March 15, 2023

Dear,

We would like to invite you to attend an open house on April 1, 2023 from 2-4pm to answer any questions you may have about the proposed Banjo Creek Solar Project.

As you may know, GreenGo Energy is developing a solar farm on a portion of the Wilferd, Diel and Coltharp farms. Since your property is within 1000 feet of this land, we would like to address questions you may have. GreenGo Energy representatives will be available meet you, show you our project and speak with you directly at the open house.

The open house will be hosted at Sedalia Café, 5593 State Route 97, Mayfield KY. Please join us for appetizers, pizza and soft drinks.

We thank you for your consideration and look forward to meeting you on April 1st. Should you have any questions or concerns please contact us at (704) 390-8966 or visit www.greengoenergyus.com.

Sincerely,

Bonnie Brown | Senior Specialist, Development & Delivery
GreenGo Energy US, Inc.
Email: bsb@greengoenergy.com

Dear «First_»,Salutation,

GreenGo Energy US, Inc would like to cordially invite you to learn more about our solar project investment in Graves County: Banjo Creek Solar LLC. Banjo Creek Solar is proposing to construct a 120 MW AC photovoltaic solar energy generator. The project will be located in the vicinity of the intersection of KY Rt 564 and Ky Rt 339 and Antioch Church Rd, south of Farmington. The coordinates are 36°38'15.9"N 88°31'44.5"W. The facility will consist in approximately 850 acres of solar panels and associated racking, inverters, battery storage, and a project substation.

There are currently three local landowners under long-term leases for the development of their property for this project.

At GreenGo Energy we have deep experience with developing large solar energy projects in the US and abroad. We know that for a project to be successful, close and respectful collaboration with the landowners, local community, municipality, and potential neighbors is vital. That is why we make sure to involve all parties in a transparent way before applying for a new solar farm to be established.

As part of our effort to get to know our new neighbors, we are hosting a community meeting Tuesday, May 16th, at 5:30 pm- 6:30 pm at Sedalia Cafe located at 5593 KY 97, Sedalia, KY 42079. Refreshments will be provided.

It is important to us that you have an opportunity to learn about the project and get to know who we are.

If you can't attend, but would still like to speak with us, please reach out to us at the contacts listed below or visit our websites:

Company Website: www.greengoenergyus.com

NOTICE OF PUBLIC MEETING

Banjo Creek Solar LLC is proposing to construct and operate a solar energy project in Graves County, Kentucky. The proposed Banjo Creek Solar Project will be located on approximately 850 acres near the intersection of Ky Rt. 564, Ky Rt. 339, and Antioch Church Road South of Farmington. The photovoltaic solar project will consist of solar panels, associated racking, inverters, battery storage and a project substation. A public meeting to inform the community about the project will take place on Tuesday, May 16, 2023 from 5:30-6:30 PM at the Sedalia Café located at 5593 Sedalia, Kentucky 42079.

Anyone with questions about the May 16 public meeting or the Banjo Creek Solar Project may request information by emailing Bonnie Brown at bsb@greengoenergy.com or calling (704) 390-8966

REQUEST FOR QUALIFICATIONS

The Eddyville Riverport and Industrial Development Authority, Inc. invites Statements of Qualification for engineering and consulting services necessary for the implementation and/or administration of a federally funded grant award under the Port Infrastructure Development Program (PIDP). Interested firms may request documents by contacting Angel Travis via email at atravis@eddyvilliverport.com.

Statements of Qualification shall be submitted in a sealed envelope or carton, plainly marked with the submitting firm's name, address, date, and project title "Engineering and consulting Services" on the outside and shall be delivered to: 615 W. Dale Ave, Eddyville, Kentucky 42038 no later than 2:30 PM on May 15, 2023.

Statements of Qualification will be publicly opened and read aloud on May 16, 2023 at 8:00 a.m. at the Riverport's office located at 615 W. Dale Ave, Eddyville, Kentucky 42038.

No firm may withdraw its submission within 90 days after the actual date of the opening thereof. The Riverport reserves the right to waive any information or reject any or all Statements of Qualification.

"EQUAL EMPLOYMENT OPPORTUNITY"

The Livingston County Board of Education requests bids on gasoline, oil, diesel, LP gas, and anti-freeze for the 2023-2024 school year, to be submitted on or before 9AM CST, Tuesday, May 23, 2023. Specifications are available at the Superintendent's office, 1370 HWY 60 East, Burna, KY. The Board of Education reserves the right to reject any or all bids.

The McCracken County Board of Education requests proposals for Paving and Striping of parking lots at Heath Elementary School, Heath Middle School, and Concord Elementary School. Bid proposals will be accepted until opened at 10:00 a.m. CDT on Thursday, May 16, 2023. Bidding packets will be available at McCracken County Board of Education Office on Monday, May 1, 2023.

For Bidding information contact Todd Jackson by email at todd.jackson@mccracken.ky-schools.us

Public Meeting Public Notice
Publication Affidavit
May 16, 2023

Affidavit of Publication for May 16 Public Meeting

AFFIDAVIT

I, SELENA WARD, Sales Manager of The Mayfield Messenger, a newspaper of general circulation, published in the City of Mayfield, County of Graves, State of Kentucky, do hereby affirm the legal advertisement attached was published in the April 29, 2023 issue of The Mayfield Messenger.

Selena Ward

Selena Ward
Sales Manager
The Mayfield Messenger

Sworn to and before me, a Notary, on this the 28th day of August, 2023.

Gerry K Gilbert

(Notary signature)

My commission expires:

November 18, 2023

NOTICE OF PUBLIC MEETING

Banjo Creek Solar LLC is proposing to construct and operate a solar energy project in Graves County, Kentucky. The proposed Banjo Creek Solar Project will be located on approximately 850 acres near the intersection of Ky Rt. 564, Ky Rt. 339, and Antioch Church Road South of Farmington. The photovoltaic solar project will consist of solar panels, associated racking, inverters, battery storage and a project substation. A public meeting to inform the community about the project will take place on Tuesday, May 16, 2023 from 5:30-6:30 PM at the Sedalia Café located at 5593 Sedalia, Kentucky 42079.

Anyone with questions about the May 16 public meeting or the Banjo Creek Solar Project may request information by emailing Bonnie Brown at bsb@greengoenergy.com or calling (704) 390-8966

Dear «First_»,

We previously sent a certified mail letter to your residence to invite you a public meeting on May 16th. This letter is to inform you that **the May 16th public meeting has been rescheduled to June 6th** per the details below.

GreenGo Energy US, Inc would like to cordially invite you to learn more about our solar project investment in Graves County: Banjo Creek Solar LLC. Banjo Creek Solar is proposing to construct a 120 MW AC photovoltaic solar energy generator. The project will be located in the vicinity of the intersection of KY Rt 564 and Ky Rt 339 and Antioch Church Rd, south of Farmington. The coordinates are 36°38'15.9"N 88°31'44.5"W. The facility will consist in approximately 1270 acres of solar panels and associated racking, inverters, battery storage, and a project substation. There are currently three local landowners under long-term leases for the development of their property for this project.

At GreenGo Energy we have deep experience with developing large solar energy projects in the US and abroad. We know that for a project to be successful, close and respectful collaboration with the landowners, local community, municipality, and potential neighbors is vital. That is why we make sure to involve all parties in a transparent way before applying for a new solar farm to be established.

As part of our effort to get to know our new neighbors, we are hosting a public meeting **Tuesday, June 6th, at 5:30 pm- 6:30 pm** at Sedalia Cafe located at 5593 KY 97, Sedalia, KY 42079. Refreshments will be provided. In addition to the community meeting, Jonathan Flemings will be in Farmington on May 15th and 16th and would like to arrange to meet with you about the site plan at your convenience. Please let us know if there is a time that you are available.

Company Website: www.greengoenergyus.com
Project Website: www.banjocreeksolar.com

We look forward to seeing you either on May 15th or 16th or at the June 6th public meeting in Sedalia!

Beshear: Credit agency boosts state's financial outlook

BY MAYFIELD MESSENGER STAFF

FRANKFORT — On Friday, May 12, Gov. Andy Beshear announced the first-ever state-level credit rating upgrade from the major credit rating agency Fitch Ratings, which moved Kentucky's rating up from AA- to AA.

In general, the rating is a measure of the state's ability to pay debts and the overall health of Kentucky's economy.

According to a news release, the governor said the increased confidence in Kentucky's financial outlook will mean lower costs for taxpayers on the state's investments in critical infrastructure projects — like roads, bridges and schools — which help move the state forward while helping families.

“This is the first state-level credit rating increase Kentucky has received in 13 years, and it's the first-ever state-level upgrade for Kentucky by Fitch,” Beshear said. “Kentuckians are celebrating today's news because it proves that this administration has been a good steward of taxpayer dollars; and this is one more positive sign that Kentucky's economy is booming, and that our fiscal house is in order.”

Fitch Ratings started rating Kentucky in 2014. The new Fitch report also shows that Kentucky teacher and state employee pension obligations are being fully met and can be counted on by public servants, according to the news release.

The state lease appropriation rating, which the majority of Kentucky's bonds carry, is moving to AA- from A+. This credit rating increase follows improvements last year in the state's financial outlook, which both Fitch Ratings and S&P Global Ratings ranked as positive.

