COMMONWEALTH OF KENTUCKY BEFORE THE PUBLIC SERVICE COMMISSION

IN THE MATTER OF THE ADJUSTMENT OF ELECTRIC RATES OF DUKE ENERGY KENTUCKY, INC.

CASE NO. 2022-00372

FILING REQUIREMENTS

VOLUME 15

Duke Energy Kentucky, Inc. Case No. 2022-00372 Forecasted Test Period Filing Requirements Table of Contents

| Vol.# | Tab # | Filing Requirement | Description | Sponsoring Witness |
|----------|-------|-----------------------|---|-------------------------|
| 1 | 1 | KRS 278.180 | 30 days' notice of rates to PSC. | Amy B. Spiller |
| 1 | 2 | 807 KAR 5:001 | The original and 10 copies of application plus | Amy B. Spiller |
| | | Section 7(1) | copy for anyone named as interested party. | 7 1 |
| 1 | 3 | 807 KAR 5:001 | (a) Amount and kinds of stock authorized. | Christopher R. Bauer |
| | | Section 12(2) | (b) Amount and kinds of stock issued and | Danielle L. Weatherston |
| | | | outstanding. | |
| | | | (c) Terms of preference of preferred stock | |
| | | | whether cumulative or participating, or on | |
| | | | dividends or assets or otherwise. | |
| | | | (d) Brief description of each mortgage on | |
| | | | property of applicant, giving date of execution, | |
| | | | name of mortgagor, name of mortgagee, or trustee, | |
| | | | amount of indebtedness authorized to be secured | |
| | | | thereby, and the amount of indebtedness actually | |
| | | | secured, together with any sinking fund | |
| | | | provisions. (e) Amount of bonds authorized, and amount | |
| | | | issued, giving the name of the public utility which | |
| | | | issued the same, describing each class separately, | |
| | | | and giving date of issue, face value, rate of | |
| | | | interest, date of maturity and how secured, | |
| | | | together with amount of interest paid thereon | |
| | | | during the last fiscal year. | |
| | | | (f) Each note outstanding, giving date of | |
| | | | issue, amount, date of maturity, rate of interest, in | |
| | | | whose favor, together with amount of interest paid | |
| | | | thereon during the last fiscal year. | |
| | | | (g) Other indebtedness, giving same by | |
| | | | classes and describing security, if any, with a brief | |
| | | | statement of the devolution or assumption of any | |
| | | | portion of such indebtedness upon or by person or | |
| | | | corporation if the original liability has been | |
| | | | transferred, together with amount of interest paid | |
| | | | thereon during the last fiscal year. | |
| | | | (h) Rate and amount of dividends paid during the five (5) previous fiscal years, and the amount | |
| | | | of capital stock on which dividends were paid each | |
| | | | year. | |
| | | | (i) Detailed income statement and balance | |
| | | | sheet. | |
| 1 | 4 | 807 KAR 5:001 | Full name, mailing address, and electronic mail | Amy B. Spiller |
| | | Section 14(1) | address of applicant and reference to the particular | , 1 |
| | | | provision of law requiring PSC approval. | |
| 1 | 5 | 807 KAR 5:001 | If a corporation, the applicant shall identify in the | Amy B. Spiller |
| | | Section 14(2) | application the state in which it is incorporated and | |
| | | | the date of its incorporation, attest that it is | |
| | | | currently in good standing in the state in which it | |
| | | | is incorporated, and, if it is not a Kentucky | |
| | | | corporation, state if it is authorized to transact | |
| <u> </u> | | | business in Kentucky. | |

| 1 | 6 | 807 KAR 5:001 | If a limited liability company, the applicant shall | Amy B. Spiller |
|---|----|----------------------------|--|----------------------------|
| 1 | | Section 14(3) | identify in the application the state in which it is | I miy B. Spiner |
| | | | organized and the date on which it was organized, | |
| | | | attest that it is in good standing in the state in | |
| | | | which it is organized, and, if it is not a Kentucky | |
| | | | limited liability company, state if it is authorized | |
| | | | to transact business in Kentucky. | |
| 1 | 7 | 807 KAR 5:001 | If the applicant is a limited partnership, a certified | Amy B. Spiller |
| | | Section 14(4) | copy of its limited partnership agreement and all | |
| | | | amendments, if any, shall be annexed to the | |
| | | | application, or a written statement attesting that its partnership agreement and all amendments have | |
| | | | been filed with the commission in a prior | |
| | | | proceeding and referencing the case number of the | |
| | | | prior proceeding. | |
| 1 | 8 | 807 KAR 5:001 | Reason adjustment is required. | Amy B. Spiller |
| | | Section 16 | | Sarah E. Lawler |
| | | (1)(b)(1) | | |
| 1 | 9 | 807 KAR 5:001 | Certified copy of certificate of assumed name | Amy B. Spiller |
| | | Section 16 | required by KRS 365.015 or statement that | |
| 1 | 10 | (1)(b)(2) 807 KAR 5:001 | certificate not necessary. | Bruce L. Sailers |
| 1 | 10 | Section 16 | New or revised tariff sheets, if applicable in a format that complies with 807 KAR 5:011 with an | Bruce L. Sallers |
| | | (1)(b)(3) | effective date not less than thirty (30) days from | |
| | | (1)(0)(3) | the date the application is filed | |
| 1 | 11 | 807 KAR 5:001 | Proposed tariff changes shown by present and | Bruce L. Sailers |
| | 1 | Section 16 | proposed tariffs in comparative form or by | |
| | | (1)(b)(4) | indicating additions in italics or by underscoring | |
| | | | and striking over deletions in current tariff. | |
| 1 | 12 | 807 KAR 5:001 | A statement that notice has been given in | Amy B. Spiller |
| | | Section 16 | compliance with Section 17 of this administrative | |
| 1 | 12 | (1)(b)(5) 807 KAR 5:001 | regulation with a copy of the notice. | Amy D. Cmillon |
| 1 | 13 | Section 16(2) | If gross annual revenues exceed \$5,000,000, written notice of intent filed at least 30 days, but | Amy B. Spiller |
| | | Section 10(2) | not more than 60 days prior to application. Notice | |
| | | | shall state whether application will be supported | |
| | | | by historical or fully forecasted test period. | |
| 1 | 14 | 807 KAR 5:001 | Notice given pursuant to Section 17 of this | Amy B. Spiller |
| | | Section 16(3) | administrative regulation shall satisfy the | |
| | | | requirements of 807 KAR 5:051, Section 2. | |
| 1 | 15 | 807 KAR 5:001 | The financial data for the forecasted period shall | Grady "Tripp" S. Carpenter |
| | | Section 16(6)(a) | be presented in the form of pro forma adjustments | |
| 1 | 16 | 807 KAR 5:001 | to the base period. Forecasted adjustments shall be limited to the | Grady "Tripp" S. Carpenter |
| 1 | 10 | Section 16(6)(b) | twelve (12) months immediately following the | Lisa D. Steinkuhl |
| | | | suspension period. | Huyen C. Dang |
| 1 | 17 | 807 KAR 5:001 | Capitalization and net investment rate base shall | Lisa D. Steinkuhl |
| | | Section 16(6)(c) | be based on a thirteen (13) month average for the | |
| | | | forecasted period. | |
| 1 | 18 | 807 KAR 5:001 | After an application based on a forecasted test | Grady "Tripp" S. Carpenter |
| | | Section 16(6)(d) | period is filed, there shall be no revisions to the | |
| | | | forecast, except for the correction of mathematical | |
| | | | errors, unless the revisions reflect statutory or | |
| | | | regulatory enactments that could not, with | |
| | | | reasonable diligence, have been included in the forecast on the date it was filed. There shall be no | |
| | | | revisions filed within thirty (30) days of a | |
| | | | scheduled hearing on the rate application. | |
| L | | 1 | out and application. | <u> </u> |

| 1 | 19 | 807 KAR 5:001 Section 16(6)(e) | The commission may require the utility to prepare an alternative forecast based on a reasonable number of changes in the variables, assumptions, and other factors used as the basis for the utility's forecast. | Grady "Tripp" S. Carpenter |
|---|----|-----------------------------------|--|--|
| 1 | 20 | 807 KAR 5:001 Section 16(6)(f) | The utility shall provide a reconciliation of the rate base and capital used to determine its revenue requirements. | Lisa D. Steinkuhl |
| 1 | 21 | 807 KAR 5:001 Section 16(7)(a) | Prepared testimony of each witness supporting its application including testimony from chief officer in charge of Kentucky operations on the existing programs to achieve improvements in efficiency and productivity, including an explanation of the purpose of the program. | All Witnesses |
| 1 | 22 | 807 KAR 5:001 Section 16(7)(b) | Most recent capital construction budget containing at minimum 3 year forecast of construction expenditures. | Grady "Tripp" S. Carpenter Dominic "Nick" J. Melillo William C. Luke |
| 1 | 23 | 807 KAR 5:001 Section 16(7)(c) | Complete description, which may be in prefiled testimony form, of all factors used to prepare forecast period. All econometric models, variables, assumptions, escalation factors, contingency provisions, and changes in activity levels shall be quantified, explained, and properly supported. | Grady "Tripp" S. Carpenter |
| 1 | 24 | 807 KAR 5:001 Section 16(7)(d) | Annual and monthly budget for the 12 months preceding filing date, base period and forecasted period. | Grady "Tripp" S. Carpenter |
| 1 | 25 | 807 KAR 5:001 Section 16(7)(e) | Attestation signed by utility's chief officer in charge of Kentucky operations providing: 1. That forecast is reasonable, reliable, made in good faith and that all basic assumptions used have been identified and justified; and 2. That forecast contains same assumptions and methodologies used in forecast prepared for use by management, or an identification and explanation for any differences; and 3. That productivity and efficiency gains are included in the forecast. | Amy B. Spiller |
| 1 | 26 | 807 KAR 5:001 Section 16(7)(f) | For each major construction project constituting 5% or more of annual construction budget within 3 year forecast, following information shall be filed: 1. Date project began or estimated starting date; 2. Estimated completion date; 3. Total estimated cost of construction by year exclusive and inclusive of Allowance for Funds Used During construction ("AFUDC") or Interest During construction Credit; and 4. Most recent available total costs incurred exclusive and inclusive of AFUDC or Interest During Construction Credit. | Grady "Tripp" S. Carpenter Dominic "Nick" J. Melillo William C. Luke |
| 1 | 27 | 807 KAR 5:001 Section 16(7)(g) | For all construction projects constituting less than 5% of annual construction budget within 3 year forecast, file aggregate of information requested in paragraph (f) 3 and 4 of this subsection. | Grady "Tripp" S. Carpenter Dominic "Nick" J. Melillo William C. Luke |
| - | | • | • | • |

| | 1 | 28 | 807 KAR 5:001 Section 16(7)(h) | Financial forecast for each of 3 forecasted years included in capital construction budget supported by underlying assumptions made in projecting results of operations and including the following information: 1. Operating income statement (exclusive of dividends per share or earnings per share); 2. Balance sheet; 3. Statement of cash flows; 4. Revenue requirements necessary to support the forecasted rate of return; 5. Load forecast including energy and demand | Grady "Tripp" S. Carpenter Max W. McClellan John D. Swez |
|---------|-----|----|-----------------------------------|---|--|
| | | | | (electric); 6. Access line forecast (telephone); | |
| | | | | 7. Mix of generation (electric); 8. Mix of gas supply (gas); | |

| 8 | 39 | 807 KAR 5:001 Section 16(7)(s) | Summary of latest depreciation study with schedules itemized by major plant accounts, except that telecommunications utilities adopting PSC's average depreciation rates shall identify current and base period depreciation rates used by major plant accounts. If information has been filed in another PSC case, refer to that case's number and style. | John J. Spanos |
|---|----|-----------------------------------|---|---------------------|
| 8 | 40 | 807 KAR 5:001 Section 16(7)(t) | List all commercial or in-house computer software, programs, and models used to develop schedules and work papers associated with application. Include each software, program, or model; its use; identify the supplier of each; briefly describe software, program, or model; specifications for computer hardware and operating system required to run program | Lisa D. Steinkuhl |
| 8 | 41 | 807 KAR 5:001 Section 16(7)(u) | If utility had any amounts charged or allocated to it by affiliate or general or home office or paid any monies to affiliate or general or home office during the base period or during previous 3 calendar years, file: 1. Detailed description of method of calculation and amounts allocated or charged to utility by affiliate or general or home office for each allocation or payment; 2. method and amounts allocated during base period and method and estimated amounts to be allocated during forecasted test period; 3. Explain how allocator for both base and forecasted test period was determined; and 4. All facts relied upon, including other regulatory approval, to demonstrate that each amount charged, allocated or paid during base period is reasonable. | Jeffrey R. Setser |
| 9 | 42 | 807 KAR 5:001 Section 16(7)(v) | If gas, electric or water utility with annual gross revenues greater than \$5,000,000, cost of service study based on methodology generally accepted in industry and based on current and reliable data from single time period. | James E. Ziolkowski |
| 9 | 43 | 807 KAR 5:001 Section 16(7)(w) | Local exchange carriers with fewer than 50,000 access lines need not file cost of service studies, except as specifically directed by PSC. Local exchange carriers with more than 50,000 access lines shall file: 1. Jurisdictional separations study consistent with Part 36 of the FCC's rules and regulations; and 2. Service specific cost studies supporting pricing of services generating annual revenue greater than \$1,000,000 except local exchange access: a. Based on current and reliable data from single time period; and b. Using generally recognized fully allocated, embedded, or incremental cost principles. | N/A |
| 9 | 44 | 807 KAR 5:001 Section 16(8)(a) | Jurisdictional financial summary for both base and forecasted periods detailing how utility derived amount of requested revenue increase. | Lisa D. Steinkuhl |

| 9 | 45 | 807 KAR 5:001 Section 16(8)(b) | Jurisdictional rate base summary for both base and forecasted periods with supporting schedules which include detailed analyses of each component of the rate base. | Lisa D. Steinkuhl Huyen C. Dang Grady "Tripp" S. Carpenter John R. Panizza James E. Ziolkowski Danielle L. Weatherston |
|---|----|-----------------------------------|--|---|
| 9 | 46 | 807 KAR 5:001 Section 16(8)(c) | Jurisdictional operating income summary for both base and forecasted periods with supporting schedules which provide breakdowns by major account group and by individual account. | Lisa D. Steinkuhl |
| 9 | 47 | 807 KAR 5:001 Section 16(8)(d) | Summary of jurisdictional adjustments to operating income by major account with supporting schedules for individual adjustments and jurisdictional factors. | Lisa D. Steinkuhl Grady "Tripp" S. Carpenter Huyen C. Dang James E. Ziolkowski |
| 9 | 48 | 807 KAR 5:001 Section 16(8)(e) | Jurisdictional federal and state income tax summary for both base and forecasted periods with all supporting schedules of the various components of jurisdictional income taxes. | John R. Panizza |
| 9 | 49 | 807 KAR 5:001 Section 16(8)(f) | Summary schedules for both base and forecasted periods (utility may also provide summary segregating items it proposes to recover in rates) of organization membership dues; initiation fees; expenditures for country club; charitable contributions; marketing, sales, and advertising; professional services; civic and political activities; employee parties and outings; employee gifts; and rate cases. | Lisa D. Steinkuhl |
| 9 | 50 | 807 KAR 5:001 Section 16(8)(g) | Analyses of payroll costs including schedules for wages and salaries, employee benefits, payroll taxes, straight time and overtime hours, and executive compensation by title. | Lisa D. Steinkuhl Jacob J. Stewart |
| 9 | 51 | 807 KAR 5:001 Section 16(8)(h) | Computation of gross revenue conversion factor for forecasted period. | Lisa D. Steinkuhl |
| 9 | 52 | 807 KAR 5:001 Section 16(8)(i) | Comparative income statements (exclusive of dividends per share or earnings per share), revenue statistics and sales statistics for 5 calendar years prior to application filing date, base period, forecasted period, and 2 calendar years beyond forecast period. | Danielle L. Weatherston Grady "Tripp" S. Carpenter |
| 9 | 53 | 807 KAR 5:001 Section 16(8)(j) | Cost of capital summary for both base and forecasted periods with supporting schedules providing details on each component of the capital structure. | Christopher R. Bauer |
| 9 | 54 | 807 KAR 5:001 Section 16(8)(k) | Comparative financial data and earnings measures for the 10 most recent calendar years, base period, and forecast period. | Huyen C. Dang Danielle L. Weatherston Christopher R. Bauer Grady "Tripp" S. Carpenter |
| 9 | 55 | 807 KAR 5:001 Section 16(8)(1) | Narrative description and explanation of all proposed tariff changes. | Bruce L. Sailers |
| 9 | 56 | 807 KAR 5:001 Section 16(8)(m) | Revenue summary for both base and forecasted periods with supporting schedules which provide detailed billing analyses for all customer classes. | Bruce L. Sailers |
| 9 | 57 | 807 KAR 5:001 Section 16(8)(n) | Typical bill comparison under present and proposed rates for all customer classes. | Bruce L. Sailers |
| 9 | 58 | 807 KAR 5:001 Section 16(9) | The commission shall notify the applicant of any deficiencies in the application within thirty (30) days of the application's submission. An application shall not be accepted for filing until the utility has cured all noted deficiencies. | Sarah E. Lawler |

| 9 | 59 | 807 KAR 5:001 Section 16(10) | Request for waivers from the requirements of this section shall include the specific reasons for the request. The commission shall grant the request upon good cause shown by the utility. | N/A |
|---|----|----------------------------------|--|----------------|
| 9 | 60 | 807 KAR 5:001 Section (17)(1) | (1) Public postings. (a) A utility shall post at its place of business a copy of the notice no later than the date the application is submitted to the commission. (b) A utility that maintains a Web site shall, within five (5) business days of the date the application is submitted to the commission, post on its Web sites: 1. A copy of the public notice; and 2. A hyperlink to the location on the commission's Web site where the case documents are available. (c) The information required in paragraphs (a) and (b) of this subsection shall not be removed until the commission issues a final decision on the application. | Amy B. Spiller |
| 9 | 61 | 807 KAR 5:001 Section 17(2) | (2) Customer Notice. (a) If a utility has twenty (20) or fewer customers, the utility shall mail a written notice to each customer no later than the date on which the application is submitted to the commission. (b) If a utility has more than twenty (20) customers, it shall provide notice by: 1. Including notice with customer bills mailed no later than the date the application is submitted to the commission; 2. Mailing a written notice to each customer no later than the date the application is submitted to the commission; 3. Publishing notice once a week for three (3) consecutive weeks in a prominent manner in a newspaper of general circulation in the utility's service area, the first publication to be made no later than the date the application is submitted to the commission; or 4. Publishing notice in a trade publication or newsletter delivered to all customers no later than the date the application is submitted to the commission. (c) A utility that provides service in more than one (1) county may use a combination of the notice methods listed in paragraph (b) of this subsection. | Amy B. Spiller |

| 9 | 62 | 807 KAR 5:001 | (3) Proof of Notice. A utility shall file with the | Amy B. Spiller |
|---|----|---------------|---|----------------|
| | | Section 17(3) | commission no later than forty-five (45) days from | |
| | | | the date the application was initially submitted to | |
| | | | the commission: | |
| | | | (a) If notice is mailed to its customers, an | |
| | | | affidavit from an authorized representative of the | |
| | | | utility verifying the contents of the notice, that | |
| | | | notice was mailed to all customers, and the date of | |
| | | | the mailing; | |
| | | | (b) If notice is published in a newspaper of | |
| | | | general circulation in the utility's service area, an | |
| | | | affidavit from the publisher verifying the contents | |
| | | | of the notice, that the notice was published, and | |
| | | | the dates of the notice's publication; or | |
| | | | (c) If notice is published in a trade publication | |
| | | | or newsletter delivered to all customers, an | |
| | | | affidavit from an authorized representative of the | |
| | | | utility verifying the contents of the notice, the | |
| | | | mailing of the trade publication or newsletter, that | |
| | | | notice was included in the publication or | |
| | | | newsletter, and the date of mailing. | |

| | 1 | I 00= | | |
|---|----|---------------|--|------------------|
| 9 | 63 | 807 KAR 5:001 | (4) Notice Content. Each notice issued in accordance | Bruce L. Sailers |
| | | Section 17(4) | with this section shall contain: | |
| | | | (a) The proposed effective date and the date the proposed rates are expected to be filed with the | |
| | | | commission; | |
| | | | (b) The present rates and proposed rates for each | |
| | | | customer classification to which the proposed rates | |
| | | | will apply; | |
| | | | (c) The amount of the change requested in both | |
| | | | dollar amounts and percentage change for each | |
| | | | customer classification to which the proposed rates | |
| | | | will apply; | |
| | | | (d) The amount of the average usage and the | |
| | | | effect upon the average bill for each customer | |
| | | | classification to which the proposed rates will apply, | |
| | | | except for local exchange companies, which shall | |
| | | | include the effect upon the average bill for each customer classification for the proposed rate change | |
| | | | in basic local service; | |
| | | | (e) A statement that a person may examine this | |
| | | | application at the offices of (utility name) located at | |
| | | | (utility address); | |
| | | | (f) A statement that a person may examine this | |
| | | | application at the commission's offices located at 211 | |
| | | | Sower Boulevard, Frankfort, Kentucky, Monday | |
| | | | through Friday, 8:00 a.m. to 4:30 p.m., or through the | |
| | | | commission's Web site at http://psc.ky.gov; | |
| | | | (g) A statement that comments regarding the | |
| | | | application may be submitted to the Public Service | |
| | | | Commission through its Web site or by mail to Public Service Commission, Post Office Box 615, Frankfort, | |
| | | | Kentucky 40602; | |
| | | | (h) A statement that the rates contained in this | |
| | | | notice are the rates proposed by (utility name) but | |
| | | | that the Public Service Commission may order rates | |
| | | | to be charged that differ from the proposed rates | |
| | | | contained in this notice; | |
| | | | (i) A statement that a person may submit a timely | |
| | | | written request for intervention to the Public Service | |
| | | | Commission, Post Office Box 615, Frankfort, | |
| | | | Kentucky 40602, establishing the grounds for the | |
| | | | request including the status and interest of the party; and | |
| | | | (j) A statement that if the commission does not | |
| | | | receive a written request for intervention within thirty | |
| | | | (30) days of initial publication or mailing of the | |
| | | | notice, the commission may take final action on the | |
| | | | application. | |
| 9 | 64 | 807 KAR 5:001 | (5) Abbreviated form of notice. Upon written | N/A |
| | | Section 17(5) | request, the commission may grant a utility | |
| | | | permission to use an abbreviated form of | |

I. INTRODUCTION

- 1 O. PLEASE STATE YOUR NAME AND ADDRESS.
- 2 A. My name is John J. Spanos. My business address is 207 Senate Avenue, Camp Hill,
- 3 Pennsylvania, 17011.
- 4 Q. ARE YOU ASSOCIATED WITH ANY FIRM?
- 5 A. Yes. I am associated with the firm of Gannett Fleming Valuation and Rate
- 6 Consultants, LLC (Gannett Fleming).
- 7 Q. HOW LONG HAVE YOU BEEN ASSOCIATED WITH GANNETT
- **FLEMING?**
- 9 A. I have been associated with the firm since June 1986.
- 10 O. WHAT IS YOUR POSITION WITH THE FIRM?
- 11 A. I am President.
- 12 O. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS CASE?
- 13 A. I am testifying on behalf of Duke Energy Kentucky, Inc. (Duke Energy Kentucky
- or the Company).
- 15 Q. PLEASE STATE YOUR QUALIFICATIONS.
- 16 A. I have over 36 years of depreciation experience which includes giving expert
- testimony in more than 400 cases before 41 regulatory commissions in the United
- States and Canada, including this Commission. The cases include depreciation
- studies in the electric, gas, water, wastewater and pipeline industries. In addition to
- 20 the cases where I have submitted testimony, I have supervised in over 700 other
- depreciation or valuation assignments. Please refer to Appendix A for additional
- 22 information on my qualifications, which includes further information with respect

- to my work history, case experience, and my leadership in the Society of
- 2 Depreciation Professionals.
- 3 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS
- 4 **PROCEEDING?**
- 5 A. My testimony will support and explain the depreciation study conducted under my
- 6 direction and supervision for the electric and common utility plant of Duke Energy
- 7 Kentucky, which was prepared in satisfaction of Filing Requirement (FR) 16(7)(s).
- 8 The study represents all electric and common plant assets.

II. <u>DISCUSSION</u>

- 9 Q. PLEASE DEFINE THE CONCEPT OF DEPRECIATION.
- 10 A. Depreciation refers to the loss in service value not restored by current maintenance,
- incurred in connection with the consumption or prospective retirement of utility
- 12 plant in the course of service from causes which are known to be in current
- operation, against which the Company is not protected by insurance. Among the
- causes to be given consideration are wear and tear, decay, action of the elements,
- obsolescence, changes in the art, changes in demand and the requirements of public
- authorities.
- 17 Q. PLEASE IDENTIFY ATTACHMENT JS-1.
- A. Attachment JS-1 is a report entitled, "2021 Depreciation Study Calculated Annual
- Depreciation Accruals Related to Electric and Common Plant as of December 31,
- 20 2021." This report sets forth the results of my depreciation study for Duke Energy
- 21 Kentucky.

- Q. IS ATTACHMENT JS-1 A TRUE AND ACCURATE COPY OF YOUR
 DEPRECIATION STUDY?
- 3 A. Yes.
- 4 Q. DOES ATTACHMENT JS-1 ACCURATELY PORTRAY THE RESULTS
- 5 OF YOUR DEPRECIATION STUDY AS OF DECEMBER 31, 2021?
- 6 A. Yes.
- 7 Q. WHAT WAS THE PURPOSE OF YOUR DEPRECIATION STUDY?
- A. The purpose of the depreciation study was to estimate the annual depreciation accruals related to electric and common plant in service for ratemaking purposes and determine appropriate average service lives and net salvage percents for each plant account.
- 12 Q. PLEASE DESCRIBE THE CONTENTS OF YOUR REPORT.
- A. The Depreciation Study is presented in nine parts. Part I, Introduction, presents the 13 14 scope and basis for the Depreciation Study. Part II, Estimation of Survivor Curves, includes descriptions of the methodology of estimating survivor curves. Parts III 15 16 and IV set forth the analysis for determining service life and net salvage estimates. 17 Part V, Calculation of Annual and Accrued Depreciation, includes the concepts of depreciation and amortization using the remaining life. Part VI, Results of Study, 18 19 presents a description of the results of my analysis and a summary of the 20 depreciation calculations. Parts VII, VIII and IX include graphs and tables that 21 relate to the service life and net salvage analyses, and the detailed depreciation 22 calculations by account.

The Depreciation Study also includes several tables and tabulations of data and calculations. Table 1 on pages VI-4 through VI-6 of the Depreciation Study presents the estimated survivor curve, the net salvage percent, the original cost as of December 31, 2021, the book depreciation reserve, and the calculated annual depreciation accrual and rate for each account or subaccount. The section beginning on page VII-2 presents the results of the retirement rate analyses prepared as the historical bases for the service life estimates. The section beginning on page VIII-2 presents the results of the net salvage analysis. The section beginning on page IX-2 presents the depreciation calculations related to surviving original cost as of December 31, 2021.

A.

Q. PLEASE EXPLAIN HOW YOU PERFORMED YOUR DEPRECIATION STUDY.

I used the straight line remaining life method of depreciation, with the average service life procedure for all plant assets except some general plant accounts. The annual depreciation is based on a method of depreciation accounting that seeks to distribute the unrecovered cost of fixed capital assets over the estimated remaining useful life of each unit, or group of assets, in a systematic and rational manner.

For Common Plant Accounts 1910, 1911, 1940, 1970, and 1980 and for General Plant Accounts 3910, 3911, 3940 and 3970, I used the straight line remaining life method of amortization. The annual amortization is based on amortization accounting that distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account and vintage.

| l | Q. | HOW | DID | YOU | DETERMINE | THE | RECOMMENDED | ANNUAL |
|---|----|-------|-------|-------|---------------|-----|-------------|--------|
| , | | DEPRI | ECTAT | TON A | CCRIIAI. RATE | S? | | |

- A. I did this in two phases. In the first phase, I estimated the service life and net salvage characteristics for each depreciable group, that is, each plant account or subaccount identified as having similar characteristics. In the second phase, I calculated the composite remaining lives and annual depreciation accrual rates based on the service life and net salvage estimates determined in the first phase.
- 9 PLEASE DESCRIBE THE FIRST PHASE OF THE DEPRECIATION
 5 STUDY, IN WHICH YOU ESTIMATED THE SERVICE LIFE AND NET
 6 SALVAGE CHARACTERISTICS FOR EACH DEPRECIABLE GROUP.
- 12 The service life and net salvage study consisted of compiling historic data from
 12 records related to Duke Energy Kentucky's plant; analyzing these data to obtain
 13 historic trends of survivor and net salvage characteristics; obtaining supplementary
 14 information from Duke Energy Kentucky's management, and operating personnel
 15 concerning practices and plans as they relate to plant operations; and interpreting
 16 the above data and the estimates used by other electric utilities to form judgments
 17 of average service life and net salvage characteristics.
- Q. WHAT HISTORIC DATA DID YOU ANALYZE FOR THE PURPOSE OF
 ESTIMATING SERVICE LIFE CHARACTERISTICS?
- A. I analyzed the Company's accounting entries that record plant transactions during
 the period 1956 through 2021. The transactions included additions, retirements,
 transfers, and the related balances. The Company records also included surviving
 dollar value by year installed for each plant account as of December 31, 2021.

| 1 | Q. | WHAT | METHOD | DID | YOU | USE | TO | ANALYZE | THIS | SERVICE | LIFE |
|---|----|------|--------|-----|-----|-----|----|----------------|------|----------------|------|
| | | | | | | | | | | | |

- **DATA?**
- A. I used the retirement rate method. This is the most appropriate method when aged retirement data are available, because this method determines the average rates of retirement actually experienced by the Company during the period of time covered
- 5 retirement actuarry experienced by the Company during the period of time covered
- 6 by the study.
- 7 Q. PLEASE DESCRIBE HOW YOU USED THE RETIREMENT RATE
- 8 METHOD TO ANALYZE DUKE ENERGY KENTUCKY'S SERVICE LIFE
- **DATA.**
- 10 A. I applied the retirement rate method to each different group of property in the study.
- For each property group, I used the retirement rate method to form a life table
- which, when plotted, shows an original survivor curve for that property group. Each
- original survivor curve represents the average survivor pattern experienced by the
- several vintage groups during the experience band studied. The survivor patterns
- do not necessarily describe the life characteristics of the property group; therefore,
- interpretation of the original survivor curves is required in order to use them as
- valid considerations in estimating service life. The Iowa-type survivor curves were
- used to perform these interpretations.
- 19 Q. WHAT IS AN "IOWA-TYPE SURVIVOR CURVE" AND HOW DID YOU
- 20 USE SUCH CURVES TO ESTIMATE THE SERVICE LIFE
- 21 CHARACTERISTICS FOR EACH PROPERTY GROUP?
- 22 A. Iowa type curves are a widely used group of generalized survivor curves that
- contain the range of survivor characteristics usually experienced by utilities and

other industrial companies. The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observing and classifying the ages at which various types of property used by utilities and other industrial companies had been retired.

A.

Iowa type curves are used to smooth and extrapolate original survivor curves determined by the retirement rate method. The Iowa curves and truncated Iowa curves were used in this study to describe the forecasted rates of retirement based on the observed rates of retirement and the outlook for future retirements.

The estimated survivor curve designations for each depreciable property group indicate the average service life, the family within the Iowa system to which the property group belongs, and the relative height of the mode. For example, the Iowa 56-R2 indicates an average service life of fifty-six years; a right-moded, or R, type curve (the mode occurs after average life for right-moded curves); and a moderate height, 2, for the mode (possible modes for R type curves range from 0.5 to 5).

Q. WHAT APPROACH DID YOU USE TO ESTIMATE THE LIVES OF SIGNIFICANT PRODUCTION FACILITIES?

I used the life span technique to estimate the lives of significant facilities for which concurrent retirement of the entire facility is anticipated. In this technique, the survivor characteristics of such facilities are described by the use of interim survivor curves and estimated probable retirement dates. The interim survivor curve describes the rate of retirement related to the replacement of elements of the facility, such as, for a power plant, the retirement of assets such as pumps, motors

| 1 | and piping that occur during the life of the facility. The probable retirement date |
|---|---|
| 2 | provides the rate of final retirement for each year of installation for the facility by |
| 3 | truncating the interim survivor curve for each installation year at its attained age at |
| 4 | the date of probable retirement. The use of interim survivor curves truncated at the |
| 5 | date of probable retirement provides a consistent method for estimating the lives of |
| 6 | the several years of installation for a particular facility inasmuch as a single |
| 7 | concurrent retirement for all years of installation will occur when it is retired. |

Q. IS THIS APPROACH WIDELY ACCEPTED FOR ESTIMATING THE SERVICE LIVES OF PRODUCTION FACILITIES?

- 10 A. Yes. The life span has been used previously for Duke Energy Kentucky. My firm

 11 has also used the life span technique in performing depreciation studies presented

 12 to many other public utility commissions across the United States and Canada.
- 13 Q. HOW ARE THE LIFE SPANS ESTIMATED FOR DUKE ENERGY
 14 KENTUCKY'S PRODUCTION FACILITIES?
- 15 A. The life span estimates are based on informed judgment that incorporates factors
 16 for each facility such as the technology of the facility, management plans and
 17 outlook for the facility, and the estimates for similar facilities for other utilities.
- 18 Q. HAVE ANY LIFE SPAN ESTIMATES CHANGED SINCE THE LAST
 19 STUDY WAS CONDUCTED?
- 20 A. Yes. East Bend and Woodsdale have life spans that are planned to change. The East
 21 Bend unit has a change in life span from 2041 to 2035. The life span for Woodsdale
 22 has been extended from 2032 to 2040.

| Q. | ARE THE | NEW LI | FE SPANS | REASONABLE? | , |
|----|---------|--------|----------|-------------|---|
|----|---------|--------|----------|-------------|---|

- 2 A. Yes. The new life span for East Bend is 54 years and for Woodsdale is 48 years.
- The most common range of life spans for steam production facilities had been 55
- 4 to 65 years; however, in recent years, originally proposed life spans have been
- shortened due to unit efficiencies and environmental regulations. The industry
- 6 average of similar units in recent years has been 46 years. For combustion turbines,
- the most common period for life spans has been 40 years, however, some similar
- life spans in recent years have been lengthened in order to meet capacity
- 9 requirements due to steam retirements.

10 Q. ARE THE NEW LIFE SPANS CONSISTENT WITH COMPANY PLANS?

- 11 A. Yes. During the conduct of this depreciation study, Duke Energy Kentucky
- personnel identified the revised life spans for these facilities.
- 13 Q. ARE THE FACTORS CONSIDERED IN YOUR ESTIMATES OF SERVICE
- 14 LIFE AND NET SALVAGE PERCENTS PRESENTED IN ATTACHMENT
- 15 **JS-1?**

1

- 16 A. Yes. A discussion of the factors considered in the estimation of service lives and
- net salvage percents are presented in Part III and Part IV of Attachment JS-1.
- 18 Q. HAVE YOU PHYSICALLY OBSERVED DUKE ENERGY KENTUCKY'S
- 19 PLANT AND EQUIPMENT AS PART OF YOUR DEPRECIATION
- 20 **STUDIES?**
- 21 A. Yes. I have made field reviews of Duke Energy Kentucky's property during
- November 2022 to observe representative portions of plant. Also, I have conducted
- field visits in prior studies since 1990 with the most recent previous trip in January

2017. I have also made numerous field visits during previous studies since 1990. Field reviews are conducted to become familiar with Company operations and obtain an understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements. This knowledge was incorporated in the interpretation and extrapolation of the statistical analyses.

Α.

O. WOULD YOU PLEASE EXPLAIN THE CONCEPT OF "NET SALVAGE"?

Net salvage is a component of the service value of capital assets that is recovered through depreciation rates. The service value of an asset is its original cost less its net salvage. Net salvage is the salvage value received for the asset upon retirement less the cost to retire the asset. When the cost to retire exceeds the salvage value, the result is negative net salvage.

Inasmuch as depreciation expense is the loss in service value of an asset during a defined period, e.g. one year, it must include a ratable portion of both the original cost and the net salvage. That is, the net salvage related to an asset should be incorporated in the cost of service during the same period as its original cost so that customers receiving service from the asset pay rates that include a portion of both elements of the asset's service value, the original cost, and the net salvage value.

For example, the full recovery of the service value of a \$3,000 line transformer will include not only the \$3,000 of original cost, but also, on average, \$500 to remove the line transformer at the end of its life and \$50 in salvage value.

- In this example, the net salvage component is negative \$450 (\$50 \$500), and the net salvage percent is negative 15% ((\$50 \$500)/\$3,000).
- 3 Q. PLEASE DESCRIBE HOW YOU ESTIMATED NET SALVAGE
 4 PERCENTAGES.
- A. The net salvage percentages estimated in the Depreciation Study were based on 5 informed judgment that incorporated factors such as the statistical analyses of 6 historical net salvage data; information provided to me by the Company's operating 7 personnel, general knowledge and experience of the industry practices; and trends 8 in the industry in general. The statistical net salvage analyses incorporates the 9 Company's actual historical data for the period 1990 through 2021, and considers 10 11 the cost of removal and gross salvage ratios to the associated retirements during the 32-year period. Trends of these data are also measured based on three-year moving 12 averages and the most recent five-year indications. 13

14 Q. WERE THE NET SALVAGE PERCENTAGES FOR GENERATING 15 FACILITIES BASED ON THE SAME ANALYSES?

16

17

18

19

20

21

22

23

A.

Yes, for the interim net salvage estimates. The net salvage percentages for generating facilities were based on two components, the interim net salvage percentage and the final net salvage percentage. The interim net salvage percentage is determined based on the historical indications from the period 1990 to 2021 of the cost of removal and gross salvage amounts as a percentage of the associated plant retired. The final net salvage or dismantlement component was determined based on the retirement activities associated with the assets anticipated to be retired at the concurrent date of final retirement.

1 Q. HAVE YOU INCLUDED A DISMANTLEMENT OR DECOMMISSIONING

2 COMPONENT INTO THE OVERALL RECOVERY OF GENERATING

FACILITIES?

- 4 A. Yes. A dismantlement or decommissioning component has been included to the net salvage percentage for steam and other production facilities.
- 6 Q. CAN YOU EXPLAIN HOW THE FINAL NET SALVAGE COMPONENT IS

7 INCLUDED IN THE DEPRECIATION STUDY?

- Yes. The dismantlement component is part of the overall net salvage for each 8 A. location within the production assets. Based on studies for other utilities and the 9 Decommissioning Cost Study conducted by 1898 & Co. for Duke Energy 10 Kentucky, it was determined that the dismantlement or decommissioning costs for 11 steam and other production facilities is best calculated by dividing the 12 dismantlement cost by the surviving plant at final retirement. These amounts at a 13 14 location basis are added to the interim net salvage percentage of the assets anticipated to be retired on an interim basis to produce the weighted net salvage 15 percentage for each location. The detailed calculations of the overall net salvage 16 17 for each location is set forth on page VIII-3 of the Depreciation Study.
- 18 Q. WHAT IS THE BASIS OF THE DISMANTLEMENT OR
 19 DECOMMISSIONING COST ESTIMATES?
- 20 A. The decommissioning cost estimates are based on decommissioning studies of each
 21 generating site performed by 1898 & Co (previously known as Burns and
 22 McDonnell). These estimates are based on the current cost to decommission the
 23 facility and have been updated in 2022. However, the costs to decommission power

| l | plants has tended to increase over time (as have construction costs in general). For |
|---|---|
| 2 | this reason, in order to recover the full decommissioning costs for each site, these |
| 3 | costs need to be escalated to the time of retirement. The calculations of the |
| 1 | escalation of these costs have been provided in the table set forth on page VIII-4 of |
| 5 | the Depreciation Study. |

- Q. PLEASE DESCRIBE THE SECOND PHASE OF THE PROCESS THAT
 YOU USED IN THE DEPRECIATION STUDY IN WHICH YOU
 CALCULATED COMPOSITE REMAINING LIVES AND ANNUAL
 DEPRECIATION ACCRUAL RATES.
- A. After I estimated the service life and net salvage characteristics for each depreciable property group, I calculated the annual depreciation accrual rates for each depreciable group based on the straight-line remaining life method, using remaining lives weighted consistent with the average service life procedure. The calculation of annual depreciation accrual rates was developed as of December 31, 2021.
- 16 Q. PLEASE DESCRIBE THE STRAIGHT LINE REMAINING LIFE
 17 METHOD OF DEPRECIATION.
- A. The straight line remaining life method of depreciation allocates the original cost of the property, less accumulated depreciation, less future net salvage, in equal amounts to each year of remaining service life.

Q. PLEASE DESCRIBE THE AVERAGE SERVICE LIFE PROCEDURE FOR CALCULATING REMAINING LIFE ACCRUAL RATES.

A.

Α.

The average service life procedure defines the group or account for which the remaining life annual accrual is determined. Under this procedure, the annual accrual rate is determined for the entire group or account based on its average remaining life and the rate is then applied to the surviving balance of the group's cost. The average remaining life of the group is calculated by first dividing the future book accruals (original cost less allocated book reserve less future net salvage) by the average remaining life for each vintage. The average remaining life for each vintage is derived from the area under the survivor curve between the attained age of the vintage and the maximum age. The sum of the future book accruals is then divided by the sum of the annual accruals to determine the average remaining life of the entire group for use in calculating the annual depreciation accrual rate.

Q. PLEASE DESCRIBE AMORTIZATION ACCOUNTING.

Amortization accounting is used for accounts with a large number of units, but small asset values. In amortization accounting, units of property are capitalized in the same manner as they are in depreciation accounting. However, depreciation accounting is difficult for these assets because periodic inventories are required to properly reflect plant in service. Consequently, retirements are recorded when a vintage is fully amortized rather than as the units are removed from service. That is, there is no dispersion of retirement. All units are retired when the age of the vintage reaches the amortization period. Each plant account or group of assets is

| 1 | | assigned a fixed period which represents an anticipated life during which the asset |
|----|----|--|
| 2 | | will render service. For example, in amortization accounting, assets that have a 15- |
| 3 | | year amortization period will be fully recovered after 15 years of service and taken |
| 4 | | off the Company books, but not necessarily removed from service. In contrast, |
| 5 | | assets that are taken out of service before 15 years remain on the books until the |
| 6 | | amortization period for that vintage has expired. |
| 7 | Q. | AMORTIZATION ACCOUNTING IS BEING IMPLEMENTED FOR |
| 8 | | WHICH PLANT ACCOUNTS? |
| 9 | A. | Amortization accounting is only appropriate for certain Common and General Plant |
| 10 | | accounts. These accounts are 1900, 1910, 1911, 1940, 1970, and 1980 for Common |
| 11 | | Plant and 3910, 3911, 3940, and 3970 for General Plant which represents slightly |
| 12 | | more than one percent of depreciable plant. |
| 13 | Q. | PLEASE USE AN EXAMPLE TO ILLUSTRATE THE DEVELOPMENT |
| 14 | | OF THE ANNUAL DEPRECIATION ACCRUAL RATE FOR A |
| 15 | | PARTICULAR GROUP OF PROPERTY IN YOUR DEPRECIATION |
| 16 | | STUDY. |
| 17 | A. | I will use Account 3640, Poles, Towers and Fixtures, as an example because it is |
| 18 | | one of the largest depreciable groups and represents an easily understood asset. |
| 19 | | The retirement rate method was used to analyze the survivor characteristics |
| 20 | | of this property group. Aged plant accounting data were compiled from 1956 |
| 21 | | through 2021 and analyzed in periods that best represent the overall service life of |
| 22 | | this property. The life table for the 1956-2018 experience band is presented in the |

23

depreciation study on pages VII-102 through VII-104. Each life table displays the

retirement and surviving ratios of the aged plant data exposed to retirement by age interval. For example, page VII-102 of Attachment JS-1, shows \$521,089 retired during age interval 0.5-1.5 with \$88,980,239 exposed to retirement at the beginning of the interval. Consequently, the retirement ratio is 0.0059 (\$521,089/\$88,980,239) and the survivor ratio is 0.9941 (1-0.0059). The life table, or original survivor curve, is plotted along with the estimated smooth survivor curve, the 55-R0.5, on page VII-101 of Attachment JS-1.

The net salvage percent is presented on pages VIII-38 and VIII-39. The percentage is based on the result of annual gross salvage minus the cost to remove plant assets as compared to the original cost of plant retired during the period 1990 through 2021. The 32-year period experienced \$6,295,817 (\$1,590,755 - \$7,886,572) in net salvage for \$11.211.038 plant retired. The result is negative net salvage of 56 percent (\$6,295,817/\$11,211,038). Recent trends have shown indications of negative 229 percent, therefore, it was determined that based on industry ranges, historical indications, and Company expectations, that negative 50 percent was the most appropriate estimate. The negative 50 percent estimate considers the entire period, however, does not put as much weight on recent trends as cost of removal should be lower in the future than the levels over last five years for the assets being retired.

My calculation of the annual depreciation related to original cost of electric utility plant as of December 31, 2021, for Account 3640 is presented on pages IX-46 through IX-48 of Attachment JS-1. The calculation is based on the 55-R0.5 survivor curve, 50% negative net salvage, the attained age, and the allocated book

reserve. The tabulation sets forth the installation year, the original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual. These totals are brought forward to Table 1 on page VI-5.

4 Q. HAVE YOU DEVELOPED RATES FOR FUTURE ASSETS?

Α.

A. Yes. There are plans to add new energy storage assets for generation, transmission, and distribution plant. The rates for these assets will be based on a 15-L3 survivor curve and zero percent net salvage. Also, there are plans to add various electric vehicle charging assets. The rates for the first group of assets will be based on a 10-S3 survivor curve and negative 2 percent net salvage. The rates for the other group of assets will be based on a 10-S4 survivor curve and negative 1 percent net salvage. The rate for all of these assets is presented on page VI-6 of Attachment JS-1.

Q. ARE THERE OTHER SPECIAL RECOVERY AMOUNTS THAT WERE INCLUDED IN THE STUDY?

Yes. The overall recovery of steam assets includes the remaining net plant of Miami Fort Unit 6. There was \$12,966,986 (\$16,640,000 - \$3,643,014) still to be recovered at time of retirement which related to the established decommissioning cost minus the previously accumulated reserve. Based on group depreciation, the remaining amount to be recovered for Miami Fort Unit 6 (\$4,887,000) should be recovered over the remaining life of the surviving assets.

The second special recovery amount is the unrecovered reserve amortization established for certain general and common plant accounts. In order to achieve a more stable accrual for general and common plant accounts in the future, I have recommended a five-year amortization to adjust unrecovered reserve.

This approach will achieve consistent amortization rates for existing assets as well
as future assets. The reserve for each of these accounts is segregated into two
components. The first component is the amount required to achieve the proper rate
for the amortization period. The remaining amount, which could be negative, is

III. CONCLUSION

- 6 Q. WAS ATTACHMENT JS-1 IN SATISFACTION OF FR 16(7)(s) PREPARED
- 7 UNDER YOUR DIRECTION AND CONTROL?
- 8 A. Yes.

5

9 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

amortized over 5 years separately from the assets.

10 A. Yes.

VERIFICATION

Appendix A

JOHN SPANOS

DEPRECIATION EXPERIENCE

- Q. Please state your name.
- A. My name is John J. Spanos.
- Q. What is your educational background?
- A. I have Bachelor of Science degrees in Industrial Management and Mathematics from Carnegie-Mellon University and a Master of Business Administration from York College.
- Q. Do you belong to any professional societies?
- A. Yes. I am a member and past President of the Society of Depreciation Professionals and a member of the American Gas Association/Edison Electric Institute Industry Accounting Committee.
- Q. Do you hold any special certification as a depreciation expert?
- A. Yes. The Society of Depreciation Professionals has established national standards for depreciation professionals. The Society administers an examination to become certified in this field. I passed the certification exam in September 1997 and was recertified in August 2003, February 2008, January 2013 and February 2018.
- Q. Please outline your experience in the field of depreciation.
- A. In June 1986, I was employed by Gannett Fleming Valuation and Rate Consultants, Inc. as a Depreciation Analyst. During the period from June 1986 through December 1995, I helped prepare numerous depreciation and original cost studies for utility companies in various industries. I helped perform depreciation studies for the following telephone companies:

 United Telephone of Pennsylvania, United Telephone of New Jersey, and Anchorage Telephone Utility. I helped perform depreciation studies for the following companies in

the railroad industry: Union Pacific Railroad, Burlington Northern Railroad, and Wisconsin Central Transportation Corporation.

I helped perform depreciation studies for the following organizations in the electric utility industry: Chugach Electric Association, The Cincinnati Gas and Electric Company (CG&E), The Union Light, Heat and Power Company (ULH&P), Northwest Territories Power Corporation, and the City of Calgary - Electric System.

I helped perform depreciation studies for the following pipeline companies: TransCanada Pipelines Limited, Trans Mountain Pipe Line Company Ltd., Interprovincial Pipe Line Inc., Nova Gas Transmission Limited and Lakehead Pipeline Company.

I helped perform depreciation studies for the following gas utility companies: Columbia Gas of Pennsylvania, Columbia Gas of Maryland, The Peoples Natural Gas Company, T. W. Phillips Gas & Oil Company, CG&E, ULH&P, Lawrenceburg Gas Company and Penn Fuel Gas, Inc.

I helped perform depreciation studies for the following water utility companies: Indiana-American Water Company, Consumers Pennsylvania Water Company and The York Water Company; and depreciation and original cost studies for Philadelphia Suburban Water Company and Pennsylvania-American Water Company.

In each of the above studies, I assembled and analyzed historical and simulated data, performed field reviews, developed preliminary estimates of service life and net salvage, calculated annual depreciation, and prepared reports for submission to state public utility commissions or federal regulatory agencies. I performed these studies under the general direction of William M. Stout, P.E.

In January 1996, I was assigned to the position of Supervisor of Depreciation Studies. In July 1999, I was promoted to the position of Manager, Depreciation and

Valuation Studies. In December 2000, I was promoted to the position as Vice-President of Gannett Fleming Valuation and Rate Consultants, Inc., in April 2012, I was promoted to the position as Senior Vice President of the Valuation and Rate Division of Gannett Fleming Inc. (now doing business as Gannett Fleming Valuation and Rate Consultants, LLC) and in January of 2019, I was promoted to my present position of President of Gannett Fleming Valuation and Rate Consultants, LLC. In my current position I am responsible for conducting all depreciation, valuation and original cost studies, including the preparation of final exhibits and responses to data requests for submission to the appropriate regulatory bodies.

Since January 1996, I have conducted depreciation studies similar to those previously listed including assignments for Pennsylvania-American Water Company; Aqua Pennsylvania; Kentucky-American Water Company; Virginia-American Water Company; Indiana-American Water Company; Iowa-American Water Company; New Jersey-American Water Company; Hampton Water Works Company; Omaha Public Power District; Enbridge Pipe Line Company; Inc.; Columbia Gas of Virginia, Inc.; Virginia Natural Gas Company National Fuel Gas Distribution Corporation - New York and Pennsylvania Divisions; The City of Bethlehem - Bureau of Water; The City of Coatesville Authority; The City of Lancaster - Bureau of Water; Peoples Energy Corporation; The York Water Company; Public Service Company of Colorado; Enbridge Pipelines; Enbridge Gas Distribution, Inc.; Reliant Energy-HLP; Massachusetts-American Water Company; St. Louis County Water Company; Missouri-American Water Company; Chugach Electric Association; Alliant Energy; Oklahoma Gas & Electric Company; Nevada Power Company; Dominion Virginia Power; NUI-Virginia Gas Companies; Pacific Gas & Electric Company; PSI Energy; NUI - Elizabethtown Gas Company; Cinergy Corporation – CG&E; Cinergy

Corporation – ULH&P; Columbia Gas of Kentucky; South Carolina Electric & Gas Company; Idaho Power Company; El Paso Electric Company; Aqua North Carolina; Aqua Ohio; Aqua Texas, Inc.; Aqua Illinois, Inc.; Ameren Missouri; Central Hudson Gas & Electric; Centennial Pipeline Company; CenterPoint Energy-Arkansas; CenterPoint Energy - Oklahoma; CenterPoint Energy - Entex; CenterPoint Energy - Louisiana; NSTAR -Boston Edison Company; Westar Energy, Inc.; United Water Pennsylvania; PPL Electric Utilities; PPL Gas Utilities; Wisconsin Power & Light Company; TransAlaska Pipeline; Avista Corporation; Northwest Natural Gas; Allegheny Energy Supply, Inc.; Public Service Company of North Carolina; South Jersey Gas Company; Duquesne Light Company; MidAmerican Energy Company; Laclede Gas; Duke Energy Company; E.ON U.S. Services Inc.; Elkton Gas Services; Anchorage Water and Wastewater Utility; Kansas City Power and Light; Duke Energy North Carolina; Duke Energy South Carolina; Monongahela Power Company; Potomac Edison Company; Duke Energy Ohio Gas; Duke Energy Kentucky; Duke Energy Indiana; Duke Energy Progress; Northern Indiana Public Service Company; Tennessee- American Water Company; Columbia Gas of Maryland; Maryland-American Water Company; Bonneville Power Administration; NSTAR Electric and Gas Company; EPCOR Distribution, Inc.; B. C. Gas Utility, Ltd; Entergy Arkansas; Entergy Texas; Entergy Mississippi; Entergy Louisiana; Entergy Gulf States Louisiana; the Borough of Hanover; Louisville Gas and Electric Company; Kentucky Utilities Company; Madison Gas and Electric; Central Maine Power; PEPCO; PacifiCorp; Minnesota Energy Resource Group; Jersey Central Power & Light Company; Cheyenne Light, Fuel and Power Company; United Water Arkansas; Central Vermont Public Service Corporation; Green Mountain Power; Portland General Electric Company; Atlantic City Electric; Nicor Gas Company; Black Hills Power; Black Hills Colorado Gas; Black Hills Energy Arkansas, Inc.; Black Hills Kansas

Gas; Black Hills Service Company; Black Hills Utility Holdings; Public Service Company of Oklahoma; City of Dubois; Peoples Gas Light and Coke Company; North Shore Gas Company; Connecticut Light and Power; New York State Electric and Gas Corporation; Rochester Gas and Electric Corporation; Greater Missouri Operations; Tennessee Valley Authority; Omaha Public Power District; Indianapolis Power & Light Company; Vermont Gas Systems, Inc.; Metropolitan Edison; Pennsylvania Electric; West Penn Power; Pennsylvania Power; PHI Service Company - Delmarva Power and Light; Atmos Energy Corporation; Citizens Energy Group; PSE&G Company; Berkshire Gas Company; Alabama Gas Corporation; Mid-Atlantic Interstate Transmission, LLC; SUEZ Water; WEC Energy Group; Rocky Mountain Natural Gas, LLC; Illinois-American Water Company; Northern Illinois Gas Company; Public Service of New Hampshire and Newtown Artesian Water Company.

My additional duties include determining final life and salvage estimates, conducting field reviews, presenting recommended depreciation rates to management for its consideration and supporting such rates before regulatory bodies.

- Q. Have you submitted testimony to any state utility commission on the subject of utility plant depreciation?
- A. Yes. I have submitted testimony to the Pennsylvania Public Utility Commission; the Commonwealth of Kentucky Public Service Commission; the Public Utilities Commission of Ohio; the Nevada Public Utility Commission; the Public Utilities Board of New Jersey; the Missouri Public Service Commission; the Massachusetts Department of Telecommunications and Energy; the Alberta Energy & Utility Board; the Idaho Public Utility Commission; the Louisiana Public Service Commission; the State Corporation Commission of Kansas; the Oklahoma Corporate Commission; the Public Service

Commission of South Carolina; Railroad Commission of Texas – Gas Services Division; the New York Public Service Commission; Illinois Commerce Commission; the Indiana Utility Regulatory Commission; the California Public Utilities Commission; the Federal Energy Regulatory Commission ("FERC"); the Arkansas Public Service Commission; the Public Utility Commission of Texas; Maryland Public Service Commission; Washington Utilities and Transportation Commission; The Tennessee Regulatory Commission; the Regulatory Commission of Alaska; Minnesota Public Utility Commission; Utah Public Service Commission; District of Columbia Public Service Commission; the Mississippi Public Service Commission; Delaware Public Service Commission; Virginia State Corporation Commission; Colorado Public Utility Commission; Oregon Public Utility Commission; South Dakota Public Utilities Commission; Wisconsin Public Service Commission; Wyoming Public Service Commission; the Public Service Commission of West Virginia; Maine Public Utility Commission; Iowa Utility Board; Connecticut Public Utilities Regulatory Authority; New Mexico Public Regulation Commission; Commonwealth of Massachusetts Department of Public Utilities; Rhode Island Public Utilities Commission and the North Carolina Utilities Commission.

Q. Have you had any additional education relating to utility plant depreciation?

A. Yes. I have completed the following courses conducted by Depreciation Programs, Inc.: "Techniques of Life Analysis," "Techniques of Salvage and Depreciation Analysis," "Forecasting Life and Salvage," "Modeling and Life Analysis Using Simulation," and "Managing a Depreciation Study." I have also completed the "Introduction to Public Utility Accounting" program conducted by the American Gas Association.

Q. Does this conclude your qualification statement?

A. Yes.

Attention David L. Doss Jr.

Director Asset Accounting

Ladies and Gentlemen:

Pursuant to your request, we have conducted a depreciation study related to the electric and common plant of Duke Energy Kentucky as of December 31, 2021. The attached report presents a description of the methods used in the estimation of depreciation, the summary of annual depreciation accrual rates, the statistical support for the life and net salvage estimates and the detailed tabulations of annual and accrued depreciation.

Respectfully submitted,

GANNETT FLEMING VALUATION AND RATE CONSULTANTS, LLC

DEPRECIATION STUDY

EXECUTIVE SUMMARY

Pursuant to Duke Energy Kentucky, Inc.'s ("Duke Energy Kentucky" or "Company") request, Gannett Fleming Valuation and Rate Consultants, LLC ("Gannett Fleming") conducted a depreciation study related to electric and common plant as of December 31, 2021. The purpose of this study was to determine the annual depreciation accrual rates and amounts for book and ratemaking purposes.

The depreciation rates are based on the straight line method using the average service life ("ASL") procedure and were applied on a remaining life basis. The calculations were based on attained ages and estimated average service life, and forecasted net salvage characteristics for each depreciable group of assets.

Duke Energy Kentucky's accounting policy has not changed since the last depreciation study was prepared. However, there have been changes in plans of some assets as well as additions of capital investment in all plant categories. For transmission and distribution plant, the overall depreciation expense has increased due primarily to the change in more negative net salvage. The shortened probable retirement date for East Bend has increased rates for steam assets. The longer probable retirement date for Woodsdale and the longer life spans for solar assets have slightly decreased the overall rate for other production plant.

Gannett Fleming recommends the calculated annual depreciation accrual rates set forth herein apply specifically to electric and common plant in service as of December 31, 2021 as summarized by Table 1 of the study. Supporting analysis and calculations are provided within the study.

