FILING: Rebuttal Testimony of Lisa D. Steinkuhl, Filed April 14, 2023

DATE CORRECTED: May 5, 2023

CORRECTION	LINE	PAGE
Replace "\$9.939" with "\$3.290"	6	5
Add "Revised" and "Revised"	Footnote 1	5
Add the following:	1-7	7
Q. DOES THE COMPANY AGREE WITH MR.		
FUTRAL'S RECOMMENDATIONS AS IT RELATES TO		
THE COMPANY'S PROPOSED PROPERTY TAX		
EXPENSE?		
A. No. Company witness Panizza explains why the		
Company disagrees with this recommendation. However, in		
his corrected rebuttal testimony Mr. Panizza does propose a		
revised property tax expense. As a result of this change, the		
revenue requirement being requested by the Company is		
reduced by \$1.605 million.		
Replace revenue requirement summary table with revised revenue		7-8
requirement summary table, which reflects the changes noted above

### I. <u>INTRODUCTION AND PURPOSE</u>

1	Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
2	A.	My name is Lisa D. Steinkuhl and my business address is 139 East Fourth Street,
3		Cincinnati, Ohio 45202.
4	Q.	BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?
5	A.	I am employed by Duke Energy Business Services LLC (DEBS) as Director Rates
6		& Regulatory Planning. DEBS provides various administrative and other services
7		to Duke Energy Kentucky, Inc., (Duke Energy Kentucky or Company) and other
8		affiliated companies of Duke Energy Corporation (Duke Energy).
9	Q.	ARE YOU THE SAME LISA D. STEINKUHL THAT SUBMITTED
10		DIRECT TESTIMONY IN THIS PROCEEDING?
11	A.	Yes.
12	Q.	WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?
	<b>~</b> •	
13	A.	The purpose of my rebuttal testimony is to respond to a number of the

23 and the treatment of decommissioning expenses;

### LISA D. STEINKUHL REBUTTAL

1 (3) the AG witnesses' proposal to either not amortize or adjust 2 amortization expense timing for certain regulatory assets in this proceeding as 3 well as in the Company's Rider ESM; and

First, I will also address adjustments proposed by Mr. Futral and Mr.
Kollen that the Company does not oppose, some of which were identified by the
Company through discovery and the resulting revised revenue requirement
increase being requested by the Company.

### II. REVISED REVENUE REQUIREMENT

8 Q. HAS THE ATTORNEY GENERAL MADE REVENUE REQUIREMENT
 9 ADJUSTMENT RECOMMENDATIONS THAT THE COMPANY
 10 ACCEPTS?

A. Yes. There are three adjustments that Mr. Futral is recommending which the
 Company is willing to accept. These adjustments were identified by the Company
 through the course of answering discovery. Mr. Kollen also makes two
 recommendations that the Company is not opposing.

Mr. Baudino also makes a recommendation as it relates to the Company's proposed capital structure. While Company witness Chris Bauer explains in his rebuttal testimony why Duke Energy Kentucky disagrees with Mr. Baudino's recommendation, Mr. Bauer does revise the Company's proposed capital structure. I address the impacts of that revised capital structure on the Company's total proposed revenue requirement.

21

## 1Q.PLEASE EXPLAIN MR. FUTRAL'S ADJUSTMENTS THAT THE2COMPANY IS WILLING TO ACCEPT.

3 A. First, as the Company noted in response to discovery question AG-DR-01-112, the Company discovered an error in the calculation of the forecasted 13-month 4 5 average plant in-service balances. In AG-DR-02-042, the Company quantified the 6 impact of the error to be an understatement of the total accumulated depreciation 7 and amortization reserve for total electric plant including allocated common was 8 \$0.121 million. The error did not impact ADIT amounts in the projected test year. 9 The impact to the Company's requested revenue requirement is a reduction of 10 \$0.011 million and the Company agrees to adjust its requested revenue 11 requirement accordingly.

