Implementation Of Its Demand-Side Management	)	
Programs; (3) Acceptance Of Its Annual DSM Status	)	
Report; And (4) All Other Required Approvals And	)	
Relief	)	

**APPLICATION**

Kentucky Power Company (“Kentucky Power” or the “Company”) applies to the Public Service Commission of Kentucky (“Commission”) pursuant to KRS 278.285(1) for an Order: (1) approving the continuation through December 31, 2024 of Kentucky Power Company’s Targeted Energy Efficiency Program (“TEE” Program”); (2) approving the Company’s recovery through its Demand-Side Management Adjustment Clause (Tariff Sheets 22-1 and 22-2) of its full costs, including lost revenues and incentives, associated with the Company’s TEE Program and approving the proposed tariff changes; (3) approving the reduction of Kentucky Power Company’s residential DSM factor to \$0.000149 per kWh and the commercial DSM factor to a credit of (\$0.000016) to permit the recovery through the Company’s Demand-Side Management Adjustment Clause of Kentucky Power’s full costs, including lost revenues, associated with the Company’s demand-side management (“DSM”)/energy efficiency (“EE”) program and the recovery of the costs of the Market Potential Study as previously approved by the Commission; (4) accepting the Company’s annual DSM status reports; and (5) granting all other required approvals and relief.

Kentucky Power states:

**APPLICANT**

1. Kentucky Power is a corporation organized under the laws of the Commonwealth of Kentucky.<sup>1</sup> The Company is in good standing in the Commonwealth.

2. The post office address of Kentucky Power is 1645 Winchester Avenue, Ashland, Kentucky 41101. The Company's electronic mail address is [kentucky\\_regulatory\\_services@aep.com](mailto:kentucky_regulatory_services@aep.com).

3. Kentucky Power is engaged in the generation, purchase, transmission, distribution and sale of electric power. Kentucky Power serves approximately 163,000 customers in the following 20 counties of eastern Kentucky: Boyd, Breathitt, Carter, Clay, Elliott, Floyd, Greenup, Johnson, Knott, Lawrence, Leslie, Letcher, Lewis, Magoffin, Martin, Morgan, Owsley, Perry, Pike and Rowan. Kentucky Power also supplies electric power at wholesale to other utilities and municipalities in Kentucky for resale. Kentucky Power is a utility as that term is defined at KRS 278.010.

**KENTUCKY POWER'S EXISTING DSM/ENERGY EFFICIENCY PROGRAMS**

4. Kentucky Power has offered DSM and EE programs since 1994.

5. On February 23, 2017, the Commission initiated an electronic investigation of the reasonableness of the Company's DSM programs and the rates associated with those programs in Case No. 2017-00097 (the "DSM Investigation").<sup>2</sup> On November 2, 2017, the Commission issued an Order in the DSM Investigation that, among other things, suspended all new DSM

---

<sup>1</sup> The Company's November 13, 2022 Certificate of Existence is filed as **Exhibit 1** to this Application.

<sup>2</sup> Order, *In the Matter Of: Electronic Investigation Of The Reasonableness Of The Demand Side Management Programs And Rates Of Kentucky Power Company*, Case No. 2017-00097 (Ky. P.S.C. Feb. 23, 2017) ("2017 DSM Investigation").

program activity during the pendency of the DSM Investigation.<sup>3</sup> On January 18, 2018, the Commission issued an Order in the DSM Investigation directing Kentucky Power to “eliminate offering any DSM programs, other than those programs that target income-eligible residential customers until there is a change in Kentucky Power’s capacity position that indicates a need for additional generation to serve its load.”<sup>4</sup> The TEE Program targets income-eligible residential customers.

6. By order dated January 6, 2023 in Case No. 2022-00392,<sup>5</sup> and consistent with the Commission’s January 18, 2018 Order in the DSM Investigation, the Commission approved continuation of the Company’s TEE Program through December 31, 2023.

#### **DSM/EE PROGRAM OPERATIONS**

7. For the 12 months ended September 30, 2023, the Company recovered \$381,287 from its residential customers through the DSM factor. For the same period, Kentucky Power’s net residential DSM program costs, incentive payments, and realized lost revenues totaled \$390,538.