The study results set forth an annual depreciation expense of \$75.3 million when applied to depreciable plant balances as of December 31, 2021. The results are summarized at the functional level as follows:

SUMMARY OF ORIGINAL COST, ACCRUAL RATES AND AMOUNTS

| FUNCTION | | RIGINAL COST AS OF CEMBER 31, 2021 | PROPOSED RATE | | PROPOSED EXPENSE | |
|------------------------------------|------------|--|------------------|----|---------------------|--|
| Common Plant | \$ | 21,221,570.40 | 5.20 | \$ | 1,103,142 | |
| Electric Plant | | | | | | |
| Steam Production Plant | \$ | 918,526,199.94 | 4.71 | \$ | 43,225,671 | |
| Other Production Plant | | 355,721,060.70 | 3.37 | | 11,986,376 | |

PART I. INTRODUCTION

DUKE ENERGY KENTUCKY, INC. DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study for Duke Energy Kentucky, Inc. ("Company"), to determine the annual depreciation accrual rates and amounts for book purposes applicable to the original cost of electric and common plant as of December 31, 2021. The rates and amounts are based on the straight line remaining life method of depreciation. This report also describes the concepts, methods and judgments which underlie the recommended annual depreciation accrual rates related to electric and common plant in service as of December 31, 2021.

The service life and net salvage estimates resulting from the study were based on informed judgment which incorporated analyses of historical plant retirement data as recorded through 2021, a review of Company practice and outlook as they relate to plant operation and retirement, and consideration of current practice in the electric industry, including knowledge of service lives and net salvage estimates used for other electric companies.

PLAN OF REPORT

Part I, Introduction, contains statements with respect to the plan of the report, and the basis of the study. Part II, Estimation of Survivor Curves, presents descriptions of the considerations and the methods used in the service life and net salvage studies. Part III, Service Life Considerations, presents the factors and judgment utilized in the average service life analysis. Part IV, Net Salvage Considerations, presents the judgment utilized for the net salvage study. Part V, Calculation of Annual and Accrued Depreciation,

describes the procedures used in the calculation of group depreciation. Part VI, Results of Study, presents summaries by depreciable group of annual depreciation accrual rates and amounts, as well as composite remaining lives. Part VII, Service Life Statistics presents the statistical analysis of service life estimates, Part VIII, Net Salvage Statistics sets forth the statistical indications of net salvage percents, and Part IX, Detailed Depreciation Calculations presents the detailed tabulations of annual depreciation.

BASIS OF THE STUDY

Depreciation

Depreciation, in public utility regulation, is the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of utility plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among causes to be given consideration are wear and tear, deterioration, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and the requirements of public authorities.

Depreciation, as used in accounting, is a method of distributing fixed capital costs, less net salvage, over a period of time by allocating annual amounts to expense. Each annual amount of such depreciation expense is part of that year's total cost of providing electric utility service. Normally, the period of time over which the fixed capital cost is allocated to the cost of service is equal to the period of time over which an item renders service, that is, the item's service life. The most prevalent method of allocation is to distribute an equal amount of cost to each year of service life. This method is known as the straight-line method of depreciation.

For most accounts, the annual depreciation was calculated by the straight line method using the average service life procedure and the remaining life basis. For certain General Plant accounts, the annual depreciation is based on amortization accounting.

Both types of calculations were based on original cost, attained ages, and estimates of service lives and net salvage.

The straight line method, average service life procedure is a commonly used depreciation calculation procedure that has been accepted in Kentucky. Amortization accounting is used for certain General Plant accounts because of the disproportionate plant accounting effort required when compared to the minimal original cost of the large number of items in these accounts. An explanation of the calculation of annual and accrued amortization is presented beginning on page V-4 of the report.

Service Life and Net Salvage Estimates

The service life and net salvage estimates used in the depreciation and amortization calculations were based on informed judgment which incorporated a review of management's plans, policies and outlook, a general knowledge of the electric utility industry, and comparisons of the service life and net salvage estimates from our studies of other electric utilities. The use of survivor curves to reflect the expected dispersion of retirement provides a consistent method of estimating depreciation for electric plant. Iowa type survivor curves were used to depict the estimated survivor curves for the plant accounts not subject to amortization accounting.

The procedure for estimating service lives consisted of compiling historical data for the plant accounts or depreciable groups, analyzing this history through the use of widely accepted techniques, and forecasting the survivor characteristics for each depreciable group on the basis of interpretations of the historical data analyses and the probable future. The combination of the historical experience and the estimated future yielded estimated survivor curves from which the average service lives were derived.

PART II. ESTIMATION OF SURVIVOR CURVES

PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below and the development of net salvage is discussed in later sections of this report.

SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of lowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

Iowa Type Curves

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the lowa type curves. There are four families in the lowa system, labeled in accordance with the location of the modes of the retirements (or the portion of the frequency curve with the highest level of retirements) in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family. A higher number designates a higher mode curve.

The lowa curves were developed at the lowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves, which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125.

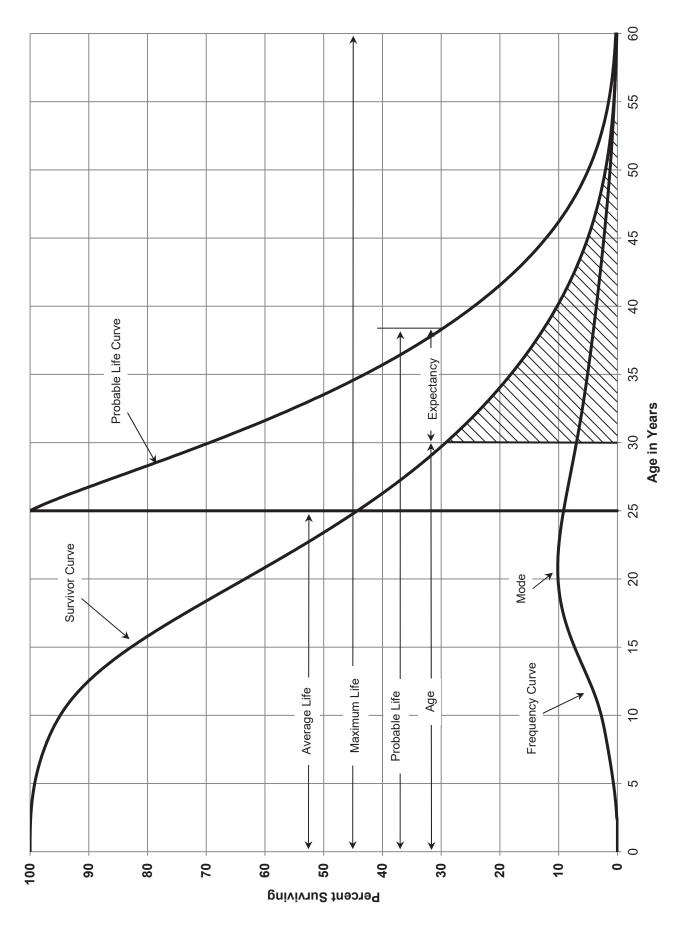

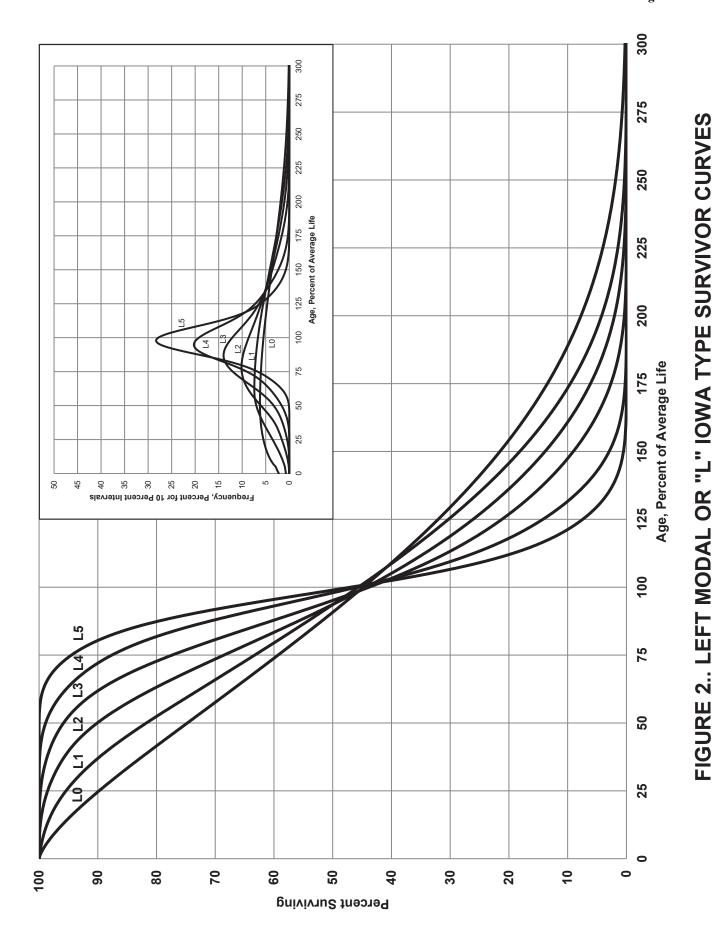

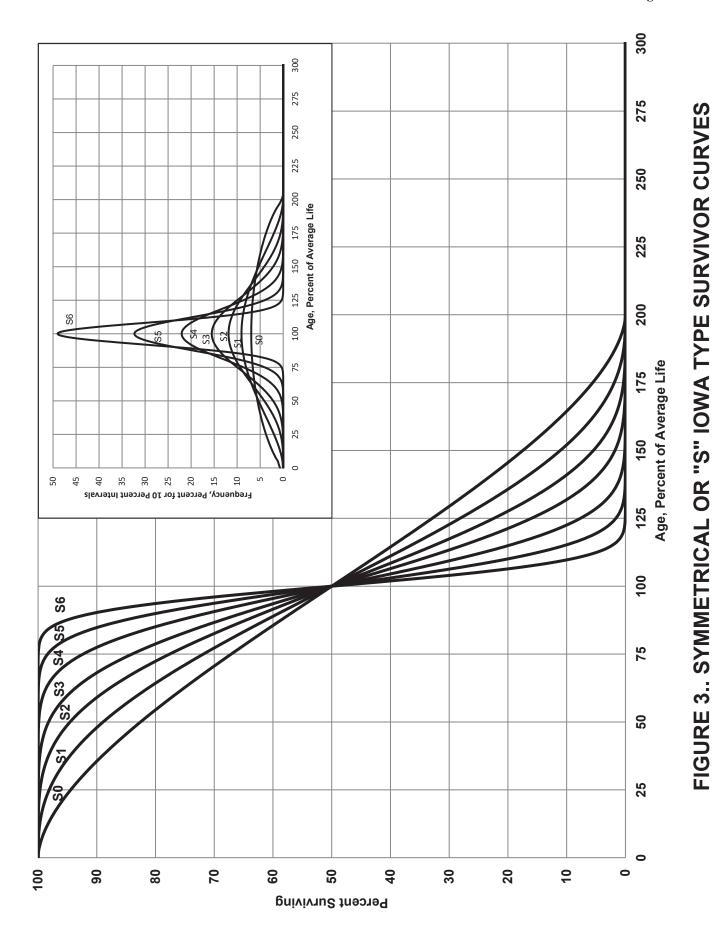

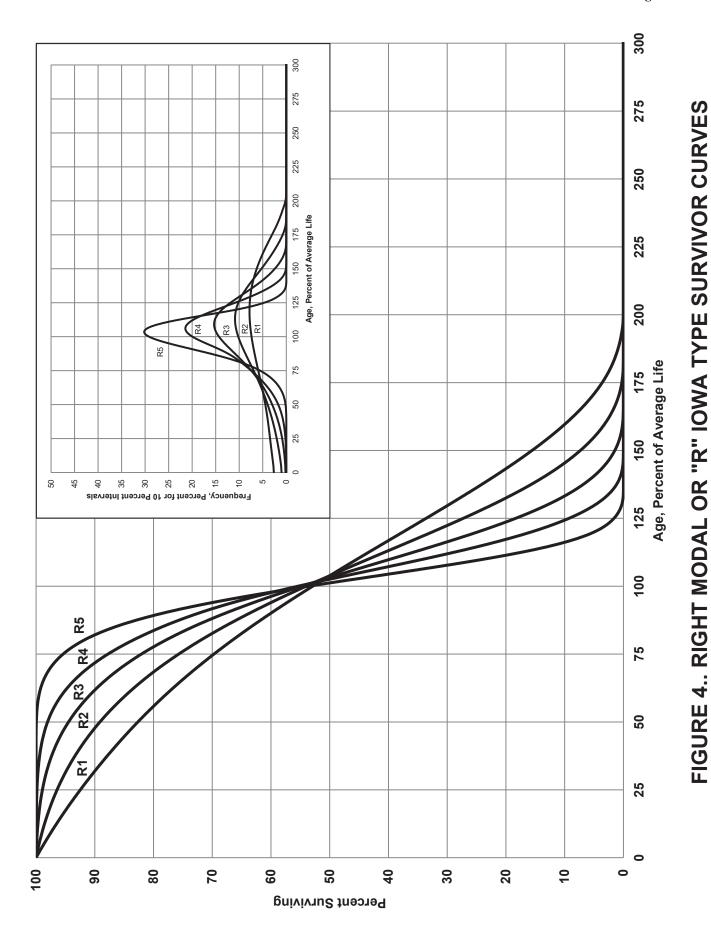

FIGURE 1. TYPICAL SURVIVOR CURVE AND DERIVED CURVES

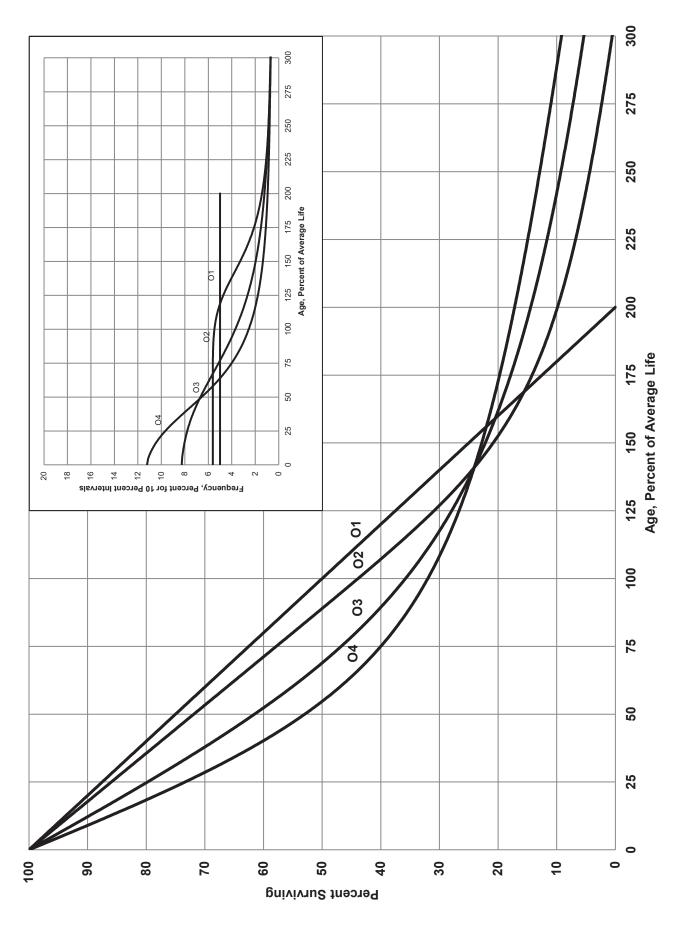

FIGURE 5. ORIGIN MODAL OR "O" IOWA TYPE SURVIVOR CURVES

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation." In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements," Engineering Valuation and Depreciation, and "Depreciation Systems."

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

Schedules of Annual Transactions in Plant Records

The property group used to illustrate the retirement rate method is observed for the experience band 2012-2021 for which there were placements during the years 2007-2021. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, \$10,000 of the dollars invested in 2007 were retired in 2012. The \$10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of \$143,000 retired for age interval $4\frac{1}{2}$ - $5\frac{1}{2}$ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2012 retirements of 2007 installations and ending with the 2021 retirements of the 2016 installations. Thus, the total amount of 143 for age interval $4\frac{1}{2}$ - $5\frac{1}{2}$ equals the sum of:

$$10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20$$
.

^a Transfer Affecting Exposures at Beginning of Year

Parentheses Denote Credit Amount.

^b Transfer Affecting Exposures at End of Year

^c Sale with Continued Use

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

Schedule of Plant Exposed to Retirement

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2012 through 2021 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or addition are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2017 are calculated in the following manner:

| Exposures at age 0 = | amount of addition | = \$750,000 |
|-----------------------|-----------------------------------|-------------|
| Exposures at age ½ = | = \$750,000 - \$ 8,000 | = \$742,000 |
| Exposures at age 1½ = | ÷ \$742,000 <i>-</i> \$18,000 | = \$724,000 |
| Exposures at age 2½ = | • \$724,000 - \$20,000 - \$19,000 | = \$685,000 |
| Exposures at age 3½ = | : \$685,000 - \$22,000 | = \$663,000 |

^aAdditions during the year

For the entire experience band 2012-2021, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval $4\frac{1}{2}-5\frac{1}{2}$, is obtained by summing:

Original Life Table

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½ 88.15 Exposures at age 4½ = 3.789,000Retirements from age $4\frac{1}{2}$ to $5\frac{1}{2}$ 143,000 Retirement Ratio = $143,000 \div 3,789,000 = 0.0377$ Survivor Ratio = 1.000 -0.0377 = 0.9623Percent surviving at age 5½ $(88.15) \times (0.9623) =$ 84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE CALCULATED BY THE RETIREMENT RATE METHOD

| Total | <u>44,780</u> | <u>1,606</u> | | | |

Column 2 from Schedule 3, Column 12, Plant Exposed to Retirement.

Column 3 from Schedule 1, Column 12, Retirements for Each Year.

Column 4 = Column 3 Divided by Column 2.

Column 5 = 1.0000 Minus Column 4.

Column 6 = Column 5 Multiplied by Column 6 as of the Preceding Age Interval.

The original survivor curve is plotted from the original life table (column 6, Schedule 4). When the curve terminates at a percent surviving greater than zero, it is called a stub survivor curve. Survivor curves developed from retirement rate studies generally are stub curves.

Smoothing the Original Survivor Curve

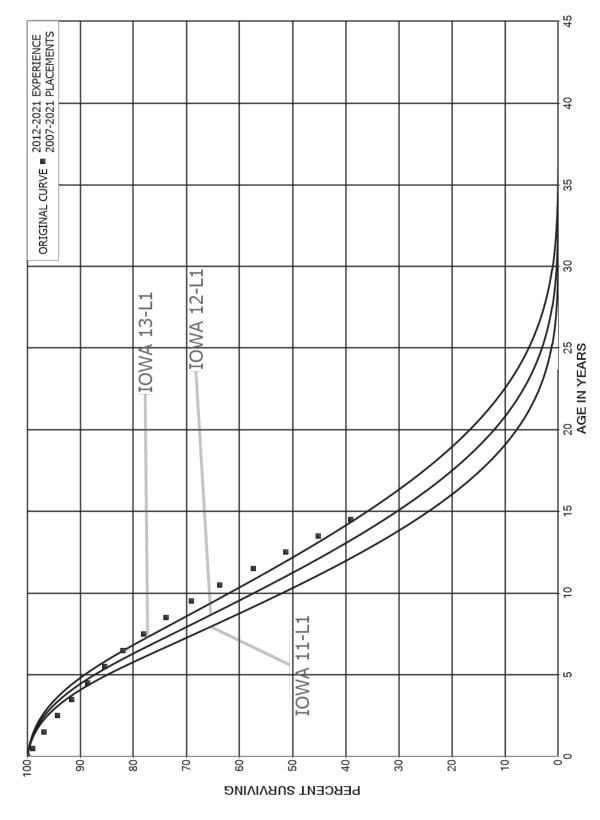

The smoothing of the original survivor curve eliminates any irregularities and serves as the basis for the preliminary extrapolation to zero percent surviving of the original stub curve. Even if the original survivor curve is complete from 100% to zero percent, it is desirable to eliminate any irregularities, as there is still an extrapolation for the vintages which have not yet lived to the age at which the curve reaches zero percent. In this study, the smoothing of the original curve with established type curves was used to eliminate irregularities in the original curve.

The lowa type curves are used in this study to smooth those original stub curves which are expressed as percents surviving at ages in years. Each original survivor curve was compared to the lowa curves using visual and mathematical matching in order to determine the better fitting smooth curves. In Figures 6, 7, and 8, the original curve developed in Schedule 4 is compared with the L, S, and R lowa type curves which most nearly fit the original survivor curve. In Figure 6, the L1 curve with an average life between 12 and 13 years appears to be the best fit. In Figure 7, the S0 type curve with a 12-year average life appears to be the best fit and appears to be better than the L1 fitting. In Figure 8, the R1 type curve with a 12-year average life appears to be the best fit and appears to be better than either the L1 or the S0.

In Figure 9, the three fittings, 12-L1, 12-S0 and 12-R1 are drawn for comparison purposes. It is probable that the 12-R1 lowa curve would be selected as the most representative of the plotted survivor characteristics of the group.

PART III. SERVICE LIFE CONSIDERATIONS

FIELD TRIPS

In order to be familiar with the operation of the Company and observe representative portions of the plant, a field trip has been conducted. A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements are obtained during field trips. This knowledge and information were incorporated in the interpretation and extrapolation of the statistical analyses.

The following is a list of the locations visited during the most recent field trips.

November 7, 2022

Woodsdale Generating Station Woodsdale Substation East Bend Generating Plant

January 30, 2017

Miami Fort Generating Substation East Bend Generating Station Woodsdale Generating Station Crescent Substation Hebron Substation Richwood Substation Limaburg Substation

SERVICE LIFE ANALYSIS

The service life estimates were based on informed judgment which considered a number of factors. The primary factors were the statistical analyses of data; current Company policies and outlook as determined during conversations with management; and the survivor curve estimates from previous studies of this company and other electric companies.

For many of the plant accounts and subaccounts for which survivor curves were estimated, the statistical analyses using the retirement rate method resulted in good to excellent indications of the survivor patterns experienced. These accounts represent 75 percent of depreciable plant. Generally, the information external to the statistics led to little or no significant departure from the indicated survivor curves for the accounts listed below. The statistical support for the service life estimates is presented in the section beginning on page VII-2.

| 3960 | Power Operated Equipment |

Account 3640, Poles, Towers and Fixtures, and Account 3650, Overhead Conductors and Devices are used to illustrate the manner in which the study was conducted for the groups in the preceding list. Account 3640 represents 4 percent, and Account 3650 represents 7 percent of the total depreciable plant. Aged plant accounting data have been compiled for the years 1956 through 2021. These data have been coded in the course of the Company's normal record keeping according to account or property group, type of transaction, year in which the transaction took place, and year in which the electric plant was placed in service. The retirements, other plant transactions, and plant additions were analyzed by the retirement rate method.

The survivor curve estimate for Account 3640, Poles, Towers and Fixtures, is the 55-R0.5 and is based on the statistical indication for the period 1956 through 2021. The 55-R0.5 is an excellent fit of the significant portion of the original survivor curve as set forth on page VII-101 consistent with management outlook for a continuation of historical experience, and at the upper end of the typical service life range of 40 to 55 years for distribution poles and fixtures. The previous estimate for this account was a 54-R0.5 survivor curve.

The survivor curve estimate for Account 3650, Overhead Conductors and Devices, is based on the statistical indications for the period 1956-2021 and 1992-2021. The Iowa

53-O1 is an excellent fit of the original survivor curve. The 53 year service life is within the typical service life range of 40 to 55 years for conductors. The 53-year life reflects the Company's continued practices of steady retirements for all vintages. The previous estimate was an lowa 52-O1 survivor curve.

<u>Life Span Estimates</u>

The life span technique was used for the Company's Power Production accounts, as well as major structures in Account 1900. The life span procedure is appropriate for these accounts since many of the assets within the plant will be retired concurrently. Probable retirement dates were estimated for each generating facility and structure. Life spans for each Steam and Other Production Plant were the result of considering experienced life spans of similar generating units, the age of surviving units, general operating characteristics of the units, major refurbishing, and discussions with management personnel concerning the probable long-term outlook for the units, and the estimate of the operating partner, if applicable.

The depreciable life span estimate for steam, base-load units at East Bend is 54 years. The typical range of life spans for such units in the past has been 50 to 65 years, however, recent life expectations have been for less than 50 years. This life span represents the expected depreciable life of the facility under its current configuration. Future capital expenditures can extend a facility's depreciable life, however, such changes to depreciable life would not be prudent until the capital expenditures are actually put into plant in service. A life span of 48 years was estimated for the combustion turbines at Woodsdale. Life span estimates are typically 35 to 45 years for combustion turbines which are used primarily as peaking units, however these units have had upgrades to extend the overall life. The life span for solar units is 30 years.

The life span and probable retirement dates used for steam and other production plants are as follows:

| Depreciable Group | Major Year in Service | Depreciable <u>Life Date</u> | <u>Depreciable</u> <u>Life Span</u> |
|---|----------------------------|---------------------------------|--|
| Steam Production Plant East Bend | 1981 | 2035 | 54 |
| Other Production Plant Woodsdale Crittenden Walton | 1992, 2017 2017 2017 | 2040 2047 2047 | 48,23 30 30 |

The survivor curve estimates for the remaining accounts were based on judgment incorporating the statistical analyses and previous studies for this and other electric utilities.

Similar studies were performed for the remaining plant accounts. Each of the judgments represented a consideration of statistical analyses of aged plant activity, management's outlook for the future, and the typical range of lives used by other electric companies.

The selected amortization periods for other General Plant accounts are described in the section "Calculated Annual and Accrued Amortization."

|----------|-----|------|-----|------|-------|----------|
| PARI IV. | | SALV | AGE | CONS | IUERA | 4 I IUNS |

PART IV. NET SALVAGE CONSIDERATIONS

NET SALVAGE ANALYSIS

The estimates of net salvage by account were based in part on historical data compiled for the years 1990 through 2021. Cost of removal and gross salvage were expressed as percents of the original cost of plant retired, both on annual and three-year moving average bases. The most recent five-year average also was calculated for consideration. The net salvage estimates by account are expressed as a percent of the original cost of plant retired.

Net Salvage Considerations

The estimates of future net salvage are expressed as percentages of surviving plant in service, i.e., all future retirements. In cases in which removal costs are expected to exceed salvage receipts, a negative net salvage percentage is estimated. The net salvage estimates were based on judgment which incorporated analyses of historical cost of removal and gross salvage data, expectations with respect to future removal requirements and markets for retired equipment and materials.

The analyses of historical cost of removal and gross salvage data are presented in the section titled "Net Salvage Statistics" for the plant accounts for which the net salvage estimate relied partially on those analyses.

Statistical analyses of historical data for the period 1990 through 2021 contributed significantly toward the net salvage estimates for 28 plant accounts, representing 81 percent of the depreciable plant, as follows:

COMMON PLANT

1900 Structures and Improvements

STEAM PRODUCTION PLANT

- 3110 Structures and Improvements
- 3120 Boiler Plant Equipment
- 3140 Turbogenerator Units
- 3150 Accessory Electric Equipment
- 3160 Miscellaneous Power Plant Equipment

OTHER PRODUCTION PLANT

GENERAL PLANT

3921 Transportation Equipment - Trailers

Account 3650, Overhead Conductors and Devices, is used to illustrate the manner in which the study was conducted for the groups in the preceding list. Net salvage data for the period 1990 through 2021 were analyzed for this account. The data include cost of removal, gross salvage and net salvage amounts and each of these amounts is expressed as a percent of the original cost of regular retirements. Three-year moving averages for the 1990-1992 through 2019-2021 periods were computed to smooth the annual amounts.

Cost of removal was high during the early 1990s and in the years 1997, 2003, 2005, 2010, 2018 and 2021. The high removal cost in the early 1990s related to practices

during that time. The high removal in 2003 and 2005 related to location of the assets. The high cost of removal in 2010 related to the high labor needed to remove assets due to the events of the flood. The high removal in 2018 and 2021 related to the high labor needed to replace conductor. Cost of removal for the most recent five years averaged 81 percent.

Gross salvage has diminished drastically since 1999. The most recent five-year average of 1 percent gross salvage reflects recent trends of minimal salvage value for conductor.

The net salvage percent based on the overall period 1990 through 2021 is 43 percent negative net salvage. The most common range of estimates made by other electric companies for overhead conductor is negative 20 to negative 50 percent. The net salvage estimate for overhead conductor is negative 40 percent, is within the range of estimates for other electric companies, reflects the trend to higher cost of removal and reflects the overall experience for negative net salvage, but does not consider all of the higher cost of removal amounts to be common.

The overall net salvage estimates for the Company's production facilities, for which the life span method is used, is based on estimates of both final net salvage and interim net salvage. Final net salvage is the net salvage experienced at the end of a production plant's life span. Interim net salvage is the net salvage experienced for interim retirements that occur prior to the final retirement of the plant. The final net salvage estimates in the study were based on decommissioning analyses performed by various engineering organizations. The interim net salvage estimates were based in part on analysis of historical interim retirement and net salvage data. Based on informed judgment that incorporated these interim net salvage analyses for each plant account, an interim net salvage estimate of negative 20 percent was used for steam plant accounts, a negative 7 percent estimate was used for other production plant and a negative 5 percent for solar production plant accounts.

The interim survivor curve estimates for each account and production facility were used to calculate the percentage of plant expected to be retired as interim retirements and final retirements. These are shown on Table 1 in the Net Salvage Statistics section on page VIII-2. These percentages were used to determine the weighted net salvage estimate for each account and production facility based on the interim and final net salvage estimates. These calculations, as well as the estimated final net salvage amounts and interim net salvage percents, are shown on Table 2 of the Net Salvage Statistics section on page VIII-3. The calculation of final(terminal) net salvage by location is presented on Table 3 on page VIII-4.

The net salvage percents for the remaining accounts were based on judgment incorporating estimates of previous studies of this and other electric utilities.

Generally, the net salvage estimates for the general plant accounts were zero percent, consistent with amortization accounting.

PART V. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

PART V. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

GROUP DEPRECIATION PROCEDURES

A group procedure for depreciation is appropriate when considering more than a single item of property. Normally the items within a group do not have identical service lives, but have lives that are dispersed over a range of time. There are two primary group procedures, namely, average service life and equal life group. In the average service life procedure, the rate of annual depreciation is based on the average life or average remaining life of the group, and this rate is applied to the surviving balances of the group's cost. A characteristic of this procedure is that the cost of plant retired prior to average life is not fully recouped at the time of retirement, whereas the cost of plant retired subsequent to average life is more than fully recouped. Over the entire life cycle, the portion of cost not recouped prior to average life is balanced by the cost recouped subsequent to average life.

Single Unit of Property

The calculation of straight line depreciation for a single unit of property is straightforward. For example, if a \$1,000 unit of property attains an age of four years and has a life expectancy of six years, the annual accrual over the total life is:

$$\frac{\$1,000}{(4+6)}$$
 = \\$100 per year.

The accrued depreciation is:

$$$1,000\left(1-\frac{6}{10}\right)=$400.$$

Remaining Life Annual Accruals

For the purpose of calculating remaining life accruals as of December 31, 2021, the depreciation reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation follow. The detailed calculations as of December 31, 2021, are set forth in the Results of Study section of the report.

Average Service Life Procedure

In the average service life procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life of the vintage. The average remaining life is a directly weighted average derived from the estimated future survivor curve in accordance with the average service life procedure.

The calculated accrued depreciation for each depreciable property group represents that portion of the depreciable cost of the group which would not be allocated to expense through future depreciation accruals, if current forecasts of life characteristics are used as the basis for such accruals. The accrued depreciation calculation consists of applying an appropriate ratio to the surviving original cost of each vintage of each account, based upon the attained age and service life. The straight line accrued depreciation ratios are calculated as follows for the average service life procedure:

$$Ratio = 1 - \frac{Average\ Remaining\ Life}{Average\ Service\ Life}.$$

CALCULATION OF ANNUAL AND ACCRUED AMORTIZATION

Amortization is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

Normally, the distribution of the amount is in equal amounts to each year of the amortization period.

The calculation of annual and accrued amortization requires the selection of an amortization period. The amortization periods used in this report were based on judgment which incorporated a consideration of the period during which the assets will render most of their service, the amortization period and service lives used by other utilities, and the service life estimates previously used for the asset under depreciation accounting.

Amortization accounting is proposed for a number of accounts that represent numerous units of property, but a very small portion of depreciable electric plant in service. The accounts and their amortization periods are as follows:

| | <u>Account</u> | Amortization Period, <u>Years</u> |
|------|----------------------------------|---|
| 1910 | Office Furniture and Equipment | 20 |
| 1911 | Electric Data Processing | 5 |
| 1940 | Tools, Shop and Garage Equipment | 25 |
| 1970 | Communication Equipment | 15 |
| 1980 | Miscellaneous Equipment | 15 |
| 3910 | Office Furniture and Equipment | 20 |
| 3911 | Electric Data Processing | 5 |
| 3940 | Tools, Shop and Garage Equipment | 25 |
| 3970 | Communication Equipment | 15 |

For the purpose of calculating annual amortization amounts as of December 31, 2021, the book depreciation reserve for each plant account or subaccount is assigned or allocated to vintages. The book reserve assigned to vintages with an age greater than the amortization period is equal to the vintage's original cost. The remaining book reserve is allocated among vintages with an age less than the amortization period in proportion to the calculated accrued amortization. The calculated accrued amortization is equal to the original cost multiplied by the ratio of the vintage's age to its amortization period. The

annual amortization amount is determined by dividing the future amortizations (original cost less allocated book reserve) by the remaining period of amortization for the vintage.

PART VI. RESULTS OF STUDY

PART VI. RESULTS OF STUDY

QUALIFICATION OF RESULTS

The calculated annual and accrued depreciation are the principal results of the study. Continued surveillance and periodic revisions are normally required to maintain continued use of appropriate annual depreciation accrual rates. An assumption that accrual rates can remain unchanged over a long period of time implies a disregard for the inherent variability in service lives and net salvage and for the change of the composition of property in service. The annual accrual rates were calculated in accordance with the straight line remaining life method of depreciation, using the average service life procedure based on estimates which reflect considerations of current historical evidence and expected future conditions.

The annual depreciation accrual rates are applicable specifically to the electric and common plant in service as of December 31, 2021. For most plant accounts, the application of such rates to future balances that reflect additions subsequent to December 31, 2021, is reasonable for a period of three to five years.

DESCRIPTION OF DETAILED TABULATIONS

Table 1 sets forth a summary of the results of the study as applied to the original cost of electric and common plant at December 31, 2021. These results are presented on pages VI-4 through VI-6 of this report. The schedule sets forth the original cost, the book depreciation reserve, future accruals, the calculated annual depreciation rate and amount, and the composite remaining life related to electric and common plant.

The service life estimates were based on judgment that incorporated statistical analysis of retirement data, discussions with management and consideration of estimates made for other electric utilities. The results of the statistical analysis of service life are presented in the section beginning on page VII-2, within the supporting documents of this report.

For each depreciable group analyzed by the retirement rate method, a chart depicting the original and estimated survivor curves followed by a tabular presentation of the original life table(s) plotted on the chart. The survivor curves estimated for the depreciable groups are shown as dark smooth curves on the charts. Each smooth survivor curve is denoted by a numeral followed by the curve type designation. The numeral used is the average life derived from the entire curve from 100 percent to zero percent surviving. The titles of the chart indicate the group, the symbol used to plot the points of the original life table, and the experience and placement bands of the life tables which were plotted. The experience band indicates the range of years for which retirements were used to develop the stub survivor curve. The placements indicate, for the related experience band, the range of years of installations which appear in the experience.

The analyses of salvage data are presented in the section titled, "Net Salvage Statistics." The tabulations present annual cost of removal and gross salvage data, three-year moving averages and the most recent five-year average. Data are shown in dollars and as percentages of original costs retired.

The tables of the calculated annual depreciation applicable to depreciable assets as of December 31, 2021 are presented in account sequence starting on page IX-2 of the supporting documents. The tables indicate the estimated survivor curve and net salvage percent for the account and set forth, for each installation year, the original cost, the calculated accrued depreciation, the allocated book reserve, future accruals, the remaining life, and the calculated annual accrual amount.

|------|--|-------------|
| I. | INTRODUCTION AND PURPOSE | 1 |
| II. | TEST PERIOD AND RATE BASE | 3 |
| III. | FILING REQUIREMENTS SPONSORED BY WITNESS | 4 |
| IV. | ENVIRONMENTAL SURCHARGE MECHANISM | 16 |
| V. | DEFERRAL MECHANISM | 17 |
| VI. | CONCLUSION | 19 |

I. <u>INTRODUCTION AND PURPOSE</u>

- 1 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
- 2 A. My name is Lisa D. Steinkuhl and my business address is 139 East Fourth Street,
- 3 Cincinnati, Ohio 45202.
- 4 Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?
- 5 A. I am employed by Duke Energy Business Services LLC (DEBS) as Director Rates
- & Regulatory Planning. DEBS provides various administrative and other services
- 7 to Duke Energy Kentucky, Inc., (Duke Energy Kentucky or Company) and other
- 8 affiliated companies of Duke Energy Corporation (Duke Energy).
- 9 Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND
- 10 **PROFESSIONAL EXPERIENCE.**
- 11 A. I received a Bachelor Degree in Mathematics from Western Kentucky University
- in Bowling Green, Kentucky. After completing my Bachelor Degree, I received a
- 13 Post Baccalaureate Certificate in Professional Accountancy from the University
- of Southern Indiana in Evansville, Indiana. I became a Certified Public
- 15 Accountant (CPA) in the State of Ohio in 1993. After receiving my Post
- Baccalaureate Certificate in 1988, I was employed by small public accounting
- firms. I was hired by Cinergy Services, Inc., (Cinergy Services, predecessor to
- DEBS) in 1996 as a tax accountant. I held various positions with Cinergy Services
- including responsibilities in Regulated Business Financial Operations,
- 20 Commercial Business Asset Management, and Budgets and Forecasts. I joined the
- Rates Department in April 2006 as a Lead Rates Analyst and was promoted to
- Rates & Regulatory Manager in January 2014 and Utility Strategy Director in

- 1 May 2018. I have held my current position as Director, Rates & Regulatory
- 2 Planning since March 2022.
- 3 Q. PLEASE DESCRIBE YOUR RESPONSIBILITIES AS DIRECTOR,
- 4 RATES AND REGULATORY PLANNING.
- 5 A. I am responsible for the preparation of financial and accounting data used in retail
- 6 rate filings, Federal Energy Regulatory Commission (FERC) filings and various
- 7 other rate recovery mechanisms for Duke Energy Kentucky and Duke Energy Ohio,
- 8 Inc.
- 9 Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY
- 10 **PUBLIC SERVICE COMMISSION?**
- 11 A. Yes.
- 12 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS
- 13 **PROCEEDING?**
- 14 A. I support the revenue requirement proposed by Duke Energy Kentucky. To that end,
- I support various adjustments to the projected data for the forecasted test period
- provided by Duke Energy Kentucky witness, Mr. Grady S. "Tripp" Carpenter. I also
- sponsor Filing Requirements (FR) 16(6)(b), 16(6)(c), 16(6)(f) and 16(7)(t). I also
- sponsor the following schedules: Schedule A in satisfaction of FR 16(8)(a) and
- 19 Schedule B-1, in response to FR 16(8)(b); Schedules C-1 through C-2.1 in
- compliance with FR 16(8)(c); Schedules D-1, D-2.17 through D-2.23, and D-2.25
- 21 through D-2.31, in compliance with FR 16(8)(d); Schedules F-1 through F-7 in
- compliance with FR 16(8)(f); and Schedules G-1 and H in response to FR 16(8)(g)
- and FR16((8)(h), respectively.

II. TEST PERIOD AND RATE BASE

| 1 | Q. | WHAT IS THE TEST PERIOD IN THIS PROCEEDING? |
|----|----|---|
| 2 | A. | The Company has elected to use a forecasted test period in this proceeding. The |
| 3 | | forecasted test period reflects the twelve months ending June 30, 2024, adjusted |
| 4 | | for known and measurable changes, and a base period of twelve months ending |
| 5 | | February 28, 2023. The base period consists of six months of actual data, through |
| 6 | | August 31, 2022, and the remaining six months consist of forecasted data. |
| 7 | Q. | HOW WERE THE RATE BASE AND CAPITALIZATION DETERMINED |
| 8 | | IN THIS PROCEEDING? |
| 9 | A. | The Company determined rate base and capitalization using a thirteen-month |
| 10 | | average for the forecasted test period ending June 30, 2024. The base period rate |
| 11 | | base and capitalization represent end-of-period balances. |
| 12 | Q. | DID THE COMPANY FOLLOW THE COMMISSION'S GUIDELINES IN |
| 13 | | DEVELOPING THE BASE AND FORECASTED TEST PERIOD DATA? |
| 14 | A. | Yes. Per the Commission's rules, 807 KAR 5:001, Section 16(7)(e)(2), "the forecast |
| 15 | | contains the same assumptions and methodologies as used in the forecast period for |
| 16 | | use by management." As described by Mr. Carpenter, the base and forecasted test |
| 17 | | periods were developed using the same methods applied in the Company's annual |
| 18 | | budgeting process. The first six months of the base period are actual results and are |

taken from the Company's books and records.

19

III. FILING REQUIREMENTS SPONSORED BY WITNESS

- 1 Q. PLEASE DESCRIBE FR 16(6)(b).
- 2 A. FR 16(6)(b) requires that the forecasted adjustments are limited to the twelve months
- 3 immediately following the suspension period. The forecasted adjustments in this
- 4 proceeding are limited to the twelve months immediately following the suspension
- 5 period.
- 6 Q. PLEASE DESCRIBE FR 16(6)(c).
- 7 A. FR 16(6)(c) requires that capitalization and net investment rate base are based on
- 8 a thirteen-month average for the forecasted test period, in this case, the twelve
- 9 months ending June 30, 2024. In this proceeding, the capitalization and net
- investment in rate base are based on a thirteen-month average.
- 11 Q. PLEASE DESCRIBE FR 16(6)(f)
- 12 A. FR 16(6)(f) contains a reconciliation of the capital and rate base used to determine
- the revenue requirement in this case.
- 14 Q. PLEASE DESCRIBE FR 16(7)(t)
- 15 A. FR 16(7)(t) contains a list of all commercially available or in-house developed
- 16 computer software, programs, and models used in the development of the schedules
- and workpapers associated with the filing of the utility's application.
- 18 Q. PLEASE DESCRIBE SCHEDULE A.
- 19 A. Schedule A is the overall financial summary for both the base period and the
- forecasted period at present rates. Based on the filing in this proceeding, as adjusted,
- 21 the Company's electric operations are projected to earn a return on rate base of 2.738
- 22 percent for the forecasted test period, which is considerably less than the 7.526

percent return requested in this proceeding. In order to achieve the appropriate return on rate base, Duke Energy Kentucky's base electric revenues must increase by \$75,176,777 as shown in Schedule A.

4 O. PLEASE DESCRIBE SCHEDULE B-1.

A.

A.

Schedule B-1 is the jurisdictional rate base summary for both the base and forecasted periods and is supported by various schedules in Section B of the Company's filing. The plant in service, and reserve for accumulated depreciation and amortization for the base and forecasted periods were summarized from Schedules B-2, B-3, and B-3.2 as supported by Company witnesses Ms. Huyen C. Dang and Mr. Carpenter. The cash working capital from Schedule B-5 is supported by a lead-lag study prepared by Company witness Mr. Paul M. Normand. The other working capital component was summarized from Schedule B-5, as supported by Mr. Carpenter, and other items of rate base were obtained from Schedule B-6, as supported by Mr. John R. Panizza. The jurisdictional electric rate base for the forecast period as contained in Schedule B-1 is \$1,176,674,865.

17 Q. PLEASE DESCRIBE SCHEDULE C-1.

Schedule C-1 is a jurisdictional operating income summary for the forecasted period ended June 30, 2024. This schedule includes the operating income summary at both current and proposed rates. It assumes that the Commission allows the total amount of the requested electric base revenue increase of \$75,176,777. The adjusted operating results at current rates were summarized from Schedule C-2 and the proposed increase was obtained from Schedule M. The revenue at proposed rates

was developed by adding the revenue increase to the operating revenues at current rates. The related expenses and taxes on the proposed increase were added to the current adjusted operating results to determine the jurisdictional *pro forma* amounts and the corresponding rate of return. The rate base as shown on this schedule is calculated on Schedule B-1.

Q. PLEASE DESCRIBE SCHEDULE C-2.

A.

Schedule C-2 is a jurisdictional operating income statement to be used for ratemaking purposes. In order to develop the forecasted test period that is appropriate for ratemaking, a two-step process was required. First, as required by 807 KAR 5:001, Section 16(6)(a), it was necessary to show the adjustments necessary to transform the financial data for the base period into the forecasted period. Second, it was necessary to adjust the forecasted period data to reflect any adjustments required to ensure that the revenues and expenses to be recovered in rates are representative of the expected costs to serve Duke Energy Kentucky electric customers on an ongoing basis.

Schedule C-2 starts with the unadjusted base period and shows the adjustments required to extend the Company's income statement from the base period to the forecasted period. The next column on the schedule summarizes the adjustments to the unadjusted forecasted test period. These adjustments are described below. Generally, they relate to costs that were not reflected in the Company's forecasted data or were reflected in the forecasted data but not allocable to Duke Energy Kentucky's electric customers or were made to reflect traditional ratemaking methodology. The unadjusted operating results are summarized from

- Schedule C-2.1. The adjusted amounts include the effects of the adjustments
- 2 summarized on Schedule D-1.

3 Q. PLEASE DESCRIBE SCHEDULE C-2.1.

- 4 A. Schedule C-2.1 sets forth the detail of total Company operating results for both the
- 5 base and forecasted periods. The operating results as shown in this Schedule C-2.1
- 6 are listed by account and are summarized on Schedule C-2.

7 Q. PLEASE DESCRIBE SCHEDULE D-1.

- 8 A. Schedule D-1 is a summary of the detailed adjustments to test period operating
- 9 revenues and operating expenses as set forth in Schedules D-2.1 through D-2.31.

10 Q. WHY ARE ADJUSTMENTS TO THE BASE AND FORECASTED

PERIOD INFORMATION NECESSARY?

11

- 12 A. The adjustments shown in Schedules D-2.1 through D-2.15 reflect the normal
- budgetary changes that are expected to occur from the base period through the
- forecasted period. Schedules D-2.1 through D-2.15, are sponsored by Mr. Carpenter.
- The remaining adjustments, shown in Schedules D-2.16 through D-2.31, present
- adjustments to the forecasted period data needed to ensure that the correct level of
- 17 revenue and expense is included in rates at the proper ongoing level. Some costs,
- although reflected in the normal forecasting process, are not recoverable from Duke
- 19 Energy Kentucky's electric customers. Other adjustments were made to reflect
- 20 traditional ratemaking methodology (e.g., amortizing a regulatory asset to reflect the
- 21 Commission's prior orders). The reflection of a proper cost level is necessary to
- 22 ensure that customers are not paying for more than the cost of providing service and
- 23 to give the Company a reasonable opportunity to earn its authorized return. Ignoring

- appropriate adjustments to the test period used for setting rates puts customers at risk
- 2 for overpaying for service and puts the Company at risk for potentially under-
- 3 recovering its ongoing costs. Schedule D-2.16 is sponsored by Mr. Carpenter.
- 4 Schedule D-2.24 is sponsored by Ms. Dang. Schedules D-2.17 through D-2.23 and
- 5 D-2.25 through 2.31 are discussed in my testimony below.

6 Q. HOW ARE THE INCOME TAX EFFECTS OF THESE ADJUSTMENTS

7 SHOWN ON YOUR SCHEDULES?

- 8 A. All applicable adjustments to state and federal income taxes resulting from the
- 9 adjustments, described below, are shown for each individual adjustment on Schedule
- 10 D-1.

11 Q. PLEASE DESCRIBE SCHEDULE D-2.17.

- 12 A. The adjustment in Schedule D-2.17 is to amortize the projected cost of presenting
- the rate case. Duke Energy Kentucky proposes to amortize these costs over five
- years, which increases test period operating expenses by \$227,200.

15 Q. PLEASE DESCRIBE SCHEDULE D-2.18.

- 16 A. Schedule D-2.18 is an adjustment required to eliminate from base rates, both
- 17 revenue and expenses recovered in the Environmental Surcharge Mechanism
- 18 (Rider ESM) not being "rolled into base rates" in this proceeding. I will discuss in
- 19 further detail later in my testimony the costs being "rolled into base rates." The
- 20 effect of the adjustment on electric operations is a decrease in electric operating
- 21 revenue of \$14,528,244 and a decrease in pre-tax operating expenses of
- 22 \$14,686,904.

Q. PLEASE DESCRIBE SCHEDULE D-2.19.

A.

A.

Interest synchronization is used to ensure that the revenue requirement reflects the appropriate income tax effects for interest expense determined in the weighted-average cost of capital. Schedule D-2.19 presents the calculation of the state and federal income taxes on the interest cost included in the cost of capital. The adjustment is calculated by first determining the debt portion of total electric rate base. The total electric rate base is multiplied by the long-term and short-term debt percentage of total capital structure.

The result is then multiplied by the average cost of long-term and short-term debt. The sum of these results represents the annualized electric interest cost deductible for income tax purposes. From this annualized total, we subtract the forecasted test period electric book interest to determine the electric interest expense adjustment for income tax purposes. The effect of this adjustment on electric operations is to decrease test period federal income taxes by \$306,380 and to decrease test period state income taxes by \$76,278.

Q. PLEASE DESCRIBE SCHEDULE D-2.20.

Revenue and expenses associated with off-system sales are included in the budget and, consequently, in the forecasted test period. Schedule D-2.20 is intended to completely exclude all revenue and costs that will flow through the Company's Profit Sharing Mechanism (Rider PSM) from the calculation of the forecasted test year revenue requirement. Base Revenue is increased by \$1,594,610 and Other Revenue is reduced by \$7,416,505 for the revenue flowing through Rider PSM. Operating expenses are reduced by \$4,963,221 for related expenses flowing

- through Rider PSM. Related expenses include fuel, purchased power, reactive
- 2 power expense, allocated emission allowance expenses, and other variable
- 3 expenses.

4 Q. PLEASE DESCRIBE SCHEDULE D-2.21.

5 A. Schedule D-2.21 is reserved for future use.

6 Q. PLEASE DESCRIBE SCHEDULE D-2.22.

- 7 A. The adjustment in Schedule D-2.22 eliminates from the forecasted test year
- 8 revenue requirement the impact of Demand Side Management (DSM) revenue of
- 9 \$6,868,699 and pre-tax DSM operating expense of \$5,560,160. Schedule D-2.22
- is intended to completely exclude all revenue and costs that will flow through the
- 11 Company's Rider DSM from the calculation of the forecasted test year revenue
- requirement. The adjustment recognizes that revenue and expenses associated
- with the Company's energy efficiency programs are addressed in its existing
- Rider DSM.

15

Q. PLEASE DESCRIBE SCHEDULE D-2.23.

- 16 A. Schedule D-2.23 is an adjustment to eliminate miscellaneous expenses such as
- 17 community relations, advertising, donations, governmental affairs, club dues and
- miscellaneous events expenses from the forecasted test period. These adjustments
- were made to comply with the Commission's orders in prior rate proceedings.
- The effect of the adjustment on electric operations is a decrease in pre-tax
- operating expenses of \$1,067,028.

Q. PLEASE DESCRIBE SCHEDULE D-2.25.

1

- 2 A. Schedule D-2.25 is an adjustment to eliminate unbilled revenue from the
- forecasted test period. The adjustment is needed to be consistent with the revenue
- and volume computations contained on Schedule M. The revenue and volume
- 5 amounts on Schedule M are based on test year billing statistics and, consequently,
- do not reflect estimated unbilled sales. The adjustment increases revenue in the
- 7 forecasted test period by \$372,067.

8 Q. PLEASE DESCRIBE SCHEDULE D-2.26.

9 A. Schedule D-2.26 is reserved for future use.

10 Q. PLEASE DESCRIBE SCHEDULE D-2.27.

- 11 A. Schedule D-2.27 is an adjustment to include in the forecasted test period,
- amortization of the regulatory asset balances related to the Planned Outage O&M
- and Forced Outage Purchased Power, for which the Company was granted
- deferral authority in Case No. 2017-00321. The adjustment increases electric
- operating expense in the forecasted test period by \$2,025,745. I discuss this
- adjustment and the deferral mechanisms later in my testimony.

17 Q. PLEASE DESCRIBE SCHEDULE D-2.28.

- 18 A. Schedule D-2.28 is an adjustment to eliminate incentive compensation from the
- 19 forecasted test period related to the achievement of financial goals and
- compensation for Restricted Stock Units (RSUs) consistent with what the
- Commission previously approved in the Company's base rate cases, Case No.
- 22 2017-00321 and Case No. 2018-00261. Company witness Mr. Jacob J. Stewart
- discusses why the Company did not eliminate the portion of the short-term

incentive payments that "would only be paid out in the event that a predetermined "circuit breaker" EPS value is met in the fiscal year." The adjustment removes long-term and short-term incentive compensation included in the forecasted test period tied to the achievement of financial goals of the Company. The RSU component of employee compensation is a fixed percentage of the employee's salary and, therefore, it is not related to the achievement of the Company's financial goals. Nevertheless, the Company eliminated this expense consistent with Commission precedence in prior cases. The adjustment decreases incentive compensation expense in the forecasted test period by \$2,192,033.

The adjustment also removes payroll taxes associated with the short-term incentive compensation being eliminated. This adjustment decreases taxes other than income in the forecasted test period by \$91,600.

13 Q. PLEASE DESCRIBE SCHEDULE D-2.29.

A. Schedule D-2.29 is an adjustment to eliminate pension expense related to employees who participate in both a defined benefit pension program and a 401K company match program and expenses for the Company's Supplemental Executive Retirement Plan (SERP). This is made to be consistent with Commission rulings in prior cases. The adjustment decreases operating expense in the forecasted test period by \$1,009,166.

20 Q. PLEASE DESCRIBE SCHEDULE D-2.30.

21 A. Schedule D-2.30 is reserved for future use.

Q. PLEASE DESCRIBE SCHEDULE D-2.31.

1

4

5

7

8

9

10

11

12

13

14

15

16

17

18

19

2 Schedule D-2.31 is an adjustment for uncollectible expenses. The Company sells A. 3 its accounts receivable to an affiliate, Cinergy Receivables, L.L.C. (Cinergy Receivables) at a discount. The discount is based on a formula that compensates the purchasing company for the time value of money and reflects Duke Energy 6 Kentucky's net bad debt expense.

> Since the short-term debt component of the Company's weighted-average cost of capital calculation in Schedule J-1 includes the average balance of receivables at the interest rate being paid to Cinergy Receivables, the adjustment shown in Schedule D-2.31 ensures that there is no double recovery of the time value of money in the uncollectible expense. Consequently, the time value of money component of the discount being charged to Uncollectible Expense (Account 904 and 426) is eliminated from the forecasted test period expenses. The adjustment reduces test period expenses by \$1,801,031.

PLEASE DESCRIBE SCHEDULE F-1. Q.

A. Schedule F-1 sets forth the detail, by account, of Social and Service Club Dues for both the base and unadjusted forecasted test periods. All amounts are either charged below the line or have been removed from operating expenses on Schedule D-2.23 and, thus, not included in the forecasted test period revenue requirement.

Q. PLEASE DESCRIBE SCHEDULE F-2.1.

- 2 A. Schedule F-2.1 sets forth the detail, by account, of Charitable Contributions for both
- 3 the base period and unadjusted forecasted test periods. All amounts are charged
- 4 below the line and, thus, not included in the forecasted test period revenue
- 5 requirement.

1

6 Q. PLEASE DESCRIBE SCHEDULE F-2.2.

- 7 A. Schedule F-2.2 indicates that the Initiation Fees and Country Club expenses for the
- 8 base and forecasted test periods are included on Schedule F-1.

9 Q. PLEASE DESCRIBE SCHEDULE F-2.3.

- 10 A. Schedule F-2.3 sets forth the detail, by account of Employee Party, Outing, & Gift
- Expense for both the base and forecasted test periods.

12 Q. PLEASE DESCRIBE SCHEDULE F-3.

- 13 A. Schedule F-3 sets forth the detail, by account, of Customer Service and
- 14 Informational Expense, Sales Expense and General Advertising Expense for both
- the base and unadjusted forecasted test periods. Advertising costs included in
- Account 913 and 930150 have been removed from operating expenses on Schedule
- D-2.23 and, thus, not included in the forecasted test period revenue requirement.

18 Q. PLEASE DESCRIBE SCHEDULE F-4.

- 19 A. Schedule F-4 sets forth additional details supporting advertising costs for both the
- base and unadjusted forecasted test periods. As noted above, these costs are not
- included in the forecasted test period revenue requirement.

22 Q. PLEASE DESCRIBE SCHEDULE F-5.

23 A. Schedule F-5 sets forth the detail of Professional Services Expenses for both the

1 base and forecasted test periods.

2

18

19

20

21

22

23

O. PLEASE DESCRIBE SCHEDULE F-6.

A. Schedule F-6, entitled "Rate Case Expense," indicates the estimated expense of presenting this case. The top half of this schedule details the estimated expense of this proceeding. Also included is a comparison to the rate case expense in the Company's last two rate case proceedings. The bottom half of this schedule shows the amortization over a five-year period. This amount is included in expense through the adjustment contained in Schedule D-2.17.

9 Q. PLEASE DESCRIBE SCHEDULE F-7.

10 A. Schedule F-7 sets forth Civic, Political and Related Expense for both the base and
11 unadjusted forecasted test periods. All amounts are charged below the line and, thus,
12 not included in the forecasted test period revenue requirement.

13 Q. PLEASE DESCRIBE SCHEDULE G-1.

A. Schedule G-1 contains a summary of all payroll costs and related benefits and taxes included in electric Operations & Maintenance (O&M) expense for both the base and forecasted test periods.

17 Q. PLEASE DESCRIBE SCHEDULE H.

A. Schedule H, entitled "Computation of Gross Revenue Conversion Factor," (GRCF) sets forth the calculation of the GRCF. This is the factor, or multiplier, used to gross-up the operating income deficiency to a revenue deficiency amount. It includes an uncollectible accounts factor which represents the portion of the average total discount rate that is related to charge-offs, collection costs, and late payment charges. Also included in the GCRF are the Kentucky Public Service Commission

| 1 | assessment, and state and federal income taxes. The GRCF is included on Schedule |
|---|--|
| 2 | A and is used to compute the calculated revenue deficiency. |

IV. <u>ENVIRONMENTAL SURCHARGE MECHANISM</u>

3 Q. CAN YOU BRIEFLY EXPLAIN THE COSTS CURRENTLY INCLUDED

IN THE ENVIRONMENTAL SURCHARGE MECHANISM (ESM)?

A.

A.

