

QUESTIONNAIRE  
FOR  
PUBLIC PARTICIPATION IN  
**Cooperative Solar Farm Two – Fayette**

You may leave this form at the registration table as you leave tonight or return it in the envelope provided, already stamped, in which to mail to us at a later time. Please return your feedback by June 14, 2024.

This survey will allow us to get your opinions regarding Cooperative Solar Farm Two - Fayette. Your response will assist EKPC in understanding and addressing public concerns. Thank you for your help.

1. The following information is optional but could be useful if follow-up is needed.  
**(Names and addresses are considered confidential and are for EKPC use only)**

2. Do you live near the proposed solar farm? If so, how far away?

Yes, across the street

Will you be able to see the solar farm from your residence?  Yes  No

3. Please choose the three aspects of this project that concern you most. The most concerning item will be No. 1, the least important No. 3.

- |   |  |
|---|--|
| <input type="checkbox"/> Visual appearance.                           | <input type="checkbox"/> Construction traffic/sound/impact.                        |
| <input type="checkbox"/> Reduces farmable land.                       | <input type="checkbox"/> Proximity to commercial or industrial areas.              |
| <input checked="" type="checkbox"/> Proximity to residences.          | <input checked="" type="checkbox"/> Proximity to historic or archaeological Sites. |
| <input type="checkbox"/> Prefer other sources of electric generation. |  |
| <input checked="" type="checkbox"/> Other, please specify below.      |  |

environmental impact

4. How can EKPC mitigate your concerns?

I was frustrated to learn that similar projects had been abandoned in other counties because of public outcry but that EKPC decided to try again in Fayette Co, where most of the power will not be going. It's concerning that other communities have already rejected this project. Why should it be allowed in Fayette Co if hardly any of of residents will benefit from it.

5. Please choose the three aspects of this project that you feel will provide the most benefit. The most beneficial item will be No. 1, the least important No. 3.

- |   |   |
|---|---|
| <input checked="" type="checkbox"/> Reducing carbon/climate impact. | <input type="checkbox"/> Low-impact development.                        |
| <input checked="" type="checkbox"/> Reducing use of fossil fuels.   | <input checked="" type="checkbox"/> Diversifying Kentucky's energy mix. |
| <input type="checkbox"/> Making my energy sustainable.              | <input type="checkbox"/> Helping business/industry be sustainable.      |
| <input type="checkbox"/> Other, please specify below.               |   |

---

---

6. How can EKPC maximize those benefits?

*EKPC isn't making my energy sustainable. I'm across the street so I'll get all the drawbacks but none of the benefits. Why can't the farm be based in a county in which you supply customers power?*

7. What can EKPC do to better support farmers/agriculture in the area.

---

---

8. Are you aware of any buildings or landmarks in the study area that may be architecturally or historically important? If so, please specify location, names or addresses.

*No*

---

---

9. You may be aware of unique or specific information regarding this site. Please describe any special items of interest or concern below such as scenic areas, recreation areas or new homes. Please give the location of the item or contact one of the representatives to mark it on a map.

\* *If you have any additional comments, please list on back of this page.*

## PROCESS EVALUATION SURVEY

**Please help us to improve the siting procedures, which you have participated in by completing this form.**

Did this process give you:

- An adequate amount of information?  
 Too much information?  
 Not enough information?

Was advertisement for the open house:

- Adequate?  
 Inadequate?  
 Early enough?

Were most of your questions answered by:

- EKPC staff?  
 Written information?  
 Displays?

Do you feel that you know more about EKPC and its operation?

Not really - I'd like to see a more detailed preparedness plan for if/when tornadoes hit.

Did you voice any questions that were not adequately addressed? See above

If yes, what is your question and may we contact you to discuss?

Yes, please contact. I'd also appreciate getting a copy of the locations of the inverters & I was shown this map at the open house. My email is
