

PPL CORPORATION

2nd Quarter 2024 Investor Update

August 2, 2024

Cautionary Statements and Factors That May Affect Future Results

Statements made in this presentation about future operating results or other future events are forward-looking statements under the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from the forward-looking statements. A discussion of some of the factors that could cause actual results or events to vary is contained in the Appendix of this presentation and in PPL's SEC filings.

Management utilizes non-GAAP financial measures such as "earnings from ongoing operations" or "ongoing earnings" in this presentation. For additional information on non-GAAP financial measures and reconciliations to the appropriate GAAP measure, refer to the Appendix of this presentation and PPL's SEC filings.

Business Update

Vince Sorgi
President & Chief Executive Officer

2nd QUARTER 2024 INVESTOR UPDATE

August 2, 2024

2nd Quarter Financial Highlights

Continued execution, delivered solid financial results

- Reported Q2 2024 GAAP results of \$0.26 per share and ongoing earnings of \$0.38 per share
- ➤ Reaffirmed 2024 ongoing earnings forecast range of \$1.63 \$1.75 per share with a midpoint of \$1.69 per share; expect to achieve at least the midpoint of forecast range
- On track to achieve 2024 priorities
 - Execute \$3.1 billion capex plan to provide safe, reliable and affordable energy to our customers
 - Complete integration of Rhode Island Energy and exit the remaining TSAs
 - Attain \$120 \$130 million of annual O&M savings this year compared to 2021 baseline
- Reaffirmed long-term financial targets
 - 6% 8% annual earnings per share and dividend growth through at least 2027 (1)
 - \$14.3 billion capital investment plan through 2027
 - O&M savings of at least \$175 million by 2026 from the 2021 baseline

Executing Our "Utility of the Future" Strategy

Delivering a net-zero energy system by 2050 that is affordable and reliable

Prevent outages and improve restoration times through system hardening with updated design criteria and use of smart grid technology and automation in the face of more frequent and severe storms

Advance the clean energy transition affordably and reliably by replacing endof-life coal plants with natural gas, renewables and battery storage, while supporting critical R&D for new low-carbon generation solutions

Drive sustainable efficiencies across the business through a rigorous Transformation Management Office (TMO) process to keep energy affordable for our customers as we make required investments in the Grid

Use Al and other advanced technologies to better manage supply and demand on the Grid, improve the customer experience, improve reliability and lower costs

Engage key stakeholders to strengthen resource adequacy (even in deregulated markets) and to power economic development, including data center growth and expansion

Data Center Update

PA and KY jurisdictions extremely well-positioned to support data center growth

Pennsylvania Highlights

- PPL Electric's competitive advantages:
 - \$6.5 billion of strategic transmission investments over past decade and use of Dynamic Line Rating technology delivers topdecile reliability without capacity constraints
 - Abundance of land, water, and fiber optics; near transportation and internet "highways" in region; state tax incentives
 - Typical response times to requests are within 6 weeks
- ➤ Nearly 5GW in advanced stages (up from 3GW previously discussed on Q1 call) with over 17GWs of potential projects in the queue from 2026 2033⁽¹⁾
 - ~5GW in advance stages represents potential transmission capital upside of \$400M - \$450 million (not in capex plan)
- Data Center connections lower costs for all retail customers
 - Every 1GW connected reduces transmission costs on the retail customer bill by about 10% (~2% of total bill or \$3 per month)⁽²⁾

Kentucky Highlights

- ➤ LG&E and KU's competitive advantages:
 - Low energy costs, abundance of land and water, ability to build new generation and tax incentives in our service territory
- Active data center requests have increased to more than 2GWs over 2027 – 2033, with about 350MW in advanced stages
- In addition to transmission upgrades, additional generation resources are likely needed to support potential data center and industrial demand
 - Once Mill Creek Unit 5 (MC5) is operational, we estimate we'll have ~400-500 MW of generation capacity available to support further load growth and maintain prudent reserve margins
 - Cost of one 650MW NGCC is ~\$1 billion based on MC5 currently under construction
 - Additional evaluation to come in Integrated Resource Plan, which will be filed with the KPSC in October

⁽¹⁾ The 5GW in advanced stages represents projects that have signed agreements with developers and costs being incurred by PPL Electric are reimbursable by the developers if they do not more forward with the projects.

²⁾ Assumes 1GW of additional load and \$100M of additional transmission investment. Transmission currently represents 20% of the average residential customer bill in Pennsylvania. Estimated dollar per month based on average usage of 1,000 kwh per month.