The ESM includes the return on eligible environmental compliance rate base including eligible environmental compliance plant investments net of associated accumulated depreciation and accumulated deferred income taxes (ADIT). It also includes the recovery of environmental operating expenses including property taxes and depreciation expense associated with the eligible environmental compliance investments, as well as environmental reagent expenses, amortization of coal ash and landfill closure ARO, and the native portion of emission allowance expenses. The rider also credits back to customers any proceeds from emission allowance sales.

14 Q. ARE ANY OF THE COSTS ASSOCIATED WITH DUKE ENERGY 15 KENTUCKY'S ESM INCLUDED IN THIS PROCEDING?

Yes. The 13-month average of the net rate base associated with the eligible environmental compliance investments in the forecasted test year, including net capital placed in-service and associated ADIT balances has been "rolled into base rates" in this filing, along with the associated depreciation expense and property taxes. The ESM will continue to include the return on the emission allowance inventory; recovery of environmental reagent expenses, amortization of coal ash and

| 1 | | landfill closure ARO, and the native portion of emission allowance expenses; and |
|----|----|--|
| 2 | | credit back to customers any proceeds from emission allowance sales. |
| | | V. <u>DEFERRAL MECHANISM</u> |
| 3 | Q. | DOES THE COMPANY HAVE ANY DEFERRAL MECHANISMS |
| 4 | | PREVIOUSLY APPROVED BY THE COMMISSION THAT IT IS |
| 5 | | SEEKING TO AMORTIZE IN THIS PROCEEDING? |
| 6 | A. | Yes. Duke Energy Kentucky was authorized to begin deferring annual expenses for |
| 7 | | planned outage O&M above or below the amount being recovered in base rates and |
| 8 | | annual expenses for replacement power expense not recovered in the Fuel |
| 9 | | Adjustment Clause (FAC), above or below the amounts being recovered in base |
| 10 | | rates. Both of these deferral mechanisms were approved by the Commission in Case |
| 11 | | No. 2017-00321. |
| 12 | | In Schedule D-2.27, the Company is requesting authority to amortize the |
| 13 | | December 31, 2021 Planned Outage O&M regulatory asset balance and the June |
| 14 | | 30, 2022 Forced Outage Purchased Power regulatory asset balance over five |
| 15 | | years. |
| 16 | Q. | PLEASE EXPLAIN WHY THE COMPANY IS REQUESTING TO |
| 17 | | AMORTIZE THE DECEMBER 31, 2021 BALANCE FOR THE PLANNED |
| 18 | | OUTAGE O&M REGULATORY ASSET? |
| 19 | A. | This deferral is based on the annual amount of planned outage O&M incurred |
| 20 | | compared to the annual amount included in base rates. Because the actual |
| 21 | | expenses incurred year to date as of June 30, 2022 were not over the annual |
| 22 | | amount included in base rates, no deferrals were booked as of June 30, 2022. |

| 1 | Therefore, the December 31, 2021 balance of \$8,309,265 is being proposed. Since |
|---|--|
| 2 | the Company expects the actual expenses going forward to be approximately |
| 3 | equal, on average, to the amount collected in base rates, the Company is |
| 4 | requesting amortization of the December 31, 2021 balance in this proceeding. |

5 Q. PLEASE EXPLAIN WHY THE COMPANY IS REQUESTING TO

6 AMORTIZE THE JUNE 30, 2022 BALANCE FOR THE FORCED

7 OUTAGE PURCHASED POWER REGULATORY ASSET?

This deferral is based on the annual amount of expenses incurred for forced outage replacement power not recovered in the FAC compared to the annual amount included in base rates. Because the actual expenses incurred year to date as of June 30, 2022 were over the annual amount included in base rates, there were deferrals booked as of June 30, 2022. Therefore, the June 30, 2022 balance of \$1,819,460 is being proposed. Since the Company expects the actual expenses going forward to be approximately equal, on average, to the amount collected in base rates, the Company is requesting amortization of the June 30, 2022 balance in this proceeding.

17 Q. WHAT IS INCLUDED IN BASE RATES RELATED TO THESE

DEFERRALS?

A.

A.

Currently, \$7,177,425 in included in base rates for O&M expense related to planned generation maintenance outages (excluding fuel, emission allowances, and environmental reagent costs) and \$1,609,964 is included in base rates for cost of replacement power expense related to forced outages.

- 1 Q. IS THIS THE SAME AMOUNT INCLUDED IN THE REVENUE
- 2 REQUIREMENT BEING REQUESTED IN THIS PROCEEDING?
- 3 A. Yes.
- 4 Q. IS THE COMPANY INCLUDING AMORTIZATION EXPENSE FOR ANY
- 5 OTHER NEW DEFERRALS IN ITS FORECASTED TEST PERIOD
- 6 **REVENUE REQUIREMENT?**
- 7 A. Yes. The Company is seeking to create a regulatory asset for the cost associated
- 8 with developing, presenting, and litigating this base rate case. Following
- 9 precedent established in prior cases, the Company is seeking a five-year
- amortization period for this deferral. Schedule D-2.17 reflects the impact of this
- 11 adjustment.

VI. <u>CONCLUSION</u>

- 12 Q. WERE FR 16(6)(b), FR 16(6)(c), FR 16(6)(f), AND FR 16(7)(t),
- SCHEDULES A, B-1, C-1 THROUGH C-2.1, D-1, D-2.17 THROUGH D-
- 14 2.23 AND D-2.25 THROUGH D-2.31, F-1 THROUGH F-7, G-1, AND H
- 15 PREPARED BY YOU OR UNDER YOUR DIRECTION AND
- 16 **SUPERVISION?**
- 17 A. Yes.
- 18 Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?
- 19 A. Yes.

I. <u>INTRODUCTION AND PURPOSE</u>

| 1 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
|----|----|---|
| 2 | A. | My name is Jacob J. Stewart and my business address is 4720 Piedmont Row |
| 3 | | Drive, Charlotte North Carolina 28210. |
| 4 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 5 | A. | I am employed by Duke Energy Business Services LLC (DEBS), as Director, |
| 6 | | Health and Wellness. DEBS provides various administrative and other services to |
| 7 | | Duke Energy Kentucky, Inc., (Duke Energy Kentucky or Company) and other |
| 8 | | affiliated companies of Duke Energy Corporation (Duke Energy). |
| 9 | Q. | PLEASE SUMMARIZE YOUR EDUCATION AND PROFESSIONAL |
| 10 | | EXPERIENCE. |
| 11 | A. | I graduated from the University of Illinois with a Bachelor of Science degree in |
| 12 | | Recreation, Sport and Tourism Management and a Master's Degree in Human |
| 13 | | Resources and Industrial Relations. I have also held various certifications |
| 14 | | including a Certified Compensation Professional (CCP) certification. |
| 15 | | I have 17 years of human resources experience, primarily working with |
| 16 | | compensation and benefits programs. I joined Duke Energy in 2013 and have held |
| 17 | | various positions in compensation and benefits, including Director Compensation. |
| 18 | | While Director Compensation, I was responsible for all broad-based |
| 19 | | compensation including compensation design and strategy, management of key |
| 20 | | vendor relationships, and compensation administration and compliance. In |
| 21 | | addition, I have served in key roles on several projects, including the redesign of |
| | | |

Duke Energy's pay-for-performance strategy, the implementation of the Workday

22

| 1 | | HRMS system, and the integration of Progress Energy and Piedmont Natural Gas |
|----|----|---|
| 2 | | employees into the Duke Energy compensation and benefits programs. In August |
| 3 | | 2021 I was named to my current position as Director, Health and Wellness. |
| 4 | Q. | PLEASE DESCRIBE YOUR DUTIES AS DIRECTOR, HEALTH AND |
| 5 | | WELLNESS. |
| 6 | A. | I am responsible for the strategy, design, implementation, compliance and |
| 7 | | communication of all health and wellness programs for Duke Energy, including |
| 8 | | all of Duke Energy's affiliated regulated and non-regulated companies, including |
| 9 | | Duke Energy Kentucky (collectively the Companies). Areas of responsibility |
| 10 | | include benefit plan design and strategy, management of key vendor relationships, |
| 11 | | administration, and compliance. |
| 12 | Q. | HAVE YOU EVER TESTIFIED BEFORE THE KENTUCKY PUBLIC |
| 13 | | SERVICE COMMISSION? |
| 14 | A. | Yes. |
| 15 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS |
| 16 | | PROCEEDING? |
| 17 | A. | I am an expert in compensation and benefit programs, and the purpose of my |
| 18 | | testimony is to demonstrate that the compensation and benefits programs provided |
| 19 | | to Duke Energy employees are necessary to attract, engage and retain the skilled |
| 20 | | and experienced workforce the Company needs to efficiently and effectively |
| 21 | | provide electric service to its customers. I show further how these programs are |
| | | |

market competitive and comparable to programs offered by other utilities, as well

as other companies outside of the utility industry. As I explain in my testimony,

22

23

being market competitive is critical because Duke Energy competes with these other utilities and companies in the labor market for talent.

I also outline the design and function of our incentive pay programs and explain how the performance metrics directly benefit Duke Energy Kentucky customers through safe and reliable service, customer service quality, and low energy costs. As described in greater detail in my testimony, incentive pay is a key component of Duke Energy's compensation program. In the competitive market for talent, employees consider the total rewards package, including base pay, incentive pay and benefits, as a key determinant in deciding whether to work for a particular employer. Accordingly, whether it is through base pay or a combination of base pay and incentives, Duke Energy must keep its overall compensation package competitive to attract and retain a competent workforce. Incentive pay is therefore similar to other costs necessary to provide customers safe and reliable service. As such, in my opinion, the program expenditures by the Company in connection with these programs are reasonable and prudently incurred costs of service to our customers.

The factors that underpin the importance of full cost recovery have not diminished since our last electric rate case in 2019 – to the contrary, many employers and industries have experienced greater workforce turnover as a result of the "Great Resignation," and the electric utility industry is no exception. Employee turnover is expensive, particularly in industries – such as ours – which require highly skilled labor, requiring lengthy and intensive periods of apprenticeship and training. Accordingly, as my testimony demonstrates, the

| 1 | | Company's allocated compensation expense, including incentive compensation, is |
|----|----|---|
| 2 | | reasonable and prudent, and Duke Energy Kentucky should be allowed to recover |
| 3 | | these costs. |
| 4 | | I also sponsor Schedules G-2 and G-3 in satisfaction of Filing |
| 5 | | Requirement (FR) 16(8)(g). |
| | | II. WORKFORCE OVERVIEW |
| 6 | Q. | PLEASE DESCRIBE THE GENERAL COMPOSITION OF THE |
| 7 | | EMPLOYEE POPULATIONS. |
| 8 | A. | As of August 30, 2022, Duke Energy has a total of 27,685 employees. Duke |
| 9 | | Energy Kentucky has 158 employees, comprising 7 exempt employees and 151 |
| 10 | | non-exempt employees, of whom 151 are union employees. DEBS has 7,471 |
| 11 | | employees, comprising 5,727 exempt employees and 1,744 non-exempt |
| 12 | | employees, of whom 819 are union employees. |
| 13 | Q. | WHERE DO THESE EMPLOYEES WORK WHEN PERFORMING |
| 14 | | SERVICES FOR DUKE ENERGY KENTUCKY CUSTOMERS? |
| 15 | A. | Duke Energy Kentucky's customers receive services from employees of Duke |
| 16 | | Energy Kentucky and affiliated companies. The electric employees work at the |
| 17 | | East Bend Generating Station (East Bend), the Woodsdale Generating Station |
| 18 | | (Woodsdale) (collectively, the Plants) the Erlanger, Kentucky, Construction and |
| 19 | | Maintenance Center; the Little Miami Operations Center; and the Queensgate |
| 20 | | Operations Center. They also work in our Cincinnati, Ohio, headquarters and in |
| 21 | | the Duke Energy headquarters in Charlotte, North Carolina. |

| 1 | Q. | WHAT TYPE OF SPECIAL SKILLS OR KNOWLEDGE IS REQUIRED |
|----|----|--|
| 2 | | IN ORDER TO OPERATE AN ELECTRIC UTILITY SUCH AS DUKE |
| 3 | | ENERGY KENTUCKY? |
| 4 | A. | Generation, transmission, and distribution of electric power are complex |
| 5 | | undertakings requiring a highly skilled workforce. A few examples serve to |
| 6 | | illustrate this point: |
| 7 | | • Engineering professionals help to design, build, operate, and maintain our |
| 8 | | generation plants and the transmission and distribution systems that |
| 9 | | provide power to our customers. |
| 10 | | • Plant operators are responsible for generating the electricity that powers |
| 11 | | our customers' homes and businesses. |
| 12 | | • Line workers must work quickly and efficiently, especially under adverse |
| 13 | | weather conditions, to maintain, improve, and if necessary, restore our |
| 14 | | transmission and delivery infrastructure to keep electricity flowing to our |
| 15 | | customers. |
| 16 | | • Field service and call center employees must understand the services |
| 17 | | provided by the Company, including the metering, billing, and collection |
| 18 | | processes plus various other customer service matters. |
| 19 | | • At the corporate level, highly skilled managers, engineers, accountants, |
| 20 | | cyber security analysts, and other professionals are needed to support the |
| 21 | | employees who are directly responsible for generating, procuring, and |
| 22 | | delivering electricity to the Company's customers. |

1 Q. HOW IMPORTANT IS THE RECRUITMENT AND RETENTION OF 2 SUCH EMPLOYEES TO DUKE ENERGY KENTUCKY'S SUCCESS?

A.

The ability to attract and retain employees with the required technical skills is critical to the success of the Company, and very important to our ability to provide safe, reliable, and high-quality electric utility service to our customers. A fundamental factor with respect to the ability of any employer to attract and recruit skilled and qualified employees is the employer's compensation and benefits programs — potential employees will simply look elsewhere if the employer's total rewards package fails to achieve market competitiveness. This is true in any labor market, but particularly important in a tight labor market with high inflation, such as the one the U.S. economy is experiencing right now. Duke Energy Kentucky does not present an exception to this rule.

Compensation and benefits – especially in a time of high employee mobility and tight labor – are highly important to the Company's ability to attract, engage, and retain a diverse, qualified workforce. One of the keys to providing a desirable workplace where employees want to continue working is to ensure that employees have the opportunity to earn competitive pay and participate in comprehensive benefits programs.

19 Q. IN RECENT YEARS HAS THE COMPANY EXPERIENCED 20 CHALLENGES ATTRACTING AND RETAINING A HIGHLY TRAINED 21 AND SKILLED WORKFORCE?

A. Duke Energy has indeed experienced challenges both in attracting and retaining its workforce across the entire enterprise. For example, our job offer acceptance

| 1 | | rate in 2022 as of October 31 was 84.1% and in 2021 was 87.8% compared to |
|---|--------------|--|
| 2 | | 90.7% in 2020 and 91.0% in 2019. In addition, regarding retention, as of October |
| 3 | | 31, 2022, our enterprise voluntary turnover was 6.9% and in 2021 our enterprise |
| 4 | | voluntary turnover was 7.06% compared to 4.26% in 2020 and 5.18% in 2019. |
| 5 | | These statistics show that Duke Energy has not been immune from the challenges |
| 6 | | that many employers have experienced attracting and retaining employees in the |
| 7 | | current tight labor market conditions, marked by high employee mobility and high |
| 8 | | inflation. |

III. COMPENSATION OVERVIEW: PHILOSOPHY, COMPONENTS, AND CUSTOMER BENEFIT

19 Q. WHAT IS DUKE ENERGY'S COMPENSATION PHILOSOPHY?

20

21

22

A. Duke Energy's overall compensation philosophy is to target total compensation of base pay and incentives, including both short- and long-term, at the median of the market when compared to peer companies, with the opportunity to earn more or

less relative to the market median based on actual performance. We have an obligation to be responsive to the market for talent and assure the competitiveness of the total compensation package, consisting of base salary, cash-based incentives, and, for some employees, long-term incentive compensation. Duke Energy's compensation philosophy has three major parts:

First, Duke Energy wants our compensation to be market-based, meaning we are competitive with the external labor market, allowing it to remain attractive against competition in order to attract and retain qualified and diverse employees. Duke Energy employs a compensation strategy that combines base pay and variable incentive opportunities for all levels of positions. This approach fosters efficiency, safety and a focus on the customer by aligning our employees' pay to quality service for customers.

Second, Duke Energy is performance oriented. Linking compensation to performance is one way to engage employees, set high expectations for employees, and reward results that benefit customers. Duke Energy's compensation program is designed to provide total compensation that is consistent with performance.

Finally, Duke Energy is fair and flexible. Its well-managed policies and pay administration guidelines ensure that employees are compensated consistently and fairly across departments. Duke Energy must also be flexible to align its policies with business needs as they grow and change.

1 Q. IS DUKE ENERGY'S COMPENSATION PHILOSPHY FOR

2 EXECUTIVES SIMILAR TO THE PHILOSOPHY APPLICABLE TO

3 NON-EXECUTIVE EMPLOYEES?

17

18

19

20

21

22

4 A. Yes. The compensation philosophy is similar for both executive and non-5 executive employees. The compensation package for executives consists of a 6 combination of fixed and variable pay using base salary, short-term incentives and 7 long-term incentives. These components, in the aggregate, are targeted to deliver 8 total compensation that is competitive with Duke Energy's peers and consistent 9 with performance. Duke Energy adopted this executive compensation strategy in 10 order to attract and retain the executive talent required to deliver superior performance. The strategy emphasizes performance-based compensation that 11 12 balances rewards for both short-term and long-term results and that aligns the 13 executives' interests with the long-term success of Duke Energy, including Duke 14 Energy Kentucky and its customers.

15 Q. PLEASE PROVIDE AN OVERVIEW OF THE COMPENSATION 16 PROGRAMS PROVIDED BY DUKE ENERGY.

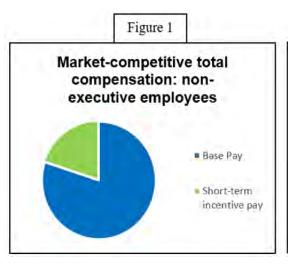

A. Duke Energy's compensation programs consist of a base pay component and incentive pay components that together provide a market-competitive, total compensation package for all employees. The base pay component is a set amount, reviewed by management at least annually, and established at a level that: (1) provides compensation based on the nature and responsibilities of the employee's position; (2) is fair relative to the pay for other similarly situated

positions in the organization; and (3) when combined with the incentive pay opportunities, is market competitive.

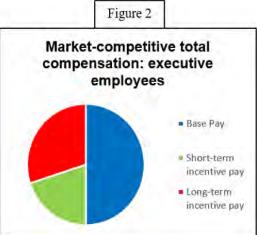

The short-term incentive (STI) pay component is variable based on performance and is "at risk" pay. All employees are eligible for the STI as a component of their total pay – that is, employees are "at risk" of not receiving this component of their compensation package. Carving out a portion of employees' total compensation and delivering it through variable incentive pay serves multiple purposes: (1) to encourage employees to accomplish specific objectives intended to ensure safe, reliable, and economical utility service for our customers; (2) to foster their business unit's and Duke Energy's overall success; and (3) to incorporate a pay-at-risk component that is similar to competitors in our market.

The long-term incentive (LTI) plans round out a competitive total compensation package for certain employees in leadership positions. Including LTI programs as a portion of total compensation for leadership is market competitive and necessary to attract and retain the high-caliber leaders needed to ensure safe, reliable, and economical utility service for our customers. Simply put, competent management is beneficial to customers.

For illustrative purposes, the total compensation concept is depicted below in Figures 1 and 2.

A.

As Figures 1 and 2 make clear, base pay alone does *not* equate to market-competitive total compensation – rather, base pay *in combination with* incentive pay equates to market-competitive total compensation.

Q. HOW DOES DUKE ENERGY KNOW ITS COMPENSATION IS MARKET COMPETITIVE?

The Company's pay levels are competitive with the market median for base salary and total compensation (base pay plus incentives) when compared to numerous published surveys. As just one example, the salary range for a Senior Engineering Technologist is \$83,900 to \$125,900, with a midpoint of \$104,900 and total cash compensation of \$115,390. The market median from the WTW Energy Services Mid-Management & Professional 2022 survey is \$103,511 for base pay and \$117,939 for total cash compensation. Further, we routinely benchmark total compensation (base pay plus incentives) against other similarly sized companies, both within and outside of the utility industry, and participate in a variety of third-party salary surveys on an annual basis. These surveys contain aggregated compensation data, including base pay and incentive targets, from multiple

| employers for various job functions and career levels. This data is analyzed to |
|--|
| determine overall competitiveness of pay for jobs throughout Duke Energy. A |
| complete list of the salary surveys Duke Energy is currently participating in is |
| reflected in Attachment JJS-1. |

5 Q. DOES A COMPETITIVE TOTAL COMPENSATION PACKAGE FOR 6 EMPLOYEES BENEFIT THE COMPANY'S RETAIL CUSTOMERS?

A.

Yes. Our employees deliver critical services to our customers every day. We need to attract, develop, and retain—over the long term—the employees that design, build, and operate our plants and the employees that maintain and improve the infrastructure necessary to keep the lights on. Many craft positions require lengthy apprenticeships to learn the skills needed to perform work independently and safely. The competencies needed for employees in highly skilled positions – such as Line Technicians – take many years to develop. If we were to lose such employees, we would incur additional costs to train replacements for these positions, while experiencing additional risk with regard to reliability issues. The expense incurred to hire and train new employees and the loss of productivity realized through high turnover rates would negatively affect the ability of the Company to provide safe and reliable service at a reasonable cost.

This is also true for leadership positions. Duke Energy invests in developing highly effective leaders who develop and carry out the organization's strategy and inspire employees to work together to achieve results the right way. Long-term incentive pay as a component of overall compensation for our executives is market competitive and provides Duke Energy with an effective

retention tool. Offering less than competitive levels of compensation would put Duke Energy at risk of losing these valuable leaders to other companies and potentially having to pay more to attract the same level of leadership talent externally. In addition, the inclusion of long-term incentive pay ensures that our leadership is focused on the long term, and not overly focused on the short term. Finally, incenting a focus on long-term sustainable company performance provides a benefit to customers, as a financially strong company will have greater access to capital at a lower cost, which in turn benefits customers through a lower cost structure.

IV. DETAILED REVIEW OF COMPENSATION COMPONENTS

10 Q. PLEASE DESCRIBE DUKE ENERGY'S BASE PAY PROGRAMS.

Α.

Duke Energy utilizes base salary ranges consisting of a minimum and maximum base salary for each job grade for most non-union positions. We perform an annual review of market data for both general industry positions and energy services positions and compare that data to our total compensation package (base pay plus incentives). Using this market data, salary ranges are reviewed annually to remain competitive. Market data is also reviewed and used to determine annual wage increase recommendations.

To determine the compensation for executive officers on an annual basis, the Compensation and People Development Committee of the Board of Directors of Duke Energy (the Committee) reviews data from nationally recognized, independent executive compensation consulting firms (Frederick W. Cook and WTW). The peer group of companies used for these analyses consists of

companies that represent the talent markets from which Duke Energy competes to attract and retain executive employees.

Α.

Hourly represented employees, such as line technicians and meter readers, are provided general wage increases negotiated with the labor unions that represent the employees. Wage increases are just one component of union negotiations and must be negotiated on in the larger context of work-related topics, such as benefits, work rules and overtime. These general increases are expressed as percentages of current base pay rates and are consistent with market trends. Duke Energy bases its positions in these negotiations on survey projections for market increases and also utilize survey market data to ensure pay is competitive to the market. The current contracts in place with employees of Duke Energy Kentucky can be found in Attachments JJS-2(a) and JJS-2(b).

Q. PLEASE DESCRIBE THE STI COMPONENT OF INCENTIVE PAY.

All employees are eligible for the STI component of incentive pay, however, some represented employees, including those in Duke Energy Kentucky, participate in the UEIP sub-plan per their union agreement. As I testified previously, the STI component is the "at risk" portion of each employee's compensation. The STI program is designed to promote a workforce culture that responds to pre-determined performance goals set both at the corporate level and at a "team" (for non-leadership employees) or individual (for leadership employees) level. How much of the STI component is actually paid out to an individual employee depends on the degree to which the performance goals are

met. The STI and UEIP plan descriptions can be found in Confidential Attachment JJS-3(a).

The process begins with the setting of goals at the commencement of each year. The Committee approves the corporate level performance goals for the upcoming year, as well as individual goals for leadership employees. Executive leadership for each business unit sets the team goals for non-leadership employees.

The corporate goals are reflected in a "scorecard," and Confidential Attachment JJS-3(b) is the 2022 STI Scorecard reflecting the corporate goals approved by the Committee. As can be readily seen in the Scorecard, each goal reflects the specific metrics required to meet the goal at three different levels – the Minimum, Target, and Maximum level. The payout associated with achievement of the goal is based upon where along the Minimum to Maximum continuum the corporate performance falls. A thorough review is performed at the end of the year to determine the achievement level for each performance goal.

The scorecard reproduced in Confidential Attachment JJS-3(b) is a generic scorecard for non-leadership employees – it indicates that "team" goals are to be set and performance measured against achievement. For leadership employees, individual goals would replace the "team" component, with performance also measured against achievement. The Exhibit also details the weight given to achievement of each goal. A recap of the STI metrics, weights, and payout opportunities is set forth in the table below:

TABLE 1: SUMMARY 2022 STI PLAN

| | Senior Management | | | |
|-------------|----------------------|---------------------------|--------------------|--------------|
| | Committee (SMC) | Leadership (Other than | Non- Leadership | ъ. |
| | Weight | SMC) Weight | Weight | Payout range |

Members of the Senior Management Committee (SMC) will also be subject to an Individual Performance Modifier pursuant to which the Compensation and People Development Committee of the Board of Directors of Duke Energy may exercise discretion to increase or decrease the aggregate incentive payment of each SMC member calculated based on the goals and weightings set forth above by up to 25 percent, based on the SMC member's achievement of their performance objectives during the year.

- 8 Q. **PLEASE** PROVIDE ADDITIONAL DETAIL REGARDING THE 9 CORPORATE METRICS INCLUDED IN THE STI PROGRAM FOR 2022, 10 AND, IN PARTICULAR, DESCRIBE HOW THESE METRICS BENEFIT **CUSTOMERS.**
- 12 As the Scorecard in Confidential Attachment JJS-3(b) reflects, corporate STI A. 13 metrics are grouped into the categories of Financial Performance & Growth, 14 Operational Excellence, and Customer Satisfaction. A detailed description of 15 these categories follows:

| Financial Performance & Growth: The Financial Performance & |
|---|
| Growth measure consists of Earnings per Share and Operations and |
| Maintenance expense measures, each of which motivates employees to |
| focus on financial discipline, efficient operations, and prudent use of |
| resources, which are vital to the health and stability of the organization. |

Earnings per Share (EPS): EPS is an important metric to evaluate the success of our performance and it is a very common practice, both within and outside of the utility industry, to use EPS as a primary goal in incentive programs. A consistently growing EPS benefits customers by allowing the company to access the capital markets on reasonable terms which ultimately lowers the company's financing costs as Duke Energy Kentucky continues to invest in the critical infrastructure needed to ensure the continued reliability and resiliency of the electric grid, achieve the ongoing energy transition, and transform the customer experience by providing customers with more billing options, additional energy usage information, and new tools to help manage and reduce energy costs.

O&M Expense Control (O&M): O&M expenses include those costs necessary to support daily operations, as well as operate and maintain the operating efficiency and productive life of assets. Cost control is an integral part of any company's success. The intent of this goal is for employees to focus on cost control on a day-to-day basis, which will allow Duke Energy to incorporate these savings into programs that will benefit customers.

| Operational Excellence: This metric is broken into two equally |
|--|
| weighted measures, Reliability and Safety/Environmental. This objective |
| emphasizes service reliability and the mitigation of environmental risks |
| associated with our operations and motivates employees to provide |
| reliable and safe products and services to customers. |
| Reliability: The intent of this metric is to ensure that cost focus |
| does not sacrifice Duke Energy Kentucky's ability to provide reliable |
| service, which is expected by all customers. By including reliability in its |
| annual incentive metrics, employees are provided extra motivation to |
| ensure that the Company provides reliable service to its customers. |

13

14

15

16

17

18

19

20

21

22

23

Safety/Environmental: This metric incorporates safety and environmental stewardship into day-to-day activities, thus making the safety of employees, customers, and communities a priority. The safety and environmental goal payout will be determined by averaging the yearend accomplishment of two goals: (i) Total Incident Case Rate (TICR), which measures the number of occupational injuries and illnesses per 100 employees, including staff-augmented contractors; and (ii) Reportable Environmental Events, which are environmental events resulting from operations that have an impact on the environment, require notification (verbal/written/electronic) to a regulatory agency, or result in a regulatory citation or other enforcement action by a regulatory agency.

Customer Satisfaction: The incentive program also includes a Customer Satisfaction goal, or CSAT, which measures the degree to which customers have a favorable perception of an interaction, product, service, or of Duke Energy overall. Achievement is based on Duke Energy's Net Promoter Score (NPS), which is captured through its proprietary survey. Duke Energy fosters a customer-centric culture, and the customer satisfaction goal is intended to keep customers central to all that Duke Energy does across the company, regardless of where its employees work.

<u>Climate:</u> In 2022, the SMC comprised of Duke Energy Chair, President and CEO Lynn Good and her direct reports, also have a climate metric. This quantitative climate goal focuses on the growth of our non-emitting generation and storage capacity measured over a one-year period in comparison to pre-established objective performance criteria. This goal is not dependent on any retirements of existing coal plants.

Team/Individual: In addition to these corporate metrics, the performance of non-leadership employees is assessed against predetermined "team" goals set by their business units. The team goals directly benefit customers by tying employee compensation to reliability, outage frequency, time required to restore service, lost-time accidents, customer satisfaction scores, O&M expense levels, and capital expenditures. These goals are typically tactical and operational goals that align the work of each team to Duke Energy's overall priorities. Team goal results establish a pool of dollars allocated at the discretion of managers among employees based on their individual performance and contributions to the team.

Finally, leadership employees below the SMC are assigned individual goals. The individual goals are intended to motivate the executive leadership members to advance strategic and operational objectives and are generally aligned to the business in which they operate. Superior performance relating to these team and individual goals directly benefits Duke Energy Kentucky customers through safe and reliable service, customer service quality, and low energy costs.

7 Q. PLEASE DESCRIBE THE UEIP.

1

2

3

4

5

6

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

A.

The UEIP is available to union employees of Duke Energy Kentucky and its affiliated companies. Employees participating in the UEIP may not also participate in the STI program offered to the general employee population described in the previous question. The purpose of the UEIP is to attract, retain and motivate employees, enhance teamwork and high levels of achievement, and to facilitate the accomplishment of specific corporate and business unit goals. These goals benefit the customer similar to the annual STI – by motivating employees to excel at such goals as customer satisfaction, safety, reliability, and financial stewardship, high performance becomes part of the culture and employees are motivated to exhibit the behaviors require to meet the goals and deliver the highest value to customers at a reasonable cost. In addition, the UEIP is a necessary component of the total compensation package for union employees that attracts and retains the critical skills necessary to provide safe, efficient, and reliable service to customers. Union employees include many of the back-office personnel, including administrative and clerical employees, as well as customer care associates, meter readers, and employees who construct and maintain the

Company's electric distribution system. All are functions that are critical to reliable customer service.

11

12

13

14

15

16

17

18

19

21

22

23

A.

The UEIP is a short-term incentive opportunity that allows union employees to receive cash payments if the Duke Energy attains certain corporate performance goals and/or if their group attains certain operational performance goals during a calendar year. The UEIP award levels consist of a percentage of the employee's base and overtime earnings and is based upon the achievement of corporate and business unit goals, such as financial results, safety, and customer satisfaction. The award levels for employees participating in the UEIP may also vary based upon the employee's participation in the various retirement programs. All union employees who participate in a cash balance feature under a Duke Energy sponsored pension plan or who do not participate in a Duke Energy sponsored pension plan are eligible for up to a five (5) percent maximum annual incentive payment. Employees who participate in a final average pay feature under a Duke Energy sponsored pension plan are eligible for up to a two (2) percent maximum annual incentive payment. Additionally, regardless of which retirement program they participate in, represented employees are eligible for a safety adder equal to five (5) percent of their incentive payouts if there is no significant operational event.

20 Q. PLEASE DESCRIBE THE LTI COMPONENT OF INCENTIVE PAY.

At a high level, Duke Energy's LTI programs provide equity-based compensation (i.e., stock awards) to executive and leadership-level employees. Compensation including stock awards aligns these employees' interests with the long-term

interests of Duke Energy, including its customers. The goal of the LTI programs is to attract and retain high-caliber leaders by providing a competitive compensation package and to encourage leaders to make sound business decisions from a long-term perspective. Stock awards are an important component of a compensation package that is reviewed annually to ensure ongoing competitiveness. Duke Energy's LTI opportunities generally vest over a period of three years, focusing executives on long-term performance and enhancing retention.

Q. WHAT SPECIFIC LTI PROGRAMS ARE OFFERED BY DUKE ENERGY?

Duke Energy has two LTI programs. One program is an Executive LTI program, called the Executive LTI Plan, which is reserved for the most senior executives, including the SMC which includes the CEO and her direct reports, and members of the Enterprise Leadership Team ELT, which includes approximately 100 of the top leaders within Duke Energy below the level of the SMC. The second LTI program, the Restricted Stock Unit (RSU) Program, is available to other strategic leaders below the ELT level who are responsible for the most critical roles/responsibilities in each business group (population generally ranges between 2-3 percent of the total Duke Energy employee population). The Executive LTI Plan brochure and the Restricted Stock Award Summary are included as Confidential Attachment JJS-3(c) and Attachment JJS-3(d), respectively.

A.

Q. PLEASE DESCRIBE THE EXECUTIVE LTI PLAN.

A.

The Executive LTI Plan is designed to drive an ownership mindset for participants and ensure accountability for making short- and long-term strategic decisions. For 2022, participants in this program have 70 percent of their target LTI opportunity awarded as performance shares and 30 percent of their target LTI opportunity awarded as restricted stock units (RSUs).

Performance Shares: The performance shares granted in 2022 incorporate three performance goals: (1) cumulative adjusted EPS, (2) Total Shareholder Return (TSR) compared to companies in the Philadelphia Utility Index, and (3) Total Incident Case Rate (TICR), which (as indicated above in my discussion of STI metrics) is a measure of operational safety – a factor of great importance to Duke Energy and its customers. Similar to the payout associated with meeting STI goals, payout of performance shares occurs only if pre-defined performance metrics related to the goals are met, but in the case of the performance share awards the goals must be met over a three-year vesting period. The multi-year vesting period ties the number of performance shares participants ultimately earn to Duke Energy's long-term performance, and this correlates to long-term value. Executive LTI Plan participants must generally continue their employment with Duke Energy for a three-year period to earn a payout.

RSUs: The other 30 percent of Executive LTI Plan participants' target LTI opportunity is awarded as RSUs. Vesting of RSUs is solely tied to the participants' continued employment through vesting dates over a three-year vesting period and is not dependent upon Duke Energy's financial performance.

| 1 | | Participants who remain employed with Duke Energy through a vesting date |
|----|----|--|
| 2 | | receive a share of Duke Energy common stock for each vesting RSU. |
| 3 | Q. | PLEASE DESCRIBE THE LTI PROGRAM AVAILABLE TO LEADERS |
| 4 | | BELOW THE ELT LEVEL. |
| 5 | A. | Leaders below the ELT level participate in the RSU program and receive their |
| 6 | | LTI value in the form of RSUs that vest equally over three years, thereby |
| 7 | | encouraging retention of high-quality employees. The reward of these RSUs is |
| 8 | | purely aimed at continued employment and is in no way tied to actual company |
| 9 | | performance. Participation in the RSU plan is reserved for positions that meet at |
| 10 | | least one of the following criteria: |
| 11 | | • Position has significant responsibility for a broad area or function or |
| 12 | | geographic region; |
| 13 | | • The employee leads major projects or groups with substantial |
| 14 | | enterprise or business unit strategic or financial impact; |
| 15 | | • The employee is in a role that has decision-making authority that |
| 16 | | impacts Company performance; and |
| 17 | | • Position requires specialized expertise that is critical to business |
| 18 | | operations or strategy development. |
| 19 | | The RSU plan is an equally important component within the total |
| 20 | | compensation package for eligible leadership positions (below executive level) |
| 21 | | and is critical to maintaining market competitiveness and retaining key leadership |

talent. These employees' base salary is set at such a level that, when factoring in

22

| 1 | the | retention-driven | RSUs, | the | total | package | results | in | market-competitive |
|---|-----|------------------|-------|-----|-------|---------|---------|----|--------------------|
| 2 | com | npensation. | | | | | | | |

3 Q. HOW DO GOALS BASED ON MEETING EPS OR TSR BENEFIT

CUSTOMERS?

A. In order to achieve earnings per share goals, Duke Energy must have strong cost management, prudent investments, and operational excellence, all of which benefit customers. Achieving EPS growth and consistent TSR benefits customers by allowing the company to access capital markets on reasonable terms which ultimately lowers the company's financing costs as Duke Energy continues to conduct necessary maintenance of the system, invest in modernization of the electric grid, and transforms the customer experience by providing customers with more billing options, additional energy usage information, and new tools to help manage and reduce energy costs.

14 Q. WHY IS IT IMPORTANT TO PROVIDE INCENTIVE OPPORTUNITIES

AS PART OF EMPLOYEES' TOTAL COMPENSATION?

A. Short-term incentive opportunities are components of market-competitive total compensation that is necessary to attract and retain qualified employees. I believe it is important to stress the fact that if Duke Energy did not provide incentive opportunities to employees, the same target value of incentive compensation

would need to be added to base pay – which is paid regardless of Duke Energy's

performance – in order to maintain market-competitive compensation.

Similarly, Duke Energy's LTI programs are necessary components of Duke Energy's compensation package for leaders. They allow Duke Energy to

attract and retain high-performing leaders who carry out its vision of leading the way to cleaner, smarter energy solutions that are valued by customers. If the Companies did not incorporate LTI as a part of the total compensation for these leadership positions, it would require higher base salaries in order to provide the same level of market-based total compensation. If an increase to base pay was not made in place of the LTI component and the overall level of total compensation was reduced, the Companies would not be able to effectively attract or retain the experienced leaders necessary to direct the efforts of its employees and make the best strategic decisions on behalf of the Duke Energy.

A.

Put another way, whether it is through base pay or a combination of base pay and incentives, Duke Energy must keep its overall compensation package competitive in order to attract and retain a competent workforce. Incentive pay is similar to the other costs related to providing electric service – it is a necessary cost to provide customers safe and reliable service. In the competitive market for talent, employees consider the total rewards package, including base pay, incentive pay and benefits, as a key determinant in deciding whether to work for a particular employer.

V. <u>COST RECOVERY OF INCENTIVE PAY EXPENSE</u>

18 Q. WHAT INCENTIVE PAY EXPENSE DOES DUKE ENERGY KENTUCKY 19 PROPOSE TO RECOVER IN THIS PROCEEDING?

Duke Energy Kentucky proposes to share its incentive plan expense between shareholders and customers in a manner similar to what the Commission previously approved in the Company's most recent base rate cases, Case No. 2017-00321 and Case No. 2018-00261. In those cases, the Commission approved recovery of incentive pay expense related to performance objectives such as reliability, customer satisfaction and individual performance objectives. The Commission disallowed recovery of incentive pay expense for earnings related and stock based corporate performance objectives.

A.

In Case No. 2019-00271 and Case No. 2021-00190, the Commission also disallowed the portion of short-term incentive (STI) payments that "would only be paid out in the event that a predetermined "circuit breaker" EPS value is met in the fiscal year. However, in this rate case we seek recovery of all STI measures except those that are earnings related and stock based. Even though we believe all incentive expenses are prudent, benefit customers and are a component of market-competitive pay, because of consistent Commission precedence to exclude financial related and stock-based compensation from base rates, we have not included these costs in this proceeding. We will describe further why we believe that excluding additional costs subject to the "circuit breaker" is not appropriate.

Q. DOES THE CIRCUIT BREAKER RESULT IN ALL STI PAYMENTS BEING CONTINGENT UPON DUKE ENERGY CORPORATION MEETING FINANCIAL METRICS?

No. If actual EPS is greater than the EPS circuit breaker, all measures will be paid out based on the scorecard. The circuit breaker, which is set between minimum and target EPS, is designed to keep payouts affordable during years of extreme financial hardship. Only if actual EPS is less than the EPS circuit breaker will payouts for all measures, including the team component, be reduced and capped at

the EPS achievement. But again, this ensures the short-term incentive payout is appropriate and affordable in the rare circumstances of extreme financial hardship of the Company when the obligation to fund incentives is imprudent.

4 Q. WHY IS THIS REASONABLE AND IN CUSTOMERS' BEST INTEREST?

A.

A. The circuit breaker is designed to keep payouts affordable during years of extreme financial hardship. Based on our analysis and lessons learned from 2020, the circuit breaker strikes a balance between rewarding strong operational performance with providing a mechanism to keep incentive payouts affordable during challenging years. It provides assurance that the Company will not make incentive payouts when it is not financially prudent to do so. Importantly, consistent EPS results allows the company to access the capital markets on reasonable terms and ultimately lowers the company's financing costs, which benefits our customers.

14 Q. PLEASE FURTHER EXPLAIN DUKE ENERGY KENTUCKY'S 15 PROPOSAL FOR RECOVERY OF INCENTIVE PLAN EXPENSE.

As shown above in Table 1: Summary 2022 STI plan, the STI continues to include a weighting factor for achieving corporate EPS. In 2009, Duke Energy added a weighting for achieving other goals such as O&M savings and reliability targets that continue today. Adding reliability targets provides a balance between the need to prudently manage costs and providing cost-effective, reliable and safe service to our customers. In 2015, Duke Energy added customer satisfaction, safety and environmental targets. Safety and environmental targets were added to encourage positive behavior of employees in our day-to-day operations, and

| customer satisfaction targets were added to keep customers central in all that we |
|---|
| do. In 2022, Duke Energy added the climate goal for SMC members to focus on |
| the growth of our non-emitting generation and storage capacity that is not |
| dependent on the retirement of existing coal plants. As previously explained, |
| these various performance measures included in the Companies' incentive plans |
| are designed to benefit customers. Accordingly, Duke Energy Kentucky proposes |
| to recover the following amount of incentive compensation costs, based upon |
| achieving target goal levels, in its revenue requirement calculation. |

TABLE 2: SUMMARY OF INCENTIVE PLAN COMPONENTS

| Incentive Plan | Incentive | Weighting | Proposed |
|-----------------------|--|-----------|-------------|
| | Plan Components | 0 0 | Percentage |
| | | | Recoverable |
| STI – Non- | EPS | 50% | 0% |
| Leadership | O&M | 5% | 5% |
| | Reliability | 5% | 5% |
| | Safety/Environmental | 5% | 5% |
| | Customer Satisfaction | 10% | 10% |
| | Team | 25% | 25% |
| STI – | EPS | 50% | 0% |
| Leadership | O&M | 10% | 10% |
| (other than | Reliability | 5% | 5% |
| SMC) | Safety/Environmental | 5% | 5% |

| | customer satisfaction, etc. | | |

- 1 Q. WHY DOES THE COMPANY'S PROPOSAL FOR INCENTIVE
- 2 COMPENSATION ASSUME REACHING 100 PERCENT OF TARGET
- 3 **ACHIEVEMENT LEVELS?**
- 4 A. These are the accrued and budgeted achievement levels for the performance goals
- for the STI, UEIP and the LTI. The 100 percent target achievement level is used
- for the accruals and budget because this is what the Company expects to achieve
- 7 on average over time.

VI. <u>BENEFIT PLAN DESIGN</u>

- 8 Q. WHAT IS DUKE ENERGY'S BENEFITS PHILOSOPHY AND HOW
- 9 DOES IT TIE INTO THE OVERALL TOTAL REWARDS PHILOSOPHY?
- 10 A. At Duke Energy, we place a priority on attracting and retaining a diverse, high-
- 11 performing workforce. An important way we do this is by providing a
- comprehensive, competitive total rewards package of pay and benefits that
- includes base pay, incentive pay opportunities and benefits. Benefits are the non-
- pay portion of an employee's total rewards. Our benefit programs are designed so
- that Duke Energy is able to maintain a highly trained, experienced workforce that
- is capable of rendering excellent utility service. Retaining employees is important
- for Duke Energy because the business involves complex processes such that
- 18 employees must receive long-term training to perform their jobs safely and
- 19 effectively. Generally, benefits are provided through one of two vehicles: health
- and welfare benefit plans and retirement plans. Health and welfare benefit plans
- include medical, dental, vision, life insurance, and disability plans. Retirement
- plans include pension (limited to a grandfathered population) and 401(k) plans.

Duke Energy's retirement plans are designed to enable employees, through shared responsibility, to accumulate sufficient resources to be able to transition into retirement at the appropriate time. Employees' ability to retire at the right time increases opportunities for the workforce as a whole, and also helps the utility manage costs.

6 Q. PLEASE DESCRIBE DUKE ENERGY'S EMPLOYEE BENEFIT 7 PROGRAMS.

A.

A. The benefit programs in which all eligible employees may participate include medical, health savings account, dental, vision, flexible spending accounts, employee assistance program, wellness, sick pay, short-term disability, long-term disability (LTD), life insurance, accidental death and dismemberment and business travel accident insurance. Retirement benefits include company contributions and company matching contributions to employees' 401(k) plans to promote the shared responsibility between the company and employees for accumulating retirement resources.

16 Q. PLEASE DESCRIBE DUKE ENERGY'S POST EMPLOYMENT 17 HEALTHCARE BENEFITS PROVIDED TO EMPLOYEES.

Duke Energy is the result of a series of several acquisitions and mergers and has worked hard at integration to minimize differences among legacy company employee groups. This includes the post-employment benefits available to employees when they retire. Newly hired employees will be eligible to enroll in company sponsored pre-65 retiree medical, dental and vision benefits at retirement on an unsubsidized basis by paying the full cost of coverage.

| Additionally, Duke Energy provides retirees access to a retiree exchange program |
|--|
| for assistance with exploring options for coverage available on the individual |
| market as an alternative to Duke Energy-sponsored retiree coverage. They will |
| also have the option to convert or port their active life insurance to an individual |
| policy at retirement by paying the required premiums. Active employees who |
| were part of a closed group and eligible for a retiree healthcare subsidy towards |
| the cost of Duke Energy-sponsored retiree health care coverage were generally |
| transitioned to a common approach in the form of a pre-65 Health Reimbursement |
| Account (HRA) benefit. As Duke Energy periodically reviews healthcare trends, |
| we see that only 46 percent of employers provide access to pre-65 coverage to |
| current employees who will retire in the future and only 36 percent provide their |
| new hires a potential future retiree benefit. The figures are even lower for |
| companies that provide financial support for post-65 coverage for future retirees. |
| As Duke Energy's financial support of retiree healthcare has lessened over the |
| years, we have recognized that this is an area of concern for many employees. To |
| address this, we encourage employees who are enrolled in a High Deductible |
| Health Plan (HDHP) to contribute to a Health Savings Account (HSA) and |
| receive company matching contributions to save for their future retiree healthcare |
| costs. |

Q. HOW DOES DUKE ENERGY DETERMINE THAT THE EMPLOYEE

BENEFIT PROGRAMS THAT IT OFFERS ARE REASONABLE AND

NECESSARY?

A. Duke Energy routinely examines its benefits to confirm how we compare with

national trends among comparable employers, and we consider the most effective ways to serve our diverse workforce who reside in over 25 states. Because Duke Energy is a company with a history of mergers and acquisitions, it tries to ensure consistency and fairness among legacy company employee groups as well as overall cost-effectiveness. Duke Energy benchmarks its programs against other large employers from both the utility industry and general industry so that it is positioned to attract and retain qualified employees needed to support customers. Duke Energy leverages its consultants, vendor partners and nationally recognized surveys to evaluate the competitiveness of its benefits and costs. Examples of surveys include Willis Towers Watson's Financial Benchmarks Survey, Best Practices in Health Care Survey, Emerging Trends in Healthcare Survey, and Benefits Data Source. These surveys indicate that Duke Energy's benefit plans and employee contributions are in line with its utility industry and general industry peers, making them reasonable and necessary in order to compete with other employers for qualified talent. Based on Duke Energy's reviews of the competitiveness and reasonableness of its benefit programs and employee costs, it routinely determines if any changes should be made.

19

20

21

22

23

A.

Q. WHAT PORTION OF THE HEALTH AND INSURANCE COSTS OF BENEFITS DO EMPLOYEES PAY?

For company-sponsored Vision, Supplemental and Dependent Life, Supplemental and Dependent Accidental Death & Dismemberment (AD&D), and Optional LTD insurance, the employee is required to pay 100 percent of the cost of group coverage. The company pays 100 percent of the cost of Basic Life/AD&D, Basic

LTD and Business Travel Accident Insurance.

When designing medical plan options and determining employee cost share, Duke Energy focuses on the total cost of coverage – not just the premium (or contributions since medical and dental coverage is self-insured) that is deducted from employees' paychecks. Total cost of coverage includes the additional out-of-pocket costs such as copays, deductibles and co-insurance. Looking at only the premium does not provide the total picture of employees' cost share.

Duke Energy's plans and cost share are designed to encourage good consumer health care choices by providing opportunities for lower employee premiums and higher out-of-pocket costs at the point of service so that the utilizers of health care services are paying for it. For example, premiums for the high deductible health plan (HDHP) options have higher costs at the point of service, but lower premiums. Alternatively, the preferred provider organization (PPO) option has lower costs at the point of service and higher premiums. 85.2 percent of our covered employee population is enrolled in our HDHP options. For those enrolling in a HDHP option, employees can make payroll contributions to an HSA and Duke Energy matches employee contributions to their HSA each pay period up to \$600 per year for individual coverage and \$1,200 per year for family coverage for most employees.

Duke Energy employees' total cost of medical coverage (premiums and out-of-pocket costs) for 2022 is projected to be 28.9 percent, which falls between that of employers in general industry (32 percent) and utility industry (28 percent).

For PPO dental coverage, the employee pays on average 37.2 percent of the premium and 59.8 percent of the total cost of coverage (premium plus out-of-pocket costs). When an employee enrolls in medical and dental coverage, he/she may also cover his/her eligible dependents. Duke Energy subsidizes more for the cost of employee coverage than for dependent coverage.

VII. <u>BENEFIT COST MANAGEMENT CONTROLS</u>

6 Q. HAS DUKE ENERGY TAKEN STEPS TO CONTROL THE COST OF

EMPLOYEE BENEFITS?

A.

A.

Yes. On an ongoing basis, Duke Energy reviews its employee benefits and costs in an effort to keep costs reasonable, while continuing to provide benefits that are sufficient to attract and retain employees. Employees pay a portion or all of the cost for many of their benefits, so we strive to manage costs not just for the Companies, but for employees as well. Periodically, benefit plan changes are made, and other steps are taken to control costs. The following are some examples of steps taken in recent years to control costs.

15 Q. WHAT RETIREMENT PLAN EXPENSE DOES DUKE ENERGY 16 KENTUCKY PROPOSE TO RECOVER IN THIS PROCEDING?

The 401(k) plan is now our standard retirement plan that applies to all union and non-union new hires. Duke Energy has taken significant steps to both control costs and reduce the risk associated with its retirement plans by eliminating the pension benefit for all new hires, including union new hires, and moving all non-union pension eligible employees and the majority of union pension eligible employees to a cash balance design.

We believe all retirement plan costs should be recoverable since our retirement benefits are in line with industry benchmarks and are essential for the retention of the critical job skills that are needed to provide safe, reliable and high-quality service to our customers. However, to address the Commission's previous orders around the expense for employees receiving both a pension benefit and a 401(k)-retirement benefit, we are making a proforma adjustment to remove the pension cost for employees who also receive 401(k) match. In addition, we are making a proforma adjustment to remove supplemental executive retirement plan (SERP) cost. We will not seek to recover these costs as part of the rate case.

VIII. SCHEDULES AND FILING REQUIREMENTS SPONSORED BY WITNESS

10 Q. PLEASE DESCRIBE SCHEDULES G-2 ANG G-3.

1

2

3

4

5

6

7

8

9

- 11 A. Schedules G-2 and G-3 consist of certain compensation and fringe benefit costs as
 12 required as part of FR 16(8)(g). I provided this information to Duke Energy
 13 Kentucky witness Mr. Grady "Tripp" S. Carpenter for his use in preparing the
 14 forecasted financial data.
- 15 Q. HOW DID YOU ESTIMATE THESE LABOR AND BENEFIT COST
 16 CHANGES FOR THE FORECASTED PERIOD?
- A. I made reasonable estimates based on recent trends, current conditions, the market studies by independent consultants that I discussed previously in my testimony, and my previous experience with compensation and benefits matters. Based on these considerations, I provided Mr. Carpenter with the following estimates for the forecasted test period consisting of the twelve months ending June 30, 2024:

- the union and non-union labor rate increases, the fringe benefit loading rates,
- 2 payroll tax, and indirect labor loading rates for union and non-union labor.

IX. <u>CONCLUSION</u>

- 3 Q. WERE SCHEDULES G-2 AND G-3 AND ATTACHMENTS JJS-1
- 4 THROUGH JJS-3 PREPARED BY YOU OR AT YOUR DIRECTION?
- 5 A. Yes.
- 6 Q. ARE SCHEDULES G-2 AND G-3 AND ATTACHMENTS JJS-1
- 7 THROUGH JJS-3 TRUE AND ACCURATE COPIES OF THE
- 8 **DOCUMENTS THEY PURPORT TO REPRESENT?**
- 9 A. Yes.
- 10 Q. IS THE INFORMATION YOU PROVIDED TO MR. CARPENTER
- 11 ACCURATE TO THE BEST OF YOUR KNOWLEDGE AND BELIEF?
- 12 A. Yes.
- 13 Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?
- 14 A. Yes.

AGREEMENT

Between the

Utility Workers Union of America, AFL-CIO, Local 600

and

Duke Energy Ohio, Inc. Duke Energy Kentucky, Inc.

THIS AGREEMENT is entered into between the Utility Workers Union of America, AFL-CIO, Local 600, formerly the Independent Utilities Union, hereinafter referred to as the "Union," and Duke Energy Ohio, Inc., Duke Energy Kentucky, Inc., hereinafter referred to as the "Company," through and by their duly authorized representatives.

WITNESSETH: Whereas, the parties to the Agreement as are mentioned above are desirous of maintaining collective bargaining between the Employer and its Employees, as are represented by the Union as bargaining agent, and are desirous of stabilizing employment, eliminating strikes, lockouts, curtailment of employment, and the peaceful settlement of all employer and employee disputes, and of making an honest effort to improve the conditions of both the employer and the employees.

WHEREAS, it is deemed desirable and necessary that definite operations and practices between the Company and the employees of the Company represented by the Union be formally set forth and described, with a desire that uniformity of working conditions exist between the aforementioned Companies and such employees.

WHEREAS, the Company and the Union recognize that in order for the parties to meet the challenge of competition, the need for long term prosperity and growth, and establish employment security, each must be committed to a cooperative labor management relationship that extends from the bargaining unit members to the executive employees. The Company and the Union agree that employees at all levels of the Company must be involved in the decision making process and provide their input, commitment, and cooperation to improving productivity and helping the Company become the lowest cost producer and highest quality provider of energy service.

NOW, THEREFORE, the Company and the Union do hereby agree to the following terms and conditions, to-wit:

ARTICLE I

- Section 1. (a) The Company hereby recognizes the Union during the term of this A-14 Agreement as the sole and exclusive representative of all regular full-time and part-time employees of the occupational classifications in the units defined as "The Office, Clerical and Technical Unit" and "The Residual Unit," as described in the Order issued by the National Labor Relations Board dated August 12, 1944 and amended by the National Labor Relations Board Order dated February 24, 1967. The units so defined shall retain jurisdiction over such work as was normally performed by them prior to this Agreement but such jurisdiction shall not be expanded except by mutual agreement of the parties hereto or through due processes under the National Labor Relations Act.
- (b) The Company recognizes the Union as the sole bargaining agent of the units contained in the preceding paragraph for the purpose of collective bargaining with respect to rates of pay, wages, hours of employment, or other conditions of employment, and the Company agrees to attempt to adjust any and all disputes, and any other matters, arising out of or pursuant to this Agreement, with the Union.
- (c) This Agreement shall be final and binding upon the successors, assignees or transferees of the Union and the corporate entity of the Company.
- **Section 2.** (a) The Company agrees not to interfere, restrain, coerce, or discriminate against any of the members of the Union, because of their membership in the Union, or because of their activity as a member or officer of the Union. Should reasonable proof of any such interference, restraining, coercion or discrimination by any person in a supervisory capacity against a member of the Union be shown to the Company by the Union, the Company agrees to take immediate corrective action in connection with such complaint. It is further agreed that no member shall be discharged because of his or her service, or lawful activity as a member of the Union, nor will the Company at any time attempt to discourage membership in the Union.
- (b) There shall be no discrimination, interference, restraint or coercion by the Company or the Union or their agents against any employee because of race, color, religion, sex, disability, national origin or ancestry or for any other reason. References to the masculine gender are intended to be construed to also include the feminine gender wherever they appear throughout the Agreement.
- (c) The Union recognizes that the management of the Company, the direction of the working forces, the determination of the number of people it will employ or retain in each classification, and the right to hire, suspend, discharge, discipline, promote, demote or transfer, and to release employees because of lack of work or for other proper and legitimate reasons are vested in and reserved to the Company.

A-9

- (d) The above rights of Management are not all-inclusive, but indicate the type of matters or rights which belong to and are inherent to Management. Any of the rights, powers, and authority the Company had prior to entering this Agreement are retained by the Company, except as expressly and specifically abridged, delegated, granted or modified by this Agreement.
- (e) The foregoing two paragraphs do not alter the employee's right of adjusting grievances as provided for in Article VII, Section 1 of this Agreement.
- **Section 3.** Respecting the subject of "Union Security," the parties mutually agree as follows:
- (a) All regular employees in the bargaining unit represented by the Union shall be required as a condition of their continued employment to maintain their membership in the Union in good standing on and after the thirty-first (31st) day following the employee's date of hire. The Union shall notify the Company's Labor Relations Department of any members who are not in good standing as determined by the Union. For the purposes of this provision, "membership in good standing" shall mean being a full member or a core fee payer of the Union.
- (b) The Union agrees that neither it nor any of its officers or members will intimidate or coerce any of the employees of the Company to join or become members of the Union, nor will said Union or any of its officers or members unfairly deprive any employee within the bargaining unit represented by the Union of union membership or of any opportunity to obtain union membership if said employee so desires. In this connection the Company agrees that it will not discriminate against any employee on account of activities or decisions in connection with the Union, except as the same may become necessary on the part of the Company to carry out its obligations to the Union under this Agreement.
- (c) If a dispute arises as to the actual union status of any employee, at any time, as to whether or not the employee has been unfairly deprived of or denied union membership, the dispute shall be subject to arbitration, in accordance with the arbitration provisions of Article VII of this Agreement.
- (d) The Company shall provide the Union with time to discuss with new employees the Union and the existence of the collective bargaining agreement. The Company will provide new employees with electronic and/or paper access to the collective bargaining agreement, along with the Union's "Membership Application" and the "Payroll Deduction Authorization" cards for Union dues or core fees, so that enrollment will be effective 31 days after being hired.
- (e) Except for those employees mentioned in subsection (d) of this section and subject to all state and federal laws, all employees who are not members of the Union shall be required, as a condition of their continued employment, to pay to the Union the applicable core fees representing the percentage of the Union's expenses that are for representational and other legally chargeable activities.

