5. Description of Changes in Service Territory:

As explained in this application and in the attached exhibits, KU and Kenergy have individually agreed to the requested territorial change for two parcels of land described below.

The proposed territorial boundary change serves the purposes of KRS 278.016. The change avoids the wasteful duplication of facilities, the unnecessary encumbrance of the landscape, and minimizes disputes between retail electric providers. No existing customer will change electric provider.

This proposed territorial change stems from a developer's request for electric service to a proposed oil well. The oil well is located within property owned by Nancy Geiger. While the portion of the property in question lies within KU's certified territory, Ms. Geiger's existing premise has been served by Kenergy within its certified territory for approximately 50 years. Due to the location and configuration of the current electric utility facilities in the area, the logistics for KU to serve this particular site are challenging and would cause additional costs to the oil well developer for KU to extend its facilities. Therefore it would be in the best interest of both utilities, and of the proposed customer, to change the current service area boundary to allow Kenergy to extend its nearby distribution facilities to serve the proposed oil well.

Upon review of the maps in this area, in preparing to make this filing, KU and Kenergy realized that the Commission's certified territorial line (as interpreted from Quadrant 17-G-1) did not match the existing property lines of 196 Field Road in terms of which utility is already providing service there. It appears that KU has been inadvertently serving outside of its respective certified territory. Therefore, KU and Kenergy have also agreed to propose to move the official boundary line to match the existing property lot lines of 196 Field Road.

In summary, KU requests to relinquish its certified electric service territory that includes GIS Points 6, 7, 8 depicted on the attached site map. KU further requests to acquire certified electric service territory to include GIS Points 1 through 5 on the site map. No customers will change electric providers under this proposal.

The territorial maps and other attachments provided constitute the entire agreement between KU and Kenergy.

6. Agreement and Maps:

Application Exhibit 1 of this filing includes the summary list identifying KU and Kenergy personnel familiar with the specifics of the facilities available, the reason for the change (purposes served under KRS 278.016) and agreement signed by both parties for the properties involved. Application Exhibit 2 includes the signed territorial (quadrant) map. Application Exhibit 3 includes the signed detailed site map and includes the locations of KU and Kenergy electric distribution facilities.

WHEREFORE, KU hereby requests, pursuant to KRS 278.018, that the Commission enter an order approving the updates to the Quadrant Map to reflect the current requested service territory changes and the agreement between KU and Kenergy.

Dated: September 16, 2022

6. The reason(s) for the boundary change (realignment with lot/property lines, closest utility (give details), it is the least cost of providing service to the customer(s), etc.):

Promotes orderly development and matching with property lines

7. How does this boundary change promote the purposes of KRS 278.016? (check all that apply)

Promotes the orderly development of retail electric service

Avoids wasteful duplication of facilities

Avoids unnecessary encumbering of the landscape

Prevents waste of materials and natural resources

Is necessary for the public convenience and necessity

Minimizes disputes between retail electric suppliers which may result in inconvenience, diminished efficiency, and higher cost to the consumer

8. Will any retail customer change electric supplier as the result of this boundary change?

No (Check this if no retail customers were receiving service in affected territory prior to the boundary change.)

Yes (If yes, provide the information on Attachment 1 for each customer affected.)

a PPL company

Agreement

Kentucky Utilities Company (“KU”) and Kenergy Corp. (“Kenergy”) hereby agree to a territorial boundary change. The boundary line includes an oil well and an existing residential home, both of which are located in Union County, Kentucky.

Kenergy has existing facilities in the immediate area of the oil well and is able to provide electrical service, which avoids wasteful duplication of facilities and unnecessary encumbering of the landscape.

KU has been providing electrical service to the home at 196 Field Road for approximately 25 years. The companies discovered this anomaly, while preparing this filing, and seek to rectify the territorial boundary.

No customers will change providers.
