

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Charles Rea

1. Please provide the total number of water service meters assigned to Lexington as a customer in the base period and in the forecasted test period, and the total revenue requirement assigned to Lexington as a customer in the base period and the forecasted test period.

Response:

The water service meters assigned to LFUCG (Lexington-Fayette Urban County Government) in the base period are:

5/8" Meter	70
1" Meter	89
1.5" Meter	5
2" Meter	79
4" Meter	6
6" Meter	4

The Company forecasted meter counts on an aggregate level. The number of meters by customer is not available for the forecast period. The Company's water revenue requirement is calculated for the total water operations and is not calculated on a customer level detail.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

2. Under how many different types of customer rate classes does Lexington currently make payments to KAWC? For each type of class, please provide the following information:
- (a) The type of customer rate class;
 - (b) The number of accounts in each such class;
 - (c) Whether such accounts are metered;
 - (d) The account numbers for each separate account;
 - (e) The physical location, by street address, GPS marker (or other easily understood designation) of each separate account;
 - (f) The basis and explanation for treating the account as a separate account, whether it is because it is separately metered or otherwise;
 - (g) The total amount paid by Lexington to KAWC for the provision of water for each of its separate accounts for each year, going back the inception of KAWC's last approved rate increase; and
 - (h) The total net projected impact for each such class under the proposed rate increase.

Response:

- (a) As of March 2023, LFUCG accounts are currently under Commercial, OPA, Private Fire and Public Fire rate classes.
- (b) As of March 2023, there are 2 accounts in Commercial, 238 in OPA, 46 in Private fire and 3 in Public Fire.
- (c) All Commercial and OPA LFUCG accounts are metered.
- (d) Please see KAW_R_LFUCGDR1_NUM002_081823_Attachment for the information requested.
- (e) Please see KAW_R_LFUCGDR1_NUM002_081823_Attachment for the

information requested. For the physical location of each public fire hydrant, please refer to KAW_R_LFUCGDR1_NUM018_0181823_Attachment.

- (f) A separate account is determined by the existence of a service line and meter to serve a specific premise.
- (g) Please see KAW_R_LFUCGDR1_NUM002_081823_Attachment for the service-related charges and tax amount billed to LFUCG for each year 2019 through 2022.
- (h) Please refer to Exhibit 37, Schedule M for the projected impact of each rate class under the proposed rate increase.

FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

3. Does KAWC believe that the filing and/or proposed rate increases will in any way change the types of services for which it pays franchise fees to Lexington? If so, please explain.

Response:

No, the filing and proposed rate increase will not change the types of services for which the Company pays franchise fees to Lexington.

5. Please list all of the tariffs applicable to the use or consumption of water in Fayette County for which KAWC does not currently pay Lexington a franchise fee.

Response:

The current Franchise Agreement (Resolution No. 21-2016; Renewed by Resolution No. 463-2020) provides in Section 19 (a) that the company pay a franchise fee of 3% of the “gross revenues” as defined in Section 19 (b), with an exception for nonrecurring charges. Section 19 (b) states that, "Gross Revenues," for purposes of this Ordinance, shall include all revenues received from customers in Fayette County from the sale of water, service charges based upon the size of facilities, municipal fire connections and hydrants, private fire connections and hydrants, temporary service connections for construction purposes, reconnection charges, returned check charges, service line inspection fees, and bulk sales to customers in Fayette County.”

The Company has an Activation Fee and Late Payment Fee in its tariffs that are not subject to the Franchise Fee. These are nonrecurring fees not expressly mentioned in the definition of “gross revenues” above.

6. Does KAWC or any other American Water Company subsidiary have a tariff, contract or other arrangement under which the costs related to public fire hydrants are passed through to one or more of the other customer classes? If so, please list the name of the jurisdiction and provide the details of the arrangement, including any relevant supporting documents.

Response:

Illinois – See KAW_R_LFUCGDR1_NUM006_081823_Attachment 1 for public fire protection service charges for one area of the state that is demonstrative of the state.

Indiana – Public fire protection charges are collected from retail customers through a separate fire service charge based on meter size.

Kentucky – Costs related and allocated to public fire hydrants are partially passed through to one or more of the other customer classes based on the current Commission approved tariffs. In addition, customers in Georgetown have a hydrant surcharge added to their bill that is provided to the City of Georgetown, which they utilize to pay their public fire hydrant charges.

Missouri – Public fire protection is included in base rates of other customer classes.

Tennessee - Public fire protection is included in base rates of other customer classes.

Iowa – Public fire protection is included in base rates of other customer classes.

California – Public fire protection is included in base rates of other customer classes.

New Jersey – Public fire protection charges are billed directly to municipalities on a monthly charge basis that varies by rate zone.

Pennsylvania – 75% of the public fire cost of service is included in base rates of the other customer classes the remaining 25% of the cost of service is billed directly to the governmental entity where the public fire hydrants are located.

West Virginia – Currently, 97% of the public fire cost of service is included in base rates of the other customer classes. The remaining 3% of the cost of service is billed directly to the governmental entity where the public fire hydrants are located on a one-time annual fee. Public fire rates to municipalities are frozen by Commission order since before the

year 2000 so any additional revenue requirements associated with public fire service will be recovered through base rates.

SCHEDULE OF RATES AND CHARGES

CLASSIFICATION OF SERVICE
PUBLIC FIRE SERVICE FOR METERED GENERAL WATER SERVICE

Section 9-223 of "The Public Utilities Act", as amended, authorizes a water utility to recover a charge for fire protection services from municipalities and fire protection districts only when provided for in a separate agreement between the municipality or the fire protection district and the utility. Public Fire Service Charges for the indicated municipalities and fire protection districts within the indicated District of the Company are listed below:

Available For

Public Fire Service in the areas indicated, except where service is provided under the Standard Private Fire Service Agreement included in the Company's Rules and Regulations.

Monthly Charges

All Metered General Water Service Customers located in a municipality or fire protection district in which public fire hydrants are connected to the Company's water mains shall pay a monthly Public Fire Service Charge in the amount as set forth below, such charge being in addition to the rates and charges set forth elsewhere in the tariffs for Metered General Water Service. Metered Irrigation Customers shall not be subject to a public fire charge on the irrigation meter if the premise is also being provided water service as a Metered General Water Service Customer.

<u>Location</u>	<u>Public Paid Service</u>	<u>Customer Paid Service Charge</u>

CLASSIFICATION OF SERVICE
FIRE SERVICE

PUBLIC FIRE HYDRANTS

Each municipality or governmental entity responsible for public fire service in the areas listed below shall pay for each public fire hydrant within its boundaries.

Monthly surcharge per hydrant: \$63.12

Where applicable: Clarksville, Seymour, and Summitville.

PUBLIC FIRE PROTECTION SURCHARGE

Applicability

Applies to all customers, with the exception of Sale for Resale customers, not located within the boundaries of the governmental entities responsible for public fire service in the areas listed in Public Fire Hydrants. Applicable to any water customer, with the exception of Sale for Resale customers, located in areas within municipal boundaries or to any water customer within 1,000 feet of a public fire hydrant (measured from the hydrant to the nearest point on the property line of the customer) on the Company's distribution mains in areas not within municipal boundaries. In addition to the charges for water service under currently approved tariffs, a public fire protection surcharge shall be charged to, and collected from, each customer to whom said surcharge is hereby made applicable. If multiple meters are installed the surcharge(s) shall be based upon the total of all meters installed.

CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Jeffrey Newcomb

7. Do any American Water Company subsidiaries currently have a contract under which they provide sewer billing services on behalf of a local government? If so, please provide the name of the subsidiary and local government and provide a copy of each contract.

Response:

Yes. Illinois-American Water Company provides sewer billing services to the City of Bolingbrook. Please refer to KAW_R_LFUCGDR1_NUM007_081823_Attachment for a copy of the contract.

SEWER BILLING AGREEMENT

THIS AGREEMENT is made and entered into this 25th day of July, 2002, by and between ILLINOIS-AMERICAN WATER COMPANY, a corporation organized under the laws of the State of Illinois, hereinafter referred to as the WATER COMPANY, and the VILLAGE OF BOLINGBROOK, ILLINOIS, a municipal corporation of the State of Illinois, hereinafter referred to as the VILLAGE.

WITNESSETH:

WHEREAS, the WATER COMPANY is engaged in the business of providing potable water service to the general public in, inter alia, Bolingbrook, Illinois and areas adjacent thereto; and

WHEREAS, the WATER COMPANY also provides sewer collection services in a portion of the VILLAGE and the VILLAGE provides sewer collection services in the remainder of the VILLAGE and sewer treatment services for the entire VILLAGE and each entity bills its customers for the services it provides; and

WHEREAS, the VILLAGE has requested the WATER COMPANY to perform billing and accounting for customers of the VILLAGE receiving sewer service (both collecting and treating) and the WATER COMPANY has agreed to provide said services to the VILLAGE, all pursuant to the terms and conditions contained herein;

NOW, THEREFORE, for and in consideration of the covenants contained herein, the parties hereby agree as follows:

1. (A) The VILLAGE and the WATER COMPANY shall, jointly, designate and cause to be identified on the WATER COMPANY's computer records, each customer of the WATER COMPANY who is also a sewer treatment customer, a sewer collection customer, or both a sewer collection and treatment customer of the VILLAGE (the "joint accounts"). The WATER COMPANY shall bill all joint accounts for sewer service charges on behalf of the VILLAGE, at the rates provided to it by the VILLAGE pursuant to Section 3.
- (B) Upon receipt of a written request from the VILLAGE, the WATER COMPANY shall also bill the VILLAGE's sewer service customers who are not also WATER COMPANY customers (the "sewer only customers"), if any; provided that the VILLAGE shall furnish to the WATER COMPANY such sewer service information for such customers as may be required by the WATER COMPANY for it to bill such customers for sewer service; and provided, further, that should such sewer only customers:

- (i) receive water from unmetered wells, such customers shall be billed at a flat rate for sewer service from the VILLAGE, as provided to the WATER COMPANY pursuant to Section 3 (the "flat rate");
 - (ii) receive water from a metered water system other than the WATER COMPANY's system, such customers shall be billed by the flat rate, unless the VILLAGE furnishes water meter readings for such a customer to the WATER COMPANY and requests that such customer be billed at the metered rate provided pursuant to Section 3; or
 - (iii) not receive water service from any source (e.g., a landlord whose tenants are directly responsible for their water service), the VILLAGE may request WATER COMPANY to bill such sewer only customer based upon a flat rate to be provided to the WATER COMPANY pursuant to Section 3 or, if the WATER COMPANY provides water service to its customer(s) at the same premises to which such sewer service is rendered, based upon the water use at such premises; provided the WATER COMPANY reserves the right to charge an additional fee, as may be hereafter agreed by the parties from time to time, for the service of determining the total water usage at such premises, in order to calculate such bill.
2. The WATER COMPANY shall be responsible for the sewer customer billing and accounting service for only those users of the sewer system of the VILLAGE identified pursuant to Section 1 above, and only during the term of this Agreement.
3. The VILLAGE shall, prior to the commencement of billing services by the WATER COMPANY pursuant hereto, furnish the WATER COMPANY with the rate or rates to be charged for each sewer collection; sewer treatment; and combination sewer services, including both the flat and metered rates and charges to be applied to delinquent accounts, if any. The VILLAGE may, from time to time, but no more frequently than once per year, notify the WATER COMPANY of any revisions of such rates; provided that such revisions shall not be effective until the billing cycle following the end of the month in which notice has been given.
4. The sewer customers to be billed by the WATER COMPANY pursuant hereto shall be billed on a cycle which is the same as the WATER COMPANY uses for the billing of its customers and on the same bill.

5. (A) The WATER COMPANY shall administer the accounts of the VILLAGE and prepare the bills for all customers of the VILLAGE receiving sewer service subject hereto in accordance with the regular and periodic billing procedure followed by the WATER COMPANY in the billing of its customers receiving water service. The WATER COMPANY agrees to observe the same diligence, policies, and procedures in the billing and accounting of the VILLAGE's sewer accounts subject hereto as it uses in administering and billing its water service accounts.
- (B) The VILLAGE is authorized to act as a customer bill payment collection center during the term of this Agreement. The WATER COMPANY will provide the VILLAGE access to the following WATER COMPANY customer billing records, via internet or e-mail, in conjunction with the bill payment collection services provided by the Village:
- Customer Name(s)
 Service Address
 Account Number
 Current amount due for Water Service
 Current amount due for Sewer Service
6. Water bill adjustments, which are granted as a result of over or under estimated water usage, over or under registration of water meters, underground leaks, faulty or inoperative meters, incorrect meter reading, or other recognized and proper adjustments which are granted to water customers by the WATER COMPANY to water customers which are joint accounts shall be accepted by the VILLAGE and be recognized in determining the billing for sewer charges, excluding, however, any flat rate sewer service charge customer. Any resultant adjustment to the sewer charge will be billed at the same time as is the water charge adjustment.
7. The WATER COMPANY will (i) calculate, as set forth above, the applicable sewer charges for each of the VILLAGE's sewer customers identified pursuant to Section 1; (ii) print the sewer bill therefor on the joint accounts' water bills; and (iii) deposit such bill in the United States mail, with a return envelope pre-addressed to the WATER COMPANY.
8. All of the VILLAGE's sewer charges paid by its customers will be collected and receipted by the WATER COMPANY and the WATER COMPANY shall transmit to the VILLAGE, by electronic funds transfer, twice per month, on the 3rd and 18th day of each month (unless such day falls on a Saturday, Sunday, or legal holiday, in which case such transmittal shall be made on the immediately preceding business day), such collections made on behalf of the VILLAGE during

the immediately preceding semi-monthly period (being the 16th through the last day of the immediately succeeding month and the 1st through the 15th day of such month, respectively), net of chargebacks during such period, less all amounts owed to the WATER COMPANY by the VILLAGE for its services pursuant to Section 11 hereof or the provision of water to the VILLAGE.

9. The WATER COMPANY shall maintain customer accounts receivable data for the VILLAGE's sewer customers, including monthly open balance reports, daily transaction reports, daily updating reports, monthly customer record reports, and monthly revenue summary reports, which shall be delivered to the VILLAGE monthly, by the fifteenth (15th) of the month following the month to which such reports relate.
10. (A) The WATER COMPANY shall prepare and mail a second notice on all delinquent accounts.

(B) The WATER COMPANY shall not, however, pursue legal proceedings to force the payment of delinquent accounts.
11. (A) In consideration of the services to be provided to the VILLAGE by the WATER COMPANY pursuant hereto, in addition to all fees payable pursuant to Section 11(D), the VILLAGE shall pay the WATER COMPANY, monthly, a sum equal to the result of multiplying thirty cents (\$0.30) by the number of sewer bills prepared by the WATER COMPANY and delivered to the VILLAGE's sewer customers during the immediately preceding month (the "2002 Bolingbrook Billing Expense"). The "2002 Bolingbrook Expense" shall be increased (or decreased) from time to time consistent with the increase (or decrease) in billing expenses, attributable to the preparation of Bolingbrook bills, experienced by the WATER COMPANY as reflected in rate cases filed before the Illinois Commerce Commission. The effective date of such rate increase shall be the same date as the effective date of the increase in general rates approved by the Illinois Commerce Commission. Such amount shall be withheld from the collections to be paid to the VILLAGE pursuant to Section 8.

(B) The WATER COMPANY shall render a statement to the VILLAGE by the tenth (10th) of each month setting forth the number of sewer bills prepared by the WATER COMPANY during the preceding month, the dollar amount owed therefor pursuant to subsection (A), the amount thereof which has been offset from collections which have been conveyed to the VILLAGE pursuant to such section, and a statement of any past due amount owed by the VILLAGE to the WATER COMPANY. The VILLAGE shall pay each statement so rendered on which there is an outstanding balance within thirty (30) days after the date of such statement.

- (C) Should the term of this Agreement be extended, for each sewer bill which is sent out by the WATER COMPANY, the charge per bill set forth above in subsection 11(A) shall remain in effect unless changed by the WATER COMPANY by giving ninety (90) days' advanced written notice to the VILLAGE prior to the end of the annual contract. At the end of such ninety (90) day period, such new charge shall automatically take effect.
- (D) The WATER COMPANY will absorb the initial costs to establish the WATER COMPANY's books, records, and billing equipment to accommodate the VILLAGE's sewer billing, for those customers identified in Section 1(A), whether such customers are joint customers as of the date hereof or become so in the future. This initial cost is estimated to be \$7,500.00. There may be additional costs associated with those customers identified in Section 1(B), which shall, notwithstanding the preceding, be reimbursed, in full, by the VILLAGE. There shall be no additional charge for Section 1(A) customers added in the future. In the event the VILLAGE subsequently changes its method or rates for sewer billing, it shall pay the WATER COMPANY's expenses to accommodate any such change.
12. The term of this Agreement shall commence with the termination of the Billing and Collection Agreement being executed by the parties contemporaneously herewith and shall continue until December 31, 2042. The Agreement shall automatically renew from year-to-year thereafter, unless one party gives ninety (90) days' advanced written notice to the other party of its intent not to so renew the Agreement. Notwithstanding the above, this Agreement may be terminated for cause, at any time, upon sixty (60) days' advanced written notice to the other party.
13. This Agreement shall be construed to be applicable to only the parties hereto and shall not confer any rights, privileges, or obligations on any third party, including customers of the WATER COMPANY and/or the VILLAGE.
14. It is mutually understood that there may be sewer customers of the VILLAGE who discharge waste into the sewage system of the VILLAGE but who obtain water from a source other than the WATER COMPANY. It is agreed that the VILLAGE may, in its sole discretion, elect to prepare sewer bills for such customers separate and apart from the bills prepared by the WATER COMPANY under this Agreement. The VILLAGE shall not, however, use any other preparation service, nor prepare its own bills, for any joint account, unless mutually agreed by the parties hereto.
15. The VILLAGE shall indemnify and save the WATER COMPANY harmless from and against any and all costs and expenses (including attorney's fees and court

costs) incurred as a result of the WATER COMPANY's reasonable performance hereunder. In no event, however, shall the VILLAGE be required to indemnify the WATER COMPANY for the WATER COMPANY's own intentional acts or acts of negligence.

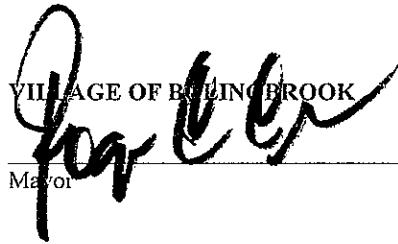

16. Payments received by the WATER COMPANY on a joint account will be applied to the WATER COMPANY customer account and the VILLAGE sewer customer account on a pro rata basis, such basis to be calculated based on the outstanding balance owed to each the WATER COMPANY and the VILLAGE, unless the customer has designated the party to whom the payment shall be paid, in accordance with the rules and regulations of the Illinois Commerce Commission. If the WATER COMPANY receives an overpayment, such overpayment shall, in accordance with the regulations of the Illinois Commerce Commission, be refunded to the customer or applied to the customer's account with the WATER COMPANY and the Village on a prorated basis.
17. This Agreement may not be assigned by a party without the express written consent of the other party.
18. This Agreement may not be amended, modified, or revised except by a written instrument executed by both parties.
19. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns.
20. This Agreement has been entered into and shall be construed in accordance with the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties hereto have caused their duly authorized agents to execute this Agreement to be effective as of the day and year first above written.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

8. Please describe in detail any ongoing efforts of KAWC to expand its sale or provision of water.

Response:

KAW responded to a 2023 request for proposal issued by the Peaks Mill Water District for acquisition of their water system. Through is normal business development efforts, KAW does engage in conversations with various Kentucky water providers that may be considering purchased water or water/wastewater system acquisition options.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

9. Please describe in detail any ongoing efforts of KAWC to expand its involvement with the Partnership for Safe Water or any other treatment programs established by the Environmental Protection Agency.

Response:

KAW plans to maintain involvement with Partnership for Safe Water by optimizing water treatment plant operation and performance through a culture focused on continuous improvement, providing our customers with high-quality water.

In 2023, KAW was recognized with 25-year Partnership for Safe Water “Directors” awards at both the KRS1 and RRS water treatment plants. KAW was also recognized with a 5-year “Directors” award at the KRS2 water treatment plant.

LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

10. Please describe in detail any and all lead testing services offered by KAWC to residential customers in Fayette County.

Response:

Kentucky-American performs testing at homes of customers every three years in accordance with EPA regulatory requirements on a sampling plan approved by the Kentucky Division of Water. Sample bottles are provided to customers with instructions for collecting first draw samples (i.e., water that has been in the lines for a minimum of 6 hours). Kentucky-American picks up the samples and provides the sample results to the customers as soon as they are available.

11. Please provide all information relating to prospective sales of water to communities or facilities outside Fayette County, and more specifically, whether such efforts are being increased due to additional water availability. If not, please explain. Please also explain any marketing or other efforts in detail and provide copies of any business or marketing plans.

Response:

Please refer to KAW_R_LFUCGDR1_NUM008_081823.

12. How many KAWC employees are located in Lexington, Kentucky? Please provide a description of the number and types of position for each. If KAWC anticipates any change within the next five (5) years, please provide the specific details.

Response:

KAWC currently has 130 employees located in Lexington, Kentucky. Of the 130 positions located in Lexington, 34 are salaried, 23 are non-union hourly, and 73 are union employees. KAWC does not anticipate any changes to our Lexington based headcount over the next five years, however we continue to assess staffing levels based on the needs of the system, customer base, etc. As the needs to the business change, we will adjust staffing levels to respond to the needs of the business.

13. How many public fire hydrants are currently in use? How many of these hydrants are billed to Lexington?

Response:

As of March 2023, there are 7,611 public fire hydrants in use and 6,942 are billed to LFUCG (Lexington-Fayette Urban County Government).

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

14. How many public fire hydrants are projected to be in use during the forecasted test period?
How many of these hydrants are projected to be billed to Lexington?
- (a) Please provide a list of all of the ratepayers (other than Lexington) who pay for any public fire hydrants.
 - (b) What percentage of gross revenue does KAWC derive from public and private fire protection charges/rates, or similar charges/rates?

Response:

An average of 7,661 public fire hydrants are projected for the forecasted test period. The Company projects the number of public fire hydrant including growth (loss) at the aggregate level and not at the customer level.

- a. Please refer to “KAW_R_LFUCGDR1_NUM014_081823_Attachment” for a list of the Company’s public fire customers.
- b. Public and private fire protection base and QIP revenues account for 7.37% of forecasted test year revenue at present rate.

LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

15. Is the Public Fire Service Revenue component of the cost of service study comprised of anything other than the total number of public fire hydrants and the tariff (KAWC Exhibit 36; KAWC Exhibit 37, Schedule M-3)?
- (a) What is the total number of public fire hydrants in the base period?
 - (b) What is the total number of public fire hydrants in the forecasted test year?

Response:

The Public Fire Service Revenue component in the cost of service study is comprised of public fire base rate revenues and public fire QIP revenues.

- a. The average number of public fire hydrants during the base period is 7,616.
- b. The average number of public fire hydrants during the forecasted test year is 7,661.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

16. Please provide a breakdown of the total number of the following fire hydrants in Fayette County: (a) public fire hydrants, (b) fire hydrants that are owned and maintained by KAWC, but located on private property, and (c) hydrants for which KAWC is not the owner. If possible, please provide the location of each hydrant. If this information is not available, please explain what action, if any, KAWC is taking to track this information going forward in time.

Response:

(a) KAW has on record 6,978 public hydrants in Fayette County on its maps. Please see the section labeled Public Hydrants Fayette County, KY on KAW_R_LFUCGDR_1_NUM016_081823_Attachment 1.

(b) KAW has listed 913 private hydrants, some of which are billed to LFUCG. These are generally located on private property but are connected to a KAW owned and maintained water line. Please see the section labeled Private Hydrants in Fayette County, KAW_R_LFUCGDR_1_NUM016_081823_Attachment 2.

(c) The total number of private hydrants owned and maintained by non-Kentucky American Water entities are in excess of 560hydrants. Please see the attached file for locations of each named as follows Privately Owned Fire Hydrants in Fayette County, KY within KAW_R_LFUCGDR_1_NUM016_081823_Attachment 3.

Each hydrant KAW owns or maintains (public hydrants and private hydrants) is collected via GPS and entered into KAWCs Geographical Information System (GIS) and MapCall System which is KAWC's computerized maintenance management system. Once the hydrant is installed, notification is sent to the company's billing department to begin billing the appropriate party. For privately-owned hydrants, KAWC initiates billing once the connection is installed.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

17. Please describe the process that is undertaken before a privately owned fire hydrant is added to KAWC's system. Please provide a copy of any contracts or other documents that are required to be followed or executed by the owner of the hydrant.

Response:

The determination as to whether a privately owned hydrant is to be installed is based on a KAWC-required review of the developer's plan by the fire department that will serve the planned development. A copy of the developer's plan with a sign-off or letter from the fire department is required before KAWC will initiate action. The developer initiates this review and KAWC receives a letter from the fire department indicating the acceptance of the location of the hydrant and an indication of the hydrant being considered as a private hydrant. A copy of a typical correspondence letter from the LFUCG Division of Fire and Emergency Services is attached.

The hydrant plans must be reviewed by KAWC in advance to determine that the proposed hydrant will meet and be installed per KAWC specifications. KAWC assigns an inspector to review and then prepares a work order estimate and requires a deposit for the estimated amount. The assigned inspector will coordinate any construction to be completed by KAWC contractors and inspect the installation. The developer also is required to sign a "Special Connections Agreement" for the hydrant and submit a Tap Application and Service Contract to establish a pre-billing account. Samples of these three documents are attached. Upon completion of the inspection of the installation, the tap set meter form is returned to billing for account activation and then billing begins.

Mr. Eric Stigall
Kentucky American Water
2300 Richmond Rd
Lexington, Ky. 40502

Re: Fire Features
Kearney Ridge Apartments
2663 / 2671 Kearney Ridge BLVD

Dear Mr. Stigall,

The Fire Department Water Control Office approves the location of (9) private hydrants, (19) 13R FDC and (19) PIV. The locations are highlighted in yellow.

If you need anything else, please feel free to contact this office.

Respectfully,

Captain Greg Lengal
Division of Fire and Emergency Services
Water Control Office
101 E. Vine Street Suite 555
Lexington, Kentucky 40507

APPLICATION FOR SPECIAL CONNECTION

Account No.	
Contract No.	
WBS Element No.	

This Application, made in duplicate this _____ day of _____, 20____, by _____, hereinafter called the "APPLICANT", to KENTUCKY AMERICAN WATER, a Kentucky corporation located at 2300 Richmond Road, Lexington, Kentucky, 40502, hereinafter called the "WATER COMPANY."

The APPLICANT, upon the terms and conditions hereinafter set forth, hereby applies to the WATER COMPANY for a private service, consisting of the right to connect a service pipe to a public water main on _____ in _____ Kentucky and attach to said service pipe the following fixtures and openings:

_____ () private fire hydrants (hydrant numbers);

all of which fixtures and openings to be located within or upon the premise of the APPLICANT abutting the street on which the said main of the WATER COMPANY is located.

In consideration for which privilege the APPLICANT agrees to be bound by all the terms and conditions of this Application and pay the WATER COMPANY for private fire protection service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this Application may be accepted by the WATER COMPANY are as follows:

FIRST: That this Application and the acceptance thereof by the WATER COMPANY may be subject to the prior approval of the fire department having jurisdiction of the premises to be served.

SECOND: That the entire service system on APPLICANT's premises shall be subject to the inspection, test and approval of the WATER COMPANY, and the WATER COMPANY by its representatives, shall have the right to enter the premises of the APPLICANT at any reasonable time for the purpose of making such reasonable inspections as it may deem necessary, and to insure compliance with the terms and conditions of this Application.

THIRD: That all pipes and appurtenances shall be constructed and maintained in good condition by and at the expense of the APPLICANT.

FOURTH: That a fire line meter or detector device, approved by both the WATER COMPANY and the fire underwriters, will be required on the service at a location approved by the WATER COMPANY. Such meter or device shall be installed and maintained by and at the cost and expense of the APPLICANT, but subject to the inspection and approval of the WATER COMPANY. The bypass meter only, used with the detector device, shall be furnished, installed and maintained by the WATER COMPANY at its cost and expense.

FIFTH: That a gate valve with the post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the WATER COMPANY, and shall be furnished, installed and maintained by and at the expense of the APPLICANT, and unless otherwise approved by the WATER COMPANY, said valve shall be installed in a valve pit or vault which shall also be furnished, installed and maintained by and at the expense of the APPLICANT.

SIXTH: That all hydrants and other fixtures connected to any private fire protection service system shall be kept closed and sealed, and not opened or used except during times of fire or testing. Upon extinguishment of each fire or following each test, the APPLICANT shall immediately close such fixtures and notify the WATER COMPANY so that they may be sealed. Whenever a private fire protection service system is to be tested, the APPLICANT shall notify the WATER COMPANY at least two business days in advance of such proposed test, requesting approval of the method, day and hour on which it is to be made.

SEVENTH: That no antifreeze or any other substance not specifically approved by the Environmental Protection Agency as non-detrimental to the public water supply, shall be introduced into sprinkling systems or into any pipe, fixture, appurtenance or other portion of the APPLICANT's private fire protection service system.

EIGHTH: That the APPLICANT understands and agrees that the extent of the rights of the APPLICANT under this Application is to receive, at times of fire on said premises, such supply of water as shall then be available and no other or greater quantity. The APPLICANT further acknowledges and agrees the WATER COMPANY shall not be considered in any way or manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and the WATER COMPANY shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

NINTH: That this Application does not contemplate uses of fixtures other than those shown on Exhibit A. Any waste of water or use of water through this connection for purposes other than testing or the extinguishment of fire, shall be deemed a violation of the terms and conditions of this Application and of the rules, regulations and conditions of service of the WATER COMPANY.

TENTH: That if private fire hydrants are included as part of this Application, they shall be painted any color other than that adopted by the WATER COMPANY for public fire hydrants.

ELEVENTH: That the APPLICANT shall furnish, attach and make a part hereof marked Exhibit A, three (3) complete sets of drawings showing the pipes, pumps, valves, hydrants, sprinkler systems, hose outlets and connections, standpipes, tanks and other openings and appurtenances contemplated in this Application. Such drawings, which shall be stamped "Approved" by the Insurance Services Office or other comparable agency approved by the WATER COMPANY, must also show all other water supply systems and pipelines and appurtenances which are proposed or which may exist on the premises to be served.

TWELFTH: That no pipe, fixture or appurtenance connected with the private fire protection service served by this Application shall be connected with any pipe, fixture or appurtenance supplied with water from any other source, unless specifically approved in writing by the WATER COMPANY.

THIRTEENTH: That the APPLICANT agrees to obtain in writing in advance the approval of the WATER COMPANY for any change, alteration, addition or deletion contemplated in the pipes, fixtures, openings and appurtenances and uses herein specified. Notwithstanding the approval of the WATER COMPANY, APPLICANT agrees that, except for those facilities which the WATER COMPANY had specifically agreed to provide and maintain, APPLICANT is and will be solely responsible for the design, adequacy, function and maintenance of its private fire protection service system referred to in this Application.

FOURTEENTH: That the WATER COMPANY has the right to discontinue or disconnect the service pipe herein applied for, and to terminate service under this Application, after due written notice to the APPLICANT, for failure to pay any bill when due, for failure to supply information to WATER COMPANY about the service system when so requested in writing, for leakage within APPLICANT's system, for violation of any of the terms and conditions of this Application, or for any violation of its rules, regulations and conditions of service; and the WATER COMPANY also has the right to shut off all or any part of its facilities by the WATER COMPANY(1) if a condition dangerous or hazardous to life, physical safety or property exists, (2) upon order by any court, the Public Service Commission or other duly authorized public authority, (3) if fraudulent or unauthorized use of water by APPLICANT is detected, or if the WATER COMPANY's regulating or measuring equipment has been tampered with by the APPLICANT.

FIFTEENTH: That upon acceptance of this Application by the WATER COMPANY and the completion of the installation of the service applied for, this Application shall be in full force and effect as a contract and shall continue as such until cancelled by written notice given thirty (30) days in advance by the APPLICANT to the WATER COMPANY, except as otherwise provided in numbered paragraph (14) above.

SIXTEENTH: The acceptance of this Application by the WATER COMPANY must be executed by its Director of Engineering before same becomes effective.

SEVENTEENTH: If ownership of the property served by the service applied for herein changes, notice thereof shall be given to the WATER COMPANY within thirty (30) days and the new owner shall be identified by name, address and proper person to contact.

EIGHTEENTH: That the APPLICANT or his agent is responsible for payment of the deposit for the estimated cost of construction to WATER COMPANY. To the extent there is any refund to be made at the end of the project after all costs are accrued, such refund will be paid to the APPLICANT by check made payable to the APPLICANT. To the extent that any amount is owed to WATER COMPANY at the end of the project after all costs are accrued, payment of such amounts is the responsibility of the APPLICANT. To the extent the APPLICANT owes any of the refunded amount to the contractors, APPLICANT agrees it is responsible for these amounts owed and that WATER COMPANY has no responsibility in that regard.

IN WITNESS WHEREOF, the APPLICANT has hereunto signed the day and year:

IMPORTANT: This application must be completed and returned with the tap fee. Proof of inspection and approval of water service by State Plumbing Inspector required. A signed "Contract for New Service" is required. Allow 20-25 days for service to be installed after all paperwork is received. **(PLEASE NOTE- Services larger than 2" are applied for and coordinated through the New Development/Construction Department. Installation time will vary but will be a minimum of 90 days after application is made.)**

PLEASE ENSURE ADDRESS IS MARKED AND VISIBLE FROM THE STREET

The undersigned makes application for water service at Address _____

County _____ Subdivision _____ City _____ Zip _____

and hereby requests Kentucky American Water to make a connection to its main. **Kentucky American Water will specify the location, size, kind and quality of all material entering into the service connection and will set and turn on the meter.** The undersigned has completed the following requirements for the installation of a water meter at the above address:

1. Service line has been installed to the point where the meter is to be permanently connected **and** visibly marked by the customer to identify the connection point. **Non-residential service lines are required to have a testable approved backflow prevention device installed.**
2. The service line which connects the customer supply at the meter setting is _____ inch (minimum 3/4") and will require a _____-inch meter to be set **(1 1/2" and larger meters require a completed Customer Data Sheet)**. The service line is at 30 inches below ground level. **Service lines up to 2"** will have Type "L" or "K" copper line installed at the connection point or affixed with a male adapter at the connection point if the customer's line is other than Type "L" or "K" copper. **Service lines larger than 2"** will have Ductile Iron pipe or C-900 plastic pipe installed to the connection point. If another type of pipe is used at the connection point, the customer is required to make the connection; and
3. This service line is equipped with an easily accessible stop and waste valve inside and near the foundation of the building being supplied.

THE UNDERSIGNED AGREES TO THE FOLLOWING:

- Comply with all rules and regulations of Kentucky American Water, as approved by the Kentucky Public Service Commission.
- Comply with local codes and ordinances in the construction, use and alteration of the plumbing system.
- If non-residential, shall install an approved backflow prevention device to avert a cross connection or backflow condition.
- Shall not create an electric shock hazard by improper electric grounding to the plumbing system. Kentucky American Water assumes no responsibility for continuity of electrical grounding systems by the installation or removal of its meter.
- Must, at all times, take necessary measures to protect the meter box, meter setting and service line and is responsible for damages to Kentucky American Water property caused by them, their contractor and/or subcontractors.

THIS METER SERVES THE FOLLOWING PREMISE TYPE (CHECK ONE):

- Residential (single premise residence, duplex, or multiple premise residence where each unit is served by its own meter).
- Commercial (multiple premise residence [apartment building] served by a single meter, private educational institutions, all businesses where water is not used principally in manufacturing or processing of a product. Commercial includes laundries, hotels, motels, restaurants, bars, non-government office buildings, non-government hospitals and other medical facilities, retail shops, etc.)
- Industrial (manufacturing or processing establishments where the water is used principally in the manufacturing or processing of a product. Industrial includes factories, refineries, bottling plants, etc.)
- Other Public Authority (OPA) (municipal, county, state, or federal agencies). OPA includes municipal buildings, public schools, public libraries, government hospitals, fire stations, public housing developments, etc.
- Sales for Resale (sales to private or public water utilities where the water is to be resold to the customers of the utility).

SEWER SERVICE PROVIDED BY (CHECK ONE):

- LFUCG GEORGETOWN MUNICIPAL ROCKWELL VILLAGE TREE HAVEN
- SEPTIC IRRIGATION ONLY OTHER N/A (FIRE HYDRANT/FIRE SERVICE)

CONTRACT FOR NEW SERVICE

FOR KENTUCKY AMERICAN WATER OFFICE USE ONLY:

Premise No.: _____ Acct. No.: _____ Customer No.: _____
 Application for Special Connection No.: _____ WBS No.: _____
 Type of Service: _____
 Person assigned: _____

I hereby make application and authorize Kentucky American Water to place a meter and turn on the water at the following address, and I agree to pay all bills by the due date specified on the bill for water furnished to any address where I either have an interest in the ownership of the property, directly or indirectly, or have requested service, and I hereby agree to continue to be responsible for the same until I notify Kentucky American Water in writing to the contrary.

I agree to take the necessary measures to protect the meter box, meter setting and the service during the installation of new services. I will be responsible for damages to Kentucky American Water property caused by me, my contractor and/or sub-contractor during on-site construction.

I agree to abide by the local codes and ordinances in the construction, use, and alteration of my plumbing system. I shall not create an electric shock hazard by improper electric grounding to the plumbing system. I agree to install an approved, testable backflow prevention device on all nonresidential incoming lines and irrigation systems to prevent the creation of a cross connection or backflow condition.

Kentucky American Water assumes no responsibility for continuity of electrical grounding systems by the installation or removal of its meter.

I agree to abide by and comply with all rules, regulations and rates of Kentucky American Water, as approved by the Public Service Commission of the Commonwealth of Kentucky and as changed from time to time.

If, at any time, any bill owed by me to Kentucky American Water, whether collectible under this Agreement or otherwise, is not paid when due and payable, then Kentucky American Water shall have the right to discontinue the supply of water to the location.

PLEASE COMPLETE THE FOLLOWING INFORMATION (return with deposit and signed agreements)

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

18. Please provide the following information with respect to public fire hydrant charges:
- (a) The total number of hydrants charged to Lexington during the base period;
 - (b) The total number of hydrants charged to Lexington during the forecasted test period;
 - (c) The basis for the projection of the number of hydrants charged to Lexington during the forecasted test period;
 - (d) Any adjustment to hydrant charges to reflect system uses of hydrants, including but not limited to flushing the KAWC system; and
 - (e) Please provide the number (quantity), type, and location (by street address or other easy to identify locator) of each fire hydrant for which Lexington currently pays a monthly tariff.

Response:

- (a) The current total number of active public fire hydrants charged to Lexington is 6,954.
- (b) The Company forecasted the hydrant count on an aggregate level. The number of hydrants by customer is not available for the forecast period.
- (c) Please see response to (b).
- (d) There is no adjustment to hydrant charges reflecting system uses of hydrants for flushing.
- (e) Please see KAW_R_LFUCGDR1_NUM018_081823_Attachment for the hydrant number, fire district, street, latitude and longitude, and street number and cross street (if available) for each of the 6,954 active public hydrants for which Lexington currently pays a tariff charge. Type was not defined, and therefore, not provided.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Charles Rea

19. Please detail the administrative cost component attributable to public fire protection, and provide any applicable work papers showing how the cost component is calculated.

Response:

The administrative cost component attributable to public fire protection is \$1,177,082 as shown on Column R Row 250 in the "Account Detail" tab of the Company's filed cost of service analysis.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

20. What is the cost to KAWC (per unit) to acquire each type of fire hydrant?
- (a) Would the creation of a tariff under which a public utility owned its fire hydrants result in a reduction in the existing public fire hydrant tariff?
 - (b) Why or why not?

Response:

KAWC purchases three types of hydrants. The uninstalled cost for just the hydrant ranges between \$1,205 to \$1,375. The use of each type of hydrant is determined by the location that the hydrant will be installed. The overall material cost for the installation of a fire hydrant is typically around \$2,500-3,500 which includes the hydrant, necessary hydrant valve, and other ancillary material.

- a. KAWC is unable to speculate on the effect on existing public fire hydrant tariffs if there was a creation of a tariff as described in the request.
- b. Many factors go into determining the allocation of revenue requirements in a cost of service study for each customer class (of which public fire is one) that may or may not change depending on the ownership structure of the hydrants or any of the assets providing service.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

21. How many additional new fire hydrants does KAWC anticipate being installed in Fayette County over the next 5 years for which Lexington would be billed? Please net out any hydrants that would be removed from the system as part of this calculation.

Response:

KAWC only installs and removes hydrants as directed by LFUCG Division of Fire and Emergency Services Water Control Office. The location and number of any additional hydrant installations associated with new development is determined by LFUCG during plan review. We are unable to speculate as to the net increase in fire hydrants that will be requested over the next 5 years.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

22. For the billing period ending June 29, 2023, LFUCG's cost for leasing public fire hydrants was \$374,396.34 (reference account ending -6506). Please calculate a hypothetical bill for the same billing period, applying the changes proposed in this rate case. Provide the hypothetical cost as a total dollar amount and as a percent increase from the actual bill.

Response:

Please see below bill comparison for LFUCG account ending 6506.

# of Hydrants	6,941		
	Current	Proposed	
Rate Per Hydrant	\$ 48.70	\$ 66.70	
Base Charge	\$ 338,026.70	\$ 462,964.70	
QIP Rate	4.49%	0.00%	
QIP Charge	\$ 15,177.40	\$ -	
	\$ 353,204.10	\$ 462,964.70	
3% Franchise Taxes	\$ 10,596.12	\$ 13,888.94	
3% School District Taxes	\$ 10,596.12	\$ 13,888.94	
	<u>\$ 374,396.34</u>	<u>\$ 490,742.58</u>	
Proposed % Increase		31.08%	

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter and Krista Citron

23. Provide examples, if any, of how revenue generated by the QIP has enhanced available fire flows.

Response:

For planned main replacements located within LFUCG's area, KAWC follows the directives of the Lexington Fire Department on the addition of new hydrants, relocation of existing hydrants, or removal and replacement of older hydrants. In areas where smaller diameter water mains (less than 8 inches) are being replaced with new mains at least 8-inch in diameter, hydrants may be added.

Because KAWC has been able to upsize the water mains in some parts of the distribution system, QIP Years 1-3 have added 27 additional fire hydrants to the system, and QIP Year 4 is proposing to add another 12 new fire hydrants.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

24. Please describe any and all efforts by KAWC to improve public fire protection service since the last rate case.

Response:

Please see the response to KAW_R_LFUCGDR1_NUM023_081823 for a discussion of fire protection enhancements relating to main replacements and the addition of infrastructure related to fire protection, specifically flows and hydrants. Please see the responses to KAW_R_LFUCGDR1_NUM025_081823, KAW_R_LFUCGDR1_NUM026_081823, and KAW_R_LFUCG_NUM027_081823 regarding the process of maintaining the public fire hydrant network.

Since the last rate case KAWC has replaced/installed 550 fire hydrants in Fayette County.

Through main replacements, KAWC has been able to increase the diameter of water mains that have allowed for the installation of over 27 of these hydrants in the system. Over the next year, KAWC expects that planned main replacements will allow for an additional 12 hydrants to be installed.

In May 2023, KAWC completed the installation of 1,450 LF of 12-inch diameter ductile iron main to complete a water main loop on S Forbes Rd in Lexington from US 60 Versailles Rd to KY 1681 Manchester St, which improved system hydraulics, increasing fire flow residual pressures from approximately 24 psi to 57 psi for a fire flow of 3,500 gpm on hydrants located along S Forbes Rd. This improvement also increased total available fire flow from approximately 3,500 gpm to 6,500 gpm on hydrants located along S Forbes Road.

A similar project is in place to retire an 8" unlined cast iron main along Winchester Rd crossing I-75, through the installation of a new 16" DIP main, crossing I-75 from Sir Barton Way to Polo Club Blvd. which will increase available fire flows and improve system pressure in eastern Fayette County.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

25. Please explain in detail KAWC's current policies, procedures, practices, and/or guidelines for testing, maintaining and/or replacing fire hydrants in Fayette County and provide copies of the same.

Response:

Kentucky American Water has an annual program to inspect every hydrant in the system and record flow data except during periods of extreme drought or other weather conditions that would impede the flow testing process.

During inspection, the caps are opened and the hydrant is flowed at a low amount. The hydrant is then shut, caps replaced, and the hydrant is opened to full pressure to show any leaks. The hydrant is then shut and visually inspected.

During a hydrant flow test, each hydrant is opened and flowed at full flow for at least two minutes. The static pressure, flow rate, and residual pressures are noted. The hydrant is then inspected and all outlets are inspected. If further maintenance is required based on either inspection, the hydrant is removed from service and repaired. Some minor repairs can be done by field service personnel at the time of the inspection with the hydrant in place. Other repairs require physical removal of the hydrant that are scheduled and performed in the field. Generally, a hydrant is replaced if it requires more extensive repairs than those that can be done in the field.

Attachment 1 is a copy of a hydrant inspection form and Attachment 2 is the KAW hydrant inspection practice. The attachments are confidential and provided pursuant to a Petition for Confidential Protection.

26. Please describe in detail all inspections, maintenance, or testing that must be performed by KAWC on each type of fire hydrant to ensure that it operates properly, and provide a list breaking down each of the components of the above and its cost, as well as how frequently each of the above must be performed, or actually is performed. Also describe in detail all maintenance that must be performed by KAWC on the public fire system to ensure that it operates properly. Please explain how KAWC maintains any such records.

Response:

Kentucky American Water has an annual program to inspect every hydrant in the system and record flow data except during periods of extreme drought or other weather conditions that would impede the flow testing process.

During inspection, the caps are opened and the hydrant is flowed at a low amount. The hydrant is then shut, caps replaced, and the hydrant is opened to full pressure to show any leaks. The hydrant is then shut and visually inspected.