Kentucky's strong financial position, budgetary discipline, continued commitment to fully funding pensions — including appropriations in excess of the actuarially required amount — and record levels in the Budget Reserve Trust

Fund are reflected in this credit upgrade. Fitch's notice to investors, which was released Thursday evening, said, “Fitch's upgrade of Kentucky's IDR to 'AA' from 'AA-' reflects material improvements to Kentucky's fiscal reserves since 2020 as a result of improved budgetary discipline and a post-pandemic surge in tax collections now in its third year. More disciplined budgeting practices have allowed Kentucky to use surplus revenues to boost state fiscal reserves, increasing its overall financial resilience. The upgrade of Kentucky's IDR also factors in better funding practices related to long-term liabilities, particularly public pension plans. Fitch believes the shift to making actuarially-determined annual pension contributions has enhanced Kentucky's budgetary flexibility and that these improvements are sustainable.”

This upgrade from Fitch Ratings enhances the state's economic momentum, according to the news release.

Governor hails law enforcement successes in fight against spread of illegal drugs

BY BRUCE SCHREINER ASSOCIATED PRESS

FRANKFORT — Democratic Gov. Andy Beshear on Thursday highlighted law enforcement successes in blocking the spread of illegal drugs in Kentucky, offering an election-year response to Republican criticism of his record in fighting back against the deadly drug scourge.

Beshear pointed to the seizure of 142 pounds of fentanyl in the past seven months and discussed the work by the state's Counterdrug Program in supporting seizures of fentanyl, methamphetamine, cocaine and heroin.

The governor also pointed to advances in addiction recovery services as he focused on a comprehensive response to drug woes in a state where drug overdose deaths have surpassed 2,000 per year.

“At this point, we all know somebody that's not only been touched by addiction, we all know somebody that we have lost to addiction,” Beshear said during his weekly news conference.

Republicans say the state's illegal drug epidemic worsened during Beshear's tenure. State Republican Party spokesman Sean Southard said in a recent statement that drug addiction continues to have a “devastating impact” on communities, and that Beshear has “failed to address this crisis adequately.”

The state's drug woes emerged as a leading issue in the GOP gubernatorial primary, where a dozen candidates are competing for their par-

ty's nomination. Beshear faces nominal opposition in his party's primary. The primary election is next Tuesday, but three days of in-person, no-excuse early voting started Thursday.

On Thursday, Beshear said he has fought back against the state's addiction problems since his term as attorney general, which preceded Cameron's term. While in that position, Beshear filed multiple lawsuits against opioid manufacturers and distributors. Beshear recently pointed to statistics showing that drug overdose deaths in Kentucky fell by 5% in 2022, which he attributed to drug treatment efforts. This is the first decline in drug overdose deaths in four years.

Kentucky has increased the number of treatment beds by 50% during Beshear's term, according to the governor. His administration is seeking support and oversight of mobile crisis intervention service providers in another initiative to help people overcome addiction. The state's GOP-dominated legislature also has focused on efforts to combat the drug crisis.

Meanwhile, Beshear noted that hundreds of Kentucky National Guard soldiers have been deployed to the nation's southwest border during his term as governor. The governor has declared in the past that a “strong national security requires strong border security.”

Craft has been outspoken in blaming border security problems for the flow of illegal drugs to Kentucky.

Beshear on Thursday signed the state's 2024 Drug Interdiction and Counterdrug Activities

Plan. He said the action will pave the way for federal funding to back the counterdrug program in Kentucky.

The governor also offered a slew of statistics to showcase drug interdiction successes. From Oct. 1, 2022 to May 1 of this year, the counterdrug program team supported law enforcement in the seizure of 88,253 fentanyl pills, Beshear said. During the prior fiscal year, only 5,100 fentan-

yl pills were seized, he said.

Fentanyl has been partially blamed for the state's high death toll from drug overdoses.

Kentucky State Police Commissioner Phillip Burnett Jr., who joined the governor at the news conference, said law enforcement agencies will continue working together to “develop innovative ways” to combat the spread of illegal drugs causing the deaths of Kentuckians.

Gov. Andy Beshear speaks during a news conference Louisville on April 10.

Dear Graves County Voters,

Your Graves County Board of Elections would like to update you on a few matters for the upcoming primary election on May 16 and general election November 7. This 2023 political season is gearing up for our commonwealth's Governor race along with other constitutional officers.

As you are well aware, voting procedures across Kentucky have had to make some adjustments over the last few years due to a national pandemic and tornado recovery. Specifically, when Covid-19 hit 2020, our large county was directed to reduce from 30 smaller voting centers all the way down to one massive voting center at Graves County. Thankfully, we were able to increase the number of absentee ballots and add multiple early voting dates. The turnout for that election was unprecedented and worked very smoothly, despite social distancing requirements. What a credit to our amazing voters and poll workers!

In the following election, the Board voted to add three more voting centers to increase the access of safe and secure locations for our voters. In addition to Graves County High School, the additional centers were Mayfield High School, Sedalia Elementary School & Trace Creek Baptist Church. **An important note is that our voting centers must have (1) access to safe and secure sheltering, (2) safe and sufficient parking, (3) possess the ability to have video surveillance and (4) provide handicap accessibility to all voters.**

In 2022, our Board added more voting centers at Fancy Farm Elementary School and Wingo Elementary School. Each year, we continue to evaluate our voting centers and elections as the growing interest among our voters is multiplying. Therefore, for the 2023 election year, we have decided to add 3 more voting centers, two of which will be added to the northern half of the county.

Please make note of these nine voting center locations as you begin planning your right to vote this year. **Any Graves County voter can vote at any of these locations, as long as they are properly registered.** We believe that after much research of voting data and receiving perspectives from our community, that these voting centers will give our voters reasonable access to in-person voting options. Every previous voting center in years past has been considered, as well.

- **Community Fellowship Church**, 90 State Route 408 W, Hickory
- **Cuba Church of Christ**, 51 Cuba School Road, Mayfield
- **Fancy Farm Elementary School**, 270 State Route 339 S, Fancy Farm
- **Graves County High School**, 1220 Eagles Way, Mayfield
- **Mayfield High School**, 700 Douthitt Street, Mayfield
- **Sedalia Elementary School**, 5252 KY-97, Mayfield
- **Symsonia Elementary School**, 11730 KY-131, Symsonia
- **Trace Creek Baptist Church**, 3577 State Route 131, Mayfield
- **Wingo Elementary School**, 449 Lebanon St, Wingo

Important Dates for 2023 Elections include:

- Online mail-in absentee request portal closes (May 2) (www.voteky.com)
- Excused in-person absentee voting- May 3-10 (During normal business hours 8:00am- 4:00pm at the County Clerk's Office, 1104 Paris Rd, Suite 4, Mayfield)
- In person, no excuse, early voting (8:00am- 4:00pm, County Clerk's Office)
 - o Thursday, May 11 (8:00am- 4:00pm)
 - o Friday, May .12 (8:00am-6:00pm)
 - o Saturday, May 13 (8:00am -4:00pm)
- Primary Election- Tuesday, May 16, 6:00am- 6:00pm (Voting centers listed above)
- General Election- November 7, 6:00am- 6:00pm (Voting centers listed above)

To register to vote or for other information regarding voting in Kentucky, please visit www.govoteky.com.

The Board of Elections would like to thank you for your patience and support and we continue to evaluate and provide a safe, secure and equitable voting experience for our voters. We have had a tremendous positive response to our plans in recent years and continue to take into consideration all information shared. Please continue to reach out to your Board of Elections members for any questions or concerns.

NOTICE OF PUBLIC MEETING RESCHEDULED

The previously scheduled May 16th meeting noticed in April 29, 2023 edition of this publication has been rescheduled to June 6th. Banjo Creek Solar LLC is proposing to construct and operate a solar energy project in Graves County, Kentucky. The proposed Banjo Creek Solar Project will be located on approximately 1270 acres near the intersection of Ky Rt. 564, Ky Rt. 339, and Antioch Church Road South of Farmington. The photovoltaic solar project will consist of solar panels, associated racking, inverters, battery storage and a project substation. A public meeting to inform the community about the project will take place on Tuesday, June 6, 2023 from 5:30-6:30 PM at the Sedalia Café located at 5593 Sedalia, Kentucky 42079. Anyone with questions about the June 6th public meeting or the Banjo Creek Solar Project may request information by emailing Bonnie Brown at bsb@greengoenergy.com or calling (704) 390-8966.

COMMONWEALTH OF KENTUCKY GRAVES CIRCUIT COURT
CIVIL ACTION NO. 21 - CI - 00377

HAZEL ENTERPRISES, LLC PLAINTIFF
 VS. MASTER COMMISSIONER'S SALE
 TREVER COLE, ET AL. DEFENDANTS

Pursuant to a Judgment and Order of Sale of the Graves Circuit Court rendered in the above-styled action, the undersigned will on **MAY 15, 2023**, at the hour of 10:00am, Central Time, expose to PUBLIC SALE to the highest bidder property which is located at **946 SOUTH 5TH STREET, MAYFIELD**, Graves County, Kentucky. This sale will take place at 1102 Paris Road in Mayfield, Kentucky, in front of the **Graves County Temporary Court Facility**.

