Response to Staff's First Request for Information

East Kentucky Midstream herewith submits its Response to the Commission Staff's First Request for Information. A signed certification for this Response appears on the following page. Documents referenced in response to a particular Staff data request (1 PSC __) have been stamped with identifying numbers beginning with "01-__" and are attached in sequence at the end of the Response.

ID #s, from-to	Title / Description	In response to
0001 – 0016	System diagrams	1 PSC 01
0017-0029	Redacted Customer List	1 PSC 04

Respectfully submitted,

/s/ Kathryn A. Eckert

Certification

This is to certify that I have supervised the preparation of the response to the Commission Staff's Initial Request for Information to East Kentucky Midstream on behalf of the corporate respondent and that the responses are true and accurate to the best of my knowledge, information and belief after reasonable inquiry.

DATE: 9-22-22

Jack Justice, Member

Request

1. Provide a detailed diagram of the entire natural gas system under East Kentucky Midstream control, including but not limited to
 - a. All pipelines, starting from producing wells to line connections;
 - b. Any and all wells or any other gas suppliers to the pipeline;
 - c. Any and all gathering lines;
 - d. Any and all processing plants;
 - e. Any and all dehydration units;
 - f. Any and all compressor stations;
 - g. Any and all valves; and
 - h. Any and all regulator stations.
-

Response

- a. Please see diagrams labeled 01-0001 to 1-0010. 01-0001 is a diagram of the overall system; 01-0002-1-0010 shows different sections of the overall system in greater detail.
- b. Please see diagrams labeled 01-0011 to 01-0016.
- c. Please see diagrams labeled 01-0002 to 01-0010.
- d. N/A.
- e. Please see diagram 01-0002 showing the single dehydration unit at Hazel Green.
- f. These are portrayed on the diagrams as follows: 01-0002 for Hazel Green; 01-0004 for Leander; 01-0008 for Van Lear; and 01-0010 for Means.
- g. Please see diagrams labeled 01-0002 to 1-0010.
- h. Please see diagrams labeled 01-0011 to 1-0016.

Request

2. Indicate the Maximum Allowable Operating Pressure (MAOP) of all lines listed on the diagram.
-

Response

The Maximum Allowable Operating Pressure (MAOP) of all lines listed on the diagram produced in response to 1 PSC 01 are as follows:

1. C 235 lbs.
2. A1, A2, A3, A4 135 lbs.
3. A5 300 lbs.
4. J 125 lbs.
5. Frozen Field 55 lbs.
6. KZ East 135 lbs.
7. KZ West 35 lbs.

Request

3. Include a detailed written explanation of the nature gas system diagram for East Kentucky Midstream.
-

Response

Please see the response to 1 PSC 02 for the MAOP for each line. The explanation for each segment of the East Kentucky Midstream follows below.

Line A-1

Line A-1 gathers gas from only one (1) well (Troublesome Creek). It provides gas to numerous farm tap customers for Kentucky Frontier Gas (“KFG”) and East Kentucky Midstream (“EKM”). It also provides gas to the following city gates of KFG at Campton, Pine Ridge and Cliff View Resort. Gas is supplied from a combination of the C-Line and A-2 Line.

Lines A-2, A-3

For Lines A-2 and A-3, gas flows are bi-directional, with gas flow from east to west into the C-Line and from west to east into the J-Line. There are two (2) interconnects between J-Line & Line A-3 at Salyersville, KY (western most section of J-Line) and the Leander Compressor Station. Numerous producer sales meters supply gas to Lines A-2 and A-3. These lines provide gas to numerous farm tap customers served by KFG and EKM. The northern section of Line A-3 terminates (capped) at the former Jude Measurement Station.

Line A-4

This line provides gas to numerous farm tap customers served by KFG and EKM. Gas is primarily supplied by Hay Exploration. Line A-4 is not connected to Line A-3 as shown on the diagrams produced in response to 1 PSC 01. This gap was due to past strip-mining operations when the pipeline was removed and never replaced. The north end of Line A-4 is disconnected (capped) at Fallsburg, KY.