During a hydrant flow test, each hydrant is opened and flowed at full flow for at least two minutes. The static pressure, flow rate, and residual pressures are noted. The hydrant is then inspected and all outlets are inspected. If further maintenance is required based on either inspection, the hydrant is removed from service and repaired. Some minor repairs can be done by field service personnel at the time of the inspection with the hydrant in place. Other repairs require physical removal of the hydrant that are scheduled and performed in the field. Generally, a hydrant is replaced if it requires more extensive repairs than those that can be done in the field.

Please refer to KAW_R_LFUCGDR1_NUM025_081823 for a description of KAW's inspection practices, maintenance, testing frequencies, and procedures. They are confidential and are subject to a petition for confidential treatment.

Pricing for complete hydrant assemblies and parts are listed below:

Complete Fire Hydrant Assembly: \$1,375.75 each
Upper stem Assembly: \$140.09 each
5 ¼ Safety Brake flange Kit: \$130.91 each
4 ½ Safety Brake flange Kit: \$128.82 each
Hydrant Operating Nut \$175.89 each
Hold Down nut \$45.79 each
6" Extension Kit \$307.53 each

12" Extension Kit \$337.13 each

18" Extension Kit \$397.43 each

All records of repairs or replacements are maintained within our computerized work management system. The same basic parts exist regardless of hydrant manufacturer.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

27. Please provide the standard(s) that KAWC is using to determine that a fire hydrant is leaking, failed or obsolete. If a hydrant is identified in such a condition, is it still billed to the customer, or is immediately removed from future billing until corrected?

Response:

Please refer to KAW_R_LFUCGDR1_NUM025_081623 for inspection procedures and notification procedures for hydrants that are out of service. Hydrant billing is not paused or stopped while repairs or replacements are completed.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

28. Is there a minimum flow rate at which KAWC deems a fire hydrant not to be useful? What if anything, is done with respect to such hydrants, when they are identified? If there is a difference in how different types of hydrants are treated, please explain.

Response:

KAW will not generally install a hydrant unless it is going to be attached to at least a six-inch main and flow at least 250 gallons per minute (gpm). For hydrants that flow less than 500 gpm, KAW will paint the caps red to indicate a low-flow hydrant. For existing hydrants, KAW believes that any flow is useful for flushing purposes. Generally, KAW would expect that local fire officials request removal of any hydrants they do not consider useful, whether for either low flow or other reasons.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

29. Does KAWC require its privately-owned fire hydrant or service customers to provide any evidence or documentation that such systems are being adequately maintained, inspected, or tested on regular basis, or does KAWC ever perform any testing? Please explain.
- (a) What, if anything, does KAWC do if it comes to its attention that a privately owned fire hydrant is no longer operable?

Response:

It is the responsibility of the property owner to maintain, inspect and test privately-owned fire hydrants on a regular basis, subject to the requirements of the respective fire department, state fire marshal, building codes and the property owner's insurance providers. KAWC does not require customers to provide documentation of maintenance or inspections.

- (a) If KAWC learns that a privately-owned fire hydrant is no longer operable and no other service is connected to the line, KAWC may shut off the service and cease billing, subject to attempts to resolve the issue with the customer.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

30. Would KAWC object to the PSC implementing additional minimum requirements with respect to maintenance, performance, or operational standards for all fire hydrants in Fayette County? Please provide a detailed response.
- (a) Does your answer differ depending upon the type of hydrant involved (public, private, and privately owned)? If so, please explain why.

Response:

KAW is unable to provide a detailed response to this question without an understanding of the additional minimum requirements the PSC might propose. As posed, the question is vague and KAW does not know what is meant by “additional minimum requirements.” There are national and international standards for fire hydrants which all water utilities in the Commonwealth must meet and one standard for all utilities should be the policy for compliance. Lexington has been judged to meet the highest ISO rating in the past, as noted in the news article (KAW_R_LFUCGDR1_NUM030_081823 Attachment 1), in part, due to the maintenance and replacement of KAW assets that support fire protection in the region.

Fire department's top rating is good news for your insurance rate

BY BETH MUSGRAVE
 bmusgrave@herald-leader.com

Lexington's fire protection is now among the best in the country, according to an independent analysis released Tuesday.

The Insurance Service Organization, which measures the effectiveness of fire protection, recently moved Lexington to Class 1, the top category. Only 241 of

46,200 rated fire departments receive that designation. Lexington had been a Class 2 city for more than a decade.

Mayor Jim Gray announced the new rating Tuesday at City Hall.

"We have dramatically, significantly improved Lexington's fire protection rating," Gray said. "Only one-half of one percent of the departments nationwide are rated as Class 1 fire departments."

The ISO rankings are used by insurance companies to help set insurance rates, said Tom Weber of ISO, who attended Tuesday's news conference. The ISO ranks cities every four to five years.

The higher rating means some residents and businesses could see a slight decrease in insurance rates, depending on the insurance company and where people live in the city, Fire Chief Kristin Chilton said.

"Businesses are often what will see the biggest change," Chilton said. "But that depends on the insurance carriers."

Chilton said she's proud that the fire department had received the elite status. It took years of city investment in a host of departments

SEE FIRE, 4A

FROM PAGE 3A

FIRE

to achieve the ratings, she said.

"This is a team effort, and we are lucky to have the division of E911 and Kentucky American Water working with us in Lexington."

There are eight Class 1 fire departments in Kentucky.

Weber said the independent agency looks at emergency communications, properties' distance to fire stations and fire hydrants, equipment, public education, and fire prevention. Lexington's climb to Class 1 was credited to better response time, community service and outreach campaigns, new structures including a training tower, and improvements to the water supply system.

The city opened a new emergency operations center and combined its E911 operations. It also

added additional staff to E911 in response to complaints about 911 delays. Kentucky American Water has upgraded its water infrastructure, which is important in fighting fires. Kentucky American Water has 7,000 public hydrants used by the fire department.

Response times for fires in the rural areas of Fayette County have been a concern in the past. In December, 23 horses died at the Mercury Equine Center off Russell Cave Road. The owner of Mercury said it took too long for fire crews to make it to the barn. City officials said at the time that it took 13 minutes for Lexington fire crews to arrive after being dispatched.

Chilton said Tuesday that the Class 1 rating was for the fire department. The rural area, where many horse farms are located, don't have the same type of fire rating.

"When we get way out into the rural area where we don't have the water supply that we have in the city, we are never going to be Class 1 protected in the county," Chilton said.

Chilton said Tuesday that the city will have to work to maintain its Class 1 rating. A fire station in the Eastland Parkway and New Circle Road area is being moved. A new fire station in the Masterson Station area will be added in a few years. A new fire training building was recently built on Old Frankfort Pike.

"This standard is a performance-based standard," Chilton said after the news conference Tuesday. "Anytime we add a fire station, ... that will decrease the response times."

CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

31. Are all privately-owned water lines metered at some point? If not, please explain how a determination is made with respect to whether such a line is metered.

Response:

Meters do not exist at all points of demarcation between KAW water mains and privately-owned water lines. Generally, from a period between 1967 and 1988, special connection multiple services agreements were executed that would allow the ownership, installation and maintenance of waterlines constructed by developers to remain the responsibility of the private developer and other public agencies and a special connection valve serves as the point of demarcation. The private mains installed under these type of special connection agreements were beneficial to customers as they did not require the capital outlay for the installation or replacement of pipeline but provided revenue for the use of water, as meters are installed along the privately owned main to meter domestic usage. The company ceased executing new special connection multiple services agreements in 1988, however some entities such the University of Kentucky continue to expand and modify their privately owned system, past the special connection valve. All new connections for service along KAW's system, other than for purposes of fire protection, are metered to measure full usage flowing across the connection.

Privately owned main serving infrastructure for fire protection purposes are not fully metered for usage. However, the installation of these special connections for fire service require a double detector check valve assembly device which incorporate a meter that allows for the detection of and partial measurement of usage occurring across the fire service line.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis and Shelley Porter

32. Please refer to KAWC Tariff “Classification of Service – Service Classification No. 4.”
- (a) How many customers have meters installed by KAWC because of suspicion of usage other than fire extinguishment? Does LFUCG have any of its accounts for First Service with such a meter? If so, please identify the account location and number.
 - (b) How many “special connections” with service contracts does KAWC have? Does LFUCG have any of its accounts serviced through such a contract? If so, please attach a copy of each such contract.

Response:

- a. To the best of KAWC’s knowledge, no permanent meters have been installed by KAWC due to suspicion of usage other than fire extinguishment.
- b. Please see KAW_R_PSCDR2_NUM082_081823_Attachment for a listing of Special Connection Multiple Service Agreements. LFUCG maintains private facilities associated with two special connection valves for LFUCG’s Lakeside Golf Course and LFUCG’s Gary Brewer Jr. Course at Picadome, formerly known as the Big Elm Country Club. Additionally, LFUCG has a service connected to University of Kentucky’s private main serviced under a Special Connection Multiple Service Agreement valve. This service is for LFUCG’s composting facility. Please see KAW_R_LFUCGDR1_NUM032_081823_Attachment for copies of the Special Connection Multiple Services Agreements associated with the two golf course facilities.

19

MULTIPLE SERVICE AGREEMENT

ARTICLES OF AGREEMENT entered into this 5th day of May,
19 69, by and between CITY OF LEXINGTON
(hereinafter referred to as the "Owner"), and LEXINGTON WATER COMPANY, a corporation
in the State of Kentucky, (hereinafter referred to as the "Water Company");

ARTICLE ONE

WHEREAS, the Owner owns and is developing A GOLF COURSE AND RECREATION
AREA ON a certain tract of land located ON RICHMOND
ROAD EAST OF SQUIRES ROAD, (such entire tract being hereinafter
sometimes referred to as SAID TRACT) and desires sanitary
water service at this location.

WHEREAS, the Owner proposes to construct various building(s) on said tract
and has requested the WATER COMPANY to furnish water service to all such buildings
and

WHEREAS, the Owner's plan for installing water facilities in the said
tract contemplates the installation of individual service lines to each of the var-
ious building(s), and

WHEREAS, the Water Company is a public utility Corporation duly authorized
to furnish water service to customers located in the area in which the tract of land
will be developed but it is under no obligation to install water service facilities
on property owned by a private individual or corporation such as the Owner; and

WHEREAS, the Water Company, in order to furnish proper and efficient water

service in the manner requested by the Owner, must have the right of access to the entire tract of land, the streets therein and the individual building(s) thereon for the purpose of operating or controlling service lines, shut-off valves, and meters; and

WHEREAS, the Water Company is willing to furnish water service to said tract in the manner requested by the Owner, but only under and subject to the following terms and conditions:

NOW, THEREFORE, the parties hereto for and in consideration of the mutual covenants and agreements hereinafter set forth, and intending to be legally bound by the terms hereof, agree with each other as follows:

1. The Water Company will make available to the Owner a water service connection to furnish water service to said tract and such connection to be located as shown on the attached drawing.
2. The owner will install at its expense all water facilities required, including such control facilities as the Water Company requires.
3. Upon receipt of duly executed water service applications on the forms supplied by the Water Company, the Water Company will install at its expense individual water meters in the meter setting provided by the owner.
4. The Water Company will read each meter monthly or quarterly and bill separately for each individual meter at rates established from time to time by the Public Service Commission of Kentucky.
5. The Owner hereby grants to the Water Company the free, unlimited and unrestricted right of access to all property within the limits of said tract so that the Water Company representatives may install, maintain, read, inspect and replace the individual water meters and otherwise control the distribution of water to the individual buildings.

6. The Water Company has the right to discontinue water service to any of its customers for non-payment of water bills or for certain violations of its rules and regulations. In any instances where one common service line is used to supply two or more individual customers, the Water Company will, in the event of non-payment or such a violation of its rules, attempt to obtain payment or compliance by first discontinuing water service to such customer by shutting off water service at the water meter. However, if such action is not effective, the Water Company reserves the right to discontinue water service to the building in which such customer is located by shutting off the water service at the control valve located outside of the building until payment is made or the rules and regulations are complied with by such customer.

7. The Water Company accepts no liability or responsibility for the adequacy or condition of the water facilities installed on said tract by the Owner and shall be under no obligation of maintaining, repairing, or replacing any water facilities in or upon the property of the Owner other than the individual water meters or other facilities which it may install or attach to said facilities of the Owner pursuant to this Agreement.

8. It is expressly understood by the parties hereto that the private fire hydrants to be installed on the premises of the Owner are subject to the conditions and restrictions set forth in Agreement titled "Application for Special Connection".

9. It is expressly understood by both parties that water furnished under this Agreement will not be resold by the Owner.

10. It is further understood and agreed that the Owner(s) shall cause to have all facilities installed pursuant to this Agreement tested in the presence of a representative of the Lexington Water Company and in accordance with Lexington

Water Company pipe line standard specifications. Said test to be conducted prior to initiating service to said tract.

11. The acceptance of this Agreement by the Water Company must be executed by it's President or Vice-President before same becomes effective as a contract.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be duly executed by their appropriate officers the day and year first above written.

MULTIPLE SERVICE AGREEMENT

ARTICLES OF AGREEMENT entered into this 12th day of August,
 19 77, by and between BIG ELM COUNTRY CLUB
 (hereinafter referred to as the "Owner"), and KENTUCKY-AMERICAN WATER COMPANY,
 a corporation in the State of Kentucky, (hereinafter referred to as the "Water
 Company");

ARTICLE ONE

WHEREAS, the Owner owns and is developing Big Elm Country Club
 a certain tract of land located at the
end of Parkway Drive, (such entire tract being
 hereinafter sometimes referred to as Big Elm Country Club) and desires
 sanitary water service at this location.

WHEREAS, the Owner proposes to construct various building(s) on said tract
 and has requested the WATER COMPANY to furnish water service to all such buildings
 and

WHEREAS, the Owner's plan for installing water facilities in the said
 tract contemplates the installation of individual service lines to each of the var-
 ious building(s), and

WHEREAS, the Water Company is a public utility Corporation duly authorized
 to furnish water service to customers located in the area in which the tract of
 land will be developed but it is under no obligation to install water service
 facilities on property owned by a private individual or corporation such as the
 Owner; and

WHEREAS, the Water Company, in order to furnish proper and efficient water

service in the manner requested by the Owner, must have the right of access to the entire tract of land, the streets therein and the individual building(s) thereon for the purpose of operating or controlling service lines, shut-off valves, and meters; and

WHEREAS, the Water Company is willing to furnish water service to said tract in the manner requested by the Owner, but only under and subject to the following terms and conditions:

NOW, THEREFORE, the parties hereto for and in consideration of the mutual covenants and agreements hereinafter set forth, and intending to be legally bound by the terms hereof, agree with each other as follows:

1. The Water Company will make available to the Owner a water service connection to furnish water service to said tract and such connection to be located as shown on the attached drawing.

2. The owner will install at its expense all water facilities required, including such control facilities as the Water Company requires.

3. Upon receipt of duly executed water service applications on the forms supplied by the Water Company, the Water Company will install at its expense individual water meters in the meter setting provided by the owner.

4. The Water Company will read each meter monthly or quarterly and bill separately for each individual meter at rates established from time to time by the Public Service Commission of Kentucky.

5. The Owner hereby grants to the Water Company the free, unlimited and unrestricted right of access to all property within the limits of said tract so that the Water Company representatives may install, maintain, read, inspect and replace the individual water meters and otherwise control the distribution of water to the individual buildings.

6. The Water Company has the right to discontinue water service to any of its customers for non-payment of water bills or for certain violations of its rules and regulations. In any instances where one common service line is used to supply two or more individual customers, the Water Company will, in the event of non-payment or such a violation of its rules, attempt to obtain payment or compliance by first discontinuing water service to such customer by shutting off water service at the water meter. However, if such action is not effective, the Water Company reserves the right to discontinue water service to the building in which such customer is located by shutting off the water service at the control valve located outside of the building until payment is made or the rules and regulations are complied with by such customer.

7. The Water Company accepts no liability or responsibility for the adequacy or condition of the water facilities installed on said tract by the Owner and shall be under no obligation of maintaining, repairing, or replacing any water facilities in or upon the property of the Owner other than the individual water meters or other facilities which it may install or attach to said facilities of the Owner pursuant to this Agreement.

8. It is expressly understood by the parties hereto that the private fire hydrants to be installed on the premises of the Owner are subject to the conditions and restrictions set forth in Agreement titled "Application for Special Connection".

9. It is expressly understood by both parties that water furnished under this Agreement will not be resold by the Owner.

10. It is further understood and agreed that the Owner(s) shall cause to have all facilities installed pursuant to this Agreement tested in the presence of a representative of the Lexington Water Company and in accordance with Lexington

Water Company pipe line standard specifications. Said test to be conducted prior to initiating service to said tract.

11. The acceptance of this agreement by the Water Company must be executed by it's President or Vice-President before same becomes effective as a contract.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be duly executed by their appropriate officers the day and year first above written.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Larry Kennedy

33. What depreciable life basis (if any) for each type of fire hydrant does KAWC utilize? Is this the industry standard service? If not, please explain.

Response:

In the depreciation study submitted in this case, Concentric has proposed depreciation of Kentucky-American Water fire hydrants within a single account, using the Average Life Group Procedure applied on a Remaining Life basis. This approach is typical in the regulated water industry throughout the United States. Within this calculation, the depreciation study proposes to depreciate the fire hydrants at a life of 65 years with an Iowa R4 dispersion pattern. A review of peer water companies indicates a range of average service lives from 45-S0 to 65-R4 is appropriate.

The depreciation parameters, procedures, and techniques used in the calculation of accrual rates for fire hydrants are within the industry standard.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

36. What is the individual fire flow requirement to which KAWC's water system in Fayette County has been designed and/or built?
- (a) Does this differ in any way from the historical or current actual performance level of the system?
 - (b) How often is this tested?
 - (c) Are these results provided to the LFUCG Division of Fire and Emergency Services?

Response:

Please see the response to KAW_R_LFUCGDR1_NUM037_081823 for current design regulations, guidelines, and requirements for Fayette County. The system in Fayette County has been designed, built, and improved upon over a period exceeding 100 years. As the system has evolved, governmental and regulatory entities such as LFUCG and the Division of Water have made updates to their design requirements, implementing minimum standards or increasing these standards. As a regulated utility, KAWC follows the necessary permitting requirements and review processes for new construction set forth by these regulations.

- a. Because there has not been a historic performance level, there is no ability to perform a performance level test.
- b. The system on a whole is not tested. However, on an annual basis, hydrants are inspected. Please refer to KAW_R_LFUCGDR1_NUM025_081823, KAW_R_LFUCGDR1_NUM026_081823, and KAW_R_LFUCGDR1_NUM027_081823 for additional information on hydrant inspection and maintenance. Selected individual hydrants are tested for fire flow ratings and information collected. Both one and two hydrant tests are performed on selected hydrants. From October 2021 to October 2022 KAWC conducted 66 two-hydrant flow tests in Fayette County that were provided to LFUCG for the Verisk/ISO review which is conducted on a 5-year frequency.
- c. LFUCG Division of Fire and Emergency Services Water Control Office is provided the annual inspection data.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Shelley Porter

37. What is the minimum fire flow protection required to meet ISO guidelines? Please provide any supporting documentation.

Response:

Please find below, the requested information on the design guidelines, regulations, and/or requirements regarding minimum fire flow protection criteria:

- ISO/Verisk Guide for Water Supply Evaluations - **Minimum criteria** For your community to be eligible for a PPC of Class 8 or better, your water supply system must be able to deliver at least 250 gpm for a period of 2 hours. That flow is in addition to the community's maximum daily rate of consumption for purposes other than firefighting. If the fire department delivers the 250 gpm through tanker shuttle, large-diameter hose, or other alternative water supply, the water must be available within 5 minutes of the arrival of the first-due apparatus, and the department must maintain the flow, without interruption, for the 2-hour duration. For buildings, Verisk calculates the Needed Fire Flow (NFF) for an individual building based on the building's area, construction, occupancy, and exposure. To get full credit, the water supply must be able to deliver water at 20 psi residual pressure and at the specified rate of flow for a specified period of time. NFFs for individual buildings (sprinkling) range from a minimum of 500 gpm to a maximum of 12,000 gpm. Please see the referenced link for support guidance: (<https://www.isomitigation.com/ppc/technical/water-supply-evaluations/>) (Attachment 1)
- Kentucky PSC Title 807 Chapter 5 Regulation 066 – On or after the effective date of this regulation, hydrants may be installed by a utility, if a minimum fire flow rate of 250 gpm for 2 hrs, plus consumption at the maximum rate can be met. (Attachment 2)
- Kentucky DOW Design Criteria - minimum diameter of mains for the installation of a fire hydrant is 6-inches. The minimum system pressure under all conditions shall be 20 psi. (Attachment 3)
- LFUCG Fire Hydrant Specifications – Minimum main diameter for new hydrant installations is 8-inches. Minimum fire flow is 1,000 gpm at 20 psi, with those that do not meet this flow handled on a case-by-case basis. (Attachment 4)

Home / PPC Program / Technical Subjects / Water Supply Evaluations

Water Supply Evaluations

Forty points of a community's Public Protection Classification (PPC[®]) grading is based on its water supply. We look at whether there is sufficient water for fire suppression beyond the community's maximum daily consumption for other purposes.

Minimum criteria

For your community to be eligible for a PPC of Class 8 or better, your water supply system must be able to deliver at least 250 gpm for a period of 2 hours. That flow is in addition to the community's maximum daily rate of consumption for purposes other than firefighting.

If the fire department delivers the 250 gpm through tanker shuttle, large-diameter hose, or other alternative water supply, the water must be available within 5 minutes of the arrival of the first-due apparatus, and the department must maintain the flow, without interruption, for the 2-hour duration.

Class 8B

If a community has superior fire protection services and fire alarm facilities but lacks the water supply required for a PPC of Class 8 or better, the community may be eligible for a Class 8B rating. For more information, see "Minimum Criteria for Class 8B." Evaluation of systems that exceed the minimum requirement.

If your water supply meets the 250 gpm minimum, ISO will evaluate your system – together with factors relating to your fire department and your fire alarm and communications systems – to determine whether you qualify for a PPC of Class 8 or better.

Within the Fire Suppression Rating Schedule (FSRS), a section called "Needed Fire Flow (NFF)" outlines the methodology for determining the amount of water necessary for providing fire protection at representative locations throughout the community. To evaluate your community's water supply, we calculate the NFF for selected locations. We then determine the water flow capabilities at those locations and calculate a ratio considering the need (NFF) and availability (water flow capability). We use that ratio in calculating the credit points identified in the FSRS.

We calculate the NFF for an individual building based on the building's area, construction, occupancy, and exposure. To get full credit, the water supply must be able to deliver water at 20 psi residual pressure and at the specified rate of flow for a specified period of time. NFFs for individual

buildings range from a minimum of 500 gpm to a maximum of 12,000 gpm. For more information, see the Guide for Determination of Needed Fire Flow.

Buildings not considered in the community's PPC

For purposes of calculating your community's PPC, ISO does not normally consider the NFF at certain high-demand properties. Those properties include buildings with an NFF in excess of 3,500 gpm.

We individually grades the protection of buildings with an NFF in excess of 3,500 gpm, and their PPC can differ from that of the community or district that provides their fire protection.

Evaluation method

We analyze three primary factors in the evaluation of the water supply at each representative site in your community:

- capacity of the supply works
- capacity of the water mains or distribution system
- distribution of hydrants

We analyze each of those factors according to applicable standards of the National Fire Protection Association (NFPA) and the American Water Works Association (AWWA). In addition, we evaluate the type and installation of hydrants and/or suction points throughout your community or district, along with any program of hydrant inspections and flow testing. You receive additional credit points based on that evaluation.

For more information on any topic related to the Public Protection Classification (PPC®) program or the Fire Suppression Rating Schedule, Contact us, or call our mitigation specialists at 1-800-444-4554.

Title 807 | Chapter 005 | Regulation 066

807 KAR 5:066. Water.

RELATES TO: KRS Chapter 278

STATUTORY AUTHORITY: KRS 278.280(2)

NECESSITY, FUNCTION, AND CONFORMITY: KRS 278.280(2) provides that the Public Service Commission (hereinafter referred to as "commission") shall pre performance of any service or the furnishing of any commodity by the utility. This administrative regulation establishes general rules which apply to water u

Section 1. Definitions.

- (1) "Customer" means, in addition to the definition in 807 KAR 5:006, Section 1(4), a person who purchases water from a utility's water loading station.
- (2) "Distribution main" means a line from which service connections with customers are taken at frequent intervals.
- (3) "Meter" means any device used for the purpose of measuring the quantity of water delivered by a utility to a customer.
- (4) "Natural Resources Cabinet" means the state Environmental Public Protection Cabinet, Department for Environmental Protection, Division of Water.
- (5) "Point of service" means the outlet of a customer's water meter, or valve if no meter is placed.
- (6) "Service connection" means the line from the main to the customer's point of service, and shall include the pipe fittings and valves necessary to make
- (7) "Service line" means the water line from the point of service to the place of consumption.
- (8) "Transmission main" means a line which is used for conveying water to the distribution system, reservoirs, tanks or stand pipes, and has generally no s with customers.

Section 2. Information Available to Customers. A utility shall provide the following information to any customer upon request:

- (1) Characteristics of water. A description in writing of chemical constituents and bacteriological standards of the treated water as required by the Natura
- (2) Rates. A schedule of rates for water service applicable to the service to be rendered to the customer.
- (3) Reading meters. Information about method of reading meters.
- (4) Bill analysis. A statement of the past readings of a customer's meter for a period of two (2) years.

Section 3. Quality of Water.

- (1) Compliance with Natural Resources Cabinet. Any utility furnishing water service for human consumption or domestic use shall conform to all legal req Natural Resources Cabinet for construction and operation of its water system as pertains to sanitation and potability of the water.
- (2) Water supply. In absence of comparable requirements of the Natural Resources Cabinet, water supplied by any utility shall be:
 - (a) Adequately protected by artificial treatment to include continuous disinfection throughout the distribution system;
 - (b) Free from objectionable color, turbidity, taste, and odor; and
 - (c) From a source reasonably adequate to provide a continuous supply of water.
- (3) Operation of supply system.
 - (a) Sanitary conditions. The water supply system, including wells, reservoirs, pumping equipment, treatment works, mains, and service pipes shall be fre defects.
 - (b) Potable water connections. No utility shall make a physical connection between its distribution system and that of any other water supply unless the maintains a safe sanitary quality in accordance with this administrative regulation, and the utility provides notice to the commission prior to any such in
 - (c) Algae growth. The growth of algae in water at the source of supply, in reservoirs or other basins, and in water mains, shall be controlled by proper t
 - (d) Well integrity. Utilities obtaining water supplies from driven or drilled wells must maintain the tightness of well casings and provide protection at th prevent infiltration of water other than that from strata tapped by such wells. Wells shall be a minimum of 300 feet from any source of pollution.
- (4) Testing of water.
 - (a) Test. Each utility shall have representative samples of its water examined by the appropriate state or local agency or by a competent chemist and ba the sanitary examination of water, under methods approved by the Natural Resources Cabinet, to insure a safe water supply.
 - (b) Report to the commission. If a utility is required by the Natural Resources Cabinet to make a public notification pursuant to administrative regulatio Resources Cabinet, the utility shall provide the commission with a copy of the public notification when it is made.

Section 4. Continuity of Service.

- (1) Emergency interruptions. Each utility shall make all reasonable efforts to prevent interruptions of service and when such interruptions occur shall ende service with the shortest possible delay consistent with the safety of its consumers and the general public. If an emergency interruption of service affects s fire protection device, the utility shall immediately notify the fire chief or other public official responsible for fire protection.
- (2) Scheduled interruptions. If any utility finds it necessary to schedule an interruption of its service, it shall notify all customers to be affected by the inter time and anticipated duration of the interruption. Whenever possible, scheduled interruptions shall be made at hours of least inconvenience to customers protection is provided by mains affected by the interruptions, the utility shall notify the fire chief or other officials responsible for fire protection of the int time and anticipated duration. The fire chief or other official responsible for fire protection shall be notified immediately upon restoration of service.
- (3) Standby equipment. The utility shall have available standby pumps capable of providing the maximum daily pumping demand of the system for use w of service.
- (4) Storage. The minimum storage capacity for systems shall be equal to the average daily consumption.
- (5) Record of interruptions. Each utility shall keep a complete record of all interruptions on its entire system or on major divisions of that system. This rec cause of interruption, date, time, duration, remedy and steps taken to prevent recurrence.

Section 5. Pressures.

- (1) Standard pressure. Each utility shall, subject to the approval of the commission, adopt and maintain a standard pressure in its distribution system at locations designated as the point or points of "standard pressure." The selection of such points shall be confined to locations fairly representative of average conditions for fixed standard pressure, a utility may divide its distribution system into districts if division is necessary due to differences of elevation or loss of friction, or both, and may either adopt a standard pressure for each division or establish a single standard pressure for its distribution system as a whole. A constant difference between the highest and lowest pressures in a district for which a standard has been adopted exceed fifty (50) percent of such standard. In interpretation of this rule it shall be understood that in districts of widely varying elevations or low customer density a utility may undertake to furnish a service which complies with the foregoing specifications if the customer is fully advised of the conditions under which average service may be expected. It shall be understood that the commission shall prevent the commission from requiring improvements when, upon investigation, it appears right and proper that such betterments should be made. The pressure at the customer's service pipe under normal conditions shall fall below thirty (30) psig nor shall the static pressure exceed 150 psig.
- (2) Pressure gauges. Each utility shall provide itself with one (1) or more recording pressure gauges to make pressure surveys as required by these rules. It shall be suitable to record the pressure experienced on the utility's system and shall be able to record a continuous twenty-four (24) hour test. One (1) of these recording gauges shall be maintained for a minimum of one (1) week per month in continuous service at some representative point on the utility's mains.
- (3) Pressure surveys. At least once annually, each utility shall make a survey of pressures in its distribution system of sufficient magnitude to indicate the conditions rendered at representative points in its system. Pressure charts for these surveys shall show the date and time of beginning and end of the test and the location where the test was made. Records of these pressure surveys shall be maintained at the utility's principal office in Kentucky and shall be made available to the commission.

Section 6. Water Supply Measurement.

- (1) Measuring devices. Each utility shall install a suitable measuring device at each source of supply so that a record may be maintained of the quantity of water from each source.
- (2) Records. The quantity of water produced or purchased for resale to customers from each source of supply shall be determined on a monthly basis. The quantity of water distributed to customers and the volume used by the utility shall be determined in the same manner. Twelve (12) month totals of the volumes produced and consumed at each source of supply, distributed to customers, and used by the utility shall be recorded separately and transmitted to the commission in the utility's annual report to the commission.
- (3) Unaccounted-for water loss. Except for purchased water rate adjustments for water districts and water associations, and rate adjustments pursuant to rate making purposes a utility's unaccounted-for water loss shall not exceed fifteen (15) percent of total water produced and purchased, excluding water used in the utility's own operations. Upon application by a utility in a rate case filing or by separate filing, or upon motion by the commission, an alternative level of reasonable unaccounted-for water loss may be established by the commission. A utility proposing an alternative level shall have the burden of demonstrating that the alternative level is less than the level prescribed in this section.

Section 7. Standards of Construction. Design and construction of the utility's facilities shall conform to good standard engineering practice. Plans and specifications for water supplies shall be prepared by an engineer registered in Kentucky, with the submitted plans bearing the engineer's seal. The utility's facilities shall be designed and operated so as to provide adequate and safe service to its customers and shall conform to requirements of the Natural Resources Cabinet with reference to the potability of water.

Section 8. Distribution Mains.

- (1) Depth of mains. Water mains shall be placed a minimum of twenty-four (24) inches below ground level and shall be protected sufficiently to prevent frost damage in the coldest weather normally experienced in the community in which laid, and to prevent damage by traffic.
- (2) Dead ends. In order to provide increased reliability of service and reduce head loss, dead ends shall be minimized by making appropriate tie-ins when necessary. Where dead ends occur they shall be provided with a fire hydrant, if flow and pressure are sufficient to meet the requirements of Section 10(2)(b) of this regulation, or with an approved flushing hydrant or blowoff for flushing purposes. Flushing devices shall be sized to provide flows which will give a velocity of one-half (2.5) feet per second in the water main being flushed. No flushing device shall be directly connected to any sewer. Mains with dead ends shall be flushed at least once each year but more often if necessary to maintain the quality of the water.
- (3) Segmentation of system. Valves or stopcocks shall be provided at reasonable intervals in the mains so that repairs may be made with the least possible interruption of service.
- (4) Disinfection of water mains. All new mains shall be thoroughly disinfected before being connected to the system. The method of disinfecting shall conform to the requirements of the Natural Resources Cabinet.
- (5) Grid systems. Wherever feasible the distribution system shall be laid out in a grid to facilitate identification of line location and minimize service interruptions or repairs.

Section 9. Service Lines.

- (1) Size of service line. The size, design, material and installation of the service line shall conform to such reasonable requirements of the utility as may be established by its rules and administrative regulations. However, the minimum size of the line shall not be less than three-fourths (3/4) inch nominal size except under unusual circumstances which shall be clearly defined.
- (2) Depth of service line. All service lines shall be laid at a depth sufficient to prevent freezing during the coldest weather normally experienced except where intended for use during freezing weather and are actually drained during such periods.
- (3) Inspection of service line. In the installation of the service line, the utility shall require the customer to leave the trench open and pipe uncovered, and the utility shall determine it is free from any tee, branch connection, irregularity or defect. The utility may substitute for its inspection an inspection by the applicable plumbing inspector, if proof of that inspection is presented to the utility by the customer.

Section 10. Construction Requirements.

- (1) The system shall be adequate to deliver all reasonable water requirements of its customers and meet the requirements of Section 5(1) of this administrative regulation except under emergency conditions.
- (2) Distribution system.

(a) Minimum pipe sizes. The distribution system shall be of adequate size and so designed in conjunction with related facilities to maintain the minimum by Sections 5(1) and 7 of this administrative regulation. The maximum length of any individual small pipe line shall be as follows:

	Circulating	Noncirculating
1 inch nominal size	150 feet	100 feet
1 1/2 inch nominal size	300 feet	200 feet
2 inch nominal size	500 feet	250 feet

In the case of rural water lines, if hydraulic studies indicate they can comply with Section 5(1) of this administrative regulation and can provide adequate service the peak requirements of customers, the above maximum extension lengths may be extended with approval of the commission.

(b) Fire protection.

1. On or after the effective date of this administrative regulation, fire hydrants may be installed by a utility only if:

- A professional engineer with a Kentucky registration has certified that the system can provide a minimum fire flow of 250 gallons per minute; and
- The system supporting this flow has the capability of providing this flow for a period of not less than two (2) hours plus consumption at the maximum.

2. The location, installation, and the responsibility for maintenance of fire hydrants, public and private fire protection facilities, connecting mains, and shall be subject to negotiation between the utility and the applicant. Fire hydrants and public and private fire protection facilities shall be installed as required. If owned by the utility shall be subject to any conditions the commission may impose, based upon the compensation received for this service.

(3) Transmission systems. Transmission pipe lines from sources of supply shall be designed to deliver in combination with related storage facilities and to capacity of those sources of supply the maximum requirements of that portion of the system which is dependent upon such transmission pipe lines.

(4) Water supply requirements. The quantity of water delivered to the utility's distribution system from all source facilities shall be sufficient to supply adequately and safely the total reasonable requirements of its customers under maximum consumption.

(5) Materials. Metallic and nonmetallic materials may be used separately and in combination to construct component parts of a water system including, but not limited to, conduits, pipes, couplings, caulking materials, protective linings and coatings, services, valves, hydrants, pumps, tanks and reservoirs, provided:

- The material shall have a reasonable useful service life.
- The material shall be capable of withstanding with ample safety factors the internal and external forces to which it may be subjected in service.
- The material shall not cause the deterioration of the potability of the water supply.
- Materials and equipment shall be so selected as to mitigate corrosion, electrolysis and deterioration.

Section 11. Extension of Service.

(1) Normal extension. An extension of fifty (50) feet or less shall be made by a utility to its existing distribution main without charge for a prospective customer for and contract to use service for one (1) year or more.

(2) Other extensions.

(a) When an extension of the utility's main to serve an applicant or group of applicants amounts to more than fifty (50) feet per applicant, the utility may, under its filed tariff require the total cost of the excessive footage over fifty (50) feet per customer to be deposited with the utility by the applicant or the utility, at the average estimated cost per foot of the total extension.

(b) Each customer who paid for service under such extension shall be reimbursed under one (1) of the following plans, which shall be included in the utility's filed tariff:

- Each year, for a refund period of not less than ten (10) years, the utility shall refund to the customer or customers who paid for the excessive footage of the extension in place for each additional customer connected during the year whose service line is directly connected to the extension installed extensions or laterals therefrom. Total amount refunded shall not exceed the amount paid the utility. No refund shall be made after the refund period expires.
- As an alternative to the refund plan outlined in subparagraph 1 of this paragraph, the utility may use the following plan: for a period of five (5) years of the extension, each additional customer whose service line is directly connected to the extension installed, and not to extensions or laterals therefrom shall contribute to the cost of the extension based on a recomputation of both the utility's portion of the total cost and the amount contributed by the customer. The utility shall refund to those customers that have previously contributed to the cost of the extension that amount necessary to reduce their contribution to the total amount for each customer connected to the extension. All customers directly connected to the extension for a five (5) year period after it is placed in service shall contribute equally to the cost of construction of the extension. In addition, each customer shall pay the approved tap-on fee applicable at the time of meter connection. The tap-on fee shall not be considered part of the refundable cost of the extension and may be changed during the refund period. After the refund period expires, any additional customer shall be connected to the extension for the amount of the approved tap-on fee only. After the five (5) year period expires, the utility shall be required to make refunds for an additional five (5) year period in accordance with subparagraph 1 of this paragraph.

(3) An applicant desiring an extension to a proposed real estate subdivision may be required to pay the entire cost of the extension. Each year, for a refund period of not less than ten (10) years, the utility shall refund to the applicant who paid for the extension a sum equal to the cost of fifty (50) feet of the extension installed for each additional customer connected during the year whose service line is directly connected to the extension installed by the developer, and not to extensions or laterals therefrom. Total amount refunded shall not exceed the amount paid to the utility. No refund shall be made after the refund period ends.

(4) Nothing contained herein shall be construed to prohibit the utility from making extensions under different arrangements if such arrangements have the approval of the commission.

(5) Nothing contained herein shall prohibit a utility from making at its expense greater extensions than herein prescribed, provided like free extensions are made to other customers under similar conditions. The conditions under which such extensions will be made shall be stated in the utility's filed tariff.

(6) Upon complaint to and investigation by the commission a utility may be required to construct extensions greater than fifty (50) feet upon a finding by the commission that such extension is reasonable and that an extension of fifty (50) feet or less is unreasonable under the circumstances.

Section 12. Service Connections.

(1) Ownership of service.

- (a) Utility's responsibility. The utility shall furnish and install at its own expense for the purpose of connecting its distribution system to the customer's place of service connection from its main to and including the meter and meter box. The utility may recoup this expense from the customer in accordance with its rules and administrative regulations.
- (b) In areas where the distribution system follows well-defined streets and roads, the customer's point of service shall be located at that point on or near the way or property line most accessible to the utility from its distribution system. In areas where the distribution system does not follow streets and roads, the point of service shall be located as near the customer's property line as practicable. Prior to installation of the meter the utility shall consult with the customer as to the location.

(2) Customer's responsibility. The customer shall furnish and lay the necessary pipe to make the connection from the point of service to the place of consumption. The customer shall keep the service line in good repair and in accordance with such reasonable requirements of the utility as may be incorporated in its rules and administrative regulations.

Section 13. Measurement of Service.

(1) Metering. All water sold by a utility shall be upon the basis of metered volume sales except as set forth in subsection (2) of this section.

(2) Unmetered service. If water usage can be readily estimated, the utility may, subject to commission approval, provide unmetered service. For unmetered service, the utility shall develop standard methods for estimating the volume of water used and maintaining records which show volumes used and associated revenues and charges. The methods proposed to be used shall be submitted to the commission for approval. Flat rates conforming to the requirements set forth in 807 KAR 5:006, Section 7(2) shall be used in the following:

- (a) Temporary service of such duration that installation of a meter is not feasible.
- (b) Public and private fire protection service.
- (c) Water used for street sprinkling and sewer flushing, when provided for in a contract between the utility and a municipality or other local government.
- (d) Service to water haulers if installation of coin-operated or other metered stations is not feasible.

(3) Registration of meter. All meters used for metered sales shall have registration devices indicating the volume of water measured in either cubic feet or gallons. If a multiplier is necessary to convert the meter reading to cubic feet or gallons, the constant shall be indicated upon the face of the meter.

(4) Standard method of meter and service line installation. Each utility shall adopt a standard method of installing meters and service lines and shall file with the commission a written description and drawings in sufficient detail that the requirements are clearly understandable. Copies of these standard methods shall be made available to customers and contractors or others engaged in the business of placing pipe for water utilization. All meters shall be set in place by the utility.

Section 14. Meter Test Facilities and Equipment.

(1) Test facilities. Except as provided in 807 KAR 5:006, Section 17(2), each utility furnishing metered water service shall have the necessary standard facilities and other equipment for testing its meters in compliance with this administrative regulation.

(2) Shop equipment. The utility's meter test shop shall, insofar as practicable, simulate actual service conditions of temperature, inlet pressure, and outlet pressure. The shop shall be provided with necessary equipment, including valves on the inlet and outlet sides of the meter test bench, calibrated tanks, a device for regulating flow, a flow rate, pressure gauges and pressure relief valves. The overall error of the calibrated test tanks shall not exceed three-tenths (.3) of one (1) percent.

(3) Test measurement standards.

- (a) Basic standard. Measuring devices for testing meters shall consist of a calibrated tank for volumetric measurement or a tank mounted upon scales for weight measurement. If a volumetric standard is used, it shall be certified as to its accuracy by the commission within the preceding thirty-six (36) months. If a scale is used, the scales shall be tested and calibrated at least once a year and certified as to accuracy by the commission.
- (b) Size of basic standards. When meters are tested by weight method, utilities whose measure of quantity is the cubic foot shall use test equipment capable of measuring less than one (1) cubic foot of water. Utilities whose measure of quantity is the U.S. gallon shall use equipment holding not less than ten (10) U.S. gallons.
- (c) Standard meter. With commission approval, a standard meter may be provided and used by any utility for the purpose of testing meters in place. The standard meter shall be tested and calibrated to a basic standard periodically to insure its accuracy within the limits required by this administrative regulation. In any event, the standard meter shall be tested at least once every other week while the standard meter is in use and a record of such tests shall be kept by both the utility and, if applicable, the customer.

Section 15. Accuracy Requirements of Water Meters.

(1) General. All meters used for measuring the quantity of water delivered to a customer shall be in good mechanical condition and shall be adequate in type of service which they measure.

(2) Testing of meters. All new meters, and any meter removed from service for any cause, shall be tested for accuracy as specified herein prior to being placed in service.

(a) Test flows. The test flow and normal test flow limits for the various types of cold water meters shall be as follows:

TEST REQUIREMENTS FOR NEW, REBUILT, AND REPAIRED COLD WATER METERS*

* - A rebuilt meter is one that has had the measuring element replaced with a factory-made new unit. A repaired meter is one that has had the old mea cleaned and refurbished in a utility repair shop.

sec. - Quantity should be one or more full revolution of the test hand but not less than two (2) min running.

(b) Determination of meter accuracy. No new, rebuilt or repaired meter shall be placed in service if the following required tests show that it does not re accuracy limits specified in paragraph (a) of this subsection.

1. Displacement, multijet, compound, fire service and propeller type meters. Meters of the displacement, multijet, compound, fire service and propell at the minimum, intermediate and high test flow rates shown in paragraph (a) of this subsection. At least one (1) additional test shall be performed w flows of compound and fire service meters to determine overall operational efficiency and accuracy of registration.

2. Class I and Class II turbine type meters. Meters of the Class I and Class II turbine type shall be tested at the minimum and high test flow rates show this subsection.

(3) As found tests. All meters tested in accordance with the rules for periodic, request or complaint tests, shall be tested in the condition as found in the c to any alteration or adjustment. This test shall consist of three (3) rates of flow in the minimum, intermediate and high flow range for that type of meter a (2)(a) of this section.

(4) Determination of meter error for bill adjustment purposes. When upon periodic, request or complaint test, a meter is found to be in error in excess of the commission's administrative regulations, three (3) additional tests shall be made: one (1) at seventy-five (75) percent of rated maximum capacity; one of rated maximum capacity; one (1) at twenty-five (25) percent of the rated maximum capacity. The average meter error shall be the algebraic average of (3) tests.

Section 16. Periodic Tests.

(1) Each utility shall test periodically all water meters so that no meter will remain in service without test for a period longer than specified in the followin

Size of Meter Inches	Interval Between Tests Years
5/8	10
5/8 x 3/4	10
3/4	10
1	10
1 1/4	4
1 1/2	4
2	4
3	2
4 and larger	1

(2) Meters of the current and compound type shall be cleaned at a minimum of the frequency listed in subsection (1) of this section for testing. If meters the frequency listed in subsection (1) of this section and during the test are flushed at a high rate of flow, the meter shall be considered to be in complian

(3) If the number of meters of any type which register in error beyond the limits specified in this administrative regulation is found by the commission to type shall be tested with such additional frequency as the commission may direct.

Section 17. Water Shortage Response Plans. Each utility which files a water shortage response plan with the Natural Resources Cabinet shall simultaneously with the commission. Any utility which has already filed a plan with the Natural Resources Cabinet shall file the plan with the commission within sixty (60) da date of this administrative regulation.

Section 18. Deviations from Administrative Regulation. In special cases, for good cause shown, the commission may permit deviations from this administrat

**KENTUCKY DIVISION OF WATER
GENERAL DESIGN CRITERIA
FOR
SURFACE AND GROUND WATER SUPPLIES**

NOTES:

1. Design shall meet all applicable codes, including local, Kentucky and Federal regulations.
2. References include Recommended Standards for Water Works – 2007 Edition (Ten States Standards). In some instances, the criteria presented here are different than Ten States Standards criteria. In most instances, criteria in this document are presented to emphasize certain items in Ten States Standards. Where the design criteria in this document differ from Ten States Standards, this document shall govern. In all instances, regulatory requirements shall govern.
3. Special consideration of operating personnel expertise should always be an integral consideration during design.
4. Variation from the design criteria will be considered on a case-by-case basis.

