USA-PA operates the water and wastewater systems for the City of Perth Amboy, New Jersey (Perth Amboy) under a 10-year operations and maintenance contract expiring in 2028. In addition to performing day-to day operations, USA-PA is also responsible for emergency response and management of capital projects funded by Perth Amboy.

USA operates the Borough of Avalon, New Jersey's (Avalon) water utility, sewer utility and storm water system under a 10-year operations and maintenance contract expiring in 2032. USA also operates the Borough of Highland Park, New Jersey's (Highland Park) water and wastewater systems under a 10-year operations and maintenance contract expiring in 2030. In addition to performing day-to-day service operations, USA is responsible for emergency response and management of capital projects funded by Avalon and Highland Park. Under a marketing agreement with HomeServe USA Corp. (HomeServe) expiring in 2031, USA offers residential customers in New Jersey and Delaware water and wastewater related services and home maintenance programs. HomeServe is a leading national provider of such home maintenance service programs. USA receives a service fee for the billing, cash collection and other administrative matters associated with HomeServe's service contracts. USA also provides unregulated water and wastewater services under contract with several New Jersey municipalities.

Middlesex President and Chief Executive Officer Retirement Announcement and Replacement

In May 2023, President and Chief Executive Officer, Dennis W. Doll announced a plan to retire upon turning age 65. On January 23, 2024, the Company named Nadine Leslie as its new President and Chief Executive Officer effective March 1, 2024. Ms. Leslie will also be appointed to the Board of Directors effective March 1, 2024. Mr. Doll

will remain Chairman of the Company's Board of Directors through the expiration of his current term as a Director as of the May 21, 2024 Annual Meeting of Shareholders.

Regulatory Notice of Non-Compliance

In September 2021, the New Jersey Department of Environmental Protection (NJDEP) issued a Notice of Non-Compliance (Notice) to Middlesex based on self-reporting by Middlesex that the level of Perfluorooctanoic Acid (PFOA) in water treated at its Park Avenue Wellfield Treatment Plant (Park Avenue Plant) in South Plainfield, New Jersey exceeded a standard promulgated in a NJDEP regulation that became effective in 2021. Middlesex was required by the regulation to notify its affected customers and complied within the required Notice period in November 2021.

The Notice further required the Company to take any action necessary to comply with the new standard by September 7, 2022. Consequently, in November 2021, the Company implemented an interim solution to meet the Notice requirements, which included putting the Park Avenue Wellfield Treatment Plant in off-line status and obtaining alternate sources of supply. In June 2022, the Company accelerated the in-service date for a portion of the enhanced treatment project based on engineering analysis that allowed a restart of the Park Avenue Wellfield Treatment Plant to ensure continued compliance with all state and federal drinking water standards.

In September 2022, the Company entered into an Administrative Consent Order (ACO) with the NJDEP, which required the Company to take whatever actions necessary to achieve and maintain compliance with applicable regulations. As prescribed in the ACO, the Company was to issue periodic public notifications until the ACO was closed.

In June 2023, the Company completed the permanent construction of the entire Park Avenue Plant treatment upgrades and placed the upgrades into operation in full compliance with the NJDEP PFOA standards. In October 2023, the Company received confirmation from the NJDEP that it has complied with all requirements of the ACO and consequently, the ACO has been closed.

The Company had previously initiated a lawsuit against 3M Company (3M), in connection with the Company's claim that 3M introduced perfluoroalkyl substances (commonly known as "PFAS"), which include PFOA, into the Company's water supply at its Park Avenue Plant.

On August 29, 2023, Middlesex and 3M executed a settlement agreement (the Settlement Agreement) to resolve the lawsuit. The Settlement Agreement provides that:

- 3M will pay $93.2 million in two installments, one payment of $23.3 million received in December 2023 and one payment of $69.9 million in July 2024. Middlesex is obligated to pay 30% of the proceeds received plus reimbursable out-of-pocket legal expenses to its lawyers as legal fees, or $29.5 million in total;

- Proceeds received from the Settlement Agreement are being used to mitigate the impact of the increase in Middlesex's customer rates approved by the NJBPU and to be implemented March 1, 2024 (for further discussion of Middlesex's base rate increase, see *Rates, Middlesex* below);

- Middlesex, by nature of its status as a U.S. water purveyor impacted by PFAS, was automatically included in a Multi-District Litigation Settlement before the United States District Court for the District of South Carolina in which 3M and other companies (Non-3M Companies) are participants. Middlesex agreed as part of the Settlement Agreement to remain a member of the plaintiff class in order to be eligible to obtain future additional compensation from 3M and the Non-3M Companies for any future remediation which may be required of its water treatment facilities; and

- Middlesex and 3M agreed to enter into a joint mediation, which occurred in November 2023, to resolve two PFOA-related class action lawsuits against Middlesex seeking restitution for medical, water replacement and other claimed related costs. Both Middlesex and 3M are defendants in these lawsuits. These lawsuits remain in the legal process and their ultimate resolution is not known at this time.

Capital Construction Program

The Company's multi-year capital construction program encompasses numerous projects designed to upgrade and replace utility infrastructure as well as enhance the integrity and reliability of assets to better serve the current and future generations of water and wastewater customers. The Company plans to invest approximately $75 million in 2024 in connection with this plan for projects that include, but are not limited to:

- Replacement of approximately 17,200 linear feet of cast iron 6" water main in the Port Reading and Carteret sections of Woodbridge, New Jersey;
- Replacement of control room and electrical distribution equipment at our The Carl J. Olsen Surface Water Treatment Plant (CJO Plant);
- Supply and storage improvements and installation of emergency generators at several of our Tidewater facilities;
- Construction of residual removal equipment and chemical feed improvements, pumps and a surge mitigation tank as well as other improvements and upgrades at our Park Avenue Plant;
- Upgrades and improvements to our Enterprise Resource Planning System; and
- Various water main replacements and improvements.

Strategy for Growth

Our strategy for profitable growth is focused on the following key areas:

- Invest in projects, products and services that complement our core water and wastewater competencies;
- Timely and adequate recovery of infrastructure investments and other costs to maintain service quality;
- Prudent acquisitions of investor and municipally-owned water and wastewater utilities; and
- Operation of municipal and industrial water and wastewater systems on a contract basis which meet our risk profile.

Rates

Middlesex - In February 2024, Middlesex's petition to the NJBPU, filed in May 2023, seeking permission to increase its base water rates was concluded, based on a negotiated settlement that is expected to increase annual operating revenues by $15.4 million effective March 1, 2024. The approved tariff rates were designed to recover increased operating costs as well as a return on invested capital of $563.1 million, based on an authorized return on common equity of 9.6%. Middlesex has made capital infrastructure investments to ensure prudent upgrade and replacement of its utility assets to support continued regulatory compliance, resilience and overall quality of service. Net proceeds from the 3M Settlement Agreement were used to recover costs for the construction of the Park Avenue Plant PFAS treatment upgrades, including depreciation and carrying costs. The rate case settlement will result in the reclassification of $48.3 million from Regulatory Liabilities to Contributions in Aid of Construction in the March 31, 2024 balance sheet. The Company will also record in the first quarter of 2024 the recovery of $0.7 million and $2.4 million of prior year depreciation and carrying costs, respectively, as well as the recovery of $1.4 million of prior year costs which were associated with the interim solution to comply with the Notice, all of which were approved in the rate case settlement. For further information on the 3M Settlement Agreement, see *Regulatory Notice of Non-Compliance* above**.**

In January 2024, the NJBPU approved Middlesex's petition for the proposed cost recovery of its Lead Service Line Replacement (LSLR) Plan and cost recovery of project costs associated with replacing Middlesex customer-owned lead service lines. Replacement of Middlesex and Middlesex customer-owned lead service lines is required by the New Jersey LSLR Law. Under this legislation, the costs associated with replacing customer-owned lead service lines are recoverable through future customer surcharges. Cost recovery for replacing Company-owned lead service lines are recoverable through traditional base rate case filings. The current estimates for replacement of Middlesex and Middlesex customer-owned lead service lines are approximately $46 million to $77 million over a nine-year period.

In October 2023, the NJBPU approved Middlesex's petition for a Distribution System Improvement Charge (DSIC) Foundation Filing, which is a prerequisite to implementing a DSIC rate that allows water utilities to recover

investments in, and generate a return on, qualifying capital improvements to their water distribution system made between base rate proceedings. Middlesex is authorized to recover DSIC revenues up to five percent (5%) of total revenues established in Middlesex's 2021 base rate proceeding, or approximately $5.5 million. Semi-annually, beginning in April 2024, the Company must file for a change in its DSIC rate seeking recovery for DSIC-eligible investments made during the period. DSIC rates remain in effect until Middlesex's next base rate case increase subsequent to the March 1, 2024 increase. Under the terms of the Foundational filing, the Company is required to file a base rate petition before November 2026.

In September 2022, the NJBPU approved Middlesex's Emergency Relief Motion to reset its Purchased Water Adjustment Clause (PWAC) tariff rate to recover additional costs of $2.7 million for the purchase of treated water from a non-affiliated water utility. A PWAC is a rate mechanism that allows for recovery of increased purchased water costs between base rate case filings. The increase, effective October 1, 2022, was on an interim basis and subject to refund with interest, pending final resolution of this matter, which the NJBPU provided in August 2023. In connection with the full recovery of the $2.7 million of additional costs, Middlesex reset its PWAC rate to zero in October 2023.

In December 2021, Middlesex's petition to the NJBPU seeking permission to increase its base water rates was concluded, based on a negotiated settlement, resulting in an expected increase in annual operating revenues of $27.7 million. The approved tariff rates were designed to recover increased operating costs, as well as a return on invested capital of $513.5 million, based on an authorized return on common equity of 9.6%. The increase was implemented in two phases with $20.7 million of the increase effective January 1, 2022 and the remaining $7.0 million effective January 1, 2023. As part of the negotiated settlement, the PWAC was reset to zero.

Tidewater - In December 2023, the DEPSC approved Tidewater's application to implement a new DSIC. Effective January 1, 2024, Tidewater implemented a DSIC rate of 3.71%, which is expected to generate revenue of approximately $1.3 million annually. A Delaware DISC is subject to a semi-annual reset with an overall maximum rate of 7.5%.

In October 2023, the DEPSC issued an Order that made a temporary base rate reduction permanent. The initial DEPSC order required Tidewater to reduce its base rates charged to general metered and private fire customers by 6.0%, effective for service rendered on and after September 1, 2022. The rate reduction was ordered as a result of Tidewater earning in excess of its authorized return, and resulted in reduced annual revenues of approximately $2.1 million in 2023.

In March 2021, Tidewater was notified by the DEPSC that it had determined Tidewater's earned rate of return exceeded the rate of return authorized by the DEPSC. Consequently, Tidewater reset its DSIC rate to zero effective April 1, 2021 and refunded approximately $1.0 million to customers primarily in the form of an account credit for DSIC revenue previously billed between April 1, 2020 and March 31, 2021.

Pinelands - In April 2023, Pinelands Water and Pinelands Wastewater concluded their base rate case matters when the NJBPU approved a combined $1.0 million increase in annual base rates, effective April 15, 2023. The requests were necessitated by capital infrastructure investments the companies have made as well as increased operations and maintenance costs.

Southern Shores - Effective January 1, 2020, the DEPSC approved the renewal of a multi-year agreement for water service to a 2,200 unit condominium community we serve in Sussex County, Delaware. Under the agreement, current rates were to remain in effect until December 31, 2024, unless there are unanticipated capital expenditures or regulatory related changes in operating expenses exceeding certain thresholds during this time period. In 2022, capital expenditures did exceed the established threshold and rates were increased by 5.39% effective January 1, 2023. Beginning in 2025 and thereafter, inflation-based rate increases cannot exceed the lesser of the regional Consumer Price Index or 3%. Inflation based increases are in addition to the threshold rate increases. The agreement expires on December 31, 2029.

Outlook

Our ability to increase operating income and net income is based significantly on four factors: weather, adequate and timely rate relief, effective cost management and customer growth (which are evident in comparison discussions in the *Results of Operations* section below). Weather patterns which can result in lower customer demand for water may occur in 2024. As operating costs are anticipated to increase in 2024 in a variety of categories, we continue to implement plans to further streamline operations and further reduce, and mitigate increases in, operating costs. Changes in customer water usage habits, as well as increases in capital expenditures and operating costs, are significant factors in determining the timing and extent of rate increase requests.

Our investments in system infrastructure continue to grow significantly and our operating costs are anticipated to increase in 2024 and 2025 in a variety of categories. These factors, among others, may require base rate increase requests filings by Tidewater, Pinelands Water and Pinelands Wastewater later in 2024.

Overall, organic residential customer growth continues in our Tidewater system (approximately 4% in 2023). However, current and evolving economic market conditions may challenge that growth.

Builders and developers in Tidewater's service areas are experiencing lower home starts and longer home sales closing cycles due to supply chain issues, which may be further affected by inflationary trends on housing construction materials and mortgage interest rates.

The Company has projected to spend approximately $226 million for the 2024-2026 capital investment program, including approximately $15 million for replacement of a thirty inch main in our Middlesex System, $9 million for LSLR compliance in the Middlesex System, $34 million on the RENEW Program, which is our ongoing initiative to replace water mains in the Middlesex System, $6 million for evaluation of PFAS treatment at our CJO Plant and $7 million for control room and electrical distribution equipment at our CJO Plant.

Operating Results by Segment

The Company has two operating segments, Regulated and Non-Regulated. Our Regulated segment contributed approximately 93%, 93% and 91% of total revenues for the years ended December 31, 2023, 2022 and 2021, respectively, and approximately 92%, 93% and 93% of net income for the years ended December 31, 2023, 2022 and 2021, respectively . The discussion of the Company's results of operations is on a consolidated basis and includes significant factors by subsidiary. The segments in the tables included below are comprised of the following companies: Regulated- Middlesex, Tidewater, Pinelands and Southern Shores; Non-Regulated- USA, USA-PA, and White Marsh.

Results of Operations for 2023 as Compared to 2022

	(In Millions) Years Ended December 31,					
	2023			2022		
	Regulated	Non-Regulated	Total	Regulated	Non-Regulated	Total
Revenues	$ 154.0	$ 12.3	$ 166.3	$ 150.6	$ 11.8	$ 162.4
Operations and maintenance expenses	74.8	8.4	83.2	70.8	8.3	79.1
Depreciation expense	24.9	0.3	25.2	22.8	0.2	23.0
Other taxes	18.5	0.2	18.7	18.0	0.2	18.2
Gain on Sale of Subsidiary	—	—	—	5.2	—	5.2
Operating income	35.8	3.4	39.2	44.2	3.1	47.3
Other income (expense), net	6.3	0.2	6.5	7.4	0.3	7.7
Interest expense	13.1	—	13.1	9.4	—	9.4
Income taxes	(0.1)	1.1	1.0	2.0	1.2	3.2
Net income	$ 29.1	$ 2.5	$ 31.6	$ 40.2	$ 2.2	$ 42.4

Operating Revenues

Operating revenues for the year ended December 31, 2023 increased $3.8 million from the same period in 2022 due to the following factors:

- Middlesex System revenues increased by $4.2 million due to the implementation of the final phase of the 2021 base rate case increase on January 1, 2023 and the PWAC rate increase offset by lower weather-driven demand across all customer classes (for further discussion of Middlesex's 2021 base and PWAC rate increases, see *Rates, Middlesex* above);
- Tidewater System revenues decreased by $0.9 million due to a DEPSC ordered rate reduction in September 2022, lower customer connection fees and lower weather-driven customer demand partially offset by an increase in customers (for further information on the Tidewater rate reduction, see *Rates, Tidewater* above*)*;
- Pinelands System revenues increased $0.2 million due to the implementation of a base rate increase effective April 15, 2023 (for further discussion of Pinelands 2023 base rate increase, see *Rates, Pinelands* above) ; and
- Non-regulated revenues increased $0.3 million, primarily due to higher supplemental contract services.

Operation and Maintenance Expense

Operation and maintenance expenses for the year ended December 31, 2023 increased $4.0 million from the same period in 2022 due to the following factors:

- Variable production costs increased $2.9 million primarily due to weather-driven changes in water quality and higher chemical prices;
- Outside service costs rose by $0.9 million primarily due to production instrumentation calibration activities;
- Labor cost increased $0.7 million due to wage increases;
- Bad debt expense increased $0.4 million due to higher anticipated customer receivable write-offs;
- Non-regulated expenses increased $0.2 million due to additional billable supplemental service expenses;
- Lower weather-related main break activity in our Middlesex System during the winter months resulted in $0.8 million of decreased non-labor costs; and
- All other operation and maintenance expense categories decreased $0.3 million.

Depreciation

Depreciation expense for the year ended December 31, 2023 increased $2.2 million from the same period in 2022 due to a higher level of utility plant in service.

Other Taxes

Other taxes for the year ended December 31, 2023 increased $0.5 million from the same period in 2022 primarily due to higher revenue related taxes on increased revenues in our Middlesex system.

Gain on Sale of Subsidiary

Middlesex recognized a $5.2 million gain on the sale of its regulated Delaware wastewater subsidiary in January 2022.

Other Income, net

Other Income, net for the year ended December 31, 2023 decreased $1.2 million from the same period in 2022 primarily due to lower actuarially-determined retirement benefit plans non-service benefit.

Interest Charges

Interest charges for the year ended December 31, 2023 increased $3.8 million from the same period in 2022 due to higher average debt outstanding and higher average interest rates in 2023 as compared to 2022.

Income Taxes

Income taxes for the year ended December 31, 2023 decreased by $2.2 million from the same period in 2022, primarily due to greater income tax benefits associated with increased repair expenditures on tangible property in the Middlesex System and lower pretax income due to gain on the sale of a subsidiary in 2022.

Net Income and Earnings Per Share

Net income for the year ended December 31, 2023 decreased $10.9 million as compared with the same period in 2022. Basic earnings per share were $1.77 and $2.40 for the years ended December 31, 2023 and 2022, respectively. Diluted earnings per share were $1.76 and $2.39 for the years ended December 31, 2023 and 2022, respectively.

Results of Operations for 2022 as Compared to 2021

(In Millions)

	Years Ended December 31,					
	2022			2021		
	Regulated	Non-Regulated	Total	Regulated	Non-Regulated	Total
Revenues	$ 150.6	$ 11.8	$ 162.4	$ 130.8	$ 12.3	$ 143.1
Operations and maintenance expenses	70.8	8.3	79.1	65.4	8.3	73.7
Depreciation expense	22.8	0.2	23.0	20.9	0.2	21.1
Other taxes	18.0	0.2	18.2	14.9	0.2	15.1
Gain on Sale of Subsidiary	5.2	—	5.2	—	—	—
Operating income	44.2	3.1	47.3	29.6	3.6	33.2
Other income (expense), net	7.4	0.3	7.7	5.6	0.3	5.9
Interest expense	9.4	—	9.4	8.1	—	8.1
Income taxes	2.0	1.2	3.2	(6.7)	1.2	(5.5)
Net income	$ 40.2	$ 2.2	$ 42.4	$ 33.8	$ 2.7	$ 36.5

Operating Revenues

Operating revenues for the year ended December 31, 2022 increased $19.3 million from the same period in 2021 due to the following factors:

- Middlesex System revenues increased by $21.6 million due to the approved 2022 base rate and PWAC rate increases and higher weather driven demand across all customer classes (for further discussion of Middlesex's 2021 base rate and PWAC rate increases see *Rates, Middlesex* above);
- Tidewater System revenues increased $0.9 million due to additional customers and a one-time customer credit issued in 2021 partially offset by a DEPSC ordered 2022 rate reduction (for further information on the one-time credit and rate reduction, see *Rates, Tidewater* above*)*;
- The sale of our regulated Delaware wastewater subsidiary in January 2022 reduced revenues by $2.7 million;
- Non-regulated revenues decreased $0.4 million, primarily due to lower supplemental contract services; and
- All other revenue categories decreased $0.1 million.

Operation and Maintenance Expense

Operation and maintenance expenses for the year ended December 31, 2022 increased $5.4 million from the same period in 2021 due to the following factors:

- Labor cost increased $1.5 million due to wage increases;
- Variable production costs increased $1.2 million primarily due to increased production, weather-driven changes in water quality and higher chemical prices;
- Costs for employee benefits increased $1.0 million due to market fluctuations in the cash surrender value of life insurance policies and higher health insurance premiums;
- Higher weather-related main break activity in our Middlesex system during the winter months resulted in $0.6 million of additional non-labor costs;
- Equipment repairs and maintenance costs increased by $0.5 million;
- Transportation expenses increased $0.3 million due to higher fuel prices;
- Costs associated with the NJDEP PFOA customer notification process resulted in $0.2 million of additional expense (for further information on this matter, see *Regulatory Notice of Non-Compliance* above*)*; and
- All other operation and maintenance expense categories increased $0.1 million.

Depreciation

Depreciation expense for the year ended December 31, 2022 increased $1.9 million from the same period in 2021 due to a higher level of utility plant in service.

Other Taxes

Other taxes for the year ended December 31, 2022 increased $3.0 million from the same period in 2021 primarily due to higher revenue related taxes on increased revenues in our Middlesex system.

Gain on Sale of Subsidiary

Middlesex recognized a $5.2 million gain on the sale of its regulated Delaware wastewater subsidiary in January 2022.

Other Income, net

Other Income, net for the year ended December 31, 2022 increased $1.8 million from the same period in 2021 primarily due to higher actuarially-determined retirement benefit plans non-service benefit partially offset by lower AFUDC resulting from a reduced level of capital projects under construction.

Interest Charges

Interest charges for the year ended December 31, 2022 increased $1.3 million from the same period in 2021 due to higher average debt outstanding and higher average interest rates in 2022 as compared to 2021 .

Income Taxes

Income taxes for the year ended December 31, 2022 increased by $8.7 million from the same period in 2021, primarily due to income taxes on the gain on the sale of a subsidiary and the expiration of income tax benefits associated with the adoption of Internal Revenue Service tangible property regulations as Middlesex was required by the NJBPU to account for the benefit of adopting these regulations over 48 months beginning in 2018. Partially offsetting these increases were greater income tax benefits associated with increased repair expenditures on tangible property in the Middlesex system.

Net Income and Earnings Per Share

Net income for the year ended December 31, 2022 increased $5.9 million as compared with the same period in 2021. Basic earnings per share were $2.40 and $2.08 for the years ended December 31, 2022 and 2021, respectively. Diluted earnings per share were $2.39 and $2.07 for the years ended December 31, 2022 and 2021, respectively (for further discussion of Middlesex's 2022 rate increase, see *Rates, Middlesex* above).

Liquidity and Capital Resources

Cash Flows from Operating Activities

Cash flows from operating activities are largely influenced by four factors: weather, adequate and timely rate increases, effective cost management and customer growth. The effect of those factors on net income is discussed in the Results of Operations section above.

For the year ended December 31, 2023, cash flows from operating activities decreased $8.6 million to $52.8 million. The decrease in cash flows from operating activities primarily resulted from lower net income and higher interest payments.

Increases in certain operating costs impact our liquidity and capital resources. We continually monitor the need for timely rate filing to minimize the lag between the time we experience increased operating costs and capital expenditures and the time we receive appropriate rate relief. There can be no assurances however that our regulated subsidiaries' respective utility commissions will approve base water and/or wastewater rate increase requests in whole or in part or when the decisions will be rendered.

Cash Flows from Investing Activities

For the year ended December 31, 2023, cash flows used in investing activities increased $2.0 million to $90.2 million, which was attributable to cash received from the sale of Middlesex's regulated wastewater subsidiary in January 2022 partially offset by lower utility plant expenditures.

For further discussion on the Company's future capital expenditures and expected funding sources, see "*Capital Expenditures and Commitments*" below.

Cash Flows from Financing Activities

For the year ended December 31, 2023, cash flows provided by financing activities increased $8.8 million to $36.0 million. The increase in cash flows provided by financing activities is due to an increase in net borrowings and higher proceeds from the issuance of common stock under the Investment Plan partially offset by increased common stock dividend payments.

For further discussion on the Company's short-term and long-term debt, see "*Sources of Liquidity*" below.

Capital Expenditures and Commitments

To fund our capital program, we use internally generated funds, short-term and long-term debt borrowings, proceeds from sales of common stock under the Investment Plan and, when market conditions are favorable, proceeds from sales to the public of our common stock.

The table below summarizes our estimated capital expenditures for the years 2024-2026.

	(Millions)			
	2024	2025	2026	2024-2026
Distribution/Network System	$ 43	$ 55	$ 50	$ 148
Production System	23	18	11	52
Information Technology (IT) Systems	3	2	3	8
Other	6	6	6	18
Total Estimated Capital Expenditures	$ 75	$ 81	$ 70	$ 226

Our estimated capital expenditures for the items listed above are primarily comprised of the following:

- Distribution/Network System - Includes projects associated with replacement, installation and relocation of water mains and service lines and wastewater collection systems, construction of water storage tanks, installation and replacement of hydrants, meters and meter pits and the RENEW Program. RENEW is our ongoing initiative to replace water mains in the Middlesex System. In connection with RENEW, we expect to spend approximately $11 million in each of 2024 and 2025, and $12 million in 2026.
- Production System - Includes projects associated with our treatment plants, including approximately $2.0 million of expenditures for PFAS treatment upgrades and $6.8 million for replacement of existing motor control center and electrical distribution equipment in our Middlesex system, and $3.6 million of various treatment projects in our Tidewater system in 2024.
- Information Technology (IT) Systems - Includes further upgrade of our enterprise resource planning system and hardware and software purchases for other IT systems.
- Other - Includes purchase of transportation equipment, tools, furniture, laboratory equipment, security systems and other general infrastructure needs including improvements to field and inventory management facilities in Iselin, New Jersey.

The actual amount and timing of capital expenditures is dependent on the need for replacement of existing infrastructure, customer growth, residential new home construction and sales, project scheduling and continued refinement of project scope and costs.

To pay for our capital program in 2024, we estimate we will utilize some or all of the following:

- Internally generated funds;
- Short-term borrowings, as needed, through $140 million of available lines of credit with several financial institutions. As of December 31, 2023, $42.8 million was outstanding under these lines of credit (see discussion under "*Sources of Liquidity-Short-term Debt*" below);
- Proceeds from the Delaware State Revolving Fund (SRF) Program. SRF programs provide low cost financing for projects meeting certain water quality and system improvement benchmarks (see discussion under "*Sources of Liquidity-Long-term Debt*" below);
- Proceeds from other long-term borrowings (see discussion under "*Sources of Liquidity-Long-term Debt*" below); and
- Proceeds from common stock sales through the Middlesex Water Company Investment Plan (the Investment Plan) (see discussion under "*Sources of Liquidity-Common Stock*" below).

Sources of Liquidity

Short-term Debt - In January 2022, the Company increased available lines of credit from $110 million to $140 million. The outstanding borrowings under the credit lines at December 31, 2023 were $42.8 million, at a weighted average interest rate of 6.50%.

The weighted average daily amounts of borrowings outstanding under the credit lines and the weighted average interest rates on those amounts were $35.7 million and $28.9 million at 6.13% and 3.34 % for the years ended December 31, 2023 and 2022, respectively.

Long-term Debt - Subject to regulatory approval, the Company periodically issues long-term debt to fund investments in utility plant. To the extent possible and fiscally prudent, the Company finances qualifying capital projects under SRF loan programs in New Jersey and Delaware. These government programs provide financing at interest rates typically below rates available in the broader financial markets. A portion of the borrowings under the New Jersey SRF is interest-free.

Under the New Jersey SRF program, borrowers first enter into a construction loan agreement with the New Jersey Infrastructure Bank (NJIB) and submit requisitions for cost reimbursements over the life of the construction period. When construction on the qualifying project is substantially complete, NJIB will coordinate the conversion of the construction loan into a long-term securitized loan with a portion of the principal balance having a stated interest rate of zero percent (0%) and a portion of the principal balance at a market interest rate at the time of closing using the credit rating of the State of New Jersey. As a result of revised project funding priority ranking for the NJIB SRF Program, the Company has no current projects in the NJIB SRF program. However, it is seeking to have Middlesex's LSLR Project added to the qualified list in order to borrow under the NJIB SRF program.

Under the Delaware SRF program, borrowers typically 1) enter into a long-term note agreement for a term not to exceed twenty years, 2) submit requisitions for cost reimbursements during the construction period for up to two years after the agreement is executed and 3) as the proceeds are received from the requisitions, Tidewater records a corresponding debt obligation amount.

In April 2023, Middlesex received approval from the NJBPU to borrow up to $300.0 million from the New Jersey SRF Program, the New Jersey Economic Development Authority, private placement and other financial institutions as needed through December 31, 2025. The Company may issue debt securities in a series of one or more transaction offerings to help fund Middlesex's multi-year capital construction program.

In March 2023, Middlesex closed on a $40.0 million, 5.24% private placement of First Mortgage Bonds (FMBs) with a 2043 maturity date designated as Series 2023A. Proceeds were used to reduce the Company's outstanding balances under its bank lines of credit.

In May 2022, Middlesex repaid its two outstanding NJIB construction loans by issuing FMBs to the NJIB under two loan agreements. The total amount of FMBs issued is $52.2 million and designated as Series 2022A ($16.2 million) and Series 2022B ($36.0 million). The interest rate on the Series 2022A bond is zero and the interest rate on the Series 2022B bond ranges between 2.7% and 3.0%. The final maturity date for both FMBs is August 1, 2056, with scheduled debt service payments over the life of these loans.

In November 2021, Middlesex closed on a $19.5 million, 2.79% private placement of FMBs with a 2041 maturity date designated as Series 2021A. Proceeds were used to reduce the Company's outstanding balances under its lines of credit.

In June 2021, Middlesex received approval from the NJBPU to redeem up to $45.5 million of outstanding FMBs, specifically Series RR ($22.5 million) and Series SS ($23.0 million), and issue replacement FMBs at an overall lower cost of debt. In November 2021, Middlesex closed on a $45.5 million, 2.90% private placement of FMBs, designated as Series 2021B with a 2051 maturity date to effectuate the redemptions.

In May 2023, Tidewater closed on a $20.0 million loan from CoBank, ACB (CoBank) with an interest rate of 5.71% and a 2033 maturity date and fully drew all funds by June 30, 2023. Proceeds from the loan were used to pay off Tidewater's outstanding balances under its bank lines of credit and for other general corporate purposes.

In April 2023, Tidewater closed on three DEPSC-approved Delaware SRF loans totaling $10.2 million, all at interest rates of 2.0% with maturity dates in 2043 and 2044. These loans are for the construction, relocation, improvement, and/or interconnection of transmission mains. Tidewater has drawn a total of $6.1 million through December 31, 2023 and expects that the requisitions will continue through mid-2025.

In December 2021, Tidewater closed on a DEPSC-approved $5.0 million Delaware SRF loan at an interest rate of 2.0%. The loan was for construction of a one million gallon elevated storage tank. Through December 31, 2023, Tidewater has drawn a total of $4.8 million and expects that the requisitions will continue through the first quarter of 2024. The final maturity date on the loan is 2044.

In September 2021, Tidewater completed its $20 million secured borrowing with CoBank, at an interest rate of 3.94% and a 2046 maturity date. Proceeds from the loan were used to pay off its outstanding balances under its bank lines of credit.

In July 2023, Pinelands Water and Pinelands Wastewater closed on $3.9 million and $3.6 million CoBank amortizing mortgage type loans, respectively, with an interest rate of 6.17% and a final maturity date of 2043 for each loan. Proceeds were used to pay off outstanding intercompany loans with Middlesex and for ongoing capital projects.

Substantially all of the utility plant of the Company is subject to the lien of its mortgage, which includes debt service and capital ratio covenants. The Company is in compliance with all of its mortgage covenants

Common Stock - The Company issues shares of its common stock in connection with the Investment Plan, a direct share purchase and dividend reinvestment plan for the Company's common stock. The Company raised approximately $12.1 million through the issuance of shares under the Investment Plan during 2023. In May 2023, Middlesex received approval from the NJBPU to increase the number of authorized shares under the Investment Plan by 0.7 million shares. Currently, 0.7 million shares remain registered with the United States Securities and Exchange Commission and available for issuance to participants under the Investment Plan. On March 1, 2023, the Company began offering shares of its common stock for purchase at a 3% discount to participants in the Investment Plan. The discount offering ended December 1, 2023. The discount applied to all common stock purchases made under the Investment Plan during that time period, whether by optional cash payment or by dividend reinvestment.

In order to fully fund the ongoing capital investment program and maintain a balanced capital structure required for a regulated water utility, Middlesex may offer for sale additional shares of its common stock. The amount, the timing and the sales method of the common stock is dependent on the timing of the construction expenditures, the level of additional debt financing and financial market conditions. Common stock offerings will occur as needed to maintain a balanced capital structure as we continue on a parallel path with future debt offerings.

In April 2023, Middlesex received approval from the NJBPU to issue and sell up to 1.0 million shares of its common stock, without par value, through December 31, 2025. Sales of additional shares of common stock are part of the Company's comprehensive financing plan to fund its multi-year utility plant infrastructure investment program. As described above in "Long-term Debt", the NJBPU also approved the debt funding component of the financing plan.

Contractual Obligations

In the course of normal business activities, the Company enters into a variety of contractual obligations and commercial commitments. Some result in direct obligations on the Company's balance sheet while others are commitments, some firm and some based on uncertainties, which are disclosed in the Company's consolidated financial statements.

The table below presents our known contractual obligations for the periods specified as of December 31, 2023.

	Payment Due by Period (Millions of Dollars)				
	Total	Less than 1 Year	2-3 Years	4-5 Years	More than 5 Years
Long-term Debt	$ 365	$ 8	$ 15	$ 14	$ 328
Note Payable	43	43	—	—	—
Interest on Long-Term Debt	260	12	24	23	201
Purchased Water Contracts	97	7	11	7	72
Commercial Office Leases	6	1	2	2	1
TOTAL	$ 771	$ 71	$ 52	$ 46	$ 602

The table above does not reflect any anticipated cash payments for retirement benefit plan obligations. The effect on the timing and amount of these payments resulting from potential changes in actuarial assumptions and returns on plan assets cannot be estimated. In 2023, the Company contributed $1.3 million to its retirement benefit plans and expects to contribute approximately $1.8 million in 2024.

We do not currently have, nor have we ever had, any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements, or for other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts.

Critical Accounting Policies and Estimates

The application of accounting policies and standards often requires the use of estimates, assumptions and judgments. The Company regularly evaluates these estimates, assumptions and judgments, including those related to the calculation of pension and other retirement benefits, unbilled revenues, and the recoverability of certain assets, including regulatory assets. The Company bases its estimates, assumptions and judgments on historical experience and current operating environment. Changes in any of the variables that are used for the Company's estimates, assumptions and judgments may lead to significantly different financial statement results.

Our critical accounting policies and estimates are set forth below.

Regulatory Accounting

We maintain our books and records in accordance with accounting principles generally accepted in the United States of America. Middlesex and certain of its subsidiaries are subject to regulation in the states in which they operate. Those companies are required to maintain their accounts in accordance with regulatory authorities' rules and guidelines, which may differ from other authoritative accounting pronouncements. In those instances, the Company follows the guidance in the Financial Accounting Standards Board Accounting Standards Codification Topic 980 *Regulated Operations* (Regulatory Accounting).

In accordance with Regulatory Accounting, costs and obligations are deferred if it is probable that these items will be recognized for rate-making purposes in future rates. Accordingly, we have recorded costs and obligations, which will be amortized over various future periods. Any change in the assessment of the probability of rate-making treatment would require us to change the accounting treatment of the deferred item. We have no reason to believe any of the deferred items that are recorded will be treated differently by the regulators in the future.

Revenues

Revenues from our regulated customers, which include amounts billed quarterly to residential customers and monthly to industrial, commercial, fire-protection and wholesale customers, also include unbilled amounts based upon estimated usage from the date of the last meter reading to the end of the accounting period. While actual usage for customers may differ from the estimate, we believe the overall total estimate of consumption and revenue for the fiscal period will not differ materially from actual consumption.

Retirement Benefit Plans

We maintain a noncontributory defined benefit pension plan (Pension Plan) which covers all currently active employees hired prior to April 1, 2007. In addition, the Company maintains an unfunded supplemental plan for certain executive officers.

The Company has a retirement benefit plan other than pensions (Other Benefits Plan) for substantially all of its retired employees. Employees hired after March 31, 2007 are not eligible to participate in the Other Benefits Plan. Coverage includes healthcare and life insurance.

The costs for providing retirement benefits are dependent upon numerous factors, including actual plan experience and assumptions of future experience. Future retirement benefit plan obligations and expense will depend on future investment performance, changes in future discount rates and various other demographic factors related to the population participating in the Company's retirement benefit plans, all of which can change significantly in future years.

The primary assumptions used for determining future retirement benefit plans' obligations and costs, which are reviewed and revised as needed each year, are as follows:

- Discount Rate - calculated based on market rates for long-term, high-quality corporate bonds specific to the expected duration of our Pension Plan and Other Benefits Plan's liabilities;
- Compensation Increase - based on management projected future employee compensation increases;
- Long-Term Rate of Return - determined based on expected returns from our asset allocation for our Pension Plan and Other Benefits Plan assets;
- Mortality - The Company utilizes the Society of Actuaries' mortality table (Pri-2012) (Mortality Improvement Scale MP-2021); and
- Healthcare Cost Trend Rate - based on management projected future healthcare costs.

The discount rate, compensation increase rate and long-term rate of return used to determine future obligations of our retirement benefit plans as of December 31, 2023 are as follows:

	Pension Plan	Other Benefits Plan
Discount Rate	4.79%	4.79%
Compensation Increase	3.00%	3.00%
Long-term Rate of Return	7.00%	7.00%

For the 2023 valuation, costs and obligations for our Other Benefits Plan assumed an 7.5% annual rate of increase in the per capita cost of covered healthcare benefits in 2024 with the annual rate of increase declining 0.5% per year for 2025-2030, resulting in an annual rate of increase in the per capita cost of covered healthcare benefits of 4.5% by year 2030.

The following is a sensitivity analysis for certain actuarial assumptions used in determining projected benefit obligations (PBO) and expenses for our retirement benefit plans:

Pension Plan

Actuarial Assumptions	Estimated Increase/ (Decrease) on PBO (000s)	Estimated Increase/ (Decrease) on Expense (000s)
Discount Rate 1% Increase	$ (9,903)	$ (604)
Discount Rate 1% Decrease	12,086	992

Other Benefits Plan

Actuarial Assumptions	Estimated Increase/ (Decrease) on PBO (000s)	Estimated Increase/ (Decrease) on Expense (000s)
Discount Rate 1% Increase	$ (3,440)	$ (552)
Discount Rate 1% Decrease	4,286	180
Healthcare Cost Trend Rate 1% Increase	3,264	499
Healthcare Cost Trend Rate 1% Decrease	(2,676)	(696)

Recent Accounting Standards

See Note 1(r) of the Notes to Consolidated Financial Statements for a discussion of recent accounting pronouncements.

ITEM 7A. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to market risk associated with changes in interest rates and commodity prices. The Company is subject to the risk of fluctuating interest rates in the normal course of business. Our policy is to manage interest rates through the use of fixed rate long-term debt and, to a lesser extent, variable rate short-term debt. The Company's interest rate risk related to existing fixed rate, long-term debt is not material due to the term of the majority of our First Mortgage Bonds, which have final maturity dates ranging from 2024 to 2059. Over the next twelve months, approximately $7.8 million of the current portion of existing long-term debt instruments will mature. The Company manages its interest rate risk related to existing variable-rate short-term debt by limiting our variable rate exposure. Applying a hypothetical change in the rate of interest charged by 10% on those fixed- and variable-rate borrowings would not have a material effect on our earnings.

Our risks associated with commodity price increases for chemicals, electricity and other commodities are reduced through contractual arrangements and the ability to recover price increases through rates. Non-performance by these commodity suppliers could have a material adverse impact on our results of operations, financial position and cash flows.

We are exposed to credit risk for both our Regulated and Non-Regulated business segments. Our Regulated operations serve residential, commercial, industrial and municipal customers while our Non-Regulated operations engage in business activities with developers, government entities and other customers. Our primary credit risk is exposure to customer default on contractual obligations and the associated loss that may be incurred due to the non-payment of customer accounts receivable balances. Our credit risk is managed through established credit and collection policies which are in compliance with applicable regulatory requirements and involve monitoring of customer exposure and the use of credit risk mitigation measures such as letters of credit or prepayment arrangements. Our credit portfolio is diversified with no significant customer or industry concentrations. In addition, our Regulated businesses are generally able to recover all prudently incurred costs including uncollectible customer accounts receivable expenses and collection costs through rates.

The Company's retirement benefit plan assets are exposed to the market price variations of debt and equity securities. Changes to the Company's retirement benefit plan assets' value can impact the Company's retirement benefit plan expense, funded status and future minimum funding requirements. Risk is mitigated through our ability to recover retirement benefit plan costs through customer rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and the Board of Directors of Middlesex Water Company:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets and consolidated statements of capital stock and long-term debt of Middlesex Water Company (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of income, common stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2023, and the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, because of the effect of the material weaknesses described below on the achievement of the objectives of the control criteria, the Company has not maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by COSO.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weaknesses have been identified and included in the accompanying Management's Report on Internal Control Over Financial Reporting appearing under Item 9A:

There were ineffective information technology general controls (ITGCs) in the areas of user access and change management over certain information technology (IT) systems that support the Company's financial reporting processes. As a result, automated and manual process controls dependent on those ITGCs were also not effective.

There were ineffective controls related to income tax accounting for a non-routine transaction.

We considered the material weaknesses in determining the nature, timing, and extent of audit tests applied in our audit of the 2023 consolidated financial statements, and our opinion regarding the effectiveness of the Company's internal control over financial reporting does not affect our opinion on those consolidated financial statements.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an

understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing separate opinions on the critical audit matter or on the accounts or disclosures to which it relates.

Income Tax Accounting for Non-Routine Transaction

Critical Audit Matter Description

As described in Notes 1 and 2 to the consolidated financial statements, the Company executed a non-routine litigation settlement agreement in 2023. Management estimated and recorded the income tax effects of this non-routine transaction.

We identified management’s assessment, accounting and financial statement presentation and disclosure of income taxes for this non-routine transaction as a critical audit matter. Auditing management’s assessment, accounting, presentation and disclosure required a high degree of judgment and subjectivity and the use of individuals with specialized knowledge.

How We Addressed the Matter in Our Audit

The primary procedures we performed to address this critical audit matter included:

- Testing the effectiveness of controls relating to income taxes, including controls over the determination of the accounting and presentation for the non-routine transaction.
- Testing management’s process for determining the accounting for income taxes. Due to the non-routine nature of the transaction, we evaluated the appropriateness of the facts and circumstances relating to the transaction and the applicable tax regulations and financial reporting requirements.
- Utilizing internal tax specialists to assist in evaluating the appropriateness of the income tax accounting impact from the significant non-routine transaction and in assessing the presentation and disclosure in the consolidated financial statements.
- Evaluating whether the amounts and assumptions used in the calculation were reasonable.

/s/ Baker Tilly US, LLP

We have served as the Company's auditor since 2006.

MIDDLESEX WATER COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Organization, Summary of Significant Accounting Policies and Recent Developments

(a) Organization - Middlesex Water Company (Middlesex or the Company) is the parent company and sole shareholder of Tidewater Utilities, Inc. (Tidewater), Pinelands Water Company (Pinelands Water) and Pinelands Wastewater Company (Pinelands Wastewater) (collectively, Pinelands), Utility Service Affiliates, Inc. (USA), Utility Service Affiliates (Perth Amboy) Inc. (USA-PA) and Twin Lakes Utilities, Inc. (Twin Lakes). Southern Shores Water Company, LLC (Southern Shores) and White Marsh Environmental Systems, Inc. (White Marsh) are wholly-owned subsidiaries of Tidewater.

Middlesex has operated as a water utility in New Jersey since 1897 and in Delaware, through our wholly-owned subsidiary, Tidewater, since 1992. We are in the business of collecting, treating, distributing and selling water for domestic, commercial, municipal, industrial and fire protection purposes. We also operate New Jersey municipal water, wastewater and storm water systems under contract and provide unregulated water and wastewater services in New Jersey and Delaware through our subsidiaries. Our rates charged to customers for water and wastewater services, the quality of services we provide and certain other matters are regulated in New Jersey and Delaware by the New Jersey Board of Public Utilities (NJBPU) and the Delaware Public Service Commission (DEPSC), respectively. Our USA, USA-PA and White Marsh subsidiaries are not regulated utilities.

(b) Principles of Consolidation – The financial statements for Middlesex and its wholly-owned subsidiaries (the Company) are reported on a consolidated basis. All significant intercompany accounts and transactions have been eliminated. Other financial investments in which the Company holds a 50% or less voting interest and cannot exercise control over the operation and policies of the investments are accounted for under the equity method of accounting. Under the equity method of accounting, the Company records its investment interests in Non-Utility Assets and its percentage share of the earnings or losses of the investees in Other Income (Expense).

(c) System of Accounts – The Company's regulated utilities maintain their accounts in accordance with the Uniform System of Accounts prescribed by the NJBPU and DEPSC.

(d) Regulatory Accounting - We maintain our books and records in accordance with accounting principles generally accepted in the United States of America. Middlesex and certain of its subsidiaries, which account for 93% of Operating Revenues and 99% of Total Assets, are subject to regulation in the state in which they operate. Those companies are required to maintain their accounts in accordance with regulatory authorities' rules and guidelines, which may differ from other authoritative accounting pronouncements. In those instances, the Company follows the guidance provided in Accounting Standards Codification (ASC) 980, *Regulated Operations*.

In accordance with ASC 980, *Regulated Operations*, costs and obligations are deferred if it is probable that these items will be recognized for rate-making purposes in future rates. Accordingly, we have recorded costs and obligations, which will be amortized over various future periods. Any change in the assessment of the probability of rate-making treatment will require us to change the accounting treatment of the deferred item. We have no reason to believe any of the deferred items that are recorded will be treated differently by the regulators in the future. For additional information, see Note 2 – *Rate and Regulatory Matters*.

(e) Retirement Benefit Plans - We maintain a noncontributory defined benefit pension plan (Pension Plan), which covers all active employees who were hired prior to April 1, 2007, as well as a defined contribution plan in which all employees are eligible to participate. In addition, the Company maintains an unfunded supplemental plan for certain of its executive officers. The Company has a retirement benefit plan other than pensions (Other Benefits Plan) for substantially all of its retired employees. Employees hired after March 31, 2007 are not eligible to participate in this plan. Coverage includes healthcare and life insurance.

The Company's costs for providing retirement benefits are dependent upon numerous factors, including actual plan experience and assumptions of future experience. Retirement benefit plan obligations and expense are determined

based on investment performance, discount rates and various other demographic factors related to the population participating in the Company's retirement benefit plans, all of which can change significantly in future years. For more information on the Company's Retirement Benefit Plans, see Note 7 – *Employee Benefit Plans*.

(f) Utility Plant – Utility Plant is stated at original cost as defined for regulatory purposes. Property accounts are charged with the cost of betterments and major replacements of property. Cost includes direct material, labor and indirect charges for pension benefits and payroll taxes. The cost of labor, materials, supervision and other expenses incurred in making repairs and minor replacements and in maintaining the properties is charged to the appropriate expense accounts. At December 31, 2023, there was no event or change in circumstance that would indicate that the carrying amount of any long-lived asset was not recoverable.

(g) Depreciation – Depreciation is computed by each regulated member of the Company utilizing a rate approved by the applicable regulatory authority. The accumulated provision for depreciation is charged with the cost of property retired, less salvage. The following table sets forth the range of depreciation rates for the major utility plant categories used to calculate depreciation for the years ended December 31, 2023, 2022, and 2021. These rates have been approved by the NJBPU or DEPSC:

Source of Supply	1.15% - 3.44%	Transmission and Distribution (T&D):	
Pumping	2.00% - 5.39%	T&D – Mains	1.10% - 3.13%
Water Treatment	1.65% - 7.09%	T&D – Services	2.12% - 3.16%
General Plant	2.08% - 17.84%	T&D – Other	1.61% - 4.63%
Wastewater Collection	1.42% - 1.81%		

Non-regulated fixed assets consist primarily of office buildings, furniture and fixtures, and transportation equipment. These assets are recorded at original cost and depreciation is calculated based on the estimated useful lives, ranging from 3 to 42 years.

(h) Preliminary Survey and Investigation (PS&I) Costs – In the design of water and wastewater systems that the Company ultimately intends to construct, own and operate, certain expenditures are incurred to advance those project activities. These PS&I costs are recorded as deferred charges on the balance sheet as these costs are expected to be recovered through future rates charged to customers as the underlying project assets are placed into service as utility plant. If it is subsequently determined that costs for a project recorded as PS&I are not recoverable through rates charged to our customers, the applicable PS&I costs are recorded as Other Expense on the Statement of Income at that time.

(i) Customers' Advances for Construction (CAC) – Utility plant and/or cash advances are provided to the Company by customers, real estate developers and builders in order to extend utility service to their properties. These transactions are recorded as CAC. Contractual Refunds of CACs in the form of cash are made by the Company and are based on either additional operating revenues generated from new customers or, as new customers are connected to the respective system. After all refunds are made and/or contract terms have expired, any remaining balance is transferred to Contributions in Aid of Construction.

Contributions in Aid of Construction (CIAC) – CIAC include direct non-refundable contributions of utility plant and/or cash and the portion of CAC that becomes non-refundable.

In accordance with regulatory requirements, CAC and CIAC are not depreciated. In addition, these amounts reduce the investment base for purposes of setting rates.

(j) Allowance for Funds Used During Construction (AFUDC) - Middlesex and its regulated subsidiaries capitalize AFUDC, which represents the cost of financing projects during construction. AFUDC is added to the construction costs of individual projects exceeding specific cost and construction period thresholds established for each company and then depreciated with the utility plant direct costs over the underlying assets' estimated useful life. AFUDC is calculated using each company's weighted cost of debt and equity as approved in their most recent

respective regulatory rate order. The AFUDC rates for the years ended December 31, 2022, 2021 and 2020 for Middlesex and Tidewater are as follows:

	2023	2022	2021
Middlesex	6.35%	6.35%	6.50%
Tidewater	7.92%	7.92%	7.92%

(k) Accounts Receivable – We record bad debt expense based on a variety of factors such as our customers' payment history, current economic conditions and trending reasonable and supportable forecasts on expected collectability of accounts receivable. The allowance for doubtful accounts was $2.1 million and $2.3 million as of December 31, 2023 and 2022, respectively. For the years ended December 31, 2023, 2022 and 2021, bad debt expense was $1.0 million, $0.5 million and $0.9 million, respectively. For the years ended December 31, 2023, 2022 and 2021, write-offs were $1.2 million, $0.7 million and $0.4 million, respectively.

(l) Revenues - The Company's revenues are primarily generated from regulated tariff-based sales of water and wastewater services and non-regulated operation and maintenance contracts for services on water and wastewater systems owned by others. Revenue from contracts with customers is recognized when control of a promised good or service is transferred to customers at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods and services.

The Company's regulated revenue results from tariff-based sales from the provision of water and wastewater services to residential, industrial, commercial, fire-protection and wholesale customers. Residential customers are billed quarterly while most industrial, commercial, fire-protection and wholesale customers are billed monthly. Payments by customers are due between 15 to 30 days after the invoice date. Revenue is recognized as the water and wastewater services are delivered to customers as well as from accrual of unbilled revenues estimated from the last meter reading date to the end of the accounting period utilizing factors such as historical customer data, regional weather indicators and general economic conditions in the relevant service territories. Unearned Revenues and Advance Service Fees include fixed service charge billings in advance to Tidewater customers recognized as service is provided to the customer.

Non-regulated service contract revenues consist of base service fees as well as fees for additional billable services provided to customers. Fees are billed monthly and are due within 30 days after the invoice date. The Company considers the amounts billed to represent the value of these services provided to customers. These contracts expire at various times through 2032 and contain remaining performance obligations for which the Company expects to recognize revenue in the future. These contracts also contain customary termination provisions.

Substantially all of the amounts included in operating revenues and accounts receivable are from contracts with customers. The Company records its allowance for doubtful accounts based on historical write-offs combined with an evaluation of current economic conditions within its service territories.

The Company's contracts do not contain any significant financing components.

The Company's operating revenues are comprised of the following:

	(In Thousands) Years Ended December 31,		
	2023	2022	2021
Regulated Tariff Sales			
Residential	$ 86,581	$ 84,950	$ 77,699
Commercial	23,945	22,689	16,715
Industrial	11,586	11,152	8,990
Fire Protection	12,582	12,726	12,608
Wholesale	19,117	18,769	14,590
Non-Regulated Contract Operations	12,320	12,006	12,391
Total Revenue from Contracts with Customers	$ 166,131	$ 162,292	$ 142,993
Other Regulated Revenues	806	831	929
Other Non-Regulated Revenues	453	440	427
Inter-segment Elimination	(1,116)	(1,129)	(1,208)
Total Revenue	**$ 166,274**	**$ 162,434**	**$ 143,141**

(m) Unamortized Debt Expense and Premiums on Long-Term Debt - Unamortized Debt Expense and Premiums on Long-Term Debt, included on the consolidated balance sheet in long-term debt, are amortized over the lives of the related debt issues.

(n) Income Taxes - Middlesex files a consolidated federal income tax return for the Company and income taxes are allocated based on the separate return method. Certain income and expense items are accounted for in different time periods for financial reporting than for income tax reporting purposes. Deferred income taxes are provided on differences between the tax basis of assets and liabilities and the amounts at which they are carried in the consolidated financial statements. Investment tax credits have been deferred and are amortized over the estimated useful life of the related property. In the event that there are interest and penalties associated with income tax adjustments from income tax authority examinations, these amounts will be reported under interest expense and other expense, respectively. For more information on income taxes, see Note 3 – *Income Taxes*.

(o) Cash and Cash Equivalents - For purposes of reporting cash flows, the Company considers all highly liquid investments with original maturity dates of three months or less to be cash equivalents. Cash and cash equivalents represent bank balances and money market funds with investments maturing in less than 90 days.

(p) Restricted Cash – Restricted cash includes cash proceeds from loan transactions entered into through government financing programs and are held in trusts for specific capital expenditures or debt service.

(q) Use of Estimates - Conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts in the financial statements. Actual results could differ from those estimates.

(r) Recent Accounting Pronouncements - There are no new adopted or proposed accounting guidance that the Company is aware of that could have a material impact on the Company's consolidated financial statements.

(s) Regulatory Notice of Non-Compliance – In September 2021, the New Jersey Department of Environmental Protection (NJDEP) issued a Notice of Non-Compliance (Notice) to Middlesex based on self-reporting by Middlesex that the level of Perfluorooctanoic Acid (PFOA) in water treated at its Park Avenue Wellfield Treatment Plant (Park Avenue Plant) in South Plainfield, New Jersey exceeded a NJDEP standard that became effective in 2021.

Prior to 2021, the Company began design for construction of an enhanced treatment process at the Park Avenue Plant to comply with the new standard prior to the regulation being enacted. Since completion was not expected until mid-2023, the Company implemented an interim solution to meet the Notice requirements.

In June 2022, a portion of the enhanced treatment process was completed, placed into service and is effectively treating the ground water in compliance with all state and federal drinking water standards.

In September 2022, the Company entered into an Administrative Consent Order (ACO) with the NJDEP with respect to the Notice, which voided any further notice regarding the fact that the permanent treatment solution was not in service by September 7, 2022 as required by the Notice. As prescribed in the ACO, the Company was to issue periodic public notifications until the ACO was closed.

In June 2023, the Company completed the permanent construction of the entire Park Avenue Plant treatment upgrades and placed the upgrades into operation in full compliance with the NJDEP PFOA standards. In October 2023, the Company received confirmation from the NJDEP that it has complied with all requirements of the ACO and consequently, the ACO has been closed.

The Company had previously initiated a lawsuit against 3M Company (3M), in connection with the Company's claim that 3M introduced perfluoroalkyl substances (commonly known as "PFAS"), which include PFOA, into the Company's water supply at its Park Avenue Plant.

On August 29, 2023, Middlesex and 3M executed a settlement agreement (the Settlement Agreement) to resolve the lawsuit. The Settlement Agreement provides that:

- 3M will pay $93.2 million in two installments, one payment of $23.3 million received in December 2023 and one payment of $69.9 million in July 2024. Middlesex is obligated to pay 30% of the proceeds received plus reimbursable out-of-pocket legal expenses to its lawyers as legal fees, or $29.5 million in total;

- Proceeds received from the Settlement Agreement are being used to mitigate the impact of the increase in Middlesex's customer rates approved by the NJBPU, which is to be implemented March 1, 2024 (for further discussion of Middlesex's base rate increase, see Note 2, *Rate Matters, Middlesex* below);

- Middlesex, by nature of its status as a U.S. water purveyor impacted by PFAS, was automatically included in a Multi-District Litigation Settlement before the United States District Court for the District of South Carolina in which 3M and other companies (Non-3M Companies) are participants. Middlesex agreed as part of the Settlement Agreement to remain a member of the plaintiff class in order to be eligible to obtain future additional compensation from 3M and the Non-3M Companies for any future remediation which may be required of its water treatment facilities; and

- Middlesex and 3M agreed to enter into a joint mediation which occurred November 2023, to resolve two PFOA-related class action lawsuits against Middlesex seeking restitution for medical, water replacement and other claimed related costs. Both Middlesex and 3M are defendants in these lawsuits. These lawsuits remain in the legal process and their ultimate resolution is not known at this time.

Note 2 - Rate and Regulatory Matters

Rate Matters

Middlesex – In February 2024, Middlesex's petition to the NJBPU, filed in May 2023, seeking permission to increase its base water rates was concluded, based on a negotiated settlement that is expected to increase annual operating revenues by $15.4 million effective March 1, 2024. The approved tariff rates were designed to recover increased operating costs as well as a return on invested capital of $563.1 million, based on an authorized return on common equity of 9.6%. Middlesex has made capital infrastructure investments to ensure prudent upgrade and replacement of its utility assets to support continued regulatory compliance, resilience and overall quality of service. Net proceeds from the 3M Settlement Agreement were used to recover costs for the construction of the Park Avenue Plant PFAS treatment upgrades, including depreciation and carrying costs.

The rate case settlement will result in the reclassification of $48.3 million from Regulatory Liabilities to CIAC in the March 31, 2024 balance sheet. The Company will also record in the first quarter of 2024 the recovery of $0.7 million and $2.4 million of prior year depreciation and carrying costs, respectively, as well as the recovery of $1.4 million of prior year costs which were associated with the interim solution to comply with the Notice, all of which were approved in the rate case settlement. For further information on the 3M Settlement Agreement, see *Note 1(s) - Regulatory Notice of Non-Compliance* above.

In January 2024, the NJBPU approved Middlesex's petition for the proposed cost recovery of its Lead Service Line Replacement (LSLR) Plan and cost recovery of project costs associated with replacing Middlesex customer-owned lead service lines. Replacement of Middlesex and Middlesex customer-owned lead service lines is required by the New Jersey LSLR Law. Under this legislation, the costs associated with replacing customer-owned lead service lines are recoverable through future customer surcharges. Cost recovery for replacing Company-owned lead service lines are recoverable through traditional base rate case filings. The current estimates for replacement of Middlesex and Middlesex customer-owned lead service lines are approximately $46 million to $77 million over a nine-year period.

In October 2023, the NJBPU approved Middlesex's petition for a Distribution System Improvement Charge (DSIC) Foundation Filing, which is a prerequisite to implementing a DSIC rate that allows water utilities to recover investments in, and generate a return on, qualifying capital improvements to their water distribution system made between base rate proceedings. Middlesex is authorized to recover DSIC revenues up to five percent (5%) of total revenues established in Middlesex's 2021 base rate proceeding, or approximately $5.5 million. Semi-annually, beginning in April 2024, the Company must file for a change in its DSIC rate seeking recovery for DSIC-eligible investments made during the period. DSIC rates remain in effect until Middlesex's next base rate case increase subsequent to the March 1, 2024 increase. Under the terms of the Foundational Filing, the Company is required to file a base rate petition before October 2026.

In September 2022, the NJBPU approved Middlesex's Emergency Relief Motion to reset its Purchased Water Adjustment Clause (PWAC) tariff rate to recover additional costs of $2.7 million for the purchase of treated water from a non-affiliated water utility. A PWAC is a rate mechanism that allows for recovery of increased purchased water costs between base rate case filings. The increase, effective October 1, 2022, was on an interim basis and subject to refund with interest, pending final resolution of this matter, which the NJBPU provided in August 2023. In connection with the full recovery of the $2.7 million of additional costs, Middlesex reset its PWAC rate to zero in October 2023.

In December 2021, Middlesex's petition to the NJBPU seeking permission to increase its base water rates was concluded, based on a negotiated settlement, resulting in an expected increase in annual operating revenues of $27.7 million. The approved tariff rates were designed to recover increased operating costs, as well as a return on invested capital of $513.5 million, based on an authorized return on common equity of 9.6%. The increase was implemented in two phases with $20.7 million of the increase effective January 1, 2022 and the remaining $7.0 million effective January 1, 2023. As part of the negotiated settlement, the PWAC was reset to zero.

Tidewater – In December 2023, the DEPSC approved Tidewater's application to implement a new DSIC. Effective January 1, 2024, Tidewater implemented a DSIC rate of 3.71%, which is expected to generate revenue of approximately $1.3 million annually. A Delaware DISC is subject to a semi-annual reset with an overall maximum rate of 7.5%.

In October 2023, the DEPSC issued an Order that made a temporary base rate reduction permanent. The initial DEPSC order required Tidewater to reduce its base rates charged to general metered and private fire customers by 6.0%, effective for service rendered on and after September 1, 2022. The rate reduction was ordered as a result of Tidewater earning in excess of its authorized return, and resulted in reduced annual revenues of approximately $2.1 million in 2023.

In March 2021, Tidewater was notified by the DEPSC that it had determined Tidewater's earned rate of return exceeded the rate of return authorized by the DEPSC. Consequently, Tidewater reset its DSIC rate to zero effective April 1, 2021 and refunded approximately $1.0 million to customers primarily in the form of an account credit for DSIC revenue previously billed between April 1, 2020 and March 31, 2021.

Pinelands – In April 2023, Pinelands Water and Pinelands Wastewater concluded their base rate case matters when the NJBPU approved a combined $1.0 million increase in annual base rates, effective April 15, 2023. The requests were necessitated by capital infrastructure investments the companies have made as well as increased operations and maintenance costs.

Southern Shores - Effective January 1, 2020, the DEPSC approved the renewal of a multi-year agreement for water service to a 2,200 unit condominium community we serve in Sussex County, Delaware. Under the agreement, current rates were to remain in effect until December 31, 2024, unless there are unanticipated capital expenditures or regulatory related changes in operating expenses exceeding certain thresholds during this time period. In 2022, capital expenditures did exceed the established threshold and rates were increased by 5.39%, effective January 1, 2023. Beginning in 2025 and thereafter, inflation-based rate increases cannot exceed the lesser of the regional Consumer Price Index or, 3%. Inflation based increases are in addition to the threshold rate increases. This agreement expires on December 31, 2029.

Twin Lakes Utilities, Inc. (Twin Lakes) - Twin Lakes provides water services to approximately 115 residential customers in Shohola, Pennsylvania. Pursuant to the Pennsylvania Public Utility Code, Twin Lakes filed a petition requesting the Pennsylvania Public Utilities Commission (PAPUC) to order the acquisition of Twin Lakes by a capable public utility. The PAPUC assigned an Administrative Law Judge (ALJ) to adjudicate the matter and submit a recommended decision (Recommended Decision) to the PAPUC. As part of this legal proceeding the PAPUC also issued an Order in January 2021 appointing a large Pennsylvania based investor-owned water utility as the receiver (the Receiver Utility) of the Twin Lakes system until the petition is fully adjudicated by the PAPUC. In November 2021, the PAPUC issued an Order affirming the ALJ's Recommended Decision, ordering the Receiver Utility to acquire the Twin Lakes water system and for Middlesex, the parent company of Twin Lakes, to submit $1.7 million into an escrow account within 30 days. Twin Lakes immediately filed a Petition For Review (PFR) with the Commonwealth Court of Pennsylvania (the Commonwealth Court) seeking reversal and vacation of the escrow requirement on the grounds that it violates the Pennsylvania Public Utility Code as well as the United States Constitution. In addition, Twin Lakes filed an emergency petition for stay of the PAPUC Order pending the Commonwealth Court's review of the merits arguments contained in Twin Lakes' PFR. In December 2021, the Commonwealth Court granted Twin Lakes' emergency petition, pending its review. In August 2022, the Commonwealth Court issued an opinion upholding PAPUC's November 2021 Order in its entirety. In September 2022, Twin Lakes filed a Petition For Allowance of Appeal (Appeal Petition) to the Supreme Court of Pennsylvania seeking reversal of the Commonwealth Court's decision to uphold the escrow requirement on the grounds that the Commonwealth Court erred in failing to address Twin Lakes' claims that because the $1.7 million escrow requirement placed on Middlesex violated Middlesex's constitutional rights, Middlesex's refusal to submit this escrow payment would jeopardize the relief Twin Lakes was otherwise entitled to in the appointment of the Receiver Utility. In March 2023, the Supreme Court of Pennsylvania issued a decision denying Twin Lakes' Appeal Petition without addressing this claim on the merits. As a result of the Pennsylvania Courts' failure to address Twin Lakes' claim, Middlesex subsequently filed a Complaint with the United States District Court for the Middle District of Pennsylvania to address the issue of whether the PAPUC's Order violated Middlesex's rights under the United States Constitution. On January 18, 2024, the District Court issued an Order dismissing Middlesex's Complaint without addressing the issue of whether the PAPUC's Order violated Middlesex's rights under the United States Constitution. On January 31, 2024, Middlesex filed a Notice of Appeal of the District Court's decision with the United States Court of Appeals for the Third Circuit. We are currently awaiting the Court's decision.

The financial results, total assets and financial obligations of Twin Lakes are not material to Middlesex.

Regulatory Matters

We have recorded certain costs as regulatory assets because we expect full recovery of, or are currently recovering, these costs in the rates we charge customers. These deferred costs have been excluded from rate base and, therefore, we are not earning a return on the unamortized balances. These items are detailed as follows:

	(Thousands of Dollars) December 31,		Remaining
Regulatory Assets	**2023**	**2022**	**Recovery Periods**
Retirement Benefits	$ —	$ 9,214	Various
Income Taxes	84,419	74,422	Various
Rate Cases, Tank Painting, and Other	6,275	6,410	2-10 years
Total	$ 90,694	$ 90,046	

Retirement benefits include pension and other retirement benefits that have been recorded on the Consolidated Balance Sheet in accordance with the guidance provided in ASC 715*, Compensation – Retirement Benefits.* These amounts represent obligations in excess of current funding (regulatory asset) or less than current funding (regulatory liability, which was $1.5 million as of December 31, 2023), which the Company believes will be fully recovered or refunded in rates set by the regulatory authorities.

The recovery period for income taxes is dependent upon when the temporary differences between the tax and book treatment of various items reverse.

The net proceeds available to Middlesex from the 3M Settlement Agreement, after excluding legal fees, $63.6 million, were recorded as a regulatory liability, as of December 31, 2023. For further information on the 3M Settlement Agreement, see *Rates, Note 1(s) - Regulatory Notice of Non-Compliance* and *Rate Matters, Middlesex* above.

The 2017 Tax Act reduced the statutory corporate federal income tax rate from 35% to 21%. The tariff rates charged to customers effective prior to 2018 in the Company's regulated companies include recovery of income taxes at the statutory rate in effect at the time those rates were approved by the respective state public utility commissions. As of December 31, 2023 and 2022, the Company has recorded regulatory liabilities of $28.2 million and $29.0 million, respectively for excess income taxes collected through rates due to the lower income tax rate under the 2017 Tax Act. These regulatory liabilities are overwhelmingly related to utility plant depreciation deduction timing differences, which are subject to Internal Revenue Service (IRS) normalization rules. The IRS rules limit how quickly the excess taxes attributable to accelerated taxes can be returned to customers. The current base rates for Middlesex and Pinelands customers became effective after 2017 and reflect the impact of the 2017 Tax Act on their revenue requirements.

The Company uses composite depreciation rates for its regulated utility assets, which is currently an acceptable method under generally accepted accounting principles and is widely used in the utility industry. Historically, under the composite depreciation method, the anticipated costs of removing assets upon retirement are provided for over the life of those assets as a component of depreciation expense. The Company recovers certain asset retirement costs through rates charged to customers as an approved component of depreciation expense. As of December 31, 2023 and 2022, the Company has approximately $19.7 million and $17.7 million, respectively, of expected costs of removal recovered currently in rates in excess of actual costs incurred as regulatory liabilities.

Note 3 – Income Taxes

Income tax expense (benefit) differs from the amount computed by applying the statutory rate on book income subject to tax for the following reasons:

	(Thousands of Dollars) Years Ended December 31,		
	2023	2022	2021
Income Tax at Statutory Rate	$ 6,839	$ 9,590	$ 6,521
Tax Effect of:			
Utility Plant Related	(1,495)	(1,106)	(1,290)
Tangible Property Repairs	(5,475)	(6,767)	(12,281)
State Income Taxes – Net	1,117	1,296	1,499
Other	55	227	63
Total Income Tax Expense (Benefit)	$ 1,041	$ 3,240	$ (5,488)

Income tax expense (benefit) is comprised of the following:

	(Thousands of Dollars) Years Ended December 31,		
	2023	2022	2021
Current:			
Federal	$ 2,952	$ 425	$ (8,247)
State	1,066	1,381	1,467
Deferred:			
Federal	(3,261)	1,242	933
State	348	260	431
Investment Tax Credits	(64)	(68)	(72)
Total Income Tax Expense (Benefit)	$ 1,041	$ 3,240	$ (5,488)

As part of Middlesex's March 2018 base water rate settlement with the NJBPU, Middlesex received approval for regulatory accounting treatment of income tax benefits associated with the adoption of tangible property regulations issued by the IRS (fully amortized as of March 31, 2022) as well as prospective recognition of the income tax benefits for the immediate deduction of repair costs on tangible property. This results in significant reductions in the Company's effective income tax rate, current income tax expense (benefit) and deferred income tax expense (benefit).

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial purposes and the amounts used for income tax purposes. The components of the net deferred tax liability are as follows:

	(Thousands of Dollars) December 31,	
	2023	2022
Utility Plant Related	$ 84,330	$ 72,996
Customer Advances	(3,546)	(3,568)
Employee Benefits	7,100	7,380
Investment Tax Credits	240	304
Other	612	671
Total Accumulated Deferred Income Taxes	$ 88,736	$ 77,783

Note 4 - Commitments and Contingent Liabilities

Water Supply – Middlesex's agreement with the New Jersey Water Supply Authority (NJWSA) for the purchase of untreated water expires November 30, 2048. NJSWA provides for an average purchase of 27.0 million gallons a day (mgd), with a peak up to 47.0 mgd. Pricing is set annually by the NJWSA through a public rate making process. The agreement has provisions for additional pricing in the event Middlesex overdrafts or exceeds certain monthly and annual thresholds.

Middlesex also has an agreement with a non-affiliated NJBPU-regulated water utility for the purchase of treated water. This agreement, which expires February 27, 2026, provides for the minimum purchase of 3.0 mgd of treated water with provisions for additional purchases if needed.

Tidewater contracts with the City of Dover, Delaware to purchase treated water of up to 60.0 million gallons annually.

Purchased water costs are shown below:

	(Millions of Dollars) Years Ended December 31,		
	2023	2022	2021
Untreated	$ 3.2	$ 3.2	$ 3.3
Treated	5.3	3.9	3.6
Total Costs	$ 8.5	$ 7.1	$ 6.9

Leases - The Company determines if an arrangement is a lease at the inception of the lease. Generally, a lease agreement exists if the Company determines that the arrangement gives the Company control over the use of an identified asset and obtains substantially all of the benefits from the identified asset.

The Company has entered into an operating lease of office space for administrative purposes, expiring in 2030. The Company has not entered into any finance leases. The exercise of a lease renewal option for the Company's administrative offices is solely at the discretion of the Company.

The right-of-use (ROU) asset recorded represents the Company's right to use an underlying asset for the lease term and lease liability represents the Company's obligation to make lease payments arising from the lease. Lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. The Company's operating lease does not provide an implicit discount rate and as such the Company used an estimated incremental borrowing rate (4.03%) based on the information available at commencement date in determining the present value of lease payments.

Given the impacts of accounting for regulated operations, and the resulting recognition of expense at the amounts recovered in customer rates, expenditures for operating leases are consistent with lease expense and was $0.8 million for each of the years ended December 31, 2023, 2022 and 2021.

Information related to operating lease ROU assets is as follows:

	(In Millions) December 31,	
	2023	2022
ROU Asset at Lease Inception	$ 7.3	$ 7.3
Accumulated Amortization	(4.1)	(3.5)
Current ROU Asset	$ 3.2	$ 3.8

The Company's future minimum operating lease commitments as of December 31, 2023 are as follows:

	(In Millions) December 31, 2023
2024	0.8
2025	0.8
2026	0.9
2027	0.9
2028	0.9
Thereafter	0.9
Total Lease Payments	$ 5.2
Imputed Interest	(1.5)
Present Value of Lease Payments	3.7
Less Current Portion*	(0.6)
Non-Current Lease Liability	$ 3.1

*Included in Other Current Liabilities

Construction –The Company has projected to spend approximately $75 million in 2024, $81 million in 2025 and $70 million in 2026 on its construction program. As of December 31, 2023, the Company has entered into several contractual construction agreements that in total obligate it to expend an estimated $6.7 million in the future. The actual amount and timing of capital expenditures is dependent on the need for replacement of existing infrastructure, customer growth, residential new home construction and sales, project scheduling, supply chain issues and continued refinement of project scope and costs. There is no assurance that projected customer growth and residential new home construction and sales will occur.

Contingencies – Based on our operations in the heavily-regulated water and wastewater industries, the Company is routinely involved in disputes, claims, lawsuits and other regulatory and legal matters, including responsibility for fines and penalties relative to regulatory compliance. At this time, Management does not believe the final resolution of any such matters, whether asserted or unasserted, will have a material adverse effect on the Company's financial position, results of operations or cash flows. In addition, the Company maintains business insurance coverage that may mitigate the effect of any current or future loss contingencies.

PFOA Matter - In November 2021, the Company was served with two PFOA-related class action lawsuits seeking restitution for medical, water replacement and other related costs and economic damages. Middlesex and 3M agreed to enter into a joint mediation on these lawsuits (for further discussion of this matter, see *Note 1(s) Regulatory Notice of Non-Compliance*).

Change in Control Agreements – The Company has Change in Control Agreements with its executive officers that provide compensation and benefits in the event of termination of employment in connection with a change in control of the Company.

Note 5 – Short-term Borrowings

Information regarding the Company's short-term borrowings for the years ended December 31, 2023 and 2022 is summarized below:

	(In Millions) 2023	2022
Average Amount Outstanding	$ 35.7	$ 28.9
Weighted Average Interest Rate	6.13%	3.34%
Notes Payable at Year-End	$ 42.8	$ 55.5
Weighted Average Interest Rate at Year-End	6.50%	5.17%

The Company maintains bank lines of credit aggregating $140.0 million.

	(In Millions) As of December 31, 2023				
	Outstanding	Available	Maximum	Credit Type	Line of Credit Renewal Date
Bank of America	$ —	$ 60.0	$ 60.0	Uncommitted	January 24, 2025
PNC Bank	39.8	28.2	68.0	Committed	January 31, 2026
CoBank, ACB (CoBank)	3.0	9.0	12.0	Committed	May 20, 2026
	$ 42.8	$ 97.2	$ 140.0		

The maturity dates for the Notes Payable as of December 31, 2023 are extendable at the discretion of the Company.

The interest rates are set for borrowings under the Bank of America and PNC Bank lines of credit using the Secured Overnight Financing Rate (SOFR) and then adding a specific financial institution credit spread. The interest rate for borrowings under the CoBank line of credit are set weekly using CoBank's internal cost of funds index that is similar to the SOFR and adding a credit spread. There is no requirement for a compensating balance under any of the established lines of credit.

Note 6 - Capitalization

All the transactions discussed below related to the issuance of securities were approved by either the NJBPU or DEPSC, except where otherwise noted.

Common Stock

The Company issues shares of its common stock in connection with its Middlesex Water Company Investment Plan (the Investment Plan), a direct share purchase and dividend reinvestment plan for the Company's common stock. The Company raised approximately $12.1 million under the Investment Plan during 2023. On March 1, 2023, the Company began offering shares of its common stock for purchase at a 3% discount to participants in the Investment Plan. The discount offering ended December 1, 2023. The discount applied to all common stock purchases made under the Investment Plan during that time period, whether by optional cash payment or by dividend reinvestment. Since the inception of the Investment Plan and its predecessor plan, the Company has periodically replenished the level of authorized shares in the plans. In May 2023, Middlesex received approval from the NJBPU to increase the number of authorized shares under the Investment Plan by 0.7 million shares. Currently, 0.7 million shares remain

registered with the United States Securities and Exchange Commission and available for issuance to participants under the Investment Plan.

In April 2023, Middlesex received approval from the NJBPU to issue and sell up to 1.0 million shares of its common stock, without par value, through December 31, 2025. Sales of additional shares of common stock are part of the Company's comprehensive financing plan to fund its multi-year utility plant infrastructure investment program. As described below in "Long-term Debt", the NJBPU also approved the debt funding component of the financing plan.

The Company issues common shares under a restricted stock plan for certain management employees, which is described in Note 7 – *Employee Benefit Plans*.

The Company maintains a stock plan for its independent Directors as a component of outside members of the Board of Directors compensation. For the years ended December 31, 2023, 2022 and 2021, 4,608, 2,664 and 3,444 shares, respectively, of Middlesex common stock were granted and issued to the Company's independent Directors under the plan. The maximum number of shares authorized for grant under the plan is 100,000, of which 41,853 shares remain available for future awards.

In the event dividends on the preferred stock are in arrears, no dividends may be declared or paid on the common stock of the Company.

Preferred Stock

At December 31, 2023 and 2022, there were 120,000 shares of preferred stock authorized and less than 21,000 shares of preferred stock outstanding. There were no preferred stock dividends in arrears.

The Company may not pay any dividends on its common stock unless full cumulative dividends to the preceding dividend date for all outstanding shares of preferred stock have been paid or set aside for payment. If four or more quarterly dividends are in arrears, the preferred shareholders, as a class, are entitled to elect two members to the Board of Directors in addition to Directors elected by holders of the common stock. In addition, if Middlesex were to liquidate, holders of preferred stock would be paid back the stated value of their preferred shares before any distributions could be made to common stockholders.

The conversion feature of the no par $7.00 Series Cumulative and Convertible Preferred Stock allows the security holders to exchange one convertible preferred share for twelve shares of the Company's common stock. In addition, the Company may redeem up to 10% of the outstanding convertible stock in any calendar year at a price equal to the fair value of twelve shares of the Company's common stock for each share of convertible stock redeemed.

Long-term Debt

Subject to regulatory approval, the Company periodically issues long-term debt to fund its investments in utility plant. To the extent possible and fiscally prudent, the Company finances qualifying capital projects under State Revolving Fund (SRF) loan programs in New Jersey and Delaware. These government programs provide financing at interest rates typically below rates available in the broader financial markets. A portion of the borrowings under the New Jersey SRF is interest-free.

Under the New Jersey SRF program, borrowers first enter into a construction loan agreement with the New Jersey Infrastructure Bank (NJIB) at a below market interest rate. When construction on the qualifying project is substantially complete, NJIB will coordinate the conversion of the construction loan into a long-term securitized loan with a portion of the principal balance having a stated interest rate of zero percent (0%) and a portion of the principal balance at a market interest rate at the time of closing using the credit rating of the State of New Jersey. As a result of revised project funding priority ranking for the NJIB SRF Program, the Company has no current projects in the NJIB SRF program. However, it is seeking to have Middlesex's LSLR Project added to the qualified list in order to borrow under the NJIB SRF program.

Under the Delaware SRF program, borrowers 1) enter into a long-term note agreement for a term not to exceed twenty years, 2) submit requisitions for cost reimbursements during the construction period for up to two years after the agreement is executed and 3) as the proceeds are received from the requisitions, borrowers record a corresponding debt obligation amount.

In April 2023, Middlesex received approval from the NJBPU to borrow up to $300.0 million from the New Jersey SRF Program, the New Jersey Economic Development Authority, private placement and other financial institutions as needed through December 31, 2025. The Company may issue debt securities in a series of one or more transaction offerings to help fund Middlesex's multi-year capital construction program.

In March 2023, Middlesex closed on a $40.0 million, 5.24% private placement of First Mortgage Bonds (FMBs) with a 2043 maturity date designated as Series 2023A. Proceeds were used to reduce the Company's outstanding balances under its bank lines of credit.

In May 2022, Middlesex repaid its two outstanding NJIB construction loans by issuing FMBs to the NJIB under two loan agreements. The total amount of FMBs issued is $52.2 million and designated as Series 2022A ($16.2 million) and Series 2022B ($36.0 million). The interest rate on the Series 2022A bond is zero and the interest rate on the Series 2022B bond ranges between 2.7% and 3.0%. The final maturity date for both FMBs is August 1, 2056, with scheduled debt service payments over the life of these loans.

In November 2021, Middlesex closed on a $19.5 million, 2.79% private placement of FMBs with a 2041 maturity date designated as Series 2021A. Proceeds were used to reduce the Company's outstanding balances under its lines of credit.

In June 2021, Middlesex received approval from the NJBPU to redeem up to $45.5 million of outstanding FMBs, specifically Series RR ($22.5 million) and Series SS ($23.0 million), and issue replacement FMBs at an overall lower cost of debt. In November 2021, Middlesex closed on a $45.5 million, 2.90% private placement of FMBs, designated as Series 2021B with a 2051 maturity date to effectuate the redemptions.

In May 2023, Tidewater closed on a $20.0 million loan from CoBank, ACB (CoBank) with an interest rate of 5.71% and a 2033 maturity date and fully drew all funds by June 30, 2023. Proceeds from the loan were used to pay off Tidewater's outstanding balances under its bank lines of credit and for other general corporate purposes.

In April 2023, Tidewater closed on three DEPSC-approved Delaware SRF loans totaling $10.2 million, all at interest rates of 2.0% with maturity dates in 2043 and 2044. These loans are for the construction, relocation, improvement, and/or interconnection of transmission mains. Tidewater has drawn a total of $6.1 million through December 31, 2023 and expects that the requisitions will continue through mid-2025.

In December 2021, Tidewater closed on a DEPSC-approved $5.0 million Delaware SRF loan at an interest rate of 2.0%. The loan was for construction of a one million gallon elevated storage tank. Through December 31, 2023, Tidewater has drawn a total of $4.8 million and expects that the requisitions will continue through the first quarter of 2024. The final maturity date on the loan is 2044.

In September 2021, Tidewater completed its $20 million secured borrowing with CoBank, at an interest rate of 3.94% and a 2046 maturity date. Proceeds from the loan were used to pay off its outstanding balances under its lines of credit.

In July 2023, Pinelands Water and Pinelands Wastewater closed on $3.9 million and $3.6 million CoBank amortizing mortgage type loans, respectively, with an interest rate of 6.17% and a final maturity date of 2043 for each loan. Proceeds were used to pay off outstanding intercompany loans with Middlesex and for ongoing capital projects.

The aggregate annual principal repayment obligations as of December 31, 2023 for all long-term debt over the next five years and thereafter are shown below:

Year	(Millions of Dollars) Annual Maturities
2024	$ 7.7
2025	$ 7.6
2026	$ 7.4
2027	$ 7.2
2028	$ 6.9
Thereafter	$ 327.9

The weighted average interest rate on all long-term debt at December 31, 2023 and 2022 was 3.65% and 2.98%, respectively.

Substantially all of the utility plant of the Company is subject to the lien of its mortgage, which includes debt service and capital ratio covenants. The Company is in compliance with all of its mortgage covenants and restrictions.

Earnings Per Share

The following table presents the calculation of basic and diluted earnings per share (EPS) for the years ended December 31, 2023, 2022 and 2021. Basic EPS is computed on the basis of the weighted average number of shares outstanding. Diluted EPS assumes the conversion of the Convertible Preferred Stock $7.00 Series.

	(In Thousands, Except Per Share Amounts)					
	2023		2022		2021	
Basic:	Income	Shares	Income	Shares	Income	Shares
Net Income	$ 31,524	17,732	$ 42,429	17,597	$ 36,543	17,492
Preferred Dividend	(120)		(120)		(120)	
Earnings Applicable to Common Stock	$ 31,404	17,732	$ 42,309	17,597	$ 36,423	17,492
Basic EPS	$ 1.77		$ 2.40		$ 2.08	
Diluted:						
Earnings Applicable to Common Stock	$ 31,404	17,732	$ 42,309	17,597	$ 36,423	17,492
Convertible Preferred $7.00 Series Dividend	67	115	67	115	67	115
Adjusted Earnings Applicable to Common Stock	$ 31,471	17,847	$ 42,376	17,712	$ 36,490	17,607
Diluted EPS	$ 1.76		$ 2.39		$ 2.07	

Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosure for financial instruments for which it is practicable to estimate that value. The carrying amounts reflected in the consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and notes payable approximate their respective fair values due to the short-term maturities of these instruments. The fair value of FMBs and SRF Bonds (collectively, the Bonds) issued by Middlesex is based on quoted market prices for similar issues. Under the fair value hierarchy, the fair value of cash and cash equivalents is classified as a Level 1

measurement and the fair value of notes payable and the Bonds in the table below are classified as Level 2 measurements. The carrying amount and fair value of the Bonds were as follows:

	(Thousands of Dollars) At December 31,			
	2023		2022	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
FMBs	$ 133,374	$ 131,745	$ 147,269	$ 138,756

It was not practicable to estimate the fair value on our outstanding long-term debt for which there is no quoted market price and there is not an active trading market. For details, including carrying value, interest rate and due date on these series of long-term debt, please refer to those series of long-term debt titled "Amortizing Secured Notes" and "State Revolving Trust Notes" on the Consolidated Statements of Capital Stock and Long-Term Debt. The carrying amount of these instruments was $231.3 million and $159.1 million at December 31, 2023 and 2022, respectively. Customer advances for construction have carrying amounts of $21.3 million and $21.4 million at December 31, 2023 and 2022, respectively. Their relative fair values cannot be accurately estimated since future refund payments depend on several variables, including new customer connections, customer consumption levels and future rate increases.

Note 7 - Employee Benefit Plans

Pension Benefits

The Company's Pension Plan covers all active employees hired prior to April 1, 2007. Employees hired after March 31, 2007 are not eligible to participate in this plan, but can participate in a defined contribution profit sharing plan that provides an annual contribution at the discretion of the Company, based upon a percentage of the participants' annual paid compensation. In order to be eligible for contribution, the eligible employee must be employed by the Company on December 31st of the year to which the contribution relates. The Company maintains an unfunded supplemental plan for a limited number of its executive officers. The Accumulated Benefit Obligation for the Company's Pension Plan at December 31, 2023 and 2022 was $83.7 million and $79.4 million, respectively.

Other Benefits

The Company's Other Benefits Plan covers substantially all of its current retired employees. Employees hired after March 31, 2007 are not eligible to participate in this plan. Coverage includes healthcare and life insurance.

Regulatory Treatment of Over/Underfunded Retirement Obligations

Because the Company is subject to rate regulation in the states in which it operates, it is required to maintain its accounts in accordance with the regulatory authority's rules and guidelines, which may differ from other authoritative accounting pronouncements. In those instances, the Company follows the guidance of ASC 980, *Regulated Operations*. Based on prior regulatory practice, and in accordance with the guidance in ASC 980, *Regulated Operations*, the Company records underfunded Pension Plan and Other Benefits Plan obligation costs, which otherwise would be recognized in Other Comprehensive Income under ASC 715, *Compensation – Retirement Benefits*, as a Regulatory Asset, and expects to recover those costs in rates charged to customers.

The Company uses a December 31 measurement date for all of its employee benefit plans. The tables below set forth information relating to the Company's Pension Plan and Other Benefits Plan for 2023 and 2022.

	(Thousands of Dollars)			
	Pension Plan		Other Benefits Plan	
	Years Ended December 31,			
	2023	2022	2023	2022
Change in Projected Benefit Obligation:				
Beginning Balance	$ 87,788	$ 113,710	$ 32,909	$ 49,396
Service Cost	1,551	2,362	391	799
Interest Cost	4,270	3,042	1,608	1,325
Actuarial (Gain) Loss	1,966	(27,850)	(5,968)	(17,761)
Benefits Paid	(3,722)	(3,476)	(940)	(850)
Ending Balance	$ 91,853	$ 87,788	$ 28,000	$ 32,909

	Pension Plan			Other Benefits Plan		
	Years Ended December 31,					
	2023	2022	2021	2023	2022	2021
Components of Net Periodic Benefit Cost						
Service Cost	$ 1,551	$ 2,362	$ 2,696	$ 391	$ 799	$ 917
Interest Cost	4,270	3,042	2,706	1,608	1,325	1,236
Expected Return on Plan Assets	(5,865)	(7,041)	(6,225)	(3,082)	(3,547)	(3,142)
Amortization of Net Actuarial Loss (Gain)	658	1,674	2,868	(191)	—	527
Net Periodic Benefit Cost*	$ 614	$ 37	$ 2,045	$ (1,274)	$ (1,423)	$ (462)

*Service cost is included in Operations and Maintenance expense on the consolidated statements of income; all other amounts are included in Other Income (Expense), net.

Amounts that are expected to be amortized from Regulatory Assets into Net Periodic Benefit Cost in 2024 are as follows:

	(Thousands of Dollars)	
	Pension Plan	Other Benefits Plan
Actuarial Loss (Gain)	$ 153	$ (1,098)

The discount rate and compensation increase rate for determining our postretirement benefit plans' benefit obligations and costs as of and for the years ended December 31, 2023, 2022 and 2021, respectively, are as follows:

	Pension Plan			Other Benefits Plan		
	2023	2022	2021	2023	2022	2021
Weighted Average Assumptions:						
Expected Return on Plan Assets	7.00%	7.00%	7.00%	7.00%	7.00%	7.00%
Discount Rate for:						
Benefit Obligation	4.79%	4.98%	2.72%	4.79%	4.98%	2.72%
Benefit Cost	4.98%	2.72%	2.37%	4.98%	2.72%	2.37%
Compensation Increase for:						
Benefit Obligation	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%
Benefit Cost	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%

The compensation increase assumption for the Other Benefits Plan is attributable to life insurance provided to qualifying employees upon their retirement. The insurance coverage will be determined based on the employee's base compensation as of their retirement date.

The Company utilizes the Society of Actuaries' mortality table (Pri-2012) (Mortality Improvement Scale MP2021).

For the 2023 valuation, costs and obligations for our Other Benefits Plan assumed a 7.5% annual rate of increase in the per capita cost of covered healthcare benefits in 2023 with the annual rate of increase declining 0.5% per year for 2024-2029, resulting in an annual rate of increase in the per capita cost of covered healthcare benefits of 4.5% by year 2030.

A one-percentage point change in assumed healthcare cost trend rates would have the following effects on the Other Benefits Plan:

	(Thousands of Dollars) 1 Percentage Point	
	Increase	Decrease
Effect on Current Year Service and Interest Costs	$ 308	$ (246)
Effect on Projected Benefit Obligation	$ 3,264	$ (2,676)

The following benefit payments, which reflect expected future service, are expected to be paid:

	(Thousands of Dollars)	
Year	Pension Plan	Other Benefits Plan
2024	$ 5,078	$ 1,181
2025	5,457	1,310
2026	5,444	1,377
2027	5,522	1,417
2028	5,638	1,445
2029-2033	29,349	8,104
Totals	$ 56,488	$ 14,834

Benefit Plans Assets

The allocation of plan assets at December 31, 2023 and 2022 by asset category is as follows:

	Pension Plan			Other Benefits Plan		
Asset Category	2023	2022	Target	2023	2022	Target
Equity Securities	58.1%	53.6%	55%	60.9%	55.2%	43%
Debt Securities	39.6%	40.9%	38%	36.1%	24.7%	50%
Cash	0.7%	3.9%	2%	3.0%	20.1%	2%
Real Estate/Commodities	1.6%	1.6%	5%	0.0%	0.0%	5%
Total	100.0%	100.0%		100.0%	100.0%	

Two outside investment firms each manage a portion of the Pension Plan asset portfolio. One of those investment firms also manages the Other Benefits Plan asset portfolio. Quarterly meetings are held between the Company's Pension Committee of the Board of Directors and the investment managers to review their performance and asset allocation. If the actual asset allocation is outside the targeted range, the Pension Committee reviews current market conditions and advice provided by the investment managers to determine the appropriateness of rebalancing the portfolio.

