Subject: Generator Interconnection Requests - Mill Creek and Brown
Attachments: Acknowledgement of Completed Application for GI Request LGE-GIS-2022-003;
Acknowledgement of Completed Application for GI Request LGE-GIS-2022-004

Good morning all,

We have received the attached emails from the ITO acknowledging the applications for the CCCTs at Mill Creek and Brown are complete and valid. The requests have been assigned the following queue numbers:

Mill Creek – LGE-GIS-2022-003
E W Brown – LGE-GIS-2022-004

The ITO has proposed a webcast be held on July 21 for a Scoping Meeting. They are requesting that we provide our availability on that date. **Looking at our calendars, it appears we are all available between 1PM and 2 PM that day, so I will request that time unless there are any objections from the group.** The purpose of the Scoping Meeting will be to discussing points of interconnection, as well as to advise us of the option of performing Feasibility Studies or proceeding straight into System Impact Studies.

Thanks,

James Frank

Linn, Mike and James, Please review the attached files by close of business today and advise to all on this email any edits or comments. We plan to submit tomorrow or at the latest Monday.

- Joan - technical perspective.
- Mike - review the capacity and locations where we intend to file for conformance with Company needs.
- Linn and James - review the application to assure conformance with TranServ requirements.

Note: I think we need the “demonstration of site control files” that we had last year.

3.4.1 Initiating a Generator Interconnection Request.

To initiate a Generator Interconnection Request, Interconnection Customer must submit all of the following: (i) a \$10,000 deposit, (ii) a completed application in the form of Appendix 1, and (iii) demonstration of Site Control or a posting of an additional deposit of \$10,000. Such deposits shall be applied toward any Interconnection Studies pursuant to the Generator Interconnection Request. If Interconnection Customer demonstrates Site Control within the cure period specified in Section 3.4.3 after submitting its Generator Interconnection Request, the additional deposit shall be refundable; otherwise, all such deposit(s), additional and initial, become nonrefundable.

Thank you.