WATER TREATMENT PLANT RATED DESIGN CAPACITY AND PROCESS REDUNDANCY

The water treatment plant rated design capacity is the maximum rate for water treatment plant operation as approved by the Cabinet's Division of Water. The rated design capacity shall be calculated with redundant processes and excess capacities out of service as described in this document. The rated design capacity shall be expressed in units of Million Gallons per Day (MGD) and gallons per minute (gpm).

Redundant treatment components should be equally sized to facilitate ease of operation.

SURFACE WATER SUPPLIES OR GROUND WATER SUPPLIES UNDER INFLUENCE OF SURFACE WATER

1. **Raw Water Source** – Written approval from the Watershed Management Branch shall be obtained for use of the proposed raw water source/s to supply the rated design capacity of the proposed water treatment plant.
2. **Raw Water Intake**
 - a. Multilevel withdrawal is required where water quality varies with depth unless the design engineer can show the ability to take raw water from more than one level is not beneficial.
 - b. Removable or traveling screen is required.

- c. Entrance velocity ≤ 0.5 fps recommended.
- d. Back flush cleaning is recommended.
- e. Adequate provisions for addition of pretreatment chemicals as may become necessary are required.
- f. Adequate provision for maintenance of equipment and facility is required.

3. Raw Water Pumping Facilities

- a. A minimum of 2 pumps is required, and 100% of the water treatment plant rated design capacity shall be supplied with largest pump out of service.
- b. Security measures recommended.
- c. Protection of electrical equipment and accessibility required sufficient to offset impacts of a 100 year flood event.
- d. Surge control shall be provided for normal pump starting and stopping.

4. Treatment Processes

- a. Rapid mix:
 - (1) Detention time < 30 seconds recommended (in no case > 60 sec).
 - (2) Backup capacity of 100% of the water treatment plant rated design capacity is recommended. A separate, additional rapid mix is required for separate, significantly different treatment processes.
 - (3) Variable speed drive recommended if plant flow rate varies significantly.
- b. Flocculation:
 - (1) Minimum of 2 basins/trains required.
 - (2) Detention time = 30 minutes minimum.
 - (3) Tapered (2 or 3 compartments) w/variable speed drive mixers is required.
 - (4) Flow thru velocity of 0.5 to 1.5 fpm.
 - (5) Exit velocity of 0.5 fps to 1.5 fps.
 - (6) At least 2 units are required, and at least 50% of the water treatment plant rated design capacity requirements shall be met with one basin out of service.

- c. Sedimentation:
- (1) Minimum of 2 basins/trains required.
 - (2) Detention time ≥ 4 hours without tube or plate settlers.
 - (3) Detention time ≥ 2 hours with tube settlers recommended.
 - (4) Tube settlers ≤ 2.0 gpm/ft² surface overflow rate.
 - (5) Plate settlers ≤ 0.5 gpm/ft² surface overflow rate based on 80% of projected horizontal plate area. A surface overflow rate of 0.3-0.35 gpm/ft² recommended.
 - (6) Length to width ratio $\geq 3:1$ recommended for basins without tube or plate settlers.
 - (7) Sludge collection and removal equipment required.
 - (8) At least 2 units are required, and at least 50% of the water treatment plant rated design capacity requirements shall be met with one basin out of service.
- d. Solids contact clarifier (up-flow clarifier):
- (1) Minimum of 2 basins required.
 - (2) Surface overflow rate ≤ 1.25 gpm/ft² with raw water turbidity ≤ 30 NTU's year around.
 - (3) Surface overflow rate ≤ 0.75 gpm/ft² with raw water turbidity > 30 NTUs at any time during year.
 - (4) At least 2 units are required, and at least 50% of the water treatment plant rated design capacity requirements shall be met with one basin out of service.
 - (5) Sludge collection and removal equipment required.
- e. Ballasted flocculation:
- (1) At least 2 units are required, and at least 50 % of the water treatment plant rated design capacity requirements shall be met with one unit out of service.
 - (2) Pilot testing of combined clarifier & filtration processes required if not used with conventional gravity, granular media filters.
- f. Dissolved air flotation:
- (1) Design shall include manufacturer's recommendations.
 - (2) Approval requires demonstrating satisfactory performance with on site pilot plant testing under all operating conditions or documentation of full plant scale plant operation with similar parameters such as raw water quality, pretreatment & any other significant parameters determined necessary to demonstrate applicability to the proposed treatment. Piloting protocol shall be submitted to DOW for approval.

- (3) At least 2 units are required, and at least 50 % of the water treatment plant rated design capacity requirements shall be met with one unit out of service.
- g. Filters (granular media):
- (1) Gravity filtration is required. Pressure filtration is not allowed for the treatment of surface water supplies.
 - (2) Filter rate ≤ 2 gpm/ft.² (sand/single media).
 ≤ 5 gpm/ft.² (multi-media).
 - (3) A minimum of 2 filters are required, and 100% of the water treatment plant rated design capacity shall be met with one filter out of service.
 - (4) Backwash rate: 15 gpm/ft.² minimum to 20 gpm/ft.² recommended (as necessary to provide 50% expansion of filter bed).
 - (5) There shall be no air delivery piping penetrating or present within the filter media bed nor shall there be any arrangement in the filter design which would allow short circuiting between the applied unfiltered water and the filtered water.
- h. Filters (membrane):
- (1) Approval requires demonstrating satisfactory performance with on site pilot plant testing, including challenge testing, under all operating conditions or documentation of full plant scale plant operation with similar parameters such as raw water quality, pretreatment & any other significant parameters determined necessary to demonstrate applicability to the proposed treatment. Piloting protocol shall be submitted to DOW for approval
 - (2) Pretreatment - Follow criteria for rapid mixing, flocculation and sedimentation requirements above if using conventional pretreatment. If direct application of flocculated water is used, maximum detention time shall be as recommended by the membrane manufacturer to provide pin floc. This detention time is usually 5 to 15 minutes maximum. In all cases, pretreatment shall provide for oxidation of minerals such as iron and manganese.
 - (3) Flux rate - maximum determined by pilot testing or other data from similar full-scale operations.
 - (4) Minimum 20% excess membrane capacity over the water treatment plant rated design capacity.
 - (5) Direct Integrity testing = minimum of once per day.
 - (6) Maintenance clean system required.
 - (7) Recovery clean system required.
 - (8) Shall meet the water treatment plant rated design capacity with one train out of service.

- (9) Redundancy of critical control components required.
 - (10) Continuous indirect integrity testing (turbidity) required.
- i. Clear Well
- (1) Required volume \geq 15 percent of the water treatment plant rated design capacity. Less than 15% may be approved if it can be shown that a lesser volume will be adequate in terms of required CT value, adequate backwash source water and other relevant considerations.
 - (2) Two separate compartments or two separate clear wells required with continued access to high service pumping to allow maintenance to one chamber or one clear well without interrupting service.
- j. High Service Pumps
- (1) A minimum of 2 pumps is required, and 100% of the water treatment plant rated design capacity shall be supplied with largest pump out of service.
 - (2) Surge control shall be provided for normal pump starting and stopping.
- k. Chemical Feed Systems:
- (1) Chlorination is required.
 - (2) Fluoridation as required by 902 KAR 115:010.
 - (3) The ability to feed powdered activated carbon is required.
 - (4) Other chemicals shall be required and used as determined necessary by the treatment process and raw water quality.
- l. Disinfection
- (1) The disinfection treatment shall be sufficient to ensure that the total treatment processes of that system achieve at least 99.9 percent (3-log) inactivation and/or removal of *Giardia lamblia* cysts and at least 99.99 percent (4-log) inactivation and/or removal of viruses.
- m. UV - Disinfection
- (1) UV shall be installed downstream of filtration.
 - (2) Hydraulics shall be designed to allow all elements of fluid to come sufficiently close to the lamp surface.
 - (3) UV unit shall be installed with adequate upstream and downstream distances from any flow disturbances.
 - (4) Effective cleaning methodology shall be in place to periodically remove biological and chemical fouling materials from lamp jacket or tube surfaces.

- (5) UV intensity sensors, transmittance monitors, and water temperature sensors shall be required.
 - (6) Flow meters shall be installed to allow accurate measurement of the flow rate to each reactor.
 - (7) Recirculation loops or flow-to-waste capability for UV reactors that require cooling water during lamp warm-up shall be required.
 - (8) Vents and/or air release, air/vacuum, or combination air valves to discharge any introduced air and to facilitate reactor draining are required.
 - (9) Hydraulic design shall allow reactors to stay flooded under all operating conditions.
 - (10) Appropriate materials of construction shall be used for piping materials exposed to UV light and for all components within the building environment.
- n. Standby Electric Power
- (1) Dedicated standby or alternate electric power source is required so that water may be treated and/or pumped to the distribution system during power outages to meet the average day demand.
- o. Security System:
- (1) Door and window locks are required.
 - (2) Security fencing recommended.
 - (3) Security monitoring system recommended.

Note: Items "g" through "j" and "m" through "o" are also applicable to ground water systems not under the influence of surface water.

GROUND WATER SUPPLIES NOT UNDER THE INFLUENCE OF SURFACE WATER

1. Raw Water Source

- a. A minimum of two wells shall be provided and 100% of the water treatment plant rated design capacity shall be supplied with the largest well out of service.
- b. Well location and design shall be reviewed and approved by DOW before construction.
- c. Well head and groundwater protection plan is required.
- d. A raw water tap on the discharge piping from each well located prior to any treatment is required.

2. Treatment

- a. Chlorination is required.
- b. Fluoridation as required by 902 KAR 115:010.
- c. Additional treatment shall be required if necessary to provide acceptable finished water quality, including 4-log virus removal/inactivation.

WATER DISTRIBUTION SYSTEM

1. Distribution System Pressure

- a. Minimum system pressure for all conditions shall be 20 psi.
- b. Water lines should be hydraulically capable of a flow velocity of 2.5 ft/s while maintaining a pressure of at least 20 psi.
- c. When static pressure exceeds 150 psi, pressure reducing devices shall be provided on mains or as part of the meter setting on individual service lines in the distribution system.
- d. The normal working pressure in the distribution system at the service connection should be approximately 60-80 psi and shall not be less than 30 psi under peak demand flow conditions. Peak demand is defined as the maximum customer water usage rate, expressed in gallons per minute (gpm), in the pressure zone of interest during a 24 hour (diurnal) time period.

2. Pipe Diameter

- a. Mains serving fire hydrants shall be minimum 6-inch diameter.
- b. Mains without hydrants shall be minimum 3-inch diameter. Any departure from minimum requirements shall be justified by hydraulic analysis and future water use, and can be considered only in special circumstances.

3. Pipe Location

- a. Pipe shall be constructed to a depth providing a minimum cover of 30 inches to top of pipe.
- b. Water pipe shall be constructed with a lateral separation of 10 feet or more from any gravity sanitary or combined sewer measured edge to edge where practical. If not practical a variance may be requested to allow the water pipe to be installed closer to the gravity sanitary or combined sewer provided the water pipe is laid in a separate trench or undisturbed shelf located on one side of the sewer with the bottom of the pipe at least 18 inches above the top of the gravity sanitary or combined sewer pipe.
- c. Water lines crossing sanitary, combined or storm sewers shall be laid to provide a minimum vertical distance of 18 inches between the outside of

the water main and the outside of the sanitary, combined or storm sewer with preference to the water main located above the sanitary, combined or storm sewer.

- d. A plan for a water line that would propose a section of line be laid within a 200 foot radius of an underground storage tank as defined in KRS 224.60-100 or a petroleum storage tank as defined in KRS 224.60-115, shall provide that all water lines within the 200 foot radius shall be ductile iron pipe or other nonpermeable pipe approved by the cabinet. Any future replacement of an existing water line within a 200 foot radius of a storage tank, whether or not plans are submitted to the cabinet, shall also meet this requirement. The requirements of this subparagraph may be waived, in writing, if the public water system shows to the satisfaction of the cabinet, that the protection afforded by nonpermeable material is unnecessary due to hydrological, geological, or other physical conditions at a particular site.
- e. Distribution systems installed within a 200 foot radius of an area of known soil contamination by organic compounds shall utilize pipe and joint materials which do not allow permeation of the organic compound.
- f. Non-permeable materials shall be used for all portions of the distribution piping system present within a 200 foot radius of an area of known soil contamination by organic compounds, including hydrant leads and service connections.

6. **Distribution Storage**

- a. Water storage tanks shall have a minimum 100% turnover rate of once per 72 hours.
- b. Minimum water level for all gravity storage tanks shall maintain a minimum design pressure of 30 psi for all potential points of use supplied by the tank.
- c. Separate inlet and outlet is required on storage tanks; and the inlet has to be in the upper half of the tank (unless there is a separate mixing system).

**LEXINGTON DIVISION OF FIRE AND
EMERGENCY SERVICES**

Page 1 of 2

FIRE HYDRANT SPECIFICATIONS

Type-----Dry Barrel

Direction of Opening-----Right (clockwise)

Opening Size (new hydrants)---Two (2) 4 ½" openings, National Standard Hose Thread

Opening Size (existing hydrants) Minimum of one (1) 4½" opening, N.S.H.T.

Main Valve Opening-----5 ¼ Inches minimum

Type of Cap-----Nut Type 15/16" square with chains

Size of Operating Nut-----15/16" square

Center of outlets to ground-----Eighteen inches (18") centerline above finished grade

Minimum Line Size for Hydrant Feeds----8" (new installations)

Fire Hydrant Color Requirements:

The painting of fire hydrants to the appropriate NFPA color signifies that the hydrants have been flow tested and meet the fire hydrant specifications of the Lexington Division of Fire and Emergency Services. These colors are based on approved NFPA standards. Red has been chosen for the barrels of 'Privately Owned' hydrants and yellow for barrels of all KAW maintained hydrants. All hydrants shall meet NFPA standard colors in conjunction with the next annual flow testing of each hydrant. For further information please contact the Lexington Fire Department Water Control Office at 859-231-5668

Privately Owned & Maintained Hydrants, [REDACTED]

0 - 499 gpm - yellow bonnet & caps
 500-999 gpm - orange bonnet & caps
 1000-1499 gpm - green bonnet & caps
 1500 + gpm - light blue bonnet & caps

All hydrant flows shall maintain a minimum 20 P.S.I. Residual Pressure

Fire hydrants that are required for fire protection purposes shall flow at minimum 1,000gpm, while maintaining no less than 20psi residual pressure.

FIRE HYDRANT SPECIFICATIONS (CONT.)

Page 2 of 2

Any hydrants that do not meet the criteria for identification by NFPA standard, will need to dealt with on an individual basis. It is the responsibility of the property owner to notify the water control officer at the **Water Control Office of the Fire Prevention Bureau** about such hydrants.

The center of the hose outlet shall not be less than 18" above final grade. NFPA 24

Privately owned fire hydrant numbers are assigned by the Ky. American Water Company when installed. For reporting purposes, the **Water Control Office** will provide these hydrant numbers when requested. If hydrants do not have a previously assigned number, then the Water Control Office at the Fire Prevention Bureau will assign a number.

Trees shall not be planted within 10 feet of a hydrant. Ordinance 17B-2

All hydrants shall be kept clear of weeds, rubbish and any and all other obstructions by the abutting property owner. Landscaping or decorations shall not be used to obstruct or hide the fire hydrant from clear view, nor prohibit access to the hydrant for use or maintenance. Damage caused to landscaping within a fifteen feet radius of the hydrant due to periodic maintenance, use, or testing of a hydrant shall be the responsibility of the owner of the landscaping.

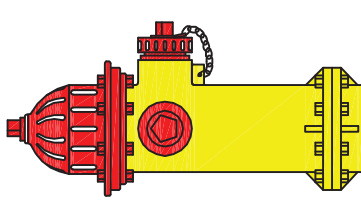

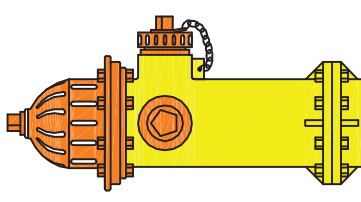

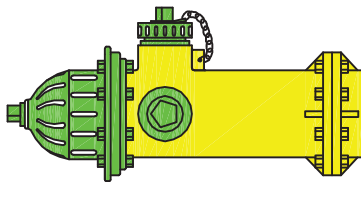

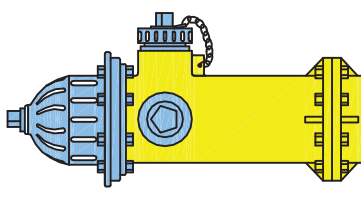

Where fire hydrants are installed along a roadway, parking within 15 feet is prohibited. All curbs within 15 feet of a hydrant shall be painted fire lane yellow.

When fire hydrants are installed in parking areas, parking shall be designed and maintained to allow 10 feet clear access to the hose connection side of the hydrant, and a four foot minimum clear radius around the hydrant

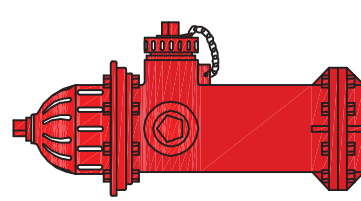

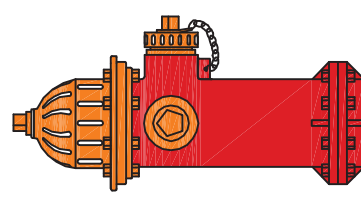

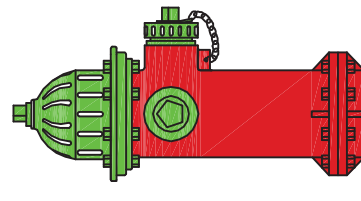

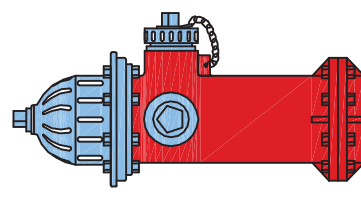

Annually, Fire Hydrant Flow Testing Reports shall be forwarded to:

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis and Charles Rea

38. Please provide the annual use of water for public and private fire service for calendar years 2019-2022, inclusive, and for each month as it is or becomes available during the base period. If water use for public and/or private fire service has been projected for the forecasted test period, please provide those projections as well.

Response:

The table below reflects public and private fire service usage based on two sources: (1) "Public/Private Hydrant Usage" – water usage from fire hydrants as reported by public fire departments and private fire hydrant owners; (2) "Public/Private Fire Line Usage" – water usage as metered and/or reported on fire lines. Note, fire line usage reflects detector check metered usage only and does not include any unmetered flow through the main backflow assembly. Please also see KAW_R_LFUCGDR1_NUM_038_Attachment1.

Public and Private Fire Service Usage (Gallons)			
	Public/Private Hydrant Usage	Public/Private Fire line Usage	Total
2019	2,950,000	5,884,000	8,834,000
2020	1,347,000	4,948,000	6,295,000
2021	1,148,000	6,414,000	7,562,000
2022	4,007,000	6,840,000	10,847,000

There is no charge for water usage from public and private fire hydrants. Water usage on fire lines, with detector check meters, is charged in accordance with approved tariff rates. Fire service usage for the base period is 968,400 gallons and 637,900 gallons for the forecast period.

KAW Fire Service Usage by Month by Year 2019 thru 2022													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
2019	830	987	692	599	(529)	(762)	577	584	523	964	760	661	5,884
2020	559	457	549	549	135	538	262	338	235	218	682	428	4,948
2021	838	787	703	690	44	175	359	368	411	344	1,049	645	6,414
2022	257	799	531	465	494	327	393	402	447	850	847	1,030	6,840

LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

39. What is the basis for the 12,000 gpm of fire flow (KAWC Exhibit 36, Tab: Usage Statistics)?

Response:

Fire flows are based on the Company's approximate population of the service area. For the purpose of cost of service, two simultaneous fire events of 6,000 gpm are assumed.

General fire-fighting requirements, based on population established by the National Board of Fire Underwriters, are as follows:

- a) For populations of 200,000 or less, $Q = 1020 \sqrt{P} (1 - 0.01\sqrt{P})$, where Q is the fire draft in gpm and P is the population in thousands.
- b) For populations in excess of 200,000, Q = 12,000 gpm plus 2,000 to 8,000 gpm for a potential second fire.

The foregoing requirements were published in Volume I, "Water and Wastewater Engineering," by Fair, Geyer & Okon, published in 1966 by John Wiley & Sone, Inc.

JUN 14 1974

GANNETT PLETT
CARPENTER

INSURANCE SERVICES OFFICE
160 WATER STREET
NEW YORK, N. Y. 10038

1974

GRADING SCHEDULE

WATER SUPPLY

An adequate and reliable water supply is an essential part of the fire-fighting facilities of a municipality.

Minimum Recognized Water Supply. In order to be recognized for grading purposes, a water supply shall be capable of delivering at least 250 gpm for a period of 2 hours, or 500 gpm for one hour, for fire protection plus consumption at the maximum daily rate. Any water supply which cannot meet this minimum requirement shall not be graded, and a deficiency of 1,950 points shall be assigned.

Adequacy and Reliability. A water supply is considered to be adequate if it can deliver the required fire flow for the number of hours specified in Table 4, with consumption at the maximum daily rate; if this delivery is possible under certain emergency or unusual conditions, the water supply is also considered to be reliable.

TABLE 4.

REQUIRED DURATION FOR FIRE FLOW

Required Fire Flow gpm	Required Duration Hours
10,000 and greater	10
9,500	9
9,000	9
8,500	8
8,000	8
7,500	7
7,000	7
6,500	6
6,000	6
5,500	5
5,000	5
4,500	4
4,000	4
3,500	3
3,000	3
2,500 and less	2

In order to provide reliability, duplication of some or all parts of a water supply system will be necessary, the need for duplication being dependent upon the extent to which the various parts may reasonably be expected to be out of service as a result of maintenance and repair work, an emergency, or some unusual condition. The introduction of storage, either as part of the supply works or on the distribution system, may partially or completely offset the need for duplicating various parts of the system; the value of the storage depends upon its amount, location, and availability.

41. Does KAWC have any plans to acquire any additional water or wastewater facilities during the forecast period? If so, please provide a detailed explanation.

Response:

Please see the response to KAW_R_LFUCGDR1_NUM008_081823.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

42. Please provide a list of all local governments and water utilities in Kentucky (other than Lexington) who obtain water from KAWC and the terms of each such arrangement. As KAWC adds additional customers of this type, please explain whether such customers will reduce the burden of the Kentucky River Station II Water Treatment Plant and associated pipeline on existing customers, or whether they will in any way reduce the cost of future water rates.

Response:

KAWC provides water to the following customers on a wholesale basis:

City of Midway
East Clark Water
Judy Water Association
City of Nicholasville
City of Versailles
Jessamine-South Elkhorn Water District
Harrison County Water District
Georgetown Municipal Water and Sewer Service
Peaks Mill Water District
Nicholas County Water District

Additionally, KAWC provides service in Owen County, the City of Owenton, the City of Monterey, the City of Sadieville, the City of Glencoe, the City of Millersburg, the City of Georgetown, the City of North Middletown, Scott County, Harrison County, Woodford County, Bourbon County, Clark County, Nicholas County, Rockcastle County, Jackson County, and Jessamine County. These local governments purchase water for individual government properties and fire services under KAWC approved tariffs.

KAWC generally negotiates wholesale water purchases in accordance with cost of service based agreements, therefore any additional customers would be required to cover the cost of service requested. KAWC's entire system of treatment plants, mains, and storage tanks is designed and constructed for a capacity to meet KAWC's current population and future increases within the area that KAWC currently serves through the year 2030. KAWC customers would benefit from any growth through the economies of scale utilizing shared facilities with either reduced rates or delayed or mitigated rate increases depending on the size and scope of any future expansions.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis and Charles Rea

43. For each year from 2015 – 2022, please provide a comparison of total projected water use established in the prior year and the total actual water use. For example, for 2015, provide the forecasted total water use established in 2014 for 2015, and the actual total water use in 2015.
- (a) To what extent are current consumption and demand rates consistent with the projections KAWC has submitted in PSC proceedings since 2002?

Response:

Please see the table below:

Year	Usage - 000s Gals		Variance	
	Actual	Forecast	Vol	%
2015	12,145,837	12,100,410	45,427	0.4%
2016	12,419,497	11,363,560	1,055,937	9.3%
2017	11,835,936	11,208,821	627,115	5.6%
2018	11,749,816	11,830,017	(80,201)	-0.7%
2019	11,994,423	11,705,580	288,843	2.5%
2020	11,497,793	11,591,483	(93,690)	-0.8%
2021	11,659,656	11,494,688	164,968	1.4%
2022	12,117,786	11,395,901	721,885	6.3%

- (a) Since 2002, KAW has submitted demand projections four times in PSC proceedings:
- 1) Case 2001-00117 included a multi-year projection, in 2004, to earlier information. The actual daily demands during the projected period from 2004 to 2015 were below those projections by 1.83 million gallons per day on average, or 4.05%.
 - 2) Case 2007-00134 included multi-year projections. The actual daily demands for 2007 through 2015 were below those projections by 1.50 million gallons per day on average, or 3.52%.
 - 3) Case 2012-00096 included projections and 2011 actual demands. The actual daily demands from 2012 to 2015 were 2.09 million gallons per day below the projections on average, or 5.17%.
 - 4) Case No. 2014-00258 included demand forecasts for planning purposes. These forecasts were for 2015 and every 5 years through 2030. The actual daily demands for 2015 and 2016 were 2.56 million gallons per day below the CPS 2015 projection, or 6.05%.

FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

45. Does KAW have an estimate of how much water has been lost due to leaking KAWC infrastructure? Please provide this information for the previous 5 calendar years by volume and percentage of treated water.

Response:

Please reference the table below for the last five calendar years of water loss due to line breaks and line leaks. The volume of water loss from main breaks is shown in the "Line Breaks" category in the PSC Monthly Water Loss report – see LFUCGDR1_045 Attachment 1 as an example. KAWC has not quantified the volume of water loss specifically due to unidentified leaking infrastructure. Consequently, any volume of water loss in that and other categories is embedded on line 26 "Line Leak" in the PSC Water Loss Report, which captures all volumes not specifically noted elsewhere on the report form. Quantities listed below are the sum of line breaks and line leaks.

Annual Volume of Water Loss Due to Line Breaks & Line Leaks		
	Annual Volume (gal omit 000)	Percent of System Delivery
2018	2,923,165	19.6%
2019	3,277,525	21.0%
2020	3,003,766	20.4%
2021	3,155,966	21.0%
2022	3,393,124	21.6%

FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

46. Please describe what processes are in place to identify a potentially stuck meter or unknown leak (e.g., automated review of meter data).

Response:

After a meter has been read each month, orders are created after analyzing the previous month's reading. If the readings indicate the meter is potentially stuck, a work order is created to investigate the zero usage or other indicia of a stuck meter. If a meter's usage is above a pre-determined threshold, an order is created to verify the usage is correct. Customers can also request the Company investigate whether there is a leak or seek an explanation for unexpectedly high or low usage.

47. Does KAWC have a formal policy or informal practice regarding expenses incurred by a customer due to an unknown leak? Does KAWC grant customers leniency in this situation? If so, please describe.

Response:

When a customer suspects they have an unknown leak and requests a leak adjustment, Kentucky-American adheres to the language for hidden leak adjustments at First Sheet 44 of its tariff for leaks that fit the criteria for that type of leak. Please see Attachment 1 for our process.

Should the customer not fit the criteria for this type of adjustment, we do offer payment plans for customers who are eligible. The payment plan can be customized for the customer based on the past due amount and customer input. Please see Attachment 2 for official process. We also encourage customers, if qualified, to take advantage of any known assistance programs such as our H2O program and LIHWAP.

KY LEAK ADJUSTMENT ESCALATION PROCESS DOCUMENT

Issue	Description of Issue
1.	<p>When the customer requests an adjustment, the Customer Service Representative will direct them to the location of the Leak Adjustment Request form. Note: Mail, email, fax if needed. (location of form)</p> <p style="margin-left: 40px;">1. The form will require the customer to (up to the state to determine form requirements):</p> <ul style="list-style-type: none"> A. document the cause of the leak B. confirm the leak period (dates from discovery to repair) C. include how the leak was repaired including repair/contractor receipts <p>The form will contain details on where to mail and what information is required</p>
2.	<p>When the form is received by members of the KY Customer Advocacy Team they will attach it to the contract account and create a BPEM case (ZC-Billing Follow up) advising billing of the additional information provided by the customer and noting if a leak is acceptable or should be denied.</p>
3.	<p>If the service order notes indicate continuous use but do not include a source or documentation of repair, then customer must contact us to initiate a request and should complete the form.</p>
4.	<p>If the adjustment is approved, the Billing Team will process the adjustment using the CRM Leak Adjustment tool/following the documented guidelines</p>
5.	<p>If the adjustment is approved, the Billing Team will process the adjustment following the documented guidelines.</p>
6.	<p>If the adjustment is denied, the Billing Team will process the BPEM following the documented guidelines for a denial. Note: send denial letter as per our documented process.</p>
7.	<p>Billing will use current standard SAP letters to communicate the decision to the customer.</p>

Note: If a case for a leak adjustment is created by someone other than the KY Customer Advocacy team, coaching is required to ensure the correct process is followed. In these instances, the rep assigned the case should send the customer the directions to locate the leak form. Once the letter is sent, the BPEM case can be closed.

KY LEAK ADJUSTMENT ESCALATION PROCESS DOCUMENT

Draft Letter to customer when a form is needed:

Thank you for your recent inquiry concerning an adjustment to your high water bill. Our policy requires that we receive a written request and ask that you complete the form on our website. Completion and receipt of the form is needed before we can review your account for adjustment eligibility. Please ensure your completed form includes responses to all questions and the account holder's signature.

The form is located on the Kentucky American Water website [under the Customer Service and Billing section](#). If you are unsure how to complete the form, please reach out to us at the number listed on the bottom of this letter. We will be happy to walk you through the process.

Please note that we cannot move forward with processing of your adjustment request until the requested information has been received. Should you have any questions, customer service representatives can be reached M-F between the hours of 7 a.m. and 7 p.m.

Thank you for your understanding. We look forward to working with you to resolve this issue.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

II. Installment Plans

An **installment plan** (IP) is a contract between the customer and American Water to pay an outstanding balance over a period of time with current charges until the outstanding balance is paid off. Typically, an installment plan is required to pay a past due or high balance. A customer can set up the installment plan to split their outstanding balance into multiple payments.

Installment plans must **always** be set up on the **entire account balance**. Be sure to get the full amount from the account balance screen, not from the customer's bill.

Eligibility

MyWater performs a review to determine the account's eligibility for an Installment Plan. It will determine if the account is:

- Active
- Residential
- Eligible - If a customer defaulted on an installment plan in the past 12 months, they are not eligible for another one until the 12 months has elapsed.

Notes:

- Some states have specific guidelines or requirements that must be followed. MyWater will take these into account. You will find different payment amounts will be presented. State-specific guidelines are documented in the Online Billing & Collections Document in IDA.
- If a non-residential customer requests an installment plan, create a **CS – Non Standard AW Installment Plan** BPEM case. If Collections denies the installment plan, the Collection representative contacts the customer to inform them of the decision. Place a 30-day Dunning > Payment Extension lock and a Calculate Interest > Late Payment Charge Lock on the account while waiting for processing.

Negotiating Payment Terms

Upfront Payment

When setting up installment plans, the customer is required to pay part of the total outstanding balance upfront. **Always try to negotiate as much as you can for the upfront payment.**

MyWater will present the minimum required upfront payment amount for your reference - the **minimum** upfront payment in most states is **25%** of the total balance. If the customer can pay a higher amount, you will be able to enter that amount when creating the plan.

The upfront payment must be paid over the phone by electronic check or credit card, on our automated payment line, online via MyWater, or at a local payment location.

Be sure to provide the customer with their full 16-digit account number if making a payment at a payment location or on the automated payment line. **Do not** instruct the customer to call back with a receipt, the system allows for time to post to the account.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Down Payment Considerations

- If a good faith payment is found on the account (any payment made within last 10 calendar days), a down payment is not required.
- If an active pledge is found on the account, a down payment is not required.
- A pending payment on the account will reduce the total eligible amount for an installment plan.

Arrangement Length

In most states, MyWater will display options for plans ranging from 2 months in length to 6 months in length. Depending on the amount of the total balance, or in the event that an account requires more than a 6-month payback (such as a back bill), create a **CS – Non Standard AW Installment Plan** BPEM Case with detailed notes on the terms and conditions provided to the customer. Be sure to also indicate the reason why the extended period of time has been requested.

Back Billing and Installment Plans: There are situations when a bill has been delayed in processing or back billing has occurred on an account and may result in a higher-than-normal balance on the account. To help those customers, remember to verify if the customer is eligible for an IP and if they are, be sure to offer the option.

If the customer is not eligible based on the IP guidelines but has been billed more than one period or back billed, an exception should be made to this rule and a non-standard Installment Plan should be offered.

In these cases, we should offer to set the terms up for the length of time on the accumulated balance. Example: a customer's bill covers a fifteen-month period; we should give the customer at least a fifteen-month IP. A CS – Non-Standard AW Installment Plan BPEM case may be needed if MyWater will not allow an IP to be set up for the customer.

Payment Frequency

Payments must be made monthly towards installment plans regardless of the customer's billing cycle.

Auto Pay

If a customer has enrolled in Auto Pay and enters into an IP, all of the installments as well as the upfront payment will be automatically drafted from their account on the due date. There is no need for the customer to send in a separate payment.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Installment Plan Confirmation Letter and Coupons

MyWater will send an email confirmation to customers who have an email address on file that includes the details of their installment plan. However, our **bi-monthly and quarterly billed customers** also receive a confirmation letter with coupons for their installment plan payments. The installment plan payments will not coincide with the due date of the bi-monthly or quarterly bills, and the customer should be made aware of this. Monthly billed customers do not receive the installment plan confirmation letter or coupons; the amount they must pay is included on their monthly invoice.

NSF and Installment Plans

If a customer is requesting an installment plan but has a returned payment and the amount due is still outstanding, we will require them to pay the amount of the returned payment and any associated fees **before** we consider giving them an installment plan. Acceptable forms of payment are cash, money order, cashier's check, debit card, or credit card. Their account will **not** be coded "cash only" with only one (1) returned payment, but we can require them to pay for the NSF check amount and fees before granting an installment plan.

Deactivation of Installment Plans

An installment plan will deactivate as a "default" at the time the customer's service is disconnected for non-payment.

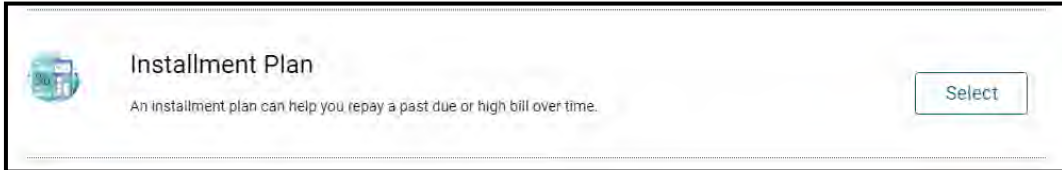

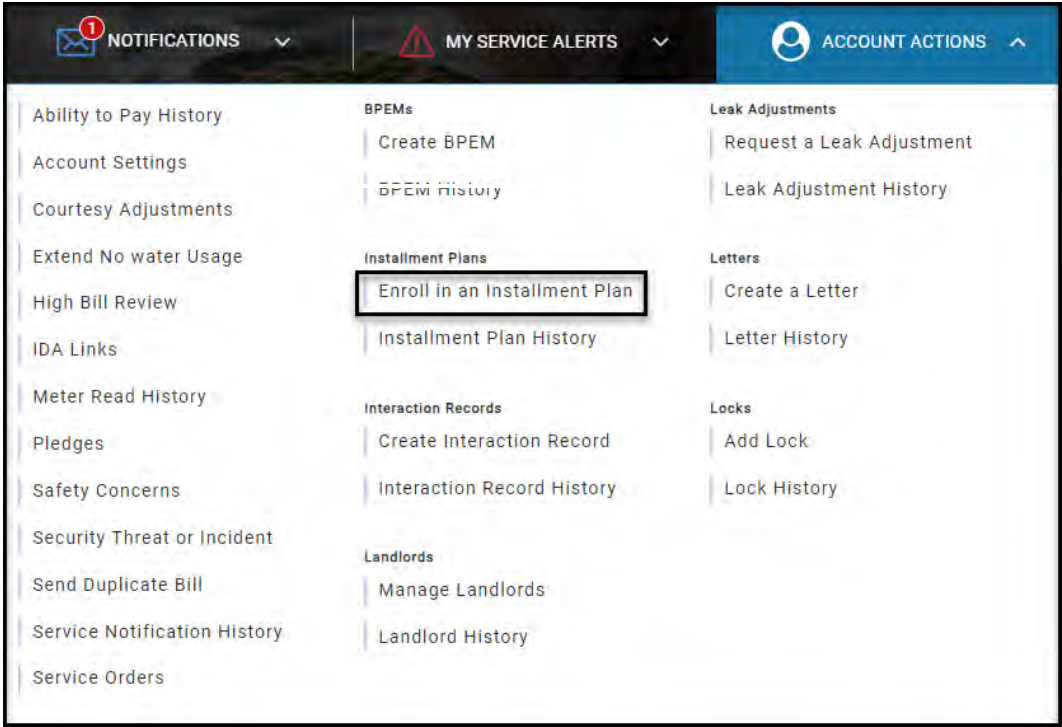

Note: If customer pays within \$5.00 of the installment amount, it will not default as there is a \$5 grace amount built in. **This is for internal information only and not to be shared with customers.**

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Creating an Installment Plan

There are two locations where a plan can be created in MyWater. The following steps show just one of those locations.

Step	Description
1.	<p>Installment Plans can be set up from the Payment Assistance card, in addition to from the drop-down menu.</p> <div data-bbox="337 575 1393 743" style="border: 1px solid black; padding: 10px; margin: 10px 0;">  </div> <p>On the Account Actions drop-down menu on the Account Landing screen, click Enroll in an Installment Plan.</p> <div data-bbox="337 911 1393 1633" style="border: 1px solid black; padding: 10px; margin: 10px 0;">  </div>

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Step	Description
2.	<p>MyWater determines eligibility and the amount eligible for an installment plan. HOS charges billed on American Water invoices are not eligible for an installment plan.</p> <p>The minimum down payment amount is calculated. If the customer is paying the minimum amount, enter it in the Down Payment Amount field. If the customer can pay more than the minimum amount, enter that amount instead.</p> <div data-bbox="355 598 1373 1136" style="border: 1px solid black; padding: 10px;"> <p>The screenshot displays the 'Installment Plan Details' section. At the top, a green checkmark icon is followed by the text: 'You are eligible for an installment plan. Please select your down payment amount and plan below.' Below this, a dashed blue box highlights the 'Amount Eligible for Installment Plan' as '\$108.51'. Underneath is the 'Installment Plan Calculator' section, which includes the instruction: 'Enter your desired down payment amount in the field below to calculate available plans for the remaining balance.' There are three main components: 'Installment Plan Total' showing '\$108.51', 'Down Payment Amount' with an empty input field and a 'Minimum Down Payment: \$10.00' note below it, and 'Remaining Balance:' showing '\$98.51'. A note at the bottom states: 'Please note: You may make more than the minimum required down payment amount by entering it in the field above, or below in the Make a Payment section.'</p> </div>

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Step	Description										
3.	<p>Based on the remaining balance, provide the customer with the monthly payment options, and choose the plan that best works for them. These payment amounts are <u>in addition to their current charges each month.</u></p> <div style="border: 1px solid black; padding: 10px; margin: 10px auto; width: 80%;"> <p> Select Payment Plan <small>Please select your payment plan below. These payments will be in addition to your regular monthly bill.</small></p> <p style="border: 1px dashed blue; padding: 2px; display: inline-block;">Remaining Balance: \$98.51</p> <p style="text-align: center;">Available Plans (please select one)</p> <table style="width: 100%; border-collapse: collapse;"> <tbody> <tr> <td style="text-align: center; padding: 5px;">2 Months Plan</td> <td style="text-align: right; padding: 5px;">\$49/mo</td> </tr> <tr> <td style="text-align: center; padding: 5px;">3 Months Plan</td> <td style="text-align: right; padding: 5px;">\$32/mo</td> </tr> <tr> <td style="text-align: center; padding: 5px;">4 Months Plan</td> <td style="text-align: right; padding: 5px;">\$24/mo</td> </tr> <tr> <td style="text-align: center; padding: 5px;">5 Months Plan</td> <td style="text-align: right; padding: 5px;">\$19/mo</td> </tr> <tr> <td style="text-align: center; padding: 5px;">6 Months Plan</td> <td style="text-align: right; padding: 5px;">\$16/mo</td> </tr> </tbody> </table> <p style="font-size: small; margin-top: 10px;">You will receive a confirmation number on the following page once the installment plan is completed by selecting the Submit button below.</p> </div>	2 Months Plan	\$49/mo	3 Months Plan	\$32/mo	4 Months Plan	\$24/mo	5 Months Plan	\$19/mo	6 Months Plan	\$16/mo

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Final Billed (Closed) Accounts Installment Plan Eligibility

The following items are pre-requisites that must be verified by the CCA before creating a BPEM case. Successfully meeting the below requirements DOES NOT GUARANTEE an IP will be created.

- Residential accounts only.
- If a customer defaults on an installment plan, they are not eligible for another one for 12 months. Use the start date of the last installment plan to determine eligibility.
- The customer cannot have more than 160 creditworthiness points.
- The customer must agree to pay 25% of the total balance.
- The agreement cannot be more than three installments.

If the customer meets these qualifications and agrees to the terms of the installment plan for a closed account, create a **CS – Non Standard AW Installment Plan BPEM case** with detailed notes.

DO NOT promise the customer that the IP will be granted or **negotiate** the IP terms and conditions as it may not be offered.

Collections will attempt to reach the customer by phone to negotiate the IP. The customer must verbally agree to the installment plan criteria. No installment plan is created if the **customer cannot be reached** or does not agree to the IP requirements.

It is also important to note that for Write Off accounts, Collections must partner with the third party collections agencies to 1) determine installment plan eligibility and 2) agree upon the IP terms and conditions.

When a **CS - Non Standard AW Installment Plan BPEM case** is made requesting IP creation by Collections, enter 2 separate locks on the account for **30 days** using the following lock types:

- **Dunning > Payment Extension**
- **Calculate Interest > Late Payment Charge**

Remember to include all terms and conditions agreed to with the customer in the case notes. This helps to ensure first call resolution (FCR).

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

III. Renegotiating Installment Plans

Occasionally customers call to make changes to an existing installment plan (renegotiate). Prior to renegotiating any installment plans, ensure the following qualifications are met:

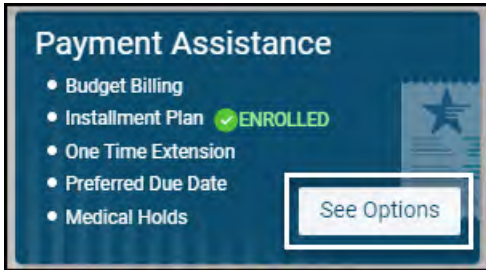

- The initial (upfront) payment has been received and posted.
- Do not renegotiate more than two times per installment plan.
- If a customer is past due on their installment plan and receives a disconnection notice, they are no longer eligible to renegotiate the terms of their agreement.

Note: Occasionally, a due date may have passed, but the IP remains open because the system builds in days for posting, also known as “grace days”. There are five grace days built into the programming; this information is not to be shared with the customer.

Renegotiating an Installment Plan will require the customer to make another upfront payment within 48 hours. Essentially, one IP is being closed out for a new IP to be created.

MyWater will determine if the customer qualifies for an IP renegotiation.

Renegotiating an Active Installment Plan

Step	Description
1.	<p>Scroll down on Account Landing page to the Payment Assistance card. Click See Options.</p> <div style="text-align: center;">  </div>

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Defaulting on an Arrangement

Be sure that the customer understands that all amounts must be paid (and posted) by the appropriate due date. It is possible for a customer to become past due on the current charges, even though their term amount is paid on time. This situation would cause the customer to enter the collections process to begin receiving disconnection notices.

Late Payment Charges

Customers are not assessed late charges on the amount included in an installment plan in most states. Check the Online Billing and Collections document for the exceptions.

Budget Billing and Installment Plans

This option will allow fixed income customers to enroll in budget billing in an effort to 'stabilize' their current monthly charges so that while they are on an installment plan to pay off their balances that are in arrears, they can avoid defaulting on another installment plan.

Eligibility:

- Budget billing is available for monthly billed residential customers.
- In all states but NJ, recalculation of the budget amount occurs every three months.
- At the end of the 12-month plan period, the customer receives a true up bill.
- Fire service accounts are not eligible.

Program Requirements:

- Installment Plan cannot be greater than 12 months.

Process:

1. Create the Budget Bill first so the customer can be advised how much their current charges will be. If the proposed budget amount is affordable for the customer, set it up.
2. Create the Installment Plan for the past due balance. Because the customer will get the true-up bill in 12 months, the IP cannot exceed 12 months.

Note: If MyWater will not allow the budget to be created, send the request to create the budget via a BPEM case to Billing Follow-up.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

IV. Pending Disconnection for Non-Payment

American Water has established specific guidelines that must be followed when a customer has been or is about to be shut off for non-payment. During the call, you are responsible for researching the customer's account and providing them with the required details to make a payment.

Upon accessing an account that is pending disconnection, the following dialogue box displays.

For an account that is pending disconnection, the Account Landing Page will display the following information:

1. The My Bill card and the Billing Comparison card will be outlined in red
2. The Billing Comparison card will display the past due balance as the "Remaining Balance"
3. The Service History card will display the **Turn Off NP** service order

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

To avoid disconnection, inform the customer of the total balance due, in the event they want to pay the entire amount, and the delinquent amount. When a disconnect for non-pay service order is generated on an account with an active Installment Plan, the service order comments will also list required amounts to be paid before and after disconnection.

