**VERIFICATION OF JOHN WOLFRAM**

---

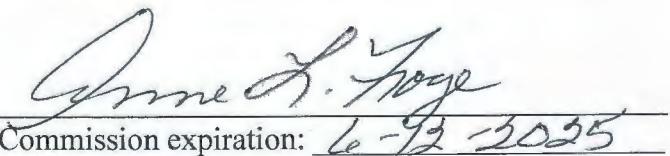

COMMONWEALTH OF KENTUCKY )  
                                )  
COUNTY OF JEFFERSON       )

John Wolfram, Principal of Catalyst Consulting LLC, being duly sworn, states that he has supervised the preparation of his Rebuttal Testimony in the above-referenced case and that the matters and things set forth therein are true and accurate to the best of his knowledge, information and belief, formed after reasonable inquiry.

John Wolfram

The foregoing Verification was signed, acknowledged and sworn to before me this 24 day of January, 2025, by John Wolfram.

Anne L. Foye

Commission expiration: June 12, 2025

**REBUTTAL TESTIMONY  
OF  
JOHN WOLFRAM**

**I. INTRODUCTION**

- 1   **Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND POSITION.**
- 2   A. My name is John Wolfram. I am the Principal of Catalyst Consulting LLC. My  
3       business address is 3308 Haddon Road, Louisville, Kentucky, 40241.
- 4   **Q. ON WHOSE BEHALF ARE YOU TESTIFYING?**
- 5   A. I am testifying on behalf of Big Sandy Rural Electric Cooperative Corporation  
6       ("Big Sandy").
- 7   **Q. ARE YOU THE SAME INDIVIDUAL THAT PROVIDED DIRECT  
8       TESTIMONY IN THIS CASE?**
- 9   A. Yes.
- 10   **Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?**
- 11   A. The purpose of my testimony is to respond to the recommendations of Witness Mr.  
12       Greg R. Meyer on behalf of the Office of the Attorney General of the  
13       Commonwealth of Kentucky ("AG"), as provided in Mr. Meyer's direct testimony  
14       ("Meyer Direct").
- 15   **Q. DID THE AG MAKE RECOMMENDATIONS REGARDING BIG  
16       SANDY'S OVERALL REVENUE REQUIREMENT?**
- 17   A. Yes. The AG made recommendations regarding several different items affecting  
18       the proposed revenue requirement in this case. I will respond to each item and  
19       recommendation in turn.

1      **Q.     WHAT DID THE AG RECOMMEND REGARDING ACKNOWLEDGED**  
2            **REVISIONS TO THE REVENUE DEFICIENCY FOR DIRECTORS FEES**  
3            **AND WAGES?**

4      A.     The AG notes that Big Sandy acknowledged an error in the proposed pro forma  
5            adjustment for these expenses (Meyer Direct, page 5 line3 and page 6 line 15)  
6            which reduced the overall revenue shortfall.

7      **Q.     HOW DO YOU RESPOND?**

8      A.     Mr. Meyer is correct. Big Sandy acknowledged this in its response to the Attorney  
9            General's Second Request for Information, Item 26 and in its response to the Staff's  
10          Third Request for Information, Item 3. The effects of both revisions are reflected  
11          in Rebuttal Exhibit JW-2. I address the numerical effects of these revisions on a  
12          consolidated basis later in my testimony.

13     **Q.     WHAT DID THE AG RECOMMEND REGARDING SALES / CUSTOMER**  
14            **NORMALIZATION?**

15     A.     The AG recommended that Big Sandy revise its year end customer normalization  
16          adjustment to eliminate the rounding of customer counts for the purpose of revenue  
17          adjustment. (Meyer Direct, page 7 line 11).

18     **Q.     HOW DO YOU RESPOND?**

19     A.     I disagree with this recommendation, for the simple reason that the number of  
20          customers on a normalized basis should be a whole number. The purpose of the  
21          adjustment is to take the number of customers at test year end and adjust revenues  
22          as if that number of customers were in place for a full year. For this reason it is not

1 practical to assume any number of customers that is not a whole number (regardless  
2 of whether the number is rounded up or rounded down).