Line A-5

Prior to and since acquisition of Line A-5, on January 8, 2021, the southern portion of this pipeline has been idled as to delivery of gas supplies from Fallsburg, Kentucky (located at the junction of Lines A-4 and A-5), north to Golden Gate Meter Station. However, the rectifier system is still operational for this section of Line A-5. The remaining three (3) miles from Golden Gate to the Marathon Refinery is being utilized by Slone Energy. EKM receives gas from Slone's gathering line at Golden Gate Measurement Station and delivers these supplies to the refinery.

C-Line

Gas flows are bi-directional in the C-line, with gas flows from south (Frozen Field) to north at the interconnects of Lines A-1 & A-2, and then further north to Line KZ-East at Ezel, Kentucky. Please see the diagrams produced in response to 1 PSC 01. Gas also flows from north to south, starting at the Ezel interconnect and then travelling south. Line KZ-East receives gas supplies from the Columbia Gas Transmission ("TCO") at Means Measuring Station. Please see diagram 1-0009. This line provides gas to numerous farm tap customers served by KFG and EKM. It also provides gas to the following city gates of KFG at Jackson, Hazel Green, and Ezel.

J-Line

The J-Line interconnects with Line A-3 in two places: Salyersville, Kentucky and the Leander Compressor Station. Gas then flows Northeast to the compressor station/measurement station located at Van Lear, Kentucky. EKM's Van Lear Station interconnects with TCO. Excess local producer gas supplies, especially in the summer, are sold to TCO's markets by Southern Energy.

KZ-East

KZ-East receives gas from the West at TCO's Means Measurement Station. KZ-East also receives excess local producer gas supplies from Line-C at Ezel, Kentucky. This gas is then delivered to Means Measurement Stations, where it is sold to TCO's markets by Southern Energy. Gas supplies are delivered to the Eastern terminus of KZ-East at the city gate of West Liberty, Kentucky. West Liberty's customers are the West Liberty Municipal Gas Company and the Eastern Kentucky Correctional Complex.

KZ-West

This line provides gas to numerous farm tap customers served by KFG and EKM. Gas supplies are delivered from TCO's Means Measurement Station (from east to west). In addition, gas supplies from local producer gas are delivered from Line-C's Ezel interconnect (from east to west).

Request

4. Identify by name and location:
 - a. Any and all suppliers;
 - b. Any and all sales of purchase points; and
 - c. Any and all residential and commercial customers, whether free, farm tap, or other.
-

Response

- a. For locations, please see the corresponding diagrams produced in response to 1 PSC 01(b) and 01(h).

c. Please see the produced customer list marked 01-0017 to 01-0029.¹

¹ This attachment has been redacted pursuant to 807 KAR 5:001 Section 4(10).

Request

5. Include a list of any and all gas lines that had gas flowing at the time of the acquisition of Jefferson Gas² by East Kentucky Midstream, but now do not, and include a detailed reason for the stop of flow. This includes, but is not limited to, lines that have been terminated, abandoned, and disconnected. This shall be an ongoing request.
-

Response

Since the time of acquisition of Jefferson Gas by East Kentucky Midstream, there are no gas lines which had gas flowing at the time of acquisition but now do not.

² Jefferson Gas Transmission Company, Inc., merged with Jefferson Gas, LLC, in 2002, with Jefferson Gas, LLC, being the surviving entity. “Jefferson Gas” in this Order refers to Jefferson Gas, LLC, and its predecessor entity.

Request

6. In reference to the Pipeline and Hazardous Materials Safety Administration (PHMSA) Annual Reports from 2020 and 2021, it appears that there has been a 15-mile reduction in transmission lines. Provide a detailed explanation for this reduction and any and all documentation related to the reduction.
-

Response

East Kentucky Midstream believes this would be in reference to a 15-mile section of Line A-5, but any reduction occurred prior to acquisition by EKM. Since the date of acquisition, the 15-mile section of Line A-5 has been idled.

Request

7. Provide information regarding the limited jurisdiction certificate issued by Federal Energy Regulatory Commission to Jefferson Gas in 2009, and whether the certificate has been transferred to East Kentucky Midstream since acquisition, or if the line has been abandoned.
-

Response

The limited jurisdiction certificate mentioned above was issued when Columbia Gas abandoned certain of its assets to Jefferson Gas through sale and needed approval of the Commission for such abandonment. The Commission found that Jefferson Gas was a non-jurisdictional gatherer of natural gas that is engaged in gathering local production from its wells, as well as those owned by third-party producers, and delivering it to other entities for retail sales or to Columbia for delivery to interstate markets. For these reasons, the Commission concluded that the primary function of the facilities will be gathering once Columbia abandoned them by sale.