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Offer to process the payment over the phone if there is a stored payment method or transfer to the payment line. If the customer accepts, collecting a reconnect fee is not necessary because the water is still on. Once payment is received, cancel the pending disconnect service order if it did not auto-cancel.

If the customer wishes to make their payment at a payment location, instruct the customer to make the payment **as soon as possible** to prevent disconnection. Ensure the customer has their 16-digit account number and quote any applicable reconnection fee in the event the order is worked before payment is made.

There is no need to instruct the customer to call back with receipt information once payment is made. The order will be cancelled automatically if it is still pending. If the order is completed, the customer will be required to call back with receipt information to verify payment and restore service.

Installment Plans and Pending Disconnection Service Orders

The standard process regarding installment plans and disconnect service orders is that you cannot offer a new installment plan once the disconnect order has been generated on an account.

Remember, if you set the customer up on a new installment plan in this situation, you MUST cancel the disconnection order. Some of our States have different rules regarding installment plans and disconnect orders, check IDA > State Specific Information or the Online Resource documents for state specific information.

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Payment Inquiries

Customers may call to inform you that the service is about to be disconnected and only inquire as to the *minimum* amount they need to pay to prevent the shut off. There are many ways to access the amount required to prevent disconnection.

**UNIT 19:****PAYMENT ASSISTANCE & DISCONNECT INQUIRIES**

Automatic Payment Validation and Disconnection Order Cancellation

MyWater can automatically validate a payment made by a customer that used the Paymentus web site, over the phone via the IVR, or at a payment location against the delinquent amount due and will cancel any pending disconnection service order.

Delinquent amounts paid in **two or more installments will not cancel** the pending disconnection order. This is because the grand total of multiple payments is not recognized by the system.

In this instance, a call to the CSC would be necessary to stop the pending disconnection. For example, if the delinquent amount is \$150.00 and the customer pays \$100.00 on Tuesday morning and \$50.00 on Tuesday evening, the pending shut off order **will not** auto-cancel.

If the customer was not made aware of the need to call back, we would handle this as a company error, create the reconnection order, and waive any reconnection fees.

Online Banking Bill Pay

Payments made through a customer's online banking will not prevent shutoff or restore service until the payment has posted on the customer's account. This also applies to payments mailed to us via USPS.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Canceling a Pending Disconnection Service Order

If the customer pays the amount with you and the disconnect order is still open, cancel the pending disconnection service order.

Step	Description
1.	Determine the amount the customer must pay to prevent shut off and verify the disconnect order to determine if the water will be shut off for water or sewer.
2.	If the customer does have a stored payment method, process the payment. If the customer does not have a stored payment method, enter the payment amount in Paymentus and transfer the call to the Paymentus payment line (7228). Watch as the payment processes to ensure the payment is accepted. If the customer has made a payment at a payment location, verify the receipt.
3.	From the Service History card, click View All to view the service order screen.
4.	Change the view from Premise History to Account History by clicking on Account History .
5.	Click on the open Turn Off NP service order that needs to be cancelled.
6.	At the bottom of the service order details screen, click Cancel Service Order .
7.	<p>Select Payment Received as the Cancellation Reason and enter the payment confirmation details in the notes.</p> <p>Click Cancel Service Order.</p> <div data-bbox="344 1186 1365 1591" style="border: 1px solid black; padding: 10px;"> </div>

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Medical Certificates and Disconnection Service Orders

If a customer states that they or someone in their household have a medical condition that necessitates water, you **MUST** advise the customer to send in a medical certificate signed by their doctor or nurse practitioner with all pertinent account information (customer's name, account number, phone number, relationship to the patient). The letter must include a statement that indicates that the medical condition will be aggravated without water. There is a medical certificate letter that can be sent via MyWater, or the customer can contact the doctor and have this information sent on their letterhead or prescription pad. This document can be emailed, faxed, or mailed to American Water.

If the disconnection order is open, check **IDA > State Specific Info > Med Cert** to see if the shut off order should be cancelled prior to receiving the medical documentation.

Most states have placed a limit on medical certificates to two per rolling year. MyWater will determine a customer's eligibility.

Medical Hardship ✔ Eligible

Short term payment extension for Medical Conditions.

Select

If the customer is eligible for a medical certificate, place the **Dunning > Medical Certification Documentation** as indicated in IDA > State Specific > Med Cert.

After the med cert is received and approved, the lock will be changed to **Dunning > Medical Certification Extension** by the fax processor for 30 or 60 days, dependent upon state requirements.

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Assistance Programs and Pledges

Programs are made available to help our customers who have difficulty paying their water bill. These Assistance Programs are typically administered by outside agencies, such as the American Red Cross, Department of Health and Human Services, or Dollar Energy.

Customers who would like to request assistance should be referred to one of the screening agencies located in the **IDA Links**.

The processes associated with handling assistance programs include:

- Locating an agency for a customer
- Accepting a pledge on a customer’s account
- Canceling termination scheduled on a customer’s account
- Restoring service on a customer’s account

In addition to providing pledge information over the phone, pledges can be emailed to CSO.paymentassistance@amwater.com or faxed to 1-866-464-0232. Any pledges that come through during the weekend will not be processed until Monday or the next business day.

Locating an Agency for a Customer

During a call, customers may request the name or number of an assistance agency. This information is in **IDA Links**.

Note: If the name of the agency appears in red, the agency is out of funds and will not be able to assist the customer.

ILAWC - Sterling (District)	409 Avenue F Fall Sterling, IL 61081-3309	Phn: (815) 625-1822	Yes	The H2O (Help to Others) Program is an emergency assistance program created by Illinois American Water and The Salvation Army. The program helps provide supplemental funding to Illinois American Water customers who would otherwise have trouble paying their bill and be subject to service disconnection.
ILAWC - Peoria (District)	Helping Hands: 1115 E. Vesey Ave Peoria, IL 61602	Donating Information: Peoria (Specialty) Phn: (309) 674-7160 Monday thru Friday 08:00 AM to 04:00 PM	N/A	Phone is manned 24/7. Peoria County (Residents only) sometimes has funds available - refers individuals to other agencies with funding.
ILAWC - Lincoln (District)	Jefferson Street Christian Church 1700 North Jefferson Street Lincoln, IL 62556-1047	Rochelle Phn: (217) 732-8294 Monday thru Friday 08:00 AM to 04:00 PM	Yes	6-8/Week Waiting List
ILAWC - Chicago Metro (District)	Joliet Township Office 51 North Des Plaines Joliet, IL 60432	Supervisor's Office Phn: (815) 726-4781 Monday thru Friday 08:00 AM to 04:00 PM	Yes	Joliet customers only.

Pledges and Installment Plans

Pledges can be created regardless of whether an active Installment Plan already exists or when setting up a new Installment Plan. A pledge is a ‘statistical credit’ that prevents dunning on the pledged amount for 45 days allowing time for the funds to be received from the agency and applied to the account.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Using a Pledge as an Upfront Payment

A pledge can also be used as an upfront payment and/or be treated as a recent payment to create an Installment Plan.

To set up an IP using the pledge as a down payment, create a **CS – Non Standard AW Installment Plan** BPEM Case with detailed notes explaining the pledge amount as the upfront payment amount. Also include the number of months the customer would need to pay the remaining installments.

Identifying a Pledge

A pledge placed on an account will appear as **Hardship Pledge**, and it will remain active for a period of 45 days to allow time for the agency to send in the payment. Once the payment is received, a **Payment Lot** will be posted to the account. A **Manual Posting** will then be posted, to clear out the Hardship Pledge.

DATE	TRANSACTION TYPE	AMOUNT	BALANCE	IN
3 02/22/2022	Reversal Document	\$217.50	\$ 66.23	
2 02/10/2022	Payment	-\$217.50	\$ 151.27	
02/08/2022	View Bill	\$66.23	\$ 66.23	ENVIRONM NEW L
01/31/2022	Hardship Pledge	-\$94.53	\$ 0.00	
1 01/31/2022	Hardship Pledge	-\$217.50	\$ 94.53	
01/12/2022	Late Payment Charge	\$3.26	\$ 312.03	
01/12/2022	View Bill	\$91.27	\$ 308.77	ATTE NEW L

3. Reversal document posted to the account to remove the statistical credit placed on the account while awaiting payment.

2. Actual payment that posted to satisfy the statistical credit placeholder entered on the account when the pledge was offered by the agency.

1. Pledge (statistical credit placeholder) entered on the account when the pledge agency contacts AW to submit on behalf of the customer. The statistical credit is valid for 45 days.

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Accepting a Pledge on a Customer's Account

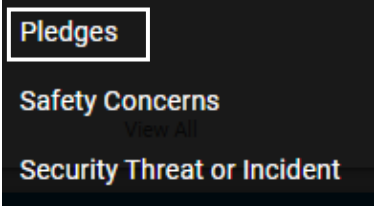

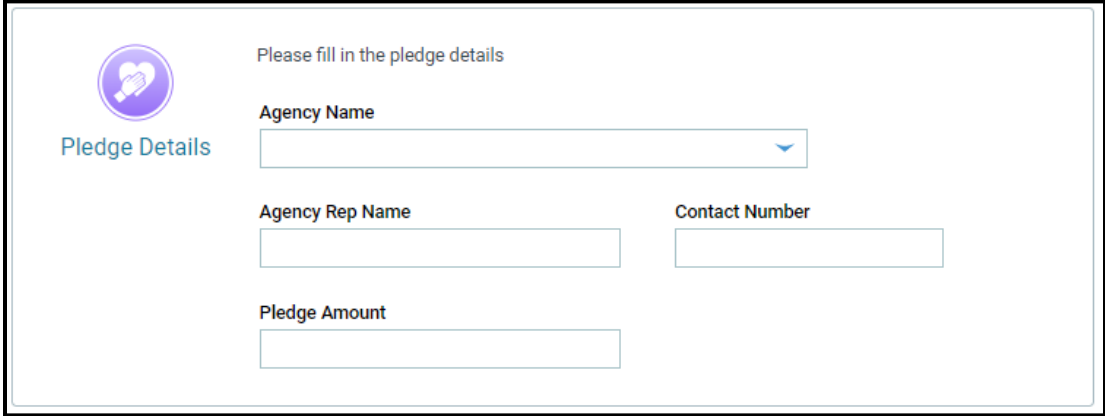

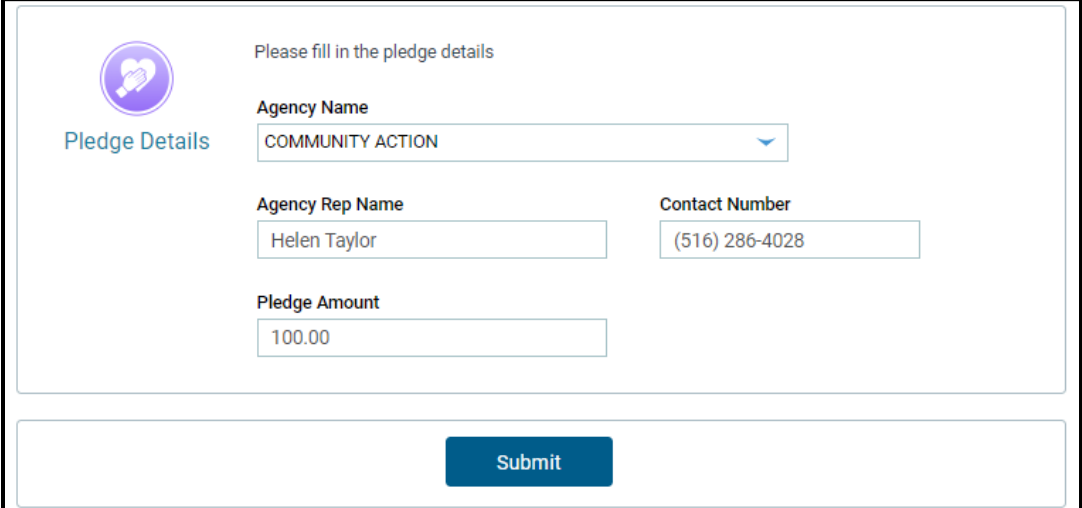

If you receive a call from a help agency offering a pledge towards a customer's account, take the following steps as it applies to your scenario:

Scenario	Action to Take
<ul style="list-style-type: none"> ▪ Water is still on <u>AND</u> ▪ Pledge from help agency (possibly combined with a customer's payment) is enough to cover shut off amount & fees 	<ol style="list-style-type: none"> 1. Check Service History to make sure there is no pending disconnection order. If there <i>is</i> a pending shut off, cancel it, and enter comments in S/O Comments explaining the situation. 2. Enter the pledge on the account. 3. Note the agency name, agency employee name, agency phone number and pledge amount to be paid in Interaction Record Comments. <p>A 45-day period is allowed for the agency's pledge to be received and posted to the customer's account. A 45-day late payment charge lock is automatically created to prevent late charges from being applied during this time as well.</p>
<ul style="list-style-type: none"> • Water is shut off <u>AND</u> ▪ Pledge from help agency (possibly combined with a customer's payment) is enough to cover shut off amount & fees 	<ol style="list-style-type: none"> 1. Issue the appropriate reconnect service order. 2. Submit the pledge on the account. 3. Note the agency name, agency employee name, agency phone number and pledge amount to be paid in Interaction Record Comments. <p>A 45-day period is allowed for the agency's pledge to be received and posted to the customer's account. A 45-day late payment charge lock is automatically created to prevent late charges from being applied during this time as well.</p>
<ul style="list-style-type: none"> • Water is on or off • Pledge from help agency (possibly combined with a customer's payment) is NOT enough to cover shut off amount & fees. 	<ol style="list-style-type: none"> 1. Submit the pledge on the account. 2. Note the agency name, agency employee name, agency phone number and pledge amount to be paid in Interaction Record Comments. <p>A 45-day late payment charge lock is automatically created to prevent late charges from being applied during this time.</p>

V. Disconnected for Non-Payment Situations

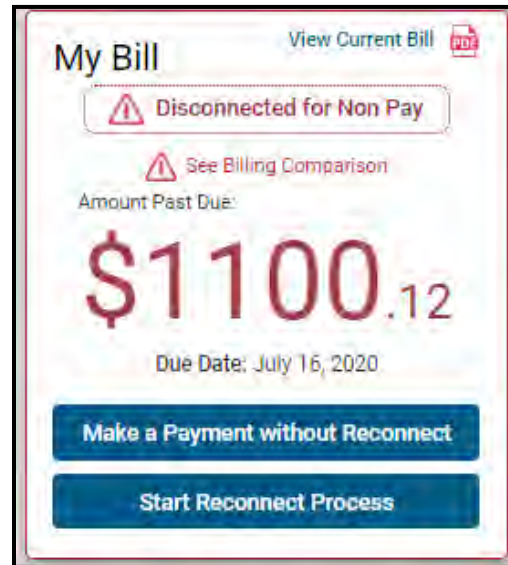

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

American Water has established specific guidelines that must be followed when a customer has been or is if an account has been **disconnected for non-payment**.

An alert will appear in the My Bill card when service has been disconnected.

The process at this point is to inform the customer what needs to be paid to get their water service restored:

- Review the account and provide the **delinquent amount** listed on the notice and service order comments and quote any applicable **reconnect fees**.

Inform the customer that you can either process their payment if there is a stored payment method, transfer the customer to our payment line, or provide them with a payment location. Once payment is made at a payment location, they can call back to restore service with their receipt number as soon as possible. Verify the receipt prior to reconnecting the service.

Returned Payments

If a customer writes American Water a check to restore water service and the payment is returned for insufficient funds, we will shut their water off again. After the customer is shut off for the second time, we will require them to pay the delinquent amount along with the associated NSF fee and reconnect fee and consider them a “cash only” customer. The only form of payment that **will not** be accepted once they are “cash only” is an electronic or personal check.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Step	Description
7.	<p>A confirmation appears.</p> 

Issuing a Reconnect Service Order for a Non-Account Owner

Once the disconnect amount has been paid, we cannot continue to withhold service from the customer. This could result in the violation of State rules and regulations. If someone other than the account owner pays at least the delinquent amount plus any reconnection fees, schedule the reconnection service order.

If someone calls stating that they want to make a payment on behalf of an account holder to restore their water service and they are not aware of the amount required to do so, provide the caller with the collect amount, and reconnect fee. Do not disclose the total balance on the account.

Please be sure to document the **caller's name and relationship** if there is one. We are not required to speak with the account owner to issue the reconnect service order. Depending on the service activation guideline requirements, if the caller cannot ensure everything in the home will be turned off, require someone at least 18 years of age to be present.

Payment at an Unauthorized Payment Location

If a customer calls in with receipt information from a payment location that is not on our list of authorized payment locations and their water is off for non-payment, record their receipt information and create the appropriate reconnect service order.

Reconnect Fee Billing

American Water cannot charge a fee that does not display on a bill. Therefore, the reconnect fee will appear on the customer's next periodic bill (even though the customer has already paid it except in areas where the reconnect fee is billed).

Should you receive a call from a customer asking why they were billed a reconnect fee in addition to paying the reconnect fee when their water service was restored, explain to the customer that the charge appears on their bill for accounting purposes.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Final Bill for Non-Payment of Water

If a customer does not restore their service within 7 days of being disconnected for non-payment, their account is final billed. The system will automatically close the account and will generate a Final Bill to the customer.

If a customer calls to restore their service after the account has final billed, they are required to pay the entire account balance plus the reconnection fee to restore their service.

To determine whether an account has final billed, review the My Accounts card for the Account Status. Once the customer pays their account in full plus the reconnection fee, restoring their service is the same process as described above. Service will be restored the **next business day** since the account has now closed.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Off for Non-Payment of Sewer

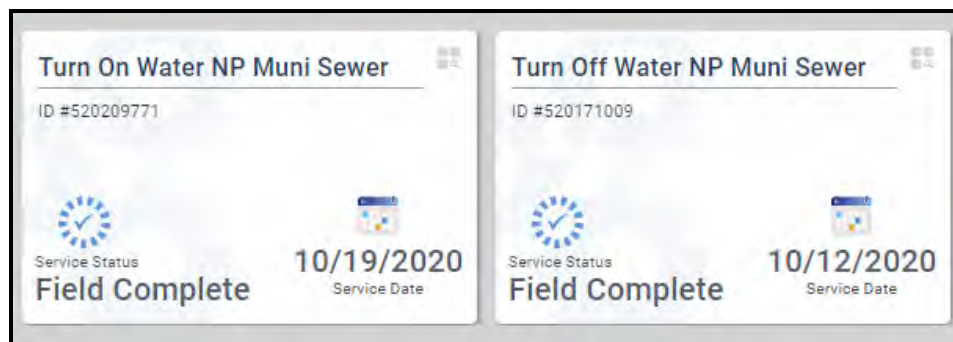

Customers may call to let you know that their service has already been shut off or that they have no water.

To confirm an account has been shut off for nonpayment of sewer, access **Service History**. The **Turn Off Water NP Muni Sewer** order will be present if the customer is shut off for non-payment of sewer.

Customers disconnected for nonpayment of sewer should be directed to contact their sewer authority to determine what needs to be paid.

The sewer authorities are responsible for issuing the **Turn Off Water NP Muni Sewer** disconnect order. Once the customer makes the necessary payment to the sewer authority, they send a data file containing the reconnect request and the **Turn On Water NP Muni Sewer** reconnect orders are auto generated. The FSR completes the **Turn On Water NP Muni Sewer** service order.

If the FSR **cannot** complete the service order the following occurs:

1. The order is marked as incomplete.
2. A door tag is left informing the customer to call the CSC to schedule another order.

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

If a customer calls to report they paid the sewer authority and no service order exists, or an incomplete was observed, research Interaction Record comments for notes indicating payment was made and that the premise is **released**. There will be an **Other Issues/Sewer Release IR** placed on the premise if a release has been received.

UNIT 19:

PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

If notes on the account indicate the sewer authority released the property, the **Start Reconnect Process** button is visible to begin the reconnect process.

Issue the **Turn On Water NP Muni Sewer** order. Service will be restored in 24 hours.

The screenshot displays the American Water customer portal dashboard. At the top, there are navigation tabs for NOTIFICATIONS, SERVICE ALERTS, and RECENT ACTIVITY. The main content area is divided into several sections:

- My Bill:** Shows a status of "Disconnected for Non Pay" with a warning icon. The amount past due is \$204.25, with a due date of July 14, 2020. Buttons for "Make a Payment without Reconnect" and "Start Reconnect Process" are visible.
- Billing Comparison:** Compares current billing to the prior month. It shows a decrease of -\$25.65 in water usage (2100 GAL, 22% decrease). Rate is \$1.2217 and Fees/Balance Transfers are \$23.65. A button for "Click to Start High Usage Review" is present.
- Account Summary:** Features a pie chart showing bill components: Water (\$85.52), Waste (\$38.71), Waste Water Service (\$35.00), Other (\$7.60), HOS (\$25.78), and Fed Tax Adjustment (-\$6.93). It also lists the due date (Jul 14, 2020) and service period (May 20 to Jun 17). A "View Billing History" button is at the bottom.
- Service Request:** Offers options to "Move In/Add New Service", "Move Out/Turn Off Service", and "Transfer Service". A "Report an Emergency or Concern" link is at the bottom.
- Usage Quick View:** Shows a table of bills:

Bill Type	Amount	Usage
Current Bill	\$180.60	7,000 GALLONS
Previous Bill	\$218.35	9,100 GALLONS
Prior Year Bill	\$209.27	9,100 GALLONS
- Service History:** Lists recent service requests:

Request	Date	Status
Turn On Water NP Muni S...	May 04, 2021	Closed
Turn On Water NP Muni S...	May 04, 2021	Closed
Turn Off Water NP Muni S...	April 20, 2021	Closed

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

Summary

In this unit you learned how to handle installment plans. Key points from this unit include the following:

- Customers who have **one** defaulted installment plan in the past 12 months are **not** eligible for another plan for one year.
- Customers are required to make an upfront payment on their balance.
- The upfront payment is due within 48 hours and should be paid at a payment location, paid via MyWater, or made via the automated payment line with their electronic check or credit card or with a CCA over the phone. Always try to collect as much as you can upfront. The minimum upfront payment is 25% in most states. Check IDA > State Specific for installment plan guidelines by state.
- Payment terms are due monthly regardless of the customer's billing cycle.
- The monthly term amount will be displayed on the customer's invoice.
- The customer is required to pay each installment **in addition** to the current charges on the invoice.
- Certain information must be covered with the customer, including the terms of the plan, the upfront payment amount, and due dates.
- Installment plans on closed accounts must be set up by Collections. Verify eligibility and send a BPEM Case to Credit and Collections.
- Installment plans cannot be offered once a disconnection order has been issued on an account with very few exceptions. Cancel open disconnection orders if you set up an installment plan.

UNIT 19: PAYMENT ASSISTANCE & DISCONNECT INQUIRIES

FAQ, Hints, and Tips

- Always review the customer's account before agreeing to set up an installment plan.
- Installment plans must always be set up on the **entire account balance** excluding HOS charges. SAP will not permit HOS charges to be selected into an IP.
- The installment plan amount is included separately on the customer's bill.
- Not all due dates of installment plans will match the bill due date. In the case of monthly billing, due date of installment plans will be in line with the due date of invoice. For all other billing cycles, the due date of installment plans is not adjusted to invoice date.
- If billing is delayed, the installment plan due dates will not auto-adjust.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

48. Identify the percentage of KAWC's non-revenue water for each of the last 60 months. Include within your response the formula of how KAWC calculates this percentage.

Response:

KAW calculates the non-revenue water ("NRW") percentage by subtracting total sales from total system delivery which results in total NRW. Total NRW is then divided by total system delivery to arrive at the NRW%.

The Company suggests that a twelve-month rolling, annual, or multi-year water loss percentage would be an appropriate indicator of NRW. This is because these longer periods normalize one-time events and timing anomalies that exist within a monthly percentage. One-time events include water losses from multiple main break events in a cold winter month. Timing anomalies exist because while "Water Produced" statistics represent the current calendar month, "Water Use" statistics do not, due to billing lag. This phenomenon can make the water loss percentage appear unusually high in the late spring when production is ramping up but the sales are not yet billed (e.g. May), and unusually low in the early fall when production is ramping down but billed sales are still high (September).

Please reference KAW response to PSCDR2_NUM079 for monthly NRW rolling 12-month percentage for the last 60 months.

Please note that NRW is different than unaccounted for water.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

49. Please describe existing or planned water conservation programs aimed at end customers and the respective annual funding for such programs. For each such program, please provide an annual estimate of the quantity, in volume and percentage of treated water, of water which will not be consumed as result of the program.

Response:

The company budgets approximately \$30,000 annually for a variety of outreach efforts to educate customers on ways they can reduce their water usage and to raise general awareness of wise water use.

Such outreach may include educational customer e-mails, home water leak detection kits, educational media advertisements, specialty items with wise water use messaging, social media outreach, partnerships with environmental organizations, and conservation-themed educational items for children.

Generally, approximately \$20,000 is spent on educational media ad placements with the remaining \$10,000 focused on other efforts listed.

We do not have data regarding the amount of water customers do not consume as a result of these efforts.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191

50. Please refer to the testimony of Shelly E. Porter in response to the Question appearing on line 17, page 13.
- (a) Please provide a listing of all of the capital investments the Company has invested or plans to invest since the last rate case totaling “approximately \$329.6 million.”
 - (b) For each such investment, please list the amount of the investment in each project by year “since the last rate case”; provide the description of the project; provide the location of the project; and provide the expenditure for each project by year.

Response:

Please see the response to KAW_R_PSCDR2_NUM020_081823 and KAW_APP_EX13_063023 pages 3, 5 and 7. A detailed description of each RP line can be found in Witness Porter’s testimony beginning on page 7, Line 12. Detailed descriptions on Investment Projects (IPs) can be found in Witness Porter’s testimony beginning on page 15, Line 1. IP descriptions containing Millersburg, Owenton, Operations Center Storage Improvements, KRS2 and Boonesboro are associated with locations outside of Fayette County area.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Krista E. Citron

51. Please refer to the testimony of Shelly E. Porter beginning on line 4, page 5. Please list each segment of pipe that is in need of replacement. For each such segment, please provide:
- (a) description of the segment to be replaced;
 - (b) the location of said segment;
 - (c) its total useful life in years;
 - (d) the number of years it has been in service;
 - (e) the date on which replacement is expected to begin; and
 - (f) the estimated cost of replacement.

Response:

- a. Refer to KAW_R_LFUCGDR1_NUM051_081823_Attachment A for a sample of GIS pipeline data for KAWC's distribution system. There are over 37,000 pipeline segments identified in KAWC's system and the complete list is over 500 pages in length. More information about the information contained in the pipeline prioritization model can be found in the Citron Direct Testimony on pages 10-17.
- b. See item (a) above. This data contains information on all the pipe segments owned by KAWC. Example maps of the pipeline segments are shown in the Citron Direct Testimony on pages 14-17.
- c. Refer to KAW_R_AGDR1_NUM026_081823 item (a) for tables depicting the mileage of pipe in KAWC's system by material type and age, and the average useful life of each pipe material. Discussion of the remaining useful life of the system as a whole can be found in the Citron Direct Testimony on pages 6-7 and KAW_DT_Citron_Exhibit_1.
- d. See item (a) above.
- e. QIP Year 4 projects, found in Case No. 2023-00030, are expected to be replaced from July 2023 through June 2024. KAWC uses a pipeline prioritization model plus the consideration of external factors (such as coordination with other utilities or

scheduled paving projects) to determine an annual list of water mains to be replaced. A detailed discussion of this process and factors can be found in the Citron Direct Testimony on pages 10-17.

- f. Based on recently completed QIP Year 3 projects, KAWC is seeing an average cost of \$331 per linear foot. However, this cost does vary project to project. Replacing a larger-diameter water main in an urban area, with service line reconnections and restoration/paving work, has a higher cost compared to replacing a similar or smaller water main in a more suburban or rural area, or in a utility strip compared to beneath pavement.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Krista Citron

52. Please refer to page 9, line 12 of the testimony of Krista E. Citron. Please quantify the rate of acceleration in investment necessary to meet the “need to further accelerate the rate of investment to replace our water infrastructure.”

Response:

Currently, KAWC replaces approximately 10-13 miles of main, or 0.5 percent of its system, annually through the QIP. In order to replace the entirety of the system in keeping with the pipe’s life expectancy, the recommended rate is to replace 27-34 miles of main annually. This would be a replacement rate of 1.1 to 1.4 percent annually.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kathryn Nash

53. Has KAWC had difficulty attracting capital either internally from American Water or from outside capital? If yes, please provide evidence of this.

Response:

Yes. KAWC's parent, American Water Works Company, Inc. ("American Water") owns the common stock of regulated water and wastewater utilities in 13 jurisdictions, including Kentucky. While American Water always ensures that each of its water and wastewater utilities, including KAWC, is afforded funding to provide safe, adequate, and reliable service, investment funding is not limitless. American Water is competing with other companies and industries in the marketplace for capital, and American Water's subsidiaries are competing within the American Water system for capital allocations of American Water's investment and financing capacity.

Capital allocations within American Water can be influenced by a company's regulatory environment, as well as by market conditions and available funds. Like any rational investor, American Water considers its opportunity to earn a timely return when considering investment opportunities. Investment capital flows invariably to where it receives the most favorable treatment. American Water regulated subsidiaries in Illinois, Indiana, Iowa, Missouri, New Jersey, Pennsylvania, Tennessee, Virginia and West Virginia have more comprehensive mechanisms to recover costs of infrastructure replacement in between general rate case proceedings. KAWC's infrastructure mechanism being significantly scaled back is a disincentive to direct proactive capital investment in Kentucky. KAWC has therefore at times had difficulty securing proactive capital funding from American Water.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Ann Bulkley

54. Please refer to page 10, line 7 of Ann E. Buckley's testimony. Please provide any evidence, data supported or not, as to why KAWC must "compete directly for capital with other investments of similar risk, which include other water, natural gas, and electric utilities."

Response:

As discussed on page 8, lines 12 to 17 of Ms. Bulkley's Direct Testimony, the U.S. Supreme Court's precedent-setting decisions in the *Hope* (see KAW_R_LFUCGDR1_NUM054_081823_Attachment 1) and *Bluefield* (see KAW_R_LFUCGDR1_NUM054_081823_Attachment 2) cases established the standards for determining the fairness and reasonableness of a utility's authorized ROE. One of the standards established by *Hope* and *Bluefield* is that the authorized return be comparable to the returns on other assets of similar risk. As the court explained in *Hope*:

By that standard the return to the equity owner should be commensurate with returns on investments in other enterprises having corresponding risks. That return, moreover, should be sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain its credit and to attract capital.

If the return is comparable to those awarded to other assets of similar risk, it is more likely that the Company will be able to continue to attract capital at reasonable terms.

For KAWC, it is reasonable to conclude that investors would consider the returns awarded to other water, natural gas and electric utilities as returns that would be considered generally comparable in risk. Since investors are likely to invest equity in those utilities with the highest returns, authorizing a return for KAWC that is below the returns awarded to other water, natural gas and electric utilities could over the longer-term negatively affect the Company's access to capital. Therefore, as Mr. Bulkley stated in her Direct Testimony, KAWC is competing "directly for capital with other investments of similar risk, which include other water, natural gas, and electric utilities."

64 S.Ct. 281

Supreme Court of the United States
 FEDERAL POWER COMMISSION et al.

v.
 HOPE NATURAL GAS CO.
 CITY OF CLEVELAND

v.
 SAME.
Nos. 34 and 35.

Argued Oct. 20, 21, 1943.
 Decided Jan. 3, 1944.

Separate proceedings before the Federal Power Commission by such Commission, by the City of Cleveland and the City of Akron, and by Pennsylvania Public Utility Commission wherein the State of West Virginia and its Public Service Commission were permitted to intervene concerning rates charged by Hope Natural Gas Company which were consolidated for hearing. An order fixing rates was reversed and remanded with directions by the Circuit Court of Appeals, [134 F.2d 287](#), and Federal Power Commission, City of Akron and Pennsylvania Public Utility Commission in one case and the City of Cleveland in another bring certiorari.

Reversed.

Mr. Justice REED, Mr. Justice FRANKFURTER and Mr. Justice JACKSON, dissenting.

On Writs of Certiorari to the United States Circuit Court of Appeals for the Fourth Circuit.

Mr. Justice DOUGLAS delivered the opinion of the

Court.

The primary issue in these cases concerns the validity under the Natural Gas Act of 1938, 52 Stat. 821, [15 U.S.C. s 717](#) et seq., [15 U.S.C.A. s 717](#) et seq., of a rate order issued by the Federal Power Commission reducing the rates chargeable by Hope Natural Gas Co., 44 P.U.R.,N.S., 1. On a petition for review of the order made pursuant to s 19(b) of the Act, the ***594** Circuit Court of Appeals set it aside, one judge dissenting. [4 Cir., 134 F.2d 287](#). The cases ****284** are here on petitions for writs of certiorari which we granted because of the public importance of the questions presented. [City of Cleveland v. Hope Natural Gas Co., 319 U.S. 735, 63 S.Ct. 1165](#).

Hope is a West Virginia corporation organized in 1898. It is a wholly owned subsidiary of Standard Oil Co. (N.J.). Since the date of its organization, it has been in the business of producing, purchasing and marketing natural gas in that state. ^{FN1} It sells some of that gas to local consumers in West Virginia. But the great bulk of it goes to five customer companies which receive it at the West Virginia line and distribute it in Ohio and in Pennsylvania. ^{FN2} In July, 1938, the cities of Cleveland and Akron filed complaints with the Commission charging that the rates collected by Hope from East Ohio Gas Co. (an affiliate of Hope which distributes gas in Ohio) were excessive and unreasonable. Later in 1938 the Commission on its own motion instituted an investigation to determine the reasonableness of all of Hope's interstate rates. In March ***595** 1939 the Public Utility Commission of Pennsylvania filed a complaint with the Commission charging that the rates collected by Hope from Peoples Natural Gas Co. (an affiliate of Hope distributing gas in Pennsylvania) and two non-affiliated companies were unreasonable. The City of Cleveland asked that the challenged rates be declared unlawful and that just and reasonable rates be determined from June 30, 1939 to the date of the Commission's order. The latter finding was requested in aid of state regulation and to afford the Public Utilities Commission of Ohio a proper basis for disposition of a fund collected by East Ohio under bond from Ohio consumers since June 30, 1939. The cases were consolidated and hearings were held.

^{FN1} Hope produces about one-third of its annual gas requirements and purchases the rest under some 300 contracts.

^{FN2} These five companies are the East Ohio Gas Co., the Peoples Natural Gas Co., the

64 S.Ct. 281
 51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333
 (Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

River Gas Co., the Fayette County Gas Co.,
 and the Manufacturers Light & Heat Co.
 The first three of these companies are, like
 Hope, subsidiaries of Standard Oil Co.

(N.J.). East Ohio and River distribute gas in
 Ohio, the other three in Pennsylvania.
 Hope's approximate sales in m.c.f. for 1940
 may be classified as follows:

Local West Virginia.

sales.	11,000,000
East Ohio.	40,000,000
Peoples.	10,000,000
River.	400,000
Fayette.	860,000
Manufacturers.	2,000,000

Local West Virginia

Hope's natural gas is processed by Hope Construction & Refining Co., an affiliate, for the extraction of gasoline and butane. Domestic Coke Corp., another affiliate, sells coke-oven gas to Hope for boiler fuel.

On May 26, 1942, the Commission entered its order and made its findings. Its order required Hope to decrease its future interstate rates so as to reflect a reduction, on an annual basis of not less than \$3,609,857 in operating revenues. And it established 'just and reasonable' average rates per m.c.f. for each of the five customer companies. ^{FN3} In response to the prayer of the City of Cleveland the Commission also made findings as to the lawfulness of past rates, although concededly it had no authority under the Act to fix past rates or to award reparations. 44 P.U.R.,U.S., at page 34. It found that the rates collected by Hope from East Ohio were unjust, unreasonable, excessive and therefore unlawful, by \$830,892 during 1939, \$3,219,551 during 1940, and \$2,815,789 on an annual basis since 1940. It further found that just, reasonable, and lawful rates for gas sold by Hope to East Ohio for resale for ultimate public consumption were those required *596 to produce \$11,528,608 for 1939, \$11,507,185 for 1940 and \$11,910,947 annually since 1940.

^{FN3} These required minimum reductions of 7¢ per m.c.f. from the 36.5¢ and 35.5¢ rates previously charged East Ohio and Peoples, respectively, and 3¢ per m.c.f. from the 31.5¢ rate previously charged Fayette and Manufacturers.

The Commission established an interstate rate base of \$33,712,526 which, it found, represented the 'actual legitimate cost' of the company's interstate property less depletion and depreciation and plus unoperated acreage, working capital and future net capital additions. The Commission, beginning with book cost, made **285

certain adjustments not necessary to relate here and found the 'actual legitimate cost' of the plant in interstate service to be \$51,957,416, as of December 31, 1940. It deducted accrued depletion and depreciation, which it found to be \$22,328,016 on an 'economic-service-life' basis. And it added \$1,392,021 for future net capital additions, \$566,105 for useful unoperated acreage, and \$2,125,000 for working capital. It used 1940 as a test year to estimate future revenues and expenses. It allowed over \$16,000,000 as annual operating expenses-about \$1,300,000 for taxes, \$1,460,000 for depletion and depreciation, \$600,000 for exploration and development costs, \$8,500,000 for gas purchased. The Commission allowed a net increase of \$421,160 over 1940 operating expenses, which amount was to take care of future increase in wages, in West Virginia property taxes, and in exploration and development costs. The total amount of deductions allowed from interstate revenues was \$13,495,584.

Hope introduced evidence from which it estimated reproduction cost of the property at \$97,000,000. It also presented a so-called trended 'original cost' estimate which exceeded \$105,000,000. The latter was designed 'to indicate what the original cost of the property would have been if 1938 material and labor prices had prevailed throughout the whole period of the piece-meal construction of the company's property since 1898.' 44 P.U.R.,N.S., at pages 8, 9. Hope estimated by the 'percent condition' method accrued depreciation at about 35% of *597 reproduction cost new. On that basis Hope contended for a rate base of \$66,000,000. The Commission refused to place any reliance on reproduction cost new, saying that it was 'not predicated upon facts' and was 'too conjectural and illusory to be given any weight in these proceedings.' Id., 44 P.U.R.,U.S., at page 8. It likewise refused to give any 'probative value' to trended 'original cost' since it was 'not founded in fact' but was 'basically erroneous' and produced 'irrational results.' Id., 44 P.U.R., N.S., at page 9. In determining the amount of accrued depletion and depreciation the Commission, following [Lindheimer v. Illinois Bell](#)

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

[Telephone Co.](#), 292 U.S. 151, 167-169, 54 S.Ct. 658, 664-666, 78 L.Ed. 1182; [Federal Power Commission v. Natural Gas Pipeline Co.](#), 315 U.S. 575, 592, 593, 62 S.Ct. 736, 745, 746, 86 L.Ed. 1037, based its computation on 'actual legitimate cost'. It found that Hope during the years when its business was not under regulation did not observe 'sound depreciation and depletion practices' but 'actually accumulated an excessive reserve' ^{FN4} of about \$46,000,000. *Id.*, 44 P.U.R.,N.S., at page 18. One member of the Commission thought that the entire amount of the reserve should be deducted from 'actual legitimate cost' in determining the rate base. ^{FN5} The majority of the *598 Commission concluded, however, that where, as here, a business is brought under regulation for the first time and where incorrect depreciation and depletion practices have prevailed, the deduction of the reserve requirement (actual existing depreciation and depletion) rather than the excessive reserve should be made so as to **286 lay 'a sound basis for future regulation and control of rates.' *Id.*, 44 P.U.R.,N.S., at page 18. As we have pointed out, it determined accrued depletion and depreciation to be \$22,328,016; and it allowed approximately \$1,460,000 as the annual operating expense for depletion and depreciation. ^{FN6}

^{FN4} The book reserve for interstate plant amounted at the end of 1938 to about \$18,000,000 more than the amount determined by the Commission as the proper reserve requirement. The Commission also noted that 'twice in the past the company has transferred amounts aggregating \$7,500,000 from the depreciation and depletion reserve to surplus. When these latter adjustments are taken into account, the excess becomes \$25,500,000, which has been exacted from the ratepayers over and above the amount required to cover the consumption of property in the service rendered and thus to keep the investment unimpaired.' 44 P.U.R.,N.S., at page 22.

^{FN5} That contention was based on the fact that 'every single dollar in the depreciation and depletion reserves' was taken 'from gross operating revenues whose only source was the amounts charged customers in the past for natural gas. It is, therefore, a fact that the depreciation and depletion reserves have been contributed by the customers and do not represent any investment by Hope.' *Id.*, 44 P.U.R.,N.S., at page 40. And see [Railroad Commission v. Cumberland Tel. & T. Co.](#), 212 U.S. 414, 424, 425, 29 S.Ct. 357, 361, 362, 53 L.Ed. 577; 2 Bonbright, Valuation of Property

(1937), p. 1139.

^{FN6} The Commission noted that the case was 'free from the usual complexities involved in the estimate of gas reserves because the geologists for the company and the Commission presented estimates of the remaining recoverable gas reserves which were about one per cent apart.' 44 P.U.R.,N.S., at pages 19, 20.

The Commission utilized the 'straight-line-basis' for determining the depreciation and depletion reserve requirements. It used estimates of the average service lives of the property by classes based in part on an inspection of the physical condition of the property. And studies were made of Hope's retirement experience and maintenance policies over the years. The average service lives of the various classes of property were converted into depreciation rates and then applied to the cost of the property to ascertain the portion of the cost which had expired in rendering the service.

The record in the present case shows that Hope is on the lookout for new sources of supply of natural gas and is contemplating an extension of its pipe line into Louisiana for that purpose. The Commission recognized in fixing the rates of depreciation that much material may be used again when various present sources of gas supply are exhausted, thus giving that property more than scrap value at the end of its present use.

Hope's estimate of original cost was about \$69,735,000—approximately \$17,000,000 more than the amount found by the Commission. The item of \$17,000,000 was made up largely of expenditures which prior to December 31, 1938, were charged to operating expenses. Chief among those expenditures was some \$12,600,000 expended *599 in well-drilling prior to 1923. Most of that sum was expended by Hope for labor, use of drilling-rigs, hauling, and similar costs of well-drilling. Prior to 1923 Hope followed the general practice of the natural gas industry and charged the cost of drilling wells to operating expenses. Hope continued that practice until the Public Service Commission of West Virginia in 1923 required it to capitalize such expenditures, as does the Commission under its present Uniform System of Accounts. ^{FN7} The Commission refused to add such items to the rate base stating that 'No greater injustice to consumers could be done than to allow items as operating expenses and at a later date include them in the rate base, thereby placing multiple charges upon the consumers.' *Id.*, 44 P.U.R.,N.S., at page 12. For the same reason the Commission excluded from the rate base about \$1,600,000 of expenditures on properties which Hope acquired from other utilities, the latter having charged those payments to operating expenses. The Commission disallowed certain other overhead items amounting to

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

over \$3,000,000 which also had been previously charged to operating expenses. And it refused to add some \$632,000 as interest during construction since no interest was in fact paid.

[FN7](#) See Uniform System of Accounts prescribed for Natural Gas Companies effective January 1, 1940, Account No. 332.1.

Hope contended that it should be allowed a return of not less than 8%. The Commission found that an 8% return would be unreasonable but that 6 1/2% was a fair rate of return. That rate of return, applied to the rate base of \$33,712,526, would produce \$2,191,314 annually, as compared with the present income of not less than \$5,801,171.

The Circuit Court of Appeals set aside the order of the Commission for the following reasons. (1) It held that the rate base should reflect the 'present fair value' of the *600 property, that the Commission in determining the 'value' should have considered reproduction cost and trended original cost, and that 'actual legitimate cost' (prudent investment) was not the proper measure of 'fair value' where price levels had changed since the investment. (2) It concluded that the well-drilling costs and overhead items in the amount of some \$17,000,000 should have been included in the rate base. (3) It held that accrued depletion and depreciation and the annual allowance for that expense should be computed on the basis of 'present fair value' of the property not on the basis of 'actual legitimate cost'.

****287** The Circuit Court of Appeals also held that the Commission had no power to make findings as to past rates in aid of state regulation. But it concluded that those findings were proper as a step in the process of fixing future rates. Viewed in that light, however, the findings were deemed to be invalidated by the same errors which vitiated the findings on which the rate order was based.

Order Reducing Rates. Congress has provided in s 4(a) of the Natural Gas Act that all natural gas rates subject to the jurisdiction of the Commission 'shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful.' Sec. 5(a) gives the Commission the power, after hearing, to determine the 'just and reasonable rate' to be thereafter observed and to fix the rate by order. Sec. 5(a) also empowers the Commission to order a 'decrease where existing rates are unjust * * * unlawful, or are not the lowest reasonable rates.' And Congress has provided in s 19(b) that on review of these rate orders the 'finding of the Commission as to the facts, if supported by substantial

evidence, shall be conclusive.' Congress, however, has provided no formula by which the 'just and reasonable' rate is to be determined. It has not filled in the *601 details of the general prescription [FN8](#) of s 4(a) and s 5(a). It has not expressed in a specific rule the fixed principle of 'just and reasonable'.

[FN8](#). Sec. 6 of the Act comes the closest to supplying any definite criteria for rate making. It provides in subsection (a) that, 'The Commission may investigate the ascertain the actual legitimate cost of the property of every natural-gas company, the depreciation therein, and, when found necessary for rate-making purposes, other facts which bear on the determination of such cost or depreciation and the fair value of such property.' Subsection (b) provides that every natural-gas company on request shall file with the Commission a statement of the 'original cost' of its property and shall keep the Commission informed regarding the 'cost' of all additions, etc.