Key Operational and Regulatory Updates

- Approval of Long-Term Infrastructure Improvement Plan (LTIIP) modification in Pennsylvania
 - PAPUC approved over \$200 million increase in DSIC eligible capital through 2027
 - \$84 million predictive failure technology (PFT) project was viewed positively by the PAPUC but was determined
 not to be DSIC eligible through the LTIIP
 - PAPUC indicated that PPL may seek recovery on the PFT program through a base rate case proceeding
- > PPL Electric's DSIC waiver petition progressing as expected
 - In June 2024, an ALJ was assigned, and a procedural schedule was created (see appendix)
 - We continue to expect the proceeding to conclude later this year and anticipate a Final Order in early 2025
- Commenced construction of Mill Creek Unit 5 natural gas combined-cycle plant
 - Remain on track to begin commercial operation in 2027 consistent with CPCN approval
- ➤ Approval of Mercer County Solar Site Compatibility Certificate in Kentucky
 - Facilitates construction of 120 MW company-owned solar facility that was approved in last November's CPCN
 - Expect to begin commercial operation in 2026
- Successfully completed another labor contract negotiation

Financial Update

Joe Bergstein

Executive Vice President & Chief Financial Officer

2nd QUARTER 2024 INVESTOR UPDATE

August 2, 2024

Closing Remarks

Vince Sorgi
President & Chief Executive Officer

2nd QUARTER 2024 INVESTOR UPDATE

August 2, 2024

PPL Investment Highlights

Large-cap, regulated U.S. utility operating in constructive regulatory jurisdictions

- Principal electric/gas utilities serving Kentucky, Pennsylvania, and Rhode Island
- Future test years in each jurisdiction, FERC formula rates and real-time recovery mechanisms of over 60% of CapEx without the need for base rate cases

Visible and predictable 6% - 8% annual EPS and dividend growth (2)

- \$14.3B capital investment plan, driving average annual rate base growth of 6.3% through 2027
- Risk mitigating without high-risk projects in CapEx plan and lower event risk in our geographic regions
- Targeted annual O&M savings of at least \$175M by 2026 from the company's 2021 baseline

Premier balance sheet supports organic growth and provides financial flexibility

- Top-tier credit ratings among peers: Baa1 rating at Moody's and A- rating at S&P
- Targeting 16% 18% FFO/CFO to Debt and no equity issuances needed through at least 2027

A total return

proposition of

9% - 12%⁽¹⁾

Compelling opportunity to transition existing coal fleet to cleaner energy resources (3)

- Committed to net-zero carbon emissions by 2050⁽⁴⁾
- Rate base from coal generation declines to less than 12% by the end of 2027
- (1) Total return reflects PPL's targeted EPS growth rate plus dividend yield based on targeted annualized dividend and PPL's closing share price as of July 31, 2024.
- (2) Refers to PPL's projected earnings per share growth from 2024 to 2027 and targeted dividend per share growth in line with EPS.
- (3) PPL is economically transitioning coal-fired generation and has committed to not burn coal by 2050 unless it can be mitigated with carbon dioxide removal technologies.
- (4) PPL is committed to a reasoned and deliberate glidepath to net-zero carbon emissions by 2050; ensuring safety, reliability and affordability remain intact during the transition.

2nd QUARTER 2024 INVESTOR UPDATE

August 2, 2024

PPL's Strategic Framework

Our objective is to deliver exceptional value for all our stakeholders

Vision Be the best utility company in the U.S.

Mission Provide safe, affordable, reliable, sustainable energy to our customers and competitive, long-term returns to investors

▼ Strategy: Create Utilities of the Future

Improve the reliability and resiliency of our electric and gas networks

Advance a clean energy transition affordably and reliably

Deliver operational efficiencies to support the clean energy transition

Build scale, enable our strategy and drive sustainable growth

Empower customers through digital solutions and better customer service **▼** Actions

Harden our networks. Expand smart grid and automation. Fully deploy AMI in KY/RI. Maximize leak-prone pipe replacement in RI.

Execute CPCN plans in KY. Advance resource adequacy strategies in PA/KY. Advance the DSO model. Accelerate clean-energy R&D

Expand the use of data analytics/Al to reduce costs and improve outcomes. Consolidate IT systems and platforms. Implement TMO initiatives

Drive economic development. Improve regulatory relationships. Facilitate electrification/DERs and customer growth.