12 Secondly, the Company discovered an error in the lead/lag calculation for 13 collection lag days. Per response to AG-DR-01-096, it was determined that two 14 changes needed to be made to the collection lag days calculation. The first change 15 relates to using total revenues and total receivables in the calculation instead of 16 incorrectly using a combination of electric only and total. The receivable balances 17 had been stated on a combined electric and gas operations basis, while the 18 revenue amounts had been stated on an electric-only basis. The second change 19 was to remove the effect of both unbilled gas and electric revenues since the 20 unbilled amounts are not accounted for in the accounts receivable balances. The 21 corrections reduce the cash working capital by \$4.919 million. The impact to the 22 Company's requested revenue requirement is a reduction of \$0.460 million and 23 the Company agrees to adjust its requested revenue requirement accordingly.

LISA D. STEINKUHL REBUTTAL

3

1		Thirdly, the Company did not include the amortization for DEBS EDIT
2		amortization approved in Case No. 2019-00271. The Commission's Order stated
3		\$0.214 million of DEBS EDITs allocated to Duke Energy Kentucky electric
4		should be amortized over 5-years for a revenue reduction of \$0.043 million. This
5		was included in rates effective on May 1, 2020. The unamortized balance on June
6		30, 2023, will be \$0.082 million. The 5-year amortization of the June 30, 2023
7		balance is \$0.016 million. This adjustment has the effect of reducing the
8		Company's proposed revenue requirement increase by \$0.016 million and the
9		Company agrees to adjust its requested revenue requirement accordingly.
10	Q.	PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO

## 11 THE COMPANY'S REQUEST TO ROLL-IN TO BASE RATES CERTAIN 12 PORTIONS OF RIDER ESM.

A. Mr. Kollen recommends the Commission deny the Company's request to transfer
 recovery of the return on four capital projects and the related depreciation expense
 and property tax expense from Rider ESM revenues to base revenues. As a result, he
 recommends the revenue requirement be reduced by \$12.076 million.

### 17 Q. DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?

A. The Company is not opposed to Mr. Kollen's recommendation to deny the
Company's request to transfer the recovery of the return on and of four capital
projects from Rider ESM revenues to base revenues.

### 21 Q. DOES THE COMPANY AGREE WITH MR. KOLLEN'S CALCUATION

- 22 OF THE REVENUE REQUIREMENT IMAPCT OF HIS PROPOSAL?
- 23 A. No.

### 1 Q. PLEASE EXPLAIN.

2 A. Mr. Kollen's reduction to the revenue requirement of \$12.076 million for the roll-in 3 of certain portions of the ESM rider was provided by the Company through discovery.<sup>1</sup> The Company supplemented the responses to correct the calculation for 4 5 various errors in the original calculation. The correct amount of revenue requirement 6 related to certain portions of Rider ESM being rolled-in to base rates is \$9.9393.290 million. The Company is willing to remove this amount from the revenue 7 requirement and keep the return on and of the four capital projects in question in the 8 9 Rider ESM.

### 10 Q. PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO

### 11 THE COMPANY'S REQUEST TO ZERO COST VENDOR FINANCING.

A. Fuel and limestone inventories are additions to rate base as other working capital.
Mr. Kollen is recommending that these balances in rate base be reduced by zero-

### 14 cost vendor financing in the related accounts payable amounts.

### 15 Q. PLEASE EXPLAIN THE CONCEPT OF ZERO COST VENDOR 16 FINANCING.

A. The Company does not actually finance its purchases of fuel and lime from the
date it purchases the fuel and lime from its vendors until it actually pays the
vendors. The vendor actually finances the purchase for this short period of time.
Mr. Kollen calls this zero-cost vendor financing.

## 21 Q. DOES MR. KOLLEN PROVIDE ANY SUPPORT OR PRECEDENT FOR 22 THIS TYPE OF ADJUSTMENT?

<sup>&</sup>lt;sup>1</sup> See Staff DR-03-021 <u>Revised</u> Supplemental and AG-DR-02-040 <u>Revised</u> Supplemental.