Property Address: 946 South 5th Street Mayfield, KY 42066 208.00 . 12.012 . 00

Map No.:
The legal description is found in Deed Book 411, Page 462, in the Graves County Court Clerk's Office.

The purchaser of the above described real estate shall be required to assume and pay all taxes assessed against such property for the year 2023 and all subsequent years. Any past due taxes shall be paid from the proceeds of the sale.

If the purchase price is not paid in full on the day of sale, the purchaser will be required to pay **ten percent (10%)** down the day of the sale and execute a bond with surety for the remainder at the time of sale. Said bond shall have the force and effect of a judgment and shall remain a lien on the property sold as additional security for the payment of the purchase price. Said bond shall bear interest at the appropriate statutory rate from the date of sale until paid within thirty (30) days from the date of the sale.

The Defendant, Trever Cole, or any persons holding under such Defendant, are no longer entitled to possession of the subject property, and said Defendants or any persons holding under them are ordered to vacate said property upon confirmation of the sale. The Sheriff of Graves County is authorized and directed to evict any party or parties to this case.

This sale is made for satisfaction of Judgment liens and recovery of cost and any outstanding real property taxes.
 Dated the day of May, 2023.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number. Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide

About North Carolina Sustainable Energy Association

North Carolina Sustainable Energy Association (NCSEA) is the leading 501(c)(3) non-profit organization that drives public policy and market development for clean energy. Our work enables clean energy jobs, economic opportunities, and affordable energy options for North Carolinians. Learn more about NCSEA, our mission, and vision at www.energync.org.

Executive Summary

Dating back to 2009, NCSEA has monitored and collected data on all solar installations across the state of North Carolina. This data has been informative to measuring the significant growth of the industry and the associated economic benefits to the state. In the process of aggregating this data, NCSEA has also utilized the opportunity to track land use associated with the growth of solar in North Carolina, which led to the creation of the North Carolina Solar and Agriculture Report first produced in 2017. According to this study conducted by NCSEA and the NC Department of Agriculture & Consumer Services, the report outlined that only .19% of cropland in North Carolina had been repurposed for utility-scale solar development.

NCSEA used a similar methodology to the previous analysis to conduct an updated land use study using data through 2021.

Solar and agriculture are two significant industries in North Carolina. The state has long been atop the national leaderboard in solar photovoltaics (PV) with more than 7,460 megawatts (MW) of installed capacity. As of March 2022, North Carolina ranks fourth in the country for total installed capacity according to the Solar Energy Industries Association.¹ While solar PV systems can be divided into a few different categories depending on their size and/or use, the analysis in this report focuses on utility-scale systems – specifically those 1 MW or greater in their nameplate capacity. According to NCSEA’s data, there are 703 of these systems currently installed in the state totaling a generation capacity of 5,786 MW.

Agriculture is another important industry in the state. As of 2021, there were 45,100 farms in North Carolina producing goods, such as soybeans, corn, sweet potatoes, and livestock according to the US Department of Agriculture.² In 2020, North Carolina led the country in sweet potato production, was third in turkey production, and third in hog and pig production, all according to the US Department of Agriculture.³ When combined, the NC Department of Agriculture & Consumer Services says that agriculture and agribusiness are the largest industry in the state, representing almost \$96 billion.⁴

Utility-scale solar PV development has grown significantly in North Carolina since 2009, increasing from three total systems in 2009 to more than 700, with some of that development occurring on agricultural land. To better understand the types of area that these installations occupy, NCSEA conducted a land use analysis with GIS footprints of each solar PV system with a nameplate capacity of 1 MW or more combined with land use data from the National Land Cover Dataset.⁵

“This farm has been in the family longer than we can trace back. We would never consider selling, so our solar lease is really good, and the land is really good. If anything or anybody else had come along, we would have said no. But we know the value of clean energy, and to promote it in this area meant a lot to us.”

- Helen Livingston, NC Farm owner

This analysis is an update to a project that NCSEA conducted with the North Carolina Department of Agriculture and Consumer Services in 2017 about the land occupied by utility-scale solar PV systems in North Carolina.⁶

The analysis found that utility-scale PV systems occupy 38,081 total acres of land. The analysis also found that 31,125 acres of that total are considered agricultural land – defined as cultivated cropland, evergreen forest, or pasture/hay. In total, the state of North Carolina is comprised of 31,537,616 acres of land, with 10,999,656 being attributed to agricultural purposes. Given these numbers, solar PV only occupies 0.12% of the total land area of the state and 0.28% of agricultural land.

Given these numbers, solar PV only occupies 0.12% of the total land area of the state and 0.28% of agricultural land.

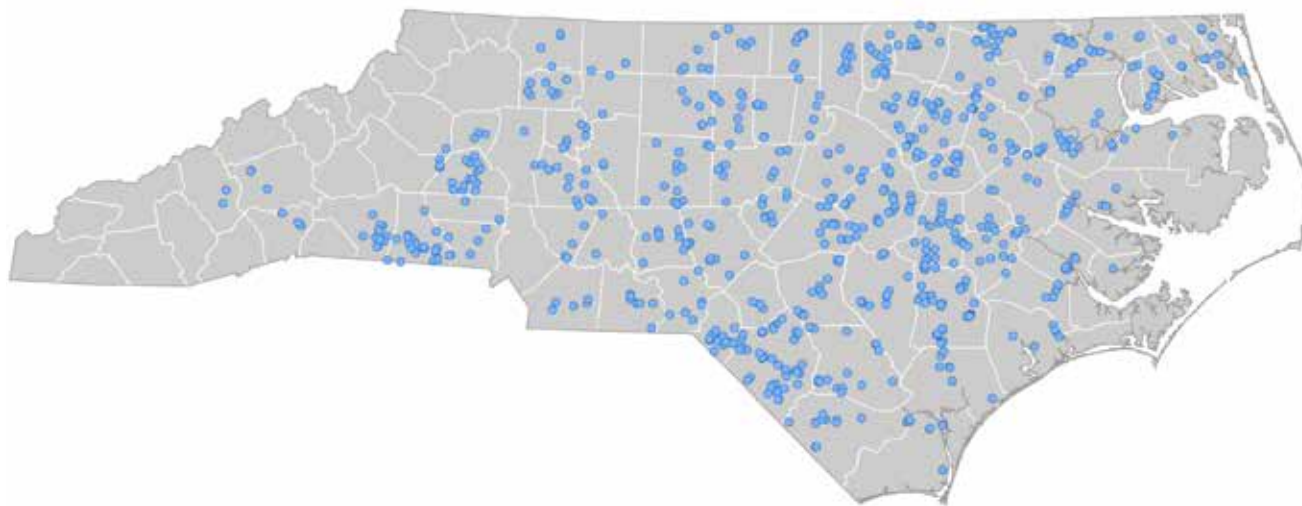

Figure 1. Locations of utility-scale solar PV systems with generating capacity of 1 MW or greater in NC

Compared to other forms of redevelopment, classified as either Developed, Open Space (i.e. single-family housing, golf courses, parks) or Developed, Low Intensity (i.e. single-family housing), which each comprise 7.18% and 3.42% of agricultural land respectively, PV development covers a low amount of agricultural land.

While utility-scale solar PV development has occurred on a small amount of agricultural land in North Carolina, there are other land uses that have repurposed significantly more land, such as residential home development. Regardless, for the small amount of agricultural land that solar PV does occupy, there are methods of system installation that can co-locate agricultural activities with solar PV, such as planting beneath raised solar PV panels and allowing for animals to graze in and around operating systems in a practice called agrivoltaics.⁷ Furthermore, solar PV systems can offer a place to add pollinator habitats to support local ecosystems.

Agriculture in North Carolina

State Economic Benefits from Agriculture

Agriculture has long been the leading industry in the state, providing thousands of jobs and contributing billions of dollars in revenue for North Carolina while leading the country in the production of many commodities. According to the NC State Agricultural Extension, in 2021, 16% (\$96 billion) of the state's GSP (\$592 billion) came from agricultural activities.⁸ Agriculture also employs almost 780,000 people, which is 17.5% of North Carolina's workforce. These workers are spread over 45,100 farms which occupy 8.3 million acres according to the US Department of Agriculture.⁹

Agricultural National Ranks

North Carolina is also an agricultural leader in the country. For some of these products, North Carolina is or is among the nation's leaders. According to the NC Department of Agriculture, close to 60% of all the sweet potatoes grown in the United States are grown in North Carolina.¹⁰

COMMODITY	NATIONAL RANK
SWEET POTATOES	1ST
TOBACCO	1ST
POULTRY & EGGS	1ST
HOGS & PIGS	3RD
TURKEYS	3RD
CUCUMBERS	3RD
BELL PEPPERS	3RD

Table 1. North Carolina national commodity production ranks (2020) according to the US Department of Agriculture¹¹

Solar PV in North Carolina

State Economic Benefits from Solar

Renewable energy is a significant industry in the state, providing nearly 100,000 jobs in North Carolina, according to E2 (Environmental Entrepreneurs) and representing almost \$20 billion in investment since 2007 according to a study from RTI International.^{12,13} Solar photovoltaics are the largest subset of the clean energy economy besides energy efficiency, with over 8,000 jobs.