The functions of EKM have not changed from those of Jefferson since acquisition.

Request

8. Provide information regarding the adoption of Jefferson Gas's tariff since acquisition.

Response

Since acquisition of Jefferson Gas assets in March 2021, EKM serves the same customers as Jefferson Gas at the same contract prices that Jefferson Gas did immediately prior to acquisition. Prior to EKM's acquisition, Jefferson Gas had numerous emergency meetings in late 2020 with the Commission, Attorney General's office and customers to discuss the exigent circumstances leading to increases in prices to keep the system functioning. These increased prices, which were agreed to by Kentucky Frontier, were the contract prices adopted by EKM at acquisition and are the same contract prices currently in place.

Request

9. Provide all current rates being charged to all classes of customers, residential or commercial, and any changes to those rates, whether increase or decrease, since acquisition.
-

Response

There have been no changes to contract prices since acquisition of Jefferson Gas assets in March 2021. The current charges are as follows.

Kentucky Frontier Gas

Locally Produced Gas: First of the Month – TCO Appalachian Index + \$5.75/Dth

Transport Fee + 12% LAUF

Interstate Gas from TCO (Delivered via TCO at Means Station): Variable Rate from

Third Party Marketer (at exact cost) + \$5.75/Dth Transport Fee + 12% LAUF

West Liberty Municipality

Interstate Gas from TCO (Delivered via TCO at Means Station): First of the Month –