8. A copy of the Company’s 2022 and 2023 DSM/EE Status Report is attached as **Exhibit 2**.

9. Kentucky Power’s TEE Program is administered in conformity with the Company’s tariff.<sup>6</sup>

---

<sup>3</sup> Order, *2017 DSM Investigation* at 5 (Ky. P.S.C. Nov. 2, 2017).

<sup>4</sup> Order, *2018 DSM Investigation*, at 13 (Ky. P.S.C. Jan. 18, 2018).

<sup>5</sup> Order, *In The Matter Of: Electronic Application Of Kentucky Power Company For: (1) Approval Of Continuation Of Its Targeted Energy Efficiency Program; (2) Authority To Recover Costs And Net Lost Revenues, And To Receive Incentives Associated With The Implementation Of Its Demand-Side Management Programs; (3) Acceptance Of Its Annual DSM Status Report; And (4) All Other Required Approvals And Relief*, Case No. 2022-00392 (Ky. P.S.C. January 6, 2023).

<sup>6</sup> P.S.C. Ky. No. 12 Original Sheet No. 22-3.

**THE PROPOSED CONTINUATION OF THE TEE PROGRAM AND PROPOSED TARIFF  
MODIFICATIONS**

10. Kentucky Power seeks authority to continue its existing TEE Program through December 31, 2024. The manner in which the Company proposes to operate its TEE program will be unchanged. Kentucky Power proposes within the existing program framework to reduce the number of heat pump to heat pump exchanges while keeping the number of central furnace to heat pump exchanges at the 2023 level.

11. Kentucky Power also seeks approval to increase its TEE Program's budget from its current level of \$281,000 to \$299,500 in 2024. The requested budget will allow for 94 participants in the program in 2024.

12. The 2023 budget provided for 98 participants. The Company proposes to reduce the number of participants in 2024 to 94 based upon the 2023 participation levels. Kentucky Power is reallocating the TEE funds between heat pump to heat pump exchanges and central furnace to heat pump exchanges based on the 2023 demand. Through September 2023 there were 53 central furnace to heat pump exchanges and zero heat pump to heat pump exchanges.

13. The Company proposes to allocate the 2024 TEE program heat pump exchange slots as follows: three for heat pump to heat pump exchanges (down from the current five) and 60 for central furnace to heat pump exchanges (no change from current amount). This allocation reflects 2023 program activity.

14. The increase in the proposed 2024 budget despite the proposed decrease in participants reflects the larger benefit paid for heat pump to heat pump exchanges and central furnace to heat pump exchanges. Customers electing a heat pump to heat pump exchange would receive a payment of up to \$2,500 (up from the current \$1,600). Customers electing a central

furnace to heat pump exchange would receive a benefit of up to \$3,000 (up from the current \$2,600).

15. The estimated budget for the TEE Program is attached as **Exhibit 3**.

16. The projected net energy and demand savings for the TEE Program are provided in **Exhibit 2**.

17. The Company requests that its full costs associated with the Company's DSM portfolio, as that term is defined in the Company's Tariff D.S.M.C., be recovered through Kentucky Power's Demand-Side Management Adjustment Clause (Tariff Sheets 22-1 and 22-2). A copy of the Company's modified Tariff Sheet Nos. 22-1 and 22-2 are attached as **Exhibit 4**.

18. Kentucky Power proposes to decrease the residential DSM surcharge factor from \$0.000247 per kWh to \$0.000149 per kWh. Kentucky Power is also proposing to decrease the commercial surcharge factor from \$0.000126 to a credit of (\$0.000016).

19. In 2023, the average residential customer using 1,300 kWh per month received a monthly DSM charge of \$0.32. The new proposed rate results in a \$0.19 monthly charge to the same customer. This is a decrease of 13 cents per customer per month.

20. The proposed decrease to the residential and commercial surcharge factors is, in large part, a result of the true-up of the costs of the Market Potential Study recovered through the 2023 DSM surcharge, the collection of which the Commission approved in the Company's last annual DSM filing in Case No. 2022-00392.

21. Through the 2023 DSM surcharge, the Company recovered the contract amount to perform the MPS (\$371,150) equally (50/50) from the residential and commercial customer classes upon recommendation by the Company's consultant. After allocation to the respective customer class, those amounts were included in the residential and commercial customer

surcharge factors. The Company proposes for this amount to be trued-up to actual costs as part of this DSM filing.