Additionally, utility-scale solar PV systems contribute significant tax revenue to the counties in which they are installed. In a previous project quantifying those taxes, NCSEA found that on average, the property taxes paid after a system was installed increased by over 450%, when including real estate, personal property, and rollback taxes when applicable and available.¹⁴ In total, the solar PV systems included in the study paid over \$13.5 million in taxes.

Solar National Rank

North Carolina is also a national leader in the clean energy industry with the 9th most total clean energy industry jobs of any state. North Carolina also has the 4th most solar PV generating capacity in the US according to the Solar Energy Industries Association.¹⁵

STATE	RANK	SYSTEMS	CAPACITY (MW)
CALIFORNIA	1	1,445,035	34,950
TEXAS	2	148,936	13,845
FLORIDA	3	118,273	8,206
NORTH CAROLINA	4	28,467	7,811
ARIZONA	5	209,513	5,644
NEVADA	6	79,097	4,511
GEORGIA	7	4,768	4,269
NEW JERSEY	8	146,116	3,854
VIRGINIA	9	25,154	3,761
MASSACHUSETTS	10	125,219	3,607

Table 2. Ten states with the most solar PV generating capacity

Economic Benefits of Solar to Agricultural Landowners

Hosting a utility-scale solar PV system on one's land can be an opportunity for a landowner to generate a more stable and potentially higher income than normal farming operations. While lease amounts are not publicly available, a variety of sources report values between \$300-\$2,000 per acre depending on the exact situation – and typically these rent payments increase over the length of the lease.¹⁶ In fact, according to the US Department of Agriculture, even at the low end of those lease payments, solar PV would pay better per acre than barley, oats, or hay production.¹⁷

Land Occupied by Utility-Scale Solar PV in North Carolina

2017 Report

In the original iteration of this land use analysis, NCSEA collaborated with the NC Department of Agriculture & Consumer Services to determine the amount of agricultural land that utility-scale solar PV systems occupy in North Carolina. Using a similar methodology to this analysis, NCSEA found that the 341 systems that were installed at that time occupied 11,559 total acres of land - 9,074 of which were agricultural land. Also at that time, there was 4,745,014 acres of agricultural land in North Carolina, which means that utility-scale solar PV systems occupied 0.19% of the state's agricultural land.

2022 Report

Methodology

NCSEA calculated land use figures by drawing GIS footprints utilizing aerial imagery of each solar PV system installed in North Carolina, superimposing these footprints over land use GIS files, and calculating the amount of land each footprint occupied in each land use category. The first solar PV systems included in this analysis were installed in 2009, so NCSEA used land use data from 2008. NCSEA compared land use data from before any of the solar PV systems were installed to quantify the amount of land occupied by solar PV as well as the amount that was previously used for agriculture.

Specifically, NCSEA utilized data from our Renewable Energy Database (REDB), a statewide clearinghouse of installed renewable energy systems, to identify 1 MW and greater in nameplate generating capacity systems. The REDB is the most comprehensive source of renewable energy system information in North Carolina and sources its data from the NC Utilities Commission.

The footprints of these systems were mapped out using the latest NC OneMap orthoimagery. NC OneMap is a source of geospatial data compiled from various government agencies and universities in North Carolina.¹⁸

This analysis yielded 703 GIS footprints, which were then overlaid on a land cover GIS file from the National Land Cover Dataset (NLCD). The NLCD dataset classifies land in the United States into categories based on its usage and contents including open water, vegetated lands (forests, grasslands, moss, lichens, etc.), and even levels of developed land. This data is provided by the Multi-Resolution Land Characteristics Consortium (MRLC) and includes federal agencies, such as the US Geological Survey, Bureau of Land Management, and US Forest Service.¹⁹

NCSEA then used ArcGIS's ArcMap program to identify the sections of the NLCD data that the solar PV systems occupy, totaling up the amount of area in each land use category.

Example

The following images demonstrate this process for the Holstein solar PV system, a 20 MW installation located in Maxton, NC, and completed in 2015.²⁰

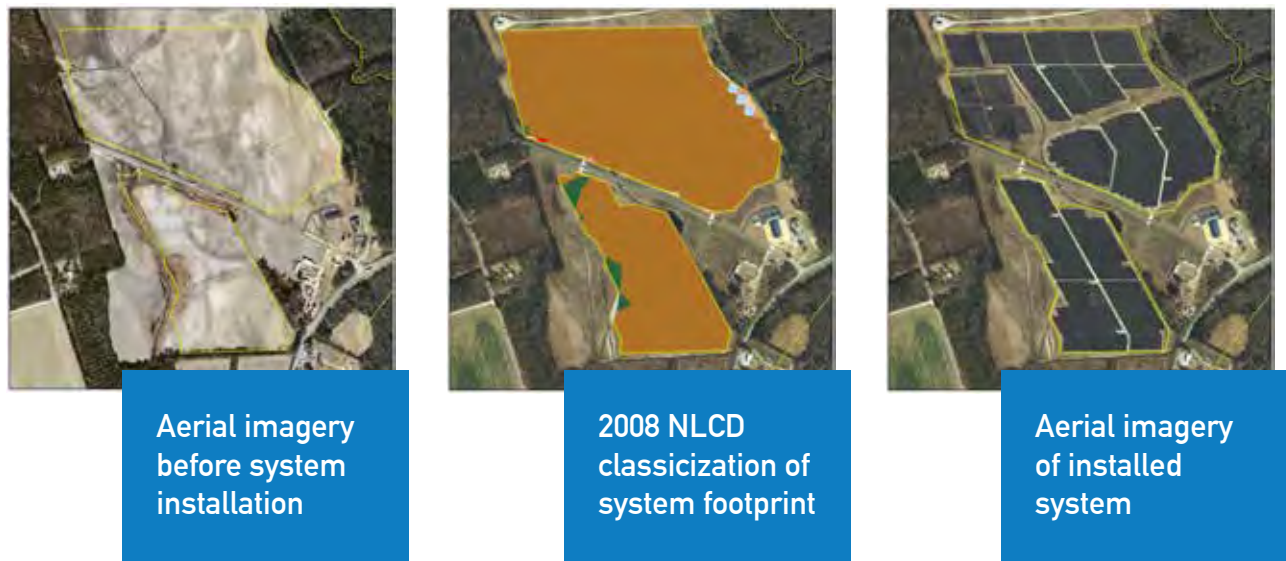

Figure 2. Aerial imagery and GIS files of a utility-scale solar PV system in North Carolina

The Holstein system occupies a footprint of 115 acres that was mostly cultivated cropland before installation.

Land Cover Categories

The National Land Cover Dataset labels 20 types of land use, but four of these are exclusive to Alaska.

NLCD Land Cover Classification Legend	
11 Open Water	52 Shrub/Scrub
12 Perennial Ice/ Snow	71 Grassland/Herbaceous
21 Developed, Open Space	72 Sedge/Herbaceous*
22 Developed, Low Intensity	73 Lichens*
23 Developed, Medium Intensity	74 Moss*
24 Developed, High Intensity	81 Pasture/Hay
31 Barren Land (Rock/Sand/Clay)	82 Cultivated Crops
41 Deciduous Forest	90 Woody Wetlands
42 Evergreen Forest	95 Emergent Herbaceous Wetlands
43 Mixed Forest	
51 Dwarf Scrub*	

* Alaska only

Figure 3. NLCD land cover classification categories

While most of the land cover classifications are self-evident, it is important to define the four “developed” categories. According to the MRLC, these are how the developed categories are characterized:²¹

- **Developed, Open Space** - areas with a mixture of some constructed materials, but mostly vegetation in the form of lawn grasses. Impervious surfaces account for less than 20% of total cover.
 - These areas most commonly include large-lot single-family housing units, parks, golf courses, and vegetation planted in developed settings for recreation, erosion control, or aesthetic purposes.
- **Developed, Low Intensity** - areas with a mixture of constructed materials and vegetation. Impervious surfaces account for 20% to 49% percent of total cover.
 - These areas most commonly include single-family housing units.
- **Developed, Medium Intensity** - areas with a mixture of constructed materials and vegetation. Impervious surfaces account for 50% to 79% of the total cover.
 - These areas most commonly include single-family housing units.
- **Developed, High Intensity** - highly developed areas where people reside or work in high numbers.
 - Examples include apartment complexes, row houses and commercial/industrial. Impervious surfaces account for 80% to 100% of the total cover.

Results

From NCSEA’s analysis, the 703 installed solar PV systems 1 MW or greater in nameplate capacity occupy a total of 38,081 acres of land. Of that total, 23,601 acres, or 62%, were categorized as cultivated cropland in 2008. The next highest categories of land use were evergreen forest (4,984 acres, 13%), deciduous forest (2,682 acres, 7%), and pasture/hay (2,540 acres, 7%).

LAND USE CATEGORY	ACRES	LAND USE CATEGORY	ACRES
DEVELOPED, OPEN SPACE	477	CULTIVATED CROPS	23,601
DEVELOPED, LOW INTENSITY	141	EVERGREEN FOREST	4,984
EMERGENT HERBACEOUS WETLANDS	59	DECIDUOUS FOREST	2,682
DEVELOPED, MEDIUM INTENSITY	44	PASTURE/HAY	2,540
BARREN LAND	16	GRASSLAND/HERBACEOUS	1,006
OPEN WATER	15	MIXED FOREST	959
DEVELOPED, HIGH INTENSITY	2	SHRUB/SCRUB	866
TOTAL	38,081	WOODY WETLAND	687

Table 3. Land occupied by solar PV systems 1 MW or greater in nameplate capacity by category from 2008 NLCD data

Figure 4. Breakdown of NLCD land use categories of NC solar installation footprints

NCSEA also calculated land use totals for the entire state of North Carolina from that same 2008 NLCD land use file.