A. Yes, in the Kentucky Power Company Case No. 2020-00174 the Commission
 subtracted construction accounts payable and prepayments accounts payable from
 rate base and in the Atmos Energy Corporation Case No. 2021-00214
 construction accounts payable were deducted. In the Atmos final Order, the
 Commission stated the following:

6 In a number of recent base rate cases where the revenue requirement is 7 determined using rate base, the Commission has accepted adjustments to remove 8 accounts payable from working capital amounts because the utility does not 9 finance these amounts. The same reasoning exists here. Therefore, the 10 Commission finds that this adjustment is reasonable and is accepted.

### 11 Q. DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?

A. Based on the Commission precedent sited above, the Company does not oppose
Mr. Kollen's recommendation that the balances in rate base be reduced by the
related accounts payable amounts for fuel and limestone inventory accounts. As a
result, the Company has reduced rate base by \$6.459 million. This reduces the
revenue requirement being requested by the Company by \$0.604 million.

17 Q DOES THE COMPANY AGREE WITH MR. BAUDINO'S
18 RECOMMENDATIONS AS IT RELATES TO THE COMPANY'S
19 PROPOSED CAPITAL STRUCTURE?

A. No. Company witness Bauer explains why the Company disagrees with this
 recommendation. However, in his testimony Mr. Bauer does propose a revised
 capital structure. As a result of this change in capital structure, the revenue
 requirement being requested by the Company is reduced by \$0.370.

LISA D. STEINKUHL REBUTTAL

6

## 1 Q. DOES THE COMPANY AGREE WITH MR. FUTRAL'S 2 RECOMMENDATIONS AS IT RELATES TO THE COMPANY'S 3 PROPOSED PROPERTY TAX EXPENSE?

- 4 A. No. Company witness Panizza explains why the Company disagrees with this
- 5 recommendation. However, in his corrected rebuttal testimony Mr. Panizza does
- 6 propose a revised property tax expense. As a result of this change, the revenue
- 7 requirement being requested by the Company is reduced by \$1.605 million.

8 Q. PLEASE SUMMARIZE THE COMPANY'S REVISED REVENUE 9 REQUIREMENT BASED ON THE CHANGES DISCUSSED IN YOUR

- 10 **REBUTTAL TESTIMONY.**
- 11 A. The following table reflects the Company's revised revenue requirement increase

based on my rebuttal testimony.

Line No.	Summary	Impact to Revenue Defeciency
1	Duke Energy Kentucky Initial Request	\$ 75,176,922

### III. <u>EAST BEND RETIREMENT DATE</u>

## Q. PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO THE RETIREMENT DATE OF EAST BEND.

A. Mr. Kollen recommends that the Commission reject the Company's request to
 accelerate East Bend's depreciation to align with a likely retirement in 2035. He
 makes various recommendations to the revenue requirement as a result.

### 6 Q. DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?

A. No. Company witnesses John Spanos, Bill Luke, Sarah Lawler, and Scott Park
discuss in their rebuttal testimony why the Company disagrees with Mr. Kollen's
proposal and believes that the depreciable life through 2035 is the most appropriate
date to include in this proceeding. I discuss how rejecting this proposal impacts the
revenue requirement.

## 12 Q. PLEASE EXPLAIN THE IMPACT OF REJECTING MR. KOLLEN'S 13 PROPOSAL ON THE COMPANY'S REVENUE REQUIREMENT.

A. The Company recommends that the Commission reject Mr. Kollen's proposal to
maintain East Bend's depreciable life through 2041. Instead, for the reasons
explained by Ms. Lawler, Mr. Spanos, Mr. Park, and Mr. Luke, the Commission
should instead align the depreciation expense with a likely retirement date of 2035.
Mr. Kollen's recommendation results in a decrease in depreciation expense of

### LISA D. STEINKUHL REBUTTAL

\$10.435 million and the decrease in accumulated depreciation, net of ADIT effects,
 of \$2.616 million. The corresponding revenue impact of \$10.208 million shown on
 Table 1 of Mr. Futral's testimony should also be rejected. This is comprised of a
 reduction of \$10.452 million for the decrease in depreciation expense and an
 increase of \$0.245 million for the decrease in accumulated depreciation net of ADIT
 impacts.