- (f) The Union agrees that any present or future employee who is now or may become a member of the Union may withdraw from membership in the Union by giving notice in writing to the Labor Relations Department of the Company and to the Union. However, the Union will not impose restrictions, which are prohibited by law, on employees who wish to withdraw from Union membership. After such withdrawal, an employee shall not be required to rejoin the Union as a condition of continued employment. Any such employee will remain obliged to pay the applicable core fees.
- (g) The Company agrees to dismiss any employee represented by the Union, at the written request of the Union, for nonpayment of union dues or core fees or to discipline employees represented by the Union in the manner herein provided for violation of this Agreement, if requested to do so, in writing, by the Union. Nothing in this clause, however, shall be construed so as to require the Company to dismiss or discipline any employee in violation of any state or federal law.
- (h) The Company agrees, after receiving proper individual authorizations by means of written individual assignments in a form mutually agreeable to both parties, to deduct Union dues or core fees and initiation fees from employees' pay. This deduction shall be made a mutually agreed upon number of times each year and shall be forwarded to the Treasurer of the Union.
- (i) The Union agrees that in the event of any strike, work stoppage, slowdown, picketing or any other interference to the work or the operations of the Company by any individual employee or group of employees in the bargaining unit represented by the Union this section of the Agreement is then and there and by reason thereof automatically canceled and of no further force and effect; provided, however, that the Company shall upon the presentation of proof satisfactory to the Company, within ten days thereafter, that the Union did not directly or indirectly authorize, permit, endorse, aid or abet said strike, work stoppage, slowdown, picketing or interference referred to, reinstate this section of the Agreement, which section, if reinstated will, from and after the date of reinstatement, be of the same validity, force and effect as if it had not been canceled. In this connection, it is the expressed intention of the parties that for the purpose of making this cancellation provision effective without affecting the other sections of the Agreement, this Agreement is to be considered a severable agreement. Should the automatic cancellation of this section occur, it is the intention and agreement of the parties that all other sections and provisions of the Agreement remain in full force and effect as therein provided. The Company agrees that it will not deliberately arrange or incite such interference to the work or operations of the Company as are referred to in this section.
- (j) The provisions of this Article I, Section 3(a) regarding Union Security, shall not be applied to bargaining unit members in any state in which such union-security provisions are prohibited by law. The parties agree that, if the current law changes to make such union security provisions applicable, or not applicable, to any employees covered by this Agreement, the Parties will deem the Agreement amended to comply with the then current law.

Section 4. The Company agrees that it will not attempt to hold the Union financially responsible or institute legal proceedings against the Union because of a strike, slowdown or work stoppage not authorized, abetted or condoned by the Union. The Union agrees that, in the event of an unauthorized work stoppage, it will in good faith and without delay exert itself to bring the work stoppage to a quick termination and insist that the employee(s) involved cease their unauthorized activities. To that end, the Union will promptly take whatever affirmative action is necessary. Furthermore, the Union agrees that any employee or employees who agitate, encourage, abet, lead or engage in such a strike, work stoppage, slowdown or other interference with the operations of the Company shall be subject to such disciplinary action as the Company may deem suitable, including discharge, without recourse to any other provision or provisions of the Agreement now in effect.

ARTICLE II

<u>Section 1</u>. The Company agrees to designate and authorize a representative or representatives to meet with The General Board of the Union. It is agreed that these meetings shall be held quarterly, at a time mutually agreed upon, and at any other time upon the written request of either party to this Agreement. These meetings will be held within seven days after such request is made.

A-32

<u>Section 2</u>. The Company agrees to meet and confer with any special committee of the Union, duly appointed by the President to administer any activity relating to the welfare of the members of the Union.

ARTICLE III

Section 1. (a) This Agreement and the provisions thereof, shall become effective April 1, 2019 and shall continue in full force and effect until April 1, 2023, and from year-to-year thereafter unless changed by the parties.

A-32

- (b) Either of the parties hereto desiring to change any section or sections of this Agreement and/or to terminate this Agreement shall notify the other party in writing of the desired changes at least 60 days prior to April 1, 2023 or any subsequent anniversary date. During this 60-day period, conferences shall be held by and between the parties hereto, with a view to arriving at a further Agreement, and in all events this Agreement shall remain in full force and effect during the period of negotiations.
- (c) In the event agreement is reached on or before April 1, the 2019 2023 Agreement will be extended for a mutually agreed number of calendar days. The Union shall have one-half of the mutually agreed number of calendar days immediately following the date an agreement is reached in which to submit the Agreement to its membership for ratification and in case of failure to ratify, in order that the Company shall have the remaining one-half of the mutually agreed number of calendar days as notice before a strike or work stoppage commences. Providing the mutually satisfactory Agreement is ratified by the

membership within the first one-half of the mutually agreed number of days following the date an agreement is reached, such Agreement will be made retroactive to the 1st day of April and any agreed upon wage adjustments will be made retroactive to the 1st day of April.

Section 2. It is agreed that this Agreement may be amended or added to at any time by the written consent of both parties hereto.

ARTICLE IV

Section 1. The Company agrees to do nothing to encourage an employee to bargain individually.

<u>Section 2</u>. The Company agrees that if a matter rightfully termed a Union activity is referred by an employee to his or her representative or delegate, and this is taken up with the supervisor or any one qualified or authorized to act for the Company, such Company representative shall not initiate, negotiate, or discuss this question with the employee without affording the representative or delegate of the division an opportunity to be present.

<u>Section 3</u>. Departmental supervisory personnel will notify the departmental union delegate when a significant change or condition affecting that department or a work group within that department is contemplated by the management of the particular department. Upon written request by the departmental union delegate or the President of the Union, a meeting shall be arranged between the Company and the Union to discuss such changes. When major organizational changes affecting personnel in various departments are contemplated, the Company agrees to notify the Union President, in writing, at least 14 calendar days in advance of the change, and, upon written request by the President of the Union, a meeting shall be arranged between the Company and the Union to discuss such changes.

<u>Section 4</u>. Copies of bulletins issued by the Company concerning working conditions for any division or department represented by the Union, shall be forwarded to the General Board of the Union.

ARTICLE V

Section 1. The principle of seniority is recognized by the Company. There shall be two types of seniority defined as follows:

- System service shall be based upon the length of time an employee has been continuously employed by the Company, and shall be the governing factor in establishing vacation dates.
- 2. Classified seniority shall be the length of time worked by an employee on a specific classified job.

<u>A-83</u>

3. Bargaining unit seniority shall be the length of time an employee has been (continuously) employed in a job position within the bargaining unit represented by the Union, and shall be the governing factor in the selection of vacation. The bargaining unit seniority list will be maintained by the Union based on information provided to the Union by the Company. The bargaining unit seniority list will be provided to the Company and used for the purpose of vacation selection beginning January 1, 2020.

It shall be considered a break in system service and seniority when an employee has been off the Company payroll, except when an employee has:

- (1) Been laid off because of lack of work and has not, at any time during the period of layoff or during a period not to exceed three years from the date of layoff, refused to return to work for the Company in a capacity formerly held or comparable to the capacity formerly held, by the employee. However, actual time away will be deducted from the employee's system service.
- (2) Been granted a leave of absence for good cause by consent of the Company, without loss of system service and seniority rights, providing the employees are available whenever necessary for the Company's medical examinations during the leave of absence. However, the employees will receive vacation in accordance with the second paragraph of Article IX, Section 5. Requests for leave of absence and consent hereto shall be in writing.
- (3) Entered the military service of the United States or has been conscripted by the United States Government. No deductions for time away shall be made from the employee's system service and seniority record.
- (4) Resigned voluntarily and subsequently been re-hired. Actual time away will be deducted from the employee's system service and seniority record, and, while previous system service shall be maintained, no classified seniority shall be retained.

Existing system service and seniority records shall not be rearranged to meet the above requirements in exceptions (1), (2) and (3), but they shall be met in all cases beginning March 21, 1983.

Section 2. (a) Job available postings for job classifications covered by this Agreement shall be provided by the Company and posted for a period of seven calendar days on the appropriate bulletin boards and/or on the Duke Energy Job Opportunities Portal page.

A-65 A-82

(b) If after the initial posting the job opening has not been filled by a qualified applicant from the department or division, the job available notice will then be reposted for a period of seven calendar days on all bulletin boards throughout the Company where there are employees covered by this Agreement. In certain cases where it is known that

A-3

there are no qualified applicants within a division or a department, the initial posting may be waived and the job posting will then be initially posted throughout the Company where there are employees covered by this Agreement. However, if applications are received from employees within the department requesting the job opening, these applications will be given consideration before those received from employees in other departments. Furthermore, anytime employees are accepted for a job opening on a lateral or cross bid, they shall not be eligible to laterally or cross bid again for a period of six months from the date of acceptance. The only exception to this six month waiting period is that employees may cross bid to another headquarters within the same bidding area at any time.

- (c) It is agreed that classified seniority will be considered within a department, district or departmental section concerning available advancements, although other qualifications for the particular position will of necessity be considered. All other factors being sufficient, the employee oldest in the point of classified seniority shall be given a reasonable opportunity to qualify for the position.
- A-20 A-21 A-44 A-65
- (d) Should the classified seniority of any two or more employees be equal, the respective seniority position of such employees shall be determined by the Union randomly drawing the names of the affected employees. The Company will be notified of the results, in writing.

In the event no fully qualified individual has bid on a Union wide job opening, the previous experience requirement only will be waived, with the exception of positions within the General Clerical sequence, and an employee will not be disqualified for promotion on the basis of not having passed through a lower job in the promotional sequence if otherwise qualified. Employees who have at least one half of the required previous experience and are in the direct promotional sequence of a job opening, posted Union wide, where previous experience has been waived, will be considered for the job before all other non-qualified employees. Any claim of discrimination in this connection may be taken up by the Union as a grievance.

- (e) An employee may waive his right to promotion, providing such waiver is presented to the Company in writing and does not prevent other employees from acquiring experience in the job held by the employee. When an employee waives his right to promotion, the employee next in seniority, other qualifications being sufficient, shall be entitled to such promotion. When it is necessary to fill an open position, and no employees are willing to promote, the Company may assign the junior qualified employee to promote to the job classification.
- (f) If no qualified regular full-time employee has been accepted following the posting procedure and consideration of requests for demotion, second consideration for non-technical job openings shall be given to part-time employees within the bargaining unit based on qualifications as determined by the Company. For technical job openings, the Company will give second consideration to part-time employees with a technical degree and/or technical expertise based on qualifications as determined by the Company. As a result of these determinations, if the top two or more part-time applicants have equal assessments, then the non-technical or technical job opening will be offered to the

applicant with the greatest system seniority.

- (g) Should the job opening not be filled after the posting procedure above, at the discretion of management, consideration may be given to requests for transfer which have been received from employees outside the bargaining unit or may be filled from outside the Company.
- (h) If the particular job opening is not filled within 60 days from the expiration date of the bargaining unit-wide posting, the job opening will be reposted in accordance with the job posting procedure outlined above.
- (i) The job posting procedure outlined above does not restrict the Company's right to cancel a job posting at any time.
- (j) An employee shall not have seniority rights to bid on a demotion but may, in writing by letter or by submitting a bid for a posted job opening, request consideration for a demotion. However, if an employee's request for demotion is granted by the Company, any accumulated classified seniority will be forfeited in job classifications above the job to which he demotes.
- (k) The Company and the Union agree that the job posting procedure will be waived for the employment of Co-ops, as probationary employees in job classifications represented by the bargaining unit, providing that the next opening in the same job classification and bidding area is posted and made available to employees within the bargaining unit. If such opening is not filled by a bargaining unit employee, openings in the same job classification and bidding areas will continue to be posted and made available to employees within the bargaining unit until such time that a bargaining unit employee fills one of the openings.
- Section 3. (a) In the event of any layoffs or curtailments of employment, the Company will attempt to place the employee in a temporary assignment. Prior to making an assignment, the Company will discuss such assignment with the Union. If a temporary assignment is not available, rollbacks and layoffs shall be made in accordance with system seniority rights. When the Company reduces the number of employees in a job classification, the Company will use the following process to determine rollbacks and layoffs. Employees with the least amount of System Service seniority within the job classification that is targeted for a reduction will be assigned to vacant positions and/or replace full-time employees in the bidding area with the least amount of System Service seniority. Displaced employees must be qualified for the job classification to which they are assigned and the job classification must be within the same bidding area and below their former job classification. Displaced employees will be reclassified into the next lower job classification within their bidding area for which they are qualified, if there are employees in that job classification and they have less system seniority than the displaced employees. Displaced employees will have their wage rates red-circled for a period of 18 months. At the end of 18 months, their wage rates will be reduced to the maximum wage rate of the job classification to which they were reclassified. Displaced employees who are assigned to perform work in lower level job classifications, if qualified, will be

A-49 A-55 reassigned to higher job classifications as they become available within the bidding area, until the displaced employees return to assignments within their former job classification; obtain a job within the bidding area at the same or higher wage level as their former job classification; or, obtain a job in another bidding area. Displaced employees will not be assigned to or be required to perform the duties of job classifications at levels higher than their former job classification. Any employees unable to be assigned to vacant positions and/or replace full-time employees in the bidding area will be subject to layoff.

Part-time Meter Readers will be laid off before any full-time Meter Readers are rolled back or laid off. The same holds true for part-time and full-time call-takers in the Call Center.

Where multiple part-time employees in a job classification at the same location are scheduled to work a total of 40 or more hours per week, a qualified displaced full-time employee in the same bidding area may replace the part-time employees by accepting a full-time job at that location, if the department can still schedule straight-time coverage for the required hours.

For those full-time displaced employees with at least 15 years of service and subject to layoff, including employees who have been placed in a temporary position in accordance with this subsection, an effort will be made by the Company to find another job at the same or lower wage level for which the employee is qualified. The Company will discuss the employee's reclassification with the Union prior to it going into effect. If there are multiple displaced employees, vacant positions will be offered by system seniority; an employee has the right to turn down one offered position. An employee who turns down a position and who is not currently in a temporary assignment, could be subject to immediate rollback or layoff in accordance with this Section or to rollback or layoff at the end of the temporary assignment if no job is available. If the Company identifies such a vacant position for which the employee is qualified, the Company may reassign and reclassify the employee without posting the position. If no positions are identified by the Company the displaced employee, if qualified, will be allowed to displace the employee with the least amount of system seniority outside of the displaced employee's bidding area.

An employee unable to be reassigned and subject to being rolled back to the Call Center or Meter Reading Departments, will have the option of accepting the assignment in the Call Center or Meter Reading, being laid off, or being offered a severance as outlined in Sidebar Letter A-70.

<u>A-70</u>

Displaced employees unable to displace full-time employees and subject to layoff, if qualified, will be allowed to replace employees in part-time positions within their bidding area, by accepting the wage rate, benefits, work hours and other terms and conditions of employment of the part-time employee. The two exceptions are Meter Reading and Call Center, where these employees may retain their full-time status and accept the wage rate applicable to new full-time employees in these departments. Full-time employees within the Customer Relations bidding area, but outside the Call Center and Meter Reading Departments, may displace a maximum of four part-time employees in each department (i.e., Call Center and Meter Reading) within a 12-month period.

Employees who were rolled back prior to April 1, 2012 and whose wage rates are red-circled will continue to have their wage rates red-circled.

An employee will not have the right to recede to a position within his bidding area that he did not pass through before reaching his present position. For purposes of this section, if an employee is unable to exercise system seniority rights in lower job classifications within his department because he did not pass through those job classifications before reaching his present position, he will be credited with system seniority in all job classifications lower than his initial job within the bidding area which are in the same direct promotional sequence. Under no circumstances may an employee exercise seniority rights outside his own bidding area or in the selection of a specific job within a classification.

- (b) In a department where there have been layoffs and a subsequent increase in employment exists within three years, the Company agrees to recall those employees in the department who have suffered a layoff because of lack of employment, in the reverse order of the dates of their layoffs. It is further agreed that the Company will notify the employee or employees, in writing by registered or certified mail, to report back to work. The Company agrees to send a copy of these letters to the Union at the time of the mailing of the original. If they do not report back to work within a 15-day period, the Company shall have the right to recall the next employee in line.
- (c) It shall be the duty of all employees, including those on layoff status, to have their proper post office address and telephone number on file with their individual departments and the Human Resources Department of the Company.
- (d) The Union may designate a witness to tests given in a departmental section, and shall have the right to review the results of these departmental tests upon request. This does not apply to standard tests given by the Staffing Services Division or by outside consultants.
- (e) The Company will make an effort to find another job classification for which an employee is qualified if his job is abolished. An employee who, because of this job abolishment, is assigned to a classification having a lower rate of pay, will maintain his existing level of pay until the maximum wage rate of the job classification to which he is assigned is equal to his existing wage rate. This provision does not affect the right of an employee to bid on a future posted job opening for which he may be qualified.
- **Section 4.** (a) Temporary transfers from one department, district, or departmental section to another will not affect an employee's system service or seniority rank(s) and his record will remain posted in the department, district, or departmental section from which he was transferred.
- (b) Permanent transfers from one department, district, or departmental section to another will not affect an employee's system service or classified seniority, which will be used to determine his system service and seniority rank in his new department, district,

<u>A-2</u>

or departmental section.

(c) When an employee has successfully bid on a posted job and his move to the posted job is delayed, consideration shall be given to the proper adjustment of the employee's seniority rank so that the employee will not be penalized with respect to future promotions. The employee will receive a seniority date and the wage rate of the job on which he has been accepted no later than the beginning of the third week after the employee is notified that he has been accepted for the new job.

<u>Section 5</u>. All new employees shall be classed as probationary for a period of one year and shall have no system service or seniority rights. After one year's service as a probationary employee, they shall be reclassified and their system service and seniority record shall include their previous employment as a probationary employee.

The probationary period of any employee on an approved leave of absence lasting more than thirty days, will be extended by the duration of the leave of absence.

<u>Section 6</u>. Temporary employees shall be those hired for a specific job of a limited duration, not to exceed six months unless agreed upon by both parties, and shall not acquire system service or classified seniority rights. The Union shall be notified of the hiring of such employees.

<u>A-6</u>

Section 7. (a) Part-time employees shall be those hired to perform a continuing specific work requirement that is temporary in nature or less than 40 hours per week. Part-time employees will only be used for part-time applications in order to supplement the regular full-time workforce, unless otherwise agreed. While the intention is for part-time employees, who are non-temporary in nature, to be regularly scheduled to work less than 32 hours per week, the actual hours worked may be greater due to temporary operational needs or trading of hours with other employees. The departments utilizing part-time employees will develop schedules to be worked by such personnel. However, schedules for part-time employees may at times vary according to work needs. These employees will work in bargaining unit positions and will be paid the minimum wage rate for the job classification or at a specially negotiated rate. They shall not acquire classified seniority rights. Part-time employees may be laid off for any reason without recall rights. Such layoffs shall not be subject to the grievance procedure. Benefits for part-time employees shall be on a prorated basis as agreed to by the parties.

<u>A-48</u> A-61

(b) Part-time employees may request consideration for other part-time openings and may submit applications for openings in regular full-time positions. When part-time employees become full-time employees, they shall be credited with system service for the length of time they were employed by the Company as a part-time employee on or after January 1, 1996. For part-time employees who become full-time employees after April 1, 2008 and who have been employed as part-time for at least 12 consecutive months prior to becoming full-time, the probationary period shall be reduced from one year to nine months.

(c) The overtime provisions of this Agreement, including meal compensation, will only apply to part-time employees when they work in excess of their regular scheduled hours per day or eight hours per day, whichever is greater. Part-time employees will not be called out for overtime assignments unless all full-time available employees have been called. The total number of part-time employees, excluding those in the Call Center and Meter Reading work groups and those hired to perform a continuing specific work requirement that is temporary in nature, will not exceed 5% of the total number of full-time employees performing work represented by the Union.

Section 8. Employees promoted to a job outside the bargaining unit and who return to the bargaining unit within six months, shall retain all classified and bargaining unit seniority accumulated up to the date of their promotion. If employees who were in a job outside the bargaining unit for more than six months return to the bargaining unit the will be placed in a starting job classification and receive a classified seniority date behind all employees but shall retain all bargaining unit seniority accumulated up to the date of their promotion out of the bargaining unit. No employee may return to a bargaining unit job classification if management does not approve, a position is not available or if as a result, an employee represented by the Union would be laid off.

ARTICLE VI

<u>Section 1</u>. The parties hereto recognizing the importance of safety projects and regulations for the protection of the health, life and limb of all employees, agree to make all reasonable efforts to maintain such rules and regulations conducive to the health and safety of all concerned. The Company will notify the Union leadership of any work related accident resulting in the hospital admission or death of any employee in the bargaining unit.

A-83

ARTICLE VII

Section 1. Any dispute or disagreement arising between an employee and the Company or the Union and the Company involving wages, hours or work, conditions of employment, or otherwise of any nature arising out of this Agreement may become the subject of a grievance. However, with respect to any claim or dispute involving the application or interpretation of an employee welfare or pension (includes defined benefit and 401(k) plans) plan, the claim or dispute shall not be resolved under the grievance procedure outlined herein, but instead, shall be resolved in accordance with the terms and procedures set forth in the relevant plan document. Additionally, should the content of any communication relating to employee benefits conflict with the terms of the relevant plan document, the terms of the plan document shall govern. Recognizing the importance of resolving disputes or disagreements in a peaceful and timely manner and at the earliest stage possible, grievances shall be processed in accordance with the following procedure:

A-18 A-32

1st Step

An employee must take up any grievance initially with the supervisor involved, within 20 days of its occurrence or 20 days from the time the employee or the Union became aware of the occurrence. The initial meeting shall be held between the supervisor(s), the employee involved and the elected union representative or delegate. Grievances in this step shall be answered verbally at the meeting or within 5 days of the conclusion of the meeting. The supervisor will also inform the Union of the appropriate management person to notify in the event that the Union wishes to pursue the grievance to the second step.

2nd Step

If the parties are unable to resolve the grievance following the first step, within 10 workdays of the first step response, the Union may submit a written grievance to the management of the department designated in the first step. Department management will schedule a meeting with a small committee representing the Union within 20 workdays after receipt of the written grievance. A written decision will be sent by email and/or US Mail to the President of the Local Union within 20 workdays of the Step 2 meeting.

3rd Step

If the parties are unable to resolve the grievance following the second step, within 20 workdays of the second step response, the Union may notify the Labor Relations Department in writing of its desire to advance the grievance to the third step of the grievance procedure. The Labor Relations Department will schedule a meeting with the appropriate management representatives and a small committee representing the Union within 20 workdays after receipt of the written request. The Labor Relations Department will render a written decision within 20 workdays of the date of the third-step meeting. The written response will be sent by email or US Mail to the President of the Local Union.

In the case of a discharge, the Union may bypass the first step of the grievance procedure and submit a written grievance requesting a second step grievance meeting, within 10 days following the date of discharge.

Arbitration

<u>Section 2</u>. (a) If the parties are unable to resolve the grievance following the thirdstep, the Union, within 30 workdays of receipt of the third step response, may notify the General Manager, Labor Relations in writing of its desire to advance the grievance to arbitration.

(b) Upon receipt of the Union's notification, the parties within ten workdays will petition the Federal Mediation and Conciliation Service (FMCS) for a panel of seven arbitrators and will cooperate to select promptly an arbitrator from that list. In the event that no acceptable arbitrator appears on the panel of arbitrators submitted by FMCS, either party may request an additional panel from FMCS.

- (c) The arbitrator so selected shall hold a hearing as promptly as possible on a date satisfactory to the parties. If a stenographic record of the hearing is requested by either party, the initial copy of this record shall be made available for the sole use of the arbitrator. The cost of this initial copy and its own copy shall be borne by the requesting party, unless both parties desire a copy. If both parties desire a copy, they shall equally share the cost of the arbitrator's copy, and shall each bear the cost of any copies of the record they desire.
- (d) After completion of the hearing and the submission of the post-hearing briefs, the arbitrator shall render a decision and submit to the parties written findings that will be binding on both parties to the Agreement.
- (e) The arbitrators' and other joint expenses mutually agreed upon shall be borne equally by both parties.
- (f) Any grievance that is not taken to the next step within the time limits specified will be deemed to have been withdrawn. If at any step in the grievance procedure, the Company does not answer within the designated time frame, the Union may notify the Company of its desire to advance the grievance to the next step of the grievance procedure. Any time limits may be extended by written agreement between the parties.
- (g) The arbitrator shall have no authority to add to, detract from, alter, amend, or modify any provision of this Agreement. It is also mutually agreed that there shall be no work stoppage or lockouts pending the decision of the arbitrator or subsequent thereto.

ARTICLE VIII

Section 1. (a) The parties hereto agree that the wage rate schedules in effect immediately prior to the execution of this Agreement shall be amended as follows:

MAXIMUM HOURLY WAGE RATES

- (b) These wage rate increases shall not apply to the minimum wage rates of starting job classifications. Any changes to wage rates, including merit or general wage increases, will be applied beginning the first day of the pay period that includes the effective date of the increase.
- (c) The wage increases mentioned above shall not apply to any employee whose present wage rate is on or above the new maximum wage rate of his job classification, except employees who are on physical retrogressions, who shall receive the increase applicable to their individual wage rate as of the indicated dates of increase.
- (d) Manual employees shall be provided the higher of a \$10.00 promotional increase above the maximum wage rate of the job classification from which they promote, or the minimum wage rate of the job classification to which they promote. Clerical and Technical employees shall be provided the higher of a \$10.00 promotional increase or the minimum wage rate of the job classification to which they promote. This provision will not apply when the maximum wage rate of a job classification is not at least \$10.00 above the maximum wage rate of the job classification from which it promotes.
- (e) Whenever the difference between the minimum and maximum wage rates of a job classification is not divisible by \$0.25, the intermediate wage rates will be by \$0.25 steps, with the exception of the last step to the maximum wage rate of the job. In such case the increase to the maximum wage rate will include the \$0.25 increment plus the odd amount necessary to equal the maximum wage rate, provided, however, that the total amount of this increase is less than \$0.50.

<u>A-40</u>

- (f) Any employee in the Union who was on or below the maximum wage rate of his job classification as of the indicated dates of increase shall receive the increase applicable to the maximum wage rate of his job classification.
- (g) The shift differentials and Sunday premium paid to employees on scheduled shifts on classified jobs will be as follows:

| Name | Definition | Shift Differential Cents Per Hour |
|--------------------|---|-----------------------------------|
| of Shift | of Shift | May 6, 2019 – March 31, 2023 |
| Day Shift | Where the majority of the scheduled hours worked are between 8:00 a.m. and 4:00 p.m. | \$0.00 |
| Afternoon Shift | Where the majority of the scheduled hours worked are between 4:00 p.m. and 12:00 Midnight | \$1.80 |

| Night | Where the majority of the | \$1.85 |
|-------|---------------------------|--------|
| Shift | scheduled hours worked | |
| | are between 12:00 | |
| | Midnight and | |
| | 8:00 a.m. | |

When the majority of the hours in a shift are on a Sunday, a Sunday premium will be paid to an employee for all scheduled straight time hours worked on that shift.

| | As of May 6, 2019 |
|----------------|-------------------|
| Sunday Premium | \$2.05 |

(h) The nature of the work involved under each payroll classification shall be defined, as nearly as possible, by the Company and occupational classifications and job descriptions shall be prepared by the Company and be subject to review by the Union.

<u>A-40</u>

(i) The Job Evaluation Committee of the Company will be responsible for evaluating all new or revised job classifications. The evaluation established by this Committee will be used to determine the maximum wage rate for each new or revised job classification. Results of the evaluation will be communicated to the Union at least two weeks before the effective date of the new or revised job classification.

- (i) The Union shall appoint a Classification Committee consisting of not more than five members who may review the evaluation and wage rate of any new or revised classification. The Union's Committee may, by request, meet with the Company's Committee as soon as possible at a mutually agreeable time, but within 30 days after the Union has been notified by the Company of the proposed new or revised classification, for the purpose of presenting any information relative to the evaluation of a new or revised classification. The Union will be notified after the Company's Committee has reviewed the information presented by the Union. All wage rates so established shall be final and binding and not subject to the grievance and arbitration procedure. However, if any revised wage rates are reduced as a result of the evaluation(s), they will not be placed into effect until the Company and the Union have had an opportunity to negotiate them during full contract negotiations, even though the revised job classification will be in effect. Employees, presently in, or promoting to, such job classifications will continue to receive wage adjustments in accordance with the other provisions of the Agreement just as if the wage rate had remained at the same level until a new Agreement is reached.
- (k) When the Union believes that a new or revised job description does not adequately describe the principal duties and minimum qualifications necessary to provide a sufficient basis for evaluating that job description, a letter outlining the Union's suggested changes may be sent to the management of the appropriate department for consideration. However, there will be no recourse to the grievance and arbitration procedure because of the language of a job description or the evaluation of a job classification.

- (I) Where the Union deems an employee to be improperly classified, it will be considered as a grievance and shall be handled under the grievance procedure described elsewhere in this Agreement.
- **Section 2.** (a) With the exception of shift differential premium, and a holiday occurring during an employee's vacation, it is agreed that under no circumstances shall any section of this Agreement be interpreted to provide the pyramiding of a benefit or premium payment to employees covered by this Agreement. For example, no employee may claim sick pay while receiving vacation pay or holiday pay while receiving sick pay.
- (b) It is further agreed that there shall be no interruption in the payment of one benefit in order that employees may receive payment for another benefit. For example, employees may not interrupt vacation to begin sick leave or interrupt sick leave to include a holiday. The only exceptions to this provision are that an employee's sick pay may be interrupted to include vacation pay and that vacation pay may be interrupted to include death in family pay as set forth in the Agreement.
- <u>Section 3.</u> Pay Checks will be directly deposited into one or more bank accounts employees shall designate and authorize. Direct Deposit advices will be mailed to the employee's home address if he/she has elected to receive a printed copy. For any employee who specifically declines to authorize direct deposit. a paper check will be mailed to the employee's home address.

ARTICLE IX

- <u>Section 1</u>. ABSENCE DUE TO SICKNESS, FAMILY CARE AND PARENTAL LEAVE. (a) Effective January 1, 2020, employees will be eligible for paid time off due to qualifying sick or family care reasons and, effective upon ratification of this Agreement for paid parental leave, on the same basis as the Company's general, non-represented employee population.
- (b) After a part-time employee with 12 months of service or a full-time employee has been continuously disabled, subject to medical determination, and unable to return to work for more than seven consecutive calendar days, the employee will receive Short-Term Disability pay consisting of up to 26 weeks of pay per incident with payment based on the schedule below or until the employee is able to return to work, whichever occurs first.

| Years of Service | Maximum Weeks at 100% Pay | Weeks at 66 2/3% Pay |
|------------------|---------------------------|----------------------|
| 0-1 | None | All |
| 1-5 | 10 | Balance |
| 6-10 | 15 | Balance |
| 11-14 | 20 | Balance |
| 15-20 | 26 | Balance |
| 21 or more | ALL | N/A |

(c) After an employee has been continuously disabled, subject to medical determination, and is unable to return to work for more than 27 consecutive weeks, and has exhausted Short-Term Disability benefits, the employee will receive Long-Term Disability benefits as described in the Company's Long-Term Disability Plan Description.

<u>Section 2</u>. Compensation will not be provided for illnesses resulting from such causes as: illegal use of drugs or alcohol, willful intention to injure oneself, the commission of a crime, elective or cosmetic procedures not covered by the medical plan, the employee's refusal to adopt such remedial measures as may be commensurate with the employee's disability or permit reasonable examinations by the Company.

A-50

Section 3. It is also mutually understood and agreed that the Company shall have the right to investigate and determine for its own satisfaction the bona fide nature of any illness for which pay is requested as well as the duration thereof. In order to facilitate the scheduling of the work forces, employees who will be absent from work are expected to notify the Company as soon as possible, but not later than one hour after their regular starting times and in the case of shift workers, one hour before the start of their shifts. Unless an employee submits a legitimate excuse for not reporting the cause of absence before the end of the first hour of such absence, the employee's claim for sick leave pay shall not begin until such notice is received.

<u>Section 4</u>. When employees have received all of the disability pay to which they are entitled under this Agreement they shall be granted, upon written request on a form provided by the Company, a "leave of absence" and shall not be eligible for further disability pay benefits until they have returned to steady employment.

A-5

<u>Section 5</u>. (a) An employee accrues entitlement of 1/12 of their current year's vacation for each full month the employee is employed during the current calendar year or is on STD, or leave of absence. Any employee leaving the Company's service during any calendar year shall receive payment for any unused portion of accrued vacation for that current year. However, in the event of an employee's death, the estate of the employee will be paid the unused portion of the employee's total vacation allotment for the current year.

<u>A-52</u>

Employees returning from military service will receive vacations with pay in the calendar year in which they return as follows:

| Month in which Employee Returns to Company's Employment | Amount of Vacation Based on System Service of Employee |
|---|---|
| Up to and including June | Full |
| July, August and September | One-Half |
| After September | None |

(b) In order for an employee to qualify for a vacation, the employee must have been ready, willing and able to work as a full-time regular or probationary employee during the calendar year the vacation is taken.

(c) The anniversary of employment shall determine the employee's vacation status. Every effort will be made to grant vacations at a time suitable to the employee, but should the vacation of an employee handicap the operations of the Company in any way, the Company reserves the right to require the vacation be taken at another time. Normally, preference shall be granted in the selection of vacation dates on the basis of system service.

<u>A-1</u> A-8

- (d) Employees with less than one year of service with the Company shall be entitled to one day of vacation for each month worked, with a maximum of 10 total days.
- (e) Employees with one year of service with the Company shall be entitled to a vacation of two weeks.
- (f) Employees with seven or more years of service with the Company shall be entitled to a vacation of three weeks. Should the amount of work or other working conditions be such that the operations of the Company would be handicapped by granting of the third week of an employee's vacation, the Company reserves the right to require an employee to take his third week of vacation at such time that does not interfere with the operations of the Company.
- (g) Employees with 15 or more years of service with the Company shall be entitled to a fourth week of vacation or payment of one week's wages (40 hours) at straight time in lieu thereof. The Company may also require such employees to take the fourth week of their vacation at such time as does not interfere with the operations of the Company.
- (h) Employees with 21 or more years of service with the Company shall be entitled to a fifth week of vacation or payment of one week's wages (40 hours) at straight time in lieu thereof. The Company may also require such employees to take the fifth week of their vacation at such time as does not interfere with the operations of the Company.
- (i) Employees with 32 or more years of service with the Company shall be entitled to a sixth week of vacation or, if required to work by the Company, payment of one week's wages (40 hours) at straight time in lieu thereof. The Company may also require such employees to take the sixth week of their vacation at such time as does not interfere with the operations of the Company.

ARTICLE X

<u>Section 1</u>. Regular employees entering the armed services of the United States or employees who are conscripted by the United States Government during a period of national emergency shall continue to accumulate full system service and full seniority and may return to their former position or one of equal pay and rank, provided they report for work with a certificate of satisfactory completion of military or governmental service within 90 days after their release from active service.

- **Section 2.** (a) All Company sponsored life and AD&D insurance coverage for employees starting an approved military leave of absence will be continued for a period of at least 90 days after the employee's leave of absence begins with the same cost sharing as before the leave began.
- (b) Company Group Life Insurance of employees returning to Company service within 90 days after their release from active service will be reinstated without physical examination or waiting period.
- **Section 3.** None of the foregoing provisions in this Article shall apply to those employees who are not eligible for statutory re-employment rights.

ARTICLE XI

Section 1. (a) The following days are observed as regular holidays which will be recognized on the indicated dates. The Company may change the date for recognizing a holiday if the date indicated is changed by a legislative enactment or if the prevailing community practice is not consistent with the indicated date.

| HOLIDAY | DATE RECOGNIZED |
|------------------------|----------------------------|
| New Year's Day | January 1 |
| Memorial Day | Last Monday – May |
| Independence Day | July 4 |
| Labor Day | First Monday – September |
| Thanksgiving Day | Fourth Thursday – November |
| Day after Thanksgiving | Friday after Thanksgiving |
| Christmas Eve | December 24 |
| Christmas Day | December 25 |

- (b) If the recognized date of a holiday occurs on a Saturday or Sunday, the Company will have the option of either celebrating that holiday on another date which is consistent with community practice or paying eight hours of regular straight time holiday pay in lieu thereof for the holiday.
- (c) Regular employees whose duties do not require them to work on holidays will be paid straight time. Regular employees who are scheduled to work on a recognized holiday will be paid at time and one-half for the first eight hours worked in addition to their straight time holiday pay. However, those employees who work less than the eight hours scheduled will have their straight time holiday pay correspondingly reduced.
- (d) Regular employees who are called out to work on a recognized holiday for a period of four hours or less not contiguous with hours worked into or out of the holiday will be paid for four hours at time and one-half in addition to their straight time holiday pay. Employees who are called out to work on a recognized holiday for more than four hours not contiguous with hours worked into or out of the holiday but less than eight hours will be

A-11

paid for eight hours at time and one-half in addition to their regular straight time holiday pay. Employees who are required to work more than eight hours on a recognized holiday will be paid at the rate of double time for all such work in excess of eight hours. An employee must work either his full scheduled day before, or his full scheduled day after a holiday to be entitled to receive holiday pay. An employee will not be compensated for travel time on a call-out which occurs on a regular holiday.

- (e) When a holiday falls within an employee's vacation, the employee shall, at the discretion of the Company, either be allowed an additional vacation day at such time in the same year as shall be mutually agreed upon between the employee and his supervisor or shall receive eight hours additional pay to compensate for the loss of such holiday pay.
- (f) An employee beginning a leave of absence will not receive holiday pay for holidays occurring after the last day worked except when the employee works the full calendar day immediately before a recognized holiday which is in the same pay period.
- Section 2. (a) An employee who has completed six months of service with the Company shall be entitled to four compensated Personal days off and one compensated Diversity day off each calendar year. Requests for Personal/Diversity days should be made at least five calendar days prior to the date requested and must be approved by management. However, because of extenuating circumstances, a day off with less than a five calendar-day notification may be approved by an employee's supervisor; such approval will not be unreasonably denied. The Company reserves the right to limit the number of employees who can be off on a specific day. Individual departments will attempt to accommodate as many requests as possible to take a Personal/Diversity day or vacation day on Martin Luther King, Jr. Day, Presidents' Day, and/or Good Friday.
- (b) If a Personal/Diversity day is not used during a year, it shall be lost and no additional compensation shall be granted. Any employee who resigns, retires or is discharged from the Company for any reason shall not receive compensation for any remaining Personal/Diversity days.
- (c) Personal/Diversity days must be taken in full day increments. Paid Personal/Diversity days will not be considered as absences for purposes of an individual's attendance record.

ARTICLE XII

Section 1. (a) It is agreed that the present establishment of 40 hours per week of the Company will remain in effect, except in those divisions where longer or shorter hours are now being worked, and the Company guarantees employment of not less than 40 hours per week for 52 weeks of each year to all employees represented by the Union as bargaining agent, who are available and ready to work, and who are regular full-time employees of the Company, except those on a less than 40 hour basis now. No such employees shall be required to work more than 40 hours in any one week, consisting of seven days, nor more than eight hours in any one day except as hereinafter provided.

A-13

- (b) Nothing in this section will affect in any manner the right of the Company to make temporary or permanent reductions in forces when considered necessary by the Company.
- (c) Nothing in this Agreement shall be deemed to require the Company or the Union to commit an unfair labor practice or other act which is forbidden by, or is an offense under, existing or future laws affecting the relations of the Company with the employees bargained for by the Union.
- <u>Section 2</u>. (a) The work week of an employee for payroll purposes and for determining off-days shall consist of seven consecutive days with a minimum of two scheduled off days and be from midnight Sunday to midnight the following Sunday. Employees working on a shift beginning two hours or less before midnight will be considered as having worked their hours following midnight.
- (b) Regular scheduled hours of work per day will be at straight time for regular scheduled work days, time and one-half for the employee's first scheduled off-day in the work week, double time for the employee's second scheduled off-day in the work week and time and one-half for any additional scheduled off-days in the work week. Any time in excess of the employee's regular scheduled hours per day will be paid at the rate of time and one-half except the employee's second scheduled off-day worked which will be paid at double time.
- (c) Employees required to work more than 16 consecutive hours will be paid double time for all time worked in excess of, and contiguous with, the 16 consecutive hours.
- (d) Schedules for all employees will be based on the time prevailing in the City of Cincinnati.
- (e) In no case will an employee be forced to take time off in lieu of overtime pay. The Company shall be the sole judge as to the necessity for overtime work, and the employee shall be obligated to work overtime when requested to do so. When overtime occurs in a group or department, where more employees are qualified and available to work than are necessary at the moment, the Company agrees to establish a system of selecting the employees who are to work, in a sincere effort to equalize overtime work. The employees will be notified in advance, whenever possible, when they are required to work overtime.
- **Section 3.** (a) The Union recognizes the need for shift work and weekend work in order to provide for continuous operation, and overtime rates will apply as set forth in Article XII, Section 2.
- (b) An employee who is transferred from his regular shift to another shift shall be notified of said transfer at least 24 hours prior thereto.

<u>Section 4</u>. (a) Employees called out for other than planned overtime shall be paid a minimum of four hours at the appropriate overtime rate. Travel time of one-half hour each way will be allowed on a call-out when such call-out exceeds four hours of continuous work that is not contiguous with a regular scheduled shift. Employees will not be compensated for any travel time for planned overtime; or on a call-out when the employee is not released from work before his regularly scheduled shift; nor will travel time be allowed when overtime is worked continuously at the end of a regularly scheduled shift.

A-74 A-78

- (b) Planned overtime shall be defined as time worked upon notice to an employee given before leaving his headquarters or place of reporting, or in case of an off-day, during or before what would have been his scheduled hours on that day, that he is to report outside of his regular schedule on any succeeding day. Such time worked shall be paid for at the appropriate overtime rate but not for less than four hours unless such planned overtime extends into or directly follows the employee's regularly scheduled work day, when it shall be paid for at the appropriate overtime rate for the actual hours worked.
- **Section 5.** (a) Employees working two hours or more in excess of their normal work day, shall receive a meal, or compensation in lieu thereof, and an additional meal, or compensation in lieu thereof, after each additional five hours of continuous overtime work over and above the original two hours mentioned above.
- (b) Employees called out on either their scheduled off day, or four or more hours before his regularly scheduled starting time, shall be furnished a meal, or compensation in lieu thereof, for each contiguous five hour interval worked even though he works into his regularly scheduled work day.
 - (c) The meal compensation allowance referred to above shall be as follows:

| Effective May 6, 2019 – March 31, 2023 | |
|--|--|
| \$11.50 | |

<u>Section 6</u>. It is further agreed by the Company that any manual employee temporarily advanced to a higher classification shall receive the minimum rate of pay applicable to that classification if such work is for four hours or more. If such work is for more than four hours the employee shall receive the minimum rate of pay applicable to that classification for the remainder of the normal day worked. In the administration of this section of the Agreement, a temporary assignment shall be construed to mean any job assignment which is not expected to continue for more than 90 consecutive days.

<u>A-46</u>

Section 7. (a) Employees in this bargaining unit temporarily assigned to a supervisory position outside the bargaining unit for four hours or more, shall receive \$1.50 per hour above the maximum rate of pay of either their job classification, or the highest rated job classification they supervise, whichever is greater. It is expressly understood that employees temporarily assigned to a supervisory position shall direct the flow of work and oversee the assignment and completion of work in accordance with applicable policies and procedures in the department. However, they shall not have any responsibility for making hiring decisions, issuing evaluations or discipline, or moving work currently performed by

other bargaining unit members into or out of any department.

(b) Employees promoted to a job outside the bargaining unit and who return to the bargaining unit within six months, shall retain all classified seniority accumulated up to the date of their promotion. If employees who were in a job outside the bargaining unit for more than six months, return to the bargaining unit, they will be placed in a starting job classification and receive a classified seniority date behind all employees. No employee may return to a bargaining unit job classification if, as a result, an employee represented by the Union would be laid off.

ARTICLE XIII

- **Section 1.** (a) The Company agrees that upon his or her return to work from illness or disability, consideration will be given to the employee's physical condition, and, if possible, a less vigorous type of work will be granted at no reduction in the employee's regular pay for a temporary period to be determined by the employee's and the Company's physicians.
- (b) If an employee with 15 or more years of service becomes physically unable to satisfactorily and safely perform the regular duties of his classification, an effort will be made by the Company to find work of a less strenuous nature for which he is qualified and to which the employee will be retrogressed. The employee's wage rate will be reduced by an amount equal to the semi-annual merit increase for the employee's job classification at the time of the assignment to a job of a lower classification and at six months' periods will be reduced by an amount equal to the semi-annual merit increase for the employee's job classification until the employee's wage rate is equal to the maximum wage rate of the job classification to which he has been retrogressed.
- (c) If an employee with 10 to 14 years of service becomes physically unable to satisfactorily and safely perform the regular duties of his job classification, he may request a demotion to a lower classification requiring work of a less strenuous nature for which he is qualified to perform. If such a demotion is granted by the Company, the employee will be assigned to a lower classification and will have his wage rate red-circled until it is equal to the maximum wage rate of the job classification to which he has been demoted. Employees whose wages have been red-circled and who subsequently achieve 15 years of service will become retrogressed in accordance with paragraph (b) above.
- (d) If an employee with less than 10 years of service becomes physically unable to satisfactorily and safely perform the regular duties of his job classification, he may request a demotion to a lower classification requiring work of a less strenuous nature for which he is qualified to perform. If such a demotion is granted by the Company, the employee will be assigned to a lower classification and will have his wage rate established at the maximum wage rate of the job classification to which he has been demoted.

<u>Section 2</u>. Injured employees who are unable to work because of an industrial accident will be paid a supplement in an amount equal to one half of the difference between what he/she would have received at regular work and the amount received as compensation for such injury, for a period not to exceed 26 weeks. This supplemental industrial accident compensation will begin after the initial seven calendar day waiting period and will continue for not more than 26 weeks of continuous disability. If, however, an industrial accident disability continues for two or more weeks, the employee will receive this supplemental industrial accident compensation for the initial seven day waiting period.

<u>Section 3</u>. Upon the death of the designated relatives of an employee, the employee, upon request, may be entitled to the stipulated maximum number of calendar days off for which the employee is entitled to receive regular pay for not more than the indicated number of consecutive working days, including the day of the funeral. No pay will be granted for regular scheduled off days.

| Relationship | Maximum Consecutive Calendar Days Off | Maximum Consecutive Working Days Off With Pay |
|-----------------------------|--|--|
| Spouse or Domestic Partner | 7 | 5 |
| Child/Step/Foster | 7 | 5 |
| Mother/Step/Foster | 7 | 5 |
| Father/Step/Foster | 7 | 5 |
| Brother/Step/Foster | 7 | 5 |
| Sister/Step/Foster | 7 | 5 |
| In-Laws (father, mother, | 5 | 3 |
| brother, sister, son or | | |
| daughter) | | |
| Grandchild/Step | 5 | 3 |
| Grandparent/Spouse's | 5 | 3 |
| Grandparent | | |
| Any relative who resides in | 7 | 5 |
| the employee's household. | | |
| Aunt/Uncle | 5 | 3 |
| Nephew/Niece | 5 | 3 |

If an employee has reported to work and is notified of a death in the family and leaves the job, the day will not be charged as one of the consecutive working days for which the employee is entitled to receive regular pay.

ARTICLE XIV

Section 1. The Company agrees to erect bulletin boards at locations to be selected by the Union and the Company. The use of these boards is restricted to the following: notices of Union meetings, notices of Union elections, notices of changes within the Union affecting its membership, and any other notices issued on the letterhead of the Union. There shall be no other general distribution or posting by the members of the Union of pamphlets, or political literature of any kind, except as herein provided.

ARTICLE XV

<u>Section 1</u>. Any member or members not to exceed three members elected or employed by the Union whose duties for the Union require their full time shall be granted a leave of absence by the Company for six months and additional six months' periods thereafter, provided that each member is from a different promotional sequence or that the Company has granted permission for two members to be from the same promotional sequence. On return to the employ of the Company, such employees shall be employed at their previous classification or other higher classification within this unit for which they may be qualified.

ARTICLE XVI

- <u>Section 1</u>. (a) The Company agrees to notify the Union of the contemplated hiring of any outside contractors to do work normally performed by regular employees covered by this Agreement. Such notification will be given if it is contemplated that the work will be in excess of 2,000 man-hours.
- (b) It is the sense of this provision that the Company will not contract/outsource any work which is ordinarily done by its regular employees if as a result thereof, it would become necessary to lay off any such employees.
- <u>Section 2.</u> (a) Each employee shall have a specific headquarters for reporting for work. However, the right of the Company to effect transfers and reassignments to properly run its business is recognized.
- (b) When it is necessary to temporarily assign employees to a headquarters other A-15 than their own or to a job site reporting location that is further from their home than their regular headquarters, these employees will be paid mileage at the prevailing rate based on the additional round-trip mileage employees are required to drive. No mileage compensation will be paid for the temporary assignment if the other reporting location is closer to the employee's home. Employees reassigned (non-temporary assignment) to a different headquarters will be paid mileage compensation during the first fourteen calendar days of the reassignment.
- (c) When an entire work group is assigned to a new headquarters, paragraph (b) of this Article shall not apply.

- (d) Job site reporting and other temporary assignments will be offered on a voluntary basis. If there is an insufficient number of volunteers, assignments will be made on a junior qualified basis. When assigning the junior qualified, unusual or extenuating circumstances will be taken into consideration.
- (e) Employees may be assigned to drive Company vehicles from and to the job site from home or sites close to home. If Company vehicles are used in such a manner, the mileage provisions for job site reporting are not applicable. An option to the mileage provision is that employees may, during a job site reporting assignment, pick up and return a Company vehicle to their regular headquarters, provided travel is on their own time.

ARTICLE XVII

- **Section 1.** Witness Fees. Regular pay and reasonable or required expenses will be allowed employees who may be summoned or requested to testify for the Company.
- **Section 2**. (a) Employees required to serve on a jury shall be compensated on the basis of their regular salary. Employees must report to work during the working hours when they do not need to be present for jury duty.
- (b) An employee working on either a night or afternoon shift at a time when he is scheduled for jury duty, who is unable to postpone the jury duty until a time when he will be working on a day shift, may request the Company to assign him to a day shift schedule. Such a request must be made at least seven working days before the jury duty service is scheduled to begin. When the term of jury duty for such an employee has ended, he shall return to his normal working schedule.

ARTICLE XVIII

- Section 1. RETIREMENT INCOME PLAN: (a) Eligible Union employees hired or rehired before January 1, 2016 will participate, or continue to participate, in the existing Cinergy Corp. Union Employees' Retirement Income Plan (the "Retirement Income Plan"); provided, however, that effective January 1, 2009, the cash balance feature provided under the Retirement Income Plan shall be amended to provide that all future pay and interest credits provided thereunder to eligible Union employees will mirror the pay and interest credits provided as of the date of this Agreement under the Duke Energy Retirement Cash Balance Plan (i.e., 4% 7% depending on age and years of service), and as further amended under the terms set forth in the April 15, 2015 Letter Agreement titled "Amendment to A58 Retirement Plan Agreement. Employees hired or rehired on or after January 1, 2016 will not be eligible to participate in the Retirement Income Plan.
- (b) It is agreed that the Company will not reduce the benefits and the Union will not request any change in the Retirement Income Plan until the expiration of the Agreement on April 1, 2019.

ARTICLE XIX

Section 1. Any insurance benefit plans under the Duke Energy Health & Welfare Benefit Plans not specifically referenced elsewhere in this Contract (i.e. life insurance, supplemental, accidental death and dismemberment and dependent life insurance) that the Company maintains and/or implements for the general non-unionized employee population shall also be provided to the bargaining unit employees at the same benefit levels, costs and plan design structure as for the non-unionized employees. The Company has the right to add, eliminate, and alter or to make any other changes to these insurance benefit plans or the employee costs for the plans, consistent with any changes it makes for the general, non-unionized employee populations.

ARTICLE XX

Section 1. HOSPITAL AND MEDICAL PLANS: (a) Health care coverage shall A-42 consist of the specially negotiated EPO Plan and shall remain in effect for the term of the 2008 – 2012 Contract. All terms of the specially negotiated EPO Plan, regarding plan design, covered services, premiums and other employee costs, shall be in accordance with the 2008 negotiations letter of agreement entitled "Health Care Benefits."

A42b

- (b) Any other health care plans (medical or dental) that the Company unilaterally implements at its sole discretion for the general non-represented employee population shall also be provided to the bargaining unit employees at the same costs and plan design structure as for the non-represented employees. It is expressly understood that the right to add, eliminate, and alter or to make any other changes to these health care plans or to employee costs for the plans, is reserved to the Company.
- (c) The Company's part of the premium will continue to be paid while an employee is receiving illness or accident compensation provided the employee was covered by such a contract immediately prior to their sickness or industrial accident.

ARTICLE XXI

Section 1. The level of benefit coverage within the medical, dental, flexible spending accounts, basic and additional life, long-term disability, and pension plans will remain substantially equivalent to the coverages mutually agreed upon during negotiations.

ARTICLE XXII

Section 1. (a) Eligible Union employees will participate or continue to participate in the existing Duke Energy Retirement Savings Plan (the "RSP"); provided, however, that (i) for eligible Union employees in the Cinergy Traditional Formula under the Cinergy Corp. Union Employees' Retirement Income Plan (Retirement Income Plan), the matching contribution formula (rate and definition of eligible compensation) under the RSP will continue to be the formula in effect prior to January 1, 2009 (i.e. 100% match on pre-tax and Roth 401(k) contributions up to 3% of the participant's eligible pay, 50% match on the

A-58 A-58a pre-tax and Roth 401(k) on next 2% of the participant's eligible pay, and an incentive match based on the attainment of corporate goals established by Duke Energy), (ii) for all other eligible Union employees, the matching contribution formula rate (rate and definition of eligible compensation) under the RSP will mirror the matching contribution formula provided under the RSP for all eligible union employees other than "Cinergy Traditional Employees" as of the date of this Agreement (i.e. 100% match on pre-tax and Roth 401(k) contributions up to 6% of the participants eligible compensation, with no incentive matching contribution opportunity), and (iii) for eligible Union employees who are not eligible for the Retirement Income Plan on or after January 1, 2016, the RSP shall provide the employer retirement contribution formula (rate and definition of total pay under the RSP that mirrors the employer retirement contribution formula provided for all participants who are not eligible to participate in a defined benefit pension plan (i.e.4% of total pay) as of the date of this Agreement.

- (b) The RSP is contained in the existing Duke Energy Retirement Savings Plan as amended and restated effective January 1, 2014 and as amended by an amendment dated December 19, 2014.
- (c) The Company hopes and expects to continue the RSP indefinitely, but must reserve the right to alter it or discontinue Company contributions to it for a time. However, under no circumstances shall any part of the corpus or income held by the Trustee of the RSP be recoverable by the Company or be used for or diverted to any purposes other than for the exclusive benefit of the employee participants or their beneficiaries as provided in the RSP.

IN WITNESS WHEREOF, the Utility Workers Union of America, AFL-CIO, Local 600, formerly the Independent Utilities Union, Cincinnati, Ohio and Duke Energy Ohio, Inc., Duke Energy Kentucky, Inc., do hereby, by their duly authorized agents, execute and sign this Agreement in duplicate on this 20 day of March., 2019.

THE CINCINNATI GAS & ELECTRIC COMPANY

December 22, 1971

Mr. Charles J. Neuhaus Chairman Independent Utilities Union P.O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Neuhaus:

Reference is made to our discussion at a meeting on November 30, 1971 and to your letter of December 1, 1971, concerning a uniform vacation selection procedure for employees represented by the Independent Utilities Union.

In accordance with our conversation, the Company will adopt the following vacation selection procedures effective January 1, 1972:

Preference for the first two weeks of vacation to which an employee is entitled will be considered within a job classification at each particular work location on a system service basis. Employees entitled to more than a two week vacation may select that additional vacation on a system service basis after all eligible employees within the job classification at each particular work location have had an opportunity to select the dates for at least two weeks of their vacation.

It is emphasized that this procedure will in no way affect the Company's right to determine the number of employees who may take a vacation at any one time.

Please confirm that the procedure stated in this letter is satisfactory to the Union so that the various affected Company departments may be notified prior to January 1, 1972.

Very truly yours,

Robert E. Byrnes

Manager

Industrial Relations

(Due to the deteriorating condition of the original, this letter has been retyped.)

July 16, 1974

Mr. Charles J. Neuhaus Chairman Independent Utilities Union P.O. Box 1757 Cincinnati, Ohio 45202

Dear Mr. Neuhaus:

During the 1974-1977 negotiation meetings, the committees of the Company and the Independent Utilities Union discussed interdepartment transfers to different job classification and lateral bids and their effect on classified seniority. The following procedure has been implemented as a result of the negotiations and subsequent discussions with representatives of the Union.

Individuals who laterally bid or transfer from one bidding are to another will receive classified seniority dates based on the dates they enter the new job classifications in the new bidding area. However, when an employee's move is delayed, consideration will be given to the proper adjustment of the employee's classified seniority rank so that the employee will not be penalized with respect to future opening within the new department. When such employees bid on future openings in the new department, they will be ranked on the basis of their classified seniority date in that bidding area. Should these employees bid on an opening posted outside their immediate bidding area, their wage level seniority will be used in determining their ranking for consideration on the posting. In accordance with past practice, departmental personnel will be given first consideration on an initial I.U.U. wide posting.

The only exceptions to the above procedures are for the following employees in the Customer Services Division of the Customer and Public Relations Department: Douglas Ray Deaton, Patricia L. Lindsay, and Ronald Eugene May. These employees, as was agreed during the negotiations, will be ranked according to wage level date on all promotional bids after they acquire the minimum work experience required for a promotion.

The procedure described in this letter applies only to transfers and lateral bids across bidding areas. Wage level seniority will continue to govern on lateral bids within a bidding area where specific procedures have previously been established.

The Company believes that the described procedures will conform with the agreement reached during the discussions at the 1974 negotiation meetings and will eliminate the potential for employees who transfer or laterally bid into another bidding area from subsequently acquiring more seniority than incumbent employees within the same classification. If the Union concurs with these arrangements, please initial and return the attached copy of this letter.

Very truly yours,

Robert L. Byrnes Manager Industrial Relations

CC:

L. M. Dagenbach R. G. Graham (Due to the deteriorating condition of the original, this letter has been retyped.)

March 28, 1977

Mr. E. Edward Divine Chairman Independent Utilities Union P.O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Devine:

During the 1977 negotiation meetings, the Company and the Union agreed to the introduction of a multiple posting system into the Property Department. This system is designed to speed up the process of filling job openings in the clerical and manual groups of the Department. For the purpose of posing job openings, accepting bids and selecting qualified applicants for job classifications bargained for by the Independent Utilities Union the existing northern, southern, eastern and western divisions of the Department will remain unchanged. Through multiple posting any known original job openings that the Company decides to fill will be listed on the posting. Any equal or lower level job that opens as a result of the original postings may be filled as a resultant available opening. In addition, any original job opening that becomes available during the posting period may also be filled as a resultant available opening. However, the Company must maintain the right to discontinue the filling of openings at any level of the procedure.

