5. Description of Changes in Service Territory:

As explained in this application and in the attached exhibits, KU and Shelby Energy have individually agreed to the requested territorial change for numerous residential home parcels of land within the new Discovery Point Residential Subdivision described below. The proposed

territorial boundary change serves the purposes of KRS 278.016. The change avoids the wasteful duplication of facilities, the unnecessary encumbrance of the landscape, and minimizes disputes between retail electric providers. No existing customer will change electric provider.

When the two utilities learned of the new residential subdivision to be constructed in the area in question, KU and Shelby Energy engineering staffs together reviewed and studied the planned subdivision layout. As is normal protocol in situations where a new development spans across two utilities' service territories, the companies agreed to redraw the certified service territory boundary line in order to efficiently and\ fairly align with the new property lines. The proposed boundary line will allow each utility to prudently extend its existing electrical distribution system in order to reliably serve the residential development.

The territorial maps and other attachments provided constitute the entire agreement between KU and Shelby Energy.

6. Agreement and Maps:

Application Exhibit 1 of this filing includes the summary list identifying KU and Shelby Energy personnel familiar with the specifics of the facilities available, the reason for the proposed change (purposes served under KRS 278.016), and the agreement signed by both parties for the properties involved. Application Exhibit 2 includes the signed territorial (quadrant) map. Application Exhibit 3 includes the signed detailed site map and includes the locations of KU and Shelby Energy distribution facilities.

WHEREFORE, KU hereby requests, pursuant to KRS 278.018, that the Commission enter an order approving the updates to the Quadrant Map to reflect the current requested service territory changes and the agreement between KU and Shelby Energy.

Dated: September 12, 2022
