> Hello Nick

> I won't beat around the bush. East Ky Power is making a very tragic mistake by putting solar panels on the ancestral land off Winchester road. I idea that someone would liter the landscape with these panels is an atrocity of the highest insult. Certainly, electricity is a necessity but solar panels don't need to cover up rich farm land. These panels need to be on rooftops of all types, residential and commercial buildings everywhere. However, to heat up the ground with these ugly black things makes no sense to me. Please do not follow through with this mistake.

> In a few years these panels will be obsolete anyway. There will be other, more efficient ways of electrical energy being generated in common sense fashion.

> Again, Do not follow through with your plan [REDACTED]
