

Since January 1, 2024, excluding submissions by Kentucky Power's ILEC joint use partners, third parties have submitted proposals (i.e., applications) for 391 poles. Those 391 poles fall collectively into the following statuses:

Status	Number of Poles
Initiated	40
Pending	276
Approved	7
Construction	23
Post-Inspect	44
Cancelled	1
TOTAL	391

The following is a brief explanation of each status:

“Initiated” means the proposal has been submitted to Kentucky Power but not yet assigned to vendor for survey and engineering, either because Kentucky Power needs additional information before assigning the proposal to a vendor or because Kentucky Power has not yet completed its internal review.

“Pending” means the proposal has been assigned to a vendor for survey and engineering and includes proposals on which the survey and engineering are complete, but the applicant has not yet paid the make-ready estimate.

“Approved” means the attacher has approval and is attached to Kentucky Power's poles.

“Construction” means the make-ready estimate has been paid and the make-ready work is currently being performed by Kentucky Power.

“Post-Inspect” means a proposal has been released for installation of attachments by the applicant and Kentucky Power is awaiting notice of completion.

“Cancelled” means the application has withdrawn the proposal.

VERIFICATION

The undersigned, Tanner S. Wolfram, being duly sworn, deposes and says he is the Director of Regulatory Services for Kentucky Power, that he has personal knowledge of the matters set forth in the foregoing and the information contained therein is true and correct to the best of his information, knowledge, and belief.