3 **Q. WHAT DID THE AG RECOMMEND REGARDING SALES / WEATHER  
4 NORMALIZATION?**

5 A. The AG recommended that sales volumes be adjusted to reflect the use of a five-  
6 year average usage per customer instead of test year actual usage (Meyer Direct,  
7 page 13 line 3). This recommendation is based on a review of weather variations  
8 on customer usage (Meyer Direct, page 10 line 9).

9 **Q. HOW DO YOU RESPOND?**

10 A. I disagree with this recommendation. First, it is not appropriate to adjust usage from  
11 test year actuals to a five-year historical average without also adjusting other  
12 parameters in the test year (including wholesale purchased power expenses) to a  
13 five-year historical average; this violates the matching principle. Second, there is  
14 no evidence to support the specific use of a five-year average usage per customer  
15 as the appropriate method to correlate weather and usage; the appropriate way to  
16 adjust for this would be to calculate and apply a Weather Normalization Adjustment  
17 (“WNA”) analysis. The AG provided information about Heating Degree Days  
18 (“HDD”) and Cooling Degree Days (“CDD”) but did not perform a complete WNA  
19 analysis, in which usage and weather correlations are mathematically determined  
20 using linear regression techniques. The AG did not rely upon 20 or 30 years of  
21 HDD/CDD weather, apply standard deviation bandwidths to monthly amounts, or  
22 perform any other parts of the conventional WNA analysis. Instead, the AG  
23 compiled HDD/CDD data and suggested that a five-year average consumption

1       would be a sound way to reflect weather variations into the revenue requirement  
2       without relying on a WNA analysis to draw that conclusion. Third, the Commission  
3       has not required or addressed the WNA in any recent electric distribution rate cases  
4       of which I am aware. For these reasons, the Commission should not accept the  
5       proposed adjustment to usage proposed by the AG and should instead accept test  
6       year consumption in the revenue deficiency calculation.

7       **Q.     WHAT DID THE AG RECOMMEND REGARDING DEPRECIATION**  
8       **EXPENSE?**

9       A.     The AG identified issues with the pro forma adjustment to normalize depreciation  
10      expense regarding Account 392 – Transportation, particularly regarding fully  
11      depreciated equipment. The AG concludes that the adjustment is overstated and  
12      should be corrected to reduce the annual depreciation expense (Meyer Direct, pages  
13      13-18).

14       **Q.     HOW DO YOU RESPOND?**

15       A.     Mr. Meyer is correct that the pro forma adjustment for depreciation expense should  
16      be revised. Upon review of Mr. Meyer's testimony, Big Sandy undertook a close  
17      review of the records underlying the adjustment proposed in Exhibit JW-9,  
18      Reference Schedule 1.03. The as-filed adjustment included some values that were  
19      inadvertently not updated to test-year values or were otherwise not correct. Big  
20      Sandy revised the depreciation rate for Account 392 – Transportation and also  
21      adjusted the amounts for fully depreciated items to accurately reflect its books and  
22      records. The adjustment as originally proposed was \$376,017 and the revised  
23      adjustment is (\$58,093), or a reduction of \$434,110. The revised Reference

1           Schedule 1.03 is provided herein in Rebuttal Exhibit JW-2. I address the numerical  
2           effects of these revisions comprehensively later in my testimony.

3           **Q.     WHAT DID THE AG RECOMMEND REGARDING OVERTIME**  
4           **WAGES?**

5           A.     The AG recommends that overtime costs should be set using the five-year average  
6           of overtime hours instead of test period overtime hours (Meyer Direct, page 20 line  
7           2). The stated reason is that test period overtime cost exceeds that of all but one of  
8           the prior four calendar years (Meyer Direct, page 19 line 7).

9           **Q.     HOW DO YOU RESPOND?**

10          A.     I disagree with this recommendation. There is no evidence that the test year  
11          overtime costs are unreasonable; they are simply increasing relative to historical  
12          amounts, much like other cost drivers are in the test year. Also, it is not appropriate  
13          to reduce overtime hours to a five-year average without also considering doing the  
14          same for other parameters in the case. In this instance the Commission should rely  
15          on the test period overtime costs and hours as the basis for setting the revenue  
16          requirement.