Implement digital apps for customers and expand self-service. Improve interconnection processes for renewable developers.

V Enablers

Safety-first/customerfocused culture

Operational excellence

Technology and innovation

Detailed business planning and prudent risk-taking

People: DEI, leadership development, training and communications

Forward-looking policy/ regulatory strategies

▼ Future State

Top-decile safety: topquartile reliability, customer satisfaction. cost efficiency

Net-zero carbon emissions by 2050 and secure, affordable energy mix

Widespread technology & automation and full **DSO** capabilities

Top-tier earnings and dividend growth; premium stock valuation

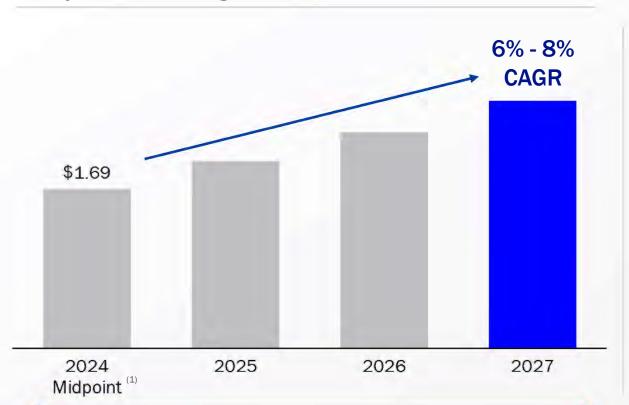

Safety, Passion, Innovation, Responsibility, Integrity, Teamwork

Visible and Predictable Earnings and Dividend Growth

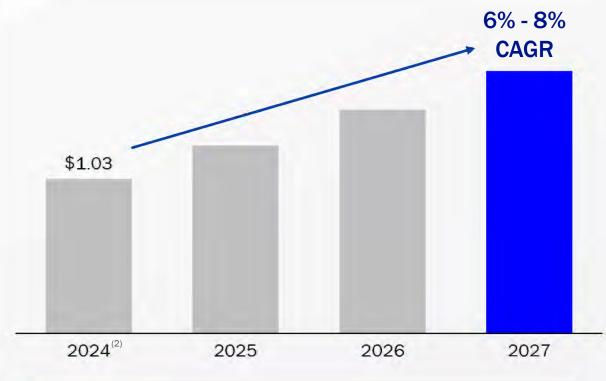

Projecting 6% - 8% annual EPS and dividend growth through at least 2027

Projected Earnings Per Share

Projecting predictable, stable annual EPS growth

Projected Annualized Dividends Per Share (2)

Dividend growth in line with EPS growth

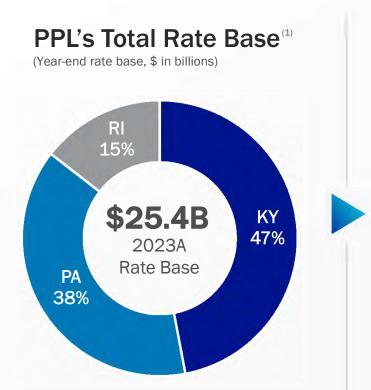

Represents the midpoint of PPL's 2024 ongoing earnings forecast range of \$1.63 - \$1.75 per share.

⁽²⁾ Actual dividends to be determined by Board of Directors. Annualized 2024 dividend based on February 16, 2024 dividend declaration by Board of Directors.

Constructive Regulatory Jurisdictions

Supportive of prudent investments in our electric and gas networks

Key Regulatory Highlights

- Contemporaneous recovery for over 60% of capital plan
 - FERC formula rates for transmission in both PA and RI
 - ~80% of RI planned <u>distribution</u> capital investments relate to infrastructure, safety and reliability (projected to be ISR eligible)
 - DSIC mechanism in PA provides hedge against lower sales volumes, storms and inflation outside of rate cases
 - ECR mechanism in KY provides recovery of additional environmental investments, if needed for regulatory compliance (ELGs, CCRs, etc.)
- Future test years in all three jurisdictions for base rate cases 2
 - Multi-year rate cases in RI
 - History of rate case settlements in all three jurisdictions
 - No anticipated base rate case filings in 2024 for PA, KY, or RI