[\[1\]](#) [\[2\]](#) When we sustained the constitutionality of the Natural Gas Act in the Natural Gas Pipeline Co. case, we stated that the 'authority of Congress to regulate the prices of commodities in interstate commerce is at least as great under the Fifth Amendment as is that of the states under the Fourteenth to regulate the prices of commodities in intrastate commerce.' [315 U.S. at page 582, 62 S.Ct. at page 741, 86 L.Ed. 1037](#). Rate-making is indeed but one species of price-fixing. [Munn v. Illinois, 94 U.S. 113, 134, 24 L.Ed. 77](#). The fixing of prices, like other applications of the police power, may reduce the value of the property which is being regulated. But the fact that the value is reduced does not mean that the regulation is invalid. [Block v. Hirsh, 256 U.S. 135, 155-157, 41 S.Ct. 458, 459, 460, 65 L.Ed. 865, 16 A.L.R. 165; Nebbia v. New York, 291 U.S. 502, 523-539, 54 S.Ct. 505, 509-517, 78 L.Ed. 940, 89 A.L.R. 1469](#), and cases cited. It does, however, indicate that 'fair value' is the end product of the process of rate-making not the starting point as the Circuit Court of Appeals held. The heart of the matter is that rates cannot be made to depend upon 'fair value' when the value of the going enterprise depends on earnings under whatever rates may be anticipated. [FN9](#)

[FN9](#) We recently stated that the meaning of the word 'value' is to be gathered 'from the purpose for which a valuation is being made. Thus the question in a valuation for rate making is how much a utility will be allowed to earn. The basic

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

question in a valuation for reorganization purposes is how much the enterprise in all probability can earn.’ [Institutional Investors v. Chicago, M., St. P. & P.R. Co.](#), 318 U.S. 523, 540, 63 S.Ct. 727, 738.

*602 [\[3\]](#) [\[4\]](#) [\[5\]](#) [\[6\]](#) [\[7\]](#) We held in *Federal Power Commission v. Natural Gas Pipeline Co.*, supra, that the Commission was not bound to the use of any single formula or combination of formulae in determining rates. Its rate-making function, moreover, involves the making of ‘pragmatic adjustments.’ [Id.](#), 315 U.S. at page 586, 62 S.Ct. at page 743, 86 L.Ed. 1037. And when the Commission's order is challenged in the courts, the question is whether that order ‘viewed in its entirety’ meets the requirements of the Act. [Id.](#), 315 U.S. at page 586, 62 S.Ct. at page 743, 86 L.Ed. 1037. Under the statutory standard of ‘just and reasonable’ it is the result reached not the method employed which is controlling. Cf. ****288**[Los Angeles Gas & Electric Corp. v. Railroad Commission](#), 289 U.S. 287, 304, 305, 314, 53 S.Ct. 637, 643, 644, 647, 77 L.Ed. 1180; [West Ohio Gas Co. v. Public Utilities Commission \(No. 1\)](#), 294 U.S. 63, 70, 55 S.Ct. 316, 320, 79 L.Ed. 761; [West v. Chesapeake & Potomac Tel. Co.](#), 295 U.S. 662, 692, 693, 55 S.Ct. 894, 906, 907, 79 L.Ed. 1640 (dissenting opinion). It is not theory but the impact of the rate order which counts. If the total effect of the rate order cannot be said to be unjust and unreasonable, judicial inquiry under the Act is at an end. The fact that the method employed to reach that result may contain infirmities is not then important. Moreover, the Commission's order does not become suspect by reason of the fact that it is challenged. It is the product of expert judgment which carries a presumption of validity. And he who would upset the rate order under the Act carries the heavy burden of making a convincing showing that it is invalid because it is unjust and unreasonable in its consequences. Cf. [Railroad Commission v. Cumberland Tel. & T. Co.](#), 212 U.S. 414, 29 S.Ct. 357, 53 L.Ed. 577; [Lindheimer v. Illinois Bell Tel. Co.](#), supra, 292 U.S. at pages 164, 169, 54 S.Ct. at pages 663, 665, 78 L.Ed. 1182; [Railroad Commission v. Pacific Gas & E. Co.](#), 302 U.S. 388, 401, 58 S.Ct. 334, 341, 82 L.Ed. 319.

*603 [\[8\]](#) [\[9\]](#) The rate-making process under the Act, i.e., the fixing of ‘just and reasonable’ rates, involves a balancing of the investor and the consumer interests. Thus we stated in the *Natural Gas Pipeline Co.* case that ‘regulation does not insure that the business shall produce net revenues.’ 315 U.S. at page 590, 62 S.Ct. at page 745, 86 L.Ed. 1037. But such considerations aside, the investor interest has a legitimate concern with the financial integrity of the company whose rates are being regulated. From the investor or company point of view it

is important that there be enough revenue not only for operating expenses but also for the capital costs of the business. These include service on the debt and dividends on the stock. Cf. [Chicago & Grand Trunk R. Co. v. Wellman](#), 143 U.S. 339, 345, 346, 12 S.Ct. 400, 402, 36 L.Ed. 176. By that standard the return to the equity owner should be commensurate with returns on investments in other enterprises having corresponding risks. That return, moreover, should be sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain its credit and to attract capital. See [State of Missouri ex rel. South-western Bell Tel. Co. v. Public Service Commission](#), 262 U.S. 276, 291, 43 S.Ct. 544, 547, 67 L.Ed. 981, 31 A.L.R. 807 (Mr. Justice Brandeis concurring). The conditions under which more or less might be allowed are not important here. Nor is it important to this case to determine the various permissible ways in which any rate base on which the return is computed might be arrived at. For we are of the view that the end result in this case cannot be condemned under the Act as unjust and unreasonable from the investor or company viewpoint.

We have already noted that Hope is a wholly owned subsidiary of the Standard Oil Co. (N.J.). It has no securities outstanding except stock. All of that stock has been owned by Standard since 1908. The par amount presently outstanding is approximately \$28,000,000 as compared with the rate base of \$33,712,526 established by *604 the Commission. Of the total outstanding stock \$11,000,000 was issued in stock dividends. The balance, or about \$17,000,000, was issued for cash or other assets. During the four decades of its operations Hope has paid over \$97,000,000 in cash dividends. It had, moreover, accumulated by 1940 an earned surplus of about \$8,000,000. It had thus earned the total investment in the company nearly seven times. Down to 1940 it earned over 20% per year on the average annual amount of its capital stock issued for cash or other assets. On an average invested capital of some \$23,000,000 Hope's average earnings have been about 12% a year. And during this period it had accumulated in addition reserves for depletion and depreciation of about \$46,000,000. Furthermore, during 1939, 1940 and 1941, Hope paid dividends of 10% on its stock. And in the year 1942, during about half of which the lower rates were in effect, it paid dividends of 7 1/2%. From 1939-1942 its earned surplus increased from \$5,250,000 to about \$13,700,000, i.e., to almost half the par value of its outstanding stock.

As we have noted, the Commission fixed a rate of return which permits Hope to earn \$2,191,314 annually. In determining that amount it stressed the importance of maintaining the financial integrity of the ****289** company. It considered the financial history of Hope and a vast

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

array of data bearing on the natural gas industry, related businesses, and general economic conditions. It noted that the yields on better issues of bonds of natural gas companies sold in the last few years were 'close to 3 per cent', 44 P.U.R.,N.S., at page 33. It stated that the company was a 'seasoned enterprise whose risks have been minimized' by adequate provisions for depletion and depreciation (past and present) with 'concurrent high profits', by 'protected established markets, through affiliated distribution companies, in populous and industrialized areas', and by a supply of gas locally to meet all requirements,*605 'except on certain peak days in the winter, which it is feasible to supplement in the future with gas from other sources.' Id., 44 P.U.R.,N.S., at page 33. The Commission concluded, 'The company's efficient management, established markets, financial record, affiliations, and its prospective business place it in a strong position to attract capital upon favorable terms when it is required.' Id., 44 P.U.R.,N.S., at page 33.

[10] [11] [12] In view of these various considerations we cannot say that an annual return of \$2,191,314 is not 'just and reasonable' within the meaning of the Act. Rates which enable the company to operate successfully, to maintain its financial integrity, to attract capital, and to compensate its investors for the risks assumed certainly cannot be condemned as invalid, even though they might produce only a meager return on the so-called 'fair value' rate base. In that connection it will be recalled that Hope contended for a rate base of \$66,000,000 computed on reproduction cost new. The Commission points out that if that rate base were accepted, Hope's average rate of return for the four-year period from 1937-1940 would amount to 3.27%. During that period Hope earned an annual average return of about 9% on the average investment. It asked for no rate increases. Its properties were well maintained and operated. As the Commission says such a modest rate of 3.27% suggests an 'inflation of the base on which the rate has been computed.' [Dayton Power & Light Co. v. Public Utilities Commission](#), 292 U.S. 290, 312, 54 S.Ct. 647, 657, 78 L.Ed. 1267. Cf. [Lindheimer v. Illinois Bell Tel. Co.](#), supra, 292 U.S. at page 164, 54 S.Ct. at page 663, 78 L.Ed. 1182. The incongruity between the actual operations and the return computed on the basis of reproduction cost suggests that the Commission was wholly justified in rejecting the latter as the measure of the rate base.

In view of this disposition of the controversy we need not stop to inquire whether the failure of the Commission to add the \$17,000,000 of well-drilling and other costs to *606 the rate base was consistent with the prudent investment theory as developed and applied in particular cases.

[13] [14] [15] Only a word need be added respecting depletion and depreciation. We held in the Natural Gas Pipeline Co. case that there was no constitutional requirement 'that the owner who embarks in a wasting-asset business of limited life shall receive at the end more than he has put into it.' 315 U.S. at page 593, 62 S.Ct. at page 746, 86 L.Ed. 1037. The Circuit Court of Appeals did not think that that rule was applicable here because Hope was a utility required to continue its service to the public and not scheduled to end its business on a day certain as was stipulated to be true of the Natural Gas Pipeline Co. But that distinction is quite immaterial. The ultimate exhaustion of the supply is inevitable in the case of all natural gas companies. Moreover, this Court recognized in [Lindheimer v. Illinois Bell Tel. Co.](#), supra, the propriety of basing annual depreciation on cost. ^{FN10} By such a procedure the **290 utility is made whole and the integrity of its investment maintained. ^{FN11} No more is required. ^{FN12} We cannot approve the contrary holding *607 of [United Railways & Electric Co. v. West](#), 280 U.S. 234, 253, 254, 50 S.Ct. 123, 126, 127, 74 L.Ed. 390. Since there are no constitutional requirements more exacting than the standards of the Act, a rate order which conforms to the latter does not run afoul of the former.

^{FN10} Chief Justice Hughes said in that case (292 U.S. at pages 168, 169, 54 S.Ct. at page 665, 78 L.Ed. 1182): 'If the predictions of service life were entirely accurate and retirements were made when and as these predictions were precisely fulfilled, the depreciation reserve would represent the consumption of capital, on a cost basis, according to the method which spreads that loss over the respective service periods. But if the amounts charged to operating expenses and credited to the account for depreciation reserve are excessive, to that extent subscribers for the telephone service are required to provide, in effect, capital contributions, not to make good losses incurred by the utility in the service rendered and thus to keep its investment unimpaired, but to secure additional plant and equipment upon which the utility expects a return.'

^{FN11} See Mr. Justice Brandeis (dissenting) in [United Railways & Electric Co. v. West](#), 280 U.S. 234, 259-288, 50 S.Ct. 123, 128-138, 74 L.Ed. 390, for an extended analysis of the problem.

^{FN12} It should be noted that the Act provides no specific rule governing depletion and depreciation. Sec. 9(a) merely states that the

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

Commission 'may from time to time ascertain and determine, and by order fix, the proper and adequate rates of depreciation and amortization of the several classes of property of each natural-gas company used or useful in the production, transportation, or sale of natural gas.'

The Position of West Virginia. The State of West Virginia, as well as its Public Service Commission, intervened in the proceedings before the Commission and participated in the hearings before it. They have also filed a brief amicus curiae here and have participated in the argument at the bar. Their contention is that the result achieved by the rate order 'brings consequences which are unjust to West Virginia and its citizens' and which 'unfairly depress the value of gas, gas lands and gas leaseholds, unduly restrict development of their natural resources, and arbitrarily transfer their properties to the residents of other states without just compensation therefor.'

West Virginia points out that the Hope Natural Gas Co. holds a large number of leases on both producing and unoperated properties. The owner or grantor receives from the operator or grantee delay rentals as compensation for postponed drilling. When a producing well is successfully brought in, the gas lease customarily continues indefinitely for the life of the field. In that case the operator pays a stipulated gas-well rental or in some cases a gas royalty equivalent to one-eighth of the gas marketed. ^{FN13} Both the owner and operator have valuable property interests in the gas which are separately taxable under West Virginia law. The contention is that the reversionary interests in the leaseholds should be represented in the rate proceedings since it is their gas which is being sold in interstate ^{*608} commerce. It is argued, moreover, that the owners of the reversionary interests should have the benefit of the 'discovery value' of the gas leaseholds, not the interstate consumers. Furthermore, West Virginia contends that the Commission in fixing a rate for natural gas produced in that State should consider the effect of the rate order on the economy of West Virginia. It is pointed out that gas is a wasting asset with a rapidly diminishing supply. As a result West Virginia's gas deposits are becoming increasingly valuable. Nevertheless the rate fixed by the Commission reduces that value. And that reduction, it is said, has severe repercussions on the economy of the State. It is argued in the first place that as a result of this rate reduction Hope's West Virginia property taxes may be decreased in view of the relevance which earnings have under West Virginia law in the assessment of property for tax purposes. ^{FN14} Secondly, it is pointed out that West Virginia has a production tax ^{FN15} on the 'value' of the gas exported from the State. And we are told that

for purposes of that tax 'value' becomes under West Virginia law 'practically the substantial equivalent of market value.' Thus West Virginia argues that undervaluation of Hope's gas leaseholds will cost the State many thousands of dollars in taxes. The effect, it is urged, is to impair West Virginia's tax structure for the benefit of Ohio and Pennsylvania consumers. West Virginia emphasizes, moreover, its deep interest in the conservation of its natural resources including its natural gas. It says that a reduction of the value of these leasehold values will jeopardize these conservation policies in three respects: (1) ^{**291} exploratory development of new fields will be discouraged; (2) abandonment of lowyield high-cost marginal wells will be hastened; and (3) secondary recovery of oil will be hampered. ^{*609} Furthermore, West Virginia contends that the reduced valuation will harm one of the great industries of the State and that harm to that industry must inevitably affect the welfare of the citizens of the State. It is also pointed out that West Virginia has a large interest in coal and oil as well as in gas and that these forms of fuel are competitive. When the price of gas is materially cheapened, consumers turn to that fuel in preference to the others. As a result this lowering of the price of natural gas will have the effect of depreciating the price of West Virginia coal and oil.

^{FN13} See Simonton, The Nature of the Interest of the Grantee Under an Oil and Gas Lease (1918), 25 W.Va.L.Quar. 295.

^{FN14} [West Penn Power Co. v. Board of Review, 112 W.Va. 442, 164 S.E. 862.](#)

^{FN15} W.Va.Rev.Code of 1943, ch. 11. Art. 13, ss 2a, 3a.

West Virginia insists that in neglecting this aspect of the problem the Commission failed to perform the function which Congress entrusted to it and that the case should be remanded to the Commission for a modification of its order. ^{FN16}

^{FN16} West Virginia suggests as a possible solution (1) that a 'going concern value' of the company's tangible assets be included in the rate base and (2) that the fair market value of gas delivered to customers be added to the outlay for operating expenses and taxes.

We have considered these contentions at length in view of the earnestness with which they have been urged upon us. We have searched the legislative history of the Natural

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

Gas Act for any indication that Congress entrusted to the Commission the various considerations which West Virginia has advanced here. And our conclusion is that Congress did not.

[16] [17] We pointed out in [Illinois Natural Gas Co. v. Central Illinois Public Service Co.](#), 314 U.S. 498, 506, 62 S.Ct. 384, 387, 86 L.Ed. 371, that the purpose of the Natural Gas Act was to provide, 'through the exercise of the national power over interstate commerce, an agency for regulating the wholesale distribution to public service companies of natural gas moving interstate, which this Court had declared to be interstate commerce not subject to certain types of state regulation.' As stated in the House Report the 'basic purpose' of this legislation was 'to occupy' the field in which such cases as *610 [State of Missouri v. Kansas Natural Gas Co.](#), 265 U.S. 298, 44 S.Ct. 544, 68 L.Ed. 1027, and [Public Utilities Commission v. Attleboro Steam & Electric Co.](#), 273 U.S. 83, 47 S.Ct. 294, 71 L.Ed. 549, had held the States might not act. H.Rep. No. 709, 75th Cong., 1st Sess., p. 2. In accomplishing that purpose the bill was designed to take 'no authority from State commissions' and was 'so drawn as to complement and in no manner usurp State regulatory authority.' Id., p. 2. And the Federal Power Commission was given no authority over the 'production or gathering of natural gas.' s 1(b).

[18] The primary aim of this legislation was to protect consumers against exploitation at the hands of natural gas companies. Due to the hiatus in regulation which resulted from the Kansas Natural Gas Co. case and related decisions state commissions found it difficult or impossible to discover what it cost interstate pipe-line companies to deliver gas within the consuming states; and thus they were thwarted in local regulation. H.Rep., No. 709, supra, p. 3. Moreover, the investigations of the Federal Trade Commission had disclosed that the majority of the pipe-line mileage in the country used to transport natural gas, together with an increasing percentage of the natural gas supply for pipe-line transportation, had been acquired by a handful of holding companies. [FN17](#) State commissions, independent producers, and communities having or seeking the service were growing quite helpless against these combinations. [FN18](#) These were the types of problems with which those participating in the hearings were pre-occupied. [FN19](#) Congress addressed itself to those specific evils.

[FN17](#) S.Doc. 92, Pt. 84-A, ch. XII, Final Report, Federal Trade Commission to the Senate pursuant to S.Res.No. 83, 70th Cong., 1st Sess.

[FN18](#) S.Doc. 92, Pt. 84-A, chs. XII, XIII, op.

cit., supra, note 17.

[FN19](#) See Hearings on H.R. 11662, Subcommittee of House Committee on Interstate & Foreign Commerce, 74th Cong., 2d Sess.; Hearings on H.R. 4008, House Committee on Interstate & Foreign Commerce, 75th Cong., 1st Sess.

*611 The Federal Power Commission was given**292 broad powers of regulation. The fixing of 'just and reasonable' rates (s 4) with the powers attendant thereto [FN20](#) was the heart of the new regulatory system. Moreover, the Commission was given certain authority by s 7(a), on a finding that the action was necessary or desirable 'in the public interest,' to require natural gas companies to extend or improve their transportation facilities and to sell gas to any authorized local distributor. By s 7(b) it was given control over the abandonment of facilities or of service. And by s 7(c), as originally enacted, no natural gas company could undertake the construction or extension of any facilities for the transportation of natural gas to a market in which natural gas was already being served by another company, or sell any natural gas in such a market, without obtaining a certificate of public convenience and necessity from the Commission. In passing on such applications for certificates of convenience and necessity the Commission was told by s 7(c), as originally enacted, that it was 'the intention of Congress that natural gas shall be sold in interstate commerce for resale for ultimate public consumption for domestic, commercial, industrial, or any other use at the lowest possible reasonable rate consistent with the maintenance of adequate service in the public interest.' The latter provision was deleted from s 7(c) when that subsection was amended by the Act of February 7, 1942, 56 Stat. 83. By that amendment limited grandfather rights were granted companies desiring to extend their facilities and services over the routes or within the area which they were already serving. Moreover, s 7(c) was broadened so as to require certificates*612 of public convenience and necessity not only where the extensions were being made to markets in which natural gas was already being sold by another company but in other situations as well.

[FN20](#) The power to investigate and ascertain the 'actual legitimate cost' of property (s 6), the requirement as to books and records (s 8), the requirement as to rates of depreciation (s 9), the requirements for periodic and special reports (s 10), the broad powers of investigation (s 14) are among the chief powers supporting the rate making function.

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

[19] These provisions were plainly designed to protect the consumer interests against exploitation at the hands of private natural gas companies. When it comes to cases of abandonment or of extensions of facilities or service, we may assume that, apart from the express exemptions ^{FN21} contained in s 7, considerations of conservation are material to the issuance of certificates of public convenience and necessity. But the Commission was not asked here for a certificate of public convenience and necessity under s 7 for any proposed construction or extension. It was faced with a determination of the amount which a private operator should be allowed to earn from the sale of natural gas across state lines through an established distribution system. Secs. 4 and 5, not s 7, provide the standards for that determination. We cannot find in the words of the Act or in its history the slightest intimation or suggestion that the exploitation of consumers by private operators through the maintenance of high rates should be allowed to continue provided the producing states obtain indirect benefits from it. That apparently was the Commission's view of the matter, for the same arguments advanced here were presented to the Commission and not adopted by it.

^{FN21} Apart from the grandfather clause contained in s 7(c), there is the provision of s 7(f) that a natural gas company may enlarge or extend its facilities with the 'service area' determined by the Commission without any further authorization.

We do not mean to suggest that Congress was unmindful of the interests of the producing states in their natural gas supplies when it drafted the Natural Gas Act. As we have said, the Act does not intrude on the domain traditionally reserved for control by state commissions; and the Federal Power Commission was given no authority over***613** 'the production or gathering of natural gas.' s 1(b). In addition, Congress recognized the legitimate interests of the States in the conservation of natural gas. By s 11 Congress instructed the Commission to make reports on compacts between two or more States dealing with the conservation, production and transportation of natural gas. ^{FN22} The Commission was also ****293** directed to recommend further legislation appropriate or necessary to carry out any proposed compact and 'to aid in the conservation of natural-gas resources within the United States and in the orderly, equitable, and economic production, transportation, and distribution of natural gas.' s 11(a). Thus Congress was quite aware of the interests of the producing states in their natural gas supplies. ^{FN23} But it left the protection of ***614** those interests to measures other than the maintenance of high

rates to private companies. If the Commission is to be compelled to let the stockholders of natural gas companies have a feast so that the producing states may receive crumbs from that table, the present Act must be redesigned. Such a project raises questions of policy which go beyond our province.

^{FN22} See P.L. 117, approved July 7, 1943, 57 Stat. 383 containing an 'Interstate Compact to Conserve Oil and Gas' between Oklahoma, Texas, New Mexico, Illinois, Colorado, and Kansas.

^{FN23} As we have pointed out, s 7(c) was amended by the Act of February 7, 1942, 56 Stat. 83, so as to require certificates of public convenience and necessity not only where the extensions were being made to markets in which natural gas was already being sold by another company but to other situations as well. Considerations of conservation entered into the proposal to give the Act that broader scope. H.Rep.No. 1290, 77th Cong. 1st Sess., pp. 2, 3. And see Annual Report, Federal Power Commission (1940) pp. 79, 80; Baum, The Federal Power Commission and State Utility Regulation (1942), p. 261.

The bill amending s 7(c) originally contained a subsection (h) reading as follows: 'Nothing contained in this section shall be construed to affect the authority of a State within which natural gas is produced to authorize or require the construction or extension of facilities for the transportation and sale of such gas within such State: Provided, however, That the Commission, after a hearing upon complaint or upon its own motion, may by order forbid any intrastate construction or extension by any natural-gas company which it shall find will prevent such company from rendering adequate service to its customers in interstate or foreign commerce in territory already being served.' See Hearings on H.R. 5249, House Committee on Interstate & Foreign Commerce, 77th Cong., 1st Sess., pp. 7, 11, 21, 29, 32, 33. In explanation of its deletion the House Committee Report stated, pp. 4, 5: 'The increasingly important problems raised by the desire of several States to regulate the use of the natural gas produced therein in the interest of consumers within such States, as against the Federal power to regulate interstate commerce in the interest of both interstate and intrastate consumers, are deemed by the committee to warrant further intensive study and probably a more retailed and comprehensive plan for the handling thereof than that which would have been provided by the stricken subsection.'

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

[20] It is hardly necessary to add that a limitation on the net earnings of a natural gas company from its interstate business is not a limitation on the power of the producing state either to safeguard its tax revenues from that industry ^{FN24} or to protect the interests of those who sell their gas to the interstate operator. ^{FN25} The return which ****294** the Commission ***615** allowed was the net return after all such charges.

^{FN24} We have noted that in the annual operating expenses of some \$16,000,000 the Commission included West Virginia and federal taxes. And in the net increase of \$421,160 over 1940 operating expenses allowed by the Commission was some \$80,000 for increased West Virginia property taxes. The adequacy of these amounts has not been challenged here.

^{FN25} The Commission included in the aggregate annual operating expenses which it allowed some \$8,500,000 for gas purchased. It also allowed about \$1,400,000 for natural gas production and about \$600,000 for exploration and development.

It is suggested, however, that the Commission in ascertaining the cost of Hope's natural gas production plant proceeded contrary to s 1(b) which provides that the Act shall not apply to 'the production or gathering of natural gas'. But such valuation, like the provisions for operating expenses, is essential to the rate-making function as customarily performed in this country. Cf. Smith, *The Control of Power Rates in the United States and England* (1932), 159 *The Annals* 101. Indeed s 14(b) of the Act gives the Commission the power to 'determine the propriety and reasonableness of the inclusion in operating expenses, capital, or surplus of all delay rentals or other forms of rental or compensation for unoperated lands and leases.'

It is suggested that the Commission has failed to perform its duty under the Act in that it has not allowed a return for gas production that will be enough to induce private enterprise to perform completely and efficiently its functions for the public. The Commission, however, was not oblivious of those matters. It considered them. It allowed, for example, delay rentals and exploration and development costs in operating expenses. ^{FN26} No serious attempt has been made here to show that they are inadequate. We certainly cannot say that they are, unless we are to substitute our opinions for the expert judgment of the administrators to whom Congress entrusted the decision. Moreover, if in light of experience they turn out to be inadequate for development of new sources of supply, the doors of the Commission are open for

increased allowances. This is not an order for all time. The Act contains machinery for obtaining rate adjustments. s 4.

^{FN26} See note 25, supra.

[21] [22] But it is said that the Commission placed too low a rate on gas for industrial purposes as compared with gas for domestic purposes and that industrial uses should be discouraged. It should be noted in the first place that the rates which the Commission has fixed are Hope's interstate wholesale rates to distributors not interstate rates to industrial users ^{FN27} and domestic consumers. We hardly ***616** can assume, in view of the history of the Act and its provisions, that the resales intrastate by the customer companies which distribute the gas to ultimate consumers in Ohio and Pennsylvania are subject to the rate-making powers of the Commission. ^{FN28} But in any event those rates are not in issue here. Moreover, we fail to find in the power to fix 'just and reasonable' rates the power to fix rates which will disallow or discourage resales for industrial use. The Committee Report stated that the Act provided 'for regulation along recognized and more or less standardized lines' and that there was 'nothing novel in its provisions'. H.Rep.No.709, supra, p. 3. Yet if we are now to tell the Commission to fix the rates so as to discourage particular uses, we would indeed be injecting into a rate case a 'novel' doctrine which has no express statutory sanction. The same would be true if we were to hold that the wasting-asset nature of the industry required the maintenance of the level of rates so that natural gas companies could make a greater profit on each unit of gas sold. Such theories of rate-making for this industry may or may not be desirable. The difficulty is that s 4(a) and s 5(a) contain only the conventional standards of rate-making for natural gas companies. ^{FN29} The ***617** Act of February 7, 1942, by broadening s 7 gave the Commission some additional authority to deal with the conservation aspects of the problem. ^{FN30} But s 4(a) and s 5(a) were not changed. If the standard ****295** of 'just and reasonable' is to sanction the maintenance of high rates by a natural gas company because they restrict the use of natural gas for certain purposes, the Act must be further amended.

^{FN27} The Commission has expressed doubts over its power to fix rates on 'direct sales to industries' from interstate pipelines as distinguished from 'sales for resale to the industrial customers of distributing companies.' Annual Report, Federal Power Commission (1940), p. 11.

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

[FN28](#). Sec. 1(b) of the Act provides: ‘The provisions of this Act shall apply to the transportation of natural gas in interstate commerce, to the sale in interstate commerce of natural gas for resale for ultimate public consumption for domestic, commercial, industrial, or any other use, and to natural-gas companies engaged in such transportation or sale, but shall not apply to any other transportation or sale of natural gas or to the local distribution of natural gas or to the facilities used for such distribution or to the production or gathering of natural gas.’ And see s 2(6), defining a ‘natural-gas company’, and H.Rep.No. 709, supra, pp. 2, 3.

[FN29](#) The wasting-asset characteristic of the industry was recognized prior to the Act as requiring the inclusion of a depletion allowance among operating expenses. See [Columbus Gas & Fuel Co. v. Public Utilities Commission](#), 292 U.S. 398, 404, 405, 54 S.Ct. 763, 766, 767, 78 L.Ed. 1327, 91 A.L.R. 1403. But no such theory of rate-making for natural gas companies as is now suggested emerged from the cases arising during the earlier period of regulation.

[FN30](#) The Commission has been alert to the problems of conservation in its administration of the Act. It has indeed suggested that it might be wise to restrict the use of natural gas ‘by functions rather than by areas.’ Annual Report (1940) p. 79.

The Commission stated in that connection that natural gas was particularly adapted to certain industrial uses. But it added that the general use of such gas ‘under boilers for the production of steam’ is ‘under most circumstances of very questionable social economy.’ Ibid.

[\[23\]](#) [\[24\]](#) It is finally suggested that the rates charged by Hope are discriminatory as against domestic users and in favor of industrial users. That charge is apparently based on s 4(b) of the Act which forbids natural gas companies from maintaining ‘any unreasonable difference in rates, charges, service, facilities, or in any other respect, either as between localities or as between classes of service.’ The power of the Commission to eliminate any such unreasonable differences or discriminations is plain. s 5(a). The Commission, however, made no findings under s 4(b). Its failure in that regard was not challenged in the petition to review. And it has not been raised or argued here by any party. Hence the problem of discrimination has no proper place in the present decision. It will be time enough to pass on that issue when it is presented to us. Congress has entrusted the administration of the Act

to the Commission not to the courts. Apart from the requirements of judicial review it is not *618 for us to advise the Commission how to discharge its functions.

Findings as to the Lawfulness of Past Rates. As we have noted, the Commission made certain findings as to the lawfulness of past rates which Hope had charged its interstate customers. Those findings were made on the complaint of the City of Cleveland and in aid of state regulation. It is conceded that under the Act the Commission has no power to make reparation orders. And its power to fix rates admittedly is limited to those ‘to be thereafter observed and in force.’ s 5(a). But the Commission maintains that it has the power to make findings as to the lawfulness of past rates even though it has no power to fix those rates. [FN31](#) However that may be, we do not think that these findings were reviewable under s 19(b) of the Act. That section gives any party ‘aggrieved by an order’ of the Commission a review ‘of such order’ in the circuit court of appeals for the circuit where the natural gas company is located or has its principal place of business or in the United States Court of Appeals for the District of Columbia. We do not think that the findings in question fall within that category.

[FN31](#) The argument is that s 4(a) makes ‘unlawful’ the charging of any rate that is not just and reasonable. And s 14(a) gives the Commission power to investigate any matter ‘which it may find necessary or proper in order to determine whether any person has violated’ any provision of the Act. Moreover, s 5(b) gives the Commission power to investigate and determine the cost of production or transportation of natural gas in cases where it has ‘no authority to establish a rate governing the transportation or sale of such natural gas.’ And s 17(c) directs the Commission to ‘make available to the several State commissions such information and reports as may be of assistance in State regulation of natural-gas companies.’ For a discussion of these points by the Commission see 44 P.U.R.,N.S., at pages 34, 35.

[\[25\]](#) [\[26\]](#) The Court recently summarized the various types of administrative action or determination reviewable as orders under the Urgent Deficiencies Act of October 22, *619 1913, [28 U.S.C. ss 45](#), 47a, [28 U.S.C.A. ss 45](#), 47a, and kindred statutory provisions. [Rochester Tel. Corp. v. United States](#), 307 U.S. 125, 59 S.Ct. 754, 83 L.Ed. 1147. It was there pointed out that where ‘the order sought to be reviewed does not of itself adversely affect complainant but only affects his rights adversely on the contingency of future administrative action’, it is not

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

reviewable. [Id.](#), 307 U.S. at page 130, 59 S.Ct. at page 757, 83 L.Ed. 1147. The Court said, 'In view of traditional conceptions of federal judicial power, resort to the courts in these situations is either premature or wholly beyond their province.' **296^{Id.}, 307 U.S. at page 130, 59 S.Ct. at page 757, 83 L.Ed. 1147. And see [United States v. Los Angeles s.l.r. c/o.](#), 273 U.S. 299, 309, 310, 47 S.Ct. 413, 414, 415, 71 L.Ed. 651; [Shannahan v. United States](#), 303 U.S. 596, 58 S.Ct. 732, 82 L.Ed. 1039. These considerations are apposite here. The Commission has no authority to enforce these findings. They are 'the exercise solely of the function of investigation.' [United States v. Los Angeles & S.L.R. Co.](#), *supra*, 273 U.S. at page 310, 47 S.Ct. at page 414, 71 L.Ed. 651. They are only a preliminary, interim step towards possible future action-action not by the Commission but by wholly independent agencies. The outcome of those proceedings may turn on factors other than these findings. These findings may never result in the respondent feeling the pinch of administrative action.

Reversed.

Mr. Justice ROBERTS took no part in the consideration or decision of this case.

Opinion of Mr. Justice BLACK and Mr. Justice MURPHY.

We agree with the Court's opinion and would add nothing to what has been said but for what is patently a wholly gratuitous assertion as to Constitutional law in the dissent of Mr. Justice FRANKFURTER. We refer to the statement that 'Congressional acquiescence to date in the doctrine of [Chicago, etc., R. Co. v. Minnesota](#), *supra* (134 U.S. 418, 10 S.Ct. 462, 702, 33 L.Ed. 970), may fairly be claimed.' That was the case in which a majority of this Court was finally induced to expand the meaning *620 of 'due process' so as to give courts power to block efforts of the state and national governments to regulate economic affairs. The present case does not afford a proper occasion to discuss the soundness of that doctrine because, as stated in Mr. Justice FRANKFURTER'S dissent, 'That issue is not here in controversy.' The salutary practice whereby courts do not discuss issues in the abstract applies with peculiar force to Constitutional questions. Since, however, the dissent adverts to a highly controversial due process doctrine and implies its acceptance by Congress, we feel compelled to say that we do not understand that Congress voluntarily has acquiesced in a Constitutional principle of government that courts, rather than legislative bodies, possess final authority over regulation of economic affairs. Even this Court has not always fully embraced that principle, and we wish to repeat that we have never acquiesced in it, and do not now. See [Federal Power Commission v. Natural Gas Pipeline Co.](#), 315 U.S. 575, 599-601, 62 S.Ct. 736,

[749, 750, 86 L.Ed. 1037.](#)

Mr. Justice REED, dissenting.

This case involves the problem of rate making under the Natural Gas Act. Added importance arises from the obvious fact that the principles stated are generally applicable to all federal agencies which are entrusted with the determination of rates for utilities. Because my views differ somewhat from those of my brethren, it may be of some value to set them out in a summary form.

The Congress may fix utility rates in situations subject to federal control without regard to any standard except the constitutional standards of due process and for taking private property for public use without just compensation. [Wilson v. New](#), 243 U.S. 332, 350, 37 S.Ct. 298, 302, 61 L.Ed. 755, L.R.A.1917E, 938, Ann.Cas.1918A, 1024. A Commission, however, does not have this freedom of action. Its powers are limited not only by the constitutional standards but also by the standards of the delegation. Here the standard added by the Natural Gas Act is that the rate be 'just *621 and reasonable.' ^{FN1} Section 6 ^{FN2} **297 throws additional light on the meaning of these words.

^{FN1} Natural Gas Act, s 4(a), 52 Stat. 821, 822, 15 U.S.C. s 717c(a), 15 U.S.C.A. s 717c(a).

^{FN2} 52 Stat. 821, 824, 15 U.S.C. s 717e, 15 U.S.C.A. s 717e:

'(a) The Commission may investigate and ascertain the actual legitimate cost of the property of every natural-gas company, the depreciation therein, and, when found necessary for rate-making purposes, other facts which bear on the determination of such cost or depreciation and the fair value of such property.

'(b) Every natural-gas company upon request shall file with the Commission an inventory of all or any part of its property and a statement of the original cost thereof, and shall keep the Commission informed regarding the cost of all additions, betterments, extensions, and new construction.'

When the phrase was used by Congress to describe allowable rates, it had relation to something ascertainable. The rates were not left to the whim of the Commission. The rates fixed would produce an annual return and that annual return was to be compared with a theoretical just and reasonable return, all risks considered, on the fair value of the property used and useful in the public service at the time of the determination.

Such an abstract test is not precise. The agency charged

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

with its determination has a wide range before it could properly be said by a court that the agency had disregarded statutory standards or had confiscated the property of the utility for public use. Cf. [Chicago, M. & St. P.R. Co. v. Minnesota](#), 134 U.S. 418, 461-466, 10 S.Ct. 462, 702, 703-705, 33 L.Ed. 970, dissent. This is as Congress intends. Rates are left to an experienced agency particularly competent by training to appraise the amount required.

The decision as to a reasonable return had not been a source of great difficulty, for borrowers and lenders reached such agreements daily in a multitude of situations; and although the determination of fair value had been troublesome, its essentials had been worked out in fairness to investor and consumer by the time of the enactment*622 of this Act. Cf. [Los Angeles G. & E. Corp. v. Railroad Comm.](#), 289 U.S. 287, 304 et seq., 53 S.Ct. 637, 643 et seq., 77 L.Ed. 1180. The results were well known to Congress and had that body desired to depart from the traditional concepts of fair value and earnings, it would have stated its intention plainly. [Helvering v. Griffiths](#), 318 U.S. 371, 63 S.Ct. 636.

It was already clear that when rates are in dispute, 'earnings produced by rates do not afford a standard for decision.' 289 U.S. at page 305, 53 S.Ct. at page 644, 77 L.Ed. 1180. Historical cost, prudent investment and reproduction cost ^{FN3} were all relevant factors in determining fair value. Indeed, disregarding the pioneer investor's risk, if prudent investment and reproduction cost were not distorted by changes in price levels or technology, each of them would produce the same result. The realization from the risk of an investment in a speculative field, such as natural gas utilities, should be reflected in the present fair value. ^{FN4} The amount of evidence to be admitted on any point was of course in the agency's reasonable discretion, and it was free to give its own weight to these or other factors and to determine from all the evidence its own judgment as to the necessary rates.

^{FN3} 'Reproduction cost' has been variously defined, but for rate making purposes the most useful sense seems to be, the minimum amount necessary to create at the time of the inquiry a modern plant capable of rendering equivalent service. See I Bonbright, Valuation of Property (1937) 152. Reproduction cost as the cost of building a replica of an obsolescent plant is not of real significance.

'Prudent investment' is not defined by the Court. It may mean the sum originally put in the enterprise, either with or without additional amounts from excess earnings

reinvested in the business.

^{FN4} It is of no more than bookkeeping significance whether the Commission allows a rate of return commensurate with the risk of the original investment or the lower rate based on current risk and a capitalization reflecting the established earning power of a successful company and the probable cost of duplicating its services. Cf. [American T. & T. Co. v. United States](#), 299 U.S. 232, 57 S.Ct. 170, 81 L.Ed. 142. But the latter is the traditional method.

*623 I agree with the Court in not imposing a rule of prudent investment alone in determining the rate base. This leaves the Commission free, as I understand it, to use any available evidence for its finding of fair value, including both prudent investment and the cost of installing at the present time an efficient system for furnishing the needed utility service.

My disagreement with the Court arises primarily from its view that it makes no **298 difference how the Commission reached the rate fixed so long as the result is fair and reasonable. For me the statutory command to the Commission is more explicit. Entirely aside from the constitutional problem of whether the Congress could validly delegate its rate making power to the Commission, in toto and without standards, it did legislate in the light of the relation of fair and reasonable to fair value and reasonable return. The Commission must therefore make its findings in observance of that relationship.

The Federal Power Commission did not, as I construe their action, disregard its statutory duty. They heard the evidence relating to historical and reproduction cost and to the reasonable rate of return and they appraised its weight. The evidence of reproduction cost was rejected as unpersuasive, but from the other evidence they found a rate base, which is to me a determination of fair value. On that base the earnings allowed seem fair and reasonable. So far as the Commission went in appraising the property employed in the service, I find nothing in the result which indicates confiscation, unfairness or unreasonableness. Good administration of rate making agencies under this method would avoid undue delay and render revaluations unnecessary except after violent fluctuations of price levels. Rate making under this method has been subjected to criticism. But until Congress changes the standards for the agencies, these rate making bodies should continue the conventional theory of rate *624 making. It will probably be simpler to improve present methods than to devise new ones.

But a major error, I think was committed in the disregard

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

by the Commission of the investment in exploratory operations and other recognized capital costs. These were not considered by the Commission because they were charged to operating expenses by the company at a time when it was unregulated. Congress did not direct the Commission in rate making to deduct from the rate base capital investment which had been recovered during the unregulated period through excess earnings. In my view this part of the investment should no more have been disregarded in the rate base than any other capital investment which previously had been recovered and paid out in dividends or placed to surplus. Even if prudent investment throughout the life of the property is accepted as the formula for figuring the rate base, it seems to me illogical to throw out the admittedly prudent cost of part of the property because the earnings in the unregulated period had been sufficient to return the prudent cost to the investors over and above a reasonable return. What would the answer be under the theory of the Commission and the Court, if the only prudent investment in this utility had been the seventeen million capital charges which are now disallowed?

For the reasons heretofore stated, I should affirm the action of the Circuit Court of Appeals in returning the proceeding to the Commission for further consideration and should direct the Commission to accept the disallowed capital investment in determining the fair value for rate making purposes.

Mr. Justice FRANKFURTER, dissenting.

My brother JACKSON has analyzed with particularity the economic and social aspects of natural gas as well as *625 the difficulties which led to the enactment of the Natural Gas Act, especially those arising out of the abortive attempts of States to regulate natural gas utilities. The Natural Gas Act of 1938 should receive application in the light of this analysis, and Mr. Justice JACKSON has, I believe, drawn relevant inferences regarding the duty of the Federal Power Commission in fixing natural gas rates. His exposition seems to me unanswered, and I shall say only a few words to emphasize my basic agreement with him.

For our society the needs that are met by public utilities are as truly public services as the traditional governmental functions of police and justice. They are not less so when these services are rendered by private enterprise under governmental regulation. Who ultimately determines the ways of regulation, is the decisive aspect in the public supervision of privately-owned utilities. Foreshadowed nearly sixty years ago, [Railroad Commission Cases \(Stone v. Farmers' Loan & Trust Co.\)](#), 116 U.S. 307, 331, 6 S.Ct. 334, 344, 388, 1191, 29 L.Ed. 636, it was decided more than fifty **299 years ago that the final say under

the Constitution lies with the judiciary and not the legislature. [Chicago, etc., R. Co. v. Minnesota](#), 134 U.S. 418, 10 S.Ct. 462, 702, 33 L.Ed. 970.

While legal issues touching the proper distribution of governmental powers under the Constitution may always be raised, Congressional acquiescence to date in the doctrine of *Chicago, etc., R. Co. v. Minnesota*, supra, may fairly be claimed. But in any event that issue is not here in controversy. As pointed out in the opinions of my brethren, Congress has given only limited authority to the Federal Power Commission and made the exercise of that authority subject to judicial review. The Commission is authorized to fix rates chargeable for natural gas. But the rates that it can fix must be 'just and reasonable'. s 5 of the Natural Gas Act, [15 U.S.C. s 717d](#), [15 U.S.C.A. s 717d](#). Instead of making the Commission's rate determinations final, Congress*626 specifically provided for court review of such orders. To be sure, 'the finding of the Commission as to the facts, if supported by substantial evidence' was made 'conclusive', s 19 of the Act, [15 U.S.C. s 717r](#); [15 U.S.C.A. s 717r](#). But obedience of the requirement of Congress that rates be 'just and reasonable' is not an issue of fact of which the Commission's own determination is conclusive. Otherwise, there would be nothing for a court to review except questions of compliance with the procedural provisions of the Natural Gas Act. Congress might have seen fit so to cast its legislation. But it has not done so. It has committed to the administration of the Federal Power Commission the duty of applying standards of fair dealing and of reasonableness relevant to the purposes expressed by the Natural Gas Act. The requirement that rates must be 'just and reasonable' means just and reasonable in relation to appropriate standards. Otherwise Congress would have directed the Commission to fix such rates as in the judgment of the Commission are just and reasonable; it would not have also provided that such determinations by the Commission are subject to court review.

To what sources then are the Commission and the courts to go for ascertaining the standards relevant to the regulation of natural gas rates? It is at this point that Mr. Justice JACKSON'S analysis seems to me pertinent. There appear to be two alternatives. Either the fixing of natural gas rates must be left to the unguided discretion of the Commission so long as the rates it fixes do not reveal a glaringly had prophecy of the ability of a regulated utility to continue its service in the future. Or the Commission's rate orders must be founded on due consideration of all the elements of the public interest which the production and distribution of natural gas involve just because it is natural gas. These elements are reflected in the Natural Gas Act, if that Act be applied as

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

an entirety. See, for *627 instance, ss 4(a)(b)(c)(d), 6, and 11, [15 U.S.C. ss 717c\(a\)\(b\)\(c\)\(d\)](#), [717e](#), and [717j](#), [15 U.S.C.A. ss 717c\(a-d\)](#), [717e](#), [717j](#). Of course the statute is not concerned with abstract theories of ratemaking. But its very foundation is the 'public interest', and the public interest is a texture of multiple strands. It includes more than contemporary investors and contemporary consumers. The needs to be served are not restricted to immediacy, and social as well as economic costs must be counted.

It will not do to say that it must all be left to the skill of experts. Expertise is a rational process and a rational process implies expressed reasons for judgment. It will little advance the public interest to substitute for the hodge-podge of the rule in [Smyth v. Ames](#), [169 U.S. 466](#), [18 S.Ct. 418](#), [42 L.Ed. 819](#), an encouragement of conscious obscurity or confusion in reaching a result, on the assumption that so long as the result appears harmless its basis is irrelevant. That may be an appropriate attitude when state action is challenged as unconstitutional. Cf. [Driscoll v. Edison Light & Power Co.](#), [307 U.S. 104](#), [59 S.Ct. 715](#), [83 L.Ed. 1134](#). But it is not to be assumed that it was the design of Congress to make the accommodation of the conflicting interests exposed in Mr. Justice JACKSON'S opinion the occasion for a blind clash of forces or a partial assessment of relevant factors, either before the Commission or here.