The objective of the Company is to maximize the long-term return on retirement plan assets, relative to a reasonable level of risk, maintain a diversified investment portfolio and maintain compliance with the Employee Retirement Income Security Act of 1974. The expected long-term rate of return is based on the various asset categories in which plan assets are invested and the current expectations and historical performance for these categories.

Fair Value Measurements

Accounting guidance provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted market prices for identical assets or liabilities in accessible active markets.
- Level 2 – Inputs to the valuation methodology that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. If the asset or liability has a specified contractual term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Certain investments in cash and cash equivalents, equity securities, and commodities are valued based on quoted market prices in active markets and are classified as Level 1 investments. Certain investments in cash and cash equivalents, equity securities and fixed income securities are valued using prices received from pricing vendors that utilize observable inputs and are therefore classified as Level 2 investments.

The following tables present Middlesex's Pension Plan assets measured and recorded at fair value within the fair value hierarchy:

	(Thousands of Dollars) As of December 31, 2023			
	Level 1	**Level 2**	**Level 3**	**Total**

Benefit Plans Contributions

For the Pension Plan, Middlesex made total cash contributions of $0.4 million in 2023 and expects to make cash contributions of approximately $0.9 million in 2024.

For the Other Benefits Plan, Middlesex made cash contributions of $0.9 million in 2023 and expects to make approximately $0.9 million of cash contributions in 2024.

401(k) Plan

The Company maintains a 401(k) defined contribution plan, which covers substantially all employees with more than 1,000 hours of service. Under the terms of the Plan, the Company matches 100% of a participant's contributions, which do not exceed 1% of a participant's compensation, plus 50% of a participant's contributions exceeding 1%, but not more than 6%. The Company's matching contribution was $0.8 million, $0.7 million and $0.7 million for the years ended December 31, 2023, 2022 and 2021, respectively.

Employees hired after March 31, 2007 are not eligible to participate in the Pension Plan and are generally eligible to participate in a discretionary profit sharing plan administered through the 401(k) plan. In December each year, the Board of Directors may approve that a stated percentage of eligible compensation be contributed to the account of the employee participant in the first quarter of the following year. For those employees still actively employed on December 31, 2023 or retired during the current year, the Company will fund a discretionary contribution of $0.9 million before April 1, 2024, which represents 5.0% of eligible 2023 compensation. For the years ended December 31, 2022 and 2021, the Company made qualifying discretionary contributions totaling $0.9 million and $0.8 million, respectively.

Stock-Based Compensation

The Company maintains a long-term incentive compensation plan for certain management employees where awards are made in the form of restricted common stock. Shares of restricted stock issued under the plan are subject to forfeiture by the employee in the event of termination of employment for any reason within five years of the award

other than as a result of retirement at normal retirement age, death, disability or change in control. The maximum number of shares authorized for award under the plan is 300,000 shares, of which approximately 75% remain available for issuance.

The Company recognizes compensation expense at fair value for the plan awards in accordance with ASC 718, *Compensation – Stock Compensation*. Compensation expense is determined by the market value of the stock on the date of the award and is being amortized over the expected vesting period.

The following table presents awarded but not yet vested share information for the plan:

	Shares (thousands)	Unearned Compensation (thousands)	Weighted Average Granted Price
Balance, January 1, 2021	86	$ 1,837

Balance, December 31, 2023	**74**	**$ 1,043**	

Note 8 – Business Segment Data

The Company has identified two reportable segments. One is the regulated business of collecting, treating and distributing water on a retail and wholesale basis to residential, commercial, industrial and fire protection customers in parts of New Jersey and Delaware. This segment also includes regulated wastewater systems in New Jersey and Delaware. The Company is subject to regulations as to its rates, services and other matters by the states of New Jersey and Delaware with respect to utility service within these states. The other segment is primarily comprised of non-regulated contract services for the operation and maintenance of municipal and private water and wastewater systems in New Jersey and Delaware.

Inter-segment transactions relating to operational costs are treated as pass-through expenses. Finance charges on inter-segment loan activities are based on interest rates that are below what would normally be charged by a third party lender.

Operation by Segments	(Thousands of Dollars) Years Ended December 31, 2023	2022	2021
Revenues:

The information above, in the opinion of the Company, includes all adjustments consisting only of normal recurring accruals necessary for a fair presentation of such amounts. The business of the Company is subject to seasonal fluctuation with the peak period usually occurring during the summer months. The quarterly earnings per share amounts above may differ slightly from previous filings due to the effects of rounding.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES

(1) Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in Company reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding disclosure.

As required by Rule 13a-15 under the Exchange Act, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures was conducted by the Company's Chief Executive Officer along with the Company's Chief Financial Officer for the year ended December 31, 2023. Based upon that evaluation, the Company's Chief Executive Officer and the Company's Chief Financial Officer concluded that:

a) The following changes in internal control over financial reporting occurred during the year ended December 31, 2023 that has materially affected, or are reasonably likely to materially affect, internal control over financial reporting:

   In December 2023, management implemented various auditing and monitoring solutions that provide greater transparency into changes made within our information technology (IT) systems. These control solutions are supported by a timely review process that focuses on the proper authorization and approval of IT system changes.

b) Our disclosure controls and procedures were not effective as of December 31, 2023 due to the material weaknesses described below. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

   As the IT material weakness was recently determined to exist, the remediation actions described in paragraph (1) a) above were completed in December 2023. However, the implemented controls did not operate over a sufficient time period to adequately test and validate the remediation and reassess other information technology general controls (ITGCs), which may require further remediation actions.

   In addition, there were ineffective internal controls related to income tax accounting for a non-routine transaction.

   Management has determined that such material weaknesses exist as of December 31, 2023.

(2) **Management's Report on Internal Control Over Financial Reporting**

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rule 13A-15(f) and 15d-15(f). Middlesex's internal control system was designed to provide reasonable assurance to the Company's management and Board of Directors of adequate preparation and fair presentation of the published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the adequacy of financial statement preparation and presentation. Middlesex's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2023. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013 framework).

Subsequent to the issuance of the Company's consolidated financial statements for the year ended December 31, 2022 which were included in Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2022, originally filed with the United States Securities and Exchange Commission on February 24, 2023, the Company's independent registered public accounting firm, Baker Tilly US, LLP (Baker Tilly), conducted a routine internal quality review of its integrated audit of the Company's 2022 consolidated financial statements and internal

control over financial reporting as of December 31, 2022. As a result of this review, Baker Tilly re-examined the Company's ITGCs in the areas of user access and change management over certain IT systems that support the Company's financial reporting processes. Certain of those controls were found to be deficient because of a lack of sufficient IT control processes designed to prevent or detect unauthorized changes in applications and data in selected IT environments. It has therefore been concluded that automated and manual process controls dependent on ITGCs were not effective. These ineffective controls create a possibility that material misstatements in financial reporting processes and financial statement accounts in our consolidated financial statements will not be prevented or detected on a timely basis. As the material weakness was recently determined to exist, certain remediation actions were completed in December 2023. Various auditing and monitoring solutions have been implemented that provide greater transparency into changes made within our IT systems. These control solutions are supported by a timely review process that focuses on the proper authorization and approval of IT system changes. Due to the timing of the implementation of the solutions, the controls implemented did not operate over a sufficient time period to adequately test and validate the remediation and reassess other ITGCs, which may require further remediation actions.

In addition, there were ineffective internal controls related to income tax accounting for a non-routine transaction.

Management has determined that such material weaknesses exist as of December 31, 2023.

Notwithstanding the identified material weakness referred to above, management, including our principal executive officer and principal financial officer, believe that the financial statements contained in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2023 fairly present, in all material respects, the financial condition, results of operations and cash flows of the Company for all periods presented in accordance with accounting principles generally accepted in the United States of America.

While the Audit Committee of our Board of Directors and Company management will closely monitor the remediation efforts, until the remediation efforts discussed in this section are complete, tested and determined effective, we will not be able to conclude that the material weakness has been remediated.

Middlesex's independent registered public accounting firm (PCAOB ID 23) has audited the effectiveness of our internal control over financial reporting as of December 31, 2023 as stated in their report dated as of February 29, 2024, which is included herein.

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value $0.001 per share	SJW	New York Stock Exchange LLC

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or emerging growth company. See definition of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company," in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the Registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b) ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of June 30, 2023, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was approximately $2,199 million based on the closing sale price as reported on the New York Stock Exchange.

As of February 15, 2024, 32,060,353 shares of the registrant's common stock, par value, $0.001 per share, were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement relating to the registrant's Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K where indicated.

Forward-Looking Statements

This report contains forward-looking statements within the meaning of the federal securities laws relating to future events and future results of SJW Group and its subsidiaries that are based on current expectations, estimates, forecasts, and projections about SJW Group and its subsidiaries and the industries in which SJW Group and its subsidiaries operate and the beliefs and assumptions of the management of SJW Group. Some of these forward-looking statements can be identified by the use of forward-looking words such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "estimates," "projects," "strategy," or "anticipates," or the negative of those words or other comparable terminology. These forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. Important factors that could cause or contribute to such differences include, but are not limited to, those discussed in this report under Item 1A, "Risk Factors," and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere, and in other reports and documents SJW Group files with the Securities and Exchange Commission (the "SEC"), specifically the most recent Form 10-Q and reports on Form 8-K filed with the SEC, each as it may be amended from time to time.

The accuracy of such statements is subject to a number of risks, uncertainties and assumptions including, but not limited to, the following factors:

- the effect of water, utility, environmental and other governmental policies and regulations, including actions concerning rates, authorized return on equity, authorized capital structures, capital expenditures and other decisions;
- changes in demand for water and other services;
- unanticipated weather conditions and changes in seasonality including those affecting water supply and customer usage;
- the effect of the impacts of climate change;
- unexpected costs, charges or expenses;
- our ability to successfully evaluate investments in new business and growth initiatives;
- contamination of our water supplies and damage or failure of our water equipment and infrastructure;
- the risk of work stoppages, strikes and other labor-related actions;
- catastrophic events such as fires, earthquakes, explosions, floods, ice storms, tornadoes, hurricanes, terrorist acts, physical attacks, cyber-attacks, epidemic or similar occurrences;
- changes in general economic, political, business and financial market conditions;
- the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings, changes in interest rates, compliance with regulatory requirements, compliance with the terms and conditions of our outstanding indebtedness, and general market and economic conditions; and
- legislative and general market and economic developments.

Actual results are subject to other risks and uncertainties that relate more broadly to our overall business, including those more fully described in our filings with the SEC, including our most recent reports on Form 10-K, Form 10-Q and Form 8-K. Forward-looking statements are not guarantees of performance, and speak only as of the date made, and SJW Group undertakes no obligation to update or revise any forward-looking statements except as required by law.

Item 1. ***Business***

General Development of Business

SJW Group was initially incorporated as SJW Corp. in the state of California on February 8, 1985. SJW Group is a holding company with four wholly owned subsidiaries:

- San Jose Water Company ("SJWC"), with its headquarters located at 110 West Taylor Street in San Jose, California 95110, was originally incorporated under the laws of the State of California in 1866. As part of a reorganization on February 8, 1985, SJWC became a wholly owned subsidiary of SJW Group. SJWC is a public utility in the business of providing water service in the metropolitan San Jose, California area.
- SJWNE LLC, a Delaware limited liability company, was formed in 2019, and is a wholly owned subsidiary of SJW Group. SJWNE LLC is a special purpose entity established to hold SJW Group's investment in Connecticut Water Service, Inc. Connecticut Water Service, Inc. with its headquarters located in Clinton, Connecticut, was incorporated in 1974 in the State of Connecticut. As part of the merger transaction between SJW Group and Connecticut Water Service, Inc. on October 9, 2019, Connecticut Water Service, Inc. and its subsidiaries ("CTWS") became a wholly owned subsidiary of SJWNE LLC. Connecticut Water Service, Inc. is a holding company with four wholly owned subsidiaries. The Connecticut Water Company ("CWC") and The Maine Water Company ("MWC") are public utilities in the business of providing water service throughout Connecticut and Maine. The remaining two subsidiaries are Chester Realty, Inc., a real estate company in Connecticut, and New England Water Utility Services, Inc. ("NEWUS"), which provides contract water and sewer operations and other water related services.
- In the third quarter of 2023, the corporate reorganization of our water services organization in Texas was completed. SJWTX Holdings, Inc. is the holding company for SJWTX, Inc., doing business as The Texas Water Company ("TWC"), Texas Water Operation Services, LLC ("TWOS") and Texas Water Resources, LLC ("TWR"). TWC is a public utility in the business of providing water service in Bandera, Blanco, Comal, Hays, Kendall, Medina and Travis Counties in the growing region between San Antonio and Austin, Texas. TWC additionally provides wastewater service in Comal and Kendall counties. TWC also holds a 25% equity interest in Acequia Water Supply Corporation ("Acequia"). Acequia has been determined to be a variable interest entity within the scope of Accounting Standards Codification ("ASC") Topic 810, "Consolidation," with TWC as the primary beneficiary. As a result, Acequia has been consolidated with TWC. TWOS was created for non-tariffed service operations and TWR was formed to hold wholesale water supply assets.
- SJW Land Company was incorporated in 1985. SJW Land Company owns undeveloped land in California and Tennessee and operates commercial buildings in Tennessee.

Together, SJWC, CWC, TWC, TWOS, TWR, MWC and NEWUS are referred to as "Water Utility Services."

SJW Land Company and Chester Realty, Inc. are collectively referred to as "Real Estate Services."

Regulation and Rates

Water Utility Services, excluding non-tariffed activities, are subject to rate regulation based on cost recovery and meets the criteria of accounting guidance for rate-regulated operations, which affects the timing of the recognition of certain revenues and expenses. SJW Group's consolidated financial statements reflect the actions of regulators in the rate-making process. The rate-making process is intended to provide revenues sufficient to recover normal operating expenses, provide funds for replacement of water infrastructure and produce a fair and reasonable return on stockholder common equity. SJW Group's regulated operations financing activities are designed to achieve capital structures consistent with regulatory guidelines in the locations where the companies operate. The following summarizes each state's authorized rates and capital structure as of December 31, 2023:

	California	Connecticut	Texas (a)	Maine (b)
Authorized capital structure (debt/equity)	45% / 55%	47% / 53%	42% / 58%	50% / 50%
Authorized return on equity (c)	9.31%	9.00%	10.88%	9.70%
Authorized rate base (in millions)	$1,113.7	$620.1	$43.3	$135.1
Estimated rate base at year-end (in millions) (d)	$1,136.3	$731.3	$106.5	$172.0

(a) Estimated by management.

(b) The authorized capital structure and return on equity shown are those of the largest division of MWC, the Biddeford and Saco division. Effective January 1, 2024, the Biddeford and Saco division's authorized return on equity is 9.5% and its authorized capital structure is 49% debt and 51%

equity. This return on equity and capital structure will be used for any future Water Infrastructure Surcharge ("WISC") calculations for all divisions until the Commission has authorized or approved a different return on equity structure in a different proceeding.

(c) For California, the approved WCCM-adjusted return on equity is 10.01% starting January 1, 2024, less a 20 basis point reduction due to the reimplementation of the Water Conservation Memorandum Account ("WCMA").

(d) An approximation of rate base which includes net utility plant not yet included in rate base pending rate case filings and outcomes. For California, this represents the weighted-average estimated rate base for the twelve months ended December 31, 2023.

California Regulatory Affairs

SJWC's rates, service and other matters affecting its business are subject to regulation by the California Public Utilities Commission ("CPUC").

Generally, there are three types of rate adjustments that affect SJWC's revenue collection: general rate adjustments, cost of capital adjustments, and offset rate adjustments. General rate adjustments are authorized in general rate case decisions, which usually authorize an initial rate adjustment followed by two annual escalation adjustments. General rate applications are normally filed and processed during the last year covered by the most recent general rate case as required by the CPUC in order to avoid any gaps in regulatory decisions on general rate adjustments. Actual revenue received may be higher or lower than the revenue requirement due to a number of factors including actual customer counts, usage or other regulatory factors in force at the time.

Cost of capital adjustments are rate adjustments resulting from the CPUC's usual tri-annual establishment of a reasonable rate of return for SJWC's capital investments.

The purpose of an offset rate adjustment is to compensate utilities for changes in specific pre-authorized offsettable capital investments or expenses, primarily for purchased water, groundwater extraction, purchased power and pensions. Pursuant to Section 792.5 of the California Public Utilities Code, a balancing account must be maintained for each expense item for which such revenue offsets have been authorized. Memorandum accounts track revenue impacts due to catastrophic events, certain unforeseen water quality expenses related to new federal and state water quality standards, energy efficiency, water conservation during periods of mandated water restrictions, water tariffs and other approved activities or as directed by the CPUC. The purpose of balancing and memorandum accounts is to track the under-collection or over-collection associated with such expense changes and activities for future recovery or refund considerations. Carrying balances of the balancing and memo accounts earn a rate of return based on treasury rates.

On May 3, 2021, SJWC filed Application No. 21-05-004 requesting authority to adjust its cost of capital for the period from January 1, 2022 through December 31, 2024. The request sought a revenue increase of $6.4 million or 1.61% in 2022. The application also proposed a rate of return of 8.11%, an increase from 7.64%, a decrease in the average cost of debt rate from 6.20% to 5.48%, and a return on equity of 10.30%, an increase from 8.90%. In addition, the request sought to adjust SJWC's currently authorized capital structure of approximately 47% debt and 53% equity to approximately 45% debt and 55% equity. Intervenors in this proceeding, namely the Public Advocates Office and Water Rate Advocates for Transparency, Equity, and Sustainability, suggested a lower return on equity while the latter has also suggested a higher cost of debt and different capital structure as part of their testimonies. On June 29, 2023, the CPUC approved Decision No. 23-06-025 in this proceeding. The decision authorized a rate of return of 7.28% based on a return on equity of 8.80%, a cost of debt of 5.46%, and a capital structure of approximately 45% debt and 55% equity. The CPUC also authorized continuation of the Water Cost of Capital Mechanism ("WCCM") in the same decision. The WCCM provided for an adjustment to SJWC's return on equity and cost of debt if the average Moody's Aa utility bond index rate between October 1, 2021 and September 30, 2022 varies by more than 100 basis points when compared to the same period from the prior year. The index rate difference between those periods increased 103 basis points, thereby triggering the WCCM. Accordingly, SJWC filed a Tier 2 Advice Letter No. 598 on June 30, 2023, which was subsequently approved with an effective date of July 31, 2023. On July 31, 2023, SJWC filed a Tier 1 Advice Letter No. 599 to implement new rates. The new rates became effective prospectively on the date of the filing and reflected the WCCM-adjusted return on equity of 9.31%, a cost of debt of 5.26%, and an overall rate of return of 7.47%. Advice Letter No. 599 was approved with an effective date of July 31, 2023. Between October 1, 2022 and September 30, 2023, the index rate increased approximately 140 basis points, surpassing the required WCCM trigger. On October 13, 2023, SJWC filed Advice Letter No. 601 to trigger the WCCM for 2024, which was subsequently approved with an effective date of January 1, 2024. The approved WCCM-adjusted return on equity is 10.01% starting January 1, 2024, less a 20 basis point reduction due to the reimplementation of the WCMA.

The CPUC approved the settlement of 2022 General Rate Case on October 6, 2022 and issued Decision No. 22-10-005 ("2022 GRC Decision") on October 11, 2022. SJWC received authority for an increase of revenue requirement by $25.1 million or 6.03% in 2022, $13.0 million or 2.94% in 2023, and $16.1 million or 3.56% in 2024. The application included requests to recover $18.2 million from balancing and memorandum accounts and authorization for a $350 million capital budget. Additionally, it further aligned authorized and actual consumption, particularly for business customers, addressed the water

supply mix variability, and provided greater revenue recovery in the fixed charge. The approved revenue increase for 2022 was effective retrospectively to January 1, 2022.

SJWC filed Advice Letter No. 585 on November 10, 2022, to recover $20.6 million in the Interim Rates Memorandum Account in accordance with the 2022 GRC Decision. Advice Letter No. 585 was approved with an effective date of January 1, 2023.

SJWC filed Advice Letter No. 586 on November 18, 2022, to increase the authorized revenue requirement by $18.4 million or 4% for the escalation year increase in accordance with the 2022 GRC Decision. Advice Letter No. 586 was approved with an effective date of January 1, 2023.

SJWC filed Advice Letter No. 590 on April 6, 2023, to recover a $14.2 million under-collection in its Monterey Water Revenue Adjustment ("MWRAM") Account as of March 31, 2023. SJWC proposed that this amount be recovered via a 12-month volume surcharge. Advice Letter No. 590 was approved with an effective date of May 8, 2023.

SJWC filed Advice Letter No. 591 on April 11, 2023, to discontinue its drought allocation surcharges and move from Stage 3 to Stage 1 of its Schedule 14.1. Advice Letter No. 591 was approved with an effective date of April 11, 2023.

SJWC filed Advice Letter No. 592 on April 20, 2023, to continue its WCMA and Water Conservation Expense Memorandum Account under Santa Clara Valley Water District's ("Valley Water") voluntary call for 15% conservation. On October 2, 2023, Advice Letter No. 592 was approved with an effective date of April 20, 2023.

SJWC filed Advice Letter No. 596 on May 31, 2023, to increase the authorized revenue requirement by $27.6 million to offset the increases to purchased potable water charges, the groundwater extraction fee, and purchased recycled water charges from its water wholesalers effective July 1, 2023. Advice Letter No. 596 was approved with an effective date of July 1, 2023.

SJWC filed Advice Letter No. 603 on November 14, 2023, to establish a Group Insurance Balancing Account to track the difference between the company's authorized versus actual costs for medical, dental, and opt-out insurance expenses. Advice Letter No. 603 was approved with an effective date of January 1, 2024.

SJWC filed Advice Letter No. 605 on November 21, 2023, to increase the authorized revenue requirement by $21.3 million or 4.16% for the attrition year increase in accordance with the 2022 GRC Decision. Advice Letter No. 605 was approved with an effective date of January 1, 2024.

On December 15, 2023, SJWC, along with three other California water utilities, filed a joint request for one-year deferment on the cost of capital filings which would otherwise be due on May 1, 2024. Postponing the filing a year would alleviate administrative processing costs on the utilities as well as the CPUC staff, and provide relief for both CPUC and utility resources already strained by numerous other proceedings. The request is conditioned on leaving the current WCCM in place such that any adjustments will be made to the respective utilities cost of capital during the one-year deferment based on the mechanism. The request was approved on February 2, 2024.

On January 2, 2024, SJWC filed General Rate Case Application No. 24-01-001 with the CPUC to increase rates charged for water service by $55.2 million or 11.11% in 2025, by $22 million or 3.99% in 2026, and by $25.8 million or 4.49% in 2027. The application also includes requests to recover $23.5 million from balancing and memorandum accounts, further alignment between actual and authorized usage, and a shift to greater revenue collection in the service charge. The application will undergo a year-long review process and the new rates, if approved, are expected to be effective January 1, 2025.

Connecticut Regulatory Affairs

CWC's rates, service and other matters affecting its business are subject to regulation by the Public Utilities Regulatory Authority of Connecticut ("PURA").

PURA allows the Connecticut regulated operations to add surcharges to customers' bills in order to recover certain costs associated with approved eligible capital projects through the Water Infrastructure Conservation Adjustment ("WICA") in between full rate cases, as well as approved surcharges or sur-credits for the Water Revenue Adjustment ("WRA").

On January 25, 2023, CWC filed its 2022 WICA reconciliation with PURA. The reconciliation, approved by PURA on March 29, 2023 and effective for 12 months beginning April 1, 2023, replaced the expiring 2021 reconciliation credit of 0.02% with a credit of 0.16%. On January 26, 2023, CWC filed for a WICA increase of $3.3 million in annualized revenues for $27.8 million in completed projects. PURA approved CWC's application on March 22, 2023. The cumulative WICA surcharge as of April 1, 2023 was 6.19%, collecting $6.5 million on an annual basis.

On February 27, 2023, CWC filed its 2022 WRA. The mechanism reconciles 2022 revenues as authorized in the CWC's most recent rate case. The 2022 WRA, as approved by PURA on March 24, 2023 and effective for 12 months beginning on April 1, 2023, imposed a 4.97% sur-credit on customer bills to refund the 2022 revenue over-collection.

On July 27, 2023, CWC filed for a WICA increase of $1.3 million in annualized revenues for $11.5 million in completed

projects. PURA approved the application, and effective October 1, 2023, the cumulative WICA surcharge is 7.38%.

On October 3, 2023, CWC filed an application with PURA to adjust customer rates. If PURA approves the request as proposed, annual revenues of CWC will increase by approximately $21.4 million or 18.1% over current authorized revenues and would be effective on or about July 1, 2024.

On November 14, 2023, CWC submitted an application to PURA for the approval to issue unsecured notes in the amount of $25.0 million. A decision from PURA approving the application was received on January 10, 2024.

Texas Regulatory Affairs

TWC's rates are subject to the economic regulation of the Public Utilities Commission of Texas ("PUCT"). The PUCT may authorize rate increases after the filing of an Application for a Rate/Tariff Change. Rate cases may be filed as they become necessary, provided there is no current rate case outstanding. Furthermore, rate cases may not be filed more frequently than once every 12 months.

TWC has no current general rate case pending. However, it filed its application to establish a System Improvement Charge ("SIC") with the PUCT under Docket No. 54430 on December 30, 2022. This filing will allow TWC to add certain utility plant additions made since 2020 to its rate base, thereby increasing revenue and avoiding the immediate need for a general rate case. The SIC is projected to increase TWC's water revenue by $1.6 million and sewer revenue by $29 thousand within one year of the approval from the PUCT. On October 17, 2023, the PUCT found the application administratively complete. Once the PUCT files the final order approving the SIC, TWC will be required to file a general rate case within four years. TWC will incrementally increase its SIC annually until its next rate case. TWC expects to receive the final order during the first quarter of 2024. Notwithstanding the SIC filing, TWC will continue to file its annual adjustments for the Water Pass-through Charges ("WPC") for Canyon Lake, Deer Creek and Kendall West customers. All water supply cost increases are recoverable when the next annual WPC adjustment for each system is filed.

On April 10, 2023, TWC filed an application with the PUCT to acquire the Elm Ridge water system that serves 21 residential customers. TWC has asked for filed rate doctrine treatment, which allows the acquiring utility's current rates to be applied at the time of acquisition. On December 12, 2023, the Administrative Law Judge filed Order No. 11, which allowed TWC to proceed and the acquisition closed on January 26, 2024. The final order, which transfers the Certificate of Convenience and Necessity ("CCN") and allows filed rate doctrine, is expected to be approved during the second quarter of 2024.

On July 24, 2023, the PUCT approved TWC's application to acquire KT Water Development Ltd. KT Water Development Ltd. provides service to approximately 570 residential water connections. On August 14, 2023, TWC closed on the acquisition. The PUCT's final decision that transfers the CCN to TWC is expected in the first quarter of 2024, which is when we anticipate approval of our request for fair market value and filed rate doctrine treatment.

On January 5, 2024, TWC filed an application with the PUCT to acquire the 3009 Water Company LLC water system that serves approximately 270 residential connections. TWC requested fair market value and filed rate doctrine treatment which allows the acquiring utility's current rates to be applied at the time of acquisition. TWC expects to receive approval to close on the acquisition during the third quarter of 2024.

Maine Regulatory Affairs

MWC's rates, service and other matters affecting its business are subject to regulation by the Maine Public Utilities Commission ("MPUC"). MPUC approves rates on a division-by-division basis in Maine and allows MWC to add surcharges to customers' bills in order to recover certain costs associated with capital projects through the WISC in between general rate cases. Projects eligible for WISC surcharges include all infrastructure replacement or repair projects, excluding meters, that are necessary for the transmission, distribution or treatment of water.

The rates approved in the Biddeford Saco division by the April 5, 2022 stipulated agreement, which authorized a rate increase of $6.3 million, or 72.5% went into effect on July 1, 2022. The Saco River Drinking Water Resource Center began supplying the water distribution system on June 16, 2022. As part of the stipulated agreement, MWC agreed to file a final phase of the rate case by April 1, 2023. Step 3 of the planned multi-year rate filings for the Saco River Drinking Water Resource Center was filed in accordance with the Commission order on March 31, 2023. The filing requested an increase in revenue requirement of $2.9 million or 19.9% and requested that the increase be implemented over two years with a 12% increase effective July 1, 2023 followed by a 9% increase effective July 1, 2024 with a slight decrease in year three to reach the overall 19.9% requested. On August 25, 2023, the Commission issued an order granting a temporary rate increase of $1.5 million or 10% while the case and the company's full request are litigated. The company reached a settlement agreement with staff and the Office of the Public Advocate and filed a stipulated settlement agreement with the MPUC on December 22, 2023. The commission approved the stipulation in deliberations on January 5, 2024 with a rate effective date of January 1, 2024. The approved stipulation authorizes an increase in rates of $2.6 million or 17.6%. The Biddeford and Saco division's increase in rates is based on an authorized return on equity of 9.5% along with a capital structure of 49% debt and 51% equity. This return on equity and capital

7

structure will be used for any future WISC calculations for all divisions until the Commission has authorized or approved a different return on equity structure in a different proceeding.

On February 28, 2022, MWC filed requests for general rate increases in the Camden-Rockland, Freeport, Millinocket and Oakland Divisions. On February 2, 2023, MWC received final decisions from the MPUC on four general rate cases filed in 2022. The rate increases are retroactively effective for January 1, 2023 and authorize a $0.7 million increase in annual revenues.

On June 30, 2023, MWC filed a Water Infrastructure Surcharge for the Camden-Rockland division. The requested surcharge is 2.34% or $0.2 million. The Commission is expected to issue a decision regarding the surcharge in the first quarter of 2024.

Description of Business

General

The principal business of Water Utility Services consists of the production, purchase, storage, purification, distribution, wholesale and retail sale of water and wastewater services. SJWC provides water services to approximately 232,400 connections that serve approximately one million people over 139 square miles residing in portions of the cities of San Jose and Cupertino and in the cities of Campbell, Monte Sereno, Saratoga and in the Town of Los Gatos, and adjacent unincorporated territories, all in the County of Santa Clara in the State of California. The CTWS companies provide water service to approximately 141,000 service connections that serve a population of approximately 461,000 people in 81 municipalities with a service area of approximately 272 square miles throughout Connecticut and Maine and 3,000 wastewater connections in Southbury, Connecticut. TWC provides water service to approximately 28,000 service connections that serve approximately 83,000 people in a service area comprising more than 271 square miles in the region between San Antonio and Austin, Texas and approximately 950 wastewater connections. Together, the Water Utility Services distribute water to customers in their respective service areas in accordance with accepted water utility methods.

Water Utility Services also provide non-tariffed services under agreements with municipalities and other utilities. These non-tariffed services include water system operations, maintenance agreements and antenna site leases. In addition, in October 1997, SJWC commenced operation of the City of Cupertino municipal water system under a 25-year lease which was due to expire in September of 2022 and was amended on January 8, 2020. The system is adjacent to the SJWC service area and has approximately 4,600 service connections. Under the terms of the lease, SJWC assumed responsibility for all maintenance and operating costs of the system, while receiving all payments for water service. SJWC paid an upfront $6.8 million concession fee and an additional $5.0 million in capital improvements to the City of Cupertino. On February 25, 2022, SJWC received a letter from the City of Cupertino exercising their option to extend the term of the lease an additional two years through October 1, 2024. SJWC paid an additional $1.6 million concession fee. The total concession fees paid for the agreement are being amortized over the contract term including the extension.

CTWS provides contracted services to water utilities, as well as offers Linebacker® protection plans for public drinking water customers in the states of Connecticut and Maine. Linebacker plans cover a limited amount of the cost of repairs to water and wastewater service lines and in-home plumbing. Services provided are dependent on the selected plan.

SJW Land Company owns undeveloped real estate property in California and Tennessee, as well as commercial and warehouse properties in Tennessee. Chester Realty, Inc. owns commercial properties and parcels of land in Connecticut.

Among other things, operating results from the water business fluctuate according to the demand for water, which is often influenced by seasonal conditions, such as impact of drought, summer temperatures or the amount and timing of precipitation in Water Utility Services' service areas. Revenue, production expenses and income are affected by changes in water sales and the sources of water supply. Overhead costs, such as payroll and benefits, depreciation, interest on long-term debt, and property taxes are not significantly impacted by seasonality or water supply mix. Generally, earnings are highest in the higher demand, warm summer months and lowest in the lower demand, cool winter months. Certain regulatory mechanisms in our service areas may mitigate the effects of demand fluctuations and/or variations in water supply costs on our operating results.

Water Supply

California Water Supply

SJWC's water supply consists of groundwater from wells, surface water from watershed run-off and diversion, reclaimed water, and imported water purchased from Valley Water under the terms of a master contract with Valley Water expiring in 2051. During normal rainfall years, purchased water provides approximately 40% to 50% of SJWC's annual production. An additional 40% to 50% of its water supply is pumped from the underground basin which is subject to a groundwater extraction charge paid to Valley Water. Surface supply, which during a normal rainfall year satisfies about 6% to 8% of SJWC's annual

8

water supply needs, provides approximately 1% of its water supply in a dry year and approximately 14% in a wet year. In dry years, the decrease in water from surface run-off and diversion and the corresponding increase in purchased and pumped water increases production expenses substantially. The opposite is also true where water production expenses decrease in wet years. In both instances, the impacts of surface water, purchased water, groundwater extraction, and purchased power expenses are now tracked in SJWC's Full Cost Balancing Account authorized in the 2022 GRC Decision.

The pumps and motors at SJWC's groundwater production facilities are propelled by electric power. SJWC has installed standby power generators at 38 of its strategic water production sites and manages a fleet of 22 portable generators deployed throughout the distribution system for power outages at remaining pumping facilities. In addition, the commercial office and operations control centers are outfitted with standby power equipment that allow critical distribution and customer service operations to continue during a power outage. Valley Water has informed SJWC that its filter plants, which deliver purchased water to SJWC, are also equipped with standby generators. In the event of a power outage, SJWC believes it will be able to prevent an interruption of service to customers for a limited period by pumping water using generator power and by using purchased water from Valley Water.

In 2023, the level of water in the Santa Clara Valley groundwater basin, which is managed by Valley Water, experienced an increase in most areas due to seasonal recovery, an increase in managed recharge operations, and a decrease in groundwater pumping by various water retailers in the region. As reported by Valley Water at the end of 2023, the groundwater level in the Santa Clara Plain was 17 feet higher compared to the same time in 2022. The total groundwater storage at the end of 2023 was within Stage 1 (Normal) of the Valley Water's Water Shortage Contingency Plan. On January 1, 2024, Valley Water's 10 reservoirs were 54% of restricted capacity with 10.9 billion gallons of water in storage. As of December 31, 2023, SJWC's Lake Elsman was 55.7% of capacity with 11.2 billion gallons of water, 179.3% of the five-year seasonal average. In addition, the rainfall at SJWC's Lake Elsman was measured at 13 inches for the period from July 1, 2023 through December 31, 2023, which is 70.8% of the five-year average. SJWC's Montevina Water Treatment Plant treated 4 billion gallons of water in 2023, which is 182.5% of the five-year average. SJWC's Saratoga Water Treatment Plant treated 0.1 billion gallons of water in 2023, which is 73.3% of the five-year average. SJWC believes that its various sources of water supply will be sufficient to meet customer demand in 2024.

On April 11, 2023, Valley Water rescinded its water shortage emergency and 15% mandatory conservation target. Valley Water also established a 15% voluntary call for conservation and retained certain watering and water waste rules in recognition of precipitation volatility and reduced local storage. On the same day, SJWC ended its Mandatory Conservation Plan, which included drought allocations and surcharges, and lowered its drought response from Stage 3 to Stage 1.

California faces long-term water supply challenges. SJWC actively works with Valley Water to meet the challenges by continuing to educate customers on responsible water use practices and conducting long-range water supply planning.

Connecticut Water Supply

CWC's water sources vary among the individual systems, but overall, approximately 80% of the total dependable yield comes from surface water supplies and 20% from wells. In addition, CWC has water supply agreements to supplement its water supply with the South Central Connecticut Regional Water Authority and The Metropolitan District that expire 2058 and 2053, respectively.

Texas Water Supply

TWC's water supply consists of groundwater from wells and purchased treated and raw water from the Guadalupe-Blanco River Authority ("GBRA"). TWC has long-term agreements with the GBRA, which expire in 2037, 2040, 2044 and 2050, respectively. The agreements, which are take-or-pay contracts, provide TWC with an aggregate of 7,650 acre-feet of water per year from Canyon Lake at prices that may be adjusted periodically by GBRA. TWC also has raw water supply agreements with the Lower Colorado River Authority ("LCRA") and West Travis Public Utility Agency ("WTPUA") expiring in 2059 and 2046, respectively, to provide for 350 acre-feet of water per year from Lake Austin and the Colorado River, respectively, at prices that may be adjusted periodically by the agencies. Forty active production wells located in a Comal Trinity Groundwater Conservation District, a regulated portion of the Trinity aquifer, are charged a groundwater pump tax based upon usage.

In August 2023, SJWTX Holdings Inc.'s unregulated subsidiary, TWR, acquired eight wells and the water rights of KT Water Resources LLC ("KTR"). These wells have been projected to yield an additional 6,000 acre-feet per year or more.

Maine Water Supply

Water sources at MWC vary among the individual systems, but overall, approximately 90% of the total dependable yield comes from surface water supplies and 10% from wells. MWC has a water supply agreement with the Kennebec Water District expiring in 2040.

MWC relies on legislatively granted water rights in order to serve customers. In some instances, these rights were granted to predecessor water companies specially chartered by the Maine legislature many decades ago, with those entities later having

been merged into MWC. The legislation incorporating these predecessor water companies did not address whether chartered rights may be transferred to another entity without special legislative action. The Maine Business Corporation Act generally provides that property and contract rights of a merged corporation are vested in the surviving corporation without reversion or impairment. In the MPUC proceedings that approved the mergers of these MWC predecessor companies, the survivorship of water rights was not contested.

Please also see further discussion under Item 1A, "Risk Factors" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Franchises

Franchises granted by local jurisdictions permit Water Utility Services to construct, maintain, and operate water distribution systems within the streets and other public properties of a given jurisdiction.

SJWC holds the necessary franchises to provide water in portions of the cities of San Jose and Cupertino and in the cities of Campbell, Monte Sereno and Saratoga, the Town of Los Gatos and the unincorporated areas of Santa Clara County. None of the franchises have a termination date, other than the franchise for the unincorporated areas of Santa Clara County, which terminates in 2035.

CWC's utility services hold the necessary franchises to provide water in portions of the towns of Ashford, Avon, Beacon Falls, Bethany, Bolton, Brooklyn, Burlington, Canton, Chester, Clinton, Colchester, Columbia, Coventry, Deep River, Durham, East Granby, East Haddam, East Hampton, East Windsor, Ellington, Enfield, Essex, Farmington, Griswold, Guilford, Haddam, Hebron, Killingly, Killingworth, Lebanon, Madison, Manchester, Mansfield, Marlborough, Middlebury, Naugatuck, Old Lyme, Old Saybrook, Oxford, Plainfield, Plymouth, Portland, Prospect, Simsbury, Somers, Southbury, South Windsor, Stafford, Stonington, Suffield, Thomaston, Thompson, Tolland, Vernon, Voluntown, Waterbury, Westbrook, Willington, Windsor Locks and Woodstock. Additionally, the Heritage Village Water division serves the Town of Southbury with wastewater services. None of the franchises of the CWC utility services have a termination date.

MWC holds franchises necessary to provide water services in the towns served which are Biddeford, Saco, Old Orchard Beach, Scarborough (Pine Point), Porter, Parsonsfield, Hiram, Freeport, Camden, Rockland, Rockport, Owls Head, Union, Thomaston, Warren, Bucksport, Skowhegan, Oakland, Hartland, Millinocket and Greenville. None of the franchises with MWC have a termination date.

TWC holds the franchises necessary to provide water and wastewater services to the City of Bulverde and the City of Spring Branch, which terminate in 2029 and 2036, respectively. The unincorporated areas that TWC serves in Comal, Blanco, Bandera, Hays, Kendall, Medina and Travis Counties do not require water service providers to obtain franchises.

Seasonal Factors

Water sales are seasonal in nature and influenced by weather conditions. The timing of precipitation and climatic conditions can cause seasonal water consumption by customers to vary significantly. Demand for water is generally lower during the cooler and rainy winter months. Demand increases in the spring when the temperature rises and rain diminishes.

Competition

The regulated operations of Water Utility Services are public utilities regulated by applicable state public utility commissions and operate within service areas approved by such regulators. Statutory laws provide that no other investor-owned public utility may operate in the service area of another public utility of the same class (e.g., another water utility) without first obtaining from the regulator a certificate of public convenience and necessity or similar authorization. Past experience shows such a certificate will be issued only after demonstrating that service in such area is inadequate.

California law also provides that whenever a public agency constructs facilities to extend utility service to the service area of a privately-owned public utility, like SJWC, such an act constitutes the taking of property and is conditioned upon payment of just compensation to the private utility.

Under the California law, municipalities, water districts and other public agencies have been authorized to engage in the ownership and operation of water systems. Such agencies are empowered to condemn properties operated by privately-owned public utilities upon payment of just compensation and are further authorized to issue bonds (including revenue bonds) for the purpose of acquiring or constructing water systems.

Under Connecticut law, any condemnation of water utility property by a municipality or any unit of state government requires the payment of just compensation for the taking. Further, any condemnation of utility land by a state department, institution or agency (including a municipality) requires the approval of the PURA.

Under Texas law, municipalities, water districts and other public agencies are authorized to engage in the ownership and operation of water systems. Such entities are empowered to acquire property, whether public or private, real or personal, by the

10

exercise of the right of eminent domain, which entails payment to the owner of just compensation for the property taken. However, under current case law those entities may not exercise that right of eminent domain to take the entire operation of an investor-owned utility.

Under Maine law, municipalities-individually and collectively, consumer-owned and standard water districts, and other public agencies are authorized to engage in the ownership and operation of water systems. Such entities may acquire the real and personal property of a privately-owned water company, and take over the company's operations, by exercising the power of eminent domain. In such a taking, the acquiring entity must furnish the condemnee just compensation.

To the company's knowledge, no municipality, water district or other public agency has any pending proceeding to condemn any part of its existing water systems. The company is also unaware of any eminent domain proceeding to take any of its property or operations.

Environmental Matters

Water Utility Services produces potable water and generates wastewater and hazardous wastes in accordance with all applicable county, state and federal environmental rules and regulations. Additionally, public utilities are subject to environmental regulation by various other state and local governmental authorities.

Water Utility Services is currently in compliance with all of the United States Environmental Protection Agency's (the "EPA") surface water treatment performance standards, drinking water standards for disinfection by-products and primary maximum contaminant levels. These standards have been adopted and are enforced by the applicable state water, public health and environmental agencies.

Other state and local environmental regulations apply to our Water Utility Services' operations and facilities. These regulations relate primarily to the handling, storage and disposal of hazardous materials and discharges to the environment, including wastewater operations in the States of Connecticut and Texas. In 2016, SJWC began performing hazardous materials site assessments and remediation prior to the construction phase of capital projects. The site assessments are performed to remove any legacy materials and to obtain site closures from the Santa Clara County Department of Environmental Health under its Voluntary Cleanup Program.

Water Utility Services is currently in compliance with all state and local public health and environmental regulations applicable to their operations.

Human Capital Resources

In order to continue to achieve SJW Group's mission of delivering life sustaining, high-quality water and exceptional service to families, businesses and communities, we are committed to attract, retain and develop the highest quality talent. We believe our employees are our most important asset. Throughout our organization, our employees embrace the company's values of teamwork and respect, straight talk and transparency, integrity and trust, and service and compassion in everything we do. Employees participate in semi-annual employee engagement and satisfaction surveys providing feedback that enables the company to continually assess and implement initiatives to enhance employee satisfaction and retention. Through our board and its committees, we are empowered to address factors that impact our employee strategy and drive positive change in our company and our communities. Our human capital measures and objectives focus on providing a safe and productive work environment that has clear positive and ethical values; a culture that embraces diversity, respect and equity; jobs that offer fair wages as benchmarked to the markets that we live and work in; competitive wages and benefits; and training and development opportunities that support our employees to establish and succeed in meaningful careers at SJW Group.

Basic Workforce Data

As of December 31, 2023, SJW Group had 808 full-time employees, of whom 387 were SJWC employees, 248 were CWC employees, 91 were TWC employees, and 82 were MWC employees. At SJWC, 240 employees are members of unions. Employees working for CWC, MWC and TWC are not represented by unions.

In the first quarter of 2023, SJWC executed three-year bargaining agreements with the International Union of Operating Engineers ("OE"), representing certain employees in the engineering department, and the Utility Workers of America ("UWUA"), representing the majority of all non-administrative employees at SJWC covering the period from January 1, 2023

through December 31, 2025. The agreements include a 6% wage increase provided in 2023, 3.5% in 2024 and 5.5% in 2025 for the union employees.

Employee Safety

Aiming for a "zero-harm" culture, our vision is to manage health and safety performance to become a leader in the water services industry. Protecting the health and safety of our employees is a top priority. Our employee health and safety programs, focus on four core elements:

- Safety Leadership: demonstrating management commitment and support, empowering local teams to be accountable for safety;
- Participation: involving every employee in all aspects of the safety program, connecting safety initiatives to serving employees, customers, shareholders, our communities and the environment;
- Hazard Identification and Control: inspecting workplaces, identifying hazards, implementing controls, and partnering with the front-line teams responsible for delivering reliable, clean, safe drinking water and service; and,
- Training: training employees on hazards and how to protect themselves. Incident and crisis management of both known and unknown threats to employee health and safety are anticipated and planned for by our safety team.

We have specific targets that set the trajectory of our safety program to ensure continuous improvement, including:

- Implement processes and systems to track, monitor, report and continually improve health and safety performance;
- Communicate the updated Health and Safety Policy to employees to promote compliance, consultation, and participation of workers on health and safety matters; and
- Strive for zero accidents and injuries.

We have implemented several management systems to plan and respond to workplace safety and training as well as incidents such as pandemics, wildfires, earthquakes, cyber threats and extreme weather, among others. The goal is to safeguard our employees' health and safety during local, national, or global incidents. Locally, workplace hazards are identified by onsite inspections and from near-miss investigations. More broadly, the team collaborates to anticipate and plan for external events such as a pandemic or for extreme weather or other external events that could impact our operations. Proactive identification of hazards keeps us one step ahead of our constantly changing workplace conditions.

Engagement and Satisfaction

SJW Group has invested significantly in employee engagement and satisfaction in alignment with its values and five building blocks of Community, Customers, Employees, Environment and Shareholders. Employees across SJW Group identified and adopted four sets of core values to guide their work and interactions: integrity and trust, compassion and service, straight talk and transparency, and respect and teamwork. Our leadership employs a servant leadership model where all leaders are encouraged and expected to provide service to their people ensuring that they continue to grow and thrive in their profession, knowledge, and general well-being. Regular "Straight Talk" meetings, employee town halls and quarterly "Leadership on Tap" gatherings are held to continue to build and support our culture and values. Additionally, the company provides ongoing opportunities for employee recognition from peers and leaders and also administers an employee engagement and satisfaction survey twice per year.

Diversity and Inclusion

SJW Group believes that a workplace supporting diversity and inclusion not only promotes equity, teamwork, productivity and collaboration among employees, but also enables us to provide the best services to our customers, communities, and partners and enhance value for our stockholders. We are committed to fostering and maintaining a culture of diversity and inclusion, and we have been tracking our workforce demographics to identify employee teams, geographies, or seniority levels where hiring of minorities or specific demographic representation needs to be addressed. In 2021, CEO Eric Thornburg signed on to the CEO Action for Diversity & Inclusion™ CEO pledge, which outlines a specific set of actions the signatory CEOs will take to cultivate a trusting environment where all ideas are welcomed, and employees feel comfortable and empowered to have discussions about diversity and inclusion. The Company's Diversity, Equity and Inclusion Council (the "Council") is comprised of employee volunteers from all four subsidiaries representing the communities we serve. Since inception, the Council has implemented several impactful initiatives including ongoing education and communications utilizing numerous platforms, providing unconscious bias training, and creating opportunities for all employees to celebrate and support cultural days of personal significance in their communities.

During the year ended December 31, 2023, our workforce comprised of:

	Percentage of Workforce
Gender:	
Female	29 %
Male	70 %
Undisclosed	1 %
Ethnicity:	
Hispanic or Latino	21 %
Not Hispanic or Latino	79 %
Race:	
White	60 %
Asian	10 %
2 or More Races	4 %
Black or African American	3 %
American Indian or Alaska Native	1 %
Native Hawaiian or Other Pacific Islander	1 %
Other/Not Reported	21 %

We work to ensure training and development opportunities are available so that all employees can establish and succeed in meaningful careers at SJW Group.

Community Involvement

In support of our mission as trusted, passionate and socially responsible professionals, we are dedicated to the people and the environment of the communities where we live, work, and serve. SJW Group provides various opportunities for our employees to participate in outreach programs from free virtual education programs for adults, employee-led courses for elementary school aged children, winter coat donation drives, environmental cleanups, community events, and grant programs supporting schools and fire departments. In addition, each of our subsidiaries supports their communities through charitable donations or sponsorships with a focus on the communities served. SJWC and CWC also have matching donations for certain programs to further promote our employees' involvement in their communities. In California, the SJWC Employees Community Fund is a 501(c)(3) charitable organization that uses funds from employee contributions and company matches to provide grants to non-profit organizations supported by our employees.

Fair Wages and Competitive Benefits

SJW Group's future success is largely dependent upon our ability to attract and retain highly skilled and qualified employees. Our California and Connecticut subsidiaries operate in particularly competitive labor markets; we believe our compensation package and benefit programs allow us to recruit and retain talented and qualified personnel. Our compensation and benefits programs include:

- Fair employee wages as benchmarked to the markets that our employees live and work in that are consistent with employee roles and responsibilities, skill levels, experience, and knowledge;
- Engagement of nationally, recognized outside compensation and benefits consulting firms to independently evaluate the appropriateness and effectiveness of compensation for our executive and other officers and to provide benchmarks for executive compensation as compared to peer companies;
- Short-term incentive compensation for management level staff aligning with company financial and operational goals targeted to our stakeholders: customers, communities, employees, and stockholders;
- Alignment with stockholder value by utilizing equity awards linked to investment performance over time, as well as certain absolute financial results;
- A comprehensive annual employee performance review process pursuant to which we determine and communicate to employees annual merit increases, promotions and other changes to responsibilities and duties; and
- Eligibility for all employees to participate in health insurance, dental, vision, cafeteria plans, life and disability/accident coverage, retirement plans and/or salary deferral plans, an employee stock purchase plan, paid and unpaid leaves, a commuter assistance program, professional education and training, and tuition assistance.

13

Executive Officers of the Registrant

The following table summarizes the name, age, offices held and business experience for each of our executive officers, as of February 22, 2024:

Name	Age	Offices and Experience
Willie Brown	56	**SJW Group—Vice President and General Counsel.** Mr. Brown serves as Vice President and General Counsel of SJW Group and SJWC since June 2021. Mr. Brown served as Corporate Secretary of SJW Group and SJWC from January 2020 to October 2023. Mr. Brown served as Assistant General Counsel of SJW Group and SJWC from January 2020 to June 2021. From April 2018 to October 2023, Mr. Brown served as counsel and Corporate Secretary of various subsidiaries of the Corporation. Since joining SJWC in 2008, Mr. Brown has held various legal positions of increasing scope and responsibly. Prior to joining SJWC, Mr. Brown was an associate at two Silicon Valley law firms and is a member of the State Bar of California.
Bruce A. Hauk	53	**SJW Group—Chief Operating Officer.** Mr. Hauk serves as the Chief Operating Officer of SJW Group, SJWC, CTWS, and TWC since January 2023 and was the Chief Corporate Development and Strategy Officer of SJW Group, SJWC, CTWS, and TWC from August 2022 to December 2022. Prior to joining the Company, Mr. Hauk was the President of NextEra Water from May 2021 to August 2022. Prior to joining NextEra, Mr. Hauk served in several roles at American Water Works Company, Inc. from May 2011 to March 2021, lastly serving as President of Regulated Operations and Military Services Group and then as Deputy Chief Operating Officer. Previously, Mr. Hauk served as Deputy Mayor/Chief Administrative Officer for the City of Westfield, Indiana and as Town Manager/Director of Public Works for the City of Westfield, Indiana.
Kristen A. Johnson	57	**SJW Group—Senior Vice President and Chief Administrative Officer.** Ms. Johnson serves as Senior Vice President since November 2022 and Chief Administrative Officer of SJW Group, since April 2020. Ms. Johnson also serves as Senior Vice President of Administration for CTWS and certain of its subsidiaries since November 2019. Ms. Johnson also serves as Senior Vice President and Chief Administrative Officer of TWC, and as Senior Vice President of Administration for CWC and MWC, since April 2023. Previously, Ms. Johnson served as Director of Human Resources, Vice President of Human Resources and Vice President and Corporate Secretary of CTWS and its subsidiaries from 2007, 2008, and 2010, respectively. She served as the Corporate Secretary of The Maine Water Company until July 2020.
Craig J. Patla	56	**CTWS—President.** Mr. Patla serves as President of CTWS and its subsidiaries, except The Maine Water Company, since January 2023. From April 2014 to December 2022, Mr. Patla was Vice President of Service Delivery. From 2011 to 2014, Mr. Patla was Director of Service Delivery. From 2008 to 2011, Mr. Patla was Manager of Service Delivery. From 2004 to 2008, Mr. Patla was Region Manager. Mr. Patla joined CTWS in 1990 as an engineer.
Eric W. Thornburg	63	**SJW Group—President, Chief Executive Officer and Chair of the Board.** Mr. Thornburg serves as President and Chief Executive Officer of SJW Group and SJW Land Company and Chief Executive Officer of SJWC and TWC since November 6, 2017. He has served as the Chair of the Board of Directors of SJW Group, SJWC, SJW Land Company and TWC since April 25, 2018 and Chair of the Board of Directors of SJWNE LLC, CTWS and its subsidiaries since October 9, 2019. Prior to joining SJW Group, Mr. Thornburg served as President and Chief Executive Officer of CTWS since 2006, and Chair of the Board of CTWS since 2007. Mr. Thornburg served as President of Missouri-American Water, a subsidiary of American Water Works Corporation from 2000 to 2004. From July 2004 to January 2006, he served as Central Region Vice President-External Affairs for American Water Works Corporation.
Andrew F. Walters	53	**SJW Group—Chief Financial Officer and Treasurer.** Mr. Walters serves as Chief Financial Officer and Treasurer of SJW Group, SJWC, SJW Land Company, and TWC since January 2022. Mr. Walters also serves as Chief Financial Officer of CTWS and its subsidiaries since April 2023. Mr. Walters served as Chief Corporate Development Officer and Integration Executive of SJW Group from November 2019 until January 2022 and previously served as Chief Administrative Officer of SJWC since January 31, 2014. Mr. Walters is also currently the Vice President of Business Planning of CWC and CTWS as of November 7, 2019. Prior to joining SJWC in 2014, Mr. Walters was a managing director and a senior acquisitions officer in the Infrastructure Investments Group of JP Morgan Asset Management from January 2009 to June 2013. Prior to this, Mr. Walters served in the Investment Banking Division of Citigroup as managing director and head of infrastructure for the Americas and in other roles focused on mergers and acquisitions and capital raising for clients, since 1993.

Principal Accounting Officer of the Registrant

The following table summarizes the name, age, offices held and business experience for our principal accounting officer, as of February 22, 2024:

Name	Age	Offices and Experience
Mohammed G. Zerhouni	48	**SJW Group—Senior Vice President of Finance, Principal Accounting Officer.** Mr. Zerhouni serves as Senior Vice President of Finance, Principal Accounting Officer of SJW Group, SJWC, CTWS and TWC, since January 2023, and CWC and MWC, since January 2024. Prior to joining SJW Group, Mr. Zerhouni was the Chief Financial Officer of Veolia Utility Parent, Inc. ("VUP") from October 2022 to January 2023 which is part of the North American business of Veolia Group, a rate-regulated water and wastewater company. Previously, Mr. Zerhouni was Vice President/Controller and Chief Accounting Officer of VUP from December 2018 to September 2022. Mr. Zerhouni served in various roles of increasing responsibility up to Senior Manager in the audit practice of PricewaterhouseCoopers LLP from December 2004 to December 2018. Mr. Zerhouni is a certified public accountant.

Available Information

SJW Group's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and amendments to these reports, are made available free of charge through SJW Group's website at *http://www.sjwgroup.com*, as soon as reasonably practicable, after SJW Group electronically files such material with, or furnishes such materials to, the SEC. The content of SJW Group's website is not incorporated by reference to or part of this report.

You may obtain electronic copies of our reports filed with the SEC on the SEC website at *http://www.sec.gov*.

Item 1A. ***Risk Factors***

Investors should carefully consider the following risk factors and warnings before making an investment decision. The risks described below are not the only ones facing SJW Group and its subsidiaries. Additional risks that SJW Group and its subsidiaries does not yet know of or that it currently thinks are immaterial may also impair its business operations. If any of the following risks actually occur, SJW Group and its subsidiaries' business, operating results or financial condition could be materially affected. In such case, the trading price of SJW Group's common stock could decline and you may lose part or all of your investment. Investors should also refer to the other information set forth in this Annual Report on Form 10-K, including the consolidated financial statements and the notes thereto.

Risks Relating To Regulatory and Legal Matters

Our business is regulated and may be adversely affected by changes to the regulatory environment.

Our Water Utility Services represent the tariffed operations of our regulated utilities. Our operating revenue is generated primarily from the sale of water at rates authorized by applicable state public utility commissions (the "Regulators"). The Regulators set rates that are intended to provide revenues sufficient to recover normal operating expenses, provide funds for replacement of water infrastructure and produce a fair and reasonable return on stockholder common equity. Please refer to Part I, Item 1, "Regulation and Rates" for a discussion of the most recent regulatory proceedings affecting the rates of our regulated operations. Consequently, our revenue and operating results depend substantially upon the rates the Regulators authorize.

In our applications for rate approvals, we rely upon estimates and forecasts to propose rates for approval by the Regulators. No assurance can be given that our estimates and forecasts will be accurate or that the Regulators will agree with our estimates and forecasts and approve our proposed rates. To the extent our authorized rates may be too low, revenues may be insufficient to cover Water Utility Services' operating expenses, capital requirements and SJW Group's historical dividend rate. In addition, delays in approving rate increases may negatively affect our operating results and operating cash flows.

In addition, policies and regulations promulgated by the Regulators govern the recovery of capital expenditures, the treatment of gains from the sale of real utility property, the offset of production and operating costs, the recovery of the cost of debt, the optimal equity structure, and the financial and operational flexibility to engage in non-tariffed operations. If the regulators implement policies and regulations that will not allow Water Utility Services to accomplish some or all of the items listed above, its future operating results may be adversely affected. Furthermore, from time to time, the commissioners at the Regulators may change. Such changes could lead to changes in policies and regulations and there can be no assurance that the resulting changes in policies and regulation, if any, will not adversely affect our operating results or financial condition.

We have various regulatory mechanisms such as balancing and memorandum accounts and rate adjustment mechanisms for infrastructure replacement, to recover certain costs and expenses. If the Regulators disagree with our calculations of our balancing and memorandum accounts, we may be required to make adjustments that could adversely affect our results of

15

operations. Furthermore, there is no guarantee that the Regulators will approve our applications to recover all or a portion of our capital expenditure or infrastructure investment through such rate adjustment mechanisms, and their failure to do so will adversely affect our financial conditions and results of operations.

Recovery of regulatory assets is subject to adjustment by regulatory agencies and could impact the operating results of Water Utility Services.

Generally accepted accounting principles for water utilities include the recognition of regulatory assets and liabilities to reflect the actions of regulators as permitted by FASB ASC Topic 980—"Regulated Operations." These actions may result in the recognition of revenues and expenses in time periods that are different from non-rate-regulated enterprises. In accordance with ASC Topic 980, Water Utility Services record deferred costs on the balance sheet as regulatory assets when it is probable that these costs will be recovered in the ratemaking process. Also, Water Utility Services record regulatory liabilities for amounts expected to be refunded to customers in the ratemaking process and for amounts collected in advance of the related expenditures. Please refer to Note 3 of the "Notes to Consolidated Financial Statements" for a summary of regulatory assets and liabilities. If the assessment of the probability of recovery in the ratemaking process is incorrect and the applicable ratemaking body determines that a deferred cost is not recoverable through future rate increases, the regulatory assets would need to be adjusted, which could have an adverse effect on our results of operations and financial condition.

Water Utility Services is subject to litigation risks concerning water quality and contamination.

In October 2023, CWC, a subsidiary of SJW Group in our Water Utility Services segment, was named as a defendant in a class action lawsuit alleging that the water provided by CWC contained contaminants. CWC intends to vigorously defend itself in this lawsuit. There can be no guarantee that additional lawsuits will not occur in the future. Any environmental or product-related lawsuit, including the class action against CWC, may require us to incur significant legal costs and we may not be able to recover the legal costs from ratepayers or other third parties. Although Water Utility Services has liability insurance coverage for bodily injury and property damage, pollution liability is excluded from this coverage and our excess liability coverage. Pollution liability coverage is in place for the majority of the SJW Group locations and operations but is subject to exclusions and limitations. In addition, any complaints or lawsuits against us based on water quality and contamination may receive negative publicity that can damage our reputation and adversely affect our business and trading price of our common stock.

Water Utility Services is subject to possible litigation or regulatory enforcement action concerning water discharges to Waters of the United States ("WOTUS").

Regulatory actions and fines related to discharges of water to WOTUS against other water utilities have increased in frequency in recent years. If Water Utility Services is subject to a litigation or regulatory enforcement action, it might incur significant costs in fines and restoration efforts, and it is uncertain whether Water Utility Services would be able to recover some or all of such costs from ratepayers or other third parties. In addition, any litigation or regulatory enforcement action against us regarding a water discharge and/or resulting environmental impact may receive negative publicity that can damage our reputation and adversely affect our business and the trading price of our common stock.

Streamflow regulations in Connecticut could potentially impact our ability to serve our customers.

In December 2011, regulations concerning the flow of water in Connecticut's rivers and streams were adopted. As promulgated, the regulations require that certain downstream releases be made from seven of CWC's eighteen active reservoirs no later than ten years following the adoption of stream classifications by the Department of Energy and Environmental Protection ("DEEP"). Currently, downstream releases are made at two locations. The next streamflow releases will be initiated by October 2024 and will affect two additional reservoirs. No groundwater supply wells are affected by the regulations.

DEEP has finalized stream classifications in all areas of Connecticut where CWC maintains and operates sources of supply. The Company remains engaged in the process in order to minimize impact to our available water supply. Although modified from prior versions, the regulations still have the potential to lower our safe yield, raise our capital and operating expenses and adversely affect our revenues and earnings. Although costs associated with the regulations may be recovered in the form of higher rates and Connecticut law allows for a WICA surcharge to recover capital improvement costs necessary to achieve compliance with the regulations, there can be no assurance PURA would approve rate increases to enable us to recover all such costs and surcharges.

New or more stringent environmental regulations could increase Water Utility Services' operating costs and affect its business.

Water Utility Services is subject to water quality and pollution control regulations issued by the EPA and environmental laws and regulations administered by the respective states and local regulatory agencies.

16

New or more stringent environmental and water quality regulations could increase Water Utility Services' water quality compliance costs, hamper Water Utility Services' available water supplies, and increase future capital expenditures.

Under the federal Safe Drinking Water Act, Water Utility Services is subject to regulation by the EPA relating to the quality of water it sells and treatment techniques it uses to make the water potable. The EPA promulgates, from time to time, nationally applicable standards, including maximum contaminant levels for drinking water. Additional or more stringent requirements may be adopted by each state. There can be no assurance that Water Utility Services will be able to continue to comply with all water quality requirements.

Water Utility Services has implemented monitoring activities and installed specific water treatment improvements in order to comply with existing maximum contaminant levels and plan for compliance with future drinking water regulations. However, the EPA and the respective state agencies have continuing authority to issue additional regulations under the Safe Drinking Water Act. New or more stringent environmental standards could be imposed that will raise Water Utility Services' operating costs and capital expenditures, including requirements for increased monitoring, additional treatment of underground water supplies, fluoridation of all supplies, more stringent performance standards for treatment plants, additional procedures to further reduce levels of disinfection by-products, and more comprehensive measures to monitor, reduce or eliminate known or newly identified contaminants such as polyfluoroalkyl substances. There are currently limited regulatory mechanisms and procedures available to us for the recovery of such costs and there can be no assurance that such costs will be fully recovered and failure to do so may adversely affect our operating results.

The impact of climate change and climate change laws and regulations have been passed and are being proposed that require compliance with greenhouse gas emissions standards, as well as other climate change initiatives, which could increase Water Utility Services' operating costs and affect our business.

Climate change is receiving ever increasing attention worldwide. Many scientists, legislators, and others attribute global warming to increased levels of greenhouse gases, including carbon dioxide. Climate change laws and regulations enacted and proposed limit greenhouse gases emissions from covered entities and require additional monitoring/reporting. We produce a corporate sustainability report, which provides an overview of our energy usage and greenhouse emissions. At this time, the existing greenhouse gases laws and regulations are not expected to materially harm Water Utility Services' operations or capital expenditures. While regulation on climate change could change, the uncertainty of future climate change regulatory requirements still remains. We cannot predict the potential impact of future laws and regulations on our business, financial condition, or results of operations. Although these future expenditures and costs for regulatory compliance may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that govern our business would approve rate increases to enable us to recover such expenditures and costs.

Climate change may also impact water supply. For example, severity of drought conditions may impact the availability of water to all Water Utility Services and rising sea levels and their effect on contributing tributary's water quality may impact the availability of groundwater to Water Utility Services.

We may be at risk for litigation under the principle of inverse condemnation for activities in the normal course of business that have a damaging effect on private property.

Under the California legal doctrine of inverse condemnation, a public utility taking or damaging private property can be responsible to the property owners for compensation, even when damage occurs through no fault or negligence of the utility company and regardless of whether the damage could be foreseen. Based upon existing California case law, SJWC could be sued under the doctrine of inverse condemnation and held liable if its facilities, operations or property, such as mains, fire hydrants, power lines and other equipment, or wildfires in our Santa Cruz Mountain watershed result in damage to private property.

A court finding of inverse condemnation does not obligate the CPUC to allow SJWC to recover damage awards or pass on costs to ratepayers. Insurance coverage for inverse condemnation may not be available or may not be sufficient. SJWC's liquidity, earnings, and operations may be adversely affected if we are unable to recover the costs of paying claims for damages caused by the operation and maintenance of our property from customers or through insurance.

Our water utility property and systems are subject to condemnation and other proceedings through eminent domain.

State laws in jurisdictions where we operate, including California, Connecticut, Texas and Maine, allow municipalities, water districts and other public agencies to own and operate water systems. If these public agencies are able to establish certain eminent domain elements required under state and federal laws, they may condemn water systems or real property owned by privately owned public utilities in certain circumstances. In general, if a public agency seeks to exercise its eminent domain power to take possession of private property, it must establish that such taking is for a public purpose and must pay just

compensation to owners of such property. In the event of eminent domain or condemnation proceedings against our water utility property or systems, we may incur substantial attorney's fees, consultant and expert fees and other costs in considering a challenge to such proceeding and/or its valuation for just compensation, as well as fees and costs in any subsequent litigation if necessary. If the public agency prevailed and acquired our utility property, we would no longer have access to the condemned property or water system, neither would we be entitled to any portion of revenue generated from the use of such asset going forward. Furthermore, if public agencies succeed in acquiring our assets, there is a risk that we will not receive adequate compensation for the assets taken or be able to recover all charges associated with the condemnation of such assets, which may adversely affect our business operations and financial conditions.

Regulatory agencies may disagree with our valuation and characterization of certain of our assets.

If we determine that assets are no longer used or useful for utility operations, we may remove them from our rate base and subsequently sell those assets with any gain on sales accruing to the stockholders, subject to certain conditions. If the regulators disagree with our characterization, there is a risk that the regulators could determine that a portion or all of the realized appreciation in property value should be awarded to customers rather than our stockholders.

Risks Relating To Business Operations

The adequacy of our water supplies depends upon a variety of factors beyond our control. Interruption in the water supply may adversely affect our reputation and earnings.

We depend on an adequate water supply to meet the present and future needs of our customers. Whether we have an adequate supply varies depending upon a variety of factors, many of which are partially or completely beyond our control, including: the amount of rainfall; the amount of water stored in reservoirs; underground water supply from which well water is pumped; availability from water wholesalers; changes in the amount of water used by our customers; water quality and availability of appropriate treatment technology; legal limitations on water use such as rationing restrictions during a drought; changes in prevailing weather patterns and climate; and population growth.

We purchase our water supply from various governmental agencies and others. Water supply availability may be affected by weather conditions, funding and other political and environmental considerations. In addition, our ability to use surface water is subject to regulations regarding water quality and volume limitations. If new regulations are imposed or existing regulations are changed or given new interpretations, the availability of surface water may be materially reduced. A reduction in surface water could result in the need to procure more costly water from other sources, thereby increasing our water production costs and adversely affecting our operating results if not recovered in rates on a timely basis. From time to time, we enter into water supply agreements with third parties and our business is dependent upon such agreements in order to meet regional demand. The parties from whom we purchase water maintain significant infrastructure and systems to deliver water to us. Maintenance of these facilities is beyond our control. If these facilities are not adequately maintained or if these parties otherwise default on their obligations to supply water to us, we may not have adequate water supplies to meet our customers' needs.

If we are unable to access adequate water supplies, we may be unable to satisfy all customer demand, which could result in rationing. Rationing may have an adverse effect on cash flow from operations. We can make no guarantee that we will always have access to an adequate supply of water that will meet all required quality standards. Water shortages may affect us in a variety of ways. For example, shortages could: adversely affect our supply mix by causing us to rely on more expensive purchased water; adversely affect operating costs; increase the risk of contamination to our systems due to our inability to maintain sufficient pressure; and increase capital expenditures for building pipelines to connect to alternative sources of supply, new wells to replace those that are no longer in service or are otherwise inadequate to meet the needs of our customers and reservoirs and other facilities to conserve or reclaim water. We may or may not be able to recover increased operating and construction costs on a timely basis, or at all, for our regulated systems through the ratemaking process. We can give no assurance, as to whether we may be able to recover certain of these costs from third parties that may be responsible, or potentially responsible, for any groundwater contamination.

We face competition from other utilities and service providers which might hinder our growth opportunities and mitigate our future profitability.

We face competition from other utilities and service providers which might hinder our growth opportunities and mitigate our future profitability. We face risks of competition from other utilities or other entities authorized by federal, state or local agencies to expand rate-regulated or contracted utility services. Once a state utility regulator grants a franchise to a public utility to serve a specific territory, that utility effectively has an exclusive right to service that territory. Although a new franchise offers some protection against competitors, the pursuit of franchises is often competitive, where new franchises may be awarded to utilities based upon competitive negotiation. Competing entities have challenged, and may challenge in the future, our applications for new franchises.

Fluctuations in customer demand for water due to seasonality, restrictions of use, weather, and lifestyle can adversely affect operating results.

Water Utility Services is seasonal, thus quarterly fluctuation in results of operations may be significant. Rainfall and other weather conditions also affect Water Utility Services. Water consumption typically increases during the third quarter of each year when weather tends to be warm and dry. In periods of drought, if customers are encouraged or required to conserve water due to a shortage of water supply or restriction of use, revenue tends to be lower. Similarly, in unusually wet periods, water supply tends to be higher and customer demand tends to be lower, again resulting in lower revenues. Furthermore, certain lifestyle choices made by customers can affect demand for water. For example, a significant portion of residential water use is for outside irrigation of lawns and landscaping. If there is a decreased desire by customers to maintain landscaping for their homes or restrictions are placed on outside irrigation, residential water demand would decrease, which would result in lower revenues.

Conservation efforts and construction codes, which require the use of low-flow plumbing fixtures and appliances, could diminish water consumption and result in reduced revenue. In addition, in time of drought, such as in the drought experienced in California in 2021 to early 2023, mandatory water conservation may become a regulatory requirement that impacts the water usage of our customers. While the impacts of conservation and drought may be mitigated by certain regulatory mechanisms that may apply, such regulatory mechanisms are subject to review and change by the Regulators. Accordingly, there could be no assurance that such regulatory mechanisms will offset the effects of any revenue losses or other adverse impacts to our operating results attributable to these fluctuations in customer demand.

A contamination event or other decline in source water quality could affect the water supply of Water Utility Services and therefore adversely affect our business and operating results.

Water Utility Services is required under drinking water regulations to comply with water quality requirements. Through water quality compliance programs, Water Utility Services monitors for contamination and pollution of its sources of water. In addition, a watershed management program provides a proactive approach to minimize potential contamination activities. There can be no assurance that Water Utility Services will continue to comply fully with all applicable water quality requirements or detect contamination timely or at all. In addition, our facilities and infrastructure, including water towers, reservoirs and wells, may be subject to vandalism, break-ins or attacks, which may cause contamination or damage to our water supply. While we have taken measures to maintain physical security of our facilities, there is no guarantee that such measures will be effective to prevent such events. In the event a contamination is detected, Water Utility Services must either commence treatment to remove the contaminant or procure water from an alternative source. Either of these results may be costly, may increase future capital expenditures and there can be no assurance that the regulators would approve a rate increase to enable us to recover the costs arising from such remedies. In addition, we could be held liable for consequences arising from hazardous substances or contamination in our water supplies or other environmental damages and our reputation may be harmed by the public disclosures or media reports of these events. Our insurance policies may not cover or may not be sufficient to cover the costs of these claims.

Operating under contract water and waste systems subject us to risks.

Water Utility Services operates a number of water and wastewater systems under operation and maintenance contracts. Pursuant to these contracts, such systems are operated according to the standards set forth in the applicable contract, and it is generally the responsibility of the owner of the system to undertake capital improvements over which we may not have control. We may not be able to convince the owner to make needed improvements in order to maintain compliance with applicable regulations. Although violations and fines incurred by water and wastewater systems may be the responsibility of the owner of the system under these contracts, such non-compliance events may reflect poorly on us as the operator of the system and harm our reputation, and in some cases, may result in liability to the same extent as if we were the owner.

The necessity for ongoing physical and technological security has resulted, and may continue to result, in increased operating costs.

The necessity for ongoing physical and technological security has resulted, and may continue to result, in increased operating costs. Because of physical and technological threats to the health and security of the United States of America, we employ procedures to review and modify security measures. We provide ongoing training and communications to our employees about threats to our water supply, our assets and related systems and our employees' personal safety. We have incurred, and will continue to incur, costs for security measures in efforts to protect against such risks.

Water Utility Services rely on information technology and systems that are key to business operations. A system malfunction, security breach, cyber-attacks, or other disruption that compromises our information could expose us to liability and adversely affect business operations. In addition, noncompliance could expose us to liability and adversely affect business operations.

Information technology is key to the operation of the Water Utility Services, including but not limited to payroll, general ledger activities, outsourced bill preparation and remittance processing, providing customer service and the use of Supervisory Control and Data Acquisition systems to operate our distribution system. Among other things, system malfunctions, computer viruses and security breaches could prevent us from operating or monitoring our facilities, billing, and collecting cash accurately and timely analysis and reporting of financial results. In addition, we collect, process, and store sensitive data from our customers and employees, including personally identifiable information, on our networks. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance, or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed without our authorization, publicly disclosed, lost, or stolen which could result in legal claims or proceedings, violation of privacy laws or damage to our reputation and customer relationships. Our profitability and cash flow could be affected negatively in the event these systems do not operate effectively or are breached. Further, the use of AI by cybercriminals may increase the frequency and severity of cybersecurity attacks, including against us or our third-party vendors. In addition, we may not be able to develop or acquire information technology that is competitive and responsive to the needs of our business, and we may lack sufficient resources to make the necessary upgrades or replacements of our outdated existing technology to allow us to continue to operate at our current level of efficiency.

In addition, we must comply with privacy laws such as The California Consumer Privacy Act, as amended by the California Privacy Rights Act (collectively, the "CCPA"). The CCPA requires, among other things, covered companies to provide enhanced disclosures to California consumers and to afford such consumers certain privacy rights and consumer protections. The CCPA also establishes statutory damages for victims of data security breaches, and provides additional rights for consumers to obtain their data from any business that has their personally identifying information. We are anticipating updated and finalized implementing regulations under the CCPA that may impact our compliance obligations. We are also subject to Connecticut's Act Concerning Personal Data Privacy and Online Monitoring, a similar law that took effect July 1, 2023, and will be subject to Texas Data Privacy and Security Act, a consumer privacy law that will be effective July 1, 2024. Moreover, additional state privacy laws have been passed or may be passed in the future, and they may have potential compliance obligations that impact our operations depending on whether we fall under their scope. The effects of these laws have been significant, requiring us to modify our data processing practices and policies and to incur costs and expenses for compliance. Despite our efforts to comply with these laws, we may fail to do so, which may lead to investigations, claims, and proceedings by governmental entities and private parties, damages for breach, and cause us to incur other significant costs, penalties, and other liabilities, as well as harm to our reputation.

A failure of our reservoirs, storage tanks, mains or distribution networks could result in losses and damages that may adversely affect our financial condition and reputation.

We distribute water through an extensive network of mains and store water in reservoirs and storage tanks located across our service areas. The Water Utility Services' distribution systems were constructed during the period from the early 1900's through today. A failure of major mains, reservoirs, or tanks could result in injuries and damage to residential and/or commercial property for which we may be responsible, in whole or in part. The failure of major mains, reservoirs or tanks may also result in the need to shut down some facilities or parts of our water distribution network in order to conduct repairs. Such failures and shutdowns may limit our ability to supply water in sufficient quantities to our customers and to meet the water delivery requirements prescribed by governmental regulators, which could adversely affect our financial condition, results of operations, cash flow, liquidity and reputation. We also own and operate numerous dams in California, Connecticut and Maine, and a failure of such dams could result in losses and damages that may adversely affect our financial condition and reputation. Any business interruption or other losses might not be covered by existing insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance in the future at acceptable rates. Our insurance policies may not cover or may not be sufficient to cover the costs of these claims.

The operations of our water and wastewater treatment plants involve physical, chemical, and biological processes and the use of pumps, generators, and other industrial equipment. As a result, our operations are subject to various industrial risks, including chemical spills, discharges or releases of toxic or hazardous substances or gases, effects resulting from confined operating spaces, fires, explosions, mechanical failures, storage tank leaks, and electric shock. These risks can result in personal injury, loss of life, catastrophic damage to or destruction of property and equipment or environmental damage, and related legal proceedings, including those commenced by regulators, neighbors, or others. They may also result in an unanticipated interruption or suspension of our operations and the imposition of liability. The loss or shutdown over an extended period of

operations at any of our treatment facilities or any losses relating to these risks could have a material adverse impact on our profitability, results of operations, liquidity, and cash flows.

Our business and financial performance may be adversely affected by high inflation.

Inflation has the potential to adversely affect our liquidity, business, financial condition and results of operations by increasing our overall cost structure, particularly if we are unable to achieve increases in the rates we charge our customers. There is no guarantee that any future rate increase requests will be approved and granted in a timely manner and/or will be sufficient to cover costs for the impact of high inflation. The existence of inflation in the economy has resulted in, and may continue to result in, higher interest rates and capital costs, shipping costs, supply shortages, increased costs of labor and other similar effects. As a result of inflation, we have experienced and may continue to experience, cost increases. Although we may take measures to mitigate the impact of this inflation, if these measures are not effective, our business, financial condition, results of operations and liquidity could be materially adversely affected. Even if such measures are effective, there could be a difference between the timing of when these beneficial actions impact our results of operations and when the cost of inflation is incurred.

SJW Land Company and Chester Realty, Inc. have real estate holdings that are subject to various business and investment risks.

SJW Land Company owns real estate in California and Tennessee, and Chester Realty, Inc. owns real estate in Connecticut. The risks of investing directly in real estate vary depending on the investment strategy and investment objective and include the following:

- Market and general economic risks—real estate investment is tied to overall domestic economic growth and, therefore, carries market risk which cannot be eliminated by diversification. Generally, all property types benefit from national economic growth, though the benefits range according to local factors, such as local supply and demand and job creation. Because real estate leases are typically staggered and last for multiple years, there is generally a delayed effect in the performance of real estate in relation to the overall economy. This delayed effect can insulate or deteriorate the financial impact to SJW Land Company and Chester Realty, Inc. in a downturn or an improved economic environment.
- Vacancy rates can climb and market rents can be impacted and weakened by general economic forces, therefore affecting income to SJW Land Company and Chester Realty, Inc.
- A decrease in the value of a real estate property or increase in vacancy could result in reduced future cash flows to amounts below the property's current carrying value and could result in an impairment charge.

The value of real estate can decrease materially due to a deflationary market, decline in rental income, market cycle of supply and demand, long lag time in real estate development, legislative and governmental actions, environmental concerns, increases in rates of returns demanded by investors, and fluctuation of interest rates, eroding any unrealized capital appreciation and, potentially, invested capital.

The success of SJW Land Company and Chester Realty, Inc.'s real estate investment strategy depend largely on ongoing local, state and federal land use development activities and regulations, future economic conditions, the development and fluctuations in the sale of the undeveloped properties, the ability to identify the developer/potential buyer of the available-for-sale real estate, the timing of the transaction, favorable tax law, and the ability to maintain and manage portfolio properties. There is no guarantee that we will be able to execute the strategy successfully and failure to do so may adversely affect our operating results and financial condition.

Work stoppages and other labor relations matters could adversely affect our business and operating results.

As of December 31, 2023, 240 of our 808 total employees were union members. Most of our unionized employees are represented by the UWUA, except certain employees in the engineering department who are represented by the OE. Only employees at SJWC are union members. The current three-year bargaining agreements will expire on December 31, 2025.

We may experience difficulties and delays in the collective bargaining process to reach suitable agreements with union employees, particularly in light of increasing healthcare and pension costs. In addition, changes in applicable law and regulations could have an adverse effect on management's negotiating position with the unions. Labor actions, work stoppages or the threat of work stoppages, and our failure to obtain favorable labor contract terms during future negotiations may adversely affect our business, financial condition, results of operations, cash flows and liquidity.

If we fail to maintain safe work sites, we can be exposed to not only people impacts but also to financial losses such as penalties and other liabilities.

Our safety record is critical to our reputation because our business operation involves inherently dangerous activities. We maintain health and safety standards to protect our employees, customers, vendors and the public. Although we intend to adhere to such health and safety standards and aim for zero injuries, it is difficult to avoid accidents at all times.

Our business sites, including construction and maintenance sites, often place our employees and others in close proximity with large pieces of heavy equipment, moving vehicles, pressurized water, underground trenches and vaults, chemicals and other regulated materials. On many sites we are responsible for safety and, accordingly, must implement safety procedures. If we fail to implement such procedures or if the procedures we implement are ineffective or are not followed by our employees or others, or if accidents occur outside of our control, our employees and others may be injured or die. Unsafe work sites also have the potential to increase employee turnover and raise our operating costs. Any of the foregoing could result in financial losses, which could have a material adverse impact on our business, financial condition, results of operations and cash flows.

In addition, our operations can involve the handling and storage of hazardous chemicals, which, if improperly handled, stored or disposed of, could subject us to penalties or other liabilities. We are also subject to regulations dealing with occupational health and safety. Although we maintain functional employee groups whose primary purpose is to ensure we implement effective health, safety, and environment work procedures throughout our organization, including construction sites and maintenance sites, the failure to comply with such regulations or procedures could subject us to a liability.

Risks Relating To Our Finances and Corporate Matters

We may not have sufficient cash flow or capital resources to fund capital expenditures of our business, and our access to liquidity through the capital markets may be limited.

Our business is capital-intensive. Expenditure levels for renewal and modernization of the system will grow at an increasing rate as components reach the end of their useful lives. SJW Group's subsidiaries fund capital expenditures through a variety of sources, including cash received from operations, funds received from developers as contributions or advances, borrowings through lines of credit and debt financings, as well as equity financings by SJW Group. We cannot provide any assurance that the historical sources of funds for capital expenditures will continue to be adequate or that the cost of funds will remain at levels permitting us to earn a reasonable rate of return. A significant change in any of the funding sources could impair the ability of Water Utility Services to fund its capital expenditures, which could impact our ability to grow our utility asset base and earnings. Any increase in the cost of capital through higher interest rates or otherwise could adversely affect our results of operations.

Our ability to raise capital through equity or debt may be affected by the economy and condition of the debt and equity markets. Disruptions in the capital and credit markets or deterioration in the strength of financial institutions could adversely affect SJW Group's ability to draw on its lines of credit, issue long-term debt or sell its equity. In addition, government policies, the state of the credit markets and other factors could result in increased interest rates, which would increase SJW Group's cost of capital. Furthermore, equity financings may result in dilution to our existing stockholders and debt financings may contain covenants that restrict the actions of SJW Group and its subsidiaries.

We have incurred substantial additional indebtedness that may reduce our business and operational flexibility and increase our borrowing costs.

We have incurred substantial indebtedness resulting in higher debt-to-equity ratio, which may have the effect, among other things, of: reducing our flexibility to respond to changing business, industry and economic conditions; increasing borrowing costs; placing us at a competitive disadvantage relative to other companies in our industry with less debt; potentially having an adverse effect on our issuer and issue ratings; requiring additional cash flow to be used to service debt instead of for other purposes; and potentially impairing our ability to obtain other financing.

In addition, the terms and conditions of such indebtedness, including financial covenants and restrictive covenants, may reduce our business flexibility and adversely affect our business, financial condition, results of operations and prospects. The agreements governing the indebtedness contain covenants that impose significant operating and financial limitations and restrictions on us, including restrictions on the ability to enter particular transactions and engage in other activities that we may believe will be advisable or necessary for our business. In addition, failure to comply with any of the covenants in our existing or future debt agreements could result in a default under those agreements and under other existing agreements containing cross-default provisions. A default would permit lenders to accelerate the maturity of indebtedness under these agreements. Under certain circumstances, we may not have sufficient funds or other resources to satisfy all of our obligations under our indebtedness, including principal and interest payments, which, if not cured, may cause an event of default.

22

Our senior note borrowings include certain financial covenants regarding a maximum debt to equity ratio and an interest coverage requirement. In the event the relevant borrower exceeds the maximum debt to equity ratio or interest coverage requirement, we may be restricted from issuing future debt. In addition, we have issued certain revenue bonds that contain affirmative and negative covenants customary for a loan agreement relating to revenue bonds, including, among other things, certain disclosure obligations, the tax exempt status of the interest on the bonds, and limitations and prohibitions on the transfer of projects funded by the loan proceeds and assignment of the loan agreement.

Certain subsidiaries are required to comply with certain covenants in connection with their various long term loan agreements. These covenants include requirements to maintain a consolidated debt to capitalization ratio and restrictions on cash dividends paid based on restricted net assets. In the event that we violate any of these covenants, an event of default may occur and all amounts due under such loans, senior notes or bonds may come due, which would have an adverse effect on our business operations and financial conditions.

SJW Group has committed to certain "ring-fencing" measures which will enhance CTWS's separateness from SJW Group, which may limit SJW Group's ability to influence the management and policies of CTWS (beyond the limitations included in other existing governance mechanisms).

Pursuant to the agreements related to the acquisition of CTWS and commitments made by SJW Group as part of the application for PURA and MPUC approval of the acquisition of CTWS, SJW Group has instituted certain "ring-fencing" measures to enhance CTWS's separateness from SJW Group and to mitigate the risk that CTWS would be negatively impacted in the event of a bankruptcy or other adverse financial developments affecting SJW Group or its non-ring-fenced affiliates. These commitments became effective upon the closing of the acquisition.

In order to satisfy the ring-fencing commitments, SJW Group formed SJWNE LLC a wholly owned special purpose entity ("SPE") to own the capital stock of CTWS. The SPE, CTWS and its subsidiaries (collectively, the "CTWS Entities") adopted certain measures designed to enhance their separateness from SJW Group, with the intention of mitigating the effects on the CTWS Entities of any bankruptcy of SJW Group and its affiliates other than the CTWS Entities (collectively, the "Non-CTWS Entities"). As a result of these ring-fencing measures, in certain situations, SJW Group will be restricted in its ability to access assets of the CTWS Entities as dividends or intercompany loans to satisfy the debt or contractual obligations of any Non-CTWS Entity, including any indebtedness or other contractual obligations of SJW Group. In addition, the ring-fencing structure may negatively impact SJW Group's ability to achieve certain benefits, including synergies and economies of scale to reduce operating costs of the combined entity, that it anticipates will result from the merger. This ring-fencing structure also subjects SJW Group and the CTWS Entities to certain governance, operational and financial restrictions since the closing of the merger. Accordingly, SJW Group may be restricted in its ability to direct the management, policies and operations of the CTWS Entities, including the deployment or disposition of their respective assets, declarations of dividends, strategic planning and other important corporate issues. Furthermore, the CTWS Entities' directors have considerable autonomy and, as described in our commitments, have a duty to act in the best interest of the CTWS Entities consistent with the ring-fencing structure and applicable law, which may be contrary to SJW Group's best interests or be in opposition to SJW Group's preferred strategic direction for the CTWS Entities. To the extent they take actions that are not in SJW Group's interests, our financial condition, results of operations and prospects may be materially adversely affected.

Our business strategy, which includes acquiring water systems and expanding non-tariffed services, will expose us to new risks which could have a material adverse effect on our business.

Our business strategy focuses on the following:

(1) Regional regulated water utility operations (includes water and wastewater);

(2) Regional non-tariffed water utility related services provided in accordance with the guidelines established by the applicable state public utility commissions; and

(3) Out-of-region water and utility related services.

As part of our pursuit of the above three strategic areas, we consider from time-to-time opportunities to acquire businesses and assets. However, we cannot be certain we will be successful in identifying and consummating any strategic business combination or acquisitions relating to such opportunities. In addition, the execution of our business strategy will expose us to different risks than those associated with the current utility operations. We expect to incur costs in connection with the execution of this strategy and any integration of an acquired business could involve significant costs, the assumption of certain known and unknown liabilities related to the acquired assets, the diversion of management's time and resources, the potential for a negative impact on SJW Group's financial position and operating results, entering markets in which SJW Group has no or limited direct prior experience and the potential loss of key employees of any acquired company. Any strategic combination or

acquisition we decide to undertake may also impact our ability to finance our business, affect our compliance with regulatory requirements, and impose additional burdens on our operations. Any businesses we acquire may not achieve sales, customer growth and projected profitability that would justify the investment. Any difficulties we encounter in the integration process, including the integration of controls necessary for internal control and financial reporting, could interfere with our operations, reduce our operating margins and adversely affect our internal controls. SJW Group cannot be certain that any transaction will be successful or that it will not materially harm operating results or our financial condition.

Adverse investment returns and other factors may increase our pension costs and pension plan funding requirements.

A substantial number of our employees are covered by defined benefit pension plans. Our pension costs and the funded status of the plans are affected by a number of factors including the discount rate, applicable mortality tables, mortality rates of plan participants, investment returns on plan assets, and pension reform legislation. Any change in such factors could result in an increase in future pension costs and an increase in our pension liabilities, requiring an increase in plan contributions which may adversely affect our financial conditions and results of operations.

SJW Group's dividend policy is subject to the discretion of our board of directors and may be limited by legal and contractual requirements.

We anticipate to continue to pay a regular quarterly dividend, though any such determination to pay dividends will be at the discretion of our board of directors and will be dependent on then-existing conditions, including our financial condition, earnings, legal requirements, including limitations under Delaware law, restrictions in our credit agreements and other debt instruments that limit our ability to pay dividends to stockholders and other factors the board of directors deems relevant. The board of directors of SJW Group may, in its sole discretion, change the amount or frequency of dividends or discontinue the payment of dividends entirely. In addition, our subsidiaries may be subject to restrictions on their ability to pay dividends to us, including under state law, pursuant to regulatory commitments and under their credit agreements and other debt instruments. In this regard, the CTWS Entities are limited from paying dividends to us in certain circumstances under PURA and MPUC regulatory commitments. Any inability of our subsidiaries to pay us dividends may have a material and adverse effect on our ability to pay dividends to our stockholders.

Our charter documents and Delaware law could prevent a takeover that stockholders consider favorable and could also make it more difficult for stockholders to influence our policies or may reduce the rights of stockholders.

