

In the Matter of:

Unaccounted Water Loss for Western Fleming Water District (QUIIP)

Case 2022-00305

Upon conference call with PSC staff on November 21, 2024, all parties of Western Fleming County Water District Board and staff are aware of the significance of the Qualified Infrastructure Improvement Plan.

The Board discussed several plans after the conference call concluded, some of which have already been implemented in an effort to immediately reduce unaccounted for water loss.

We will have the QUIIP turned in by November 27, 2024.

Thank you,

Alison Hazelrigg