To clarify the procedures, the meaning of certain terms used herein are defined at follows:

A "posting" is the announcement of a job opening on the proper forms which are displayed on the bulletin boards of headquarters within the four divisions of the Property Department.

A "bid" is a written request of an employee on the proper form for consideration for an opening.

A "cross-bid" is a bid for an opening in the same job classification in another Division.

A "lateral bid" is a bid for an opening in a different job classification having the same maximum rate of pay.

A "promotional bid" is a bid for an opening in a job classification having a higher maximum rate of pay.

Any Property Department employee may submit a bid at any time. It is not necessary that a job opening be posted before a bid can be submitted. Only one promotional bid, one cross-bid or one lateral bid can be made on a single bid sheet. The bidder may also indicate on the bid sheet his preference for geographical division in numerical sequence. The bid sheet on file with the latest date as of the closing date of a particular posting will be used in processing that posting. It is imperative that the employee be continually aware of the bids he has on file, as well as his promotional opportunities. An employee accepted on a valid bid must accept the new job classification or new location.

Mr. E. Edward Divine March 28, 1977 Page 2

To be valid, a bid must be made out in duplicate and signed by the bidder's supervisor on or prior to the closing date of a posting. One copy of the bid will be returned to the bidder and the other copy will be forwarded to the general office of the Property Department. All bids submitted in the beginning of a calendar year will be retained and used for processing all postings for the calendar year unless changed by the employee.

The acceptance of a bidder on a posting will invalidate all bids of that employee and the employee must submit new bids for consideration on future openings. Any individual bid can be invalidated (withdrawn) by submission of a similar bid with a later date or by the bidder submitting a bid sheet requesting cancellation of all previous bids. In addition, all bids become invalid on December 31 of any year. This will require new bids to be submitted on the first working day of each year or as soon thereafter as practical.

After a job posting has closed the ranking of applicants will be determined on the basis of qualifications, promotional sequences, and classified seniority. Bids will be considered in the following order:

- 1. Cross-bids
- 2. Lateral bids
- 3. Promotional bids

The successful applicant on lateral and promotional bids may be required to qualify by means of an examination if specified by the applicable job descriptions.

Requests for specific job assignments, locations, or shifts within a division may be made in writing to the supervisor in charge of that division. The supervisor will forward a copy of such request to the general office of the Property Department for filing. These requests will be considered by the division supervisor when an opening occurs and prior to the posting of such an opening. However, employees may not exercise their seniority to assure a particular job assignment, location or shift within a division. Requests for assignments will be retained in file until December 31 of any particular year and will be given consideration when job openings occur in the division in which the applicant presently works.

A "results of job opening" will be posted after all bids have been processed. This form will indicate the successful applicants, the headquarters, shift schedule, type of change and effective date. Any applicable payroll changes will be effective on the date which is designated on the multiple posting results sheet.

If, as the result of a job posting, an original opening or any resultant opening cannot be filled by an employee within the Property Department, that job may be posted Company wide.

In addition to permitting more than one cross-bid per posted opening, it is believed that this procedure will materially reduce the time required for the filling of job openings thereby expediting the promotion of employees. It is contemplated that this change in procedure in the Property Department will become effective on or about May 1, 1977.

Very truly yours,

Arthur R. Ehrnschwender

(Due to the deteriorating condition of the original, this letter has been retyped.)

March 28, 1977

Mr. E. Edward Divine Chairman Independent Utilities Union P.O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Divine:

During the 1977 negotiations, the committees for the Company and the Union discussed the testing procedures which are utilized in many promotional sequences when employees promote.

In certain areas of the Company, an employee is tested on the basis of the job from which he promotes. In other instances, testing is based on the job into which an employee will progress and is given within a certain time interval before or after the employee is accepted. Further, the re-testing time interval for employees who do not successfully complete a promotional test varies in different departments. In certain areas of the Company, employees may be pre-tested for future promotional openings. The Union has requested that such advance testing be made available to employees for the next job in their promotional sequence even though an opening may not exist.

The Company is not opposed to advance testing in those situations where a supervisor agrees that such advance testing is in the best interest of all concerned. It must be realized, however, that in some areas of the Company, methods or technology often change so that advance testing is not practical, in such instances the material upon which an employee is tested may be altered substantially at the time an employee may ultimately be promoted. An employee who wishes to be considered for this advance testing should consult with his supervisor. The supervisor will appraise the employee if such testing is permissible and, if not, the supervisor will explain to the employee why his request may not be granted.

It is thought that this letter will clarify any misunderstanding that may have existed concerning advance testing.

Very truly yours,

Arthur R. Ehrnschwender

April 13, 2012

Mr. James Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Re: Leaves of Absence

Dear Mr. Anderson:

During 2012 contract negotiations, the parties discussed Sidebar Letter A-5 dated April 10, 1986 regarding good cause for granting leaves of absence. The parties recognized that there have been significant legal developments since 1986, including but not limited to passage of the Family Medical Leave Act (FMLA) and the Uniformed Service Employment and Reemployment Rights Act (USERRA). Given these and other similar developments, the parties agreed to replace the April 10, 1086 Sidebar Letter as set forth herein.

The Company understands that employees may need to be away from the workplace at times for legitimate reasons. The Company further recognizes that time away from work is important to maintaining a healthy work-life balance. At the same time, the Company depends on a responsible and dependable workforce to serve its customers and meet its business goals.

To balance these interests, the Company provides leaves of absence for qualifying reasons, such as for new parents, medical issues (experienced by the employee or eligible family members), military service, caregivers, education, and other personal reasons deemed by the Company or its third party administrators to justify a leave of absence. Leaves of absence may be granted for up to a maximum of six (6) months, or as otherwise set forth in the applicable summary plan description.

All leaves of absence are provided in a manner consistent with applicable laws. To the extent that a leave of absence provided by the Company is over and above the employee's legal entitlement, it is recognized to be a privilege and not a right of the employee. Such leaves are granted at the discretion of the Company. While never desirable, an employee's absence in most situations can be tolerated more so during certain times of the year than other times.

It is difficult to enumerate the variable circumstances under which employees may be granted personal leaves of absence. The Company evaluates each request on an individual basis in light of the surrounding circumstances specific to such request. For

example, leaves of absence will not be granted for individuals who are absent due to incarceration or for individuals who want to try full-time employment elsewhere.

Employees are expected to cooperate with providing supporting documentation in a timely and truthful manner as needed by the Company and/or its third party administrators to manage the leave process consistently. Employees also are expected to keep their management apprised of their return-to-work status and any work-related restrictions prior to returning to work. Advance notice of the employee's return-to-work date and of any work-related restrictions is necessary for business planning and to ensure compliance with applicable laws.

It is believed that this letter accurately describes the parties' agreement.

Very truly yours,

Jay R. Alvaro
Vice President, Labor Relations

The Cincinnati Gas & Electric Company P.O. Box 950 Cincinnati, Ohio 45201-0960 Robert E. Byrnes Senior Vice President

April 18, 1989

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1989 negotiations, the parties discussed the possibility of the Company notifying the Union of the initial employment of co-ops in two year Associate Degree programs.

As agreed during these negotiations, Department Managers will attempt to inform the Union delegates whenever a two year co-op is hired within their areas of responsibility.

It is thought that by proceeding in this manner, the concerns expressed by the Union during the negotiating meetings will be alleviated.

Very truly yours,

Robert E. Byrnes

April 13, 2012

Mr. James Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Re: Partial Day Vacation Administration

Dear Mr. Anderson:

During 2012 contract negotiations, the parties discussed the granting of vacations in less than one day increments.

As was agreed, department managers will review their individual work groups and where it will not disrupt normal operations, at their discretion, permit requests for partial day vacations in increments of one-half the employee's scheduled work day but not less than four hours. It was further agreed that requests for these partial days must be made at least seven calendar days prior to the date requested and must be approved by supervision. However, because of extenuating circumstances, a partial day off with less than a seven (7) calendar day notification may be approved by an employee's supervisor.

Currently there are some departments that allow, business needs permitting, employees to take partial vacation days in less than half day increments. It is agreed that individual departments will have the ability to grant vacation requests for less than half day increments at their discretion.

It is believed that this letter accurately describes the parties' agreement.

Very truly yours,

Vice President, Labor Relations

The Cincinnati Gas & Electric Company P.O. Box 960 Cincinnati. Ohio 45201-0960 Robert E. Byrnes Senior Vice President

April 18, 1989

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati. Ohio 45201

Dear Mr. Bradford:

During the 1989 negotiation meetings, the committees for the Company and the Union discussed the degree of discipline to be administered to employees who falsify or tamper with Company records.

Many employees represented by the Union are in positions of trust concerning Company records and accounts. The management depends upon the integrity of each employee in the performance of his or her various job duties and responsibilities. The importance of this reliance upon complete employee veracity cannot be overemphasized.

In many disciplinary situations, the Company adheres to a policy of progressive and constructive discipline in order to impress upon employees the nature of Company expectations. However, as mutually agreed upon during the negotiations, employees whose dishonest acts adversely affect the Company will be summarily discharged. For example, it has been a long established Company policy that all meter reading personnel will be terminated who curb readings, falsify records, or are guilty of defalcation; immediate discharge for these activities will continue.

Employees in various departments have access to Company and other accounting and business records and are confronted with situations where circumstances could allow indiscretions for their personal gain or the benefit of others without proper remuneration to the Company. Many positions of trustworthiness could be misdirected to a manipulation or falsification of Company records in a fraudulent, larcenous, or otherwise dishonest manner. As agreed, such activities will result in immediate termination of employment.

If the types of activities occur as described above, the Company will react in good faith upon a full, fair, and impartial investigation. The Company will take every precaution to evaluate particular incidents in full light of all circumstances in order to make certain that any summary termination is not undertaken in an arbitrary, capricious, or disparate manner.

Very truly yours,

Robul & Bynus

Robert E. Byrnes

The Cincinnati Gas & Electric Company P.O. 8ex 960 Cincinnati. Ohio 45201-0960

April 16, 1992

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1992 negotiation meetings, representatives of the Company and the Union discussed the negotiated intent and the current administration of holiday call out provisions contained in Article XI, Section 1 (d) of the Agreement.

There was no dispute between the parties as to how an employee is compensated for any call out assignment where all the hours worked by the individual were entirely within the holiday (midnight to midnight). When such call out assignments are for four hours or less the employee receives four hours pay at the appropriate overtime rate and no travel pay. When such call outs are more than four hours but less than eight, the employee receives eight hours of pay at the appropriate overtime rate and no travel pay. When an employee works entirely within the holiday for more than eight hours, all hours worked after eight hours are compensated at the double time rate of pay with no travel pay. The area of dispute between the parties concerns those call out assignments which are worked contiguous to hours on the day before or the day after a holiday.

In order to completely resolve this matter, the Company is willing to compensate the employee for one hour of travel time at the appropriate rate of pay for call outs of four hours or more contiguous with hours worked into or out of a Company recognized holiday. However, the guarantee of eight hours pay for a call out that is more than four hours but less than eight that is contained in Article XI, Section 1 (d) will not apply to call outs that are contiguous with hours into or out of the holiday.

By proceeding in this manner, it is thought that a consistent and equitable manner of administering the holiday pay provisions of the Agreement can be attained.

Very truly yours,

The Cincinnati Gas & Electric Company P.O. Box 960 Cincinnati, Obio 45201-0960

April 16, 1992

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1992 negotiation meetings between the Company and the Union, the committees discussed the use of flextime.

As was discussed during these meetings, it is the policy of the Company to use flextime programs in those work groups where such scheduling is deemed appropriate by the Department Manager. Although the Company reserves the right to discontinue the use of flextime where appropriate, it will meet with the Union before proceeding.

It is thought that this will adequately describe the discussion concerning this matter.

Very truly yours,

The Cincinnati Gas & Electric Company P.O. Box 960 Cincinnati, Onio 45201-0960

April 16, 1992

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1992 negotiation meetings, the committees for the Company and the Union discussed the change of schedule provision in Article XII, Section 3 (b).

Although the language in the current Agreement states that an employee will receive at least a 24-hour notice of a change in shift, the Company will attempt to give at least a five calendar day notice of such changes.

It is thought that this is a fair and equitable policy which will satisfy the interests of all concerned.

Very truly yours,

The Cincinnati Gas & Electric Company P.O. 80x 960 Cincinnati, Onio 45201-0960

April 16, 1992

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1992 negotiations, the committees for the Company and the Union discussed the reorganization of the Distribution Operations Division of the Electric Systems Operations Department.

As was agreed during these negotiations, the supervisory positions within this section will have the flexibility to perform bargaining unit work when an Operations Technician is unavailable to readily respond to a customer inquiry that needs immediate attention. On those occasions supervision will be able to investigate, resolve and recommend solutions to customers about their inquiries. They may also be setting test equipment and or preparing written recommendations for customers. It is anticipated that the performance of this bargaining unit work will be minimal. As stated during the negotiations, it is thought that supervisory employees will only perform these types of operations on an average of one per week. In the event that the Operations Technician, assigned to a specific area, is on vacation, that average may increase to approximately two to three per week. This agreement does not restrict supervisory employees from doing work they previously performed.

It is thought that this agreement will enable us to better serve our customers.

Very truly yours,

The Cincinnati Gas & Electric Company P.O. 80x 960 Cincinnati, Ohio 45201-0960

April 16, 1992

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1992 negotiation meetings, representatives for the Company and the Union discussed the policies and procedures to be utilized when employees are required to work or train at out-of-town locations.

The mode of transportation to be utilized for all out-of-town trips will be determined by the Company. Commercial airlines will be used whenever possible. The Company will normally furnish roundtrip airline tickets (tourist or coach class) between the Greater Cincinnati Airport and the point of destination. If prior arrangements are made and the Company agrees, employees may drive to and from their destination and be reimbursed at the appropriate mileage rate but not exceeding the cost of the roundtrip airline ticket. Each individual request will be evaluated by the Company before determining if alternate transportation will be permitted. Employees utilizing the personal car option will not be granted additional time off from their regular scheduled work week in order to meet travel schedules not arranged by the Company. Nor will any other expenses such as personal auto repairs and insurance, extra meals or lodging be reimbursed by the Company.

Normally the Company will arrange for, and pay any living accommodation expenses. Occasionally, there will be times when employees will be responsible for direct payment prior to leaving the hotel/motel. In this case, the employees will receive advance payment for the applicable room rates and must reconcile their accounts personally. During most other out-of-town trips, prior arrangements may permit invoicing of applicable hotel/motel room costs directly to the Company. In this situation, involved employees will not receive any direct payments for room costs. Other types of accommodations will be handled on a case-by-case basis with methods of payment appropriate to the sibuation.

For extended trips, employees will be informed prior to leaving for the out-of-town assignment as to the number of return trips to Cincinnati they will be allotted. For these return trips, the Company will normally furnish transportation. In the event that visits home are granted and taken, the Company will reimburse each employee for roundtrip transportation costs only.

The Company may establish and pay an applicable per diem rate in advance for each out-of-town day and each travel day. This rate, which may vary between individual out-of-town locations, will include all other expenses, such as meals, laundry, telephone calls, tips, etc. Transportation and lodging will not be included in the daily per diem amount that each employee will receive. Any expenses incurred over and above the stipulated per diem amount for any given trip will be the responsibility of the employee. Alternately, the Company may elect to reimburse employees for the direct reasonable expenses for such items as meals, laundry, telephone calls, tips, etc. The Company will determine on a case-by-case basis whether a per diem arrangement or reimbursement for reasonable expenses is used for out-of-town assignments.

It is thought that this letter will clarify the Union's concerns about the policies and procedures to be utilized when employees are required to work or train at out-of-town locations.

Very truly yours,

April 13, 2012

Mr. James Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Re: Four 10-Hour Day Guidelines

Dear Mr. Anderson:

During the 2012 negotiations, the parties discussed Side bar Letters A-17 and A-47 regarding four 10-hour day workweeks. As a result of those discussions, the parties agreed to the following revised Guidelines for employees who are assigned to work four 10-hour days.

- Off Days. Management will attempt to provide employees working a four 10-hour day workweek with three consecutive off days. However, employees in a particular work group may request or may be required to have two consecutive off days and another off day within the scheduled workweek. Supervision will give due consideration to such requests.
- Overtime. Time and one-half will be paid for all overtime hours worked in any single workweek, with the exception of Sunday. All overtime hours worked on a Sunday will be paid at double time.
- 3. <u>Vacation.</u> One day vacations are for 10 hours. Weekly vacations are for 40 hours. Employees who are transitioning to or from a four 10-hour day workweek shall be entitled to all accrued vacation (i.e., if an employee returns to an five 8-hour day schedule with 10 hours remaining vacation, the employee will have one day and two hours of vacation to take in accordance with the contract).
- 4. <u>Personal Days.</u> Personal days must be taken in full days regardless of the employee's schedule, and cannot be taken in smaller increments. For employees on 10-hour shifts, personal days are paid for 10 hours. For employees on 8-hour shifts, personal days are paid for 8 hours.
- Holidays. Employees working four 10-hour shifts convert to a five 8-hour day schedule during all workweeks that contain a holiday recognized by the Company in an effort to maintain consistency throughout the bargaining unit for employees to receive 40 hours of pay.

For any other alternate work hour schedule that may be developed, it is agreed that at least two off days will be consecutive. The two consecutive off day agreement does not apply to any currently established workweek or when changing from one schedule to another. Furthermore, the two consecutive off day requirement can be waived, but both supervision and the employee must mutually agree to such a schedule.

April 16, 1992

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

Dear Mr. Bradford:

During the 1992 negotiation meetings the committees of the Company and the Union discussed the representation of employees by personal attorneys or outside agencies during the grievance and arbitration procedures.

As a result of these discussions, the parties agreed that the Union is the sole bargaining representative for its members and therefore no outside representation will be permitted during such meetings. This in no way restricts the Union's ability to have an attorney represent its own interests during the grievance and arbitration procedures.

It is believed that by proceeding in this manner the concerns expressed during these meetings have been alleviated.

Very truly yours,

The Cincinnati Gas & Electric Company P.O. Box 960 - Cincinnati, Onio 45201-0960

July 19, 1994

Mr. Patrick G. Bradford Chairman Independent Utilities Union P. O. Box 1757 Cincinnati, Ohio 45201

This letter cancels and supercedes my previous letter to you, dated July 13, 1994.

Reference is made to our meeting on Tuesday, June 28, 1994 regarding the new job classification, Gas Operations Trainer, Job Code #827. In addition to you and I, Messrs. E. Schwette and D. Zanitsch representing the Company and Mr. D. Rosing representing the IUU were also in attendance.

As agreed, the new job classification of Gas Operations Trainer, Job Code #827 will be established at wage level 12. This new job classification was evaluated by the Company's Non-Manual Job Evaluation Committee as a wage level 11.

In return for the Company's willingness to establish this new job classification at wage level 12, the Union agreed that the Management of Gas Operations will select the individual they deem to be most qualified for this position in lieu of accepting the most senior qualified individual. The Union further agreed not to process any grievances related to the selection process for this position.

If future re-evaluations of this job classification increase the total number of points sufficient to increase the wage level to 12, this job classification will remain a wage level 12 and the selection process will revert to being conducted in accordance with the Union contract in effect at that time.

If you concur with this agreement, please sign and date a copy of this letter and return it to my office.

RE: Time Off For Union Duties/Business

Dear Mr. Anderson:

During the 2015 - 2019 negotiations, the representatives of the Company and the Union clarified the administration of time off work and compensation for performing Union duties/business. Subject to legitimate business needs, the Company will grant compensated or non-compensated time off work in accordance with the following guidelines.

NEGOTIATIONS

Members of the Union negotiating committee and any other employee required to attend or prepare for negotiating meetings will be able to attend during working hours. These employees will not be compensated by the Company for time spent in and preparing for negotiations, unless previously agreed to by the parties.

GRIEVANCES & ARBITRATIONS

A reasonable number of employees will be able to prepare for and attend grievance and arbitration meetings. Union employees will not lose their straight-time wages while attending grievance meetings. The time spent by Union members in preparing for and attending all arbitration meetings is not compensable by the Company.

JOINT MEETINGS

A reasonable number of employees will be able to attend joint meetings between Union members and Company representatives. These employees will not lose their straight-time wages while attending or preparing for joint meetings.

UNION DUTIES/MEETINGS

A reasonable number of employees may be excused but not compensated by the Company for attending, preparing for or performing union duties/meetings. This includes items such as counting votes, regular Union meetings, General Board meetings, working on Union accounting records, or other union duties or meetings.

> Sidebar Letter A32 Page 1

MILEAGE EXPENSES

The Company will agree to reimburse the Union mileage expenses for up to two union representatives to attend Company scheduled meetings. This does not include grievance meetings, arbitrations, negotiations or meetings held at the request of the Union. The Company will agree to reimburse the Union mileage expense for one union representative to attend fact finding meetings. The Union will provide an itemized statement each month for this expense and the Company will reimburse the Union.

There may be occasions when exceptions to these guidelines may be granted. The parties will make every effort to accommodate each other in these matters. The Union agreed to give as much advance notice as possible to supervisors of employees who need to be off work for Union business.

The advancing of wages for non-compensable union business will continue, absent abuse of this process. If problems arise, management will meet with the Union in an attempt to correct the abuse. However, management must maintain the right to discontinue this arrangement, if a satisfactory resolution cannot be reached.

Sincerely,

Jay R Alvaro Director, Labor Relations

Duke Energy

Cinergy Corp. 139 East Fourth Street P.O. Box 960 Cincinnati, OH 45201-0960

September 2, 1998

Mr. Patrick G. Bradford Chairman Independent Utilities Union P O Box 1757 Cincinnati, Ohio 45202

CINERGY.

Dear Mr. Bradford,

As you are aware, a new job evaluation system, the BOGAR Job Evaluation System is being implemented for all job classifications represented by the IBEW, Local 1347, IUU and the USWA, Locals #12049 and #5541-06. The new system was designed by the ERT Sub-Committee II (Joint Union/Management Team) and approved for implementation by the ERT at its June 29, 1998 meeting. The BOGAR Job Evaluation System completely replaces the McIntyre system.

The McIntyre Evaluation break points for each grade level have been mathematically converted to new break points under the BOGAR System, therefore it is not necessary for job classifications to be reevaluated at this time. Only new job classifications or revised job classifications with significant changes since their last evaluation will be evaluated using the new system. Job classifications will retain their current wage rates/grade levels, but will be subject to change if they are revised and reevaluated as was the practice in the past.

Under the current agreement, a company job evaluation committee is responsible for evaluating all new or revised job classifications. (Article VIII, Section 1(I)). A key component of the new job evaluation system is the establishment of a new joint Union/Management job evaluation committee. The committee will consist of two management representatives from each business unit, two representatives from the IUU, IBEW and each USWA local and two representatives from the Corporate Center. Accordingly, there will be 16 total members with a maximum of 10 active during an evaluation. Operating guidelines for the committee are as follows:

- Unions will appoint their representatives and they will only participate in the evaluation of job classifications represented by their Union.
- Unaffected union representatives may be present, but will not participate at this time.
- No more than two of the four USWA representatives will participate in the evaluation of USWA job classifications.

- The participating union must have at least one representative available during the evaluation process.
- Consensus should be reached on each factor during the evaluation; absent consensus, majority rules.
- The participating Business Unit must have at least one representative available during the evaluation process.
- All job evaluation members should be informed it is a long term commitment.
- A quorum to have a meeting is six members.

A job evaluation coordinator from the Human Resources Department will also facilitate in the evaluation process and will not be a voting member. The ERT Sub-Committee II also established the pre-evaluation process, presentation guidelines, post evaluation process, training, a creditability check and employee communication and these will be implemented as presented to the ERT at the June 29 meeting.

This letter and accord modifies the terms of the 1996-2001 contract with respect to the job evaluation system and it is believed that this letter accurately describes the agreement the Company and Union have reached.

Sincerely,

Kenneth E. Williams

MANUAL, CLERICAL AND TECHNICAL JOB CLASSIFICATIONS

Date:

December 29, 2000

Reply By:

CINERGY.

The purpose of this letter is to amend and update the Walter C. Beckjord letter of October 1, 1945, which has served as a preamble to the Cincinnati Gas & Electric Company's Job classification and evaluation system for Union represented job classifications.

In October 1945, after a careful and comprehensive study of the various kinds of work necessary to conduct the business of the Company in a safe, efficient and otherwise satisfactory manner, and the requirements of each job involved, the Company by agreement with the Unions representing the employees and with the approval of the National War Labor Board (Region V), placed into effect a schedule of job titles and descriptions for all manual, clerical and technical employees. Wage rate schedules were established and made effective in accordance with the Union agreements and the approval of the War Labor Board.

The job descriptions and wage rate schedules were designed to provide a fair and equitable means by which all the jobs, within the scope of the plan, being filled by manual, clerical and technical employees could be designated with uniformity and understanding throughout the Company system. The Company and the duly certified exclusive bargaining representatives of the bargaining units agreed to the basis used for defining jobs. It became the duty and responsibility of the supervisory force as the representatives of management to see that it was applied and maintained in a fair and consistent manner. It was also essential that employees clearly understood the duties and requirements of the jobs to which they were assigned. While the job descriptions were not intended to be all-inclusive, they were intended to cover such typical tasks necessary to provide a fair basis for evaluation.

The job classification and evaluation plan provided:

A set of job descriptions which prescribe typical duties and qualifications;

F

INTERNAL CORRESPONDENCE

- A set of promotional charts indicating the line of normal promotions in the respective departments;
- A set of wage schedules containing maximum wage rates for all jobs and steps of progression to arrive at the maximum wage rates;

In September 1998, a new evaluation system (BOGAR) was implemented to evaluate all manual, clerical and technical job classifications represented by the International Brotherhood of Electrical Workers, Local 1347; the United Steelworkers of America, Locals 12049 and 5541-06; and the Independent Utilities Union. A joint union/management committee designed the BOGAR Job Evaluation System. In addition to the items listed above, the BOGAR system requires a Job Evaluation Questionnaire to be completed and approved for each new or revised job classification.

JOB DESCRIPTIONS

Each job description consists of a statement of the nature of work involved in the job classification, in sufficient detail to identify the title and content to those familiar with the organization; also a statement of the minimum qualifications required to enter the job. Each job description is subdivided into two parts, "Duties" and "Qualifications" as follows:

DUTIES

This section is devoted to a description of the essential duties required in the classification itself, considered entirely apart from the individual who may occupy the position. A sufficient number of duties are listed to:

- 1. Indicate the character and grade of the work;
- Indicate the variety of duties;
- Distinguish each job classification from another.

The duties for each job description are those principal duties that are required to properly identify and evaluate each of the specific job classifications. These duties are not to be considered all-inclusive. Employees may be temporarily assigned, within their capabilities, duties of other classifications. When the temporarily assigned duties are those of a higher or lower rated job classification the employees should be paid the appropriate rate of pay in accordance with the Union agreement.

This section also indicates, as a general guide, the degree of supervision under which the employees are expected to be able to perform their work; that is under "Close," "Directive," or "General Directive" supervision. These terms are defined as follows:

The Cincinnati Gas & Electric Company

 The term "under close supervision" means that the employees perform only those tasks which they have been instructed to do and are observed and supervised most of the time while performing them.

For example: A helper assisting a mechanic in performing assignments would ordinarily be under the "close" supervision of the mechanic.

The term "under directive supervision" means that the employees perform primarily those tasks and duties which they have been directed to do and then carry out such instructions under observation or checking from time to time.

For example: A mechanic, working under the direction of a supervisor, assigned to a section of the work but observed or contacted periodically during the day, by the supervisor, would be considered as working under "directive" supervision.

 The term "under general directive supervision" means that the employees under general instructions perform duties independently, but within the limitations of standard practices or procedure.

For example: A Senior Lineperson operating in the field on scheduled assignments, in accordance with standard practices and procedures but without any supervision while in the field, whose production or performance would be the check on activities and quality of work, would be considered as working under "general directive" supervision.

QUALIFICATIONS

In this section of the job descriptions are listed those minimum qualifications which the individual is expected to bring to the job. Specifically included are such items as basic education, degree of skill, extent of experience special knowledge, and other required qualifications.

Company Requirements as to General Qualifications

In addition to the duties and qualifications for each job classification as set forth in the job descriptions, each employee must meet the Company's requirements as to general qualifications, which include:

 The physical and mental abilities to perform the essential functions of the job classification, with or without reasonable accommodations;

The Cincinnati Gas & Electric Company

PSI Energy, Inc.

- 2. The willingness to follow instructions and cooperate with other employees;
- The willingness to respond to calls outside of regular hours, when the need arises and in emergencies, to help in any department or phase of the Company's operations in which they are qualified to help;
- The willingness to work a shift schedule and irregular hours where the nature of the work requires it;
- 5. The willingness to direct and instruct or train employees, of a lower job rating, assisting on the same work;
- 6. If required by assignment to drive automobile or trucks, must hold a valid State Bureau of Motor Vehicles Operators' license;
- 7. Compliance with the general rules and practices of the Company, with specific rules of the department in which they are employed, and with those of other departments with which their work must be coordinated;
- 8. Thorough familiarity with and strict observance of the Company's safety rules applicable to their job;
- Have the characteristics of dependability, trustworthiness, and carefulness, and have a satisfactory previous record in these respects;
- The willingness to submit to physical examinations by a licensed physician designated by the Company;
- 11. The willingness to supply the necessary employment records including, but not limited to, birth certificate, social security number, selective service record, military record, character and past employment records.

JOB EVALUATION QUESTIONNAIRE

Each questionnaire consists of questions related to the six factors used to evaluate a job classification under the BOGAR system. One or more employees in a job classification represented by the applicable Union must complete and sign one questionnaire. A departmental management representative must approve the completed questionnaire. The six factors and related sections of the questionnaire are as follows:

The Cincinnati Gas & Electric Company

Knowledge

Questions related to the amount of formal and informal education, training and experience.

Responsibility

Questions related to the amount of responsibility for such things as: Company funds; confidential information; safety, training and/or work direction of others; materials and equipment; etc.

Customer Contact

Questions related to the amount, importance and difficulty of contacts with internal and external customers.

Decision Making and Complexity of Duties

Questions related to the complexity of the work; the freedom employees have to make decisions; and, the impact their decisions may have on the Company.

Physical/Adverse Characteristics

Questions related to the amount, duration and frequency of: physical work (e.g., lifting, climbing and walking); and, work in adverse conditions (e.g., heat, cold, dust and noise).

Hazards

Questions related to the inherent dangers in the job which directly expose the employee to the possibility of accidents which may result in lost time accidents or death.

WAGE SCHEDULE

Starting Rates

When employees are first assigned to a job classification, they receive the starting/minimum rate indicated in the wage schedule for that job, except in cases where an employee is already receiving a rate equal to or in excess of the starting/minimum rate indicated. In such event when the employee is promoting into the job classification, the employee receives an increase as described in the applicable Union Agreement, but in no event in excess of the maximum wage rate for the job to which the employee is assigned.

The Cincinnati Gas & Electric Company

Progression Steps within a Wage Range

The wage range provides for progression steps leading up to the maximum evaluated rate of the job. Job progression steps are designed for the purpose of advancing an employee within the wage range. These progression steps are to be used as follows:

At intervals of six months, the supervisor shall make a review of the employee's development and progress on the assigned job. If progress, measured by demonstrated ability and performance, has been satisfactory, the scheduled progression step will be made effective on the first Monday following the expiration of that particular interval, until the employee's wage rate equals the maximum rate specified for the particular job classification.

When the performance review indicates that the employee has not made satisfactory progress in the job and an increase in pay is not warranted the employee is to be personally notified by the immediate supervisor that the progression step increase is being withheld. The notification must take place at least one month in advance of the date for the scheduled progression step. In addition, serious consideration should be given as to whether or not the employee should be demoted, transferred or released. The Union may request a review of such a decision. Such review is to be made by a representative or representatives of the Union and a representative or representatives of the Company.

For new employees the six-month interval will start from the hiring date, and for promoted employees, a new series of six-month intervals will start on the date of promotion.

CONCLUSION

Although this plan is set forth as clearly and explicitly as possible, questions may arise as to the intent or interpretation of some provisions. In such event, the matter should be discussed with a representative in the Labor Relations department.

Very Truly Yours,

Patrick P. Gibson

CINERGY.

Re:

Disconnect Non-pay, Succession And Special Meter Reads Agreement

Dear Ms. Harthun:

This letter documents our discussions and agreements related to disconnect non-pay (DNP) field credit activity and succession and special meter reading work.

In August 2002, the Company met with the leadership of each of the CG&E affiliated local unions to discuss the need to significantly increase the number of completed DNP's and to complete all succession/special meter reads at a competitive cost. As a result of those discussions, a team was formed, which included the leadership from each union and management representatives, to evaluate the business case for implementing necessary flexibilities and cost control measures to perform the identified work at a competitive cost. The team was charged with reaching a consensus on a plan to achieve the desired results.

It was recognized that residual union jurisdictional issues around the DNP work and the succession and special meter reading work had resulted in restrictive work practices across the multiple unions connected with these job functions. Since August of 2002, the joint union and management team has worked together on a regular basis to achieve compromise for the implementation of the following competitive alternatives to outsourcing these job functions. Pending agreement with the leadership of the four local unions involved in the discussions, the Company will implement the changes described below.

The Company will form a new centrally managed work group for the specific purpose of performing the DNP fieldwork. The Company will initially staff the new work group with 10 existing employees (Senior Representatives) represented by the UWUA currently performing DNP work. Additionally, 8 employees will be added in each of two entry-level job classifications, one represented by the USWA and the other by the IBEW, Local 1347. It is understood that if any of the aforementioned 10 employees represented by the UWUA vacate their position and the Company decides to backfill the position(s), it will be filled as an entry-level DNP worker represented by the USWA or IBEW. The Company assured the Union that the two clerical positions that provide support to the DNP work process would not be eliminated as a result of this reorganization.

The 16 new entry-level DNP worker job openings will be made available to other employees represented by their respective unions (i.e., USWA and tBEW). If all 16 openings are not filled by employees in their respective unions or by displaced employees in redeployment represented by the IBEW, the remaining openings will be made available to full-time meter readers and then part-time meter readers, in that order. If any full-time or part-time meter

readers vacate their positions as a result of accepting any of the initial 16 DNP worker job openings represented by the IBEW and USWA, the Company will backfill those vacancies accordingly (i.e., part-time with part-time and full-time with full-time). These agreements only apply to the initial 16 DNP worker job openings.

If any of the 10 Senior Representatives in Revenue Collections are bumped by Senior Representatives with more seniority as a result of Company initiatives, it will not impact the number of positions being eliminated through attrition.

The succession and special meter reading duties will be primarily, but not exclusively, assigned to UWUA represented employees. As a result, 10 new full-time meter reader job openings will be filled. Management intends to assign work other than succession/special reads to DNP workers represented by the USWA and IBEW, whenever there is other productive work available for them to perform within their job classifications. However, this does not restrict management's right to assign those employees to perform such meter reads. The Company agreed to backfill part-time meter reader positions that are vacated as a result of part-time meter readers accepting any of the initial 10 new full-time meter reader positions.

This agreement is made between the parties without prejudice to the position of either party regarding the jurisdiction, assignment and contracting of work. However, the Union agrees that no grievances will be filed or pursued relating to the assignment of work as described above, for the duration of this agreement. To the extent that the Company has retained its rights with . regard to making future changes to this, or any other work processes in the future, the Union retains its right to grieve in the event that management implements changes to the abovedescribed terms for achieving the DNP, succession and special meter reading work. In this context, however, it is also understood that slight modifications to this overall business plan may be made, as long as the plan's basic design remains in effect.

The team of management and union leaders is commended for their commitment to meeting the present day business needs in a competitive manner. It is expected that all parties will benefit by this plan for achieving this work with company employees. Please sign where indicated below to indicate the Union's agreement to the above terms.

For the Company.

Re: Post-Retirement Medical Benefits

Dear Ms. Harthun:

On April 27, 2004, the Company met with union representatives from UWUA Local 600, USWA 5541-06 and 12049 and IBEW 1347 to continue the negotiations for providing a post-retirement health reimbursement account ("HRA") option (the "HRA Option") to our active employees. Prior to that meeting, in a letter dated March 2, 2004, the Company provided the unions (I) a written overview of the Company's proposed design for the HRA Option, and (II) written responses to certain related questions. This letter updates the Company's proposed design for the HRA Option.

I. OVERVIEW OF HRA OPTION

All current, full-time employees represented by UWUA, Local 600 will be able to make a one-time choice between continuing in the current traditional post-retirement medical option (the "Traditional Option") or electing to participate in the new HRA Option described below. Employees will be required to make this election by a specified election date in 2004. (Notwithstanding the foregoing, employees currently receiving long-term disability benefits or on a military leave of absence, will make this election when they return to active, full-time status. If they do not return to active, full-time status, they will default to the Traditional Option.) All employees hired or rehired on or after January 1, 2005 will participate in the HRA Option. Each employee who elects to participate in the HRA Option, and each employee hired on or after January 1, 2005, will be referred to as a "HRA Participant" herein.

Under the Traditional Option, eligible retirees (those who retire after attaining age 50 with five (5) years of Service, as defined in the applicable Pension Plan) are provided access to group medical coverage and a premium subsidy that varies based upon the retirees' service and classification (see detail regarding the various classifications and subsidy levels attached hereto).

Subject to any collective bargaining obligation, the Company reserves the right to amend, modify or terminate the Traditional Option and/or the HRA Option at any time. However, amounts already credited to a HRA Participant's account will not be reduced by amendment, except to the extent necessary or appropriate to comply with changes in the law.

> The benefit under the HRA Option is based on a bookkeeping account that can grow like a savings account with service and interest credits as described below. An employee who elects the HRA Option will start with an opening balance that is equal to 1/12th of \$1,000 for each prior calendar month in which the HRA Participant worked at least one day for the Company. In the future, the Company will credit eligible HRA Participants with an additional 1/12th of \$1,000 for each calendar month in which the HRA Participant works at least one day for the Company. The Company will also credit each eligible HRA Participant's bookkeeping account with an annual interest credit. Interest will be credited at the same interest rate as the cash balance updates as determined in August of each year, except that for the term of the current labor agreement, the interest rate will not be less than 3.5%; for 2004, the rate is 5.31%. Except as discussed below, only HRA Participants who are active, full-time employees and work at least one day in the month are eligible for the monthly service credit. Like retirees in the Traditional Option, HRA Participants will have access to group medical coverage only if they retire after attaining age 50 with five (5) years of Service (as defined in the applicable Pension Plan), however, there will be no subsidy. Please note the following regarding the HRA Option:

- a. If a HRA Participant retires after attaining age 50 with five (5) years of Service (as defined in the applicable Pension Plan), the amounts credited to the HRAs generally can be used for the qualified medical expenses, as defined in Section 213(d) of the Internal Revenue Code, of the retiree and the retiree's spouse and eligible dependents (see IRS publication 502 for examples of qualified medical expenses). To the extent permitted by applicable law and as is otherwise practicable, the HRA option is intended to provide a tax-free benefit. Due to future law changes, however, there can be no assurance of favorable tax treatment.
- b. Except as provided below, if the employment of a HRA Participant terminates prior to attaining age 50 with five (5) years of Service (as defined under the applicable Pension Plan), the HRA Participant forfeits all amounts credited to the HRA Account.
- c. If a HRA Participant dies while actively employed prior to attaining age 50 with five (5) years of service (as defined in the applicable Pension Plan), the HRA Participant forfeits all amounts credited to the HRA Account.
- d. If a HRA Participant dies while actively employed after attaining age 50 with five (5) years of Service, his/her spouse and eligible dependents will be entitled to use amounts credited to the HRA to pay qualified medical expenses immediately.
- e. In the event of disability or leave, the Company will continue monthly service credits for the first 12 months. The Company will continue Interest credits while the HRA Participant is disabled or on leave (and prior to recovery or retirement). For HRA Participants on a military leave, service credits and interest credits will continue for the full qualified leave period.

- f. If the employment of a HRA Participant is involuntarily terminated in connection with an involuntary reduction in force and such termination is in no way related to performance deficiencies, the HRA Participant will be eligible to maintain his/her HRA balance as of termination. The HRA Participant will be able to use amounts held in his/her HRA Account immediately following the termination.
- g. For the term of the current Collective Bargaining Agreement, the Company will agree not to amend, modify or terminate retiree health care benefits for any active employees covered by the CBA. Amounts credited to a HRA Participant's account will not be reduced by amendment, except to the extent necessary or appropriate to comply with changes in the law.

II. QUESTIONS

Set forth below are responses to some of the questions regarding the HRA Option raised in previous meetings.

- 1. Will the Company offer choice to all employees?
 - A: Yes. Presently, the Company plans to allow all current, full-time employees to elect to stay in the Traditional Option or switch to the HRA Option. After January 1, 2005, new hires and rehires will automatically participate in the HRA Option.
- Will an employee be able to elect the HRA Option upon retirement?
 - A: No. A one-time election will take place in 2004.
- 3. Can a HRA Participant withdraw amounts credited to his/her HRA account in cash upon retirement? Can the Company pay the amount out in a lump sum?
 - A: Money may be withdrawn from the HRA account only for paying qualified medical expenses. The account will not be paid out in cash. Favorable tax treatment is available for a HRA only if the HRA reimburses medical expenses as defined in Section 213(d) of the Internal Revenue Code. As stated below from IRS Notice 2002-45, any right to receive cash will disqualify the HRA from receiving favorable tax treatment.

"An HRA does not qualify for the exclusion under § 105(b) if any person has the right to receive cash or any other taxable or non-taxable benefit under the arrangement other than the reimbursement of medical care expenses. If any person has such a right under an arrangement currently or for any future year, all distributions to all

> persons made from the arrangement in the current tax year are included in gross income, even amounts paid to reimburse medical care expenses. For example, if an arrangement pays a death benefit without regard to medical care expenses, no amounts paid under the arrangement to any person are reimbursements for medical care expenses excluded under § 105(b)... Arrangements formally outside the HRA that provide for the adjustment of an employee's compensation or an employee's receipt of any other benefit will be considered in determining whether the arrangement is an HRA and whether the benefits are eligible for the exclusions under §§ 106 and 105(b). If, for example, in the year an employee retires, the employee receives a bonus and the amount of the bonus is related to that employee's maximum reimbursement amount remaining in an HRA at the time of retirement, no amounts paid under the arrangement are reimbursements for medical care expenses for purposes of 105(b)..."

- 4. What happens to the HRA balance upon disability or extended leave from the Company?
 - A: See Section I(e).
- 5. What happens to the HRA balance in the event of a termination of employment?
 - A: See Section I.
- 6. What happens to the HRA balance if I die while actively employed?
 - A: See Sections I(c) and I(d). Currently, the spouse and eligible dependents of an employee who dies while actively employed with Cinergy can elect to become covered under the non-union medical plan and receive subsidized coverage at the active employee rate until death or a disqualifying event (for the spouse, this would include, but not be limited to, remarrying or becoming Medicare eligible; for an eligible dependent, it would include, but not be limited to, ceasing to qualify as an eligible dependent due to age).
- 7. Will the Company contributions be indexed in future years (e.g., indexed to the trend line for health care costs)?
 - A: No. At this time, we do not plan to align our service credit or interest credit to any index. However, the Company will continue to evaluate its crediting levels. Subject to any collective bargaining obligations, the Company reserves the right to make adjustments, including increasing, decreasing or discontinuing credits unilaterally.

- 8. Will the opening HRA balances be calculated with retroactive interest crediting?
 - A: No. Making retroactive interest credits would be cost prohibitive from the Company's perspective.
- What are other companies doing with regards to post-retirement healthcare?
 - A: See Hewitt survey previously provided (51% of survey respondents have a unionized workforce).
- How can HRA Participants use amounts credited to the HRA?
 - A: Money credited to a HRA can be used to reimburse the HRA Participant for medical expenses as defined in Section 213(d) of the Internal Revenue Code. See IRS publication 502 for examples of qualified medical expenses.
- 11. Who will administer the HRA account balances?
 - A: Hewitt Associates will track the HRA credits while HRA Participants are actively employed. The Company is reviewing proposals from third party administrators for post-retirement administration, but this will likely be Hewitt Associates.
- 12. Will the HRAs be protected/guaranteed?
 - A: The benefit under the HRA option is based on a bookkeeping account and is not funded like a 401(k) plan. See Section I regarding the Company's ability to amend.
- If the Company decides to eliminate the Traditional Option at a later date, would employees be allowed to get in the HRA?
 - A: The Company periodically evaluates its benefit programs and would determine the appropriate course of action at that time.
- 14. Would interest on the HRA account continue to accrue after an employee retires?
 - A: See Section I.
- 15. If two Cinergy employees are married, can they make different elections with respect to the HRA Option?

A: Yes, one could elect to remain in the Traditional Option, and the other could elect the HRA Option; if they remain married during retirement and so elect, they would receive subsidized coverage under the Traditional Option and have access to amounts credited to the HRA on behalf of the other spouse. Regardless, the elections are independent of each other.

Please note that the explanation set forth above merely summarizes the basic elements of our currently proposed design for the HRA Option. The Company is in the process of working out the details of the HRA proposal and necessarily reserves the right to work out those details. The Company also reserves the right to more fully document the HRA Option, which option will be governed and construed in accordance with the terms of the Plan as adopted by the Company.

Very truly yours,

John E. Polley General Manager Labor Relations

What are other companies doing with regards to post-retirement healthcare? Hewitt Associates conducted a survey for the Henry J Kalser Family Foundation between June and September 2003 to understand how large private-sector employers are handling retiree health benefits. The survey included responses from 45% of all Fortune 100 companies and 30% of all Fortune 500 companies. Among the companies surveyed this is what they had to say:

- 10% have terminated all subsidized health benefits for future retirees
- 20% say they are very likely to terminate all subsidized health benefits for future retirees
- 35% of the firms terminated benefits for future retirees and now provide access-only to health benefits with the retiree paying 100% of the cost
- . 6% of employers shifted to a defined contribution approach
- 71% report having increased retiree contributions to premiums in the past year 53% report increases to plan design cost sharing
- 57% increased prescription drug co-payments
- 12% now require mandatory mall-order refills for maintenance drugs

Summary of Post-Retirement Health Care Options

Current Post-Retirement Health Care Option

Employees hired before January 1, 2005, who elect the subsidy option and who retire from the company on or after age 50 with at least five years of service, may be entitled to a post-retirement health care subsidy from the company dependent on their years of service at retirement.

Re: Amendment to Sidebar Letter A-42 Post-Retirement Medical Benefits

Dear Mr. Anderson:

During 2012 contract negotiations, the parties discussed Sidebar Letter A-42 dated June 10, 2004 regarding post-retirement medical benefits. As a result of those discussions, the parties agreed that Sidebar Letter A-42 will (i) continue to apply without modification for employees hired prior to January 1, 2013, and (ii) be amended to reflect that any employee hired or rehired on or after January 1, 2013 will not participate in the HRA Option or the Traditional Option (both as defined in Sidebar Letter A-42). It follows that Sidebar Letter A-42 is hereby amended as set forth below:

In the second full paragraph on page one of Sidebar Letter A-42, the fifth and sixth sentences are hereby deleted and replaced with the following:

- All employees hired or rehired on or after January 1, 2005 and before January 1, 2013 will participate in the HRA Option. No employee hired on or after January 1, 2013 will participate in the HRA Option or the Traditional Option.
- No employee rehired on or after January 1, 2013 will continue to participate in the HRA Option or the Traditional Option following such rehire date. Any such rehired employee who was participating in the HRA Option or the Traditional Option at the time of such employee's prior termination of employment:
 - shall be eligible for access to the HRA or premium subsidies, as applicable, only if he or she was eligible for such HRA access or premium subsidies at the time of such prior termination of employment, and
 - (ii) shall not accrue additional benefits under either the HRA Option or the Traditional Option.
- Employees hired or rehired on or after January 1, 2013 who retire after attaining age 50 with at least five (5) years of service under the applicable Pension Plan are provided unsubsidized access to post-retirement medical coverage.
- Each employee who elected to participate in the HRA Option, and each employee hired on or after January 1, 2005 and before January 1, 2013 will be referred to as an 'HRA Participant' herein.

Any provision of Sidebar Letter A-42 that is inconsistent with the above shall be deemed no longer in effect. Except as provided herein, the remaining provisions of Sidebar Letter A-42 continue in full force and effect.

It is believed that this letter accurately reflects the parties' agreement.

Very truly yours,

av R. Alvaro

Vice President, Labor Relations

Duke Energy Labor Relations 139 East Fourth St Cincinnati, OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Post-Retirement Healthcare

Dear Mr. Kowolonek:

During the 2019 negotiations, the parties discussed post-retirement healthcare benefits. This letter amends the Post-Retirement Medical Benefits Sidebar Letter A-42 dated June 10, 2004 and A-42a dated April 13, 2012, and confirms these discussions and the resulting agreement.

Access to Post-Retirement Health Benefits

Employees who terminate on or after October 1, 2015 after attaining at least age 50 with at least 5 years of service will have unsubsidized access (i.e., no Company contributions) to post-retirement medical, dental, and vision coverage; provided, however, that beginning as soon as January 1, 2021, employees who do not enroll in Duke Energy-sponsored pre-65 retiree medical, dental and vision coverage at the time of retirement or following the expiration of any COBRA continuation will not be permitted to enroll themselves or their eligible dependents at a future date. Coverage for retirees age 65 and older will be provided on an unsubsidized basis through a Medicare Coordinator. The Company shall provide a subsidy/contribution towards the cost of post-retirement health coverage only as provided below in this letter.

Subsidies/Company Contributions - Traditional Option

For employees who terminate on or after October 1, 2015, the "Traditional Option" is hereby amended to provide contributions towards the cost of post-retirement healthcare coverage, in the form of credits to a newly established Subsidy Health Reimbursement Account ("Subsidy HRA"), only for individuals who are under age 65 and who are:

- In a group eligible for a medical subsidy under the rules in effect prior to October 1, 2015, which is limited to those hired prior January 1, 2013; and
- At least age 55 with at least 1 O years of service at termination of employment.

The amount of the contributions will vary as follows:

- Eligible employees age 50 or older by October 1, 2015 will receive (during retirement) a pre-65 contribution of \$350 per month, plus \$175 per month for their spouse/domestic partner, if any; and
- Eligible employees younger than age 50 as of October 1, 2015 will receive (during retirement) a
 pre-65 contribution of \$250 per month, plus \$125 per month for their spouse/domestic partner, if
 any.

Sidebar Letter A42b Page 2

Subsidies/Company Contributions - HRA Option

Effective October 1, 2015, the "HRA Option" is hereby amended such that:

- The Company will discontinue crediting 1 /12 of \$1,000 each month to the health reimbursement accounts for those employees who have a health reimbursement account under the HRA Option, with interest credits continuing; and
- The Company will offer a choice window in 2015 to employees who have a health reimbursement
 account under the HRA Option to elect whether to continue In the HRA Option (modified as
 described in the above bullet) or to forego their rights to their modified health reimbursement
 accounts under the HRA Option in exchange for participation in the Traditional Option (modified to
 provide credits to a Subsidy HRA as described above).

Miscellaneous

The post-retirement health benefits described above will replace the post-retirement medical coverage options in effect prior to October 1, 2015, for employees who terminate on or after October 1, 2015, Including those described in Sidebar Letters A-42 and A-42a. These benefits will be governed by and construed in accordance with the applicable plan documents.

In all other respects, Sidebar Letters A-42 and 42a shall continue in accordance with their terms.

Sincerely,

Director, Labor Relations

Duke Energy Labor Relations 139 East Fourth St Cincinnati, OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Temporary Upgrading

Dear Mr. Kowolonek:

During the 2019 contract negotiations, representatives of the Company and the Union discussed temporarily upgrading employees in clerical and technical job classifications.

The Agreement provides that temporary upgrading shall only be available for manual employees. However, as a result of these discussions, the Company will agree, during the term of the 2019 – 2023 Agreement, to permit clerical and technical employees to be temporarily advanced to higher classifications. Employees will only be given consideration for temporary advancement when they actually replace another employee in a higher job classification for a full day or more; or supervision deems there is a need for an employee to fulfill the duties of a higher classified job for a full day or more. When employees are temporarily upgraded they will receive the minimum rate of the higher job classification or \$10.00 per week more than their current wage rate, whichever is greater. When selecting the individual to be temporarily advanced, the management will give consideration to seniority and rotation among qualified employees. Such upgrading will not take place when the work duties of another employee are distributed among several other employees, or when employees perform duties of higher classified jobs for training purposes.

The Company voiced a serious concern about the potential for voluminous grievances if temporary upgrading is permitted for non-manual employees as described. As agreed, no grievances will be processed by the Union as a result of this limited exception to Article XII, Section 6 of the Agreement.

Sincerely.

Michael A. Ciccarella Senior HR Consultant Labor Relations

Duke Energy Labor Relations 139 East Fourth St Cincinnati, OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Meter Reading

Dear Mr. Kowolonek:

During the 2019 contract negotiations, representatives of the Company and the Union discussed Meter Reading operations.

Job Classification, Meter Reader - New: As discussed, the Meter Reader - Full Time job classification will be retitled Meter Reader - New and the wage rate adjusted to the MR 3 wage level upon ratification of the new Agreement. Incumbent employees in this classification will have their hourly rate adjusted to the minimum rate of the MR 3 wage level and will be eligible for merit and general wage increases as outlined in the Agreement.

Part-time Meter Readers: Should part time employees be utilized in the future, they will be hired into the Meter Reader - New classification at the minimum rate of pay as outlined in the Agreement. All provisions of the Agreement regarding part-time employment would apply to these employees. Part-time Meter Readers will receive the appropriate compensation for overtime when they work in excess of 8-hours in a day or any other regularly scheduled shift that is longer than 8 hours.

Hours of Work: Core meter reading hours will be from 7:30 AM to 4:00 PM, subject to changes based on business needs and to any schedule arrangements approved by an employee's supervisor or manager. The normal work day will consist of 8.5 hours including a 30 minute unpaid meal break; however, based on business needs, employees may be assigned a straight eight hour shift with a paid fifteen minute break. The Company reserves the right to change these hours based on business needs in accordance with the Agreement. Employees working in excess of their scheduled work day will receive premium pay and meal compensation as provided for in the Agreement.

Transfers: Any future full-time openings in divisions offices will first be offered to voluntary transfers of current qualified full-time Meter Readers.

Sincerely.

Michael A. Ciccarella Senior HR Consultant Labor Relations

Re: Interplant Seniority Rights

Dear Mr. Anderson:

During the 2005 negotiations, representatives of the Company and the Union discussed the interplant seniority rights for employees at the electric generating stations, in the event of a surplus situation.

As agreed, during the term of the 2005 - 2008 Agreement, should the Company declare a surplus at one of its electric generating stations and affected employees cannot be absorbed into the work force at the plant, all of the electric generating stations within the CG&E service territory will be considered one department for purposes of administering roll-backs. The intent is to provide the more senior employees at the station with a surplus situation, the ability to bump the less senior employees at the other stations. The wage rates of surplus employees will be red circled.

By proceeding in this manner, the Union's concern in this matter is alleviated.

Very truly yours,

Cinergy Corp. 139 East Fourth Street P.O. Box 960 Cincinnati, OH 45201-0960

Mr. Jim Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

CINERGY. CG&E

Re: Treatment for Substance Abuse

Dear Mr. Anderson:

During the 2005 negotiations, representatives of the Company and the Union discussed the compensation policy for employees who undertake treatment for substance abuse.

While the treatment of these conditions is specifically excepted from coverage under the sick leave provisions of the Agreement, the Company will, for the term of the 2005 – 2008 Agreement, continue the arrangement of providing short-term disability benefits (STD) to employees who obtain treatment at an appropriate detoxification facility under the direction of the Company or in coordination with the Company and the employee's personal physician. Available STD may only be used for the first continuous absence when an employee undertakes to correct a substance abuse problem through an approved program. If the initial rehabilitation effort at a treatment center is not successful, the employee will not be granted additional STD.

The Company is willing to extend this extra effort to help afflicted employees and their families, to eliminate the burden imposed upon fellow employees, and to minimize lost productivity and absenteeism caused by substance abuse. Employees who are unwilling to accept the responsibility for their own behavior or who refuse to participate in a necessary program will, as in the past, jeopardize their continued employment with the Company.

The Union is encouraged to make the Company aware of individuals thought to have substance abuse problems. With such assistance, fellow employees may be given a chance for which they may be forever grateful.

Very truly yours,

Cinergy Corp. 139 East Fourth Street P.O. Box 960 Cincinnati, OH 45201-0960

April 21, 2005

Mr. Jim Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Personal/Diversity Day Requests

Dear Mr. Anderson:

It was agreed that the individual departments would attempt to accommodate as many requests as possible to take a personal/Diversity or vacation day on Martin Luther King, Jr. Day, Presidents' Day and/or Good Friday during the term of the 2005 - 2008 Agreement. All requests for a personal/Diversity or vacation day must be made by employees at least 7 days in advance. Days requested with the 7 day advance notice will not be considered as an absence for determining an individual attendance record.

It is thought that this agreement will be mutually beneficial for all involved.

Very truly yours,

Duke Energy Labor Relations 139 East Fourth St Cincinnati, OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Vacation Carryover

Dear Mr. Kowolonek:

During the 2019 negotiations, representatives of the Company and the Union discussed carryover vacations.

It was agreed that henceforth employees entitled to a vacation may carryover up to a maximum of 80 hours of vacation into the next year. The amount of carryover vacation available in any calendar year may not exceed the 80 hour maximum. Use of vacation carried over may be taken any time during the following calendar year, subject to approval by supervision and the terms outlined in the Agreement for vacation use.

Sincerely,

Michael A. Ciccarella
Senior HR Consultant
Labor Relations

Mr. James Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Re:

Job Elimination Situations

CINERGY.

Dear Mr. Anderson:

During the 2005 contract negotiations, representatives of the Company and the Union discussed the possibility of employees bumping other employees with less system service seniority at the same wage level in other job classifications in the event of a job elimination situation.

During the discussions the Union wanted the Company to agree to allow senior employees at a given wage level within a bidding area, the right to bump junior employees in other job classifications at the same wage level within the same bidding area, even though the senior employees had never been in the job classification(s) occupied by the junior employees. Due to the potential for a significant loss in productivity, the Company could not agree to that arrangement. However, during the term of the 2005 - 2008 agreement, it was agreed that if such a situation should arise, the Company would work with the Union on a case-by-case basis, in an attempt to place such employees in other available job classifications at the same wage level within the same bidding area. It was further agreed that if the Company is unable to place such employees in job classifications at the same wage level within the bidding area and they have 25 or more years of system service, they will maintain their job titles and wage levels and be eligible for negotiated increases and bonuses. This only applies when such employees with more system service seniority are qualified, but cannot bump into a same wage level job within the bidding area, held by a junior system service seniority individual because they have not passed through the other job.

It was also agreed that should a job elimination situation occur during the term of this Agreement, at the request of the Union, the parties would meet to discuss the rollback procedure described in Article V, Section 3, which may be revised by mutual agreement of the parties.

This accurately reflects the agreements reached between the parties.