LAND USE CATEGORY	ACRES	LAND USE CATEGORY	ACRES
DECIDUOUS FOREST	6,103,708	SHRUB/SCRUB	1,024,732
WOODY WETLAND	4,583,597	GRASSLAND/HERBACEOUS	772,049
CULTIVATED CROPS	4,337,847	OPEN WATER	492,115
EVERGREEN FOREST	4,150,557	DEVELOPED, MEDIUM INTENSITY	396,321
MIXED FOREST	3,241,144	EMERGENT HERBACEOUS WETLANDS	374,962
PASTURE/HAY	2,511,251	DEVELOPED, HIGH INTENSITY	137,789
DEVELOPED, OPEN SPACE	2,265,552	BARREN LAND	66,608
DEVELOPED, LOW INTENSITY	1,079,383	TOTAL	31,537,616

Table 4. Land use categories from 2008 NLCD data for all of NC

Using similar designations from other agricultural land use studies, NCSEA combined the cultivated crops, pasture/hay, and evergreen forest categories to establish an agricultural land use category.

This means solar PV systems occupy 31,125 acres of a total 10,999,656 acres of agricultural land in North Carolina, or 0.28%. When compared to the land use data from the entire state, these solar PV systems occupy 0.12% of all the land in the state.

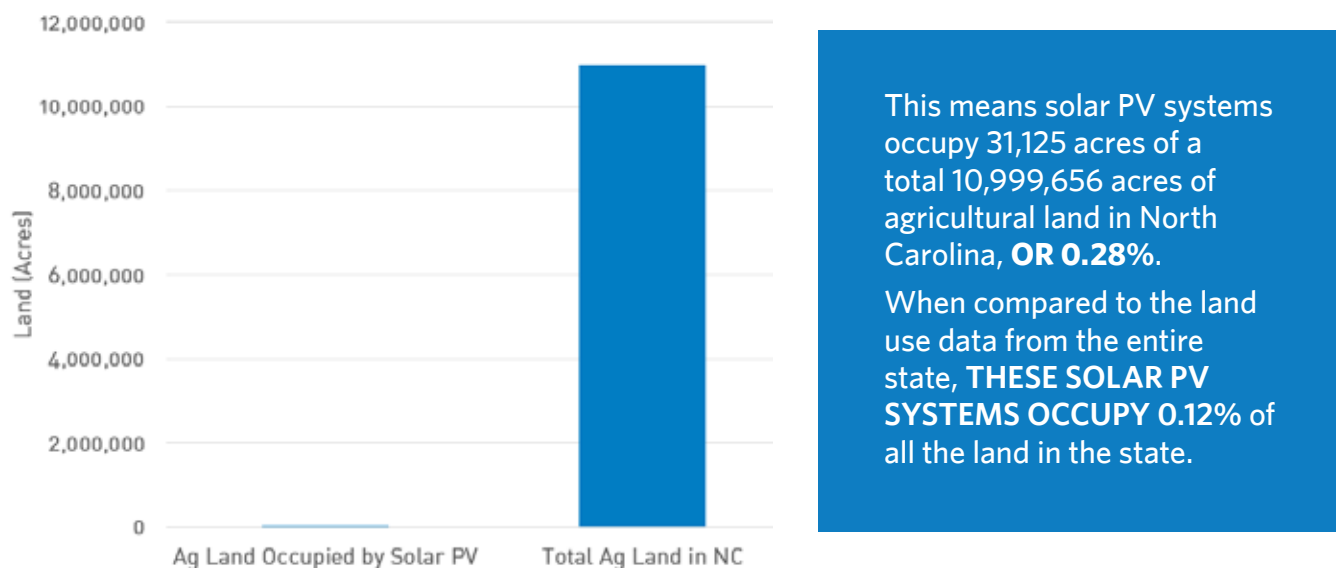

Figure 5. Agricultural land occupied by solar PV systems and total agricultural land in North Carolina

Discussion

Solar PV systems in some cases do occupy formerly agricultural land; however, it is worth noting that these systems have contributed to much less agricultural land loss than other forms of development. According to a report from the American Farmland Trust highlighting data from 2001-2016, 731,600 acres of North Carolina farmland were developed in total.²²

Not all the solar PV systems included in this analysis were installed during that period of time. If they were, the amount of agricultural land they occupy would only represent 4.25% of the total agricultural land lost. Other land uses, especially low-density residential development, comprise the lion's share of agriculture redevelopment with 78% of the total area loss.

Other land uses, especially low-density residential development, comprise the lion's share of agriculture redevelopment with 78% of the total area loss.

In the case of low-density residential development, this type of activity has a much more permanent impact on the landscape compared to solar PV systems, which oftentimes have a measurable lifespan.

For instance, this neighborhood in Johnston County has a total footprint of 330 acres, 150 of which are former cropland. This development not only includes homes, but also permanent roadways and utilities servicing each of the households.

Figure 6. Before (2005) and after (2021) aerial photos of a neighborhood in Johnston County

Highway construction is another significant type of land development, as seen with US 70 and I-795 in Goldsboro, NC.

Figure 7. Before (2000) and after (2021) construction of US 70 Bypass and I-795 in Goldsboro

Utility-scale solar PV systems have a typical lifespan of around 25 years. In some cases, these facilities may be modified or repowered at the end of their useful life, but they can also be returned to their previous land use provided that certain precautions are taken during the initial construction phases. The same cannot be said for these other types of land use.

Responsible Solar Land Use

Native Plants and Pollinators

While more solar PV systems and other forms of clean energy installations are needed to transition away from fossil fuels, they should not come at the expense of the natural features found on the land they occupy.

Organizations including The Nature Conservancy offer general principles when citing and constructing these systems to reduce their impact within local ecosystems but emphasize that specific recommendations will vary between specific locations. Recommendations include restoring native vegetation and grasslands, avoiding erosion, and steering clear of locations with high native biodiversity.²³

Further, large-scale solar PV installations are an opportunity to develop pollinator habitats supportive of organisms such as bees and butterflies that are integral to various ecosystems. The North Carolina Pollinator Conservation Alliance provides a list of specific native species that should be considered, along with a series of recommendations outlining where to locate those plants in proximity to systems, while creating buffer areas around the solar PV systems themselves.²⁴

Decommissioning

Utility-scale solar PV systems generally have a lifespan of around 25 years and unless they are repowered, these systems are usually removed from where they are installed. While there are concerns about the quality and usefulness of the land after that removal, utility-scale solar PV systems have minimal permanent environmental impact when the proper care is taken. Although decommissioning responsibilities are generally lease-specific and can sometimes be directed by a county ordinance, typically the project developer oversees removal.

As part of 2019's HB 329, the North Carolina General Assembly directed the NC Department of Environmental Quality (DEQ) to "establish a regulatory program to govern (i) the management of end-of-life photovoltaic modules....and (ii) decommissioning of utility-scale solar projects."²⁵ According to DEQ, this study found "financial assurance requirements are not necessary to ensure proper decommissioning."²⁶ Regardless, DEQ now recommends that currently operating systems can decommission according to their current plans but new systems will have to provide financial assurance mechanisms of some kind five years before their end of operation.²⁷

Solar Farm FAQs:

- **Do solar farms reduce adjacent property values?**
 - Numerous studies prove statistically from actual property sales that there is no impact to neighboring property values when the solar panels are setback 300ft from residences and appropriately screened. Refer to the following among others:
 - CohnReznick – Property Value Impact Study: Adjacent Property Values Solar Impact Study: A Study of Eight Existing Solar Facilities, Patricia McGarr & Andrew Lines, 2020.
 - Christian P. Kaila & Associates – Property Impact Analysis – Proposed Solar Power Plant Guthrie Road, Stuarts Draft, Augusta County, Virginia, Christian Kaila & George Finley 2020
 - NorthStar Appraisal Company – Impact Analysis for Nichomus Run Solar, Pilesgrove, NJ, William J. Sapio, September 16, 2020.
 - Farm Journal Guest Editor, March 22, 2021 – Solar’s Impact on Rural Property Values
 - National Renewable Energy Laboratory – Top Five Large-Scale Solar Myths, February 3, 2016
 - University of Texas at Austin, May 2018 An Exploration of Property-Value Impacts Near Utility-Scale Solar Installations.
 - University of Rhode Island, September 2020, Property Value Impacts of Commercial-Scale Solar Energy in Massachusetts and Rhode Island

- **Who is most likely to oppose solar farms?**
 - The most likely opponents to solar farms are tenant farmers who see industries competing for use of land as a threat to their business. Neighbors to solar farms who fear their property values will be negatively impacted by solar farms on adjacent properties also tend to oppose solar farms until measures such as sufficient setbacks and screening are established to protect them.