The objection to the Commission's action is not that the rates it granted were too low but that the range of its vision was too narrow. And since the issues before the Commission involved no less than the **300 total public interest, the proceedings before it should not be judged by narrow conceptions of common law pleading. And so I conclude that the case should be returned to the Commission. In order to enable this Court to discharge its duty of reviewing the Commission's order, the Commission should set forth with explicitness the criteria by which it is guided *628 in determining that rates are 'just and reasonable', and it should determine the public interest that is in its keeping in the perspective of the considerations set forth by Mr. Justice JACKSON.

By Mr. Justice JACKSON.

Certainly the theory of the court below that ties rate-making to the fair-value-reproduction-cost formula should be overruled as in conflict with Federal Power Commission v. Natural Gas Pipeline Co. ^{FN1} But the case should, I think, be the occasion for reconsideration of our rate-making doctrine as applied to natural gas and should be returned to the Commission for further consideration in the light thereof.

[FN1 315 U.S. 575, 62 S.Ct. 736, 86 L.Ed. 1037.](#)

The Commission appears to have understood the effect of the two opinions in the Pipeline case to be at least authority and perhaps direction to fix natural gas rates by exclusive application of the 'prudent investment' rate base theory. This has no warrant in the opinion of the Chief Justice for the Court, however, which released the Commission from subservience to 'any single formula or combination of formulas' provided its order, 'viewed in its entirety, produces no arbitrary result.' [315 U.S. at page 586, 62 S.Ct. at page 743, 86 L.Ed. 1037.](#) The minority opinion I understood to advocate the 'prudent investment' theory as a sufficient guide in a natural gas case. The view was expressed in the court below that since this opinion was not expressly converted it must have been approved. ^{FN2} I disclaim this imputed*629 approval with some particularity, because I attach importance at the very beginning of federal regulation of the natural gas industry to approaching it as the performance of economic functions, not as the performance of legalistic rituals.

^{FN2} Judge Dobie, dissenting below, pointed out that the majority opinion in the Pipeline case 'contains no express discussion of the Prudent Investment Theory' and that the concurring opinion contained a clear one, and said, 'It is difficult for me to believe that the majority of the Supreme Court, believing otherwise, would leave such a statement unchallenged.' ([134 F.2d 287, 312.](#)) The fact that two other Justices had as matter of record in our books long opposed the reproduction cost theory of rate bases and had commented favorably on the prudent investment theory may have influenced that conclusion. See opinion of Mr. Justice Frankfurter in [Driscoll v. Edison Light & Power Co.](#), [307 U.S. 104, 122, 59 S.Ct. 715, 724, 83 L.Ed. 1134](#), and my brief as Solicitor General in that case. It should be noted, however, that these statements were made, not in a natural gas case, but in an electric power case—a very important distinction, as I shall try to make plain.

I.

Solutions of these cases must consider eccentricities of the industry which gives rise to them and also to the Act of Congress by which they are governed.

The heart of this problem is the elusive, exhaustible, and irreplaceable nature of natural gas itself. Given sufficient money, we can produce any desired amount of railroad,

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

bus, or steamship transportation, or communications facilities, or capacity for generation of electric energy, or for the manufacture of gas of a kind. In the service of such utilities one customer has little concern with the amount taken by another, one's waste will not deprive another, a volume of service and be created equal to demand, and today's demands will not exhaust or lessen capacity to serve tomorrow. But the wealth of Midas and the wit of man cannot produce or reproduce a natural gas field. We cannot even reproduce the gas, for our manufactured product has only about half the heating value per unit of nature's own. ^{FN3}

^{FN3} Natural gas from the Appalachian field averages about 1050 to 1150 B.T.U. content, while by-product manufactured gas is about 530 to 540. Moody's Manual of Public Utilities (1943) 1350; Youngberg, Natural Gas (1930) 7.

****301** Natural gas in some quantity is produced in twenty-four states. It is consumed in only thirty-five states, and is ***630** available only to about 7,600,000 consumers. ^{FN4} Its availability has been more localized than that of any other utility service because it has depended more on the caprice of nature.

^{FN4} Sen.Rep. No. 1162, 75th Cong., 1st Sess., 2.

The supply of the Hope Company is drawn from that old and rich and vanishing field that flanks the Appalachian mountains. Its center of production is Pennsylvania and West Virginia, with a fringe of lesser production in New York, Ohio, Kentucky, Tennessee, and the north end of Alabama. Oil was discovered in commercial quantities at a depth of only 69 1/2 feet near Titusville, Pennsylvania, in 1859. Its value then was about \$16 per barrel. ^{FN5} The oil branch of the petroleum industry went forward at once, and with unprecedented speed. The area productive of oil and gas was roughed out by the drilling of over 19,000 'wildcat' wells, estimated to have cost over \$222,000,000. Of these, over 18,000 or 94.9 per cent, were 'dry holes.' About five per cent, or 990 wells, made discoveries of commercial importance, 767 of them resulting chiefly in oil and 223 in gas only. ^{FN6} Prospecting for many years was a search for oil, and to strike gas was a misfortune. Waste during this period and even later is appalling. Gas was regarded as having no commercial value until about 1882, in which year the total yield was valued only at about \$75,000. ^{FN7} Since then, contrary to oil, which has become cheaper gas in this field has pretty steadily advanced in price.

^{FN5} Arnold and Kemnitzer, Petroleum in the United States and Possessions (1931) 78.

^{FN6} Id. at 62-63.

^{FN7} Id. at 61.

While for many years natural gas had been distributed on a small scale for lighting, ^{FN8} its acceptance was slow, ***631** facilities for its utilization were primitive, and not until 1885 did it take on the appearance of a substantial industry. ^{FN9} Soon monopoly of production or markets developed. ^{FN10} To get gas from the mountain country, where it was largely found, to centers of population, where it was in demand, required very large investment. By ownership of such facilities a few corporate systems, each including several companies, controlled access to markets. Their purchases became the dominating factor in giving a market value to gas produced by many small operators. Hope is the market for over 300 such operators. By 1928 natural gas in the Appalachian field commanded an average price of 21.1 cents per m.c.f. at points of production and was bringing 45.7 cents at points of consumption. ^{FN11} The companies which controlled markets, however, did not rely on gas purchases alone. They acquired and held in fee or leasehold great acreage in territory proved by 'wildcat' drilling. These large marketing system companies as well as many small independent owners and operators have carried on the commercial development of proved territory. The development risks appear from the estimate that up to 1928, 312,318 proved area wells had been sunk in the Appalachian field of which 48,962, or 15.7 per cent, failed to produce oil or gas in commercial quantity. ^{FN12}

^{FN8} At Fredonia, New York, in 1821, natural gas was conveyed from a shallow well to some thirty people. The lighthouse at Barcelona Harbor, near what is now Westfield, New York, was at about that time and for many years afterward lighted by gas that issued from a crevice. Report on Utility Corporations by Federal Trade Commission, Sen.Doc. 92, Pt. 84-A, 70th Cong., 1st Sess., 8-9.

^{FN9} In that year Pennsylvania enacted 'An Act to provide for the incorporation and regulation of natural gas companies.' Penn.Laws 1885, No. 32, 15 P.S. s 1981 et seq.

[FN11](#) Arnold and Kemnitzer, Petroleum in the United States and Possessions (1931) 73.

[FN12](#). Id. at 63.

*632 With the source of supply thus tapped to serve centers of large demand, like Pittsburgh, Buffalo, Cleveland, Youngstown, Akron, and other industrial communities, the distribution of natural gas fast became big business. Its advantages as a **302 fuel and its price commended it, and the business yielded a handsome return. All was merry and the goose hung high for consumers and gas companies alike until about the time of the first. World War. Almost unnoticed by the consuming public, the whole Appalachian field passed its peak of production and started to decline. Pennsylvania, which to 1928 had given off about 38 per cent of the natural gas from this field, had its peak in 1905; Ohio, which had produced 14 per cent, had its peak in 1915; and West Virginia, greatest producer of all, with 45 per cent to its credit, reached its peak in 1917. [FN13](#)

[FN13](#). Id. at 64.

Western New York and Eastern Ohio, on the fringe of the field, had some production but relied heavily on imports from Pennsylvania and West Virginia. Pennsylvania, a producing and exporting state, was a heavy consumer and supplemented her production with imports from West Virginia. West Virginia was a consuming state, but the lion's share of her production was exported. Thus the interest of the states in the North Appalachian supply was in conflict.

Competition among localities to share in the failing supply and the helplessness of state and local authorities in the presence of state lines and corporate complexities is a part of the background of federal intervention in the industry. [FN14](#) West Virginia took the boldest measure. It legislated a priority in its entire production in favor of its own inhabitants. That was frustrated by an injunction*633 from this Court. [FN15](#) Throughout the region clashes in the courts and conflicting decisions evidenced public anxiety and confusion. It was held that the New York Public Service Commission did not have power to classify consumers and restrict their use of gas. [FN16](#) That Commission held that a company could not abandon a part of its territory and still serve the rest. [FN17](#) Some courts admonished the companies to take action to protect consumers. [FN18](#) Several courts held that companies, regardless of failing supply, must continue to

take on customers, but such compulsory additions were finally held to be within the Public Service Commission's discretion. [FN19](#) There were attempts to throw up franchises and quit the service, and municipalities resorted to the courts with conflicting results. [FN20](#) Public service commissions of consuming states were handicapped, for they had no control of the supply. [FN21](#)

[FN21](#) The New York Public Service Commission said: 'While the transportation of natural gas through pipe lines from one state to another state is interstate commerce * * *, Congress has not taken over the regulation of

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

that particular industry. Indeed, it has expressly excepted it from the operation of the Interstate Commerce Commissions Law (Interstate Commerce Commissions Law, section 1). It is quite clear, therefore, that this Commission can not require a Pennsylvania corporation producing gas in Pennsylvania to transport it and deliver it in the State of New York, and that the Interstate Commerce Commission is likewise powerless. If there exists such a power, and it seems that there does, it is a power vested in Congress and by it not yet exercised. There is no available source of supply for the Crystal City Company at present except through purchasing from the Porter Gas Company. It is possible that this Commission might fix a price at which the Potter Gas Company should sell if it sold at all, but as the Commission can not require it to supply gas in the State of New York, the exercise of such a power to fix the price, if such power exists, would merely say, sell at this price or keep out of the State.' Lane v. Crystal City Gas Co., 8 New York Public Service Comm.Reports, Second District, 210, 212.

****303 *634** Shortages during World War I occasioned the first intervention in the natural gas industry by the Federal Government. Under Proclamation of President Wilson the United States Fuel Administrator took control, stopped extensions, classified consumers and established a priority for domestic over industrial use. [FN22](#) After the war federal control was abandoned. Some cities once served with natural gas became dependent upon mixed gas of reduced heating value and relatively higher price. [FN23](#)

[FN22](#) Proclamation by the President of September 16, 1918; Rules and Regulations of H. A. Garfield, Fuel Administrator, September 24, 1918.

[FN23](#) For example, the Iroquois Gas Corporation which formerly served Buffalo, New York, with natural gas ranging from 1050 to 1150 b.t.u. per cu. ft., now mixes a by-product gas of between 530 and 540 b.t.u. in proportions to provide a mixed gas of about 900 b.t.u. per cu. ft. For space heating or water heating its charges range from 65 cents for the first m.c.f. per month to 55 cents for all above 25 m.c.f. per month. Moody's Manual of Public Utilities (1943) 1350.

Utilization of natural gas of highest social as well as economic return is domestic use for cooking and water

***635** heating, followed closely by use for space heating in homes. This is the true public utility aspect of the enterprise, and its preservation should be the first concern of regulation. Gas does the family cooking cheaper than any other fuel. [FN24](#) But its advantages do not end with dollars and cents cost. It is delivered without interruption at the meter as needed and is paid for after it is used. No money is tied up in a supply, and no space is used for storage. It requires no handling, creates no dust, and leaves no ash. It responds to thermostatic control. It ignites easily and immediately develops its maximum heating capacity. These incidental advantages make domestic life more liveable.

[FN24](#) The United States Fuel Administration made the following cooking value comparisons, based on tests made in the Department of Home Economics of Ohio State University:

Natural gas at 1.12 per M. is equivalent to coal at \$6.50 per ton.

Natural gas at 2.00 per M. is equivalent to gasoline at 27¢ per gal.

Natural gas at 2.20 per M. is equivalent to electricity at 3¢ per k.w.h.

Natural gas at 2.40 per M. is equivalent to coal oil at 15¢ per gal.

Use and Conservation of Natural Gas, issued by U.S. Fuel Administration (1918) 5.

Industrial use is induced less by these qualities than by low cost in competition with other fuels. Of the gas exported from West Virginia by the Hope Company a very substantial part is used by industries. This wholesale use speeds exhaustion of supply and displaces other fuels. Coal miners and the coal industry, a large part of whose costs are wages, have complained of unfair competition from low-priced industrial gas produced with relatively little labor cost. [FN25](#)

[FN25](#) See Brief on Behalf of Legislation Imposing an Excise Tax on Natural Gas, submitted to N.R.A. by the United Mine Workers of America and the National Coal Association.

Gas rate structures generally have favored industrial users. In 1932, in Ohio, the average yield on gas for domestic consumption was 62.1 cents per m.c.f. and on industrial, ***636** 38.7. In Pennsylvania, the figures were 62.9 against 31.7. West Virginia showed the least spread, domestic consumers paying 36.6 cents; and industrial, 27.7. [FN26](#) Although this spread is less than ****304** in other parts of the United States, [FN27](#) it can hardly be said to be

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

self-justifying. It certainly is a very great factor in hastening decline of the natural gas supply.

[FN26](#) Brief of National Gas Association and

State.	Industrial	Domestic
Illinois.	29.2	1.678
Louisiana.	10.4	59.7
Oklahoma.	11.2	41.5
Texas.	13.1	59.7
Alabama.	17.8	1.227
Georgia.	22.9	1.043

About the time of World War I there were occasional and short-lived efforts by some hard-pressed companies to reverse this discrimination and adopt graduated rates, giving a low rate to quantities adequate for domestic use and graduating it upward to discourage industrial use. [FN28](#)

*637 These rates met opposition from industrial sources, of course, and since diminished revenues from industrial sources tended to increase the domestic price, they met little popular or commission favor. The fact is that neither the gas companies nor the consumers nor local regulatory bodies can be depended upon to conserve gas. Unless federal regulation will take account of conservation, its efforts seem, as in this case, actually to constitute a new threat to the life of the Appalachian supply.

[FN28](#) In Corning, New York, rates were initiated by the Crystal City Gas Company as follows: 70¢ for the first 5,000 cu. ft. per month; 80¢ from 5,000 to 12,000; \$1 for all over 12,000. The Public Service Commission rejected these rates and fixed a flat rate of 58¢ per m.c.f. Lane v. Crystal City Gas Co., 8 New York Public Service Comm. Reports, Second District, 210.

The Pennsylvania Gas Company (National Fuel Gas Company group) also attempted a sliding scale rate for New York consumers, net per month as follows: First 5,000 feet, 35¢ ; second 5,000 feet, 45¢ ; third 5,000 feet, 50¢ ; all above 15,000, 55¢ . This was eventually abandoned, however. The company's present scale in Pennsylvania appears to be reversed to the following net monthly rate; first 3 m.c.f., 75¢ ; next 4 m.c.f., 60¢ ; next 8 m.c.f., 55¢ ; over 15 m.c.f., 50¢ . Moody's Manual of Public Utilities (1943) 1350. In New York it now serves a mixed gas.

For a study of effect of sliding scale rates in reducing consumption see 11 Proceedings of Natural Gas Association of America (1919) 287.

United Mine Workers, supra, note 26, pp. 35, 36, compiled from Bureau of Mines Reports.

[FN27](#) From the source quoted in the preceding note the spread elsewhere is shown to be:

II.

Congress in 1938 decided upon federal regulation of the industry. It did so after an exhaustive investigation of all aspects including failing supply and competition for the use of natural gas intensified by growing scarcity. [FN29](#)

Pipelines from the Appalachian area to markets were in the control of a handful of holding company systems. [FN30](#)

This created a highly concentrated control of the producers' market and of the consumers' supplies. While holding companies dominated both production and distribution they segregated those activities in separate *638 subsidiaries, [FN31](#) the effect of which, if not the purpose, was to isolate **305 some end of the business from the reach of any one state commission. The cost of natural gas to consumers moved steadily upwards over the years, out of proportion to prices of oil, which, except for the element of competition, is produced under somewhat comparable conditions. The public came to feel that the companies were exploiting the growing scarcity of local gas. The problems of this region had much to do with creating the demand for federal regulation.

[FN29](#) See Report on Utility Corporations by Federal Trade Commission, Sen. Doc. 92, Pt. 84-A, 70th Cong., 1st Sess.

[FN30](#) Four holding company systems control over 55 per cent of all natural gas transmission lines in the United States. They are Columbia Gas and Electric Corporation, Cities Service Co., Electric Bond and Share Co., and Standard Oil Co. of New Jersey. Columbia alone controls nearly 25 per cent, and fifteen companies account for over 80 per cent of the total. Report on Utility Corporations by Federal Trade Commission, Sen. Doc. 92, Pt. 84-A, 70th Cong., 1st Sess., 28.

In 1915, so it was reported to the Governor of West

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

Virginia, 87 per cent of the total gas production of that state was under control of eight companies. Steptoe and Hoffheimer, Legislative Regulation of Natural Gas Supply in West Virginia, 17 West Virginia Law Quarterly 257, 260. Of these, three were subsidiaries of the Columbia system and others were subsidiaries of larger systems. In view of inter-system sales and interlocking interests it may be doubted whether there is much real competition among these companies.

[FN31](#) This pattern with its effects on local regulatory efforts will be observed in our decisions. See [United Fuel Gas Co. v. Railroad Commission, 278 U.S. 300, 49 S.Ct. 150, 73 L.Ed. 390](#); [United Fuel Gas Co. v. Public Service Commission, 278 U.S. 322, 49 S.Ct. 157, 73 L.Ed. 402](#); [Dayton Power & Light v. Public Utilities Commission, 292 U.S. 290, 54 S.Ct. 647, 78 L.Ed. 1267](#); [Columbus Gas & Fuel Co. v. Public Utilities Commission, 292 U.S. 398, 54 S.Ct. 763, 78 L.Ed. 1327, 91 A.L.R. 1403](#), and the present case.

The Natural Gas Act declared the natural gas business to be 'affected with a public interest,' and its regulation 'necessary in the public interest.' [FN32](#) Originally, and at the time this proceeding was commenced and tried, it also declared 'the intention of Congress that natural gas shall be sold in interstate commerce for resale for ultimate public consumption for domestic, commercial, industrial, or any other use at the lowest possible reasonable rate consistent with the maintenance of adequate service in the public interest.' [FN33](#) While this was later dropped, there is nothing to indicate that it was not and is not still an accurate statement of purpose of the Act. Extension or improvement of facilities may be ordered when 'necessary or desirable in the public interest,' abandonment of facilities may be ordered when the supply is 'depleted to the extent that the continuance of service is unwarranted, or that the present or future public convenience or necessity *639 permit' abandonment and certain extensions can only be made on finding of 'the present or future public convenience and necessity.' [FN34](#) The Commission is required to take account of the ultimate use of the gas. Thus it is given power to suspend new schedules as to rates, charges, and classification of services except where the schedules are for the sale of gas 'for resale for industrial use only,' [FN35](#) which gives the companies greater freedom to increase rates on industrial gas than on domestic gas. More particularly, the Act expressly forbids any undue preference or advantage to any person or 'any unreasonable difference in rates * * * either as between localities or as between classes of service.' [FN36](#) And the power of the Commission expressly includes that to determine the 'just and reasonable rate,

charge, classification, rule, regulation, practice, or contract to be thereafter observed and in force.' [FN37](#)

In view of the Court's opinion that the Commission in administering the Act may ignore discrimination, it is interesting that in reporting this Bill both the Senate and the House Committees on Interstate Commerce pointed out that in 1934, on a nationwide average the price of natural gas per m.c.f. was 74.6 cents for domestic use, 49.6 cents for commercial use, and 16.9 for industrial use. [FN38](#) I am not ready to think that supporters of a bill called attention to the striking fact that householders were being charged five times as much for their gas as industrial users only as a situation which the Bill would do nothing to remedy. On the other hand the Act gave to the Commission what the Court aptly describes as 'broad powers of regulation.'

[FN38](#) Sen. Rep. No. 1162, 75th Cong., 1st Sess. 2.

*640 III.

This proceeding was initiated by the Cities of Cleveland and Akron. They alleged that the price charged by Hope for natural gas 'for resale to domestic, commercial and small industrial consumers in Cleveland and elsewhere is excessive, unjust, unreasonable, greatly in excess of the price charged by Hope to nonaffiliated companies at wholesale for resale to domestic, commercial and small industrial consumers, and greatly in excess of the price charged by Hope to East Ohio for resale to certain favored industrial consumers in Ohio, and therefore is further unduly discriminatory between consumers and between classes of service' (italics supplied). The company answered admitting differences in prices to affiliated and nonaffiliated companies and justifying them by differences in conditions of delivery.**306 As to the allegation that the contract price is 'greatly in excess of the price charged by Hope to East Ohio for resale to

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

certain favored industrial consumers in Ohio,' Hope did not deny a price differential, but alleged that industrial gas was not sold to 'favored consumers' but was sold under contract and schedules filed with and approved by the Public Utilities Commission of Ohio, and that certain conditions of delivery made it not 'unduly discriminatory.'

The record shows that in 1940 Hope delivered for industrial consumption 36,523,792 m.c.f. and for domestic and commercial consumption, 50,343,652 m.c.f. I find no separate figure for domestic consumption. It served 43,767 domestic consumers directly, 511,521 through the East Ohio Gas Company, and 154,043 through the Peoples Natural Gas Company, both affiliates owned by the same parent. Its special contracts for industrial consumption, so far as appear, are confined to about a dozen big industries.

***641** Hope is responsible for discrimination as exists in favor of these few industrial consumers. It controls both the resale price and use of industrial gas by virtue of the very interstate sales contracts over which the Commission is exercising its jurisdiction.

Hope's contract with East Ohio Company is an example. Hope agrees to deliver, and the Ohio Company to take, '(a) all natural gas requisite for the supply of the domestic consumers of the Ohio Company; (b) such amounts of natural gas as may be requisite to fulfill contracts made with the consent and approval of the Hope Company by the Ohio Company, or companies which it supplies with natural gas, for the sale of gas upon special terms and conditions for manufacturing purposes.' The Ohio company is required to read domestic customers' meters once a month and meters of industrial customers daily and to furnish all meter readings to Hope. The Hope Company is to have access to meters of all consumers and to all of the Ohio Company's accounts. The domestic consumers of the Ohio Company are to be fully supplied in preference to consumers purchasing for manufacturing purposes and 'Hope Company can be required to supply gas to be used for manufacturing purposes only where the same is sold under special contracts which have first been submitted to and approved in writing by the Hope Company and which expressly provide that natural gas will be supplied thereunder only in so far as the same is not necessary to meet the requirements of domestic consumers supplied through pipe lines of the Ohio Company.' This basic contract was supplemented from time to time, chiefly as to price. The last amendment was in a letter from Hope to East Ohio in 1937. It contained a special discount on industrial gas and a schedule of special industrial contracts, Hope reserving the right to make eliminations therefrom and agreeing that others might be added from time to ***642** time with its approval

in writing. It said, 'It is believed that the price concessions contained in this letter, while not based on our costs, are under certain conditions, to our mutual advantage in maintaining and building up the volumes of gas sold by us (italics supplied).' [FN39](#)

[FN39](#) The list of East Ohio Gas Company's special industrial contracts thus expressly under Hope's control and their demands are as follows:

****307** The Commission took no note of the charges of discrimination and made no disposition of the issue tendered on this point. It ordered a flat reduction in the price per m.c.f. of all gas delivered by Hope in interstate commerce. It made no limitation, condition, or provision as to what classes of consumers should get the benefit of the reduction. While the cities have accepted and are defending the reduction, it is my view that the discrimination of which they have complained is perpetuated and increased by the order of the Commission and that it violates the Act in so doing.

The Commission's opinion aptly characterizes its entire objective by saying that 'bona fide investment figures now become all-important in the regulation of rates.' It should be noted that the all-importance of this theory is not the result of any instruction from Congress. When the Bill to regulate gas was first before Congress it contained ***643** the following: 'In determining just and reasonable rates the Commission shall fix such rate as will allow a fair return upon the actual legitimate prudent cost of the property used and useful for the service in question.' H.R. 5423, 74th Cong., 1st Sess. Title III, s 312(c). Congress rejected this language. See H.R. 5423, s 213 (211(c)), and H.R. Rep. No. 1318, 74th Cong., 1st Sess. 30.

The Commission contends nevertheless that the 'all important' formula for finding a rate base is that of prudent investment. But it excluded from the investment base an amount actually and admittedly invested of some \$17,000,000. It did so because it says that the Company recouped these expenditures from customers before the days of regulation from earnings above a fair return. But it would not apply all of such 'excess earnings' to reduce the rate base as one of the Commissioners suggested. The reason for applying excess earnings to reduce the investment base roughly from \$69,000,000 to \$52,000,000 but refusing to apply them to reduce it from that to some \$18,000,000 is not found in a difference in the character of the earnings or in their reinvestment. The reason assigned is a difference in bookkeeping treatment many years before the Company was subject to regulation. The \$17,000,000, reinvested chiefly in well

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

drilling, was treated on the books as expense. (The Commission now requires that drilling costs be carried to capital account.) The allowed rate base thus actually was determined by the Company's bookkeeping, not its investment. This attributes a significance to formal classification in account keeping that seems inconsistent with rational rate regulation. ^{FN40} Of *644 course, the **308 Commission would not and should not allow a rate base to be inflated by bookkeeping which had improperly capitalized expenses. I have doubts about resting public regulation upon any rule that is to be used or not depending on which side it favors.

^{FN40} To make a fetish of mere accounting is to shield from examination the deeper causes, forces, movements, and conditions which should govern rates. Even as a recording of current transactions, bookkeeping is hardly an exact science. As a representation of the condition and trend of a business, it uses symbols of certainty to express values that actually are in constant flux. It may be said that in commercial or investment banking or any business extending credit success depends on knowing what not to believe in accounting. Few concerns go into bankruptcy or reorganization whose books do not show them solvent and often even profitable. If one cannot rely on accountancy accurately to disclose past or current conditions of a business, the fallacy of using it as a sole guide to future price policy ought to be apparent. However, our quest for certitude is so ardent that we pay an irrational reverence to a technique which uses symbols of certainty, even though experience again and again warns us that they are delusive. Few writers have ventured to challenge this American idolatry, but see Hamilton, Cost as a standard for Price, 4 Law and Contemporary Problems 321, 323-25. He observes that 'As the apostle would put it, accountancy is all things to all men. * * * Its purpose determines the character of a system of accounts.' He analyzes the hypothetical character of accounting and says 'It was no eternal mold for pecuniary verities handed down from on high. It was-like logic or algebra, or the device of analogy in the law-an ingenious contrivance of the human mind to serve a limited and practical purpose.' 'Accountancy is far from being a pecuniary expression of all that is industrial reality. It is an instrument, highly selective in its application, in the service of the institution of money making.' As to capital account he observes 'In an enterprise in lusty competition with others of its

kind, survival is the thing and the system of accounts has its focus in solvency. * * * Accordingly depreciation, obsolescence, and other factors which carry no immediate threat are matters of lesser concern and the capital account is likely to be regarded as a secondary phenomenon. * * * But in an enterprise, such as a public utility, where continued survival seems assured, solvency is likely to be taken for granted. * * * A persistent and ingenious attention is likely to be directed not so much to securing the upkeep of the physical property as to making it certain that capitalization fails in not one whit to give full recognition to every item that should go into the account.'

*645 The Company on the other hand, has not put its gas fields into its calculations on the present-value basis, although that, it contends, is the only lawful rule for finding a rate base. To do so would result in a rate higher than it has charged or proposes as a matter of good business to charge.

The case before us demonstrates the lack of rational relationship between conventional rate-base formulas and natural gas production and the extremities to which regulating bodies are brought by the effort to rationalize them. The Commission and the Company each stands on a different theory, and neither ventures to carry its theory to logical conclusion as applied to gas fields.

IV.

This order is under judicial review not because we interpose constitutional theories between a State and the business it seeks to regulate, but because Congress put upon the federal courts a duty toward administration of a new federal regulatory Act. If we are to hold that a given rate is reasonable just because the Commission has said it was reasonable, review becomes a costly, time-consuming pageant of no practical value to anyone. If on the other hand we are to bring judgment of our own to the task, we should for the guidance of the regulators and the regulated reveal something of the philosophy, be it legal or economic or social, which guides us. We need not be slaves to a formula but unless we can point out a rational way of reaching our conclusions they can only be accepted as resting on intuition or predilection. I must admit that I possess no instinct jby which to know the 'reasonable' from the 'unreasonable' in prices and must seek some conscious design for decision.

The Court sustains this order as reasonable, but what makes it so or what could possibly make it otherwise,

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

*646 I cannot learn. It holds that: 'it is the result reached not the method employed which is controlling'; 'the fact that the method employed to reach that result may contain infirmities is not then important' and it is not 'important to this case to determine the various permissible ways in which any rate base on which the return is computed might be arrived at.' The Court does lean somewhat on considerations of capitalization and dividend history and requirements for dividends on outstanding stock. But I can give no real weight to that for it is generally and I think deservedly in discredit as any guide in rate cases. [FN41](#)

[FN41](#) See 2 Bonbright, Valuation of Property (1937) 1112.

Our books already contain so much talk of methods of rationalizing rates that we must appear ambiguous if we announce results without our working methods. We are confronted with regulation of a unique type of enterprise which I think requires considered rejection of much conventional utility doctrine and adoption of concepts of 'just and reasonable' rates and practices and of the 'public interest' that will take account of the peculiarities of the business.

The Court rejects the suggestions of this opinion. It says that the Committees in reporting the bill which became the Act said it provided 'for regulation along recognized and more or less standardized lines' and that there was 'nothing novel in its provisions.' So saying it sustains a rate calculated on a novel variation of a rate base theory which itself had at the time of enactment of the legislation been recognized only in dissenting opinions. Our difference seems to be between unconscious innovation, [FN42](#) and the purposeful **309 and deliberate innovation I *647 would make to meet the necessities of regulating the industry before us.

[FN42](#) Bonbright says, '* * * the vice of traditional law lies, not in its adoption of excessively rigid concepts of value and rules of valuation, but rather in its tendency to permit shifts in meaning that are inept, or else that are ill-defined because the judges that make them will not openly admit that they are doing so.' Id., 1170.

Hope's business has two components of quite divergent character. One, while not a conventional common-carrier undertaking, is essentially a transportation enterprise consisting of conveying gas from where it is produced to point of delivery to the buyer. This is a relatively routine

operation not differing substantially from many other utility operations. The service is produced by an investment in compression and transmission facilities. Its risks are those of investing in a tested means of conveying a discovered supply of gas to a known market. A rate base calculated on the prudent investment formula would seem a reasonably satisfactory measure for fixing a return from that branch of the business whose service is roughly proportionate to the capital invested. But it has other consequences which must not be overlooked. It gives marketability and hence 'value' to gas owned by the company and gives the pipeline company a large power over the marketability and hence 'value' of the production of others.

The other part of the business—to reduce to possession an adequate supply of natural gas—is of opposite character, being more erratic and irregular and unpredictable in relation to investment than any phase of any other utility business. A thousand feet of gas captured and severed from real estate for delivery to consumers is recognized under our law as property of much the same nature as a ton of coal, a barrel of oil, or a yard of sand. The value to be allowed for it is the real battleground between the investor and consumer. It is from this part of the business that the chief difference between the parties as to a proper rate base arises.

It is necessary to a 'reasonable' price for gas that it be anchored to a rate base of any kind? Why did courts in the first place begin valuing 'rate bases' in order to 'value' something else? The method came into vogue *648 in fixing rates for transportation service which the public obtained from common carriers. The public received none of the carriers' physical property but did make some use of it. The carriage was often a monopoly so there were no open market criteria as to reasonableness. The 'value' or 'cost' of what was put to use in the service by the carrier was not a remote or irrelevant consideration in making such rates. Moreover the difficulty of appraising an intangible service was thought to be simplified if it could be related to physical property which was visible and measurable and the items of which might have market value. The court hoped to reason from the known to the unknown. But gas fields turn this method topsy turvy. Gas itself is tangible, possessible, and does have a market and a price in the field. The value of the rate base is more elusive than that of gas. It consists of intangibles—leaseholds and freeholds—operated and unoperated—of little use in themselves except as rights to reach and capture gas. Their value lies almost wholly in predictions of discovery, and of price of gas when captured, and bears little relation to cost of tools and supplies and labor to develop it. Gas is what Hope sells and it can be directly priced more reasonably and easily and accurately than the

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

components of a rate base can be valued. Hence the reason for resort to a roundabout way of rate base price fixing does not exist in the case of gas in the field.

But if found, and by whatever method found, a rate base is little help in determining reasonableness of the price of gas. Appraisal of present value of these intangible rights to pursue fugitive gas depends on the value assigned to the gas when captured. The 'present fair value' rate base, generally in ill repute, ^{FN43} is not even ****310** urged by the gas company for valuing its fields.

^{FN43} 'The attempt to regulate rates by reference to a periodic or occasional reappraisal of the properties has now been tested long enough to confirm the worst fears of its critics. Unless its place is taken by some more promising scheme of rate control, the days of private ownership under government regulation may be numbered.'
2 Bonbright, Valuation of Property (1937) 1190.

***649** The prudent investment theory has relative merits in fixing rates for a utility which creates its service merely by its investment. The amount and quality of service rendered by the usual utility will, at least roughly, be measured by the amount of capital it puts into the enterprise. But it has no rational application where there is no such relationship between investment and capacity to serve. There is no such relationship between investment and amount of gas produced. Let us assume that Doe and Roe each produces in West Virginia for delivery to Cleveland the same quantity of natural gas per day. Doe, however, through luck or foresight or whatever it takes, gets his gas from investing \$50,000 in leases and drilling. Roe drilled poorer territory, got smaller wells, and has invested \$250,000. Does anybody imagine that Roe can get or ought to get for his gas five times as much as Doe because he has spent five times as much? The service one renders to society in the gas business is measured by what he gets out of the ground, not by what he puts into it, and there is little more relation between the investment and the results than in a game of poker.

Two-thirds of the gas Hope handles it buys from about 340 independent producers. It is obvious that the principle of rate-making applied to Hope's own gas cannot be applied, and has not been applied, to the bulk of the gas Hope delivers. It is not probable that the investment of any two of these producers will bear the same ratio to their investments. The gas, however, all goes to the same use, has the same utilization value and the same ultimate price.

To regulate such an enterprise by indiscriminately

transplanting any body of rate doctrine conceived and ***650** adapted to the ordinary utility business can serve the 'public interest' as the Natural Gas Act requires, if at all, only by accident. Mr. Justice Brandeis, the pioneer juristic advocate of the prudent investment theory for man-made utilities, never, so far as I am able to discover, proposed its application to a natural gas case. On the other hand, dissenting in *Commonwealth of Pennsylvania v. West Virginia*, he reviewed the problems of gas supply and said, 'In no other field of public service regulation is the controlling body confronted with factors so baffling as in the natural gas industry, and in none is continuous supervision and control required in so high a degree.' 262 U.S. 553, 621, 43 S.Ct. 658, 674, 67 L.Ed. 1117, 32 A.L.R. 300. If natural gas rates are intelligently to be regulated we must fit our legal principles to the economy of the industry and not try to fit the industry to our books.

As our decisions stand the Commission was justified in believing that it was required to proceed by the rate base method even as to gas in the field. For this reason the Court may not merely wash its hands of the method and rationale of rate making. The fact is that this Court, with no discussion of its fitness, simply transferred the rate base method to the natural gas industry. It happened in *Newark Natural Gas & Fuel Co. v. City of Newark, Ohio*, 1917, 242 U.S. 405, 37 S.Ct. 156, 157, 61 L.Ed. 393, Ann.Cas.1917B, 1025, in which the company wanted 25 cents per m.c.f., and under the Fourteenth Amendment challenged the reduction to 18 cents by ordinance. This Court sustained the reduction because the court below 'gave careful consideration to the questions of the value of the property * * * at the time of the inquiry,' and whether the rate 'would be sufficient to provide a fair return on the value of the property.' The Court said this method was 'based upon principles thoroughly established by repeated decisions of this court,' citing many cases, not one of which involved natural gas or a comparable wasting natural resource. Then came issues as to state power to ***651** regulate as affected by the commerce clause. *Public Utilities Commission v. Landon*, 1919, 249 U.S. 236, 39 S.Ct. 268, 63 L.Ed. 577; *Pennsylvania Gas Co. v. Public Service Commission*, 1920, 252 U.S. 23, 40 S.Ct. 279, 64 L.Ed. 434. These questions settled, the Court again was called upon in natural gas cases to consider state rate-making claimed to be invalid under the Fourteenth Amendment. *United Fuel Gas Co. v. Railroad Commission of Kentucky*, 1929, 278 U.S. 300, 49 S.Ct. 150, 73 L.Ed. 390; *United Fuel Gas Company v. Public Service Commission of West Virginia*, 1929, 278 U.S. 322, 49 S.Ct. 157, 73 L.Ed. 402. Then, as now, the differences were 'due ****311** chiefly to the difference in value ascribed by each to the gas rights and leaseholds.' 278 U.S. 300, 311, 49 S.Ct. 150, 153, 73 L.Ed. 390. No one seems to have questioned that the rate

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

base method must be pursued and the controversy was at what rate base must be used. Later the 'value' of gas in the field was questioned in determining the amount a regulated company should be allowed to pay an affiliate therefor—a state determination also reviewed under the Fourteenth Amendment. [Dayton Power & Light Co. v. Public Utilities Commission of Ohio, 1934, 292 U.S. 290, 54 S.Ct. 647, 78 L.Ed. 1267](#); [Columbus Gas & Fuel Co. v. Public Utilities Commission of Ohio, 1934, 292 U.S. 398, 54 S.Ct. 763, 78 L.Ed. 1327, 91 A.L.R. 1403](#). In both cases, one of which sustained, and one of which struck down a fixed rate the Court assumed the rate base method, as the legal way of testing reasonableness of natural gas prices fixed by public authority, without examining its real relevancy to the inquiry.

Under the weight of such precedents we cannot expect the Commission to initiate economically intelligent methods of fixing gas prices. But the Court now faces a new plan of federal regulation based on the power to fix the price at which gas shall be allowed to move in interstate commerce. I should now consider whether these rules devised under the Fourteenth Amendment are the exclusive tests of a just and reasonable rate under the federal statute, inviting reargument directed to that point *652 if necessary. As I see it now I would be prepared to hold that these rules do not apply to a natural gas case arising under the Natural Gas Act.

Such a holding would leave the Commission to fix the price of gas in the field as one would fix maximum prices of oil or milk or coal, or any other commodity. Such a price is not calculated to produce a fair return on the synthetic value of a rate base of any individual producer, and would not undertake to assure a fair return to any producer. The emphasis would shift from the producer to the product, which would be regulated with an eye to average or typical producing conditions in the field.

Such a price fixing process on economic lines would offer little temptation to the judiciary to become back seat drivers of the price fixing machine. The unfortunate effect of judicial intervention in this field is to divert the attention of those engaged in the process from what is economically wise to what is legally permissible. It is probable that price reductions would reach economically unwise and self-defeating limits before they would reach constitutional ones. Any constitutional problems growing out of price fixing are quite different than those that have heretofore been considered to inhere in rate making. A producer would have difficulty showing the invalidity of such a fixed price so long as he voluntarily continued to sell his product in interstate commerce. Should he withdraw and other authority be invoked to compel him to part with his property, a different problem would be

presented.

Allowance in a rate to compensate for gas removed from gas lands, whether fixed as of point of production or as of point of delivery, probably best can be measured by a functional test applied to the whole industry. For good or ill we depend upon private enterprise to exploit these natural resources for public consumption. The function which an allowance for gas in the field should perform *653 for society in such circumstances is to be enough and no more than enough to induce private enterprise completely and efficiently to utilize gas resources, to acquire for public service any available gas or gas rights and to deliver gas at a rate and for uses which will be in the future as well as in the present public interest.

The Court fears that 'if we are now to tell the Commission to fix the rates so as to discourage particular uses, we would indeed be injecting into a rate case a 'novel' doctrine * * *.' With due deference I suggest that there is nothing novel in the idea that any change in price of a service or commodity reacts to encourage or discourage its use. The question is not whether such consequences will or will not follow; the question is whether effects must be suffered blindly or may be intelligently selected, whether price control shall have targets at which it deliberately aims or shall be handled like a gun in the hands of one who does not know it is loaded.

We should recognize 'price' for what it is—a tool, a means, an expedient. In public**312 hands it has much the same economic effects as in private hands. Hope knew that a concession in industrial price would tend to build up its volume of sales. It used price as an expedient to that end. The Commission makes another cut in that same price but the Court thinks we should ignore the effect that it will have on exhaustion of supply. The fact is that in natural gas regulation price must be used to reconcile the private property right society has permitted to vest in an important natural resource with the claims of society upon it—price must draw a balance between wealth and welfare.

To carry this into techniques of inquiry is the task of the Commissioner rather than of the judge, and it certainly is no task to be solved by mere bookkeeping but requires the best economic talent available. There would doubtless be inquiry into the price gas is bringing in the *654 field, how far that price is established by arms' length bargaining and how far it may be influenced by agreements in restraint of trade or monopolistic influences. What must Hope really pay to get and to replace gas it delivers under this order? If it should get more or less than that for its own, how much and why? How far are such prices influenced by pipe line access to

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

markets and if the consumers pay returns on the pipe lines how far should the increment they cause go to gas producers? East Ohio is itself a producer in Ohio. ^{FN44} What do Ohio authorities require Ohio consumers to pay for gas in the field? Perhaps these are reasons why the Federal Government should put West Virginia gas at lower or at higher rates. If so what are they? Should East Ohio be required to exploit its half million acres of unoperated reserve in Ohio before West Virginia resources shall be supplied on a devalued basis of which that State complains and for which she threatens measures of self keep? What is gas worth in terms of other fuels it displaces?

^{FN44} East Ohio itself owns natural gas rights in 550,600 acres, 518,526 of which are reserved and 32,074 operated, by 375 wells. Moody's Manual of Public Utilities (1943) 5.

A price cannot be fixed without considering its effect on the production of gas. Is it an incentive to continue to exploit vast unoperated reserves? Is it conducive to deep drilling tests the result of which we may know only after trial? Will it induce bringing gas from afar to supplement or even to substitute for Appalachian gas? ^{FN45} Can it be had from distant fields as cheap or cheaper? If so, that competitive potentiality is certainly a relevant consideration. Wise regulation must also consider, as a private buyer would, what alternatives the producer has *655 if the price is not acceptable. Hope has intrastate business and domestic and industrial customers. What can it do by way of diverting its supply to intrastate sales? What can it do by way of disposing of its operated or reserve acreage to industrial concerns or other buyers? What can West Virginia do by way of conservation laws, severance or other taxation, if the regulated rate offends? It must be borne in mind that while West Virginia was prohibited from giving her own inhabitants a priority that discriminated against interstate commerce, we have never yet held that a good faith conservation act, applicable to her own, as well as to others, is not valid. In considering alternatives, it must be noted that federal regulation is very incomplete, expressly excluding regulation of 'production or gathering of natural gas,' and that the only present way to get the gas seems to be to call it forth by price inducements. It is plain that there is a downward economic limit on a safe and wise price.

^{FN45} Hope has asked a certificate of convenience and necessity to lay 1140 miles of 22-inch pipeline from Hugoton gas fields in southwest Kansas to West Virginia to carry 285 million cu. ft. of natural gas per day. The cost

was estimated at \$51,000,000. Moody's Manual of Public Utilities (1943) 1760.

But there is nothing in the law which compels a commission to fix a price at that 'value' which a company might give to its product by taking advantage of scarcity, or monopoly of supply. The very purpose of fixing maximum prices is to take away from the seller his opportunity to get all that otherwise the market would award him for his goods. This is a constitutional use of the power to fix maximum prices, **313 Block v. Hirsh, 256 U.S. 135, 41 S.Ct. 458, 65 L.Ed. 865, 16 A.L.R. 165; Marcus Brown Holding Co. v. Feldman, 256 U.S. 170, 41 S.Ct. 465, 65 L.Ed. 877; International Harvester Co. v. Kentucky, 234 U.S. 216, 34 S.Ct. 853, 58 L.Ed. 1284; Highland v. Russell Car & Snow Plow Co., 279 U.S. 253, 49 S.Ct. 314, 73 L.Ed. 688, just as the fixing of minimum prices of goods in interstate commerce is constitutional although it takes away from the buyer the advantage in bargaining which market conditions would give him. United States v. Darby, 312 U.S. 100, 657, 61 S.Ct. 451, 85 L.Ed. 609, 132 A.L.R. 1430; Mulford v. Smith, 307 U.S. 38, 59 S.Ct. 648, 83 L.Ed. 1092; United States v. Rock Royal Co-operative, Inc., 307 U.S. 533, 59 S.Ct. 993, 83 L.Ed. 1446; Sunshine Anthracite Coal Co. v. Adkins, 310 U.S. 381, 60 S.Ct. 907, 84 L.Ed. 1263. The Commission has power to fix *656 a price that will be both maximum and minimum and it has the incidental right, and I think the duty, to choose the economic consequences it will promote or retard in production and also more importantly in consumption, to which I now turn.