### IV. <u>DECOMMISSIONING COSTS</u>

### 7 Q. PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO 8 DECOMMISSIONING COSTS.

9 Mr. Kollen recommends the decommissioning expense for the Company's A. 10 generating units be included in the revenue requirement as a separate and 11 standalone expense instead of including it as a component of the depreciation 12 rates and expense. He also recommends that the Commission limit the escalation 13 of the decommissioning cost and resulting expense to the test year and removing 14 the estimated end of life materials and supplies from the decommissioning cost 15 estimate. He makes various recommendations to the revenue requirement as a 16 result of these changes.

### 17 Q. DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?

A. No. Company witnesses John Spanos and Jeff Kopp discuss in their rebuttal testimony why the Company disagrees with Mr. Kollen's proposal and believes that the decommissioning costs should be (1) a component of the depreciation rates, (2) escalated through the probable retirement date, and (3) include the estimated end of life materials and supplies. I discuss how rejecting these proposals impact the revenue requirement.

### LISA D. STEINKUHL REBUTTAL

9

# Q. PLEASE EXPLAIN THE REVENUE REQUIREMENT IMPACT OF THE COMPANY'S POSITION AS IT RELATES TO MR. KOLLEN'S RECOMMENDATION TO TREAT DECOMMISSIONING COSTS AS A STANDALONE EXPENSE.

5 As outlined in the rebuttal testimony of the Company witnesses noted above, the A. 6 Company recommends the Commission reject Mr. Kollen's proposal to treat the 7 decommissioning costs as a separate and standalone expense in the revenue requirement. This recommendation reduced depreciation expense by \$5.765 8 9 million and was offset by an increase in depreciation expense for the 10 decommissioning costs of \$4.908 million for a net reduction in depreciation 11 expense of \$0.857 million. The corresponding revenue requirement decrease of 12 \$0.859 million shown on Table 1 of Mr. Futral's testimony should be rejected.

This recommendation also decreased accumulated depreciation, net of ADIT effects, by \$1.446 million and increased accumulated depreciation, net of ADIT effects, by \$1.231 million for a net increase in accumulated depreciation, net of ADIT effects, of \$0.215 million. This results in a recommended increase to the revenue requirement of \$0.020 million. The Commission should also reject this adjustment.

## Q. PLEASE EXPLAIN THE REVENUE REQUIREMENT IMPACT OF THE COMPANY'S POSITION AS IT RELATES TO THE ESCALATION OF DECOMMISSIONING COSTS.

A. As outlined in the rebuttal testimony of the Company witnesses noted above, the
 Company recommends the Commission reject Mr. Kollen's proposal to escalate
 the decommissioning costs and resulting expense only through the test year and

### LISA D. STEINKUHL REBUTTAL

not through the estimated retirement date. This recommendation reduced
 decommissioning costs in the test year by \$1.563 million. The corresponding
 revenue requirement decrease of \$1.566 million shown on Table 1 of Mr. Futral's
 testimony should be rejected.

5 This recommendation also decreased accumulated depreciation, net of 6 ADIT effects, of \$0.392 million. This results in a recommended increase to the 7 revenue requirement of \$0.037 million. The Commission should also reject this 8 adjustment.

## 9 Q. PLEASE EXPLAIN THE REVENUE REQUIREMENT IMPACT OF THE 10 COMPANY'S POSITION AS IT RELATES TO THE ESTIMATED END 11 OF LIFE MATERIALS AND SUPPLIES.

A. As outlined in the rebuttal testimony of the Company witnesses noted above, the
Company recommends the Commission reject Mr. Kollen's proposal to remove
the estimated end of life materials and supplies from the decommissioning cost
estimate. This recommendation reduced decommissioning costs in the test year by
\$0.757 million. The corresponding revenue requirement decrease of \$0.758
million shown on Table 1 of Mr. Futral's testimony should be rejected.

18 This recommendation also decreased accumulated depreciation, net of 19 ADIT effects, of \$0.190 million. This results in a recommended increase to the 20 revenue requirement of \$0.018 million. The Commission should also reject this 21 adjustment.