- **Will solar farms take up all the farming land in Graves County?**
 - *Comparison with North Carolina:* a study in North Carolina¹ showed that even if North Carolina obtained 26.5% of its electricity needs from solar, it would still only use about 2.2% of the cropland in the state. North Carolina is ranked 4th in the nation for most installed solar generators and has hundreds of times as much installed solar as Kentucky.²
 - In the 2020 census, North Carolina had a population more than 130% larger than Kentucky's, and North Carolina only has about 64% as much farmland as Kentucky (8.3 million acres vs KY's 12.9 million).³ Per a 2022 report, solar only occupies 0.28% of the agricultural land in the North Carolina.⁴
 - It's helpful to keep in mind that farmland has been used extensively for energy production since the early 2000s when corn ethanol production began to increase dramatically. In 2022 over 1/3 of all corn grown in the US was used for ethanol.⁵
 - *Limits on Solar:* Before being limited by local regulations, solar farm development is limited by landowners and by the constraints on the power grid. If landowners don't sign a lease or sell their land for solar, there is nowhere to put solar farms. Furthermore, the power grid can only absorb so much electricity in any one location or on any single power line. Hence, there is a natural competition and natural limit on locations suitable for solar farms. Once one large solar farm is installed on a transmission line, the fixed costs for connecting a second on the same power line make additional solar cost-prohibitive.

- **What happens when the solar farm is decommissioned?**
 - Since solar farm installation involves driving galvanized posts into the ground without any cement, restoration of the land to agricultural use is simple. At the end of a solar farm useful life, the panels are recycled, the posts and cable pulled out, and the inverters and transformers removed. The ground can be returned to farming.

⁵ See the Alternative Fuels Data Center at US Department of Energy: <https://afdc.energy.gov/data/10339>

- **Are solar farm decommissioning requirements in line with other business or uses in the county?**
 - Solar farms are often singled out by regulations and required to post bonds for decommissioning, effectively making the solar facility start paying for its removal from day one. Gas stations, body shops, factories, and other commercial or industrial uses are not burdened in the same way.

- **Is solar subsidized by the federal government?**
 - Unlike traditional farming, solar farms do not receive protected insurance programs or payments from the federal government. They only have access to tax credits to offset the investment. Unlike land in typical agricultural uses, land used for solar does not benefit from agricultural tax rates below market value or programs such as Greenbelt or Present Use Value programs. Conversion to solar requires real property to be reassessed and taxed at fair market rates.

- **Do solar farms kill birds?**
 - Photovoltaic solar farms (solar farms that use solar panels) do not kill birds. You may have seen videos of birds igniting in mid-flight over a solar farm. That only happens over thermal solar farms that use reflector mirrors to concentrate light and heat on water in a tower. Photovoltaic solar farms absorb light, instead of reflecting it.

- **Do solar farms contaminate the soil or environment?**
 - Solar energy system installation, or construction, process does not require toxic chemicals or processes. Solar photovoltaic (“PV”) panels typically consist of glass, polymer, aluminum, copper, and semiconductor materials that can be recovered and recycled at the end of their useful life. PV technologies employ few toxic chemicals and those used are used in very small quantities that do not endanger public health—a solar panel is about half as toxic as a typical 12-gauge shotgun shell. Also unlike many row crop operations, solar facilities generally use only general use herbicides, which are available over the counter, as opposed to restricted use herbicides commonly used in commercial agriculture that require a special restricted use

license. Due to the reduction in the pollution from fossil-fuel-fired electric generators, the overall impact of solar development on human health is overwhelmingly positive.⁶

o **Will a solar farm near me lower my power bill?**

- o Unlike natural gas and coal plants, solar farms have no fuel cost. Solar energy is the most cost-effective way to add new power generation to the grid. See below a graph from Bloomberg showing the levelized cost of energy (LCOE) for different generation sources⁷:

- o Since solar provides new energy generation with no exposure to fuel costs, it contributes to energy independence and an overall stabilization and reduction of the power price, although market factors and the complexities of the power grid make it difficult to trace direct savings to nearby electricity consumers.

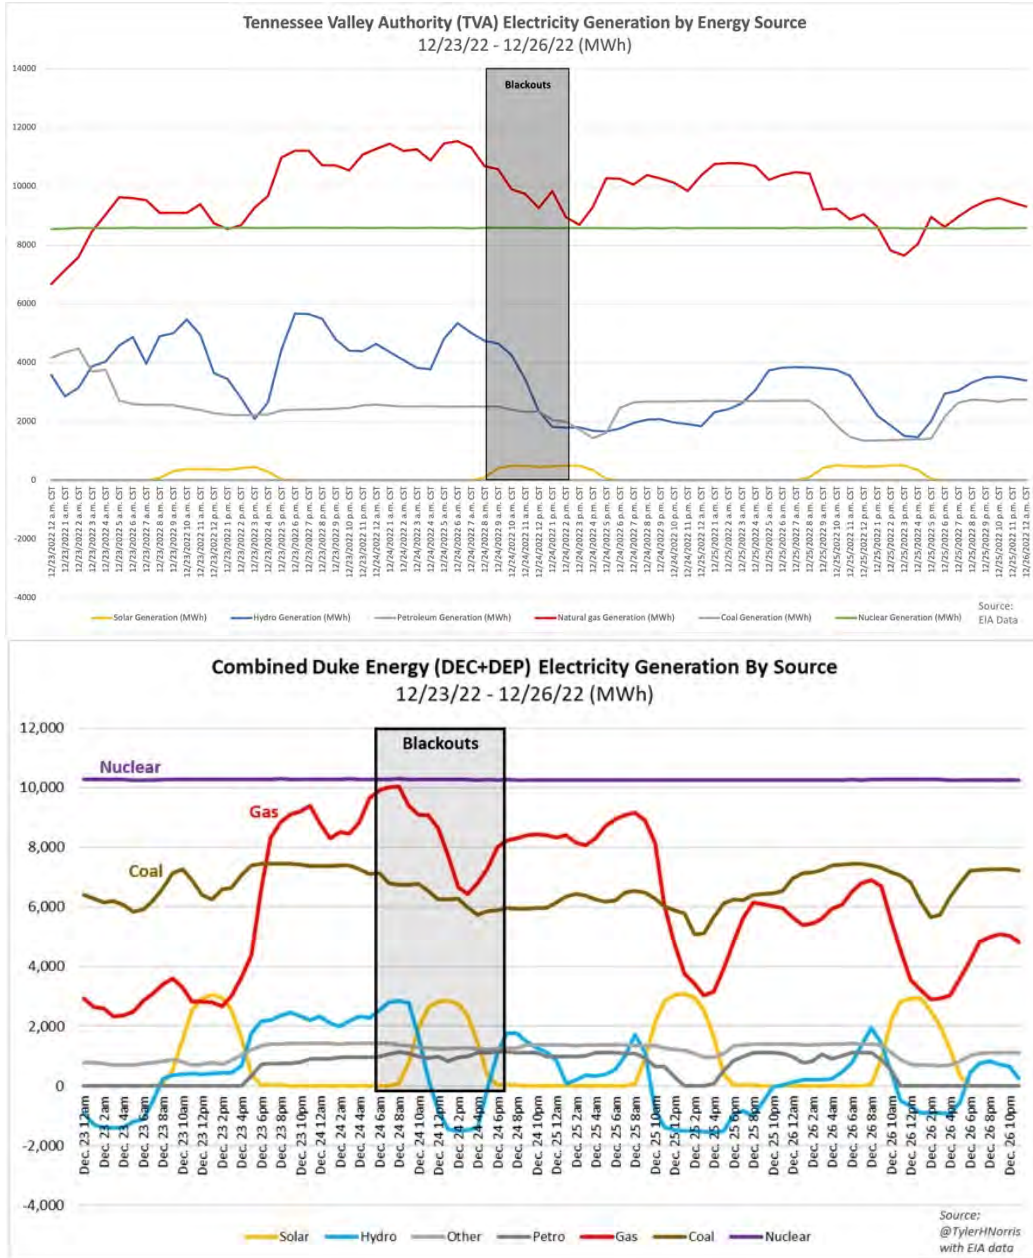

• **Is solar energy reliable?**

- o Solar power plants provide a reliable and predictable source of energy, particularly when they are coupled with battery storage. Solar panels only produce electricity when the sun is up. Coupling with batteries permits power companies to save the electricity from the sun and

⁶ See “Health and Safety Impacts of Solar Photovoltaics” White-paper, N.C. Clean Energy Technology Center at N.C. State University, 2017. See also “North Carolina Solar Land Use and Agriculture. 2022 Update” published by NC Sustainable Energy Association.

⁷ “2H 2022 Levelized Cost of Electricity Update” published Dec 27, 2022. See: <https://about.bnef.com/blog/2h-2022-levelized-cost-of-electricity-update/>

dispatch it during peak hours, such as the cold hours of the morning during winter. In the recent rolling blackouts in December 2022, solar power plants in TVA territory performed at or above standard output while gas, coal, and even hydro plants had to ramp down because of complications with cold weather. See below graphs showing generation data from the Energy Information Administration—note that solar is still one of the smallest generators in the state. The second graph is from North Carolina which suffered similar blackouts but has a much larger solar fleet.

Banjo Creek Solar**

YOUR LAND, YOUR LEGACY

A WISE CHOICE

When you lease your land for solar energy with GreenGo Energy, you enjoy the assurance of ongoing revenue and sustainability for the future.