NYMEX Index + \$5.63/Dth

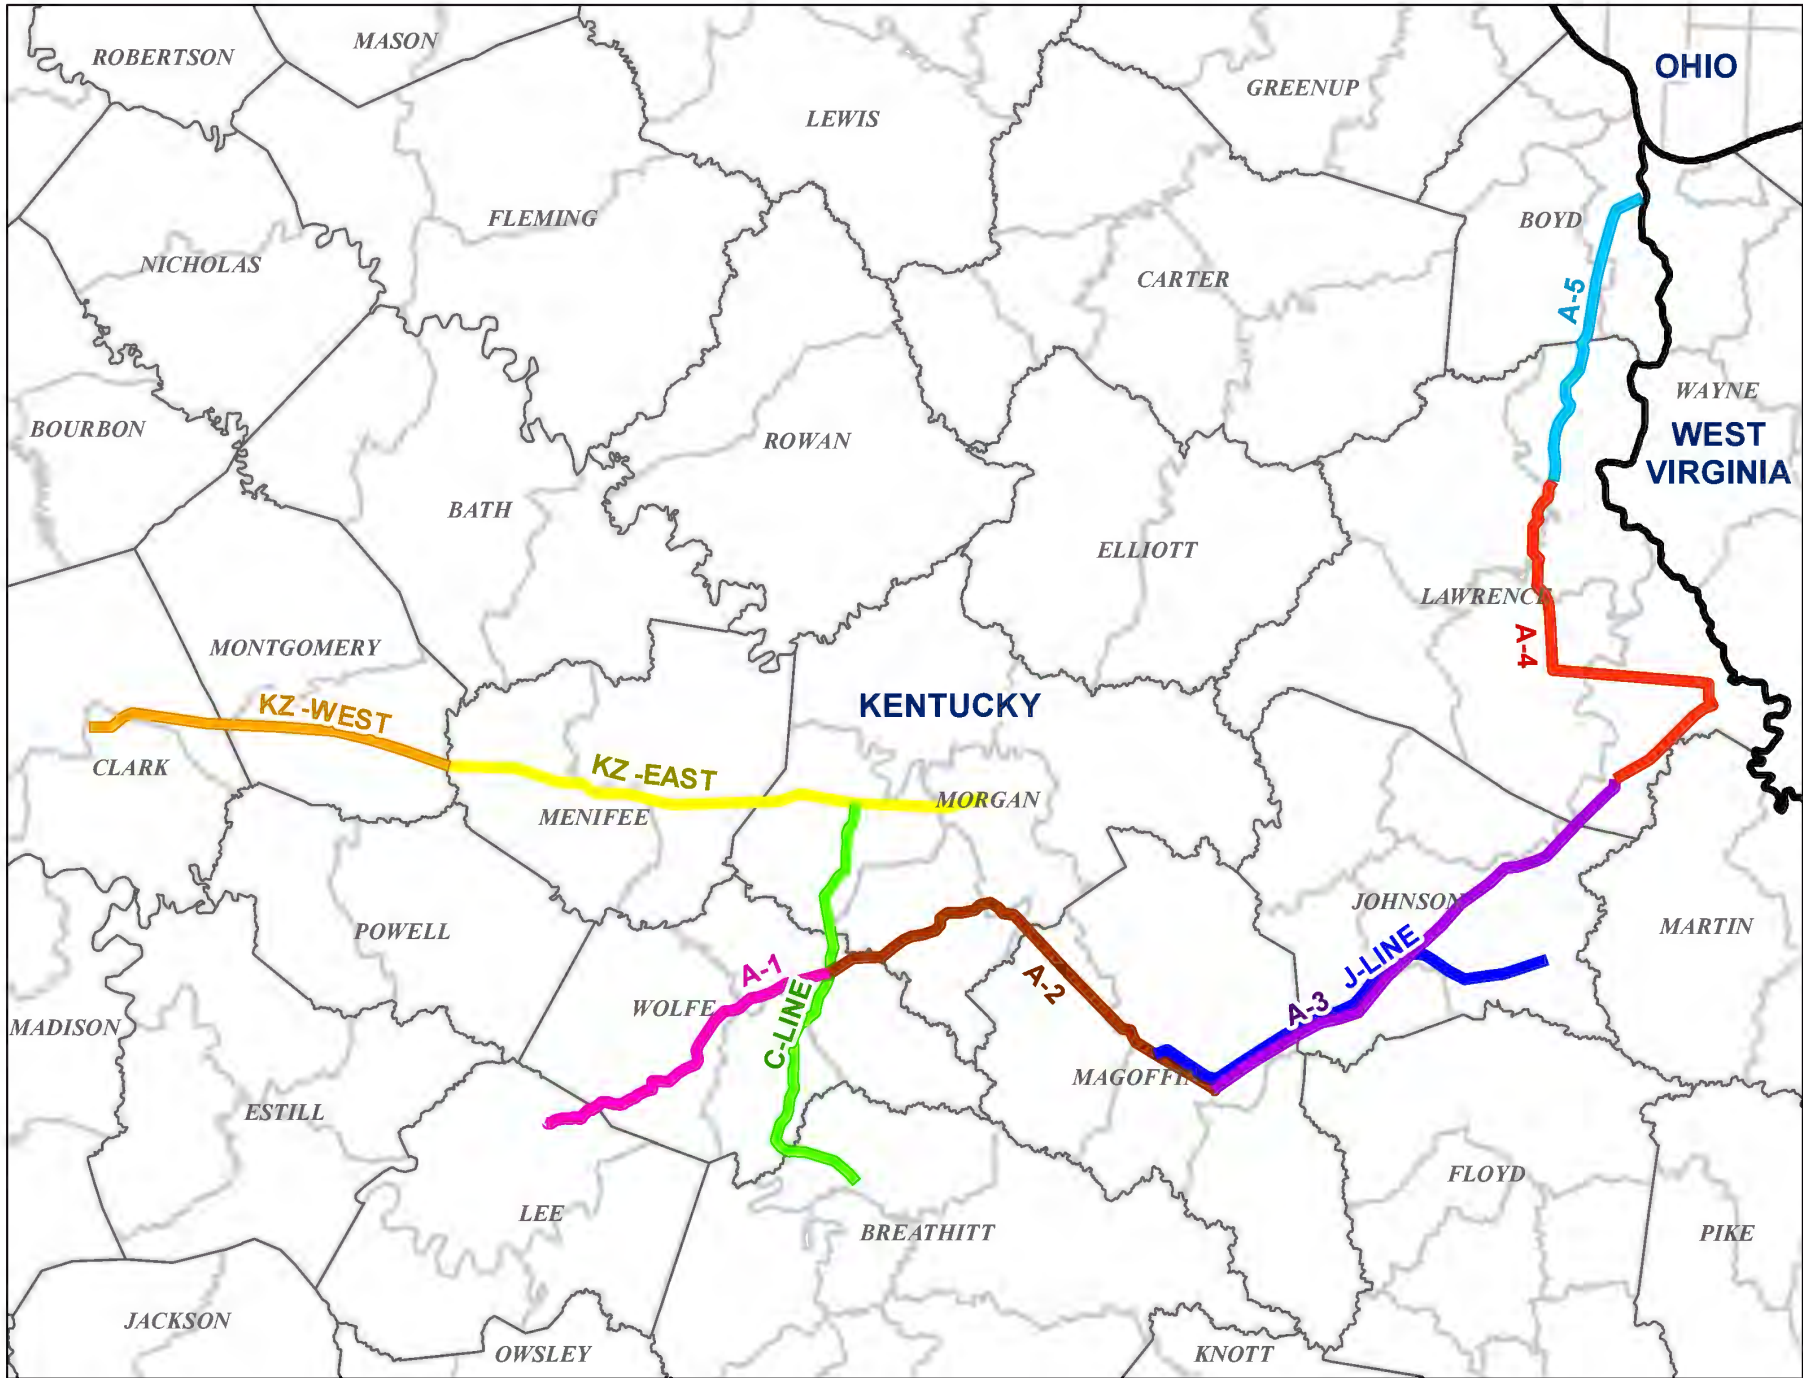

West Liberty Prison