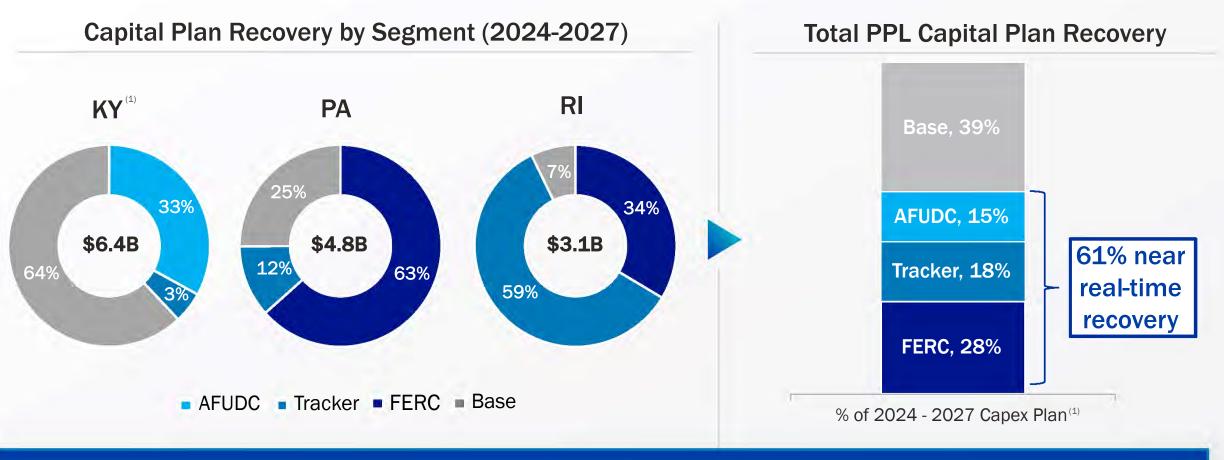

⁽¹⁾ Rhode Island rate base excludes acquisition-related adjustments for non-earning assets.

⁽²⁾ In 2018, Rhode Island established a multi-year framework for Rhode Island Energy based on a historical test year but with the ability to forecast certain O&M categories for future years. All other O&M is increased by inflation each year. Includes annual rate reconciliation mechanism that incorporates allowance for anticipated capital investments.

Significant Piece of Capital Plan Recovered Real-time

Over 60% of PPL's capital investment plan subject to contemporaneous recovery

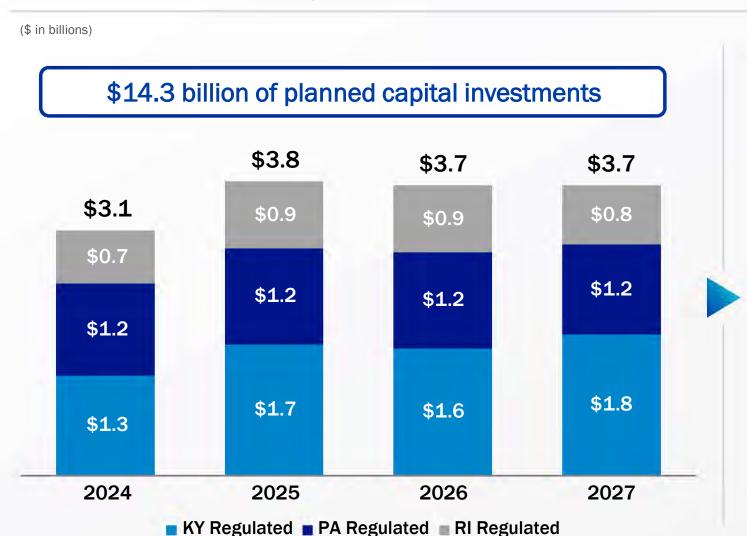

Reduces the impact of regulatory lag on earnings for investments without base rate cases

