

In reference to case no. 2024-00314

1. I will attach the invoice for the 1-inch bypass meter which was \$393.12. It shows we had 10 shipped and only 1 went to this project.
2. The total amount will be determined because we are still waiting on 2 saddles and a setter to be delivered. I will attach the labor cost which was \$1350.00 and the invoice for the gate valve which was \$1334.16. The total as of right now is \$3077.28, we are waiting on 2 saddles and a setter to be delivered then we will have that price to add to it as well.