SJW Group's Certificate of Incorporation and Bylaws contain provisions that could delay or prevent a change in control of SJW Group. These provisions could also make it more difficult for our stockholders to elect directors and take other corporate actions. These provisions include, but are not limited to, the following:

- Authorizing Board of Directors to issue "blank check" preferred stock;
- Prohibiting cumulative voting in the election of directors;
- Limiting the ability of stockholders to call a special meeting of stockholders to only stockholders holding not less than 20% of outstanding voting power; and
- Requiring advance notification of stockholder nomination of directors and proposals.

These provisions may frustrate or prevent any attempts by stockholders of SJW Group to replace or remove its current management by making it more difficult for stockholders to replace members of the Board of Directors, which is responsible for appointing the members of management. In addition, the provisions of Section 203 of the Delaware General Corporate Law ("DGCL") govern SJW Group. These provisions may prohibit large stockholders, in particular those owning 15% or more of our outstanding voting stock, from merging or combining with us for a certain period of time without the consent of the Board of Directors.

Furthermore, SJW Group's Certificate of Incorporation provides that a state or federal court located within Delaware is the sole and exclusive forum (unless the company consents in writing to the selection of an alternate forum) for (i) any derivative action or proceeding brought on behalf of SJW Group, (ii) any action asserting a claim of breach of a fiduciary duty owed by any director, officer or other employee of SJW Group to the company or its stockholders, (iii) any action asserting a claim arising pursuant to any provision of the DGCL, or (iv) any action asserting a claim governed by the internal affairs doctrine. Such "exclusive forum" provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with SJW Group or its directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and other employees.

We may not be able to maintain adequate insurance coverage at reasonable costs, or at all, to cover all losses incurred in our operations.

We maintain insurance coverage as part of our overall legal and risk management strategy to minimize potential liabilities arising from our operations. Our insurance programs have varying coverage limits, deductibles, exclusions and maximums, and our insurance coverages include: worker's compensation, employer's liability, damage to our property, general liability, pollution liability, cybersecurity, and automobile liability. Each policy includes either deductibles or self-insured retentions and policy limits for covered claims. As a result, we may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured. The insurance companies may also seek to challenge, reduce or deny any claims we submit, which may prevent us from recovering fully the losses we incurred. In addition, insurance companies may increase premiums or deductibles or reduce coverage limits based on factors that are beyond our control, including industry trends, financial conditions of insurance companies and catastrophic events such as wildfire, earthquake and pandemic. There can be no assurance that we can secure all necessary or appropriate insurance in the future, or that such insurance can be obtain at reasonable cost, or at all.

General Risk Factors

We operate in areas subject to natural disasters, and we may be the target of terrorist activities and other physical threats.

We operate in areas that are prone to earthquakes, fires, floods, extreme weather and other natural disasters. A significant seismic event in northern California, where the majority of our operations are concentrated, or other natural disaster in northern California, Connecticut, Texas or Maine could adversely impact our ability to deliver water to our customers and our costs of operations. A major disaster could damage or destroy our capital assets, harm our reputations and adversely affect our results of operations. The Regulators have historically allowed utilities to establish catastrophic event memorandum accounts as a possible mechanism to recover costs, such as the CEMA memorandum account in California. However, we can give no assurance that our regulators, or any other commission would allow any such cost recovery mechanism in the future.

In light of the potential threats to the nation's health and security due to terrorist attacks, we have taken steps to increase security measures at our facilities and heighten employee awareness of threats to our water supply. We have also tightened our security measures regarding the delivery and handling of certain chemicals used in our business. In addition, because our operation requires us to interact extensively with the general public, we may be subject to complaints, threats and potentially violent actions by our customers or the public, which may disrupt our business activities and damage our reputation.

We have and will continue to bear increased costs for security precautions to protect our facilities, operations and supplies. These costs may be significant. While some of these costs are likely to be recovered in the form of higher rates, there can be no assurance that the Regulators will approve a rate increase to recover all or part of such costs and, as a result, our operating results and business may be adversely affected. Further, despite these tightened security measures, we may not be in a position to control the outcome of terrorist events should they occur.

Our operations, liquidity, and earnings may be adversely affected by wildfires and risk of fire hazards.

It is possible that wildfires and other fire hazards may occur more frequently, be of longer duration or impact larger areas as a result of drought-damaged plants and trees, lower humidity or higher winds that might be occurring as result of changed weather patterns. The effects of these natural disasters in California's drought-prone areas, such as the Santa Cruz Mountains, the watershed of which SJWC owns approximately 6,400 acres and where SJWC typically obtains approximately up to 10% of its water supply, may temporarily compromise its surface water supply resulting in disruption in our services and litigation which could adversely affect our business, operating results, and financial condition.

If our surface water supply is compromised, we may have to interrupt the use of that water supply until we are able to substitute the flow of water from an alternative water source.

In addition, we may incur significant costs in order to treat the impacted source through expansion of our current treatment facilities, or development of new treatment methods. If we are unable to substitute water supply from an alternative water source, or to adequately treat the impacted water source in a cost-effective manner, there may be an adverse effect on our revenues, operating results, and financial condition. The costs we incur to secure an alternative water source or an increase in draws from our underground water system could be significant and may not be recoverable in rates.

Wildfires may destroy or cause damage to properties, facilities, equipment and other assets owned and operated by SJWC or result in personal injuries to our employees and personnel, which may cause temporary or permanent disruption to our water services. In such a case, we may be required to incur significant expenses to repair, replace or upgrade our assets, or to defend

25

against costly litigation or disputes with third parties, any of which may adversely affect our business operations or financial conditions.

While we maintain a business insurance policy, such policy includes limitation and retention that may reduce, or in some cases eliminate, our ability to recover all or a substantial portion of the losses and damages due to wildfire. Our inability to rely fully on insurance coverage may negatively impact our results of operations. Losses by insurance companies resulting from wildfires in California may also cause insurance coverage for wildfire risks to become more expensive or unavailable under reasonable terms, and our insurance may be inadequate to recover all our losses incurred in a wildfire. Furthermore, we might not be allowed to recover in our rates any increased costs of wildfire insurance or the costs of any uninsured wildfire losses.

The price of our common stock may be volatile and may be affected by market conditions beyond our control.

The trading price of our common stock may fluctuate in the future based on a variety of factors, many of which are beyond our control and unrelated to our financial results. Factors that could cause fluctuations in the trading price of our common stock include volatility of the general stock market or the utility index, regulatory developments, public announcement of material development in strategic transactions, general economic conditions and trends, actual or anticipated changes or fluctuations in our results of operations, actual or anticipated changes in the expectations of investors or securities analysts, actual or anticipated developments in our competitors' businesses or the competitive landscape generally, litigation involving us or our industry, and major catastrophic event(s) or sales of large blocks of our stock. Furthermore, we believe that stockholders invest in public stocks in part because they seek reliable dividend payments. If there is an oversupply of stock of public utilities in the market relative to demand by such investors, the trading price of our common stock may decrease. Additionally, if interest rates rise above the dividend yield offered by our common stock, demand for our stock and its trading price may also decrease.

We must continue to attract and retain qualified technical and managerial personnel in order to succeed.

Our future success depends substantially upon our ability to attract and retain highly skilled technical, operational and financial managers. There is a significant competition for such personnel in our industry. Our ability to recruit and retain qualified personnel depends on many factors, including but are not limited to, our ability to provide competitive compensation and benefit packages, availability of talents in our industry, general workforce trends and macroeconomic conditions. The loss of the services of any member of our management team or the inability to hire and retain experienced management personnel could have an adverse effect on our business, as our management team has knowledge of our industry and customers and would be difficult to replace. We believe we offer competitive compensation and benefits as well as conduct succession planning and provide opportunities for continued development, and we continually strive to recruit and train qualified personnel and retain key employees. There can be no assurance, however, that we will continue to be successful in attracting and retaining the personnel we require to grow and operate profitably.

Item 1B. ***Unresolved Staff Comments***

None.

Item 1C. ***Cybersecurity***

Cybersecurity Risk Management and Strategy

We have taken critical steps to ensure the security and protection of our computer systems and networks. Our processes for assessment, identification and management of material risks from cybersecurity threats include routine monitoring of vulnerabilities, evaluations of new service providers, written policies for incident identification and management, and regular testing and assessment of our cybersecurity posture.

We have integrated cybersecurity risk management as part of our company-wide culture. The measures undertaken include, but are not limited to, monthly cybersecurity training for all employees and frequent communication to all employees on the importance of cybersecurity measures.

We have engaged third-party experts to assist us in monitoring and managing our cybersecurity process. Furthermore, we monitor cybersecurity threats at certain of our third-party vendors on a regular basis. As of the date of this report, we are not aware of any material risks from cybersecurity threats that have materially affected or are reasonably likely to materially affect the company, including our business strategy, results of operations, or financial condition. We have discussed cybersecurity risks that may affect the company in Item 1A, "Risk Factors," under the headings, "The necessity for ongoing physical and technological security has resulted, and may continue to result, in increased operating costs," "Water Utility Services rely on information technology and systems that are key to business operations. A system malfunction, security breach, cyber-attacks or other disruption that compromises our information and expose us to liability and adversely affect business operations. In addition, noncompliance could expose us to liability and adversely

affect business operations," and "We may not be able to maintain adequate insurance coverage at reasonable costs, or at all, to cover all losses incurred in our operations."

Cybersecurity Governance

We have implemented an internal risk assessment process that focuses on the principal risks that have been identified for us, including risks associated with our regulatory environment, business operations and continuity, compliance requirements, information technology and data storage and retrieval facilities, cyber risk, insurance coverage. The Audit Committee, pursuant to its charter, meets at least quarterly with senior leadership and other employees to discuss identified risks and the measures taken to control, manage and mitigate those risks, which include cyber and information security risk. On the basis of these meetings and discussions regarding such risks, the Chairman of the Audit Committee reports periodically to the full Board. The Vice President, Information Security Officer provides cybersecurity updates to the Audit Committee and other members of our senior management as appropriate at least quarterly. Our Vice President, Information Security Officer, and his team is responsible for leading enterprise-wide cybersecurity strategy, policy, standards, architecture, and processes, with the support of third-party experts. The Vice President, Information Security Officer has over 30 years of experience in information technology of which over 20 years is in cybersecurity, with industry experience in utilities, banking and e-commerce.

Item 2. ***Properties***

The properties of SJWC consist of a unified water production system located in the County of Santa Clara in the State of California. In general, the property is comprised of franchise rights, water rights, necessary rights-of-way, approximately 6,400 acres of land held in fee (which is primarily non-developable watershed), impounding reservoirs with a capacity of approximately 2.3 billion gallons, 2,492 miles of transmission and distribution mains, distribution storage of approximately 0.20 billion gallons, wells, boosting facilities, diversions, surface water treatment plants, equipment, office buildings and other property necessary to provide water service to its customers.

SJWC maintains all of its properties in good operating condition in accordance with customary practice for a water utility. SJWC's groundwater pumping stations have a production capacity of approximately 0.26 billion gallons per day and the present capacity for taking purchased water is approximately 0.08 billion gallons per day. The surface water collection system has a physical delivery capacity of approximately 0.03 billion gallons per day. During 2023, a maximum and average of 0.13 billion gallons and 0.09 billion gallons of water per day, respectively, were delivered to the system.

The properties of CTWS consist of land, easements, rights (including water rights), buildings, reservoirs with a capacity of approximately 9.4 billion gallons, standpipes, dams, wells, supply lines, water treatment plants, pumping plants, 2,317 miles of transmission and distribution mains and other facilities and equipment used for the collection, purification, storage and distribution of water throughout Connecticut and Maine. In certain cases, CWC and MWC are or may be a party to limited contractual arrangements for the provision of water supply from neighboring utilities.

Sources of water supply owned, maintained and operated by CTWS include 25 surface water reservoirs and 108 well fields. In addition, CWC and MWC have agreements with various neighboring water utilities to provide water, at negotiated rates, to our water systems. Collectively, these sources have the capacity to deliver approximately 0.08 billion gallons of potable water daily to the 27 major operating systems. CTWS also owns, maintains and operates 50 small, non-interconnected satellite and consecutive water systems, that combined, have the ability to deliver about 3.5 million gallons of additional water per day to their respective systems. CTWS's 30 water treatment plants have a combined treatment capacity of approximately 0.05 billion gallons per day. In addition, CTWS owns and operates one wastewater treatment plant with a capacity of 780,000 gallons per day.

The properties of TWC consist of land, easements, rights (including water rights), buildings, reservoirs, standpipes, wells, supply lines, water treatment plants, pumping plants, 818 miles of transmission and distribution mains and other facilities and equipment used for the collection, purification, storage and distribution of water throughout its service area. TWC maintains a service area that covers approximately 271 square miles located in the southern region of the Texas hill country in Bandera, Blanco, Comal, Hays, Kendall, Medina and Travis counties. The majority of the service area surrounds an 8,200-surface acre reservoir, Canyon Lake. TWC production wells have the ability to pump a combined 5.8 billion gallons annually. TWC has contracts for 2 billion gallons of untreated surface water and 0.24 billion gallons of treated surface water from the GBRA annually, and 0.11 billion gallons of treated surface water from LCRA. TWC owns and operates three surface water treatment plants with a combined production capacity of 9 million gallons per day. TWC maintains 87 storage tanks with a total storage capacity of 0.02 billion gallons. TWC owns and operates four wastewater treatment plants with a combined capacity of 293,500 gallons per day. In August 2023, TWR acquired eight wells and the water rights of KT Water Resources LLC. These wells have been projected to yield an additional 2.0 billion gallons per year or more.

Water Utility Services hold all of its principal properties in fee simple, subject to current tax and assessment liens, rights-of-way, easements, and certain minor defects in title which do not materially affect their use. A substantial portion of treatment, storage and distribution properties owned by MWC are subject to liens of mortgage or indentures that secure bonds, notes and other evidences of long-term indebtedness.

As of December 31, 2023, SJW Land Company and Chester Realty, Inc. own approximately 101 acres of property in the State of California, 55 acres of property in the State of Tennessee and 23 acres of property in State of Connecticut.

The following table is a summary of SJW Land Company and Chester Realty, Inc. properties described previously:

				% for Year Ended December 31, 2023 of Real Estate Services	
Description	Location	Acreage	Square Footage	Revenue	Expense
Warehouse building	Knoxville, TN	30	361,500	52 %	47 %
Commercial building	Knoxville, TN	15	135,000	47 %	52 %
Undeveloped land and parking lot	Knoxville, TN	10	N/A	N/A	N/A
Undeveloped land	San Jose, CA	101	N/A	N/A	N/A
Commercial building	Clinton, CT	22	9,000	1 %	1 %
Commercial building	Guilford, CT	1	1,300	— %	— %

Item 3. ***Legal Proceedings***

SJW Group and its subsidiaries are subject to ordinary routine litigation incidental to its business. In October 2023, The Connecticut Water Company, a subsidiary of SJW Group, was named as a defendant in a class action lawsuit alleging that the water provided by Connecticut Water contained contaminants. Connecticut Water intends to vigorously defend itself in this lawsuit. There are no pending legal proceedings to which SJW Group or any of its subsidiaries is a party, or to which any of its properties is the subject, that are expected to have a material effect on SJW Group's business, financial position, results of operations or cash flows.

Item 4. ***Mine Safety Disclosures***

None.

PART II

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

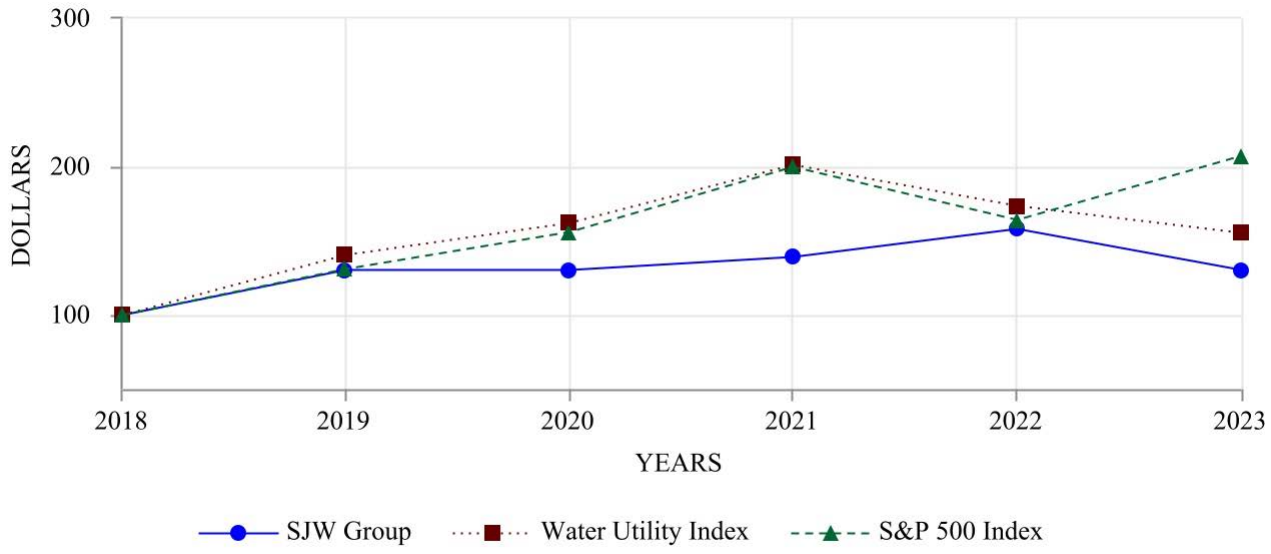
Market Information

SJW Group's common stock is traded on the New York Stock Exchange under the symbol "SJW." As of December 31, 2023, there were 271 record holders of SJW Group's common stock, excluding those shares held in street or nominee name.

Five-Year Performance Graph

The following performance graph compares the changes in the cumulative stockholder return on SJW Group's common stock with the cumulative total return on a Water Utility Index and the Standard & Poor's 500 Index during the last five years ended December 31, 2023. The comparison assumes $100 was invested on December 31, 2018 in SJW Group's common stock and in each of the foregoing indices and assumes reinvestment of dividends.

COMPARISON OF FIVE YEAR CUMULATIVE TOTAL RETURN
Among SJW Group, a Water Utility Index and the S&P 500 Index



The following descriptive data of the performance graph is supplied in accordance with Rule 304(d) of Regulation S-T (numbers represent U.S. dollars ($)):

	2018	2019	2020	2021	2022	2023
SJW Group	$ 100	130	130	139	158	130
Water Utility Index	$ 100	140	162	201	173	155
S&P 500 Index	$ 100	131	156	200	164	207

The Water Utility Index is the nine water company Water Utility Index (including CTWS up to the time of its merger with SJW Group) prepared by Wells Fargo Securities, LLC. The above performance graph and related information shall not be deemed "soliciting material" or to be "filed" with the SEC, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that the company specifically incorporates it by reference into such filing.

Item 6. **[Reserved]**

29

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations***
(Dollar amounts in thousands, except where otherwise noted)

The following discussion and analysis of our financial condition and results of operations should be read together with "Forward-Looking Statements," Part 1, Item 1 "Business," Part I, Item 1A "Risk Factors," and our consolidated financial statements and notes included under Item 8 of this Annual Report on Form 10-K. The following sections include a discussion of results for the year ended December 31, 2023 compared to the year ended December 31, 2022. The comparative results for the year ended December 31, 2022 with for the year ended December 31, 2021 generally have not been included in this Form 10-K but may be found in "Part II - Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" of the company's Annual Report on Form 10-K for the year ended December 31, 2022.

Business Strategy for Water Utility Services

SJW Group focuses its business initiatives in three strategic areas:

(1) Investing in regional regulated water utility operations to support the health, safety and quality of life of our customers;

(2) Regional non-tariffed water utility related services provided in accordance with the guidelines established by the applicable state public utility commissions; and

(3) Out-of-region water and utility related services.

Regional Regulated Activities

SJW Group's regulated utility operation is conducted through SJWC, CWC, TWC and MWC. SJW Group plans and applies a diligent and disciplined approach to maintaining and improving its water system infrastructures and also seeks to acquire regulated water systems adjacent to or near its existing service territory. CWC and TWC also provide regulated wastewater services.

The United States water utility industry is largely fragmented and is dominated by municipal-owned water systems. The water industry is regulated, and provides a life-sustaining product. This makes water utilities subject to lower business cycle risks than non-tariffed industries.

Regional Non-tariffed Activities

SJWC provides non-tariffed services, such as water system operations, maintenance agreements and antenna site leases under agreements with municipalities and other utilities. TWC provides non-tariffed wholesale water service to adjacent utilities and non-tariffed wastewater services. CTWS provides non-tariffed services, such as water system operations and maintenance under agreements with municipalities and other utilities. Additionally, CTWS offers *Linebacker©,* an optional service line protection program covering a limited amount of the cost of repairs for leaking or broken water and wastewater service lines and in-home plumbing to eligible residential customers in Connecticut and water service lines to eligible residential customers in Maine.

SJW Group also seeks appropriate non-tariffed business opportunities that complement its existing operations or that allow it to extend its core competencies beyond existing operations. SJW Group seeks opportunities to fully utilize its capabilities and existing capacity by providing services to other regional water systems, which also will benefit its existing regional customers.

Out-of-Region Opportunities

SJW Group also from time to time pursues opportunities to participate in out-of-region water and utility related services, particularly regulated water and wastewater businesses. SJW Group evaluates out-of-region and out-of-state opportunities that meet SJW Group's risk and return profile.

The factors SJW Group considers in evaluating such opportunities include:

- Potential profitability;
- Regulatory environment;
- Additional growth opportunities within the region;
- Water supply, water quality and environmental issues;
- Capital requirements;
- General economic conditions; and
- Synergy potential.

30

As part of our pursuit of the above three strategic areas, we consider from time-to-time opportunities to acquire businesses and assets. However, we cannot be certain we will be successful in identifying and consummating any strategic business combination or acquisitions relating to such opportunities. In addition, the execution of our business strategy will expose us to different risks than those associated with the current utility operations. We expect to incur costs in connection with the execution of this strategy and any integration of an acquired business could involve significant costs, the assumption of certain known and unknown liabilities related to the acquired assets, the diversion of management's time and resources, the potential for a negative impact on SJW Group's financial position and operating results, entering markets in which SJW Group has no or limited direct prior experience and the potential loss of key employees of any acquired company. Any strategic combination or acquisition we decide to undertake may also impact our ability to finance our business, affect our compliance with regulatory requirements, and impose additional burdens on our operations. Any businesses we acquire may not achieve sales, customer growth and projected profitability that would justify the investment. Any difficulties we encounter in the integration process, including the integration of controls necessary for internal control and financial reporting, could interfere with our operations, reduce our operating margins and adversely affect our internal controls. SJW Group cannot be certain that any transaction will be successful or that it will not materially harm operating results or our financial condition.

Real Estate Services

SJW Group's real estate investment activity is conducted through SJW Land Company and Chester Realty, Inc. SJW Land Company owns undeveloped land in California and Tennessee and owns and operates commercial buildings in Tennessee. Chester Realty, Inc. owns and operates land and commercial buildings in the State of Connecticut. SJW Land Company and Chester Realty, Inc. manage its acquired income producing and other properties until such time a determination is made to reinvest proceeds from sale of such properties.

Critical Accounting Policies

SJW Group has identified accounting policies delineated below as the policies critical to its business operations and the understanding of the results of operations. The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and revenues and expenses during the reporting period. SJW Group bases its estimates on historical experience and other assumptions that are believed to be reasonable under the circumstances. For a detailed discussion on the application of these and other accounting policies, see Note 2 of "Notes to Consolidated Financial Statements." SJW Group's critical accounting policies are as follows:

Recognition of Regulatory Assets and Liabilities

Generally accepted accounting principles for water utilities include the recognition of regulatory assets and liabilities as permitted by ASC Topic 980. In accordance with ASC Topic 980, Water Utility Services, to the extent applicable, records regulatory assets for incurred costs that are deemed probable of recovery from customers. Also, Water Utility Services recognizes regulatory liabilities for amounts expected to be refunded to customers in the rate-making process and for amounts collected in advance of the related expenditures. Regulatory assets or liabilities are also recognized for special revenue programs such as WCMA and WRA in accordance with guidance on alternative revenue programs under ASC Topic 980, including the requirement that such revenues will be collected within 24 months of the year-end in which the revenue is recorded. A reserve is recorded for amounts SJW Group estimates will not be collected within the 24-month period. This reserve is based on an estimate of actual usage over the recovery period, offset by applicable drought surcharges. Application of ASC Topic 980, including determining whether recovery is probable, requires significant judgement by management and includes assessing evidence that may exist prior to regulatory authorization, including regulatory rules and decisions, historical ratemaking practices, and other facts and circumstances that would indicate the recovery or refund is probable. The regulatory assets and liabilities recorded by Water Utility Services primarily relate to asset removal costs, the recognition of deferred income taxes for ratemaking versus tax accounting purposes, balancing and memorandum accounts, pensions and other postretirement benefits, and employee benefit costs. The disallowance of any asset in future ratemaking, including regulatory assets, would require Water Utility Services to immediately recognize the impact of the costs for financial reporting purposes. No disallowances were recognized during the years ended December 31, 2023, 2022 and 2021.

Recognition of Balancing and Memorandum Accounts

Balancing and memorandum accounts are utilized by our California operations. The purpose of a balancing account is to track the under-collection or over-collection associated with expense changes and the revenue authorized by the CPUC to offset those expense changes. Pursuant to Section 792.5 of the California Public Utilities Code, a balancing account must be maintained for expense items for which revenue offsets have been authorized. Balancing and memorandum accounts are recognized by SJWC when it is probable that future recovery of previously incurred costs or future refunds that are to be credited to customers will occur through the ratemaking process.

Balancing accounts are currently being maintained for the following items: purchased water, purchased power, groundwater extraction charges, pensions, and general rate case and cost of capital true-ups. The amount in the water production balancing accounts varies with the seasonality of the water utility business such that, during the summer months when the demand for water is at its peak, the account tends to reflect an under-collection, while during the winter months when demand for water is relatively lower, the account tends to reflect an over-collection. The pension balancing account is intended to capture the difference between actual pension expense and the amount approved in rates by the CPUC. The general rate case true-up accounts are a result of revenue shortfalls authorized for collection or refund by the CPUC due to delayed rate case and cost of capital decisions. The MWRAM tracks the difference between the revenue received for actual metered sales through the tiered volumetric rate and the revenue that would have been received with the same actual metered sales if a uniform rate would have been in effect.

SJWC also maintains memorandum accounts to track impacts due to catastrophic events, certain unforeseen water quality expenses related to new federal and state water quality standards, energy efficiency, water conservation, water tariffs, and other approved activities or as directed by the CPUC. The WCMA allows SJWC to track revenue, net of related water costs, associated with reduced sales due to water conservation and associated calls for water use reduction. SJWC records the lost revenue captured in the WCMA balancing accounts. Applicable drought surcharges collected are used to offset the revenue losses tracked in the WCMA.

In assessing the probability criteria for balancing and memorandum accounts between general rate cases, SJWC considers evidence that may exist prior to CPUC authorization that would satisfy ASC Topic 980 subtopic 340-25 recognition criteria. Such evidence may include regulatory rules and decisions, past practices, and other facts and circumstances that would indicate that recovery or refund is probable. When such evidence provides sufficient support, the balances are recorded in SJW Group's financial statements.

It is typical for the CPUC to incorporate any over-collected and/or under-collected balances in balancing or memorandum accounts into customer rates at the time rate decisions are made as part of SJWC's general rate case proceedings by assessing temporary sur-credits and/or surcharges. In the case where SJWC's balancing or memorandum-type accounts that have been authorized by the CPUC reach certain thresholds or have termination dates, SJWC can request the CPUC to recognize the amounts in customer rates prior to the next regular general rate case proceeding by filing an advice letter.

Goodwill

Goodwill represents the excess of the purchase price paid over the estimated fair value of the assets acquired and liabilities assumed in the acquisition of a business. Goodwill is not amortized but is tested for impairment annually on October 1st or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. SJW Group first performs a qualitative assessment to determine whether it is necessary to perform the quantitative impairment test. In assessing the qualitative factors, SJW Group considers the impact of these key factors: change in industry and competitive environment, financial performance, macroeconomic conditions, and other relevant Company-specific events. If SJW Group determines that as a result of the qualitative assessment it is more likely than not (> 50% likelihood) that the fair value is less than carrying amount, then a quantitative test is performed. SJW Group performed an impairment analysis as of October 1, 2023. The qualitative assessment found no indicators of impairment and therefore did not perform the quantitative impairment test. No impairments occurred during the years ended December 31, 2023, 2022 or 2021.

Factors Affecting Our Results of Operations

SJW Group's financial condition and results of operations are influenced by a variety of factors including the following:

- Economic utility regulation;
- Infrastructure investment;
- Compliance with environmental, health and safety standards;
- Production expenses;
- Customer growth;
- Water usage per customer;
- Weather conditions, seasonality and sources of water supply; and
- Merger and acquisition activities, if any.

Economic Utility Regulation

Water Utility Services is generally subject to economic regulation by the Regulators overseeing public utilities. Regulatory policies vary from state to state and may change over time. In addition, there may be regulatory lag between the time a capital investment is made, a consumption decrease occurs, or an operating expense increases and when those items are adjusted in utility rates.

SJWC employs a forward-looking test year and has been authorized to use several mechanisms to mitigate risks faced due to regulatory lag and new and changing legislation, policies and regulation. These include memorandum accounts to track revenue impacts due to catastrophic events, certain unforeseen water quality expenses related to new federal and state water quality standards, energy efficiency, water conservation, water tariffs, and other approved activities or as directed by the CPUC. Rate recovery for the balances in these memorandum accounts is generally allowed in a subsequent general rate case. SJWC also maintains balancing accounts to track changes in purchased water, purchased power, groundwater extraction charges and pension costs for later rate recovery. Regulatory risk in California is mitigated by use of a forward-looking test year which allows the return on and return of utility plant on a forecasted basis as it is placed in service, and in some cases interim rate relief is allowed in the event of regulatory lag. The CPUC permits its regulated utilities to acquire other utilities if the proposed sale and asset purchase transaction is determined to be in the public interest. Under Public Utilities Code § 2720, the purchase price, subject to a reasonable test involving appraisals from the acquirer as well as the Public Advocates Office, represents the Fair Market Value. Upon CPUC approval, acquiring utilities can include the Fair Market Value in rate base.

Pursuant to Connecticut regulations, CWC employs a historical test year. To address regulatory risk due to regulatory lag and changing legislation policies and regulations, rate cases may be filed as necessary in Connecticut. Additionally, to mitigate regulatory lag for pipeline replacement and conservation related projects, the Connecticut State Legislature has approved WICA that allows for a surcharge to be added to customer bills semi-annually for certain eligible pre-approved projects. Further, to mitigate risks from variations in revenues from changes in customer usage, the Connecticut State Legislature has approved a WRA to provide for recovery of the company's authorized revenues.

Pursuant to Texas regulation, TWC employs a historical test year. To address regulatory risk due to regulatory lag and changing legislation policies and regulations, rate cases may be filed as necessary in Texas, provided there is no current rate case outstanding. Further, rate cases may not be filed more frequently than once every 12 months. Additionally, to mitigate regulatory lag for capital improvements, Texas seeks to implement its first SIC. The SIC will allow TWC to earn a return on some of its capital improvements made after 2020 through a surcharge to its customers. The SIC is a cost recovery mechanism recently adopted in Texas that avoids the immediate need for a general rate case. The PUCT permits the acquisition of utilities using a process termed the Fair Market Value. This process brings in three appraisers to determine the market value of a system which the acquiring utility can apply as the value of utility plant included in rate base. In addition, after recent legislation the PUCT adopted rules allowing the application of the Filed Rate Doctrine. This allows water utilities the option of applying their previously approved rates to the customers of newly acquired systems, which encourages consolidation by minimizing rate case expenses.

Pursuant to Maine regulations, MWC employs a historical test year. To address regulatory risk due to regulatory lag and changing legislation policies and regulations, rate cases may be filed as necessary in Maine. Additionally, to mitigate regulatory lag for all infrastructure replacements (except meters), the Maine State Legislature has approved of WISC that allows for a surcharge to be added to customer bills semi-annually for certain pre-approved projects.

Infrastructure Investment

The water utility business is capital-intensive. In 2023 and 2022, company-funded capital improvements were $271,772 and $218,784, respectively, for additions to, or replacements of, property, plant and equipment for our Water Utility Services. We plan to spend approximately $332,000 in 2024 and $1,621,000 over five years for capital improvements. SJW Group funds these expenditures through a variety of sources, including earnings received from operations, debt and equity financing, and other borrowings. SJW Group relies upon lines of credit to fund capital expenditures in the short term and has historically issued long-term debt to refinance our short-term debt. While our ability to obtain financing will continue to be a key risk, we believe that based on our successful 2023 activities, we will have access to the external funding sources necessary to implement our ongoing capital investment programs in the future.

Compliance with Environmental, Health and Safety Standards

Water Utility Services' operations are subject to water quality and pollution control regulations issued by the EPA and environmental laws and regulations administered by the respective states and local regulatory agencies. Under the federal Safe Drinking Water Act, Water Utility Services is subject to regulation by the EPA of the quality of water it sells and treatment techniques it uses to make the water potable. The EPA promulgates nationally applicable standards, including maximum contaminant levels for drinking water. Water Utility Services has implemented monitoring activities and installed specific water

33

treatment improvements enabling it to comply with existing maximum contaminant levels and plan for compliance with future drinking water regulations. However, the EPA and the respective state agencies have continuing authority to issue additional regulations under the Safe Drinking Water Act. Water Utility Services incur substantial costs associated with compliance with environmental, health and safety and water quality regulation to which our water services are subject.

Environmental, health and safety, and water quality regulations are complex and change frequently, and the overall trend has been that they have become more stringent over time. It is possible that new or more stringent environmental standards and water quality regulations could be imposed that will increase Water Utility Services' water quality compliance costs, hamper Water Utility Services' available water supplies, and increase future capital expenditures. Future drinking water regulations may require increased monitoring, additional treatment of underground water supplies, fluoridation of all supplies, more stringent performance standards for treatment plants and procedures to further reduce levels of disinfection by-products. In the past, Water Utility Services have generally been able to recover expenses associated with compliance related to environmental, health and safety standards, but future recoveries could be affected by regulatory lag and the corresponding uncertainties surrounding rate recovery.

Production Expenses

Water Utility Services' operations require significant production inputs which result in substantial production expenses. These expenses include power, which is used to operate pumps and other equipment, purchased water and groundwater extraction charges. For 2023, production expenses accounted for 49% of our total operating expenses. Price increases associated with these production inputs would adversely impact our results of operations until rate relief is granted.

Customer Growth

Customer growth in our Water Utility Services' is driven by: (i) organic population growth within our authorized service areas and (ii) the addition of new customers to our regulated customer base by acquiring regulated water systems adjacent to or near our existing service territories. During 2023, we had cash outflows of $7,537 for business acquisitions which we believe will allow SJW Group to expand our regulated customer base. Before entering new regulated markets, we evaluate the regulatory environment to ensure that we will have the opportunity to achieve an appropriate rate of return on our investment while maintaining our high standards for quality, reliability and compliance with environmental, health and safety, and water quality standards.

Water Usage Per Customer

Fluctuations in customer demand for water could be due to seasonality, restrictions of use, weather or lifestyle choices, all of which could affect Water Utility Services' results of operations.

The following is the change in customer usage in 2023 compared to 2022:

- SJWC residential usage decreased 2.9% and business usage decreased 0.8%.
- TWC residential and business usage decreased 8.8%.
- CWC residential usage decreased 7.9% and business usage decreased 3.3%.
- MWC residential usage decreased 7.3% and business usage decreased 14.3%.

For the year ended December 31, 2023, SJWC's residential and business usage was lower by 15.0% and 3.2%, respectively, than the amount authorized in our 2022-2024 general rate case. SJWC's service area is currently under voluntary 15% reduction of water consumption. To address the difference between conservation usage and authorized usage in the rate case, the CPUC has approved the activation of the WCMA which tracks the divergence between authorized versus actual consumption in a balancing account for future recovery.

With the availability of the WRA in Connecticut, which allows for recovery of authorized revenues, decreases in consumption year to year do not present the same financial risk as in our other water utility services utilities.

Weather Conditions, Seasonality and Sources of Water Supply

Our ability to meet the existing and future water demands of our customers depends on an adequate supply of water. Drought, governmental restrictions, overuse of sources of water, the protection of threatened species or habitats or other factors may limit the availability of ground and surface water. Also, customer usage of water is affected by weather conditions, in particular during the warmer months. Our water systems experience higher demand in the summer due to the warmer temperatures and increased usage by customers for outside irrigation of lawns and landscaping. In periods of drought, if customers are encouraged or required to conserve water due to a shortage of supply or restriction of use, revenue tends to be lower. Water use restrictions may be imposed at a regional or state level and may affect our service areas regardless of our readiness to meet

34

unrestricted customer demands. Similarly, in unusually wet periods, water supply tends to be higher and customer demand tends to be lower, again resulting in lower revenues.

SJWC believes that its various sources of water supply, which consists of groundwater from wells, surface water from watershed run-off and diversion, reclaimed water, and purchased imported water, will be sufficient to meet customer demand for 2024. In addition, SJWC actively works with Valley Water to address California's long-term water supply challenges by continuing to educate customers on responsible water use practices and to conduct long-range water supply planning. CWC and MWC believes that they will be able to meet customer demand for 2024 with their existing water supply which consists of groundwater from wells, surface water in reservoirs and purchased water treated by neighboring water utilities. TWC believes that it will be able to meet customer demand for 2024 with their water supply which consists of groundwater from wells and purchased treated and raw water from the GBRA.

Results of Operations

Water sales are seasonal in nature and influenced by weather conditions. The timing of precipitation and climatic conditions can cause seasonal water consumption by customers to vary significantly. Revenue is generally higher in the warm, dry summer months when water usage and sales are greater and lower in the winter months when cooler temperatures and increased rainfall curtail water usage and sales.

See Item 1, "Business" and Item 1A, "Risk Factors" for a discussion of SJW Group's general business and regulatory activities.

Overview

SJW Group's consolidated net income for the year ended December 31, 2023 was $84,987, compared to $73,828 for the same period in 2022. This represents an increase of $11,159 or 15%, from 2022. The increase in net income was primarily driven by rate filings in California and Maine, lower maintenance costs due in part to prior year incurred costs related to the Order of Instituting Investigation settlement agreement, and a decrease in income taxes due to the partial release of an uncertain tax position reserve, partially offset by higher water production expenses, higher debt interest expenses, increased allowances for credit losses, higher depreciation and amortization expense related to new utility plant additions, and a gain on sale of nonutility properties of $6,197 in 2022 that did not recur in 2023.

Operating Revenue

Operating revenue by segment was as follows:

Operating Revenue

	2023	2022
Water Utility Services	$ 664,679	615,093
Real Estate Services	5,684	5,605
Total operating revenue	$ 670,363	620,698

The change in consolidated operating revenues was due to the following factors:

	2023 vs. 2022 Increase/(decrease)	
Water Utility Services:		
Consumption changes	$ (6,624)	(2)%
Increase in customers	3,780	1 %
Rate increases	46,592	8 %
Balancing and memorandum accounts:		
MWRAM	628	— %
WCMA	1,994	1 %
All other	1,187	— %
Other regulatory mechanisms	1,875	— %
Other	154	— %
Real Estate Services	79	— %
Total change in operating revenue	$ 49,665	8 %

35

The revenue increase consists of $49,586 from Water Utility Services and $79 from Real Estate Services.

The revenue increase for Water Utility Services is primarily due to an increase in authorized rates in California and Maine which resulted in $46,592 of additional revenue, an increase of $3,780 from new customers, balancing and memorandum accounts increases were primarily due to WCMA for $1,994 and $1,187 for all other balancing and memorandum accounts, and increases in other regulatory mechanisms by $1,875, partially offset by decreases of $6,624 due to lower usage.

Water Utility Services' Operating Revenue and Customer Counts

The following tables present operating revenues and number of customers by customer group of Water Utility Services:

Operating Revenue by Customer Group

	2023	2022
Residential and business	$ 566,651	509,284
Industrial	5,038	5,619
Public authorities	24,395	22,633
Others	56,823	50,821
Balancing and memorandum accounts and other regulatory mechanisms	11,772	26,736
	$ 664,679	615,093

Number of Customers

	2023	2022
Residential and business	387,616	384,346
Industrial	614	609
Public authorities	2,424	2,389
Others	11,056	10,982
	401,710	398,326

Operating Expense

Operating expense by segment was as follows:

Operating Expense

	2023	2022
Water Utility Services	$ 514,375	482,679
Real Estate Services	2,956	3,719
All Other	3,597	3,322
	$ 520,928	489,720

The change in consolidated operating expenses was due to the following factors:

	2023 vs. 2022 Increase/(decrease)	
Water production expenses:		
Change in surface water use	$ (11,510)	(2)%
Change in usage and new customers	(9,716)	(2)%
Purchased water and groundwater extraction charge, energy price change and other production expenses, net	31,767	7 %
Balancing and memorandum account cost recovery	12,869	2 %
Total water production expenses	23,410	5 %
Administrative and general	3,252	1 %
Maintenance	(5,005)	(1)%
Property taxes and other non-income taxes	1,903	— %
Depreciation and amortization	1,451	— %
Gain on sale of nonutility property	6,197	1 %
	$ 31,208	6 %

Sources of Water Supply

SJWC's water supply consists of groundwater from wells, surface water from watershed run-off and diversion, reclaimed water, and imported water purchased from Valley Water under the terms of a master contract with Valley Water expiring in 2051. Surface water is sourced from SJWC's 6,400 acres of watershed in the Santa Cruz mountains. In 2022, SJWC's general rate case decision approved the use of the Full Cost Balancing Account which mitigates the cost of the water supply from changes and variations in quantities from each of these sources which affect the overall mix of the water supply. The water rates for purchased water and the groundwater extraction charge may be increased by Valley Water at any time. If an increase occurs, then SJWC would file an advice letter with the CPUC seeking authorization to increase revenues to offset the rate increase.

CWC's water sources vary among the individual systems, but overall, approximately 80% of the total dependable yield comes from surface water supplies and 20% from wells. In addition, CWC has water supply agreements to supplement its water supply with the South Central Connecticut Regional Water Authority and The Metropolitan District that expire in 2058 and 2053, respectively.

TWC's water supply consists of groundwater from wells and purchased treated and raw water from the GBRA. TWC has long-term agreements with the GBRA, which expire in 2037, 2040, 2044 and 2050. The agreements, which are take-or-pay contracts, provide TWC with an aggregate of 7,650 acre-feet of water per year from Canyon Lake at prices that may be adjusted periodically by GBRA. TWC also has raw water supply agreements with the LCRA and WTPUA expiring in 2059 and 2046, respectively, to provide for 350 acre-feet of water per year from Lake Austin and the Colorado River, respectively, at prices that may be adjusted periodically by the agencies. Forty active production wells located in a Comal Trinity Groundwater Conservation District, a regulated portion of the Trinity aquifer, are charged a groundwater pump tax based upon usage.

In August 2023, SJWTX Holdings Inc.'s unregulated subsidiary, TWR acquired eight wells and the water rights of KTR. These wells have been projected to yield an additional 6,000 acre-feet per year or more. TWC staff is currently working on acquiring easements and routing of the waterline and infrastructure needed to get this water into our Triple Peak water system to serve existing customers and planned new developments.

Water sources at MWC vary among the individual systems, but overall, approximately 90% of the total dependable yield comes from surface water supplies and 10% from wells. MWC has a water supply agreement with the Kennebec Water District expiring in 2040.

The following table presents the sources of water supply for water utility services:

	Source of Water Supply	
	2023	2022
	(billion gallons)	
Purchased water	19.5	19.7
Groundwater	12.4	18.2
Surface water	14.6	10.5
Reclaimed water	0.8	0.9
	47.3	49.3
Average water production expense per billion gallons	$5.420 million	$4.719 million

The percentages of water supply by source excluding reclaimed water by state is presented below:

	Purchased Water		Groundwater		Surface Water	
	2023	2022	2023	2022	2023	2022
California	54 %	52 %	32 %	40 %	12 %	5 %
Connecticut	6 %	7 %	36 %	36 %	58 %	57 %
Maine	2 %	3 %	7 %	8 %	91 %	89 %
Texas	17 %	28 %	34 %	28 %	49 %	44 %

Water production in 2023 for Water Utility Services decreased 2.0 billion gallons from 2022. The changes are primarily attributable to changes in consumption by customers driven primarily by weather conditions in California, Maine and Texas.

The contract water rates for SJWC are determined by Valley Water. These rates are adjusted periodically and coincide with Valley Water's fiscal year, which ends on June 30. The contract water rate for Valley Water's fiscal years 2024, 2023 and 2022 was $6.411 million, $5.644 million and $4.953 million per billion gallons, respectively. The contractual cost of the groundwater extraction charge for water pumped from the ground basin was $6.058 million, $5.290 million and $4.600 million per billion gallons for Valley Water's fiscal years 2024, 2023 and 2022, respectively. SJWC's unaccounted-for water for 2023 and 2022 approximated 8.4% and 8.9%, respectively, as a percentage of production. The unaccounted-for water estimate is based on the results of past experience and the impact of flows through the system, partially offset by SJWC's main replacements and water loss reduction programs.

CWC has an agreement with the South Central Connecticut Regional Water Authority ("RWA") to purchase water from RWA. The agreement was signed in April 2006 and became effective upon the receipt of all regulatory approvals in 2008 and will remain in effect for a minimum of fifty years upon becoming effective. In addition, CWC is able, but under no obligation, to purchase up to one million gallons of water per day at the then current wholesale rates per the agreement, $3.1 million per billion gallons as of December 31, 2023. CWC has an agreement with The Metropolitan District ("MDC") to purchase water from MDC to serve the Unionville system. The agreement became effective on October 6, 2000 and has a term of fifty years beginning May 19, 2003, the date the water supply facilities related to the agreement were placed in service. CWC has agreed to purchase 0.28 billion gallons of water annually from MDC at the published retail rate, three dollars and eighty cents per hundred cubic feet as of December 31, 2023.

MWC has an agreement with the Kennebec Water District for potable water service. The agreement has been in place for 20 years and was extended on November 7, 2020 for a new term of up to 20 years. MWC guarantees a minimum consumption of 0.05 billion gallons of water annually. Water sales to MWC are billed at a wholesale discount of twenty cents per hundred cubic feet of water below Kennebec Water District's tariffed rates. The current tariff rate was one dollar and fifty-one cents per hundred cubic feet as of December 31, 2023.

CTWS's unaccounted-for water for 2023 and 2022 approximated 13.1% and 14.2%, respectively, as a percentage of production. The unaccounted-for water estimate is based on the results of past experience and the impact of flows through CTWS's systems, unadjusted for any required system flushing, partially offset by WICA and WISC main replacement programs and lost water reduction initiatives.

The various components of operating expenses are discussed below.

Water production expenses

Water production expenses increased $31,767 in higher per unit costs paid for purchased water, groundwater extraction, energy price charges and other production expenses and increased $12,869 in water production balancing and memorandum accounts for the Full Cost Balancing Account, offset by decreases of $11,510 as a result of increased availability of California surface water in 2023 compared to 2022 and $9,716 due to lower customer usage.

Administrative and General Expense

Administrative and general expenses include payroll related to administrative and general functions, all employee benefits charged to expense accounts, insurance expenses, legal fees, regulatory utility commissions' expenses, expenses associated with being a public company, and general corporate expenses.

Administrative and general expense increased $3,252 in 2023, or 1% of the total operating expenses in 2022 primarily due to an increase in allowances for customer credit losses.

Maintenance Expense

Maintenance expenses decreased $5,005 or 1%, primarily due to prior year incurred costs related to the Order of Instituting Investigation settlement agreement. In addition, proactive asset management and advanced leak detection reducing emergency projects and replacing them with scheduled improvements that are no longer temporary in nature reduced maintenance expenses for the year.

Property Taxes and Other Non-income Taxes

Property taxes and other non-income taxes for 2023 increased $1,903 from 2022. The increase was primarily the result of increased property taxes due to utility plant additions, and an increase in payroll taxes due to increases in wages.

Depreciation and Amortization

Depreciation and amortization expense increased $1,451 in 2023. The increases were primarily due to increases in depreciation related to new utility plant additions; partially offset by a $2,400 one-time impact related to amortization on certain Cupertino concession assets in 2022.

Sale of nonutility properties

Gain on sale of nonutility properties decreased $6,197 in 2023 primarily due to the recording of a non-recurring sale of non-utility properties in 2022, and no recorded gain on the sale of nonutility properties in 2023.

Other Income and Expense

The change in other (expense) income in 2023 compared to 2022 was primarily due to an increase in interest expense due to an increase in long-term debt balances, higher interest rates on lines of credit borrowings and an increase in pension non-service cost, offset by the changes in the Rabbi Trust and life insurance policy values and a true-up on prior real estate sale transactions.

SJW Group's consolidated weighted-average cost of long-term debt, including the amortization of debt issuance costs, was 3.97% and 4.0% for the years ended December 31, 2023 and 2022. Cost of borrowing on the lines of credit averaged 6.29% and 3.41% for the years ended December 31, 2023 and 2022, respectively.

Provision for Income Taxes

Income tax expense for 2023 was $5,956, compared to $8,496 in 2022. The effective consolidated income tax rate was 7% for 2023 and 10% for 2022. The decrease in income tax expense and the effective income tax rate was primarily due to the partial release of an uncertain tax position reserve.

Please refer to Note 7, "Income Taxes," of Notes to Consolidated Financial Statements for a reconciliation of income tax computed at the federal statutory rate to actual income tax expense.

Other Comprehensive Income

The change in other comprehensive income in 2023 compared to 2022 was primarily due to the change in the benefit obligation for CWC's supplemental executive retirement plan primarily as a result of changes in the discount rate and the unrealized gain on its investments.

39

Liquidity and Capital Resources

Water Utility Services' business derives the majority of its revenue directly from residential and business customers. Water Utility Services bills the majority of its customers on a bi-monthly basis. Management believes that the collection rate for its accounts receivables will increase as service disconnections gradually return to normal operations following the expiration of remaining state orders to suspend water service disconnections in 2022 that were instituted as a result of the COVID-19 pandemic. On December 28, 2023, SJWC submitted the application to receive $10,237 through the State of California Water and Wastewater Arrearages Payment Program to relieve outstanding payment delinquencies for customer accounts greater than 60-days past due as of December 31, 2022. We anticipate the funds to be received in the first quarter of 2024 after the State of California Water and Wastewater Arrearages Payment Program completes the review of this application.

Funds collected from Water Utility Services' customers are used to pay for water production expenses, in addition to costs associated with general operations. Funds were also generated from borrowings. In 2023, SJW Group and its subsidiaries obtained $70,000 in funds from new long-term debt and $80,659 in funds from equity issuances. From these amounts, SJW Group funded its 2023 capital expenditure programs, refinanced certain short and long-term borrowings, and funded working capital. See Note 4 and Note 6 of "Notes to Consolidated Financial Statements" for discussion on the equity and debt financing activities of SJW Group. In addition, SJW Group paid cash dividends of $47,905 during the year ended December 31, 2023.

In 2023, the common dividends declared and paid on SJW Group's common stock represented 56% of net income. Dividends have been paid on SJW Group's and its predecessor's common stock for 321 consecutive quarters and the annual dividend amount has increased in each of the last 56 years. While historically SJW Group has generally paid dividends equal to approximately 50% to 60% of its net income, SJW Group cannot guarantee that this trend will continue in the future.

Cash Flow from Operations

In 2023, SJW Group generated cash flow from operations of approximately $190,800 compared to $166,200 in 2022. Cash flow from operations is primarily generated by net income from revenue producing activities, adjusted for non-cash expenses for depreciation and amortization, deferred income taxes, share-based compensation, allowance for equity funds used during construction, gains on the sale of assets, and other changes in working capital items. Cash flow from operations increased in 2023 by approximately $24,600. The increase was primarily due to a combination of the following factors: (1) an increase of $16,100 due to higher net income adjusted for non-cash items and general working capital changes, (2) an increase in collections against our regulatory assets and liabilities which generated an increase of $10,600, (3) an increase from postretirement benefits assets and obligations of $5,600, and (4) an increase from other noncurrent assets and noncurrent liabilities of $2,800, offset by (5) a decrease of $10,500 attributable to tax accruals compared to the prior period.

Cash Flow from Investing Activities

In 2023, SJW Group used approximately $271,800 of cash for Company funded capital expenditures, $16,900 for developer funded capital expenditures, $24,200 and $7,537 for nonutility assets and business acquisitions, respectively, primarily for ongoing business and asset acquisition activities in Texas, and $2,100 in utility plant retirement costs. In 2022, SJW Group used approximately $218,800 of cash for Company funded capital expenditures, $22,900 for developer funded capital expenditures, $2,500 in utility plant retirement costs, $600 for real estate investments related to leasehold improvement additions for the properties located in Knoxville, Tennessee, and $400 for ongoing business and asset acquisition activities in Texas. These uses were offset by cash proceeds of $1,000 from the sale of various nonutility properties during the year.

Water Utility Services has budgeted 2024 capital expenditures of approximately $332,000, excluding capital expenditures financed by customer contributions and advances. The 2024 budget is comprised of as follows:

	Budgeted Capital Expenditures 2024
SJWC	$ 169,000
CWC	94,000
TWC	49,000
MWC	20,000
Total capital expenditures	$ 332,000

The 2024 capital expenditures budget is concentrated in main replacements. Water Utility Services' capital expenditures are incurred in connection with normal upgrading and expansion of existing facilities and to comply with environmental regulations. Over the next five years, Water Utility Services expects to incur approximately $1,621,000 in capital expenditures. A significant portion of this amount is subject to future approval from the Regulators. Capital expenditures have the effect of

increasing utility plant rate base on which Water Utility Services earns a return. Water Utility Services' actual capital expenditures may vary from projections due to changes in the expected demand for services, weather patterns, actions by governmental agencies and general economic conditions. Total additions to utility plant normally exceed company-financed additions as a result of new facilities construction funded with advances from developers and contributions in aid of construction.

The Water Utility Services' distribution systems were constructed during the period from the early 1900's through today. Expenditure levels for renewal and modernization will occur as the components reach the end of their useful lives. In most cases, replacement cost will significantly exceed the original installation cost of the retired assets due to increases in the costs of goods and services and increased regulation.

Cash Flow from Financing Activities

Net cash provided by financing activities for the year ended December 31, 2023, increased by approximately $50,500 from the same period in the prior year, primarily as a result of increase in cash proceeds from long-term debt and issuances of common stock, partially offset by an increase in the amount of net borrowings on our lines of credit, and an increase in payments of dividends. SJW Group's cash management policy includes the issuance of long-term debt to pay down borrowings on our lines of credit. As such, during years when long-term borrowings are high, borrowings on our line of credit tend to be low and when long-term borrowings are low, borrowings on our line of credit tend to be high.

SJW Group and its subsidiaries have unsecured bank lines of credit totaling $350,000 as of December 31, 2023. Drawdowns on our lines of credit are restricted by our funded debt not exceeding a percent of total capitalization as defined in our debt covenants. SJW Group expects to periodically draw down on its lines of credit as dictated by our funding needs and subsequently repay such borrowings with cash from operations and issuance of long-term debt or equity. See also "Sources of Capital" below.

Sources of Capital

SJW Group's regulated operations' ability to finance future construction programs and sustain dividend payments depends on its ability to maintain or increase internally generated funds and obtain external financing through the issuance of new long-term debt or issuance of equity. The level of future earnings and the related cash flow from operations is dependent, in large part, on the timing and outcome of regulatory proceedings. SJW Group's regulated operations' financing activity is designed to achieve capital structures consistent with regulatory guidelines in the locations where the companies operate. See current authorized capital structures in Item 1, "Business" under "Regulation and Rates."

Short-term Financing Arrangements

SJW Group and its subsidiaries have unsecured line of credit agreements where borrowings are used to refinance existing debt, for working capital, and for general corporate purposes. A summary of the line of credit agreements as of December 31, 2023, and 2022 are as follows:

		2023			2022
	Maturity Date	Line Limit	Amounts Outstanding	Unused Portion	Amounts Outstanding
Syndicated credit agreement:	August 2, 2028				
SJW Group		$ 50,000	10,000	40,000	—
SJWC		140,000	56,000	84,000	95,000
CTWS		90,000	53,000	37,000	20,000
TWC		20,000	2,500	17,500	—
Total syndicated credit agreement		300,000	121,500	178,500	115,000
CTWS credit agreement	August 2, 2028	10,000	10,000	—	4,578
CTWS credit agreement	May 15, 2025	40,000	40,000	—	40,000
		$ 350,000	171,500	178,500	159,578

Cost of borrowing on the lines of credit averaged 6.29% and 3.41% for the years ended of December 31, 2023 and 2022, respectively.

All of SJW Group's and subsidiaries' lines of credit contain customary representations, warranties and events of default, as well as certain restrictive covenants customary for facilities of this type, including restrictions on indebtedness, liens, acquisitions

and investments, restricted payments, asset sales, and fundamental changes. All of the lines of credit also include certain customary financial covenants such as a funded debt to capitalization ratio and a minimum interest coverage ratio. As of December 31, 2023, SJW Group and its subsidiaries were in compliance with all covenants on their lines of credit.

For additional information on SJW Group's lines of credit, see Note 5 of "Notes to Consolidated Financial Statements."

Long-term Financing Arrangements

SJW Group's and its subsidiaries' long-term debt activities are for purposes of refinancing short-term borrowings, funding capital expenditures and working capital, and repayments of maturing long-term debt. The following table summarizes the long-term debt issuances and repayments for the year ended December 31, 2023:

	Issuance (Repayment)	Activity Date	Maturity Date
SJWC:			
Senior note, Series P, 4.85%	$ 70,000	Jan 2023	Feb 2053
CTWS:			
Bank term loan, 4.09%	(1,377)	2023	December 2027
Bank term loan, 4.15%	(610)	2023	August 2037
MWC:			
Senior Note, Series G, 8.95%	(900)	Nov 2023	December 2024
State revolving fund loans, various series, 0.00%-2.58%	(1,460)	2023	2022-2048
	$ 65,653		

Additionally, on August 14, 2023, in connection with the KT Water Resources acquisition, TWR entered into a post-closing production payment obligation to pay a total amount of $29,000 to the seller over a period up to 29 years. The repayment schedule is based on the quantity of groundwater produced from the acquired wells, subject to certain provisions in the purchase agreement.

On January 22, 2024, CWC sold an aggregate principal amount of $25,000,000 of its 6.46% Senior Notes, Series 2023 due January 1, 2054.

The debt and credit agreements of SJW Group and its subsidiaries contain various financial and other covenants. Non-compliance with these covenants could result in accelerated due dates and termination of the agreements. In addition, the credit agreements contain customary representations and warranties and are subject to customary events of default, which may result in the outstanding debt becoming immediately due and payable. As of December 31, 2023, SJW Group and its subsidiaries were in compliance with all covenants related to its long-term debt agreements.

For additional information, see Note 6 of "Notes to Consolidated Financial Statements."

Equity Financing Arrangements

On March 1, 2023, SJW Group entered into Amendment No. 1 to the equity distribution agreement (the "Equity Distribution Agreement"), dated November 17, 2021, between SJW Group and J.P. Morgan Securities LLC, Janney Montgomery Scott LLC, RBC Capital Markets, LLC and Wells Fargo Securities, LLC (each a "Sales Agent" and, collectively, the "Sales Agents"), pursuant to which SJW Group increased the aggregate gross sales price of shares of SJW Group's common stock, $0.001 par value per share, that may be sold under the Equity Distribution Agreement from $100,000 to $240,000. For the year ended December 31, 2023, SJW Group issued and sold a total of 1,119,806 shares of common stock with a weighted average price of $73.68 per share and received $80,659 in net proceeds under the Equity Distribution Agreement. Since the inception of the Equity Distribution Agreement, SJW Group has issued and sold 2,004,657 shares of common stock with a weighted average price of $73.57 for a total net proceeds of $143,998 and has a remaining $92,509 under the Equity Distribution Agreement.

Credit Rating

The condition of the capital and credit markets or the strength of financial institutions could impact SJW Group's ability to draw on its lines of credit, issue long-term debt, sell its equity or earn interest income. In addition, government policies, the state of the credit markets and other factors could result in increased interest rates, which would increase SJW Group's cost of capital. While our ability to obtain financing will continue to be a risk, we believe that based on our 2023 and 2022 activities, we will have access to the external funding sources necessary to implement our ongoing capital investment programs in the future. SJW Group, CTWS and CWC were put on negative watch on September 19, 2023. Standard & Poor's noted the change in outlook is due to recent regulatory and legislative developments in Connecticut that are not consistent with Standard & Poor's view of the regulatory framework for investor owned utilities.

The following table are the current Standard & Poor's Rating Service assigned company ratings:

Entity	Rating	Outlook
SJW Group	A-	Negative
SJWC	A	Stable
CTWS	A-	Negative
CWC	A-	Negative

Off-Balance Sheet Arrangement/Contractual Obligations

SJW Group has no significant contractual obligations not fully recorded on its Consolidated Balance Sheet or not fully disclosed in the Notes to Consolidated Financial Statements.

SJW Group's contractual obligations and commitments as of December 31, 2023 are as follows:

		Contractual Obligations Due in			
	Total	Less than 1 Year	1-3 Years	3-5 Years	After 5 Years
Senior notes, Water Utility Services	$ 680,900	40,900	15,000	15,000	610,000
Bank term loans, Water Utility Services	190,795	4,500	5,000	17,020	164,275
Advances for construction, SJWC (1)	60,975	3,034	5,848	5,520	46,573
California Pollution Control Financing Authority Revenue Bond, SJWC	70,000	—	—	—	70,000
Connecticut Innovations Revenue Bonds, CWC	22,050	—	—	9,550	12,500
State revolving fund loans, MWC	14,239	1,504	2,546	2,396	7,793
Senior notes, SJW Group	560,000	—	—	—	560,000
Bank term loans, CTWS	16,457	2,071	4,405	1,873	8,108
Seller financing debt, TWR (2)	29,000	—	437	1,642	26,921
Total contractual cash obligation	$ 1,644,416	52,009	33,236	53,001	1,506,170
Total interest on contractual obligations	$ 939,978	59,162	116,303	112,963	651,550

(1) As of December 31, 2023, advances for construction were $146,582 of which $55,170 was related to non-refundable advances for construction and $30,437 was related to advances which are refundable based on service connections made.

(2) The timing of payments on the seller financing shown in the table above reflects management's current estimate. The actual timing of payments will be based upon the actual quantities of groundwater produced from the acquired wells.

With regard to uncertain tax positions, we are unable to predict the timing of tax settlements as tax audits can involve complex issues and the resolution of those issues may span multiple years, particularly if subject to negotiation or litigation. For further discussion on uncertain tax positions, please see Note 7 of "Notes to Consolidated Financial Statements."

Water Supply Agreements

SJWC purchases water from Valley Water under terms of a master contract expiring in 2051. Delivery schedules for purchased water are based on a contract year beginning July 1, and are negotiated every three years under terms of the master contract with Valley Water. For the years ended December 31, 2023, 2022 and 2021, SJWC purchased from Valley Water 18.3 billion gallons ($111,173), 18.2 billion gallons ($96,793) and 19.4 billion gallons ($91,938), respectively, of contract water. On June 16, 2022, Valley Water Board of Directors approved treated water deliveries reflecting the contractual delivery schedule reduced by 23% through June 30, 2024. Based on current prices and estimated deliveries, SJWC is committed to purchase from Valley Water a minimum of 90% of the reduced delivery schedule, or 18.9 billion gallons ($121,182) of water at the current contract water rate of $6.41 million per billion gallons in the year ending December 31, 2024. Additionally, SJWC purchases non-contract water from Valley Water on an "as needed" basis if the water supply is available. The contract water rates for SJWC are determined by Valley Water. These rates are adjusted periodically and coincide with Valley Water's fiscal year, which ends on June 30. The contract water rate for Valley Water's fiscal years 2024, 2023 and 2022 was $6.411 million, $5.644 million and $4.953 million per billion gallons, respectively. The contractual cost of the groundwater extraction charge for water pumped from the ground basin was $6.058 million, $5.290 million and $4.600 million per billion gallons for Valley Water's fiscal years 2024, 2023 and 2022, respectively.

SJWC also pumps water from the local groundwater basin. There are no delivery schedules or contractual obligations associated with the purchase of groundwater. Valley Water determines the groundwater extraction charge and it is applied on a per unit basis. In addition to the Valley Water groundwater extraction charge, SJWC also incurs power costs to pump the groundwater from the basin.

CWC has an agreement with the RWA to purchase water. The agreement was signed in April 2006 and became effective upon the receipt of all regulatory approvals in 2008 and will remain in effect for a minimum of fifty years upon becoming effective. CWC will pay RWA $75 per year as part of a capacity agreement, for a total of 14 years, starting on the effective date of the agreement. In addition, CWC has the option, but is under no obligation, to purchase up to one million gallons of water per day at the then current wholesale rates per the agreement ($3.1 million per billion gallons as of December 31, 2023). CWC has an agreement with the MDC to purchase water from MDC to serve the Unionville system. The agreement became effective on October 6, 2000 and has a term of fifty years beginning May 19, 2003, the date the water supply facilities related to the agreement were placed in service. CWC has agreed to purchase 0.28 billion gallons of water annually from MDC. The rate charged by the MDC at December 31, 2023 were three dollars and eighty cents per hundred cubic feet.

MWC has an agreement with the Kennebec Water District for potable water service. The agreement has been in place for 20 years and was extended on November 7, 2020 for a new term of up to 20 years. MWC guarantees a minimum consumption of 50 million gallons of water annually. Water sales to MWC are billed at a wholesale discount of twenty cents per hundred cubic feet of water below Kennebec Water District's tariffed rates. The current tariff rate was one dollar and fifty-one cents per hundred cubic feet as of December 31, 2023.

TWC has long-term contracts with the GBRA. The agreements expire in 2037, 2040, 2044 and 2050. The agreements, which are take-or-pay contracts, provide TWC with 7,650 acre-feet per year of water supply from Canyon Lake. The water rate may be adjusted by GBRA at any time, provided GBRA gives TWC a 60-day written notice on the proposed adjustment. TWC also has raw water supply agreements with the LCRA and WTPUA expiring in 2059 and 2046, respectively, for 350 acre-feet of water per each agreement per year from Lake Austin and the Colorado River, respectively, at prices that may be adjusted periodically by the agencies.

Employee Benefit Arrangements

SJWC and CTWS sponsor noncontributory defined benefit pension plans and provide health care and life insurance benefits for retired employees. In 2023, SJWC and CTWS contributed $11,145 and $920 to the pension plans and other postretirement benefit plans, respectively. In 2024, SJWC and CTWS expect to make required and discretionary cash contributions of up to $8,744 to the pension plans and other postretirement benefit plans. The amount of required contributions for years thereafter is not actuarially determinable.

SJWC's other benefit obligations include employees' and directors' postretirement benefits, an Executive Supplemental Retirement Plan, Cash Balance Executive Supplemental Retirement Plan, Special Deferral Election Plan and Deferral Election Program for non-employee directors. Under these benefit plans, SJWC is committed to pay approximately $1,909 annually to former officers and directors. Future payments may fluctuate depending on the life span of the retirees and as current officers and executives retire.

CTWS's other benefit obligations include employees' postretirement benefits, supplemental executive retirement agreements and deferred compensation agreements and plan. Future payments may fluctuate depending on the contribution rates of employees into the deferred compensation plan and the life span of the retirees and as current officers and executives retire. Under these benefit plans, CTWS is committed to pay approximately $1,678 annually to former officers and directors.

Recently Adopted Accounting Policies and New Accounting Pronouncements

See Note 2 of "Notes to Consolidated Financial Statements" for a discussion of recently adopted accounting policies and new accounting pronouncements for the year ended December 31, 2023.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk***

SJW Group is subject to market risks in the normal course of business, including changes in interest rates, pension plan asset values, and equity prices. The exposure to changes in interest rates can result from the issuance of debt and short-term funds obtained through the company's variable rate lines of credit. SJW Group's subsidiaries sponsor noncontributory pension and other postretirement plans for its employees. Pension and other postretirement costs and the funded status of the plans may be affected by a number of factors including the discount rate, mortality rates of plan participants, investment returns on plan assets, and pension reform legislation.

SJW Group has no derivative financial instruments, financial instruments with significant off-balance sheet risks, or financial instruments with concentrations of credit risk.

Item 8. ***Financial Statements and Supplementary Data***

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of SJW Group

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of SJW Group and subsidiaries (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of comprehensive income, changes in stockholders' equity, and cash flows, for each of the three years in the period ended December 31, 2023, and the related notes and the schedules listed in the Index at Item 15 (collectively referred to as the "financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by COSO.

Basis for Opinions

The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Management's Report on Internal Control over Financial Reporting". Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Impact of Rate Regulation on the Financial Statements — Refer to Note 3 to the financial statements

Critical Audit Matter Description

The Company is subject to rate regulation by state utility regulatory agencies (the "Commissions"), which have jurisdiction with respect to the rates of the Company's water and wastewater services. Management has determined it meets the requirements under accounting principles generally accepted in the United States of America to prepare its financial statements applying the specialized rules to account for the effects of cost-based rate regulation. Accounting for the economics of rate regulation impacts multiple financial statement line items and disclosures, such as depreciable utility plant; regulatory assets and liabilities; operating revenues; operation and maintenance expense; and depreciation expense.

The Commissions establish rates for the purpose of permitting the recovery of the cost of service and a return on investment. The Company's rates are subject to regulatory ratemaking processes. The Company records deferred costs and credits on the balance sheet as regulatory assets and liabilities when it is probable that these costs and credits will be recognized in the ratemaking process in a period different from when the costs and credits are incurred. Accounting for such costs and credits is based on management's judgment and prior historical ratemaking practices, and it occurs when management determines that it is probable that these costs and credits will be recognized in the future revenue of the Company through the ratemaking process.

We identified the impact of rate regulation as a critical audit matter due to the significant judgments that underlie the Company's financial statement line items and disclosure impacted by rate regulation and the high degree of subjectivity involved in assessing the impact of regulatory decisions on the financial statements. Management judgments include assessing the probability of (1) recovery in future rates of incurred costs and (2) the requirement to refund amounts to customers. Given that management's accounting judgements are based on consideration of evidence, such as regulatory rules and decisions, past practice, and the uncertain outcomes of future regulatory decisions, auditing these judgements required specialized knowledge of accounting for rate regulation and the rate setting process due its inherent complexities and pervasive impact on the financial statements.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the impacts of rate regulation include the following, among others:

- We tested the effectiveness of management's controls over the initial recognition of amounts as utility plant and regulatory assets or liabilities and the evaluation of the probability of (1) the recovery in future rates of costs incurred as utility plant and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We also tested the effectiveness of management's controls over the monitoring and evaluation of regulatory developments that may affect the probability of recovering costs in future rates or of a future reduction in rates, and controls over relevant computations impacting certain regulatory asset or liability balances.
- We read regulatory orders issued by the Commissions to the Company, regulatory statutes, and other publicly available information to evaluate management's determination of the accounting impacts of any new or revised regulatory decisions and their impact on measurement of related regulatory assets and liabilities.
- We obtained supporting documentation from management regarding the evidence, such as regulatory rules and decisions, past practices, and other facts and circumstances, used in the measurement of regulatory assets and liabilities for compliance with the related orders. We reconciled the underlying data or inputs used in the measurement to rate decisions approved by the Commissions and tested the mathematical accuracy of the calculations.
- We obtained an analysis from management regarding probability of recovery for regulatory assets or refund or future reduction in rates for regulatory liabilities not yet addressed in a regulatory order to assess management's assertion that amounts are probable of recovery or a future reduction in rates.

- We evaluated the Company's disclosures related to the impacts of rate regulation, including the balances recorded, and regulatory developments, were appropriate and consistent with the information obtained in our procedures.

KT Water Resources Acquisition — Refer to Note 14 to the financial statements

Critical Audit Matter Description

The Company completed the acquisition of KT Water Resources. The Company accounted for the transaction as an asset acquisition and allocated the purchase price paid for the assets acquired and liabilities assumed on a relative fair value basis. Given the significant amount of judgment required by management to estimate the relative fair value of the intangible assets, non-utility property and a production payment received as part of the acquisition, performing audit procedures to test the fair value allocation required a high degree of auditor judgment and increased effort, including involving valuation specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the relative fair value of assets acquired, liabilities assumed and the post-closing payment for KT Water Resources included the following, among others:

- We tested the effectiveness of controls over the allocation of the purchase price to assets acquired, liabilities assumed and the post-closing payment, and controls over the valuation methods used to value the assets and liabilities, including controls over management's evaluation of inputs and assumptions used in the valuation estimates.
- We obtained and evaluated the third-party valuation report and management's valuation, along with relevant supporting documentation, such as the executed purchase and sale agreement.
- With the assistance of our fair value specialists, we (1) evaluated the reasonableness of the valuation methodologies and significant assumptions used by management and their external valuation specialist, including comparing the key inputs to external market sources, (2) evaluated the reasonableness of the discount rates, including testing the source information underlying the determination of the discount rates, assessing the mathematical accuracy of the calculation, and developing a range of independent estimates and comparing those to the discount rates selected by management, and (3) assessed the mathematical accuracy of significant calculations in the valuation schedules.
- We evaluated the reasonableness of certain business assumptions used in the valuation, including the quantities of groundwater to be produced by the wells.

/s/ Deloitte & Touche LLP

San Jose, California

February 22, 2024

We have served as the Company's auditor since 2020.

SJW GROUP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years ended December 31, 2023, 2022 and 2021
(Dollars in thousands, except share and per share data and where otherwise noted)

Note 1. Organization and Operations

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts of SJW Group, its wholly owned subsidiaries, and one variable interest entity in which one SJW Group subsidiary is the primary beneficiary. All intercompany transactions and balances have been eliminated in consolidation. The accounting policies of SJW Group's subsidiaries comply with the applicable uniform system of accounts prescribed by the respective regulators and conform to generally accepted accounting principles for rate-regulated public utilities.

SJW Group is a holding company of San Jose Water Company ("SJWC"), SJWTX Holdings, Inc., SJW Land Company, and SJWNE LLC. SJWNE LLC is a special purpose entity holding company for Connecticut Water Service, Inc. ("CTWS") (and its wholly owned subsidiaries, The Connecticut Water Company ("CWC"), The Maine Water Company ("MWC"), Chester Realty, Inc. and New England Water Utility Services, Inc. ("NEWUS"). SJW Group, through its wholly owned subsidiaries, primarily provides water utility and other related services in California, Connecticut, Maine and Texas. SJW Group has business in property management and real estate investment activity conducted by SJW Land Company and Chester Realty, Inc.

In the third quarter of 2023, the corporate reorganization of our water services organization in Texas was completed. SJWTX Holdings, Inc. is the holding company for SJWTX, Inc., doing business as The Texas Water Company ("TWC"), Texas Water Operation Services, LLC ("TWOS") and Texas Water Resources, LLC ("TWR"). TWC is a public utility in the business of providing water service in Bandera, Blanco, Comal, Hays, Kendall, Medina and Travis Counties in the growing region between San Antonio and Austin, Texas. TWC additionally provides wastewater service in Comal and Kendall counties. TWC also holds a 25% equity interest in Acequia Water Supply Corporation ("Acequia"). Acequia has been determined to be a variable interest entity within the scope of Accounting Standards Codification ("ASC") Topic 810—"Consolidation" with TWC as the primary beneficiary. As a result, Acequia has been consolidated with TWC. TWOS was created for non-tariffed service operations and TWR was formed to hold wholesale water supply assets.

Water sales are seasonal in nature and influenced by weather conditions. The timing of precipitation and climatic conditions can cause seasonal water consumption by customers to vary significantly. Revenue is generally higher in the warm, dry summer months when water usage and sales are greater and lower in the winter months when cooler temperatures and increased rainfall curtail water usage and sales.

Note 2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Depreciable Utility Plant and Equipment

The major components of depreciable plant and equipment as of December 31, 2023 and 2022 are as follows:

	2023	2022
Source of supply	$ 207,537	191,082
Pumping plant	284,308	269,246
Water treatment plant	354,617	327,492
Transmission and distribution plant	2,820,358	2,615,640
General plant	301,091	257,825
Total depreciable plant and equipment	$ 3,967,911	3,661,285

Depreciation is computed using the straight-line method over the estimated remaining service lives of groups of assets. The estimated service lives of depreciable plant and equipment are as follows:

	Useful Lives
Source of supply	20 to 100 years
Pumping plant	5 to 70 years
Water treatment plant	5 to 50 years
Transmission and distribution plant	10 to 100 years
General plant	4 to 61 years

For the years 2023, 2022 and 2021, depreciation expense as a percent of the beginning of the year balance of depreciable plant was 2.9%, 3.3% and 3.2%, respectively. Depreciation expense for utility plant for the years ended December 31, 2023, 2022 and 2021 was $104,325, $99,413 and $91,906, respectively. The cost of utility plant retired (less salvage) is charged to accumulated depreciation and no gain or loss is recognized. To the extent SJW Group recovers retirement costs through rates during the life of the associated asset and before the costs are incurred, these amounts result in a regulatory liability being reported based on the amounts previously recovered through customer rates until the costs to retire those assets are incurred.

Allowance For Funds Used During Construction ("AFUDC")

AFUDC represents the capitalized costs of borrowed funds or a return on equity funds used to finance utility plant under construction and is capitalized as part of construction work in progress. AFUDC is recorded to the extent approved by the respective states' utility regulators and is recovered through water rates as the utility plant depreciates. The amount of AFUDC debt capitalized in 2023, 2022 and 2021 was $2,900, $4,703 and $4,422, respectively. Interest on long-term debt is presented net of AFUDC debt capitalized on the Consolidated Statement of Comprehensive Income. The amount of AFUDC equity capitalized in 2023, 2022 and 2021 was $2,114, $1,551 and $1,926, respectively, reflected in "Other, net" on the Consolidated Statement of Comprehensive Income.

Intangible Assets

Finite-lived intangible assets are recorded at cost and are amortized using the straight-line method over the estimated useful life of the asset, ranging from 5 to 70 years. Indefinite-lived intangibles assets are not amortized, but instead are tested for impairment annually, or more frequently if events or changes in circumstances indicate that it is more likely than not that the asset is impaired. (see Note 8, "Intangible Assets").

Nonutility Properties and Real Estate Investments

Nonutility properties and real estate investments are recorded at cost and consist primarily of land and buildings. Net gains and losses from the sale of nonutility properties and real estate investments are recorded as a component of other (expense) income and operating expense, respectively, in the Consolidated Statements of Comprehensive Income. Nonutility property is property that is neither used nor useful in providing water utility services to customers and is excluded from rate base for rate-setting purposes. SJWC recognizes gain or loss on the disposition of nonutility property in accordance with California Public Utilities Commission ("CPUC") Code Section 790, whereby the net proceeds are reinvested back into property that is useful in providing water utility services to customers. CTWS and TWC do not have regulatory restrictions on the use of proceeds from the sale of nonutility property. There is no depreciation associated with Water Utility Services nonutility property as it is all undeveloped land.

The major components of nonutility properties and real estate investments are as follows as of December 31:

	2023	2022
Land	$ 4,137	12,615
Wholesale water supply assets	8,465	—
Buildings and improvements	748	45,418
Subtotal	13,350	58,033
Less: accumulated depreciation and amortization	194	17,158
Total	$ 13,156	40,875

Depreciation on buildings and improvements for real estate investments is computed using the straight-line method over the estimated useful lives of the assets, ranging from 7 to 39 years.

In March 2023, SJW Land Company entered into a broker agreement to sell its warehouse buildings and land property located in Knoxville, Tennessee. The company reclassified the Tennessee properties from held-and-used to held-for-sale at March 31, 2023. The Company's intention is to complete the sale of these assets within a twelve-month period. The company records the Tennessee properties at the lower of their carrying value or estimated fair value less cost to sell, and also stopped recording depreciation on assets held for sale. SJW Group's broker provides the estimated fair value of the Tennessee properties. No impairment has been recorded as the estimated fair value less cost to sell exceeds carrying value. The property is classified as part of the Real Estate Services reportable segment.

The sale of the Tennessee properties does not represent a strategic shift that has or will have a major effect on SJW Group; therefore, the sale does not qualify for treatment as a discontinued operation.

The following represents the major components of the Tennessee warehouse building and land property recorded in assets held-for-sale on the Consolidated Balance Sheets as of December 31, 2023:

	2023
Land	$ 13,170
Buildings and improvements	44,950
Subtotal	58,120
Less: accumulated depreciation and amortization	17,270
Total	$ 40,850

On October 29, 2021, SJWC sold two nonutility properties located in San Jose, California for $13,150. For the year ended December 31, 2022, SJW Group recognized the pre-tax gain on the sale of nonutility properties of $7,230, after selling expenses of $277 for one of the properties sold, and a gain of $5,442 which was deferred in 2021 pending the CPUC review. On February 15, 2022, the CPUC review was complete and SJWC recognized the deferred gain on sale of nonutility property in 2022.

A former wholly owned subsidiary of SJW Group, Texas Water Alliance, was sold to Guadalupe-Blanco River Authority ("GBRA") in 2017. The sales agreement with GBRA included a holdback amount of $3,000 to be paid to SJW Group on June 30, 2021, subject to reduction under certain conditions. SJW Group received the holdback amount without reduction from the GBRA on June 29, 2021 and recognized a pre-tax gain on sale of $3,000.

Also, on October 29, 2021, SJW Land sold undeveloped land located in San Jose, California for $2,600. SJW Group recognized a pre-tax gain on the sale of real estate investments of $927, after selling expenses of $121.

The following schedule shows the future minimum rental payments to be received from third parties under operating leases that have remaining noncancelable lease terms in excess of one year as of December 31, 2023:

Year ending December 31:	Rental Revenue
2024	$ 4,758
2025	5,063
2026	5,290
2027	3,990
2028	1,679
Thereafter	—

Business Combinations and Asset Acquisitions

SJW Group applies the provisions of Financial Accounting Standards Board ("FASB") ASC Topic 805— "Business Combinations" for the accounting related to business and asset acquisitions. First, SJW Group applies the guidance in Topic 805 to determine whether a transaction represents a business combination or an acquisition of assets. If the transaction is a business combination, Topic 805 requires SJW Group to recognize separately from goodwill the assets acquired and the liabilities assumed at the acquisition date fair values. Goodwill as of the acquisition date is measured as the excess of consideration transferred over the net of the acquisition date fair values of the assets acquired and the liabilities assumed. If the transaction is an acquisition of assets, the cost of the transaction, including transaction costs, is allocated to the individual assets acquired and liabilities assumed on a relative fair value basis without recognition of goodwill. While SJW Group uses best available estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date, such estimates are inherently uncertain and subject to refinement. For business combinations, Topic 805 provides for a measurement

period from the acquisition date of up to one year, during which we may record adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to our Consolidated Statements of Comprehensive Income. Accounting for business combinations and asset acquisitions requires SJW Group to make significant estimates and assumptions, especially at the acquisition date, including estimates for intangible assets, contractual obligations assumed and pre-acquisition contingencies. Although SJW Group believes that the assumptions and estimates we make are reasonable and appropriate, they are based in part on historical experience and information obtained from the acquired company's management and are inherently uncertain. Events and circumstances may occur that may affect the accuracy or validity of such assumptions, estimates or actual results. Examples of critical estimates in valuing certain of the intangible assets we have acquired include, but are not limited to: future expected cash flows from services; historical and expected customer attrition rates and anticipated growth in revenue from acquired customers; the expected use of the acquired assets; and discount rates. See Note 14, "Acquisitions" for further information on business combinations and asset acquisitions.

Impairment of Long-Lived Assets and Goodwill

In accordance with the requirements of FASB ASC Topic 360—"Property, Plant and Equipment," the long-lived assets of SJW Group, including property, plant and equipment and finite-lived intangible assets, are reviewed for impairment when changes in circumstances or events indicate that the carrying amount of the assets may not be recoverable. In assessing qualitative factors, SJW Group considers the impact of these key factors: change in industry and competitive environment, financial performance, and other relevant company-specific events. When such changes in circumstances or events occur, the company assesses recoverability by determining whether the carrying value of such assets will be recovered through the undiscounted expected future cash flows. To the extent an impairment exists, the asset is written down to its estimated fair value with a corresponding charge to operations in the period in which the impairment is identified. No impairments occurred during 2023 and 2022. During the year ended December 31, 2021, SJW Group determined that an implementation project for a customer care billing system at TWC will no longer be pursued and accordingly wrote-off $2,211 of accumulated costs for the project that were previously recorded as construction work in progress on the Consolidated Balance Sheets.

Goodwill is not amortized but is tested for impairment annually on October 1st or more frequently if an event occurs or circumstances change that would more likely than not, reduce the fair value of a reporting unit below its carrying amount. Indefinite-lived intangible assets, other than goodwill, are not amortized but are tested for impairment annually on October 1st or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of indefinite-lived intangible assets below their carrying amount. In performing impairment tests of goodwill and indefinite-lived intangible assets, SJW Group first performs a qualitative assessment to determine whether it is necessary to perform the quantitative impairment test. In assessing the qualitative factors, SJW Group considers the impact of these key factors: change in industry and competitive environment, financial performance, macroeconomic conditions, and other relevant Company-specific events. If SJW Group determines that as a result of the qualitative assessment it is more likely than not (> 50% likelihood) that the fair value is less than carrying amount, then a quantitative test is performed. As of October 1, 2023, SJW Group performed qualitative assessments of both goodwill and indefinite-lived intangible assets and found no indicators of impairment and therefore did not perform quantitative impairment tests. No impairments of goodwill or indefinite-lived intangible assets occurred during 2023, 2022 or 2021.

Cash and Cash Equivalents

Cash and cash equivalents primarily consisted of cash on deposit with banks and short-term, highly liquid investments with original maturities of three months or less. Restricted funds consisted of proceeds from state revolving fund bond issuances to MWC of $4,000 on December 23, 2020, for capital expenditures. Proceeds were held by a trustee for the bonds and released when the funding conditions were met. As of December 31, 2021, $2,789 of the proceeds from the December 23, 2020, bond were released by the trustee, and the balance of $1,211 was released during the year ended December 31, 2022.

Accounts Receivable

Accounts receivable are recorded at the invoiced amounts. The allowance for uncollectible accounts is SJW Group's best estimate of credit losses in its existing accounts receivable and is determined based on current expected losses. The estimate is based on historical loss information adjusted for current conditions. Accounts balances are written off against the allowance when it is probable the receivable will not be recovered or is over a certain number of days outstanding.

Financial Instruments and Investments

The following instruments are not measured at fair value on the company's Consolidated Balance Sheets but require disclosure of fair values: cash and cash equivalents, accounts receivable, accounts payable, and lines of credit. The estimated fair value of such instruments approximates their carrying value as reported on the Consolidated Balance Sheets. The fair value of such

56

financial instruments are determined using the income approach based on the present value of estimated future cash flows. The fair value of these instruments would be categorized as Level 2 in the fair value hierarchy, with the exception of cash and cash equivalents, which would be categorized as Level 1. The fair value of long-term debt is discussed in Note 6, "Long-Term Debt" and pension plan assets in Note 11, "Benefit Plans."

SJW Group has investments in company owned life insurance which are valued at cash surrender value of the policies as reported by the insurer. The value of these contracts is based principally on a referenced pool of investment funds that actively redeem shares, are observable and measurable, and are presented in "Investments" on SJW Group's Consolidated Balance Sheets. As of December 31, 2023 and 2022, the value of the company owned life insurance was $8,220 and $7,342, respectively, of which $3,937 and $3,420, respectively, was related to assets to fund CTWS' supplemental retirement plan agreements. See discussion on pension plans in Note 11, "Benefit Plans."

Income Taxes

Income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the effect of temporary differences between financial and tax reporting. Deferred tax assets and liabilities are measured using current tax rates in effect. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date.

To the extent permitted by the regulators, investment tax credits resulting from public utility plant additions are deferred and amortized over the estimated useful lives of the related property. In addition, investment tax credits resulting from other asset additions are recognized in the year the property is put in service.

Advances for Construction and Contributions in Aid of Construction

In California, advances for construction received after 1981 are primarily refunded ratably over 40 years. In Connecticut and Maine, advances for construction are refunded as services are connected to the main, over periods not exceeding 15 years and in Texas advances for construction are non-refundable. Estimated refunds for the next five years and thereafter are shown below:

	Estimated Refunds
2024	$ 3,034
2025	2,970
2026	2,878
2027	2,793
2028	2,726
Thereafter	46,574

As of December 31, 2023, advances for construction were $146,582 of which $55,170 was related to non-refundable advances for construction and $30,437 was related to advances which are refunded based on service connections made. As of December 31, 2023 and 2022, the fair value of the advances for construction refunded ratably over 40 years is $40,915 and $44,715, respectively.

Contributions in aid of construction represent funds or property received from developers that are not refundable under applicable regulations. Depreciation applicable to utility plant constructed with these contributions is charged to contributions in aid of construction.

Customer advances and contributions in aid of construction received subsequent to 1986 and prior to June 12, 1996, generally must be included in federal taxable income, except for CTWS. Taxes paid relating to advances and contributions are recorded as deferred tax assets for financial reporting purposes and are amortized over 40 years for advances and over the tax depreciable life of the related asset for contributions. Receipts subsequent to June 12, 1996, are generally exempt from federal taxable income, unless specifically prescribed under treasury regulations, including CTWS.

Advances and contributions received subsequent to 1991 and prior to 1997 are included in state taxable income, except for CTWS.

Asset Retirement Obligation

SJW Group's asset retirement obligation is recorded as a liability included in other non-current liabilities. It reflects principally the retirement costs of wells and other anticipated clean-up costs, which by law, must be remediated upon retirement.

As of December 31, 2023 and 2022, the asset retirement obligation is as follows:

	2023	2022
Estimated future retirement costs	$ 4,198	4,426
Discount rate	6 %	6 %
Retirement obligation, present value	$ 862	920

Revenue

SJW Group recognizes revenue under ASC Topic 606—"Revenue from Contracts with Customers" for metered revenue of Water Utility Services, which includes billings to customers based on meter readings plus an estimate of water used between the customers' last meter reading and the end of the accounting period. SJW Group satisfies its performance obligation upon delivery of water to the customer at which time the customer consumes the benefits provided by the company. The customer is generally billed on a quarterly, monthly, or bi-monthly basis after water delivery has occurred. The customer is charged both a service charge which is based upon meter size and covers a portion of the fixed costs of furnishing water to the customer and a consumption charge based on actual water usage. Unbilled revenue from the last meter reading date to the end of the accounting period is estimated based on the most recent usage patterns, production records and the effective tariff rates. As the company has the right to bill for services that it has provided, SJW Group estimates the dollar value of deliveries during the unbilled period and recognizes the associated revenue. Actual results could differ from those estimates, which may result in an adjustment to revenue when billed in a subsequent period.

SJW Group also recognizes revenue under ASC Topic 980-605-25—"Alternative Revenue Programs." Under programs established by the CPUC and Public Utilities Regulatory Authority of Connecticut ("PURA"), allowing for automatic adjustment of future rates, the company recognizes revenue when it is objectively determinable, probable of recovery and expected to be collected within 24 months of the year-end in which the revenue is recognized. A reserve, based on an estimate of actual usage over the recovery period, is recorded for any amounts SJW Group estimates will not be collected within the 24-month period. SJW Group's alternative revenue programs include SJWC's Water Conservation Memorandum Account ("WCMA") and CTWS's Water Rate Adjustment mechanism ("WRA"). See further discussion on WCMA and WRA in Note 3, "Regulatory Matters."

SJW Group's revenues also reflect the impact of other balancing and memorandum accounts and other regulatory mechanisms that are accounted for under FASB ASC Topic 980—"Regulated Operations." Balancing and memorandum accounts are recognized when it is probable that future recovery of previously incurred costs or future refunds that are to be credited to customers will occur through the ratemaking process. See further discussion in Note 3, "Regulatory Matters."

SJW Group also recognizes revenue from rental income, which represents lease rental income. Tenants pay monthly in accordance with lease agreements and SJW Group recognizes the income ratably over the lease term as this is the most representative of the pattern in which the benefit is expected to be derived from SJW Group's underlying asset.

Detail of SJW Group's revenue is as follows for the years ended December 31:

	2023	2022	2021
Revenue from contracts with customers	$ 678,168	586,918	559,568
Alternative revenue programs, net	3,634	(1,312)	5,304
Other balancing and memorandum accounts and regulatory mechanisms, net	(17,123)	29,487	3,435
Rental income	5,684	5,605	5,379
	$ 670,363	620,698	573,686

Revenue also includes a surcharge collected from regulated customers that is paid to the CPUC. This surcharge is recorded both in operating revenues and administrative and general expenses. For the years ended December 31, 2023, 2022 and 2021, the surcharge was $4,085, $6,121 and $5,691, respectively.

