RE: Case No. 2024-00251
Southern Water & Sewer District
Response to First Request for Information

Dear Ms. Bridwell:

Enclosed for filing in the referenced case are Southern Water & Sewer District's additional amended responses to Kentucky Public Service Commission staff's first Request for Information. This is intended to complete the responses to the first Request for Information.

Southern Water & Sewer District acknowledges that the responses to Question #7 may not be fully responsive to the Commission staff's Request. The office staff, which typically includes 5 employees, was reduced to 2 employees during the past week due to absences due to hip replacement, flu, and a sick child.

As the Kentucky Rural Water Association consultant working on behalf of Southern Water & Sewer District, I acknowledge that it may be appropriate for the Commission to consider a Staff Field Review in order to obtain the information necessary for a timely review of the Alternative Rate Filing application.

Sincerely,

Robert K. Miller
