Mr. Chuck Schram
Director, Power Supply
LG&E and Kentucky Utilities
220 West Main Street
Louisville, KY 40202

Dear Chuck,

Our corporate vision is to be a leading provider of energy services with a commitment to develop safe and reliable infrastructure. We pride ourselves on a reputation of meeting our service obligations to our customers and protect it by placing the utmost importance on preventative maintenance and preparation. Boardwalk shares a long history of reliable service with LG&E and KU including over twenty years of service to the Trimble County power plant and over eight years at the Cane Run 7 power plant.

During Winter Storm Elliott, Texas Gas experienced issues at its Slaughters Compressor Station that affected our ability to deliver gas to KU's electric generation plants at contractual pressures when a control unit on a valve failed due to icing. The component failure did not prevent Texas Gas' ability to source 1.62 billion cubic feet per day of storage capacity from storage fields in Kentucky and Indiana to replace lost supply on the north end of our system.

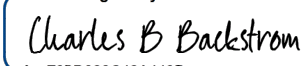

As part of our continued efforts to prepare for future winter storm events, we are developing the following system improvements:

- Additional maintenance checks on control and other critical equipment prior to severe winter weather events
- Additional temporary covers and heating equipment on critical equipment that is exposed to the elements.
- Work with our control center to turn on compression and run it in a bypass or unloaded condition, when physically and hydraulically feasible, so it will be ready for full load when needed.
- Fabricate and install permanent structures over certain critical control equipment and include appropriate heat equipment.
- Boardwalk continues to review potential site-specific improvements, including but not limited to, pipeline system(s), horsepower reliability, redundant horsepower, electrical power generation, air systems, fuel systems, and ancillary equipment.

We appreciate our partnership with LG&E and KU and look forward to providing dependable service for years to come.

Best Regards,

DocuSigned by:

Charles B. Backstrom