Share-Based Compensation

SJW Group calculates the fair value of service-based and performance-based restricted stock awards based on the grant date fair value of the company's stock price reduced by the present value of the dividends expected to be declared on outstanding shares.

SJW Group utilizes the Monte Carlo valuation model, which requires the use of subjective assumptions, to compute the fair value of market-vesting restricted stock units.

The compensation cost for service-based restricted stock awards are charged to income on a straight-line basis over the requisite service period, which is the vesting period. For performance-based stock awards, compensation expense is charged to income on a straight-line basis over the requisite service period based on expected attainment of performance targets. Changes in the estimates of the expected attainment of performance targets will result in a change in the number of shares that are expected to vest which may cause a cumulative catch up for the amount of share-based compensation expense during each reporting period in which such estimates are altered. Forfeitures are accounted for as they occur.

Earnings per Share

Basic earnings per share is calculated using income available to common stockholders, divided by the weighted average number of shares outstanding during the period. Diluted earnings per share is calculated using income available to common stockholders divided by the weighted average number of shares of common stock including both shares outstanding and shares potentially issuable in connection with restricted common stock awards under SJW Group's long-term incentive plans, shares potentially issuable under the performance stock plans assumed through the business combination with CTWS, and shares potentially issuable under SJW Group's employee stock purchase plans. Restricted common stock units of 14,193, 25,127 and 16,347 as of December 31, 2023, 2022 and 2021, respectively, were excluded from the dilutive earnings per share calculation as their effect would have been anti-dilutive.

Reclassifications

Certain reclassifications have been made to prior periods in the Consolidated Financial Statements and Notes to conform to the current presentation.

New Accounting Standards

In November 2023, the FASB issued Accounting Standards Update ("ASU") 2023-07, "Improvements to Reportable Segment Disclosures." ("ASU 2023-07"). Among other changes, the ASU requires disclosure of significant segment expenses and extends certain annual disclosures to interim periods. The ASU is effective for SJW Group beginning with its annual financial statements for the year ending December 31, 2024. Early adoption is permitted. SJW Group is currently evaluating the requirements of ASU 2023-07.

In December 2023, the FASB issued ASU 2023-09, "Improvements to Income Tax Disclosures." The ASU amends certain income tax disclosure requirements, including adding requirements to present the reconciliation of income tax expense computed at the statutory rate to actual income tax expense using both percentages and amounts and providing a disaggregation of income taxes paid. Further, certain disclosures are eliminated, including the current requirement to disclose information on changes in unrecognized tax benefits in the next 12 months. The ASU is effective for SJW Group beginning with its annual financial statements for the year ending December 31, 2025. Early adoption is permitted. SJW Group is currently evaluating the requirements of ASU 2023-09.

Note 3. Regulatory Matters

Regulation

Water Utility Services, excluding non-tariffed activities, are subject to rate regulation based on cost recovery and meets the criteria of accounting guidance for rate-regulated operations under ASC Topic 980, which affects the timing of the recognition of certain revenues and expenses. SJW Group's consolidated financial statements reflect the actions of regulators in the rate-making process. The rate-making process is intended to provide revenues sufficient to recover normal operating expenses, provide funds for replacement of water infrastructure and produce a fair and reasonable return on stockholder common equity.

Water Utility Services, excluding non-tariffed activities, recognizes regulatory assets for incurred costs that are deemed probable of recovery from customers. Also, Water Utility Services recognizes regulatory liabilities for amounts expected to be refunded to customers in the rate-making process and for amounts collected in advance of the related expenditures. Regulatory assets or liabilities are also recognized for special revenue programs such as WCMA and WRA in accordance with guidance on alternative revenue programs under ASC Topic 980. Application of ASC 980, including determining whether recovery is probable, requires significant judgment by management and includes assessing evidence that may exist prior to regulatory authorization, including regulatory rules and decisions, historical ratemaking practices, and other facts and circumstances that would indicate that recovery or refund is probable.

If the regulated utility determines that it is no longer probable that regulatory assets or liabilities would be recovered or refunded through the regulatory process, or if the utility ceased to be subject to rate regulation, the affected regulatory assets and liabilities would be derecognized with a corresponding adjustment to income in the period in which that determination was made.

SJWC has established balancing accounts for the purpose of tracking the under-collection or over-collection associated with expense changes and the revenue authorized by the CPUC to offset those expense changes. In 2022, SJWC's general rate case decision approved the use of the Full Cost Balancing Account to track the water supply costs and energy consumption. The Monterey Water Revenue Adjustment ("MWRAM") balancing account tracks the difference between the revenue received for actual metered sales through the tiered volumetric rate and the revenue that would have been received with the same actual metered sales if a uniform rate would have been in effect.

SJWC also maintains memorandum accounts to track impacts due to catastrophic events, certain unforeseen water quality expenses related to new federal and state water quality standards, energy efficiency, water conservation, water tariffs, and other approved activities or as directed by the CPUC. The WCMA allows SJWC to track lost revenue, net of related water costs, associated with reduced sales due to water conservation and associated calls for water use reduction. SJWC records the lost revenue captured in the WCMA balancing accounts. Applicable drought surcharges collected are used to offset the revenue losses tracked in the WCMA. Mandatory water conservation requirements from Santa Clara Valley Water District ("Valley Water") ended on April 11, 2023, which also ended SJWC's Mandatory Conservation Plan, that included drought allocations and surcharges. On October 2, 2023, the CPUC approved the continuation of WCMA and Water Conservation Expense Memorandum Account under the voluntary call for conservation effective April 20, 2023. All balancing accounts and memorandum accounts not included for recovery or refund in current customer rates will be reviewed by the CPUC in SJWC's next general rate case or at the time an individual account balance reaches a threshold of 2% of authorized revenue, whichever occurs first.

CWC has been authorized by PURA to utilize WRA, a decoupling mechanism, to mitigate risks associated with changes in demand. The WRA is used to reconcile actual water demands with the demands projected in the most recent general rate case and allows the company to implement a surcharge or sur-credit as necessary to recover or refund the revenues approved in the general rate case. The WRA allows the company to defer, as a regulatory asset or liability, the amount by which actual revenues deviate from the revenues allowed in the most recent general rate proceedings.

As of December 31, 2023 and 2022, SJW Group's regulatory assets not earning a return primarily included unrecognized pensions and other postretirement benefits and business combinations debt premium. The total amount of regulatory assets not earning a return at December 31, 2023 and 2022, either by interest on the regulatory asset or as a component of rate base at the allowed rate of return was $43,141 and $66,373, respectively.

Regulatory Assets and Liabilities

Regulatory assets and liabilities are comprised of the following as of December 31:

	2023	2022
Regulatory assets:		
Income tax temporary differences (a)	$ 157,669	137,860
Unrecognized pensions and other postretirement benefits (b)	24,593	45,799
Business combinations debt premium (c)	14,855	17,396
Employee benefit costs (d)	9,815	8,068
MWRAM (e)	9,361	10,864
Customer Assistance Program ("CAP") balancing account (f)	5,457	3,417
Catastrophic event memorandum accounts ("CEMA") (g)	4,819	3,485
2022 general rate case interim memorandum account (h)	4,571	20,650
Water supply costs (i)	583	9,873
Other (j)	8,463	8,363
Total regulatory assets	240,186	265,775
Less: current regulatory asset (k)	4,276	19,740
Total regulatory assets, less current portion	$ 235,910	246,035
Regulatory liabilities:		
Cost of removal (l)	$ 346,418	—
Future income tax benefits due to customers (m)	88,610	94,426
Unrecognized pensions and other postretirement benefits (b)	20,196	14,307
Revenue adjustment mechanisms (n)	5,536	9,528
Other (o)	3,407	4,171
Total regulatory liabilities	464,167	122,432
Less: current regulatory liabilities (p)	3,059	3,672
Total regulatory liabilities, less current portion	$ 461,108	118,760

(a) Consists primarily of temporary income tax differences that are flowed through to customers, which will be recovered in future rates as these temporary differences reverse. The company expects to recover regulatory assets related to plant depreciation income tax temporary differences over the lives of the plant assets, which are between 4 to 100 years.

(b) Represents actuarial losses and gains and prior service cost that have not yet been recognized as components of net periodic benefit cost for certain pension and other postretirement benefit plans.

(c) Consists of debt fair value adjustments recognized through purchase accounting for the completed merger with CTWS in 2019.

(d) Includes deferrals of pension and other postretirement benefit expense and cost of accrued benefits for vacation.

(e) MWRAM is described in the previous section.

(f) Represents costs associated with SJWC's CAP.

(g) Primarily related to increased bad debt expenses associated with SJWC's response to COVID-19. The CPUC has authorized water utilities to activate CEMA accounts in order to track savings and costs related to SJWC's response to catastrophic events, which includes external labor and materials, increases in bad debt from suspension of shutoffs for non-payment, waived deposits and reconnection fees, and divergence from actual versus authorized usage.

(h) Represents the difference between revenues collected in interim rates in effect as of January 1, 2022 and revenues that would result from rates authorized in SJWC's 2022 general rate case retroactive to January 1, 2022.

(i) Reflects differences in actual water supply costs compared to amounts assumed in setting rates, including applicable changes and variations in costs and quantities that affect the overall mix of the water supply.

(j) Other includes other balancing and memorandum accounts and regulatory mechanisms, deferred costs for certain information technology activities, asset retirement obligations and rate case expenses.

(k) As of December 31, 2023, primarily relates to MWRAM. As of December 31, 2022, primarily relates to the 2022 general rate case interim memorandum account.

(l) Represents amounts collected in rates from customers for estimated costs to retire assets at the end of their expected useful lives before the costs are incurred. During 2023, the Company completed a new depreciation study and as of December 31, 2023, recorded a classification adjustment of $346,418 as cost of removal regulatory liabilities. As of December 31, 2022, cost of removal regulatory liabilities of $316,647 are included in net utility plant - accumulated depreciation and amortization. Management has concluded a classification adjustment to the prior year balance sheet is not necessary because the impact is immaterial.

(m) On December 22, 2017 the Tax Act was signed into law. The Tax Act included a reduction in the federal income tax rate from 35% to 21%. The rate reduction was effective on January 1, 2018 and resulted in a regulatory liability for the excess deferred income taxes. The benefit of amortization of excess deferred income taxes flows back to the customers under current normalization rules and agreed upon methods with the commissions.

61

(n) Consists of WRA and WCMA, which are described in the previous section.
(o) Other includes other balancing and memorandum accounts, other regulatory mechanisms and accrued tank painting costs.
(p) As of December 31, 2023 and 2022, primarily relates to WRA.

Note 4. Capitalization

SJW Group is authorized to issue 70,000,000 shares of common stock of $0.001 par value per share. At December 31, 2023 and 2022, 32,023,004 and 30,801,912, respectively, shares of common stock were issued and outstanding.

As of December 31, 2023 and 2022, 1,000,000 shares of preferred stock of $0.001 par value per share were authorized for SJW Group. At December 31, 2023 and 2022, no shares of preferred stock were issued or outstanding.

In March 2023, SJW Group entered into Amendment No. 1 to the equity distribution agreement (the "Equity Distribution Agreement"), dated November 17, 2021, between SJW Group and J.P. Morgan Securities LLC, Janney Montgomery Scott LLC, RBC Capital Markets, LLC and Wells Fargo Securities, LLC, pursuant to which the company may offer and sell shares of its common stock, $0.001 par value per share, from time to time in "at-the-market" offerings, having an aggregate gross sales price of up to $240,000. For the year ended December 31, 2023, SJW Group issued and sold a total of 1,119,806 shares of common stock with a weighted average price of $73.68 per share and received $80,659 in net proceeds under the Equity Distribution Agreement. Since the inception of the Equity Distribution Agreement, SJW Group has issued and sold 2,004,657 shares of common stock with a weighted average price of $73.57 for a total net proceeds of $143,998 and has a remaining $92,509 under the Equity Distribution Agreement to issue into shares.

On March 8, 2021, SJW Group entered into an underwriting agreement with J.P. Morgan Securities LLC, as the representative of the several underwriters named therein (the "Underwriters"), which provided for the issuance and sale by SJW Group to the Underwriters 1,030,000 shares of common stock, par value $0.001 per share, in an underwritten public offering (the "Offering"). The shares in the Offering were sold at a public offering price of $59.00 per share. SJW Group also granted the Underwriters an option to purchase up to 154,500 additional shares of common stock, which was exercised in full. The Offering closed on March 11, 2021, and the offering of option shares closed on March 16, 2021. SJW Group received net proceeds of $66,775 from the Offering and the sale of option shares, after deducting the underwriting discounts and commissions and offering expenses.

Note 5. Lines of Credit

SJW Group and its subsidiaries have unsecured line of credit agreements where borrowings are used to refinance existing debt, for working capital, and for general corporate purposes. A summary of the line of agreements as of December 31, 2023 and 2022 are as follows:

		2023			2022
	Maturity Date	Line Limit	Amounts Outstanding	Unused Portion	Amounts Outstanding
Syndicated credit agreement:	August 2, 2028				
SJW Group		$ 50,000	10,000	40,000	—
SJWC		140,000	56,000	84,000	95,000
CTWS		90,000	53,000	37,000	20,000
TWC		20,000	2,500	17,500	—
Total syndicated credit agreement		300,000	121,500	178,500	115,000
CTWS credit agreement	August 2, 2028	10,000	10,000	—	4,578
CTWS credit agreement	May 15, 2025	40,000	40,000	—	40,000
		$ 350,000	171,500	178,500	159,578

SJW Group, SJWC, TWC, and CTWS have entered into a $300,000 credit agreement (the "Credit Agreement") with JPMorgan Chase Bank, N.A., as Administrative Agent ("JP Morgan"), Wells Fargo Bank, National Association, as Documentation Agent, and a syndicate of banks dated August 2, 2022. Proceeds of borrowings under the Credit Agreement will be used for refinancing existing debt, working capital, and general corporate purposes. The Credit Agreement had a maturity date of August 2, 2027. On August 2, 2023, SJW Group, SJWC, TWC, and CTWS entered into the First Amendment to the Credit Agreement with JPMorgan Chase Bank which provided for, among other matters, an extension of the maturity date from August 2, 2027 to August 2, 2028.

Under the terms of the Credit Agreement, each of SJW Group, SJWC, TWC, and CTWS is a borrower with several and not joint liability. Each borrower has an initial borrowing entitlement, or sublimit, which can be periodically adjusted from time to time as set forth in the Credit Agreement. The initial sublimit of each borrower is as presented in the table above.

Borrowings under the Credit Agreement bear interest at either the Alternative Base Rate (as defined in the Credit Agreement and hereinafter referred to as "ABR") or the Adjusted Term Secured Overnight Financing Rate (as defined in the Credit Agreement and hereinafter referred to as "SOFR"). ABR borrowings (which are borrowings bearing interest at a rate determined by reference to ABR) will bear interest at a rate per annum equal to ABR plus the applicable rate. SOFR borrowings (which are borrowings bearing interest at a rate determined by reference to SOFR) will bear interest at a rate per annum equal to SOFR plus the applicable rate. The applicable rate and pricing is variable depending on credit ratings of the borrower.

The Credit Agreement includes a financial covenant that requires each of the borrowers to maintain its funded debt to capitalization ratio at or below 70%.

On October 31, 2022, CTWS and Citizens Bank, National Association, entered into a fifth modification to the amended and restated revolving credit facility of $10,000 to update the interest rate from London Interbank Offered Rate ("LIBOR") plus the applicable rate to SOFR plus the applicable rate. In August 2023, SJW Group, SJWC, TWC, and CTWS entered into the First Amendment to Credit Agreement with JPMorgan Chase Bank which provided for, among other matters, an extension of the maturity date from August 2, 2027 to August 2, 2028.

On February 6, 2023, CTWS modified its existing $40,000 credit agreement with CoBank to update the interest rate from LIBOR plus the applicable rate to SOFR plus the applicable rate.

On February 6, 2023, CTWS entered into a third amendment to the amended and restated promissory note and supplement with CoBank to update the one of the stated terms regarding one of interest rate options from LIBOR plus the applicable rate to SOFR plus the applicable rate. CTWS previously locked the interest rate under this agreement such that this amendment has no impact.

The weighted-average interest rate on short-term borrowings outstanding at December 31, 2023 was 6.48% compared to 5.40% at December 31, 2022.

All of SJW Group's and subsidiaries' lines of credit contain customary representations, warranties and events of default, as well as certain restrictive covenants customary for facilities of this type, including restrictions on indebtedness, liens, acquisitions and investments, restricted payments, asset sales, and fundamental changes. The lines of credit also include certain customary financial covenants such as a funded debt to capitalization ratio and a minimum interest coverage ratio. As of December 31, 2023, SJW Group and its subsidiaries were in compliance with all covenants on the lines of credit.

Note 6. Long-Term Debt

Long-term debt as of December 31 was as follows:

Description	Rate	Maturity	2023	2022
SJW Group Senior notes (a)	2.47% - 3.53%	2029 - 2039	560,000	560,000
SJWC:				
Senior notes (a)	3.00% - 7.37%	2024 - 2053	470,000	400,000
California Pollution Control Financing Authority Revenue Bond	4.75%	2046	70,000	70,000
Total SJWC			540,000	470,000
CTWS bank term loans	4.09%, 4.15%	2027, 2037	16,457	18,444
CWC:				
Connecticut Innovations Revenue Bonds, variable rate		2028 - 2029	22,050	22,050
Senior notes (a)	3.07% - 4.71%	2037 - 2052	195,000	195,000
Bank term loans	4.04% - 4.75%	2028 - 2036	96,295	96,295
Total CWC			313,345	313,345
TWC:				
Senior note (a)	6.27%	2036	15,000	15,000
Bank term loans	4.01% - 5.54%	2041, 2052	45,000	45,000
Total TWC			60,000	60,000
TWR seller financing debt	5.61%	2053	29,000	—
MWC:				
State revolving fund loans	0.00% - 2.23%	2023 - 2048	14,239	15,699
Other First Mortgage Bond	8.95%	2024	900	1,800
Bank term loans	3.89% - 5.51%	2024 - 2043	49,500	49,500
Total MWC			64,639	66,999
Total debt			1,583,441	1,488,788
Unamortized debt premium and discount, net			1,583	17,396
Unamortized debt issuance costs			(9,350)	(9,859)
Current portion			(48,975)	(4,360)
Total long-term debt, less current portion			$ 1,526,699	1,491,965

(a) Senior notes held by institutional investors are unsecured obligations of SJW Group, SJWC, CWC, TWC and MWC and require interest-only payments until maturity. To minimize issuance costs, the companies' debt has primarily been placed privately.

The following is a table of the consolidated company's schedule of principal payments:

Year	
2024	48,975
2025	3,648
2026	23,740
2027	2,995
2028	44,486
Thereafter	1,459,597

The estimated fair value of long-term debt as of December 31, 2023 and 2022 was $1,394,412 and $1,294,354, respectively, and was determined using a discounted cash flow analysis, based on the current rates for similar financial instruments of the same duration and creditworthiness of the company. Of the total fair value of long-term debt, $1,378,683 would be categorized as Level 2 in the fair value hierarchy and $15,729 would be categorized as Level 3 in the fair value hierarchy.

SJWC

On July 14, 2022, SJWC entered into a note purchase agreement with certain affiliates of New York Life Insurance, Metropolitan Life Insurance, Northwestern Mutual Life Insurance, and John Hancock Life Insurance (collectively the "Purchasers"), pursuant to which the company sold an aggregate principal amount of $70,000 of its 4.85% Senior Notes, Series P ("Series P Notes") to the Purchasers. The Series P Notes are unsecured obligations of SJWC and are due on February 1, 2053. Interest is payable semi-annually in arrears on February 1st and August 1st of each year. The note purchase agreement contains customary affirmative and negative covenants for as long as the Series P Notes are outstanding. The Series P Notes are also subject to customary events of default. The closing of the note purchase agreement occurred on January 25, 2023.

CWC

On June 28, 2022, CWC entered into a note purchase agreement with certain affiliates of New York Life Insurance Company, pursuant to which CWC sold an aggregate principal amount of $25,000 of its 4.71% Senior Notes, Series 2022, due 2052. The closing of the note purchase agreement occurred on December 14, 2022. The Series 2022 Notes are unsecured obligations of CWC. Interest is payable semi-annually in arrears on June 15th and December 15th of each year.

On November 15, 2023, CWC entered into a note purchase agreement with certain affiliates of American United Life Insurance, The State Life Insurance, Mutual of Omaha Insurance, and United of Omaha Life Insurance, pursuant to which the company sold an aggregate principal amount of $25,000 of its 6.46% Senior Notes, Series 2023 ("Series 2023 Notes"). The Series 2023 Notes are unsecured obligations of CWC and are due on January 1, 2054. Interest is payable semi-annually in arrears on January 15th and July 15th of each year. The closing of the notes purchase agreement occurred on January 22, 2024.

TWC

On October 31, 2022, TWC entered into a credit with a commercial bank, pursuant to an existing master loan agreement under which the commercial bank issued TWC a promissory note on the same date with an aggregate principal amount of $15,000 at a fixed interest rate of 5.54% due on May 30, 2052. The notes are unsecured obligations of TWC. Interest is payable quarterly in arrears on the 20th day of January, April, July and October of each year.

TWR

In August 2023, TWR closed on an asset acquisition that included an obligation for a post-closing production payment of $29,000 to the seller over a period of up to 29 years. The repayment schedule is based on the quantity of groundwater produced from the acquired wells, subject to certain provisions in the purchase agreement. The difference between the gross obligation of $29,000 and the fair value at the date of acquisition is reflected as a debt discount and is being amortized as interest expense using the effective interest method over the life of the obligation.

MWC

On April 6, 2022, MWC entered into a credit agreement with a commercial bank, pursuant to an existing master loan agreement under which the commercial bank issued MWC a promissory note on the same date with an aggregate principal amount of $15,000 at a fixed interest rate of 4.54%, due May 31, 2042. The notes are unsecured obligations of MWC. Interest is payable quarterly in arrears on the 20th day of January, April, July and October of each year. Proceeds from the borrowing were received on May 13, 2022.

Financial Covenants

The debt and credit agreements of SJW Group and its subsidiaries contain various financial and other covenants. Non-compliance with these covenants could result in accelerated due dates and termination of the agreements. In addition, the credit agreements contain customary representations and warranties and subject to customary events of default, which may result in outstanding notes becoming immediately due and payable. As of December 31, 2023, SJW Group and its subsidiaries were in compliance with all covenants related to its long-term debt agreements.

Note 7. Income Taxes

The components of income tax expense were:

	2023	2022	2021
Current:			
Federal	$ 10,185	8,570	8,587
State	4,281	3,170	2,633
Deferred:			
Federal	(8,871)	(3,223)	(3,811)
State	361	(21)	960
	$ 5,956	8,496	8,369

The following table reconciles income tax expense to the amount computed by applying the federal statutory rate to income before income taxes of $90,943, $82,324 and $68,847 in 2023, 2022 and 2021, respectively:

	2023	2022	2021
Income tax at federal statutory rate	$ 19,098	17,288	14,458
Increase (decrease) in taxes attributable to:			
State taxes, net of federal income tax benefit	6,001	5,328	4,572
Uncertain tax positions	(4,330)	1,483	1,678
Property flow-through	(9,045)	(13,091)	(8,573)
Reversal of excess deferred taxes recognized in regulatory liability	(3,625)	(3,885)	(3,295)
Pension flow-through	(597)	27	429
Stock-based compensation	(491)	(297)	(331)
Other items, net	(1,055)	1,643	(569)
	$ 5,956	8,496	8,369

The components of the net deferred tax liability as of December 31 was as follows:

	2023	2022
Deferred tax assets:		
Advances and contributions	$ 25,714	25,462
Unamortized investment tax credit	517	575
Pensions, postretirement benefits and stock-based compensation	17,844	23,161
Debt premium, net	4,157	4,868
California franchise tax	713	640
Deferred revenue	841	1,444
Tax related regulatory liability	24,358	25,750
Other	7,077	6,627
Total deferred tax assets	81,221	88,527
Deferred tax liabilities:		
Utility plant	243,786	229,500
Pension and postretirement	13,247	17,709
Deferred gain and other-property	6,456	5,982
Regulatory asset - business combinations debt premium, net	4,157	4,868
Intangibles	2,693	2,943
Tax related regulatory asset	44,155	38,599
Section 481(a) adjustments	—	1,573
Other	5,255	5,508
Total deferred tax liabilities	319,749	306,682
Net deferred tax liabilities	$ 238,528	218,155

Management evaluates the realizability of deferred tax assets based on all available evidence, both positive and negative. The realization of deferred tax assets is dependent on our ability to generate sufficient future taxable income during periods in which the deferred tax assets are expected to reverse. Based on all available evidence, management believes it is more likely than not that SJW Group will realize the benefits of its deferred tax assets. Net operating loss carryforwards expire beginning in 2032 and ending in 2039. As of December 31, 2023, the estimated amount of net operating loss carryforwards available to offset future taxable income for Connecticut purposes is $18,369. The estimated state tax credit carryforwards are $707 which will expire beginning in 2024 and ending in 2040.

The change in the net deferred tax liabilities of $20,373 in 2023 included other non-cash items primarily consisting of regulatory assets and liabilities relating to income tax temporary differences.

The total amount of unrecognized tax benefits, before the impact of deductions for state taxes, excluding interest and penalties was $4,511 and $9,004 as of December 31, 2023 and 2022, respectively. The amount of tax benefits, net of any federal benefits for state taxes that would impact the effective rate, if recognized, is approximately $4,048 and $8,262 as of December 31, 2023 and 2022, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2023	2022	2021
Balance at beginning of year	$ 9,004	7,961	6,468
Increase related to tax positions taken during the current year	231	1,549	1,376
Increase related to tax positions taken during a prior year	364	—	117
Reductions related to statute expiration	(1,191)	(284)	—
Reductions related to tax positions taken in a prior year	(3,897)	(222)	—
Balance at end of year	$ 4,511	9,004	7,961

The decrease in gross unrecognized tax benefits in 2023 was primarily due to the release of an uncertain tax position reserve relating to repairs tax deductions. In April 2023, the IRS issued additional tax guidance that has allowed the company to revisit

certain historical income tax reserves. Pursuant to the issuance of this guidance, which provided additional clarification regarding some of the uncertain tax areas, the company re-evaluated the risk relating to repair deductions. The result of the analysis led to a release of an uncertain tax position reserve. The release relates to repairs expenditures which are more likely than not to be sustained on audit. The release due to re-evaluation of the reserve was $3,125.

SJW Group's policy is to classify interest and penalties associated with unrecognized tax benefits, if any, in tax expense. Accrued interest expense, net of the benefit of tax deductions which would be available on the payment of such interest, is approximately $455 as of December 31, 2023. SJW Group has not accrued any penalties for unrecognized tax benefits. The amount of interest recognized in 2023 was a decrease to expense of $151.

SJW Group currently does not expect uncertain tax positions to change significantly over the next 12 months, except in the case of lapse of the statute of limitations.

SJW Group files U.S. federal income tax returns and income tax returns in various states and is subject to ordinary statute of limitation of three years for federal and three or four years for different state returns. However, due to tax attribute carryforwards, SJW Group is subject to examination for tax years 2012 forward for federal and state returns of CTWS and its subsidiaries. The statute of limitation for SJW Group returns is closed for these extended years and remains open for 2020 and forward for federal and 2019 or 2020 and forward for different states.

Note 8. Intangible Assets

Utility plant intangible assets consist of a concession fee paid to the City of Cupertino of $6,800 for operating the City of Cupertino municipal water system, $13,400 related to the purchase premium for customer relationships and other intangibles of $15,746 as of December 31, 2023. Other intangibles primarily consist of $5,984 for infrastructure related to the Cupertino service concession arrangement, $4,292 which was paid for service area and water rights by TWC, $1,400 for customer relationships and $1,040 incurred in conjunction with Valley Water water contracts related to the operation of SJWC. The nonutility other intangible asset represents water rights with an indefinite life.

Amortization expense for the intangible assets was $1,310, $3,869 and $1,553 for the years ended December 31, 2023, 2022 and 2021, respectively. Amortization expense for 2024 through 2028 and thereafter is anticipated to be approximately $1,310 per year.

The costs of intangible assets as of December 31, 2023 and 2022 are as follows:

	2023	2022
Utility Plant Intangible Assets:		
Concession fees	$ 6,800	6,800
Purchase premium customer relationships	13,400	13,400
Other intangibles	15,746	15,759
Utility plant intangible assets	35,946	35,959
Less: Accumulated amortization		
Concession fees	6,754	6,693
Purchase premium customer relationships	3,774	2,881
Other intangibles	10,361	10,018
Utility plant net intangible assets	$ 15,057	16,367
Other Intangible Asset:		
Water rights	$ 28,386	—

Note 9. Commitments

SJWC purchases water from Valley Water under terms of a master contract expiring in 2051. Delivery schedules for purchased water are based on a contract year beginning July 1, and are negotiated every three years under terms of the master contract with Valley Water. For the years ended December 31, 2023, 2022 and 2021, SJWC purchased from Valley Water 18.3 billion gallons ($111,173), 18.2 billion gallons ($96,793) and 19.4 billion gallons ($91,938), respectively, of contract water. On June 16, 2022, the Valley Water Board of Directors approved treated water deliveries reflecting the contractual delivery schedule reduced by 23% through June 30, 2024. Based on current prices and estimated deliveries, SJWC is committed to purchase from Valley Water a minimum of 90% of the reduced delivery schedule, or 18.9 billion gallons ($121,182) of water at the current

contract water rate of $6.411 million per billion gallons for the year ending December 31, 2024. Additionally, SJWC purchases non-contract water from Valley Water on an "as needed" basis if the water supply is available.

In 1997, SJWC entered into a 25-year contract agreement, as amended, with the City of Cupertino to operate the City's municipal water system. SJWC paid a one-time, upfront concession fee of $6,800 to the City of Cupertino and an incremental up-front payment of $5,000 to be used by the City of Cupertino for capital improvements. On February 25, 2022, SJWC received a letter from the City of Cupertino exercising their option to extend the term of the lease an additional two years through October, 1, 2024. SJWC paid an additional $1,600 concession fee for the extension period. The total fees paid for the agreement is being amortized over the contract term including the extension period.

CWC is able, but under no obligation, to purchase up to one million gallons of water per day, from the South Central Connecticut Regional Water Authority ("RWA"), at the then current wholesale rates per the agreement, $3.1 million per billion gallons as of December 31, 2023. CWC has an agreement with The Metropolitan District ("MDC") to purchase water from MDC to serve the Unionville system. The agreement became effective on October 6, 2000 and has a term of fifty years beginning May 19, 2003, the date the water supply facilities related to the agreement were placed in service. CWC agrees to purchase 0.28 billion gallons of water annually from MDC. The rate charged by the MDC at December 31, 2023 was three dollars and eighty cents per hundred cubic feet.

TWC has long-term contracts with the GBRA. The terms of the agreements expire in 2037, 2040, 2044 and 2050, respectively. The agreements, which are take-or-pay contracts, provide TWC with 7,650 acre-feet per year of water supply from Canyon Lake. The water rate may be adjusted by GBRA at any time, provided they give TWC a 60-day written notice on the proposed adjustment. TWC also has raw water supply agreements with the Lower Colorado River Authority and West Travis Public Utility Agency expiring in 2059 and 2046, respectively, to provide for 350 acre-feet of water per year from Lake Austin and the Colorado River, respectively, at prices that may be adjusted periodically by the agencies.

MWC has an agreement with the Kennebec Water District for potable water service. The agreement has been in place for 20 years and was extended on November 7, 2020 for a new term of up to 20 years. MWC guarantees a minimum consumption of 0.05 billion gallons of water annually. Water sales to MWC are billed at a wholesale discount of twenty cents per hundred cubic feet of water below Kennebec Water District's tariffed rates. The current tariff rate was one dollar and fifty-one cents per hundred cubic feet as of December 31, 2023.

As of December 31, 2023, SJWC had 387 employees, of whom 240 were members of unions. In the first quarter of 2023, SJWC executed three-year bargaining agreements with the International Union of Operating Engineers ("OE"), representing certain employees in the engineering department, and the Utility Workers of America ("UWUA"), representing the majority of all nonadministrative employees at SJWC covering the period from January 1, 2023 through December 31, 2025. The agreements include a 6% wage increase provided in 2023, 3.5% in 2024 and 5.5% in 2025 for union employees.

Note 10. Contingencies

SJW Group and its subsidiaries are subject to ordinary routine litigation incidental to its business. There are no pending legal proceedings to which SJW Group or any of its subsidiaries is a party, or to which any of its properties is the subject, that are expected to have a material effect on SJW Group's business, financial position, results of operations or cash flows.

Note 11. Benefit Plans

Pension Plans

SJW Group maintains noncontributory defined benefit pension plans for its eligible employees. SJWC employees hired before March 31, 2008 and CWC and MWC employees hired before January 1, 2009 are entitled to benefits under the pension plans based on the employee's years of service and compensation. For SJWC employees hired on or after March 31, 2008, benefits are determined using a cash balance formula based upon compensation credits and interest credits for each employee. Effective January 1, 2023, TWC employees became eligible to participate under SJWC's cash balance plan. Interest is credited based on the annual yield on 30-year Treasury bonds as of October for the preceding plan year with a minimum annual rate of 3.25% and a maximum annual rate of 6.00%. For the year ended December 31, 2023, interest credits assumption was 4.00%. Certain employees hired before March 1, 2012, and covered by a plan merged into the CWC plan in 2013 are also entitled to benefits based on the employee's years of service and compensation. CTWS employees hired on or after January 1, 2009 are entitled to an additional 1.5% of eligible compensation to their company sponsored savings plan. SJW Group does not have multi-employer plans.

The pension plans are administered by their respective committees where the investment strategy of the investments of the various pension and postretirement benefit plans are reviewed and approved to achieve the goals of income generation and long-term capital preservation. SJW Group engages third-party investment consultants and managers to assist with, among

other things, asset allocation strategy, investment policy advice, performance monitoring, and investment manager due diligence. Individual investment decisions have been delegated by the pension plan committees to the investment managers who are also monitored by an investment consultant. Investment managers are not permitted to invest outside of the asset class or strategy under the pension plans' investment guidelines. The committees ensure that the plans establish a target mix that is expected to achieve its investment objectives, by assuring a broad diversification of investment assets among investment types, while minimizing volatility of the target asset mix, unless market conditions make such a change appropriate to reduce risk. The pension plans require a minimum portion of plan assets to be allocated to fixed income securities and provide guidelines and restrictions on equity investments for the assets.

Plan assets are marked to market at each measurement date, resulting in unrealized actuarial gains or losses. Unrealized actuarial gains and losses on pension assets are amortized over the expected future working lifetime of participants for actuarial expense calculation purposes.

Generally, it is expected of the investment managers that the performance of the assets held in the pension plans, computed on a total annual rate of return basis, should meet or exceed specific performance standards over a three-to-five-year period and/or full market cycle. These standards include specific absolute and risk-adjusted performance standards over a three-to-five-year period and/or full market cycle. The expected long-term rate of return on the pension plan assets is between 6.00% and 6.75% for the year ended December 31, 2023.

SJW Group calculates the market-related value of defined benefit pension plan assets, which is defined under FASB ASC Topic 715 —"Compensation—Retirement Benefits" as a balance used to calculate the expected return on plan assets, using fair value. The fair value is based on quoted prices in active markets for identical assets and significant observable inputs.

Certain senior management hired before March 31, 2008 for SJWC and January 1, 2009 for CWC are eligible to receive additional retirement benefits under the supplemental executive retirement plans and retirement contracts (collectively, "SERP"). SJWC's senior management hired on or after March 31, 2008 are eligible to receive additional retirement benefits under SJWC's Cash Balance Executive Supplemental Retirement Plan ("Cash Balance Executive Supplemental Retirement Plan"). Both of the plans are non-qualified plans in which only senior management and other designated members of management may participate. The annual cost of the plans has been included in the determination of the net periodic benefit cost shown below. The SERP and Cash Balance Executive Supplemental Retirement Plan had a projected benefit obligation of $43,001 and $39,455 as of December 31, 2023 and 2022, respectively, and net periodic pension cost of $3,257, $4,400 and $4,456 for 2023, 2022 and 2021, respectively. For the years ended December 31, 2023, 2022 and 2021, the amounts not recognized as a component of net periodic benefit cost was $314, $1,640, and $901, respectively, recorded as other comprehensive income on the consolidated financial statements. SJWC's non-qualified plans are unfunded while CTWS's SERP is funded through investments consisting primarily of life insurance contracts and assets in a Rabbi Trust. As of December 31, 2023 and 2022, total investments made to fund CWC's SERP was $6,843 and $6,395, respectively, which is included in "Investments" in SJW Group's Consolidated Balance Sheets. The life insurance contracts are valued at cash surrender value of the policies as reported by the insurer. As of December 31, 2023 and 2022, the value of the life insurance contracts was $3,937 and $3,420, respectively.

The following tables summarize the fair values of the Rabbi Trust investment assets to fund CWC's SERP by major categories as of December 31, 2023 and 2022:

		Fair Value Measurements at December 31, 2023		
Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Money market funds	$ 71	71	—	—
Mutual funds	2,053	2,053	—	—
Fixed income	709	709	—	—
Total	$ 2,833	2,833	—	—

	Fair Value Measurements at December 31, 2022			
Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Money market funds	$ 49	49	—	—
Mutual funds	2,032	2,032	—	—
Fixed income	728	728	—	—
Total	$ 2,809	2,809	—	—

Other Postretirement Benefits

In addition to providing pension and savings benefits, the company also provides health care and life insurance benefits for eligible retired employees under the respective employer-sponsored postretirement benefits other than pension plans. The benefits are paid by the company and not from plan assets due to limitations imposed by Internal Revenue Service.

Flexible Spending Plan

SJW Group sponsors flexible spending account plans for its employees for the purpose of providing eligible employees with the opportunity to choose from among the fringe benefits available under the plans. The flexible spending plan is intended to qualify as a cafeteria plan under the provisions of the Internal Revenue Code Section 125. The flexible spending plan allows employees to save pre-tax income in a Health Care Spending Account ("HCSA") and/or a Dependent Care Spending Account ("DCSA") to help defray the cost of out-of-pocket medical and dependent care expenses. The annual maximum limit under the HCSA and DCSA plans is $3.1 and $5, respectively.

Savings Plans for Employees

SJW Group also sponsors salary deferral plans which are defined contribution plans that allow employees to defer and contribute a portion of their earnings to the plan. Contributions, not to exceed set limits, are matched by the company. SJW Group contributions were $3,902, $3,003 and $2,822 in 2023, 2022 and 2021, respectively. All of the company's contributions are invested at the direction of the employees in funds offered under the plans.

Special Deferral Election Plans and Deferral Election Program

SJW Group maintains a special deferral election plan and a deferred compensation plan and agreements for senior management and a deferral election program for non-employee directors allowing for the deferral of a portion of their earnings each year and to realize an investment return on those funds during the deferral period. Senior management and non-employee directors have to make an election on the deferral and distribution method of the deferrals before services are rendered. CWC's deferred compensation plan allows the company to make discretionary contributions. Senior management and non-employee directors had deferred $8,148 and $6,197 under the plans as of December 31, 2023 and 2022, respectively. As of December 31, 2023 and 2022, $6,223 and $4,508, respectively, of the total amount deferred is related to CWC agreements.

Assumptions Utilized on Actuarial Calculations

Net periodic cost for the defined benefit plans and other postretirement benefits was calculated using the following assumptions:

	Pension Benefits			Other Postretirement Benefits		
	2023	2022	2021	2023	2022	2021
	%	%	%	%	%	%
Discount rate	4.95 - 5.24	2.65 - 2.82	2.29 - 2.48	4.96 - 5.21	2.61 - 2.76	2.18 - 2.41
Expected return on plan assets	6.00, 6.75	6.50, 6.75	6.50, 6.75	4.20, 6.00	4.20, 6.00	4.20, 6.50
Rate of compensation increase	4.50, 5.00	4.00, 4.50	4.00	N/A	N/A	N/A

The expected rate of return on plan assets was determined based on a review of historical returns, for the pension plans and for medium- to large-sized defined benefit pension funds with similar asset allocations. This review generated separate expected returns for each asset class. These expected future returns were then blended based on the pension plans' target asset allocations.

Benefit obligations for the defined benefit plans and other postretirement benefits were calculated using the following weighted-average assumptions as of December 31:

	Pension Benefits		Other Postretirement Benefits	
	2023	2022	2023	2022
	%	%	%	%
Discount rate	4.99 - 5.03	4.95 - 5.24	4.95 - 5.01	4.96 - 5.21
Rate of compensation increase	4.50, 5.00	4.50 - 5.00	N/A	N/A

SJW Group utilized each plan's projected benefit stream in conjunction with the FTSE Pension Discount Curve in determining the discount rate used in calculating the pension and other postretirement benefits liabilities at the measurement date.

SJW Group has adopted MP-2021, Mortality Improvement Scales to determine mortality assumptions. The tables and scales reflect increasing life expectancies of participants in the United States. See also "Reconciliation of Funded Status" below.

For other postretirement benefits, the assumed healthcare cost trend rate for 2024 is 8.00%, grading down gradually to 4.50% by 2030.

Net Periodic Pension Costs

Net periodic costs for the defined benefit plans and other postretirement benefits for the years ended December 31 was as follows:

	Pension Benefits			Other Postretirement Benefits		
	2023	2022	2021	2023	2022	2021
Components of net periodic benefit cost						
Service cost	$ 7,569	9,359	9,730	$ 638	1,032	1,115
Interest cost	14,234	10,708	9,415	1,268	883	806
Expected return on assets	(15,440)	(18,841)	(18,019)	(860)	(1,047)	(970)
Amortization of prior service cost	15	17	41	—	—	—
Amortization of actuarial loss (gain)	2,210	4,620	6,901	(350)	(115)	257
Recognition of significant event	—	(1,595)	—	—	—	—
Net periodic benefit cost	$ 8,588	4,268	8,068	$ 696	753	1,208

Reconciliation of Funded Status

For the defined benefit plans and other postretirement benefits, the benefit obligation is the projected benefit obligation and the accumulated benefit obligation, respectively. The projected benefit obligations and the funded status of the defined benefit pension and other postretirement plans as of December 31 were as follows:

	Pension Benefits		Other Postretirement Benefits	
	2023	2022	2023	2022
Change in benefit obligation				
Benefit obligation at beginning of year	$ 289,123	383,838	$ 25,830	34,412
Service cost	7,569	9,359	638	1,032
Interest cost	14,234	10,708	1,268	883
Actuarial loss/(gain)	5,794	(94,793)	(2,645)	(9,360)
Implicit rate subsidy	—	—	(237)	(236)
Plan participants contributions	—	—	179	207
Administrative expenses paid	(137)	(136)	—	—
Benefits paid and settlements	(18,749)	(19,853)	(769)	(1,108)
Benefit obligation at end of year	$ 297,834	289,123	$ 24,264	25,830
Change in plan assets				
Fair value of assets at beginning of year	$ 251,960	310,176	$ 17,952	21,767
Actual return on plan assets	41,285	(49,939)	3,136	(3,606)
Employer contributions	11,145	11,712	920	626
Plan participants contributions	—	—	179	207
Administrative expenses paid	(137)	(136)	(67)	(65)
Benefits paid and settlements	(18,749)	(19,853)	(913)	(977)
Fair value of plan assets at end of year	285,504	251,960	21,207	17,952
Funded status at end of year	$ (12,330)	(37,163)	$ (3,057)	(7,878)

For the year ended December 31, 2023, the net actuarial loss on the benefit obligation was related primarily to a loss from changes in the discount rate of $1,188, a $1,993 loss from pension data changes, and a loss from mortality changes of $168. For the year ended December 31, 2022, the net actuarial gain of the benefit obligation was related primarily to a gain from changes of discount rate of $116,372, a $12,422 loss from pension data changes, and a gain from mortality changes of $4.

The amounts recognized on the balance sheet as of December 31 were as follows:

	Pension Benefits		Other Postretirement Benefits	
	2023	2022	2023	2022
Noncurrent assets	$ 30,671	16,005	$ 3,123	679
Current liabilities	(2,365)	(2,089)	(113)	(139)
Noncurrent liabilities	(40,636)	(51,079)	(6,067)	(8,418)
	$ (12,330)	(37,163)	$ (3,057)	(7,878)

As of December 31, 2023 and 2022, the accumulated benefit obligation of the defined benefit pension plans was $270,209 and $259,838, respectively.

The following table provides selected information about plans with projected benefit obligation and accumulated benefit obligation in excess of plan assets as of December 31:

	2023	2022
Pension Benefits:		
Plans with projected benefit obligation in excess of plan assets:		
Projected benefit obligation	$ 43,001	217,358
Fair value of plan assets	—	169,077
Plans with accumulated benefit obligation in excess of plan assets:		
Accumulated benefit obligation	39,652	35,813
Fair value of plan assets	—	—
Other Postretirement Benefits:		
Plans with accumulated benefit obligation in excess of plan assets:		
Accumulated benefit obligation	15,580	16,411
Fair value of plan assets	9,401	7,853

SJW Group recognizes regulatory assets and liabilities that represent actuarial losses and gains and prior service cost that have not yet been recognized as components of net periodic benefit cost for certain of its pension and other postretirement benefit plans. In accordance with ASC 980. SJW Group recorded regulatory assets of $24,593 and $45,799 as of December 31, 2023 and 2022, respectively and regulatory liabilities of $20,196 and $14,307 as of December 31, 2023 and 2022, respectively. As of December 31, 2023 and 2022, the amounts deferred in regulatory assets that have not yet been recognized as components of net periodic benefit cost include net loss of $24,552 and $45,743, respectively, and prior service cost of $41 and $56, respectively. As of December 31, 2023 and 2022, the amounts deferred in regulatory liabilities that have not yet been recognized as components of net periodic benefit cost include net gain of $20,196 and $14,307, respectively.

Plan Assets

Plan assets as of December 31 were as follows:

	Pension Benefits		Other Postretirement Benefits	
	2023	2022	2023	2022
Fair value of assets at end of year:				
Debt securities	$ 101,498	90,914	$ 5,596	5,330
	36 %	36 %	26 %	30 %
Equity securities	174,155	147,864	14,424	11,711
	61 %	59 %	68 %	65 %
Cash and equivalents	9,851	13,182	1,187	911
	3 %	5 %	6 %	5 %
Total	$ 285,504	251,960	$ 21,207	17,952

The following tables summarize the fair values of plan assets by major categories as of December 31, 2023 and 2022:

		Fair Value Measurements at December 31, 2023		
Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash and cash equivalents	$ 11,038	11,038	—	—
Equity securities (a)	188,579	188,579	—	—
Fixed Income (b)	107,094	39,048	68,046	—
Total	$ 306,711	238,665	68,046	—

(a) Actively managed portfolio of equity securities with the goal to exceed the benchmark performance.
(b) Actively managed portfolio of fixed income securities with the goal to exceed the benchmark performance

		Fair Value Measurements at December 31, 2022		
Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash and cash equivalents	$ 14,093	14,093	—	—
Equity securities	159,575	159,575	—	—
Fixed Income	96,244	30,863	65,381	—
Total	$ 269,912	204,531	65,381	—

In 2024, SJW Group expects to make required and discretionary cash contributions of up to $8,744 to the pension plans and other postretirement benefit plans.

Benefits expected to be paid in the next five years and in the aggregate for the five years thereafter are:

	Pension Plans	Other Postretirement Benefit Plans
2024	$ 16,727	$ 1,461
2025	17,455	1,549
2026	22,753	1,619
2027	18,977	1,691
2028	19,121	1,647
2029 - 2033	104,931	8,580

Note 12. Equity Plans

Common Stock

SJW Group's long-term incentive plans provide employees, non-employee board members or the board of directors of any parent or subsidiary, consultants, and other independent advisors who provide services to the company or subsidiary the opportunity to acquire an equity interest in SJW Group. SJW Group also maintains stock plans in connection with its acquisition of CTWS which are no longer granting new stock awards. In addition, shares are issued to employees under SJW Group's employee stock purchase plan.

On April 26, 2023, SJW Group adopted the successor plans, the 2023 Long-Term Incentive Plan and the 2023 Employee Stock Purchase Plan, to replace the Amended and Restated Long-Term Incentive Plan (the, "Predecessor Incentive Plan") and the 2014 Employee Stock Purchase Plan (the, "Predecessor ESPP"), respectively. The Predecessor Incentive Plan terminated on April 23, 2023 and the Predecessor ESPP terminated on July 31, 2023. Each outstanding award under the Predecessor Incentive Plan will remain outstanding under the Predecessor Incentive Plan and shall be governed solely by the terms of the documents evidencing such awards. The 2023 Long-Term Incentive Plan reserves a total of 1,142,000 shares of SJW Group's common stock for issuance to employees, non-employee board members or the board of directors of any parent or subsidiary,

consultants, and other independent advisors who provide services to the SJW Group and its subsidiaries. The 2023 Employee Stock Purchase Plan reserves for a total of 500,000 shares of SJW Group's common stock for issuance for eligible employees to purchase common stock at a discount through accumulated payroll deductions. Remaining reserves for both of the predecessor plans were terminated with the adoption of the successor plans.

The plans allow SJW Group to provide employees, non-employee Board members or the board of directors of any parent or subsidiary, consultants, and other independent advisors who provide services to the company or any parent or subsidiary the opportunity to acquire an equity interest in SJW Group.

A participant in the plans generally may not receive plan awards covering an aggregate of more than 600,000 shares of common stock in any calendar year. Additionally, awards granted under the plans may be conditioned upon the attainment of specified Company performance goals. The types of awards included in the plans are restricted stock awards, restricted stock units, performance shares, or other share-based awards. In addition, shares are issued to employees under the employee stock purchase plan ("ESPP") that was approved by SJW Group stockholders.

As of December 31, 2023, 2022 and 2021, 1,080,759, 1,013,782 and 946,086 shares have been issued pursuant to the plans, and 150,704, 162,502 and 168,721 shares are issuable upon the vesting of outstanding restricted stock units, performance-based stock units, and deferred restricted stock units for the years ended 2023, 2022 and 2021, respectively. The remaining shares available for issuance under the plans are 1,136,979 as of December 31, 2023. The compensation costs charged to income is recognized on a straight-line basis over the requisite service period.

A summary of compensation costs charged to income and proceeds from share-based compensation, which are recorded to additional paid-in capital and common stock, by award type, are presented below for the years ended December 31:

	2023	2022	2021
Compensation costs charged to income:			
ESPP	$ 378	369	357
Restricted stock and deferred restricted stock	4,269	4,422	3,889
Total compensation costs charged to income	$ 4,647	4,791	4,246
ESPP proceeds	$ 2,141	2,091	2,026

Restricted Stock and Deferred Restricted Stock

A summary of SJW Group's outstanding restricted and deferred restricted stock awards under the Plan as of December 31, 2023, and changes during the year ended December 31, 2023, are presented below:

	Units	Weighted-Average Grant-Date Fair Value
Outstanding as of January 1, 2023	162,502	$ 63.77
Granted	69,655	$ 78.30
Issued	(66,977)	$ 57.05
Forfeited	(14,476)	$ 72.43
Outstanding as of December 31, 2023	150,704	$ 72.64
Shares vested as of December 31, 2023	27,159	$ 66.81

A summary of the status of SJW Group's nonvested restricted and deferred restricted stock awards under the plans as of December 31, 2023, and changes during the year ended December 31, 2023, are presented below:

	Units	Weighted-Average Grant-Date Fair Value
Nonvested as of January 1, 2023	125,459	$ 66.71
Granted	69,655	$ 78.30
Vested	(63,755)	$ 64.62
Forfeited	(7,814)	$ 72.98
Nonvested as of December 31, 2023	123,545	$ 73.93

Total fair value of restricted stock awards for all plans that were vested for the years ended 2023, 2022 and 2021 were $4,170, $4,369 and $3,332, respectively. As of December 31, 2023, the total unrecognized compensation costs related to restricted and deferred restricted stock plans amounted to $4,587. This cost is expected to be recognized over a weighted-average period of 1.67 years.

For the years ended December 31, 2023, 2022 and 2021, 15,955, 11,551 and 7,327, respectively, of performance-based and market-based restricted stock awards were issued upon the attainment of certain performance metrics and service-based vesting under the Plan. Based upon actual attainment relative to the target performance metric, the number of shares issuable can range between 0% to 150% of the target number of shares for performance-based restricted stock awards, or between 0% and 200% of the target number of shares for market-based restricted stock awards. As of December 31, 2023, 24,726 performance-based and market-based restricted stock awards vested and 61,763 remained outstanding.

Employee Stock Purchase Plan

The ESPP allows eligible employees to purchase shares of SJW Group's common stock at 85% of the fair value of shares on the purchase date. Under the ESPP, employees can designate up to a maximum of 10% of their base compensation for the purchase of shares of common stock, subject to certain restrictions. A total of 500,000 shares of SJW Group's common stock have been reserved for issuance under the ESPP. The remaining shares available for issuance under the ESPP are 500,000 as of December 31, 2023.

For the year ended December 31, 2023, 2022 and 2021, a total of 34,122, 36,585 and 35,304 shares, respectively, were issued under the ESPP. The plan has no look-back provisions.

For the years ended December 31, 2023, 2022 and 2021, SJW Group's recorded expenses were $380, $377 and $361, respectively, related to the ESPP. The total unrecognized compensation costs related to the semi-annual offering period that ended January 31, 2024, for the ESPP is approximately $27.

Note 13. Segment and Non-Tariffed Businesses Reporting

SJW Group is a holding company with four subsidiaries: (i) SJWC, (ii) SJWTX Holdings, Inc., a holding company for TWC, its consolidated variable interest entity, Acequia Water Supply Corporation, TWOS and TWR, (iii) SJW Land Company, and (iv) SJWNE LLC, a holding company for CTWS and its subsidiaries, CWC, MWC, NEWUS and Chester Realty, Inc. The first segment provides water utility and utility-related services to its customers through SJW Group's subsidiaries, SJWC, CWC, TWC, MWC, and NEWUS together referred to as "Water Utility Services." Water Utility Services' activities are water utility operations with both regulated and non-tariffed businesses. The second segment consists of property management and investment activity conducted by SJW Land Company and Chester Realty, Inc., referred to as "Real Estate Services."

SJW Group's reportable segments have been determined based on information used by the chief operating decision maker. SJW Group's chief operating decision maker includes the Chairman, President and Chief Executive Officer, and his executive staff. The executive staff reviews financial information presented on a consolidated basis that is accompanied by disaggregated information about operating revenue, net income and total assets, by subsidiary.

The following tables set forth information relating to SJW Group's reportable segments and distribution of regulated and non-tariffed business activities within the reportable segments. Certain allocated assets, such as goodwill, revenue and expenses have been included in the reportable segment amounts. Other business activity of SJW Group not included in the reportable segments is included in the "All Other" category.

	For the year ended December 31, 2023						
	Water Utility Services		Real Estate Services	All Other (1)	SJW Group		
	Regulated (2)	Non-tariffed	Non-tariffed	Non-tariffed	Regulated	Non-tariffed	Total

All Other	58,141	63,507
Total assets	$ 4,345,067	3,755,056
Regulated	$ 4,199,172	3,643,916
Non-tariffed	145,895	111,140
Total assets	$ 4,345,067	3,755,056

Note 14. Acquisitions

KT Water

On January 13, 2023, TWC reached an agreement to acquire KT Water Development Ltd. ("KT Water Development") and SJWTX Holdings, Inc. reached an agreement to acquire KT Water Resources L.P. ("KT Water Resources"). The agreement between SJWTX Holdings, Inc. and KT Water Resources, LP, was assigned to TWR prior to closing. KT Water Development was an investor-owned water utility providing water to approximately 1,725 people through over 570 service connections in the Rockwall Ranch subdivision in southern Comal County, Texas. KT Water Resources was a wholesale groundwater resource supplier to KT Water Development formed to develop wholesale water supplies for the fast-growing utilities of Comal County, Texas. The Public Utility Commission of Texas ("PUCT") approved the proposed KT Water Development acquisition on July 24, 2023. The acquisition of KT Water Resources did not require PUCT approval. Both transactions closed on August 14, 2023. Further information regarding each of the acquisitions is set forth below.

KT Water Development

The purchase price of KT Water Development was $7,338, all of which was cash, and was determined in accordance with a fair market value process defined under the Texas Water Code. The transaction was accounted for as a business combination in accordance with ASC Topic 805. Based on the preliminary purchase price allocation, the transaction consideration was allocated to utility plant. The final allocation will be completed within one year from the acquisition date. Transaction costs were not material. The results of KT Water Development are included in SJW Group's consolidated statements of comprehensive income since the acquisition date and were not material. Pro forma financial information has not been presented because the acquisition was not material to SJW Group's consolidated financial statements.

KT Water Resources

The total purchase price of KT Water Resources of $39,891 consisted of a $24,491 up-front cash payment and an obligation for a post-closing production payment with an acquisition date fair value of $15,400. Considering transaction costs of $170, the total cost of the acquisition was $40,061. The KT Water Resources acquisition was accounted for as an asset acquisition in accordance with ASC Topic 805.

The total cost was allocated as follows based on the fair values of the assets acquired: $28,386 to other intangible asset, $11,684 to nonutility property, and $9 to other current liabilities. The other intangible asset represents indefinite-life water rights. The nonutility property consists of wells, land, easements, and construction work in progress.

The post-closing production payment represents an obligation to pay a total amount of $29,000 to the seller over a period up to 29 years. The repayment schedule is based on the quantity of groundwater produced from the acquired wells, subject to certain provisions in the purchase agreement. The fair value of the post-closing payment as of the acquisition date was determined by discounting forecasted repayments based on management's estimates of future groundwater production. The difference between the fair value of $15,400 and the gross obligation of $29,000 was recorded as a debt discount and is being amortized as interest expense using the effective interest method over the life of the obligation. The post-closing production payment obligation is classified as long-term debt in the Consolidated Balance Sheets.

Kendall West Utility and Bandera East Utility

On December 17, 2021, TWC completed its acquisition of Kendall West Utility and Bandera East Utility, companies that provide water services, including wastewater and recycled water services, in Kendall, Bandera and Medina counties which are located in south central Texas. Kendall West Utility and Bandera East Utility, together, added approximately 5,000 people through 1,600 service connections in a service area approximately 19 square miles to TWC's operations. The total net cash price was $23,587. The preliminary purchase price allocation for these acquisitions primarily consisted of acquired utility plant of approximately $9,400 and goodwill of approximately $12,300. The results of Kendall West Utility and Bandera East Utility are included in SJW Group's Consolidated Statements of Comprehensive Income since the acquisition date, including revenues and net loss, and were not material. During the measurement period in 2022, TWC reduced goodwill previously recognized by $161 primarily related to additional regulatory assets recognized. The final purchase price allocation resulted in goodwill of $12,167 for the transaction. Pro forma financial information has not been presented because the acquisition was not material to SJW Group's consolidated financial statements.

Years ended December 31, 2023, 2022 and 2021
(Dollars in thousands, except share and per share data)

Restrictions on Dividends and Other Distributions

SJW Group is a legal entity separate and distinct from its various subsidiaries. As a holding company with no significant operations of its own, SJW Group's principal sources of funds are dividends or other distributions from its operating subsidiaries, borrowings and the issuance of equity. The rights of SJW Group and, consequently, its creditors and shareholders, to participate in any distribution of assets of any of its subsidiaries are subject to certain prior claims of creditors of such subsidiary.

The abilities of certain of SJW Group's subsidiaries to transfer funds to SJW Group in the form of cash dividends, loans or advances are subject to certain contractual and regulatory restrictions. SJW Group and its subsidiaries are subject to debt covenants that could limit their respective abilities to pay dividends. For a discussion on these covenants, see Note 6, "Long-term Debt" to SJW Group and Subsidiaries Notes to Consolidated Financial Statements. In addition, CTWS and its regulated subsidiaries are prohibited from paying dividends if not in compliance with minimum equity requirements under commitments made by SJW Group as part of the approval granted by the PURA and the Maine Public Utilities Commission in connection with the acquisition of CTWS.

As of December 31, 2023, the restricted net assets of SJW Group's subsidiaries were approximately $408,244 or 33% of consolidated net assets of SJW Group.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

None.

Item 9A. ***Controls and Procedures***

Evaluation of Disclosure Control and Procedures

SJW Group's management, with the participation of its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of SJW Group's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, the "Exchange Act"), as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that SJW Group's disclosure controls and procedures as of the end of the period covered by this report have been designed and are functioning effectively to provide reasonable assurance that the information required to be disclosed by SJW Group in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. SJW Group believes that a control system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the control system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Management's Report on Internal Control over Financial Reporting

SJW Group's management is responsible for establishing and maintaining an adequate internal control structure over financial reporting and for an assessment of the effectiveness of internal control over financial reporting, as such items are defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act.

Management has utilized the criteria established in "Internal Control-Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission to evaluate the effectiveness of internal control over financial reporting.

SJW Group's management has performed an assessment of the effectiveness of internal control over financial reporting as of December 31, 2023. Based on this assessment, management has concluded SJW Group's internal control over financial reporting as of December 31, 2023 was effective.

85

Our independent registered public accounting firm, DELOITTE & TOUCHE LLP (PCAOB ID No. 34), has issued an auditors' report on the effectiveness of our internal control over financial reporting, which is included in Item 8 of this report.

Changes in Internal Controls

There has been no change in internal control over financial reporting during the fourth fiscal quarter of 2023 that has materially affected, or is reasonably likely to materially affect, the internal controls over financial reporting of SJW Group.

Item 9B. ***Other Information***

SJW Group intends to post information about the operating and financial performance of SJW Group and its subsidiaries on its website *http://www.sjwgroup.com* from time to time. The content of SJW Group's website is not incorporated by reference to or part of this report.

a. There is no information that was required to be disclosed in a report on Form 8-K during the fourth quarter of 2023 but was not reported.

b. In the quarter ended December 31, 2023, none of our directors or officers (as defined in Rule 16a-1(f) of the Exchange Act) adopted or terminated a plan for the purchase or sale of our securities intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) or a non-Rule 10b5-1 trading arrangement for the purchase or sale of our securities, within the meaning of Item 408 of Regulation S-K.

Item 9C. ***Disclosure Regarding Foreign Jurisdictions that Prevent Inspection***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance***

The information required by this item is contained in part under the caption "Executive Officers of the Registrant" in Part I, Item 1, of this report, and in SJW Group's Proxy Statement for its 2024 Annual Meeting of Stockholders (the "2024 Proxy Statement") under the captions "PROPOSAL 1 ELECTION OF DIRECTORS" and "Delinquent Section 16(a) Reports," and is incorporated herein by reference.

Item 11. ***Executive Compensation***

The information required by this item is contained in the 2024 Proxy Statement under the captions "Compensation of Directors," "Executive Compensation and Related Information," "Compensation Committee Interlocks and Insider Participation," and "Committee Reports" and is incorporated herein by reference.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters***

The information required by this item is contained in the 2024 Proxy Statement under the captions "Security Ownership of Certain Beneficial Owners and Management" and "Securities Authorized for Issuance under Equity Compensation Plans" and is incorporated herein by reference.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence***

The information required by this item is contained in the 2024 Proxy Statement under the caption "Certain Relationships and Related Transactions" and "Director Independence" and is incorporated herein by reference.

Item 14. ***Principal Accountant Fees and Services***

The information required by this item is contained in the 2024 Proxy Statement under the caption "Principal Independent Accountants' Fees and Services" and is incorporated herein by reference.

Pennsylvania	23-1702594
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
762 W Lancaster Avenue, Bryn Mawr, Pennsylvania	19010-3489
(Address of principal executive offices)	(Zip Code)

(610) 527-8000
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock, par value $0.50 per share	**WTRG**	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. ☑ Yes ☐ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. ☐ Yes ☑ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☑ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). ☑ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "small reporting company," and "emerging growth company" in Rule 12(b)-2 of the Exchange Act.:

Large accelerated filer ☑
Accelerated filer ☐
Non-accelerated filer ☐
Small reporting company ☐
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☑

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D.1(b) . ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ Yes ☑ No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant as of June 30, 2023: $10,535,546,923

The number of shares outstanding of the registrant's common stock as of February 23, 2024: 273,298,409

DOCUMENTS INCORPORATED BY REFERENCE

(1) Portions of the definitive Proxy Statement, relating to the 2024 annual meeting of shareholders of registrant, to be filed within 120 days after the end of the fiscal year covered by this Form 10-K, have been incorporated by reference into Part III of this Form 10-K

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Annual Report on Form 10-K, or this Annual Report, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "estimates", "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Please refer to the Summary in Item 1A – Risk Factors in this Annual Report for a description of the types of forward-looking statements in this Annual Report. These factors are not necessarily all of the important factors that could cause actual results to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this Annual Report completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans, and beliefs only as of the date of this Annual Report. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see Item 1A – Risk Factors. We qualify all of our forward-looking statements by these cautionary statements.

PART I

Item 1. *Business*

The Company

Essential Utilities, Inc., referred to as "Essential Utilities", "Essential", the "Company", "we", "us", or "our", a Pennsylvania corporation, is the holding company for regulated utilities providing water, wastewater, or natural gas services to an estimated 5.5 million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, and Kentucky under the Aqua and Peoples brands. One of our largest operating subsidiaries, Aqua Pennsylvania, Inc., or Aqua Pennsylvania, accounted for approximately 56% of operating revenues and approximately 68% of income for our Regulated Water segment in 2023. As of December 31, 2023, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of water and wastewater customers we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated water or wastewater utility subsidiaries provide similar services in seven additional states. Our Peoples subsidiaries provide natural gas service to approximately 744,000 customers in western Pennsylvania and Kentucky. Approximately 95% of the total number of natural gas utility customers we serve are in western Pennsylvania. The Company also operates market-based activities, conducted through its non-regulated subsidiaries, that provide utility service line protection solutions and repair services to households and gas marketing and production activities. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, focusing on water and wastewater utilities and to opportunistically pursue growth ventures in select market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated water utility businesses.

In December 2022, the Company signed an agreement to sell its regulated natural gas utility assets in West Virginia, which represented approximately two percent of the Company's regulated natural gas customers. The sale closed on October 1, 2023, and the Company received net cash proceeds of $39,965,000, subject to working capital and other adjustments. The sale concluded the Company's regulated utility operations in West Virginia. In October 2023, the Company entered into an agreement to sell its interest in three non-utility local microgrid and distributed energy projects for $165,000,000. The sale was completed in January 2024. These transactions are consistent with the Company's long-term strategy of focusing on its core business and will allow the Company to prioritize the growth of its utilities in states where it has scale. The Company intends to use the proceeds from these transactions to finance its capital expenditures and water and wastewater acquisitions, in place of external funding from equity and debt issuances. See Note 3 – *Assets Held for Sale and Dispositions* in the Notes to Consolidated Financial Statements for additional information.

The following table reports our operating revenues, by principal state, for our Regulated Water segment, which includes both water and wastewater utility services, Regulated Natural Gas segment, and Other and eliminations for the year ended December 31, 2023:

	Operating Revenues (000's)	Operating Revenues (%)
Pennsylvania	$ 643,604	31.3%
Ohio	125,574	6.1%
Texas	98,441	4.8%
Illinois	96,833	4.7%
North Carolina	82,065	4.0%
Other states (1)	106,859	5.2%
Regulated Water segment total	1,153,376	56.1%
Pennsylvania	798,831	38.9%
Other states (2)	64,928	3.2%
Regulated Natural Gas segment total	863,759	42.1%
Other and eliminations	36,689	1.8%
Consolidated	$ 2,053,824	100.0%

(1) Includes our water operating subsidiaries in the following states: New Jersey, Indiana, and Virginia.
(2) Includes our natural gas operating subsidiaries in West Virginia (up through September 2023) and Kentucky.

The Company has identified eleven operating segments and has two reportable segments, the Regulated Water segment and the Regulated Natural Gas segment. The Regulated Water segment is comprised of eight operating segments for the Company's water and wastewater regulated utility companies, aligned with the states where we provide these services. These operating segments are aggregated into one reportable segment since each of the Company's operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment. The Regulated Natural Gas segment is comprised of one operating segment representing natural gas utility companies, for which the Company provides natural gas distribution services. In addition to the Company's two reportable segments, the Company includes two of its operating segments in "Other". These businesses represent its non-regulated water, wastewater, and natural gas operations, which are not quantitatively significant to be reportable and therefore are included as a component of "Other". In addition, "Other" and eliminations include corporate costs that have not been allocated to the Regulated Water and Regulated Natural Gas segments, because they would not be recoverable as a cost of utility service, and intersegment eliminations. Information concerning revenues, net income, identifiable assets and related financial information for the Regulated Water and Regulated Natural Gas segments and Other and eliminations for 2023, 2022, and 2021, is set forth in *Management's Discussion and Analysis of Financial Condition and Results of Operations* and in Note 18 – *Segment Information* in the Notes to Consolidated Financial Statements which is contained in Item 8 of this Annual Report.

The following table summarizes our operating revenues, by utility customer class, for the Regulated Water and Regulated Natural Gas segments and Other and eliminations for the year ended December 31, 2023:

	Operating Revenues (000's)	Operating Revenues (%)
Residential water	$ 641,351	31.2%
Commercial water	180,731	8.8%
Fire protection	41,257	2.0%
Industrial water	33,949	1.7%
Other water	51,527	2.5%
Total water	948,815	46.2%
Wastewater	187,394	9.0%
Other utility	17,167	0.8%
Regulated Water segment total	1,153,376	56.0%
Residential gas	519,406	25.3%
Commercial gas	111,272	5.5%
Industrial gas	3,232	0.2%
Gas transportation	184,598	9.0%
Other utility	45,251	2.2%
Regulated Natural Gas segment total	863,759	42.2%
Other and eliminations	36,689	1.8%
Consolidated	$ 2,053,824	100.0%

Customers

Our water utility customer base is diversified among residential water, commercial water, fire protection, industrial water, other water, wastewater customers, and other utility customers (consisting of contracted services that are associated with the utility operations). Residential water and wastewater customers make up the largest component of our water utility customer base, with these customers representing approximately 69%, 68%, and 69%, of our water and wastewater revenues for 2023, 2022, and 2021, respectively. Substantially all of our water utility customers are metered, which allows us to measure and bill for our customers' water consumption. Water consumption per customer is affected by local weather conditions during the year, especially during late spring, summer, and early fall. In general, during these seasons, an extended period of dry weather increases consumption, while above-average rainfall decreases consumption. Also, an increase in the average temperature generally causes an increase in water consumption. On occasion, abnormally dry weather in our service areas can result in governmental authorities declaring drought warnings and imposing water use restrictions in the affected areas, which could reduce water consumption. See "Business – *Water Utility Supplies, and Facilities and Wastewater Utility Facilities*" for a discussion of water use restrictions that may impact water consumption during abnormally dry weather. The geographic diversity of our water utility customer base reduces the effect of our exposure to extreme or unusual weather conditions in any one area of our service territories. Water usage is also affected by changing consumption patterns by our customers, resulting from such causes as increased water conservation and the installation of water saving devices and appliances that can result in decreased water usage. It is estimated that, in the event we experience a 0.50% decrease in residential water consumption, it would result in a decrease in annual residential water revenue of approximately $3,000,000, which would likely be partially offset by a reduction in incremental water production expenses such as chemicals and power.

Our natural gas utility customer base is diversified among residential gas, commercial gas, industrial gas, gas transportation, and other utility. Substantially all of our natural gas utility customers are metered, which allows us to measure and bill for our customers' natural gas usage. Natural gas usage per customer is affected by local weather conditions during the year, especially during the fall, winter, and early spring. These patterns reflect the higher demand for natural gas for heating purposes during the colder months. Our regulated natural gas revenues and expenses are also affected by the cost of gas. We are generally able to pass the cost of gas through to our customers using a purchased gas adjustment clause; therefore, fluctuations in the cost of purchased gas impact revenues on a dollar-for-dollar basis. Since

regulated natural gas revenues are affected by the cost of gas, higher gas costs, as well as general economic conditions, may cause customers to conserve usage, or seek alternative energy sources. In addition, higher gas costs result in an increase to our purchased gas inventory, which requires additional borrowings under credit facilities, resulting in higher interest expense.

The Company's growth in revenues over the past five years is primarily a result of its acquisition in 2020 of Peoples Natural Gas Company LLC and its affiliated companies, or the Peoples Gas Acquisition, increases in water and wastewater rates, increase in the cost of natural gas in 2021 and 2022, and customer growth. See *Economic Regulation* for a discussion of water, wastewater, and natural gas rates. The increase in our utility customer base has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions) as shown below:

Year	Utility Customer Growth Rate
2023	1.0%
2022	1.7%
2021	1.2%
2020	42.9%
2019	2.1%

In 2023, 2022, 2021, 2020, and 2019, our customer count increased by 5,875, 31,537, 21,246, 772,099 and 21,108 customers, respectively, primarily due to the water and wastewater utility systems that we acquired, organic growth, and in 2020, due to the Peoples Gas Acquisition that resulted to the addition of approximately 750,000 natural gas utility customers. Overall, for the five year period of 2019 through 2023, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 13.2%. During the five year period ended December 31, 2023, our utility customer base including customers associated with utility system acquisitions and dispositions increased from 1,005,590 at January 1, 2019 to 1,857,461 at December 31, 2023.

Acquisitions and Other Growth Ventures

We believe that acquisitions will continue to be an important source of customer growth for us. We intend to continue to pursue acquisitions of government-owned and regulated water and wastewater systems that provide services in areas near our existing service territories or in new service areas. We engage in continuing activities with respect to potential acquisitions, including calling on prospective sellers, performing analyses of and due diligence on acquisition candidates, making preliminary acquisition proposals, and negotiating the terms of potential acquisitions. Further, we are also seeking other potential business opportunities, including but not limited to, partnering with public and regulated utilities to invest in infrastructure projects, growing our market-based activities by acquiring businesses that provide water and wastewater or other utility-related services, and investing in infrastructure projects.

Based on the 2021 U.S. Census American Housing Survey, approximately 89% of the U.S. population obtain their water from public or private water utility systems, and 11% of the U.S. population obtain their water from individual wells. With approximately 50,000 community water systems in the U.S. (approximately 81% of which serve less than 3,300 customers), the water industry is the most fragmented of the major utility industries (telephone, natural gas, electric, water and wastewater). The majority of these community water systems are government-owned. The nation's water systems range in size from large government-owned systems, such as the New York City water system, which serves approximately 8.5 million people, to small systems, where a few customers share a common well. In the states where we operate regulated water utilities, we believe there are over 14,000 community water systems of widely-varying size, with the majority of the population being served by government-owned water systems.

Although not as fragmented as the water industry, the wastewater industry in the U.S. also presents opportunities for consolidation. Based on the 2021 U.S. Census American Housing Survey, approximately 84% of the U.S. population relies on public or private sewer systems, and 16% of the U.S. population relies on septic tank, cesspool, or other sewer options. A majority of wastewater facilities are government-owned rather than regulated utilities. In the states where we operate regulated water utilities, we believe there are approximately 4,000 wastewater facilities in operation, with the majority of the population being served by government-owned wastewater systems.

Because of the fragmented nature of the water and wastewater utility industries, we believe there are many potential water and wastewater system acquisition candidates throughout the U.S. We believe the factors driving consolidation of these systems are:

- the benefits of economies of scale;
- the increasing cost and complexity of environmental regulations;
- the need for substantial capital investment;
- the need for technical and managerial expertise;
- the desire to improve water quality and service;
- limited access to cost-effective financing;
- the monetizing of public assets to support, in some cases, the declining financial condition of municipalities; and
- the use of system sale proceeds by a municipality to accomplish other public purposes.

We are actively exploring opportunities to expand our water and wastewater utility operations through acquisitions or other growth ventures. During the three-year period ended December 31, 2023, we expanded our utility operations by completing 12 acquisitions of water or wastewater utilities or other similar assets.

Capital Investment

The Company expects to invest approximately $7.2 billion from 2024 through 2028 to meet compliance requirements, improve water and natural gas systems, and better serve customers through improved information technology. These investments include replacing and expanding its water and wastewater utility infrastructure and replacing and upgrading its natural gas utility infrastructure, with the latter leading to significant reductions in methane emissions that occur in aged gas pipes. The capital investments made to rehabilitate and expand the infrastructure of the communities we serve is critical to our mission of safely and reliably delivering Earth's most essential resources.

Supply and Facilities

Water Utility Supplies and Facilities and Wastewater Utility Facilities - Our water utility operations obtain their water supplies from surface water sources, underground aquifers, and water purchased from other water suppliers. Our water supplies are primarily self-supplied and processed at twenty-four surface water treatment plants located in five states, and numerous well stations located in the states in which we conduct business. Approximately 5.9% of our water supplies are provided through water purchased from other water suppliers. It is our policy to obtain and maintain the permits necessary to obtain and treat the water we distribute.

We believe that the capacities of our sources of supply, and our water treatment, pumping and distribution facilities, are generally sufficient to meet the present requirements of our customers under normal conditions. We plan system improvements and additions to capacity in response to normal replacement and renewal needs, changing regulatory standards, changing patterns of consumption, and increased demand from customer growth. The various state utility commissions have generally recognized the operating and capital costs associated with these improvements in setting water and wastewater rates.

On occasion, drought warnings and water use restrictions are issued by governmental authorities for portions of our service territories in response to extended periods of dry weather conditions. The timing and duration of the warnings and restrictions can have an impact on our water revenues and net income. In general, water consumption in the summer months is more affected by drought warnings and restrictions because discretionary and recreational use of water is at its highest during the summer months. At other times of the year, warnings and restrictions generally have less of an effect on water consumption. Drought warnings and watches result in the public being asked to voluntarily reduce water consumption.

We believe that our wastewater treatment facilities are generally adequate to meet the present requirements of our customers under normal conditions. Additionally, we own several wastewater collection systems that convey the wastewater to municipally-owned facilities for treatment. Changes in regulatory requirements can be reflected in revised permit limits and conditions when permits are renewed, typically on a five year cycle, or when treatment capacity is

expanded. Capital improvements are planned and budgeted to meet normal replacement and renewal needs, anticipated changes in regulations, needs for increased capacity related to projected growth, and to reduce inflow and infiltration to collection systems. The various state utility commissions have generally recognized the operating and capital costs associated with these improvements in setting wastewater rates for current and new customers. It is our policy to obtain and maintain the permits necessary for the treatment of the wastewater that we return to the environment.

Natural Gas Supply and Transportation Facilities - Our natural gas supply strategy is to ensure a dependable gas supply that is economically priced and which is available for delivery when needed. We purchase natural gas from intrastate, interstate and local sources, and transport natural gas supplies through various intrastate and interstate pipelines under contracts with remaining terms, including extensions, varying from one month to 10 years. We anticipate that these gas supply and transportation contracts will be renewed or replaced prior to their expiration.

The regulations of the states in which we operate natural gas utilities allow us to pass through changes in the cost of natural gas to our customers under purchased gas adjustment provisions in our tariffs. Depending upon the jurisdiction, the purchased gas adjustment factors are updated periodically, ranging from quarterly to annually. The changes in the cost of gas billed to customers are subject to review by the applicable regulatory bodies.

We use various third-party storage services or owned natural gas storage facilities to meet peak-day requirements and to manage the daily changes in demand due to changes in weather.

We own and operate underground natural gas storage facilities with capacity of 10.5 billion cubic feet (Bcf). Total working capacity is 5.3 Bcf for use during the heating season with a maximum daily withdrawal rate of 115.5 million cubic feet (MMcf). Additionally, we have contracted for off-system storage from interstate pipelines. The total amount of off-system storage under contract is 34.9 Bcf with a maximum daily withdrawal rate of 588.9 MMcf.

On an ongoing basis, we enter into contracts to provide sufficient supplies and pipeline capacity to meet our customers' natural gas requirements. However, it is possible for limited service disruptions to occur from time to time due to weather conditions, transportation constraints, and other events. As a result of these factors, supplies of natural gas may become unavailable from time to time, or prices may increase rapidly in response to temporary supply constraints or other factors. We enter into firm agreements with suppliers, including major producers and marketers, intended to provide flexibility to meet the temperature-sensitive needs of its customers. In Pennsylvania, our distribution system is connected to six interstate pipelines, where we maintain capacity we believe is sufficient to meet our customers' gas requirements. In Kentucky, our distribution system is connected to four interstate pipelines, where we maintain capacity we believe is sufficient to meet our customers' gas requirements.

Natural Gas Gathering - Our Pennsylvania Regulated Natural Gas service territory is situated in the Marcellus Shale production region. Approximately 27% of the natural gas supply on the system is from locally produced gas, which we gather and transport into our distribution system. Our gathering system is regulated by the Pennsylvania Public Utility Commission which includes various safety, environmental and, in some circumstances, anti-discrimination requirements, and in some instances complaint-based rate regulation. Our gathering operations may be subject to ratable take and common purchaser statutes in the states in which we operate.

Our Regulated Natural Gas gathering operations could be adversely affected should they be subject in the future to the application of state or federal regulation of rates and services. Our gathering operations could also be subject to additional safety and operational regulations relating to the design, construction, testing, operation, replacement, and maintenance of gathering facilities. We cannot predict what effect, if any, such changes might have on our operations, but our Regulated Natural Gas segment could be required to incur additional capital expenditures and increased costs depending on future legislative and regulatory changes. Refer to further discussion below in the *Environmental, Health and Safety Regulation and Compliance* section.

Economic Regulation

Most of our utility operations are subject to regulation by their respective state utility commissions, which have broad administrative power and authority to regulate billing rates, determine franchise areas and conditions of service, approve acquisitions, and authorize the issuance of securities. The utility commissions also establish uniform systems of accounts and approve the terms of contracts with affiliates and customers, business combinations with other utility systems, and loans and other financings. The policies of the utility commissions often differ from state to state and may change over time. A small number of our water and wastewater utility operations are subject to rate regulation by county or city governments. The profitability of our utility operations is influenced to a great extent by the timeliness and adequacy of rate allowances we are granted by the respective utility commissions or authorities in the various states in which we operate.

Rate Case Management Capability – We maintain a rate case management capability, the objective of which is to provide that the tariffs of our utility operations reflect, to the extent practicable, the timely recovery of increases in costs of operations, capital expenditures, interest expense, taxes, energy, materials, and compliance with environmental regulations as well as a return on equity. We file rate increase requests to recover and earn a fair return on the infrastructure investments that we make in improving or replacing our facilities and to recover expense increases. In the states in which we operate, we are primarily subject to economic regulation by the following state utility commissions:

State	Utility Commission
Pennsylvania	Pennsylvania Public Utility Commission
Ohio	Public Utilities Commission of Ohio
North Carolina	North Carolina Utilities Commission
Texas	Public Utility Commission of Texas
Illinois	Illinois Commerce Commission
New Jersey	New Jersey Board of Public Utilities
Kentucky	Public Service Commission of Kentucky
Virginia	Virginia State Corporation Commission
Indiana	Indiana Utility Regulatory Commission

Our water and wastewater operations are comprised of 57 rate divisions, and our natural gas operations are comprised of three rate divisions. Each of our utility rate divisions require a separate rate filing for the evaluation of the cost of service, including the recovery of investments, in connection with the establishment of rates for that rate division. When feasible and beneficial to our utility customers, we will seek approval from the applicable state regulatory commission to consolidate rate divisions to achieve a more even distribution of costs over a larger customer base. All of the states in which we operate permit us to file a revenue requirement for some form of consolidated rates for all, or some, of the rate divisions in that state.

In Ohio, Virginia, North Carolina, and Kentucky, we may bill our utility customers, in certain circumstances, in accordance with a rate filing that is pending before the respective regulatory commission, which would allow for interim rates. As of December 31, 2023, we have no billings under interim rate arrangements for rate case filings in progress. Furthermore, some utility commissions authorize the use of expense deferrals and amortization to provide for an impact on our operating income by an amount that approximates the requested amount in a rate request. In these states, the additional revenue billed and collected prior to the final regulatory commission ruling is subject to refund to customers based on the outcome of the ruling. The revenue recognized and the expenses deferred by us reflect an estimate as to the final outcome of the ruling. If the request is denied completely or in part, we could be required to refund to customers some or all of the revenue billed to date and write-off some or all of the deferred expenses.

Revenue Surcharges – Eight states in which we operate water and wastewater utilities, and both states, Pennsylvania and Kentucky, in which we operate natural gas utilities, permit us to add an infrastructure rehabilitation surcharge to their respective bills to offset the additional depreciation and capital costs associated with capital expenditures related to replacing and rehabilitating infrastructure systems. Without this surcharge, a utility absorbs all of the depreciation and capital costs of these projects between base rate increases. The gap between the time that a capital project is completed and the recovery of its costs in rates is known as regulatory lag. This surcharge is intended to substantially reduce regulatory lag, which could act as a disincentive for utilities to rehabilitate their infrastructure. In addition, our

subsidiaries in some states use a surcharge or credit on their bills to reflect changes in costs, such as changes in state tax rates, other taxes and purchased water costs, until such time as the new cost levels are incorporated into base rates.

The infrastructure rehabilitation surcharge typically adjusts periodically based on additional qualified capital expenditures completed or anticipated in a future period, and is capped at a percentage of base rates, generally at 5% to 12.75%, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. These surcharges provided revenues of $20,260,881 in 2023, $26,902,294 in 2022, and $33,771,486 in 2021.

In the majority of our natural gas service territories, the public utility commissions have authorized bare steel and cast-iron replacement programs. In Pennsylvania, we filed a Long-Term Infrastructure Replacement program with the Pennsylvania Public Utility Commission where we have committed to the replacement of bare steel and cast-iron pipe. On February 14, 2012, the Governor of Pennsylvania signed into law Act 11 of 2012, which provided a Distribution System Improvement Charge (DSIC) mechanism for certain utilities to recover costs related to repair, replacement or improvement of eligible distribution property that has not previously been reflected in rates or rate base. Through this Pennsylvania DSIC, subject to an earnings test, a utility may recover the fixed costs of eligible infrastructure incurred during the three months ended one month prior to the effective date of the charge, thereby reducing the historical regulatory lag associated with cost recovery through the traditional rate-making process. In Kentucky, we have a pipe replacement program tariff, which allows adjustment of regulated rates annually to earn a return on capital expenditures incurred subsequent to our last rate case which were associated with the replacement of bare steel and vintage plastic pipe.

Gas costs incurred to serve our natural gas customers represent a significant operating expense. Our regulated natural gas rates, in all jurisdictions, contain a Purchased Gas Adjustment (PGA), which is reflected in our tariffs. The PGA allows us to timely charge for changes in the cost of purchased gas, inclusive of unaccounted for gas expense based on actual experience. PGA procedures involve periodic filings and hearings before the state regulatory commissions to establish price adjustments for a designated future period. The procedures also provide for inclusion in later periods of any variances between actual recoveries representing the estimated costs and actual costs incurred. The PGA is subject to periodic review and audit by the state regulatory commissions who also have the authority to disallow previously incurred costs.

In Pennsylvania, the gas cost component of uncollectible accounts expense, gas procurement costs, and certain costs to maintain a supplier choice program, where customers can elect their natural gas supplier, are recovered by mechanisms outside of typical base rate recovery. Additionally, in Pennsylvania, we recover the costs related to universal service programs, whereby customers who meet certain income guidelines receive assistance toward paying their monthly bill, weatherization services, and other programs. In Kentucky, the gas cost component of uncollectible accounts expense is recovered by a recovery mechanism outside of base rate recovery.

Income Tax Accounting Method Change – In 2012, in response to a rate order, Aqua Pennsylvania adopted an income tax accounting method change, implemented on Essential Utilities' 2012 federal income tax return. This accounting method change resulted in a tax deduction for qualifying utility asset improvement costs that were formerly capitalized for tax purposes. The rate order requires the flow-through of income tax benefits which results in a reduction to current income tax expense through the recognition of income tax benefits resulting from the accounting method change. In May 2022, as a result of its most recent rate case, Aqua Pennsylvania received a rate case order that provided for $159,000,000 of income tax deductions, for its water customers, annually, from the flow-through recognition, subject to a collar mechanism of $4,000,000.

In March 2020 and June 2022, the Company changed the method of tax accounting for certain qualifying infrastructure investments at its Peoples Natural Gas and Peoples Gas subsidiaries, respectively. In the fourth quarter of 2022, the Company made a similar change for its Aqua New Jersey subsidiary. These changes result in a tax deduction for qualifying utility asset improvement costs that were formerly capitalized for tax purposes. Consistent with the Company's accounting for differences between book and tax expenditures for its Aqua Pennsylvania subsidiary, the Company is utilizing the flow-through method to account for this timing difference. For Peoples Natural Gas, the Company calculated the income tax benefits for qualifying capital expenditures made prior to March 16, 2020 (catch-up adjustment) and recorded a regulatory liability for $160,655,000 for these income tax benefits. In May 2021, the Pennsylvania Public Utility Commission approved a settlement petition that allows Peoples Natural Gas to continue to use flow-through

accounting for the current tax repair benefit and allows for the catch-up adjustment to be given to its customers. These benefits are being provided back to customers over a five-year period through a credit on customer bills which commenced in August 2021. For Peoples Gas, another company acquired in the Peoples Gas Acquisition, the Company calculated the catch-up adjustment from the periods prior to the 2021 tax year and recognized a regulatory liability of $13,808,000 for these income tax benefits.

In April 2023, the Internal Revenue Service issued Revenue Procedure 2023-15 which provides a safe harbor method of accounting that taxpayers can adopt to determine whether expenses to repair, maintain, replace, or improve natural gas transmission and distribution property must be capitalized for tax purposes. The Company evaluated the safe harbor and intends to adopt the methodology on its 2023 tax return. Upon completion of its 2023 tax return analyses, the Company will update the regulatory liabilities recorded with the recalculated amounts for the catch-up periods for its Peoples Natural Gas and Peoples Gas subsidiaries, and file a petition to update its Tax Repair Surcredit rider to address the benefits due to customers.

In the second quarter of 2023, based on the tax legislative guidance that was issued, the Company reevaluated the uncertain tax positions related to the Regulated Water Segment and ultimately released a portion of its historical income tax reserves. Concurrently, the Company deferred this tax benefit from the reserve release as a regulatory liability, as the accounting treatment is expected to be determined in a future regulatory filing.

Fair Market Value Legislation – In April 2016, Pennsylvania enacted legislation allowing the public utility commission to utilize fair market value to set ratemaking rate base instead of the depreciated original cost of water or wastewater assets for certain qualifying municipal acquisitions. The legislation includes a process for engaging two independent utility valuation experts to perform appraisals that are filed with the public utility commission and then averaged and compared to the purchase price. The ratemaking rate base is the lower of the average of the appraisals or the purchase price and is subject to regulatory approval. In February 2024, the public utility commission issued a draft revision to the current procedures and guidelines that had been implemented, that bolsters requirements for public notice and meetings, requires a rate impact notice, and provides other measures to improve the fair market value process when investor-owned utilities acquire water and wastewater utilities in Pennsylvania. The proposal is currently open for public comment and recommendations to provide feedback for consideration by the commission before finalizing these proposed revisions. Illinois, Indiana, New Jersey, North Carolina, Ohio, Virginia, and Texas also have legislation that allows the use of fair market value under varying rules and circumstances. We believe that this legislation encourages consolidation in the water and wastewater industry, providing municipalities with an option for exiting the business if they are dealing with challenges associated with their aging, deteriorating water and wastewater assets, do not have the expertise or technical capabilities to continue to comply with ever-increasing environmental regulations, or simply want to focus on other community priorities.

Revenue Stability Mechanisms – Revenue stability mechanisms separate the volume of water sold from our ability to meet our cost of service and infrastructure costs. These mechanisms allow us to recognize revenue based on a target amount established in the last rate case, and then record either a regulatory asset or liability based on the cumulative difference over time, which results in either a refund due to customers or a payment from customers. In Illinois, our operating subsidiary utilizes a revenue stability mechanism. Additionally, a weather-normalization adjustment (WNA) mechanism is in place for our natural gas customers served in Kentucky. The WNA serves to minimize the effects of weather on the Company's results for its residential and small commercial natural gas customers. This regulatory mechanism adjusts revenues earned for the variance between actual and normal weather and can have either positive (warmer than normal) or negative (colder than normal) effects on revenues. Customer bills are adjusted in the December through April billing months, with rates adjusted for the difference between actual revenues and revenues calculated under this mechanism billed to the customers.

