

Beech Grove Water System

445 State Route 56 N

Calhoun, KY 42327

(270) 273-5738

Case No. 2022-000318

Dear Public Service Commission,

In response to Beech Grove Water's letter for reimbursement filed June 15, 2026. The commission asked Beech Grove Water to explain how the leaks on Hunt Road fall outside the ordinary leak repairs that would be paid out of the district's operating and maintenance account.

This leak came toward the end of a series of leaks being identified and repaired by the water system. Customers were reporting lower than normal water pressure. The leak was eventually found to be coming from under the road. This meant that the repairs would require a road bore. Beech Grove Water had to obtain services outside the system in order to complete the repair. We do not own a road bore machine. Therefore, was unable to be completed the job in house. The extent of the cost and the resources it took to make the repairs is why we have requested to use the surcharge funds.

Thank you for your time and consideration on this matter.

Sincerely,

*Jennifer Ferguson*