### V. <u>PLANNED OUTAGE O&M EXPENSE REGULATORY ASSET</u> <u>AMORTIZATION</u>

### 1 Q. PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO 2 THE AMORTIZATION OF THE PLANNED OUTAGE **0&M** 3 **DEFERRAL**. 4 A. Mr. Kollen recommends the amortization for the planned maintenance outage 5 O&M deferrals be denied in this proceeding. Mr. Kollen argues that the Company 6 has not met its burden to demonstrate that the expenses incurred were prudent, 7 reasonable, and necessary. 8 **DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL? Q**. 9 A. No. 10 Q. PLEASE EXPLAIN. 11 A. Mr. Luke explains in his rebuttal testimony why the Company disagrees with this 12 argument. Mr. Luke outlined in his direct testimony details around the Company's 13 planned outages. Additionally, the Company responded to discovery Mr. Kollen asked on this exact matter.<sup>2</sup> Mr. Kollen failed to prove why that direct testimony 14 15 and responses to discovery doesn't demonstrate that the expenses incurred were 16 prudent, reasonable, and necessary.

<sup>&</sup>lt;sup>2</sup> See Response to AG-DR-01-100(c), Attachment 1.

## Q. IF THE COMMISSION RULES IN FAVOR OF MR. KOLLEN'S RECOMMENDATION, DOES THE COMPANY HAVE ANY ADDITIONAL RECOMMENDATION?

- A. Yes. If the Commission does not allow the Company to begin amortizing these
  costs in rates, the Commission should approve that the balance of the regulatory
  asset or liability should accrue a carrying cost at the Company's long-term debt
  rate approved in this proceeding. The carrying costs should apply to any credit
  balance (*i.e.*, amounts owed to customers) or to any debit balance (*i.e.*, amounts
  owed to the Company) to maintain the symmetry and ensure that neither customer
  nor Company is deprived of the time value of money.
- 11 Q. DOES MR. KOLLEN HAVE ANY OTHER RECOMMENDATIONS
  12 REGARDING THE AMORTIZATION OF THE PLANNED OUTAGE O&M
  13 DEFERRAL?
- A. Yes. Mr. Kollen recommends that if the Commission does grant amortization, that
  it set the amortization period to ten years instead of the five years the Company is
  requesting.

### 17 Q. DO YOU AGREE WITH THIS RECOMMENDATION?

18 A. No. The Company believes the five-year amortization period is the most 19 appropriate period for the Company to recover its costs. At a minimum, if the 20 Commission orders the Company to amortize the costs over ten years, it should 21 allow the Company to accrue carrying costs at the Company's long-term debt 22 rate.

### VI. <u>FORCED OUTAGE PURCHASED POWER EXPENSE REGULATORY</u> <u>ASSET AMORTIZATION</u>

Q. PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO
 THE AMORTIZATION OF THE FORCED OUTAGE PURCHASED
 POWER DEFERRAL.

A. Mr. Kollen recommends the amortization for the forced outage purchased power
deferrals be denied in this proceeding. He makes a similar argument as he did for
the planned outage O&M deferral that the Company has not met its burden of
proof to demonstrate that the expenses incurred were prudent, reasonable, and
necessary.

### 9 Q. DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?

- 10 A. No.
- 11 Q. PLEASE EXPLAIN.

12 A. Mr. Swez explains in his rebuttal testimony why the Company disagrees with this 13 argument. The Company responded to discovery questions Mr. Kollen asked on 14 this describing the nature of the forced outages.<sup>3</sup> Mr. Kollen failed to prove why 15 the responses to the discovery did not demonstrate that the expenses incurred 16 were prudent, reasonable, and necessary.

<sup>&</sup>lt;sup>3</sup> See response to AG-DR-01-100(f), Attachment 1.

## Q. IF THE COMMISSION RULES IN FAVOR OF MR. KOLLEN'S RECOMMENDATION, DOES THE COMPANY HAVE ANY ADDITIONAL RECOMMENDATON?