If we assume that the reduction in company revenues is warranted we then come to the question of translating the allowed return into rates for consumers or classes of consumers. Here the Commission fixed a single rate for all gas delivered irrespective of its use despite the fact that Hope has established what amounts to two rates—a high one for domestic use and a lower one for industrial contracts. ^{FN46} The Commission can fix two prices for interstate gas as readily as one—a price for resale to domestic users and another for resale to industrial users. This is the pattern Hope itself has established in the very contracts over which the Commission is expressly given jurisdiction. Certainly the Act is broad enough to permit two prices to be fixed instead of one, if the concept of the 'public interest' is not unduly narrowed.

^{FN46} I find little information as to the rates for industries in the record and none at all in such usual sources as Moody's Manual.

The Commission's concept of the public interest in natural

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

gas cases which is carried today into the Court's opinion was first announced in the opinion of the minority in the Pipeline case. It enumerated only two 'phases of the public interest: (1) the investor interest; (2) the consumer interest,' which it emphasized to the exclusion of all others. [315 U.S. 575, 606, 62 S.Ct. 736, 753, 86 L.Ed. 1037](#). This will do well enough in dealing with railroads or utilities supplying manufactured gas, electric, power, a communications service or transportation, where utilization of facilities does not impair their future usefulness. Limitation of supply, however, brings into a natural gas case another phase of the public interest that to my mind overrides both the owner *657 and the consumer of that interest. Both producers and industrial consumers have served their immediate private interests at the expense of the long-range public interest. The public interest, of course, requires stopping unjust enrichment of the owner. But it also requires stopping unjust impoverishment of future generations. The public interest in the use by Hope's half million domestic consumers is quite a different one from the public interest in use by a baker's dozen of industries.

Prudent price fixing it seems to me must at the very threshold determine whether any part of an allowed return shall be permitted to be realized from sales of gas for resale for industrial use. Such use does tend to level out daily and seasonal peaks of domestic demand and to some extent permits a lower charge for domestic service. But is that a wise way of making gas cheaper when, in comparison with any substitute, gas is already a cheap fuel? The interstate sales contracts provide that at times when demand is so great that there is not enough gas to go around domestic users shall first be served. Should the operation of this preference await the day of actual shortage? Since the propriety of a preference seems conceded, should it not operate to prevent the coming of a shortage as well as to mitigate its effects? Should industrial use jeopardize tomorrow's service to householders any more than today's? If, however, it is decided to cheapen domestic use by resort to industrial sales, should they be limited to the few uses **314 for which gas has special values or extend also to those who use it only because it is cheaper than competitive fuels? [FN47](#) And how much cheaper should industrial*658 gas sell than domestic gas, and how much advantage should it have over competitive fuels? If industrial gas is to contribute at all to lowering domestic rates, should it not be made to contribute the very maximum of which it is capable, that is, should not its price be the highest at which the desired volume of sales can be realized?

[FN47](#) The Federal Power Commission has touched upon the problem of conservation in

connection with an application for a certificate permitting construction of a 1500-mile pipeline from southern Texas to New York City and says: 'The Natural Gas Act as presently drafted does not enable the Commission to treat fully the serious implications of such a problem. The question should be raised as to whether the proposed use of natural gas would not result in displacing a less valuable fuel and create hardships in the industry already supplying the market, while at the same time rapidly depleting the country's natural-gas reserves. Although, for a period of perhaps 20 years, the natural gas could be so priced as to appear to offer an apparent saving in fuel costs, this would mean simply that social costs which must eventually be paid had been ignored.

'Careful study of the entire problem may lead to the conclusion that use of natural gas should be restricted by functions rather than by areas. Thus, it is especially adapted to space and water heating in urban homes and other buildings and to the various industrial heat processes which require concentration of heat, flexibility of control, and uniformity of results. Industrial uses to which it appears particularly adapted include the treating and annealing of metals, the operation of kilns in the ceramic, cement, and lime industries, the manufacture of glass in its various forms, and use as a raw material in the chemical industry. General use of natural gas under boilers for the production of steam is, however, under most circumstances of very questionable social economy.' Twentieth Annual Report of the Federal Power Commission (1940) 79.

If I were to answer I should say that the household rate should be the lowest that can be fixed under commercial conditions that will conserve the supply for that use. The lowest probable rate for that purpose is not likely to speed exhaustion much, for it still will be high enough to induce economy, and use for that purpose has more nearly reached the saturation point. On the other hand the demand for industrial gas at present rates already appears to be increasing. To lower further the industrial rate is merely further to subsidize industrial consumption and speed depletion. The impact of the flat reduction *659 of rates ordered here admittedly will be to increase the industrial advantages of gas over competing fuels and to increase its use. I think this is not, and there is no finding by the Commission that it is, in the public interest.

There is no justification in this record for the present discrimination against domestic users of gas in favor of industrial users. It is one of the evils against which the Natural Gas Act was aimed by Congress and one of the evils complained of here by Cleveland and Akron. If

64 S.Ct. 281

51 P.U.R.(NS) 193, 320 U.S. 591, 64 S.Ct. 281, 88 L.Ed. 333

(Cite as: 51 P.U.R.(NS) 193, 64 S.Ct. 281)

Hope's revenues should be cut by some \$3,600,000 the whole reduction is owing to domestic users. If it be considered wise to raise part of Hope's revenues by industrial purpose sales, the utmost possible revenue should be raised from the least consumption of gas. If competitive relationships to other fuels will permit, the industrial price should be substantially advanced, not for the benefit of the Company, but the increased revenues from the advance should be applied to reduce domestic rates. For in my opinion the 'public interest' requires that the great volume of gas now being put to uneconomic industrial use should either be saved for its more important future domestic use or the present domestic user should have the full benefit of its exchange value in reducing his present rates.

Of course the Commission's power directly to regulate does not extend to the fixing of rates at which the local company shall sell to consumers. Nor is such power required to accomplish the purpose. As already pointed out, the very contract the Commission is altering classifies the gas according to the purposes for which it is to be resold and provides differentials between the two classifications. It would only be necessary for the Commission to order ****315** that all gas supplied under paragraph (a) of Hope's contract with the East Ohio Company shall be ***660** at a stated price fixed to give to domestic service the entire reduction herein and any further reductions that may prove possible by increasing industrial rates. It might further provide that gas delivered under paragraph (b) of the contract for industrial purposes to those industrial customers Hope has approved in writing shall be at such other figure as might be found consistent with the public interest as herein defined. It is too late in the day to contend that the authority of a regulatory commission does not extend to a consideration of public interests which it may not directly regulate and a conditioning of its orders for their protection. [Interstate Commerce Commission v. Railway Labor Executives Ass'n, 315 U.S. 373, 62 S.Ct. 717, 86 L.Ed. 904; United States v. Lowden, 308 U.S. 225, 60 S.Ct. 248, 84 L.Ed. 208.](#)

Whether the Commission will assert its apparently broad statutory authorization over prices and discriminations is, of course, its own affair, not ours. It is entitled to its own notion of the 'public interest' and its judgment of policy must prevail. However, where there is ground for thinking that views of this Court may have constrained the Commission to accept the rate-base method of decision and a particular single formula as 'all important' for a rate base, it is appropriate to make clear the reasons why I, at least, would not be so understood. The Commission is free to face up realistically to the nature and peculiarity of the resources in its control, to foster

their duration in fixing price, and to consider future interests in addition to those of investors and present consumers. If we return this case it may accept or decline the proffered freedom. This problem presents the Commission an unprecedented opportunity if it will boldly make sound economic considerations, instead of legal and accounting theories, the foundation of federal policy. I would return the case to the Commission and thereby be clearly quit of what now may appear to be some responsibility for perpetrating a shortsighted pattern of natural gas regulation.

U.S. 1944.

Supreme Court of the United States
 BLUEFIELD WATERWORKS & IMPROVEMENT
 CO.
 v.
 PUBLIC SERVICE COMMISSION OF WEST
 VIRGINIA et al.
 No. 256.

Argued January 22, 1923.
 Decided June 11, 1923.

In Error to the Supreme Court of Appeals of West Virginia.

Proceedings by the Bluefield Waterworks & Improvement Company against the Public Service Commission of the State of West Virginia and others to suspend and set aside an order of the Commission fixing rates. From a judgment of the Supreme Court of West Virginia, dismissing the petition, and denying the relief ([89 W. Va. 736, 110 S. E. 205](#)), the Waterworks Company bring error. Reversed.

(Formerly 106k394(6))

A proceeding in a state court attacking an order of a public service commission fixing rates, on the ground that the rates were confiscatory and the order void under the federal Constitution, is one where there is drawn in question the validity of authority exercised under the state, on the ground of repugnancy to the federal Constitution, and therefore is reviewable by writ of error.

****675 *680** Messrs. Alfred G. Fox and Jos. M. Sanders, both of Bluefield, W. Va., for plaintiff in error.
 Mr. Russell S. Ritz, of Bluefield, W. Va., for defendants in error.

***683** Mr. Justice BUTLER delivered the opinion of the Court.

Plaintiff in error is a corporation furnishing water to the city of Bluefield, W. Va., ****676** and its inhabitants. September 27, 1920, the Public Service Commission of the state, being authorized by statute to fix just and reasonable rates, made its order prescribing rates. In accordance with the laws of the state (section 16, c. 15-O, Code of West Virginia [sec. 651]), the company instituted proceedings in the Supreme Court of Appeals to suspend and set aside the order. The petition alleges that the order is repugnant to the Fourteenth Amendment, and deprives the company of its property without just

compensation and without due process of law, and denies it equal protection of the laws. A final judgment was entered, denying the company relief and dismissing its petition. The case is here on writ of error.

[\[1\]](#) 1. The city moves to dismiss the writ of error for the reason, as it asserts, that there was not drawn in question the validity of a statute or an authority exercised under the state, on the ground of repugnancy to the federal Constitution.

The validity of the order prescribing the rates was directly challenged on constitutional grounds, and it was held valid by the highest court of the state. The prescribing of rates is a legislative act. The commission is an instrumentality of the state, exercising delegated powers. Its order is of the same force as would be a like enactment by the Legislature. If, as alleged, the prescribed rates are confiscatory, the order is void. Plaintiff in error is entitled to bring the case here on writ of error and to have that question decided by this court. The motion to dismiss will be denied. See [*684 Oklahoma Natural Gas Co. v. Russell, 261 U. S. 290, 43 Sup. Ct. 353, 67 L. Ed. 659](#), decided March 5, 1923, and cases cited; also [Ohio Valley Co. v. Ben Avon Borough, 253 U. S. 287, 40 Sup. Ct. 527, 64 L. Ed. 908](#).

2. The commission fixed \$460,000 as the amount on which the company is entitled to a return. It found that under existing rates, assuming some increase of business, gross earnings for 1921 would be \$80,000 and operating expenses \$53,000 leaving \$27,000, the equivalent of 5.87 per cent., or 3.87 per cent. after deducting 2 per cent. allowed for depreciation. It held existing rates insufficient to the extent of 10,000. Its order allowed the company to add 16 per cent. to all bills, excepting those for public and private fire protection. The total of the bills so to be increased amounted to \$64,000; that is, 80 per cent. of the revenue was authorized to be increased 16 per cent., equal to an increase of 12.8 per cent. on the total, amounting to \$10,240.

As to value: The company claims that the value of the property is greatly in excess of \$460,000. Reference to the evidence is necessary. There was submitted to the commission evidence of value which it summarized substantially as follows:

a. Estimate by company's engineer

43 S.Ct. 675

Page 3

	Valley waterworks, water rights,.	
	and going value.	397,964 38
e.	Report of commission's statistician.	
	showing investment cost less.	
	depreciation.	365,445 13
f.	Commission's valuation, as fixed	
	in.	
	case No. 368 (\$360,000), plus	
	gross.	
	additions to capital since made.	
	(\$92,520.53).	452,520 53

*685 It was shown that the prices prevailing in 1920 were nearly double those in 1915 and pre-war time. The company did not claim value as high as its estimate of cost of construction in 1920. Its valuation engineer testified that in his opinion the value of the property was \$900,000—a figure between the cost of construction in 1920, less depreciation, and the cost of construction in 1915 and before the war, less depreciation.

As to 'a,' supra: The commission deducted \$204,000 from the estimate (details printed in the margin), [FNI](#) leaving approximately \$421,000, which it contrasted with the estimate of its own engineer, \$397,964.38 (see 'd,' supra). It found that there should be included \$25,000 for the Bluefield Valley waterworks plant in Virginia, 10 per cent. for going value, and \$10,000 for working capital. If these be added to \$421,000, there results \$500,600. This may be compared with the commission's final figure, \$460,000.

The commission's application of the evidence may be stated briefly as follows:

[FNI](#)

Difference in depreciation allowed.	\$ 49,000
Preliminary organization and development.	
cost.	14,500
Bluefield Valley waterworks plant.	25,000
Water rights.	50,000
Excess overhead costs.	39,000
Paving over mains.	28,500
	\$204,000

43 S.Ct. 675

Page 4

P.U.R. 1923D 11, 262 U.S. 679, 43 S.Ct. 675, 67 L.Ed. 1176
 (Cite as: P.U.R. 1923D 11, 43 S.Ct. 675)

***686** As to 'b' and 'c,' supra: These were given no weight by the commission in arriving at its final figure, \$460,000. It said:

'Applicant's plant was originally constructed more than twenty years ago, and has been added to from time to time as the progress and development of the community required. For this reason, it would be unfair to its consumers to use as a basis for present fair value the abnormal prices prevailing during the recent war period; but, when, as in this case, a part of the plant has been constructed or added to during that period, in fairness to the applicant, consideration must be given to the cost of such expenditures made to meet the demands of the public.'

****677** As to 'd,' supra: The commission, taking \$400,000 (round figures), added \$25,000 for Bluefield Valley waterworks plant in Virginia, 10 per cent. for going value, and \$10,000 for working capital, making \$477,500. This may be compared with its final figure, \$460,000.

As to 'e,' supra: The commission, on the report of its statistician, found gross investment to be \$500,402.53. Its engineer, applying the straight line method, found 19 per cent. depreciation. It applied 81 per cent. to gross investment and added 10 per cent. for going value and \$10,000 for working capital, producing \$455,500. [FN2](#) This may be compared with its final figure, \$460,000.

[FN2](#) As to 'e': \$365,445.13 represents investment cost less depreciation. The gross investment was found to be \$500,402.53, indicating a deduction on account of depreciation of \$134,957.40, about 27 per cent., as against 19 per cent. found by the commission's engineer.

As to 'f,' supra: It is necessary briefly to explain how this figure, \$452,520.53, was arrived at. Case No. 368 was a proceeding initiated by the application of the company for higher rates, April 24, 1915. The commission made a valuation as of January 1, 1915. There were presented two estimates of reproduction cost less depreciation, one by a valuation engineer engaged by the company, ***687** and the other by a valuation engineer engaged by the city, both 'using the same method.' An inventory made by the company's engineer was accepted as correct by the city and by the commission. The method 'was that generally employed by courts and commissions in arriving at the value of public utility properties under this method.' and in both estimates 'five year average unit prices' were applied. The estimate of the company's engineer was \$540,000 and of the city's engineer, \$392,000. The principal differences as given by the commission are shown in the margin. [FN3](#) The commission disregarded both estimates and arrived at \$360,000. It held that the best basis of valuation was the net investment, i. e., the total cost of the property less depreciation. It said:

[FN3](#)

		Company Engineer.	City Engineer.
1.	Preliminary costs.	\$14,455	\$1,000
2.	Water rights.	50,000	Nothing
3.	Cutting pavements over. mains.	27,744	233
4.	Pipe lines from gravity. springs.	22,072	15,442
5.	Laying cast iron street. mains.	19,252	15,212
6.	Reproducing Ada springs.	18,558	13,027
7.	Superintendence and engineering.	20,515	13,621
8.	General contingent cost.	16,415	5,448

since its organization, of \$407,882, and that there has been charged off for depreciation from year to year the total sum of \$83,445, leaving a net investment of

'The books of the company show a total gross investment,

43 S.Ct. 675

Page 5

P.U.R. 1923D 11, 262 U.S. 679, 43 S.Ct. 675, 67 L.Ed. 1176
(Cite as: P.U.R. 1923D 11, 43 S.Ct. 675)

\$324,427. * * * From an examination of the books * * * it appears that the records of the company have been remarkably well kept and preserved. It therefore seems that, when a plant is developed under these conditions, the net investment, which, of course, means the total gross investment less depreciation, is the very best basis of valuation for rate making purposes and that the other methods above referred to should *688 be used only when it is impossible to arrive at the true investment. Therefore, after making due allowance for capital necessary for the conduct of the business and considering the plant as a going concern, it is the opinion of the commission that the fair value for the purpose of determining reasonable and just rates in this case of the property of the applicant company, used by it in the public service of supplying water to the city of Bluefield and its citizens, is the sum of \$360,000, which sum is hereby fixed and determined by the commission to be the fair present value for the said purpose of determining the reasonable and just rates in this case.'

In its report in No. 368, the commission did not indicate the amounts respectively allowed for going value or working capital. If 10 per cent. be added for the former, and \$10,000 for the latter (as fixed by the commission in the present case), there is produced \$366,870, to be compared with \$360,000, found by the commission in its valuation as of January 1, 1915. To this it added \$92,520.53, expended since, producing \$452,520.53. This may be compared with its final figure, \$460,000.

The state Supreme Court of Appeals holds that the valuing of the property of a public utility corporation and prescribing rates are purely legislative acts, not subject to judicial review, except in so far as may be necessary to determine whether such rates are void on constitutional or other grounds, and that findings of fact by the commission based on evidence to support them will not be reviewed by the court. [City of Bluefield v. Waterworks](#), 81 W. Va. 201, 204, 94 S. E. 121; [Coal & Coke Co. v. Public Service Commission](#), 84 W. Va. 662, 678, 100 S. E. 557, 7 A. L. R. 108; [Charleston v. Public Service Commission](#), 86 W. Va. 536, 103 S. E. 673.

In this case ([89 W. Va. 736, 738, 110 S. E. 205, 206](#)) it said:

'From the written opinion of the commission we find that it ascertained the value of the petitioner's property for rate making [then quoting the commission] 'after *689 maturely and carefully considering the various methods presented for the ascertainment of fair value and giving such weight as seems proper to every element involved and all the facts and circumstances disclosed by the record.'

[2] [3] The record clearly shows that the commission, in arriving at its final figure, did not accord proper, if any, weight to the greatly enhanced costs of construction in 1920 over those prevailing about 1915 and before the war, as established by uncontradicted **678 evidence; and the company's detailed estimated cost of reproduction new, less depreciation, at 1920 prices, appears to have been wholly disregarded. This was erroneous. [Missouri ex rel. Southwestern Bell Telephone Co. v. Public Service Commission of Missouri](#), 262 U. S. 276, 43 Sup. Ct. 544, 67 L. Ed. 981, decided May 21, 1923. Plaintiff in error is entitled under the due process clause of the Fourteenth Amendment to the independent judgment of the court as to both law and facts. [Ohio Valley Co. v. Ben Avon Borough](#), 253 U. S. 287, 289, 40 Sup. Ct. 527, 64 L. Ed. 908, and cases cited.

We quote further from the court's opinion ([89 W. Va. 739, 740, 110 S. E. 206](#)):

'In our opinion the commission was justified by the law and by the facts in finding as a basis for rate making the sum of \$460,000.00. * * * In our case of [Coal & Coke Ry. Co. v. Conley](#), 67 W. Va. 129, it is said: 'It seems to be generally held that, in the absence of peculiar and extraordinary conditions, such as a more costly plant than the public service of the community requires, or the erection of a plant at an actual, though extravagant, cost, or the purchase of one at an exorbitant or inflated price, the actual amount of money invested is to be taken as the basis, and upon this a return must be allowed equivalent to that which is ordinarily received in the locality in which the business is done, upon capital invested in similar enterprises. In addition to this, consideration must be given to the nature of the investment, a higher rate *690 being regarded as justified by the risk incident to a hazardous investment.'

'That the original cost considered in connection with the history and growth of the utility and the value of the services rendered constitute the principal elements to be considered in connection with rate making, seems to be supported by nearly all the authorities.'

[4] The question in the case is whether the rates prescribed in the commission's order are confiscatory and therefore beyond legislative power. Rates which are not sufficient to yield a reasonable return on the value of the property used at the time it is being used to render the service are unjust, unreasonable and confiscatory, and their enforcement deprives the public utility company of its property in violation of the Fourteenth Amendment. This is so well settled by numerous decisions of this court that citation of the cases is scarcely necessary:

43 S.Ct. 675

Page 6

P.U.R. 1923D 11, 262 U.S. 679, 43 S.Ct. 675, 67 L.Ed. 1176
 (Cite as: P.U.R. 1923D 11, 43 S.Ct. 675)

'What the company is entitled to ask is a fair return upon the value of that which it employs for the public convenience.' [Smyth v. Ames \(1898\) 169 U. S. 467, 547, 18 Sup. Ct. 418, 434 \(42 L. Ed. 819\).](#)

'There must be a fair return upon the reasonable value of the property at the time it is being used for the public. * * * And we concur with the court below in holding that the value of the property is to be determined as of the time when the inquiry is made regarding the rates. If the property, which legally enters into the consideration of the question of rates, has increased in value since it was acquired, the company is entitled to the benefit of such increase.' [Willcox v. Consolidated Gas Co. \(1909\) 212 U. S. 19, 41, 52, 29 Sup. Ct. 192, 200 \(53 L. Ed. 382, 15 Ann. Cas. 1034, 48 L. R. A. \[N. S.\] 1134\).](#)

'The ascertainment of that value is not controlled by artificial rules. It is not a matter of formulas, but there must be a reasonable judgment having its basis in a proper consideration of all relevant facts.' [Minnesota Rate Cases \(1913\) 230 U. S. 352, 434, 33 Sup. Ct. 729, 754 \(57 L. Ed. 1511, 48 L. R. A. \[N. S.\] 1151, Ann. Cas. 1916A, 18\).](#)

*691 'And in order to ascertain that value, the original cost of construction, the amount expended in permanent improvements, the amount and market value of its bonds and stock, the present as compared with the original cost of construction, the probable earning capacity of the property under particular rates prescribed by statute, and the sum required to meet operating expenses, are all matters for consideration, and are to be given such weight as may be just and right in each case. We do not say that there may not be other matters to be regarded in estimating the value of the property.' [Smyth v. Ames, 169 U. S., 546, 547, 18 Sup. Ct. 434, 42 L. Ed. 819.](#)

* * * The making of a just return for the use of the property involves the recognition of its fair value if it be more than its cost. The property is held in private ownership and it is that property, and not the original cost of it, of which the owner may not be deprived without due process of law.'

[Minnesota Rate Cases, 230 U. S. 454, 33 Sup. Ct. 762, 57 L. Ed. 1511, 48 L. R. A. \(N. S.\) 1151, Ann. Cas. 1916A, 18.](#)

In Missouri ex rel. Southwestern Bell Telephone Co., v. Public Service Commission of Missouri, supra, applying the principles of the cases above cited and others, this court said:

'Obviously, the commission undertook to value the property without according any weight to the greatly enhanced costs of material, labor, supplies, etc., over those prevailing in 1913, 1914, and 1916. As matter of common knowledge, these increases were large. Competent witnesses estimated them as 45 to 50 per

centum. * * * It is impossible to ascertain what will amount to a fair return upon properties devoted to public service, without giving consideration to the cost of labor, supplies, etc., at the time the investigation is made. An honest and intelligent forecast of probable future values, made upon a view of all the relevant circumstances, is essential. If the highly important element of present costs is wholly disregarded, such a forecast becomes impossible. Estimates for to-morrow cannot ignore prices of to-day.'

[5] *692 It is clear that the court also failed to give proper consideration to the higher cost of construction in 1920 over that in 1915 and before the war, and failed to give weight to cost of reproduction less depreciation on the basis of 1920 prices, or to the testimony of the company's valuation engineer, based on present and past costs of construction, that the property in his opinion, was worth \$900,000. The final figure, \$460,000, was arrived *679 at substantially on the basis of actual cost, less depreciation, plus 10 per cent. for going value and \$10,000 for working capital. This resulted in a valuation considerably and materially less than would have been reached by a fair and just consideration of all the facts. The valuation cannot be sustained. Other objections to the valuation need not be considered.

3. Rate of return: The state commission found that the company's net annual income should be approximately \$37,000, in order to enable it to earn 8 per cent. for return and depreciation upon the value of its property as fixed by it. Deducting 2 per cent. for depreciation, there remains 6 per cent. on \$460,000, amounting to \$27,600 for return. This was approved by the state court.

[6] The company contends that the rate of return is too low and confiscatory. What annual rate will constitute just compensation depends upon many circumstances, and must be determined by the exercise of a fair and enlightened judgment, having regard to all relevant facts. A public utility is entitled to such rates as will permit it to earn a return on the value of the property which it employs for the convenience of the public equal to that generally being made at the same time and in the same general part of the country on investments in other business undertakings which are attended by corresponding, risks and uncertainties; but it has no constitutional right to profits such as are realized or anticipated in *693 highly profitable enterprises or speculative ventures. The return should be reasonably sufficient to assure confidence in the financial soundness of the utility and should be adequate, under efficient and economical management, to maintain and support its credit and enable it to raise the money necessary for the proper discharge of its public duties. A

43 S.Ct. 675

Page 7

P.U.R. 1923D 11, 262 U.S. 679, 43 S.Ct. 675, 67 L.Ed. 1176
(Cite as: P.U.R. 1923D 11, 43 S.Ct. 675)

rate of return may be reasonable at one time and become too high or too low by changes affecting opportunities for investment, the money market and business conditions generally.

In 1909, this court, in [Willcox v. Consolidated Gas Co.](#), [212 U. S. 19](#), 48-50, [29 Sup. Ct. 192](#), [53 L. Ed. 382](#), [15 Ann. Cas. 1034](#), [48 L. R. A. \(N. S.\) 1134](#), held that the question whether a rate yields such a return as not to be confiscatory depends upon circumstances, locality and risk, and that no proper rate can be established for all cases; and that, under the circumstances of that case, 6 per cent. was a fair return on the value of the property employed in supplying gas to the city of New York, and that a rate yielding that return was not confiscatory. In that case the investment was held to be safe, returns certain and risk reduced almost to a minimum-as nearly a safe and secure investment as could be imagined in regard to any private manufacturing enterprise.

In 1912, in [Cedar Rapids Gas Co. v. Cedar Rapids](#), [223 U. S. 655](#), [670](#), [32 Sup. Ct. 389](#), [56 L. Ed. 594](#), this court declined to reverse the state court where the value of the plant considerably exceeded its cost, and the estimated return was over 6 per cent.

In 1915, in [Des Moines Gas Co. v. Des Moines](#), [238 U. S. 153](#), [172](#), [35 Sup. Ct. 811](#), [59 L. Ed. 1244](#), this court declined to reverse the United States District Court in refusing an injunction upon the conclusion reached that a return of 6 per cent. per annum upon the value would not be confiscatory.

In 1919, this court in [Lincoln Gas Co. v. Lincoln](#), [250 U. S. 256](#), [268](#), [39 Sup. Ct. 454](#), [458](#) (63 L. Ed. 968), declined on the facts of that case to approve a finding that no rate yielding as much as 6 per cent. *694 on the invested capital could be regarded as confiscatory. Speaking for the court, Mr. Justice Pitney said:

'It is a matter of common knowledge that, owing principally to the World War, the costs of labor and supplies of every kind have greatly advanced since the ordinance was adopted, and largely since this cause was last heard in the court below. And it is equally well known that annual returns upon capital and enterprise the world over have materially increased, so that what would have been a proper rate of return for capital invested in gas plants and similar public utilities a few years ago furnishes no safe criterion for the present or for the future.'

In 1921, in [Brush Electric Co. v. Galveston](#), the United States District Court held 8 per cent. a fair rate of return. ^{FN4}

^{FN4} This case was affirmed by this court June 4, 1923, [262 U. S. 443](#), [43 Sup. Ct. 606](#), [67 L. Ed. 1076](#).

In [January, 1923, in City of Minneapolis v. Rand, the Circuit Court of Appeals of the Eighth Circuit \(285 Fed. 818, 830\)](#) sustained, as against the attack of the city on the ground that it was excessive, 7 1/2 per cent., found by a special master and approved by the District Court as a fair and reasonable return on the capital investment-the value of the property.

[7] Investors take into account the result of past operations, especially in recent years, when determining the terms upon which they will invest in such an undertaking. Low, uncertain, or irregular income makes for low prices for the securities of the utility and higher rates of interest to be demanded by investors. The fact that the company may not insist as a matter of constitutional right that past losses be made up by rates to be applied in the present and future tends to weaken credit, and the fact that the utility is protected against being compelled to serve for confiscatory rates tends to support it. In *695 this case the record shows that the rate of return has been low through a long period up to the time of the inquiry by the commission here involved. For example, the average rate of return on the total cost of the property from 1895 to 1915, inclusive, was less than 5 per cent.; from 1911 to 1915, inclusive, about 4.4 per cent., without allowance for depreciation. In 1919 the net operating income was approximately \$24,700, leaving \$15,500, approximately, or 3.4 per cent. on \$460,000 fixed by the commission, after deducting 2 per cent. for depreciation. In 1920, the net operating income was approximately \$25,465, leaving \$16,265 for return, after allowing for depreciation. Under the facts and circumstances indicated by the record, we think that a rate of return of 6 per cent. upon the value of the property is substantially too low to constitute just compensation for the use of the property employed to render the service.

The judgment of the Supreme Court of Appeals of West Virginia is reversed.

Mr. Justice BRANDEIS concurs in the judgment of reversal, for the reasons stated by him in [Missouri ex rel. Southwestern Bell Telephone Co. v. Public Service Commission of Missouri](#), *supra*.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

55. Please refer to Exhibit 1 to the testimony of Shelley W. Porter, and also Exhibit 11 to the Application filed herein:

Response:

KAW has conferred with counsel for LFUCG and it was agreed that a response to this question is not required.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Charles Rea

56. Please refer to the testimony of Constance F. Heppenstall in Case No. 2018 00358 dated November 28, 2018, and the testimony of Charles B. Rea in the case at hand, No. 2023-00191:
- (a) Explain in detail how and why the sum of the monthly costs for a 5/8-inch meter increased from \$15.00 to \$20.00, a 33% increase.
 - (b) Did you use any different methodology in preparing your cost-of-service study than was used in preparing the cost-of-service study prepared by Constance F. Heppenstall, referenced above?

Response:

- (a) The Company's proposal in this proceeding is to increase each component of rates (fixed charges and volumetric charges alike) by approximately the same percentage increase which results in a proposed increase in the 5/8-inch meter charge from \$15.00 to \$20.00. The cost of service study in this case calculates the 5/8" meter charge at \$18.00.
- (b) There is one significant change in cost-of-service methodology employed by the Company in this proceeding compared to the methodology utilized in the last rate case. This change relates to the allocation of revenue requirement to cost categories. Previously, the consultant sponsoring the cost-of-service studies allocated account balances directly to customer class using an appropriate class allocation methodology. In the current cost-of-service study, revenue requirement and account balances are first allocated to cost categories. Once a revenue requirement for each cost category is determined, the cost category revenue requirement is then allocated to customer class using a single allocation methodology for each cost category. The Company is making this change because this two-step approach simplifies the cost-of-service analysis and makes the resulting allocation to customer class more intuitive and enables the Company to answer questions like the one posed in KAW_R_LFUCGDR1_NUM019_081823. This approach unbundles revenue requirement into business functions and allows stakeholders to see what the cost of service is for each customer class by business function.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

57. Please provide the authority to support KAWC's position that all fire hydrants are only billed a demand charge.

Response:

For the purposes of this data request, Mr. Rea interprets demand charge to mean a monthly fixed charge. The Company has not changed rate design in this proceeding. Proposed rates for public fire hydrants, which are billed on a fixed monthly charge basis, are consistent with the current Commission-approved rate design.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

58. Who made the decision to increase the demand charges on public fire hydrants a greater percentage than private fire hydrants and when was that decision made?

Response:

The Company determined the proposed increase to the demand charges during its preparation of the rate case filing. Exhibit 37, Schedule M-3 shows that the percentage increase for private fire hydrants is 36.22% and the percentage increase for public fire hydrants is 35.52%. The percentage increase are comparable.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

59. Please state why the increase in rates for Public Authorities exceeded the system's average proposed increase by 41.3%? In answering this DR, please refer to the specific pages and exhibits of the Cost of Service study.

Response:

The Cost of Service study indicates that a significant increase above the overall increase requested in this case is justified for the Other Public Authorities Class. Proposed rates in this case, however, reflect class increases that are approximately equal (across-the-board). Exhibit 37, Schedule M-3 shows increases for meter charges for the Municipal & Other Public Authorities Class of approximately 33% and the increase in the volumetric rate is 35.90%.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Patrick Baryenbruch

60. Refer to the testimony of Patrick Baryenbruch at 8, line 3. Did Mr. Baryenbruch compare KAWCs cost-per-customer for its Service Company in relation to any other water utilities? If not, why not?

Response:

No, Mr. Baryenbruch does not compare service company charges to water utility affiliates in his cost comparison because there is no publicly available source of data for water service companies. Few water companies have a centralized service company arrangement. Those that do are not overseen by a single regulatory authority that requires standard informational filings as does the FERC for the electric utility industry. If a similar source existed for water service companies, Mr. Baryenbruch would have included them in his cost-per-customer comparison.

Mr. Baryenbruch does make a comparison of KAW's total expenses, including charges from the Service Company, to the total costs of other Kentucky water companies. From the viewpoint of customers, the metric of total utility O&M expenses per customer provides a more definitive comparison because it is reflective of the amount on their bill. In Chapter V of his report (pages 13-16), Mr. Baryenbruch presents the results of this comparison. KAW has the second lowest total O&M expenses per customer among the comparison group of Kentucky water companies.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Patrick Baryenbruch

61. Refer to the testimony of Patrick Baryenbruch and the related study. Explain how Mr. Baryenbruch can verify that the services provided by comparison utilities' Services Companies are similar to the services provided by American Water's Service Company?

Response:

A&G Services Are Similar Across Utility Types

Most test year Service Company charges to KAWC are for administrative and general (A&G)-related services. These are the expenses that are benchmarked by Mr. Baryenbruch. His experience has shown that A&G services involve similar processes across different types of utilities. A&G functions include the following:

- Accounting
- Audit
- Business Development
- Communications
- Customer Service
- Engineering
- External Affairs
- Finance
- Human Resources
- Information Technology
- Legal
- Management
- Operations
- Rates and Regulatory
- Supply Chain
- Water Quality

Utility service companies provide these services in a similar way and, therefore, valid cost comparisons can be made across utility industry types.

Take, for instance, accounting services. Regardless of utility type, the work of accountants revolves around their assigned set of general ledger accounts; they ensure transactions have been processed and properly posted to their accounts, reconcile accounts to subsidiary ledgers, prepare journal entries, compile budget versus actual data, research variances and

prepare cost performance reports for operating managers. These activities take place in water utilities in the same way as in electric utilities.

Investor-owned utilities of any type have similar processes for tax accounting and compliance. They all must deal with federal and state income, property, sales and use taxes. In general, tax personnel are responsible for determining tax provisions and preparing and filing various tax returns.

Information technology services cover a broad range of activities that are also generally quite similar among utilities. Employees are provided with workstations, email, Microsoft Office, phone service, internet connections and access to financial, human resources and various other corporate applications. Many of the same applications are used by different utilities. For example, American Water uses the enterprise resource planning system called SAP. His electric utility clients Dominion Energy and Southern California Edison use the same system. Another similar system is PowerPlant, a project and asset accounting system used by American Water and by his electric utility client Duke Energy.

Information technology hardware and software are operated and maintained in the same way regardless of utility type. Application systems run on the utility's own data center or on a cloud service provider. They are operated and maintained by the utility's IT organization or by an outside service provider. Thus, American Water's data center provides the same type of services as the data centers of electric service companies.

The processes and activities associated with delivering other A&G services, such as legal, procurement, human resources, customer services and executive management are likewise similar among different types of utilities.

Similar A&G-Related Business Applications

Business applications drive A&G business processes (e.g., work steps, review/approvals, reporting). The similarity of A&G work is evidenced by the fact that the same business applications are used across utility types. For instance, American Water uses the SAP application referred to above as its enterprise resource planning (ERP) system to support finance, accounting, tax, financial planning and analysis, internal audit and procurement functions. SAP is also the ERP system used by Mr. Baryenbruch's electric utility clients Dominion Energy and SCE Corporation. Human resource functions for utilities can also be managed by the same applications from vendors such as Oracle, SAP and Peoplesoft. Systems used to run IT services (e.g., asset management, development, production, help desk, security) are likewise similar across utility types.

These applications have built-in workflows that standardize business processes for A&G functions. This further demonstrates that the nature of A&G services and the way they are managed and delivered are similar across utility types.

Mr. Baryenbruch's Professional Experience

Mr. Baryenbruch has provided professional services to the utility industry during his 45+-year career in public accounting and management consulting. This provides him with a

thorough understanding of the industry's structure, organization, operations and business processes. Mr. Baryenbruch's clients have included water, electric, gas and telephone companies.

For 10 years of his career, he was a member of a client utility's project management organization (PMO), acting as a project manager or member of the project management team for 20 large IT systems projects for a utility client's business applications involving more than 800,000 hours of work from hundreds of client employees and outside contractors. These assignments provided him with a deep understanding of A&G services and the associated business processes that are involved in delivering those services.

He helped Duke Energy manage its implementation of Sarbanes-Oxley 404, a project that involved the work of hundreds of employees and outside consultants. He later assisted Duke Energy with its mergers with Cinergy and Progress Energy, helping to manage the integration of the companies' financial systems, charts of accounts and business processes.

Of the 22 utility holding companies in his service company comparison group, 15 (AEP, Aliant, Avangrid, CenterPoint, Dominion, Duke Energy, Entergy, Eversource, Exelon, First Energy, National Grid, NiSource, PPL Energy, Southern Company, WE) have been clients over the course of his career.

This extensive utility industry experience provides Mr. Baryenbruch with the basis for determining that the cost of A&G services can be validly compared across different utility types.

Conclusion

For all these reasons, Mr. Baryenbruch believes his cost comparison provides a valid and useful way to put into perspective the A&G-related charges from American Water's service company compared to the cost of other utility service companies.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Patrick Baryenbruch

62. Refer to the testimony of Patrick Baryenbruch and page 7 of his study. Why would it be difficult for KAWC to find local service providers with the same specialized experience?

Response:

The Service Company provides KAWC and its affiliates with a wide range of services, including the following:

- Accounting
- Audit
- Business Development
- Communications
- Customer Service
- Engineering
- External Affairs
- Finance
- Human Resources
- Information Technology
- Legal
- Management
- Operations
- Rates and Regulatory
- Supply Chain
- Water Quality

These services are delivered by approximately 1,200 Service Company employees dedicated exclusively to providing services to American Water companies. With a staff this size, employees can specialize and become functional experts. The water industry is the single focus of the Service Company's support services, which develops the staff's relevant knowledge.

The size of the Service Company and its scope of operations have allowed it to assemble a uniquely qualified group of professionals. The Service Company, in effect, acts as a platform for sharing extensive knowledge, expertise, experience and best practices across the American Water system to the benefit of all American Water's state-regulated utilities and their customers.

Local service providers do not have the scale of the Service Company. They cannot individually provide the entire set of support services. That means multiple local providers would be required if an individual American Water operating utility were to outsource Service Company services to local providers. The administration of the associated contracts and management of local providers' work would add to the operating utility's costs of service.

Most local service providers do not focus exclusively on the water industry. Thus, their staff will likely not have the same depth of industry knowledge.

Most local service providers have multiple clients that require their attention. The Service Company essentially has only one—American Water's water business. The Service Company staff is organized to specifically support that business. The staff of outside providers often support multiple clients at one time. This can lead to resource contention that compromises client service levels. When it comes to the impacts of staff turnover, continuity of service is more secure with a larger organization like the Service Company compared to smaller local providers.

Besides these staffing arguments, there are economic and logistical considerations that weigh in favor of the Service Company.

The Service Company provides services and expertise of its staff at cost. Local outside providers have an incentive to maximize their net income.

KAWC benefits from the size of American Water, which provides significant purchasing power compared to that of an individual operating company. As a result, American Water can secure discounts on outside services, equipment and supplies. In this way, Kentucky-American achieves cost savings that it could not otherwise obtain through local service providers.

Other Service Company services, such as the following, directly benefit KAWC:

- Customer Service – Facilitates economies of scale and improved service levels.
- Field Resource Coordination Services – Allows operating utilities to focus their resources more efficiently.
- Belleville Lab – Offers testing at cost by qualified analysts
- Human Resources – Realizes economies through having centralized payroll and benefits

The American Water enterprise runs the same business applications. This means there is a single source of data necessary to run the business. Every American Water department can access, record, update, query and report off this single source of information. Local providers of certain Service Company services would need some access to American Water's business applications. Outside providers of, say, accounting services would either need to enter information (e.g. journal entries) directly into American Water's SAP system or would have to create data files on their own system and send it to American Water for uploading. A third-party entering data directly into SAP could present IT security issues. Uploading files created by a third party would also present a considerable security risk. In either case, American Water

would have to establish new processes for validating and accepting data from local providers. This would ultimately add to customers' cost of service.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

63. Explain whether KAWC provides any relief to a customer who proves that a water leak occurs on a line downstream of the meter but on a section of a line outside of the customer's control. For example, would KAWC provide relief to an apartment-complex tenant who is a customer if the leak is proven to be on a section of water line downstream of the meter but in the common area of the apartment complex.

Response:

KAWC has a formal policy for hidden leak adjustments, included in the current tariff at P.S.C No. 9 - First Sheet No. 44. A customer that demonstrates a hidden leak on their line impacted their usage and can provide the qualifying evidence of a completed repair is eligible for a leak adjustment subject to the guidelines of the policy.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Jeffrey Newcomb

64. Refer to paragraph 21 of the Application. Identify how KAWC determined \$28 is reasonable for the monthly opt-out fee for AMI metering.

Response:

Please see Kentucky-American's response to PSC 2-18.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell and David M. Hill

65. State whether the AMI metering proposed by KAWC will have the capability to shut off and restore water service from a remote location.

Response:

The proposed solution currently does not have the capability to completely shut off water service from a remote location. The capability to completely shut off water service is being evaluated by the manufacturer; however, there is no public timeline for this capability.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

66. If AMI metering is approved, state whether KAWC anticipates recovering salvage value for the meters that are replaced?

Response:

To the extent that brass meters may be retired, some salvage value may be obtained.

In the forecasted test year, approximately 35,000 of the meters planned for retirement are composite meters, and the Company would not anticipate salvage value from these. The remaining meters are primarily brass and these could have some salvage value.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

67. Refer to Application Exhibit A at page 3, where it states that “meter and endpoint replacements in the normal course of business.” Confirm that KAWC’s normal course of business is to replace meters and their endpoints as the meters reach their testing limit, which is every 15 years for a 5/8” meter.

Response:

Please see the section of Application Exhibit A titled “KAWC’s Schedule Periodic Meter Replacement Program”, found on pages 10-13 of that exhibit. Within that section, please also refer to Figure 3 on page 10, which summarizes the various practices for meter testing and replacement, which vary by meter size. The paragraph that immediately follows Figure 3 discusses the going forward plan for scheduled periodic replacement of 5/8” meters.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell and Shelley Porter

68. Approximately how many meters would KAWC replace in the years 2024-2028 if it were to maintain its current practice of replacing meters and their endpoints as the meters reach their testing limit, which is every 15 years for a 5/8" meter.

Response:

The following table shows the quantity of meter replacements that would be scheduled for 2024-2028 if the Company maintained a practice of replacing 5/8" meters every 15 years.

Please note that what this table does not show is how many meters would need to be replaced on an unscheduled break / fix basis if the aging meter stock was not removed more promptly. Unscheduled replacements have been between 4,000 and 7,000 per year in the last several years, and the Company is aiming for a more proactive approach.

Meter Size	Scheduled Replacement					
	Year	2024	2025	2026	2027	2028
2" & below						
1" Water Meter Size		54	52	443	534	567
1-1/2" Water Meter Size		3		3	13	1
2" Water Meter Size		44	4	41	50	42
5/8" Water Meter Size		2319	4037	24908	21067	18471
Grand Total		2420	4093	25395	21664	19081

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

69. Identify the number of meters that have been replaced for each calendar year since 2009.

Response:

Data is not available prior to 2013. The number of meters replaced annually since 2013 is shown below.

Replacement Year	Meters
2013	1,638
2014	3,002
2015	2,546
2016	2,428
2017	3,575
2018	15,381
2019	9,986
2020	6,473
2021	5,613
2022	5,747
2023	13,180
Total	69,569

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell and William A. Lewis

70. Refer to Application Exhibit A at page 10, where it states, "KAWC has observed an increase in meter reading challenges."
- (a) Please explain what meter reading challenges KAWC has observed and state approximate dates when these challenges began.
 - (b) Provide all reports, memorandum, and other documentation detailing these meter reading challenges. Include within your response KAWC's "analysis of that vintage of meters' performance," referenced on page 40 of Mr. Lewis's testimony.

Response:

- a. KAWC uses a metric called "consecutive estimates" to help measure meter reading success. Consecutive estimates count instances each month when the normal periodic read order did not obtain a successful result.

In the early months of 2018, KAWC's consecutive estimate performance indicator was higher than desired, at 3,300-4,800 per month (out of 135,000 to 141,000 attempted reads per month). Extensive work was done to bring this down, primarily through meter replacement, and consecutive estimates then remained at or below 1,000 per month until early 2021, when these began to trend upward again.

Meter reading challenges can relate to a failure to obtain a radio or manual read in the field, due to causes including: broken equipment (either the meter, meter interface unit ("MIU") or reading device), obstruction of the radio signal, obstruction to the meter, or inclement weather. Meter reading challenges can also relate to reads obtained in the field which are not usable due to alphanumeric codes or disqualifying error codes in the data received.