22. The original amount of the contract was \$371,150.00. The Company has paid a total of \$220,000.82 for the study through September 2023. The Company has received and is processing a final invoice of \$26,544.54. The Company expects to come in under budget, or below the initial contract price for the MPS, by \$124,604.64. The excess amount collected for the contract has been trued-up and factored into the 2024 DSM surcharge factor.

23. Additional details about the status of the MPS and the Company's proposal to recover and true-up the costs associated with the same may be found in the Direct Testimony of Scott E. Bishop, filed herewith.

24. Support for the calculation of the proposed DSM surcharge factors is provided in **Exhibit 5**.

25. Kentucky Power does not propose any other modifications to its Demand-Side Management Adjustment Clause or its DSM tariff through this Application.

26. Kentucky Power proposes to amend Tariff Sheets 22-1 and 22-2 to reflect the updated factors.

#### **COMMERCIAL DSM FACTOR**

27. The Commission's January 18, 2018 Order in Case No. 2017-00097 eliminated, *inter alia*, the Company's commercial DSM programs.

28. That same Order authorized the Company to continue to recover or refund any under-recovery or over-recovery, respectively, in connection with its discontinued commercial

DSM programs. In addition, subject to certain limitations, the Company was authorized to recover commercial DSM program lost revenues and incentives.<sup>7</sup>

29. The Company's currently authorized commercial DSM factor is \$0.000126. As stated earlier, Kentucky Power proposes to decrease the commercial surcharge factor from \$0.000126 to a credit of (\$0.000016) in order to true-up the costs recovered from commercial customers to perform the MPS. As explained in Case No. 2021-00420 and Case No. 2022-00392, the total costs to perform the MPS (\$371,150) should be, and were, recovered equally from the two customer classes who will actually benefit from the MPS—commercial and residential customers. Thus, the true-up of the MPS costs also will be apportioned equally to those classes of customers.

#### **ANNUAL DSM STATUS REPORT**

30. A Copy of Schedule C, which details the operation of the Company's DSM surcharge, is attached as **Exhibit 5**.

#### **TESTIMONY**

31. The testimony of Scott E. Bishop is filed in support of this Application.

#### **EXHIBITS**

32. The exhibits listed in the Appendix to this Application are attached to and made a part of this Application.

#### **COMMUNICATIONS**

33. Kentucky Power respectfully requests that communications in this matter be addressed to the e-mail addresses identified on Kentucky Power's November 8, 2023 Notice of Election of Use of Electronic Filing Procedures.

---

<sup>7</sup> Order, *2018 DSM Investigation* at 16 (Ky. P.S.C. January 18, 2018).

WHEREFORE, Kentucky Power Company respectfully requests that the Commission issue an Order:

(1) approving the continuance of Kentucky Power Company's TEE Program through December 31, 2024;

(2) approving the reduction of Kentucky Power Company's residential DSM factor to \$0.000149 per kWh to permit the recovery through the Company's Demand-Side Management Adjustment Clause of Kentucky Power's full costs, including the true-up of cost of the Market Potential Study and lost revenues, associated with the Company's residential DSM/EE portfolio;

(3) approving the modification of Kentucky Power Company's commercial DSM factor to a credit of (\$0.000016) per kWh to permit the true-up through the Company's Demand-Side Management Adjustment Clause of Kentucky Power's costs to conduct the Market Potential Study;

(4) modifying Tariff Sheet Nos. 22-1 and 22-2;

(5) accepting the Company's annual DSM Status Reports; and

(6) granting all other required relief or approvals.

Respectfully submitted,

Katie M. Glass

## **DEFINITIONS**

- 1) YTD Costs - Year-to-Date costs recorded through December 31, 2022.
- 2) YTD Impacts - Estimated in place load impacts for Year-to-Date participants.
- 3) PTD Costs - Costs recorded from the inception of the program through December 31, 2022
- 4) PTD Impacts - Estimated in place load impacts for Program-to-Date participants.

## **COMMENTS**

Our calculations are based on actual participants and costs as of December 31, 2022.