Competition

In general, we believe that Essential Utilities and its water, wastewater, and natural gas subsidiaries have valid authority, free from unduly burdensome restrictions, to enable us to carry on our business as presently conducted in the franchised or contracted areas we now serve. The rights to provide water, wastewater, or natural gas service to customers in a particular franchised service territory are generally non-exclusive, although the applicable utility commissions usually allow only one regulated utility to provide service to customers in a given area. In some instances, another water utility provides service to a separate area within the same political subdivision served by one of our subsidiaries. Additionally, our larger natural gas customers may bypass gas distribution services by gaining distribution directly from interstate pipelines, other gas distributors, or other energy sources. As a regulated utility, we believe there is little competition for the daily water, wastewater, and natural gas service we provide to our customers.

Although our natural gas subsidiaries are not currently in significant direct competition with any other distributors of natural gas in its service areas, we do compete with suppliers of other forms of energy such as fuel oil, electricity, propane, coal, wind, and solar. Competition can be intense among the energy sources with price being the primary consideration. This is particularly true for industrial customers who have the ability to switch to alternative fuels. Natural gas generally benefits from a competitive price advantage over oil, electricity, and propane. Competition from renewable energy sources such as solar and wind is likely to increase as the political environment currently favors these energy sources through incentives or by placing restrictions on emissions from the burning of fossil fuels.

Water and wastewater utilities may compete for the acquisition of other water and wastewater utilities or for acquiring new customers in new service territories. Competition for these acquisitions generally comes from nearby utilities, either other regulated utilities or municipal-owned utilities, and sometimes from strategic or financial purchasers seeking to enter or expand in the water and wastewater industry. We compete for new service territories and the acquisition of other utilities on the following bases:

- economic value;
- economies of scale;
- our ability to provide quality water, wastewater, and natural gas service;
- our existing infrastructure network;
- our ability to perform infrastructure improvements;
- our ability to comply with environmental, health, and safety regulations;
- our technical, regulatory, and operational expertise;
- our ability to access capital markets; and
- our cost of capital.

The addition of new service territories and the acquisition of other utilities by regulated utilities such as the Company are generally subject to review and approval by the applicable state utility commissions.

In a very small number of instances in one of our southern states, where there are municipally-owned water or wastewater systems near our operating divisions, the municipally-owned system may either have water distribution or wastewater collection mains that are located adjacent to our division's mains or may construct new mains that parallel our mains. In these rare circumstances, the municipally-owned system may attempt to voluntarily offer service to customers who are connected to our mains, resulting in our mains becoming surplus or underutilized without compensation.

In the states where our water subsidiaries operate, it is possible that portions of our subsidiaries' operations could be acquired by municipal governments by one or more of the following methods:

- eminent domain;
- the right of purchase given to or reserved by a municipality or political subdivision when the original franchise was granted; and,
- the right of purchase given or reserved under the law of the state in which the subsidiary was incorporated or from which it received its permit.

The price to be paid upon such an acquisition by the municipal government is usually determined in accordance with applicable law under eminent domain. In other instances, the price may be negotiated, fixed by appraisers selected by the parties, or computed in accordance with a formula prescribed in the law of the state or in the particular franchise or charter. We believe that our operating subsidiaries would be entitled to fair market value for any assets that are condemned, and we believe the fair market value would be in excess of the book value for such assets.

Despite maintaining a program to monitor condemnation interests and activities that may affect us over time, one of our primary strategies continues to be to acquire additional water and wastewater systems, to maintain our existing systems where there is a business or a strategic benefit, and to actively oppose unilateral efforts by municipal governments to acquire any of our operations, particularly for less than the fair market value of our operations or where the municipal government seeks to acquire more than it is entitled to under the applicable law or agreement. On occasion, we may voluntarily agree to sell systems or portions of systems in order to help focus our efforts in areas where we have more critical mass and economies of scale or for other strategic reasons.

Environmental, Health and Safety Regulation and Compliance

The Company's mission is "to sustain life and improve economic prosperity by safely and reliably delivering Earth's most essential resources to customers and communities". We are committed to protecting the environment and the health and safety of our employees, customers, and the public and continue to adhere to applicable regulatory standards. We integrate environmental, health, and safety requirements into planning, decision-making, construction, operations, and maintenance activities that we perform.

Provision of water and wastewater services is subject to regulation under the federal Safe Drinking Water Act, the Clean Water Act, and related state laws, and under federal and state regulations issued under these laws. These laws and regulations establish criteria and standards for drinking water and for wastewater discharges. Environmental, health and safety, and water quality regulations are complex and may vary from state to state. In some instances, a state has adopted a standard that is more stringent than the federal standard. For example, in advance of proposed federal EPA regulations, the New Jersey Department of Environmental Protection has already established enforceable drinking water standards for three per- and polyfluoroalkyl substances, or PFAS, including perfluorooctanoic acid, or PFOA; perfluorooctane sulfonic acid, or PFOS; and perfluorononanoic acid, or PFNA, and the Pennsylvania Department of Environmental Protection also recently enacted enforceable drinking water standards for PFOA and PFOS. In addition, we are subject to federal and state laws and other regulations relating to solid waste disposal, dam safety, and other aspects of our operations.

From time to time, Essential Utilities has acquired, and may acquire, systems that have environmental compliance issues. Environmental compliance issues also arise in the course of normal operations or as a result of regulatory changes. Essential Utilities attempts to align capital budgeting and expenditures to address these issues in due course. We believe that the capital expenditures required to address outstanding environmental compliance issues in our water and wastewater systems have been budgeted in our capital program and represent approximately $187,000,000, or less than 5% of our expected total water and wastewater capital expenditures over the next five years (2024-2028). These capital expenditures do not include the amounts discussed below in connection with the National Primary Drinking Water Regulation as that regulation is not yet finalized. We are parties to agreements with regulatory agencies in Pennsylvania, Texas, and Illinois under which we have committed to make improvements for environmental compliance. These agreements are intended to provide the regulators with assurance that problems covered by these agreements will be addressed, and the agreements generally provide protection from fines, penalties, and other actions while corrective measures are being implemented. We are working with state environmental officials in Pennsylvania, Texas, and Illinois to implement or amend regulatory agreements as necessary.

Our Regulated Natural Gas utility operations are subject to stringent and complex laws and regulations pertaining to the environment. Legislative and regulatory actions to address climate change are in various phases of review or implementation in the United States. These measures could include emissions limits, reporting requirements, carbon taxes, and incentives or mandates to conserve energy or use renewable energy sources. As an owner or operator of natural gas pipelines, distribution systems and storage, and the facilities that support these systems, we must comply with these laws and regulations at the federal, state, and local levels. Failure to comply with these laws and regulations may trigger a variety of administrative, civil, and criminal enforcement measures, including the assessment of monetary penalties, the

imposition of remedial actions, and the issuance of orders enjoining future operations. Certain environmental statutes impose strict, joint and several liability for costs required to assess, clean up, and restore sites where hazardous substances have been stored, disposed or released.

Safe Drinking Water Act - The Safe Drinking Water Act establishes criteria and procedures for the U.S. Environmental Protection Agency (EPA) to develop national quality standards for drinking water. Regulations issued pursuant to the Safe Drinking Water Act set standards regarding the amount of microbial and chemical contaminants and radionuclides in drinking water. Current requirements under the Safe Drinking Water Act are not expected to have a material impact on our business, financial condition, or results of operations as we have made and are making investments to meet existing water quality standards. We may, in the future, be required to change our method of treating drinking water at some sources of supply and make additional capital investments if additional regulations become effective.

On March 14, 2023, the EPA announced the proposed National Primary Drinking Water Regulation, or NPDWR, for the treatment of six PFAS. The Company submitted comments on the NPDWR, which would establish legally enforceable levels for PFAS in drinking water. It is expected that the EPA will finalize the regulation in 2024. The Company will be provided a three-year window to comply with the NPDWR, and the Safe Drinking Water Act allows for an additional potential for a two-year extension at the state level, or the Compliance Period. We expect that the regulation, once finalized, will result in changes to or addition of certain treatment processes that will require increased capital expenditures and operating expenses. The Company performed its initial analysis of the NPDWR and estimates an investment of at least $450,000,000 of capital expenditures to install additional treatment facilities over the Compliance Period in order to comply with the proposed NPDWR. This figure could increase as plans for construction execution are refined or if additional sites require treatment in the future. Additionally, the Company estimates annual operating expenses of approximately five percent of the installed capital expenditures, in today's dollars, related to testing, treatment, and disposal. These are preliminary estimates and actual capital expenditures and expenses may differ based upon a variety of factors, including supply chain issues and site-by-site requirements. The Company continues to advocate for actions to hold polluters accountable and is part of the Multi-District Litigation and other legal actions against multiple PFAS manufacturers and polluters to attempt to ensure that the ultimate responsibility for the cleanup of these contaminants is attributed to the polluters and is seeking damages and other costs to address the contamination of its public water supply systems by PFAS. Capital expenditures and operating costs required as a result of water quality standards have been traditionally recognized by state utility commissions as appropriate for inclusion in establishing rates; however, we are also actively applying for grants and low interest loans, whenever possible, to reduce the overall cost to customers. The Company is also monitoring ongoing litigation and settlement activity with manufacturers of PFAS in these proceedings. For more information, see Item 3 - Legal Proceedings.

Clean Water Act - The Clean Water Act regulates discharges from drinking water and wastewater treatment facilities into lakes, rivers, streams, and groundwater. It is our policy to obtain and maintain all required permits and approvals for the discharges from our water and wastewater facilities, and to comply with all conditions of those permits and other regulatory requirements. A program is in place to monitor facilities for compliance with permitting, monitoring and reporting for wastewater discharges. We are continuously modernizing wastewater treatment methods, ensuring our systems protect the surrounding environment and adhere to current standards. From time to time, discharge violations may occur which may result in fines. These fines and penalties, if any, are not expected to have a material impact on our business, financial condition, or results of operations. We are also parties to agreements with regulatory agencies in several states where we operate while improvements are being made to address wastewater discharge issues. The EPA has identified leveraging wastewater discharge permitting and application of biosolids, or sewage sludge, containing PFAS as areas of focus in its PFAS Strategic Roadmap.

Solid Waste Disposal - The handling and disposal of waste generated from water and wastewater treatment facilities is governed by federal and state laws and regulations. A program is in place to monitor our facilities for compliance with regulatory requirements, and we are not aware of any significant environmental remediation costs necessary from our handling and disposal of waste material from our water and wastewater operations.

Dam Safety - Our subsidiaries own 34 dams, of which 18 are classified as high hazard dams that are subject to the requirements of the federal and state regulations related to dam safety, which undergo regular inspections and an annual engineering inspection. After a thorough review and inspection of our dams by professional outside engineering firms, we

believe that all 18 dams are structurally sound and well-maintained, except as described below. These inspections provide recommendations for ongoing rehabilitation which we include in our capital improvement program. The Company has approximately $34,000,000 in capital improvements budgeted between 2024 and 2028 for dam improvements.

We performed studies of our dams that identified five high hazard dams in Pennsylvania and one high hazard dam in Ohio requiring capital improvements. These capital improvements result from the adoption by state regulatory agencies of revised formulas for calculating the magnitude of a possible maximum flood event. The most significant capital improvement remaining to be performed in our dam improvement program is on one dam in Pennsylvania at a total estimated cost of $15,400,000. Design for this dam commenced in 2013 and construction is expected to be completed in 2027. An additional four high hazard dams in Pennsylvania were recently added due to an acquisition in 2023. These dams are undergoing additional evaluations but have capital improvements budgeted for currently identified needs in the 2024 to 2028 period.

Lead and Copper Rule –Since the Lead and Copper Rule (LCR) was issued in 1992, we have been working to prevent lead leaching from home plumbing sources by reducing water corrosivity and adding chemicals that can prevent leaching of lead in pipes and homes. We have a program to evaluate all changes in water sources and/or treatment prior to initiating a change in water supply. We also focus on identifying and removing lead service lines and encouraging customers to replace the customer-owned portion of the service line if it is lead as they are identified during our main replacement program or during other maintenance activities. We support the recommendations of The Lead Service Line Replacement Collaborative, a collaborative of leading water industry, housing, and health organizations that has recommended full replacement of lead service lines as a “best practice” to reduce lead in drinking water, but we generally only have control over the company-owned portion of each service line. In cases where we are replacing a company-owned lead service line, our standard approach is to replace the company-owned portion and advise and encourage the customer to replace the customer-owned portion of the service line, all the way to the customer’s home. In Pennsylvania, we have the legal and regulatory authority to replace the customer-owned portion of the service line and will attempt to obtain customer permission to do so. In New Jersey, we are also complying with the state mandate to replace lead and galvanized service lines on both the company and customer sides with a 10-year deadline. We also advise customers of the potential health impacts of lead in drinking water, and conduct lead testing at homes following replacement of a lead service line.

On January 15, 2021, the EPA published the Lead and Copper Rule Revisions (LCRR) which detail additional measures to better protect communities from exposure to lead in drinking water. Under the LCRR and subsequent rulings, water utilities are required to submit a lead service line inventory and a lead service line replacement plan to the respective states or agencies by October 16, 2024. We are continuing to enhance our lead service line inventory and refine our lead service line replacement plans, which we expect to complete by the deadline. On November 30, 2023, the EPA announced a proposed Lead and Copper Rule Improvements (LCRI) to further strengthen the key elements of the LCRR. The proposed LCRI includes, among others, a requirement to replace lead service lines within 10 years, lower lead action levels, changes to tap sampling protocol, and enhancements to public notification and customer communication. We are still in the process of reviewing the overall impact of the proposed LCRI. Capital expenditures and operating costs associated with compliance with any of these rule revisions will be determined once the EPA finalizes the rule.

Partnership for Safe Water Program – Essential Utilities is a proud participant in the American Water Works Association’s (AWWA) Partnership for Safe Water Program. This voluntary program is a commitment to excellence within the drinking water community above and beyond EPA’s stringent treatment goals. All of our active surface water treatment plants (within Pennsylvania, Ohio, and Illinois) maintain good standing in the program which includes many awards of achievement. The honors include the “Director’s Award” (achieved at eight systems) which recognizes plants that have: 1) completed a comprehensive self-assessment report, 2) created an action plan for continuous improvement, and 3) provided several evaluations of performance demonstrating operational excellence. Several of our systems have met these criteria annually and have received 5-, 10-, 15-, and 20-year subscriber awards. Furthermore, our Roaring Creek Pennsylvania treatment plant has received the Phase IV Excellence Award, the highest honor achieved in the Partnership Program.

Safety Standards - Our facilities and operations may be subject to inspections by representatives of the Occupational Safety and Health Administration from time to time. We maintain safety policies and procedures to comply with the Occupational Safety and Health Administration’s rules and regulations, but violations may occur from time to time, which

may result in fines and penalties, which are not expected to have a material impact on our business, financial condition, or results of operations. We endeavor to correct such violations promptly when they come to our attention.

Pipeline Safety Improvement Act- In December 2006, Congress enacted the Pipeline, Inspection, Protection, Enforcement and Safety Act of 2006 (2006 Act), which reauthorized the programs adopted under the Pipeline Safety Improvement Act of 2002 (2002 Act). These programs included several requirements related to ensuring pipeline safety, and a requirement to assess the integrity of pipeline transmission facilities in areas of high population concentration.

Pursuant to the 2006 Act, the Pipeline and Hazardous Materials Safety Administration (PHMSA), an agency of the US Department of Transportation (DOT), issued regulations, effective February 12, 2010, requiring operators of gas distribution pipelines to develop and implement integrity management programs similar to those required for gas transmission pipelines, but tailored to reflect the differences in distribution pipelines. Operators of natural gas distribution systems were required to write and implement integrity management programs by August 2, 2011. Peoples' natural gas distribution systems met this deadline.

Pursuant to the 2002 Act and the 2006 Act, PHMSA has adopted a number of rules concerning, among other things, distinguishing between gathering lines and transmission facilities, requiring certain design and construction features in new and replaced lines to reduce corrosion, and requiring pipeline operators to amend existing written operations and maintenance procedures and operator qualification programs. PHMSA also updated its reporting requirements for natural gas pipelines effective January 1, 2011.

In December 2011, Congress passed the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (2011 Act). This act increased the maximum civil penalties for pipeline safety administrative enforcement actions; required the DOT to study and report on the expansion of integrity management requirements and the sufficiency of existing gathering line regulations to ensure safety; required pipeline operators to verify their records on maximum allowable operating pressure; and imposed new emergency response and incident notification requirements. In 2016, the Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2016 (2016 Act) reauthorized PHMSA's pipeline safety programs through 2019 and provided limited new authority, including the ability to issue emergency orders, to set inspection requirements for certain underwater pipelines and to promulgate minimum safety standards for natural gas storage facilities, as well as to provide increased transparency into the status of as-yet-incomplete PHMSA actions required by the 2011 Act.

In 2020, the Protecting Our Infrastructure of Pipelines and Enhancing Safety Act of 2020 (2020 Act) reauthorized PHMSA through fiscal year 2023 and directed the agency to move forward with several regulatory initiatives, including obligating operators of non-rural gas gathering lines and new and existing transmission and distribution pipeline facilities to conduct certain leak detection and repair programs and to require facility inspection and maintenance plans to align with those regulations.

In June 2021, PHMSA issued an advisory bulletin to address a self-executing mandate as part of the 2016 Act. This Leak Detection and Reduction (LDAR) bulletin requires operators to update standard operating procedures to address leaks and gas releases which may be hazardous to public safety and the environment. In November 2021, PHMSA published the final gathering line rule. This rule requires preventative and mitigative measures on gathering lines of certain diameters and operating pressures. Further, on August 24, 2022, PHMSA published a final rule strengthening integrity management requirements for onshore gas transmission lines, bolstering corrosion control standards and repair criteria, and imposing new requirements for inspections after extreme weather events. Certain portions of this August 2022 ruling went into effect in May 2023, with the remaining portions taking effect in February 2024.

Compliance with PHMSA's regulations, performance of the remediation activities by our natural gas distribution companies and intrastate pipelines and verification of records on maximum allowable operating pressure will continue to require increases in both capital expenditures and operating costs. The level of expenditures will depend upon several factors, including age, location and operating pressures of the facilities. In particular, the cost of compliance with the DOT's integrity management rules will depend on integrity testing and the repairs found to be necessary by such testing. Changes to the amount of pipe subject to integrity management, whether by expansion of the definition of the type of areas subject to integrity management procedures or of the applicability of such procedures outside of those defined areas, may also affect incurred costs. Implementation of the 2011, 2016 and 2020 Acts by PHMSA may result in other

regulations or the reinterpretation of existing regulations that could impact compliance costs. In addition, we may be subject to the DOT's enforcement actions and penalties if the Company fails to comply with pipeline regulations.

Inflation Reduction Act - On August 16, 2022, the Inflation Reduction Act of 2022 (IRA) was enacted into law, which among other things, includes a provision to implement an annual waste emissions charge beginning with calendar year 2024 (to be paid in 2025) on applicable oil and gas facilities that exceed certain methane emission thresholds. Currently, the Company has gathering facility assets that could exceed the applicable emissions thresholds and potentially be subject to the waste emissions charge. On January 12, 2024, the EPA released a proposed rule addressing how the charge will be implemented, including the calculation of the charge and potential exemptions from the charge. We are continuing to assess the future impact of the provisions of the IRA on our consolidated financial statements and on the Company's gathering facility assets. We have estimated that the waste emissions charge beginning in 2024 could approximate $1,000,000 to $2,000,000 annually, with the potential to change over time as the Company's gathering facility assets are replaced or retired. We have proposed recovery of these estimated costs in the pending Peoples Natural Gas rate filing. As a regulated utility, required capital expenditures and operating costs, including taxes, have been traditionally recognized by state utility commissions as appropriate for inclusion in establishing rates.

Physical Security

We maintain security measures at our facilities, and collaborate with federal, state and local authorities and industry trade associations regarding information on possible threats and physical security measures for water, wastewater, and natural gas utility operations. The costs incurred are expected to be recoverable in customer rates and are not expected to have a material impact on our business, financial condition, or results of operations.

Environmental Stewardship

The way we do business at Essential reflects our commitment to a sustainable, safe, and healthy environment for all our stakeholders. Sustainability is deeply engrained in our business strategy. We ensure environmental stewardship remains a priority for management by factoring several benchmarks into executive compensation.

We understand the urgency of the Paris Agreement and the United Nations Intergovernmental Panel on Climate Change's science-based target of limiting the global temperature increase to well below 2 degrees Celsius. Of our Scope 1 and 2 GHG emissions, 79% are driven by our gas distribution business. Early in 2021, we announced that by 2035, we will reduce our Scope 1 and 2 GHG emissions by 60% from our 2019 baseline. This is consistent with the rate of reduction necessary through 2035 to keep on track with the Paris Agreement. This will be achieved by extensive gas pipeline replacement, renewable energy purchasing, accelerated methane leak detection and repair, and various other currently planned initiatives that are highly feasible with proven technology. In 2022, we have achieved 25% emissions reduction from our 2019 baseline. We also began procuring nearly 100% renewable electricity for our water and wastewater operations in Illinois, New Jersey, Ohio, and Pennsylvania in 2022.

The Company manages climate-change matters through significant board-level oversight. At the management level, the Environmental, Social and Governance, or ESG, Oversight Committee, which is a group of about a dozen of the Company' senior leaders across the organization and the Chief Executive Officer, meet at least once each quarter to discuss these topics. The Company's environmental sustainability initiatives and strategy are discussed further in our environmental, social, and governance reporting, which can be found on our website at https://esg.essential.co. Such reports are not incorporated by reference and should not be considered part of this Annual Report.

Human Capital Management

The Company values its workforce as one of its most important assets. The Company is dedicated to creating a sustainable working atmosphere for its employees to attract and retain the best employees. Human capital measures and objectives that the Company focuses on in managing its business include the health and safety of its employees, succession planning, voluntary attrition rate, and diversity, equity and inclusion initiatives.

As of December 31, 2023, we employed a total of 3,258 full-time employees. Our subsidiaries are parties to 22 labor agreements with labor unions covering 1,643 employees. The labor agreements expire at various times up until 2028.

Health and Safety - Safety is the foundation of our business and guides all our employees' actions. The Company continues to invest in safety improvements, implement policies and procedures, develop technical training and guidelines for our employees, and leverage new tools and technology to improve our maps, records and infrastructure performance. The Company's Senior Leadership Safety Council leads our safety efforts and is supported by the Safety Steering Committee, state and facility committees and leaders that operate at the local site level. Hazards in the workplace are actively identified, and management tracks incidents so remedial actions can be taken to improve workplace safety. To encourage managers to promote a safe environment, related metrics are incorporated in management's incentive compensation plans.

The Company provides free access to Health Advocate, which offers a variety of innovative, flexible, and convenient employee health and wellness programs. Through our partnership with Health Advocate, personalized mental health assistance is available to all employees and their family members; support is available 24/7 via in-person, phone or virtual visits with a licensed counselor.

Employee Development and Training - The Company continues to invest in training and development programs for employees so that they may evolve and enhance their skills in their areas of expertise. The Company offers several learning opportunities through partnerships with one of the leading online learning providers, business school certificate programs, tuition reimbursement for post-secondary degree granting programs, and individual career coaching. At Essential, we believe in an integrated talent development approach. We utilize the "70/20/10 model" for development, which holds that 70% of learning happens on the job through stretch goals and critical assignments, 20% of learning occurs through mentoring and coaching and involvement in professional and industry related activities, and 10% of learning occurs within a virtual or live learning environment. We align our development model to support our vision, mission, and competencies, with a balanced approach to developing our workforce that leads us to the development of a confident, committed, and high-performance culture.

Succession Planning – Essential has organizational workforce analysis and planning programs to ensure the Company has the talent it needs for the future. By conducting stay interviews with key performers, the Company learns where talent risks may arise. Under the Company's Corporate Governance Guidelines, the Board of Directors is responsible for the development and periodic review of a management succession plan for the Chief Executive Officer and other executives. Annually, the Board of Directors reviews the Company's succession planning process for the Chief Executive Officer and the named executive officers. During this review, the directors review succession candidates on an immediate basis and more developmental candidates to ensure that the Company is well-prepared for the future.

Voluntary Attrition and Turnover - The Company measures turnover rates of its employees in assessing the Company's overall human capital. The Company's voluntary attrition rate (not including retirements) for 2023 was 0% at the executive and senior management level, 6.3% at the mid-level manager level, 11.7% at the professional level, and 7.4% across all other employees. These voluntary attrition rates decreased from 2022 as the Company focused on measures to increase retention and the labor market improved. We are continuing to develop programs focused on retaining our workforce.

Diversity, Equity and Inclusion - Diversity of backgrounds, ideas, thoughts, and experiences is essential to our culture and the way we do business. Creating an environment where our differences are valued and where every person feels a sense of belonging and engagement supports a thriving organization that cares about our customers and ensures our continued long-term success. In order to promote a culture of diversity and inclusion, we have conducted educational workshops to foster better understanding of different points of view and how pre-conceived notions impact relationships at work. We also support diverse segments of our workforce through employee resource groups, such as the Black Resource Group, LGBTQ+ Pride Resource Group, and Women's Resource Group. These groups welcome participation from all employees in order to learn from a cultural perspective and support each other through allyship.

From 2021 to 2023, we added an employee diversity component (5% weighting) to our short-term incentive plan. Our focus on attracting and retaining diverse talent has resulted in growth in the number of our diverse employees. Diversity at the management level has also remained steady in 2023. We have achieved our multiyear plan of reaching 16.5% employees of color.

We also believe diversity in our Board of Directors is critical for effective governance. Candidates for nomination to the Board are considered by the Corporate Governance Committee based on their personal abilities, qualifications, independence, knowledge, judgment, character, leadership skills, education, background (including, but not limited to race, gender, and national origin), and their expertise and experience in fields and disciplines relevant to the Company. In October 2023, we were recognized as a Champion of Board Diversity by The Forum of Executive Women for having one-third of our board comprised of women for the fifth year since 2016.

Total Rewards - We invest in our workforce by offering a total rewards package that is targeted to be competitive with the market in which we compete for talent, while allowing individual pay to vary equitably based on performance, skills and experience. Our total rewards package includes a combination of salaries, short and long-term incentives, health and wellness benefits, retirement benefits, and other benefits which we regularly assess against the current business environment and labor market to ensure they are competitive.

Communication and Engagement –We believe that our employees are critical to our business, and it is essential to have an environment of high engagement and inclusivity in which employees thrive. We use a variety of communication channels to help employees stay informed and to facilitate direct dialogue, including open forums with our executives, town halls, regular engagement surveys, employee resource groups, and regular performance feedback sessions between employees and their supervisors. We value feedback from our employees, as it helps us gain a deeper understanding of areas where we are doing well and where we need improvement. Employees are requested to participate in a bi-annual culture assessment by completing an anonymous survey. We have worked with various functional areas to create and implement action plans to address areas of employee concern. Executive management also regularly conducts town hall-style meetings with employees, where they have the opportunity to ask questions, voice opinions, and share feedback.

Citizenship – As a mission-based organization, we are driven to improve the quality of life and livelihood of our customers and the communities we serve. Through our charitable giving program, employees are encouraged to engage in philanthropy through the United Way campaign and matching gift program. Essential matches 100%, up to a maximum of $500 per calendar year per employee, for personal contributions made by an employee or their spouse or domestic partner to qualifying nonprofit organizations. At various times throughout the year, the Company supports its employees in volunteering their time and talents to give back to their communities.

Supplier Diversity

We acknowledge that supplier diversity is critical for our communities as well as for our business. We are committed to increasing our work with qualified and certified diverse suppliers from the communities and neighborhoods where we live, work, and operate each day and suppliers that use reasonable efforts to minimize pollution and improve environmental protection and sustainability. As such, we announced a multi-year plan to increase diverse supplier spend to 15% of controllable spend, which excludes spend where there is no opportunity to include diverse suppliers or spend that cannot be sourced from a diverse supplier due to a policy or law (items like power, purchased water and some one-time payments). From 2021 to 2023, we added a supplier diversity component (5% weighting) to our short-term incentive plan to focus on identifying and supporting diverse vendors. We also have a Supplier Code of Conduct that defines the basic requirements for suppliers of goods and services and their responsibilities to the environment and their stakeholders. We also expect our suppliers to subscribe to the principles of nondiscrimination, follow high standards of business ethics and professional conduct and adhere to our Human Rights Policy.

Management and Board Oversight

Our Board of Directors has various committees including an audit committee, an executive compensation committee, a corporate governance committee, and a risk mitigation and investment policy committee. Each of these committees has a formal charter. We also have Corporate Governance Guidelines and a Code of Ethical Business Conduct. Copies of these charters, guidelines, and codes can be obtained free of charge from our *Investor Relations* page on our web site, www.essential.co. In the event we amend or waive any portion of the Code of Ethical Business Conduct that applies to any of our directors, executive officers, or senior financial officers, we will post that information on our web site.

Available Information

We file annual, quarterly, current reports, proxy statements, and other information with the Securities and Exchange Commission (SEC). You may obtain our SEC filings from the SEC's web site at www.sec.gov.

Our internet web site address is www.essential.co. We make available free of charge through our web site's *Investor Relations* page all of our filings with the SEC, including our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and other information. These reports and information are available as soon as reasonably practicable after such material is electronically filed with the SEC.

In addition, you may request a copy of the foregoing filings, at no cost by writing or telephoning us at the following address or telephone number:

Investor Relations Department
Essential Utilities, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000

The references to our web site and the SEC's web site are intended to be inactive textual references only, and the contents of those web sites are not incorporated by reference herein and should not be considered part of this or any other report that we file with or furnish to the SEC.

Item 1A. *Risk Factors*

In addition to the other information included in this Annual Report, the following factors should be considered in evaluating our business and future prospects. Any of the following risks, either alone or taken together, could materially harm our business, financial condition, and results of operations. If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, our business, financial condition, and results of operations could be materially harmed.

Risk Factor Summary

Our business is subject to many risks and uncertainties. The following are the types of forward-looking statements we make throughout this Annual Report, including in these Risk Factors, and a summary of the types of risks that could impact us and cause actual results to differ from those described in such forward-looking statements:

- opportunities for future acquisitions, both within and outside the water and wastewater industries, the success of pending acquisitions and the impact of future acquisitions;
- acquisition-related costs and synergies;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- the sale of water, wastewater, and gas subsidiaries;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water and natural gas usage per customer;
- the impact of our business on the environment, and our ability to meet our environmental, social, and governance goals;
- our authority to carry on our business without unduly burdensome restrictions;
- our capability to pursue timely rate increase requests;
- the capacity of our water supplies, water facilities, wastewater facilities, and natural gas supplies and storage facilities;
- the impact of public health threats, or the measures implemented by the Company as a result of these threats;
- the impact of cybersecurity attacks or other cyber-related events;
- developments, trends and consolidation in the water, wastewater, and natural gas utility and infrastructure industries;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with the environment, health and water quality, taxation, and public utility regulation;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- the availability and cost of capital financing, including impacts of increasing financing costs and interest rates;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of legal proceedings;
- general economic conditions, including inflation;
- the impairment of goodwill resulting in a non-cash charge to earnings;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- the success in the closing of, and the profitability of future acquisitions;
- changes in general economic, business, credit and financial market conditions;
- our ability to manage the expansion of our business;
- changes in environmental conditions, including the effects of climate change;
- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- the decisions of governmental and regulatory bodies, including decisions on regulatory filings, including rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- the impact of inflation on our business and on our customers;
- abnormal weather conditions, including those that result in water use restrictions or reduced or elevated natural gas consumption;
- the seasonality of our business;
- our ability to treat and supply water or collect and treat wastewater;
- our ability to source sufficient natural gas to meet customer demand in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cybersecurity attacks or other cyber-related events, and risks associated with new systems implementation or integration;
- impacts from public health threats, including on consumption, usage, supply chain, and collections.
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- inflation in the costs of goods and services;
- the effect of natural gas price volatility, including the potential impact of high commodity prices on usage or rate case outcomes;
- civil disturbance or terroristic threats or acts;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- changes in accounting pronouncements;
- litigation and claims; and
- restrictions on our subsidiaries' ability to make dividends and other distributions.

Risks Related to Acquisitions

One of the important elements of our growth strategy is the acquisition of regulated utility systems. Any acquisition we decide to undertake may involve risks. Further, competition for acquisition opportunities from other regulated utilities, governmental entities, and strategic and financial buyers may hinder our ability to grow our business. Lastly, competition and industry trends could impact our ability to retain existing customers or acquire new customers, which could have an adverse impact on our business, results of operations and financial condition.

One important element of our growth strategy is the acquisition and integration of regulated utility systems in order to broaden our service areas. We will not be able to acquire other businesses if we cannot identify suitable acquisition opportunities or reach mutually agreeable terms with acquisition candidates. It is our intent, when practical, to integrate any businesses we acquire with our existing operations. Investing in and integrating acquisitions could require us to incur significant costs and cause diversion of our management's time and resources, and we may be unable to successfully integrate our business with acquired businesses or to realize anticipated benefits of acquisitions. Acquisitions by us could also result in:

- dilutive issuances of our equity securities;
- incurrence of debt, contingent liabilities, and environmental liabilities;
- unanticipated capital expenditures;
- failure to maintain effective internal control over financial reporting;
- recording goodwill and other intangible assets for which we may never realize their full value and may result in an asset impairment that may negatively affect our results of operations;
- fluctuations in quarterly and/or annual results;
- other acquisition related expenses; and
- exposure to unknown or unexpected risks and liabilities.

Some or all of these items could harm our business, financial condition, results of operations, and cash flows, and our ability to finance our business and to comply with regulatory requirements. The businesses we acquire may not achieve sales and profitability that would justify our investment, and any difficulties we encounter in the integration process, including in the integration of processes necessary for internal control and financial reporting, could interfere with our operations, reduce our operating margins and harm our internal controls.

Some states in which we operate allow the respective public utility commissions to use fair market value to set ratemaking rate base instead of the traditional depreciated original cost of water or wastewater assets for certain qualifying municipal acquisitions. Depending on the state, there are varying rules and circumstances in which fair value is determined. A number of states' regulations allow ratemaking rate base to equal the lower of the average of the appraisals or the purchase price, subject to regulatory approval. There may be situations where we may pay more than the ultimate fair value of the utility assets as set by the regulatory commission, despite the fair value legislation suggesting its full recovery. In these situations, goodwill may be recognized to the extent there is an excess purchase price over the fair value of net tangible and identifiable intangible assets acquired through a business acquisition. Our financial condition and results of operations could be harmed by an inability to earn a return on, and recover our purchase price as a component of rate base. Regulatory actions or changes in significant assumptions, including discount and growth rates, utility sector market performance and comparable transaction multiples, projected operating and capital cash flows, and fair value of debt, could also potentially result in future impairments which could be material.

We compete with governmental entities, other regulated utilities, and strategic and financial buyers, for acquisition opportunities. As consolidation becomes more prevalent in the utility industry and competition for acquisitions increases, the prices for suitable acquisition candidates may increase to unacceptable levels and limit our ability to grow through acquisitions. In addition, our competitors may impede our growth by purchasing utilities near our existing operations, thereby preventing us from acquiring them. Governmental entities or environmental / social activist groups have challenged, and may in the future challenge our efforts to acquire new service territories, particularly from municipalities or municipal authorities. Additionally, on occasion we have entered into agreements to acquire water or wastewater utility systems that have been challenged by municipalities or other parties, or where referenda are required, which may impact our ability to complete the acquisition. Higher purchase prices and resulting rates may limit our ability to invest additional capital for system maintenance and upgrades in an optimal manner. Our growth could be hindered if we are not able to compete effectively for new companies and/or service territories with other companies or strategic and financial buyers that have lower costs of operations or capital, or that submit more attractive bids. Any of these risks may harm our business, financial condition, and results of operations.

We face the risk that large natural gas customers may bypass gas distribution services by gaining distribution directly from interstate pipelines, other gas distributors, or other energy sources. Increased competition or other changes in legislation, regulation, or policies could have a material adverse effect on our business, financial condition, or results of operations. Moreover, changes in wholesale natural gas prices compared with prices for electricity, fuel oil, coal, propane, or other energy sources may affect the retention of natural gas customers and may adversely impact our future financial condition and results of operations.

The integration of acquisitions can be a multi-year activity depending upon the complexity and significance of the acquisition.

One element of our strategic plans is our growth through acquisition strategy. Acquisitions in the utility industry are time consuming and complex, with the number of regulatory approvals needed. A significant acquisition can require significant time and resources, including devotion of management time, to integrate the acquired business.

Risks Related to Health and Safety and Environmental Concerns

Some scientific experts are predicting a worsening of weather volatility in the future, possibly created by climate change due to greenhouse gases. Changing severe weather patterns could require additional expenditures to reduce the risk associated with any increasing storm, flood, and drought occurrences.

The issue of climate change is receiving ever increasing attention worldwide. Many climate change predictions, if true, present several potential challenges to utilities, such as: increased frequency and duration of droughts, increased precipitation and flooding, potential degradation of water quality, and changes in demand for services. We maintain an ongoing facility planning process, and this planning or the enactment of new standards may result in the need for additional capital expenditures or raise our operating costs, including the cost of insurance. Because of the uncertainty of weather volatility related to climate change, we cannot predict its potential impact on our business, financial condition, or results of operations. Although any potential expenditures and operating costs may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that govern our business would approve rate increases to enable us to recover such expenditures and costs. Without adequate rate recovery, our costs of complying with climate change weather related measures may negatively impact our business, financial condition, or results of operations.

Climate change laws and regulations have been passed and are being proposed that require compliance with greenhouse gas emissions standards, as well as other climate change initiatives and reporting, which could impact our business, financial condition or results of operations.

Climate change is receiving ever increasing attention worldwide. Many scientists, legislators, and others attribute global warming to increased levels of greenhouse gases (GHG), including carbon dioxide. Climate change laws and regulations enacted and proposed could limit and impose costs tied to GHG emissions from covered entities and require additional monitoring/reporting. For example, in August 2022, the Inflation Reduction Act was signed into law, which includes a methane charge that is expected to be applicable to the reported annual methane emissions of certain oil and gas facilities,

that exceed certain methane emission thresholds, starting in calendar year 2024. A number of states have also adopted energy strategies or plans with goals that include the reduction of greenhouse gas emissions. For example, Pennsylvania has a methane reduction framework for the natural gas industry, which has resulted in permitting changes with the stated goal of reducing methane emissions from well sites, compressor stations, and pipelines. At this time, the existing GHG laws and regulations are not expected to materially harm the Company's operations or capital expenditures; however, the uncertainty of future climate change regulatory requirements still remains. We cannot predict the potential impact of future laws and regulations on our business, financial condition, or results of operations. Although these future expenditures and costs for regulatory compliance may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that govern our business would approve rate increases to enable us to recover such expenditures and costs. Competition from renewable energy sources may reduce the demand for natural gas, which could impact our future earnings and cash flows. Another potential risk related to climate change could be more frequent and more severe weather events, which could increase our costs to repair damaged facilities and restore service to our customers. If we are unable to provide utility services to our customers, our financial results would be impacted by lost revenues, and we would have to seek regulatory approval to recover restoration costs.

Climate change and other environmental, social, and governance matters are increasingly important to many investors, and we may fail to provide information desired by all investors or achieve our ESG goals.

Climate change and other environmental, social, and governance, or ESG, matters are increasingly important to many investors, including our current investors. We have focused attention on ESG matters and the communication of our ESG goals, targets, and activities to investors. These goals and targets reflect our current plans and aspirations. Our ability to achieve such goals and aspirations is subject to numerous risks and uncertainties, many of which rely on the collective efforts of others or may be outside of our control. As such, we cannot offer assurances that the results reflected or implied by any such statements will be realized or achieved. Moreover, standards and expectations for ESG matters continue to evolve and may be subject to varying interpretations, which may result in significant revisions to our goals or progress. We may also be unable to satisfactorily meet evolving standards, regulations, and disclosure requirements related to ESG. Any failure, or perceived failure, to meet evolving stakeholder expectations, additional regulations and industry standards and disclosures, or achieve our ESG goals and targets could have an adverse effect on our business, results of operations, financial condition, or stock price.

Our water supply, including water provided to our customers, is subject to various potential contaminants which may result in disruption in our services, additional costs, loss of revenue, fines, laws and/or regulations, and litigation which could harm our business, reputation, financial condition, and results of operations.

Our water supplies, including water provided to our customers, are subject to possible contaminants, including those from:

- naturally occurring compounds or man-made substances;
- chemicals and other hazardous materials;
- lead and other materials;
- manufactured sources, such as pharmaceuticals and personal care products; and
- possible deliberate or terrorist attacks.

Depending on the nature of the water contamination, we may have to interrupt the use of that water supply until we are able to substitute, where feasible, the flow of water from an uncontaminated water source, including if practicable, the purchase of water from other suppliers, or continue the water supply under restrictions on use for drinking or broader restrictions against all use except for basic sanitation and essential fire protection. We may experience a loss of revenue and incur significant costs, including, but not limited to, costs for water quality testing and monitoring, "do not consume" expenses, treatment of the contaminated source through modification of our current treatment facilities or development of new treatment methods, the purchase of alternative water supplies, or litigation related matters, including governmental enforcement actions. In addition, the costs we could incur to decontaminate a water source or our water distribution system and dispose of waste could also be significant. The costs resulting from the contamination may not be recoverable in rates we charge our customer, or may not be recoverable in a timely manner. Further, we may incur a loss of revenue in the event we elect to waive customers' water and wastewater charges. If we are unable to adequately treat the contaminated water supply or substitute a water supply from an uncontaminated water source in a timely or cost-effective manner, there may be an adverse effect on our business, reputation, financial condition, and results of operations. We could also be subject to:

- claims for consequences arising out of human exposure to contamination and/or hazardous substances in our water supplies, including toxic torts;
- claims for other environmental damage;
- claims for customers' business interruption as a result of an interruption in water service;
- claims for breach of contract;
- criminal enforcement actions;
- regulatory fines; or
- other claims.

We incur substantial costs on an ongoing basis to comply with all laws and regulations. New or stricter laws and/or regulations could increase our costs. Although we may seek to recover these costs through an increase in customer rates, there is no guarantee that the various state regulators would approve such an increase.

We have been working to prevent lead leaching from home plumbing sources by reducing water corrosivity and adding chemicals that can prevent leaching of lead in pipes and homes. We have a program to evaluate all changes in water sources prior to initiating a change in water supply. We also focus on identifying and removing lead service lines and encouraging customers to replace the customer-owned portion of the service line if it is lead as they are identified during our main replacement program or during other maintenance activities. In 2019, we initiated a "do not consume" advisory for some of our customers served by our Illinois subsidiary, which resulted in a loss of revenues and increased operating costs and for which we anticipate an additional recovery of other costs and losses. The do not consume advisory was lifted in 2019 and, in 2022, the water system was determined to be in compliance with the federal Lead and Copper Rule. We filed a claim with our insurance carrier for costs and losses incurred in 2019 related to the do not consume advisory, for which we recovered a portion of the costs and losses and for which we anticipate an additional recovery of other costs and losses.

We are devoting our attention to various emerging contaminants, including the Per- and Polyfluoroalkyl Substances (PFAS) family of chemicals and other chemicals and substances that do not have any federal regulatory standard in drinking water. We comply with governmental agency guidance that recommends the standard of protection from these contaminants, and we monitor proposed standards and other governmental agency guidance regarding these contaminants. On March 14, 2023, the U.S. Environmental Protection Agency (EPA) announced the proposed National Primary Drinking Water Regulation (NPDWR) for the treatment of six PFAS compounds. The NPDWR proposed maximum contaminant levels (MCLs) in drinking water. It is expected that the EPA will finalize the regulation in 2024. The Company will be provided a three-year window to comply with the NPDWR, and the Safe Drinking Water Act allows for an additional potential for a two-year extension at the state level, or the Compliance Period. We expect that the regulation, once finalized, will result in changes to or addition of certain treatment processes that will require increased capital expenditures and operating expenses. The Company performed its initial analysis of the NPDWR and estimates an investment of at least $450,000,000 of capital expenditures to install additional treatment facilities over the Compliance Period in order to comply with the proposed NPDWR. This figure could increase as plans for construction execution are refined or if additional sites require treatment in the future. Additionally, the Company estimates annual operating expenses of approximately five percent of the installed capital expenditures, in today's dollars, related to testing,

treatment, and disposal. These are preliminary estimates and actual capital expenditures and expenses may differ based upon a variety of factors, including supply chain issues and site-by-site requirements.

We may incur costs to defend our position and/or incur reputational damage even if we are not liable for consequences arising out of human exposure to contamination and/or hazardous substances in our water supplies, other environmental damage, or our customer's business interruption. Our insurance policies may not be sufficient to cover the costs of our defense or, in the event we are liable, these claims, and losses incurred, may make it difficult for us to secure insurance in the future at acceptable rates. Such claims or actions could harm our business, reputation, financial condition, and results of operations.

Transporting, distributing and storing natural gas involves numerous risks that may result in accidents and other operating risks and costs.

Natural gas transportation, distribution and storage activities inherently involve a variety of hazards and operational risks, such as leaks, accidental explosions, damage caused by third parties and mechanical problems, which could cause substantial financial losses. These risks could result in serious personal injury, loss of human life, significant damage to property, environmental pollution, impairment of operations, and substantial losses. The location of pipelines and storage facilities near populated areas, including residential areas, commercial business centers and industrial sites, could increase the level of damages resulting from these risks. These activities may also subject the Company to litigation or administrative proceedings. Such litigation or proceedings could result in substantial monetary judgments, fines or penalties against the Company or otherwise be resolved on unfavorable terms.

We are subject to federal and state laws and regulations requiring the Company to maintain certain safety and system integrity measures by identifying and managing storage and pipeline risks. In addition, companies that supply and transport gas to Peoples are also subject to similar regulations and other restrictions related to their activities. Compliance with these laws and regulations, or future changes in these laws and regulations, may, directly or indirectly, result in increased capital, operating, and other costs which may not be recoverable in a timely manner or at all from customers in rates. In accordance with customary industry practices, we maintain insurance against a significant portion, but not all, of these risks and losses. To the extent any of these events occur or regulations change, it could adversely affect our business, reputation, financial condition, and results of operations.

Risks Related to the Operation and Regulation of our Business

General economic conditions may affect our financial condition and results of operations.

A general economic downturn may lead to a number of impacts on our business and may affect our financial condition and results of operations. Such impacts may include:

- a reduction in discretionary and recreational water use by our residential water customers, particularly during the summer months when such discretionary usage is normally at its highest;
- a reduction in natural gas use by our residential customers, particularly during the winter months when such usage is normally at its highest;
- a decline in usage by industrial and commercial customers as a result of decreased business activity or a shift to alternative energy sources;
- an increased incidence of customers' inability to pay or delays in paying their utility bills, or an increase in customer bankruptcies, which may lead to higher bad debt expense, increased financing costs, and reduced cash flow;
- a lower natural customer growth rate due to a decline in new housing starts; and
- a decline in the number of active customers due to housing vacancies.

General economic turmoil may also lead to an investment market downturn, which may result in our pension and other post-retirement plans' asset market values suffering a decline and significant volatility. A decline in our plans' asset market values could increase our required cash contributions to the plans and increased expense in subsequent years. Inflation levels in excess of historical levels could also lead to regulatory lag and thus impact our earned returns and financial results.

Moreover, in recent years, inflation and rising interest rates have become areas of increasing economic concern. Changes in the cost of providing our products and services, including price increases in operating and capital costs, as well as increases in labor costs or borrowing costs, may negatively impact our financial condition and results of operations. We review the adequacy of our rates as approved by public utility commissions in relation to the increasing cost of providing services and the inherent regulatory lag in adjusting those rates. Rate increases are not retroactive and often lag increases in costs caused by inflation. On occasion, our regulated utility companies may enter into rate settlement agreements, which require us to wait for a period of time to file the next base rate increase request. These agreements may result in regulatory lag whereby inflationary increases in expenses or higher borrowing costs may not be reflected in rates, and may not yet be requested, or a gap may exist between when a capital project is completed and the start of its recovery in rates. Even during periods of moderate inflation, the effects of inflation can have a negative impact on our operating results. The ability to control operating expenses is an important factor that will influence future results.

Inflation could adversely impact our ability to control costs, including operating expenses and capital costs.

Although inflation had been low previously, it rose significantly in the second half of 2021 and through 2022 and 2023. In addition, global and industry-wide supply chain disruptions have resulted in shortages in labor, materials and services. Such shortages have resulted in inflationary cost increases for labor, materials and services and could continue to cause costs to increase, as well as a scarcity of certain products and raw materials. Inflation, higher interest rates and supply chain pressures resulted in an increase in certain operating and capital spending requirements in 2022 and 2023, which we expect will continue into 2024. To the extent inflation remains elevated, we may experience further cost increases for our operations, as well as increased labor costs. We cannot predict any future trends in the rate of inflation and interest rates, and a significant increase in inflation, to the extent we are unable to recover higher costs through rate cases, could negatively impact our business, financial condition and results of operation.

The rates we charge our customers are subject to regulation. If we are unable to obtain government approval of our requests for rate increases or if approved rate increases are untimely or inadequate to recover and earn a return on our capital investments, to recover expenses or taxes, or to take into account changes in water, wastewater, or natural gas usage, our profitability may suffer.

The rates we charge our customers are subject to approval by utility commissions in the states in which we operate. We file rate increase requests, from time to time, to recover our investments in utility plant and expenses. Our ability to maintain and meet our financial objectives is dependent upon the recovery of, and return on, our capital investments and expenses through the rates we charge our customers. Once a rate increase petition is filed with a utility commission, the ensuing administrative and hearing process may be lengthy and costly, and our costs may not always be fully recoverable. The timing of our rate increase requests are therefore partially dependent upon the estimated cost of the administrative process in relation to the investments and expenses that we expect to recover through the rate increase. In addition, the amount or frequency of rate increases may be decreased or lengthened as a result of many factors including changes in regulatory oversight in the states in which we operate utilities and income tax laws, including regulations regarding tax-basis depreciation as it applies to our capital expenditures or qualifying utility asset improvements. We can provide no assurances that any future rate increase request will be approved by the appropriate utility commission; and, if approved, we cannot guarantee that these rate increases will be granted in a timely or sufficient manner.

In Virginia, North Carolina and Kentucky, we may bill our water utility customers, in certain circumstances, in accordance with a rate filing that is pending before the respective regulatory commission, which would allow for interim rates. Furthermore, some utility commissions authorize the use of expense deferrals and amortization in order to provide for an impact on our operating income by an amount that approximates the requested amount in a rate request. The additional revenue billed and collected prior to the final ruling is subject to refund to customers based on the outcome of the ruling. The revenue recognized and the expenses deferred by us reflect an estimate as to the final outcome of the ruling. If the request is denied completely or in part, we could be required to refund to customers some or all of the revenue billed to date, and write-off some or all of the deferred expenses.

Changes in our earnings may differ from changes in our rate base.

Our business is capital intensive and requires significant capital investments for additions to or replacement of property, plant and equipment. These capital investments create assets that are used and useful in providing regulated utility service, and as a result, increase our rate base, on which we generate earnings through the regulatory process. Changes in our reported earnings, however, may differ from changes in our rate base in a given period due to several factors, including rate case timing and the terms of such rate cases; over-or under-earnings in a given period due to changes in operating costs; the effects of tax rates or tax treatment of capital investments, including the effect of repair tax; capital expenditures that are not eligible for a DSIC between rate cases; acquisitions which have not yet been included in rate base; and issuances of equity. We anticipate that we may experience periods in which growth in earnings is less than growth in rate base; such differences may be material and may persist over multiple reporting periods.

Our ability to meet customers' natural gas requirements may be impaired if contracted natural gas supplies and interstate pipelines services are not available, are not delivered in a timely manner or if federal regulations decrease its available capacity, which may result in a loss of customers and an adverse effect on our financial conditions and results of operations.

We are responsible for acquiring sufficient natural gas supplies, interstate pipeline capacity and storage capacity to meet current and future customers' peak, annual and seasonal natural gas requirements. We rely on third-party service providers, as we purchase a portion of our natural gas supply from interstate sources and rely on interstate pipelines to transport natural gas to our distribution system, in addition to local production that is delivered directly into our pipeline system. The Federal Energy Regulatory Commission (FERC) regulates the transportation of the natural gas received from interstate sources, and any change in regulatory policies could increase our transportation costs or decrease our available pipeline capacity. A decrease in interstate pipeline capacity available, an increase in competition for interstate pipeline transportation service or other interruptions to pipeline gas supplies could reduce our normal interstate supply of natural gas. Additionally, federal or state legislation could restrict or limit natural gas drilling, which could decrease the supply of available natural gas. If we are unable to maintain access to a reliable and adequate natural gas supply or sufficient pipeline capacity to deliver that supply, we may be unable to meet our customers' requirements, resulting in a loss of customers and an adverse effect on our financial conditions and results of operations.

Peoples has traditionally used local production as a source of supply to fulfill a portion of its supply requirements. In order to absorb local gas into its system, Peoples has in place a network of pipelines and related facilities that move the gas either to customers located where gas is produced or to the more populated areas of the service territory where the greatest level of consumption occurs, and, in summer months, to Peoples' on-system and off-system storage facilities. This network of facilities includes gathering lines, compressor stations, and transmission lines. Peoples has entered into gas purchase agreements with various producers to supply this local production. A decrease in this supply could occur, for example, if the local gas producers no longer drill wells to offset natural well production decline or if such producers decide to cease production or produce into another pipeline. State and federal legislation or regulations could also limit drilling activities and in turn limit gas supply. If supply is limited, we would be faced with purchasing gas supplies likely at a higher cost, may be unable to find alternative gas supply, and accordingly, may be unable to meet customer requirements, resulting in a loss of customers and an adverse effect on our financial condition and results of operations.

Any failure of our water and wastewater treatment plants, network of water and wastewater pipes, or water reservoirs could result in damages that may harm our business, financial condition, and results of operations.

Our operating subsidiaries treat water and wastewater, distribute water, and collect wastewater through an extensive network of pipes, and store water in reservoirs. A failure of a major treatment plant, pipe, or reservoir could result in claims for injuries or property damage. The failure of a major treatment plant, pipe, or reservoir may also result in the need to shut down some facilities or parts of our network in order to conduct repairs. Such failures and shutdowns may limit our ability to supply water in sufficient quality and quantities to our customers or collect and treat wastewater in accordance with standards prescribed by governmental regulators, including state utility commissions, and may harm our business, financial condition, and results of operations. Any business interruption or other losses might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance in the future at acceptable rates.

Our facilities could be the target of a possible terrorist or other deliberate attack which could harm our business, financial condition and results of operations.

In addition to the potential contamination of our water supply or deliberate gas explosions as described in separate risk factors herein, we maintain security measures at our facilities and have heightened employee and public safety official awareness of potential threats to our utility systems. We have and will continue to bear increases in costs for security precautions to protect our facilities, operations, and supplies, most of which have been recoverable under state regulatory policies. While the costs of increases in security, including capital expenditures, may be significant, we expect these costs to continue to be recoverable in utility rates. Despite our security measures, we may not be in a position to control the outcome of terrorist events, or other attacks on our utility systems, should they occur. Such an event could harm our business, financial condition, and results of operations.

Our business is impacted by weather conditions and is subject to seasonal fluctuations, which could harm demand for water and natural gas services and our business, financial condition, and results of operations.

Demand for our water during the warmer months is generally greater than during cooler months due primarily to additional requirements for water in connection with irrigation systems, swimming pools, cooling systems, and other outside water use. Throughout the year, and particularly during typically warmer months, demand will vary with temperature, rainfall levels, and rainfall frequency. In the event that temperatures during the typically warmer months are cooler than normal, if there is more rainfall than normal, or rainfall is more frequent than normal, the demand for our water may decrease and harm our business, financial condition, and results of operations. In Illinois, our operating subsidiary has adopted a revenue stability mechanism which allows us to recognize state PUC authorized revenue for a period which is not based upon the volume of water sold during that period, and effectively reduces the impact of weather and consumption variability.

Peoples' revenues are seasonal and temperature sensitive and vary from year-to-year, depending on weather conditions, with a substantial portion of Peoples' revenue occurring in the first and fourth quarters of the year due to colder temperatures and increased heating needs. In 2023, this amounted to 73%, for the first and fourth quarters. This has the effect of reducing our quarterly revenues in the spring and summer months. In addition, warmer-than-normal-weather conditions can decrease the amount of natural gas Peoples sells in any year, which could adversely affect our business, financial condition, and results of operations. Finally, significantly colder-than-normal weather conditions can materially increase natural gas usage, resulting in challenges for our operations and our ability to serve our customers.

Decreased residential customer water and natural gas usage as a result of conservation efforts, and the impact of more efficient appliances and furnaces, may harm demand for our utility services and may reduce our revenues and earnings.

There has been a general decline in water usage per residential customer as a result of an increase in conservation awareness, and the impact of an increased use of more efficient plumbing fixtures and appliances. These gradual, long-term changes are normally taken into account by the utility commissions in setting rates, whereas short-term changes in water usage, if significant, may not be fully reflected in the rates we charge. We are dependent upon the revenue generated from rates charged to our residential customers for the volume of water used. If we are unable to obtain future rate increases to offset decreased residential customer water consumption to cover our investments, expenses, and return for which we initially sought the rate increase, our business, financial condition, and results of operations may be harmed.

In addition, over time, average customer gas consumption has declined, as more energy efficient appliances and furnaces have been installed and conservation programs have been implemented. If we are unable to compete effectively or if customers further reduce their gas needs, we may lose existing customers, sell less gas to our customers and/or fail to acquire new customers, which could have a material adverse effect on our business, financial condition, and results of operations.

Drought conditions and government-imposed water use restrictions may impact our ability to serve our current and future customers, and may impact our customers' use of our water, which may harm our business, financial condition, and results of operations.

We depend on an adequate water supply to meet the present and future demands of our customers. Drought conditions could interfere with our sources of water supply and could harm our ability to supply water in sufficient quantities to our existing and future customers. An interruption in our water supply could harm our business, financial condition, and results of operations. Moreover, governmental restrictions on water usage during drought conditions may result in a decreased demand for our water, even if our water supplies are sufficient to serve our customers during these drought conditions, which may harm our business, financial condition, and results of operations.

The failure of, or the requirement to repair, upgrade or dismantle any of our dams or reservoirs may harm our business, financial condition, and results of operations.

Several of our water systems include impounding dams and reservoirs of various sizes. Although we believe our dam review program, which includes regular inspections and other engineering studies, will ensure our dams are structurally sound and well-maintained, the failure of a dam could result in significant downstream damage and could result in claims for property damage or for injuries or fatalities. We periodically inspect our dams and purchase liability insurance to cover such risks, but depending on the nature of the downstream damage and cause of the failure, the policy limits of insurance coverage may not be sufficient, and losses incurred may make it difficult for us to secure insurance in the future at acceptable rates. A dam failure could also result in damage to, or disruption of, our water treatment and pumping facilities that are often located downstream from our dams and reservoirs. Significant damage to these facilities, or a significant decline in the storage of the raw water impoundment, could affect our ability to provide water to our customers until the facilities and a sufficient raw water impoundment can be restored. The estimated costs to maintain our dams are included in our capital budget projections and, although such costs to date have been recoverable in rates, there can be no assurance that rate increases will be granted in a timely or sufficient manner to recover such costs in the future, if at all.

Our operations are geographically concentrated in Pennsylvania, which make us susceptible to risks affecting Pennsylvania.

Although we operate water, wastewater, and natural gas utility infrastructure in a number of states, our operations are concentrated in Pennsylvania. As a result, our financial results are largely subject to political, resource supply, labor, utility cost and regulatory risks, economic conditions, natural disasters, and other risks affecting Pennsylvania.

Federal and state environmental laws and regulations impose substantial compliance requirements on our operations. Our operating costs could be significantly increased in order to comply with new or stricter regulatory standards imposed by federal and state environmental agencies.

Our water, wastewater, and natural gas services are governed by various federal and state environmental protection and health and safety laws and regulations, including the federal Safe Drinking Water Act, the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act and similar state laws, and federal and state regulations issued under these laws by the EPA and state environmental regulatory agencies. These laws and regulations establish, among other things, criteria and standards for drinking water and for discharges into the waters of the U.S. as well as dam safety, air emissions, and residuals management. Pursuant to these laws, we are required to obtain various environmental permits from environmental regulatory agencies for our operations. The Company routinely seeks to acquire wastewater systems, some of which may have combined wastewater and stormwater systems which may overflow and be subject to increased regulation by the U.S. EPA. We cannot assure you that we will be at all times in total compliance with these laws, regulations and permits. If we fail to comply with these laws, regulations or permits, we could be fined or otherwise sanctioned by regulators and such noncompliance could result in civil suits. Environmental laws and regulations are complex and change frequently. These laws, and the enforcement thereof, have tended to become more stringent over time. While we have budgeted for future capital and operating expenditures to comply with these laws and our permits, it is possible that new or stricter standards could be imposed that will require additional capital expenditures or raise our operating costs. Although these expenditures and costs may be recovered in the form of higher rates, there can be no assurance that the various state utility commissions that regulate our business would approve rate increases to enable us to

recover such expenditures and costs. In summary, we cannot assure you that our costs of complying with, current and future environmental and health and safety laws will not harm our business, financial condition, and results of operations.

Additionally, the discovery of presently unknown environmental conditions, including former manufactured gas plant sites, and claims under environmental laws and regulations may result in expenditures and liabilities, which could be material, and could materially harm our business, financial condition and results of operations.

We are increasingly dependent on the continuous and reliable operation of our information technology systems, including those of our third-party vendors, and a disruption of these systems, resulting from cybersecurity attacks, risks associated with new systems implementation or integration, or other events, could harm our business.

We rely on our information technology systems, including those of our third-party vendors, in connection with the operation of our business, especially with respect to customer service and billing, accounting and, in some cases, the monitoring and operation of our treatment, storage and pumping facilities, and our natural gas pipelines. In addition, we rely on our systems to track our utility assets and to manage maintenance and construction projects, materials and supplies, and our human resource functions. A loss of these systems, or major problems with the operation of these systems, could harm our business, financial condition, and results of operations. We could also be adversely affected by system or network disruptions if new or upgraded information technology systems are defective, not installed properly, or not properly integrated into operations. In addition, our information technology systems may be vulnerable to damage or interruption from the following types of cybersecurity attacks or other events:

- power loss, computer systems failures, and internet, telecommunications or data network failures;
- operator negligence or improper operation by, or supervision of, employees;
- physical and electronic loss of data;
- computer viruses, cybersecurity attacks, intentional security breaches, hacking, denial of service actions, misappropriation of data and similar events;
- difficulties in the implementation of upgrades or modification to our information technology systems; and
- hurricanes, fires, floods, earthquakes and other natural disasters.

Although we do not believe that our systems are at a materially greater risk of cybersecurity attacks than other similar organizations, our information technology systems may be vulnerable to damage or interruption from the types of cybersecurity attacks or other events listed above or other similar actions, and such incidents may go undetected for a period of time. Such cybersecurity attacks or other events may result in:

- the loss or compromise of customer, financial, employee, or operational data;
- disruption of billing, collections or normal field service activities;
- disruption of electronic monitoring and control of operational systems;
- delays in financial reporting and other normal management functions; and
- disruption in normal system operations.

Possible impacts associated with a cybersecurity attack or other events may include: remediation costs related to lost, stolen, or compromised data; repairs to data processing or physical systems; increased cybersecurity protection costs; adverse effects on our compliance with regulatory and environmental laws and regulation, including standards for drinking water; litigation; loss of revenue; and reputational damage. We maintain insurance to help defray costs associated with cybersecurity attacks or other events, but we cannot provide assurance that such insurance will provide coverage for any particular type of incident or event or that such insurance will be adequate, and losses incurred may make it difficult for us to secure insurance in the future at acceptable rates.

We have a cybersecurity controls framework in place. We monitor our control effectiveness in an increasing threat landscape and continuously take action to improve our security posture. We cannot assure you that, despite such measures, a form of system failure or data security breach will not have a material adverse effect on our financial condition and results of operations.

Our water or wastewater utility systems may be subject to condemnations or other methods of taking by governmental entities.

In the states where our subsidiaries operate water or wastewater utility systems, it is possible that portions of our subsidiaries' operations could be acquired by municipal governments by one or more of the following methods:

- eminent domain;
- the right of purchase given to or reserved by a municipality or political subdivision when the original franchise was granted; and
- the right of purchase given or reserved under the law of the state in which the subsidiary was incorporated or from which it received its permit.

The price to be paid upon such an acquisition by the municipal government is usually determined in accordance with applicable law under eminent domain. In other instances, the price may be negotiated, fixed by appraisers selected by the parties or computed in accordance with a formula prescribed in the law of the state or in the particular franchise or charter. We believe that our operating subsidiaries would be entitled to receive fair market value for any assets that are condemned. However, there is no assurance that the fair market value received for assets condemned would be in excess of book value.

In a very small number of instances, in one of our southern states where there are municipally-owned water or wastewater systems near our operating divisions, the municipally-owned system may either have water distribution or wastewater collection mains that are located adjacent to our division's mains or may construct new mains that parallel our mains. In these circumstances, on occasion, the municipally-owned system may attempt to offer service to customers who are connected to our mains, resulting in our mains becoming surplus or underutilized without compensation.

The final determination of our income tax liability may be materially different from our income tax provision.

Significant judgment is required in determining our provision for income taxes. Our calculation of the provision for income taxes is subject to our interpretation of applicable business tax laws in the jurisdictions in which we file. In addition, our income tax returns are subject to periodic examination by the Internal Revenue Service and other taxing authorities. Some of our subsidiaries use a tax method of accounting that permits the expensing of qualifying utility asset improvement costs that were previously being capitalized and depreciated for tax purposes. Our determination of what qualifies as a capital cost versus a tax deduction for utility asset improvements is subject to subsequent adjustment and may impact the income tax benefits that have been recognized.

Although we believe our income tax estimates, including any tax reserves for uncertain tax positions or valuation allowances on deferred tax assets are appropriate, there is no assurance that the final determination of our income tax liability will not be materially different; either higher or lower, from what is reflected in our income tax provision. In the event we are assessed additional income taxes, our business, financial condition, and results of operations could be harmed.

Wastewater operations entail significant risks and may impose significant costs.

Wastewater collection and treatment involve various unique risks. If collection or treatment systems fail or do not operate properly, or if there is a spill, untreated or partially treated wastewater could discharge onto property or into nearby streams and rivers, causing various damages and injuries, including environmental damage. These risks are most acute during periods of substantial rainfall or flooding, which are the main causes of wastewater overflow and system failure. Liabilities resulting from such damages and injuries could harm our business, financial condition, and results of operations.

Work stoppages and other labor relations matters could harm our operating results.

Approximately 50% of our Regulated Water and Regulated Natural Gas segments' workforce is unionized under 22 labor contracts with labor unions, which expire between at various times up until 2028. In light of rising costs for healthcare and retirement benefits, contract negotiations in the future may be difficult. We are subject to a risk of work stoppages and other labor actions as we negotiate with the unions to address these issues, which could harm our business, financial condition, and results of operations. We cannot assure you that issues with our labor forces will be resolved favorably to us in the future or that we will not experience work stoppages.

Workforce-related risks may affect our results of operations.

We are subject to various workforce-related risks, including the risk that we will be unable to attract and retain qualified personnel for our water, wastewater, and natural gas operations, that we will be unable to effectively transfer the knowledge and expertise of an aging workforce to new personnel as those workers retire, and that we will be unable to reach collective bargaining arrangements with the unions that represent certain of our workers, which could result in work stoppages. Additionally, we rely on outside resources to supplement our workforce, including construction crews which are key to our infrastructure replacement program. We face the same risks associated with these outside resources as we do with our own workforce. As a result, we may be unable to hire or retain an adequate number of individuals who are knowledgeable about public utilities, water or the natural gas industry or face a lengthy time period associated with skill development and knowledge transfer. Failure to address these risks may result in increased operational and safety risks as well as increased costs. Even with reasonable plans in place to address succession planning and workforce training, we cannot control the future availability of qualified labor. If we are unable to successfully attract and retain an appropriately qualified workforce, it could adversely affect our financial condition and results of operations.

Significant or prolonged disruptions in the supply of important goods or services from third parties could harm our business, financial condition, and results of operations.

We are dependent on a continuing flow of important goods and services from suppliers for our businesses. A disruption or prolonged delays in obtaining important supplies or services, such as maintenance services, purchased water, chemicals, utility pipe, valves, hydrants, electricity, or other materials, could harm our utility services and our ability to operate in compliance with all regulatory requirements, which could harm our business, financial condition, and results of operations. In some circumstances, we rely on third parties to provide important services (such as customer bill print and mail activities, payment processing, or utility service operations in some of our divisions) and a disruption in these services could harm our business, financial condition, and results of operations. Some possible reasons for a delay or disruption in the supply of important goods and services include:

- our suppliers may not provide materials that meet our specifications in sufficient quantities;
- our suppliers may provide us with water that does not meet applicable quality standards or is contaminated;
- our suppliers may provide us with natural gas not meeting quality standards or is of insufficient volume or pressure;
- our suppliers may face production or shipping delays due to public health threats, natural disasters, strikes, lock-outs, political disputes, or other such actions;
- one or more suppliers could make strategic changes in the lines of products and services they offer; and
- some of our suppliers, such as small companies, may be more likely to experience financial and operational difficulties than larger, well-established companies, because of their limited financial and other resources.

As a result of any of these factors, we may be required to find alternative suppliers for the materials and services on which we rely. Accordingly, we may experience delays in obtaining appropriate materials and services on a timely basis and in sufficient quantities from such alternative suppliers at a reasonable price, which could interrupt services to our customers and harm our business, financial condition, and results of operations.

We depend significantly on the services of the members of our management team, and the departure of any of those persons could cause our operating results to suffer.

Our success depends significantly on the continued individual and collective contributions of our management team. The loss of the services of any member of our management team or the inability to hire and retain experienced management personnel could harm our business, financial condition, and results of operations.

We may incur significant costs and liabilities resulting from pipeline integrity and other similar programs and related repairs.

Certain of Peoples' pipeline operations are subject to pipeline safety laws and regulations. The Department of Transportation's Pipeline and Hazardous Materials Safety Administration has adopted regulations requiring pipeline operators to develop integrity management programs, including more frequent inspections and other measures, for transmission pipelines located in "high consequence areas," which are those areas where a leak or rupture could do the most harm. The regulations require pipeline operators, including Peoples, to, among other things:

- perform ongoing assessments of pipeline integrity;
- develop a baseline plan to prioritize the assessment of a covered pipeline segment;
- identify and characterize applicable threats that could impact a high consequence area;
- improve data collection, integration, and analysis;
- develop processes for performance management, record keeping, management of change and communication;
- repair and remediate pipelines as necessary; and
- implement preventative and mitigating action.

We are required to maintain pipeline integrity testing programs that are intended to assess pipeline integrity. Peoples is also required to establish and maintain a Distribution Integrity Management Program for all distribution assets. This program requires protocols for identifying risks and threats to the distribution systems. The program incorporates a relative risk model to measure risk reduction to these threats. Any repair, remediation, preventative or mitigating actions may require significant capital and operating expenditures. Should we fail to comply with applicable statutes and related rules, regulations and orders, we could be subject to significant penalties and fines.

Our liquidity and, in certain circumstances, results of operations may be adversely affected by the cost of purchasing natural gas during periods in which natural gas prices are rising significantly.

The Peoples' regulated companies purchase their natural gas supply primarily through a combination of requirements contracts, some of which contain minimum purchase obligations, monthly spot purchase contracts, and forward purchase contracts. The price paid for natural gas acquired under forward purchase contracts is fixed prior to the delivery of the natural gas. Additionally, a portion of natural gas purchases is injected into natural gas storage facilities in the non-heating months and withdrawn from storage for delivery to customers during the heating months.

Our short-term borrowing requirements and liquidity are also significantly affected by the seasonal nature of the natural gas business. Changes in the price of natural gas due to, for example, extreme weather events, geopolitical forces, or regulatory policy changes, and the amount of natural gas needed to supply customers' needs due to, for example, colder than expected seasonal temperatures, could significantly affect the price and amount of natural gas we are required to purchase and the timing of such purchases, and, in turn, affect our borrowing requirements and liquidity position. If we fail to secure sufficient natural gas supplies at appropriate prices (due to, for example, more extreme winter conditions), we may be required to purchase additional natural gas supplies or purchase natural gas at elevated prices, which could adversely affect our borrowing levels, liquidity and financial condition.

Peoples' tariff rate schedules contain Purchased Gas Adjustment (PGA) clauses that permit filings for rate adjustments to recover the cost of purchased gas. Subject to regulatory approval, as described below, changes in the cost of purchased gas are flowed through to customers and may affect uncollectible amounts and cash flows and can therefore impact our financial condition and results of operations.

The state regulatory commissions approve the PGA changes on an interim basis, subject to refund and the outcome of a subsequent audit and prudence review. Due to such review process, there is a risk of a disallowance of full recovery of these costs. We are also subject to regulations and standards regarding the amount of lost and unaccounted for gas that may be recovered from customers. Any material disallowance of purchased gas costs would adversely affect our financial condition and results of operations.

Increases in the prices that we charge for gas may also adversely affect our business because increased prices could lead customers to reduce usage and cause some customers to have difficulty paying the resulting higher bills. These higher prices may increase bad debt expenses and ultimately reduce earnings. Additionally, rapid increases in the price of purchased gas may result in an increase in short-term debt.

Our non-regulated natural gas operations purchase natural gas utilizing a combination of requirements contracts, some of which contain minimum purchase obligations, monthly spot purchase contracts, and forward purchase contracts. Although price risk for the non-regulated companies is mitigated to a degree by efforts aimed at balancing supply and demand, there are practical limitations on the ability to accurately predict demand and any failure to do so could adversely affect our financial condition and results of operations.

An impairment in the carrying value of our goodwill could negatively impact our consolidated results of operations and net worth.

We have significant amounts of goodwill resulting from the acquisition of utility systems and businesses. As of December 31, 2023, the net carrying value of goodwill amounted to $2,340,738,000 or 13.9% of our total assets. Of the balance, $2,277,447,000 relates to our Regulated Natural Gas reporting unit. Goodwill is initially recorded at fair value, not amortized and reviewed for impairment at least annually or more frequently if impairment indicators arise. Indicators that are considered significant include changes in performance relative to expected operating results, significant negative industry or economic trends, including rising interest rates, or a significant decline in our stock price and/or market capitalization for a sustained period of time. If certain factors arise, we may be required to record a significant non-cash charge to earnings in our consolidated financial statements during the period in which an impairment of our goodwill is determined. Any such non-cash charge could have a material adverse impact on our results of operations and net worth.

Risk Related to Public Health Threats

Global or regional health pandemics, epidemics or similar public health threats could negatively impact our business, outlook, financial condition, results of operations and liquidity.

Public health threats, such as the COVID-19 pandemic, and the measures implemented to contain its spread, have widespread impacts on the global economy, our employees, customers, and third-party business partners. Public health threats could, in the future, materially impact our business in numerous ways, including, but not limited to, those outlined below:

- reduced demand from our commercial customers and shifts in demand for our regulated utility services;
- delay the timeliness of our service to customers because of shutdowns and/or illness and travel restrictions among our employees or employees of other companies on whom we rely;
- negatively impact the financial condition of our customers and their ability to pay for our products and services, and our ability to disconnect service for non-payment may be limited, and state regulators may impose bill deferral programs;
- may limit or curtail significantly or entirely the ability of public utility commissions to approve or authorize applications and other requests we may make with respect to our regulated water and natural gas businesses; and
- delays in our supply chain and our ability to complete maintenance, repairs, and capital programs, which could result in disruptions and increased costs.

These and other impacts of global or regional health pandemics, epidemics or similar public health threats could also have the effect of heightening many of the other risks described in "Risk Factors" in this Annual Report and the other reports we file from time to time with the SEC. We might not be able to predict or respond to all impacts on a timely basis to prevent near- or long-term adverse impacts to our results of operations, financial condition and liquidity. The ultimate impact of public health threats on our business depends on factors beyond our knowledge or control, including the duration and severity of the outbreak as well as third-party actions taken to contain its spread and mitigate its public health effects. Any of these factors could have a negative impact on our business, outlook, financial condition, and results of operations, which impact could be material.

Risks Related to the Company's Capital Needs and Common Stock

We have substantial indebtedness, as a result, it may be more difficult for the Company to pay or refinance its debts or take other actions, and the Company may need to divert cash to fund debt service payments.

As of December 31, 2023, our aggregate long-term and short-term debt balance was $7,098,131,000. The substantial indebtedness could:

- make it more difficult and/or costly for the Company to pay or refinance its debts as they become due, particularly during adverse economic and industry conditions, because a decrease in revenues or increase in costs could cause cash flow from operations to be insufficient to make scheduled debt service payments;
- limit the Company's flexibility to pursue other strategic opportunities or react to changes in its business and the industry sectors in which it operates and, consequently, put the Company at a competitive disadvantage to its competitors that have less debt;
- require a substantial portion of the Company's available cash to be used for debt service payments, thereby reducing the availability of its cash to fund working capital, capital expenditures, development projects, acquisitions, dividend payments, and other general corporate purposes, which could harm the Company's prospects for growth;
- result in a downgrade in the credit ratings on the Company's indebtedness, which could limit the Company's ability to borrow additional funds on favorable terms or at all and increase the interest rates under its credit facilities and under any new indebtedness it may incur;
- make it more difficult for the Company to raise capital to fund working capital, make capital expenditures, pay dividends, pursue strategic initiatives or for other purposes;
- result in higher interest expense, which could be further increased in the event of increases in interest rates on the Company's current or future borrowings; and
- require that additional materially adverse terms, conditions or covenants be placed on the Company under its debt instruments, which covenants might include, for example, limitations on additional borrowings and specific restrictions on uses of its assets, as well as prohibitions or limitations on its ability to create liens, pay dividends, receive distributions from its subsidiaries, redeem or repurchase its stock or make investments, any of which could hinder its access to capital markets and limit or delay its ability to carry out its capital expenditure program or otherwise limit its flexibility in the conduct of its business and make it more vulnerable to economic downturns and adverse competitive and industry conditions.

Based on the current and expected results of operations and financial condition of the Company, the Company believes that its cash flows from operations, together with the proceeds from borrowings, and issuances of equity and debt securities in the capital markets will generate sufficient cash on a consolidated basis to make all of the principal and interest payments when such payments are due under the Company's and its current subsidiaries' existing credit facilities, indentures and other instruments governing their outstanding indebtedness. However, the Company's expectation is based upon numerous estimates and assumptions and is subject to numerous uncertainties.

Our business requires significant capital expenditures that are partially dependent on our ability to secure appropriate funding. Disruptions in the capital markets may limit our access to capital. If we are unable to obtain sufficient capital, or if the cost of borrowing increases, it may harm our business, financial condition, results of operations, and our ability to pay dividends.

Our business is capital intensive. In addition to the capital required to fund customer growth through our acquisition strategy, on an annual basis, we invest significant sums for additions to or replacement of property, plant and equipment. We obtain funds for our capital expenditures from operations, contributions and advances by developers and others, debt issuances, and equity issuances. We have paid dividends consecutively for 79 years, and our Board of Directors recognizes the value that our common shareholders place on both our historical payment record and on our future anticipated dividend payments. Our ability to continue our growth through acquisitions and to maintain and meet our financial objectives is dependent upon the availability of adequate capital, and we may not be able to access the capital markets on favorable terms or at all. Additionally, if in the future, our credit facilities are not renewed or our short-term borrowings are called for repayment, we would need to seek alternative financing sources; however, there can be no assurance that these alternative financing sources would be available on terms acceptable to us. In the event we are unable to obtain sufficient capital, we may need to take steps to conserve cash by reducing our capital expenditures or dividend payments and our ability to pursue acquisitions may be limited. The reduction in capital expenditures may result in reduced potential earnings growth, affect our ability to meet environmental laws and regulations, and limit our ability to improve or expand our utility systems to the level we believe appropriate. There is no guarantee that we will be able to obtain sufficient capital in the future on reasonable terms and conditions for expansion, construction, and maintenance. In addition, delays in completing major capital projects could delay the recovery of the capital expenditures associated with such projects through rates.

If the cost of borrowing continues to increase, we might not be able to recover increases in our cost of capital through rates. The inability to recover higher borrowing costs through rates, or the regulatory lag associated with the time that it takes to begin recovery, may harm our business, financial condition, results of operations and cash flows.

Our inability to comply with debt covenants under our loan and debt agreements could result in prepayment obligations.

We are obligated to comply with debt covenants under some of our loan and debt agreements. Failure to comply with covenants under our loan and debt agreements could result in an event of default, which if not cured or waived, could result in us being required to repay or finance these borrowings before their due date, limit future borrowings, cause us to default on other obligations, and increase borrowing costs. If we are forced to repay or refinance (on less favorable terms) these borrowings, our business, financial condition, and results of operations could be harmed by reduced access to capital and increased costs and rates.

The price of our common stock may be volatile. This volatility may affect the price at which one could sell our common stock, and the sale or resale of substantial amounts of our common stock could adversely affect the market price of our common stock.

The sale or issuance of substantial amounts of our common stock, or the perception that additional sales or issuances could occur, could adversely affect the market price of our common stock, even if the business is doing well. In addition, the availability for sale of substantial amounts of our common stock could adversely impact its market price. Any of the foregoing may also impair our ability to raise additional capital through the sale of our equity securities.

Item 1B *Unresolved Staff Comments*

None

Item 1C *Cybersecurity*

Risk Management and Strategy

In connection with our enterprise risk management process, we identify, prioritize and monitor key risks that may affect the Company, including risks from cyber threats. Our cybersecurity program is aligned to the National Institute of Standards and Technology (NIST) Cybersecurity Framework. We have enterprise-wide security policies, standards and controls that incorporate best practices in security engineering, technology architecture and data protection, which support regulatory compliance. Our program includes encryption, data masking technology, data loss prevention technology, authentication technology, entitlement management, access control, anti-malware software and transmission of data over private networks, among other procedures designed to protect against unauthorized access to information. We also implemented specialized programs, such as enterprise-wide communications, presentations, phishing simulations and focused training for specific roles, as well as a general cybersecurity training program required for all employees. We also engage third parties to perform regular reviews of our security framework controls to promote objectivity. Our processes to identify, assess and manage material risks of cyber threats include risks associated with third party service providers, including cloud-based platforms. We believe that these processes provide us with a comprehensive assessment of potential cyber threats.

We maintain cybersecurity protection measures with respect to our information technology, including our customer data, and, in some cases, the monitoring and operation of our treatment, storage, pumping, and pipeline infrastructure. We rely on our information technology systems in connection with the operation of our business, especially with respect to customer service and billing, accounting and, in some cases, the monitoring and operation of our treatment, storage, pumping, and pipeline infrastructure. In addition, we rely on our systems to track our utility assets and to manage maintenance and construction projects, materials and supplies, and our human resource functions.

To date, risks from cybersecurity threats have not materially affected the Company, and we do not believe they are reasonably likely to materially affect the Company, including its business strategy, financial condition or results of operations. Refer to Item 1A – *Risk Factors* for additional information.

Governance

Role of Management - Our cybersecurity program is overseen by a cross-functional committee of senior business leaders and led by our Chief Information Officer and Information Security Director. This management committee meets bimonthly and is charged with overseeing our cybersecurity strategy, ensuring that cyber risk is managed, and that the program is aligned to business goals and objectives. Both our Chief Information Officer and Information Security Director have formal education in information technology; have combined, extensive experience working in the Company's information and technology function; and receive periodic training and education on cybersecurity-related topics.

Role of the Board of Directors - The Board of Directors has a Risk and Investment Policy Committee ("RP Committee") whose primary purpose is to assist the Board of Directors in fulfilling its oversight responsibilities. The RP Committee oversees a number of the Company's risk management practices, including cybersecurity risks. Our Chief Information Officer and Information Security Director provides updates on cybersecurity risks, threats, key developments in policies and practices, and related risk exposures to the RP Committee at least quarterly, and more often as needed. When covered during an RP Committee meeting, the Chairperson of the RP Committee reports on its discussions to the full Board of Directors. Additionally, management provides an update to the full Board of Directors at least once a year, and more often as needed. The Board of Directors annually reviews and approves the capital and operating budgets, ultimately reviewing and approving the amount spent on cybersecurity measures.

Item 2. *Properties*

Our Regulated Water properties consist of water transmission and distribution mains and wastewater collection pipelines, water and wastewater treatment plants, pumping facilities, wells, tanks, meters, pipes, dams, reservoirs, buildings, vehicles, land, easements, rights-of-way, and other facilities and equipment used for the operation of our systems, including the collection, treatment, storage, and distribution of water and the collection and treatment of wastewater. Substantially all of our treatment, storage, and distribution properties are owned by our subsidiaries, and a substantial portion of our property is subject to liens of mortgage or indentures. These liens secure bonds, notes and other evidences of long-term indebtedness of our subsidiaries. For some properties that we acquired through the exercise of the power of eminent domain and other properties we purchased, we hold title for water supply purposes only. We own, operate and maintain approximately 14,450 miles of transmission and distribution mains, 24 surface water treatment plants, many well treatment stations, and 203 wastewater treatment plants. A small portion of the properties are leased under long-term leases.

Our Regulated Natural Gas properties consist of approximately 15,400 miles of natural gas distribution mains, varying in size from one-half inch to 36 inches in diameter, 1,700 miles of gathering pipeline, and 300 miles of intrastate transmission/storage pipeline. Further, in each of the cities, towns, and rural areas where we serve natural gas customers, we own the underground gas mains and service lines, metering, and regulating equipment located on customers' premises and the district regulating equipment necessary for pressure maintenance. With a few exceptions, the measuring stations at which we receive gas from third parties are owned, operated, and maintained by others, and our distribution facilities begin at the outlet of the measuring equipment. These facilities, including odorizing equipment, are usually located on land owned by suppliers.

The following table indicates our net property, plant and equipment, in thousands of dollars, as of December 31, 2023 in the principal states where we operate:

	Net Property, Plant and Equipment	
Pennsylvania	$ 8,621,092	71.3%
Ohio	709,169	5.9%
Illinois	649,669	5.4%
North Carolina	548,807	4.5%
Texas	676,130	5.5%
Other (1)	892,205	7.4%
Consolidated	$ 12,097,072	100.0%

(1) Consists primarily of our operating subsidiaries in the following states: New Jersey, Indiana, Virginia, and Kentucky.

We believe that our properties are generally maintained in good condition and in accordance with current standards of good water, wastewater, and natural gas industry practice. We believe that our facilities are adequate and suitable for the conduct of our business and to meet customer requirements under normal circumstances.

Our corporate offices are leased from our subsidiary, Aqua Pennsylvania, and are located in Bryn Mawr, Pennsylvania.

Item 3. *Legal Proceedings*

There are various legal proceedings in which we are involved. Although the results of legal proceedings cannot be predicted with certainty, except for the matter described below, there are no other pending legal proceedings to which we or any of our subsidiaries is a party or to which any of our properties is the subject that we believe are material or are expected to materially harm our business, operating results, reputation, or financial condition.

PFAS Litigation
Several of the Company's subsidiaries are parties to several lawsuits against manufacturers of certain PFAS compounds for damages, contribution and reimbursement of costs incurred and continuing to be incurred to address the presence of such PFAS compounds in public water supply systems owned and operated by these utility subsidiaries and throughout its service area. One such suit, to which the Company is a party, is a multi-district litigation, or MDL, lawsuit which

commenced on December 7, 2018, in the United States District Court for the District of South Carolina. In August 2023, a potential class action settlement involving defendants The Chemours Company, Corteva, Inc., and DuPont de Nemours, Inc. to resolve claims brought in the MDL against them by public water systems, including the Company, and a similar class action settlement with defendant 3M Company received preliminary approval from the MDL court. The Company is monitoring and evaluating the ongoing litigation and settlement activity with the PFAS manufacturers for potential impacts to the various claims that the Company has asserted.

Item 4. *Mine Safety Disclosures*

Not applicable.

PART II

Item 5. *Market for the Registrant's Common Stock, Related Stockholder Matters and Purchases of Equity Securities*

Our common stock is traded on the New York Stock Exchange under the ticker symbol WTRG. As of February 23, 2024, there were approximately 19,173 holders of record of our common stock.

The following table shows the cash dividends per share for the periods indicated:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year
2023					
Dividend paid per common share	$ 0.2870	$ 0.2870	$ 0.3071	$ 0.3071	$ 1.1882
Dividend declared per common share	0.2870	-	0.3071	0.6142 *	1.2083
2022					
Dividend paid per common share	$ 0.2682	$ 0.2682	$ 0.2870	$ 0.2870	$ 1.1104
Dividend declared per common share	0.2682	0.2682	0.2870	0.5740 *	1.3974

**includes dividends declared in December that are payable to shareholders on March 1 of the subsequent year*

We have paid dividends consecutively for 79 years. On August 1, 2023, our Board of Directors authorized an increase of 7.0% in the September 1, 2023 quarterly dividend over the dividend Essential Utilities paid in the previous quarter. As a result of this authorization, beginning with the dividend payment in September 2023, the annualized dividend rate increased to $1.2284 per share. This is the 33rd dividend increase in the past 32 years and the 25th consecutive year that we have increased our dividend in excess of five percent. We presently intend to pay quarterly cash dividends in the future, on March 1, June 1, September 1, and December 1, subject to our earnings and financial condition, restrictions set forth in our debt instruments, regulatory requirements and such other factors as our Board of Directors may deem relevant. In 2023, our dividends paid represented 63.6% of net income.

Information with respect to restrictions set forth in our debt instruments is disclosed in Note 11 – *Long-term Debt and Loans Payable* in the *Notes to Consolidated Financial Statements* which is contained in Item 8 of this Annual Report.

During the fourth quarter of 2023, the Company did not repurchase any of its equity securities under any repurchase plan or program.

Item 6. *[RESERVED]*

(In thousands of dollars, except per share amounts)

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

OVERVIEW

The following discussion and analysis of our financial condition and results of operations should be read together with our Consolidated Financial Statements and accompanying Notes included in this Annual Report. This discussion contains forward-looking statements that are based on management's current expectations, estimates, and projections about our business, operations, and financial performance. All dollar amounts are in thousands of dollars, except per share amounts.

The Company

Essential Utilities, Inc., (Essential Utilities, the Company, we, us, or our), a Pennsylvania corporation, is the holding company for regulated utilities providing water, wastewater, or natural gas services to an estimated 5.5 million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, and Kentucky under the Aqua and Peoples brands. One of our largest operating subsidiaries, Aqua Pennsylvania, Inc. (Aqua Pennsylvania), provides water or wastewater services to approximately one-half of the total number of water or wastewater customers we serve. These customers are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated water or wastewater utility subsidiaries provide similar services in seven additional states. Our Peoples subsidiaries provide natural gas service to approximately 744,000 customers in western Pennsylvania and Kentucky. Approximately 95% of the total number of natural gas utility customers we serve are in western Pennsylvania. Lastly, the Company's market-based activities are conducted through Aqua Resources, Inc. and certain other non-regulated subsidiaries of Peoples. Aqua Resources offers, through a third-party, water and sewer service line protection solutions and repair services to households. Other non-regulated subsidiaries of Peoples provide utility service line protection services to households and operate gas marketing and production businesses.

In December 2022, the Company signed an agreement to sell its regulated natural gas utility assets in West Virginia, which represented approximately two percent of the Company's regulated natural gas customers. The sale closed on October 1, 2023 for an estimated purchase price of $39,965, subject to working capital and other adjustments. The sale concluded the Company's regulated utility operations in West Virginia. In October 2023, the Company entered into an agreement to sell its interest in three non-utility local microgrid and distributed energy projects for $165,000. The sale was completed in January 2024. These transactions are consistent with the Company's long-term strategy of focusing on its core business and will allow the Company to prioritize the growth of its utilities in states where it has scale. The Company intends to use the proceeds from these transactions to finance its capital expenditures and water and wastewater acquisitions, in place of external funding from equity and debt issuances. See Note 3 – *Assets Held for Sale and Dispositions* in the Notes to Consolidated Financial Statements for additional information.

