RE: ELECTRONIC INVESTIGATION OF JURISDICTIONAL  
STATUS OF ORBIT GAS TRANSMISSION, INC., AND OF  
ITS COMPLIANCE WITH KRS CHAPTER 278, 807 KAR  
CHAPTER 005, AND 49 CFR PARTS 191 AND 192  
Case No. 2025-00017

Dear Sirs/Madams:

Orbit submits this second response within the fourteen (14) days stipulated from the 9-4-2025 receipt, by certified mail, of the above-subject documents.

**1) Orbit Gas shall file a statement setting forth a description of the natural gas services it currently provides. This statement shall include:**

**a. A description of all gas distribution services that Orbit Gas offers.**

Orbit: To our knowledge, Orbit does not offer gas distribution services, per se. Orbit gathers/buys gas locally delivered into its system and transmits/redelivers it – via sale - to various end users. Delivery meters are generally at Orbit's pipeline (i.e. off the end user property), and the end user attaches to it and is responsible for final regulation etc. at and inside its premises.

**b. A description of all gas transportation services that Orbit Gas offers pursuant to its transportation tariff. This shall include the number of transportation customers that Orbit has served in each of the last five years.**

Orbit: Orbit only contemplates one type of transportation service being the simple Point A to Point B service with reliability based upon the supply-source

reliability. Any request would have to be analyzed to determine no negative impact on Orbit's existing services and economic viability. Orbit has had no transportation customers in any of the last five years.

**c. A description of all sources of gas supply.**

Orbit: In 2024, Orbit bought 80% of its supply from local production (wells) – some are Orbit-owned wells, others third party. The remainder is from a marketing company providing back-up supplies (i.e. not locally produced) primarily during winter heavy load times.

Very truly yours,

ORBIT GAS TRANSMISSION, INC.

By  
James F. Martin  
President