The estimated actual in-place energy (kWh) savings represents the annual energy savings for customers beginning program participation in the reported period. It is computed by applying the average customer annual net energy savings, including 9.4% T&D losses. The savings are included with the latest program evaluation report or the initially filed program estimate where an evaluation report has not been completed. The estimated actual in place energy (kWh) savings are calculated in accordance with the Sunset Provision contained in the joint application, filed September 27, 1995.

The estimated anticipated peak demand (kW) reduction is a product of the number of net participating customers or measure quantity (excluding free riders) and projected winter/summer demand reductions filed for each program. The anticipated peak demand (kW) reductions include a 10.5% T&D loss savings.

The calculation of YTD and PTD estimated in place energy (kWh) savings and anticipated peak demand (kW) reductions contained in this status report reflect, wherever applicable, the program evaluation results of each individual program as described in the August 16, 1999, June 30, 2002, June 30, 2005, June 30, 2008, June 30, 2010, August 15, 2011, August 15, 2012, and August 15, 2014, DSM collaborative report, and August 10, 2015, Demand Side Management Program Plan.

The individual DSM lost revenue, efficiency incentive and maximizing incentives as of June 30, 1997 are calculated based on the initial values from Exhibit E in the joint application, filed September 27, 1995. A retroactive adjustment of the initial values of the efficiency incentives and net lost revenue kWh impacts was used for each program for the first eighteen months (1/1/96 to 6/30/97). The lost revenue, efficiency incentive and maximizing incentive for the period 1/1/2022 to 12/31/2022 are calculated using the revised values contained in Schedule C of this status report.

The program lost revenue is the product of the number of participating customers, the average net energy savings (kWh) per customer and the net lost revenue (\$/kWh). The number of participating customers is equal to 1/2 of the new participants for the current month, plus the cumulative participants from the previous months. The program-to-date lost revenues are calculated in accordance with the Sunset Provision contained in the joint application, filed September 27, 1995.

The efficiency incentive is the product of the number of participants for the month and the efficiency rate (\$/participant). The maximizing incentive is calculated as 5% of actual program cost for the month.

## COMMENTS:

The Targeted Energy Efficiency Program provides a variety of services, including a home energy audit, weatherization and seal-up to targeted low income customers.

The Equipment / Vendor cost categories includes the cost of labor and materials of measures installed, participant energy education costs and vendor administration costs.

The participant and expense forecast for 2022 is 98 homes and \$281,000, respectively. The participant and expense forecast for 2023 is 98 homes and \$281,000, respectively.

**COMMENTS:**

The program encourages whole-house improvements to existing homes by promoting home energy audits

and comprehensive retrofit services. Single family and multi-family residential customer that own or rent a residence and have an electric central cooling or heat pump system are eligible.

The program delivers three options:

1. Home Energy Audit
2. Weatherization Measures
3. HVAC equipment

A Commission order for case no. 2017-00097 terminated this program in 2018.

**COMMENTS:**

The Community Outreach program is designed to educate and influence residential customers to purchase and use energy conservation measures in their homes. An energy efficiency kit consisting of 2 light emitting diodes (LED) and 1 low-flow faucet aerator will be distributed to customers at scheduled community events.

A Commission order for case no. 2017-00097 terminated this program in 2017.

## COMMENTS:

The Commercial Incentive program offers energy savings for all commercial business customers through promotion of high efficiency electric lighting, HVAC, pumps, and motors. Primary objectives include; increasing the market share and installation rate of high efficiency technologies, and improving the operating efficiencies of existing long life equipment for commercial customers.

A Commission order for case no. 2017-00097 terminated this program in 2018.

**COMMENTS:**

The program encourages decision-makers in new construction and major reovation projects to incorporate greater energy efficiency into their building design and construction practices.

Participation includes two components:

1. Whole Building Approach
2. Systems Approach

A Commission order for case no. 2017-00097 terminated this program in 2018.

## COMMENTS:

The first phase of the School Energy Manager program was not expensed to DSM. The first phase consisted of a total of eight potential school districts that could participate with the program. The following five school districts participated in 2014: Carter, Johnson, Martin, Lawrence, and Paintsville.