Recent Developments

National Primary Drinking Water Regulation
On March 14, 2023, the U.S. Environmental Protection Agency ("EPA") announced the proposed National Primary Drinking Water Regulation ("NPDWR") for the treatment of six per- and polyfluoroalkyl substances or compounds ("PFAS"), which would establish legally enforceable levels for PFAS in drinking water. It is expected that the EPA will finalize the regulation in 2024. The Company will be provided a three-year window to comply with the NPDWR, and the Safe Drinking Water Act allows for an additional potential for a two-year extension at the state level (the "Compliance Period"). We expect that the regulation, once finalized, will result in changes to or addition of certain treatment processes that will require increased capital expenditures and operating expenses. The Company performed its initial analysis of the NPDWR and estimates an investment of at least $450,000 of capital expenditures to install additional treatment facilities over the Compliance Period in order to comply with the proposed NPDWR. This figure could increase as plans for construction execution are refined or if additional sites require treatment in the future. Additionally, the Company estimates annual operating expenses of approximately five percent of the installed capital expenditures, in today's dollars, related to testing, treatment, and disposal. These are preliminary estimates and actual capital expenditures and expenses may differ based upon a variety of factors, including supply chain issues and site-by-site requirements. The Company continues to advocate for actions to hold polluters accountable and is part of the Multi-District Litigation and other legal

actions against multiple PFAS manufacturers and polluters to attempt to ensure that the ultimate responsibility for the cleanup of these contaminants is attributed to the polluters and is seeking damages and other costs to address the contamination of its public water supply systems by PFAS. Capital expenditures and operating costs required as a result of water quality standards have been traditionally recognized by state utility commissions as appropriate for inclusion in establishing rates; however, we are also actively applying for grants and low interest loans, whenever possible, to reduce the overall cost to customers. The Company is also monitoring ongoing litigation and settlement activity with manufacturers of PFAS in these proceedings. For more information, see Part I, Item 3—Legal Proceedings in our Annual Report on Form 10-K for the year ended December 31, 2023.

Lead and Copper Rule Revisions and Improvements
On January 15, 2021, the EPA published the Lead and Copper Rule Revisions (LCRR) which details additional measures to better protect communities from exposure to lead in drinking water. Under the LCRR and subsequent rulings, water utilities are required to submit a lead service line inventory and a lead service line replacement plan to the respective states or agencies by October 16, 2024. We are continuing to enhance our lead service line inventory and refine our lead service line replacement plans, which we expect to complete by the deadline. On November 30, 2023, the EPA announced a proposed Lead and Copper Rule Improvements (LCRI) to further strengthen the key elements of the LCRR. The proposed LCRI includes, among others, a requirement to replace lead service lines within 10 years, lower lead action levels, changes to tap sampling protocol, and enhancements to public notification and customer communication. We are still in the process of reviewing the overall impact of the proposed LCRI. Capital expenditures and operating costs associated with compliance with any of these rule revisions will be determined once the EPA finalizes the rule.

Economic Regulation

Most of our utility operations are subject to regulation by their respective state utility commissions, which have broad administrative power and authority to regulate billing rates, determine franchise areas and conditions of service, approve acquisitions, and authorize the issuance of securities. The utility commissions also generally establish uniform systems of accounts and approve the terms of contracts with affiliates and customers, business combinations with other utility systems, and loans and other financings. The policies of the utility commissions often differ from state to state and may change over time. A small number of our operations are subject to rate regulation by county or city government. Over time, the regulatory party in a particular state may change. The profitability of our utility operations is influenced to a great extent by the timeliness and adequacy of rate allowances in the various states in which we operate. One consideration we may undertake in evaluating on which states to focus our growth and investment strategy is whether a state provides for consolidated rates, a surcharge for replacing and rehabilitating infrastructure, fair value treatment of acquired utility systems, and other regulatory policies that promote infrastructure investment and efficiency in processing rate cases.

Rate Case Management Capability – The mission of the regulated utility industry is to provide quality and reliable utility service at reasonable rates to customers, while earning a fair return for shareholders. We strive to achieve the industry's mission by effective planning, efficient investments, and productive use of our resources. We maintain a rate case management capability to pursue timely and adequate returns on the capital investments that we make in improving our distribution system, treatment plants, information technology systems, and other infrastructure. This capital investment creates assets that are used and useful in providing utility service and is commonly referred to as rate base. Timely and adequate rate relief is important to our continued profitability and in providing a fair return to our shareholders; thus, providing access to capital markets to help fund these investments. In pursuing our rate case strategy, we consider the amount of net utility plant additions and replacements made since the previous rate decision, the changes in the cost of capital, changes in our capital structure, and changes in operating and other costs. Based on these assessments, our utility operations periodically file rate increase requests with their respective state utility commissions or local regulatory authorities. In general, as a regulated enterprise, our utility rates are established to provide full recovery of utility operating costs, taxes, interest on debt used to finance capital investments, and a return on equity used to finance capital investments. Our ability to recover our expenses in a timely manner and earn a return on equity employed in the business helps determine the profitability of the Company.

As of December 31, 2023, the Company's rate base is estimated to be $10,400,000, which is comprised of:

- $6,900,000 in the Regulated Water segment; and
- $3,500,000 in the Regulated Natural Gas segment.

As of December 31, 2023, the regulatory status of the Company's rate base is estimated to be as follows:

- $8,200,000 filed with respective state utility commissions or local regulatory authorities; and
- $2,200,000 not yet filed with respective state utility commissions or local regulatory authorities.

Our water and wastewater operations are composed of 57 rate divisions, and our natural gas operations are comprised of four rate divisions. Each of our utility rate divisions require a separate rate filing for the evaluation of the cost of service and recovery of investments in connection with the establishment of tariff rates for that rate division. When feasible and beneficial to our utility customers, we have sought approval from the applicable state utility commission to consolidate rate divisions to achieve a more even distribution of costs over a larger customer base. All of the eight states in which we operate water and wastewater utilities currently permit us to file a revenue requirement using some form of consolidated rates for some or all of the rate divisions in that state.

Our operating subsidiaries received rate increases representing estimated annualized revenues of $28,426 in 2023 resulting from seven base rate decisions, $81,610 in 2022 resulting from seven base rate decisions, and $3,390 in 2021 resulting from six base rate decisions. Annualized revenues in aggregate from all of the rate increases realized in the year of grant were $10,109 in 2023, $51,163 in 2022, and $2,995 in 2021.

Revenue Surcharges – Each of our states in which we operate water, wastewater, and natural gas utilities, permit us to add an infrastructure rehabilitation surcharge to their respective bills to offset the additional depreciation and capital costs associated with capital expenditures related to replacing and rehabilitating infrastructure systems. Prior to allowing for such surcharges, utilities absorbed all of the depreciation and capital costs of these projects between base rate increases without the benefit of additional revenues. The gap between the time that a capital project is completed and the recovery of its costs in rates is known as regulatory lag. This surcharge is intended to substantially reduce regulatory lag, which could act as a disincentive for utilities to rehabilitate their infrastructure. In addition, some states permit our subsidiaries to use a surcharge or credit on their bills to reflect allowable changes in costs, such as changes in state tax rates, other taxes and purchased water costs, until such time as the new costs are fully incorporated in base rates. Additional information regarding revenue surcharges is provided in Note 17 – *Rate Activity* in this Annual Report.

Inflation and Operating Costs – Most elements of operating costs are subject to the effects of inflation and changes in the number of customers served. Several elements are subject to the effects of changes in water or gas consumption, weather conditions, and the degree of water treatment required due to variations in the quality of the raw water. The principal elements of operating costs are purchased gas, labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claims costs, and costs to comply with environmental regulations. Electricity and chemical expenses vary in relationship to water or gas consumption, raw water quality, wastewater volumes, and price changes. Maintenance expenses are sensitive to extremely cold weather, which can cause utility mains to rupture and natural gas service lines to freeze, resulting in additional costs to repair the affected mains. Higher operating costs and capital requirements may also require us to increase borrowings under our credit facilities, resulting in higher interest expense.

Inflation, higher interest rates, higher insurance costs due to market conditions, and supply chain pressures resulted in an increase in our operating and capital spending requirements in 2022 and 2023, which we expect to continue through 2024. Recovery of the effects of increased cost of providing services and infrastructure improvements through higher customer rates is dependent upon receiving adequate and timely rate increases. However, rate increases are not retroactive and often lag increases in costs. On occasion, our regulated utility companies may enter into rate settlement agreements, which require us to wait for a period of time to file the next base rate increase request. These agreements may result in regulatory lag whereby inflationary increases in expenses may not be reflected in rates, and may not yet be requested, or a gap may exist between when a capital project is completed and the start of its recovery in rates. Even during periods of moderate inflation, the effects of inflation can have a negative impact on our operating results. We continue to pursue

enhancements to our regulatory practices to facilitate the efficient recovery of the increased cost of providing services and infrastructure improvements in our rates and mitigate the inherent regulatory lag associated with traditional rate making processes.

Our natural gas distribution operations are also affected by the cost of natural gas. We are able to generally pass the cost of gas to our customers without markup under purchase gas cost adjustment mechanisms; therefore, increases in the cost of gas are offset by a corresponding increase in revenues. However, higher gas costs may adversely impact our accounts receivable collections, resulting in higher bad debt expense. This risk is currently mitigated by rate design that allows us to collect from our customers a portion of our bad debt expense. A typical residential natural gas bill includes charges for the cost of gas, delivery, and other charges. As of January 1, 2024, the annual portion of a typical Peoples Natural Gas residential bill related to gas costs is approximately 41%. In periods when we experience market increases in natural gas costs, such as in 2022, customer affordability and usage may be reduced. Customer conservation measures may occur that can reduce natural gas revenues, either temporarily or over time.

Income Tax Accounting Method Change - In March 2020 and in June 2022, the Company changed the method of tax accounting for certain qualifying infrastructure investments at its Peoples Natural Gas and Peoples Gas Company subsidiaries, respectively. In December 2022, the Company made a similar change for its Aqua New Jersey subsidiary. These changes resulted in a tax deduction for qualifying utility asset improvement costs that were formerly capitalized for tax purposes. The Company is utilizing the flow-through method to account for these timing differences. For Peoples Natural Gas, the Company calculated the income tax benefits for qualifying capital expenditures made prior to March 16, 2020 (catch-up adjustment) and recorded a regulatory liability for $160,655 for these income tax benefits. In May 2021, the Pennsylvania Public Utility Commission approved a settlement petition that allows Peoples Natural Gas to continue to use flow-through accounting for the current tax repair benefit and allows for the catch-up adjustment be given to its customers. These benefits are being provided back to customers over a five-year period through a credit on customer bills which commenced in August 2021. In addition, the settlement petition required the contribution of $500 to a customer-bill payment assistance program, completed in July 2021, and $5,000 in relief to past-due accounts for natural gas customers impacted by the COVID-19 pandemic, completed in December 2021. For Peoples Gas, the Company calculated the catch-up adjustment for periods prior to the 2021 tax year and recognized a regulatory liability of $13,808 for these income tax benefits.

In April 2023, the Internal Revenue Service issued Revenue Procedure 2023-15 which provides a safe harbor method of accounting that taxpayers can adopt to determine whether expenses to repair, maintain, replace, or improve natural gas transmission and distribution property must be capitalized for tax purposes. The Company evaluated the safe harbor and intends to adopt the methodology on its 2023 tax return. Upon completion of its 2023 tax return analyses, the Company will update the regulatory liabilities recorded with the recalculated amounts for the catch-up periods for its Peoples Natural Gas and Peoples Gas subsidiaries, and file a petition to update its Tax Repair Surcredit rider to address the benefits due to customers.

In the second quarter of 2023, based on the tax legislative guidance that was issued, the Company reevaluated the uncertain tax positions related to the Regulated Water Segment and ultimately released a portion of its historical income tax reserves. Concurrently, the Company deferred this tax benefit from the reserve release as a regulatory liability, as the accounting treatment is expected to be determined in a subsequent regulatory proceeding.

Growth-Through-Acquisition Strategy

Part of our strategy to meet the industry challenges is to actively explore opportunities to expand our utility operations through acquisitions of water, wastewater, and other utilities either in areas adjacent to our existing service areas or in new service areas, and to explore acquiring market-based businesses that are complementary to our regulated utility operations. To complement our growth strategy, we routinely evaluate the operating performance of our individual utility systems, and in instances where limited economic growth opportunities exist or where we are unable to achieve favorable operating results or a return on equity that we consider acceptable, we will seek to sell the utility system and reinvest the proceeds in other utility systems. Consistent with this strategy, we are focusing our acquisitions and resources in states where we have critical mass of operations in an effort to achieve economies of scale and increased efficiency. Our growth-through-acquisition strategy allows us to operate more efficiently by sharing operating expenses over more utility customers and

provides new locations for future earnings growth through capital investment. Another element of our growth strategy is the consideration of opportunities to expand by acquiring other utilities, including those that may be in a new state if they provide promising economic growth opportunities and a return on equity that we consider acceptable. Our ability to successfully execute this strategy historically and to meet the industry challenges has largely been due to our core competencies, financial position, and our qualified and trained workforce, which we strive to retain by treating employees fairly and providing our employees with development and growth opportunities.

During 2023, we completed seven acquisitions of water and wastewater systems, which along with the organic growth in our existing systems, represents 19,659 new customers. During 2022, we completed three acquisitions of water and wastewater systems, which along with the organic growth in our existing systems, represents 31,537 new customers. During 2021 we completed two acquisitions of water and wastewater systems, which along with the organic growth in our existing systems, represents 21,364 new customers.

The Company currently has six signed purchase agreements for additional water and wastewater systems that are expected to serve approximately 215,000 equivalent retail customers or equivalent dwelling units and total approximately $380,000 in purchase price in two of our existing states. This includes the Company's agreement to acquire the Delaware County Regional Water Quality Control Authority (DELCORA) for $276,500. DELCORA, a Pennsylvania sewer authority, serves approximately 198,000 equivalent dwelling units in the Philadelphia suburbs. Refer to Note 2 – *Acquisitions* in this Annual Report for further discussion.

As of December 31, 2023, the pipeline of potential water and wastewater municipal acquisitions the company is actively pursuing represents approximately 400,000 total customers or equivalent dwelling units. The Company remains on track to, on average, annually increase customers between 2% and 3% through acquisitions and organic customer growth.

Performance Measures Considered by Management

We consider the following financial measures (and the period to period changes in these financial measures) to be the fundamental basis by which we evaluate our operating results:

- earnings per share;
- water and wastewater operating revenues;
- gas operating revenues, net of purchased gas costs;
- operations and maintenance expenses;
- earnings before interest, taxes, and depreciation (EBITD);
- earnings before income taxes;
- net income; and
- the dividend rate on common stock.

In addition, we consider other key measures in evaluating our utility business performance within our Regulated Water and Regulated Natural Gas segments:

- our number of utility customers;
- the ratio of operations and maintenance expense compared to operating revenues (this percentage is termed "operating expense ratio");
- return on revenues (net income divided by operating revenues);
- rate base growth;
- return on equity (net income divided by stockholders' equity); and
- the ratio of capital expenditures to depreciation expense.

Some of these measures, like EBITD and gas operating revenues, net of purchased gas costs, are non-GAAP financial measures. The Company believes that the non-GAAP financial measures provide management the ability to measure the Company's financial operating performance across periods and are more comparable to measures reported by other companies. We believe EBITD is a relevant and useful indicator of operating performance, as we measure it for

management purposes because it provides a better understanding of our results of operations by highlighting our operations and the underlying profitability of our core businesses.

We review these measurements regularly and compare them to historical periods, to our operating budget as approved by our Board of Directors, and to other publicly-traded utilities. Additionally, our Regulated Natural Gas segment is affected by the cost of natural gas, which is passed through to customers using a purchased gas adjustment mechanism and includes commodity price, transportation and storage costs. These costs are reflected in the consolidated statement of operations and comprehensive income as purchased gas expenses. Therefore, fluctuations in the cost of purchased gas impact operating revenues on dollar-for-dollar basis. Management uses gas operating revenues, net of purchased gas costs, a non-GAAP financial measure, to analyze the financial performance of our Regulated Natural Gas segment. Management believes this measure provides a meaningful basis for evaluating our natural gas utility operations since purchased gas expenses are included in operating revenues and passed through to customers.

Our operating expense ratio is one measure that we use to evaluate our operating efficiency and management effectiveness of our regulated operations. Our operating expense ratio is affected by a number of factors, including the following:

- ***Regulatory lag*** – Our rate filings are designed to provide for the recovery of increases in costs of operations (primarily labor and employee benefits, electricity, chemicals, transportation, maintenance expenses, insurance and claim costs, and costs to comply with environmental regulations), capital, and taxes. The revenue portion of the operating expense ratio can be impacted by the timeliness of recovery of, and the return on capital investments. The operating expense ratio is further influenced by regulatory lag (increases in operations and maintenance expenses not yet recovered in rates or a gap between the time that a capital project is completed and the start of its cost recovery in rates). The operating expense ratio is also influenced by decreases in operating revenues without a commensurate decrease in operations and maintenance expense, such as changes in customer usage as impacted by adverse weather conditions, or conservation trends. During periods of inflation, our operations and maintenance expenses may increase, impacting the operating expense ratio, as a result of regulatory lag, since our rate cases may not be filed timely and are not retroactive.

- ***Acquisitions*** – In general, acquisitions of smaller undercapitalized utility systems in some areas may initially increase our operating expense ratio if the operating revenues generated by these operations do not reflect the true cost of service and are accompanied by a higher ratio of operations and maintenance expenses as compared to other operational areas of the company that are more densely populated and have integrated operations. In these cases, the acquired operations are characterized as having relatively higher operating costs to fixed capital costs, in contrast to the majority of our operations, which generally consist of larger, interconnected systems, with higher fixed capital costs (utility plant investment) and lower operating costs per customer. For larger acquisitions, we may incur significant transaction expenses, which increase operations and maintenance expenses in periods prior to and in the period of the closing of the acquisition. In addition, we operate market-based subsidiary companies consisting of our non-regulated natural gas operations and Aqua Resources. The cost-structure of these market-based companies differs from our utility companies in that, although they may generate free cash flow, these companies may at times have a higher ratio of operations and maintenance expenses to operating revenues and a lower capital investment and, consequently, a lower ratio of fixed capital costs versus operating revenues in contrast to our regulated operations. As a result, the operating expense ratio is not comparable between the businesses. These market-based subsidiary companies are not a component of our Regulated Water or Regulated Natural Gas segments.

We continue to evaluate initiatives to help control operating costs and improve efficiencies.

Other Operational Measures Considered by Management

Sendout - Sendout represents the quantity of treated water delivered to our distribution systems. We use sendout as an indicator of customer demand. Weather conditions tend to impact water consumption, particularly during the late spring, summer, and early fall when discretionary and recreational use of water is at its highest. Consequently, a higher proportion of annual Regulated Water segment operating revenues are realized in the second and third quarters. In general, during this period, an extended period of hot and dry weather increases water consumption, while above-average

rainfall and cool weather decreases water consumption. Conservation efforts, construction codes that require the use of low-flow plumbing fixtures, as well as mandated water use restrictions in response to drought conditions can reduce water consumption. We believe an increase in conservation awareness by our customers, including the increased use of more efficient plumbing fixtures and appliances, may continue to result in a long-term structural trend of declining water usage per customer. These gradual long-term changes are normally taken into account by the utility commissions in setting rates, whereas significant short-term changes in water usage, resulting from drought warnings, water use restrictions, or extreme weather conditions, may not be fully reflected in the rates we charge between rate proceedings. In Illinois, our operating subsidiary has a revenue stability mechanism which allows us to recognize state PUC-authorized revenue for a period which is not based upon the volume of water sold during that period, and effectively lessens the impact of weather and consumption variability.

On occasion, drought warnings and water use restrictions are issued by governmental authorities for portions of our service territories in response to extended periods of dry weather conditions, regardless of our ability to meet unrestricted customer water demands. The timing and duration of the warnings and restrictions can have an impact on our water revenues and net income. In general, water consumption in the summer months is affected by drought warnings and restrictions to a higher degree because discretionary and recreational use of water is highest during the summer months, particularly in our northern service territories. At other times of the year, warnings and restrictions generally have less of an effect on water consumption. Drought warnings and watches result in the public being asked to voluntarily reduce water consumption.

The geographic diversity of our utility customer base reduces the effect of our exposure to extreme or unusual weather conditions in any one area of the country. During the year ended December 31, 2023, our operating revenues for our Regulated Water segment were derived principally from the following states: approximately 56% in Pennsylvania, 11% in Ohio, 8% in Illinois, 9% in Texas, and 7% in North Carolina.

Heating Degree Days – The regulated natural gas utility business is subject to seasonal fluctuations with the peak usage period occurring in the heating season which generally runs from October to March. A heating degree day (HDD) is each degree that the average of the high and the low temperatures for a day is below 65 degrees Fahrenheit in a specific geographic location. Particularly during the heating season, this measure is used to reflect the demand for natural gas needed for heating based on the extent to which the average temperature falls below a reference temperature for which no heating is required (65 degrees Fahrenheit). HDDs are used in the natural gas industry to measure the relative coldness of weather and to estimate the demand for natural gas. Normal temperatures are based on a historical twenty-year average heating degree days, as calculated from data provided by the National Weather Service for the same geographic location. During the year ended December 31, 2023, we experienced actual HDDs of 4,558 days, which was warmer by 16.0% than the average or normal HDDs for Pittsburgh, Pennsylvania, which we use as a proxy for our western Pennsylvania service territory.

(In thousands of dollars, except per share amounts)

RESULTS OF OPERATIONS

Consolidated financial and operational highlights for the years ended December 31, 2023, 2022, and 2021 are presented below. For discussion of our results of operations and cash flows for 2022 compared with 2021, refer to Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for our fiscal year ended December 31, 2022, filed with the SEC on March 1, 2023.

Years ended December 31,	2023	2022	2021	2023 vs. 2022	2022 vs. 2021
Operating revenues:					
Regulated water segment	$ 1,153,376	$ 1,082,972	$ 980,203	$ 70,404	$ 102,769
Regulated gas segment	863,759	1,143,362	859,902	(279,603)	283,460
Other and eliminations	36,689	61,698	38,039	(25,009)	23,659
Consolidated operating revenues	$ 2,053,824	$ 2,288,032	$ 1,878,144	$ (234,208)	$ 409,888
Operations and maintenance expense	$ 575,518	$ 613,649	$ 550,580	$ (38,131)	$ 63,069
Net income	$ 498,226	$ 465,237	$ 431,612	$ 32,989	$ 33,625
Capital expenditures	$ 1,199,103	$ 1,062,763	$ 1,020,519	$ 136,340	$ 42,244
Operating Statistics					
Selected operating results as a percentage of operating revenues:					
Operations and maintenance	28.0%	26.8%	29.3%	1.2%	-2.5%
Depreciation and amortization	16.7%	14.0%	15.9%	2.7%	-1.9%
Taxes other than income taxes	4.4%	3.9%	4.6%	0.5%	-0.7%
Interest expense, net of interest income	13.6%	10.2%	10.9%	3.4%	-0.7%
Net income	24.3%	20.3%	23.0%	4.0%	-2.7%
Return on Essential Utilities stockholders' equity	8.4%	8.7%	8.3%	-0.3%	0.4%
Ratio of capital expenditures to depreciation expense	3.5	3.4	3.5	0.1	(0.1)
Effective tax rate	(15.4%)	(3.2%)	(2.3%)	(12.2%)	(0.9%)

Consolidated Results of Operations Comparison for 2023 and 2022

Operating revenues **-** Operating revenues decreased by $234,208 or 10.2% for the year ended December 31, 2023 compared to the year ended December 31, 2022. Revenues from our Regulated Water segment increased by $70,404, Regulated Natural Gas segment revenues decreased by $279,603 and Other business segment revenues decreased by $25,009. A detailed discussion of the factors contributing to the changes in segment net revenue is included below under the section, Segment Results of Operations.

Our Other business segment revenues consist of market-based revenues at Aqua Resources and our non-regulated natural gas operations amounting to $36,689 in 2023, $61,698 in 2022, and $38,435 in 2021. The decrease in Other business segment revenues is primarily due to lower revenues from our non-regulated natural gas operations as a result of lower average gas prices and lower gas usage in the current period as compared to the prior period.

Operating expenses **-** Operations and maintenance expenses decreased in 2023, as compared to 2022, by $38,131 or 6.2%, primarily due to:

- decrease in customer assistance surcharge costs of $18,710 in our Regulated Natural Gas segment, which has an equivalent offsetting amount in revenues;
- decrease in employee related costs of $5,381, primarily due to lower post-retirement benefit costs, higher capitalization in 2023 due to greater capital expenditures, and a one-time compensation payment for non-officer level employees in 2022;
- decrease in charitable contributions to the Essential Foundation and other organizations of $15,360;

- decrease in bad debt expense of $4,422;
- decrease in outside services, maintenance expenses, and other operating expenses of $7,707, primarily due to lower water main break activity and higher capitalization as a result of greater capital expenditures during the period in our Regulated Water segment;
- insurance recovery of $2,448 associated with clean-up and additional expenses incurred during Hurricane Ida;
- an asset impairment charge recognized in the first quarter of 2022 of $1,801 to write down a portion of the right of use asset of our Regulated Natural Gas segment's office space to fair value; offset by
- an increase in production costs for water and wastewater operations of $12,208, primarily due to higher chemical prices and an increase in wholesale purchased water costs;
- additional operating costs associated with acquired and pending acquisitions of water and wastewater utility systems and higher customer base of $5,767;
- increase in insurance expense of $1,741 due to higher reserve for claims and insurance premiums in 2023;
- increase in legal expenses of $2,427;
- lower operation and maintenance expense of $837 as a result of the sale and cessation of our regulated natural gas operations in West Virginia in October 2023; and
- lower operating expenses driven by various cost-saving measures.

Purchased gas decreased by $249,689 or 41.5% in 2023 compared to 2022. Purchased gas represents the cost of gas sold by Peoples for the regulated and non-regulated gas business and has a corresponding offset in revenue. This expense decreased for the regulated natural gas business and non-regulated business by $223,461 and $26,228, respectively. The decrease in 2023 is the result of the impact of lower cost of gas of $128,997 and, lower gas usage of $120,692 due to warmer weather conditions as compared with 2022.

Depreciation and amortization expense increased by $22,518 or 7.0%, in 2023 over 2022, principally due to continued capital expenditures to expand and improve our utility facilities, upgrade our information systems, our acquisitions of new utility systems, and additional rate case filings. Expenses associated with filing rate cases are deferred and amortized over periods that generally range from one to three years.

Taxes other than income taxes totaled $90,208 in 2023 and $90,024 in 2022, and has increased by $184 or 0.2% in 2023 as compared to 2022.

Other expense, net - Interest expense, net was $279,961 in 2023 and $234,441 in 2022. Interest expense increased in 2023 primarily due to an increase in average borrowings, and an increase in average interest rates. The weighted average cost of fixed rate long-term debt was 3.86% at December 31, 2023 and 3.78% at December 31, 2022. The weighted average cost of fixed and variable rate long-term debt was 4.14% at December 31, 2023 and 3.94% at December 31, 2022.

Allowance for funds used during construction (AFUDC) was $16,967 in 2023 and $23,665 in 2022, and varies as a result of changes in the average balance of utility plant construction work in progress, to which AFUDC is applied, changes in the AFUDC rate which is based predominantly on short-term interest rates, changes in the balance of short term-debt, and changes in the amount of AFUDC related to equity. The decrease in 2023 is primarily due to a decrease in the average balance of utility plant construction work in progress, to which AFUDC is applied. The amount of AFUDC related to equity was $11,726 in 2023 and $17,618 in 2022.

Gain on sale of other assets totaled $65 in 2023 and $991 in 2022, and consists of the sales of property, plant and equipment.

Other (income) expense totaled $(2,613) in 2023 and $494 in 2022, and largely consists of the non-service cost component of our net benefit cost for post-retirement benefits and unrealized gains and losses on investments associated with our non-qualified pension plan. In 2023, the fair values of our investments associated with our non-qualified plan increased, and we recognized a gain of $582 in 2023 compared to a loss of $895 in 2022. Additionally, the non-service cost component of the net benefit cost for post-retirement benefits in our Regulated Gas segment was lower in 2023.

(In thousands of dollars, except per share amounts)

Income tax benefit - Our effective income tax rate was a benefit of 15.4% in 2023 and 3.2% in 2022. The Company's provision for income taxes represents an income tax benefit due to the effects of tax deductions recognized for certain qualifying infrastructure investments. The decrease in the effective tax rate is primarily attributed to the increase in our income tax benefit associated with the tax deduction for qualifying infrastructure investments in our Regulated Natural Gas segment.

Net income -

	Years ended December 31,		
	2023	2022	2021
Operating income	$ 692,097	$ 661,187	$ 602,709
Net income	498,226	465,237	431,612
Diluted net income per share	1.86	1.77	1.67

The changes in diluted net income per share in 2023 over the previous year were due to the aforementioned changes.

Although we have experienced increased income in the recent past, continued adequate rate increases reflecting increased operating costs and new capital improvements are important to the future realization of improved profitability.

Segment Results of Operations Comparison for 2023 and 2022

We have identified eleven operating segments, and we have two reportable segments based on the following:

- Eight segments are composed of our water and wastewater regulated utility operations in the eight states where we provide these services. These operating segments are aggregated into one reportable segment, Regulated Water, since each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution and/or wastewater collection methods, and the nature of the regulatory environment.

- Our Regulated Natural Gas segment is composed of natural gas utility companies in three states acquired in the Peoples Gas Acquisition. These utilities provide natural gas distribution services, and their operating results subsequent to the March 16, 2020 acquisition date are reported in the Regulated Natural Gas segment. In October 2023, the Company sold its regulated natural gas utility assets in West Virginia, which represented approximately two percent of the Company's regulated natural gas customers. The sale concluded the Company's regulated utility operations in West Virginia.

- Two segments are not quantitatively significant to be reportable and are composed of our non-regulated natural gas operations and Aqua Resources. These segments are included as a component of "Other," in addition to corporate costs that have not been allocated to the Regulated Water and Regulated Natural Gas segments, because they would not be recoverable as a cost of utility service, and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense.

Regulated Water Segment

The following tables present the selected operating results and customers served for our Regulated Water segment, for and as of the year ended December 31:

	2023	2022	2021	2023 vs. 2022	2022 vs. 2021
Sendout (in millions of gallons)					
Pennsylvania	42,525	42,666	42,198	(141)	468
Ohio	13,560	14,604	13,971	(1,044)	633
Illinois	8,421	8,784	8,764	(363)	20
Texas	8,703	8,606	7,212	97	1,394
North Carolina	5,824	5,934	5,984	(110)	(50)
Other states	6,526	6,272	6,191	254	81
Subtotal	85,559	86,866	84,320	(1,307)	2,546
Elimination	(122)	(141)	(154)	19	13
Total sendout by state	85,437	86,725	84,166	(1,288)	2,559
Utility customers:					
Residential water	859,331	850,673	842,200	8,658	8,473
Commercial water	43,853	43,119	42,864	734	255
Industrial water	1,283	1,286	1,331	(3)	(45)
Other water	19,123	18,446	17,932	677	514
Wastewater	190,119	181,721	162,478	8,398	19,243
Total water and wastewater utility customers	1,113,709	1,095,245	1,066,805	18,464	28,440
Operating revenues:					
Residential water	$ 641,351	$ 607,473	$ 561,996	$ 33,878	$ 45,477
Commercial water	180,731	168,460	151,071	12,271	17,389
Industrial water	33,949	32,581	30,230	1,368	2,351
Other water	92,784	94,359	89,472	(1,575)	4,887
Wastewater	187,462	165,312	132,316	22,150	32,996
Other utility	17,099	14,787	15,118	2,312	(331)
Total operating revenues	$ 1,153,376	$ 1,082,972	$ 980,203	$ 70,404	$ 102,769
Operating expenses:					
Operations and maintenance expense	$ 368,843	$ 370,850	$ 332,598	$ (2,007)	$ 38,252
Depreciation and amortization	$ 217,593	$ 201,392	$ 182,074	$ 16,201	$ 19,318
Taxes other than income taxes	$ 62,759	$ 64,472	$ 63,264	$ (1,713)	$ 1,208
Other expense, net	$ 105,674	$ 84,396	$ 81,931	$ 21,278	$ 2,465
Provision for income taxes	$ 57,546	$ 47,510	$ 26,633	$ 10,036	$ 20,877
Segment net income	$ 340,961	$ 314,352	$ 293,703	$ 26,609	$ 20,649

Operating revenues - The growth in our Regulated Water segment's revenues over the past three years is primarily a result of increases in our water and wastewater rates and our customer base. Water and wastewater rate increases, including infrastructure rehabilitation surcharges, implemented during the past three years have provided additional operating revenues of $57,924 in 2023, $63,367 in 2022, and $27,421 in 2021. The number of customers increased at an annual compound rate of 2.1% over the past three years due to acquisitions and organic growth, adjusted to exclude customers associated with utility system dispositions. Acquisitions in our Regulated Water segment have provided additional water and wastewater revenues of $9,646 in 2023, $16,145 in 2022, and $6,750 in 2021.

Our Regulated Water segment also includes operating revenues of $14,863 in 2023, $11,477 in 2022 and $13,358 in 2021, associated with revenues earned primarily from fees received from telecommunication operators that have put cellular antennas on our water towers, fees earned from municipalities for our operation of their water or wastewater treatment services or to perform billing services, and fees earned from developers for accessing our water mains.

(In thousands of dollars, except per share amounts)

Operating expenses - Operations and maintenance expense for the year ended December 31, 2023 was $368,843 compared to $370,850 in the prior period. The decrease of $2,007 or 0.5% was primarily due to the following:

- increase in production costs for water and wastewater operations of $12,208;
- additional operating costs resulting from acquired water and wastewater utility systems and higher customer base of $5,767; offset by
- decrease in employee related costs of $8,379 primarily due to lower post-retirement benefit costs, higher capitalization in 2023 due to greater capital expenditures, and a one-time compensation payment for non-officer level employees in 2022;
- decrease in bad debt expense of $902;
- insurance recovery of $2,448 associated with clean-up costs and other expenses incurred during Hurricane Ida; and,
- lower outside services, maintenance expenses and other operating expenses of $7,707 primarily due to lower water main break activity and higher capitalization as a result of greater capital expenditures during the period.

Depreciation and amortization increased by $16,201 or 8.0% primarily due to continued capital investment to expand and improve our utility facilities and our acquisitions of new utility systems.

Other expense, net – Interest expense, net, increased by $12,742 or 11.4% primarily due to the increase in average borrowings and increased borrowing costs.

AFUDC decreased by $6,164 or 29.4% due to the decrease in the average balance of utility plant construction work in progress, to which AFUDC is applied.

Other income, inclusive of loss/gain on sale of other assets, totaled $4,220 in 2023 and $6,592 in 2022. The decrease in other income is largely due to the increase in the non-service cost component of post-retirement benefits in our Regulated Water segment in 2023.

Provision for income tax – The effective income tax rate for our Regulated Water segment was an expense of 14.4% in 2023, compared to an expense of 13.1% in 2022. The change in the effective tax rate is primarily due to a decrease in the amortization of certain regulatory liabilities associated with deferred taxes.

(In thousands of dollars, except per share amounts)

Regulated Natural Gas Segment

The following tables present the selected operating results and customers served for our Regulated Natural Gas segment for and as of the year ended December 31:

	2023	2022	2021	2023 vs. 2022	2022 vs. 2021
Gas utility customers:					
Residential gas	683,811	695,198	692,174	(11,387)	3,024
Commercial gas	59,384	59,684	59,595	(300)	89
Industrial gas	551	1,459	1,475	(908)	(16)
Total gas utility customers	743,746	756,341	753,244	(12,595)	3,097
Delivered volumes (thousand cubic feet)					
Residential gas	51,698,440	61,093,372	56,542,038	(9,394,932)	4,551,334
Commercial gas	33,151,308	37,240,382	33,403,899	(4,089,074)	3,836,483

Other utility	45,251	61,758	33,346	(16,507)	28,412
Total operating revenues	$ 863,759	$ 1,143,362	$ 859,902	$ (279,603)	$ 283,460
Operating expenses:					
Operations and maintenance expense	$ 209,073	$ 239,506	$ 226,194	$ (30,433)	$ 13,312
Purchased gas	$ 327,548	$ 551,009	$ 313,390	$ (223,461)	$ 237,619
Depreciation and amortization	$ 125,263	$ 118,955	$ 113,238	$ 6,308	$ 5,717
Taxes other than income taxes	$ 23,846	$ 22,642	$ 20,801	$ 1,204	$ 1,841
Other expense, net	$ 90,819	$ 87,916	$ 78,099	$ 2,903	$ 9,817
Income tax benefit	$ (113,353)	$ (61,942)	$ (40,013)	$ (51,411)	$ (21,929)
Segment net income	$ 200,563	$ 185,276	$ 148,193	$ 15,287	$ 37,083

(a) Unit of measure reflecting temperature-sensitive natural gas consumption, calculated by subtracting the average of a day's high and low temperatures from 65 degrees Fahrenheit; measured at Pittsburgh, PA.

(b) Based on historical twenty-year average heating degree days, as calculated from data provided by the National Weather Service for the same geographic location.

Operating revenues – Operating revenues from the Regulated Natural Gas segment decreased by $279,603 or 24.5% due to:

- impact of lower gas cost of $223,461 in 2023 as compared to 2022;
- lower gas usage of $53,122 due to warmer weather conditions in 2023;
- decrease in customer assistance surcharge of $18,710, which has an equivalent offsetting amount in operations and maintenance expense; offset by
- an increase of $11,141 due to higher rates and other surcharges.

(In thousands of dollars, except per share amounts)

Operating expenses – Operations and maintenance expense for the year ended December 31, 2023 decreased by $30,433 or 12.7% primarily due to the following:

- decrease in customer assistance surcharge costs of $18,710, which has an equivalent offsetting amount in revenues;
- lower charitable contributions to the Essential Foundation and other organizations of $13,360;
- an asset impairment charge recognized in the first quarter of 2022 of $1,801 to write down a portion of the right of use asset to fair value;
- lower operations and maintenance expense of $837 as a result of the sale and cessation of our regulated natural gas operations in West Virginia in October 2023;
- decrease in bad debt of $3,520; offset by
- an increase in legal fees of $1,892; and
- an increase in materials and supplies of $2,121.

Our Regulated Natural Gas segment is affected by the cost of natural gas, which is passed through to customers using a purchased gas adjustment clause and includes commodity price, transportation and storage costs. These costs are reflected in the consolidated statement of operations and comprehensive income as purchased gas expenses. Therefore, fluctuations in the cost of purchased gas impact operating revenues on dollar-for-dollar basis. Purchased gas decreased by $223,461 or 40.6% in 2023 compared to 2022. The decrease is the result of the impact of lower cost of gas and lower gas usage which amounted to $118,371 and $105,090, respectively, in 2023 as compared with the prior year.

Depreciation and amortization increased by $6,308 or 5.3% primarily due to continued capital investment in pipe replacement.

Taxes other than income taxes increased by $1,204 or 5.3% mainly due to higher gross receipts tax and public utility commission assessments in 2023 as compared with the prior year.

Other expense, net – Interest expense, net, increased by $5,134 or 5.9% for 2023 compared to 2022 due to additional borrowings and a higher interest rate on our revolving line of credit in 2023.

AFUDC decreased by $534 or 19.7% due to the decrease in the average balance of utility plant construction work in progress, to which AFUDC is applied.

Other expense, inclusive of loss/gain on sale of other assets, totaled $680 in 2023 and $3,445 in 2022. The decrease in other expense is driven by a lower non-service cost component of our net benefit cost for post-retirement benefits in our Regulated Gas segment in 2023.

Income tax benefit – The effective income tax rate was a benefit of 130.0% in 2023, compared to a benefit of 50.2% in 2022. The change in the effective tax rate is primarily attributed to an increase in the income tax benefit associated with the tax deduction for qualifying infrastructure investments.

(In thousands of dollars, except per share amounts)

LIQUIDITY AND CAPITAL RESOURCES

Consolidated Cash Flow and Capital Expenditures

Net operating cash flows, dividends paid on common stock, capital expenditures, including allowances for funds used during construction, and expenditures for acquiring utility systems were as follows for the years ended December 31:

	Net Operating Cash Flows	Dividends	Capital Expenditures	Acquisitions
2021	$ 644,679	$ 258,650	$ 1,020,519	$ 36,326
2022	600,306	288,632	1,062,763	116,891
2023	933,587	316,806	1,199,103	45,303
	$ 2,178,572	$ 864,088	$ 3,282,385	$ 198,520

Net cash flows from operating activities increased from 2022 to 2023 largely due to the decrease in accounts receivable, unbilled revenues and inventory - gas stored. Average cost of gas stored in inventories and associated recoveries of gas costs from customers was lower in 2023 than in 2022.

Included in capital expenditures for the three year period are: expenditures for the rehabilitation of existing utility systems, the expansion of our utility systems, modernization and replacement of existing treatment facilities, meters, office facilities, information technology, vehicles, and equipment. During this three year period, we received $50,960 of customer advances and contributions in aid of construction to finance new utility mains and related facilities that are not included in the capital expenditures presented in the above table. In addition, during this period, we have made repayments of debt, which includes the net effect of borrowings and repayments under our long-term revolving credit facility of $1,441,098 and have refunded $21,202 of customers' advances for construction. Dividends increased during the past three years as a result of annual increases in the dividends declared and paid and increases in the number of shares outstanding.

Our planned 2024 capital program, excluding the costs of new mains financed by advances and contributions in aid of construction is estimated to be approximately $1,365,000 in infrastructure improvements for the communities we serve. The 2024 capital program is expected to include approximately $935,000 for infrastructure rehabilitation surcharge qualified projects. Our planned 2024 capital program in Pennsylvania for our water and natural gas utilities is estimated to be approximately $915,000, a portion of which is expected to be eligible as a deduction for qualifying utility asset improvements for Federal income tax purposes. Our overall 2024 capital program along with $67,415 of debt repayments and $322,176 of other contractual cash obligations, as reported in the section captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations – *Contractual Obligations*", has been, or is expected to be, financed through internally-generated funds, our revolving credit facilities, and the issuance of long-term debt and equity.

Future utility construction in the period 2025 through 2026, including recurring programs, such as the ongoing replacement or rehabilitation of utility meters and mains, water treatment plant upgrades, storage facility renovations, pipes, service lines, and additional transmission mains to meet customer demands, excluding the costs of new mains financed by advances and contributions in aid of construction, is estimated to require aggregate expenditures of approximately $2,769,000. We anticipate that more than one half of these expenditures will require external financing. We expect to refinance $168,875 of long-term debt during this period as it becomes due with funds from new issues of long-term debt, issuances of equity, internally-generated funds, and our revolving credit facilities. The estimates discussed above do not include any amounts for possible future acquisitions of utility systems or the financing necessary to support them.

Our primary sources of liquidity are cash flows from operations (including the allowed deferral of Federal income tax payments), borrowings under various short-term lines of credit and other credit facilities, and customer advances and contributions in aid of construction. Our cash flow from operations, or internally-generated funds, is impacted by the timing of rate relief, utility operating revenues, and changes in Federal tax laws, and accelerated tax depreciation or deductions for utility construction projects. We fund our capital and typical acquisitions through internally-generated funds, supplemented by short-term lines of credit. Over time, we partially repay or pay-down our short-term lines of credit with long-term debt. The ability to finance our future construction programs, as well as our acquisition activities, depends on our ability to attract the necessary external debt and equity financing and maintain internally-generated funds. Timely rate orders permitting compensatory rates of return on invested capital will be required by our operating subsidiaries to achieve an adequate level of earnings and cash flow to enable them to secure the capital they will need to operate and to maintain satisfactory debt coverage ratios.

Acquisitions

As part of the Company's growth-through-acquisition strategy, as of December 31, 2023, the Company has entered into purchase agreements to acquire the water or wastewater utility system assets of five municipalities and a private company for a total combined purchase price in cash of approximately $380,000. The purchase price for these pending acquisitions is subject to certain adjustments at closing, and the pending acquisitions are subject to regulatory approvals, including the final determination of the fair value of the rate base acquired. Closings for these acquisitions are expected to occur in 2024 or 2025, which is subject to the timing of the various regulatory approval processes. These acquisitions are expected to add approximately 215,000 equivalent retail customers in two of the states in which the Company operates.

In July 2023, the Company completed the following water utility asset acquisitions: Shenandoah Borough, Pennsylvania, which serves approximately 2,900 customers for $12,291; La Rue, an Ohio municipality, which serves approximately 300 customers for $2,253; and, Southern Oaks Water System, which serves approximately 800 customers in Texas for $3,321. In July 2023, the Company completed their acquisition of a portion of the water and wastewater utility assets of the Village of Frankfort, an Illinois municipality, which serves approximately 1,500 customers for $1,424. In June 2023, the Company acquired the wastewater utility assets of Union Rome, Ohio, which serves approximately 4,300 customers for a cash purchase price of $25,547. Additionally, in March 2023, the Company acquired the North Heidelberg Sewer Company in Berks County, Pennsylvania, which serves approximately 300 customer connections for a cash purchase price of $136.

In November 2022, the Company acquired the water system of Oak Brook, DuPage County, Illinois, which serves 2,037 customers, for a cash purchase price of $12,500. In August 2022, the Company acquired the municipal wastewater assets of East Whiteland Township, Chester County, Pennsylvania, which serves 4,018 customers, for a cash purchase price of $54,374. In March 2022, the Company acquired the wastewater system of Lower Makefield Township, which serves 11,323 customer connections in Lower Makefield, Falls, and Middletown townships, and Yardley Borough, Bucks County, Pennsylvania, for a cash purchase price of $53,000.

Subsequent to the August 2022 closing on the acquisition of the municipal wastewater assets of East Whiteland Township, a party filed an appeal to the Pennsylvania Public Utility Commission's order of approval. On July 31, 2023, a decision was issued by the Pennsylvania Commonwealth Court that agreed with the party's appeal and reversed the order which approved the acquisition. In an effort to resolve the matter, the Company pursued and is continuing to pursue certain legal actions. Management believes the final resolution of this matter is not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows. Refer to Note 2 – *Acquisitions* in this Annual Report for additional information.

In August 2021, the Company acquired the water utility system assets of The Commons Water Supply, Inc., which serves 992 customers in Harris County, Texas, and the wastewater utility system assets of the Village of Bourbonnais, which serves approximately 6,500 customers in Kankakee County, Illinois. The total cash purchase prices for these utility systems were $4,000 and $32,100, respectively.

During the past three years, we have expended cash of $198,520 related to the acquisition of both water and wastewater utility systems. We continue to pursue the acquisition of water and wastewater utility systems and explore other utility

acquisitions that may be in a new state. Our typical acquisitions are expected to be financed with short-term debt with subsequent repayment from the proceeds of long-term debt, retained earnings, or equity issuances.

Assets Held for Sale and Dispositions

We routinely review and evaluate areas of our business and operating divisions and, over time, may sell utility systems or portions of systems. In December 2022, the Company signed an agreement to sell its regulated natural gas utility assets in West Virginia, which represented approximately two percent of the Company's regulated natural gas customers. The sale closed on October 1, 2023 for an estimated purchase price of $39,965, subject to working capital and other adjustments. The sale concluded the Company's regulated utility operations in West Virginia. In October 2023, the Company entered into an agreement to sell its interest in three non-utility local microgrid and distributed energy projects for $165,000. The sale was completed in January 2024. These transactions are consistent with the Company's long-term strategy of focusing on its core business and will allow the Company to prioritize the growth of its utilities in states where it has scale. The Company intends to use the proceeds from these transactions to finance its capital expenditures and water and wastewater acquisitions, in place of external funding from equity and debt issuances. Refer to Note 3 – *Asset Held for Sale and Dispositions* in this Annual Report for additional information.

Sources of Capital

Since net operating cash flow plus advances and contributions in aid of construction have not been sufficient to fully fund our cash requirements including capital expenditures and our growth through acquisitions program, we issued $2,786,632 of long-term debt, and obtained other short-term borrowings during the past three years. At December 31, 2023, we have a $1,000,000 unsecured long-term revolving credit facility that expires in December 2027, of which $16,838 was designated for letter of credit usage, $263,162 was available for borrowing, and $720,000 of borrowings were outstanding at December 31, 2023. This credit facility was established in December 2022, replacing a similar facility, and was used to repay all indebtedness and fees under our prior unsecured revolving credit facility, and for other general corporate purposes. In addition, we have short-term lines of credit of $435,500 of which $275,377 was available as of December 31, 2023. Included in the short-term lines of credit is an Aqua Pennsylvania $100,000 364-day unsecured revolving credit facility and a Peoples Natural Gas $300,000 364-day unsecured revolving credit facility. These short-term lines of credit are subject to renewal on an annual basis. Although we believe we will be able to renew these facilities, there is no assurance that they will be renewed, or what the terms of any such renewal will be.

On January 8, 2024, the Company issued $500,000 of long-term debt (the "2024 Senior Notes"), less expenses of $4,610, due in 2034 with an interest rate of 5.375%. The Company used the net proceeds from the issuance of 2024 Senior Notes (1) to repay a portion of the borrowings under the Company's existing five year unsecured revolving credit facility, and (2) for general corporate purposes.

In August 2023, the Company's subsidiary, Aqua Pennsylvania, issued $225,000 in aggregate principal amount of first mortgage bonds. The bonds consisted of $175,000 of 5.48% first mortgage bonds due in 2053; and $50,000 of 5.56% first mortgage bonds due in 2061. In January 2023 and October 2022, Aqua Pennsylvania issued $75,000 and $125,000 of first mortgage bonds, due in 2043 and 2052, and with interest rates of 5.60% and 4.50%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

On October 14, 2022, the Company entered into at-the market sales agreements ("ATM") with third-party sales agents, under which the Company may offer and sell shares of its common stock, from time to time, at its option, having an aggregate gross offering price of up to $500,000 pursuant to the Company's effective shelf registration statement on Form S-3 (File No. 333-255235). The Company intends to use the net proceeds from the sales of shares through the ATM for working capital, capital expenditures, water and wastewater utility acquisitions and repaying outstanding indebtedness. As of December 31, 2022, the Company has issued 1,321,994 shares for net proceeds of $63,040 under the ATM. During the year ended December 31, 2023, the Company sold 8,938,839 shares of common stock, in exchange for net proceeds of $322,983 under the ATM. As of December 31, 2023, approximately $110,000 remained available for sale under the ATM.

On June 29, 2023, Aqua Pennsylvania and Peoples Natural Gas Companies amended the terms of their respective $100,000 and $300,000, 364-day revolving credit agreements, as follows: (1) extended the maturity dates to June 27, 2024; and (2) updated the adjustment on the Bloomberg Short-Term Bank Yield Index (BSBY) Rate.

On May 20, 2022, the Company issued $500,000 of long-term debt (the "Senior Notes"), less expenses of $5,815, due in 2052 with an interest rate of 5.30%. The Company used the net proceeds from the issuance of Senior Notes to (1) to repay $49,700 of borrowings under Aqua Pennsylvania's 364-day revolving credit facility and $410,000 of borrowings under the Company's existing five year unsecured revolving credit facility, and (2) for general corporate purposes.

On April 15, 2021, our operating subsidiary, Aqua Ohio, Inc., issued $100,000 of first mortgage bonds, of which $50,000 is due in 2031 and $50,000 is due in 2051, with interest rates of 2.37% and 3.35%, respectively. The proceeds from these bonds were used for general corporate purposes and to repay existing indebtedness. Further, on April 19, 2021, the Company issued $400,000 of long-term debt, with expenses of $4,010, which is due in 2031 with an interest rate of 2.40%. The Company used the proceeds from this issuance to repay $50,000 of borrowings under the Aqua Pennsylvania revolving credit facility, and the balance was used to repay in full the borrowings under its existing five-year unsecured revolving credit agreement.

In August 2020, we entered into a forward equity sale agreement for 6,700,000 shares of common stock with a third party (the "forward purchaser"). In connection with the forward equity sale agreement, the forward purchaser borrowed an equal number of shares of our common stock from stock lenders and sold the borrowed shares to the public. We did not receive any proceeds from the sale of our common stock by the forward purchaser until settlement of the forward equity sale agreement. On August 9, 2021, the Company settled the forward equity sale agreement in full by physical share settlement. The Company issued 6,700,000 shares and received cash proceeds of $299,739 at a forward price of $44.74 per share. Pursuant to the agreement, the forward price was computed based upon the initial forward price of $46.00 per share, adjusted for a floating interest rate factor equal to a specified daily rate less a spread and scheduled dividends during the term of the agreement. The Company used the proceeds received upon settlement of the forward equity sale agreement to fund general corporate purposes, including for water and wastewater acquisitions, working capital and capital expenditures. The forward equity sale agreement has now been completely settled, and there are no additional shares subject to the forward equity sale agreement.

Our consolidated balance sheet historically has had a negative working capital position, whereby routinely our current liabilities exceed our current assets. Management believes that internally-generated funds along with existing credit facilities and the proceeds from the issuance of long-term debt and common equity will be adequate to provide sufficient working capital to maintain normal operations and to meet our financing requirements for at least the next twelve months.

Our loan and debt agreements require us to comply with certain financial covenants, which among other things, subject to specific exceptions, limit the Company's ratio of consolidated total indebtedness to consolidated total capitalization, and require a minimum level of earnings coverage over interest expense. During 2023, we were in compliance with our debt covenants under our credit facilities. Failure to comply with our debt covenants could result in an event of default, which could result in us being required to repay or refinance our borrowings before their due date, possibly limiting our future borrowings, and increasing our borrowing costs.

In April 2021, the Company filed a universal shelf registration statement through a filing with the SEC to allow for the potential future offer and sale by the Company, from time to time, in one or more public offerings, of an indeterminate amount of our common stock, preferred stock, debt securities, and other securities specified therein at indeterminate prices. During the past three years, we issued common stock, including common stock in connection with a forward equity sale agreement, and long-term debt in offerings under this shelf registration statement. Refer to Note 11 – *Long-term Debt and Loans Payable* and Note 13 – *Stockholders' Equity* in this Annual Report for further information regarding these financings.

In addition, we have an acquisition shelf registration statement, which was filed with the SEC on February 27, 2015, to permit the offering from time to time of an aggregate of $500,000 of our common stock and shares of preferred stock in connection with acquisitions. The balance remaining available for use under the acquisition shelf registration as of December 31, 2023 is $487,155.

We will determine the form and terms of any further securities issued under the universal shelf registration statement and the acquisition shelf registration statement at the time of issuance.

We offer a Dividend Reinvestment and Direct Stock Purchase Plan (the Plan) that provides a convenient and economical way to purchase shares of the Company. Under the direct stock purchase portion of the Plan, shares are issued throughout the year. The dividend reinvestment portion of the Plan offers a five percent discount on the purchase of shares of common stock with reinvested dividends. As of the December 2023 dividend payment, holders of 4.3% of the common shares outstanding participated in the dividend reinvestment portion of the Plan. The shares issued under the Plan are either original issue shares or shares purchased by the Company's transfer agent in the open-market. During the past three years, we have sold 1,173,589 original issue shares of common stock for net proceeds of $49,423 through the dividend reinvestment portion of the Plan, and we used the proceeds to invest in our operating subsidiaries, to repay short-term debt, and for general corporate purposes. In 2023, 2022 and 2021, we sold 430,487, 368,278, and 374,824 original issues shares of common stock for net proceeds of $16,005, $16,619, and $16,799, respectively, through the dividend reinvestment portion of the plan.

Credit Risk

As of December 31, 2023, our credit ratings remained at investment grade levels. On July 12, 2023, S&P affirmed an A issuer credit rating for the Company, Aqua Pennsylvania and Peoples Natural Gas Companies, and revised its outlook from stable to negative for the companies, citing weakening financial measures as a result of inflationary pressures and our significant capital spending. However, as can be noted in their report, S&P continues to assess our business risk profile as excellent, considering our low-risk and rate-regulated water and gas distribution operations in credit-supportive regulatory environments, our geographic and regulatory diversity, our large and stable residential and commercial customer base, and our solid and reliable operations. On August 29, 2023, Moody's Investors Service ("Moody's") affirmed the Company's senior unsecured notes rating of Baa2 and stable outlook; and, affirmed Peoples Natural Gas Companies' senior secured notes rating of Baa1 and revised its outlook from stable to negative. The Company's ability to maintain its credit rating depends, among other things, on adequate and timely rate relief, its ability to fund capital expenditures in a balanced manner using both debt and equity, and its ability to generate cash flow. A material downgrade of our credit rating may result in the imposition of additional financial and/or other covenants, impact the market prices of equity and debt securities, increase our borrowing costs, and adversely affect our liquidity, among other things. Management continues to enhance our regulatory practices to address regulatory lag and recover capital project costs and increases in operating costs efficiently and timely through various rate-making mechanisms.

Off-Balance Sheet Financing Arrangements

We do not engage in any off-balance sheet financing arrangements. We do not have any interest in entities referred to as variable interest entities, which includes special purpose entities and other structured finance entities.

Contractual Obligations

The following table summarizes our contractual cash obligations as of December 31, 2023:

		Payments Due by Period			
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Long-term debt	$ 6,938,008	$ 67,415	$ 168,875	$ 964,760	$ 5,736,958
Interest on fixed-rate, long-term debt (1)	286,799	2,660	8,599	56,123	219,417
Operating leases (2)	53,038	9,037	16,166	13,933	13,902
Unconditional purchase obligations (3)	18,067	5,990	7,961	3,035	1,081
Gas purchase obligations (4)	2,519,459	206,378	471,836	485,586	1,355,659
Other purchase obligations (5)	87,187	87,187	-	-	-
Pension plan obligations (6)	9,393	9,393	-	-	-
Other obligations (7)	8,428	1,531	2,499	2,659	1,739
Total	$ 9,920,379	$ 389,591	$ 675,936	$ 1,526,096	$ 7,328,756

(1) Represents interest payable on fixed rate, long-term debt. Amounts reported may differ from actual due to future refinancing of debt.

(2) Represents minimum lease payments for long-term operating leases of land, office facilities, office equipment, and vehicles.

(3) Represents our commitment to purchase minimum quantities of water as stipulated in agreements with other water purveyors. We use purchased water to supplement our water supply, particularly during periods of peak customer demand. Our actual purchases may exceed the minimum required levels.

(4) Represents our commitment to purchase minimum quantities of natural gas stipulated in agreements with various producers of natural gas to meet regulated customers' natural gas requirements.

(5) Represents an approximation of the open purchase orders for goods and services purchased in the ordinary course of business.

(6) Represents contributions to be made to the Company's retirement plans.

(7) Represents expenditures estimated to be required under legal and binding contractual obligations.

In addition to the contractual obligations table above, we have the following obligations:

- *Refunds of customer's advances for construction* – We pay refunds on customers' advances for construction over a specific period of time based on operating revenues related to developer-installed utility mains or as new customers are connected to and take service from such mains. After all refunds are paid, any remaining balance is transferred to contributions in aid of construction. The refund amounts are not included in the above table because the refund amounts and timing are dependent upon several variables, including new customer connections, customer consumption levels and future rate increases, which cannot be accurately estimated. Portions of these refund amounts are payable annually through 2033 and amounts not paid by the contract expiration dates become non-refundable.

- *Asset Retirement Obligations* – We recognize asset retirement obligations associated with retirements of production, storage wells and other pipeline components at fair value, as incurred, or when sufficient information becomes available to determine a reasonable estimate of the fair value of the retirement activities to be performed. Expected obligations are not included in the above table because the amounts and timing are dependent upon several variables, which cannot be accurately estimated.

- *Uncertain tax positions* – We have uncertain tax positions of $7,898. Although we believe our tax positions comply with applicable law, we have made judgments as to the sustainability of each uncertain tax position based on its technical merits. Due to the uncertainty of future cash outflows, if any, associated with our uncertain tax positions, we are unable to make a reasonable estimate of the timing or amounts that may be paid. See Note 7 – *Income Taxes* in this Annual Report for further information on our uncertain tax positions.

We will fund these contractual obligations with cash flows from operations and liquidity sources held by or available to us.

The Company is routinely involved in legal matters, including both asserted and unasserted legal claims, during the ordinary course of business. See Note 9 – *Commitments and Contingencies* in this Annual Report for a discussion of the Company's legal matters. It is not always possible for management to make a meaningful estimate of the potential loss or range of loss associated with such litigation. Also, unanticipated changes in circumstances and/or revisions to the assessed probability of the outcomes of legal matters could result in expenses being incurred in future periods as well as an increase in actual cash required to resolve the legal matter.

(In thousands of dollars, except per share amounts)

Capitalization
The following table summarizes our capitalization as of December 31, 2023 and 2022:

December 31,	2023	2022
Long-term debt (1)	54.1%	55.2%
Essential Utilities stockholders' equity	45.9%	44.8%
	100.0%	100.0%

(1) Includes current portion, as well as our borrowings under a variable rate revolving credit agreement of $720,000 at December 31, 2023, and $490,000 at December 31, 2022.

Over the past two years, the changes in the capitalization ratios primarily resulted from the issuance of debt to finance our acquisitions and capital program, changes in net income, the issuance of common stock, and the declaration of dividends.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our financial condition and results of operations are impacted by the methods, assumptions, and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to our financial condition or results of operations and require estimates or other judgments of matters of uncertainty. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the financial statements. We believe our most critical accounting policies include the use of regulatory assets and liabilities, revenue recognition, the valuation of our long-lived assets (which consist primarily of utility plant in service, regulatory assets, and goodwill), our accounting for post-retirement benefits, and our accounting for income taxes. We have discussed the selection and development of our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

Regulatory Assets and Liabilities — We defer costs and credits on the balance sheet as regulatory assets and liabilities when it is probable that these costs and credits will be recognized in the rate-making process in a period different from when the costs and credits were incurred. These deferred amounts, both assets and liabilities, are then recognized in the consolidated statement of operations in the same period that they are reflected in our rates charged for utility service. We make significant judgments and estimates to record regulatory assets and liabilities, such as for amounts related to income taxes, pension and postretirement benefits, acquisitions and capital projects. For each regulatory jurisdiction with regulated operations, we evaluate at the end of each reporting period, whether the regulatory assets and liabilities continue to meet the probable criteria for future recovery or refund. The evaluation considers factors such as regulatory orders or guidelines, in the same regulatory jurisdiction, of a specific matter or a similar matter, as provided to us in the past or to other regulated utilities. In addition, the evaluation may be impacted by changes in the regulatory environment and pending or new legislation that could impact the ability to recover costs through regulated rates. There may be multiple participants to rate or transactional regulatory proceedings who might offer different views on various aspects of such proceedings, and in these instances may challenge our prudence of business policies and practices, seek cost disallowances or request other relief.

In the event that our assessment as to the probability of the inclusion in the rate-making process is incorrect, the associated regulatory asset or liability would be adjusted to reflect the change in our assessment or change in regulatory approval.

Revenue Recognition — Our utility revenues recognized in an accounting period include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the last billing to the end of the accounting period. The estimated usage is based on our judgment and assumptions; our actual results could differ from these estimates, which would result in operating revenues being adjusted in the period that the revision to our estimates is determined.
In Virginia, North Carolina, and Kentucky, we may bill our utility customers, in certain circumstances, in accordance with a rate filing that is pending before the respective regulatory commission, which would allow interim rates before the final commission rate order is issued. The revenue recognized reflects an estimate based on our judgment of the final outcome of the commission's ruling. We monitor the applicable facts and circumstances regularly and revise the estimate as required. The revenue billed and collected prior to the final ruling is subject to refund based on the commission's final ruling.

Valuation of Long-Lived Assets, Goodwill and Intangible Assets — We review our long-lived assets for impairment, including utility plant in service. We also review regulatory assets for the continued application of the FASB accounting guidance for regulated operations. Our review determines whether there have been changes in circumstances or events, such as regulatory disallowances, or abandonments, that have occurred that require adjustments to the carrying value of these assets. Adjustments to the carrying value of these assets would be made in instances where their inclusion in the rate-making process is unlikely. For utility plant in service, we would recognize an impairment loss for any amount disallowed by the respective utility commission.

Our long-lived assets, which consist primarily of utility plant in service, operating lease right-of-use assets and intangible assets, are reviewed for impairment when changes in circumstances or events occur. These circumstances or events could include a decline in the market value or physical condition of a long-lived asset, an adverse change in the manner in which long-lived assets are used or planned to be used, a change in historical trends, operating cash flows associated with the long-lived assets, changes in macroeconomic conditions, industry and market conditions, or overall financial performance. When these circumstances or events occur, we determine whether it is more likely than not that the fair value of those assets is less than their carrying amount. If we determine that it is more likely than not (that is, the likelihood of more than 50 percent), we would recognize an impairment charge if it is determined that the carrying amount of an asset exceeds the sum of the undiscounted estimated cash flows. In this circumstance, we would recognize an impairment charge equal to the difference between the carrying amount and the fair value of the asset. Fair value is estimated to be the present value of future net cash flows associated with the asset, discounted using a discount rate commensurate with the risk and remaining life of the asset. This assessment requires significant management judgment and estimates that are based on budgets, general strategic business plans, historical trends and other data and relevant factors. These estimates include significant inherent uncertainties, since they involve forecasting future events. If changes in circumstances or events occur, or estimates and assumptions that were used in this review are changed, we may be required to record an impairment charge on our long-lived assets. Refer to Note 1 – *Summary of Significant Accounting Policies – Impairment of Long-Lived Assets* in this Annual Report for additional information regarding the review of long-lived assets for impairment.

We test the goodwill attributable to each of our reporting units for impairment at least annually, or more often, if circumstances indicate a possible impairment may exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, changes to regulatory environment, recent regulatory and legislative proceedings, cost factors, overall financial performance, and entity specific events, for some or all of our reporting units to determine whether it's more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on our assessment of the qualitative factors previously noted, or at our discretion, we may perform a quantitative goodwill impairment test by determining the fair value of a reporting unit by weighting the results from the income approach and the market approach. These valuation approaches consider a number of factors that include, but are not limited to, prospective financial information (which includes projected operating income, expected future capital expenditures, and projected regulatory rate base, among others), growth rates, terminal value, discount rates, and comparable multiples from publicly traded companies in our industry and require us to make certain assumptions and estimates regarding industry economic factors and future profitability of our business. If we perform a quantitative test and determine that the fair value of a reporting unit is less than its carrying amount, we would record an impairment loss for the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of goodwill. The assessment requires significant management judgment and estimates that are based on budgets, general strategic business plans, historical trends and other data and relevant factors. If changes in circumstances or events occur, or estimates and assumptions that were used in our impairment test change, we may be required to record an impairment charge for goodwill. Refer to Note 1 – *Summary of Significant Accounting Policies – Goodwill* in this Annual Report for further information.

As part of the October 1, 2023 annual goodwill assessment, we elected to perform a quantitative goodwill impairment assessment on the goodwill attributable to our Regulated Natural Gas reporting unit and a qualitative assessment for our Regulated Water and Other reporting units. Additionally, the Company performed a market capitalization reconciliation to further support the Company's estimated fair value and support the implied premium. Based on our analysis, we determined that none of the goodwill of our reporting units was impaired.

(In thousands of dollars, except per share amounts)

We generally assumed operating margins in future years would increase as we continue to integrate and implement our rate base growth strategy. However, unforeseen events, such as adverse changes in market conditions and changes in the regulatory environment which could lead to disallowances of a portion of capital investments, may result in future non-cash impairment charges that could be material. If we were to assume changes in certain of our key assumptions used to determine the fair value of our Regulated Natural Gas reporting unit, the following would be the impact on the amount of headroom over the carrying value:

Sensitivity Analysis[1]	Percentage decrease in headroom of Regulated Natural Gas Reporting Unit
Increase in discount rate by 100 basis points	40%
Decrease in Market Multiples by 1x	46%
Reduction in terminal value EBITDA[2] by 10%	49%

[1] Each assumption used in the sensitivity analysis is independent of the other assumptions

[2] Defined as earnings before interest, taxes, depreciation and amortization

Accounting for Post-Retirement Benefits — We maintain a qualified and a non-qualified defined benefit pension plan and plans that provide for post-retirement benefits other than pensions. Accounting for pension and other post-retirement benefits requires an extensive use of assumptions including the discount rate, expected return on plan assets, the rate of future compensation increases received by our employees, mortality, turnover and medical costs. Each assumption is reviewed annually with assistance from our actuarial consultant, who provides guidance in establishing the assumptions. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other post-retirement benefits expense that we recognize.

Our discount rate assumption, which is used to calculate the present value of the projected benefit payments of our post-retirement benefits, was determined by selecting a hypothetical portfolio of high quality corporate bonds appropriate to match the projected benefit payments of the plans. The selected bond portfolio was derived from a universe of Aa-graded corporate bonds. The discount rate was then developed as the rate that equates the market value of the bonds purchased to the discounted value of the projected benefit payments of the plans. A decrease in the discount rate would generally increase our post-retirement benefits expense and benefit obligation. After reviewing the hypothetical portfolio of bonds, we selected a discount rate of 5.17% for our pension plan, and 5.09% for our other post-retirement benefit plans as of December 31, 2023, which represent a 34 and 36 basis-point decrease as compared to the discount rates selected at December 31, 2022, respectively. Our post-retirement benefits expense under these plans is determined using the discount rate as of the beginning of the year, which was 5.51% for our pension plan and 5.45% for our other-postretirement benefit plan for 2023. In 2023, settlement accounting was triggered by the amount of lump-sum payments by our qualified pension plan to retirees and other separated employees exceeding the threshold of service and interest cost for the period. As a result, we remeasured our qualified pension plan assets and liabilities using a discount rate of 5.20%, and the remeasurement did not have a material impact to our consolidated financial statements.

Our expected return on plan assets is determined by evaluating the asset class return expectations with our advisors as well as actual, long-term, historical results of our asset returns. The Company's market-related value of plan assets is equal to the fair value of the plans' assets as of the last day of its fiscal year and is a determinant for the expected return on plan assets, which is a component of post-retirement benefits expense. The allocation of our plans' assets impacts our expected return on plan assets. As of December 31, 2023, the expected return on plan assets is based on a targeted allocation of 20% to 40% return seeking assets and 30% to 70% liability hedging assets for our pension plan, and a targeted allocation of 50% to 70% return seeking assets and 30% to 50% liability hedging assets for our other post-retirement benefit plans. Our post-retirement benefits expense increases as the expected return on plan assets decreases. We believe that our actual long-term asset allocations on average will approximate our targeted allocations. Our targeted allocations are driven by our investment strategy to earn a reasonable rate of return while maintaining risk at acceptable levels through the diversification of investments across and within various asset categories. For 2023, we used a 6.8% expected return on plan assets assumption and are currently reviewing this assumption for 2024.

Funding requirements for qualified defined benefit pension plans are determined by government regulations and not by accounting pronouncements. In accordance with funding rules and our funding policy, during 2024 our pension contribution is expected to be $9,393. Future years' contributions will be subject to economic conditions, plan participant data and the funding rules in effect at such time as the funding calculations are performed, though we expect future changes in the amount of contributions and expense recognized to be generally included in customer rates.

Accounting for Income Taxes — We estimate the amount of income tax payable or refundable for the current year and the deferred income tax liabilities and assets that results from estimating temporary differences resulting from the treatment of specific items, such as depreciation, for tax and financial statement reporting. Generally, these differences result in the recognition of a deferred tax asset or liability on our consolidated balance sheet and require us to make judgments regarding the probability of the ultimate tax impact of the various transactions we enter into. Based on these judgments, we may record tax reserves or adjustments to valuation allowances on deferred tax assets to reflect the expected realization of future tax benefits. Actual income taxes could vary from these estimates and changes in these estimates can increase income tax expense in the period that these changes in estimates occur.

Our determination of what qualifies as a capital cost versus a tax deduction, for qualifying utility asset improvements, as it relates to our income tax accounting method, is subject to subsequent adjustment as well as IRS audits, changes in income tax laws, including regulations regarding tax-basis depreciation as it applies to our capital expenditures, or qualifying utility asset improvements, the expiration of a statute of limitations, or other unforeseen matters could impact the tax benefits that have already been recognized. We establish reserves for uncertain tax positions based upon management's judgment as to the sustainability of these positions. These accounting estimates related to the uncertain tax position reserve require judgments to be made as to the sustainability of each uncertain tax position based on its technical merits. We believe our tax positions comply with applicable law and that we have adequately recorded reserves as required. However, to the extent the final tax outcome of these matters is different than our estimates recorded, we would then need to adjust our tax reserves which could result in additional income tax expense or benefits in the period that this information is known.

IMPACT OF RECENT ACCOUNTING PRONOUNCEMENTS

We describe the impact of recent accounting pronouncements in Note 1 – *Summary of Significant Accounting Policies* in this Annual Report.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

We are subject to market risks in the normal course of business, including changes in interest rates, gas commodity prices and equity prices. Volatile equity market conditions arising from public health threats and global conflicts and sanctions imposed in response thereto, may result in our pension and other post-retirement plans' assets market values suffering a decline, which could increase our required cash contributions to the plans and expense in subsequent years. The exposure to changes in interest rates is a result of financings through the issuance of fixed rate long-term debt. Such exposure is typically related to financings between utility rate increases, since generally our rate increases include a revenue level to allow recovery of our current cost of capital. Interest rate risk is managed through the use of a combination of long-term debt, which is at fixed interest rates; short-term debt, which is at floating interest rates; and at times in the past interest rate swap agreements. As of December 31, 2023, the debt maturities by period, in thousands of dollars, and the weighted average interest rate for long-term debt are as follows:

	2024	2025	2026	2027	2028	Thereafter	Total	Fair Value
Long-term debt:								
Fixed rate	$ 67,415	$ 147,319	$ 21,556	$ 237,728	$ 7,032	$ 5,736,958	$ 6,218,008	$ 5,260,722
Variable rate	-	-	-	720,000	-	-	720,000	720,000
Total	$ 67,415	$ 147,319	$ 21,556	$ 957,728	$ 7,032	$ 5,736,958	$ 6,938,008	$ 5,980,722
Weighted average interest rate	3.95%	4.76%	7.37%	5.83%	4.32%	3.82%	4.14%	

From time to time, we make investments in marketable equity securities. As a result, we are exposed to the risk of changes in equity prices for the marketable equity securities. As of December 31, 2023, we have assets of, in thousands of dollars, $26,442 to fund our deferred compensation and non-qualified pension plan liabilities. The market risk of the deferred compensation plan assets are borne by the participants in the deferred compensation plan.

Our natural gas commodity price risk, driven mainly by price fluctuations of natural gas, is mitigated by our purchased-gas cost adjustment mechanisms. We also use derivative instruments to economically hedge the cost of anticipated natural gas purchases during the winter heating months that seeks to offset the risk to our customers from upward market price volatility. These instruments include requirements contracts and spot purchase contracts to meet our regulated customers' natural gas requirements and these instruments may have fixed or variable pricing. The variable price contracts qualify as derivative instruments; however, because the contract price is the prevailing price at the future transaction date the contract has no determinable fair value. The fixed price contracts and firm commitments to purchase a fixed quantity of gas in the future qualify for the normal purchases and normal sales exception that is allowed for contracts that are probable of delivery in the normal course of business and, as such, are accounted for under the accrual basis and not recorded at fair value in the Company's consolidated financial statements. We also manage gas commodity price risk and supply risk by injecting natural gas into storage during the summer months and withdrawing the natural gas during the winter heating season.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Essential Utilities, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets, including the consolidated statements of capitalization, of Essential Utilities, Inc. and its subsidiaries (the "Company") as of December 31, 2023 and 2022, and the related consolidated statements of operations and comprehensive income, of equity, and of cash flows for each of the three years in the period ended December 31, 2023, including the related notes and schedule of condensed parent company financial statements as of December 31, 2023 and 2022 and for each of the three years in the period ended December 31, 2023 appearing after the signature pages (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Accounting for Rate Regulation

As described in Notes 1 and 6 to the consolidated financial statements, most of the operating companies of the Company that are regulated public utilities are subject to regulation by the utility commissions of the states in which they operate. Some of the operating companies that are regulated public utilities are subject to rate regulation by county or city government. As of December 31, 2023, regulatory assets were $1.80 billion and regulatory liabilities were $0.85 billion. Regulated public utilities follow the Financial Accounting Standards Board's accounting guidance for regulated operations, which provides for the recognition of regulatory assets and liabilities as allowed by regulators for costs or credits that are reflected in current rates or are considered probable of being included in future rates. The regulatory assets represent costs that are probable to be fully recovered from customers in future rates while regulatory liabilities represent amounts that are expected to be refunded to customers in future rates or amounts recovered from customers in advance of incurring the costs. The regulatory assets or liabilities are then relieved as the cost or credit is reflected in the Company's rates charged for utility service. If, as a result of a change in circumstances, it is determined that a regulated operating company no longer meets the criteria to apply regulatory accounting, the operating company would have to discontinue regulatory accounting and write-off the respective regulatory assets and liabilities. Management makes significant judgments and estimates to record regulatory assets and liabilities. For each regulatory jurisdiction with regulated operations, management evaluates at the end of each reporting period whether the regulatory assets and liabilities continue to meet the probable criteria for future recovery or refund. The evaluation considers factors such as regulatory orders or guidelines, in the same regulatory jurisdiction, of a specific matter or a similar matter, as provided to the Company in the past or to other regulated utilities. In addition, the evaluation may be impacted by changes in the regulatory environment and pending or new legislation that could impact the ability to recover costs through regulated rates. There may be multiple participants to rate or transactional regulatory proceedings who might offer different views on various aspects of such proceedings and, in these instances, may challenge the prudence of business policies and practices, seek cost disallowances or request other relief.

The principal considerations for our determination that performing procedures relating to management's accounting for rate regulation is a critical audit matter are the significant judgment by management when assessing the impact of regulation on the accounting for regulatory assets and liabilities, which in turn led to a high degree of auditor judgment and effort in performing procedures and in evaluating audit evidence related to whether the regulatory assets will be recovered and liabilities will be refunded.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's evaluation of regulatory matters impacting regulatory assets and liabilities, including controls over the recovery of regulatory assets and the refund of regulatory liabilities. These procedures also included, among others (i) obtaining the Company's correspondence with regulators and assessing the reasonableness of management's judgments regarding the recovery of regulatory assets and refund of regulatory liabilities, (ii) assessing the reasonableness of management's accounting judgments related to new and updated regulatory orders and guidelines, and (iii) testing the calculation of regulatory assets and liabilities based on provisions outlined in regulatory correspondence.

Note 1 – *Summary of Significant Accounting Policies*

Nature of Operations ─ Essential Utilities, Inc. ("Essential Utilities," the "Company," "we," "our", or "us") is the holding company for regulated utilities providing water, wastewater, or natural gas services concentrated in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, and Kentucky under the Aqua and Peoples brands. One of our largest operating subsidiaries is Aqua Pennsylvania, Inc., which accounted for approximately 56% of our Regulated Water segment's operating revenues and approximately 68% of our Regulated Water segment's income for 2023. As of December 31, 2023, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of Regulated Water customers we serve. Aqua Pennsylvania's service territory is located in the suburban areas north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. The Company's other regulated water or wastewater utility subsidiaries provide similar services in seven additional states. Our Peoples subsidiaries provide natural gas service to approximately 744,000 customers in western Pennsylvania and Kentucky. Approximately 95% of the total number of natural gas utility customers we serve are in western Pennsylvania. The Company also operates market-based activities, conducted through its non-regulated subsidiaries, that provide utility service line protection solutions and repair services to households and gas marketing and production activities.

In December 2022, the Company signed an agreement to sell its regulated natural gas utility assets in West Virginia, which represented approximately two percent of the Company's regulated natural gas customers. The sale closed on October 1, 2023, and concluded our regulated utility operations in West Virginia. In October 2023, the Company entered into an agreement to sell its interest in three non-utility local microgrid and distribution energy projects. This sale was completed in January 2024. See Note 6 – *Assets Held for Sale and Dispositions* for further information.

Regulation ─ Most of the operating companies that are regulated public utilities are subject to regulation by the utility commissions of the states in which they operate. The respective utility commissions have jurisdiction with respect to rates, service, accounting procedures, issuance of securities, acquisitions and other matters. Some of the operating companies that are regulated public utilities are subject to rate regulation by county or city government. Regulated public utilities follow the Financial Accounting Standards Board's ("FASB") accounting guidance for regulated operations, which provides for the recognition of regulatory assets and liabilities as allowed by regulators for costs or credits that are reflected in current rates or are considered probable of being included in future rates. Costs, for which the Company has received or expects to receive prospective rate recovery, are deferred as a regulatory asset and amortized over the period of rate recovery in accordance with the FASB's accounting guidance for regulated operations. The regulatory assets or liabilities are then relieved as the cost or credit is reflected in Company's rates charged for utility service. If, as a result of a change in circumstances, it is determined that a regulated operating company no longer meets the criteria to apply regulatory accounting, the operating company would have to discontinue regulatory accounting and write-off the respective regulatory assets and liabilities. See Note 6 - *Regulatory Assets and Liabilities* for further information regarding the Company's regulatory assets.

The Company makes significant judgments and estimates to record regulatory assets and liabilities. For each regulatory jurisdiction with regulated operations, the Company evaluates at the end of each reporting period, whether the regulatory assets and liabilities continue to meet the probable criteria for future recovery or refund. The evaluation considers factors such as regulatory orders or guidelines, in the same regulatory jurisdiction, of a specific matter or a similar matter, as provided to the Company in the past or to other regulated utilities. In addition, the evaluation may be impacted by changes in the regulatory environment and pending or new legislation that could impact the ability to recover costs through regulated rates. There may be multiple participants to rate or transactional regulatory proceedings who might offer different views on various aspects of such proceedings, and in these instances, may challenge the prudence of our business policies and practices, seek cost disallowances or request other relief.

Use of Estimates in Preparation of Consolidated Financial Statements ─ The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

Basis of Presentation – The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated.

Property, Plant and Equipment and Depreciation ─ Property, plant and equipment consist primarily of utility plant. The cost of additions includes contracted cost, direct labor and fringe benefits, materials, overheads, and for additions meeting certain criteria, allowance for funds used during construction. Utility systems acquired are typically recorded at estimated original cost of utility plant when first devoted to utility service and the applicable depreciation is recorded to accumulated depreciation. Further, utility systems acquired under fair value regulations would be recorded based on the valuation of the utility plant as approved by the respective utility commission. The difference between the estimated original cost, less applicable accumulated depreciation, and the purchase price may be recorded as an acquisition adjustment within utility plant as permitted by the applicable regulatory jurisdiction. At December 31, 2023 and 2022, utility plant includes a net credit acquisition adjustment of $6,444 and $6,076, respectively, which is generally being amortized from 10 to 53 years. Amortization of the acquisition adjustments totaled $2,103 in 2023, $2,788 in 2022, and $2,842 in 2021.

Utility expenditures for maintenance and repairs, including major maintenance projects and minor renewals, are charged to operating expenses when incurred in accordance with the system of accounts prescribed by the utility commissions of the states in which the company operates. The cost of new units of property and betterments are capitalized. Utility expenditures for water main cleaning and relining of pipes are deferred and are presented in net property, plant and equipment in accordance with the FASB's accounting guidance for regulated operations. As of December 31, 2023, $1,635 of these costs have been incurred since the last respective rate proceeding and the Company expects to recover these costs in future rates.

The cost of software upgrades and enhancements are capitalized if they result in added functionality, which enables the software to perform tasks it was previously incapable of performing. Information technology costs associated with major system installations, conversions and improvements, such as software training, data conversion and business process reengineering costs, are deferred as a regulatory asset if the Company expects to recover these costs in future rates. If these costs are not deferred, then these costs are charged to operating expenses when incurred. As of December 31, 2023, $44,238 of these costs have been deferred since the last respective rate proceeding as a regulatory asset, and the deferral is reported as a component of net property, plant and equipment.

When units of utility property are replaced, retired or abandoned, the recorded value thereof is credited to the asset account and such value, together with the net cost of removal, is charged to accumulated depreciation. To the extent the Company anticipates recovery of the cost of removal or other retirement costs through rates after the retirement costs are incurred, a regulatory asset is recorded as those costs are incurred. In some cases, the Company recovers retirement costs through rates during the life of the associated asset and before the costs are incurred. These amounts, which are not yet utilized, result in a regulatory liability being reported based on the amounts previously recovered through customer rates.

The straight-line remaining life method is used to compute depreciation on utility plant. Generally, the straight-line method is used with respect to transportation and mechanical equipment, office equipment and laboratory equipment.

Impairment of Long-Lived Assets - Long-lived assets of the Company, which consist primarily of utility plant in service, operating lease right-of-use assets and intangible assets, are reviewed for impairment when changes in circumstances or events occur. These circumstances or events could include a decline in the market value or physical condition of a long-lived asset, an adverse change in the manner in which long-lived assets are used or planned to be used, a change in historical trends, operating cash flows associated with the long-lived assets, changes in macroeconomic conditions, industry and market conditions, or overall financial performance. When these circumstances or events occur, the Company determines whether it is more likely than not that the fair value of those assets is less than their carrying amount. If the Company determines that it is more likely than not (that is, the likelihood of more than 50 percent), the Company would recognize an impairment charge if it is determined that the carrying amount of an asset exceeds the sum of the undiscounted estimated cash flows. In this circumstance, the Company would recognize an impairment charge equal to the difference between the carrying amount and the fair value of the asset. Fair value is estimated to be the

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

present value of future net cash flows associated with the asset, discounted using a discount rate commensurate with the risk and remaining life of the asset. During the years ended December 31, 2022 and 2021, the Company recorded an impairment loss to write down a portion of the operating lease right-of-use asset for office space not used in operations to fair value. Refer to Note 10 – *Leases*, for further details.

Regulatory assets are reviewed for the continued application of the FASB accounting guidance for regulated operations. The Company's review determines whether there have been changes in circumstances or events, such as regulatory disallowances, or abandonments, that have occurred that require adjustments to the carrying value of these assets. Adjustments to the carrying value of these assets would be made in instances where their inclusion in the rate-making process is unlikely. For utility plant in service, we would recognize an impairment loss for any amount disallowed by the respective utility commission.

Allowance for Funds Used During Construction — The allowance for funds used during construction ("AFUDC") represents the capitalized cost of funds used to finance the construction of utility plant. In general, AFUDC is applied to construction projects requiring more than one month to complete. No AFUDC is applied to projects funded by customer advances for construction, contributions in aid of construction, or applicable state-revolving fund loans. AFUDC includes the net cost of borrowed funds and a rate of return on other funds when used and is recovered through rates as the utility plant is depreciated. The amount of AFUDC related to equity funds in 2023 was $11,726, 2022 was $17,618, and 2021 was $16,282. No interest was capitalized by our market-based businesses.

Lease Accounting — The Company evaluates the contracts it enters into to determine whether such contracts contain leases. A contract contains a lease if the contract conveys the right to control the use of identified property, plant or equipment for a period of time in exchange for consideration. We enter into operating lease contracts for the right to utilize certain land, office facilities, office equipment, and vehicles from third parties. For contracts that extend for a period greater than 12 months, we recognize a right of use asset and a corresponding lease liability on our consolidated balance sheet. The present value of each lease is based on the future minimum lease payments in accordance with Accounting Standards Codification ("ASC") 842 and is determined by discounting these payments using an incremental borrowing rate.

Recognition of Revenues — The Company recognizes revenue as utility services are provided to our customers, which happens over time as the services are delivered and the performance obligation is satisfied. The Company's utility revenues recognized in an accounting period includes amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the last billing to the end of the accounting period. Unbilled amounts are calculated by deriving estimates based on an average usage of the prior month. The Company's actual results could differ from these estimates, which would result in operating revenues being adjusted in the period that the revision to our estimates are determined.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

Generally, payment is due within 30 days once a bill is issued to a customer. Sales tax and other taxes we collect on behalf of government authorities, concurrent with our revenue-producing activities, are primarily excluded from revenue. The following table presents our revenues disaggregated by major source and customer class for the years ended December 31:

2023	Water Revenues	Wastewater Revenues	Natural Gas Revenues	Other Revenues
Revenues from contracts with customers:				
Residential	$ 641,351	$ 139,188	$ 519,406	$ -
Commercial	180,731	35,530	111,272	-

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

Revenues from Contracts with Customers – These revenues are composed of four main categories: water, wastewater, natural gas, and other. Water revenues represent revenues earned for supplying customers with water service. Wastewater revenues represent revenues earned for treating wastewater and releasing it into the environment. Natural gas revenues represent revenues earned for the gas commodity and delivery of natural gas to customers. Other revenues are associated fees that relate to our utility businesses but are not water, wastewater, or natural gas revenues. Refer to the description below for a discussion of the performance obligation for each of these revenue streams.

- Tariff Revenues – These revenues are categorized by customer class: residential, commercial, fire protection, industrial, gas transportation, other water, and other wastewater. The rates that generate these revenues are approved by the respective state utility commission, and revenues are billed cyclically and accrued for when unbilled. The regulated natural gas rates are set and adjusted for increases or decreases in our purchased gas costs through purchased gas adjustment mechanisms. Purchased gas adjustment mechanisms provide us with a means to recover purchased gas costs on an ongoing basis without filing a rate case. Other water and other wastewater revenues consists primarily of fines, penalties, surcharges, and availability lot fees. Our performance obligation for tariff revenues is to provide potable water, wastewater treatment service, or delivery and sale of natural gas to customers. This performance obligation is satisfied over time as the services are rendered. The amounts that the Company has a right to invoice for tariff revenues reflect the right to consideration from the customers in an amount that corresponds directly with the value transferred to the customer for the performance completed to date.

- Other Utility Revenues – Other utility revenues represent revenues earned primarily from: antenna revenues, which represents fees received from telecommunication operators that have put cellular antennas on our water towers; operation and maintenance and billing contracts, which represent fees earned from municipalities for our operation of their water or wastewater treatment services or performing billing services; and fees earned from developers for accessing our water mains, miscellaneous service revenue from gas distribution operations, gas processing and handling revenue, sales of natural gas at market-based rates and contracted fixed prices, sales of gas purchased from third parties, and other gas marketing activities. The performance obligations vary for these revenues, but all are primarily recognized over time as the service is delivered.

- Alternative Revenue Program:
  - Water / Wastewater Revenues – These revenues represent the difference between the actual billed utility volumetric water and wastewater revenues for Aqua Illinois and the revenues set in the last Aqua Illinois rate case. In accordance with the Illinois Commerce Commission, we recognize revenues based on the target amount established in the last rate case, and then record either a regulatory asset or liability based on the cumulative annual difference between the target and actual amounts billed, which results in either a payment from customers or a refund due to customers. The cumulative annual difference is either refunded to customers or collected from customers over a nine-month period.

  - Natural Gas Revenues – These revenues represent the weather-normalization adjustment (“WNA”) mechanism in place for our natural gas customers served in Kentucky. The WNA serves to minimize the effects of weather on the Company’s results for its residential and small commercial natural gas customers. This regulatory mechanism adjusts revenues earned for the variance between actual and normal weather and can have either positive (warmer than normal) or negative (colder than normal) effects on revenues. Customer bills are adjusted in the December through April billing months, with rates adjusted for the difference between actual revenues and revenues calculated under this mechanism billed to the customers.

  These revenue programs represent a contract between the utility and its regulators, not customers, and therefore are not within the scope of the FASB’s accounting guidance for recognizing revenue from contracts with customers.

- Other and Eliminations – Other and eliminations consist of market-based revenues, which are earned through our non-regulated natural gas operations and Aqua Resources, and intercompany activities for revenue billed between our subsidiaries. Our non-regulated natural gas operations consist of utility service line protection solutions and repair services for households and the operation of gas marketing and production entities. Revenue is recognized and the performance obligation is satisfied over time as the service is delivered. Aqua Resources earned revenues and continues to earn revenue through third-party water and sewer service line protection and repair services. For the service line protection business, the performance obligations are allowing the use of our logo to a third-party water and sewer service line repair provider. Revenues are primarily recognized over time as service is delivered.

Cash and Cash Equivalents — The Company considers all highly liquid investments with an original maturity of three months or less, which are not restricted for construction activity, to be cash equivalents.

The Company had a book overdraft, which represents transactions that have not cleared the bank accounts at the end of the period, for specific disbursement cash accounts of $13,358 and $28,694 at December 31, 2023 and 2022, respectively. The Company transfers cash on an as-needed basis to fund these items as they clear the bank in subsequent periods. The balance of the book overdraft is reported as book overdraft and the change in the book overdraft balance is reported as cash flows from financing activities, due to our ability to fund the overdraft with the Company's credit facility.

Accounts Receivable — Accounts receivable are recorded at the invoiced amounts, which consists of billed and unbilled revenues. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in our existing accounts receivable and is determined based on lifetime expected credit losses and the aging of account balances. The Company reviews the allowance for doubtful accounts quarterly. Account balances are written off against the allowance when it is probable the receivable will not be recovered. When utility customers request extended payment terms, credit is extended based on regulatory guidelines, and collateral is not required.

Inventories – Materials and Supplies – Inventories are stated at cost. Cost is determined using the first-in, first-out method.

Inventory – Gas Stored – The Company accounts for gas in storage inventory using the weighted average cost of gas method.

Assets Held for Sale — When the Company makes a decision to sell an asset or to stop some part of its business, the Company assesses if such assets should be classified as an asset held for sale. Assets held for sale are measured at the lower of their carrying amount or fair value less cost to sell. For long-lived assets or disposal groups that are classified as held for sale but do not meet the criteria for discontinued operations, the assets and liabilities are presented separately on the consolidated balance sheet of the initial period in which it is classified as held for sale. The major classes of assets

and liabilities classified as held for sale are disclosed in the notes to the consolidated financial statements. See *"Note 3 – Assets Held for Sale and Dispositions"*.