- A. Yes. The Commission should approve that the balance of the regulatory asset or
  liability should accrue a carrying cost at the Company's long-term debt rate
  approved in this proceeding. The carrying costs should apply to any credit balance
  (*i.e.*, amounts owed to customers) or to any debit balance (*i.e.*, amounts owed to the
  Company) to maintain the symmetry and ensure that neither customer nor Company
  is deprived of the time value of money.
- 10 Q. DOES MR. KOLLEN HAVE ANY OTHER RECOMMENDATIONS
- 11**REGARDING THE AMORTIZATION OF THE FORCEDOUTAGE**12**PURCHASED POWER DEFERRAL?**
- A. Yes. Mr. Kollen recommends that if the Commission does grant amortization, that
  it set the amortization period to ten years instead of the five years the Company is
  requesting.

### 16 Q. DO YOU AGREE WITH THIS RECOMMENDATION?

A. No. The Company believes the five-year amortization period is the most
appropriate period for the Company to recover its costs. At a minimum, if the
Commission orders the Company to amortize the costs over ten years, it should
allow the Company to accrue carrying costs at the Company's long-term debt
rate.

## 1Q.WHAT ELSE DOES MR. KOLLEN HAVE TO SAY ABOUT THE2AMORTIZATION OF THIS DEFERRAL?

- A. Mr. Kollen also argues that the Commission should not allow the amortization
  until it has completed its investigation in Case 2022-0190.
- 5 Q. DO YOU AGREE WITH THIS ARGUMENT?

6 A. No. I do not. First, although I am not an attorney, by experience in regulatory 7 matters before the Commission leads me to conclude that the Commission has the 8 ability to decide these sorts of issues within a base rate proceeding. Moreover, Mr. 9 Kollen's argument in this regard is inconsistent with other positions he is taking 10 in this proceeding. For example, Mr. Kollen argues in favor of the Company's 11 recommendation to eliminate volatility in Rider FAC by introducing a twelve-12 month rolling average calculation to the clause. The volatility of fuel expense and 13 how to address it is also being discussed and considered by the Commission in 14 another proceeding, administrative Case 2022-00190. It makes no sense that the 15 Commission can rule on one issue in this case but not the other, simply because a 16 particular issue is being considered in another proceeding. The Commission has 17 the experience, expertise, and authority to address these important issues now, and 18 the Company submits that the Commission should do so in this case, rather than delaying. 19

### VII. EAST BEND DEFERRED O&M AMORTIZATION

1	Q.	PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO
2		THE AMORTIZATION OF THE EAST BEND O&M EXPENSE
3		DEFERRAL RELATED TO THE ACQUISITION OF THE REMAINING
4		OWNERSHIP OF THE GENERATING UNIT.
5	A.	Mr. Kollen recommends the Commission extend the amortization period and
6		recalculate the levelized recovery to reflect a probable retirement date of mid-year
7		2041.
8	Q.	DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?
9	A.	No.
10	Q.	PLEASE EXPLAIN.
11	A.	The Commission approved the ten-year amortization period of this regulatory
12		asset in Case No. 2017-00321. <sup>4</sup> Mr. Kollen was a witness in that proceeding and
13		did not object to the ten-year amortization period that the Company proposed, and
14		the Commission adopted. In fact, in that case, Mr. Kollen recommended an
15		adjustment to the regulatory asset balance and recommended that that balance be

Commission should not be second guessed in this proceeding.

amortized over ten years. The Commission's order found that the "10-year period

is reasonable and should be approved." Mr. Kollen's recommendation is an

untimely request for the Commission to reconsider its prior decision. The

Apr. 13, 2018).