The second phase of the program expands to include a potential of 23 school districts beginning July 2015. The DSM program budget for the 2nd phase of the program will be \$200,000. Actual school district start date and participation is dependent on the school district contractual agreement with Kentucky School Board Association (KSBA).

## COMMENTS:

The program offers small commercial customers an energy assessment that includes information on potential energy savings and anticipated payback. Incentives are available for up to 70% of the equipment and installation cost. The program strategy includes three components:

1. Walk-Through Audit
2. Direct Installation of Measures
3. Customer Education

A Commission order for case no. 2017-00097 terminated this program in 2017.

**COMMENTS:**

The program provides a study to optimize customer's building automation systems. Eligible customers receive one of the following fully funded studies based upon the building size:

1. RCx Lite: Buildings with 50,000 and 150,000 square feet and 150 to 500 kW peak demand.
2. RCx Standard: Buildings larger than 150,000 square feet and with greater than 500 kW peak demand.

A Commission order for case no. 2017-00097 terminated this program in 2017.

**COMMENTS:**

The Commercial High Efficiency Heat Pump/Air Conditioner program offers financial incentive to small commercial customers (< 100 kW demand) who upgrade to a new qualifying central air conditioner or heat pump with a Consortium for Energy Efficiency (CEE) rating. Applicable for 5 ton units or less.

The program was completed in 2015.

**COMMENTS:**

The Commercial Incentive program offers energy savings for all commercial business customers through promotion of high efficiency electric lighting, HVAC, pumps, and motors. Primary objectives include; increasing the market share and installation rate of high efficiency technologies, and improving the operating efficiencies of existing long life equipment for commercial customers.

This program was modified in 2016 to include only prescriptive and custom services. Some residual 2105 program expense were paid in 2016. The new program design added the Commercial New Construction program, the Commercial Express Install program, and the Commercial Retro-Commissioning program.

## COMMENTS:

The Commercial HVAC Diagnostic and Tune-up Program provides a variety of HVAC services, including diagnostic performance checks on commercial unitary central air conditioning and heat pump units.

The Equipment / Vendor cost include the cost of incentives for participating HVAC dealers promotion of the program. Central Air Conditioning units were discontinued 12/31/12.

The 2014 portfolio evaluation recommended program termination after the 2014 program year.

## **DEFINITIONS**

- 1) YTD Costs - Year-to-Date costs recorded through September 30, 2023.
- 2) YTD Impacts - Estimated in place load impacts for Year-to-Date participants.
- 3) PTD Costs - Costs recorded from the inception of the program through September 30, 2023
- 4) PTD Impacts - Estimated in place load impacts for Program-to-Date participants.

## **COMMENTS**

Our calculations are based on actual participants and costs as of September 30, 2023.

The estimated actual in-place energy (kWh) savings represents the annual energy savings for customers beginning program participation in the reported period. It is computed by applying the average customer annual net energy savings, including 9.4% T&D losses. The savings are included with the latest program evaluation report or the initially filed program estimate where an evaluation report has not been completed. The estimated actual in place energy (kWh) savings are calculated in accordance with the Sunset Provision contained in the joint application, filed September 27, 1995.

The estimated anticipated peak demand (kW) reduction is a product of the number of net participating customers or measure quantity (excluding free riders) and projected winter/summer demand reductions filed for each program. The anticipated peak demand (kW) reductions include a 10.5% T&D loss savings.

The calculation of YTD and PTD estimated in place energy (kWh) savings and anticipated peak demand (kW) reductions contained in this status report reflect, wherever applicable, the program evaluation results of each individual program as described in the August 16, 1999, June 30, 2002, June 30, 2005, June 30, 2008, June 30, 2010, August 15, 2011, August 15, 2012, and August 15, 2014, DSM collaborative report, and August 10, 2015, Demand Side Management Program Plan.

The individual DSM lost revenue, efficiency incentive and maximizing incentives as of June 30, 1997 are calculated based on the initial values from Exhibit E in the joint application, filed September 27, 1995. A retroactive adjustment of the initial values of the efficiency incentives and net lost revenue kWh impacts was used for each program for the first eighteen months (1/1/96 to 6/30/97). The lost revenue, efficiency incentive and maximizing incentive for the period 1/1/2023 to 9/31/2022 are calculated using the revised values contained in Schedule C of this status report.

