RE: Case No. 2022-00246  
Supplemental Information  
Green-Taylor Water District

Dear Ms. Bridwell:

The ARF application in the referenced case was submitted only because the Order dated August 13, 2021, in Case No. 2021-00233 required it. A change in rates was not proposed.

The Schedule of Adjusted Operations (SAO) and other documents filed with the ARF application (hereinafter referred to as Scenario 1) were prepared with the assumption that Green-Taylor's Purchased Water Adjustment (PWA) in Case No. 2022-00210 would be approved. Scenario 1 computations indicate that a general rate increase is not needed. However, the Commission found that the application in the PWA case should be denied as untimely filed and the case was closed. Green-Taylor subsequently filed a letter asking the Commission to investigate the reasonableness of its supplier's wholesale rate increase and a new case has been opened for that purpose.

Because the PWA in Case No. 2022-00210 was not approved, a new version of the SAO and other affected documents has been prepared (hereinafter referred to as Scenario 2) and is attached. Scenario 2 uses the retail and wholesale rates currently in effect and these computations also indicate that a general rate increase is not needed.

Both Scenario 1 and Scenario 2 clearly demonstrate that whatever the outcome of the wholesale rate investigation, a general rate increase is not necessary. The ARF case can progress normally and should not be impacted by the wholesale rate case.

Sincerely,

Mary Ann Larimore  
Office Manager