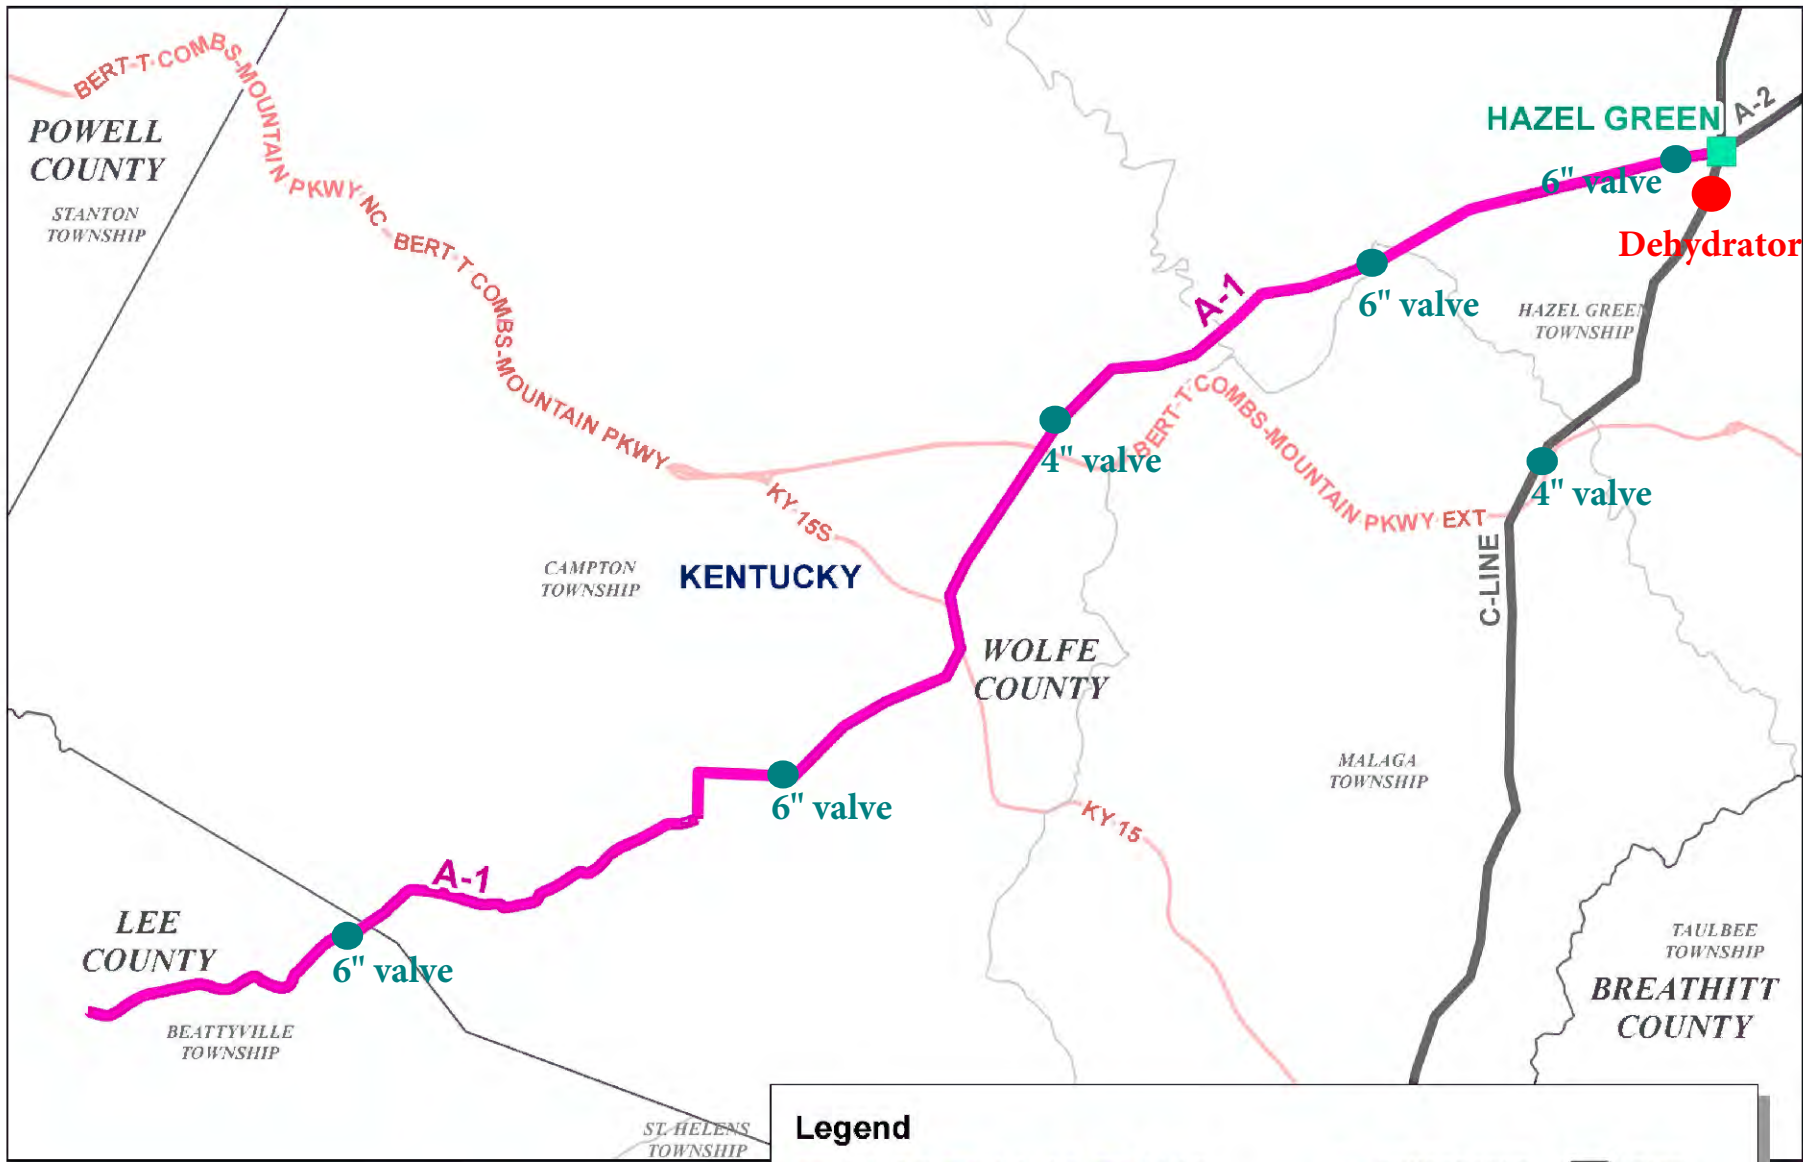

Interstate Gas from TCO (Delivered via TCO at Means Station): First of the Month –

NYMEX + \$5.13/Dth

EKM Farm Taps

TCO Appalachian Index + \$5.75/Dth + \$2.00/Dth (LAUF & Meter Reading)