The program lost revenue is the product of the number of participating customers, the average net energy savings (kWh) per customer and the net lost revenue (\$/kWh). The number of participating customers is equal to 1/2 of the new participants for the current month, plus the cumulative participants from the previous months. The program-to-date lost revenues are calculated in accordance with the Sunset Provision contained in the joint application, filed September 27, 1995.

The efficiency incentive is the product of the number of participants for the month and the efficiency rate (\$/participant). The maximizing incentive is calculated as 5% of actual program cost for the month.

## COMMENTS:

The Targeted Energy Efficiency Program provides a variety of services, including a home energy audit, weatherization and seal-up to targeted low income customers.

The Equipment / Vendor cost categories includes the cost of labor and materials of measures installed, participant energy education costs and vendor administration costs.

The participant and expense forecast for 2023 is 98 homes and \$281,000, respectively. The participant and expense forecast for 2024 is 94 homes and \$299,500, respectively.

**COMMENTS:**

The program encourages whole-house improvements to existing homes by promoting home energy audits

and comprehensive retrofit services. Single family and multi-family residential customer that own or rent a residence and have an electric central cooling or heat pump system are eligible.

The program delivers three options:

1. Home Energy Audit
2. Weatherization Measures
3. HVAC equipment

A Commission order for case no. 2017-00097 terminated this program in 2018.

**COMMENTS:**

The Energy Education for Students program is designed to partner with the National Energy Education Development Project (NEED) to implement an energy education program for middle school students at participating schools. The students will be provided an energy efficiency kit consisting of 2 light emitting diodes (LED) and 1 low-flow faucet aerator. The program will influence residential customers to purchase and use energy conservation measures in their homes.

A Commission order for case no. 2017-00097 terminated this program in 2017.

**COMMENTS:**

The Residential Efficient Products Program will provide incentives and marketing support through retailers to build market share and usage of ENERGY STAR lighting products. Designed to produce long-term energy savings in the residential sector by increasing the market share of ENERGY STAR CFLs and (or) other ENERGY STAR lighting products.

A Commission order for case no. 2017-00097 terminated this LED program in 2017.

## COMMENTS:

The Residential HVAC Diagnostic and Tune-up Program provides incentives to customers for a variety of HVAC services including over and under refrigerant charge and other diagnostic performance checks on residential unitary central air conditioning and heat pump units. Central Air Conditioning units were discontinued 12/31/12.

A 2014 portfolio evaluation recommended program termination after the 2014 program year.

## COMMENTS:

The Commercial Incentive program offers energy savings for all commercial business customers through promotion of high efficiency electric lighting, HVAC, pumps, and motors. Primary objectives include; increasing the market share and installation rate of high efficiency technologies, and improving the operating efficiencies of existing long life equipment for commercial customers.

A Commission order for case no. 2017-00097 terminated this program in 2018.

## COMMENTS:

The program encourages decision-makers in new construction and major reovation projects to incorporate greater energy efficiency into their building design and construction practices.

Participation includes two components:

1. Whole Building Approach
2. Systems Approach

A Commission order for case no. 2017-00097 terminated this program in 2018.

## COMMENTS:

The first phase of the School Energy Manager program was not expensed to DSM. The first phase consisted of a total of eight potential school districts that could participate with the program. The following five school districts participated in 2014: Carter, Johnson, Martin, Lawrence, and Paintsville.

The second phase of the program expands to include a potential of 23 school districts beginning July 2015. The DSM program budget for the 2nd phase of the program will be \$200,000. Actual school district start date and participation is dependent on the school district contractual agreement with Kentucky School Board Association (KSBA).

<b>Total Costs</b>	<b>\$0</b>	<b>\$0</b>	<b>\$973,920</b>

## COMMENTS:

The program offers small commercial customers an energy assessment that includes information on potential energy savings and anticipated payback. Incentives are available for up to 70% of the equipment and installation cost. The program strategy includes three components:

1. Walk-Through Audit
2. Direct Installation of Measures
3. Customer Education

A Commission order for case no. 2017-00097 terminated this program in 2017.

