NAME

ADDRESS

CITY ST ZIP

East Kentucky Power Cooperative (EKPC) is rebuilding an existing 69-kilovolt (kV) electric transmission line as a 138-kV and 69-kV double circuit transmission line in Madison County, Ky., from Goggins Lane and Tates Creek Road to Duncannon Lane. The 69-kV and 138-kV transmission line portion of the project will be completed this year, 2024.

On Feb. 23, 2023, EKPC was granted a Certificate of Public Convenience and Necessity (CPCN) by the Kentucky Public Service Commission (PSC) to execute this project. In addition to the transmission line replacement and construction, the CPCN included construction of a substation at the Duncannon Lane ending point for the 69-kV and 138-kV double-circuit transmission line. EKPC will be submitting a CPCN amendment to the PSC requesting to relocate the approved substation. EKPC is including maps with this notice that clearly shows the original location for the substation as well as the new proposed location. The maps will allow each landowner to determine if their property may be affected by the CPCN amendment.

You are being notified because records indicate property you own is affected by the approved project. As required, EKPC is providing formal notice to all affected property owners of its intent to request an amendment to the approved CPCN. **Please note, the requested amendment will affect only the far southern end of the project, on the south side of Duncannon Lane.**

EKPC plans to file the CPCN amendment request with the PSC on or after Sept. 13, 2024. The amendment request will proceed on PSC Docket 2024-00263. You have the right to request to intervene in these proceedings should you desire and to request a local public hearing. Should you have any questions concerning this process, please contact Linda C. Bridwell, Executive Director, Kentucky Public Service Commission, PO Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, telephone (502) 564-3940.

Sincerely,
Bill Sharp
Land Acquisition Program Manager