17          **Q.     WHAT DID THE AG RECOMMEND REGARDING HEALTH CARE**  
18          **COSTS?**

19          A.     The AG recommended that health care costs be adjusted to the Bureau of Labor  
20          and Statistics (“BLS”) average since non-union employees pay less than 12% of  
21          the health insurance premiums (Meyer Direct, page 22 line 2). Mr. Meyer supports  
22          this recommendation with a citation to a Commission finding in a streamlined rate  
23          case filed by Farmers R.E.C.C. (Meyer Direct, page 21, footnote 15).

1   **Q.   HOW DO YOU RESPOND?**

2   A.   I disagree with this recommendation. The basis for this recommendation is a  
3   Commission finding in a streamlined rate proceeding. But the instant case is not a  
4   streamlined rate proceeding, and the provisions of the streamlined rate pilot  
5   program (and newly effective Commission regulation on streamlined rate filings)  
6   do not apply here.

7   **Q.   WHAT DID THE AG RECOMMEND REGARDING TIER?**

8   A.   The AG recommended that the Commission establish rates based on a TIER of 1.85  
9   (Meyer Direct, page 25 line 12).

10   **Q.   HOW DO YOU RESPOND?**

11   A.   I disagree with this recommendation, for several reasons. First, the AG tabulated  
12   the TIER Achieved over the last 7 years (Meyer Direct, page 23, Table GRM-7).  
13   The table shows that TIER exceeded 2.00 after Big Sandy's last rate case but has  
14   not done so since 2021. The TIER has continued to decline every year since then.  
15   This is an adverse trend in recent years, but it does not mean that an awarded TIER  
16   of 2.00 would be too high. Neither Big Sandy nor any other distribution  
17   cooperative has expended the additional resources for hiring an outside expert to  
18   quantify the appropriate TIER metric for ratemaking (as investor-owned utilities  
19   ordinarily due in rate cases to determine the proposed Return on Equity), instead  
20   relying on qualitative information and Commission precedent to support the  
21   proposed 2.00 TIER. Given the current trends, basing new rates on a TIER of less  
22   than 2.00 will simply result in Big Sandy having to return sooner rather than later  
23   for another rate increase.

1           Second, a TIER of 1.85 is not much higher than the minimums established  
2       in Big Sandy’s loan covenants—which Big Sandy failed to meet in two of the last  
3       three years, even though the rates were set based on a 2.00 TIER. The Commission  
4       has found in other cases that it is reasonable to set the target metric higher than the  
5       minimums required by cooperative lenders, in part because of the importance of  
6       unforeseen expenses. Cooperative margins are not solely related to paying off debt;  
7       they also allow the cooperative to manage volatility in the wholesale purchased  
8       power bills and unforeseen expenses like storm restoration and/or other O&M costs  
9       subject to rapid inflationary pressures. This is why the Commission should not set  
10      TIER close to the minimum levels required by the lenders; doing so would require  
11      the cooperative to operate even more on the razor’s edge than they already do today.

12           Third, in Case No. 2021-00358, the Commission explicitly rejected the  
13       AG’s recommendation to set Jackson Purchase’s TIER at 1.50. The Commission  
14       cited the adverse effect on the cooperative’s cash working capital, which could  
15       impair Jackson Purchase’s ability to have sufficient cash flow to respond to  
16       unforeseen expenses.<sup>1</sup> The basis for the Commission decision in that case applies  
17       to Big Sandy in the instant case as well; setting TIER at 1.85 could impair cash  
18       working capital and cash flow for unforeseen expenses, particularly given the  
19       current inflationary cost pressures.

20           Fourth, the AG states that Big Sandy has riders to collect significant  
21       portions of its cost (Meyer Direct, page 24 line 11) and that the revenue requirement  
22       includes approximately \$3.2 million for depreciation costs which have no

---

<sup>1</sup> In the Matter of: *Electronic Application Of Jackson Purchase Energy Corporation For A General Adjustment Of Rates And Other General Relief*, Order dated April 8, 2022 p. 18.

1           corresponding required cash outlay (Meyer Direct, page 24 line 13). However,  
2           neither of these is persuasive because (a) both the revenue and the expense from  
3           the riders are excluded from the revenue requirement pursuant to standard  
4           Commission practice, and (b) the cash outlay for capital projects is up front, and  
5           the depreciation expense is the standard method for recovering those costs over the  
6           life of the assets. How much of the total costs are recovered from riders or  
7           depreciation is irrelevant to the requirement for margins from rates being sufficient  
8           to meet Big Sandy's needs each month.