**COMMENTS:**

The program provides a study to optimize customer's building automation systems. Eligible customers receive one of the following fully funded studies based upon the building size:

1. RCx Lite: Buildings with 50,000 and 150,000 square feet and 150 to 500 kW peak demand.
2. RCx Standard: Buildings larger than 150,000 square feet and with greater than 500 kW peak demand.

A Commission order for case no. 2017-00097 terminated this program in 2017.

**COMMENTS:**

The Commercial High Efficiency Heat Pump/Air Conditioner program offers financial incentive to small commercial customers (< 100 kW demand) who upgrade to a new qualifying central air conditioner or heat pump with a Consortium for Energy Efficiency (CEE) rating. Applicable for 5 ton units or less.

The program was completed in 2015.

**COMMENTS:**

The Commercial Incentive program offers energy savings for all commercial business customers through promotion of high efficiency electric lighting, HVAC, pumps, and motors. Primary objectives include; increasing the market share and installation rate of high efficiency technologies, and improving the operating efficiencies of existing long life equipment for commercial customers.

This program was modified in 2016 to include only prescriptive and custom services. Some residual 2105 program expense were paid in 2016. The new program design added the Commercial New Construction program, the Commercial Express Install program, and the Commercial Retro-Commissioning program.

## COMMENTS:

The Commercial HVAC Diagnostic and Tune-up Program provides a variety of HVAC services, including diagnostic performance checks on commercial unitary central air conditioning and heat pump units.

The Equipment / Vendor cost include the cost of incentives for participating HVAC dealers promotion of the program. Central Air Conditioning units were discontinued 12/31/12.

The 2014 portfolio evaluation recommended program termination after the 2014 program year.

CANCELLING P.S.C. KY. NO. 12 ~~2<sup>nd</sup>~~ ~~1<sup>st</sup>~~-REVISED SHEET NO. 22-1

**TARIFF D.S.M.C.  
(Demand-Side Management Adjustment Clause)**

**APPLICABLE.**

To Tariffs R.S., R.S.D., R.S.-L.M.-T.O.D., R.S.-T.O.D., Experimental R.S.-T.O.D. 2, G.S., S.G.S.-T.O.D., M.G.S.-T.O.D., L.G.S., L.G.S.-T.O.D., I.G.S., C.S.-I.R.P., C.S.-Coal, and M.W.,

**RATE.**

1. The Demand-Side Management (DSM) clause shall provide for periodic adjustment per KWH of sales equal to the DSM costs per KWH by customer sector according to the following formula:

$$\text{(c) Adjustment Factor} = \frac{\text{DSM}}{\text{S(c)}}$$

Where DSM is the cost by customer sector of demand-side management programs, net lost revenues, incentives, and any over/under recovery balances; (c) is customer sector; and S is the adjusted KWH sales by customer sector.

2. Demand-Side Management (DSM) costs shall be the most recent forecasted cost plus any over/under recovery balances recorded at the end of the previous period.
  - a. Program costs are any costs the Company incurred associated with demand-side management which were approved by the Kentucky Power Company DSM Collaborative. Examples of costs to be included are contract services, allowances, promotion, expenses, evaluation, lease expense, etc. by customer sector.
  - b. Net lost revenues are the calculated net lost revenues by customer sector resulting from the implementation of the DSM programs.
  - c. Incentives are a shared-savings incentive plan consisting of one of the following elements: The efficiency incentive, which is defined as 15 percent of the estimated net savings associated with the programs. Estimated net savings are calculated based on the California Standard Practice Manual’s definition of the Total Resources Cost (TRC) test, or the maximizing incentive which is defined as 5 percent of actual program expenditures if program savings cannot be measured.
  - d. Over/ Under recovery balances are the total of the differences between the following:
    - (i) the actual program costs incurred versus the program costs recovered through DSM adjustment clause, and
    - (ii) the calculated net lost revenues realized versus the net lost revenues recovered through the DSM adjustment clause, and
    - (iii) the calculated incentive to be recovered versus the incentive recovered through the DSM adjustment clause.
3. Sales (S) shall be the total ultimate KWH sales by customer sector less non-metered, opt-out and lost revenue impact KWHs by customer sector.
4. The provisions of the Demand-Side Management Adjustment Clause will be effective for the period ending December 31, 202~~4~~3.
