RE: Rate Increase Surcharge

Dear Executive Director Bridwell:

The South Woodford Water District proposes to use the surcharge money from the recent rate increase as follows:

- Purchase a Portable Sonic Water Meter. This would allow the district to calculate the amount of water that is flowing through the main at any given time. This would be used in conjunction with dry well meter pits to allow us to measure the water flow that goes into certain areas.
- Install a DXM Transceiver Doppler Portable Flow meter to be able to grid the district. Each grid would need a dry meter box. This is a meter box that leaves 40 inches of the water main exposed to allow us to hook up the meter. This would aid in measuring the amount of water flow to each part of the district especially when looking for a leak.
- Acoustic Leak Detector
- Ground Penetrating Radar to help the district locate water mains.

Any money that might be left after that would need to go to replace water lines that have large leaks in them. We are currently in the process of purchasing radio-read meters to replace existing meters.

We anxiously await your response of approval of these proposals in order to move forward in solving existing problems.

Sincerely,

A handwritten signature in black ink, appearing to read "Barry Drury". The signature is fluid and cursive, with a large loop at the end.

Barry Drury, Chairman
Board of Commissioners
