SEBREE SOLAR PROJECT

About the Project

The Sebree Solar project is an innovative solar project proposed for Henderson County, Kentucky. The two phases of the project will have a capacity of up to 400 megawatts of clean, renewable, American-made energy. The Sebree Solar project is more than solar panels - it represents a significant capital investment in Kentucky. Once operational, it will create good-paying jobs and millions in additional revenue for the local community.

The project is being developed and built by subsidiaries of [NextEra Energy Resources, LLC](#), the world's largest generator of renewable energy from the wind and the sun.

COMMUNITY BENEFITS

Bringing Economic Opportunities

Solar projects generate home-grown, renewable energy, while preserving clean air and water. They can also generate significant economic benefits for the communities that host them.

Employment Opportunities
 The Sebree Solar project will create local employment opportunities, including up to 300 jobs to construct the project.

HOW TO PARTICIPATE

There are many ways you can become a part of the Sebree Solar project, because you're not alone!

If you live in Henderson County and want to help bring the benefits of this project to your community, or if you simply want to encourage the growth of solar energy development, we could use your help writing a letter of support to local and state elected officials.

If you are a landowner in or near the project area, you may be able to host solar panels or equipment on your land and enhance your income, potentially for years to come.

The biggest way you can get involved is providing your email to stay up-to-date on the latest project information.

Local Investment. Jobs. Clean Energy.