9           Finally, the AG's recommendation of a 1.85 TIER is arbitrary. It is not  
10          supported by any analysis, comparative review of peers, formulaic determination,  
11          *or case precedent*. Even if one were to determine that the Commission's historic  
12          consideration of 2.00 TIER was inappropriate here – a determination for which  
13          there is no evidence in this docket – then there is still no reason to conclude that a  
14          TIER of 1.85 is the appropriate value for ratemaking purposes. There is no  
15          evidence in the record or in Commission precedent to support the reasonableness  
16          of applying a 1.85 TIER.

17          For these reasons, it is not reasonable to make the AG's proposed TIER  
18          adjustment, and the Commission should not accept this recommendation.

19          **Q.       WHAT DID THE AG RECOMMEND REGARDING RIGHT OF WAY  
20           ("ROW") EXPENSES?**

21          A.       The AG recommended removing \$462,172 in ROW expenses. The AG claimed  
22          that there is no reasonable basis to believe that Big Sandy is capable of fully  
23          trimming and treating the ROW in accordance with its proposed cycle (Meyer

1 Direct, page 28 line 5). The AG recommended that the ROW target be set at the  
2 maximum actual mileage recorded over the past 10 years, with a 10% increase to  
3 account for deferred ROW maintenance (Meyer Direct, page 28 line 11). The AG  
4 further recommended that Big Sandy review its budgeting process (Meyer Direct,  
5 page 29 line 3) and be required to file an annual report with the Commission (Meyer  
6 Direct, page 29 line 6).

7 **Q. HOW DO YOU RESPOND?**

8 A. I disagree with these recommendations, for several reasons. First, the AG's  
9 recommendation to use the historical ROW maintenance cost for setting rates  
10 ensures that Big Sandy will never catch up to the target trimming cycle. The AG's  
11 belief that Big Sandy does not have the capacity to trim enough mileage per year to  
12 get back on target will be true *if* Big Sandy cannot afford the costs of trimming the  
13 target mileage per year. The historical ROW maintenance costs are largely aligned  
14 with the historical achieved TIER values. Over the recent years, Big Sandy has had  
15 insufficient margins to permit the cooperative to manage the ROW to the target  
16 cycle. Setting rates based on a history in which Big Sandy fell short of the ROW  
17 maintenance target will ensure that in the future, they will continue to fall short of  
18 the ROW maintenance target.

19 Big Sandy already considers its ROW expenses carefully in its planning and  
20 budgeting. The development and filing of an annual report to the Commission  
21 creates additional administrative burden and cost for Big Sandy without any  
22 offsetting benefits to Big Sandy's members. These recommendations are not  
23 necessary and should not be adopted.

1                   For these reasons, and those provided by the other witnesses, the  
2                   Commission should reject the AG's recommendations and instead should accept  
3                   Big Sandy's adjustment to ROW maintenance expense as filed. The ROW  
4                   expenses are discussed further in the Rebuttal testimony of Mr. Jeff Prater.

5           **Q.     WHAT DID THE AG RECOMMEND REGARDING RETIREMENT  
6               PLANS?**

7           A.    The AG requests that the Commission require Big Sandy to indicate if there are  
8               employees who participate in both the defined benefit and defined contribution  
9               plans and if so quantify how much Big Sandy contributes for each plan related to  
10              these specific employees. The AG recommended that the costs of the least  
11              expensive plan for employees that qualify for more than one plan be removed  
12              (Meyer Direct, page 31, line 2).

13          **Q.     HOW DO YOU RESPOND?**

14          A.    Big Sandy does not have any employees for which it contributes to more than one  
15              retirement plan. For this reason, no expense adjustment to remove the costs of the  
16              least expensive retirement plan for those that qualify for more than one plan is  
17              needed.

18          **Q.     BASED ON THE RESPONSES DESCRIBED HEREIN, AND THOSE  
19              NOTED IN DISCOVERY, WHAT IS THE REVISED REVENUE  
20              DEFICIENCY FOR BIG SANDY IN THIS CASE?**

21          A.    The revenue deficiency changes from the originally filed \$3,458,483 amount to  
22              \$2,861,406, for a change of (\$597,077).

