5. Description of Changes in Service Territory:

As explained in this application and in the attached exhibits, KU and Blue Grass Energy have individually agreed to the requested territorial change for numerous residential home lots of

land within the new Parkview Heights Residential Subdivision described below. The proposed territorial boundary change serves the purposes of KRS 278.016. The change avoids the wasteful duplication of facilities, the unnecessary encumbrance of the landscape, and promotes the orderly development of retail electric service. No existing customer will change electric provider.

When the two utilities learned of the new residential subdivision to be constructed in the area in question, KU and Blue Grass Energy engineering staffs together reviewed and studied the planned subdivision layout. As is normal protocol in situations where a new development spans across two utilities' service territories, the companies agreed to redraw the certified service territory boundary line in order to efficiently and fairly align with the new property lines. The proposed boundary line will allow each utility to prudently extend its existing electrical distribution system in order to reliably serve the residential development. Specifically, lots 42-44, 50-65, 86, 87 are currently situated in a "split territory" where part of each lot is within KU's service territory and part is within Blue Grass Energy's territory. The proposed boundary modification would adjust the line such that the entirety of each of lots 42-44 and 50-65 would be in KU's service territory, as KU is best situated to serve those particular lots. Lot 41, although not currently a split lot, will be added to KU's territory in order to promote the orderly subdivision development.

As noted above, lots 86 and 87 are currently in a split territory situation. The proposed boundary modification ensures that the entirety of each of those lots would be situated within Blue Grass Energy's certified territory, as Bluegrass Energy is best situated to serve those particular lots.

The territorial maps and other attachments provided constitute the entire agreement between KU and Blue Grass Energy.

6. Agreement and Maps:

Application Exhibit 1 of this filing includes the summary list identifying KU and Blue Grass Energy personnel familiar with the specifics of the facilities available, the reason for the proposed change (purposes served under KRS 278.016), and the agreement signed by both parties for the properties involved. Application Exhibit 2 includes the signed territorial Richmond North 31-F-4 quadrant map. Application Exhibit 3 includes the corresponding signed detailed site map.

WHEREFORE, KU hereby requests, pursuant to KRS 278.018, that the Commission enter an order approving the updates to the Quadrant Map to reflect the current requested service territory changes and the agreement between KU and Blue Grass Energy.

Dated: February 11, 2025