Very truly yours,

June 2, 2008

Mr. James W. Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Retirement Plan Agreement

Dear Mr. Anderson:

During the 2008 contract negotiations, representatives of the Company and the UWUA, Local 600 (the "Union") discussed the Company's desire to migrate all employees to a common benefits program. The following outlines the agreement between the Company and the Union for providing the employees with options and protections for Retirement Plan participation that will remain in effect during the 2008 – 2012 Contract.

Traditional Retirement Program Frozen:

Participation in the Cinergy Traditional Retirement Program will be frozen as of January 1, 2013 for certain employees. Active employees on January 1, 2013 who are younger than age 50 (as of December 31, 2012) and anyone who is older than 50 but has fewer than 25 years of service (as of December 31, 2012), will automatically begin participating in the New Duke Retirement Program.

Voluntary Conversion Opportunities:

Active employees in the Traditional Retirement Program will be offered a voluntary window in 2008 to elect to remain in the Traditional Pension Program or elect the New Retirement Program. In 2012, a second voluntary window will be offered only to those active employees who remain in the Traditional Program and who are age 50 with 25 years or more of service as of December 31, 2012.

Voluntary Conversion to the New Retirement Program:

Part A Benefit (Part A): The pension plan benefit employees will earn under the Traditional Program will be based on their participation service as of the "day before conversion date" and their final average monthly pay at retirement (not the date of conversion).

AND

Part B Benefit (Part B): On the "conversion date," employees will start earning an additional pension plan benefit through a new formula that "mirrors" the Duke Energy Retirement Cash Balance Plan.

The Company matching contributions for the 401(k) plan will be enhanced to mirror the Duke Energy Retirement Savings Plan. As a result, employees will be eligible to receive higher matching contributions on a broader definition of pay. The higher

Mr. James W. Anderson June 2, 2008 Page 2

amount is a dollar-for-dollar match on the first 6% of eligible pay (this includes base, overtime and annual incentive pay).

Employees will also begin participating in an annual incentive plan with greater award opportunities (up to 5%).

With Mandatory Conversion to the New Retirement Program:

- Mandatory conversion will be effective January 1, 2013 for employees who
 have elected to remain in the Cinergy Traditional Retirement Program. Other
 terms applicable to the mandatory conversion are as follows:
 - The final average monthly pay for retirement will be frozen at the time of conversion (no pay run up).
 - Employees will have no choice between annuity and lump sum on Part A;
 only the current traditional program annuitant options will be available for Part A.
 - c. Can still grow in to the 85 points.
 - Employees will receive the enhanced 401(k) and enhanced incentive pay as described above once they mandatorily convert.

Employees Currently in the Cash Balance Plans:

Employees who previously selected one of the Cinergy cash balance plans (Balance or Investor) will automatically transition to the New Retirement Program as soon as administratively possible, but no later than January 1, 2009, to include participation in a cash balance pension plan that mirrors the Duke Energy Retirement Cash Balance Plan and an enhanced 401(k) plan to mirror the Duke Energy Retirement Savings Plan and an enhanced annual incentive plan as described below:

Annual Incentive Plan Summary Changes for those who elect or automatically move to the New Retirement Program:

In conjunction with the New Retirement Program, all participants who volunteer or upon mandatory conversion to the New Retirement Program will be eligible for up to a 5% maximum annual incentive pay (payable in 2010) based on the achievement of goals as set forth below:

NEW RETIREMENT PROGRAM - UEIP

| Goal | Level 1 | Level 2 | Level 3 |
|--------------------------|---------|---------|---------|
| Company Financial Result | .75% | 1.5% | 3% |
| Safety | .5% | .75% | 1% |
| Customer Satisfaction | .5% | .75% | 1% |
| | 1.75% | 3.0% | 5.0% |

Mr. James W. Anderson June 2, 2008 Page 3

Annual Incentive Plan Summary Changes for those who do not elect the New Retirement Program:

Employees who elect to remain in the Cinergy Traditional Program, which provides benefits under the current final average pay formula, will not be eligible for the higher incentive payout, but will continue their eligibility for the current Cinergy 401(k) Plan formula and will begin participating in an annual incentive plan, with a maximum award of 2% based on the achievement of goals as set forth below:

TRADITIONAL RETIREMENT PLAN - UEIP

| Goal | Level 1 | Level 2 | Level 3 |
|--|---------|---------|---------|
| Company Financial Result | .5% | .75% | 1% |
| Safety | .25% | .375% | .5% |
| Customer Satisfaction | .25% | .375% | .5% |
| The state of the s | 1.0% | 1.5% | 2.0% |

The Retirement Conversion Agreement Survives the 2008 - 2012 Contract:

The Company and the Union expressly understand and agreed that the Retirement Program conversion agreement shall continue in full force through January 1, 2013, surviving the termination of the 2008 - 2012 Contract, and shall continue in full force through succeeding contracts, or in the absence of succeeding contracts, unless changed by mutual agreement of the parties.

Very truly yours,

Vice President

Duke Energy 139 East Fourth St Cincinnati, OH 45201

April 15, 2015

Mr. James Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Amendment to A-58 Retirement Plan Agreement

Dear Mr. Anderson:

During the 2015 negotiations, the Company and the Union discussed changes to the Company's retirement programs. This letter sets forth the changes that were agreed to by the Company and the Union.

Retirement Benefits for New Hires

For employees hired or rehired on or after January 1, 2016, the Company will provide an annual contribution to the Duke Energy Retirement Savings Plan ("RSP") in the amount of 4% of the employee's annual compensation (including base, overtime, and incentive compensation) in accordance with the RSP plan documents. Such newly hired or rehired employees also will be eligible for the Company-provided matching contribution equal to 100% of the before-tax (and Roth) contributions made up to 6% of eligible compensation in accordance with the RSP plan documents on the same basis as employees hired or rehired prior to January 1, 2016. Employees hired or rehired on or after January 1, 2016 will not be eligible to participate in the Cinergy Corp. Union Employees' Retirement Income Plan (the "Retirement Income Plan").

Cash Balance Interest Credit

The cash balance interest credit rate under the Retirement Income Plan for pay credits made on and after January 1, 2016 will be based on a 4% interest rate (0.327% monthly equivalent interest rate). For purposes of clarity, the cash balance interest credit rate applies to cash balance participants and the Part B benefit for participants who have a Part A (traditional) and Part B (cash balance) pension plan benefit. The Part A (traditional) portion of the participant's benefit will not be affected by this change.

Retirement Income Benefit for Long-Term Disability

A participant who starts receiving long-term disability benefits on or after July 1, 2016 will receive interest credits under the Retirement Income Plan's cash balance formula while disabled, but will not receive pay credits while long-term disabled, in accordance with the Retirement Income Plan documents. This change will not apply for any individual who starts receiving long-term disability benefits before July 1, 2016, or participants under the traditional formula, or for the Part A benefit for participants who have a Part A (traditional) and Part B (cash balance) pension plan benefit.

Sidebar Letter A58a Page 1 For purposes of clarity, as previously agreed, the Company may in its discretion merge the Retirement Income Plan into the Duke Energy Retirement Cash Balance Plan or other defined benefit plan maintained by the Company. In accordance with applicable law, any such merger will not reduce participants' accrued benefits.

The complete provisions of the Company's retirement plans are set forth in the plan documents, as amended to make administrative changes, legally-required changes and/or technical changes that do not reduce the benefits formula. In the event of a conflict between any other communication and the plan documents themselves, the plan documents control.

It is thought that this letter accurately describes the agreement reached by the parties regarding amendments to Sidebar Letter A-58 relating to retirement plan agreements.

Sincerely,

Jay A. Alvaro

Director, Labor Relations

RE: Sabbatical Vacation Bank and Vacation Credit Programs

Dear Mr. Anderson:

During the 2008 contract negotiations, representatives of the Company and the UWUA, Local 600 (the "Union") discussed the phasing out of the Sabbatical Vacation Bank and the Vacation Credit Programs.

As agreed, these programs shall be phased out in accordance with the attached document, Attachment A, which outlines the specific revisions to the Sabbatical Vacation Bank and Vacation Credit Programs that will remain in effect through December 31, 2012.

The Company and the Union expressly understand and agreed that the phasing out of the Sabbatical Vacation Bank and the Vacation Credit Programs, as stated in the attached document, shall continue in full force until December 31, 2012, surviving the termination of the 2008 – 2012 Contract, and shall continue in force through succeeding contracts, or in the absence of succeeding contracts, unless changed by mutual agreement of the parties.

Very truly yours,

Jay R. Alvaro Vice President

Attachment

ATTACHMENT A

REVISIONS TO THE SABBATICAL VACATION BANK AND VACATION CREDIT PROGRAMS FOR UWUA, LOCAL 600

Effective January 1, 2009, the Vacation Bank and Vacation Credit Programs will be phased out over a four year period and will be ending on December 31, 2012.

THE CHANGES:

Sabbatical Vacation Program:

- The sabbatical banking program will be eliminated for employees who are younger than 47 years old as of December 31, 2008.
- Employees who are 47 years old or older as of December 31, 2008 will be eligible to continue banking vacation until December 31, 2012, up to the limits described on the schedule below.
- Employees who have already banked more than the maximum amount of vacation based on the schedule below (including any vacation credits) cannot bank more after January 1, 2009 but will be grandfathered with the amount they have banked.
- No additional banking will be permitted after January 1, 2013. Therefore, the last opportunity to bank vacation will be in December 31, 2012 because banking is done at the end of the year.
- Banked vacation will be paid out at the final rate of pay at retirement.

Vacation Credit Program:

- Vacation Credits: Up to six weeks credit, starting at age 51, cannot exceed the employee's vacation entitlement
- Employees who are at least 51 years old as of December 31, 2012 will continue to receive "vacation credits" up to the lesser of their annual vacation entitlement or the schedule below.
- The vacation credit program will be modified for employees who are younger than 51 years old as of December 31, 2012. For those employees "only" hired prior to January 1, 1997 will receive their "vacation credits" up to the amount of vacation time they were eligible for as of January 1, 2006.
- Vacation credits will be paid out at the final rate of pay of retirement.

Service Credit Program:

- Service Credits: Up to two weeks for years 32 and 33 years of employment in lieu of a 6th week of vacation time off.
- Employees will continue to receive one week of "service credit" added to their vacation bank in years 32 and 33 of employment in lieu of time off until December 31, 2012. Effective January 1, 2013, employees will be granted a 6th week of vacation time off during their 32nd year of employment in lieu of a week of service credit.
- An employee who has already reached their maximum or more of vacation bank before January 1, 2013 will receive their 6th week of vacation as "time off" in lieu of a service credit.

THE SCHEDULE:

| Age as of: 12/31/2008 | Maximum Banked Vacation (including vacation and service credits) |
|--------------------------|--|
| 47 | 10 |
| 48 | 10 |
| 49 | 10 |
| 50 | 12 |
| 51 | 14 |
| 52 | 16 |
| 53 | 18 |
| 54 | 20 |
| 55 | 22 |
| 56 | 22 |

Mr. James W. Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Union Employee Annual Incentive Program (UEIP)

Dear Mr. Anderson:

During the 2008 contract negotiations, representatives of the Company and the UWUA, Local 600 (the "Union") discussed that the payout for the incentive bonuses for employees will vary based on their participation in the offered retirement program.

Beginning with the 2009 goals and during the term of the 2008 – 2012 Agreement, the UEIP payout (payable in 2010) will be administered as follows:

Annual Incentive Plan Summary Changes for those who elect or automatically move to the New Retirement Program:

In conjunction with the New Retirement Program, all participants who volunteer, or upon mandatory conversion, will be eligible for up to a 5% maximum annual incentive pay, as specified below:

NEW RETIREMENT PROGRAM - UEIP

| Goal | Level 1 | Level 2 | Level 3 |
|--|---------|---------|---------|
| Company Financial Result | .75% | 1.5% | 3% |
| Safety | .5% | .75% | 1% |
| Customer Satisfaction | .5% | .75% | 1% |
| The second secon | 1.75% | 3.0% | 5.0% |

Mr. James W. Anderson June 2, 2008 Page 2

Annual Incentive Plan Summary Changes for those who remain in the Traditional Retirement Program:

Employees who elect to remain in the Cinergy Traditional Program, which provides benefits under the current final average pay formula, will not be eligible for the higher incentive payout, but will participate in an annual incentive plan, with a maximum award of 2%, as specified below:

TRADITIONAL RETIREMENT PLAN - UEIP

| Goal | Level 1 | Level 2 | Level 3 |
|--|---------|---------|---------|
| Company Financial Result | .5% | .75% | 1% |
| Safety | .25% | .375% | .5% |
| Customer Satisfaction | .25% | .375% | .5% |
| The state of the s | 1.0% | 1.5% | 2.0% |

Mr. James Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Amendment to A-60 Letter Regarding the Union Employee Annual Incentive Plan (UEIP)

Dear Mr. Anderson:

During the 2015 contract negotiations, representatives of the Company and the UWUA, Local 600 ("Union") discussed eligibility for the Union Employee Annual Incentive Plan ("UEIP"). As a result of those discussions, the parties agreed to amend Letter A-60 dated June 2, 2008 as set forth below.

Beginning with the 2015 calendar year performance period under the UEIP, the Company will provide a prorated UEIP payment (calculated as set forth below) to any eligible Union employee who meets the following criteria during a performance period: (i) works for at least six complete calendar months, and (ii) retires (as defined below).

Such prorated UEIP payments shall be paid in the first quarter of the calendar year immediately following the applicable performance period at the same time and on the same basis as other UEIP payments are made to other eligible Union employees, and any such prorated UEIP payment shall be calculated based on the eligible earnings of the retired Union employee during the applicable performance period and actual achievement relative to the pre-established goals set forth in Letter A-60.

For purposes of clarity, in no event will a Union employee who does not meet the criteria set forth in this letter be eligible for a prorated UEIP payment for a performance period if he or she isn't employed on December 31st of the performance period. For purposes of this Letter, "retire" means separate from employment with the Company after having attained at least age 55 and 10 years of service (as determined for purposes of access to Company sponsored retiree medical coverage).

In other respects, Sidebar Letter A-60 shall continue in full force and effect herein for the duration of the 2015 - 2019 Agreement, unless changed by mutual agreement of the parties.

Sincerely,

Jay 8. Alvaro

RE: Union Employee Annual Incentive Program (UEIP)

Dear Mr. Kowolonek:

During the 2019 negotiations, the parties discussed the UWUA Union Employee Annual Incentive Program (UEIP). This letter amends the UEIP Sidebar Letter A-60 dated June 2, 2008 and confirms these discussions and the resulting agreement.

As discussed during negations, beginning with the 2020 incentive year UWUA represented employees are eligible for an incentive lump sum bonus up to a maximum of 2% or 5% of straight time and overtime wages per year in accordance with Sidebar Letter A60 Union Employee Incentive Plan (UEIP), based on the achievement of goals during the previous year, as determined by the Company.

In all other respects, Sidebar Letters A60 shall continue in accordance with the terms as outlined.

Sincerely,

Michael A. Ciccarella Senior HR Consultant Labor Relations

Duke Energy Labor Relations 139 East Fourth St Cincinnati. OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Cincinnati Customer Care Center

Dear Mr. Kowolonek:

During the 2019 contract negotiations, representatives of the Company and the UWUA, Local 600 (the "Union") discussed the Duke Energy Cincinnati Customer Care Center.

As agreed, the Cincinnati Customer Care Center organization will consist of Customer Service Representatives (CSR) and Service Installation (SI). The CSR group will consist of employees in the Cust Svc Rep-FT Regular, Customer Service Rep-Full Time New, and Cust Service Rep-Part Time New job classifications. The Service Installation group will consist of employees in the Order Processing and Customer Service Representative – Service Installation classifications.

The Cincinnati Customer Care Center wages and merit increases will be administered per the attached (Attachment A). The minimum wage rate for the Cust Svc Rep-FT Regular and Customer Service Rep-Full Time New classifications will be \$14.50 per hour and the maximum hourly rate will be \$16.00 per hour. Effective April 1, 2020 and for the remaining term of the 2019 – 2023 Agreement, the General Wage Increase (GWI) applicable to UWUA represented Clerical employees will be applied to the maximum hourly wage rate of \$16.00 for the Cust Svc Rep-FT Regular and Customer Service Rep-Full Time New classifications. In addition, this increase will be applied to the individual hourly wage rates for employees in these classifications not to exceed the maximum rate of pay. The minimum rate of pay will not increase over the term of the Agreement.

Incentives in the Cincinnati Customer Care Center will be based on the achievement of established performance measures as determined by the Company. The Company will notify the Union of any changes and will meet to discuss if requested by the Union. Any request by the Union to meet for discussion will not delay the implementation of incentive measures. Any employee, who is serving in a non-call-taking role, will receive a bonus equal to the average bonus payout for call-takers, unless an alternative method is mutually agreed upon by management and union representatives. There will be a quarterly review by management and union representatives to ensure that bonus calculations are accurate. Assuming the union representatives involved in this review are in agreement with the calculations, the Union agrees not to support or process grievances related to the bonus calculations.

An incentive eligible employee, who leaves the Cincinnati Call Center, prior to the end of a quarter, will receive a prorated bonus for the time worked in the Cincinnati Call Center organization.

It is expected that representatives working evening, night, holiday or weekend shifts provide at least three hours' notice if they are going to be unable to report to work, whether due to illness or other factors. It is understood that there will be times when an emergency occurs within three hours of the start of an employee's shift.

Employees (including SI), who are called out for other than planned overtime, will be paid a minimum of four hours at the appropriate overtime rate except when they come in, relative to storms, less than four hours before their scheduled shift. In this case, they will only be paid at the applicable overtime rate for a minimum of two hours.

Sidebar Letter A61 Page 2

Employees (including SI), who are called out for other than planned overtime, will be paid a minimum of four hours at the appropriate overtime rate except when they come in, relative to storms, less than four hours before their scheduled shift. In this case, they will only be paid at the applicable overtime rate for a minimum of two hours.

The Call Center may elect to observe the actual holiday or the Company designated holiday based on business needs. Prior to December 31 of each year the Company will notify employees of the holiday schedule for the following year. Employees scheduled to work the holiday designated by the Call Center that are excused from work by the Company will receive holiday pay for the regularly scheduled hours they would have worked on the holiday. All other employees will receive eight hours of holiday pay. Twelve hour and nine hour employees working on the holiday designated by the Call Center will receive time and one-half pay for their scheduled hours. If the employee exceeds their scheduled hours, double time will be paid for those hours worked in excess of their schedule. In order to be eligible to receive holiday pay, full time Customer Service Representatives must work the last regularly scheduled workday prior to the holiday and the first regularly scheduled workday after the holiday.

The Union agrees to support the following:

Virtual Routing (Base Customer Care)

 The Union agrees to not grieve the routing of Duke Energy customer calls and other types of Call Center non-call work to available representatives within the Duke Energy Call Centers or outsourced center(s). The outsourced portion of this work is not subject to any related sideletter agreements.

Premium for Specialties

- Employees in developmental roles will receive \$1.75 per hour in addition to the employee's
 normal hourly wage rate. These roles currently include the training of new employees and
 performing the duties of On Job Trainer. This premium may be applied to other roles as
 determined by the Company. Prior to applying this premium to other duties, the Union and
 Company will meet at least thirty days in advance to discuss.
- Full-time new and part-time representatives, within the Cincinnati Call Center, who
 demonstrate, through assessment, that they are fluent in Spanish, will be paid a premium of
 \$1.00 per hour.

Applicable to Customer Care Operations (Base and SI)

- <u>Virtual Agents.</u> The use of Virtual Agents was discussed and it was agreed that the Company will
 have the ability to implement a Virtual Agent program based on business needs. The advantages
 to such a program include faster response for emergency/outage situations, a more efficient use of
 resources, and increased customer satisfaction. Eligibility will be based on an employee's
 performance including but not limited to:
 - Achieving or exceeding all performance metrics.
 - No corrective action within the past twelve months.
 - Minimal escalations or Resource Support Line (RSL) calls.
 - Participating employees who subsequently develop performance related issues may have their Virtual Agent privileges revoked.

Sidebar Letter A61 Page 3

The number of employees participating in the program is at the sole discretion of the Company. In the event that two or more employees' performance is equal as determined by the Company, seniority will be the deciding factor. Order Processing Representative and Customer Service Representative – Service Installation (CSR-SI) classifications will be combined when determining eligibility for the Service Installation work group. In addition, the program may be suspended or discontinued based on business needs by the Company in its sole discretion. Prior to making such a decision, the Company will meet with the Union for discussion.

- <u>Emergency or Abnormal Operations</u>. In order to ensure that our customers' needs are met during outage, abnormal, or emergency situations, it was agreed that a 33% response rate over a rolling twelve month period would apply to all Cincinnati Customer Care employees. Response is defined as reporting to work a call out associated with these types of situations. Any employee who has pre-approved vacation/personal time scheduled immediately prior to or after scheduled off days, or is beginning or ending a bereavement leave, will not have a non-response credited to them for the purposes of calculating the response rate. However, if an employee does respond in this situation a credit will be applied. Employees failing to meet the required rate are subject to corrective action.
- <u>Vacation Availability</u>. In the event that Workforce Management determines that additional vacation slots are available during the workday, employees will have the ability to make a request to take advantage of these slots.

Applicable to Base Customer Care Operations

Employees may be hired either as full time or part time based on business needs. In accordance with the Collective Bargaining Agreement new employees will be classified as probationary for a period of one year. Probationary CSRs will not be eligible to apply for other positions for a period of twelve months from the date of hire. Employees meeting the educational requirements for technical positions represented by the UWUA will be eligible to apply within the twelve month period.

Based on business needs there may be a requirement for part time CSRs. All part-time CSRs will receive part-time employee benefits, regardless of the number of hours they work. While the intention is for part-time CSRs to be scheduled for less than 32 hours per week, they may exceed this number of hours due to actual or expected peak call volumes, trading of hours between employees, etc.

In 2012 two new schedules were agreed to;

- A) 3 twelve hour days and 1 four hour day.
- B) 4 nine hour days and 1 four hour day.

The Company reserves the right to implement these and other schedules based on business needs. At least 30 days prior to implementation, the Union and Company will meet to discuss the schedule. The Company will make every attempt to notify effected employees within a reasonable amount of time when planned overtime is being cancelled.

The meal provision for twelve hour workers will be triggered when the employee works thirteen consecutive hours and fifteen consecutive hours with the employee receiving a meal, or compensation in lieu thereof. For employees on a nine hour schedule, a meal or compensation in lieu thereof, will be provided at eleven and fifteen consecutive hours respectively.

Personal days must be taken in full day increments regardless of the employee's schedule. Twelve hour shift workers will be entitled to three personal day and one diversity day and nine hour shift workers will be entitled to four personal days and one diversity day.

Sidebar Letter A61 Page 4

Applicable to Service Installation

Customer Service Representative – Service Installation (CSR-SI) within the Customer Relations bid area will have a minimum wage rate of \$16.50 and a maximum wage rate of \$19.00 per hour. Only full time employees will be considered for this position. The minimum and maximum wage rates are not subject to the negotiated annual wage increases. For the first 12 months after entry into the classification, and in accordance with the Patrick P. Gibson Letter, employees failing to meet performance standards may be demoted to the Full Time New job classification. Such demotion may take place prior to corrective action being taken. This does not preclude action being taken on more serious offenses such as but not limited to attendance, zero tolerance calls, or any dischargeable offense. Any demotion will not be subject to the grievance procedure. If such a demotion occurs, the employee's rate of pay will be reduced to the rate of pay at the time the employee promoted to the CSR-SI position plus any merit increase that the employee had received since their promotion, not to exceed the maximum wage rate for the CSR classification. If the employee is demoted, they will not be considered for promotion for an additional nine months, from the date of demotion or last corrective action. During the first six months, an employee can request to demote from CSR-SI. Employees who demote within six months will retain their classified seniority. Employees demoted after six months will receive an adjusted seniority date.

Employees in the CSR-SI classification will receive a \$0.50 merit increase every six months in accordance with the December 29, 2000 Patrick P. Gibson Letter in lieu of the annual general wage increase until reaching the maximum rate of pay. Once an employee reaches the maximum rate of pay, they will receive an annual lump sum equal to the negotiated general wage increase for clerical employees.

Employees accepting a Customer Service Representative – Service Installation position will not be eligible to cross or laterally bid for a period of nine months from the date they enter the classification.

This letter will be in effect during the term of the 2019 - 2023 Agreement.

Sincerely,

Michael A. Ciccarella Senior HR Consultant

Lichard (iccailla

Labor Relations

- The minimum and maximum wage rates for the CSR-PTN and CSR -SI will not increase with annual base wage increases.
- Any CSR-PTN with a wage rate at or above the maximum will receive their annual increase in the form of a lump sum rather than a base increase.
- 3. Semi-annual merit increases are in lieu of General Wage Increase.
- \$0.50 every six months is in lieu of General Wage Increase. After maximum is reached employee will
 receive a lump sum increase equal to the negotiated annual wage increase for clerical employees.
- 5. Service Installation representatives assigned to take base calls at least 35% of the quarter will receive the quarterly Call Center Incentive based on their performance.

DUKE ENERGY CORPORATION 139 East Fourth St. PO Box 960 Cincinnati, OH 45201-0960

June 2, 2008

Mr. James W. Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Part-Time Employee Benefits

Dear Mr. Anderson:

During the 2008 contract negotiations, representatives of the Company and the UWUA, Local 600 (the "Union") discussed benefits that would be extended to part-time employees represented by the Union. Accordingly, the following table outlines the benefits that these employees will receive during the term of the 2008 - 2012 Collective Bargaining Agreement.

| Benefit | Comment | | |
|------------------------------------|--|--|--|

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Revenue Services Representative

Dear Mr. Kowolonek:

During the 2012 negotiations, the parties discussed consolidating the current three work groups within the Revenue Services Department into one newly created job classification titled "Revenue Services Representative" (RSR). Based on these discussions, the parties agreed to create the RSR position in accordance with this letter.

Specifically, Revenue Services currently is comprised of three work groups: (1) Billing, (2) Accounts Receivables, and (3) Payments. These three work groups' functions will be combined and performed by the newly created RSR position. The job description for the RSR position is Attachment A to this letter.

Wage Rate: The minimum rate of pay for the RSR position is established at \$17.00 per hour and will not increase during the term of the contract. The maximum rate of pay is \$19.50 per hour with the maximum increasing to \$19.75 on April 1, 2021. The GWI will not increase the minimum or maximum rate of pay for this position. Any employee below the new minimum rate of pay will be increased to new minimum with next payroll following contract ratification.

Merit Increases: Employees in the RSR position may progress to the maximum wage rate through merit increases of \$0.25 at six-month intervals. Employees will be eligible for \$0.25 merit increases in accordance with the December 29, 2000 Patrick P. Gibson Letter. Employees at the maximum rate of pay will receive an annual merit increase in a lump sum amount equal to the negotiated general wage increase for clerical employees, which may be in the form of a percentage pay increase and/or lump sum amount.

Selection: The Company will give first consideration to full-time employees over part-time employees in the competency-based selection process for the RSR position when all other things are equal.

Incumbent Employees. Incumbent employees will perform all functions of the newly created job description but will be considered grandfathered in their existing classifications. Incumbent employees will continue to receive the negotiated general wage increases applicable to their current job classifications in accordance with the Collective Bargaining Agreement. In addition, these employees will retain all bid and rollback rights in the Customer Relations Bidding Area.

Tamper Theft and Switched Meter Work -The Company and the Union agree to establish a \$1.75 per hour premium to be paid to employees in the RSR position when management assigns them to perform tamper theft and switched meter work. Management will assign full-time employees to perform specialty-type work as needed. Any employee who has received a verbal warning in the past six months, or a disciplinary letter or higher-level discipline in the past year will not be considered. Such employees are eligible for consideration once his or her record is free from a verbal warning for six months, and/or free from any disciplinary letter or higher-level discipline for one year. It is anticipated the number of employees performing this work will vary based on work load.

Sidebar Letter A64 Page 2

Should additional specialty type work be brought into these teams the company will meet with the Union, at their request, to determine whether the premium is applicable to the work. The Company reserves the right in its sole discretion to determine whether the premium is applicable.

Management will consider seniority as a tiebreaker to determine which equally qualified employees will be assigned to perform this work. No premium will be paid to employees while training or on paid time off. This letter shall not be construed as limiting management's rights under the terms of the applicable collective bargaining agreement.

| Title | Wage Range | Merit Increase |
|--|-------------------|-----------------------|
| Revenue Services Rep April 1, 2019 - March 31, 2020 | \$17.00 - \$19.50 | \$0.25 every 6 months |
| Revenue Services Rep April 1, 2021 - March 31, 2023 | \$17.00 - \$19.75 | \$0.25 every 6 months |

This letter will be in effect during the term of the 2019 - 2023 Agreement.

Sincerely,

Michael A. Ciccarella Senior HR Consultant Labor Relations

Duke Energy Labor Relations 139 East Fourth St Cincinnati, OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Competency Based Selection

Dear Mr. Kowolonek:

During the 2019 negotiations, the Company and Union discussed the ongoing implementation of a Competency Based Selection (CBS) Process for certain job classifications. Specifically, this process will be utilized when filling certain clerical jobs designated as Level NB and above and certain technical jobs designated as level T4 and above. This will ensure that the most qualified candidate is selected for the position and is more likely to succeed.

Job openings will be filled using the following Competency Based Selection process:

- Job applications/resumes will be screened to determine that the basic qualifications, as set forth in
 the job description are met. An employee's corrective action which is below Suspension will not
 affect consideration of the employee for any jobs that are posted externally.
- To supplement their application, Company employees may print copies of their training records, job history, or other similar documents relating to their employment from the Employee Center on the Company's portal, and provide such documents to interviewers during the interview process or as attachments to their electronic application. All such documents provided by employees will be considered by the Company.
- Candidates meeting the minimum qualifications will be evaluated based on the following factors: skills and qualifications, prior job performance and/or experience and, in certain positions, a Basic Skills Assessment.
- Absent unusual circumstances, candidates will be interviewed by a team of at least three qualified, interviewers as determined by the Company. When determined by the Company to be feasible, one of the interviewers will be from a department outside of the department posting the position. Human Resources and/or Labor Relations will continue to provide guidance as appropriate.
- Company employees will be provided with advantage points in the process that will not be provided to external applicants. Specifically, the advantage points will be calculated as follows:
- One point will be provided for existing UWUA members; and
- One point will be provided for existing UWUA members who are full-time employees.

Accordingly, a part-time UWUA member would be provided with one advantage point and full-time UWUA members would be provided with two advantage points.

Sidebar Letter A65 Page 2

- Seniority will be the deciding factor if there are two full-time, internal candidates who are equally qualified as determined by the Company.
- Unsuccessful candidates under this process will be provided with additional interview training and/or assistance with resume preparation upon their written request to their HR Business Partner.

The process, as outlined above, will be used for the following job classifications:

| CLERICAL | TECHNICAL | | |
|-------------------------------------|---|--|--|
| Gas Operations Administrator | System Integrity Technician Associate | | |
| Administrative Office Clerk | System Integrity Technician | | |
| Electric Operations Clerk | Sr System Integrity Technician | | |
| Order Processing Representative | Gas Technician | | |
| Sourcing/Purchasing Associate | Control Technician III | | |
| Customer Relations Representative B | Technician | | |
| Gas Document Specialist | Control Technician II | | |
| Customer Relations Clerk B | Gas Layout Technician | | |
| Office Coordinator | T&D Support Technician | | |
| Revenue Services Representative | Control Technician I | | |
| Service Installation Representative | Sr Gas Layout Technician | | |
| Customer Experience Support | GIS Technologist II | | |
| Senior Work Management Specialist | GIS Technologist I | | |
| Land Analyst | GIS Technologist III | | |
| Gas Office Coordinator | LIT Support Agent II | | |
| Gas Operations Support Specialist | LIT Support Agent I | | |
| Customer Relations Representative C | T&D Design Technician | | |
| Customer Relations Clerk C | Design Technician | | |
| Engineering Office Clerk | Operations Technician | | |
| Administrative Office Clerk - IT | Sr Substation Design Technician | | |
| | Sr T&D Design Technician | | |
| | Distribution Technician | | |
| | Substation Design Technician | | |
| | Surveying Technician | | |
| | Sr Transmission and Distribution Technician | | |
| | Sr T&D Support Technician | | |
| | Gas Marketing Specialist | | |
| | Configuration Management Specialist | | |
| | Engineering Specialist I | | |
| | Engineering Specialist Assistant | | |
| | Event Tech Services Specialist I | | |
| | Gas Controls System Tech | | |
| | P&C Design Document Specialist | | |
| | Lighting Specialist I | | |
| | Lighting Specialist II | | |

Sidebar Letter A65 Page 3

Additionally, the Company would use this process to fill any newly created job classifications that are at or above the NB or T4 wage level (or its equivalent). The selection process for Customer Projects Resource Specialist, Customer Project Coordinator and the Gas Operations Trainer, will remain as outlined in the applicable side bar letters.

Sincerely,

Michael A. Ciccarella Senior HR Consultant Labor Relations

Duke Energy Labor Relations 139 East Fourth St Cincinnati, OH 45201

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Severance Program

Dear Mr. Kowolonek:

To the extent the Company and the union agree that a severance opportunity will be provided to UWUA represented employees during the term of the CBA, the Company will provide employees who are designated as eligible by management a one-time lump-sum severance payment and other benefits if they meet basic plan requirements, as set forth below;

Severance Payment Formula

The Severance Payment will be calculated as follows based on the Eligible Employee's release date;

- Two weeks of Annual Base Pay for each Year of Service (including partial Years of Service).
- For employees hired on or after April 1, 1989, the Severance Payment will not be less than 12 weeks and not more than 52 weeks of the eligible employee's Annual Base Pay.
- For employees hired before April 1, 1989, the Severance Payment will not be more than two times
 the eligible employees Annual Base Pay. The maximum severance payment will not exceed two
 times an employee's annual compensation calculated as two times the compensation listed in Box
 5 of the employee's most current W-2.

Additional Benefits

- Six months of Company-paid medical/dental coverage under COBRA following separation for all
 participating employees who have such coverage in effect as active employees upon separation.
- Access to outplacement services under the Company's program.

Design Features

- Employees are required to remain employed in good standing until their release date, which will be established by management in its sole discretion.
- Employees must sign and not revoke a Waiver and Release of All Claims in order to receive any benefits under this Program.
- Employees who separate under this Program will not be eligible for rehire or for staff-augmentation contingent worker (contractor) assignments for 12 months after their release date.

Sidebar Letter 70 Page 2

The Company shall designate who will be eligible for the severance program by department, job classification, age and/or years of service. or other legitimate, objective criteria, as determined by the Company, in its sole discretion.

Sincerely,

Michael A. Ciccarella Senior HR Consultant Labor Relations

April 13, 2012

Mr. James Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Re:

Overtime Provisions

Dear Mr. Anderson:

During 2012 contract negotiations, the parties discussed providing employees' flexibility in certain situations to work overtime assignments at a time mutually agreeable to the individual employee and his or her management, when consistent with business needs.

Per our discussion regarding overtime scheduling, the parties have agreed to the following in order to provide flexibility to employees. If an employee volunteers or is required to work overtime and the employee requests to work the overtime on their second scheduled off-day in lieu of working the overtime on a different scheduled off-day, management may approve the employee's request if it meets business needs as determined by the Company. When such employee requests are granted by the Company, the overtime worked will be paid at the rate of time and one-half, instead of double time.

Similarly, if an employee requests to work overtime at a date and/or time of his or her choice and the supervisor approves the request as consistent with business needs as determined by the Company, the Company will pay the overtime at the time and one-half rate.

This in no manner restricts the right of the Company to schedule overtime based on business and operational needs. Such assignments may be mandatory and employees are expected to work such mandatory assignments, and the applicable overtime and meal provisions would apply as stated in the Agreement.

It is believed that this letter accurately describes the parties' agreement.

Very truly yours,

Jak Alvaro

Vice President, Labor Relations

April 13, 2012

Mr. James Anderson President Utility Workers Union of America IUU Local 600 810 Brighton Street Newport, Kentucky 41071

Re: Outsourcing Affecting Job Elimination

Dear Mr. Anderson:

During the 2012 negotiations, the parties discussed the issue of outsourcing and its impact on bargaining unit members. The parties agreed that the 2005 Labor Management Executive Committee (LMEC) process was outdated, and should be replaced as set forth herein.

The parties will continue to engage in a collaborative process where Labor Relations professionals, management, and union representatives exchange data, perspectives, and ideas so that outsourcing decisions affecting job elimination can be made in an open and candid environment.

As a first step, once the Company has determined that outsourcing is feasible based on proposals received from a potential vendor(s) and that outsourcing will likely result in job elimination, the Company will notify the Utility Workers Union of America, IUU Local 600 ("Union"). Upon receiving this notice, the Union can request information from the Company and/or propose how it would be more advantageous for unionized employees to retain the work at issue.

If requested by the Union, a meeting will be held to discuss the most competitive bid. During the meeting, the Company will provide the Union the key criteria used to evaluate the bid. The meeting should include the following representatives:

- Management representative of the outsourcing department;
- Union leadership;
- A representative from Labor Relations

The Company is fully aware of any legal responsibilities it may have, including the legal duty to share information and bargain in good faith, and will comply with those responsibilities. The Union understands that information shared between the parties while utilizing the process described in this letter is subject to legal protections, and the information shall remain confidential to this process and to the Company.

The parties recognize that each outsourcing proposal should be evaluated on a caseby-case basis, with consideration of factors including but not limited to the overall operating costs, relative labor costs (including the applicable loading rates such as benefits, pension, payroll taxes, etc.), any applicable regulatory requirements, equipment, technological developments, job process improvements, special expertise, efficiency, safety, availability of skilled labor and supervision, scalability, and any other factors that may impact the merits of outsourcing.

The parties further recognize and agree that neither party shall cause unreasonable delay during the process. It is the intent of the parties that this process will occur during approximately two months following the notice provided to the Union referred to in Paragraph 3 hereinabove and/or the parties' first meeting on the issue, if later than the notice. No provision of this letter shall be construed to eliminate or otherwise modify any applicable provision of the parties' collective bargaining agreement relating to outsourcing.

It is agreed that this letter accurately reflects the parties' agreement.

Very truly yours,

Vice President, Labor Relations

RE: LIT Support Agent Job Progression

Dear Mr. Anderson:

The Company is establishing a new job progression in order to provide information technology support to various business units. The classifications are as follows;

- LIT Support Agent I
- LIT Support Agent II
- LIT Support Agent III

Initially three positions will be filled with one employee classified as a Support Agent I and two classified as Support Agent II. Based on the skill set required to perform this work, the Company will select the individuals for these positions. In regard to educational requirements, employees initially placed in these positions will be grandfathered and will be considered as meeting the requirements for promotional opportunities within this progression. Going forward, the LIT Support Agent III will be the entry level position for this progression and posted as stated in the Collective Bargaining Agreement.

Wage Rates

The wage rates for this classification will be as follows;

| Job Classification | Minimum Hourly Rate | Maximum Hourly Wage | Merit Increase |
|-----------------------|---------------------|---------------------|----------------|
| LIT Support Agent I | \$30.71 | \$33.71 | \$0.25 |
| LIT Support Agent II | \$25.97 | \$28.97 | \$0.25 |
| LIT Support Agent III | \$21.88 | \$24.50 | \$0.25 |

Individuals placed initially in these positions will be placed at their current wage level not to exceed the maximum wage rate established for the classification. Employees making less than the minimum will be placed at the minimum wage rate for that classification.

Merit Increases

Merit increases will be given every six months is accordance with the "Patrick P. Gibson" letter dated December 29, 2000. These increases will be \$0.25 per hour.

Sidebar Letter A73 Page 1 Mr. James Anderson November 16, 2009 Page 2

Out of Town Work Assignments

It is anticipated that all employees in this progression will be given out of town assignments to support Duke Energy facilities. Based on skill level, the majority of these assignments will fall within the LIT Support Agent I classification. When such assignments are made Sidebar Letter A-15 will prevail.

Emergency Overtime Callouts

There may be occasions when employees are called out to respond to information technology issues that require an immediate response to ensure continuity of operations. In such cases, employees will be permitted to respond from locations other than a Duke Energy facility. In such case, the minimum call out of four hours will apply. If a second call out is required within four hours of the first call out it will be considered a continuation of that call out. If an employee does not travel in order to respond then no travel time will be paid.

Employees are expected to respond to and work a reasonable number of emergency overtime assignments. Employees who are consistently unavailable for such assignments are subject to disciplinary action, up to and including discharge.

Progression

Employees will perform satisfactory will automatically promote from the Support Agent III classification to the Support Agent II classification once all qualifications are met. Employees on a disciplinary track or those that have been denied a merit increase will not be eligible to promote until they have received two consecutive merit increases or have been discipline free for one year. Promotions to the Support Agent I classification will be based on business need only.

This letter describes the establishment of the above mentioned classifications, wage rates, and initial staffing. Except where specifically abridged by this letter, all provisions of the 2008 – 2012 Collective Bargaining Agreement apply. In addition, the rights retained by the Company under Article I, Section 2 (c) of the Agreement remain unchanged. This letter in no manner represents a commitment on behalf of the Company in regard to staffing levels. The Company reserves the right to change or modify these job descriptions in accordance with the Agreement. I believe that this letter adequately describes our discussion regarding this matter. If the Union is in agreement with this proposal please return a signed copy of this letter to me at your earliest convenience.

Sincerely.

Michael A. Ciccarella

RE: On Call Rotation - Local IT Support

Dear Mr. Anderson:

Per our recent discussion, the Company is establishing an on call rotation for employees in the Local Information Technology job progression. As we discussed, the employee in the LIT I classification is excluded from this rotation due to business needs at this time. However, it is acknowledged and agreed that the Company has the sole discretion to include employee(s) in the LIT I classification in the rotation if business requirements change in the future.

While on call, employees will be compensated at the rate of \$16.50 per day. In addition, the minimum call out will be two hours. If a second call out is required within two hours of the first call out, it will be considered a continuation of that first call out. As previously agreed to, employees will be permitted to respond from locations other than a Duke Energy facility. If an employee does not travel in order to respond, then no travel time will be paid.

Employees failing to respond to a call out in a timely manner may be subject to disciplinary action, up to and including discharge.

Sincerely,

Michael A. Ciccarella

Re: Foreign Utility Assistance

Dear Mr. Andersen:

This letter documents our discussions and agreement concerning emergency work performed for other utilities. The following guidelines will apply when employees represented by UWUA Local 600, are called upon to work for a foreign utility in emergency situations.

Compensation Guidelines:

- All hours of travel or work will be paid at the rate of time and one-half.
- After 16 consecutive hours of work, Article XII, Section 2(c) will continue to apply.
- Compensation when traveling begins when the employee begins driving toward their destination and ends when the employee arrives at the final destination of the day.
- When employees reach their destination and are to begin work, compensation
 will begin when the employee leaves the host Company staging area. If the
 staging area is away from the place of lodging and crews have to be transported
 to the staging area, then time begins when the employee leaves the place of
 lodging.
- Compensation ends for the work day when the employee returns to the host Company's staging area. If the staging area is away from the place of lodging and crews have to be transported, then the time will stop when the employee returns to the place of lodging.

RE: Senior Work Management Support Specialist

Dear Mr. Anderson:

I am writing in regard to our conversations regarding the establishment of the Senior Work Management Support Specialist within Midwest Delivery Operations. As we have discussed, the minimum hourly rate for this position will be \$31.02 and a maximum rate of \$31.52 per hour. Merit increases will be administered as outlined in the Collective Bargaining Agreement. Furthermore, Sidebar Letter A65 (Competency Based Selection) will be applicable to this position. Also as discussed, the Company will agree that the first three positions will be limited to qualified UWUA represented employees plus any additional positions for two years after entering this agreement. In the event that three positions are not filled within two years, the agreement will be extended until such time as three total positions are offered. This agreement in no manner restricts the Company's right to revise this job description in the future as provided for in the Collective Bargaining Agreement or any applicable sidebar letter.

I believe that this letter accurately describes our conversations regarding this issue. If you are in agreement, please sign and return this letter to me.

April 15, 2015

Mr. James Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Separation of Delivery Operations and Gas Operations

Dear Mr. Anderson:

During the 2015 negotiations, the parties discussed the separation of Midwest Delivery Operations and Gas Operations relating to clerical functions performed by Office Coordinators, Customer Projects Recourse Specialists, and employees assigned to the Order Completion role.

As discussed, the work being performed by the above referenced classifications is being divided between the Midwest Delivery Operations (Electric) and Gas Operations (Gas) business units. As such, two new positions are being established in the Gas Operations Clerical Bid Area, Gas Office Coordinator (Gas QC) and Gas Operations Support Specialist (GOSS). Employees in the Office Coordinator classification currently assigned to Gas Operations will be reclassified as Gas Office Coordinators. The Customer Projects Resource Specialists (CPRS) currently assigned to Gas Operations will be re-classified into the new Gas Operations Support Specialist position. Employees currently performing the Order Completion role will remain in their respective classifications in the Customer Relations Bid Area.

The wage levels for the new positions remains the same as the existing Office Coordinator and CPRS classifications. The Company maintains all rights provided under the Collective Bargaining Agreement and applicable sidebar letters to revise job descriptions and/or discontinue filling these job classifications based on future business needs. Should such material revisions occur to the job descriptions, UWUA Local 600 may request a re-evaluation by the Job Evaluation Committee as provided for in the Agreement.

In order to give incumbent employees a final opportunity to move between the electric and gas bidding areas, the next three vacancies in either bidding area for an OC or a Gas QC will be filled by cross bidding (hand raising) as a combined area. The process for each vacancy will continue until the original posting is filled. This same process will also apply for the next CPRS or GOSS vacancy. Once this commitment is fulfilled, vacancies will be filled using the Competency Based Selection process in accordance with Sidebar Letters A21 (CPRS) and A65 and hand raising will apply only within the individual bid area.

Sidebar Letter A79 Page 1 In the event of a work force reduction, the Office Coordinator and Gas Office Coordinator classifications will be combined for the purpose of determining any rollbacks or layoffs. The same will apply for the CPRS and Gas Operations Support Specialist classifications.

Sincerely,

Jay A. Alvaro Director, Labor Relations

RE: Global Positioning Satellite (GPS)

Dear Mr. Anderson:

During the 2015 contract negotiations, the parties discussed the use of Global Positioning Satellite (GPS) system and other types of technology being contemplated for use in Company vehicles.

The primary purpose of the GPS and similar technology is to allow the Company the ability to more efficiently manage and assign work and to enhance safety by allowing us to locate a vehicle in the event we have lost contact with someone or a vehicle has been stolen. As discussed, it is not the Company's intent to constantly monitor employee's whereabouts using the GPS or other technology for the purpose of issuing corrective action.

Although its primary use is for managing work, the Company may review and rely on technology and/or the information obtained through its use to aid in an investigation where there is reason to believe an employee may have violated a Company policy or work rule, and the violation may be substantiated or disproven by such a review. To the extent the Company does rely on such information, the Company will treat similarly-situated employees in the same manner. Any such information, upon which the Company relies for purpose of imposing corrective action, will be provided upon request by the Union in accordance with applicable law.

In accordance with the March 29, 2007 GPS Letter, the Company is providing notice to the Union that the amount of history maintained in these systems may be longer than 30 days.

Sincerely,

Director, Labor Relations

Alvaro

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Engineering Specialist Progression

Dear Mr. Kowolonek:

During the 2015 and 2019 negotiations, the parties discussed the Company's decision to establish an Engineering Specialist Job Progression in the Customer Projects Bidding Area and the Transmission & Distribution Bidding Area. This progression will consist of the Engineering Specialist I, II, and III classifications. The wage levels for these newly created positions will be as follows:

| Job Classification | Wage Level | Maximum Hourly Rate as of 3/31/19 |
|----------------------------|------------|--------------------------------------|
| Engineering Specialist III | T9 | \$37.89 |
| Engineering Specialist II | T8 | \$36.83 |
| Engineering Specialist I | T4 | \$30.39 |

Wage progression will be as outlined in Article VIII of the Agreement and Sidebar Letter A40, with selections determined by the Company in accordance with Sidebar Letter A65. Employees are required to successfully complete all training programs required by the Company and to promote to the Engineering Specialist II position in a timely manner. Employees successfully completing the requirements for the Engineering Specialist III position will automatically promote to that position. In addition, the Company maintains all rights provided under the Collective Bargaining Agreement and applicable sidebar letters, including but not limited to the right to revise the Engineering Specialist job descriptions based on future business needs. Should such material revisions occur, UWUA Local 600 may request a re-evaluation by the Job Evaluation Committee as provided for in the Agreement.

Employees in the Engineering Specialist I classification may be assigned to a specific headquarters for training purposes as determined by the Company. Employees in the Engineering Specialist I classification will receive all training necessary as identified by the Company to safely perform assigned duties and meet all requirements to promote to the Engineering Specialist II position.

Due to a restructuring of how work is performed by the Company, the Company does not anticipate any future postings for Customer Project Apprentice positions. Incumbent employees will be grandfathered under their existing job description, and will be eligible to continue to receive the negotiated wage increase applicable to employees in the Technical Unit. Existing employees in the progression not at the maximum rate of pay will be eligible to continue receive merit increases as outlined in the December 28, 2012 letter regarding this subject. Also, incumbent employees in the Customer Project Associate and Customer Project Apprentice classifications must continue to meet all Company expectations as previously required, including but not limited to the requirement to progress.

Sidebar Letter A81 Page 2

As agreed, when the Company fills a position in the "Engineering Specialist II" classification, the senior qualified Technician in good standing will be promoted to T&D Design Technician. Furthermore, when the Company fills a position in the "Engineering Specialist III" classification, the senior qualified T&D Design Technician in good standing will be promoted to Senior T&D Design Technician. In all cases, employees must be in qualified and in good standing to be eligible for a promotion. This process will continue until all incumbents in the following classifications: Technical Apprentice, Design Technician, Technician, and, T&D Design Technician as of the date the Collective Bargaining Agreement is ratified until all eligible employees have had the opportunity to progress to the Sr. T&D Design Technician position. The T&D progression will be closed to Technical Apprentices and Technicians hired after April 15, 2015. It is the intent of the Distribution Design organization to utilize the Engineering Specialist progression for all such future hires.

For the purposes of "hand-raising" (bidding on headquarters or location) within the Customer Projects Bid Area, the Customer Projects Coordinator and the Engineering Specialist III classifications will be combined. In the event of a work force reduction, the Engineering Specialist progressions in the Customer Projects Bid Area and the Transmission & Distribution Bidding Area will be combined.

Additionally, the Company would use this process to fill any newly created job classifications that are at or above the NB or T4 wage level (or its equivalent). The selection process for Customer Projects Resource Specialist, Customer Project Coordinator and the Gas Operations Trainer, will remain as outlined in the applicable side bar letters.

Sincerely.

Michael A. Ciccarella Senior HR Consultant

Mr. James Anderson President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Customer Relations Representative/Clerk C Positions

Dear Mr. Anderson:

During the 2015 negotiations, the parties discussed the filling of future vacancies in the Customer Relations Representative C and the Customer Relations Clerk C classifications.

Based on these discussions, the parties have agreed that future openings in the Customer Relations Representative C and Customer Relations Clerk C classifications will be filled by the Company using the Competency Based Selection process.

The first three (3) positions will be filled using the Competency Based Selection process among the incumbent Order Processing Representatives in good standing. Should there only be one Order Processing Representative apply for each of the first three positions and he or she meets the minimum qualifications and is in good standing they will be the successful candidate. Order Processing Representatives selected by the Company for the first 3 opportunities will have their rate of pay reduced to the maximum wage rate of the Customer Relations Representative/Clerk C classification. In the event that no Order Processing Representative in good standing applies for one or more of the first three positions, the Company may fill the vacancy by a Union wide posting using the Competency Based Selection process.

Sincerely,

Director, Labor Relations

Duke Energy

April 1, 2019

Mr. Steve Kowolonek President Utility Workers Union of America Local 600 810 Brighton Street Newport, Kentucky 41071

RE: Inclement Weather

Dear Mr. Kowolonek:

At Duke Energy, our goal is a zero injury and illness safety culture for our employees and the communities we serve. In order to address the UWUA Local 600's concerns regarding inclement weather, when the Company determines there is a safety concern during periods of heavy or continuous storms or excessive cold weather, the Company will not require employees to perform construction or maintenance work in exposed locations outdoors, unless such work is necessary to protect life, property, or continuity of service. Employees are encouraged to communicate with their supervisors or managers to report and discuss any weather situations they believe may be unsafe. It is expressly understood and agreed that the services to be performed by the employees covered by this Contract pertain to and are essential to the operation of a public utility and to the welfare of the public.

Sincerely,

Michael A. Ciccarella Senior HR Consultant Labor Relations

RE: Alternate Schedule

Dear Mr. Anderson:

I am writing in regard to our conversations regarding an alternate work schedule consisting of 4 nine hour days and one 4 hour day. As discussed, this schedule will be administered as follows;

- The four hour day will be determined by business needs and may not necessarily be a Monday or Friday.
- Meal compensation will remain at ten hours as outlined in the Collective Bargaining Agreement including the four hour day.
- Where possible, seniority will be used in the selection of schedules absent business needs as
 determined by the Company. Should it be necessary to deviate from seniority, the Company will
 notify the Union the reason for the deviation and afford the Union an opportunity to offer
 alternatives.
- The double-time day will be Sunday.
- Personal/diversity days must be taken in full days regardless of the employee's schedule and cannot be taken in smaller increments.
- Employees working this schedule will revert to an eight hour schedule during all workweeks that contain a holiday recognized by the Company in an effort to maintain consistency throughout the bargaining unit.

The availability of this schedule to various workgroups and employees within those groups will be based on business needs. The Company retains all rights under the Agreement and applicable sidebar letters including the right to discontinue this schedule. I believe that this letter accurately describes our conversations regarding this issue. If you are in agreement, please sign and return this letter to me.

Sincerely,

Michael A. Ciccarella Senior HR Consultant

RE: Gas Marketing Progression

Dear Mr. Anderson:

The Gas Marketing progression, consisting of the Gas Marketing Specialist and Senior Gas Marketing Specialist classifications, was established in 2015 in order to assist in the expansion of Duke Energy's commercial gas operations. Since that time, the roles have evolved to the extent that the Company has determined that combining the classifications will provide the maximum flexibility in meeting customer needs.

Per our conversation, the existing classifications will be combined into one classification. Current educational requirements for the Gas Marketing Specialist call for a minimum of 45 credit hours with an Associate's Degree obtained within three years. The requirement for the revised job description will be a minimum of 45 credit hours with an Associate's Degree in engineering, technology, construction management, or business obtained within eighteen months of entry into the classification. Absent extenuating circumstances as solely determined by the Company, employees who fail to obtain the required degree within the eighteen month time frame are subject to discharge. The Company retains all rights under the Collective Bargaining Agreement to modify the duties and qualifications including acceptable degree requirements. Should the Company contemplate such revisions, notice will be given to the Union prior to any changes being made.

The wage rate for employees entering the classification will be the T7 minimum hourly rate. As outlined in the Patrick P. Gibson letter (Sidebar Letter A40) employees will be granted a merit increase in accordance with the Collective Bargaining Agreement if progress, measured by demonstrated ability and performance, has been satisfactory after six months. After one year, and again based on satisfactory performance, the employee's wage rate will be adjusted to the T8 minimum hourly rate provided that all educational requirements are met. For those employees not meeting the educational requirement at the twelve month mark, the wage adjustment will be made when the employee completes the requirement. As stated above, this must occur within eighteen months of entering the classification.

Incumbent Gas Marketing Specialists with more than one year of classified seniority and meeting all qualifications of the revised job description will have their wage rate adjusted to the T8 minimum hourly rate. Any current Gas Marketing Specialist not meeting the educational requirement of the revised job description will continue to have three years from entry into the classification to meet the requirement. Upon meeting the education requirement and all other qualifications, the employee will have their wage rate adjusted to the T8 minimum hourly rate. Employees in this category will maintain their seniority.

Mr. James Anderson September 13, 2016 Page 2

As stated previously, the Company maintains all rights provided under the Collective Bargaining Agreement and applicable sidebar letters to revise or discontinue job descriptions, including this one, based on future business needs. Should such material revisions occur to the job description, UWUA Local 600 may request a re-evaluation by the Job Evaluation Committee as provided for in the Agreement.

In addition, UWUA Local 600 agrees to withdraw Grievance #399 pertaining to the establishment of the Gas Marketing progression.

I believe that this accurately describes our conversation regarding this matter. If you are in agreement, please sign and return a copy of this letter to me.

Sincerely,

Michael A. Ciccarella Senior HR Consultant Labor Relations

RE: Lighting Specialist Progression

Dear Mr. Anderson:

I am writing in regard to our conversations regarding the establishment of the Lighting Specialist progression. As discussed, this will be a separate bid area consisting of the Lighting Specialist I (Wage Level T5) and Lighting Specialist II (Wage Level T8) job classifications. All applicable provisions of the Collective Bargaining Agreement, including Sidebar Letter A65 - Competency Based Selection, will apply to these positions.

The initial posting will be for two Lighting Specialists IIs and be restricted to qualified employees in the Distribution Design OH/KY and the Distribution Design (Subdivision) departments. Should the successful candidate be in a classification with a wage level higher than T8, then they will be grandfathered in their current classification and be eligible for contractual wage increases applicable to that classification. For all other purposes under the Collective Bargaining Agreement these grandfathered employees will be considered as Lighting Specialists IIs. As such, they will have no rollback rights within their former work groups. Conversely, these employees would not be included in any surplus/rollback scenario within their prior work group. The ability of employees with more than fifteen years of service to displace employees outside of their bidding area is not impacted. Employees in the Technician or T&D Design Technician classifications accepting a Lighting Specialist position will not be eligible to promote as outlined in Sidebar

The Company maintains all rights provided under the Collective Bargaining Agreement and applicable sidebar letters to revise or discontinue job descriptions, including these, based on future business needs. Should such material revisions occur to the job description, UWUA Local 600 may request a re-evaluation by the Job Evaluation Committee as provided for in the Agreement.

I believe that this letter accurately describes our conversations regarding this issue. If you are in agreement, please sign and return this letter to me.

Sincerely,

Letter A81.

Date:

SUMMARY OF TENTATIVE AGREEMENT BETWEEN DUKE ENERGY OHIO, INC. & DUKE ENERGY KENTUCKY, INC. AND IBEW LOCAL NO. 1347 June 9, 2022

TERM OF THE AGREEMENT – Subject to membership ratification, the new Agreement will be a four-year Agreement effective April 1, 2022 through March 31, 2026.

WAGE INCREASES – Employees will receive a 3.5% general wage increase, retroactive to April 1, 2022, if this Tentative Agreement is ratified by June 24, 2022. For the remainder of the term of the new Agreement, employees will receive a 3.5% general wage increase effective April 1, 2023, a 3.0% general wage increase effective April 1, 2024, and a 3.0% general wage increase effective April 1, 2025. Applicable to all employees unless otherwise negotiated.

Following ratification of the Agreement, certain job classifications will receive market adjustments in addition to the agreed upon general wage increase (Appendix).