Goodwill – Goodwill represents the excess cost over the fair value of net tangible and identifiable intangible assets acquired through acquisitions. Goodwill is not amortized but is tested for impairment annually, or more often, if circumstances indicate a possible impairment may exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, changes to regulatory environment, recent regulatory and legislative proceedings, cost factors, overall financial performance, and entity specific events, for some or all of our reporting units to determine whether it's more likely than not that the fair value of a reporting unit is less than its carrying amount. Alternatively, based on our assessment of the qualitative factors previously noted or at our discretion, we may perform a quantitative goodwill impairment test by determining the fair value of a reporting unit. If we perform a quantitative test and determine that the fair value of a reporting unit is less than its carrying amount, we would record an impairment loss for the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the reporting unit's carrying amount of goodwill.

Impairment testing for goodwill is done at the reporting unit level. A reporting unit is an operating segment or one level below an operating segment (also known as a component). A component of an operating segment is a reporting unit if the component constitutes a business for which discrete financial information is available, and segment management regularly reviews the operating results of that component. We assigned assets and liabilities to each reporting unit based on either specific identification or by using judgment for the remaining assets and liabilities that are not specific to a reporting unit. Goodwill was assigned to the reporting units based on a combination of specific identification and relative fair values.

Determining the fair value of our reporting units involves the use of significant estimates and assumptions and considerable management judgment. We base our fair value estimates on assumptions we believe to be reasonable at the time, but such assumptions are subject to inherent uncertainty. We estimated the fair value of reporting units by weighting results from the market approach and the income approach. These valuation approaches consider a number of factors that include, but are not limited to, prospective financial information, growth rates, terminal value, discount rates, and comparable multiples from publicly traded companies in our industry. Changes in market conditions, changes in the regulatory environment, pending or new legislation that could impact the ability to recover costs through regulated rates or other factors outside of our control, could cause us to change key assumptions and our judgment about a reporting unit's prospects. Similarly, in a specific period, a reporting unit could significantly underperform relative to its historical or projected future operating results. Either situation could result in a meaningfully different estimate of the fair value of our reporting units, and a consequent future impairment charge.

During the fourth quarter of 2023, as part of the annual goodwill assessment as of October 1, 2023, we elected to perform a quantitative goodwill impairment assessment on the goodwill attributable to our Regulated Natural Gas reporting unit and a qualitative assessment for our Regulated Water and Other reporting units. Based on our analysis, we determined that none of the goodwill of our reporting units was impaired.

The following table summarizes the changes in the Company's goodwill:

	Regulated Water	Regulated Natural Gas	Other	Consolidated
Balance at December 31, 2021	$ 58,527	$ 2,277,447	$ 4,841	$ 2,340,815
Goodwill acquired	-	-	-	-
Reclassifications to utility plant acquisition adjustment	(23)	-	-	(23)
Balance at December 31, 2022	58,504	2,277,447	4,841	2,340,792
Goodwill acquired	-	-	-	-
Reclassifications to utility plant acquisition adjustment	(54)	-	-	(54)
Balance at December 31, 2023	$ 58,450	$ 2,277,447	$ 4,841	$ 2,340,738

The reclassification of goodwill to utility plant acquisition adjustment results from either a regulatory order or a mechanism approved by the applicable utility commission. A regulatory order may provide for the one-time transfer of certain acquired goodwill. The mechanism provides for the transfer over time, and the recovery through customer rates, of goodwill associated with some acquisitions upon achieving specific objectives.

Intangible assets – The Company's intangible assets consist of customer relationships for our non-regulated natural gas operations and non-compete agreements with certain former employees of Peoples. These intangible assets are amortized on a straight-line basis over their estimated useful lives of fifteen years for the customer relationships and five years for the non-compete agreements.

Derivative Instruments – The Company's natural gas commodity price risk, driven mainly by price fluctuations of natural gas, is mitigated by its purchased-gas cost adjustment mechanisms. The Company also uses derivative instruments to economically hedge the cost of anticipated natural gas purchases during the winter heating months that seeks to offset the risk to the Company's utility customers from upward market price volatility. These strategies include requirements contracts, spot purchase contracts and underground storage to meet regulated customers' natural gas requirements that may have fixed or variable pricing. The variable price contracts qualify as derivative instruments; however, because the contract price is the prevailing price at the future transaction date the contract has no determinable fair value. The fixed price contracts and firm commitments to purchase a fixed quantity of gas in the future qualify for the normal purchases and normal sales exception that is allowed for contracts that are probable of delivery in the normal course of business and, as such, are accounted for under the accrual basis and are not recorded at fair value in the Company's consolidated financial statements.

Deferred Charges and Other Assets — Deferred charges and other assets consist primarily of assets held to compensate employees in the future who participate in the Company's deferred compensation plan, and prepaid pension and other post-retirement benefit plans assets, which amounted to $26,442 and $43,025 as of December 31, 2023; and $24,962 and $43,827 as of December 31, 2022, respectively. The assets of the deferred compensation plan are invested in mutual funds which are carried on the consolidated balance sheet at fair market value, and changes in fair value are included in other expense (income), refer to Note 12 – *Fair Value of Financial Instruments* for further details. Refer to Note 16 – *Pension Plans and Other Post-Retirement Benefit Plans* for further information on the prepaid pension and other post-retirement benefit plan assets.

As of December 31, 2022, deferred charges and other assets also included the non-current portion of the Company's interest in three non-utility local microgrid and distributed energy projects amounting to $63,204. In October 2023, the Company entered to an agreement to sell their interests in these projects for $165,000. As of December 31, 2023, the balances associated with these projects of $63,182 are included in prepayments and other current assets in the consolidated balance sheets. In January 2024, the sale was completed. Refer to Note 3 – *Assets Held for Sale and Dispositions* for further details.

Income Taxes — The Company accounts for some income and expense items in different time periods for financial and tax reporting purposes. Deferred income taxes are provided on specific temporary differences between the tax basis of the assets and liabilities, and the amounts at which they are carried in the consolidated financial statements. The income tax effect of temporary differences not currently included in rates is recorded as deferred taxes with an offsetting regulatory asset or liability. These deferred income taxes are based on the enacted tax rates expected to be in effect when such temporary differences are projected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. Investment tax credits are deferred and amortized over the estimated useful lives of the related properties. Judgment is required in evaluating the Company's Federal and state tax positions. Despite management's belief that the Company's tax return positions are fully supportable, the Company establishes reserves when it believes that its tax positions are likely to be challenged and it may not fully prevail in these challenges. The Company's provision for income taxes includes interest, penalties and reserves for uncertain tax positions.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

Customers' Advances for Construction and Contributions in Aid of Construction — Utility mains, other utility property or, in some instances, cash advances to reimburse the Company for its costs to construct utility mains or other utility property, are contributed to the Company by customers, real estate developers and builders in order to extend utility service to their properties. The value of these contributions is recorded as customers' advances for construction. Over time, the amount of non-cash contributed property will vary based on the timing of the contribution of the non-cash property and the volume of non-cash contributed property received in connection with development in our service territories. The Company makes refunds on these advances over a specific period of time based on operating revenues related to the property, or as new customers are connected to and take service from the applicable water main. After all refunds are made, any remaining balance is transferred to contributions in aid of construction for our regulated water business. Contributions in aid of construction include direct non-refundable contributions and the portion of customers' advances for construction that become non-refundable. For our regulated gas business, non-refundable contributions are netted against the cost of the related utility mains or other utility property.

Based on regulatory conventions in states where the Company operates, generally our subsidiaries depreciate contributed property and amortize contributions in aid of construction at the composite rate of the related property. Contributions in aid of construction and customers' advances for construction are deducted from the Company's rate base for rate-making purposes, and therefore, no return is earned on contributed property.

Stock-Based Compensation — The Company records compensation expense in the financial statements for stock-based awards based on the grant date fair value of those awards. Stock-based compensation expense includes an estimate for pre-vesting forfeitures and is recognized over the requisite service periods of the awards on either a straight-line basis, or the graded vesting method, which is generally commensurate with the vesting term.

Fair Value Measurements – The Company follows the FASB's accounting guidance for fair value measurements and disclosures, which defines fair value and establishes a framework for using fair value to measure assets and liabilities. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access;

- Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted market prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in non-active markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

- Level 3: inputs that are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Additionally, assets that are measured at fair value using the net asset value ("NAV") per share practical expedient are not classified in the fair value hierarchy. There have been no changes in the valuation techniques used to measure fair value or asset or liability transfers between the levels of the fair value hierarchy for the years ended December 31, 2023 and 2022.

Recent Accounting Pronouncements —

Pronouncements to be adopted upon the effective date:

In December 2023, the FASB issued ASU 2023-09, *"Income Taxes (*Topic 740*): Improvements to Income Tax Disclosures"*. The ASU enhances the transparency and decision usefulness of income tax disclosures and is effective for annual periods beginning after December 15, 2024 on a prospective basis. Early adoption is permitted. The Company is currently evaluating the impact of this ASU on its consolidated financial statements and related disclosures.

In November 2023, the FASB issued ASU 2023-07 *Segment Reporting - Improving Reportable Segment Disclosures (Topic 280)*. The update is intended to improve reportable segment disclosure requirements, primarily through enhanced disclosures about significant expenses. The ASU requires disclosures to include significant segment expenses that are regularly provided to the chief operating decision maker (CODM), a description of other segment items by reportable segment, and any additional measures of a segment's profit or loss used by the CODM when deciding how to allocate resources. The ASU also requires all annual disclosures currently required by Topic 280 to be included in interim periods. The update is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted and requires retrospective application to all prior periods presented in the financial statements. The Company is currently assessing the timing and impact of adopting the updated provisions.

Pronouncements adopted during the fiscal year:

In October 2021, the FASB issued accounting guidance on accounting for acquired revenue contracts with customers in a business combination. The guidance specifies for all acquired revenue contracts, regardless of their timing of payment, the circumstances in which the acquirer should recognize contract assets and contract liabilities that are acquired in a business combination, as well as how to measure those contract assets and contract liabilities. The updated accounting guidance is effective for fiscal years beginning after December 15, 2022 with early adoption permitted. The Company adopted this guidance effective January 1, 2023, and will apply it prospectively to business combinations occurring on or after that date.

Recently issued accounting standards or pronouncements not disclosed above have been excluded as they are not relevant to the Company.

Note 2 – *Acquisitions*

Water and Wastewater Utility Acquisitions – Pending Completion

In December 2023, the Company entered into a purchase agreement to acquire North Versailles wastewater assets in North Versailles Township, Pennsylvania which serves approximately 4,400 customers for between $25,000 and $30,000.

In September 2023, the Company entered into a purchase agreement to acquire Greenville Municipal Water Authority's water system in Greenville, Pennsylvania which serves approximately 3,000 customers for $18,000.

In June 2023, the Company entered into a purchase agreement to acquire Westfield HOA wastewater assets, which serves approximately 200 customers within Westfield Homeowners Subdivision in Glenview, Illinois for $50.

In April 2023, the Company entered into a purchase agreement to acquire Greenville Sanitary Authority's wastewater utility assets, which serves approximately 2,300 customers in Greenville, Pennsylvania for $18,000.

In October 2021, the Company entered into a purchase agreement to acquire the wastewater utility assets of the City of Beaver Falls, Pennsylvania which consists of approximately 7,600 customers for $41,250.

The purchase price for each of these pending acquisitions is subject to certain adjustments at closing, and is subject to regulatory approval, including the final determination of the fair value of the rate base acquired. We plan to finance the purchase price of these acquisitions by utilizing our revolving credit facility until permanent debt and common equity are secured. These pending acquisitions are expected to close in 2024 or 2025. Closing for our utility acquisitions are subject to the timing of the respective regulatory approval processes.

DELCORA Purchase Agreement

In September 2019, the Company entered into a purchase agreement to acquire the wastewater utility system assets of the Delaware County Regional Water Quality Control Authority ("DELCORA"), which consists of approximately 16,000 customers, or the equivalent of 198,000 retail customers, in 42 municipalities in Southeast Pennsylvania for $276,500. There are several legal proceedings involving the Company as a result of the purchase agreement:

- In 2020, Delaware County, Pennsylvania (the "County") filed a lawsuit alleging that DELCORA did not have the legal authority to establish and fund a customer trust with the net proceeds of the transaction (the "County Lawsuit"). In 2020, the judge in the Delaware County Court lawsuit issued an order that (1) the County cannot interfere with the purchase agreement between DELCORA and the Company; (2) the County cannot terminate DELCORA prior to the closing of the transaction; and (3) the establishment of the customer trust was valid. The County appealed this decision to the Commonwealth Court of Pennsylvania. On March 3, 2022, the Commonwealth Court issued a decision finding that the County can dissolve DELCORA if it so chooses, but the purchase agreement must be upheld regardless of who is operating the system. The case was remanded back to the trial court for the entry of an order consistent with the Commonwealth Court's opinion and the order was issued in September 2022 ("Remand Order"). Since then, the County has challenged the Remand Order that has resulted in the Remand Order being on appeal to the Commonwealth Court. The Commonwealth Court has scheduled oral argument on this appeal for April 2024.

- On January 25, 2023, DELCORA filed in the Delaware Court of Common Pleas a complaint for Declaratory Judgment against the Company and the County seeking resolution of whether the County Ordinance dissolving DELCORA is a final action prohibiting DELCORA from carrying out the material transaction of the Asset Purchase Agreement and, in the event that DELCORA retains the ability to close the transaction, whether DELCORA is permitted to exist as a trust (the "DELCORA Complaint"). The Company filed preliminary objections to the DELCORA complaint, which were scheduled for a hearing on October 12, 2023. However, prior to the scheduled hearing, the Court notified the parties that the hearing was canceled and would be re-listed after the parties receive the benefit of the Commonwealth Court's decision on the appeal addressed above.

The administrative law judges ("ALJ") in the regulatory approval process (the "PUC Process") recommended that the Company's application to acquire DELCORA be denied, and subsequently, the Company provided exceptions to the recommended decision. On March 30, 2021, the Pennsylvania Public Utility Commission ("PUC") ruled that the case be remanded back to the ALJ and vacated the original administrative law judges' recommended decision ("2021 Order"). This 2021 Order was also appealed to the Commonwealth Court by the County on April 29, 2021. A decision was issued by the Commonwealth Court on September 12, 2022, which dismissed the appeal of the County.

- After the PUC issued the 2021 Order, on April 16, 2021, the ALJ issued an order staying the proceeding until the County Lawsuit is final and unappealable. On March 25, 2022, the Company sent a letter notifying the PUC of the March 3, 2022, Commonwealth Court decision (that originated in Delaware County Court of Common Pleas) and requested that the PUC move forward with processing the application. On July 14, 2022, the Commission moved to lift the stay imposed by the ALJ, and required the ALJ to establish a schedule on remand for the proceeding. The ALJ established a procedural schedule for the remand proceeding, which was subsequently stayed.

- On August 17, 2022, the Receiver for the City of Chester filed suit in Delaware County Common Pleas Court against DELCORA premised upon the claimed reversionary interest of the City of Chester in some of DELCORA's assets. The Company intervened in that matter and filed preliminary objections. Following a hearing on the Company's preliminary objections, the Receiver for the City of Chester discontinued the case without prejudice.

- On January 26, 2023, several parties involved in the PUC case filed a joint motion for stay based on the DELCORA Complaint and referenced the City of Chester's bankruptcy filing in which the City of Chester has asserted reversionary contract interests regarding some of DELCORA's wastewater assets. On February 6, 2023, the ALJ stayed the PUC Process.

- On May 23, 2023, the United States Bankruptcy Court issued an order in the City of Chester's bankruptcy filing staying the PUC Process until relief from the stay is granted by the Bankruptcy Court. The Company appealed the Bankruptcy Court stay order to the United States District Court for the Eastern District of Pennsylvania and is awaiting the Court decision whether oral argument will be scheduled or a decision rendered based solely on the briefing.

- On June 16, 2023, the Company filed a Complaint against DELCORA in the Delaware County Court of Common Pleas requesting a declaratory judgment and injunctive relief regarding breach of the Asset Purchase Agreement in acting outside the ordinary course of business by attempting to enter into a new agreement with Philadelphia Water Department ("PWD") for the treatment of wastewater without the Company's consent. DELCORA filed an answer, new matter and counterclaim against the Company, alleging that the Company has tortiously interfered with DELCORA's contract with PWD. The Company filed preliminary objections to the counterclaim, and DELCORA filed an amended counterclaim. The Company filed preliminary objections to the amended counterclaim, and on October 9, 2023, DELCORA filed a second amended counterclaim, to which the Company filed preliminary objections. The preliminary objections remain pending before the Court.

The purchase price for this pending acquisition is subject to certain adjustments at closing, and is subject to regulatory approval, including the final determination of the fair value of the rate base acquired. We plan to finance the purchase price of this acquisition with a mix of equity and debt financing, utilizing our revolving credit facility until permanent debt is secured. Closing of our acquisition of DELCORA is subject to the timing of the above-described regulatory approval process and on-going litigation.

Water and Wastewater Utility Acquisitions - Completed

In July 2023, the Company completed the following water utility asset acquisitions: Shenandoah Borough, Pennsylvania, which serves approximately 2,900 customers for $12,291; La Rue, an Ohio municipality, which serves approximately 300 customers for $2,253; and, Southern Oaks Water System, which serves approximately 800 customers in Texas for $3,321. Additionally, in July 2023, the Company completed their acquisition of a portion of the water and wastewater utility assets of the Village of Frankfort, an Illinois municipality, which serves approximately 1,500 customers for $1,424.

In June 2023, the Company acquired the wastewater utility assets of Union Rome, Ohio, which serves approximately 4,300 customers for a cash purchase price of $25,547.

In March 2023, the Company acquired the North Heidelberg Sewer Company in Berks County, Pennsylvania, which serves approximately 300 customer connections for a cash purchase price of $136.

In November 2022, the Company acquired certain water utility assets of Oak Brook, Illinois, which serve 2,037 customers for a cash purchase price of $12,500.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

On July 29, 2022, the Pennsylvania Public Utility Commission issued an order (the "PUC Order") approving the Company's acquisition of the municipal wastewater assets of East Whiteland Township, Chester County, Pennsylvania, which serves 4,018 customers (the "East Whiteland Wastewater Assets"). On August 12, 2022, the Company acquired the East Whiteland Wastewater Assets for a cash purchase price of $54,374. Subsequently on August 25, 2022, the Office of Consumer Advocate ("OCA") filed an appeal of the PUC Order to the Pennsylvania Commonwealth Court. On July 31, 2023, a decision was issued by the Pennsylvania Commonwealth Court, in which the Pennsylvania Commonwealth Court agreed with the OCA and reversed the PUC order which approved the acquisition. On September 26, 2023, the Pennsylvania Commonwealth Court denied our motion for reargument. On October 26, 2023, the Company, the Pennsylvania Public Utility Commission, and East Whiteland Township filed an appeal to the Pennsylvania Supreme Court. East Whiteland Township filed to Supplement its Petition for Allowance of Appeal on January 2, 2024. On January 16, 2024, the Company, the OCA and the PUC filed Answers to East Whiteland Township's Petition. The Company is currently waiting to see if the Supreme Court will grant allocatur. Management believes the final resolution of this matter is not expected to have a material adverse effect on the Company's financial position, results of operations, or cash flows.

In March 2022, the Company acquired the wastewater system of Lower Makefield Township, which serves 11,323 customer connections in Lower Makefield, Falls, and Middletown townships, and Yardley Borough, Bucks County, Pennsylvania, for a cash purchase price of $53,000. The purchase price allocation for these acquisitions consisted primarily of property, plant and equipment.

In August 2021, the Company acquired the water utility system assets of The Commons Water Supply, Inc., which serves 992 customers in Harris County, Texas, and the wastewater utility system assets of the Village of Bourbonnais, which serves approximately 6,500 customers in Kankakee County, Illinois. The total cash purchase prices for these utility systems were $4,000 and $32,100, respectively. The purchase price allocation for these acquisitions consisted primarily of property, plant and equipment.

The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for these utility systems acquired in 2023 are $3,290.

The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired in 2022 were $18,039 in 2023 and $11,393 in 2022.

The operating revenues included in the consolidated financial statements of the Company during the period owned by the Company for the utility systems acquired in 2021 were $7,930 in 2023, $7,421 in 2022, and $2,462 in 2021.

The pro forma effect of the utility systems acquired is not material either individually or collectively to the Company's results of operations.

Note 3 – *Assets Held for Sale and Dispositions*

In December 2022, the Company entered into a definitive agreement with Hope Gas, Inc. for the sale of its regulated natural gas utility assets in West Virginia, which served approximately 13,000 customers or about 2% of the Company's regulated natural gas customers ("Peoples Gas West Virginia"). The Peoples Gas West Virginia sale closed on October 1, 2023 for an estimated purchase price of $39,965, subject to working capital and other adjustments. The sale of Peoples Gas West Virginia had no major effect on the Company's operations and did not meet the requirements to be classified as discontinued operations. The assets and liabilities of Peoples Gas West Virginia were reported as held for sale in the accompanying consolidated balance sheet, and consist of the following as of December 31, 2022.

Inventory - gas stored	$	2,807
Other current assets		3,284
Regulatory assets		5,076
Current assets held for sale	$	11,167
Property, plant and equipment, net		30,267
Regulatory assets and other		1,857
Non-current assets held for sale	$	32,124
Current liabilities related to assets held for sale	$	3,263
Regulatory liabilities		649
Other long-term liabilities		325
Non-current liabilities related to assets held for sale	$	974

In October 2023, the Company entered into an agreement to sell its interest in three non-utility local microgrid and distributed energy projects for $165,000. As of December 31, 2023, balances associated with these projects are included in prepayments and other current assets in the consolidated balance sheets totaling $63,182. As of December 31, 2022, balances associated with these projects are included in deferred charges and other assets, and prepayments and other current assets, amounting to $63,204 and $2,517, respectively. The sale was subject to various closing conditions and regulatory approvals and was completed in January 2024. The sale of these projects had no major effect on the Company's operations and did not meet the requirements to be classified as discontinued operations.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

As of December 31, 2023, the Company's utility customers are located principally in the following states: 66% in Pennsylvania, 9% in Ohio, 6% in North Carolina, 5% in Texas, and 5% in Illinois. No single customer accounted for more than one percent of the Company's utility operating revenues during the years ended December 31, 2023, 2022, and 2021. The following table summarizes the changes in the Company's allowance for doubtful accounts:

	2023	2022	2021
Balance at January 1,	$ 63,981	$ 58,073	$ 40,099
Amounts charged to expense	23,209	27,631	27,336
Accounts written off	(27,759)	(22,507)	(19,731)
Recoveries of accounts written off and other (a)	1,142	784	10,369
Balance at December 31,	$ 60,573	$ 63,981	$ 58,073

(a) Recoveries of accounts written off and other in 2021 includes measurement period adjustments of $12,851 from the Peoples Gas Acquisition before the measurement period ended.

Note 6 – *Regulatory Assets and Liabilities*

Regulatory assets represent costs that are probable to be fully recovered from customers in future rates while regulatory liabilities represent amounts that are expected to be refunded to customers in future rates or amounts recovered from customers in advance of incurring the costs. Except for income taxes and utility plant retirement costs, regulatory assets and regulatory liabilities are excluded from the Company's rate base and do not earn a return. The components of regulatory assets and regulatory liabilities are as follows:

	December 31, 2023		December 31, 2022	
	Regulatory Assets	Regulatory Liabilities	Regulatory Assets	Regulatory Liabilities
Income taxes	$ 1,553,111	$ 599,088	$ 1,164,294	$ 571,110
Purchased gas costs	21,019	29,807	15,435	28,955
Utility plant retirement costs	38,148	68,815	36,440	64,212
Post-retirement benefits	80,000	153,816	51,810	142,390
Accrued vacation	1,877	-	3,231	-
Water tank painting	17,044	-	10,385	-
Fair value adjustment of long-term debt assumed in acquisition	38,482	-	49,954	-
Debt refinancing	12,674	-	13,906	-
Rate case filing expenses and other	33,617	654	16,570	7,363
	$ 1,795,972	$ 852,180	$ 1,362,025	$ 814,030

Items giving rise to deferred state income taxes, as well as a portion of deferred Federal income taxes related to specific differences between tax and book depreciation expense, are recognized in the rate setting process on a cash basis or as a reduction in current income tax expense and will be recovered as they reverse. Amounts include differences that arise between specific utility asset improvement costs capitalized for book and deducted as an expense for tax purposes. Additionally, the recording of AFUDC for equity funds results in the recognition of a regulatory asset for income taxes, which represents amounts due related to the revenue requirement. The Company records regulatory assets when a valuation allowance is recorded on deferred tax assets, associated with state NOLs that the Company does not believe are more likely than not to be realized, and are expected to be fully recovered from customers in future rates. Regulatory liabilities are refundable in future rate filings based on the difference between the amount of the income tax benefits that were incorporated into the Company's cost of service in its latest rate case as compared to the actual income tax benefits recognized.

A portion of the regulatory liability for income taxes is related to Aqua Pennsylvania's income tax accounting change for the tax benefits realized on the Company's 2012 tax return, which have not yet reduced current income tax expense due to a rate order requiring a ten year amortization period which began in 2013. Beginning in 2013, the Company amortized $38,000, annually, of its deferred income tax benefits, which reduced current income tax expense. In 2022, the

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

amortization period for this regulatory liability was extended for an additional three years. A portion of the income taxes regulatory liability is also related to Peoples Natural Gas' income tax accounting change for the tax benefits expected to be realized for the periods prior to adoption on March 16, 2020. The Company recorded a regulatory liability for this catch-up adjustment in the amount of $160,655 in 2020, and it remained on the consolidated balance sheet as of December 31, 2020. In May 2021, the Company received a regulatory order directing the Company to refund the catch-up adjustment to its utility customers over a five-year period, which was initiated by the Company in August 2021. In 2022, the Company made a similar change for its Peoples Gas and Aqua New Jersey subsidiaries, resulting in the recognition of a regulatory liability for each of these subsidiaries for the tax benefits prior to the year of adoption.

The regulatory asset or liability for purchased gas costs reflects the differences between actual purchased gas costs and the levels of recovery for these costs in current rates. The unrecovered costs are recovered and the over-recovered costs are refunded in future periods, typically within a year, through quarterly and annual filings with the applicable state regulatory agency.

The regulatory asset for utility plant retirement costs, including cost of removal, represents costs already incurred that are expected to be recovered in future rates over a five year recovery period. The regulatory liability for utility plant retirement costs represents amounts recovered through rates during the life of the associated asset and before the costs are incurred.

The regulatory asset for accrued vacation represents costs that would otherwise be charged to operations and maintenance expense for vacation that is earned by employees, which is recovered as a cost of service.

The regulatory asset for post-retirement benefits, which includes pension and other post-retirement benefits, primarily reflects a regulatory asset that has been recorded for the costs that would otherwise be charged to stockholders' equity for the underfunded status of the Company's pension and other post-retirement benefit plans. The Company also has a regulatory asset related to post-retirement benefits costs that represent costs already incurred which are now being or anticipated to be recovered in rates over a period ranging from approximately 10 to 37 years. The regulatory liability for post-retirement benefits represents costs recovered in rates in excess of post-retirement benefits expense.

Expenses associated with water tank painting are deferred and amortized over a period of time as approved in the regulatory process. Water tank painting costs are generally being amortized over a period ranging from 10 to 20 years. The regulatory liability for water tank painting costs represents amounts recovered through rates and before the costs are incurred.

The Company recorded a fair value adjustment for fixed rate, long-term debt assumed in acquisitions that matures in various years ranging from 2024 to 2033. The regulatory asset or liability results from the rate setting process continuing to recognize the historical interest cost of the assumed debt.

The regulatory asset for debt refinancing represents a portion of a make whole payment of $25,237 incurred in 2019 for the Company's redemption of $313,500 of the Company's outstanding notes that had maturities ranging from 2019-2037 and interest rates ranging from 3.57-5.83%. The Company deferred a portion of the make whole payment as it represents an amount by which we expect to receive prospective rate recovery.

The regulatory asset related to rate case filing expenses and other represents the costs associated with filing for rate increases that are deferred and amortized over periods that generally range from one year to five years, and costs incurred by the Company for which it has received or expects to receive rate recovery. Other regulatory assets also include the financial impacts of customer-owned lead service line replacement costs and regulatory balancing accounts. Regulatory balancing accounts represent the difference between revenues recognized and authorized revenue requirements until they are recovered from customers, and low-income customer assistance programs.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

The regulatory asset related to the costs incurred for information technology software projects and water main cleaning and relining projects are described in Note 1 – *Summary of Significant Accounting Policies – Property, Plant and Equipment and Depreciation*.

Note 7 – *Income Taxes*

Income tax benefit for the years ended December 31, is comprised of the following:

	Years Ended December 31,		
	2023	2022	2021
Current:			
Federal	$ 1,913	$ -	$ (5,132)
State	11,487	8,716	4,034
	13,400	8,716	(1,098)
Deferred:			
Federal	(103,617)	(8,258)	3,036
State	23,772	(14,787)	(11,550)
	(79,845)	(23,045)	(8,514)
Total income tax benefit	$ (66,445)	$ (14,329)	$ (9,612)

The statutory Federal tax rate is 21% for 2023, 2022, and 2021. For states with a corporate net income tax, the state corporate net income tax rates range from 2.5% to 9.99% for all years presented. The Company's effective income tax rate for 2023, 2022, and 2021 was (15.4)%, (3.2)%, and (2.3)%, respectively. The Company remains subject to examination by federal and state tax authorities for the 2020 through 2023 tax years.

The differences between income taxes expected at the federal statutory rate and the reported income tax benefit are described below:

	Years Ended December 31,		
	2023	2022	2021
Computed Federal tax expense at statutory rate	$ 90,674	$ 94,691	$ 88,620
Decrease in Federal tax expense related to the flow through benefit of repair deductions	(117,370)	(72,302)	(58,929)
Amortization of deferred benefit from repair method changes	(18,454)	(21,012)	(15,155)
State income taxes, net of Federal tax benefit	(15,115)	(3,972)	(4,132)
Amortization of excess deferred income taxes	(8,324)	(8,425)	(11,715)
Impact of acquisitions and reorganizations	-	-	(4,632)
Net change in unrecognized tax benefit	(4,796)	718	2,270
Valuation allowance for deferred tax assets	8,148	-	-
Other, net	(1,208)	(4,027)	(5,939)
Actual income tax benefit	$ (66,445)	$ (14,329)	$ (9,612)

A valuation allowance for state deferred tax assets in the amount of $10,969 is included in state income taxes, net of federal tax benefit above.

Certain prior year amounts have been reclassified for consistency with the current year presentation.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

In 2012, Aqua Pennsylvania changed its tax method of accounting for qualifying utility system repairs, which provides for a tax deduction for qualifying utility asset improvement costs that were previously being capitalized and depreciated for book and tax purposes. In compliance with a rate order issued by the Pennsylvania Public Utility Commission, the tax deduction is accounted for using a flow-through method of accounting for income tax benefits, which results in a reduction in current income tax expense through the recognition of income tax benefits due to the income tax accounting method change.

In 2019, the Pennsylvania Public Utility Commission issued a rate order to Aqua Pennsylvania and commencing in 2020, the base rates were designed to include annual tax benefits for qualifying utility system improvement costs equal to a deduction of $158,865, subject to a $3,000 collar either above or below this target amount. In May 2022, Aqua Pennsylvania received a rate order that adjusted this target to $159,060 and revised the collar amount to $4,000, beginning with the 2022 fiscal year. To the extent actual tax benefits are outside this range, tax benefits will either be deferred or accrued, and settled in the next rate filing.

In March 2020 and June 2022, the Company filed applications for automatic tax accounting method changes for certain qualifying infrastructure investments at its Peoples Natural Gas and Peoples Gas Company subsidiaries, respectively. These method changes result in tax deductions for qualifying utility asset improvement costs that were formerly capitalized for tax purposes. The Company uses the flow-through method to account for these timing differences.

For Peoples Natural Gas, the Company calculated the income tax benefits for qualifying capital expenditures made prior to the date of its acquisition on March 16, 2020 (“catch-up adjustment”) and recognized a regulatory liability of $160,655 for these income tax benefits. On May 6, 2021, the Pennsylvania Public Utility Commission approved a settlement order which stipulates, among other points, that the catch-up adjustment be provided by a surcredit to utility customers over a five-year period beginning August 2021, and the Company can continue to use flow-through accounting for the current tax repair benefit until its next base rate case. For each year in 2023 and 2022, there was a $22,848 reduction to income tax expense to reflect the benefit to Peoples Natural Gas customers through the surcredit. For Peoples Gas Company, the Company calculated the catch-up adjustment from periods prior to the 2021 tax year and recognized a regulatory liability of $13,808 for these income tax benefits.

On its 2022 tax return, both the Peoples Natural Gas and Peoples Gas Divisions filed for accounting method changes to deduct costs incurred for mandatory relocations. The Company calculated the catch-up adjustment from periods prior to the 2022 tax year and recognized a regulatory liability of $14,251 for their income tax benefits. In addition, the Peoples Natural Gas and Peoples Gas Divisions intend to file an accounting method change on its 2023 tax return to adopt the Internal Revenue Service Revenue Procedure 2023-15, a natural gas safe harbor that was issued in April 2023 to determine the amount of tax-deductible repairs. In the fourth quarter, the Company updated its calculation of the catch-up adjustment that should be returned to customers for periods prior to March 16, 2020 for the Peoples Natural Gas Division, and periods prior to the 2021 tax year for the Peoples Gas Division and deferred an additional tax benefit of $25,883 and $7,785, respectively. The Company will file an updated tax repair surcredit calculation with the Pennsylvania Public Utility Commission to determine the treatment of these tax benefits when the final calculations of the deductions have been determined.

The following table provides the changes in the Company’s unrecognized tax benefits:

	2023	2022	2021
Balance at January 1,	$ 18,217	$ 20,201	$ 19,194
Impact of current year activity	7,219	(900)	1,007
Effect of Pennsylvania tax rate change	-	(1,084)	-
Decrease for prior year tax positions	(17,538)	-	-
Balance at December 31,	$ 7,898	$ 18,217	$ 20,201

The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. From time to time, the Company may be assessed interest and penalties by taxing authorities, which would be recorded as income tax expense. During the years ended December 31, 2023, 2022, and 2021, there were expenses of $23, $118, and $409 for interest and penalties related to uncertain tax positions. As of December 31, 2023 and 2022 the Company recognized liabilities of $144 and $620, respectively, for interest and penalties related to its uncertain tax positions.

On its 2012 Federal tax return, filed in September 2013, Aqua Pennsylvania filed a change in accounting method to adopt the IRS temporary tangible property regulations. This method change allowed the Company to take a current year deduction for expenses that were previously capitalized for tax purposes. Since the filing of the 2012 tax return, the IRS has issued final regulations. While the Company maintains the belief that the deduction taken on its tax return is appropriate, the methodology for determining the deduction has not been agreed to by the taxing authorities. Provisions for uncertain tax positions were recorded to reflect the possible challenge of the Company's methodology for determining its repair deduction as required by the FASB's accounting guidance for income taxes. Should the taxing authority challenge the Company's tax treatment, and ultimately disallow a portion of the repair deduction, the Company expects Federal net operating loss carryforwards to offset any resulting liability, and state net operating loss carryforwards will offset a portion of any resulting liability.

The unrecognized tax benefits relate to the income tax accounting change, and the tax position is attributable to a temporary difference. The Company does not anticipate material changes to its unrecognized tax benefits within the next year. As a result of the regulatory treatment afforded by the income tax accounting change in Pennsylvania and despite this position being a temporary difference, as of December 31, 2023 and 2022, $6,918 and $35,267, respectively, of these tax benefits would have an impact on the Company's effective income tax rate in the event the Company does sustain all, or a portion, of its tax position.

In April 2023, the Internal Revenue Service issued Revenue Procedure 2023-15 which provides a safe harbor method of accounting that taxpayers may use to determine whether expenses to repair, maintain, replace, or improve natural gas transmission and distribution property must be capitalized for tax purposes. The Company evaluated the safe harbor and intends to adopt the methodology on its 2023 tax return. In the second quarter of 2023, based on the tax legislative guidance that was issued, the Company reevaluated the uncertain tax positions related to the Regulated Water Segment and ultimately released a portion of its historical income tax reserves. Concurrently, the Company deferred this tax benefit from the reserve release as a regulatory liability, as the accounting treatment is expected to be determined in the next rate case.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

The following table provides the components of net deferred tax liability:

	December 31, 2023	December 31, 2022
Deferred tax assets:		
Customers' advances for construction	$ 20,332	$ 27,009
Costs expensed for book not deducted for tax, principally accrued expenses	29,135	23,585
Post-retirement benefits	1,368	-
Tax effect of regulatory liabilities for post-retirement benefits	49,199	41,602
Tax attributes and credit carryforwards	458,001	235,838
Operating lease liabilities	11,529	13,558
Other	1,378	9,613
	570,942	351,205
Less valuation allowance	(149,486)	(38,940)
	421,456	312,265
Deferred tax liabilities:		
Utility plant, principally due to depreciation and differences in the basis of fixed assets due to variation in tax and book accounting	1,662,741	1,495,526
Deferred taxes associated with the gross-up of revenues necessary to recover, in rates, the effect of temporary differences	348,646	128,975
Post-retirement benefits	-	6,130
Operating lease right-of-use assets	10,301	12,250
Tax effect of regulatory assets for post-retirement benefits	28,092	15,150
	2,049,780	1,658,031
Net deferred tax liability	$ 1,628,324	$ 1,345,766

Certain prior year amounts have been reclassified for consistency with the current year presentation.

At December 31, 2023, the Company has cumulative Federal NOLs of $1,280,694. The Company believes the Federal NOLs are more likely than not to be recovered and require no valuation allowance. The Company's Federal NOLs will begin to expire in 2032.

At December 31, 2023, the Company has a cumulative state NOL of $2,534,987, a portion of which is offset by a valuation allowance from previous years. During the fourth quarter of 2023, the Company determined that it does not believe a portion of its Regulated natural gas segment state NOLs are more likely than not to be realized due to its continuous investments in qualifying infrastructure resulting in the recording of a valuation allowance of $1,381,943. The Company recorded a regulatory asset for the portion of the valuation allowance that is expected to be fully recovered from customers in future rates. At December 31, 2023, the Company has a cumulative state valuation allowance of $1,950,378. The state NOL began expiring in 2023.

At December 31, 2023, the Company's Federal and state NOL carryforwards are reduced by an unrecognized tax position, on a gross basis, of $18,264 and $13,566, respectively, which results from the Company's presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amounts of the Company's Federal and state NOL carryforwards prior to being reduced by the unrecognized tax positions are $1,262,430 and $2,521,421, respectively. The Company records its unrecognized tax benefit as a component of its net deferred income tax liability.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

At December 31, 2023, the Company has a cumulative Federal charitable contribution of $48,014, of which a valuation allowance of $38,798 has been recorded as the Company determined it is more likely than not they will expire before they are utilized within the carryforward period.

At December 31, 2023, the Company has a cumulative state charitable contribution of $77,263 of which a valuation allowance of $71,354 has been recorded as the Company does not believe these state charitable contributions are more likely than not to be realized.

On August 16, 2022, the Inflation Reduction Act of 2022 ("IRA") was enacted into law, which among other things, implements a 15% minimum tax on book income of certain large corporations, and a 1% excise tax on net stock repurchases after December 31, 2022. The alternative minimum tax would not be applicable in our next fiscal year because it is based on a three-year average annual adjusted financial statement income in excess of $1,000,000. We are continuing to assess the future impact of the provisions of the IRA on our consolidated financial statements. As a regulated utility, taxes have been traditionally recognized by state public utility commissions as appropriate for inclusion in establishing rates.

On July 8, 2022, Pennsylvania enacted House Bill 1342 into law, which among other things, reduces Pennsylvania's corporate income tax rate from 9.99% to 8.99% beginning January 1, 2023, and an additional 0.5% annually through 2031, when it reaches to 4.99%. For the year ended December 31, 2022, the Company evaluated the impacts of the tax rate change and recorded a reduction to our deferred tax liabilities of $244,537 with a corresponding reduction primarily to our regulatory assets.

Note 8 – *Taxes Other than Income Taxes*

The following table provides the components of taxes other than income taxes:

	Years Ended December 31,		
	2023	2022	2021
Property	$ 32,790	$ 33,703	$ 33,946
Gross receipts, excise and franchise	17,985	16,828	15,777
Payroll	21,628	21,343	21,789
Regulatory assessments	7,451	6,771	6,968
Pumping fees	6,405	7,881	5,761
Other	3,949	3,498	2,400
Total taxes other than income taxes	$ 90,208	$ 90,024	$ 86,641

Note 9 – *Commitments and Contingencies*

Commitments –

The Company maintains agreements with other water purveyors for the purchase of water to supplement its water supply, particularly during periods of peak demand. The agreements stipulate purchases of minimum quantities of water to the year 2029. The estimated annual commitments related to such purchases through 2028 are expected to average $3,397, and the aggregate of the years remaining approximates $1,081.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

The Company has entered into purchase obligations, in the ordinary course of business, that include agreements for water treatment processes at some of its wells in a small number of its divisions. The 20 year term agreement provides for the use of treatment equipment and media used in the treatment process and are subject to adjustment based on changes in the Consumer Price Index. The future contractual cash obligations related to these agreements are as follows:

2024	2025	2026	2027	2028	Thereafter
$ 1,136	$ 1,151	$ 1,176	$ 1,203	$ 1,230	$ 1,733

The Company's natural gas supply is provided by sources on the interstate pipeline system and from local western Pennsylvania gas well production. The Company has various interstate pipeline service agreements that provide for firm transportation capacity, firm storage capacity, and other services and include capacity reservation charges based upon the maximum daily and annual contract quantities set forth in the agreements. Some of these agreements have minimum volume obligations and are transacted at applicable tariff and negotiated rates to the year 2034. The estimated annual commitments related to such purchases through 2028 are expected to average $232,760, and the aggregate of the years remaining beyond 2028 approximates $1,355,659.

The purchased water, water treatment, and purchased gas expenses under these agreements were as follows:

	Years Ended December 31,		
	2023	2022	2021
Purchased water under long-term agreements	$ 6,752	$ 5,559	$ 5,867
Water treatment expense under contractual agreement	1,103	1,061	1,017
Purchased natural gas under long-term agreements	352,306	601,995	340,262

Contingencies – The Company is routinely involved in various disputes, claims, lawsuits and other regulatory and legal matters, including both asserted and unasserted legal claims, in the ordinary course of business. The status of each such matter, referred to herein as a loss contingency, is reviewed and assessed in accordance with applicable accounting rules regarding the nature of the matter, the likelihood that a loss will be incurred, and the amounts involved. As of December 31, 2023, the aggregate amount of $24,643 is accrued for loss contingencies and is reported in the Company's consolidated balance sheet as other accrued liabilities and other liabilities. These accruals represent management's best estimate of probable loss (as defined in the accounting guidance) for loss contingencies or the low end of a range of losses if no single probable loss can be estimated. For some loss contingencies, the Company is unable to estimate the amount of the probable loss or range of probable losses. Further, Essential Utilities has insurance coverage for certain of these loss contingencies, and as of December 31, 2023, estimates that approximately $1,340 of the amount accrued for these matters are probable of recovery through insurance, which amount is also reported in the Company's consolidated balance sheet as deferred charges and other assets, net.

During a portion of 2019, the Company initiated a do not consume advisory for some of its customers in one division served by the Company's Illinois subsidiary. The do not consume advisory was lifted in 2019, and, in 2022, the water system was determined to be in compliance with the federal Lead and Copper Rule. During the third quarter of 2023, an amount was accrued for the penalty and other fees that will be paid as a result of a conditional settlement that was reached with the regulators. The settlement is the subject of court approval. In addition, on September 3, 2019, two individuals, on behalf of themselves and those similarly situated, commenced an action against the Company's Illinois subsidiary in the State court in Will County, Illinois related to this do not consume advisory. The complaint seeks class action certification, attorney's fees, and "damages, including, but not limited to, out of pocket damages, and discomfort, aggravation, and annoyance" based upon the water provided by the Company's subsidiary to a discrete service area in University Park Illinois. The complaint contains allegations of damages as a result of supplied water that exceeded the standards established by the federal Lead and Copper Rule. The complaint is in the discovery phase and class certification has not been granted. The Company has an accrual for the amount of loss asserted in the complaint that we determined to be probable and estimable of being incurred. The Company is vigorously defending against this claim. The Company submitted a claim for the expenses incurred to its insurance carrier for potential recovery of a portion of these costs and is currently in litigation with one of its carriers seeking to enforce its claims. The Company continues to assess the potential loss contingency on this matter. While the final outcome of this claim cannot be predicted with certainty, and unfavorable outcomes could negatively impact the Company, at this time in the opinion of management, the final resolution of this matter is not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows.

Although the results of legal proceedings cannot be predicted with certainty, other than disclosed above, there are no pending legal proceedings to which the Company or any of its subsidiaries is a party or to which any of its properties is the subject that are material or are expected to have a material effect on the Company's financial position, results of operations or cash flows.

In addition to the aforementioned loss contingencies, the Company self-insures a portion of its employee medical benefit program, and maintains stop-loss coverage to limit the exposure arising from these claims. The Company's reserve for these claims totaled $1,846 and $2,327 at December 31, 2023 and 2022, respectively, and represents a reserve for unpaid claim costs, including an estimate for the cost of incurred but not reported claims.

Note 10 – *Leases*

The Company leases land, office facilities, office equipment, and vehicles for use in its operations, which are accounted for as operating leases. Leases with a term of 12 months or less are not recorded on the balance sheet; rather, lease expense is recognized over the lease term. Our leases have remaining lives of 1 to 71 years.

Some of the Company's leases can be extended on a month-to-month basis, which allow us to terminate the lease at any given month without penalty while others include options to extend the leases for up to 50 years. The renewal of a month-to-month lease is at our sole discretion.

The Company accounts for lease and non-lease components of lease arrangements separately. For calculating lease liabilities, we may deem lease terms to include options to extend or terminate the lease when it's reasonably certain that we will exercise that option. The Company's lease agreements do not contain significant residual value guarantees, restrictions or covenants.

Lease liabilities and corresponding right-of-use assets are recorded based on the present value of the lease payments over the expected lease term, including leases with variable payments that are based on a market rate or an index and net of any impairment. All other variable payments are expensed as incurred. Since the Company's lease agreements do not provide an implicit interest rate, we utilize our incremental borrowing rate to determine the discount rate used to present value the lease payments.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

On January 6, 2022, the Company entered into an amendment to an office lease that provided for the partial termination of the Company's obligations with respect to a portion of the leased premises of approximately 37,000 rentable square feet. The Company paid a termination fee of $2,812, reduced its remaining lease payments by $1,753 and recognized a loss on the partial termination of the lease of $1,801.

During the fourth quarter of 2021, the Company determined that there were impairment indicators that required the Company to review a portion of office space that was no longer used by the Company in its operations for impairment. Accordingly, the Company performed undiscounted cash flow analyses on the related right-of-use asset group and determined that such right-of-use asset was impaired. This resulted in a non-cash impairment charge of $4,695, representing the excess of the right-of-use asset over its fair value, and is included within operations and maintenance expense in the consolidated statements of operations and comprehensive income.

	Years Ended December 31,		
	2023	2022	2021
Components of lease expense were as follows:			
Operating lease cost	$ 9,307	$ 9,359	$ 9,716

	Years Ended December 31,	
	2023	2022
Supplemental cash flow information related to leases was as follows:		
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from operating leases	$ 9,149	$ 9,270

	December 31,	
	2023	2022
Supplemental balance sheet information related to leases was as follows:		
Operating leases:		
Operating lease right-of-use assets	$ 37,416	$ 41,734
Other accrued liabilities	$ 7,360	9,316
Operating lease liabilities	34,425	37,666
Total operating lease liabilities	$ 41,785	$ 46,982

	December 31,	
	2023	2022
Weighted average remaining lease term:		
Operating leases	10.1 years	9.7 years
Weighted average discount rate:		
Operating leases	4.87%	3.42%

Maturities of operating lease liabilities and a reconciliation of the operating lease liabilities reported on our consolidated balance sheets as of December 31, 2023 are as follows:

	Operating Leases
2024	$ 9,037
2025	8,955
2026	7,211
2027	7,122
2028	6,811
Thereafter	13,902
Total operating lease payments	$ 53,038
Total operating lease payments	$ 53,038
Less operating lease liabilities	41,785
Present value adjustment	$ 11,253

Note 11 – *Long-term Debt and Loans Payable*

Long-term Debt – The consolidated statements of capitalization provide a summary of long-term debt as of December 31, 2023 and 2022. The supplemental indentures with respect to specific issues of the first mortgage bonds restrict the ability of Aqua Pennsylvania and other operating subsidiaries of the Company to declare dividends, in cash or property, or repurchase or otherwise acquire the stock of these companies. Loan agreements for Aqua Pennsylvania and other operating subsidiaries of the Company have restrictions on minimum net assets. As of December 31, 2023, restrictions on the net assets of the Company were $4,553,903 of the total $5,896,183 in net assets. Included in this amount were restrictions on Aqua Pennsylvania's net assets of $1,747,255 of their total net assets of $2,354,604. As of December 31, 2023, $2,393,249 of Aqua Pennsylvania's retained earnings of $2,413,249 and $335,892 of the retained earnings of $514,416 of other subsidiaries were free of these restrictions. Some supplemental indentures also prohibit Aqua Pennsylvania and some other subsidiaries of the Company from making loans to, or purchasing the stock of, the Company.

Sinking fund payments are required by the terms of specific issues of long-term debt. Excluding amounts due under the Company's revolving credit agreement, the future sinking fund payments and debt maturities of the Company's long-term debt are as follows:

Interest Rate Range	2024	2025	2026	2027	2028	Thereafter
0.00% to 0.99%	$ 309	$ 197	$ 179	$ 146	$ 146	$ 1,958
1.00% to 1.99%	748	759	769	780	791	3,691
2.00% to 2.99%	1,619	1,427	1,304	1,111	906	1,101,550
3.00% to 3.99%	51,710	1,178	740	208,797	416	2,176,091
4.00% to 4.99%	1,658	120,027	1,562	1,567	1,571	1,619,342
5.00% to 5.99%	10,611	202	202	202	3,202	828,326
6.00% to 6.99%	-	-	5,000	20,000	-	6,000
7.00% to 7.99%	-	23,000	-	5,125	-	-
8.00% to 8.99%	760	529	-	-	-	-
9.00% to 9.99%	-	-	11,800	-	-	-
Total	$ 67,415	$ 147,319	$ 21,556	$ 237,728	$ 7,032	$ 5,736,958

On January 8, 2024, the Company issued $500,000 of long-term debt (the "2024 Senior Notes"), less expenses of $4,610, due in 2034 with an interest rate of 5.375%. The Company used the net proceeds from the issuance of 2024 Senior Notes

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

(1) to repay a portion of the borrowings under the Company's existing five year unsecured revolving credit facility, and (2) for general corporate purposes.

In August 2023, the Company's subsidiary, Aqua Pennsylvania, issued $225,000 in aggregate principal amount of first mortgage bonds. The bonds consisted of $175,000 of 5.48% first mortgage bonds due in 2053; and $50,000 of 5.56% first mortgage bonds due in 2061. In January 2023 and October 2022, Aqua Pennsylvania issued $75,000 and $125,000 of first mortgage bonds, due in 2043 and 2052, and with interest rates of 5.60% and 4.50%, respectively. The proceeds from these bonds were used to repay existing indebtedness and for general corporate purposes.

On May 20, 2022, the Company issued $500,000 of long-term debt (the "Senior Notes"), less expenses of $5,815, due in 2052 with an interest rate of 5.30%. The Company used the net proceeds from the issuance of Senior Notes (1) to repay $49,700 of borrowings under Aqua Pennsylvania's 364-day revolving credit facility and $410,000 of borrowings under the Company's existing five year unsecured revolving credit facility, and (2) for general corporate purposes.

The weighted average cost of long-term debt at December 31, 2023 and 2022 was 4.14% and 3.94%, respectively. The weighted average cost of fixed rate long-term debt at December 31, 2023 and 2022 was 3.86% and 3.78%, respectively.

On December 14, 2022, the Company entered into a five year $1,000,000 unsecured revolving credit facility, which replaced the Company's prior five year $1,000,000 unsecured revolving credit facility. The Company's new unsecured revolving credit facility was used to repay all indebtedness and fees under our prior unsecured revolving credit facility, and for other general corporate purposes. The facility includes a $100,000 sublimit for daily demand loan. Funds borrowed under this facility are classified as long-term debt and are used to provide working capital as well as support for letters of credit for insurance policies and other financing arrangements. As of December 31, 2023, the Company has the following sublimits and available capacity under the credit facility: $100,000 letter of credit sublimit, $83,162 of letters of credit available capacity, $0 borrowed under the swing-line commitment, $263,162 was available for borrowing and $720,000 of funds borrowed under the agreement. Interest under the facility is equal to either (i) Term simple secured overnight financing rate (SOFR), plus applicable margin; or (ii) an Alternate Base Rate (which is based at the highest of the (a) New York Federal Reserve Bank rate, plus 0.5%, (b) the prime rate, and, (c) the daily SOFR, plus 1.0%,) plus applicable margin. The applicable margin for an Alternate Base Rate loan will be up to 0.5% and for a SOFR loan will be up to 1.5%, in each case depending on the debt ratings in effect as of such date. The Company may elect either the Term SOFR or the Alternate Base Rate at the time of the drawdown, and loans may be converted from one rate to another at any time, subject or certain conditions. A facility fee is charged on the total commitment amount of the agreement. Under these facilities the average cost of borrowings was 6.30% and 3.11%, and the average borrowing was $537,983 and $297,021, during 2023 and 2022, respectively.

The Company is obligated to comply with covenants under some of its loan and debt agreements. These covenants contain a number of restrictive financial covenants, which among other things limit, subject to specific exceptions, the Company's ratio of consolidated total indebtedness to consolidated total capitalization, and require a minimum level of earnings coverage over interest expense. During 2023, the Company was in compliance with its debt covenants under its loan and debt agreements. Failure to comply with the Company's debt covenants could result in an event of default, which could result in the Company being required to repay or finance its borrowings before their due date, possibly limiting the Company's future borrowings, and increasing its borrowing costs.

Loans Payable – On June 29, 2023, Aqua Pennsylvania and Peoples Natural Gas Companies amended the terms of their respective $100,000 and $300,000, 364-day revolving credit agreements, as follows: (1) extended the maturity dates to June 27, 2024; and (2) updated the adjustment on the Bloomberg Short-Term Bank Yield Index (BSBY) Rate. The funds borrowed under these agreements are classified as loans payable and are used to provide working capital.

As of December 31, 2023 and 2022, funds borrowed under the Aqua Pennsylvania revolving credit agreement were $23,123 and $20,000, respectively. Interest under this facility is based, at the borrower's option, on the prime rate, an adjusted overnight bank funding rate, or an adjusted Bloomberg Short-Term Bank Yield Index (BSBY) floating rate. This agreement restricts short-term borrowings of Aqua Pennsylvania. A commitment fee of 0.05% is charged on the total

commitment amount of Aqua Pennsylvania's revolving credit agreement. The average cost of borrowing under the facility was 5.36% and 2.40%, and the average borrowing was $19,275 and $31,555, during 2023 and 2022, respectively. The maximum amount outstanding at the end of any one month was $54,472 and $55,000 in 2023 and 2022, respectively.

As of December 31, 2023 and 2022, funds borrowed under the Peoples Natural Gas Companies revolving credit agreement were $137,000 and $208,500, respectively. Interest under this facility is based, at the borrower' option, at the prime rate, an adjusted overnight bank funding rate, or an adjusted BSBY floating rate. A commitment fee of 0.08% is charged on the total commitment amount of Peoples' revolving credit agreement. The average cost of borrowing under the facility was 5.97% and 2.30%, and the average borrowing was $78,952 and $97,458, during 2023 and 2022, respectively. The maximum amount outstanding at the end of any one month was $161,500 and $234,000 in 2023 and 2022, respectively.

At December 31, 2023 and 2022, the Company had other combined short-term lines of credit of $35,500. Funds borrowed under these lines are classified as loans payable and are used to provide working capital. As of December 31, 2023 and 2022, funds borrowed under the short-term lines of credit were $0. The average borrowing under the lines was $0 and $0 during 2023 and 2022, respectively. The maximum amount outstanding at the end of any one month was $0 and $0 in 2023 and 2022, respectively. Interest under the lines is based at the Company's option, depending on the line, on the prime rate, an adjusted Euro-Rate, an adjusted federal funds rate or at rates offered by the banks. The average cost of borrowings under all lines during 2023 and 2022 was 0% and 0%, respectively.

Interest Income and Expense– Interest income of $3,401, $3,675, and $2,384 was recognized for the years ended December 31, 2023, 2022, and 2021, respectively. Interest expense was $283,362, $238,116, and $207,709 in 2023, 2022, and 2021, including amounts capitalized for borrowed funds of $5,241, $6,047, and $4,510, respectively.

Note 12 – *Fair Value of Financial Instruments*

Financial instruments are recorded at carrying value in the financial statements and approximate fair value, with the exception of long-term debt, as of the dates presented. The fair value of these instruments is disclosed below in accordance with current accounting guidance related to financial instruments.

The fair value of loans payable is determined based on its carrying amount and utilizing Level 1 methods and assumptions. As of December 31, 2023 and 2022, the carrying amount of the Company's loans payable was $160,123 and $228,500, respectively, which equates to their estimated fair value. The fair value of cash and cash equivalents is determined based on Level 1 methods and assumptions. As of December 31, 2023 and 2022, the carrying amounts of the Company's cash and cash equivalents were $4,612 and $11,398, respectively, which equates to their fair value. The Company's assets underlying the deferred compensation and non-qualified pension plans are determined by the fair value of mutual funds, which are based on quoted market prices from active markets utilizing Level 1 methods and assumptions. As of December 31, 2023 and 2022, the carrying amount of these securities was $26,442 and $24,962, respectively, which equates to their fair value, and is reported in the consolidated balance sheet in deferred charges and other assets.

Unrealized gains and losses on equity securities held in conjunction with our non-qualified pension plan is as follows:

	Years ended December 31,		
	2023	2022	2021
Net gain (loss) recognized during the period on equity securities	$ 582	$ (895)	$ 607
Less: net gain (loss) recognized during the period on equity securities sold during the period	-	-	-
Unrealized gain (loss) recognized during the reporting period on equity securities still held at the reporting date	$ 582	$ (895)	$ 607

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

The net gain (loss) recognized on equity securities is presented on the consolidated statements of operations and comprehensive income on the line item "Other."

The carrying amounts and estimated fair values of the Company's long-term debt is as follows:

	December 31,	
	2023	2022
Carrying amount	$ 6,938,009	$ 6,617,395
Estimated fair value	5,980,722	5,528,131

The fair value of long-term debt has been determined by discounting the future cash flows using current market interest rates for similar financial instruments of the same duration utilizing level 2 methods and assumptions. The Company's customers' advances for construction have a carrying value of $128,755 and $114,732 at December 31, 2023 and 2022, respectively. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels and future rates. Portions of these non-interest bearing instruments are payable annually through 2033 and amounts not paid by the respective contract expiration dates become non-refundable. The fair value of these amounts would, however, be less than their carrying value due to the non-interest bearing feature.

Note 13 – *Stockholders' Equity*

At December 31, 2023, the Company had 600,000,000 shares of common stock authorized; par value $0.50. Shares outstanding and treasury shares held were as follows:

	December 31,		
	2023	2022	2021
Shares outstanding	273,296,037	263,737,084	252,867,623
Treasury shares	3,299,191	3,236,237	3,234,765

At-the-Market Offering

On October 14, 2022, the Company entered into at-the market sales agreements ("ATM") with third-party sales agents, under which the Company may offer and sell shares of its common stock, from time to time, at its option, having an aggregate gross offering price of up to $500,000 pursuant to the Company's effective shelf registration statement on Form S-3 (File No. 333-255235). The Company intends to use the net proceeds from the sales of shares through the ATM for working capital, capital expenditures, water and wastewater utility acquisitions, and repaying outstanding indebtedness. As of December 31, 2022, the Company issued 1,321,994 shares of common stock under the ATM for proceeds of $63,040, net of expenses. During the year ended December 31, 2023, the Company sold 8,938,839 shares of common stock, in exchange for net proceeds of $322,983, under the ATM. As of December 31, 2023, approximately $110,000 remained available for sale under the ATM.

Forward Equity Sale

In August 2020, the Company entered into a forward equity sale agreement for 6,700,000 shares of common stock with a third party (the "forward purchaser"). In connection with the forward equity sale agreement, the forward purchaser borrowed an equal number of shares of the Company's common stock from stock lenders and sold the borrowed shares to the public. The Company did not receive any proceeds from the sale of its common stock by the forward purchaser until settlement of the shares underlying the forward equity sale agreement. The actual proceeds to be received by the Company would have varied depending upon the settlement date, the number of shares designated for settlement on that settlement date and the method of settlement. The forward equity sale agreement was accounted for as an equity

instrument and was recorded at a fair value of $0 at inception. The fair value was not adjusted as the Company continued to meet the accounting requirements for equity instruments.

On August 9, 2021, the Company completely settled forward equity sale agreements by physical share settlement. The Company issued 6,700,000 shares and received cash proceeds of $299,739 at a forward price of $44.74 per share. Pursuant to the agreement, the forward price was computed based upon the initial forward price of $46.00 per share, adjusted for a floating interest rate factor equal to a specified daily rate less a spread and scheduled dividends during the term of the agreement. The Company used the proceeds received upon settlement of the forward equity sale agreement to fund general corporate purposes, including for water and wastewater utility acquisitions, working capital and capital expenditures. There are no remaining shares subject to the forward equity sale agreement.

Common Stock / Tangible Equity Unit Issuances

On April 23, 2019, the Company issued $690,000, less expenses of $16,358, of its tangible equity units (the "Units"), with a stated amount of $50 per unit. This issuance was part of the financing of the Peoples Gas Acquisition. The Company recorded the issuance of the purchase contract portion of the Units as additional paid-in-capital of $570,919, less allocable issuance costs of $13,530, in our financial statements. The Company recorded the amortizing notes portion of the Units of $119,081 as long-term debt and recorded allocable issuance costs of $2,828 as debt issuance costs.

Each Unit consisted of a prepaid stock purchase contract and an amortizing note, each issued by the Company. The amortizing notes had an initial principal amount of $8.62909, or $119,081 in aggregate, and yielded interest at a rate of 3.00% per year, and paid equal quarterly cash installments of $0.75000 per amortizing note (except for the July 30, 2019 installment payment, which was $0.80833 per amortizing note), that constituted a payment of interest and a partial repayment of principal. This cash payment in the aggregate was equivalent to 6.00% per year with respect to each $50 stated amount of the Units. The amortizing notes represented unsecured senior obligations of the Company.

Certain holders of the tangible equity units had early settled their prepaid stock purchase contracts prior to the due date, and, in exchange, the Company issued shares of its common stock. During 2022, 981,919 stock purchase contracts were early settled by the holders of the contracts prior to the mandatory settlement date, resulting in the issuance of 1,166,107 shares of the Company's common stock. On May 2, 2022, the remaining 6,621,315 stock purchase contracts were each mandatorily settled for 1.18758 shares of the Company's common stock, and in the aggregate the Company issued 7,863,354 shares of its common stock. Additionally, the final quarterly installment payment was made, which resulted in the complete pay-off of the amortizing notes.

At December 31, 2023, the Company had 1,770,819 shares of authorized but unissued Series Preferred Stock, $1.00 par value.

In April 2021, the Company filed a universal shelf registration, through a filing with the Securities and Exchange Commission ("SEC"), to allow for the potential future offer and sale by the Company, from time to time, in one or more public offerings, of an indeterminate amount of our common stock, preferred stock, debt securities and other securities specified therein at indeterminate prices.

The Company has an acquisition shelf registration statement on file with the SEC which permits the offering, from time to time, of an aggregate of $500,000 in shares of common stock and shares of preferred stock in connection with acquisitions. The balance remaining available for use under the acquisition shelf registration as of December 31, 2023 is $487,155.

The form and terms of any securities issued under the universal shelf registration statement and the acquisition shelf registration statement will be determined at the time of issuance.

The Company has a Dividend Reinvestment and Direct Stock Purchase Plan ("Plan") that allows reinvested dividends to be used to purchase shares of common stock at a five percent discount from the current market value. Under the direct stock purchase program, shares are issued throughout the year. The shares issued under the Plan are either shares purchased by the Company's transfer agent in the open-market or original issue shares. In 2023, 2022 and 2021, the Company sold 430,487, 368,278and 374,824 original issue shares of common stock through the dividend reinvestment portion of the Plan, for net proceeds of $16,005, $16,619 and $16,799, respectively.

The Company recorded a regulatory asset for its underfunded status of its pension and other post-retirement benefit plans that would otherwise be charged to other comprehensive income, as it anticipates recovery of its costs through customer rates.

Note 14 – *Net Income per Common Share and Equity per Common Share*

Basic net income per share is based on the weighted average number of common shares outstanding and the weighted average minimum number of shares issued upon settlement of the stock purchase contracts issued under the tangible equity units. Diluted net income per share is based on the weighted average number of common shares outstanding and potentially dilutive shares. The dilutive effect of employee stock-based compensation and shares issuable under the forward equity sale agreement (from the date the Company entered into the forward equity sale agreement to the settlement date) are included in the computation of diluted net income per common share. The dilutive effect of stock-based compensation and shares issuable under the forward equity sale agreement are calculated by using the treasury stock method and expected proceeds upon exercise or issuance of the stock-based compensation and settlement of the forward equity sale agreement. The treasury stock method assumes that the proceeds from stock-based compensation and settlement of the forward equity sale agreement are used to purchase the Company's common stock at the average market price during the period. The following table summarizes the shares, in thousands, used in computing basic and diluted net income per share:

	Years ended December 31,		
	2023	2022	2021
Average common shares outstanding during the period for basic computation	267,171	262,246	257,487
Effect of dilutive securities:			
Forward equity sale agreement	-	-	189
Employee stock-based compensation	488	622	504
Average common shares outstanding during the period for diluted computation	267,659	262,868	258,180

The number of outstanding employee stock options that were not included in the diluted earnings per share calculation because the effect would have been anti-dilutive was 148,725 and 77,506 for the year ended December 31, 2023 and 2022, respectively. For the year ended December 31, 2021 , all of the Company's employee stock options were included in the calculation of diluted net income per share as the calculated cost to exercise the stock options was less than the average market price of the Company's common stock during these periods. Additionally, the dilutive effect of performance share units and restricted share units granted are included in the Company's calculation of diluted net income per share.

On May 2, 2022, all of the remaining stock purchase contracts under the tangible equity units were mandatorily settled. For the year ended December 31, 2022, the weighted average impact of 2,932,010 shares was included in the basic computation of the average common shares outstanding based on the number of shares that were issued upon settlement of the stock purchase contracts under the tangible equity units. For the year ended December 31, 2021, the minimum settlement amount of the stock purchase contracts under the tangible equity units of 9,041,687 shares was considered outstanding for the basic computation of the average common shares outstanding.

Equity per common share was $21.57 and $20.39 at December 31, 2023 and 2022, respectively. These amounts were computed by dividing Essential Utilities stockholders' equity by the number of shares of common stock outstanding at the end of each year.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

Note 15 – *Employee Stock and Incentive Plan*

Under the Company's Amended and Restated Equity Compensation Plan, (the "Plan") approved by the Company's shareholders on May 2, 2019, to replace the 2004 Equity Compensation Plan, stock options, stock units, stock awards, stock appreciation rights, dividend equivalents, and other stock-based awards may be granted to employees, non-employee directors, and consultants and advisors. The Plan authorizes 6,250,000 shares for issuance under the plan. A maximum of 3,125,000 shares under the Plan may be issued pursuant to stock award, stock units and other stock-based awards, subject to adjustment as provided in the Plan. During any calendar year, no individual may be granted (i) stock options and stock appreciation rights under the Plan for more than 500,000 shares of common stock in the aggregate or (ii) stock awards, stock units or other stock-based awards under the Plan for more than 500,000 shares of Company stock in the aggregate, subject to adjustment as provided in the Plan. Awards to employees and consultants under the Plan are made by a committee of the Board of Directors, except that with respect to awards to the Chief Executive Officer, the committee recommends those awards for approval by the non-employee directors of the Board of Directors. In the case of awards to non-employee directors, the Board of Directors makes such awards. At December 31, 2023, 1,527,080 shares were still available for issuance under the Plan. No further grants may be made under the Company's 2004 Equity Compensation Plan.

Performance Share Units – During 2023, 2022 and 2021, the Company granted performance share units. A performance share unit ("PSU") represents the right to receive a share of the Company's common stock if specified performance goals are met over the three-year performance period specified in the grant, subject to exceptions through the respective vesting periods, which is generally three years. Each grantee is granted a target award of PSUs and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals.

The performance goals of the 2023, 2022 and 2021 PSU grants consisted of the following metrics:

Metric 1 – Company's total shareholder return ("TSR") compared to the TSR for a specific peer group of investor-owned utilities (a market-based condition)	38.46%
Metric 2 – Achievement of a targeted cumulative level of rate base growth as a result of acquisitions (a performance-based condition)	30.77%
Metric 3 – Achievement of targets for maintaining consolidated operations and maintenance expenses over the three-year measurement period (a performance-based condition)	30.77%

The following table provides the compensation expense and income tax benefit for PSUs:

	Years ended December 31,		
	2023	2022	2021
Stock-based compensation within operations and maintenance expense	$ 6,942	$ 7,950	$ 7,150
Income tax benefit	1,741	1,997	2,038

The following table summarizes nonvested PSU transactions for the year ended December 31, 2023:

	Number of Share Units	Weighted Average Fair Value
Nonvested share units at beginning of period	556,462	$ 42.77
Granted	162,030	45.06
Performance criteria adjustment	(1,230)	43.97
Forfeited	(17,276)	44.18
Share units issued	(168,549)	53.77
Nonvested share units at end of period	531,437	40.03

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions associated with the PSUs using the Monte Carlo valuation method, which assesses the probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs associated with performance-based conditions was based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The fair value of each PSU grant is amortized into compensation expense on a straight-line basis over their respective vesting periods, generally 36 months. The accrual of compensation costs is based on an estimate of the final expected value of the award and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs. The recording of compensation expense for PSUs has no impact on net cash flows. The following table provides the assumptions used in the pricing model for the grant, the resulting grant date fair value of PSUs, and the intrinsic value and fair value of PSUs that vested during the year:

	Years ended December 31,		
	2023	2022	2021
Expected term (years)	3.0	3.0	3.0
Risk-free interest rate	4.43%	1.75%	0.24%
Expected volatility	33.8%	31.9%	32.1%
Weighted average fair value of PSUs granted	$ 45.06	$ 42.33	$ 43.18
Intrinsic value of vested PSUs	$ 7,483	$ -	$ 6,050
Fair value of vested PSUs	$ 9,692	$ -	$ 5,321

As of December 31, 2023, $9,676 of unrecognized compensation costs related to PSUs is expected to be recognized over a weighted average period of approximately 1.8 years. The aggregate intrinsic value of PSUs as of December 31, 2023 was $19,849. The aggregate intrinsic value of PSUs is based on the number of nonvested share units and the market value of the Company's common stock as of the period end date.

Restricted Stock Units – A restricted stock unit ("RSU") represents the right to receive a share of the Company's common stock and is valued based on the fair market value of the Company's stock on the date of grant. RSUs are eligible to be earned at the end of a specified restricted period, generally three years, beginning on the date of grant. In some cases, the right to receive the shares is subject to specific performance goals established at the time the grant is made. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of the RSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the RSUs. The following table provides the compensation expense and income tax benefit for RSUs:

	Years ended December 31,		
	2023	2022	2021
Stock-based compensation within operations and maintenance expense	$ 2,877	$ 2,927	$ 3,360
Income tax benefit	722	736	953

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

The following table summarizes nonvested RSU transactions for the year ended December 31, 2023:

	Number of Stock Units	Weighted Average Fair Value
Nonvested stock units at beginning of period	180,306	$ 45.94
Granted	75,414	45.53
Stock units vested	(55,886)	49.01
Forfeited	(7,617)	45.33
Nonvested stock units at end of period	192,217	45.06

The following table summarizes the value of RSUs:

	Years ended December 31,		
	2023	2022	2021
Weighted average fair value of RSUs granted	$ 45.53	$ 44.74	$ 44.44
Intrinsic value of vested RSUs	2,427	3,090	2,108
Fair value of vested RSUs	2,665	2,483	1,726

As of December 31, 2023, $3,433 of unrecognized compensation costs related to RSUs is expected to be recognized over a weighted average period of approximately 1.8 years. The aggregate intrinsic value of RSUs as of December 31, 2023 was $7,179. The aggregate intrinsic value of RSUs is based on the number of nonvested stock units and the market value of the Company's common stock as of the period end date.

Stock Options – A stock option represents the option to purchase a number of shares of common stock of the Company as specified in the stock option grant agreement at the exercise price per share as determined by the closing market price of our common stock on the grant date. Stock options are exercisable in installments of 33% annually, starting one year from the grant date and expire ten years from the grant date. The vesting of stock options granted in 2023 and 2022 are subject to the achievement of the following performance goal: the Company achieves at least an adjusted return on equity equal to 150 basis points below the return on equity granted by the Pennsylvania Public Utility Commission during the Company's Pennsylvania subsidiary's last rate proceeding. The adjusted return on equity equals net income, excluding net income or loss from acquisitions which have not yet been incorporated into a rate application as of the last year end, divided by equity which excludes equity applicable to acquisitions which are not yet incorporated in a rate application during the award period.

The Company did not grant stock options for the year ended December 31, 2021. The fair value of each stock option is amortized into compensation expense using the graded vesting method, which results in the recognition of compensation costs over the requisite service period for each separately vesting tranche of the stock options as though the stock options were, in substance, multiple stock option grants. The following table provides compensation expense and income tax benefit for stock options:

	Years ended December 31,		
	2023	2022	2021
Stock-based compensation within operations and maintenance expenses	$ 650	$ 451	$ 480
Income tax benefit	162	140	136

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

Options under the plans were issued at the closing market price of the stock on the day of the grant. The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model, which relies on assumptions that require management's judgment. The following table provides the assumptions used in the pricing model for grants and the resulting grant date fair value of stock options granted in the period reported:

	2023	2022
Expected term (years)	5.5	5.5
Risk-free interest rate	4.03%	1.92%
Expected volatility	27.80%	26.50%
Dividend yield	2.53%	2.37%
Grant date fair value per option	$ 11.37	$ 9.34

Historical information was the principal basis for the selection of the expected term and dividend yield. The expected volatility is based on a weighted-average combination of historical and implied volatilities over a period that approximates the expected term of the option. The risk-free interest rate was selected based upon the U.S. Treasury yield curve in effect at the time of grant for the expected term of the option. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense.

The following table summarizes stock option transactions for the year ended December 31, 2023:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Life (years)	Aggregate Intrinsic Value
Outstanding, beginning of year	820,061	36.29		
Granted	74,632	45.39		
Forfeited	(3,258)	45.32		
Expired / Cancelled	(819)	37.09		
Exercised	(8,174)	35.13		
Outstanding at end of year	882,442	$ 37.03	5.5	$ 1,458
Exercisable at end of year	761,220	$ 35.72	5.0	$ 1,458

The intrinsic value of stock options is the amount by which the market price of the stock on a given date, such as at the end of the period or on the day of exercise, exceeded the closing market price of stock on the date of grant. The following table summarizes the intrinsic value of stock options exercised and the fair value of stock options which vested:

	Years ended December 31,		
	2023	2022	2021
Intrinsic value of options exercised	$ 64	$ 960	$ 1,709
Fair value of options vested	236	1,203	1,485

The following table summarizes information about the options outstanding and options exercisable as of December 31, 2023:

	Options Outstanding			Options Exercisable	
	Shares	Weighted Average Remaining Life (years)	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Range of prices:					
$30.00 - 33.99	53,442	3.2	$ 30.47	53,442	$ 30.47
$34.00 - 34.99	89,139	4.2	34.51	89,139	34.51
$35.00 - 35.99	591,136	5.2	35.93	591,136	35.93
$36.00 and above	148,725	8.6	45.28	27,503	45.18
	882,442	5.5	$ 37.03	761,220	$ 35.72

As of December 31, 2023, there was $496 of total unrecognized compensation costs related to nonvested stock options granted under the plans. The cost is expected to be recognized over a weighted average period of approximately 1.4 years.

Restricted Stock – Restricted stock awards provide the grantee with the rights of a shareholder, including the right to receive dividends and to vote such shares, but not the right to sell or otherwise transfer the shares during the restriction period. Restricted stock awards result in compensation expense that is equal to the fair market value of the stock on the date of the grant and is amortized ratably over the restriction period. The Company expects forfeitures of restricted stock to be de minimis.

The following table provides the compensation cost and income tax benefit for stock-based compensation related to restricted stock:

	Years ended December 31,		
	2023	2022	2021
Stock-based compensation within operations and maintenance expense	$ 43	$ 50	$ 130
Income tax benefit	12	15	37

The following table summarizes restricted stock transactions for the year ended December 31, 2023:

	Number of Shares	Weighted Average Fair Value
Nonvested shares at beginning of period	1,170	$ 42.75
Granted	1,412	35.42
Vested	(1,170)	42.75
Nonvested shares at end of period	1,412	$ 35.42

Stock Awards – Stock awards represent the issuance of the Company's common stock, without restriction. Stock awards are granted to the Company's non-employee directors. The issuance of stock awards results in compensation expense which is equal to the fair market value of the stock on the grant date, and is expensed immediately upon grant. The following table provides compensation cost and income tax benefit for stock-based compensation related to stock awards:

	Years ended December 31,		
	2023	2022	2021
Stock-based compensation within operations and maintenance expense	$ 810	$ 715	$ 700
Income tax benefit	228	207	202

Granted	19,488	41.58
Vested	(19,488)	41.58
Nonvested stock awards at end of period	-	-

Note 16 – *Pension Plans and Other Post-retirement Benefits*

The Company maintains a qualified, defined benefit pension plan that covers its full-time employees who were hired prior to the date their respective pension plan was closed to new participants. Retirement benefits under the plan are generally based on the employee's total years of service and compensation during the last five years of employment. The Company's policy is to fund the plan annually at a level which is deductible for income tax purposes and which provides assets sufficient to meet its pension obligations over time. To offset some limitations imposed by the Internal Revenue Code with respect to payments under qualified plans, the Company has a non-qualified Supplemental Pension Benefit Plan for Salaried Employees in order to prevent some employees from being penalized by these limitations, and to provide certain retirement benefits based on employee's years of service and compensation. The net pension costs and obligations of the qualified and non-qualified plans are included in the tables which follow. Employees hired after their respective pension plan was closed, may participate in a defined contribution plan that provides a Company matching contribution on amounts contributed by participants and an annual profit-sharing contribution based upon a percentage of the eligible participants' compensation.

The Company's qualified defined benefit pension plan has a permanent lump sum option to the form of benefit payments offered to participants upon retirement or termination. The plan paid $30,347 and $17,757 to participants who elected this option during 2023 and 2022, respectively. During 2023, we made lump-sum pension benefit distributions exceeding the cumulative amount of service and interest cost components of the net periodic pension cost for the year, which is the settlement accounting threshold. The settlement loss of $5,173 was recorded as a regulatory asset, as it is probable of recovery in future rates, and will be amortized into pension benefit costs. A settlement loss is the recognition of unrecognized pension benefit costs that would have been incurred in subsequent periods.

In addition to providing pension benefits, the Company offers post-retirement benefits other than pensions to employees retiring with a minimum level of service and hired before their respective plan closed to new participants. These benefits include continuation of medical and prescription drug benefits, or a cash contribution toward such benefits, for eligible retirees and life insurance benefits for eligible retirees. The Company funds these benefits through various trust accounts. The benefits of retired officers and other eligible retirees are paid by the Company and not from plan assets due to limitations imposed by the Internal Revenue Code.

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid in the years indicated:

	Pension Benefits	Other Post-retirement Benefits
Years:		
2024	$ 26,611	$ 5,287
2025	27,306	5,546
2026	27,098	5,819
2027	28,755	6,086
2028	27,446	6,272
2029-2033	124,461	32,778

The changes in the benefit obligation and fair value of plan assets, the funded status of the plans and the assumptions used in the measurement of the company's benefit obligation are as follows:

The following table provides selected information about plans with accumulated benefit obligation and projected benefit obligation in excess of plan assets:

	December 31, 2023		December 31, 2022	
	Pension Benefits	Other Post-retirement Benefits	Pension Benefits	Other Post-retirement Benefits
Selected information for plans with projected benefit obligation in excess of plan assets:				
Projected benefit obligation	$ 17,720	$ N/A	$ 16,041	$ N/A
Fair value of plan assets	-	N/A	-	N/A
Selected information for plans with accumulated benefit obligation in excess of plan assets:				
Accumulated benefit obligation	14,843	35,154	12,126	29,009
Fair value of plan assets	-	11,957	-	12,064

The following table provides the components of net periodic benefit costs for the years ended December 31:

	Pension Benefits			Other Post-retirement Benefits		
	2023	2022	2021	2023	2022	2021
Service cost	$ 1,507	$ 2,587	$ 3,503	$ 1,347	$ 1,911	$ 2,793
Interest cost	16,007	13,806	13,018	4,476	3,369	3,358
Expected return on plan assets	(22,223)	(22,004)	(23,165)	(4,372)	(4,502)	(4,155)
Amortization of prior service cost (credit)	684	536	559	-	-	(432)
Amortization of actuarial loss (gain)	2,962	2,043	2,907	(1,317)	(1,336)	219
Net periodic benefit cost/(credit)	$ (1,063)	$ (3,032)	$ (3,178)	$ 134	$ (558)	$ 1,783

The Company records the underfunded/overfunded status of its pension and other post-retirement benefit plans on its consolidated balance sheets and records a regulatory asset/liability for these costs that would otherwise be charged to stockholders' equity, as the Company anticipates recoverability of the costs through customer rates to be probable. Changes in the plans' funded status will affect the assets and liabilities recorded on the balance sheet. Due to the Company's regulatory treatment, the recognition of the funded status is recorded as a regulatory asset pursuant to the FASB's accounting guidance for regulated operations.

The following table provides the amounts recognized in regulatory assets and regulatory liabilities that have not been recognized as components of net periodic benefit cost as of December 31:

	Pension Benefits		Other Post-retirement Benefits	
	2023	2022	2023	2022
Net actuarial loss (gain)	$ 84,030	$ 56,737	$ (21,257)	$ (19,894)
Prior service cost (credit)	1,866	2,550	-	-
Total recognized in regulatory assets	$ 85,896	$ 59,287	$ (21,257)	$ (19,894)

Accounting for pensions and other post-retirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover and medical costs. Each assumption is reviewed annually with assistance from the Company's actuarial consultant who provides guidance in establishing the assumptions. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other post-retirement benefit expense that the Company recognizes.

Year that the rate reaches the ultimate trend rate	n/a	n/a	n/a	2029	2027	2025

n/a – Assumption is not applicable.

** In 2023 and 2022, the Company remeasured its qualified pension plan assets and liabilities in accordance with settlement accounting rules. The discount rate used for the remeasurement and for the calculation of the net periodic benefit cost for the remainder of the year in 2023 and 2022 was 5.20% and 5.58%, respectively.*

The Company's discount rate assumption, which is utilized to calculate the present value of the projected benefit payments of our post-retirement benefits, was determined by selecting a hypothetical portfolio of high-quality corporate bonds appropriate to match the projected benefit payments of the plans. The selected bond portfolio was derived from a universe of Aa-graded corporate bonds. The discount rate was then developed as the rate that equates the market value of the bonds purchased to the discounted value of the plan's benefit payments. The Company's pension expense and liability (benefit obligations) increases as the discount rate is reduced.

The Company's expected return on plan assets is determined by evaluating the asset class return expectations with its advisors as well as actual, long-term, historical results of our asset returns. The Company's market related value of plan assets is equal to the fair value of the plan's assets as of the last day of its fiscal year, and is a determinant for the expected return on plan assets which is a component of post-retirement benefits expense. The Company's pension expense

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

increases as the expected return on plan assets decreases. For 2023, the Company used a 6.8% expected return on plan assets assumption. The Company believes its actual long-term asset allocation on average will approximate the targeted allocation. The Company's investment strategy is to earn a reasonable rate of return while maintaining risk at acceptable levels. Risk is managed through fixed income investments to manage interest rate exposures that impact the valuation of liabilities and through the diversification of investments across and within various asset categories. Over time, as the plan's funded status increases, the target allocation of return-seeking assets (e.g., equities and other instruments with a similar risk profile) may decline and the target allocation of liability-hedging assets (e.g., fixed income and other instruments with a similar risk profile) may increase. Investment returns are compared to a total plan benchmark constructed by applying the plan's asset allocation target weightings to passive index returns representative of the respective asset classes in which the plan invests. The Retirement and Employee Benefits Committee meets quarterly to review plan investments and management monitors investment performance quarterly through a performance report prepared by an external consulting firm.

The target allocation by asset class as of December 31, 2023, along with the actual allocation of the Company's pension plan assets, are as follows:

		Percentage of Plan Assets at December 31,	
	Target Allocation	2023	2022
Return seeking assets	20 to 40%	38%	56%
Liability hedging assets	30 to 70%	62%	44%
Total	100%	100%	100%

The fair value of the Company's pension plans' assets at December 31, 2023 by asset class are as follows:

	Level 1	Level 2	Level 3	Assets measured at NAV (a)	Total
Common stock	$ 14,115	$ -	$ -	$ -	$ 14,115

Cash and cash equivalents	8,725	-	-	-	8,725
Total other post-retirement assets	$ 57,500	$ -	$ -	$ 28,494	$ 85,994

Valuation Techniques Used to Determine Fair Value

- *Common Stocks* - Investments in common stocks are valued using unadjusted quoted prices obtained from active markets.
- *Return Seeking Assets* – Investments in return seeking assets consists of the following:
  - Global equities, which consist of common and preferred shares of stock, traded on U.S. or foreign exchanges that are valued using unadjusted quoted prices obtained from active markets, or commingled fund vehicles, consisting of such securities valued using NAV, which are not classified within the fair value hierarchy.
  - Real estate securities, which consist of securities, traded on U.S. or foreign exchanges that are valued using unadjusted quoted prices obtained from active markets, or for real estate commingle fund vehicles that are not publicly quoted, the fund administrators value the funds using the NAV per fund share,

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements (continued)
(In thousands of dollars, except per share amounts)

derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
    - Hedge / diversifying strategies, which consist of a multi-manager fund vehicle having underlying exposures that collectively seek to provide low correlation of return to equity and fixed income markets, thereby offering diversification. As a multi-manager fund investment, NAV is derived from underlying manager NAVs, which are derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
    - Credit, which consist of certain opportunistic, return-oriented credits which primarily include below investment grade bonds (i.e. high yield bonds), bank loans, and securitized debt. Credits are valued using the NAV per fund share, derived from either quoted prices in active markets of the underlying securities, or less active markets, or quotes of similar assets, and are not classified within the fair value hierarchy.
- *Liability Hedging Assets* – Investments in liability hedging assets consist of funds investing in high-quality fixed income securities (i.e. U.S. Treasury securities and government bonds), and for funds for which market quotations are readily available, are valued at the last reported closing price on the primary market or exchange on which they are traded. Funds for which market quotations are not readily available, are valued using the NAV per fund share, derived from the quoted prices in active markets of the underlying securities and are not classified within the fair value hierarchy.
- *Cash and Cash Equivalents* – Investments in cash and cash equivalents are comprised of both uninvested cash and money market funds. The uninvested cash is valued based on its carrying value, and the money market funds are valued utilizing the net asset value per unit obtained from published market prices.

Funding requirements for qualified defined benefit pension plans are determined by government regulations and not by accounting pronouncements. In accordance with funding rules and the Company's funding policy, during 2024 our pension contribution is expected to be $9,393.

The Company has a 401(k) savings plan, which is a defined contribution plan and covers substantially all employees. The Company makes matching contributions that are based on a percentage of an employee's contribution, subject to specific limitations, as well as, non-discretionary contributions based on eligible hourly wages for certain union employees, discretionary year-end contributions based on an employee's eligible compensation, and employer profit sharing contributions. Participants may diversify their Company matching account balances into other investments offered under the 401(k) savings plan. The Company's contributions, which are recorded as compensation expense, were $23,519, $21,758, and $19,569, for the years ended December 31, 2023, 2022, and 2021, respectively.

Note 17 –*Rate Activity*

On January 19, 2024, Aqua New Jersey filed an application with the New Jersey Board of Public Utilities designed to increase water rates by $8,328 or 17.3% on an annual basis. The Company anticipates a final order to be issued by August 2024.

On January 2, 2024, Aqua Illinois filed an application with the Illinois Commerce Commission designed to increase water and wastewater rates by $19,196 or 18.9% on an annual basis. The Company anticipates a final order to be issued by December 2024.

On December 29, 2023, Peoples Natural Gas filed an application with the Pennsylvania Public Utility Commission designed to increase natural gas rates by $156,024 or 18.7% on an annual basis. The Company anticipates a final order to be issued by September 2024.

On December 13, 2023, the Company's regulated water and wastewater utility operating divisions in Ohio received an order from the Public Utilities Commission of Ohio which will increase operating revenues by $4,850 annually. New rates for water and sewer service went into effect on December 13, 2023.

On September 28, 2023, the Company's regulated water and wastewater operating subsidiary in Texas, Aqua Texas, received a final order from the Public Utility Commission of Texas approving infrastructure rehabilitation surcharges designed to increase revenues by $8,388 annually. The rates authorized on March 28, 2023 and implemented on an interim basis effective April 1, 2023 did not change with the final order.

On July 27, 2023, the Company's regulated water and wastewater operating subsidiary in Virginia, Aqua Virginia, filed an application with the State Corporation Commission designed to increase revenues by $6,911 or 29.5% on an annual basis.

On June 5, 2023, the Company's regulated water and wastewater operating subsidiary in North Carolina, Aqua North Carolina, received an order from the North Carolina Utilities Commission designed to increase rates by $14,001 in the first year of new rates being implemented, then by an additional $3,743 and $4,130 in the second and third years, respectively. In February 2023, the Company had implemented interim rates, based on an estimate of the final outcome of the order, and no refunds or additional billings are required for the difference between interim and final approved rates.

On September 21, 2022, the Company's regulated water and wastewater utility operating divisions in Ohio received an order from the Public Utilities Commission of Ohio which increased operating revenues by $5,483 annually. New rates for water and sewer service went into effect on September 21, 2022.

On May 16, 2022, the Company's regulated water and wastewater operating subsidiary in Pennsylvania, Aqua Pennsylvania, received an order from the Pennsylvania Public Utility Commission that allowed base rate increases that would increase total annual operating revenues by $69,251. New rates went into effect on May 19, 2022. At the time the rate order was received, the rates in effect also included $35,470 in Distribution System Improvement Charges ("DSIC"), which was 7.2% above prior base rates. Consequently, the aggregate annual base rates increased by $104,721 since the last base rate increase and DSIC was reset to zero.

On January 3, 2022, the Company's natural gas operating division in Kentucky received an order from the Kentucky Public Service Commission resulting in an increase of $5,238 in annual revenues, and new rates went into effect on January 4, 2022. On June 7, 2022, an additional $260 was approved and made effective by the Commission, resulting from a rehearing requested by the operating division.

In addition to the Texas, North Carolina, Ohio, Pennsylvania, and Kentucky rate awards noted above, the Company's operating subsidiaries were allowed annualized rate increases of $1,703 in 2023, $1,378 in 2022, and $3,390 in 2021, represented by three, two, and six rate decisions, respectively. Revenues recognized in aggregate from all of the rate

ESSENTIAL UTILITIES, INC. AND SUBSIDIARIES

(In thousands of dollars, except per share amounts)

increases realized in the year of grant were approximately $10,109, $51,163, and $2,995 in 2023, 2022, and 2021, respectively.