2024 - 2027 Capital Investment Plan

Over \$14 billion of capital investments that deliver value for customers

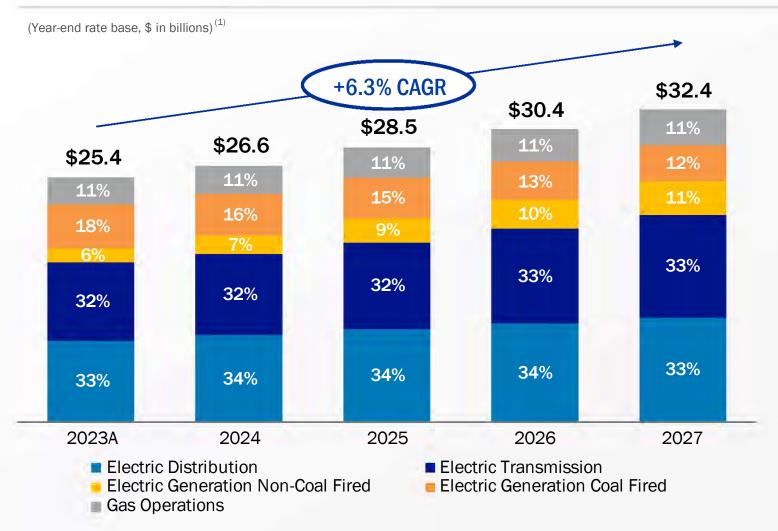

Key Capital plan Considerations

- Plan reflects only identified projects without any big bets
- Upside potential to current plan:
 - Investments to support increasing demand from data centers
 - System hardening to maintain reliability against increasing severity and frequency of storms
- Significant longer-term needs:
 - Transition of remaining 4GW of coalfired generation fleet in KY
 - Potential environmental investments required from EPA regulations
 - Offshore wind transmission in RI

Average Annual Rate Base of 6.3% Through 2027

Driven by significant investments in T&D infrastructure and non-coal generation

- Two-thirds of rate base relates to investments in electric transmission and distribution infrastructure
- Growth in non-coal fired electric generation driven by transition of aging, coal-fired generation fleet in Kentucky to renewables and efficient, combined-cycle natural gas
- Percentage of rate base related to coal-fired generation declines to 11.5% by end of 2027 and to less than 10% by 2030

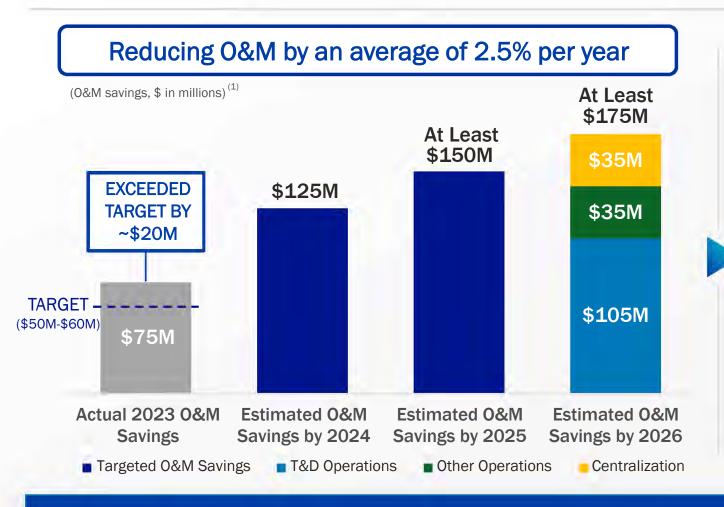

Note: Totals may not sum due to rounding

⁽¹⁾ Rhode Island rate base excludes acquisition-related adjustments for non-earning assets.

Prioritizing Efficiency and Affordability

A clear path to deliver at least \$175M of annual savings by 2026 from 2021

T&D Operations

- Smart Grid Technology more efficient and condition-based maintenance for substation and line assets
- Enhanced vegetation management modeling lowers maintenance costs
- Customer service technology investments improve self-service and reduce calls handled by agents

Other Operations (Generation & Gas LDCs)

 Optimization of planned outage schedules and nonoutage maintenance

Centralization of Shared Services

- Consolidation of IT platforms reducing maintenance footprint and lower licensing costs
- Economies of scale from centralized service functions, including supply chain

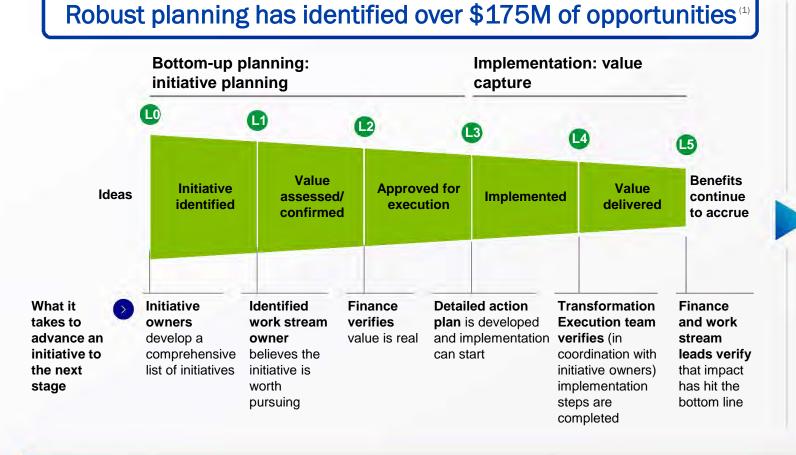

Additional opportunities to scale and drive incremental savings longer term

⁽¹⁾ As used in this chart, O&M refers to controllable O&M expenses, excluding estimated pass-through costs and integration and related costs associated with the acquisition of Rhode Island Energy.