### VIII. COAL ASH ARO AMORTIZATION

1	Q.	PLEASE DESCRIBE MR. KOLLEN'S PROPOSAL AS IT RELATES TO
2		THE AMORTIZATION OF THE COAL ASH ARO IN RIDER ESM.
3	A.	Mr. Kollen recommends the Commission extend the amortization period and
4		recalculate the levelized recovery to reflect a probable retirement date of mid-year
5		2041.
6	Q.	DOES THE COMPANY AGREE WITH MR. KOLLEN'S PROPOSAL?
7	А.	No.
8	Q.	PLEASE EXPLAIN.
9	А.	No. As I explained above as it relates to the amortization of East Bend's O&M
10		expense, the Commission has already addressed this issue in a fully-litigated case,
11		and approved the ten-year amortization period of this regulatory asset in Case No.
12		2017-00321.5 Specifically, in that proceeding, the Commission found that the
13		Company should "amortize only the actual balance of the East Bend Coal Ash
14		ARO regulatory asset over 10 years and recover additional costs associated with
15		the settlement of the East Bend Coal Ash ARO in the second month after they are
16		incurred." That is the methodology the Company has been employing ever since.
17		Mr. Kollen's recommendation is an untimely request for the Commission to
18		reconsider its prior decision. The Commission should not be second guessed in
19		this proceeding and should hold true to its prior determination on this issue.

### IX. <u>CONCLUSION</u>

### 1 Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

2 A. Yes.

### **VERIFICATION**

STATE OF OHIO	)	
	)	SS:
<b>COUNTY OF HAMILTON</b>	)	

The undersigned, Lisa D. Steinkuhl, Director Rates & Regulatory Planning, being duly sworn, deposes and says that she has personal knowledge of the matters set forth in the foregoing corrections to her rebuttal testimony and data request responses, and that they are true and correct to the best of her knowledge, information, and belief.

<u>Susa</u> <u>Objerkuhl</u> Lisa D. Steinkuhl Affiant

### **REVISED SUPPLEMENTAL AG-DR-02-040**

### **REQUEST:**

Refer to the Spiller Testimony at 4, regarding the proposed roll in of rate base included in the environmental surcharge mechanism ("Rider ESM") into base rates.

a. Provide an electronic copy of Duke Kentucky's most recent environmental surcharge filing with the Commission in electronic format with all formulas intact. Duke Kentucky's Environmental Surcharge Reports are not accessible in the Commission's public records.

b. Provide a copy of Duke Kentucky's Environmental Surcharge Report filed
with the Commission on December 16, 2022, for the expense month of November 2022.
Duke Kentucky's Environmental Surcharge Reports are not accessible in the
Commission's public records.

c. Refer to the Environmental Surcharge Report filed with the Commission on December 16, 2022, for the expense month of November 2022, and specifically to the list of capital projects and costs incurred as reflected on ES Form 2.10. Confirm that these are the only plant-related projects that were rolled into the projected rate base amounts in the Company's pending Application. If not confirmed, explain the response in detail.

d. Refer to the Environmental Surcharge Report filed with the Commission on December 16, 2022, for the expense month of November 2022, and specifically to the list of capital projects and costs incurred as reflected on ES Form 2.10. Confirm that all of these capital projects have been completed. If not confirmed, explain the response in detail.

1

e. Confirm that the recovery of costs through Rider ESM is done so using quantifications from historic period costs and not projected costs. If not confirmed, explain why not in detail.

f. Indicate whether the reduction in the Rider ESM recovery will be concurrent with the corresponding increase in base rates related to the roll in. If not, explain the response in detail.

g. Provide a calculation of the Rider ESM costs that have been included in the Company's projected test year revenue requirement showing all components of rate base (plant in service, accumulated depreciation, accumulated deferred income taxes ("ADIT"), other), all components of the return on rate base, all separate operating expenses, and any related gross-ups. In addition, provide citations to the Application schedules in which each of the various components of the cost of service were included.

h. Provide copies of all workpapers used to convert, or roll-forward, all historic costs included in the Rider ESM to the projected amounts in the test year, such as changes to the level of accumulated depreciation and ADIT.