- Solar energy provides 20-60% higher income than other agricultural uses.
- Provides stable long-term income with high profitability.
- We pay all real estate taxes on leased land during contract.

A SIMPLE TRANSITION

With GreenGo Energy leasing, you're a good neighbor. Solar energy is quiet, unobtrusive, and environmentally friendly.

- Property values are not adversely affected for your land or adjoining properties.
- Creates new discretionary property tax income for your community.
- Your land is carefully restored at lease end.

GREENGO ENERGY LEASES

GreenGo Energy's mission is straightforward: to build win-win partnerships with local communities through solar leasing. Leases provide a stable revenue while supporting clean power in rural America.

Lease contract terms are 25 years or more of commercial operation. Land purchase option is also possible.

Contact GreenGo Energy to learn how solar leasing can enhance your legacy.

HOW THE PROCESS WORKS

Once you choose GreenGo Energy, we will:

- Send a letter of intent with key terms of the lease.
- Review and execute the lease.
- Prepare for construction while you continue to farm your land.

Once the project is energized, you reap the benefits of a secure cashflow for years to come.

PROVEN EXPERIENCE

GreenGo Energy US, Inc. is based in Charlotte, North Carolina, and has leased over 17,000 acres throughout Texas, Tennessee, and North Carolina.

Greengo Energy has a proven record of:

- Scouting the most viable land for solar leasing.
- Developing projects that meet or exceed federal and local standards.
- Maintaining close relationships with landowners.
- Working with regional utilities, including Tennessee Valley Authority (TVA), Duke Energy, and the Electric Reliability Council of Texas (ERCOT).