The TMO: Delivering the Efficiency of our Strategy

Transformation Management Office (TMO) adds rigor and durability to savings

Achievement was a result of implementing initiatives ahead of schedule, primarily optimizing generation outage schedules and reducing contractor spend

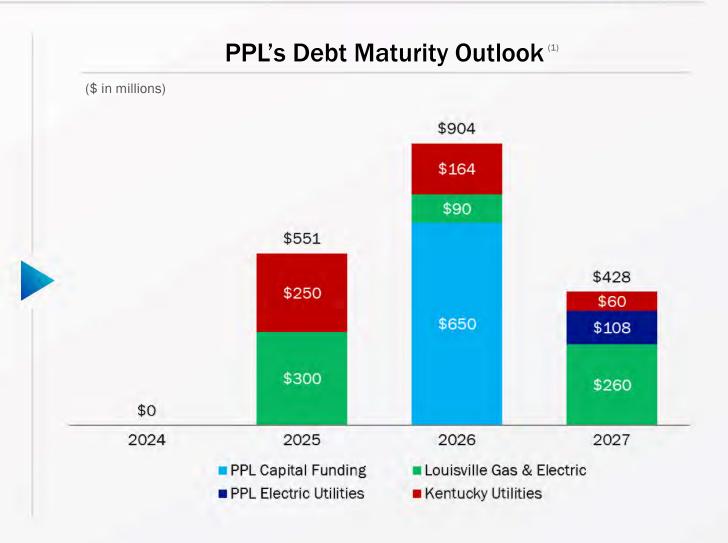

Every \$1 of O&M savings on average can be reinvested as \$8 of capital without impacting customer bills

Balance Sheet Strength Provides Financial Flexibility

Uniquely positioned to fund planned growth without equity

- Premier credit ratings among peers
 - Baa1 rating at Moody's
 - A- rating at S&P
- Supported by strong credit metrics
 - Targeting 16% 18% FFO/CFO to debt
 - Holding company debt projected to remain less than 25% of total debt
- Limited floating rate debt exposure
 - ~5% of total debt as of June 30th
- Manageable debt maturity stack
- No equity issuances required throughout the planning period

⁽¹⁾ As of June 30, 2024. Excludes Rhode Island Energy's sinking fund payments that are due annually until the bond's final maturity (less than \$1 million annually in 2024 and 2025).

2nd QUARTER 2024 INVESTOR UPDATE

August 2, 2024

Pennsylvania Regulatory Overview

PPL Electric Utilities

Key Attributes

2023 Rate Base Year-End Rate Base (\$B) % of Total PPL Rate Base	\$9.8 38%
Allowed ROE	
Electric Transmission	10.0% + adders (1)
Electric Distribution	(2)
DSIC	9.85% ⁽³⁾
Capital Structure (2023)	
Equity	56%
Debt	44%
Last Base Rate Case (rates effective date)	1/1/2016
	Forward Test Year

Constructive Features Mitigating Regulatory Lag

- ✓ FERC Formula Transmission Rates
- ✓ Distribution System Improvement Charge (DSIC)
 - An alternative ratemaking mechanism providing more-timely cost recovery of qualifying distribution system capital expenditures
- ✓ Pass through of energy purchases
- ✓ Smart Meter Rider
- ✓ Storm Cost Recovery
- ✓ Alternative Ratemaking (4)
 - In Pennsylvania, there are various mechanisms available including: decoupling mechanisms, performance-based rates, formula rates, and multi-year rate plans

⁽¹⁾ Adders include 50-basis points for RTO membership and incremental returns for certain projects.

²⁾ Last Pennsylvania distribution base rate case was effective 1/1/2016 with an un-disclosed ROE.

³⁾ The equity return rate used in the DSIC calculation is calculated by the Commission in the most recent Quarterly Report on the Earnings of Jurisdictional Utilities. Effective October 1, 2024, this cost of equity is 9.85%.