### **REVISED SUPPLEMENTAL RESPONSE:**

- a. N/A
- b. N/A
- c. N/A
- d. N/A
- e. N/A
- f. N/A

g. Please see response to Revised Supplemental STAFF-DR-03-021 and STAFF-DR-03-021 Revised Supplemental Attachment 1 and STAFF-DR-03-021 Revised

Supplemental Attachment 2 for a corrected calculation of the Rider ESM costs that have been included in the Company's projected test year revenue requirement including citations to the Application schedules in which each of the various components of the cost of service were included and the impact to the revenue deficiency.

h. N/A

PERSON RESPONSIBLE: Lisa D. Steinkuhl

### **REVISED SUPPLEMENTAL STAFF-DR-03-021**

### **REQUEST:**

Refer to the response to Staff's Second Request, Item 38b. Provide the adjustment necessary to remove the proposed base rate roll in of plant in service related to Rider Environmental Surcharge Mechanism.

### **REVISED SUPPLEMENTAL RESPONSE:**

As discussed in the response to Supplemental STAFF-DR-03-021, there were three corrections needed to the original response to STAFF-DR-03-021 for the adjustment necessary to remove the proposed base rate roll in of plant in service related to Rider Environmental Surcharge Mechanism (ESM). The first correction is the Grossed Up Weighted Average Cost of Capital of 9.346% should have been used in the original response to incorporate the income tax, Commission assessment fees, and bad debt expense impacts for the change in return on rate base. The second correction is the rate base change should have included the accumulated depreciation and deferred income tax impacts for the annualized depreciation adjustment impacted by the ESM depreciation change. The third correction is the depreciation and property tax expenses should have been grossed up for Commission assessment fees and bad debt expense. These adjustments have not changed and are included in the STAFF-DR-03-021 Revised Supplemental Attachment 1 page 1, lines 1 through 36. Pages 2 through 4 of STAFF-DR-03-021 Revised Supplemental Attachment 1 supports these adjustments.

Those corrections reduced the revenue deficiency by \$9,938,525 instead of a reduction of \$12,075,851 from the original response.

An additional correction needs to be made to remove all of the Rider ESM revenues from the operating revenues included in the forecasted test year. The total Rider ESM revenues in the forecasted test year per WPC-2d is \$21,165,856. On Schedule D-2.18, the Rider ESM revenues of \$14,528,244 were eliminated. This was the portion of the total revenues associated with the costs originally proposed to remain in Rider ESM. The pro forma forecasted operating revenue on Schedule C-2 included \$6,637,612 of Rider ESM revenues related to the return on and of the specific projects being rolled into base rates (total revenues \$21,165,856 less \$14,528,244 eliminated on Schedule D-2.18). As part of removing all of the Rider ESM impacts from revenue deficiency, this portion of the Rider ESM revenues will need to be eliminated and grossed up for Commission assessment fees and bad debt expense. This adjustment will increase the revenue deficiency by \$6,648,749.

Therefore, the revised adjustment to remove the proposed base rate roll in of plant in service related to Rider ESM is a decrease of the revenue deficiency of \$3,289,776 which is a decrease in revenue requirement of \$9,938,525 and a decrease in the adjusted operating revenues of \$6,648,749. This adjustment has been included in STAFF-DR-03-021 Revised Supplemental Attachment 1 page 1, lines 38 through 40. The STAFF-DR-03-021 Revised Supplemental Attachment 1 also includes additional details on page 5 and 6 supporting these adjustments.

All things being equal, moving recovery of the return on and of the capital ESM projects to base rates would not have any impact to the revenue deficiency. When the Company proposed this in its original application, current revenues included ESM revenues associated with these assets at current rates and proposed revenues included ESM

revenues associated with these assets at proposed rates, therefore the revenue deficiency only represented the difference in current and proposed rates. Current and proposed rates for these assets are different for two reasons: the Company requested 1) an increase in the depreciation rates and 2) a higher rate of return. The current pre-tax rate of return is 7.905%<sup>1</sup> and proposed pre-tax rate of return in this proceeding is 9.346%. The current depreciation rate for these projects is 2.47%<sup>2</sup> and the proposed depreciation rate is 6.30%. An estimate of the impacts of the increased revenue deficiency due to the proposed changes for depreciation and rate of return is in the table below which explains the drivers of the revenue deficiency reduction of \$3,289,776. Please see STAFF-DR-03-021 Revised Supplemental Attachment 2 for revised Schedules A, B-1 and C-2 for further clarification of the changes.
