Yellow lenses to rescue for macular degeneration

DEAR DR. ROACH: I have an elderly friend who's becoming blind from macular degeneration. After hearing of a particularly frustrating event she experienced due to vision loss, I remembered the great clarity that the yellow-lens (to reduce glare) glasses gave me, not just at night, but daytime also.

So, I sent her a pair to see if it would help, as a last-ditch effort. She called me crying, it had made such a difference! She has now had her prescription eyeglasses done with the yellow (blue-canceling?) lenses. Of course, we understand that this is just a temporary help, and won't prevent the blindness from taking its course, but it has given her much better vision for a time. -- I.L.B.

ANSWER: Age-related macular degeneration is the leading cause of vision loss in industrialized countries. It is a degeneration of the central part of the retina, called the macula, which is responsible for fine de-

tail central vision. The underlying cause is not precisely known, and the course is progressive.

I was able to find a 2002 study that confirmed that yellow or orange lenses improved contrast sensitivity in people with early age-related macular degeneration, whereas red and gray lenses worsened it. Another study suggested that the perceived benefit (the subjective experience by the person) was enhanced, but that objective improvement in vision was not actually improved much at all.

In my opinion, perceived benefit is still worth a great deal, and since there is little effective treatment for the more common "dry" form of ARMD beyond vitamins and smoking cessation, I am publishing your letter in hopes that some people will get improvements in their vision, as your friend did, from this low-cost treatment with essentially no risk of side effects.

DEAR DR. ROACH: I am a healthy 73-year-old man who has always had a large prostate. Thirty years ago, my urologist described it more like the size of an orange rather than a walnut. Despite its size, it has never given me any problems -- no UTIs, sudden urination, poor stream, waking me in the middle of the night, etc. Despite not having symptoms, about 10 years ago I was prescribed finasteride at a dose of 5 milligrams, and Rapaflo to "try to keep it in check." In 2018 I had an ultrasound done of my prostate, and it was measured at 185 grams. It was measured again recently and is now 232 grams. My PSA is always in the 3.2-3.5 range.

At what point does a prostate get too large? Should I be concerned even without having any symptoms? To his credit, my urologist discussed my surgical options, along with the related side effects. I am reluctant to do anything if it's not necessary. -- J.J.

ANSWER: The normal prostate gland is about 20 grams, and only 4% of men will develop a prostate over 100 grams. Yours is well past that, though far short of the world record of 2,410 grams.

It is striking that the size of the prostate does not well correlate with a man's symptoms. Since you have no symptoms and a low PSA level (especially considering the size), there is no indication to do anything surgically. The risk of surgical complications is higher in men with very enlarged prostate glands, so I would certainly be cautious about considering surgery.

PUBLIC NOTICE

THOROUGHbred SOLAR PROJECT

Thoroughbred Solar, LLC, is proposing to develop and construct an up to 50-megawatt solar electric generating facility on approximately 450 acres comprised of multiple tracts of undeveloped, agricultural land located south of the City of Munfordville, Hart County, Kentucky on the east side of Interstate 65 and west of the town of Rowletts.

The Project website includes information about the size and location of the proposed Project and the anticipated economic impact. Information on an upcoming public meeting is also included. The website can be accessed at www.thoroughbredsolar.com. Additionally, you may email questions to rob.kalbouss@leewardenergy.com.

Additionally, a public meeting has been scheduled for April 13, 2022 from 6:00 p.m. to 8:00 p.m. at Hart on Main, 301 Main Street, Munfordville, Kentucky 42765. The meeting format will be similar to an open house and maps of the project area will be available to review. Company representatives will be available to answer questions.

PUBLIC NOTICE

Bailey Gibson Buick GMC at 306 Happy Valley Rd. intends to obtain title for 2011 Chevrolet Cruze LT VIN #1G1PE590B7216796 belonging to Preston Wooten with last known address of 175 Woods Rd., Munfordville, KY 42765 with intent to sell for purpose of recouping storage fees and diagnostic charges. If owner does not object in writing within 14 days of last publication of this notice, Bailey Gibson Buick GMC will apply for title and sell vehicle pursuant to KRS.186A.190.

ADVERTISEMENT FOR BIDS

Caveland Environmental Authority and the Hart County Industrial Authority request bids on the following Project:

HORSE CAVE PRETREATMENT PLANT COMPOST SCREEN WITH DIESEL ENGINE, 150 TONS PER HOUR.

Sealed bids will be received at the Caveland Environmental Authority Office located at, 508 S. Dixie Highway, Cave City, KY 42127, no later than **8:00 a.m. (Local Time) on April 4-2022.** Plans and specifications for the Project are on file and may be examined at Caveland Environmental Authority.

March 28, 2022

Dear) Property Owners of Land Leased for the Project:
) Property Owners of Land Next to Land Leased for the Project:

As the attorneys representing Thoroughbred Solar, LLC (“Thoroughbred Solar”) before the Kentucky Electric Generation and Transmission Siting Board (“Board”), we are writing to inform you that Thoroughbred Solar is seeking to develop and construct an up to 50-megawatt solar electric generating facility on approximately 450 acres comprised of multiple tracts of undeveloped, agricultural land located south of the City of Munfordville, Hart County, on the east side of Interstate 65 and west of the town of Rowletts. Thoroughbred Solar will be formally submitting an application to the Board for review and approval to begin construction in 2023.

Leeward Renewable Energy Development, LLC (“Leeward Renewable”), the owner of Thoroughbred Solar, is one of the largest, most technologically advanced utility-scale solar and energy storage project development companies in the U.S. Leeward Renewable has been developing over 17,000 megawatts of utility-scale photovoltaic (PV) and energy storage projects in more than twenty states. Leeward Renewable upholds the highest standard of safety and competency required for long-term and day-to-day operations.

Thoroughbred Solar has set up a project website to provide additional information and help keep you informed of project updates. You can visit it at www.thoroughbredsolar.com.

Additionally, a public meeting has been scheduled for April 13, 2022 from 6:00 p.m. to 8:00 p.m. at Hart on Main, 301 Main Street, Munfordville Kentucky 42765. The meeting format will be similar to an open house, and maps of the project area will be available to review. Company representatives will be available to answer questions.

If you have any questions, you may contact Rob Kalbouss at rob.kalbouss@leewardenergy.com or (512) 902-8837.

Sincerely on behalf of
 Thoroughbred Solar, LLC,

Sommer L. Sheely
 Dylan F. Borchers
