

Case No. 2024-00290
Kentucky Municipal Energy Agency
Supplemental Response to Siting Board's First Request for Information

Siting Board 1-2:

Detail any contracts for which Kentucky Municipal Energy has paid, has negotiated to pay, or any compensation paid to non-participating landowners, whether cash or otherwise, near the project. Include the terms of the agreements and which properties are involved in terms of distance to the project boundaries.

Response: No contracts have been made with non-participating landowners.

Supplemental Response: Although no written contracts have been executed with non-participating landowners, KYMEA representatives met with landowners of the two closest residential structures on February 4, 2025. Robert Cunningham and Donna and Sharon Hendricks each confirmed that they support the project with KYMEA's commitment to working with them in the future within reason to address future concerns they may have. Letters of these confirmations were filed in the record of this case as Exhibit A to the KYMEA's Response to the Consultant's Report. Mr. Cunningham owns the property with the hunting cabin to the west of the Madisonville Wastewater Treatment Plant. Donna and Sharon Hendricks own the parcel on the southwest corner of AC Slaton Road and Bean Cemetery Road with the mobile home.