REVISED LINEPERSON PROGRESSIONS – Revised progressions allowing for a dedicated workforce in the Customer Delivery and Transmission line organizations. This will enhance safety for employees. The Agreement allows for employees to move between progressions.

ANNUAL FR CLOTHING ALLOTMENT – Beginning in 2023, the annual allowance for FR clothing will be \$655 for eligible employees in the Customer Delivery, Customer Services, Transmission and Telecommunications Departments.

REVISED FLEET PROGRESSION – Provides for auto-progression from the Vehicle Maintenance I classification to the Vehicle Maintenance II classification.

CALL-OUT PROCESS – Revised call-out responsiveness measures to provide clarification on the administration of the corrective action process and provides additional opportunity for credits when working unscheduled and scheduled overtime assignments.

TWELVE HOUR SHIFT AGREEMENT – Enhancements to the holiday and Sunday premiums for twelve hour rotating shift workers.

FLEET TOOL ALLOWANCE – Should Fleet Services decide in the future to provide a tool allowance or an initial set of tools to Fleet Services employees across the enterprise, the Company will also provide those items to Fleet Services employees represented by IBEW 1347.

REVISED HOLIDAY LANGUAGE - Contract language revised to clarify overtime provisions on holidays.

ELECTRIC TROUBLE GUIDELINES – Provides clarity concerning rest periods and the trading of shifts.

GENERATION WELDING PREMIUM – Employees in the Support Technician or Maintenance Services Team Member job classifications whose job requires them to perform structural welding and who have completed any required specialized training and certification, will receive a premium in the amount of \$0.75 per hour. Employees whose job requires them to perform pressure component welding and who have completed any required specialized training and certification, will receive a premium in the amount of \$1.50 per hour. This premium will be applicable to all hours paid.

EMPLOYEE DEVELOPMENT CREW (EDC) - The Leadperson Trainer Premium as defined in Sidebar Letter A51 will be applicable to all hours paid for those Leadperson Trainers assigned to the Employee Development Crew on a full-time basis. Should the EDC be spilt into smaller groups working independently, a second Leadperson-Trainer may be designated as deemed appropriate by the Company.

POST-RETIREMENT HEALTH BENEFITS – Beginning no sooner than January 1, 2023, employees who retire and are eligible, who do not enroll in Company-sponsored pre-65 healthcare coverage at the time of retirement or upon the expiration of any COBRA continuation coverage, will not be permitted to enroll

themselves or their eligible dependents at any future date. Retirees who enroll in Company-sponsored pre-65 healthcare coverage but subsequently, decline/drop coverage, will not be permitted to re-enroll themselves or their eligible dependents at any future date.

WORKPLACE SECURITY POLICY – Duke Energy is committed to providing a safe and secure workplace for employees, contingent workers, vendors, customers, and visitors. This commitment includes promotion of a work environment free from incidents or threats of workplace violence and intimidation or harassment on Company property or while conducting Company business. The terms of this Policy apply to all IBEW 1347 represented employees.

This Summary of the Tentative Agreement contains highlights of the parties' negotiations outcomes. More detailed information is contained in the side letter agreements and language modifications to the collective bargaining agreement.

This brochure is intended to be a general summary of the 2022 Executive Long-term Incentive (LTI) Plan granted under the terms of the Duke Energy Corporation 2015 Long-term Incentive Plan (LTIP). The Executive LTI Plan is subject to the provisions of the LTIP and related prospectus and should be read together with the award agreements. In the event of any conflict between the information in this brochure and the LTIP or the applicable award agreements, the terms of the LTIP/award agreements will govern. Duke Energy Corporation reserves the right to amend, suspend or terminate the 2022 Executive LTI Plan at any time and for any reason. PARTICIPATION IN THE 2022 EXECUTIVE LTI PLAN IS NOT AN OFFER OR GUARANTEE OF EMPLOYMENT OR AN EMPLOYMENT CONTRACT AND DOES NOT ALTER THE AT-WILL NATURE OF ANY EMPLOYEE'S EMPLOYMENT IN ANY WAY.

2022 EXECUTIVE LONG-TERM INCENTIVE PLAN

As a leader at Duke Energy Corporation (Duke Energy), you receive stock-based incentives as part of your annual compensation. The grant date for the 2022 annual award was **February 23, 2022**. Under the 2022 Executive Longterm Incentive (LTI) Plan, you will receive two types of stock-based awards:

Performance Shares — You will receive 70% of your 2022 LTI opportunity in performance shares. Performance shares are subject to vesting, but only after specified performance goals have been determined to have been achieved, subject to your continuous employment (or as otherwise described in the 2022 Executive LTI Plan Summary on page 8). The 2022 Executive LTI Plan contains the following three performance goals, each of which is measured over a three calendar-year period (2022-2024):

| Performance Goal | % of Shares |
|---|-------------|
| Goal 1 : Cumulative adjusted basic Earnings Per Share (EPS) | 50% |
| Goal 2: Total Incident Case Rate (TICR) | 25% |
| Goal 3: Total Shareholder Return (TSR) relative to that of the companies in the Philadelphia Utility Index | 25% |

 Restricted Stock Units (RSUs) — You will receive the remaining 30% of your 2022 LTI opportunity in the form of RSUs that will vest equally over a threeyear period (one-third on each of the first three anniversaries of the grant date), subject to your continuous employment (or as otherwise described in the 2022 Executive LTI Plan Summary on page 8).

The 2022 Executive LTI Plan continues Duke Energy's focus on increased stock ownership, more direct alignment with shareholders and retention. Specifically, the plan:

- Provides for share ownership by executives;
- Delivers a portion of your long-term incentive opportunity to you only when value is delivered to shareholders;
- Provides for increased award value in alignment with increases in shareholder value; and
- Assists in the retention of key executive talent.

Total Rewards

Duke Energy's executive compensation and benefits programs are designed to reward high-performing individuals for delivering the results needed to ensure the company's success.

Duke Energy's rewards strategy remains constant with the goal being to attract and retain high-caliber leaders by providing a competitive compensation package that recognizes corporate and individual performance.

Given today's business environment, the concept of a "total rewards" approach has never been more important. Stock awards are an important component — but not the only component — of a total rewards package that is reviewed annually to ensure ongoing competitiveness and appropriateness in light of internal and external factors. The elements of your total rewards package may include:

Accepting Your Stock Awards

In order for your 2022 Executive LTI Plan awards to take effect, it will be necessary for you to accept the awards and agree to their terms via the Fidelity NetBenefits website. An email communication with detailed instructions will be sent to you when it is time to accept your stock awards.

We encourage you to read this brochure carefully in conjunction with your award agreements, as well as the 2015 Long-term Incentive Plan Summary and its Prospectus. You may also wish to discuss this information with your personal financial advisor.

Accessing Your Stock Awards

Record keeping for your stock awards is provided by Fidelity Stock Plan Services, LLC. You will be able to access your stock plan information online at www.netbenefits.com or by calling a Fidelity Stock Plan Services representative at 800-376-4015 (toll free).

Eligibility

Participation in the Executive LTI Plan is generally reserved for members of the Enterprise Leadership Team (ELT) to ensure alignment with shareholder interests and accountability for making short and long-term strategic decisions.

Calculating Your Stock Awards

To understand vesting opportunities under your stock awards, it is important to first understand how your stock awards were calculated. Your LTI opportunity is expressed as a percentage of your base pay. You should have received information about your 2022 LTI opportunity from your manager. You can also locate this information on the "Your Total Rewards Statement" page on the Duke Energy Portal.

The number of performance shares and RSUs awarded to you was based on:

- Your annual base salary as of March 1, 2022;
- Your 2022 LTI opportunity; and
- The closing price of Duke Energy common stock on the grant date (i.e., \$97.67).

The number of performance shares specified in your award agreement represents the number of shares that are subject to vesting if Duke Energy's performance is at the target level. However, at maximum performance, you have the opportunity, depending on Duke Energy's performance, to vest in up to 200% of the number of target shares.

The following example illustrates how the Executive LTI stock awards are calculated:

Calculation Example

Assumptions:

- · Annual base salary as of March 1, 2022 is \$250,000.
- Target LTI opportunity is 50% of base salary or \$125,000 (\$250,000 x 50%).
- Closing price of a share of Duke Energy common stock on the grant date is \$97.67.

LTI opportunity value by component:

Performance Shares.....\$125,000 x 70% = \$87,500 Restricted Stock Units.....\$125,000 x 30% = \$37,500

Number of shares in award by component:

Performance Shares......\$87,500 / \$97.67 = 896 (target) 896 shares x 200%= 1,792 (max)

Restricted Stock Units\$37,500 / \$97.67 = 384

Highlights of 2022 Executive LTI Plan Awards

Performance Shares

- 70% of LTI opportunity awarded as performance shares.
- Three performance goals based on cumulative adjusted Earnings Per Share (EPS), Total Incident Case Rate (TICR) and relative Total Shareholder Return (TSR) compared to companies in the Philadelphia Utility Index.
- Performance measured over a three calendar-year period from 2022 to 2024 and will vest, subject to company performance, in early 2025.
- May vest in up to 200% of the target number of shares at maximum performance.
- Performance shares vest, subject to continuous employment, based on performance at the end of the three-year performance period. Prorated vesting provided if employment terminates after attaining age 55 with 10 years of service or after involuntary termination without cause.*
- Number of shares distributed is reduced to satisfy any tax withholding obligation.
- At the end of the performance period, receive cash payment equal to dividends declared and paid for the three-year period for each performance share that is vested and paid.

Restricted Stock Units (RSUs)

- · 30% of LTI opportunity awarded as RSUs.
- One-third of the RSUs vest, subject to continuous employment, on each of the first three anniversaries of the grant date. Prorated vesting provided if employment terminates after attaining age 55 with 10 years of service or after involuntary termination without cause.*
- Number of shares distributed is reduced to satisfy any tax withholding obligation.
- For each unvested RSU, receive quarterly cash payment equal to the cash dividend per share declared and paid on Duke Energy common stock

^{*}Special vesting rules apply to certain participants. You will be notified if these rules apply to you.

PERFORMANCE GOALS (applicable to 70% of your award)

The intent of your performance share award is to link a portion of your LTI value to the achievement of performance goals that directly align with shareholders' interests. Part of your award is at risk, such that you will forfeit the performance shares if the goals are not achieved.

Performance Award Updates

Determination of goal achievement for the 2022 Executive LTI Plan performance shares will be made in early 2025. During the 2022-2024 performance period, periodic updates on Duke Energy's progress relative to the performance goals will be posted on the Stock Awards page under the myHR menu on the Duke Energy Portal.

Performance achievement for the 2022 performance shares will be measured against three metrics.

• EPS Performance Goal: The vesting opportunity for one-half (50%) of your performance shares will be based on Duke Energy's cumulative adjusted basic EPS over the three calendar-year period 2022 to 2024. The chart below indicates the percentage of this portion of your performance shares that will vest based on a determination of achievement of EPS:

| Cumulative Adjusted Basic EPS | % of Target Shares Vested |
|----------------------------------|------------------------------|
| Below | 0% |
| (threshold) | 50% |
| (target) | 100% |
| or higher (maximum) | 200% |

The percentage of performance shares that will vest will be interpolated for achievement of cumulative adjusted basic EPS between these amounts.

 TICR Performance Goal: The vesting opportunity for one-quarter (25%) of your performance shares will be based on Duke Energy's TICR measured over the three calendar-year period 2022 to 2024. The chart below indicates the percentage of this portion of your performance shares that will vest based on a determination of achievement at the specified percentile rankings:

| TICR Percentile Ranking vs. EEI Peer Group* | % of Target Shares Vested |
|---|------------------------------|
| Below 75 th | 0% |
| 75 th (threshold) | 50% |
| 90 th (target) | 100% |
| Top Company (maximum) | 200% |

The percentage of performance shares that will vest will be interpolated for achievement of TICR between these percentile rankings.

*EEI Group 1 Large Company Index, excluding companies without gas or nuclear operations, that report TICR results for at least one year during the 2021-2023 period

• TSR Performance Goal: The vesting opportunity for the remaining one-quarter (25%) of your performance shares will be based on Duke Energy's cumulative TSR relative to that of the companies in the Philadelphia Utility Index (UTY), measured over the three calendar-year period 2022 to 2024. The chart below indicates the percentage of this portion of your performance shares that will vest based on a determination of achievement at the specified percentile rankings:

| TSR Percentile Ranking vs. UTY | % of Target Shares Vested |
|--------------------------------------|---------------------------|
| Below 25 th | 0% |
| 25 th (threshold) | 50% |
| 55 th (target) | 100% |
| 90 th or higher (maximum) | 200% |

The percentage of performance shares that will vest will be interpolated for achievement of TSR between these percentile rankings.

In addition, if Duke Energy's cumulative TSR is at least 15% during the performance period, the payout for the TSR portion cannot be less than 30% of target shares, and if Duke Energy's TSR is negative during the performance period, the payout cannot exceed the target level (i.e., 100%).

About Cumulative Adjusted Basic Earnings Per Share (EPS)

What is cumulative adjusted basic EPS?

Cumulative EPS measures earnings over a specified period of time. Adjusted EPS is a company's earnings, as adjusted for "special items", divided by the number of its weighted average outstanding shares of common stock. For instance, a corporation that earned \$10 million last year and has 10 million shares outstanding would report EPS of \$1.

Why was cumulative adjusted EPS chosen as one of the performance measures for the 2022 performance shares?

This measure aligns the interests of executives with shareholders. Over time, increases in EPS drive shareholder value and should result in increases to Duke Energy's stock price.

How is cumulative adjusted basic EPS calculated? Cumulative adjusted basic EPS is calculated by adding the actual adjusted EPS results for each year during the performance period (i.e., 2022-2024).

About Total Incident Case Rate (TICR)

What is TICR?

Total Incident Case Rate, or TICR, measures the number of occupational injuries and illnesses per 100 employees, including staff augmentation workers, and is calculated as follows.

The TICR performance goal under the 2022 Executive LTI Plan is based on the number of injuries and hours worked measured over the three calendar-year period (2022-2024).

Why was TICR chosen as one of the performance measures for the 2022 performance shares?

Safety is a core value for our company. In addition, research shows that the discipline necessary to achieve high performance in safety influences all other aspects of operational excellence.

How is the TICR goal evaluated?

The TICR goal is based on how Duke Energy's TICR over the 2022-2024 performance period compares to the results of the companies in the EEI Group I Large Company Index, excluding companies without gas or nuclear operations, that report TICR results for at least one year during the 2021-2023 period.

About Total Shareholder Return (TSR)

What is Total Shareholder Return?

Total Shareholder Return is the return a shareholder earns over a specified period of time. TSR measures the change in fair market value of an initial investment in common stock, over a specified period, with dividends reinvested, and is typically expressed as an annual percentage.

The average closing price on each day during the month of December at the beginning and ending of the performance period (*i.e.*, 2022 and 2024) will be used to calculate TSR results.

Why was TSR chosen as one of the performance measures for the 2022 performance shares and how is it evaluated?

Because TSR measures the change in a shareholder's investment over a period of time, it aligns the interests of executives with shareholders. This concept is consistent with Duke Energy's focus on long-term shareholder value creation. The TSR measure under the 2022 Executive LTI Plan is measured on a relative basis (*i.e.*, as compared to the TSR of a published index of companies in the UTY).

Why was the Philadelphia Utility Index (UTY) chosen as the benchmark against which to compare Duke Energy's TSR?

The UTY is an index of companies similar to Duke Energy. When measuring Duke Energy's TSR as compared to the companies in the UTY, only those companies in the UTY on the first day of the performance period will be considered unless a company is no longer a separate publicly-traded company due to merger, acquisition or privatization.

This example illustrates how TSR is calculated for a one-year period. Keep in mind that the TSR performance goal under the 2022 Executive LTI Plan is based on TSR measured over the three calendar-year period (2022-2024) relative to the companies in the Philadelphia Utility Index.

| | TSR Calculation* | | | | | |
|---------|--|---------------------------------|--|--|--|--|
| Month | Share Value | Dividend Reinvestment | Total Shares | | | |
| Jan.1 | \$95.00 | Not applicable | Initial investment of 100 shares = \$9,500 | | | |
| Mar. | \$95.50 | 100.00 shares x 0.945 = \$94.50 | Buy 0.99 share = 100.99 total shares | | | |
| Jun. | \$96.00 | 100.99 shares x 0.945 = \$95.44 | Buy 0.99 share = 101.98 total shares | | | |
| Sep. | \$96.50 | 101.98 shares x 0.945 = \$96.37 | Buy 1.00 share = 102.98 total shares | | | |
| Dec. | \$97.00 | 102.98 shares x 0.945 = \$97.32 | Buy 1.00 share = 103.98 total shares | | | |
| Dec. 31 | \$97.50 | Not applicable | 103.98 shares x \$97.50 = \$10,138 | | | |
| | TOTAL SHAREHOLDER RETURN = (\$10,138 - \$9,500) / \$9,500 = 6.7% | | | | | |

^{*}The amounts reflected in the preceding example are merely intended for illustrative purposes and do not reflect any expectations or predictions by the company.

Certification of Final Results by the Compensation and People Development Committee

Duke Energy's results with respect to the performance measures will be certified by the Compensation and People Development Committee of the Board of Directors. The Compensation and People Development Committee reserves the right to adjust or reduce payments if it determines that such action is appropriate to reflect an adjustment to the calculation of EPS (for unusual or nonrecurring items) or in connection with another change in circumstances or events. As a result, it is important to remember that the performance share results will not be officially determined until they are certified by the Compensation and People Development Committee in early 2025.

GENERAL INFORMATION

Performance shares and RSUs provide some, but not all, of the benefits of actual shares of Duke Energy common stock.

Vesting

Generally, your performance shares will become vested following a determination in early 2025 based on the extent to which the performance goals have been achieved. If, at the time of such determination, your continuous employment has not terminated (or as otherwise described in the 2022 Executive LTI Plan Summary on page 8), up to 200% of the target number of performance shares in your award will then immediately vest, depending upon the level of goal achievement. Any shares not vested are forfeited.

Your RSUs vest, while your employment continues, according to an installment-based vesting schedule (or as otherwise described in the 2022 Executive LTI Plan Summary on page 8). Under that schedule, one-third of your RSUs will vest on each of the first three anniversaries of the grant date.

The following provisions apply to the vesting of your performance shares and RSUs:

- Performance shares and RSUs generally are paid as soon as practicable after they vest. Certain exceptions apply if such awards vest on or following your termination of employment.
- Vested performance shares and vested RSUs are paid in whole shares of Duke Energy common stock.
- The number of shares paid is reduced to satisfy your tax withholding obligation (see *Taxes* on page 7 for additional details).

Dividend Equivalents

You will receive dividend equivalent payments on your performance shares and RSUs as follows:

For each performance share that is vested and paid, following the determination in early 2025 of whether the performance goals have been achieved, you will receive a cash payment equal to the dividends declared and paid after the grant date and before the vested performance shares are paid (i.e., the dividend equivalent). This amount is paid on an accumulated basis at the end of the three calendar-year period.

- For each unvested RSU, you will receive a cash payment equal to the cash dividend per share declared and paid on Duke Energy common stock. These amounts are paid on a current basis each quarter. Upon vesting and payment, or forfeiture of the unit, future dividend equivalent payments will end.
- Dividend equivalent payments will be included in your paycheck. They are treated as ordinary income and are, therefore, subject to tax withholding.

Stock Ownership Guidelines

Members of the Enterprise Leadership Team (ELT) are subject to the Duke Energy Stock Ownership Guideline Policy. Unvested RSUs, but not unvested performance shares, count toward your target ownership level. Actual shares of Duke Energy common stock paid to you following vesting of RSUs and performance shares that you continue to hold also count toward your target ownership level.

Voting Rights

Prior to vesting, your performance shares and RSUs do not give you shareholder voting rights because no actual shares of common stock are issued to you unless and until they vest and are paid.

Ability to Sell

You may not sell your performance shares or RSUs, but you may sell the shares of Duke Energy common stock that you receive upon vesting, subject to Duke Energy's Insider Trading Policy and, if applicable, stock ownership guidelines.

Taxes

Under current U.S. tax rules, you will incur taxable income when your vested performance shares and RSUs are paid based on the fair market value of the common stock delivered to you. This income will be included on your Duke Energy Form W-2. Federal income tax and any applicable state, local, Social Security and Medicare tax withholdings are required upon the vesting of your award. Your taxes will be paid by the share reduction method. You will receive the number of shares that have vested less the shares used to pay your tax withholding. Shortly after vesting, you will receive your net shares in your Fidelity brokerage account.

Keep in mind you may owe additional income taxes depending on your personal financial situation. You may wish to consult with your tax advisor to determine whether you should make additional estimated tax payments.

Example: Tax Withholding Through Reduction of Shares

You vest in 100 RSUs and are notified that the tax withholding amount due is \$3,400. The shares used to pay your tax withholding are valued at fair market value (let's assume \$85). The amount of Duke Energy common stock you receive would be reduced by 40 shares (\$3,400/\$85 = 40 shares). You would receive 60 shares in your Fidelity Brokerage account, the 100 shares that vested less the 40 shares withheld to pay your tax withholding.

2022 EXECUTIVE LTI PLAN SUMMARY

The following chart summarizes the terms of your stock awards under the 2022 Executive LTI Plan.

| Provision | Performance Shares | Restricted Stock Units (RSUs) |
|--|---|--|
| Grant date | February 23, 2022 | February 23, 2022 |
| Performance Goals and Vesting Opportunity | The extent to which the performance shares vest depends on achievement relative to three performance measures during the 2022-2024 performance period, as follows: (50% Weighting) Cumulative Bulke Energy Duke TSR vs. TICR vs. EEI Peer Phil. Utility Shares EPS Group* Below 25th Top Company Poth or higher * EEI Group 1 Large Company Index, excluding companies without gas or nuclear operations, that report TICR results for at least one year during the 2021-2023 period. | N/A |
| Vesting While employment continues When employment with Duke Energy and its affiliated companies | Following determination in early 2025 of the extent to which the performance measures have been achieved, immediate vesting of the applicable number of shares based on actual performance. | Three-year installment vesting — 1/3 of units vest each year on anniversary of grant date. |
| - After attaining the age of 55 with 10 years of service or on account of termination by the company without cause or termination as the result of a divestiture | If on or after 12/31/24 but before determination in early 2025 that the goals have been achieved – once the determination is made, immediate vesting of applicable number of shares based on actual performance. If before 12/31/24 – once the determination is made in early 2025 that the goals have been achieved, immediate vesting of the applicable number of shares based on actual performance, adjusted to reflect only actual 2022-2024 service.* Shares not immediately vested are forfeited. Note: Special vesting rules apply to certain participants. You will be notified if these rules apply to you. | Units in award are reduced to reflect only actual service during the installment vesting period** and become immediately vested and paid to the extent not previously vested. Units not previously or immediately vested are forfeited. |
| - On account of death /e isability | If on or after 12/31/24 but before determination in early 2025 that the goals have been achieved – once the determination is made, immediate vesting of applicable number of shares based on actual performance. If before 12/31/24 – once the determination is made in early 2025 that the goals have been achieved, immediate vesting of the applicable number of shares based on actual performance, adjusted to reflect only actual 2022-2024 service.* Shares not immediately vested are forfeited. | Units become immediately vested and paid. |
| Other than after attaining the age of 55 with 10 years of service or on account of death/disability/termination by company without cause/divestiture | If before 12/31/24, all shares are forfeited. | Vesting ends — units not previously vested are forfeited. |
| Dividend Equivalents | Following determination in early 2025 that the goals have been achieved, for each performance share that becomes vested, payment will be in an amount equal to the aggregate cash dividends on a share of Duke Energy common stock previously declared and paid after the grant date and before the vested performance share is paid. | Quarterly payments on unvested units that have not been forfeited are paid when common stock cash dividends are declared and paid. |

^{*} Calculated based on number of days of actual service, divided by the total number of days in the 2022-2024 period

^{**} Calculated based on number of days of actual service from the grant date divided by the total number of days in the period from the grant date to the third anniversary of the grant date

2022 Restricted Stock Unit (RSU) Award Summary (granted2/23/2022)

As a participant in Duke Energy's long-term incentive (LTI) program, you have been awarded a restricted stock unit (RSU) grant which was approved **February 23, 2022** (*i.e.*, the grant date).

Your grant value was calculated by multiplying your annual rate of base pay that was effective on the grant date by your LTI opportunity. The number of RSUs awarded to you was determined by dividing your grant value by \$97.67, the closing price of Duke Energy common stock on the grant date. These RSUs will vest over a three-year period, as described below.

Accepting Your RSU Grant

It will be necessary for you to accept your RSU award and agree to its terms via the Fidelity NetBenefits site. Upon accepting your award, we encourage you to read your award agreement carefully as well as the 2015 Long-Term Incentive Plan (LTIP) Summary and its Prospectus. In the event of any conflict between the information in this summary and the LTIP or the award agreement, the terms of the LTIP/award agreement will govern. You may also wish to discuss this information with your personal financial advisor.

Accessing Your Stock Award

Record keeping for your stock award is provided by Fidelity Stock Plan Services, LLC. You will be able to access your stock plan information online at **www.netbenefits.com** or by calling a Fidelity Stock Plan Services representative at **800-376-4015**.

Vesting

Your RSUs vest, while your employment continues, according to an installment-based vesting schedule (or as otherwise described in the *Restricted Stock Unit Award Summary Chart* on page 3). Under that schedule, one-third of your RSUs will vest on each of the first three anniversaries of the grant date (*i.e.*, 2/23/2023, 2/23/2024 and 2/23/2025).

Vested RSUs are paid in whole shares of Duke Energy common stock shortly after they vest and will be reduced by the applicable tax withholding, as described below.

Dividend Equivalents

You will receive a cash payment equal to the quarterly cash dividend per share declared and paid on Duke Energy common stock for each unvested RSU awarded to you. These cash payments will be included in your paycheck. Dividend equivalent payments are treated as ordinary income, and, therefore, are subject to tax withholding. Upon vesting and payment, or forfeiture of the unit, future dividend equivalent payments will end.

Voting Rights

Prior to vesting, your RSUs do not give you shareholder voting rights because no actual shares of common stock are issued to you until your RSUs vest and are paid.

Ability to Sell

You may not sell your unvested RSUs, but you may sell the shares of Duke Energy common stock that you receive upon vesting, subject to Duke Energy's Insider Trading Policy.

Taxes

Under current U.S. tax rules, you will incur taxable income when your vested RSUs are paid, based on the fair market value of the common stock delivered to you. This income will be included on your Duke Energy Form W-2. Federal income tax and any applicable state, local, Social Security and Medicare tax withholding is required upon the vesting of your award. Your taxes will be paid by the share reduction method which means you will receive the number of shares that have vested less the shares withheld to pay your tax withholding. Shortly after vesting, you will receive your net shares in your Fidelity brokerage account.

EXAMPLE: Tax Withholding Payment Through a Reduction of Shares

You vest in 100 RSUs and are notified that the tax withholding amount due is \$3,400. The shares used to pay your tax withholding are valued at fair market value (let's assume \$85). The amount of Duke Energy common stock you receive would be reduced by 40 shares (\$3,400/\$85 = 40 shares). You would receive 60 shares in your Fidelity Brokerage account, the 100 shares that vested less the 40 shares withheld to pay your tax withholding.

Keep in mind that your income will be taxed at applicable withholding rates, and you may owe additional income taxes depending on your personal financial situation. You may wish to consult with your tax advisor to determine whether you should make additional estimated tax payments.

Restricted Stock Unit Award Summary Chart

The following chart summarizes the terms of your 2022 RSU award.

| Provision | Restricted Stock Units (RSUs) | | | | |
|--|---|--|--|--|--|
| Grant Date | February 23, 2022 | | | | |
| Vesting's • While employment continues | Three-year installment vesting — 1/3 of units vest each year on anniversary of grant date (i.e., 2/23/2023, 2/23/2024 and 2/23/2025) | | | | |
| When employment with Duke Energy and its affiliated companies terminates | | | | | |
| - After attaining the age of 55 with 10 years of service or on account of termination by the company without cause or termination as the result of divestiture | Units in award are reduced to reflect actual service during the installment vesting period* and become immediately vested to the extent not previously vested Units not previously or immediately vested are forfeited | | | | |
| - On account of death/disability | Unvested units become immediately vested | | | | |
| - Termination other than described above | Vesting ends — units not previously vested are forfeited | | | | |
| Dividend Equivalents | Quarterly payments on unvested units that have not been forfeited are paid when common stock cash dividends are declared and paid | | | | |

^{*}Calculated based on number of days of actual service from the grant date divided by total number of days in the period from the grant date to the third anniversary of the grant date.

This document contains selected highlights of Duke Energy's employee compensation plans. If any statement herein, or any other communication, conflicts with the applicable plan documents and/or award agreements, the plan documents and/or award agreements will govern. Duke Energy retains the right to amend, modify or terminate its compensation plans in any respect and at any time, and neither its benefits plans, nor your plan participation, will be considered a contract for future employment.

I. <u>INTRODUCTION AND PURPOSE</u>

- 1 Q. STATE YOUR NAME AND BUSINESS ADDRESS.
- 2 A. My name is John D. Swez and my business address is 526 S. Church Street,
- 3 Charlotte, North Carolina 28202.
- 4 Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?
- 5 A. I am employed as Managing Director, Trading and Dispatch, by Duke Energy
- 6 Carolinas, LLC, a utility affiliate of Duke Energy Kentucky, Inc. (Duke Energy
- 7 Kentucky or Company).
- 8 Q. PLEASE DESCRIBE BRIEFLY YOUR EDUCATION AND
- 9 **PROFESSIONAL EXPERIENCE.**
- 10 A. I received a Bachelor of Science degree in Mechanical Engineering from Purdue
- University in 1992. I received a Master of Business Administration degree from
- the University of Indianapolis in 1995. I joined PSI Energy, Inc. in 1992 and have
- held various engineering positions with the Company or its affiliates in the
- generation dispatch or power trading departments. In 2003, I assumed the position
- of Manager, Real-Time Operations, on January 1, 2006, became the Director of
- Generation Dispatch and Operations, and finally assumed my current role on
- 17 November 1, 2019.
- 18 Q. HAVE YOU EVER TESTIFIED BEFORE THE KENTUCKY PUBLIC
- 19 **SERVICE COMMISSION?**
- 20 A. Yes, I have testified before the Kentucky Public Service Commission
- 21 (Commission) on several occasions.

1 Q. PLEASE BRIEFLY DESCRIBE YOUR DUTIES AS MANAGING

DIRECTOR, TRADING & DISPATCH.

A.

A. As Managing Director, Trading and Dispatch of Duke Energy, I am responsible for Power Trading on behalf of Duke Energy's regulated utilities in the Carolinas and Florida and Generation Dispatch on behalf of Duke Energy's regulated utilities in Indiana, Ohio, and Kentucky. I am responsible for Duke Energy Kentucky's participation as a member of PJM Interconnection LLC (PJM) as it relates to the Company's generation dispatch, unit commitment, 24-hour real-time operations, short-term maintenance planning. I am also responsible for the Company's submittal of supply offers in PJM's day-ahead and real-time electric energy (collectively Energy Markets) and ancillary services markets (ASM), as well as managing the Company's short-term supply position to ensure that the Company has adequate economic resources committed to serve its retail customers' electricity needs. I also work closely with the teams responsible for managing the Company's capacity position with respect to meeting its Fixed Resource Requirement (FRR) obligation as a member of PJM.

17 Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?

I provide a brief overview of the Company's generating resources used to meet its customer load obligations and provide safe, reliable, and adequate service. I then discuss the Company's participation in the PJM energy markets and discuss the customer benefits that the Company's PJM membership provides. Finally, I sponsor Filing Requirement (FR) 16(7)(h)(7) and certain forecasted financial data

| 1 | that I provided to Duke Energy Kentucky witness Mr. Grady S. "Tripp" Carpenter |
|---|--|
| 2 | for his use in preparing the Company's forecast. |

II. OVERVIEW OF DUKE ENERGY'S CURRENT GENERATING RESOURCES AND PARTICIPATION IN PJM

3 Q. PLEASE PROVIDE A BRIEF OVERVIEW OF HOW DUKE ENERGY

KENTUCKY MEETS ITS KENTUCKY LOAD OBLIGATIONS.

A.

Duke Energy Kentucky currently owns and operates approximately 1,076 net installed megawatts (MW) of summer generating capacity, provided by two assets. Base load requirements are met by the East Bend Unit 2 Generating Station (East Bend). East Bend is a 600-megawatt (MW) (net rating) coal-fired base load unit located along the Ohio River in Boone County, Kentucky. The Company's peaking requirements are met with the Woodsdale Generating Station (Woodsdale). Woodsdale is a 476 MW (net summer rating) six-unit natural gasfired combustion turbine (CT) facility located in Trenton, Ohio. The net ratings represent the amount of power that the Company can dispatch from the plants after some portion of the gross power output is used to power the plant machinery.

Additionally, the Company has 8.8 MW of solar assets consisting of the nameplate ratings of Walton 1 (2 MW), Walton 2 (2 MW), Crittenden (2.8 MW), and the soon to be completed Aero (2.0 MW) site with the net firm summer capacity at all four solar sites of 3.7 MW. These assets are connected at the distribution level and thus, from PJM's perspective are behind the meter, meaning these generating assets reduce the customer demand as seen from PJMs perspective, but are not separately dispatched into the market.

| Collectively, East Bend and Woodsdale generating assets are dispatched |
|--|
| into PJM, which maintains functional control of the transmission system within its |
| footprint including the Duke Energy Ohio/Kentucky system. To the extent Duke |
| Energy Kentucky can monetize its assets to produce off-system sales through |
| PJM, customers receive the majority of those net revenues (or costs) through the |
| Company's profit-sharing mechanism (Rider PSM). |

7 Q. PLEASE GENERALLY DESCRIBE DUKE ENERGY KENTUCKY'S 8 MEMBERSHIP IN PJM.

A.

Duke Energy Kentucky is a member of PJM, the nation's first fully functioning Regional Transmission Organization (RTO) that operates the power grid and wholesale electric market for all or parts of thirteen states and the District of Columbia. This electric market consists of energy markets, capacity markets, ancillary services markets (ASM), and a Financial Transmission Rights (FTR) market. PJM's operation is governed by agreements approved by the Federal Energy Regulatory Commission (FERC) including the Operating Agreement, Open Access Transmission Tariff (OATT), and the Reliability Assurance Agreement (RAA).

As a member of PJM, Duke Energy Kentucky is subject to these agreements, which among other things, require Duke Energy Kentucky to offer its available generation to PJM and to purchase its customer energy load from the PJM Day-Ahead or Real-Time Energy Markets. The Day-Ahead and Real-Time Energy Markets are collectively referred to as the PJM Energy Market for the remainder of my testimony.

Through PJM's Day-Ahead market, market participants can mitigate their exposure to real-time price risk by selling available generation and purchasing forecasted demand. Duke Energy Kentucky submits demand bids and supply offers as both a load serving entity and a generator owner, respectively. Thus, the Company simultaneously functions as both a buyer and seller to serve its retail electric customers.

7 Q. PLEASE BRIEFLY DESCRIBE THE PJM ENERGY MARKET.

A.

PJM administers its Energy Market utilizing locational marginal pricing (LMP). LMP can be broadly defined as the value of one additional megawatt of energy at a specific point on the electric grid. In PJM, LMP is composed of three components: the system energy price, the transmission marginal congestion price, and the marginal loss price. Both the Day-Ahead and Real-Time Energy Markets are based on supply offers and demand bids submitted to PJM by market participants, including both generator owners (as sellers) and load serving entities (as buyers).

The Day-Ahead Energy Market provides a means for market participants to mitigate their exposure to price risk in the Real-Time Energy Market. The Day-Ahead Energy Market also provides meaningful information to PJM regarding expected real-time operating conditions for the next day, which enhances PJM's ability to ensure reliable operation of the transmission system. The Real-Time Energy Market functions as a balancing market between generation and load in real-time. Through the PJM Energy Market and the LMP price signals, PJM provides a market-based solution to value and thus manages energy production,

| 1 | | transmission congestion, and marginal losses in the PJM region. PJM also |
|----|----|--|
| 2 | | operates, and Duke Energy Kentucky participates in the ASM. Ancillary services |
| 3 | | include: |
| 4 | | • Synchronized Reserves, which provide energy during an unexpected |
| 5 | | period of need; |
| 6 | | • Non-Synchronized Reserves, which also provide energy during an |
| 7 | | unexpected period of need, but which are typically off-line; |
| 8 | | • Regulating Reserves, which are utilized to manage short-term changes |
| 9 | | in energy requirements; |
| 10 | | • Day-Ahead Scheduling Reserves, a 30-minute day-ahead reserve |
| 11 | | product; |
| 12 | | • Black Start Service, which provides energy to the grid in the event of a |
| 13 | | black out condition; and |
| 14 | | • Reactive Supply and Voltage Control, which is produced by capacitors |
| 15 | | and generators and absorbed by reactors and other inductive devices. |
| 16 | | Synchronized, Non-Synchronized, Regulating, and Day-Ahead Scheduling |
| 17 | | Reserves are co-optimized with the PJM Energy Market to minimize overall |
| 18 | | production costs across the PJM footprint. |
| 19 | Q. | PLEASE EXPLAIN HOW PJM DISPATCHES GENERATING |
| 20 | | RESOURCES TO MEET DEMAND. |
| 21 | A. | PJM performs a security constrained economic commitment and least-cost |
| 22 | | security constrained economic dispatch process that simultaneously optimizes |
| 23 | | energy and reserves for all generation in its footprint in determining which |

| additional assets to commit and dispatch. This process considers the various, |
|---|
| unique challenges faced in reliably and economically supplying power to all load |
| across its footprint, most significantly aligning the production of energy |
| simultaneously with the volatility in demand within the capability of the |
| transmission network. PJM must continually act to account for the fact that |
| customer demand is dynamic in nature, fluctuating over the course of a hour, day, |
| week, and season, while analyzing factors such as costs, unit availability, and |
| operating characteristics of generation from different types of units within its |
| entire footprint and expected and unexpected conditions on the transmission |
| network that affect which generation units can be used to serve load economically |
| and reliably given the numerous constraints that must be considered. Because of |
| these challenges, PJM's dispatch process "is designed to be an optimization |
| processso that a reliable supply of electricity at the lowest cost possible under |
| the conditions prevailing in each dispatch time interval can be delivered." |

Importantly, PJM's decisions as to which generating units should be dispatched are not made exclusively based on the individual unit's cost. Although the price of energy at a generating unit is certainly important, PJM's dispatch process must consider several factors, including system-wide reliability, transmission grid congestion and losses, and numerous operational conditions. PJM has access to complete information regarding the operation of its Day-Ahead and Real-Time Energy Markets in making the determination to commit and dispatch a unit. Because of the efficient and informed nature of PJM's dispatch

¹ FERC Docket AD05-13-000, Report on Security Constrained Economic Dispatch by the Joint Board of PJM/MISO Region, Attachment 1, at pg. 5 (May 24, 2006).

| 1 | methodology, a utility's energy purchases in PJM's Day-Ahead and Real-Time |
|---|--|
| 2 | Energy Markets are efficient and economic means available to satisfy customer |
| 3 | load. Stated another way, energy acquired by all load serving entities from PJM is |
| 1 | necessarily, and by definition, purchased on an economic dispatch basis. |

5 Q. PLEASE BRIEFLY EXPLAIN HOW DUKE ENERGY KENTUCKY'S
6 CURRENT GENERATION PORTFOLIO PARTICIPATES AND IS
7 DISPATCHED IN THE DAY-AHEAD AND REAL-TIME ENERGY
8 MARKETS.

23

A.

Under the terms of PJM's RAA, as a FRR entity and generation owner in PJM, Duke Energy Kentucky is under a must-offer requirement to offer its generation committed to the FRR plan into the Day-Ahead Energy Market. Duke Energy Kentucky offers its units to PJM's Energy Market and ASM for commitment and dispatch purposes based on variable production costs used for the calculation of incremental cost, no-load cost, and startup cost. These costs are comprised of the market price of fuel and emissions plus variable operation and maintenance costs. The generating units are offered with designations including Must Run, Economic, Emergency, and Unavailable. Units offered with a Must Run status will clear the market and are available for dispatch between the unit's economic minimum and economic maximum load. Units will be dispatched down or at minimum load during periods when the marginal cost of the unit is above the LMP solved by the dispatch model or will be dispatched up or at full load during periods when the marginal cost of the unit is below the LMP solved by the dispatch model. Economic status units generally are committed if their "all in"

costs, including startup costs, are economic across the following day or during periods of the following day. Emergency status units can be committed during an energy emergency event. Unavailable status units will not be considered by the commitment and dispatch model.

Q. HOW DOES DUKE ENERGY KENTUCKY'S GENERATION COMPETE

IN THE PJM ENERGY MARKET?

A.

In the Day-Ahead and Real-Time Energy Markets, East Bend historically competed favorably in the PJM market. However, while it still remains mostly economic, in recent times there have been periods when the unit was uneconomic to operate and was placed in reserve shutdown status. During reserve shutdown periods, the summation of the variable costs to run the unit are generally expected to be greater than the energy and ancillary service revenues received from the market. This occurred during 57 days at the beginning of the COVID pandemic during the 2nd quarter of 2020. Additionally, there have been few instances since that time when, due to market conditions, reserve shutdown again occurred.

The Company's six natural gas-fired combustion turbines at Woodsdale station, which operate as peaking units, continue to see limited dispatch within the PJM energy markets. These units, however, may clear the energy market for ancillary services such as Day-Ahead Planning Reserves and may not actually be turned on-line. Thus, it is possible for the units to provide value to the Kentucky customer and PJM without being on-line. PJM reimburses service providers such as Duke Energy Kentucky for black start and reactive services. Woodsdale is

- currently a black start unit in the Company's black start plan and thus two of the units are reimbursed for certain costs to provide black start service to PJM.
- 3 Q. DOES DUKE ENERGY KENTUCKY'S MODELING AND FORECASTS
- 4 INDICATE EAST BEND WILL CONTINUE TO EXPERIENCE PERIODS
- 5 WHERE EAST BEND IS UNECONOMIC IN THE PJM ENERGY
- 6 **MARKETS?**
- 7 A. Yes. The Company's dispatch models are forecasting more instances of reserve 8 shutdown in the future. This likelihood of reserve shutdown modeling appears in 9 both shorter-term models that look out up to 5-years and in longer term resource 10 planning models. Both models are showing a declining net capacity factor at East 11 Bend. While environmental factors may be an additional headwind towards East 12 Bend's economics in the future, it is not a primary driver of the expected 13 continuation of reserve shutdown status. Rather, the primary driver is simply that 14 the variable cost of the unit as compared to energy market revenues indicates that 15 East Bend is expected to have difficulties competing in Energy Markets in the future. As a result of these incredibly low capacity factors, the Company is 16 17 modeling that East Bend should be retired in 2035 as it is simply no longer being 18 regularly dispatched in the Energy Markets. Company witness Scott Park 19 discusses the economics of East Bend and its eventual retirement in his testimony.
- 20 Q. PLEASE EXPLAIN THE CAPACITY PERFORMANCE CONSTRUCT
 21 WITHIN THE PJM CAPACITY MARKETS.
- A. In an effort to improve the reliability of generating resources in the PJM footprint,

 PJM re-designed the capacity market with the "Capacity Performance" construct.

| In doing so, PJM defined its capacity products with performance-based incentives |
|--|
| and assessments for non-performance. With Capacity Performance, PJM adopted |
| a "no-excuses" policy to improve reliability. Complying capacity performance |
| resources must be capable of sustained, predictable operation that provides energy |
| and reserves during performance assessment hours throughout the Delivery Year. |
| Performance assessment hours will be determined in real-time based on system |
| conditions. They are not pre-determined but are anticipated to occur during |
| seasonal peak periods. Resources are subject to non-performance assessments |
| during emergency conditions throughout the entire Delivery Year. Resources are |
| required to be available to PJM during periods of high load demand or system |
| emergency or face substantial non-performance assessments. Conversely, over- |
| performance is rewarded with performance-based bonuses. |

A.

13 Q. HOW WOULD YOU CLASSIFY THE CURRENT DUKE ENERGY 14 KENTUCKY RESOURCES IN TERMS OF PJM CAPACITY 15 PERFORMANCE COMPLIANCE AND RESPONSE?

PJM Capacity Performance compliance does not have a strict or bright line set of guidelines to determine whether or not it complies. The best a utility can do is manage the risks and make appropriate and prudent investments to maintain and if possible, enhance the reliability of its assets to reduce the likelihood of the asset not being able to perform when called upon during a PJM-determined event. That said, there are some minimum strategies that Duke Energy Kentucky can take in terms of ensuring there is a reliable source of fuel and maintaining regular and proactive maintenance schedules and activities.

| 1 | In my opinion, East Bend meets the minimum requirements of a Capacity | | | | | | |
|--------------|---|--|--|--|--|--|--|
| 2 | Performance resource in that it is a coal-fired facility that maintains a significant | | | | | | |
| 3 | reserve of fuel stored on-site. The Company is taking proactive steps to invest in | | | | | | |
| 4 | the maintenance of East Bend through "asset hardening" strategies designed to | | | | | | |
| 5 | reduce the possibility and likelihood of forced outages. Additionally, the | | | | | | |
| 6 | Woodsdale facility also meets minimum Capacity Performance requirements due | | | | | | |
| 7 | to the Company's addition of dual fuel. | | | | | | |
| 8 Q. | PLEASE EXPLAIN POTENTIAL IMPACTS TO THE COMPANY AND | | | | | | |
| 9 | CUSTOMERS OF CAPACITY PERFORMANCE. | | | | | | |
| 10 A. | The generation assets that the Company has invested in are sound and | | | | | | |
| 11 | dependable. Duke Energy Kentucky continues to invest in and maintain these | | | | | | |
| 12 | assets so that they remain reliable resources and continue to provide benefits to | | | | | | |
| 13 | Duke Energy Kentucky's customers. These investments will include capital | | | | | | |
| 14 | expenditures to ensure generation unit availability, as well as potential upgrades at | | | | | | |
| 15 | generation stations designed to mitigate, to the greatest extent possible, exposure | | | | | | |
| 16 | to the significant assessments for non-performance. | | | | | | |
| 17 Q. | ARE YOU AWARE OF ANY CHANGES TO THE WHOLESALE | | | | | | |
| 18 | ELECTRIC POWER MARKETS THAT ARE ANTICIPATED TO OCCUR | | | | | | |
| 19 | IN THE FUTURE THAT COULD AFFECT DUKE ENERGY | | | | | | |
| 20 | KENTUCKY'S POWER PROCUREMENT PRACTICES. | | | | | | |
| 21 A. | From a macro level perspective, the Company believes that the energy and | | | | | | |

electricity sector continues to go through an extraordinary period of change. This

change is primarily driven by shifts in load growth patterns, commodity price

22

23

| relationships, the move towards sustainable generation, and increasing regulatory |
|---|
| uncertainty. |

Although the Company believes that the PJM energy markets will continue to function as they do today, wholesale energy and capacity price volatility have and will likely continue to experience upward pressure in the short term. Drivers behind this increased volatility include effects from commodity pricing impacts from world events such as the war in Ukraine, US natural gas and coal exports, new environmental regulations as they become effective, trends towards a more renewable and efficient generation mix, and structural market changes implemented by PJM. As coal-fired generation continues to retire, the natural gas and intermittent resources connecting to the grid, both in front of and behind the meter, drive potential impacts on how grid operators will reliably meet demands, and the investments that will be required in energy resources and grid infrastructure and modernization. It remains to be seen what extent the current federal administration will have on the arc of environmental regulation; but that uncertainty itself will be a challenge to utilities such as Duke Energy Kentucky.

17 Q. PLEASE EXPLAIN WHAT CHANGES TO COAL GENERATION 18 CAPACITY HAS OCCURRED AND IS EXPECTED TO CONTINUE TO 19 OCCUR IN PJM?

- A. According to the PJM Independent Market Monitor, Monitoring Analytics, LLC

 State of the Market Report for the third quarter of 2022:
 - 40,617.1 MW of coal has retired or will retire in PJM between the years of 2011 and 2024.

| 1 | • | As o | of | 9/30/2022, | the | PJM | total | installed | generating | capacity | is |
|---|---|------|-----|------------|-----|-----|-------|-----------|------------|----------|----|
| 2 | | 196, | 245 | 5.9 MW | | | | | | | |

 Coal comprises 23.6 percent of this installed generating unit capacity, or 44,332 MW.²

5 Q. IS PJM FORECASTING CHANGES TO COAL GENERATION

CAPACITY IN ITS MARKETS?

3

4

6

7 A. Yes. According to the October 19, 2022, report by PJM titled "Managing the 8 Energy Transition: Coordinating Environmental Policy & Regulation With Grid 9 Reliability", PJM forecasts that 32,000 MW of capacity is projected to retire 10 between now and 2035 and 37,000 MW of capacity to retire between now and 2045.3 This is due to numerous policy factors, including Coal Combustion 11 Residuals, Cross-State Air Pollution Rule, EPA Effluent Limitation Guidelines, 12 and other state or company specific reasons. By examining the reasons listed in 13 14 the legend, approximately 16,000 MW of the generation expected to retire by 2035 from these policies alone, not including other potential reasons such as 15 16 economic reasons, are coal-fired generating units. These policy type retirements 17 coupled with economic retirements will likely impact a large portion of the 18 remaining coal generation in PJM. Finally, this report also indicates that no new 19 coal-fired capacity is present in PJM's interconnection queue as of September 20, $2022.^{4}$ 20

 $^{^{2} \}underline{\text{https://www.monitoringanalytics.com/reports/PJM_State_of_the_Market/2022/2022q3-som-pjm.pdf} \\ (Pages 73-74)$

⁴ *Id.* pp. 9-12.

1 Q. HOW WILL THE LOW-CAPACITY FACTOR FORECASTED BY 2 COMPANY MODELS FOR EAST BEND IN THE LATE 2020'S IMPACT

ITS OPERATION IN PJM?

A.

There are several factors that are negatively impacted when a large coal unit such as East Bend has a prolonged period of low usage. First, due to the nature of East Bend currently suppling a substantial amount of low-cost energy for the customer, when the unit operates with a low-capacity factor, an overreliance of PJM purchased energy typically results. Although this can work well for the customer during periods of low power prices such as during the 2nd quarter of 2020 at the start of the COVID pandemic, having a large reliance on purchased energy can lead to higher energy costs and price volatility for customers due to purchased power price volatility, resulting inefficiencies in unit commitment, additional cycling wear and tear due to additional unit startups, and resulting other impacts from this additional maintenance. This can lead to not only higher immediate customer energy costs, but higher customer costs in the longer term due to a higher calculated forced outage rate (EFOR).

The EFOR of a unit in PJM is important for two reasons; the first being that a unit that has a forced outage or derate during times of higher power prices is replaced either by a more expensive unit or more expensive PJM purchased energy (immediate impact) and the second being the impact of higher EFOR on a units Unforced Capacity (UCAP) and therefore its capacity value (longer term impact). The higher EFOR translates directly into a lower UCAP and therefore less capacity for the Company to use to satisfy its FRR Plan, and/or less capacity

| 1 | availa | ble | to mon | etize | in the | RPM | capacity | au | ictio | ons. A | Additiona | ılly, | when | a uni | t in |

3 performance penalties for the time that it takes to re-start the unit.

A.

4 Q. CONSIDERING THE CHANGES IN THE WHOLESALE PJM 5 MARKETS, INCLUDING BOTH POTENTIAL RISKS AND REWARDS, 6 DO YOU BELIEVE DUKE ENERGY KENTUCKY'S CUSTOMERS

STILL BENEFIT FROM THE COMPANY'S MEMBERSHIP IN PJM?

Yes. Duke Energy Kentucky's customers benefit significantly from PJM's centrally dispatched RTO construct. PJM dispatches generation in broad consideration of total RTO cost minimization, the benefits of which are directly passed to customers in the form of energy alternatives to owned generation. The approximately 180,000 MWs of generating capacity in PJM's footprint provides a significant benefit in terms of reliability and provides Duke Energy Kentucky with access to the most efficient generation providing energy. Further, these markets maximize the opportunity for non-native sales from the Company's generation, the majority of the proceeds flow back to Duke Energy Kentucky's customers through a credit on their bills. PJM's focus is on maintaining and improving reliability across its entire system, which directly translates to more efficient and reliable access to electric resources to serve Duke Energy Kentucky's customers.

III. <u>INFORMATION SPONSORED BY WITNESS</u>

| 1 | Q. | PLEASE DESCRIBE FR 16(7)(h)(7). |
|----|----|--|
| 2 | A. | FR 16(7)(h)(7) provides Duke Energy Kentucky's generation mix for the |
| 3 | | forecasted years of 2022 through 2024 and it is projected to be approximately 99 |
| 4 | | percent coal and 1 percent gas/oil for each year. |
| 5 | Q. | DID YOU PROVIDE ANY INFORMATION TO MR. CARPENTER FOR |
| 6 | | HIS USE IN DEVELOPING THE FORECASTED FINANCIAL DATA? |
| 7 | A. | Yes. I supplied Mr. Carpenter with information for the forecasted portion of the |
| 8 | | base period, consisting of the six months ending February 28, 2023, and for the |
| 9 | | forecasted test period, consisting of the twelve months ending June 30, 2024. I |
| 10 | | provided Mr. Carpenter with certain production costs and revenues such as fuel |
| 11 | | costs, emission allowances costs and purchased power costs, and revenue derived |
| 12 | | from off-system sales, after applying the off-system sales sharing mechanism. |
| 13 | | I also provided Mr. Carpenter with the projected account balances, for his |
| 14 | | use in preparing the balance sheet, and for the forecasted test period for the |
| 15 | | following items: emission allowances, coal, oil, gas and materials and supplies. I |
| 16 | | obtained this information from historic trends and adjustments for expected |
| 17 | | changes forecasted within the GenTrader® Model run. |
| | | IV. <u>CONCLUSION</u> |
| 18 | Q. | WAS ATTACHMENT JDS-1 PREPARED BY YOU OR AT YOUR |
| 19 | | DIRECTION AND UNDER YOUR CONTROL? |

20

A.

Yes.

- 1 Q. WAS FR 16(7)(h)(7), THE INFORMATION SUPPLIED TO MR.
- 2 CARPENTER PREPARED BY YOU OR UNDER YOUR SUPERVISION?
- 3 A. Yes.
- 4 Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?
- 5 A. Yes.

DIRECT TESTIMONY OF

DANIELLE L. WEATHERSTON

ON BEHALF OF

DUKE ENERGY KENTUCKY, INC.

TABLE OF CONTENTS

| | | PAGE |
|------|--|-------------|
| I. | INTRODUCTION AND PURPOSE | 1 |
| II. | OVERVIEW OF DUKE ENERGY KENTUCKY'S ACCOUNTING RECORDS | 2 |
| III. | ACCOUNTING TREATMENT | 4 |
| IV. | SCHEDULES AND FILING REQUIREMENTS SPONSORED BY WITNESS | 9 |
| V. | CONCLUSION | 12 |

I. <u>INTRODUCTION AND PURPOSE</u>

| 1 | O. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
|---|----|--|
| _ | v. | TEDIOL STITLE TOCKTONIC IN 12 DOST 1200 HDD 14200. |

- 2 A. My name is Danielle L. Weatherston and my business address is 526 S. Church
- 3 Street, Charlotte, North Carolina 28202.

4 Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

- 5 A. I am employed by Duke Energy Business Services LLC (DEBS), as Manager
- 6 Accounting II. DEBS provides various administrative and other services to Duke
- 7 Energy Kentucky, Inc., (Duke Energy Kentucky or Company) and other affiliated
- 8 companies of Duke Energy Corporation (Duke Energy).
- 9 Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND
- 10 **PROFESSIONAL EXPERIENCE.**
- 11 A. I graduated from Indiana State University with a Bachelor of Science in Accounting
- and from Ball State University with a Master of Arts in Business Education. I am
- also a certified public accountant in Indiana. I have held various accounting roles
- at Sony Disc Manufacturing and Hill-Rom in Indiana, prior to joining Duke Energy.
- 15 At Duke Energy I have worked in various groups such as corporate accounting,
- regulated accounting, and commercial power before accepting my current role as
- 17 Manager Accounting II in Charlotte.
- 18 Q. PLEASE DESCRIBE YOUR RESPONSIBILITIES AS MANAGER
- 19 **ACCOUNTING II.**
- 20 A. I am responsible for maintaining the books of account and reporting the financial
- 21 position and the results of electric operations for Duke Energy's public utility
- operating companies in Kentucky and Ohio.

| 1 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY |
|----|----|--|
| 2 | | PUBLIC SERVICE COMMISSION? |
| 3 | A. | Yes. |
| 4 | Q. | WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY IN THIS |
| 5 | | PROCEEDING? |
| 6 | A. | My testimony in this proceeding addresses the various capital and operating |
| 7 | | expenditures and accounting adjustments to Duke Energy Kentucky's books of |
| 8 | | account in support of Duke Energy Kentucky's application in this proceeding. I |
| 9 | | discuss the accounting treatment being requested in this proceeding for three |
| 10 | | categories of regulatory assets/liabilities as I will discuss further in my testimony. |
| 11 | | I sponsor the historical data in Schedule B-8 provided in satisfaction of Filing |
| 12 | | Requirement FR 16(8)(b); and Filing Requirements FR 12(2)(i), FR 16(7)(i), FR |
| 13 | | 16(7)(k), FR 16(7)(m), FR 16(7)(n), FR 16(7)(o), FR 16(7)(p), and FR 16(7)(q). |
| 14 | | Finally, I also sponsor the historical data on Schedules I-1 through I-5 in response |
| 15 | | to FR 16(8)(i), and Schedule K in response to FR 16(8)(k). |
| | | II. OVERVIEW OF DUKE ENERGY KENTUCKY'S ACCOUNTING RECORDS |
| 16 | Q. | ARE YOU FAMILIAR WITH THE ACCOUNTING PROCEDURES AND |
| 17 | | BOOKS OF ACCOUNT OF DUKE ENERGY KENTUCKY? |
| 18 | A. | Yes. The books of account for Duke Energy Kentucky's regulated business follow |
| 19 | | the Uniform System of Accounts prescribed by the Federal Energy Regulatory |
| 20 | | Commission (FERC). |

| 1 | Q. | ARE THE BOOKS OF ACCOUNT FOR THE ELECTRIC BUSINESS OF |
|----|----|--|
| 2 | | DUKE ENERGY KENTUCKY PREPARED AT YOUR DIRECTION AND |
| 3 | | UNDER YOUR SUPERVISION? |
| 4 | A. | Yes. |
| 5 | Q. | ARE THE CAPITAL AND OPERATING EXPENDITURES |
| 6 | | REPRESENTED ON DUKE ENERGY KENTUCKY'S BOOKS OF |
| 7 | | ACCOUNT ACCURATE AND REASONABLE? |
| 8 | A. | Yes. Duke Energy Kentucky has various budgeting, planning, and review |
| 9 | | procedures in place to establish and monitor the capital and operating budgets, as |
| 10 | | well as actual expenditures. The system of internal accounting controls provides |
| 11 | | reasonable assurance that all transactions are executed in accordance with |
| 12 | | management's authorization and are recorded properly. |
| 13 | | The system of internal accounting controls is annually reviewed, tested, and |
| 14 | | documented by Duke Energy Kentucky to provide reasonable assurance that |
| 15 | | amounts recorded on the books and records of the Company are accurate and |
| 16 | | proper. In addition, independent certified public accountants perform an annual |
| 17 | | audit to provide assurance that internal accounting controls are operating |
| 18 | | effectively and that Duke Energy Kentucky's financial statements are materially |
| 19 | | accurate. |

III. ACCOUNTING TREATMENT

| 1 | Q. | PLEASE BRIEFLY DESCRIBE THE ACCOUNTING TREATMENT FOR |
|---|----|--|
| 2 | | THE COMPANY'S SALE OF RECEIVABLES. |

A.