⁽⁴⁾ Alternative ratemaking is available for next distribution base rate case

A Review of the DSIC Mechanism in Pennsylvania

Reduces regulatory lag associated with certain electric distribution investments

<u>Purpose</u>	 Distribution system improvement charge (DSIC) allows PPL Electric to recover reasonable and prudent costs incurred to repair, improve, or replace eligible property between base rate cases. The DSIC also provides PPL Electric with the resources to accelerate the replacement of aging infrastructure, comply with evolving regulatory requirements, and design and implement solutions to regional supply problems.
<u>Eligible</u> <u>Propert</u> y	 For PPL Electric, DSIC-eligible capital investments are approved by the PAPUC through 5-year, long-term infrastructure improvement plans (LTIIP). DSIC-eligible property consists of poles and towers, overhead conductors, underground conduit and conductors, and any fixture or device related to the aforementioned eligible property. It also includes costs related to highway relocation projects where an electric distribution company must relocate its facilities and other related capitalized costs.
Calculation	 The DSIC is calculated to recover the fixed costs (depreciation and pre-tax return) of eligible plant additions not previously reflected in PPL Electric's rates or rate base. The pre-tax return is calculated using the statutory state and federal income tax rates, PPL Electric's actual capital structure and actual cost rates for long-term debt and preferred stock as of the last day for the three-month period ending one month prior to the effective date of the DSIC and subsequent updates. The cost of equity will be the equity return rate approved in PPL Electric's last fully litigated base rate proceeding for which a final order was entered not more than two years prior to the effective date of the DSIC. If more than two years shall have elapsed between the entry of such a final order and the effective date of the DSIC, then the equity return rate used in the calculation will be the equity return rate calculated by the Commission in the most recent Quarterly Report on the Earnings of Jurisdictional Utilities released by the Commission. Effective October 1, 2024, this cost of equity is 9.85%. The DSIC is updated on a quarterly basis to reflect eligible plant additions placed in service during the three-month periods ending one month prior to the effective date of each DSIC Update. For example, the DSIC rate effective October 1, 2024, reflects plan additions from June through August 31, 2024.
Consumer Safeguards	 For PPL Electric, the amount of distribution revenues that are recoverable through the DSIC mechanism is capped at 5.0%. The DSIC is reset at zero if the company's return, as reported in the quarterly earnings report, shows that the utility will earn a rate of return that would exceed the allowable rate of return. The DSIC will be reset at zero upon application of new base rates to customer billings that provide for prospective recovery of the annual costs that had previously been recovered under the DSIC.

Summary of DSIC Wavier Filing in Pennsylvania

Debt	47%		
Last Base Rate Case	7/4/0004		
(rates effective date)	7/1/2021		
Test Year	Forward Test Year		

Constructive Features Mitigating Regulatory Lag

- ✓ Environmental Cost Recovery (ECR) Surcharge
 - Provides near real-time recovery for approved environmental projects related to coal-fired generation
- ✓ Gas Line Tracker (GLT)
 - Approved mechanism for LG&E's recovery of certain costs associated with gas transmission lines, gas service lines, and leak mitigation
- ✓ Demand-Side Management (DSM) Cost Recovery
 - Provides recovery of energy efficiency programs
- ✓ Retired Asset Recovery (RAR) Rider⁽¹⁾
 - Provides recovery of and return on remaining net book value at time of retirement, with recovery over 10 years from retirement date
- ✓ Fuel Adjustment Clause (FAC)
 - Pass through of costs of fuel and energy purchases
- ✓ Gas Supply Clause (GSC)
 - Pass through of costs of natural gas supply

Rhode Island Regulatory Overview

Rhode Island Energy

Key Attributes

Constructive Features Mitigating Regulatory Lag

- ✓ FERC Formula Transmission Rates
- ✓ Multi-year rate plans for electric and gas distribution
- ✓ Infrastructure, Safety, and Reliability (ISR) tracker
 - Annual recovery mechanism for certain capital and O&M costs for electric and gas distribution projects filed with the RIPUC
- ✓ Performance-based incentive revenues
 - Includes electric system performance, energy efficiency, natural gas optimization, and renewables incentives
- Revenue decoupling
- ✓ Storm cost recovery
- ✓ Pension expense tracker
- Energy Efficiency tracker

⁽¹⁾ Reflects base allowed ROE. Rhode Island Energy receives a 50-basis point RTO adder and additional project adder mechanisms that may increase the allowed ROE up to 11.74%.

