**Case No. 2022-00131**

**Application - Exhibit 2**

**Kentucky State Board on Electric Generation and Transmission Siting  
Sebree Solar, LLC – Case No. 2021-00072  
Application – Exhibit 2**

**Filing Requirement**

*A full description of the proposed site, including a map showing the distance of the proposed site from residential neighborhoods, the nearest residential structures, schools, and public and private parks that are located within a two (2) mile radius of the proposed facility (KRS 278.706(2)(b))*

**Respondent: Jason Andrews**

The proposed Project will be capable of generating 150 megawatt alternating current (“MWac”). The Project is to be located on a site occupying approximately 1,000 acres located near the town of Robards in Henderson County, Kentucky. The Project includes approximately 400,000 photovoltaic (“PV”) solar panels, associated racking, 51 inverters and a project substation transformer that will connect via a 161 kV transmission line to the existing Reid EHV Substation owned by Big Rivers Electric Corporation. This permitted and approved 161kV transmission line will also service the Sebree Solar (“Sebree”) project, which received a Construction Certificate under Case Number 2021-00072 on February 9, 2022.

The power generated by the Project will provide clean, renewable electricity. Photovoltaic solar panels will be mounted on racking, which will fix the solar panels to the ground. Additional infrastructure at the Project will consist of central electric inverters and transformers, underground electrical collection systems, electrical collector substation, point of interconnection, switchyard, a solar meteorological station, supervisory control, data acquisition (SCADA) hardware, control house, and associated facilities, private gravel access roads with gated ingress/egress points and security fencing. A map of the Project is attached hereto and more detailed preliminary site maps are attached to the Site Assessment Report (Exhibit 12).