Duke Energy Kentucky sells on a revolving basis certain accounts receivable arising from the sale of electricity, natural gas and related services to Cinergy Receivables Company (CRC). These receivables are both billed and unbilled. These receivables are sold at a discount and without recourse. Duke Energy Kentucky witness Christopher Bauer discusses how the Company uses the sale of receivable process as an alternative to long-term borrowing.

CRC borrowed amounts under a credit facility to buy the initial pool of receivables from the Company. Borrowing availability from the credit facility is limited to the amount of qualified receivables sold to CRC, which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. When the amount of qualified receivables exceeds the credit facility limit, no additional funds are received by Duke Energy Kentucky. For any month in which the amount of qualified receivables is less than the credit facility limit, Duke Energy Kentucky funds a repayment of the outstanding CRC loan based on its pro rata share of the deficiency based on outstanding receivables. In subsequent months when the amount of qualified receivables meets or exceeds the credit facility limit, Duke Energy Kentucky receives proceeds up to its pro rata share of the credit facility limit based on outstanding receivables. Duke Energy Kentucky services these receivables and receives a collection fee monthly.

To summarize the process, when the Company sells receivables to CRC, Duke Energy Kentucky debits a receivable from CRC (Account 145) and credits

| the retail customer accounts receivable account (Account 142). No cash is receivable | vec |
|--|-----|
| from CRC at this time for those receivables, other than in the instances describ | bec |
| in the above paragraph. When the cash is received from retail customers | for |
| payment of their balance, the Company records a debit to cash and a credit to | the |
| receivable from CRC (Account 145). | |

Q. PLEASE BRIEFLY DESCRIBE THE ACCOUNTING TREATMENT THE COMPANY IS REQUESTING IN THIS PROCEEDING IN RELATION TO

REGULATORY ASSETS.

A.

As part of this proceeding, Duke Energy Kentucky is seeking Commission authorization to create a rate recovery mechanism for any remaining net book value of its East Bend and Woodsdale generating stations that may remain on the books and records at the end of its useful life, the Generation Asset True-Up Mechanism (Rider GTM). If approved by the Commission, the Company will create a regulatory asset at the time of retirement. As Company witness Sarah E. Lawler discusses, the Company is proposing to recover a return on and of this regulatory asset through this new Rider GTM over a ten-year period upon retirement of the generating assets. The return would be calculated at the weighted average cost of capital (WACC) approved in the Company's most recent electric base rate case. The Company would begin amortization of this regulatory asset at the time the Rider GTM becomes effective in rates.

A second regulatory asset is being requested in conjunction with the Electric Vehicle Site Make Ready Service program (Rate MRC). Rate MRC is intended to encourage adoption of electric vehicles (EV's) and EV charging by offering credits to customers to assist them with the expenses for the make ready infrastructure needs

associated with EV's. As Ms. Lawler discusses in her testimony, the Company requests approval to establish a regulatory asset for these credits. The Company is also seeking approval to record carrying costs at the cost of debt approved in this proceeding. Recovery of this regulatory asset would be requested in a future proceeding.

A.

A third regulatory asset is being requested to defer any lost revenues associated with the Company's new proposed time of use rate for residential customers, Rate RS-TOU-CPP. Company witness Bruce L. Sailers discusses this new rate proposal in his testimony. Recovery of this regulatory asset would be requested in a future proceeding.

In addition to the request for regulatory asset treatment for these items, Duke Energy Kentucky will continue recording deferrals and amortization, per normal regulatory accounting standards, for previously approved deferral mechanisms, as well as its various riders that are subject to being trued-up. Over- or under-recovery of costs are flowed through riders such as the fuel adjustment clause, environmental surcharge, demand-side management and the profit sharing mechanism and, therefore, the Company records the amounts to be trued-up in future periods as regulatory assets or regulatory liabilities.

Q. WHY IS IT APPROPRIATE TO CREATE A REGULATORY ASSET ASSOCIATED WITH THE RIDER GTM?

The Commission has exercised its discretion to approve regulatory assets where a utility has incurred: (1) an extraordinary, nonrecurring expense which could not have reasonably been anticipated or included in the utility's planning; (2) an expense resulting from a statutory or administrative directive; (3) an expense in

| 1 | | relation to an industry sponsored initiative; or (4) an extraordinary or nonrecurring |
|----|----|--|
| 2 | | expense that over time will result in a saving that fully offsets the costs. |
| 3 | | The costs for which the Company is seeking to create the regulatory deferral |
| 4 | | for remaining net book value of the generating assets at the time of its retirement |
| 5 | | would constitute a nonrecurring expense that could not be included in the utility's |
| 6 | | planning and an expense resulting from an administrative directive. Additionally, |
| 7 | | to the extent the Company has undepreciated plant on its books at the time of |
| 8 | | retirement, it is because the Company's rates, as approved by the Commission (an |
| 9 | | administrative directive), were not sufficient to fully recover the costs of the station |
| 10 | | during its service life. |
| 11 | Q. | PLEASE DESCRIBE THE ACCOUNTING/JOURNAL ENTRIES THAT |
| 12 | | WILL BE USED TO CREATE THIS REGULATORY ASSET. |
| 13 | A. | Any remaining net book value of East Bend or Woodsdale at the time of its |
| 14 | | retirement, would be placed into a regulatory asset. The Company would debit a |
| 15 | | regulatory asset and credit various plant accounts, for example: |
| 16 | | Debit Account 182.3 |
| 17 | | Debit Account 108 |
| 18 | | Credit Account 101 |
| 19 | Q. | WHY IS IT APPROPRIATE TO CREATE A REGULATORY ASSET |
| 20 | | ASSOCIATED WITH THE PROPOSED RATE MRC? |
| 21 | A. | As I mentioned above, the Commission has exercised its discretion to approve |
| 22 | | regulatory assets where a utility has incurred: (1) an extraordinary, nonrecurring |
| 23 | | expense which could not have reasonably been anticipated or included in the |
| | | |

utility's planning; (2) an expense resulting from a statutory or administrative

24

| 1 | directive; (3) an expense in relation to an industry sponsored initiative; or (4) an |
|---|--|
| 2 | extraordinary or nonrecurring expense that over time will result in a saving that |
| 3 | fully offsets the costs. |
| | |

The costs for which the Company is seeking to create this regulatory deferral constitute an expense in relation to an industry sponsored initiative and is in support of a statutory directive to expand the electrification of vehicles across the country. Company witness Cormack C. Gordon discusses the need for this program as it relates to the Infrastructure Investment & Jobs Act (IIJA).

9 Q. PLEASE DESCRIBE THE ACCOUNTING/JOURNAL ENTRIES THAT 10 WILL BE USED TO CREATE THIS REGULATORY ASSET.

A. The costs will be placed into a regulatory asset. The Company would debit a regulatory asset and credit accounts payable, for example:

Debit Account 182.3

14 Credit Account 232

A.

15 Q. WHY IS IT APPROPRIATE TO CREATE A REGULATORY ASSET FOR 16 RATE RS-TOU-CPP POTENTIAL LOST REVENUES?

As explained by Mr. Sailers, the regulatory asset for the RS-TOU is for potential lost revenues that may occur as a result of this program. Again, the Commission has exercised its discretion to approve regulatory assets where a utility has incurred: (1) an extraordinary, nonrecurring expense which could not have reasonably been anticipated or included in the utility's planning; (2) an expense resulting from a statutory or administrative directive; (3) an expense in relation to an industry sponsored initiative; or (4) an extraordinary or nonrecurring expense that over time will result in a saving that fully offsets the costs.

| | The costs for which the Company is seeking to create this regulatory |
|----|--|
| | deferral constitute an extraordinary, nonrecurring expense which could not have |
| | reasonably been anticipated or included in the utility's planning expense and are in |
| | response to an industry sponsored initiative and statutory directive. By including |
| | the deferral mechanism for potential lost revenue recovery instead of imputing an |
| | estimated revenue adjustment (increase) to base rates in this case, customers will |
| | not experience an estimated and speculative increase related to this program at this |
| | time. The Company will, in a future rate case, seek to recover the actual lost |
| | revenues with the program, if any, through an amortization process. Additionally, |
| | as this program will support EV charging for residential customers in accordance |
| | with the IIJA, this deferral is also supported as an industry sponsored initiative and |
| | in response to a statutory directive. Mr. Sailers discusses how the introduction of |
| | this new rate will assist consumers who are interested in EV and solar adoption. |
| Q. | PLEASE DESCRIBE THE ACCOUNTING/JOURNAL ENTRIES THAT |
| | WILL BE USED TO CREATE THIS REGULATORY ASSET. |
| A. | The costs will be placed into a regulatory asset. The Company would debit a |
| | regulatory asset and credit a regulatory credit, for example: |
| | Debit Account 182.3 |
| | Credit Account 407.4 |
| | IV. SCHEDULES AND FILING REQUIREMENTS SPONSORED BY WITNESS |
| Q. | PLEASE DESCRIBE SCHEDULE B-8. |
| A. | Schedule B-8 contains the Comparative Balance Sheets for Duke Energy Kentucky |

for the most recent five calendar years, the base period and the forecasted period.

- 1 Q. PLEASE DESCRIBE FR 12(2)(i).
- 2 A. FR 12(2)(i) consists of Duke Energy Kentucky's detailed income statement and
- 3 balance sheet for the period ended September 30, 2022.
- 4 Q. PLEASE DESCRIBE FR 16(7)(i).
- 5 A. FR 16(7)(i) consists of the Company's most recent Federal Energy Regulatory
- 6 Commission (FERC) audit report, reporting the results of the Company's last FERC
- 7 audit.
- 8 Q. PLEASE DESCRIBE FR 16(7)(k).
- 9 A. FR 16(7)(k) consists of Duke Energy Kentucky's most recent FERC Form 1 and
- FERC Form 2.
- 11 Q. PLEASE DESCRIBE FR 16(7)(m).
- 12 A. FR 16(7)(m) consists of Duke Energy Kentucky's current chart of accounts.
- 13 Q. PLEASE DESCRIBE FR 16(7)(n).
- 14 A. FR 16(7)(n) consists of the latest twelve months of the monthly management
- reports providing financial results of the Company's operations in comparison to
- the forecast.
- 17 Q. PLEASE DESCRIBE FR 16(7)(o).
- 18 A. FR 16(7)(o) consists of management's monthly budget variance reports for Duke
- 19 Energy Kentucky electric operations.
- 20 Q. PLEASE DESCRIBE FR 16(7)(p).
- A. FR 16(7)(p) consists of Duke Energy Kentucky's most recent Form 10-K and Form
- 22 8-K as well as those forms for the last two years. Additionally, the Company is
- submitting copies of its Form 10-Qs that were filed during the past six quarters.

- 1 Q. PLEASE DESCRIBE FR 16(7)(q).
- 2 A. FR 16(7)(q) consists of the independent auditor's annual opinion report for Duke
- 3 Energy Kentucky. The auditor did not note any material weaknesses in internal
- 4 controls.
- 5 Q. PLEASE DESCRIBE THE INFORMATION YOU SUPPORT IN
- 6 RESPONSE TO FR 16(8)(i), SCHEDULES I-1 THROUGH I-5.
- 7 A. Schedule I-1 contains comparative income statements for the Company. Schedules
- 8 I-2.1 through I-5 contains comparative revenue and sales statistical information as
- 9 required by the Commission's filing requirements. I support the historic
- information contained on these schedules.
- 11 Q. PLEASE DESCRIBE THE INFORMATION YOU SUPPORT IN
- 12 RESPONSE TO FR 16(8)(k), THE "K" SCHEDULES.
- 13 A. The information I support in response to FR 16(8)(k) consists of the Capital
- 14 Structure and the Consolidated Condensed Income Statement for Duke Energy
- 15 Kentucky. I also provided the Mix of Sales schedules. I provided this information
- to Mr. Carpenter for his use in preparation of the forecast.

V. <u>CONCLUSION</u>

- 1 Q. WAS THE INFORMATION YOU SPONSORED IN SCHEDULES B-8, I-1,
- 2 I-2.1, I-3, I-4, I-5 AND K AS WELL AS FR 12(2)(i), FR 16(7)(i), FR 16(7)(k),
- 3 FR 16(7)(m), FR 16(7)(n), FR 16(7)(o), FR 16(7)(p), FR 16(7)(q), FR 16(8)(b),
- 4 FR 16(8)(i), AND FR 16(8)(k) PREPARED BY YOU OR UNDER YOUR
- 5 **DIRECTION AND SUPERVISION?**
- 6 A. Yes.
- 7 Q. IS THE INFORMATION YOU SPONSORED IN THOSE SCHEDULES
- 8 AND FILING REQUIREMENTS ACCURATE TO THE BEST OF YOUR
- 9 **KNOWLEDGE AND BELIEF?**
- 10 A. Yes.
- 11 Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?
- 12 A. Yes.

VERIFICATION

| STATE OF NORTH CAROLINA |) | |

I. <u>INTRODUCTION AND PURPOSE</u>

PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

1

Q.

| | _ | |
|----|----|--|
| 2 | A. | My name is James E. Ziolkowski, and my business address is 139 East Fourth |
| 3 | | Street, Cincinnati, Ohio 45202. |
| 4 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 5 | A. | I am employed by Duke Energy Business Services LLC (DEBS) as Director, |
| 6 | | Rates & Regulatory Planning. DEBS provides various administrative and other |
| 7 | | services to Duke Energy Kentucky, Inc., (Duke Energy Kentucky) and other |
| 8 | | affiliated companies of Duke Energy Corporation (Duke Energy). |
| 9 | Q. | PLEASE BRIEFLY SUMMARIZE YOUR EDUCATION AND |
| 10 | | PROFESSIONAL EXPERIENCE. |
| 11 | A. | I received a Bachelor of Science degree in Mechanical Engineering from the U.S. |
| 12 | | Naval Academy in 1979 and a Master of Business Administration degree from |
| 13 | | Miami University in 1988. I am also a licensed Professional Engineer in the state |
| 14 | | of Ohio. I received certification as a Chartered Industrial Gas Consultant in 1994 |
| 15 | | from the Institute of Gas Technology and the American Gas Association. I have |
| 16 | | attended the EUCI Cost of Service seminar. |
| 17 | | After graduating from the Naval Academy, I attended the Naval Nuclear |
| 18 | | Power School and other follow-on schools. I served as a nuclear-trained officer on |
| 19 | | various ships in the U.S. Navy through 1986. From 1988 through 1990, I worked |
| 20 | | for Mobil Oil Corporation as a Marine Marketing Representative in the New York |
| 21 | | City area. |
| 22 | | I joined The Cincinnati Gas & Electric Company n/k/a Duke Energy Ohio, |

| Inc., (Duke Energy Ohio) in 1990 as a Product Applications Engineer, in which |
|---|
| capacity I designed and managed some of Duke Energy Ohio's demand side |
| management programs, including Energy Audits and Interruptible Rates. From |
| 1996 until 1998, I was an Account Engineer and worked with large customers to |
| resolve various service-related issues, particularly in the areas of billing, |
| metering, and demand management. In 1998, I joined the Rate Department, where |
| I focused on rate design and tariff administration. I was appointed to my current |
| position in January 2014. |

9 Q. PLEASE SUMMARIZE YOUR RESPONSIBILITIES AS DIRECTOR 10 RATES & REGULATORY PLANNING.

As Director Rates & Regulatory Planning, I am responsible for cost of service studies, tariff administration, billing, and revenue reporting issues in Kentucky and Ohio. I also prepare filings to modify charges and terms in the retail tariffs of both Duke Energy Kentucky and Duke Energy Ohio, and I develop rates for new services. During major rate cases, I help with the design of the new base rates. Additionally, I frequently work with Duke Energy Kentucky's and Duke Energy Ohio's customer contact and billing personnel to answer rate-related questions, and to apply the retail tariffs to specific situations. Occasionally, I meet with customers and Company representatives to explain rates or provide rate training. I also prepare reports that are required by regulatory authorities.

Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY PUBLIC SERVICE COMMISSION?

23 A. Yes.

A.

1 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS

- 2 **PROCEEDING?**
- 3 A. I sponsor Schedules B-7, B-7.1, B-7.2, D-3, D-4, and D-5 in response to Filing
- 4 Requirement FR 16(8)(b) and FR 16(8)(d), respectively. I also support the cost of
- 5 service studies identified in response to Filing Requirement FR 16(7)(v).

II. SCHEDULES AND FILING REQUIREMENTS SPONSORED BY WITNESS

- 6 Q. PLEASE DESCRIBE SCHEDULES B-7 AND D-3.
- 7 A. These schedules report the allocation factors used to determine the jurisdictional
- 8 percentages of electric plant, expenses, etc., necessary to allocate the amount of
- 9 the proposed new electric rates between jurisdictional and non-jurisdictional
- 10 customers. These schedules indicate that 100 percent of the costs are
- 11 jurisdictional, because Duke Energy Kentucky does not provide service to any
- 12 non-jurisdictional electric customers.
- 13 Q. PLEASE DESCRIBE SCHEDULES B-7.1 AND D-4.
- 14 A. These schedules are the support for Schedules B-7 and D-3 described above. They
- provide the basis for the actual jurisdictional allocation factors.
- 16 Q. PLEASE DESCRIBE SCHEDULES B-7.2 AND D-5.
- 17 A. These schedules explain changes made to the jurisdictional allocation from the
- 18 Company's prior electric base rate proceeding in Case No. 2019-00271.
- 19 Q. PLEASE DESCRIBE FR 16(7)(v).
- A. FR 16(7)(v) contains 25 schedules: Schedules FR 16(7)(v)-1 through FR 16(7)(v)-
- 25 which represent the fully allocated, embedded cost of service study by rate
- class. I discuss these filing requirements in greater detail in my testimony below.

III. **COST OF SERVICE STUDIES**

O. WHAT IS THE PURPOSE OF A COST-OF-SERVICE STUDY?

2 A. A cost-of-service study is an analytical tool used in traditional utility rate design 3 to allocate costs to different classes of customers. When the process of preparing a 4 cost-of-service study is completed, the resulting class cost-of-service study can (1) assist in determining the revenue requirement for the services offered by a 6 utility; (2) analyze, at a very detailed level, the costs imposed on the utility's system by different classes of customers; (3) show the total costs the company 8 incurs in serving each retail rate class, as well as the rate of return on 9 capitalization earned from each class during the test year; and (4) establish cost 10 responsibility that makes it possible to determine just and reasonable rates based on costs.

12 Q. WHAT INFORMATION DID THE COMPANY USE TO DEVELOP THE

COST ALLOCATION FACTORS FOR THE COST OF SERVICE STUDIES

14 **USED IN THIS PROCEEDING?**

The test year for this proceeding is the twelve months ending June 30, 2024, which is comprised of forecasted test period data. The development of the test year allocation factors is primarily based on historical data for the twelve months ended March 2022. Otherwise, forecasted test year information was used as appropriate. I will discuss the actual development of the various allocation factors used in this proceeding later in my testimony.

5

7

11

13

15

16

17

18

19

20

Α.

| 1 | Q. | HAS THE COMPANY PREPARED MULTIPLE COSTS OF SERVICE |
|----|----|---|
| 2 | | STUDIES? |
| 3 | A. | Yes. The Company prepared three Class Cost of Service Studies that contain |
| 4 | | essentially the same data, except that different methodologies were used to develop |
| 5 | | the allocation factor for the demand component of Production-related costs. The |
| 6 | | demand allocation methods are as follows: (1) the Average of the Twelve (12) |
| 7 | | Coincident Peaks (12 CP) method; (2) the Average and Excess (A&E) method; and |
| 8 | | (3) the Production Stacking method. |
| 9 | Q. | PLEASE DESCRIBE THE DEMAND METHODOLOGIES USED IN THESE |
| 10 | | COST OF SERVICE STUDIES. |
| 11 | A. | The 12 CP method is designed to allocate capacity related costs to the customer |
| 12 | | classes using the system during maximum system load. The allocation of capacity |
| 13 | | costs to each customer class is based on the class load contribution to the maximum |
| 14 | | peak, at the time of peak, regardless of what their respective loads were at other |
| 15 | | times of the day. |
| 16 | | The A&E method, also referred to as the "used and unused capacity |
| 17 | | method," recognizes both the class average use of the system capacity and the class |
| 18 | | contribution to the capacity required to meet the maximum system load. The |
| 19 | | capacity costs are allocated in a two-part formula. Attachment JEZ-3 shows the |
| 20 | | calculation of the production allocator K201 using the A&E method. |
| 21 | | The "class-used" capacity component is the proportion of the class's |

The "class-used" capacity component is the proportion of the class's respective average hourly kilowatt-hour (kWh) sales to the total average hourly sales. The "class-unused" capacity is the class excess hourly peak demand

22

23

| contribution ratio, which is the difference between the class average hourly demands |
|--|
| and the hourly class peak demands. The used and unused capacity factors for each |
| class are combined to allocate capacity costs to the respective rate classes. |

1

2

3

4

5

6

7

8

9

The Production Stacking method is a time-differentiated method that allocates baseload plant costs on energy (kWh) and peaker plants costs on peak demands. As shown in Attachment JEZ-4, net plant associated with the East Bend plant is allocated to each rate class based on annual kWh. Net plant associated with the Woodsdale facility is allocated to each rate class based on 12 CP. The K201 production allocator combines both allocations.

10 Q. DID YOU COMPARE THE CLASS DEMAND RATIOS FOR EACH OF 11 THE DEMAND METHODOLOGIES?

- 12 A. Yes. Attachment JEZ-1 shows the demand ratios for the different methods.

 13 Attachment JEZ-2 shows the rate impacts using the different methods.
- 14 Q. BASED UPON YOUR COMPARISON OF THE 12 CP, A&E AND
 15 PRODUCTION STACKING METHODOLOGIES, WHICH DO YOU
 16 RECOMMEND THE COMMISSION APPROVE IN THIS PROCEEDING?
- I recommend using the Average 12 CP methodology for three reasons. First, the 12
 CP method is generally accepted in the utility industry and was approved by the
 Commission in the Company's last electric base rate case. The 12 CP demand
 methodology has been used in other jurisdictions including Duke Energy Indiana's
 rate proceedings. Second, this methodology recognizes that Duke Energy
 Kentucky's current generating facilities are in place precisely to meet the monthly
 maximum peak loads of customers. Third, there was no compelling reason to adopt

a new methodology. Rate subsidies will generally occur among customer classes,
regardless of the cost of service methodology used. Changing to either the A&E or
Production Stacking methodology will not change this fact. The Company believes
that the use of the 12 CP methodology is the appropriate means to align capacity
costs with the customer classes that are imposing the costs.

6 Q. PLEASE DESCRIBE THE ELECTRIC COST OF SERVICE STUDY.

A.

A.

The electric cost of service study contained in Schedules FR-16(7)(v)-1 through FR-16(7)(v)-25 is an embedded, fully allocated cost of service study by rate class for the test period ended June 30, 2024. In preparing the cost of service study, I used information provided by other Company employees. The cost of service study functionalizes, classifies, and allocates cost items such as plant investment, operating expenses, and taxes to the various customer classes and calculates the revenue responsibility of each class. Finally, the cost of service study calculates the revenue responsibility of each rate class required to generate the recommended rate of return.

16 Q. PLEASE DESCRIBE HOW THE COST OF SERVICE STUDY IS 17 ORGANIZED IN SCHEDULES FR-16(7)(v)-1 THROUGH SCHEDULE 18 FR-16(7)(v)-25.

The schedules provided in the cost of service study are organized as shown in the table below. The detailed calculation and derivation of the allocation factors utilized in the cost of service study are included in the workpapers filed in these proceedings.

| Table 1 | | | | |
|---------------|----------|------------------------------------|--|--|
| Schedule | Page No. | Description | | |
| Schedule 1 | 1 | Summary of Results | | |
| Schedule 2 | 2 | Gross Plant in Service | | |
| Schedule 3 | 3 | Depreciation Reserve | | |
| Schedule 4 | 4 | Net Electric Plant in Service | | |
| Schedule 5 | 5 | Subtractive Rate Base Adjustments | | |
| Schedule 5.1 | 6 | Additive Rate Base Adjustments | | |
| Schedule 5.2 | 7 | Working Capital | | |
| Schedule 6 | 8 | O&M Expenses | | |
| Schedule 6.1 | 9 | O&M Expenses | | |
| Schedule 7 | 10 | Depreciation Expense | | |
| Schedule 8 | 11 | Taxes Other Than Income Taxes | | |
| Schedule 9 | 12 | Federal Income Tax Based on Return | | |
| Schedule 9.1 | 13 | State Income Tax Based on Return | | |
| Schedule 10 | 14 | Cost of Service Computation | | |
| Schedule 11 | 15 | ROR, Tax Rates & Special Factors | | |
| Schedule 12 | 16 | Allocation Factors | | |
| Schedule 12.1 | 17 | Allocation Factors | | |
| Schedule 12.2 | 18 | Allocation Factors | | |

1 Q. WHAT JURISDICTIONAL RATE CLASSES WERE USED IN THE CLASS

2 **COST OF SERVICE STUDY?**

- 3 A. The cost of service is organized showing the following rate classes:
- Residential: (Rate RS);
- Secondary Distribution Small: (Rates DS, GS-FL, EH and SP);
- Secondary Distribution Large: (Rates DT);
- Primary Distribution: (Rate DT and DP);
- Transmission: (Rates TT);
- Lighting: (Rates NSU, NSP, OL, SC, SE, SL, TL and UOLS combined); and
- Other: (Flood Control Water Pumping Stations).

11 Q. WHAT ARE THE ELEMENTS OF A COST OF SERVICE STUDY?

12 A. Much like the components of the overall revenue requirement, the elements of a

1 cost of service study consist of the following elements, which are allocated to 2 each function, classification and rate class: 3 Operating & Maintenance Expense 4 + Depreciation 5 + Other Taxes 6 + Federal Income Tax 7 + State Income Tax 8 + Return (Jurisdictional Rate Base x Rate of Return (ROR)) 9 - Revenue Credits 10 = Class Revenue Requirement or Cost of Service 11 PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-1. 0. 12 Α. Schedule FR-16(7)(v)-1 is a functional cost of service study that separates the cost 13 items into the production, transmission, and distribution functions. 14 0. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-2. 15 A. Schedule FR-16(7)(v)-2 is a classified cost of service study that separates the cost 16 items contained in the production function on Schedule FR-16(7)(v)-1 between 17 the demand, energy, and customer classifications. 18 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-3. 19 A. Schedule FR-16(7)(v)-3 is an allocated cost of service study that allocates the cost 20 items contained in the production demand classification from Schedule FR-21 16(7)(v)-2 to the various rate groups. 22 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-4. 23 Schedule FR-16(7)(v)-4 is an allocated cost of service study that allocates the cost A.

- 1 items contained in the production energy classification from Schedule FR-
- 2 16(7)(v)-2 to the various rate groups.

3 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-5.

- 4 A. Schedule FR-16(7)(v)-5 is an allocated cost of service study that allocates the cost
- 5 items contained in the production customer classification from Schedule FR-
- 6 16(7)(v)-2 to the various rate groups. As is evident on the schedule, there are no
- 7 production costs classified as customer related.

8 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-6.

- 9 A. Schedule FR-16(7)(v)-6 is a classified cost of service study that separates the cost
- items contained in the transmission function on Schedule FR-16(7)(v)-1 between
- the demand, energy, and customer classifications.

12 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-7.

- 13 A. Schedule FR-16(7)(v)-7 is an allocated cost of service study that allocates the cost
- 14 items contained in the transmission demand classification from Schedule FR-
- 16(7)(v)-6 to the various rate groups.

16 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-8.

- 17 A. Schedule FR-16(7)(v)-8 is an allocated cost of service study that allocates the cost
- items contained in the transmission energy classification from Schedule FR-
- 16(7)(v)-6 to the various rate groups. As is evident on the schedule, there are no
- transmission costs classified as energy related.

21 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-9.

- 22 A. Schedule FR-16(7)(v)-9 is an allocated cost of service study that allocates the cost
- 23 items contained in the transmission customer classification from Schedule FR-

- 1 16(7)(v)-6 to the various rate groups.
- 2 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-10.
- 3 A. Schedule FR-16(7)(v)-10 is a classified cost of service study that separates the
- 4 cost items contained in the distribution function on Schedule FR-16(7)(v)-1
- 5 between the demand, energy, and customer classifications.
- 6 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-11.
- 7 A. Schedule FR-16(7)(v)-11 is an allocated cost of service study that allocates the
- 8 cost items contained in the distribution demand classification from Schedule FR-
- 9 16(7)(v)-10 to the various rate groups.
- 10 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-12.
- 11 A. Schedule FR-16(7)(v)-12 is an allocated cost of service study that allocates the
- cost items contained in the distribution energy classification from Schedule FR-
- 16(7)(v)-10 to the various rate groups. As is evident on the schedule, there are no
- distribution costs classified as energy related.
- 15 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-13.
- 16 A. Schedule FR-16(7)(v)-13 is an allocated cost of service study that allocates the
- 17 cost items contained in the distribution customer classification from Schedule FR-
- 16(7)(v)-10 to the various rate groups.
- 19 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-14.
- 20 A. Schedule FR-16(7)(v)-14 is a total class cost of service study that sums the
- 21 allocated costs from Schedules FR-16(7)(v)-3, FR-16(7)(v)-4, FR-16(7)(v)-5, FR-
- 22 16(7)(v)-7, FR-16(7)(v)-8, FR-16(7)(v)-9, FR-16(7)(v)-11, FR-16(7)(v)-12 and
- FR-16(7)(v)-13, by the various rate groups.

1 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-15.

- 2 A. Schedule FR-16(7)(v)-15 is a classified cost of service study for the residential
- 3 class that shows the allocated costs from Schedules FR-16(7)(v)-3, FR-16(7)(v)-7
- and FR-16(7)(v)-11, summarized by the demand, energy, and customer
- 5 classifications.

6 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-16.

- 7 A. Schedule FR-16(7)(v)-16 is a classified cost of service study for the Distribution
- 8 Secondary class that shows the allocated costs from Schedules FR-16(7)(v)-3,
- 9 FR-16(7)(v)-7 and FR-16(7)(v)-11, summarized by the demand, energy, and
- 10 customer classifications.

11 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-17.

- 12 A. Schedule FR-16(7)(v)-17 is a classified cost of service study for the GSFL
- Secondary class that shows the allocated costs from Schedules FR-16(7)(v)-3,
- FR-16(7)(v)-7 and FR-16(7)(v)-11, summarized by the demand, energy, and
- 15 customer classifications.

16 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-18.

- 17 A. Schedule FR-16(7)(v)-18 is a classified cost of service study for the EH
- Secondary class that shows the allocated costs from Schedules FR-16(7)(v)-3,
- FR-16(7)(v)-7 and FR-16(7)(v)-11, summarized by the demand, energy, and
- 20 customer classifications.

21 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-19.

- 22 A. Schedule FR-16(7)(v)-19 is a classified cost of service study for the SP Secondary
- class that shows the allocated costs from Schedules FR-16(7)(v)-3, FR-16(7)(v)-7

- and FR-16(7)(v)-11, summarized by the demand, energy, and customer
- 2 classifications.
- 3 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-20.
- 4 A. Schedule FR-16(7)(v)-20 is a classified cost of service study for the DT
- 5 Secondary class that shows the allocated costs from Schedules FR-16(7)(v)-3,
- 6 FR-16(7)(v)-7 and FR-16(7)(v)-11, summarized by the demand, energy, and
- 7 customer classifications.
- 8 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-21.
- 9 A. Schedule FR-16(7)(v)-21 is a classified cost of service study for the DT Primary
- 10 class that shows the allocated costs from Schedules FR-16(7)(v)-3, FR-16(7)(v)-7
- and FR-16(7)(v)-11, summarized by the demand, energy, and customer
- 12 classifications.
- 13 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-22.
- 14 A. Schedule FR-16(7)(v)-22 is a classified cost of service study for the Distribution
- Primary class that shows the allocated costs from Schedules FR-16(7)(v)-3, FR-
- 16 16(7)(v)-7 and FR-16(7)(v)-11, summarized by the demand, energy, and customer
- 17 classifications.
- 18 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-23.
- 19 A. Schedule FR-16(7)(v)-23 is a classified cost of service study for the Time-of-Day
- 20 Rate for Service at Transmission Voltage (Rate TT) class that shows the allocated
- 21 costs from Schedules FR-16(7)(v)-3, FR-16(7)(v)-7 and FR-16(7)(v)-11,
- summarized by the demand, energy, and customer classifications.

|-------------|----------------------------------|------|--------------------|

- 2 A. Schedule FR-16(7)(v)-24 is a classified cost of service study for the Lighting class
- 3 that shows the allocated costs from Schedules FR-16(7)(v)-3, FR-16(7)(v)-7 and
- FR-16(7)(v)-11, summarized by the demand, energy, and customer classifications.

5 Q. PLEASE DESCRIBE SCHEDULE FR-16(7)(v)-25.

- 6 A. Schedule FR-16(7)(v)-25 is a classified cost of service study for the Other –
- Water Pumping class that shows the allocated costs from Schedules FR-16(7)(v)-
- 8 3, FR-16(7)(v)-7 and FR-16(7)(v)-11, summarized by the demand, energy, and
- 9 customer classifications.

10 Q. HOW DID YOU DEVELOP THE COST OF SERVICE STUDY THAT

11 YOU USED TO ALLOCATE COSTS TO THE DIFFERENT RATE

12 CLASSES?

- 13 A. First, I developed various allocation factors based on customer, energy usage, and
- demand statistics for the test period. Next, I functionalized costs into the specific
- utility functions, *i.e.*, production, transmission and distribution. I then classified
- the costs as demand, energy, or customer related, or a combination in some
- instances. Lastly, I allocated the demand, energy, and customer related costs to
- rate classes based on the cost causation guidelines published in the NARUC
- 19 "Electric Utility Cost Allocation Manual," my utility company experience, and
- 20 my knowledge of cost of service studies.

A. Functionalizing Costs

21 Q. PLEASE EXPLAIN HOW YOU FUNCTIONALIZE COSTS.

22 A. The production function includes the costs associated with power generation and

power purchases and their delivery to the bulk transmission system. The transmission function consists of costs associated with the high voltage system utilized for the bulk transmission of power to and from interconnected utilities to the load centers of the utility's system. The distribution function includes the radial distribution system that connects the transmission system and the ultimate customer.

The Company's accounting records use the Uniform System of Accounts of the Federal Energy Regulatory Commission (FERC). These accounts functionalize the Company's investment into the primary categories of production (generation), transmission, distribution, and general plant. Similarly, the Company's operating costs are categorized into production, transmission, distribution, customer services, and administrative and general (A&G) functions.

B. Classifying Costs

12 Q. PLEASE EXPLAIN THE CLASSIFICATION OF COSTS.

A.

A. Next, functionalized costs are grouped according to their cost-causation characteristics. This process is known as classification of costs. Typically, these cost-causing characteristics are defined as demand-related, energy-related, or customer-related.

Q. PLEASE DEFINE DEMAND-RELATED COSTS.

Demand-related costs are fixed costs incurred regardless of the level of energy sales and have a direct relationship to the kilowatts (kW) of demand that customers place on the various segments of the system. Costs that are classified as demand-related include major portions of the Company's investment and related expenses in its production and transmission facilities and a significant portion of the investment and

- related expenses of its distribution system. Until the Company has the full ability to
 bill all customers based on demand (both from a technical and a regulatory
 perspective), the Company will continue to use fixed and kWh charges to recover
 demand related costs for some base rates.
- 5 Q. PLEASE DEFINE ENERGY-RELATED COSTS.
- A. Energy-related costs are costs incurred that vary in direct relationship to the amount of energy or kilowatt hours (kWh) generated and delivered. These costs are often referred to as variable costs. Fuel is an example of an energy-related cost.
- 9 Q. PLEASE DEFINE CUSTOMER-RELATED COSTS.
- 10 A. Customer-related costs are costs incurred primarily as a result of the number of
 11 customers being served. These fixed costs include items of investment and related
 12 expenses in functional categories such as metering, and costs associated with
 13 customer accounting and sales. Customer costs do not vary significantly with the
 14 customers' volume of usage but are influenced more by factors such as number of
 15 customers.

C. Allocation of Costs

- 16 Q. PLEASE EXPLAIN HOW COSTS ARE ALLOCATED TO VARIOUS
- 17 **CUSTOMER CLASSES.**
- A. The allocation of costs is the process of multiplying the functionalized and classified costs by allocation factors, resulting in costs being assigned to customer classes.

 Some costs are directly assignable to a single class of customers. Most costs, however, are attributable to more than one type of customer. Costs are allocated to the various customer groups in relationship to how those customers influence the

| 1 | | Company to incur the costs. This relationship is referred to as "cost causation." |
|----------|----|--|
| 2 | | Specific allocation factors are developed that relate to the demand, energy, and |
| 3 | | customer classifications identified above, to accomplish a proper matching of the |
| 4 | | costs to the customer groups, based on cost causation. |
| 5 | Q. | PLEASE DESCRIBE THE ALLOCATION METHODOLOGY YOU USED |
| 6 | | IN THIS PROCEEDING TO ALLOCATE DEMAND-RELATED COSTS. |
| 7 | A. | Each customer class' cost responsibility (i.e., the percentage of the demand related |
| 8 | | costs assigned to each customer class) is equal to the ratio of their demand in relation |
| 9 | | to the total demand placed on the system. The cost of service study supporting the |
| 10 | | Company's proposed rate design in this proceeding allocates production and |
| 11 | | transmission demand-related costs based upon the 12 monthly coincident peaks (12 |
| 12 | | CP). |
| 13 | Q. | HOW WERE THE DEMAND VALUES DEVELOPED FROM COMPANY |
| 14 | | CUSTOMER LOAD RESEARCH DATA? |
| 15 | A. | kWh sales and load research data for the twelve months ended March 31, 2022, were |
| 16 | | used to calculate the monthly peak contributions. The calculations of the monthly |
| 17 | | demands appear on pages 11 through 32 of work paper FR-16(7)(v). The following |
| 18 | | is an example of how the class group demand was calculated for rate RS for the |
| 19 | | month of January 2022. |
| 20 | | Step 1 - Determine the average demand by dividing the total kWh by the |
| | | number of hours in the month. |
| 21 | | namoer of notify in the monai. |
| 21 22 | | $150,942,818 \text{ kWh} \div 744 \text{ hours} = 202,880 \text{ kW}$ |

| 1 | | demand from Step 1 by the coincident peak load factor supplied by load |
|----|----|--|
| 2 | | research. |
| 3 | | $202,880 \text{ kW} \div 68.83 \text{ percent} = 294,776 \text{ kW}$ |
| 4 | | Step 3 - To determine the demand at generation, line losses are added by |
| 5 | | multiplying the coincident peak demand from step 2 by the loss factor. |
| 6 | | 294,776 x 1.03751 = 305,833 kW (with losses) |
| 7 | | This process was followed for all customer classes for the twelve months of the test |
| 8 | | year to determine each class' monthly peak coincident with Duke Energy |
| 9 | | Kentucky's monthly system peak. I used a similar procedure to develop each class's |
| 10 | | diversified class peak and highest (single) non-coincident peak demands. |
| 11 | Q. | PLEASE DESCRIBE HOW THE 12 CP DEMAND ALLOCATOR WAS |
| 12 | | USED TO ALLOCATE COSTS. |
| 13 | A. | The 12 CP demand allocator was used to allocate Production and Transmission |
| 14 | | capacity related investments and expenses to the customer classes. |
| 15 | Q. | PLEASE DESCRIBE THE METHODS USED TO ALLOCATE |
| 16 | | DISTRIBUTION RELATED COSTS TO THE VARIOUS RATE CLASSES. |
| 17 | A. | Several different allocation factors were used to allocate distribution plant to the |
| 18 | | customer classes. First, distribution plant was grouped by the type of plant such as |
| 19 | | substations, poles, conductors, etc. Then it was determined whether each type is |
| 20 | | customer- or demand-related factor. Finally, each customer- or demand-related |
| 21 | | cost was allocated to rate class. |
| 22 | | Substations are considered 100 percent demand-related and were allocated |
| 23 | | using the average class group coincident peak demand ratios for the twelve |

months ending March 31, 2022. This factor takes into consideration the load diversity by rate group at the distribution substation level.

Poles and conductors are allocated partially on demand and partially based on customer counts using the minimum size method.

Transformers were allocated between customer and demand using the minimum size method. Transformers, as well as other distribution plant facilities, are considered to have a customer component because the number of facilities needed on the system, are dependent on the number of customers. The remaining costs are demand related. I allocated the demand portion of transformers among the customer classes using the maximum non-coincident peak load ratios. The maximum non-coincident peak demand allocator is appropriate because transformers are sized to meet the maximum demand and are close to the customer so there is little or no load diversity. I then allocated the customer portion of transformers among the customer classes based on the total number of customers.

Services are considered 100 percent customer-related and were allocated based on a weighted-average number of customers (K217). The weighting is based on an engineering analysis that prices various service drop costs based on demands. For example, it is twice as costly for a service drop at 100 kVA versus a service drop at 25 kVA. Customers with an average demand of 100 kVA are weighted at twice the cost of customers with an average demand of 25 kVA.

Other distribution and customer service-related costs can be more directly associated with a customer statistic such as the cost of meters (K407), customer

| 1 | charge-offs (K411) and other customer-related studies. As an example, the |
|---|--|
| 2 | investment in meters can be directly associated with the costs of metering the |
| 3 | various customer groups (K407). |

Streetlights were directly assigned to the street lighting rate class.

A.

Q. PLEASE DESCRIBE THE MINIMUM SIZE METHOD USED TO ALLOCATE TRANSFORMER COSTS BETWEEN CUSTOMER- AND DEMAND-RELATED COSTS.

The minimum size study is shown on Work Paper FR-16(7)(v), page 53. The minimum size method assumes that a minimum size distribution system can be built to serve the minimum load requirements of the customer. For transformers, the study involved determining the minimum size transformer currently installed by Duke Energy Kentucky. In this case, it is a 15 kVa transformer. Duke Energy Kentucky's 2022 cost of a 15 kVa transformer was \$2,231.

I used asset accounting records to determine the number of overhead and pad-mounted transformers installed each year from 1910 to 2021. I then used the Handy-Whitman Index for Utility Plant Materials (specifically line transformers) to calculate the cost per transformer for each of the years 1910 to 2021, beginning with a 2022 Handy-Whitman index of 1192 and 2022 cost of \$2,231. For each year, I multiplied the number of transformers by the cost per transformer to get the minimum size cost per year. I summarized each of the years 1910 to 2021 to arrive at the minimum size transformer cost of approximately \$18.8 million. This was classified as a customer-related cost. The difference between this customer-related cost and the balance in FERC Line Transformer account 368 is the

| 1 | | demand component, resulting in allocation factors of 22.69 percent to customer |
|----|----|--|
| 2 | | and 77.31 percent to demand. I allocated all transformer-related cost (plant, |
| 3 | | accumulated depreciation) to customer and demand using these factors. |
| 4 | Q. | DID YOU PERFORM MINIMUM SIZE STUDIES FOR OTHER TYPES |
| 5 | | OF DISTRIBUTION EQUIPMENT? |
| 6 | A. | Yes, in a manner like the transformer study, I prepared minimum size studies for |
| 7 | | primary poles, secondary poles, overhead primary conductor, secondary overhead |
| 8 | | conductor, underground primary conductor, and underground secondary |
| 9 | | conductor. The results of these analyses appear on the "Minimum Size Summary" |
| 10 | | tab. This tab also includes the results of the minimum size studies that were |
| 11 | | performed in Case No. 2019-00271. |
| 12 | Q. | DID YOU PERFORM ANY ZERO-INTERCEPT ANALYSES TO |
| 13 | | DETERMINE THE CUSTOMER AND DEMAND COMPONENTS OF |
| 14 | | TRANSFORMERS, POLES, AND CONDUCTORS? |
| 15 | A. | Yes. In its Order dated April 27, 2020, in Case No. 2019-00271, the Commission |
| | | |

- 15 A. Yes. In its Order dated April 27, 2020, in Case No. 2019-00271, the Commission 16 stated that the Company should perform a zero-intercept study in its next base rate 17 case. Page 1 of Attachment JEZ-5 shows the results of the zero-intercept analyses 18 and how they compare with the results of the minimum size studies.
- 19 Q. PLEASE DESCRIBE THE ZERO-INTERCEPT ANALYSIS OF 20 TRANSFORMERS.
- A. The zero-intercept analysis of transformers appears on page 4 of Attachment JEZ5. Transformer cost and quantity data were obtained from the Company's plant
 accounting records, and the average cost for each transformer accounting group

was calculated. Only transformers with ratings of about 500 kVA or lower were included. The accounting data groups transformers into size ranges, e.g., 46-150 kVA. For each accounting group, I assumed that the typical transformer in the group had a size that was approximately in the middle of the range. For example, I assumed that all transformers in the 46-150 kVA accounting group were 100 kVA transformers. These assumptions were necessary because more granular data is not available. If a straight line is drawn through the various data points (size versus average cost), the calculated zero-intercept cost (i.e., the cost of a zero-kW transformer) is \$1,604. This is lower than the minimum size study cost of \$2,231. The zero-intercept method results in a customer percentage of 69.55% versus the customer percentage of 22.69% in the minimum size study. This very large difference in customer percentages occurs because the zero-intercept method does not account for the age of the transformers that exist on the Company's distribution system. The minimum size study uses a Handy Whitman factor to recognize that many transformers were installed decades ago and recorded on the Company's books at much lower costs than current costs.

A.

Q. PLEASE DESCRIBE THE ZERO-INTERCEPT ANALYSIS OF POLES.

The zero-intercept analysis of poles appears on page 2 of Attachment JEZ-5. Pole cost and quantity data were obtained from the Company's plant accounting records, and the average cost for each pole-size accounting group was calculated. Only poles with heights of 70 feet or smaller were included. If a straight line is drawn through the various data points (size versus average cost), the calculated zero-intercept cost (i.e., the cost of a zero-foot pole) is \$186. This is lower than

the minimum size study cost of \$1,288 for primary poles and \$820 for secondary poles. The analysis includes both primary and secondary poles because the accounting data does not specify the type of pole in each category. The zero-intercept method results in a customer percentage of 8.66% for primary poles versus the customer percentage of 27.20% in the minimum size study. The zero-intercept method results in a customer percentage of 10.62% for secondary poles versus the customer percentage of 21.61% in the minimum size study.

8 Q. PLEASE DESCRIBE THE ZERO-INTERCEPT ANALYSIS OF 9 CONDUCTORS.

A.

The zero-intercept analysis of conductors is based on three types of commonly used conductor on the Company's distribution system. Only three data points were used because of the difficulty of obtaining consistent engineering data that matches cost versus ampacity. The line compares the ampacity rating of the conductor versus the cost per circuit mile. The analysis uses overhead conductor costs and assumes that the minimum size for overhead would also apply to underground conductor. In other words, underground circuits would not exist in a hypothetical minimum size system. The zero-intercept cost of conductors with zero ampacity (i.e., a conductor that cannot carry any current) was calculated to be \$10,494 per circuit mile. The use of this zero-intercept cost results in customer percentages of overhead conductor that are substantially higher than the percentage derived from the minimum size study. I believe that this large difference in customer percentage occurs because the zero-intercept method does not account for the age of the overhead conductor that exist on the Company's

| 1 | | distribution system. For underground conductor, the zero-intercept method |
|----|----|--|
| 2 | | results in lower customer percentages versus the minimum size method. |
| 3 | Q. | WHY DID YOU USE THE MINIMUM SIZE ANALYSES IN THE COST |
| 4 | | OF SERVICE STUDY INSTEAD OF THE ZERO-INTERCEPT |
| 5 | | ANALYSES? |
| 6 | A. | I believe that the minimum size analyses, using the Handy Whitman indexes, |
| 7 | | more accurately calculate the costs of minimum size systems. The minimum size |
| 8 | | analyses use actual costs of actual minimum size equipment. I believe that the |
| 9 | | zero-intercept method has the following flaws: |
| 10 | | • The zero-intercept method does not recognize that much of the equipment |
| 11 | | on the distribution system was installed many years ago, and the costs of |
| 12 | | the older equipment were recorded at much lower dollar values than |
| 13 | | current. This flaw is especially noticeable when looking at transformers. |
| 14 | | • The zero-intercept method assumes that there is a linear relationship |
| 15 | | between equipment size and cost. |
| 16 | | • The zero-intercept method assumes that this linear relationship between |
| 17 | | size and cost continues outside of the range of data that was used to |
| 18 | | develop the line. |
| 19 | | • The zero-intercept method attempts to accurately compute the costs of |
| 20 | | fictitious equipment that do not and cannot exist (e.g., zero height poles). |
| 21 | | • The Company's plant accounting records are not sufficiently detailed to |
| 22 | | perform the zero-intercept analyses without making numerous |
| 23 | | assumptions about the size of equipment within various accounting |

| 1 | | groups. |
|----|----|---|
| 2 | | On the other hand, the minimum size method uses actual costs of actual |
| 3 | | equipment, and it adjusts those costs for decades of inflation. I believe that the |
| 4 | | minimum size methodology more accurately depicts the split between the |
| 5 | | customer and demand components of transformers, poles, and conductors. |
| 6 | Q. | PLEASE DESCRIBE THE METHODOLOGY USED TO ALLOCATE |
| 7 | | COMMON AND GENERAL PLANT. |
| 8 | A. | I functionalized common and general plant based on functional salaries and wages |
| 9 | | as presented on pages 354-355 of Duke Energy Kentucky's 2021 FERC Form 1 |
| 10 | | annual report. I then used distribution kW and various weighted O&M expense |
| 11 | | ratios to allocate each function to customer classes. |
| 12 | Q. | PLEASE EXPLAIN HOW YOU ALLOCATED A&G EXPENSES USING |
| 13 | | THIS METHODOLOGY. |
| 14 | A. | I functionalized A&G expenses based on the same functional salaries and wages |
| 15 | | used for general and common plant. After I functionalized the expenses, I allocated |
| 16 | | the expenses to rate classes based on the allocation of direct O&M for that function. |
| 17 | | For example, A&G expenses functionalized as distribution were allocated to rate |
| 18 | | classes based on each rate class' allocation of direct distribution O&M. |
| 19 | Q. | WHAT ARE THE RATE BASE ADJUSTMENTS THAT YOU IDENTIFY IN |
| 20 | | THE COST OF SERVICE? |
| 21 | A. | While net plant is the largest single component of rate base, there are other items |
| 22 | | which must be added to or subtracted from rate base. These items include deferred |

- income taxes, miscellaneous deferrals, and working capital which includes materials
 and supplies and prepayments.
- 3 Q. HOW DID YOU ALLOCATE THE ADJUSTMENTS THAT WERE
- 4 SUBTRACTED FROM RATE BASE?
- 5 A. I allocated the subtractive adjustments based on the net plant ratios and other
- 6 allocators for each rate class.
- 7 Q. HOW DID YOU ALLOCATE ADJUSTMENTS THAT WERE ADDED TO
- 8 RATE BASE?
- 9 A. I used various factors to allocate the amounts reflected in the Accumulated Deferred

 10 Income Tax Account 190.
- 11 O. HOW DID YOU ALLOCATE WORKING CAPITAL?
- A. Working capital consists of the following items: fuel inventories, emission allowances, materials and supplies, prepayments, cash, and other miscellaneous items. Fuel Inventories and emission allowances were allocated to rate groups based on K301, class kWh ratios; materials and supplies were allocated using PD29, class net plant ratios; general insurance and excise tax were allocated to rate groups using net plant ratios NP29, collateral asset was allocated to rate groups based on K301 class kWh ratios.
- Cash working capital is based on the lead/lag study.
- 20 Q. HOW DID YOU ALLOCATE DEPRECIATION EXPENSES?
- A. I allocated depreciation expenses to rate class based on the functional class netdepreciable plant ratios.

| 1 | ^ | HOW DID | TOTI ATT | | | AND DECEMBER OF A | ZTOO |
|---|----|--------------|----------|------------|--------|-------------------|--|
| 1 | O. | H() (V I) I) | YUU ALL | UCAIR KRAL | COLAIR | AND PROPERTY TAX | λ Γ δ ϵ |

- 2 A. I allocated real estate and property taxes to rate class based on the functional class
- 3 net plant ratios.
- 4 Q. HOW DID YOU ALLOCATE PAYROLL AND HIGHWAY TAXES, THE
- 5 PSC ASSESSMENT AND OTHER MISCELLANEOUS TAXES?
- 6 A. I allocated the PSC Maintenance Taxes to class based on each rate class revenue
- 7 ratio. I allocated Payroll, Highway and Other Miscellaneous Taxes to rate class
- 8 based the class-weighted A&G expense ratio (A315).
- 9 Q. HOW DID YOU ALLOCATE FEDERAL AND STATE INCOME TAX
- 10 **ADJUSTMENTS AND DEDUCTIONS?**
- 11 A. I reviewed each income tax adjustment and deduction to determine the functional
- cause of the adjustment and deduction, then selected the appropriate allocation
- factor. For example, an "Other Deductions" item, tax depreciation in excess of book
- depreciation, was allocated to the rate classes based on the class depreciation
- expense ratio (DE49).
- 16 Q. HOW DID YOU ALLOCATE OTHER OPERATING REVENUES?
- 17 A. I evaluated each other operating revenue item to determine the source of the
- revenue, then selected the appropriate allocation factor. The class ratio of present
- revenues was the primary allocation factor used to allocate the revenue credits to the
- 20 respective rate groups.
- 21 Q. DID YOU USE ANY OTHER ALLOCATION FACTORS IN THE COST OF
- 22 **SERVICE STUDY?**
- 23 A. Yes, there are many plant and expense ratios that were developed internally in the

| 1 | | cost of service study. The cost of service study fists each item's anocation factor |
|----|----|---|
| 2 | | under the column identified as "ALLO." |
| | | IV. RESULTS OF COST OF SERVICE STUDY |
| 3 | Q. | WHAT DO THE RESULTS OF THE COST OF SERVICE STUDY SHOW? |
| 4 | A. | Schedule FR-16(7)(v)-14, page 1 of 15, is a summary of the cost of service study |
| 5 | | that shows the costs allocated to each rate class. |
| 6 | Q. | HOW WERE THE RESULTS OF YOUR COST OF SERVICE STUDY |
| 7 | | USED IN THESE PROCEEDINGS? |
| 8 | A. | The results of the fully allocated cost of service study by rate class were supplied |
| 9 | | to Duke Energy Kentucky witness Bruce Sailers, who used this data to develop |
| 10 | | the proposed rate design for these proceedings. |
| | | V. <u>DISTRIBUTION OF PROPOSED REVENUE INCREASE</u> |
| 11 | Q. | DID THE COST OF SERVICE STUDY SHOW THAT THE INCREASE |
| 12 | | REQUIRED FOR EACH CUSTOMER CLASS WAS PROPORTIONAL? |
| 13 | A. | No. The cost of service study revealed that there are significant differences among |
| 14 | | the rate classes when comparing the actual return earned by each rate class to the |
| 15 | | 7.526 percent overall return on rate base being requested in this case. Put another |
| 16 | | way, developing rates that generate the amount of revenue that equals the allocated |
| 17 | | revenue requirement for each rate class will mean much greater increases for some |
| 18 | | rate classes, in terms of percentage increases, than other classes. |
| 19 | | To mitigate the rate shock that may come from eliminating the |
| 20 | | subsidy/excess (or rate disparities) among the rate classes, the Company is proposing |
| 21 | | to use a two-step process to distribute the proposed revenue increase. The first step |

| 1 | | eliminates 5 percent of the subsidy/excess revenues between customer classes based |
|----|----|--|
| 2 | | on present revenues. The second step allocates the rate increase to customer classes |
| 3 | | based on electric original cost depreciated (OCD) rate base. |
| 4 | Q. | THE WATER PUMPING RATE CLASS APPEARS TO BE RECEIVING A |
| 5 | | RATE DECREASE. PLEASE EXPLAIN HOW THIS IS BEING HANDLED |
| 6 | | IN THE PROPOSED RATES. |
| 7 | A. | The customers in this class are served under special contracts. The rates for these |
| 8 | | customers will not change. The proposed rate decrease for this class was added to |
| 9 | | the proposed revenues for Rate DS. |
| 10 | Q. | PLEASE EXPLAIN IN GREATER DETAIL THE FIRST STEP THAT |
| 11 | | ELIMINATES 5 PERCENT OF THE SUBSIDY/EXCESS REVENUES. |
| 12 | A. | Again, it is a general tenet of ratemaking that each class should, to the extent |
| 13 | | practicable, pay the costs of providing service to that class. The elimination of a |
| 14 | | portion of the subsidy/excess takes into consideration that the Company is not |
| 15 | | earning the same rate of return on all customer classes. It is unlikely that equal rates |
| 16 | | of return across all rate classes are achievable; nonetheless, to the extent possible, |
| 17 | | large variances among the customer classes should be eliminated. A comparison of |
| 18 | | revenues under present rates and at the retail average rate of return is made and then |
| 19 | | 5 percent of that amount is added to, or subtracted from, the rate increase to |
| 20 | | determine the proposed revenues in this proceeding. |
| 21 | | Admittedly, this proposal lets a subsidy/excess persist but it will reduce the |
| 22 | | gap so that each class is paying rates that more closely reflect their costs of service. |

Q. HOW DID THIS RATE DISPARITY ARISE?

1

12

13

14

15

16

17

18

19

20

A.

2 A. Rate disparities exist mostly because over the years rates have not been set based on 3 the cost to serve customers as determined by a cost of service study. Other factors 4 include: (1) customer mix often changes between rate cases, i.e., residential, for 5 example, may make up more or less of the total today than it did the last time rates 6 were set; (2) different asset classes depreciate at different rates and because different 7 asset classes are allocated differently, long periods between rate cases can shift the 8 relative costs to serve each rate class. Also, regulators may purposely allow 9 subsidy/excesses to persist in the interest of rate gradualism.

10 Q. WHY DID YOU PROPOSE A FIVE PERCENT REDUCTION OF THE 11 SUBSIDY/EXCESS REVENUES IN THESE PROCEEDINGS?

The present rate of returns by class shown on Work Paper FR-16(7)(v), page 1, indicate that there is a significant difference in those returns. To ensure that each rate class pays the actual cost to serve that class and move each class to the average rate of return, 100 percent of the subsidy/excess would need to be eliminated. However, given the wide disparity among rate classes, complete elimination of the subsidy excess would cause a dramatic swing in rate impacts between and among various rate classes. By proposing to eliminate only five percent of the subsidy/excess, the Company is choosing to invoke the rate making principle of gradualism so to mitigate the volatility of 100 percent subsidy/excess elimination.
