

WESTERN FLEMING COUNTY WATER DISTRICT

CASE 2022-00305

UNACCOUNTED FOR WATER LOSS REDUCTION PLAN (QIIP)

Western Fleming County Water District plans to reduce unaccounted for water loss with the installation of new cellular water meters. These meters will allow staff to be made aware of water leaks within a 24 hour period. The estimated cost of meters is \$144,477.90 plus installation. Installation cost will be \$25 per meter.

Western Fleming County Water District plans to replace to replace lines through out the system. The total cost of the lines to be replaced are an estimated \$2,780,000.

With quicker leak detection we are anticipating reducing our water loss to less that 10% per month.