23          **Q.     DO THESE REVISIONS AFFECT THE COSS?**

1     A. Yes, but the revised pro forma adjustments have a negligible effect on the relative  
2         results of the COSS. The revisions change the cost-based rates by small increments  
3         and do not change the relative assessment of overall rates of return for Big Sandy's  
4         rate classes. The cost based customer charge for residential Rate A1 – Farm &  
5         Home is \$42.64 per month, compared to the actual current charge of \$21.95 per  
6         month. See Rebuttal Exhibit JW-3.

7     **Q. HOW DO THE UPDATES TO THE REVENUE DEFICIENCY AND COSS**  
8         **TRANSLATE INTO REVISED RATES?**

9     A. Because the fundamental results of the COSS do not change, the allocation of the  
10         proposed increase does not change; the proposed per-unit charges change slightly  
11         in order to yield the target revenue increase. The proposed residential customer  
12         charge of \$29.00 does not change. The proposed energy charge for residential  
13         changes from the as-originally-filed \$0.11476 per kWh to \$0.11137 per kWh. The  
14         other proposed rate changes also decrease by small amounts, such that the overall  
15         rates of return on rate base for the relevant classes are approximately equivalent.  
16         See Rebuttal Exhibits JW-3 and JW-9.

17     **Q. HOW DO YOU SUMMARIZE THE REVISED REQUEST OF BIG SANDY**  
18         **AT THIS JUNCTURE OF THE CASE?**

19     A. Based on the latest information, Big Sandy is requesting an overall increase of  
20         \$2,861,372. (This is \$34 short of the \$2,861,406 target revenue deficiency due to  
21         rate rounding.) Big Sandy is proposing to increase the residential Rate A1 – Farm  
22         & Home charge from \$21.95 per month to \$29.00 per month (which is still well  
23         short of the cost based \$42.64 per month) and the energy charge from \$0.10064 per

1 kWh to \$0.11137 per kWh, which will increase the average residential customer's  
2 monthly bill by \$18.07 or 12.93%. This request is lower than that originally filed  
3 by Big Sandy (which was \$21.55 per month or 15.42% on average) but is required  
4 in order for the cooperative to meet the financial target of 2.00 TIER for the period  
5 of time when the proposed rates will be put in effect. See Rebuttal Exhibit JW-9.

6 **Q. DID YOU UPDATE THE FILED EXHIBITS TO REFLECT BIG SANDY'S**  
7 **MOST RECENT POSITION, BASED ON THE RESPONSES DESCRIBED**  
8 **HEREIN?**

9 A. Yes. Updated files for Exhibit JW-2 (revenue requirement with pro forma  
10 adjustments), Exhibits JW-3 through JW-8 (COSS updated for pro forma  
11 adjustment revisions) and Exhibit JW-9 (present and proposed rates for revised  
12 revenue deficiency) are included in the three files provided electronically with this  
13 rebuttal testimony. These are the same three files uploaded with the original  
14 application, but they include revisions reflecting all of the items I described herein.  
15 Revised fields are noted in colored highlight. Copies of Rebuttal Exhibit JW-2, JW-  
16 3 and JW-9 are also attached. The Commission should rely on the updated exhibits  
17 in rendering its decision on Big Sandy's application in this case.

18 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

19 A. Yes, it does.

**Exhibit JW-2**  
**Revenue Requirements &**  
**Pro Forma Adjustments**

**UPDATED**

**BIG SANDY RECC**  
**Statement of Operations & Revenue Requirement**

This adjustment removes certain Director expenses, including directors' per diems & expenses for attending EKPC / KAEC / NRECA annual meeting(s) when the director is not the Big Sandy representative for the respective organization, plus gifts and jackets. Expenses that are not removed for rate-making purposes may include costs of attending director training/education seminars (esp for new directors). These seminars help directors to meet their fiduciary duties to the membership by educating them on industry issues. Also included is Liability Insurance that protects the directors for decisions they make on a routine basis.

53	Annualized Cost Rate						3.023%	2.636%	

This adjustment normalizes the interest on Long-Term Debt. Test year cost of debt is normalized to annualized cost rate (by multiplying the test year end debt amounts by the interest rate in effect at the end of the test year for each loan).
