

Grant County Sanitary Sewer Rate Increase Response (Case No.2022-00377)

Response to Intervenor City of Crittenden request for information

**Witness – Paul Harp**

**Question # 26** – Provide the number of miles of pipeline that GCSD has replaced in the past five calendar years. Ensure to include the type of pipeline that was replaced, and whether it was a planned replacement or a replacement based upon a water break, etc.

**Answer –**

The district hasn't replaced complete pipelines in the last 5 years. They have had a small amount of replacement due to hit lines during excavation and other very general repairs. The total replacement would be less than 100 feet.
