

EXHIBIT A:

PROJECT DESCRIPTION

Breathitt County Water District

KY 30 East & Wolf Creek Waterline Extension Project

Project Description

Waterline Extension in Breathitt County, KY.

Construction includes the installation of:

Approximately 6-inch , 4-inch and 2-inch waterlines with HDPE directionally drilled creek/river crossings and other appurtenances, Installation of a duplex pump station, telemetry and electrical service and water service connections. Installation of a 40,000 gallon ground storage tank, Access Road improvement, Excavation, final grading, site restoration and Fencing

The waterline will be constructed by means of trenching the earth.

The public necessity is to provide safe and reliable drinking water to the project area. There are no other existing water utilities in this area, therefore this project will not cause duplication of service. This extension will be served through a connection to an existing BCWD waterline.

The apparent low responsible bidder for contract 1 Waterlines is G&W Construction and Contract 2 Water tanks to KY Glass Lined Tank Systems.

Funding

That Applicant proposes to finance 100% of the Project with a Cleaner Water grant in the amount of \$3,630,000.

Construction

Setting out the date of January 10, 2024, when it is anticipated that construction will begin and September 10,2024 when it is anticipated to end.