PHOTOVOLTAIC POWER PLANT LOCATION

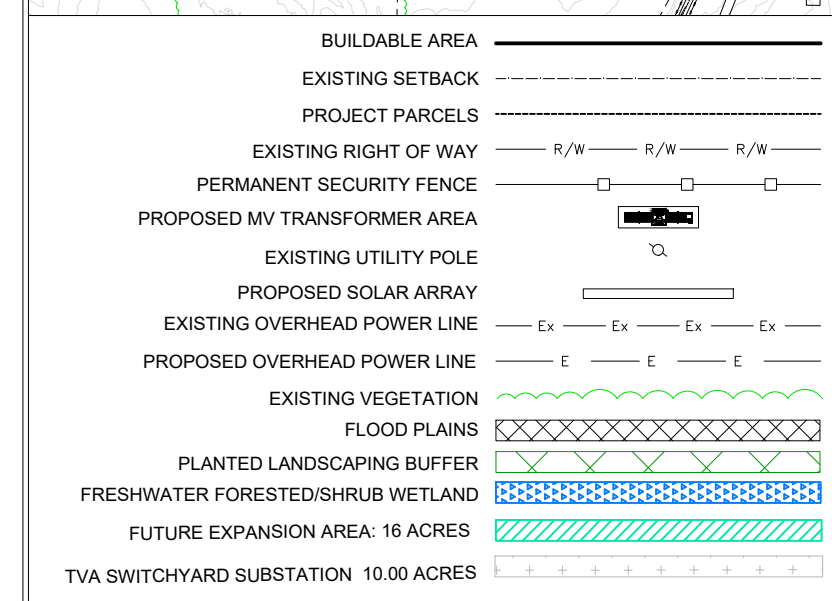

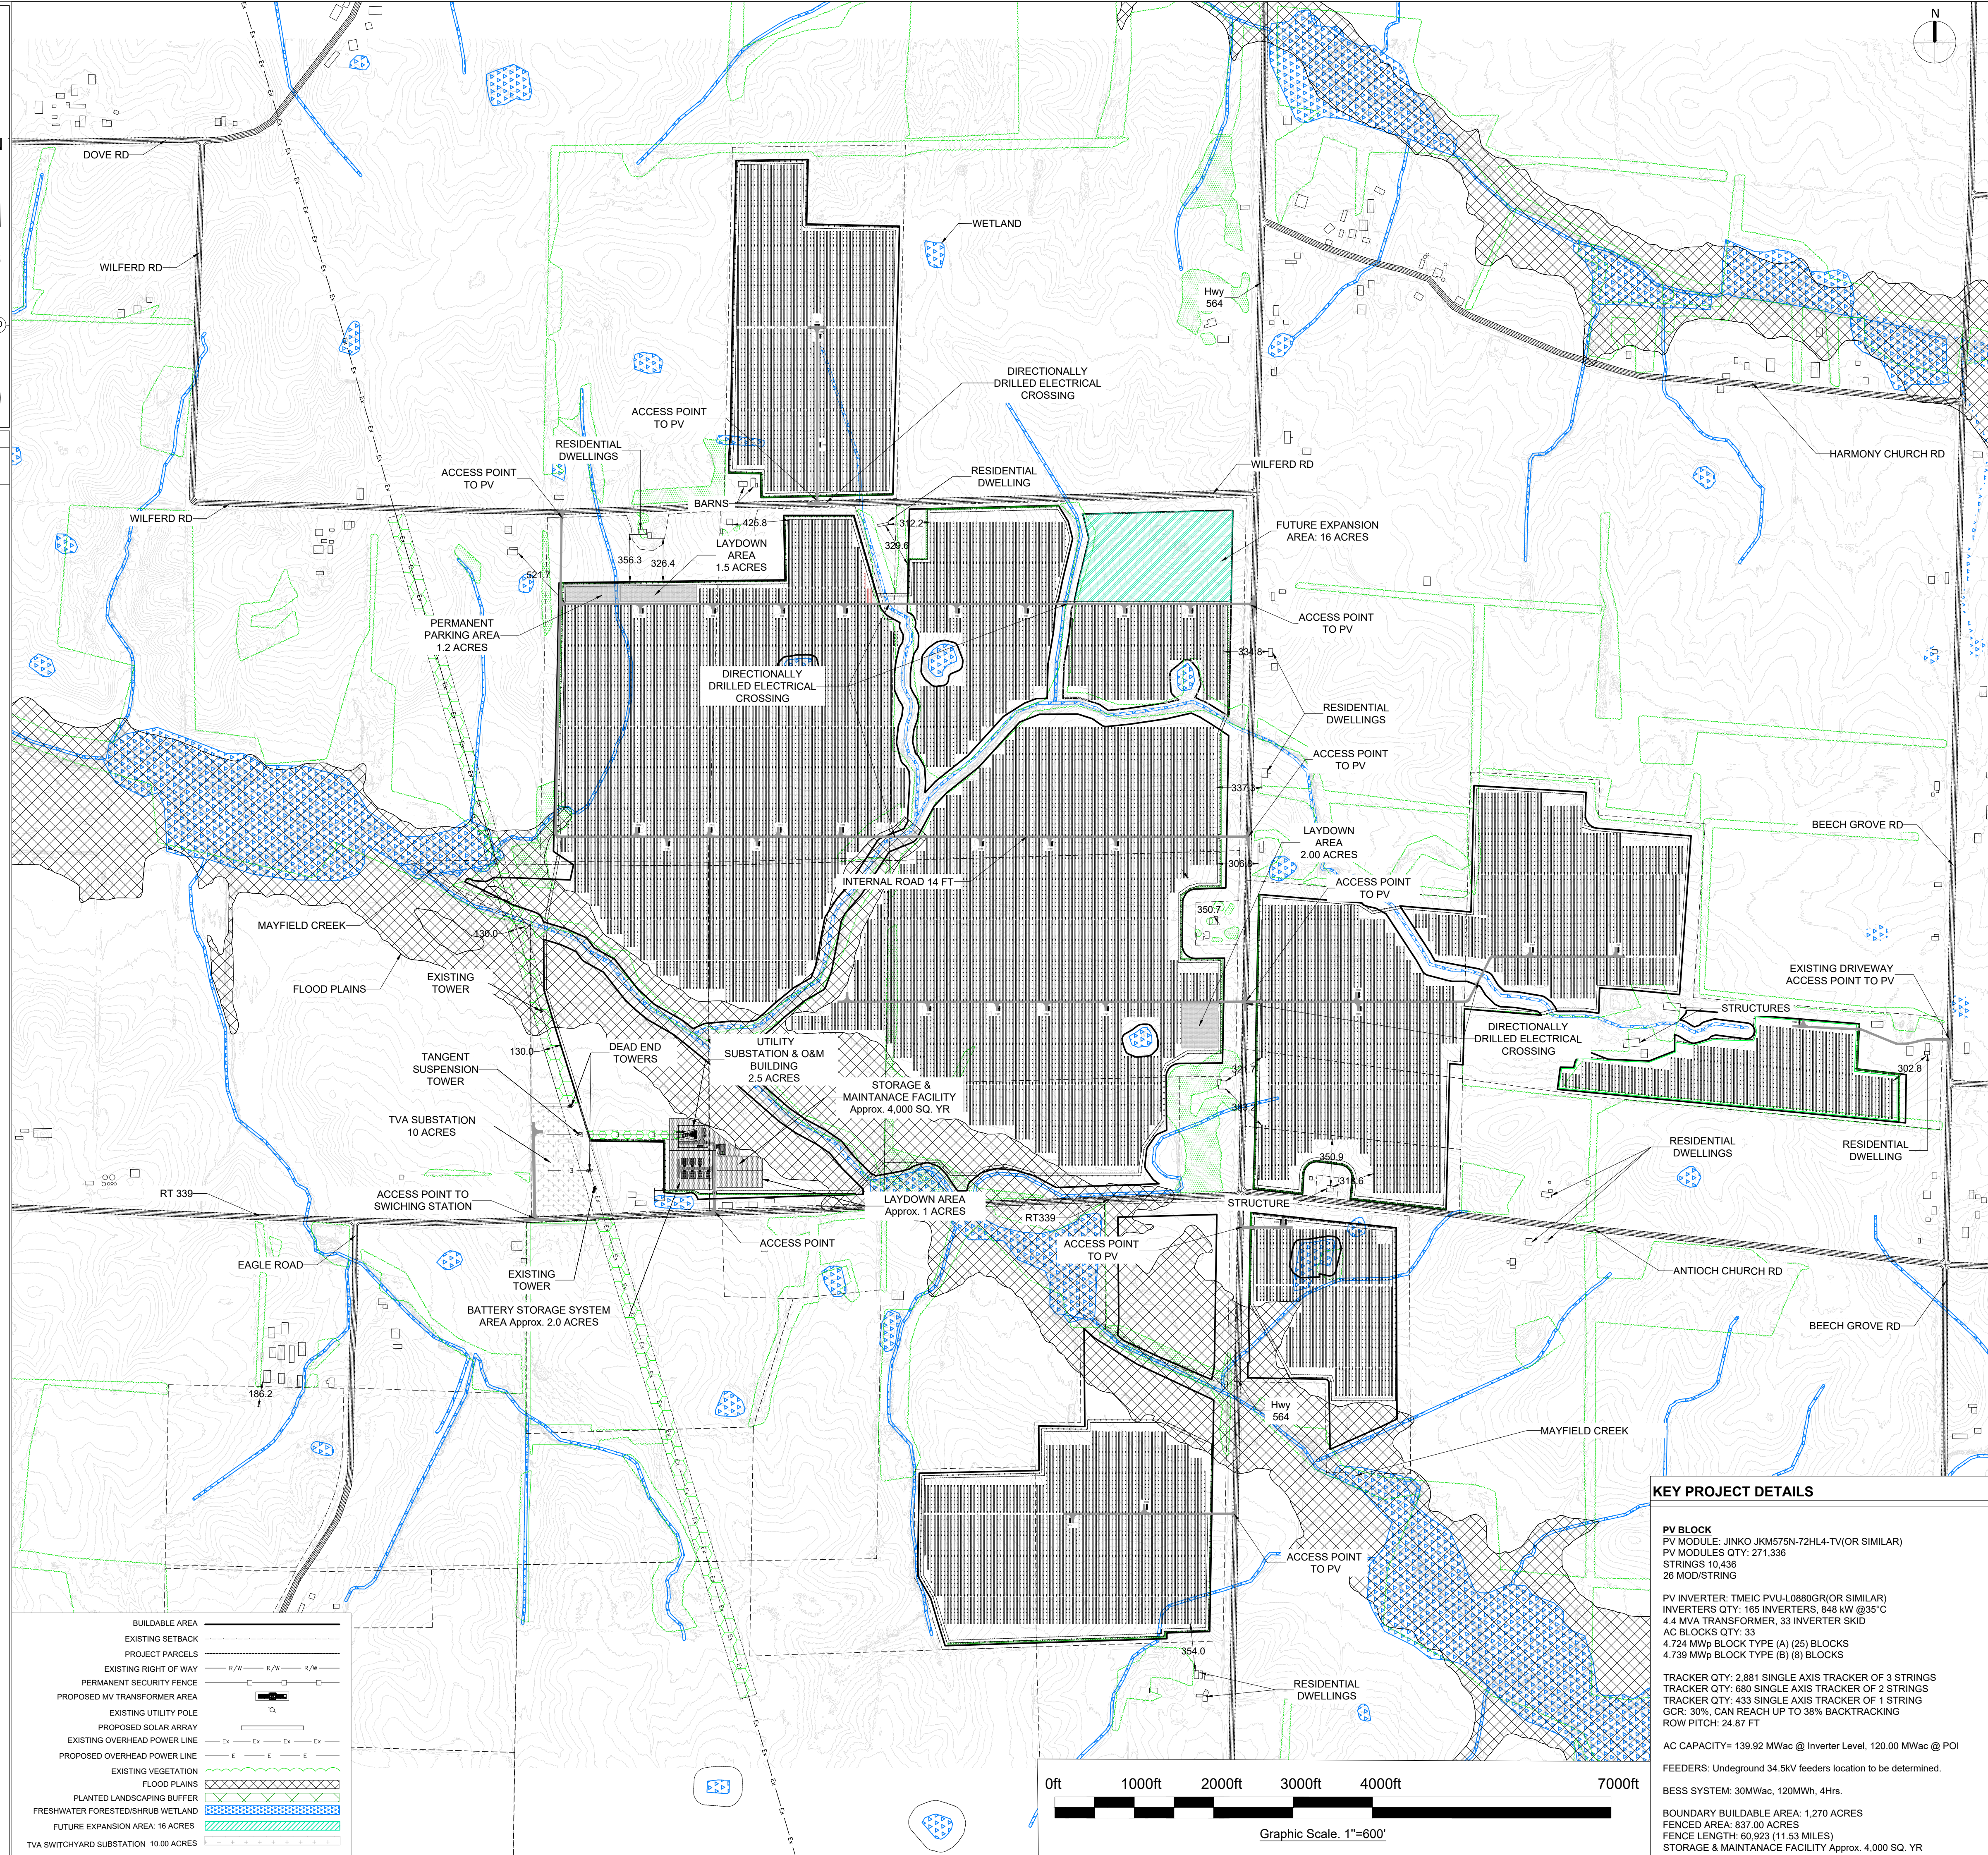

ADDRESS: Graves County, Kentucky, United States. COORDINATES: 36.643432°N, -88.534700°W

1) Applicant's Information:
Banjo Creek Solar LLC, 1900 South Blvd; Suite 306, Charlotte, NC 28203.

2) Property Information:
Parcel ID: 140.00.00.022.00 Parcel ID: 141.00.00.049.01
Parcel ID: 140.00.00.021.00 Parcel ID: 156.00.00.065.00
Parcel ID: 140.00.00.018.00 Parcel ID: 141.00.00.046.00
Parcel ID: 140.00.00.019.00 Parcel ID: 156.00.00.001.00
Parcel ID: 140.00.00.011.00 Parcel ID: 141.00.00.044.01
Parcel ID: 140.00.00.021.00 Parcel ID: 141.00.00.038.00
Parcel ID: 140.00.00.016.00 Parcel ID: 141.00.00.044.00
Parcel ID: 141.00.00.051.00 Parcel ID: 141.00.00.041.00
Parcel ID: 141.00.00.050.00 Parcel ID: 141.00.00.042.00
Parcel ID: 141.00.00.049.00 Parcel ID: 141.00.00.040.00
Parcel ID: 141.00.00.040.00 Parcel ID: 141.00.00.034.00
Parcel ID: 141.00.00.039.00 Parcel ID: 141.00.00.010.00
Parcel ID: 141.00.00.038.00 Parcel ID: 141.00.00.009.00
Parcel ID: 141.00.00.035.00
Location: Graves County, Kentucky, United States.

3) Notes:
-Total Property Boundary Constructible acres: ~ 1,270 acres
-Aluminum signs ("Danger-High Voltage" and "Danger-No Trespassing") will be placed on the permanent security fencing.
-Clearing limits may change to accommodate temporary construction features, such as erosion control features.
-No proposed lighting on site or directed onto adjacent properties.
-Safety fencing. Safety fencing will be installed around the exterior of the Solar Farm. Fencing will be at six (6) feet in height and will have barbwire mounted above the six (6) feet.
-Gates and Locks. Gates will be at least six (6) feet in height.
-Setbacks. The Solar Farm will be set back at least 30 feet from non-participating parcels that do not have residences and from county roads. The Solar Farm will be set back 100 ft from non-participating parcels with residences and from state roads. The Solar Farm will be set back at least 50 feet from the banks of any navigable stream.
-Storm water controls and erosion control retention ponds to be determined.
-Location of road and stream crossings is approximate. Directionally-drilled boring will be used to cross roads and streams.
-Trees on the Solar Farm parcel(s) may be cleared or trimmed to permit direct sunlight access to the Solar Farm.

4) Buffer Details:
Vegetative Buffer. Where standing vegetation does not exist, an evergreen vegetative buffer will be planted at the perimeter of the solar farm along road frontage and between residences and perimeter fence. The vegetative buffer will be composed of evergreen trees or shrubs, planted a maximum of 15 feet apart and which have the capacity to reach 6 feet in height at maturity.

Public Meeting
Images & Summary
June 6, 2023

The Banjo Creek Solar LLC public meeting was held on Saturday June 6, 2023 at the Sedalia Café, 5593 State Route 97, Mayfield KY.

Two representatives of Banjo Creek Solar LLC, ten families, two project lease landowners, and one county commissioner were in attendance. The Site Plan was presented together with a visual simulation video of the completed project. The presentation was brief and was followed by about an hour of Q&A.

A Kentucky Solar Farm FAQ's created by GreenGo Energy as well as a report on solar and land use in North Carolina and the GreenGo Energy brochure were all available for distribution.