⁽²⁾ Reflects base allowed ROE. Rhode Island Energy can earn higher returns than the base allowed ROE through incentive mechanisms and efficiencies that are supported by customer sharing mechanisms. Earnings sharing with customers of 50% when earned ROE is between 9.275% and 10.275% and increases to 75% sharing for customers when earned ROE exceeds 10.275%.

³⁾ Based on regulatory framework established in 2018, which included a multi-year framework for Rhode Island Energy electric and gas base rates based on a historical test year with the ability to forecast certain 0&M categories for future years. All other 0&M expenses are increased by inflation each year. Includes annual rate reconciliation mechanism that incorporates allowance for anticipated capital investments.

⁽²⁾ Represents costs primarily related to PPL's centralization efforts and other strategic efforts.

⁽³⁾ Primarily integration and related costs associated with the acquisition of Rhode Island Energy.

⁽⁴⁾ Certain expenses related to billing issues.

Forward-Looking Information Statement

Statements contained in this presentation, including statements with respect to future earnings, cash flows, dividends, financing, regulation and corporate strategy, including the anticipated acquisition of Narragansett from National Grid, and its impact on PPL Corporation, are "forward-looking statements" within the meaning of the federal securities laws. Although PPL Corporation believes that the expectations and assumptions reflected in these forward-looking statements are reasonable, these statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: asset or business acquisitions and dispositions, and our ability to realize expected benefits from them; pandemic health events or other catastrophic events, including severe weather, and their effect on financial markets, economic conditions, supply chains and our businesses; the outcome of rate cases or other cost recovery or revenue proceedings; the direct and indirect effects on PPL or its subsidiaries or business systems of cyberbased intrusion or threat of cyberattacks; capital market and economic conditions, including interest rates and inflation, and decisions regarding capital structure; market demand for energy in our service territories; weather conditions affecting customer energy usage and operating costs; the effect of any business or industry restructuring; the profitability and liquidity of PPL Corporation and its subsidiaries; new accounting requirements or new interpretations or applications of existing requirements; operating performance of our facilities; the length of scheduled and unscheduled outages at our generating plants; environmental conditions and requirements, and the related costs of compliance; system conditions and operating costs; development of new projects, markets and technologies; performance of new ventures; receipt of necessary government permits and approvals; the impact of state, federal or foreign investigations applicable to PPL Corporation and its subsidiaries; the outcome of litigation involving PPL Corporation and its subsidiaries; stock price performance; the market prices of debt and equity securities and the impact on pension income and resultant cash funding requirements for defined benefit pension plans; the securities and credit ratings of PPL Corporation and its subsidiaries; changes in political, regulatory or economic conditions in states, regions or countries where PPL Corporation or its subsidiaries conduct business, including any potential effects of threatened or actual cyberattack, terrorism, or war or other hostilities; new state, federal or applicable foreign legislation or regulatory developments, including new tax legislation; and the commitments and liabilities of PPL Corporation and its subsidiaries. Any such forward-looking statements should be considered in light of such important factors and in conjunction with factors and other matters discussed in PPL Corporation's Form 10-K and other reports on file with the Securities and Exchange Commission.

Definitions of Non-GAAP Financial Measures

Management utilizes "Earnings from Ongoing Operations" or "Ongoing Earnings" as a non-GAAP financial measure that should not be considered as an alternative to net income, an indicator of operating performance determined in accordance with GAAP. PPL believes that Earnings from Ongoing Operations is useful and meaningful to investors because it provides management's view of PPL's earnings performance as another criterion in making investment decisions. In addition, PPL's management uses Earnings from Ongoing Operations in measuring achievement of certain corporate performance goals, including targets for certain executive incentive compensation. Other companies may use different measures to present financial performance.

Earnings from Ongoing Operations is adjusted for the impact of special items. Special items are presented in the financial tables on an after-tax basis with the related income taxes on special items separately disclosed. Income taxes on special items, when applicable, are calculated based on the statutory tax rate of the entity where the activity is recorded. Special items may include items such as:

- Gains and losses on sales of assets not in the ordinary course of business.
- Impairment charges.
- Significant workforce reduction and other restructuring effects.
- Acquisition and divestiture-related adjustments.
- Significant losses on early extinguishment of debt.
- Other charges or credits that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations.