- b. The Commission is aware of the meter reading challenges and opened an investigation case (Case No. 2022-00299) to investigate those challenges in September 2022. After extensive discovery, the case went to hearing on June 8, 2023. A decision has not been made. For the documents responsive to this question, please see the record of that case.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell and Shelley Porter

71. Refer to Application Exhibit A at page 11, where it indicates that KAWC proposes to replace approximately 42,000 meters in 2024 and approximately 18,000 meters in 2025. State how many meters the expenses of which are included in this rate case for the test year of February 1, 2024 to January 31, 2025.

Response:

The revenue requirement in this case reflects the costs of all meters in the KAW system, which is approximately 142,000. That said, this question references Exhibit A to the application, so KAW presumes the question is intended to refer to the AMI-enabled meters that would be installed by the end of the test year if the CPCN were approved. There are approximately 43,700 of these.

KAW's revenue requirement uses a 13-month average rate base and forecasted monthly depreciation expense for the test period. Because the meters are not all in service at the beginning of the test year, but rather will be installed over the course of the year, their annual costs are partially captured through this methodology.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell and Shelley Porter

72. Regarding KAWC's existing Automated Meter Reading ("AMR") equipment,
- (a) Explain when KAWC began using AMR equipment.
 - (b) Explain how long it took KAWC to deploy AMR equipment throughout its system.
 - (c) State whether KAWC received a certificate of public convenience and necessity for deployment of its AMR equipment. If so, identify the PSC Case Number in which approval was sought.

Response:

a & b. In Case No. 2016-00394, the Company's response to PSC 2-6 indicated that "[t]he implementation of AMR began in 1998." In Case 2012-00520, KAWC witness Keith Cartier testified that "at the end of 2012, KAW will have AMR meters installed at approximately 82% of metering locations, and expects to be at or near 100% by the end of 2013." Additionally, in Case No. 2016-00394, Petition p. 3 stated that "[a]ll meters in KAW system are [AMR] meters that are read using drive-by technology or manually read in the event of an issue with the AMR technology". Based on these statements, KAWC began using AMR in 1998, expected to have it fully deployed by 2013, and reported that it was fully deployed in 2016.

c. The Commission appears to have first addressed AMR for the Company when it assessed the rate recovery of an AMR Study that analyzed the costs/benefits of AMR. In the Commission's September 29, 1997 Order (pp. 3-4) on rehearing in Case No. 95-554, the Commission authorized the inclusion of AMR study costs in KAWC's rate base based on the following findings: (1) KAWC performed the AMR Study in response to a recommendation in a Commission-mandated management audit; (2) KAWC provided sufficient evidence to show that the AMR Study benefitted ratepayers by postponing a capital project that is not currently cost beneficial; and (3) a periodical AMR Study review will be performed due to KAWC's intent to implement the AMR program as soon as the benefits outweigh the costs. The Commission stated: "**Thus, there is no doubt that the AMR program will be implemented at some time in the future.**" (Emphasis added). In its September 30, 1997 Order (pp. 17-18) in Case No. 97-034, the Commission reaffirmed the findings from Case No. 95-554 and stated it would "therefore include the unamortized AMR Study costs in rate base." There was not a separate proceeding, beyond these, for a Certificate of Public Convenience and Necessity.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: David Hill

73. Will KAWC generate revenue through the sale to a third party of data obtained through the AMI program? If so, how much revenue does KAWC anticipate receiving through such a sale?

Response:

No.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: David Hill

74. Regarding American Water affiliates who have deployed or sought approval for deploying AMI equipment,
- (a) Identify each American Water affiliate who has deployed AMI equipment and the approximate percentage of deployment through its system.
 - (b) Identify each American Water affiliate who has sought regulatory approval for AMI deployment and was denied approval by the regulatory agency.

Response:

A. Please see table below:

AMI Population

State	AMI Meters	Total Meters	AMI %
Bluefield Valley Water Wo	175	175	100.00%
California-American Water	9,530	167,203	5.70%
Illinois-American Water C	75,084	315,152	23.82%
Indiana-American Water Co	29,781	350,355	8.50%
Iowa-American Water Compa	6,196	69,456	8.92%
Kentucky-American Water C	285	142,995	0.20%
Maryland-American Water C	0	4,443	0.00%
Missouri-American Water C	369,964	487,879	75.83%
New Jersey-American Water	345,950	679,793	50.89%
Pennsylvania-American Wat	219,805	704,651	31.19%
Tennessee-American Water	358	86,640	0.41%
Virginia-American Water C	16,687	62,954	26.51%
West Virginia-American Wa	49,246	188,938	26.06%

- B. California American Water Company's ("Cal-Am") 2016 General Rate Case Application (Application 16-07-002) included a request for authority to implement an AMI system. The request was not granted (see Decision 18-12-021, which is publicly available at the California Public Utilities Commission website: <https://docs.cpuc.ca.gov/PublishedDocs/Published/G000/M252/K251/252251101.pdf>).

Cal-Am 2019 General Rate Case Application (Application 19-07-004) included a new request for approval to implement an AMI system, which was granted (see Decision 21-11-018, which is publicly available at the California Public Utilities Commission website: <https://docs.cpuc.ca.gov/PublishedDocs/Published/G000/M425/K808/425808218.PDF>).

CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Dave Hill

75. Provide all reports, studies, or analysis performed by American Water regarding AMI equipment.

Response:

This question is overly broad with undefined terms and time periods. Having said that, in an effort to be as responsive as reasonably possible, the Company has made a reasonable interpretation and has conducted due diligence to find reports, studies or analysis on AMI equipment from the last five years. Please see the following attachment:

KAW_R_LFUCGDR1_NUM075_081823 – Attachment 1: This document reviews AMI equipment strategies, including guidance for many best practices that KAWC is proposing, including the use of cellular rather than fixed network technology, the pairing of same-vendor meters and endpoints, brand specific recommendations on cellular products and the installation of composite lids.

Please also see responses to other discovery that have a relationship to AMI equipment analysis:

- Please see PSC 2-12, Attachment 2 – Propagation Study which shows estimated quantities of fixed network equipment required depending on coverage and location of collectors.
- Please see PSC 2-12, Attachment 3- Ops Matrix for some contrasting analysis of equipment options
- Please see PSC 2-11, Attachments 1 through 4: These documents are from the RFP process to select metering equipment.

Meter Operations AMI Strategy

AMI is not a single technology, but an integration of many technologies that provides an intelligent connection between customers and the water utility.

Continuing to provide safe, clean and reliable water to our customers We will make smart, data-driven decisions and leverage technology to provide solutions that improve the quality and the reliability of water service to our customers.

WE KEEP LIFE FLOWING™

Objectives/Agenda

1

Current State

2

AMI Overview / Education

3

AMI Stratgey / Recommendations

4

Supporting AMI & Next Steps

Current Challenges

- 1 Do not have full visibility of AMI data for our current AMI meters. No Visibility of interval reads to our customers. Alert and Alarm data not utilized properly.
- 2 Rely heavily on Fathom to get billable AMI reads for customer billing.
- 3 Every state manages their own AMI data. They do manual processing for reports and alarms. This requires a lot of manual steps, data extraction from different systems and is not a very efficient process..
- 4 Rolling trucks for move-in/move-outs, account changes, meter changes, etc..

AMI vs AMR

American Water – Current State

AMR Meters = 2,790,473

AMI Meters = 427,440

What is the difference?

AMI – Advanced Metering Infrastructure

The Power of Interval Data

Register – read showing total consumption over time

Interval – read showing usage at specific time

Key Points

1

AMI may not be for everyone. Key considerations to be evaluated at the district level include topography, customer density, NRW opportunity, meter reading costs and Meter/MIU strategy.

2

AMI offers significant benefits for both the utility and their customers. The key to unlocking these benefits lies in the data AMI delivers. Thus, the ability to analyze and identify patterns in the data is a critical piece of the overall investment.

3

Cost drivers are shifting as meter manufacturers now offer a dual purpose, “migratable” radio that can be read by either AMR or AMI. This has the potential to significantly reduce the cost of AMI deployment and consequently make the business case more attractive to a much broader segment of AW districts.

4

Several districts have already initiated or are planning AMI deployments. Corporate technology, integration, and funding decisions are critical to enabling and realizing the long term benefits.

There are two types of AMI systems:

- **Fixed-Network Systems** – With AMI fixed-network systems, meter reading is accomplished by meter transmission units (MTUs) installed on each meter. The MTUs collect real-time water use readings from the meter and transmit them via radio signals to data collection units (DCUs) that are owned by the utility.
 - **Cellular-Network Systems** – AMI cellular-network systems utilize cellular endpoints installed on each meter to transmit the meter data via an existing cellular infrastructure to a central database system (hosted or on-premise) for analysis and reporting.
- 

Components of an AMI System:

There are four components to an AMI system:

- 1) A Smart Meter
- 2) Communications Module
- 3) Collectors and Head End Systems
- 4) Meter Data Management System

ADVANCED METERING INFRASTRUCTURE

- THE BENEFITS OF AMI**
- Leak Notifications
 - Informed Decisions on Water Usage
 - Water Conservation
 - Improved Billing Accuracy
 - Increased Safety for Employees

Let me check the latest data from your meter so we can pinpoint the problem and get it resolved quickly.

I got a text that I have a leak.

SMART WATER METERS

A smart water meter combined with a communications module can transmit water usage in real time — a typical AMI system tracks water usage every hour. Smart meters can also detect continuous usage or expected leaks, and detect attempts to tamper with the meter.

DATA IS SENT TO THE CLOUD

The data is sent to a Head End System via a cellular signal. The Head End System directly interfaces with our Meter Data Management (MDM) and billing system providing highly accurate bills.

LEAK DETECTION ALERTS

Because they are transmitting data on a regular basis, smart meters are able to send alerts when a leak is suspected. This data is received by our MDM and can be sent to customers via text automatically before the problem becomes too serious.

FIELD SERVICE REPRESENTATIVES (FSR) RETRIEVE DATA ON DEMAND

Our FSRs are able to view real-time data on their tablets and better assist customers using the most current information.

AMI Value Proposition

Operational Benefits

- Reduction in Non Revenue Water
- Meter Reading Automation
- Operational Efficiencies in Field & Meter Services
- Operational Efficiencies in Billing & Customer Management
- Improvement in Capital Spend Efficiency

Customer Benefits

- Enhanced Customer Service & Convenience
- Billing Accuracy Improvement
- High Use & Continuous Flow Notifications
- Informed Decisions on Water Usage
- Near Real Time Access to Account Information
- Comparative Analysis, Conservation and Bill-Reducing Tips

Additional Benefits

- Increased Safety for Meter Readers & Field Services Personnel
- Environmental Benefits
- Water Conservation
- Backflow Prevention
- AMI presents an opportunity to have employees who are dedicated to meter readings or are focused on customer service tasks that will be reduced, refocus their efforts on tasks that improve our responsiveness to and the overall experience of our customers.

Improved Water Resource Management

What is Meter Data Management System

- ✓ A system that imports data to

- Validate
- Estimate
- Edit (cleanse)

- ✓ Then process to make it available for

- Billing
- Other analysis

- ✓ MDMS objectives

- VEE
- Normalization of Actionable Data
- Push high priority alerts to data warehouse – increased awareness, notifications
- Phased approach – AMI first, AMR next, all remaining meter systems
- Retire Fathom (current system)

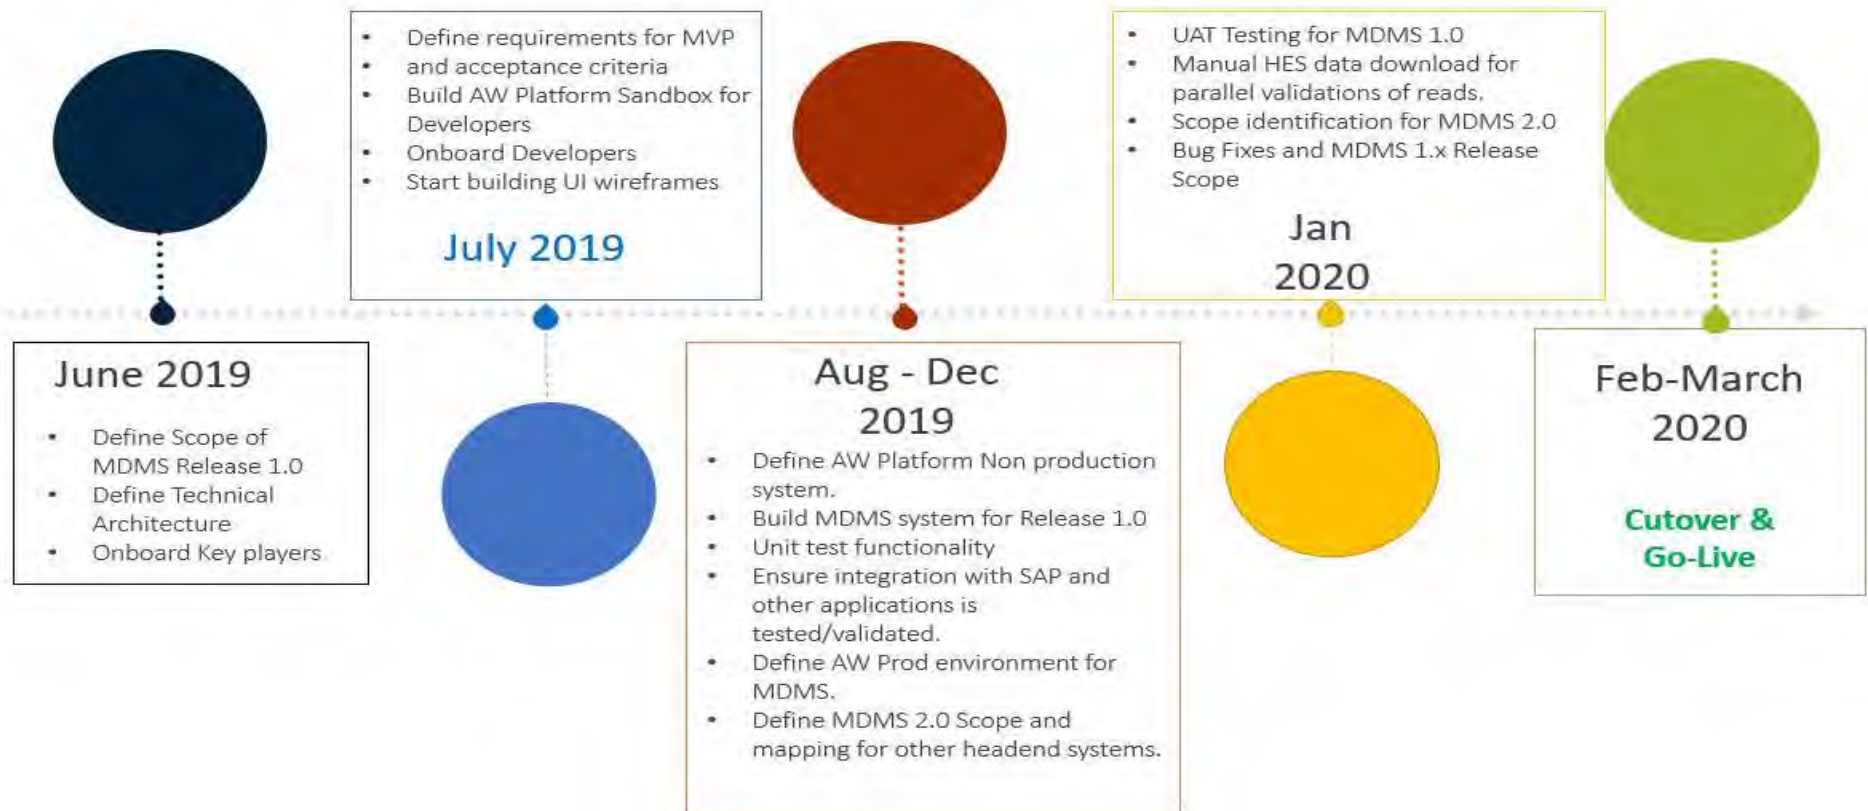

AW MDMS Core Release 1.0:

- Data Sync between SAP, MDMS and HES systems for technical master data.
 - HES Integration with Aclara and Mueller for AMI.
 - Raw and processed interval meter reads for all meter types(compound meters etc.)
 - Satisfy MRO order generated by SAP.
 - Avoid truck rolls by utilizing MDMS data for Move-in/Move-out, Off-cycle reads, account changes, etc.
 - Basic VEE Rules(Estimation of hourly reads to fill time gaps.)
 - Storage of Exceptions, Alarms data provided from HES in a standardized way.(System generated exceptions to be handled later)
 - Dashboards for viewing data and analytics.
 - Sending Alerts data to MeterOps for manual actions and trend analysis.
- 

AW MDMS Timeline:

MDMS 1.0 Product Timeline

AMI Strategy Recommendations

WE KEEP LIFE FLOWING™

Forward Looking AMI Strategy:

- **No building out of infrastructure for AMI. We understand the many complexities and you may need to put up infrastructure to leverage your current investment, so you may have a Hybrid AMI solution. As you work to define your states AMI strategy, we are asking that you try to move to a cellular LTE-M AMI solution when and wherever possible, that requires no infrastructure to install or maintain.**
 - **LTE-M was selected as the communication solution for AMI.**
 - **2 - Cellular Meter Vendors selected, [REDACTED] & [REDACTED] with long term agreements,10,15 & 20 years.**
 - **Meter and Endpoint (MIU) selection must be certified for full extended alert/alarm functionality.**
 - **Purchase meter and connectivity as a package (complete AMI solution). No need to build out a communications network.**
 - **Timing of migrating should be based on your LOS and regulatory requirements.**
 - **Meters can be purchased with 5,10,15 and 20 years of connectivity.**
- 

Why Cellular LTE-M: (Benefits)

- LTE-M endpoint has an extended coverage that is optimized for basements and pit set applications.
- Lower power draw.
- Stronger signal power.
- Guaranteed operations for 20 years.
- Security and resiliency built in and maintained by vendor.
- Cellular networks are constantly updated to keep up with the latest technologies and provide greater coverage, reliability and security.
- The LTE-M endpoint works like a cell phone in that, the endpoint will vary its power output depending on how much power is needed to reach a cell tower. For example, if the endpoint is close to the tower, power is decreased. If the endpoint is farther away from cell tower, power is increased to desired level. Furthermore, this is all done automatically by the endpoint and does not require any human interface.
- Signal penetration comparison LTE-M endpoint versus LTE 4/5G version;

Cellular LTE-M vs Fixed Network (Licensed/Unlicensed MHz Spectrum)	Cellular	Fixed
No build-out infrastructure and network requirements. Utility does not need to purchase, build and maintain an infrastructure of collectors, repeaters and structures.		
Ability to leverage robust security programs and ongoing security assessments.		
Access to the same disaster recovery systems used by emergency services for faster up time during a disasters.		
Protected from any liabilities related to the physical structure caused by storms, security patches, equipment failures, etc.		
Limited ongoing maintenance related to security reviews, hardware refreshes and changes in technology.		
Lower initial capital outlay, as well as lower annual operational expenses. Allows for rapid deployment and decreases ongoing maintenance.		
Ability to leverage an existing communications network that constantly evolves its technology without increased capital costs.		
No intervention required by FSR, endpoint automatically registers when its turned on.		
Was designed for sensors, requiring less power and longer battery life. Built for supporting IoT (Internet of Things)		

Current AMI Recommendations:

- Best Practice is to pair the same vendor meter to the same vendor endpoint. This will ensure you get all the extended protocols from the meter.
- Best Practice, MIU endpoints should be installed outside the premise, if not must be installed as high in the rafters or near a window to ensure adequate connectivity.
- Best Practice, Composite lids should be used for pit installations, if not it's recommended to run endpoint into a composite housing next to pit.
- If you already have an AMI fixed network, you may want to leverage your existing investment or move to cellular depending on your regulatory/rate and commission approvals. Do not increase your Fixed Network footprint or life cycle replacement of equipment if all possible.
- Existing fixed networks must be maintained for security updates.
- Look over your LOS life cycle in your system to determine when is the right time to move to a cellular AMI solution. Timing of migrating should be based on your LOS and regulatory requirements
- Always first check if you need to seek and gain regulatory and commission AMI technology approval from your state.
- Remember to engage your Corporate Meter Operations Team to discuss moving to and selecting the right AMI technology.
- AMI helpful information can be found on the Meter Operations Portal, example; AMI Readiness & Pilot Checklist:

Supporting AMI Next Steps

WE KEEP LIFE FLOWING™

AMI Support: Program Management

Develop a comprehensive framework of methods, processes, tools, and responsibilities to establish and deploy an effective Advanced Metering Infrastructure (AMI) PMO function supporting the state AMI projects.

- Establish guidelines, roles and responsibilities, and governance.
 - Define and manage processes, standards, and tools to manage scope, schedule, costs, issues and risks including change control and release management.
 - Coordinate communications, activities and dependencies across program internal and external stakeholders.
 - Support in managing overall business case and benefits realization as appropriate.
 - Manage quality assurance and adherence to standards.
 - Vendor Management and Sourcing.
- 

AMI Support: Business Integration

Develop and update the future-state AMI business processes and requirements which define the interactions between the enterprise solutions and the AMI solution.

- Prepare workshop schedule including the identification of Subject Matter Advisor (SMA) participation for each workshop.
 - Prepare workshop materials that illustrate standard AMI business process practices to be customized.
 - Conduct small group working sessions (e.g. SMA interviews) to prepare business process drafts for design workshops.
 - Develop level 2 and level 3 business processes through design workshops with (business and technical stakeholders & SMAs) and AMI vendor.
 - Develop business, functional, and technical requirements for future state processes that will capture dependencies on/for other areas of AMI functionality and support the business processes (to be stored in Requirements Traceability Matrix).
 - Document assumptions, risks, issues, and decisions.
- 

AMI Support: Change Management

Identify stakeholders and determine how they are impacted by AMI.

- Identify key internal and external stakeholders.
 - Capture how identified changes will impact the organization (people, process, and technology) and tie to key stakeholder groups.
 - Identify change management needed for aforementioned stakeholders.
 - Determine communication needs by stakeholder group including key points, timing, reviewers/approvers, and delivery method.
 - Build a high-level plan that details the specific activities and events for engaging stakeholders and preparing them for change.
 - Develop training plans outlining training needs by stakeholder.
 - Develop training curriculum and training material for the global design.
- 

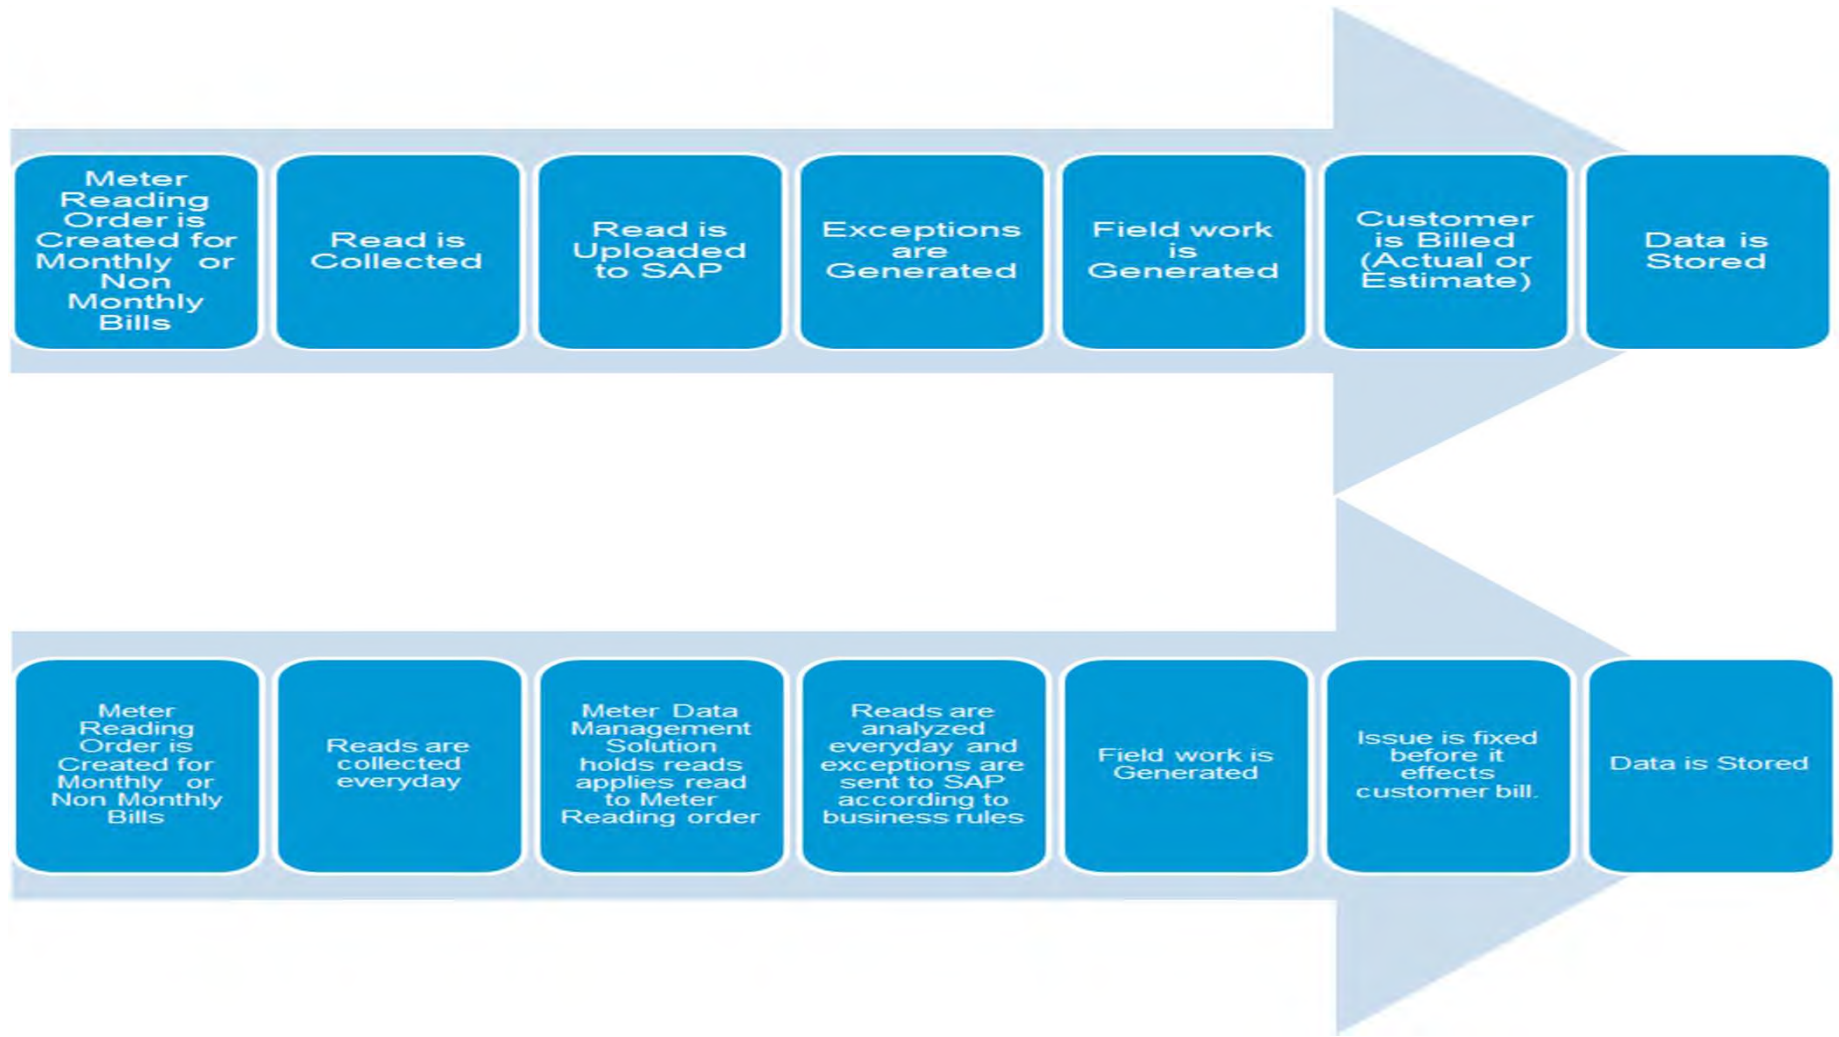

Questions – Are You Ready For AMI?

Appendix

Work Breakdown Structure, AMR vs AMI

Metal Lids

- Signal Reflection/Reduction
- Significant amount of radiated power is reflected back into the pit
- For network applications, endpoints need to be mounted through / under non-metal lids for optimal performance
- Even “through the lid” in Metal lid installations have significant interaction of the metal lid and the antenna, reducing radiated power
- Signal Reduction Metal Lid (Cone Affect)

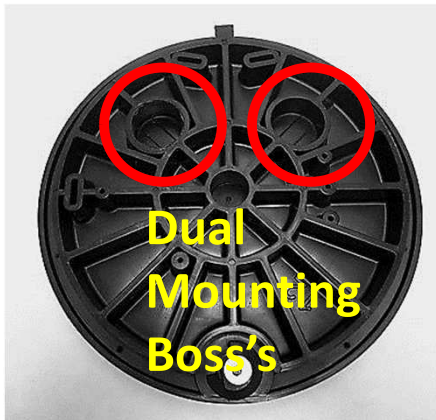

Composite Lids

- No signal Reflection/Reduction
- Through the lid / Insert in lid in Composite Lid installations have minimal effect on radiated power
- Signal Coverage is good with Composite Lids

Proper Cellular Installation Methods

Please ensure tie wraps have been removed or lengthened from the transmitter wiring.

What's Wrong Here.....

Vault Installation Methods

Installation Instructions AMR ANTENNA COVER ASSEMBLY Model: AC-01 **OPARK**

Component list:

- 2x Screws M6 30mm
- 2x Screws M4 15mm
- 1x Universal Bracket
- 1x AMR Antenna Cover
- 1x Gasket

Installation

Step 1. Fit the gasket into the grooves to ensure the antenna cover is seated on the gasket. Gaskets are not included in the antenna cover assembly.

Step 2. Carefully place the AMR Antenna Cover over the gasket. The cover will be held in place by the gasket.

Step 3. Carefully secure the UNIVERSAL BRACKET to the ANTENNA COVER using the SCREWS. Tighten screws evenly. Make the assembly as close to 90° as possible.

Park AC-01 Composite Vault Insert

Attachment of Transmitter to Encoder/Register

- Nicor Connector
 - Ensure that alignment arrows are pointing at each other.
 - If they are not lined up properly the transmitter will not be able to communicate with the encoder/register
 - Potential damage to the connector pins of the meter and/or endpoint will occur rendering the meter/endpoint inoperable.
- Twist Tight Connector
 - Simply twist the connectors together until they stop and you can no longer see the pink Oring

Nicor caps removed, ends connected

Figure 8: Nicor in-line connector

Twist Tight, caps removed, ends connected

Figure 4: Twist Tight in-line connector

Installation Review

- Typical Drive By only required the endpoint to communicate up to 75 yards
- Cellular requires the endpoint to transmit up to 5 miles
- Cellular CDMA / LTE: Less forgiving when it comes to installation

Metal Lids

- Verify Pit Rings are tight
- Remove or lengthen tie wraps from cables to prevent snags
- Nicor Connectors? Verify Arrows are aligned BEFORE pushing together.
- Twist Tight Connectors? Tighten completely.
- Activating the Endpoint?

Run 5 gallons of water thru the meter

OR

Use a Trimble, LTE Activation Tool or Orion Endpoint Utility

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

76. State whether KAWC's cost-benefit analysis for the deployment of AMI equipment includes cost savings recognized by acquisition of larger quantities by partnering with American Water or its affiliates.

Response:

The costs for the AMI equipment included in the Cost benefit Analysis are based on prices negotiated with vendors, in contemplation of potentially large (but not guaranteed) orders, due to the scale of enterprise-wide meter and endpoint purchases.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

77. Identify the dollar-amount change in Depreciation Expense for the test year ending January 31, 2025, in comparison to the base period ending September 20, 2023, that is related to KAWC's proposed AMI program.

Response:

The approximate depreciation and cost of removal expense for AMI meter replacement is shown below. Please note, the most significant difference in depreciation and cost of removal expense is not related to AMI specifically, but due to the meter change volume anticipated (regardless of selected technology) and the proposed change in depreciation and cost of removal rates.

- At proposed depreciation rates \$2,243,128
- At currently approved depreciation rates \$326,595

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

78. Identify the dollar-amount change in Operation and Maintenance Expense for the test year ending January 31, 2025, in comparison to the base period ending September 20, 2023, that is related to KAWC's proposed AMI program.

Response:

There is no incremental operations and maintenance costs included in the test year for the AMI program, other than any uncollectible expense that would be associated with AMI related revenue requirement.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Melissa Schwarzell

79. Identify the dollar-amount change in New Original Cost Rate Base for the test year ending January 31, 2025, in comparison to the base period ending September 20, 2023, that is related to KAWC's proposed AMI program.

Response:

The Company has not prepared a precise rate base figure related to the AMI program that would include all movements to deferred tax, for example. However, a high level estimated average rate base for the test year (measured as Utility Plant in Service and Construction Work in Progress, less accumulated depreciation) is shown below:

Rate Base Component	Average Balance
Utility Plant In Service	\$9,331,292
Accumulated Depreciation	(728,897)
Net Utility Plant In Service	8,602,396
Construction Work in Progress	1,055,142
Rate Base	\$9,657,537

LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Jeffrey Newcomb

80. Refer to the Direct Testimony of Jeffrey Newcomb at page 15, line 5. Provide a copy of the referenced email.

Response:

Please see below for a copy of the referenced email.

From: Carbin, Robert A (DOR) [REDACTED]
Sent: Wednesday, May 31, 2023 9:55 AM
Subject: Transmission Pipeline Taxation Information
Importance: High

EXTERNAL EMAIL: The Actual Sender of this email is [REDACTED] Think before you click!.

To Whom it May Concern;

We are reaching out to you regarding a change in classification for taxation of pipeline property. Please see the following:

Beginning in tax year 2023, significant changes to the taxation of transmission pipelines occurred. Previously, the Department of Revenue classified and taxed transmission pipelines as real property; however, pipelines have now been re-classified as tangible personal property in accordance with the judgment in the case styled as *Department of Revenue v. Marathon Pipe Line LLC*, 653 S.W.3d 104 (Ky. App. 2022)(discretionary review denied by the Kentucky Supreme Court October 12, 2022). Accordingly, taxpayers shall report and classify their transmission pipelines as tangible personal property on their returns, which shall be subject to the applicable state and local rates imposed on tangible personal property. The tax year 2023 state tax rate applicable to pipelines classified as tangible personal property is 45 cents per \$100 of assessed value.

If you have any questions please feel free to reach out to our office. Thank you and have a great day.

Robert Carbin, Business Appraiser Branch Manager
Office of State Valuation

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: John Watkins

81. Refer to Direct Testimony of John M. Watkins at page 16, line 23. State whether KAWC made any adjustments to the test year uncollectible expense in consideration of any potential impact the Covid-19 pandemic may have had on collections. State within your response why adjustments were or were not made.

Response:

The Company forecasted the uncollectible percentage by taking the uncollectible expense divided by revenues for the years 2020, 2021, and 2022 to determine an average uncollectible percentage. Please refer to attachment KAW_R_LFUCGDR1_NUM082_081823_Attachment. This attachment shows the actual uncollectible expense percentage for the years 2018-2022 and year to date 2023 (through July). The Company did not make any adjustments to the three year average for Covid-19 as the percentage for 2020 was reasonable when compared to 2018. The below chart provides the information from Case No. 2018-00358, the information below also shows the three year average proposed in the case is reasonable.

	<u>Uncollectibles</u>	<u>Revenues</u>	<u>Write off %</u>
2015	\$914,171	\$91,373,906	1.0005%
2016	908,020	95,396,492	0.9518%
2017	774,208	97,999,683	0.7900%
	\$2,596,399	\$284,770,081	0.9141%

FIRST REQUEST FOR INFORMATION**

Witness: John Watkins

82. Provide the percentage of uncollectible accounts for each individual year 2018 through 2022 and to date in 2023. In addition, provide these percentage calculations in electronic format with all formulas intact.

Response:

Please refer to KAW_R_LFUCGDR1_NUM082_081823_Attachment.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Shelley Porter

83. Refer to Direct Testimony of Shelly W. Porter at Exhibit 1.
- (a) Provide a table listing each category of the Recurring Projects (e.g, A1 Mains – New, A2 Mains – Replaced/Restored, etc.) and the actual dollar amount spend by KAWC for those categories for the years 2019, 2020, 2021, and 2022.
 - (b) With respect to Item J1 “Meters – Replaced,” confirm that the significant increase from 2023 to 2024 is driven by KAWC’s AMI proposal.
 - (c) With respect to Item O1 “Vehicles”, please provide the number of vehicles to be purchased; the year, make and model of each; and the cost of each.
 - (d) Confirm that KAWC plans to increase its Capital Project Spending from \$59,709,133 in 2023 to \$85,596,903 in 2024.
 - (e) Confirm that increased Capital Project Spending is incorporated into the test-year revenue requirement, as opposed to being included in a future QIP surcharge.

Response:

- (a) Please see KAW_R_PSCDR1_NUM014A_071823_Attachment for actual dollars spent on Recurring Projects in 2019, 2020, 2021, and 2022.
- (b) The increase in Item J1 “Meters - Replaced” from 2023 to 2024 is primarily associated with transitioning from a 15-year replacement schedule for 5/8” meters, to a 10-year replacement schedule for 5/8” meters.
- (c) Please see KAW_R_PSCDR2_NUM083_081823_Attachment for a list of budgeted Line O1 “Vehicle” spend. Make and model may vary based on availability and best pricing considerations when purchasing. Budgeted costs include all vehicle purchase costs, including but not limited to upfitting.
- (d) Yes, this is correct.
- (e) Test year Capital Project Spending is incorporated in the revenue requirement and will not be included in a future QIP surcharge.

CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

84. Refer to Direct Testimony of Shelley W. Porter at page 16, line 11. State whether the Department of Transportation paid for or reimbursed KAWC for the relocation of the 20-inch water main as a result of the Department of Transportation's widening project.

Response:

Kentucky American Water received contributions and reimbursements towards this relocation project totaling \$838,514.32. Contributions and reimbursements have been reduced from rate base in this proceeding.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: William A. Lewis

85. Refer to Direct Testimony of Shelly W. Porter at page 21, line 7.

- (a) State the number of meters KAWC has tested at its facilities each year since and including 2020.
- (b) State the circumstances under which KAWC tests meters.

Response:

- a. 2020 – KAWC tested 1240 meters
2021 – KAWC tested 1529 meters
2022 – KAWC tested 880 meters
2023of end Q2 – KAWC has tested 763 meters
- b. The Company tests meters when a customer requests a meter test, when the meter is due for a calibration test, when a pulled meter needs to be tested before being placed back in service, or when the Public Service Commission requests a meter test.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

86. Refer to Direct Testimony of Shelly W. Porter at page 25, line 25.
- (a) Explain why the current purchase source for Millersburg does not meet the current demand of Millersburg and KAWC's wholesale customers.
 - (b) State whether KAWC has considered requesting approval of a surcharge to recover expenses associated with construction of a Millersburg transmission main to be charged to customers receiving water through that transmission line.
 - (c) Identify the prior annual purchased water expense in 2020, 2021, 2022, and to date in 2023 associated with KAWC customers that would be served by the proposed transmission line.

Response:

- (a) KAWC's agreement with Paris Water Works specifies that KAWC has the right to purchase water up to a daily average rate of 200,000 gallons per day in a given calendar month. From January 2022 through July 2023, KAWC's daily average purchased water volume exceeded 200,000 gallons in seven months.

Due to events such as power outages and main breaks within the Paris system, the supply from Paris Water Works has resulted in systemwide service interruptions for KAWC customers in Millersburg. KAWC had to issue precautionary boil advisories to Millersburg customers due to a main break within the Paris Water Works system and water supply shortages related to winter weather in July 2022 and December 2022, respectively.

KAWC also experiences water quality challenges associated with the water supplied by Paris Water Works. KAWC routinely receives water with elevated disinfection by-products (DBPs) from Paris Water Works. These DBPs, consisting of trihalomethanes (THMs) and haloacetic acids (HAAs), create a challenge to maintain compliance with the Stage 2 DBP Rule and as a result additional treatment must be performed by KAW at the Millersburg booster station. In 2022, monitoring of the water supplied by Paris Water Works indicated HAA levels above the regulatory maximum contaminant level (MCL) in nine of twelve months and THM levels above the MCL in one month.

Additionally, the current supply from Paris Water Works does not provide adequate fire protection in Millersburg. An example of this is the June 22, 2022 fire that

destroyed multiple buildings in downtown Millersburg. The flow available in Millersburg's hydrants was not sufficient to adequately contain the fire. No hydrants within the Millersburg system are certified as fire hydrants under regulatory and industry standards due to the limited supply from Paris Water Works.

- (b) KAWC evaluates regulatory recovery options for capital investments like construction of a Millersburg transmission main. The Millersburg transmission main project is not QIP-eligible, so the Company opted for regulatory recovery through base rates and single-tariff pricing.
- (c) KAWC's purchased water expenses to supply the Millersburg system were \$113,755 in 2020; \$156,209 in 2021; and \$186,875 in 2022. Purchased water expenses for 2023 through July are \$129,196.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Shelley Porter

87. State when the following capital projects were placed in service:

- (a) I12-020037 Kentucky River Station Chemical Storage and Feed Improvements
- (b) I12-020055 New Circle Road Phase 2
- (c) I12-020067 Richmond Road Station Chemical Facility Upgrade
- (d) I12-020074 Athens Boonesboro Main Extension – Phase II
- (e) I12-020076 KRS1 Replace Incline Car
- (f) I12-020079 Jacobson Reservoir Pump Station Improvements
- (g) I12-020094 Cox Street Booster
- (h) I12-020095 Mercer Road Booster Station
- (i) I12-020099 Kentucky River Station 1 High Service Pumps No. 13 Replacement
- (j) I12-300008 Owenton Maintenance Garage

Response:

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

88. Refer to the Direct Testimony of Charles Rea at page 22, line 5. Explain how KAWC estimated that there are approximately 11,000 water customers with household incomes at or below 100% of FPL?

Response:

The Company's affordability analysis estimates the number of customers by zip code at various household income increments of FPL by analyzing the distribution of owner-occupied household units and renter-occupied single family household units in each zip code and correlating that data with the number of customers served in each zip code.

See KAW_R_PSCDR2_NUM061_081823_Attachment for the Company's affordability model.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Charles Rea

89. Refer to the Direct Testimony of Charles Rea at page 24, lines 10-12.
- (a) When KAWC assumed a 10% participation rate, state whether that is a 10% participation rate of the estimated 11,000 eligible water customers or whether that is based on the total KAWC water customer base.
 - (b) Identify the basis for the assumption of a 10% participation rate.
 - (c) Provide all calculations and workpapers that a 10% participation rate would impact revenue by \$116,000.
 - (d) Explain the process through which customers would verify eligibility for the Universal Affordability Tariff.

Response:

- a. For the proposed Universal Affordability Tariff, the Company is assuming a participation rate of 10% of the estimated 11,000 eligible water customers.
- b. The Company's affordability assessment, rate design analysis, and cost of service analysis targets bills for all residential customers at 2% of household income or less. The Company proposes an assumption of 10% participation based on initial limited interest with the population that is currently billed at higher than 2% Bill to Income Ratio.
- c. See Rows 14, 15, 22, and 23 of Exhibit 37, Schedule M-3, RESIDENTIAL CLASS revenues.
- d. In order to be eligible for the Universal Affordability Tariff, the customer is required to submit income verification as well as proof of address and household occupancy. Once the customer data is validated, they would be enrolled in the program. KAWC anticipates utilizing a third party administrator for enrollment, as the Company does for its H2O assistance program.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION

Witness: Jeffrey Newcomb

90. Refer to Exhibit 37, Schedule 37, D-2 at page 5.
- (a) Confirm that the KAWC is proposing to recover rate case expenses to be amortized over 24 months.
 - (b) State the rationale for KAWC's requested amortization period for rate case expense.

Response:

- a. Confirmed. KAWC is proposing to recover rate case expenses over a 24-month amortization period.
- b. The average time between rate effective dates has been approximately 30 months over the past five rate case orders. There will be approximately 9 months between the first rate case expense incurred for this rate case and the proposed amortization start date. 24-months strikes a balance between customer impact and intergenerational equity, meaning the customers who will be paying the base rates established in this case are the customers from whom the rate case expenses incurred to establish those rates are recovered.

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Krista Citron

91. Refer to the Direct Testimony of Citron at page 8, lines 6-9. Provide all documentation, analysis, reports, summaries, and underlying support for KAWC's conclusion that "repair[ing] a main break is over \$1,000 per linear foot compared to \$331 per linear foot for a planned main replacement project."

Response:

The \$331 per linear foot for a planned main replacement project is based on the average of the most recently completed QIP Year 3 projects as outlined in Case No. 2023-00030 filed on March 1, 2023.

For main breaks, the average cost to repair over the past five years is based on the amount of pipe replaced in response to main breaks and the associated annual cost on Budget Line C – "Unscheduled Main Breaks" as set forth below:

2018	\$511,754	419.5 lf	\$1,219.91/lf
2019	\$990,555	727 lf	\$1,362.52/lf
2020	\$1,239,712	560 lf	\$2,213.77/lf
2021	\$1,318,792	536 lf	\$2,460.43/lf
2022	\$1,370,718	950 lf	\$1,442,86/lf

**KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2023-00191
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT'S
FIRST REQUEST FOR INFORMATION**

Witness: Kathryn Nash and Krista Citron

92. Refer to the Direct Testimony of Kathryn Nash starting at page 12, line 22, in which she states, “the Company is proposing one small step towards implementing the QIP as it was originally designed by expanding 1 the QIP from an annual replacement of 10-13 miles of cast iron main to 27-34 miles of any material of main.” Identify the anticipated increase in annual expenses to KAWC in 2024, 2025, and 2026 if the Commission approves an increase in replacement of 27-34 miles of cast iron main, in comparison to replacement of 10-13 miles of cast iron main.

Response:

2024 - \$0

2025 - \$21,069,495

2026 - \$21,470,690