Eight states in which the Company operates permit water and wastewater utilities to add a surcharge to their water or wastewater bills to offset the additional depreciation and capital costs related to infrastructure system replacement and rehabilitation projects completed and placed into service between base rate filings. Additionally, Pennsylvania and Kentucky allow for the use of an infrastructure rehabilitation surcharge for natural gas utility systems. The surcharge for infrastructure system replacements and rehabilitations is typically adjusted periodically based on additional qualified capital expenditures completed or anticipated in a future period, is capped as a percentage of base rates, generally at 5% to 12.75%, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. During 2023, the Company received approval to bill infrastructure rehabilitation surcharges designed to increase total operating revenues on an annual basis by $18,814 in its water and wastewater utility operating divisions in Pennsylvania, New Jersey, Illinois and Texas, and $21,272 in its gas utility operating divisions in Pennsylvania and Kentucky. The surcharge for infrastructure system replacements and rehabilitations provided revenues in 2023, 2022, and 2021 of $20,261, $26,902, and $33,771, respectively.

Note 18 – *Segment Information*

The Company has eleven operating segments and has two reportable segments, the Regulated Water segment and the Regulated Natural Gas segment. The Regulated Water segment is comprised of eight operating segments representing its water and wastewater regulated utility companies, which are organized by the states where the Company provides water and wastewater services. The eight water and wastewater utility operating segments are aggregated into one reportable segment, because each of these operating segments has the following similarities: economic characteristics, nature of services, production processes, customers, water distribution or wastewater collection methods, and the nature of the regulatory environment. The Regulated Natural Gas segment is comprised of one operating segment representing natural gas utility companies for which the Company provides natural gas distribution services.

In addition to the Company's two reportable segments, it includes two operating segments within the Other category below. These segments are not quantitatively significant and are comprised of its non-regulated natural gas operations and Aqua Resources. Non-regulated natural gas operations consist of utility service line protection solutions and repair services to households and the operation of gas marketing and production entities. Aqua Resources offers, through a third party, water and sewer service line protection solutions and repair services to households. In addition to these segments, Other is comprised of business activities not included in the reportable segments, corporate costs that have not been allocated to the Regulated Water and Regulated Natural Gas segments, and intersegment eliminations. Corporate costs include general and administrative expenses, and interest expense. The Company reports these corporate costs within Other as they relate to corporate-focused responsibilities and decisions and are not included in internal measures of segment operating performance used by the Company to measure the underlying performance of the operating segments.

The following table presents information about the Company's reportable segments:

2023	Regulated Water	Regulated Natural Gas	Other and Eliminations	Consolidated
Operating revenues	$ 1,153,376	$ 863,759	$ 36,689	$ 2,053,824

[(a)] The regulated water and regulated natural gas segments report interest expense that includes long-term debt that was pushed-down to the regulated operating subsidiaries from Essential Utilities, Inc.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures – Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this Annual Report are effective to provide reasonable assurance that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Management's Report on Internal Control Over Financial Reporting
Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In assessing the effectiveness of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework* (2013). As a result of management's assessment and based on the criteria in the framework, management has concluded that, as of December 31, 2023, the Company's internal control over financial reporting was effective.

Attestation Report of the Registered Public Accounting Firm – The effectiveness of our internal control over financial reporting as of December 31, 2023 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Changes in Internal Control Over Financial Reporting – No change in our internal control over financial reporting occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information*

During the quarter ended December 31, 2023, none of the Company's directors or executive officers adopted, modified or terminated any contract, instruction or written plan for the purchase or sale of Company securities that was intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) or any "non-Rule 10b5-1 trading arrangement", except for as follows:

Name & Title	Character of Trading Arrangement	Date of Adoption/ Termination	Aggregate Number of Shares of Common Stock to be Purchased/Sold Pursuant to Trading Arrangement	Duration of Plan [1]
Christopher Luning, Executive Vice President & General Counsel	Rule 10b5-1(c) Trading Arrangement	Terminated - October 3, 2023	Up to 16,770 shares to be sold	1/3/2023 - 7/1/2024
Matthew Rhodes, Executive Vice President, Strategy and Corporate Development	Rule 10b5-1(c) Trading Arrangement	Terminated - December 1, 2023	Up to 7,982 shares to be sold	1/3/2023 - 6/3/2024
Christopher Luning, Executive Vice President & General Counsel	Rule 10b5-1(c) Trading Arrangement	Adopted - November 28, 2023	Up to 30,000 shares to be sold	3/5/2024 - 3/31/2025
Matthew Rhodes, Executive Vice President, Strategy and Corporate Development	Rule 10b5-1(c) Trading Arrangement	Adopted - December 12, 2023	Up to 7,982 shares to be sold	3/8/2024 - 6/3/2024
Robert Rubin, Senior Vice President, Controller and Chief Accounting Officer	Rule 10b5-1(c) Trading Arrangement	Adopted - November 20, 2023	Up to 19,831 shares to be sold	3/5/2024 - 10/31/2024
Daniel Schuller, Executive Vice President and Chief Financial Officer	Rule 10b5-1(c) Trading Arrangement	Adopted - December 18, 2023	Up to 7,327 shares to be sold	3/15/2024 - 12/31/2024

[1] Each trading arrangement marked as a "Rule 10b5-1(c) Trading Arrangement" only permits transactions after the indicated duration start date and, in any case, upon expiration of the applicable mandatory cooling-off period under the Rule, and until the earlier of the indicated duration end date or completion of all sales contemplated in the Rule 10b5-1(c) Trading Arrangement.

Item 9C. *Disclosure Regarding Foreign Jurisdictions that Prevent Inspections*

Not applicable.

PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

The information appearing in the sections captioned *Information Regarding Nominees*, *Corporate Governance – Code of Ethics*, *– Board and Board Committees*, and *Section 16(a) Beneficial Ownership Reporting Compliance* of the definitive Proxy Statement relating to our 2024 annual meeting of shareholders, to be filed within 120 days after the end of the fiscal year covered by this Annual Report is incorporated by reference herein.

We make available free of charge within the Corporate Governance portion of the investor relations section of our web site, at www.essential.co, our Corporate Governance Guidelines, the Charters of each Committee of our Board of

Directors, and our Code of Ethical Business Conduct (the Code of Ethics). Amendments to the Code of Ethics, and any grant of a waiver from a provision of the Code requiring disclosure under applicable rules of the SEC, will be disclosed on our web site. The reference to our web site is intended to be an inactive textual reference only, and the contents of such web site are not incorporated by reference herein and should not be considered part of this or any other report that we file with or furnish to the SEC.

Information About Our Executive Officers

The following table and the notes thereto set forth information with respect to our executive officers, including their names, ages, positions with Essential Utilities and business experience during the last five years:

Name	Age	Position with Essential Utilities (1)
Christopher H. Franklin	58	Chairman (January 2018 to present); President and Chief Executive Officer (July 2015 to present); Executive Vice President and President and Chief Operating Officer, Regulated Operations (January 2012 to July 2015); Regional President – Midwest and Southern Operations and Senior Vice President, Corporate and Public Affairs (January 2010 to January 2012); Regional President – Southern Operations and Senior Vice President, Public Affairs and Customer Operations (February 2007 to January 2010); Vice President, Public Affairs and Customer Operations (May 2005 to February 2007); Vice President, Corporate and Public Affairs (February 1997 to May 2005); Manager Corporate and Public Affairs (December 1992 to February 1997)
Daniel J. Schuller	54	Executive Vice President and Chief Financial Officer (October 2018 to present); Executive Vice President, Strategy and Corporate Development (July 2015 to October 2018); Investment Principal – J.P. Morgan Asset Management – Infrastructure Investments Group (2007 to 2015)
Colleen M. Arnold	53	President, Aqua Water (March 2020 to present); Deputy Chief Operating Officer, Aqua (September 2015 to March 2020)
Michael A. Huwar	60	President, Peoples Natural Gas (August 2020 to present); President Columbia Gas of Pennsylvania & Columbia Gas of Maryland (February 2017 to August 2020)
Christopher P. Luning	56	Executive Vice President and General Counsel (August 2022 to present); Executive Vice President, General Counsel, and Secretary (February 2019 to July 2022; Senior Vice President, General Counsel, and Secretary (April 2012 to February 2019); Vice President Corporate Development and Corporate Counsel (June 2008 to April 2012); Vice President and Deputy General Counsel (May 2005 to June 2008); Assistant General Counsel (March 2003 to May 2005)
Matthew R. Rhodes	46	Executive Vice President, Strategy and Corporate Development (June 2018 to present); Managing Director - Goldman Sachs, Global Natural Resources (July 2007 to April 2018)
Robert A. Rubin	61	Senior Vice President, Controller and Chief Accounting Officer (January 2012 to present); Vice President, Controller and Chief Accounting Officer (May 2005 to January 2012); Controller and Chief Accounting Officer (March 2004 to May 2005); Controller (March 1999 to March 2004); Assistant Controller (June 1994 to March 1999); Accounting Manager (June 1989 to June 1994)

(1) In addition to the capacities indicated, the individuals named in the above table hold other offices or directorships with subsidiaries of the Company. Officers serve at the discretion of the Board of Directors.

Item 11. *Executive Compensation*

The information responsive to this item will be included in the definitive Proxy Statement relating to our 2024 annual meeting of shareholders, to be filed within 120 days after the end of the fiscal year covered by this Annual Report, is incorporated by reference herein.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

Ownership of Common Stock - The information responsive to this item will be included in the definitive Proxy Statement relating to our 2024 annual meeting of shareholders, to be filed within 120 days after the end of the fiscal year covered by this Annual Report, and is incorporated by reference herein.

Securities Authorized for Issuance under Equity Compensation Plans - The following table provides information for our equity compensation plans as of December 31, 2023:

Equity Compensation Plan Information

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	1,606,096 (1)	$ 37.03 (2)	1,527,080
Equity compensation plans not approved by security holders	-	-	-
Total	1,606,096	$ 37.03	1,527,080

(1) Consists of 882,442 shares issuable upon exercise of outstanding options, 531,437 shares issuable upon conversion of outstanding performance share units, and 192,217 shares issuable upon conversion of outstanding restricted share units.

(2) Calculated based upon outstanding options of 882,442 shares to acquire our common stock.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information responsive to this item will be included in the definitive Proxy Statement relating to our 2024 annual meeting of shareholders, to be filed within 120 days after the end of the fiscal year covered by this Annual Report, and is incorporated by reference herein.

Item 14. *Principal Accountant Fees and Services*

The information responsive to this item will be included in the definitive Proxy Statement relating to our 2024 annual meeting of shareholders, to be filed within 120 days after the end of the fiscal year covered by this Annual Report, and is incorporated by reference herein.

PART IV

Item 15. *Exhibits and Financial Statement Schedules*

Financial Statements. The consolidated financial statements and supplementary data included in Part II, Item 8 are hereby incorporated by reference herein.

Financial Statement Schedules.

Schedule 1. – Condensed Parent Company Financial Statements. All other schedules are omitted because they are not applicable or not required, or because the required information is included in the consolidated financial statements or notes thereto.

Exhibits, Including Those Incorporated by Reference. A list of exhibits filed as part of this Annual Report is set forth in the Exhibit Index hereto which is incorporated by reference herein. Where so indicated, exhibits which were previously filed are incorporated by reference. For exhibits incorporated by reference, the location of the exhibit in the previous filing is indicated in the exhibit index.

Item 16. *Form 10-K Summary*

Registrants may voluntarily include a summary of information required by Form 10-K under this Item 16. The Company has elected not to include such summary information in this Annual Report.

See Note 1 - *Basis of Presentation*

The accompanying condensed notes are an integral part of these condensed financial statements.

Essential Utilities, Inc.
Schedule 1 – Condensed Parent Company Financial Statements
Notes to Condensed Financial Statements
(In thousands, except per share amounts)

Note 1 – *Basis of Presentation* – The accompanying condensed financial statements of Essential Utilities, Inc. (the "Parent") should be read in conjunction with the consolidated financial statements and notes thereto of Essential Utilities, Inc. and subsidiaries (collectively, the "Registrant") included in Part II, Item 8 of the Annual Report. The Parent's significant accounting policies are consistent with those of the Registrant.

The Parent borrows from third parties and provides funds to its subsidiaries, in support of their operations. Amounts owed to the Parent for borrowings under this facility are reflected as inter-company receivables on the condensed balance sheets. The interest rate charged to the subsidiaries is sufficient to cover the Parent's interest costs under its associated borrowings.

As of December 31, 2023 and 2022, the Parent had a current accounts receivable – affiliates balance of $907,302 and $1,601,064, respectively. As of December 31, 2023 and 2022, the Parent had a notes receivable – affiliates balance of $2,765,670 and $2,276,670, respectively. The changes in these balances represent non-cash adjustments that are recorded through the Parent's investment in subsidiaries.

In the ordinary course of business, the Parent indemnifies a third-party for surety bonds issued on behalf of subsidiary companies, guarantees the performance of one of its regulated utilities in a jurisdiction that requires such guarantees, and guarantees several projects associated with the treatment of water in a jurisdiction.

Note 2 – *Dividends from subsidiaries* – Dividends in the amount of $0, $0, and $0 were paid to the Parent by its wholly-owned subsidiaries during the years ended December 31, 2023, 2022, and 2021, respectively.

Note 3 – *Long-term debt* – The Parent has long-term debt under unsecured note purchase agreements with investors in addition to its $1,000,000 revolving credit agreement. Excluding amounts due under the revolving credit agreement, the debt maturities of the Parent's long-term debt are as follows:

Year	Debt Maturity
2024	$ -
2025	-
2026	-
2027	-
2028	-
Thereafter	3,025,000

Spire Alabama Inc.	☐	☐	☒	☐	☐

If an emerging growth company, indicate by check mark if each registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.
Spire Inc. ☐ Spire Missouri Inc. ☐ Spire Alabama Inc. ☐

Indicate by check mark whether each registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.
Spire Inc. ☒ Spire Missouri Inc. ☐ Spire Alabama Inc. ☐

If securities are registered pursuant to Section 12(b) of the Exchange Act, indicate by check mark whether the financial statements of each registrant included in the filing reflect the correction of an error to previously issued financial statements.
Spire Inc. ☐ Spire Missouri Inc. ☐ Spire Alabama Inc. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).
Spire Inc. ☐ Spire Missouri Inc. ☐ Spire Alabama Inc. ☐

Indicate by check mark whether each registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Spire Inc. Yes ☐ No ☒ Spire Missouri Inc. Yes ☐ No ☒ Spire Alabama Inc. Yes ☐ No ☒

The aggregate market value of the common equity held by non-affiliates of Spire Inc. amounted to $3,580,140,878 as of March 31, 2023. All of Spire Missouri Inc.'s and Spire Alabama Inc.'s equity securities are owned by Spire Inc., their parent company and a reporting company under the Exchange Act.

The number of shares outstanding of each registrant's common stock, as of November 10, 2023, was as follows:

Spire Inc.	Common Stock, par value $1.00 per share	53,176,840
Spire Missouri Inc.	Common Stock, par value $1.00 per share (all owned by Spire Inc.)	25,855
Spire Alabama Inc.	Common Stock, par value $0.01 per share (all owned by Spire Inc.)	1,972,052

This combined Form 10-K represents separate filings by Spire Inc., Spire Missouri Inc., and Spire Alabama Inc. Information contained herein relating to an individual registrant is filed by that registrant on its own behalf. Each registrant makes no representation as to information relating to the other registrants, except that information relating to Spire Missouri Inc. and Spire Alabama Inc. is also attributed to Spire Inc.

Spire Missouri Inc. and Spire Alabama Inc. meet the conditions set forth in General Instructions I(1)(a) and (b) of Form 10-K and are therefore filing this Form 10-K with the reduced disclosure format specified in General Instructions I(2) to Form 10-K.

DOCUMENTS INCORPORATED BY REFERENCE
Portions of proxy statement for Spire Inc. to be filed on or about December 13, 2023 — Part III.
Certain exhibits as indicated in Part IV.

Spire Alabama	Spire Alabama Inc.
Spire EnergySouth	Spire EnergySouth Inc., parent of Spire Gulf and Spire Mississippi
Spire Gulf	Spire Gulf Inc.
Spire Marketing	Spire Marketing Inc.
Spire Mississippi	Spire Mississippi Inc.
Spire Missouri	Spire Missouri Inc.
Spire STL Pipeline	Spire STL Pipeline LLC, or the 65-mile FERC-regulated pipeline it owns and operates to deliver natural gas into eastern Missouri
Spire Storage	The physical natural gas storage operations of Spire Storage West LLC and Spire Storage Salt Plains LLC
U.S.	United States
Utilities	Spire Missouri, Spire Alabama and the subsidiaries of Spire EnergySouth

PART I

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this report, excluding historical information, include forward-looking statements. Certain words, such as “may,” “anticipate,” “believe,” “estimate,” “expect,” “intend,” “plan,” “seek,” “target,” and similar words and expressions identify forward-looking statements that involve uncertainties and risks. Future developments may not be in accordance with our current expectations or beliefs and the effect of future developments may not be those anticipated. Among the factors that may cause results or outcomes to differ materially from those contemplated in any forward-looking statement are:

- Weather conditions and catastrophic events, particularly severe weather in U.S. natural gas producing areas;
- Volatility in gas prices, particularly sudden and sustained changes in natural gas prices, including the related impact on margin deposits associated with the use of natural gas derivative instruments, and the impact on our competitive position in relation to suppliers of alternative heating sources, such as electricity;
- Changes in gas supply and pipeline availability, including as a result of decisions by natural gas producers to reduce production or shut in producing natural gas wells and expiration or termination of existing supply and transportation arrangements that are not replaced with contracts with similar terms and pricing, as well as other changes that impact supply for and access to the markets in which our subsidiaries transact business;
- Acquisitions may not achieve their intended results;
- Legislative, regulatory and judicial mandates and decisions, some of which may be retroactive, including those affecting:
    - allowed rates of return and recovery of prudent costs,
    - incentive regulation,
    - industry structure,
    - purchased gas adjustment provisions,
    - rate design structure and implementation,
    - capital structures established for rate-setting purposes,
    - regulatory assets,
    - non-regulated and affiliate transactions,
    - franchise renewals,
    - authorization to operate facilities,
    - environmental or safety matters, including the potential impact of legislative and regulatory actions related to climate change and pipeline safety and security,
    - taxes,
    - pension and other postretirement benefit liabilities and funding obligations, or
    - accounting standards;
- The results of litigation;
- The availability of and access to, in general, funds to meet our debt obligations prior to or when they become due and to fund our operations and necessary capital expenditures, either through (i) cash on hand, (ii) operating cash flow, or (iii) access to the capital markets;
- Retention of, ability to attract, ability to collect from, and conservation efforts of, customers;
- Our ability to comply with all covenants in our indentures and credit facilities any violations of which, if not cured in a timely manner, could trigger a default of our obligations;
- Energy commodity market conditions;
- Discovery of material weakness in internal controls;
- The disruption, failure or malfunction of our operational and information technology systems, including due to cyberattacks; and
- Employee workforce issues, including but not limited to labor disputes, the inability to attract and retain key talent, and future wage and employee benefit costs, including costs resulting from changes in discount rates and returns on benefit plan assets.

Readers are urged to consider the risks, uncertainties, and other factors that could affect our business as described in this report. All forward-looking statements made in this report rely upon the safe harbor protections provided under the Private Securities Litigation Reform Act of 1995. We do not, by including this statement, assume any obligation to review or revise any particular forward-looking statement in light of future events.

Item 1. Business

OVERVIEW

Spire Inc. ("Spire") was formed in 2000 and is the holding company for Spire Missouri Inc. ("Spire Missouri"), Spire Alabama Inc. ("Spire Alabama"), other gas utilities, and gas-related businesses. Spire Missouri was formed in 1857 and Spire Alabama was formed in 1948 by the merger of two gas companies. Spire is committed to transforming its business and pursuing growth through growing organically, investing in infrastructure, and advancing through innovation. The Company has three reportable business segments: Gas Utility, Gas Marketing and Midstream.

The Gas Utility segment includes the regulated operations of Spire Missouri, Spire Alabama, Spire Gulf Inc. ("Spire Gulf") and Spire Mississippi Inc. ("Spire Mississippi") (collectively, the "Utilities"). The business of the Utilities is subject to seasonal fluctuations with the peak period occurring in the winter heating season, typically November through April of each fiscal year. Spire Missouri is a public utility engaged in the purchase, retail distribution and sale of natural gas, with primary offices located in St. Louis, Missouri. Spire Missouri is the largest natural gas distribution utility system in Missouri, serving approximately 1.2 million residential, commercial and industrial customers in St. Louis, Kansas City, and other areas in Missouri. Spire Alabama is a public utility engaged in the purchase, retail distribution and sale of natural gas principally in central and northern Alabama, serving more than 0.4 million residential, commercial and industrial customers with primary offices located in Birmingham, Alabama. Spire Gulf and Spire Mississippi are utilities engaged in the purchase, retail distribution and sale of natural gas to 0.1 million customers in the Mobile, Alabama area and south-central Mississippi.

The Gas Marketing segment includes Spire Marketing Inc. ("Spire Marketing"), a wholly owned subsidiary providing natural gas marketing services.

The Midstream segment includes Spire STL Pipeline LLC ("Spire STL Pipeline") and Spire Storage (consisting of the operations of Spire Storage West LLC and Spire Storage Salt Plains LLC), which are subsidiaries engaged in the transportation and storage of natural gas.

As of September 30, 2023, Spire had 3,589 employees, including 1,967 for Spire Missouri and 802 for Spire Alabama. We believe that:

1. the safety and well-being of our employees is one of our most important responsibilities,
2. the development, education and advancement of employees is key to our sustainability, and
3. embracing an inclusive workforce full of diverse backgrounds and perspectives drives innovation.

We continue to implement processes, procedures and programs that reflect our focus on consistently reducing our employee injury and motor vehicle accident rates. In 2023, we held our 10th annual safety summit, and we encourage employees to identify potential safety improvements in the workplace, which is one of the driving forces behind reducing motor vehicle incidents and work-related injuries. We have also installed safety cameras in all Company vehicles, which are accompanied by driver coaching initiatives, to promote safe driving habits. To support employee wellness, we offer incentives for weight management and gym membership, as well as employee assistance programs to provide counseling services and emotional support, and we have a formalized comprehensive well-being program that focuses on the physical, emotional, social and financial health of every employee.

All employees have access to developmental assessments, customized training, specialized degree programs, and partnerships with best-in-class organizations related to industry courses, leadership and management workshops and computer application development seminars. In addition, all employees are eligible for up to $6,000 per year in tuition assistance and have access to the Spire Learning Center, our robust internal learning management system. In their first year, each construction and maintenance employee receives 80 hours of safety training, while each service and installation employee receives 200 hours of training. Field operations employees average 24 hours of technical and procedural training annually.

We regularly review and adjust our affirmative action plans based on placement and utilization rates, and we strive to create an even more diverse and inclusive work environment. Our Human Rights Policy demonstrates that Spire understands its universal responsibility to respect human rights and provides the basis for publicly affirming our values and embedding the responsibility into Spire's operations and the way we do business.

4

Spire uses its website, SpireEnergy.com, as its primary channel for distribution of important information including news releases, analyst presentations and financial information. The information Spire, Spire Missouri and Spire Alabama file or furnish to the United States (U.S.) Securities and Exchange Commission (SEC), including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and their amendments, and proxy statements are available free of charge under "Filings & reports" in the Investors section of Spire's website, SpireEnergy.com, as soon as reasonably practical after the information is filed with or furnished to the SEC. Information contained on Spire's website is not incorporated by reference in this report. The SEC also maintains a website that contains Spire's SEC filings (sec.gov).

GAS UTILITY

Natural Gas Supply

The Utilities' fundamental gas supply strategy is to meet the two-fold objective of 1) ensuring a dependable gas supply is available for delivery when needed and 2) insofar as is compatible with that dependability, purchasing gas that is economically priced. In structuring their natural gas supply portfolio, the Utilities focus on natural gas assets that are strategically positioned to meet the Utilities' primary objectives.

Spire Missouri focuses its gas supply portfolio around a number of large natural gas suppliers with equity ownership or control of assets strategically situated to complement its regionally diverse firm transportation arrangements. Spire Missouri utilizes Midcontinent, Gulf Coast, Northeast, and Rocky Mountain gas sources to provide a level of supply diversity that facilitates the optimization of pricing differentials as well as protecting against the potential of regional supply disruptions. Further, Spire STL Pipeline may deliver up to 400,000 million British thermal units (MMBtu) per day of natural gas into eastern Missouri, of which Spire Missouri is the foundation shipper with a contractual commitment of 350,000 MMBtu per day.

In fiscal 2023, Spire Missouri purchased natural gas from 24 different suppliers to meet its total service area current gas sales and storage injection requirements. Spire Missouri entered into firm agreements with suppliers including major producers and marketers providing flexibility to meet the temperature-sensitive needs of its customers. Natural gas purchased by Spire Missouri for delivery to its service areas included 50.3 billion cubic feet (Bcf) through the Southern Star Central Gas Pipeline, Inc. (Southern Star) system, 35.8 Bcf through the Enable Mississippi River Transmission LLC (MRT) system, 22.9 Bcf through the Spire STL Pipeline, 6.0 Bcf through the Tallgrass Interstate Gas Transmission, LLC (TIGT) system, 4.3 Bcf through the Panhandle Eastern Pipe Line Company, LP (PEPL) system, and 2.8 Bcf through the Rockies Express Pipeline, LLC (REX) system. Spire Missouri also holds firm transportation arrangements on several other interstate pipeline systems that provide access to gas supplies upstream. Some of Spire Missouri's commercial and industrial customers purchased their own gas with Spire Missouri transporting 51.2 Bcf to them through its distribution system.

The fiscal 2023 peak day send out of natural gas to Spire Missouri East customers, including transportation customers, occurred on December 23, 2022. The average temperature was 6 degrees Fahrenheit in St. Louis, and on that day Spire Missouri East customers consumed 1.04 Bcf of natural gas. This peak day demand was met with natural gas transported to St. Louis through the MRT, Missouri Gas Pipeline LLC, Spire STL Pipeline, and Southern Star transportation systems, and from Spire Missouri's on-system storage.

The fiscal 2023 peak day send out of natural gas to Spire Missouri West customers, including transportation customers, occurred on December 22, 2022. The average temperature was -3 degrees Fahrenheit in Kansas City, and on that day Spire Missouri West customers consumed 0.91 Bcf of natural gas. This peak day demand was met with natural gas transported to Kansas City through the Southern Star, PEPL, TIGT, and REX transportation systems.

Spire Alabama's distribution system is connected to two major interstate natural gas pipeline systems, Southern Natural Gas Company, L.L.C. (Southern Natural Gas) and Transcontinental Gas Pipe Line Company, LLC (Transco). It is also connected to two intrastate natural gas pipeline systems.

Spire Alabama purchases natural gas from various natural gas producers and marketers. Certain volumes are purchased under firm contractual commitments with other volumes purchased on a spot market basis. The purchased volumes are delivered to Spire Alabama's system using a variety of firm transportation, interruptible transportation and storage capacity arrangements designed to meet the system's varying levels of demand.

In fiscal 2023, Spire Alabama purchased natural gas from 24 different suppliers to meet current gas sales, storage injection, and liquefied natural gas (LNG) liquefaction requirements, of which one supplier is under a long-term supply agreement. Approximately 47.8 Bcf was purchased for delivery by Southern Natural Gas, 5.6 Bcf by BBT-AlaTenn, 3.8 Bcf by Transco, and 18.2 Bcf through intrastate pipelines to the Spire Alabama delivery points for its residential, commercial, and industrial customers.

The fiscal 2023 peak day send out for Spire Alabama was 0.6 Bcf of natural gas on December 23, 2022, when the average temperature was 13 degrees Fahrenheit in Birmingham, of which 80% was met with supplies transported through Southern Natural Gas, Transco, and intrastate facilities. The remaining 20% was fulfilled with LNG.

Spire Gulf's distribution system is directly connected to interstate pipelines, natural gas processing plants and gas storage facilities. Spire Gulf buys from a variety of producers and marketers, with BP Energy Company being the primary supplier.

Natural Gas Storage

Spire Missouri believes it currently has ample storage capacity to meet the demands of its distribution system, particularly to augment its supply during peak demand periods. Spire Missouri has a contractual right to store 21.6 Bcf of gas in MRT's storage facility located in Unionville, Louisiana, 16.0 Bcf of gas storage in Southern Star's system storage facilities located in Kansas and Oklahoma, 1.4 Bcf of firm storage on PEPL's system storage, and 1.0 Bcf of firm storage with Spire Storage Salt Plains. MRT's tariffs allow injections into storage from May 1 through November 1 and require the withdrawal from storage of all but 4.3 Bcf from November 1 through May 1. Southern Star tariffs allow both injections and withdrawals into storage year-round with ratchets that restrict the associated flows dependent upon the underlying inventory level per the contracts.

In addition, Spire Missouri supplements pipeline gas with natural gas withdrawn from its own underground storage field located in St. Louis and St. Charles Counties in Missouri. The field is designed to provide approximately 0.35 Bcf of natural gas withdrawals on a peak day and provides the ability to reinject natural gas during the heating season to replenish or increase deliverability, subject to maximum annual net withdrawals of approximately 4.0 Bcf of natural gas based on the inventory level that Spire Missouri plans to maintain.

Spire Alabama has a contractual right to store 12.7 Bcf of gas with Southern Natural Gas, 0.5 Bcf of gas with Gulf South Pipeline, 0.2 Bcf of gas with Transco and 0.2 Bcf of gas with Tennessee Gas Pipeline. In addition, Spire Alabama has 2.0 Bcf of on-system LNG storage that can provide the system with up to an additional 0.2 Bcf of natural gas daily to meet peak day demand.

Spire Gulf obtains adequate storage capacity through Gulf South Pipeline Company, LP, and Enstor Gas, LLC's Bay Gas Storage.

Union Agreements

The Company believes labor relations with its employees are good. Should that condition change, the Company could experience labor disputes, work stoppages or other disruptions that could negatively impact the Company's system operations, customer service, results of operations and cash flows.

The following table presents the Company's various labor agreements as of September 30, 2023:

Union	Local	Employees Covered	Contract Start Date	Contract End Date
Spire Missouri				
United Steel, Paper and Forestry, Rubber Manufacturing, Allied-Industrial and Service Workers International Union (USW)	884	67	August 10, 2021	July 31, 2024

Operating Revenues and Customer Information

The following tables present information on Spire's revenues and volume sold and transported (before intersegment eliminations), and annual average numbers of customers for the three years ended September 30, 2023, 2022 and 2021.

Gas Utility Operating Revenues

(% of Total)	2023	2022	2021
Residential	67%	73%	58%
Commercial & Industrial	25%	17%	28%
Transportation	5%	6%	6%
Other	3%	4%	8%
Total	100%	100%	100%

Gas Utility Volume Sold and Transported

(In millions of CCF)	2023	2022	2021
Residential	965.3	994.7	1,069.6
Commercial & Industrial	468.7	468.9	479.0
Transportation	1,662.9	1,617.6	1,614.7
Interruptible	10.9	11.8	15.0
Total System	3,107.8	3,093.0	3,178.3
Off-System	112.9	82.0	69.4
Total	3,220.7	3,175.0	3,247.7

Gas Utility Customers	2023	2022	2021
Residential	1,621,822	1,618,515	1,612,385
Commercial & Industrial	112,753	113,077	112,635
Transportation	1,013	1,023	846
Interruptible	45	50	63
Total	1,735,633	1,732,665	1,725,929

Total annual average number of customers for Spire Missouri and Spire Alabama for fiscal 2023 was 1,203,003 and 430,290, respectively.

Regulatory Matters

For details on regulatory matters, see Note 15, Regulatory Matters, of the Notes to Financial Statements in Item 8.

Other Pertinent Matters

Spire Missouri is the only distributor of natural gas within its franchised service areas, while Spire Alabama is the main distributor of natural gas in its service areas. Spire Missouri and Spire Alabama have franchises in nearly all the communities where they provide service with terms varying from five years to an indefinite duration. A franchise is essentially a municipal permit to install and maintain pipes and construct other facilities in the community. All of the franchises are free from unduly burdensome restrictions and are adequate for the conduct of Spire Missouri's and Spire Alabama's current public utility businesses in their respective states. In recent years, although certain franchise agreements have expired, the Utilities have continued to provide service in those communities without formal franchises.

The principal competition for the Utilities comes from the local electric companies. Other competitors in the service areas include suppliers of fuel oil, coal, and propane, as well as natural gas pipelines that can directly connect to large volume customers. Coal has been price competitive as a fuel source for very large boiler plant loads, but environmental requirements have shifted the economic advantage to natural gas. Oil and propane can be used to fuel boiler loads and certain direct-fired process applications, but these fuels require on-site storage, thus limiting their competitiveness. Competition also comes from district steam systems in the downtown areas of both St. Louis and Kansas City and from municipally or publicly owned natural gas distributors located adjacent to

the Alabama service territories. Direct use of renewables will continue to grow in the future and compete against distributed generation using natural gas.

Residential, commercial, and industrial customers represent approximately 95% and 83% of fiscal 2023 operating revenues for Spire Missouri and Spire Alabama, respectively. Given the current level of natural gas supply and market conditions, the Utilities believe that the relative comparison of natural gas equipment and operating costs with those of competitive fuels will not change significantly in the foreseeable future, and that these markets will continue to be supplied by natural gas. In new multi-family and commercial rental markets, the Utilities' competitive exposures are presently limited to space and water heating applications.

Spire Missouri and Spire Alabama offer gas transportation service to its large commercial and industrial customers. Transportation customers represent approximately 2% and 14% of fiscal 2023 operating revenues for Spire Missouri and Spire Alabama, respectively. The Spire Missouri tariff approved for that type of service produces a margin similar to that which Spire Missouri would have received under their regular sales rates. Similarly, Spire Alabama's tariff is based on Spire Alabama's sales profit margin so that operating margins are unaffected.

The Utilities are subject to various environmental laws and regulations that, to date, have not materially affected the Utilities' or the Company's financial position and results of operations. For a detailed discussion of environmental matters, see Note 16, Commitment and Contingencies, of the Notes to Financial Statements in Item 8.

GAS MARKETING

Spire Marketing is engaged in the marketing of natural gas and related services throughout the U.S., which includes customers within and outside of the Utilities' service areas. For fiscal 2023 and 2022, Spire Marketing volumes averaged 1.40 Bcf/day and 1.73 Bcf/day, respectively. The majority of Spire Marketing's business is derived from the procurement and physical delivery of natural gas to a diverse customer base, primarily in the central and southern U.S. Through its retail operations, Spire Marketing offers natural gas marketing services to large commercial and industrial customers, while its wholesale business consists of producers, pipelines, power generators, municipalities, storage operators, and utility companies. Wholesale activities currently represent a majority of the total Gas Marketing business. The Gas Marketing strategy is to leverage its market expertise and risk management skills to manage and optimize the value of its portfolio of commodity, transportation, park and loan, and storage contracts while controlling costs and acting on new marketplace opportunities.

In the course of its business, Spire Marketing enters into agreements to purchase natural gas at a future date in order to lock up supply to cover future sales commitments to its customers. To secure access to the markets it serves, Spire Marketing contracts for transportation capacity on various pipelines from pipeline companies directly and from other parties through the secondary capacity market. Throughout fiscal 2023, Spire Marketing held approximately 1 Bcf per day of firm transportation capacity. In addition, to ensure reliability of service and to provide operational flexibility, Spire Marketing enters into firm storage contracts and interruptible park and loan transactions with various companies, where it is able to buy and retain gas to be delivered at a future date, at which time it sells the natural gas to third parties. As of September 30, 2023, Spire Marketing has contracted for approximately 18 Bcf of such storage and park and loan capacity for the 2023-2024 winter season.

Table of Contents

MIDSTREAM

Spire Midstream consists of three facilities located in the U.S.: Spire STL Pipeline, Spire Storage West, and Spire Storage Salt Plains.

Spire STL Pipeline owns and operates a 65-mile pipeline connecting the Rockies Express Pipeline in Scott County, Illinois, to multiple delivery points in St. Louis County, Missouri, including Spire Missouri. Spire STL Pipeline's operating revenue is derived primarily from Spire Missouri as its foundation shipper. The pipeline is under the jurisdiction of the Federal Energy Regulatory Commission (FERC).

Spire Storage West is engaged in the storage of natural gas serving markets primarily in the western region of the U.S. The facility is located in southwestern Wyoming and consists of two storage fields operating under one FERC market-based rate tariff currently authorized to provide up to 55 Bcf of storage capacity to customers. The actual storage capacity was 23 Bcf as of September 30, 2023, and management is in the process of expanding it to 39 Bcf by 2025.

Spire Storage Salt Plains is located in north central Oklahoma and serves markets in the midcontinent and midwestern U.S. The facility operates under intrastate regulation and has a certificated capacity of 13 Bcf and working capacity of 10 Bcf.

OTHER

Other components of the Company's consolidated information include Spire's subsidiaries engaged in the operation of a propane pipeline and risk management, among other activities, and unallocated corporate items, including certain debt and associated interest costs.

Item 1A. Risk Factors

Spire's, Spire Missouri's and Spire Alabama's businesses and financial results are subject to a number of risks and uncertainties, including those set forth below. The risks described below are those management considers to be material. When considering any investment in these companies' securities, investors should carefully consider the following information, as well as information contained in the caption "Forward-Looking Statements," Item 7A, and other documents Spire, Spire Missouri, and Spire Alabama file with the SEC. This list is not exhaustive, and management places no priority or likelihood based on the risk descriptions, order of presentation or grouping.

RISKS AND UNCERTAINTIES THAT RELATE TO REGULATORY, LEGISLATIVE AND LITIGATION FACTORS

Regulatory and legislative developments in the energy industry related to climate change or in support of increased energy efficiency may adversely affect operations and financial results.

There have been a number of federal, state and local legislative and regulatory initiatives proposed in recent years in an attempt to control or limit the effects of global warming and overall climate change, including greenhouse gas emissions, such as methane and carbon dioxide. Adoption of this type of legislation by Congress or similar legislation by states or localities, or the adoption of related regulations by federal, state or local governments mandating a substantial reduction in greenhouse gas emissions, restricting the use of fossil fuels, such as natural gas, or restricting the construction of infrastructure could have far-reaching and significant impacts on the energy industry. Such new legislation or regulations could result in increased compliance costs or additional operating restrictions, adversely affect the demand for natural gas and/or midstream services, or impact the prices charged to customers, potentially reducing customer growth opportunities and/or increasing the cost of doing business.

In addition, legislative and regulatory initiatives by the federal, state and local governments addressing greenhouse gas emissions or restricting the use of natural gas could adversely affect customer demand. The promulgation of regulations of the emissions of greenhouse gases and efficiency for residential gas furnaces and other gas appliances or the potential enactment of congressional legislation addressing global warming and climate change may decrease customer usage, encourage fuel switching from gas to other energy forms, and may result in future additional compliance costs that could impact the Utilities' financial conditions and results of operations. At this time, we cannot predict the potential impact of such laws or regulations that may be adopted on the Company's and the Utilities' future business, financial condition or financial results.

Regulation of the Utilities' businesses may impact rates they are able to charge, costs, and profitability.

The Utilities are subject to regulation by federal, state and local authorities. At the state level, the Utilities are regulated in Missouri by the Missouri Public Service Commission (MoPSC), in Alabama by the Alabama Public Service Commission (APSC), and in Mississippi by the Mississippi Public Service Commission (MSPSC). These state public service commissions regulate many aspects of the Utilities' distribution operations, including construction and maintenance of facilities, operations, safety, the rates the Utilities may charge customers, the terms of service to their customers, transactions with their affiliates, the rate of return they are allowed to realize, and the accounting treatment for certain aspects of their operations. For further discussion of these accounting matters, see Regulatory Accounting under Critical Accounting Estimates in Item 7.

Accounting for the economics of rate regulation affects multiple financial statement line items (such as property, plant, and equipment; regulatory assets and liabilities; operating revenues; and operating expenses) and affects multiple disclosures in the Company's financial statements. There is a risk that the state public service commissions will not approve full recovery of the costs of providing utility service or recovery of all amounts invested in the utility business and a reasonable return on that investment. A material disallowance of deferred costs could adversely affect the Utilities' results of operations.

The MoPSC also approves Spire Missouri's Infrastructure System Replacement Surcharge (ISRS). The ISRS allows Spire Missouri expedited recovery for its investment to upgrade its infrastructure and enhance its safety and reliability without the necessity of a formal rate case. Such investments are subject to review, and there is risk that any material disallowance of costs under ISRS could adversely affect the timing of revenues and cash flows.

The Utilities' ability to obtain and timely implement rate increases and rate supplements to maintain the current rate of return is subject to regulatory review and approval. There can be no assurance that they will be able to obtain rate increases or rate supplements or continue earning the current authorized rates of return. Spire Alabama's and Spire Gulf's rate setting process, Rate Stabilization and Equalization (RSE), is subject to regulation by the APSC and is implemented pursuant to APSC orders expiring September 30, 2025. RSE adjustments would continue after that date unless the APSC enters an order to the contrary in a manner consistent with the law. Spire Mississippi is subject to regulation by the MSPSC and utilizes the Rate Stabilization Adjustment (RSA) Rider. For further details, see Note 15, Regulatory Matters, of the Notes to Financial Statements in Item 8.

The Utilities could incur additional costs if required to adjust to new laws or regulations, revisions to existing laws or regulations or changes in interpretations of existing laws or regulations. In addition, as the regulatory environment for the natural gas industry increases in complexity, the risk of inadvertent noncompliance could also increase. If the Utilities fail to comply with applicable laws and regulations, whether existing or new, they could be subject to fines, penalties, business interruption or other enforcement action by the authorities that regulate the Utilities' operations.

Federal safety and integrity regulations related to pipeline and storage operators and owners of critical infrastructure may impose significant costs and liabilities on the Company.

The U.S. Pipeline and Hazardous Materials Safety Administration (PHMSA) requires pipeline and natural gas storage operators to develop integrity management programs to evaluate their pipelines comprehensively and to take additional measures to protect pipeline segments located in areas where a leak or rupture could potentially do the most harm.

The Company is required to maintain programs that are intended to assess pipeline integrity. Any repair, remediation, preventative or mitigating actions may require significant capital and operating expenditures. PHMSA constantly updates its regulations to ensure the highest levels of pipeline safety. As the operator of pipelines, Spire is required to:

- perform ongoing assessments of pipeline integrity;
- identify and characterize applicable threats to pipelines;
- improve data collection, integration and analysis;
- repair and remediate the pipeline as necessary; and
- implement preventative and mitigating actions.

The Transportation Security Administration (TSA) requires owners and operators of specified pipeline facilities to take action to prevent disruption and degradation to their infrastructure to achieve the following security outcomes:

- develop network segmentation policies and controls;
- create access control measures to secure and prevent unauthorized access to critical cyber systems;
- build continuous monitoring and detection policies and procedures to detect threats and correct anomalies; and
- reduce the risk of exploitation of unpatched systems in a timely manner using a risk-based methodology.

As such, pipeline owners and operators are required to establish and execute a TSA-approved Cybersecurity Implementation Plan, develop and maintain a Cybersecurity Incident Response Plan, and establish a Cybersecurity Assessment Program.

Costs to comply with these and other such future safety and integrity regulations are significant. Additionally, should the Company fail to comply with applicable statutes, rules, regulations and orders, it could be subject to significant fines, penalties, business interruption or other enforcement actions.

Environmental laws and regulations may require significant expenditures or increase operating costs.

The Utilities and Midstream companies are subject to federal, state and local environmental laws and regulations affecting many aspects of their present and future operations. These laws and regulations require these businesses to obtain and comply with a wide variety of environmental licenses, permits, inspections, and approvals. Failure to comply with these laws and regulations and failure to obtain any required permits and licenses may result in costs in the form of fines, penalties, business interruptions or other enforcement actions, which may be material. In addition, existing environmental laws and regulations could be revised or reinterpreted and/or new laws and

regulations could be adopted or become applicable to these companies or their facilities, thereby impacting the cost of compliance. The discovery of presently unknown environmental conditions, including former manufactured gas plant sites, and adverse claims under environmental laws and regulations may result in expenditures and liabilities, which could be material. To the extent environmental compliance costs are self-insured, or not fully covered by insurance or recovered in rates from customers, those costs may have an adverse effect on financial condition and results of operations.

The Utilities' liquidity may be adversely affected by delays in recovery of their costs, due to regulation.

In the normal course of business, there is a lag between when the Utilities incur increases in certain of their costs and the time in which those costs are considered for recovery in the ratemaking process. Cash requirements for increased gas supply costs, operating costs, increased funding levels of defined benefit pension and postretirement costs, capital expenditures, interest expense and other increases in the costs of doing business, including inflation, can require outlays of cash prior to the authorization of increases in rates charged to customers, as approved by the MoPSC, APSC, or MSPSC. Accordingly, the Utilities' liquidity can be adversely impacted to the extent higher costs are not timely recovered from their customers.

Changes to income tax policy, certain tax elections, tax regulations and future taxable income could adversely impact the Company's financial condition and results of operations.

The Company has significantly reduced its current federal and state income tax obligations over the past few years through tax planning strategies and application of tax rules which included the use of bonus depreciation deductions for certain expenditures for property. As a result, the Company generated large annual taxable losses that have resulted in significant federal and state net operating losses. The Company plans to utilize these net operating losses in the future. The value of these net operating losses could be reduced if the Company cannot generate enough taxable income in the future to utilize all of the net operating losses generated prior to the Tax Cuts and Jobs Act of 2017 before they expire due to income tax policy changes, lower-than-expected financial performance and/or regulatory actions.

Changes to income tax policy, laws and regulations, including but not limited to changes in tax rates, the deductibility of certain expenses including interest and/or changes in the deductibility of certain expenditures for property, could adversely impact the Company. Those impacts could include reducing the value of its net operating losses and could result in material charges to earnings. Further, the Company's financial condition and results of operations may be adversely impacted. Notably, the Inflation Reduction Act became effective on August 16, 2022. This new law provides various tax credits and incentives with respect to clean energy. The Company is still evaluating the impact and applicability of these programs to its operations, but they are not expected to have a material impact on the Company.

The Company may be involved in legal or administrative proceedings before various courts and governmental bodies that could adversely affect its results of operations and financial condition.

The Company may be involved in legal or administrative proceedings before various courts and governmental bodies with respect to general claims, rates, environmental issues, gas cost prudence reviews and other matters. For further details, see Contingencies in Note 16 to the financial statements in Item 8. Adverse decisions regarding these matters, to the extent they require the Company to make payments in excess of amounts provided for in its financial statements, or to the extent they are self-insured or not covered by insurance, could adversely affect the results of operations and financial condition.

Commodity markets and derivative instruments are regulated by federal agencies, and new developments in this area may adversely impact Spire Marketing's results of operations and financial condition.

As a participant in the natural gas market, Spire Marketing is subject to applicable statutes, rules, regulations and orders administered by FERC and the Commodity Futures Trading Commission (CFTC), including those directed generally to prevent fraud or manipulation involving natural gas transactions (physical or financial transactions). Spire Marketing could be subject to fines, penalties, business interruption or other enforcement actions by the FERC or CFTC, or both, for failure to comply with such rules. New regulatory and legislative actions may adversely impact Spire Marketing's results of operations and financial condition by potentially reducing customer growth opportunities and/or increasing the costs of doing business.

Spire Marketing uses bilateral contracts and derivative instruments such as futures contracts, options and swaps to hedge or mitigate ongoing commercial risks. Most standardized swaps, under the Dodd-Frank Act and regulations from the CFTC, are required to be cleared through a registered clearing facility and traded on a designated exchange or swap execution facility, subject to certain exceptions. These regulations may also require compliance with certain margin requirements for over-the-counter derivative contracts with certain regulated

entities, which could adversely affect liquidity and ability to use derivatives to hedge risks. In addition, the CFTC's rules require companies, including Spire Marketing, to maintain regulatory records of swap transactions, and to report swaps to centralized swap data repositories, among other compliance obligations.

Although Spire Marketing may qualify for exceptions to certain of these CFTC rules, its derivatives counterparties are likely subject to capital, margin, documentation and business conduct requirements imposed as a result of the Dodd-Frank Act. These obligations may increase transaction costs and may make it more difficult for Spire Marketing to enter into hedging transactions on favorable terms or affect the number and/or creditworthiness of available swap counterparties. In that event, Spire Marketing's inability to enter into derivatives instruments or other commercial risk hedging transactions on favorable terms, or at all, could increase operating expenses and expose it to unhedged commercial risks, including potential adverse changes in commodity prices.

In October 2020, the CFTC finalized its rules that modify and expand the applicability of speculative position limits on the amounts of certain futures contracts (including options thereon), cash-settled "lookalike" contracts for or linked to the commodities underlying the foregoing futures contracts, as well as economically equivalent swaps containing "identical material" contractual specifications, terms and conditions as the foregoing contracts. While Spire Marketing anticipates qualifying for a bona fide hedging exemption from such limits, the CFTC's final rules and earlier adopted aggregation rules may cause Spire Marketing's hedging strategies described above to be limited if Spire Marketing is unable to qualify for an exemption.

RISKS THAT RELATE TO OPERATIONAL FACTORS

The Company's ability to meet its customers' natural gas requirements may be impaired if contracted gas supplies, interstate pipeline and/or storage services are not available or delivered in a timely manner.

In order to meet their customers' annual and seasonal natural gas demands, the Utilities must obtain sufficient supplies, interstate pipeline capacity, and storage capacity. If they are unable to obtain these, either from their suppliers' inability to deliver the contracted commodity or the inability to secure replacement quantities, to the extent not mitigated by tariffs, contractual indemnification or insurance, the Utilities' financial condition and results of operations may be adversely impacted. If a substantial disruption in interstate natural gas pipelines' transmission and storage capacity were to occur during periods of heavy demand, the Utilities' financial results could be adversely impacted.

Spire Marketing's ability to deliver natural gas to its customers is contingent upon the performance of its suppliers and capability of pipeline and storage operators to fulfill delivery obligations to Spire Marketing under firm contracts. To the extent that it is unable to obtain the necessary supplies, Spire Marketing's financial position and results of operations may be adversely impacted.

Midstream is dependent upon third-party pipelines and other facilities to provide delivery options to and from its facilities. If any pipeline connection were to become unavailable for volumes of natural gas due to repairs, damage to the facility, lack of capacity or any other reason, the ability to continue receiving or delivering natural gas could be restricted, and to the extent not mitigated by contractual indemnification, insurance or tariffs, would thereby reduce its revenues. Any permanent interruption that causes a material reduction in volumes could result in an impairment loss that could have a material adverse effect on the financial condition and results of operations.

Transporting, distributing, and storing natural gas and propane involves numerous risks that may result in accidents and other operating risks.

Natural gas transportation, distribution and storage activities inherently involve a variety of integrity issues, hazards and operations risks, such as leaks, accidental explosions, blowouts, damage caused by third parties, and mechanical problems, which could cause substantial financial losses. In addition, these risks could result in serious injury to employees and non-employees, loss of human life, significant damage to property, environmental pollution, impairment of operations, and substantial losses to the Company and its subsidiaries. The location of pipelines and storage facilities near populated areas, including residential areas, commercial business centers, and industrial sites, could increase the level of damages resulting from these risks. Similar risks also exist for Spire Missouri's propane storage, transmission and minor distribution operations. These activities may subject the Company to litigation or administrative proceedings. Such litigation or proceedings could result in substantial monetary judgments, fines, penalties, business interruption or other enforcement actions against the Company and its subsidiaries or be resolved on unfavorable terms. In accordance with customary industry practices, the Utilities and other Spire businesses maintain insurance against a significant portion, but not all, of these risks and losses. To the extent the occurrence of any of these events is self-insured or not fully covered by

insurance, it could adversely affect the financial condition and results of operations of the Company and its subsidiaries.

Because of competition, the Company may not be able to retain existing customers or acquire new customers, or may be unsuccessful in retaining or acquiring contractual assets on favorable terms, which could have an adverse impact on its business, results of operations and financial condition.

The Utilities face the risk that larger commercial or industrial customers may bypass gas distribution services by directly connecting with interstate pipelines or, in the case of Spire Alabama and Spire Gulf, also from municipally or publicly owned gas distributors located adjacent to its service territory. The Utilities cannot provide any assurance that increased competition will not have a material adverse effect on their business, financial condition or results of operations.

The Utilities compete with distributors offering a broad range of services and prices, from full-service distributors to those offering delivery only. The Utilities also compete for retail customers with suppliers of alternative energy products, principally propane and electricity, and to a growing extent, distributed sources of renewable energy. If they are unable to compete effectively, the Utilities may lose existing customers and/or fail to acquire new customers, which in the aggregate could have a material adverse effect on their business, results of operations and financial condition. Along those lines, changes in wholesale natural gas prices compared with prices for electricity, fuel oil, coal, propane, or other energy sources can significantly impact the cost of delivered natural gas, which may affect the Utilities' retention of natural gas customers and may adversely impact their financial condition and results of operations.

Spire Storage is subject to competition from similar services provided by pipelines and from competing independent storage providers capable of serving its customers. Natural gas storage is a competitive business, with competitors having the ability to expand storage capacity. Increased competition in the natural gas storage business could reduce the demand and drive rates down for the Company's natural gas storage services.

Also, Spire Marketing profitability may be impacted by the effects of the expiration, in the normal course of business, of certain of its natural gas supply, sales, transportation and storage contracts if, because of competition or other reasons, those contracts cannot be replaced and/or renewed with arrangements with similar terms and pricing.

Significantly warmer-than-normal weather conditions and the effects of climate change may affect the Utilities' sale of heating energy and adversely impact their financial position and results of operations.

The Utilities' earnings are primarily generated by the sale of heating energy. Spire Missouri and Spire Mississippi each have a Weather Normalization Adjustment rider, Spire Alabama has a Temperature Adjustment Rider, and Spire Gulf has a Weather Impact Normalization Factor. These mechanisms, approved by the respective state regulatory body, provide better assurance of the recovery of fixed costs and margins during winter months despite variations in sales volumes due to the impacts of weather, while the annual rate designs of Alabama and Mississippi help adjust for other factors that affect customer usage. However, significantly warmer-than-normal weather conditions in the Utilities' service areas and other factors, such as climate change, alternative energy sources and increased efficiency of gas furnaces and other appliances, may result in reduced profitability and decreased cash flows attributable to lower gas sales. Furthermore, these mechanisms do not fully mitigate the impact of warmer weather and continuation of these adjustment factors is subject to regulatory discretion.

To the extent climate change results in warmer temperatures, financial results could be adversely affected through lower gas volumes and revenues and reduced marketing opportunities. Management believes it is likely that any such resulting impacts would occur over a long period of time and thus would be difficult to quantify with any degree of specificity. Another possible impact of climate change may be more frequent and more severe weather events, such as significant wind or flooding events, which could increase costs to repair damaged facilities and restore service to customers or result in lost revenues if the Company were unable to deliver natural gas to customers. Such weather events could also disrupt our usual gas supplies and make it impossible or extremely costly to find replacement gas for our customers. To the extent such impacts are self-insured, or not covered by insurance or recovered in rates, the foregoing events could have a material adverse effect on the Company's financial condition and results of operations.

The Company's natural gas storage business includes inherent geologic and operational risks.

The Company plans to continue to increase capacity, improve operating performance, and improve the integrity of its storage fields and associated above-ground facilities of Spire Storage. Construction of such assets is subject to various risks and uncertainties, including supply chain and labor disruptions, weather conditions during construction, equipment failures and construction quality issues. Any such disruptions, as well as any negative effects from the risks discussed below, could result in an impairment of Spire's investment in the project, and such impairment could have a material adverse effect on the Company's financial condition and results of operations.

Any damage to the Spire Storage facilities or pipelines, or lack of integrity to its storage fields, including damages caused by a blow-out, to the extent such impacts are self-insured or not covered by insurance, could have a material adverse effect on the Company's financial condition and results of operations.

The Company does not own all the land on which its storage facilities were constructed, and it is, therefore, subject to the possibility of more onerous terms or increased costs to retain necessary land use, if and when applicable property rights expire or are renewed. Changes in the terms of such land use could have an adverse impact on the financial condition and results of operations of the Company's storage business.

Increased dependence on technology may hinder the Company's business operations and adversely affect their financial condition and results of operations if such technologies fail.

The Company has implemented or acquired a variety of technological tools including both Company-owned information technology and technological services provided by outside parties. These tools and systems support critical functions including the Company's integrated planning, scheduling and dispatching of field resources, its automated meter reading system, customer care and billing, procurement and accounts payable, operational plant logistics, management reporting, and external financial reporting. The failure of these or other similarly important technologies, or the Company's inability to have these technologies supported, updated, expanded, or integrated into other technologies, could hinder its business operations and, to the extent such impacts are self-insured or not covered by insurance, could adversely impact its financial condition and results of operations.

Although the Company has, when possible, developed alternative sources of technology and built redundancy into its computer networks and tools, there can be no assurance these efforts to date would protect against all potential issues related to the loss of any such technologies or the Company's use of such technologies.

A cyberattack may disrupt the Company's operations or lead to a loss or misuse of confidential and proprietary information or potential liability.

The Company is subject to cybersecurity risks primarily related to breaches of security pertaining to sensitive customer, employee, and vendor information maintained by the Company, its subsidiaries, or its third-party vendors in the normal course of business, as well as breaches in the technology that manages natural gas supply and control operations and other business processes. A loss of confidential or proprietary data or security breaches of technology for operations or business processes could adversely affect the Company's reputation, diminish customer confidence, disrupt operations, and subject the Company to possible financial liability, any of which could have a material effect on its financial condition and results of operations.

The Company acknowledges increased dependence on technology increases its exposure to cyberattack. The Company closely monitors both preventive and detective measures to manage these risks and maintain cyber risk insurance to mitigate a significant portion, but not all, of these risks and losses. To the extent that the occurrence of any of these cyber events is self-insured or not covered by insurance, it could adversely affect the Company's financial condition and results of operations.

The Company's business activities are concentrated in a few states and regions.

The Utilities provide natural gas distribution services to customers in Alabama, Mississippi, and Missouri. Midstream is focused on the Rocky Mountain/Western and Midcontinent regions. Changes in the regional economies, politics, regulations and weather patterns of these states could negatively impact growth opportunities and the usage patterns and financial condition of customers and could adversely affect earnings, cash flows, and financial position.

RISKS THAT RELATE TO FINANCIAL, ECONOMIC AND MARKET FACTORS

As a holding company, Spire depends on its operating subsidiaries to meet its financial obligations.

Spire is a holding company with no significant assets other than the stock of its operating subsidiaries and cash investments. Spire, and Spire Missouri prior to the holding company's formation in 2000, has paid common stock dividends continuously since 1946. Spire's ability to pay dividends to its shareholders is dependent on the ability

of its subsidiaries to generate sufficient net income and cash flows to pay upstream dividends and make loans or loan repayments.

A downgrade in Spire's and/or its subsidiaries' credit ratings and/or reduced access to credit and capital markets may negatively affect its cost of capital or prevent it from executing operating strategies.

Currently, Spire, Spire Missouri, and Spire Alabama have investment-grade credit ratings. There is no assurance such credit ratings for any of these companies will remain in effect for any given period of time or such ratings will not be lowered, suspended or withdrawn entirely by the rating agencies, if, in each rating agency's judgment, circumstances so warrant. Spire has a working capital line of credit to meet its short-term liquidity needs. Spire's line of credit may be used to meet the liquidity needs of any of its subsidiaries, subject to sublimits. If the rating agencies lowered the credit rating at any of these entities, particularly below investment grade, it might significantly limit that entity's ability to secure new or additional credit facilities and would increase its costs of borrowing. Spire's and the Utilities' ability to borrow under current or new credit facilities and costs of that borrowing have a direct impact on their ability to execute their operating strategies.

Spire Marketing relies on its cash flows, ability to effect net settlements with counterparties, parental guaranties, and access to Spire's liquidity resources to satisfy its credit and working capital requirements. Spire Marketing's ability to rely on parental guaranties is dependent upon Spire's financial condition and credit ratings. If Spire's credit ratings were lowered, particularly below investment grade, counterparty acceptance of parental guaranties may diminish, resulting in decreased availability of credit. Additionally, under such circumstances, certain counterparties may require Spire Marketing to provide prepayments or cash deposits, amounts of which would be dependent upon natural gas market conditions. Reduced access to credit or increased credit requirements, which may also be caused by factors such as higher overall natural gas prices, may limit Spire Marketing's ability to enter into certain transactions. In addition, Spire Marketing has concentrations of counterparty credit risk in that a significant portion of its transactions are with (or are associated with) utility companies and their marketing affiliates. The concentration of counterparties has the potential to affect the Company's overall exposure to credit risk, either positively or negatively, in that customers in this group may be affected similarly by changes in economic, industry, or other conditions. Spire Marketing also has concentrations of credit risk in certain individually significant counterparties. Spire Marketing closely monitors its credit exposure and, although uncollectible amounts have not been significant, increased counterparty defaults are possible and may result in financial losses and/or capital limitations.

Regional supply/demand imbalances, fluctuations in natural gas commodity prices, changes in the terms and rates charged by midstream facilities, and infrastructure projects may adversely impact the future profitability of the Company.

Competition in the marketplace and fluctuations in natural gas commodity prices have a direct impact on Spire Marketing. Changing market conditions and prices, the narrowing of regional and seasonal price differentials and limited future price volatility may adversely impact its sales margins or affect its ability to procure gas supplies and/or to serve certain customers, which may reduce sales profitability and/or increase certain credit requirements caused by reductions in netting capability. Although the FERC regulates the interstate transportation of natural gas and establishes the general terms and conditions under which Spire Marketing may use interstate gas pipeline capacity to purchase and transport natural gas, Spire Marketing must occasionally renegotiate its transportation agreements with a concentrated group of pipeline companies. Renegotiated terms of new agreements, or increases in FERC-authorized rates of existing agreements, may impact Spire Marketing's future profitability. Profitability may also be adversely impacted if pipeline capacity or future storage capacity secured is not fully utilized.

Storage businesses are affected by various gas market fundamentals which impact the level of demand for storage services and the rates that can be charged for these services. These market fundamentals include: seasonal price spread; monthly, daily and hourly price volatility; locational basis for pricing points on pipelines connected to a storage facility; seasonal, daily and hourly weather; and operational impacts in supply and market areas served by a storage facility and its connected pipelines. These fundamentals have varying and potentially material adverse impacts on the various services offered by storage facilities and the rates that can be charged for these services in the market. These services include long-term firm storage, short-term park and loan, wheeling, and optimization. Rates below the variable costs to operate a storage facility could result in a decision to not operate all the capacity in the facility or to operate the facility at a loss if required to fulfill firm customer contract obligations. A sustained decline in these rates or a shut-in of all or a portion of one or more facilities' capacity could have an adverse impact on the Company's financial condition and results of operations.

17

Spire Missouri's and Spire Alabama's income from off-system sales and capacity release is subject to fluctuations in market conditions and changing supply and demand conditions in areas the Utilities hold pipeline capacity rights. Specific factors impacting the Utilities' income from off-system sales and capacity release include the availability of attractively priced natural gas supply, availability of pipeline capacity, and market demand. Income from off-system sales and capacity release is shared with customers. Spire Missouri and Spire Alabama are allowed to retain 25% of the net margins achieved as a result of such off-system sales and capacity release. The Utilities' ability to retain such income in the future is also subject to regulatory discretion.

Rapid significant increases in natural gas prices may adversely affect the Utilities' liquidity and, in certain circumstances, results of operations.

The tariff rate schedules of Spire Missouri, Spire Gulf and Spire Mississippi contain Purchased Gas Adjustment (PGA) clauses and Spire Alabama's tariff rate schedule contains a Gas Supply Adjustment (GSA) rider that permit the Utilities to file for rate adjustments to recover the cost of purchased gas. Changes in the cost of purchased gas are flowed through to customers and may affect uncollectible amounts and cash flows and can therefore impact the amount of capital resources.

Currently, Spire Missouri is allowed to adjust the gas cost component of rates up to four times each year while Spire Alabama and Spire Gulf (collectively, the "Alabama Utilities") and Spire Mississippi may adjust the gas cost component of their rates on a monthly basis. Spire Missouri must make a mandatory gas cost adjustment at the beginning of the winter, in November, and during the next twelve months may make up to three additional discretionary gas cost adjustments, so long as each of these adjustments is separated by at least two months.

The MoPSC typically approves the Spire Missouri PGA changes on an interim basis, subject to refund and the outcome of a subsequent audit and prudence review. Due to such review process, there is a risk of a disallowance of full recovery of these costs. Any material disallowance of purchased gas costs would adversely affect results of operations. The Alabama Utilities' gas supply charges are submitted for APSC review on a monthly basis, regardless of whether there is a request for a change, so prudence review occurs on an ongoing basis. Spire Mississippi's PGA is adjusted on a monthly basis for the most recent charges and is filed at the MSPSC on a monthly basis.

Increases in the prices the Utilities charge for gas may also adversely affect revenues because they could lead customers to reduce usage and cause some customers to have trouble paying the resulting higher bills. These higher prices may increase bad debt expenses and ultimately reduce earnings. Rapid increases in the price of purchased gas may result in an increase in short-term debt.

To lower financial exposure to commodity price fluctuations, Spire Missouri enters into contracts to hedge the forward commodity price of its natural gas supplies. As part of this strategy, Spire Missouri may use fixed-price forward physical purchase contracts, swaps, futures, and option contracts. However, Spire Missouri does not hedge the entire exposure of energy assets or positions to market price volatility, and the coverage will vary over time. Any costs, gains, or losses experienced through hedging procedures, including carrying costs, generally flow through the PGA clause, thereby limiting Spire Missouri's exposure to earnings volatility. However, variations in the timing of collections of such gas costs under the PGA clause and the effect of cash payments for margin deposits associated with Spire Missouri's use of natural gas derivative instruments may cause short-term cash requirements to vary. These procedures remain subject to prudence review by the MoPSC.

Other than fixed-price forward physical purchase contracts, Spire Alabama, Spire Gulf, and Spire Mississippi currently do not utilize risk mitigation strategies that incorporate commodity hedge instruments, but Spire Alabama has the ability to do so through its GSA.

Risk management policies, including the use of derivative instruments, may not fully protect Spire Marketing's sales and results of operations from volatility and may result in financial losses.

In the course of its business, Spire Marketing enters into contracts to purchase and sell natural gas at fixed prices and index-based prices. Commodity price risk associated with these contracts has the potential to impact earnings and cash flows. To minimize this risk, Spire Marketing has a risk management policy that provides for daily monitoring of a number of business measures, including fixed price commitments.

Spire Marketing currently manages the commodity price risk associated with fixed-price commitments for the purchase or sale of natural gas by either closely matching the offsetting physical purchase or sale of natural gas at fixed prices or through the use of natural gas futures, options, and swap contracts traded on or cleared through the New York Mercantile Exchange, Inc. and/or the Intercontinental Exchange to lock in margins. These exchange-traded/cleared contracts may be designated as cash flow hedges of forecasted transactions. However, market conditions and regional price changes may cause ineffective portions of matched positions to result in financial losses. Additionally, to the extent that Spire Marketing's natural gas contracts are classified as trading activities or do not otherwise qualify for the normal purchases or normal sales designation (or the designation is not elected), the contracts are recorded as derivatives at fair value each period. Accordingly, the associated gains and losses are reported directly in earnings and may cause volatility in results of operations. Gains or losses (realized and unrealized) on certain wholesale purchase and sale contracts, consisting of those classified as trading activities, are required to be presented on a net basis (instead of a gross basis) in the statements of consolidated income. Such presentation could result in volatility in the Company's operating revenues.

Spire's pension and other postretirement benefit plans are subject to investment and interest rate risk that could negatively impact its financial condition.

Spire and its subsidiaries have pension and other postretirement benefit plans that provide benefits to many of their employees and retirees. Costs of providing benefits and related funding requirements of these plans are subject to changes in the market value of the assets that fund the plans. The funded status of the plans and the related costs reflected in the Company's financial statements are affected by various factors, which are subject to an inherent degree of uncertainty, including economic conditions, financial market performance, interest rates, life expectancies and demographics. Recessions and volatility in the domestic and international financial markets have negatively affected the asset values of the Company's pension plans at various times in the past. Poor investment returns or lower interest rates may necessitate accelerated funding of the plans to meet minimum federal government requirements, which could have an adverse impact on the Company's financial condition and results of operations. For more information, including regulatory provisions affecting the Utilities' plans, see Note 13, Pension Plans and Other Postretirement Benefits, of the Notes to Financial Statements in Item 8.

In connection with acquisitions, Spire and Spire Missouri recorded goodwill and long-lived assets that could become impaired and adversely affect its financial condition and results of operations.

Spire and Spire Missouri assess goodwill for impairment annually or more frequently if events or circumstances occur that would more likely than not reduce the fair value of a reporting unit below its carrying value. The Company and Spire Missouri assess their long-lived assets for impairment whenever events or circumstances indicate an asset's carrying amount may not be recoverable. To the extent the value of goodwill or long-lived assets becomes impaired, the Company and Spire Missouri may be required to incur impairment charges that could have a material impact on their results of operations.

Since interest rates are a key component, among other assumptions, in the models used to estimate the fair values of the Company's reporting units, rises in interest rates would generally decrease the calculated fair values and future impairments may occur. Due to the subjectivity of the assumptions and estimates underlying the impairment analysis, Spire and Spire Missouri cannot provide assurance that future analyses will not result in impairment. These assumptions and estimates include projected cash flows, current and future rates for contracted capacity, growth rates, weighted average cost of capital and market multiples.

GENERAL RISK FACTORS

Resources expended to pursue or integrate business acquisitions, investments or other business arrangements may adversely affect Spire's financial position and results of operations and return on investments made may not meet the Company's expectations.

From time to time, Spire may seek to grow through strategic acquisitions, investments or other business arrangements. Attractive acquisition and investment opportunities may be difficult to complete on economically acceptable terms. It is possible for Spire to expend considerable resources pursuing acquisitions and investments that for a variety of reasons do not move forward. Similarly, investment opportunities may be hindered or halted by regulatory or legal actions. To the extent acquisitions or investments are made, such transactions involve a number of risks, including but not limited to, the assumption of material liabilities, the diversion of management's attention from daily operations, difficulties in assimilation and retention of employees, securing adequate capital to support the transaction, and obtaining regulatory approval. Uncertainties exist in assessing the value, risks, profitability, and liabilities associated with certain businesses or assets and there is a possibility that anticipated operating and financial efficiencies expected to result from an acquisition or investment do not develop. Additionally, there are no assurances resources expended will achieve their intended result.

The failure to complete an acquisition successfully or to integrate acquisitions or investments it may undertake could have an adverse effect on the Spire's financial condition and results of operations and the market's perception of the Company's execution of its strategy. To the extent Spire engages in any of the above activities together with or through one or more of its subsidiaries, including the Utilities, such subsidiaries may face the same risks.

Unexpected losses may adversely affect Spire's or its subsidiaries' financial condition and results of operations.

As with most businesses, there are operations and business risks inherent in the activities of Spire's subsidiaries. If, in the normal course of business, Spire or any of its subsidiaries becomes a party to litigation, such litigation could result in substantial monetary judgments, fines, penalties, business interruption or other enforcement actions or be resolved on unfavorable terms. In accordance with customary practice, Spire and its subsidiaries maintain insurance against a significant portion of, but not all, risks and losses, though it does reinsure a portion of the risk from certain of Spire's insurers through its captive insurance company. Spire and its operating companies employ many strategies to gain assurance such risks are appropriately managed, mitigated, or insured, as appropriate. To the extent a loss is self-insured or not fully covered by insurance or other risk mitigation strategies, that loss could adversely affect Spire's and/or its subsidiaries' financial condition and results of operations.

Catastrophic events may adversely affect the Company's facilities and operations.

Catastrophic events such as fires, earthquakes, explosions, floods, tornadoes, hurricanes, tropical storms, winter storms, terrorist acts, acts of civil unrest, pandemic illnesses or other similar occurrences could adversely affect the Utilities' facilities and operations, as well as those of Midstream. Emergency planning and training programs are in place to respond to events that could cause business interruptions; however, unanticipated events or a combination of events, failure in resources needed to respond to events, or slow or inadequate response to events may have an adverse impact. To the extent the impacts of such catastrophic events are not covered by insurance or recovered in rates, this could have a material adverse effect on the Company's financial condition and results of operations.

Workforce risks may affect the Company's financial results.

The Company and its subsidiaries are subject to various workforce risks, including, but not limited to, the risk that it will be unable to attract and retain qualified personnel; that it will be unable to effectively transfer to new personnel the knowledge and expertise of an aging workforce as those workers retire; and that it will be unable to reach collective bargaining arrangements with the unions that represent certain of its workers, which could result in work stoppages.

The Company may be adversely affected by economic conditions.

Periods of slowed economic activity generally result in decreased energy consumption, particularly by industrial and large commercial companies, a loss of existing customers, and fewer new customers. As a consequence, national or regional recessions or other downturns in economic activity could adversely affect revenues and cash flows or restrict future growth. Economic conditions in the Utilities' service territories may also adversely impact the Utilities' ability to collect accounts receivable, resulting in an increase in bad debt expense.

Changes in accounting standards may adversely impact the Company's financial condition and results of operations.

Spire and its subsidiaries are subject to changes in U.S. generally accepted accounting principles (GAAP), SEC regulations and other interpretations of financial reporting requirements for public utilities. Neither the Company nor any of its subsidiaries have any control over the impact these changes may have on their financial condition or results of operations nor the timing of such changes. The potential issues associated with rate-regulated accounting, along with other potential changes to GAAP that the U.S. Financial Accounting Standards Board (FASB) continues to consider may be significant.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Spire

Refer to the information below about the principal properties of Spire Missouri and Spire Alabama. The Spire EnergySouth utilities own more than 5,000 miles of pipelines. Other properties of Spire and its subsidiaries do not constitute a significant portion of its properties. The current leases for office space in downtown St. Louis commenced in early 2015, with terms ranging from 10 to 20 years, with multiple renewal options. For further information on leases see Note 17, Leases, of the Notes to Financial Statements in Item 8.

Spire Missouri

The principal properties of Spire Missouri consist of its gas distribution system, which includes more than 32,000 miles of main and related service lines, odorization and regulation facilities, and customer meters. The mains and service lines are located in municipal streets or alleys, public streets or highways, or on lands of others for which Spire Missouri has obtained the necessary legal rights to place and operate its facilities on such property. Spire Missouri has an underground natural gas storage facility, several operating centers, and other related properties. Substantially all of Spire Missouri's utility plant is subject to the liens of its mortgage. All the properties of Spire Missouri are held in fee, by easement, or under lease agreements.

Spire Alabama

The properties of Spire Alabama consist primarily of its gas distribution system, which includes more than 24,000 miles of main and related service lines, odorization and regulation facilities, and customer meters. The mains and service lines are located in municipal streets or alleys, public streets or highways, or on lands of others for which Spire Alabama has obtained the necessary legal rights to place and operate its facilities on such property. Spire Alabama also has four LNG facilities, several operating centers, and other related properties. All of the properties of Spire Alabama are held in fee, by easement, or under lease agreements.

Item 3. Legal Proceedings

For a description of pending regulatory matters of Spire, see Note 15, Regulatory Matters, of the Notes to Financial Statements in Item 8. For a description of environmental and other legal matters, see Contingencies in Note 16 of the Notes to Financial Statements in Item 8.

Item 4. Mine Safety Disclosures

Not applicable.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS – Listed below are executive officers as defined by the SEC for Spire as of November 16, 2023, along with their ages (as of September 30, 2023), positions and business experience during the past five years.

Name	Age	Position with Company [1]	Appointed [2]
S. L. Lindsey	57	President and Chief Executive Officer	October 2023
		Executive Vice President, Chief Operating Officer (until October 2023)	January 2020
		Executive Vice President, Chief Executive Officer of Gas Utilities and Distribution Operations (until December 2019)	October 2012
		Chief Executive Officer, Spire Missouri	December 2018
		Chief Executive Officer, Spire Alabama	September 2014
S. Sitherwood [3]	63	Executive Vice President, Senior Advisor	October 2023
		President and Chief Executive Officer (until October 2023)	February 2012
		Chairman of the Board, Spire Missouri	January 2015
		Chairman of the Board, Spire Alabama	September 2014
S. P. Rasche	63	Executive Vice President and Chief Financial Officer	November 2013
		Chief Financial Officer, Spire Missouri (until January 2020)	May 2012
		Chief Financial Officer, Spire Alabama (until January 2020)	September 2014
M. C. Darrell [4]	65	Senior Vice President, Chief Legal and Compliance Officer	May 2012
M. C. Geiselhart	64	Senior Vice President, Chief Strategy and Corporate Development Officer	January 2015

(1) The information provided relates to the Company and its principal subsidiaries. Many of the executive officers have served or currently serve as officers or directors for other subsidiaries of the Company.

(2) Officers of Spire are normally reappointed by its Board of Directors in November of each year. Officers of Spire Missouri and Spire Alabama are normally reappointed by their boards of directors in January of each year.

(3) Ms. Sitherwood has announced she will retire effective January 1, 2024.

(4) Mr. Darrell has announced he will retire effective December 1, 2023.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities

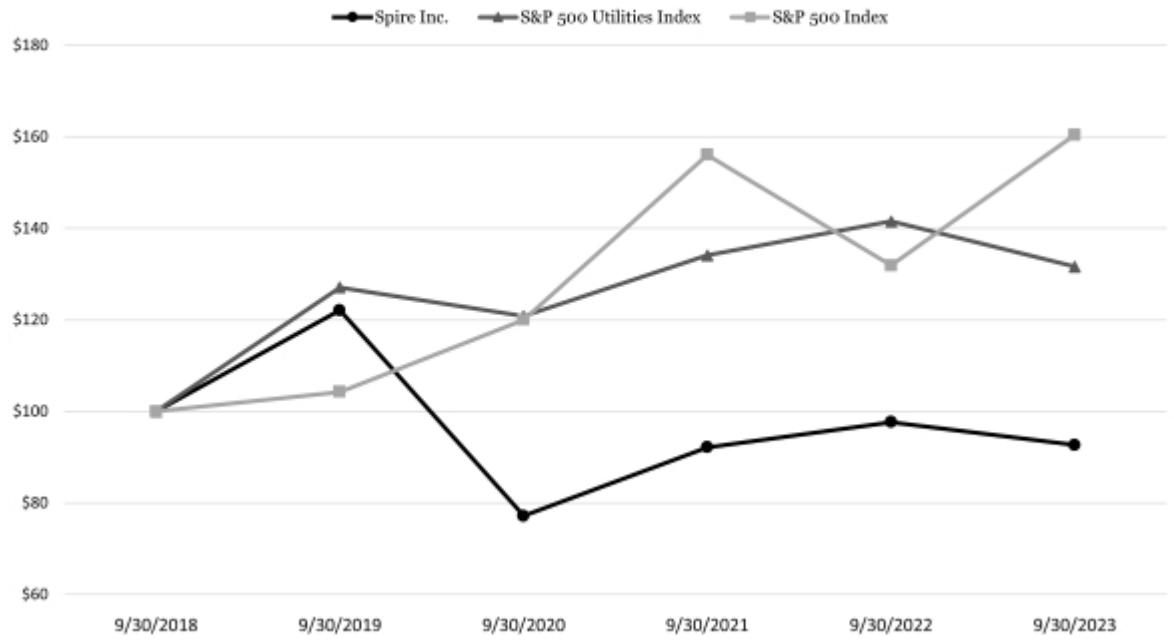
Spire

Spire's common stock trades on The New York Stock Exchange (NYSE) under the symbol "SR". The number of holders of record as of November 10, 2023 was 2,531.

Dividends are payable on the Company's common stock at the discretion of its Board of Directors (the "Board"). Spire, and Spire Missouri prior to the holding company's formation in 2000, has paid common stock dividends continuously since 1946, with 2023 marking the 20th consecutive year of increasing dividends on an annualized basis. Although the Board expects to continue paying dividends on the common stock for the foreseeable future, the declaration of dividends is not guaranteed. The amount of dividends on the common stock, if any, will depend upon the Company's financial condition, results of operations, capital requirements, and other factors.

Performance Graph

COMPARISON OF FIVE-YEAR CUMULATIVE TOTAL RETURN*



September 30	2018	2019	2020	2021	2022	2023
Spire Inc.	$ 100.00	$ 122.09	$ 77.17	$ 92.14	$ 97.66	$ 92.65
S&P 500 Utilities Index	100.00	127.10	120.79	134.09	141.56	131.63
S&P 500 Index	100.00	104.25	120.05	156.07	131.92	160.44

* Cumulative total return is based on a $100 investment on September 30, 2018, assuming reinvestment of dividends.

The S&P 500 Utilities Index is comprised of 30 utilities heavily weighted to large capitalization (median market cap of $22.3 billion) electric utilities. In 2023, stocks of small and mid cap electric utilities and gas utility companies (like Spire) in general traded lower relative to the large cap electric sector.

For disclosures related to securities authorized for issuance under equity compensation plans, see Note 3, Stock-Based Compensation, of the Notes to Financial Statements in Item 8.

During the three months ended September 30, 2023, the only repurchases of the Company's common stock were pursuant to elections by employees to have shares of stock withheld to cover employee tax withholding obligations upon the vesting of performance-based and time-vested restricted stock and stock units. The following table provides information on those repurchases:

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
July 1, 2023 – July 31, 2023	—	—	—	—
August 1, 2023 – August 31, 2023	—	—	—	—
September 1, 2023 – September 30, 2023	749	$60.65	—	—
Total	749	$60.65	—	—

Spire Missouri

Spire Missouri common stock is owned by its parent, Spire Inc., and is not traded on any stock exchange.

Spire Missouri's mortgage contains restrictions on its ability to pay cash dividends on its common stock, as described in further detail in Note 5, Shareholders' Equity, of the Notes to Financial Statements in Item 8. As of September 30, 2023 and 2022, the amount under the mortgage's formula that was available to pay dividends was $1,678.5 million and $1,579.4 million, respectively.

Spire Alabama

Spire Alabama common stock is owned by its parent, Spire Inc., and is not traded on any stock exchange.

Item 6. (Reserved)

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

(Dollars in millions, except per share and per unit amounts)

INTRODUCTION

This section analyzes the financial condition and results of operations of Spire Inc. (the "Company"), Spire Missouri Inc., and Spire Alabama Inc. Spire Missouri, Spire Alabama and Spire EnergySouth are wholly owned subsidiaries of the Company. Spire Missouri, Spire Alabama and the subsidiaries of Spire EnergySouth are collectively referred to as the "Utilities." The subsidiaries of Spire EnergySouth are Spire Gulf and Spire Mississippi. This section includes management's view of factors that affect the respective businesses of the Company, Spire Missouri and Spire Alabama, explanations of financial results including changes in earnings and costs from the prior periods, and the effects of such factors on the Company's, Spire Missouri's and Spire Alabama's overall financial condition and liquidity. Unless otherwise indicated, references to years herein are references to the fiscal years ending September 30 for the Company and its subsidiaries.

Reference is made to "Item 1A. Risk Factors" and "Forward-Looking Statements," which describe important factors that could cause actual results to differ from expectations and non-historical information contained herein. In addition, the following discussion should be read in conjunction with the audited financial statements and accompanying notes thereto of Spire, Spire Missouri and Spire Alabama included in "Item 8. Financial Statements and Supplementary Data."

OVERVIEW

The Company has three reportable segments: Gas Utility, Gas Marketing, and Midstream. Most of Spire's earnings are derived from its Gas Utility segment, which reflects the regulated activities of the Utilities. Due to the seasonal nature of the Utilities' business and the volumetric Spire Missouri rate design, earnings of Spire and each of the Utilities are typically concentrated during the heating season of November through April each fiscal year.

Gas Utility - Spire Missouri

Spire Missouri is Missouri's largest natural gas distribution utility and is regulated by the MoPSC. Spire Missouri serves St. Louis, Kansas City, and other areas throughout the state. Spire Missouri purchases natural gas in the wholesale market from producers and marketers and ships the gas through interstate pipelines into its own distribution facilities for sale to residential, commercial and industrial customers. Spire Missouri also transports gas through its distribution system for certain larger customers who buy their own gas on the wholesale market. Spire Missouri delivers natural gas to customers at rates and in accordance with tariffs authorized by the MoPSC. The earnings of Spire Missouri are primarily generated by the sale of heating energy.

Gas Utility - Spire Alabama

Spire Alabama is the largest natural gas distribution utility in the state of Alabama and is regulated by the APSC. Spire Alabama's service territory is located in central and northern Alabama. Among the cities served by Spire Alabama are Birmingham, the center of the largest metropolitan area in the state, and Montgomery, the state capital. Spire Alabama purchases natural gas through interstate and intrastate suppliers and distributes the purchased gas through its distribution facilities for sale to residential, commercial, and industrial customers and other end-users of natural gas. Spire Alabama also transports gas through its distribution system for certain large commercial and industrial customers for a transportation fee. Effective December 1, 2020, for most of these transportation service customers, Spire Alabama also purchases gas on the wholesale market for sale to the customer upon delivery to the Spire Alabama distribution system. All Spire Alabama services are provided to customers at rates and in accordance with tariffs authorized by the APSC.

Gas Utility - Spire EnergySouth

Spire Gulf and Spire Mississippi are utilities engaged in the purchase, retail distribution and sale of natural gas to approximately 100,000 customers in southern Alabama and south-central Mississippi. Spire Gulf is regulated by the APSC, and Spire Mississippi is regulated by the MSPSC.

Gas Marketing

Spire Marketing is engaged in the marketing of natural gas and related activities on a non-regulated basis and is reported in the Gas Marketing segment. Spire Marketing markets natural gas to customers across the U.S. (and into Canada), including customers inside and outside of the Utilities' service areas. It holds firm transportation and storage contracts in order to effectively manage its transactions with counterparties, which primarily include producers, municipalities, electric and gas utility companies, and large commercial and industrial customers.

Midstream

Spire's midstream operations consist of Spire STL Pipeline and Spire Storage (composed of Spire Storage West LLC and Spire Salt Plains Storage LLC). Spire STL Pipeline owns and operates a FERC-regulated 65-mile pipeline connecting the Rockies Express Pipeline in Scott County, Illinois, to delivery points in St. Louis County, Missouri, including Spire Missouri's storage facility. Spire STL Pipeline's operating revenue is derived primarily from Spire Missouri as its foundation shipper. Spire Storage is engaged in the storage of natural gas in the western region of the U.S. Spire Storage consists of two storage fields in Wyoming operating under one FERC market-based rate tariff, and a storage field in Oklahoma that operates under intrastate jurisdiction with authorizations from FERC under Section 311 of the Natural Gas Policy Act to provide certain interstate storage, transportation, and hub services.

Other

Other components of the Company's consolidated information include Spire's subsidiaries engaged in the operation of a propane pipeline and risk management, among other activities, and unallocated corporate items, including certain debt and associated interest costs.

Business Evaluation Factors

Based on the nature of the business of the Company and its subsidiaries, as well as current economic conditions, management focuses on several key variables in evaluating the financial condition and results of operations and managing the business.

For the Gas Utility segment, these include:

- the Utilities' ability to recover from their customers the costs of purchasing and distributing natural gas;
- the impact of weather and other factors, such as customer conservation, on revenues and expenses;
- changes in the regulatory environment at the federal, state, and local levels, as well as decisions by regulators, that impact the Utilities' ability to earn the authorized rate of return and recover prudent costs in each of the service territories they serve;
- the Utilities' ability to access credit markets and maintain working capital sufficient to meet operating requirements;
- the effect of natural gas price volatility on the business; and
- the ability to manage costs, integrate and standardize operations, and upgrade infrastructure.

In the Gas Marketing segment, these include:

- the risks of competition;
- fluctuations and volatility in natural gas prices;
- the changing flow and availability of natural gas;
- new national infrastructure projects;
- the ability to procure firm transportation and storage services at reasonable rates;
- credit and/or capital market access; and
- counterparty risks.

In the Midstream segment, these include:

- the impact of seasonal weather patterns;
- fluctuations and volatility in natural gas prices;
- the changing flow and availability of natural gas;
- the efficiency of the injection and withdrawal processes for natural gas storage;
- competitive factors in the energy industry;
- energy and other regulation in Spire's storage and transportation service areas; and
- counterparty risks.

Further information regarding how management seeks to manage these key variables is discussed below.

Gas Utility

The Utilities seek to provide reliable natural gas services at a reasonable cost, while maintaining and building secure and dependable infrastructures. The Utilities' strategies focus on improving both performance and the ability to recover their authorized distribution costs and rates of return. The Utilities' distribution costs are the essential, primarily fixed, expenditures they must incur to operate and maintain more than 60,000 miles of mains and services comprising their natural gas distribution systems and related storage facilities.

The Utilities' distribution costs include wages and employee benefit costs, depreciation and maintenance expenses, and other regulated utility operating expenses, excluding natural and propane gas expense. Distribution costs are considered in the rate-making process, and recovery of these types of costs is included in revenues generated through the Utilities' tariff rates. Spire Missouri's tariff rates are approved by the MoPSC, whereas Spire Alabama's tariff rates are approved by the APSC. Spire Gulf and Spire Mississippi have tariff rates that are approved by the APSC and MSPSC, respectively.

Spire Missouri and Spire Alabama also have off-system sales and capacity release income streams that are regulated by tariff but remain subject to fluctuations in market conditions. Some of the factors impacting the level of off-system sales include the availability and cost of Spire's natural gas supply, the weather in its service areas and the weather in other markets. When Spire's service areas experience warmer-than-normal weather while other markets experience colder weather or supply constraints, some of Spire's natural gas supply is available for sale to third parties not on Spire's system.

The Utilities work actively to reduce the impact of wholesale natural gas price volatility on their costs by strategically structuring their natural gas supply portfolios to increase their gas supply availability and pricing alternatives. They may also use derivative instruments to hedge against significant changes in the commodity price of natural gas. Nevertheless, the overall cost of purchased gas remains subject to fluctuations in market conditions. The Purchased Gas Adjustment (PGA) clause of Spire Missouri, Spire Gulf and Spire Mississippi and the Gas Supply Adjustment (GSA) rider of Spire Alabama allow the Utilities to flow through to customers, subject to prudence review by the public service commissions, the cost of purchased gas supplies, including costs, cost reductions and related carrying costs associated with the use of derivative instruments to mitigate volatility in the cost of natural gas. As of September 30, 2023, Spire Missouri had active derivative positions, but Spire Alabama has had no gas supply derivative instrument activity since 2010. The Utilities believe they will continue to be able to obtain sufficient gas supply. The price of natural gas supplies and other economic conditions may affect sales volumes, due to the conservation efforts of customers, and cash flows associated with the timing of collection of gas costs and related accounts receivable from customers.

The Utilities rely on short-term credit and long-term capital markets, as well as cash flows from operations, to satisfy their seasonal cash requirements and fund their capital expenditures. The Utilities access the commercial paper market through a program administered by the holding company, which then loans borrowed funds to the Utilities. The Utilities directly access the long-term bond market. Access to debt markets is dependent on current conditions in the credit and capital markets. Management focuses on maintaining a strong balance sheet and believes the Utilities currently have adequate access to credit and capital markets and will have sufficient liquidity and capital resources to meet their foreseeable obligations. See the "Liquidity and Capital Resources" section for additional information.

Gas Marketing

Spire Marketing utilizes its natural gas supply agreements, transportation agreements, park and loan agreements, storage agreements and other executory contracts to support a variety of services to its customers at competitive prices. It closely monitors and manages the natural gas commodity price and volatility risks associated with providing such services to its customers through the use of a variety of risk management activities, including the use of exchange-traded/cleared derivative instruments and other contractual arrangements. Spire Marketing is committed to managing commodity price risk while it seeks to expand the services that it now provides. Nevertheless, income from the Gas Marketing operations is subject to more fluctuations in market conditions than the Utilities' operations.

The Gas Marketing business is directly impacted by the effects of competition in the marketplace, the impacts of new infrastructure, surplus natural gas supplies, and the addition of new demand from exports, power generation and industrial load. Spire Marketing's management expects a growing need for marketing services across the country as customers manage seasonal variability and marketplace volatility.

In addition to its own operating cash flows, Spire Marketing relies on Spire's parental guaranties to secure its purchase and sales obligations of natural gas, and it also has access to Spire's liquidity resources. A large portion of Spire Marketing's receivables are from customers in the energy industry. It also enters into netting arrangements with many of its energy counterparties to reduce overall credit and collateral exposure. On a net dollar exposure basis, the majority of Spire Marketing's customers are utilities or utility affiliates. Although Spire Marketing's uncollectible amounts are closely monitored and have not been significant, increases in uncollectible amounts from customers are possible and could adversely affect Spire Marketing's liquidity and results of operations.

Spire Marketing carefully monitors the creditworthiness of counterparties to its transactions. It performs in-house credit reviews of potential customers and may require credit assurances such as prepayments, letters of credit or parental guaranties when appropriate. Credit limits for customers are established and monitored.

Spire Marketing cannot be certain that all of its wholesale purchase and sale transactions will settle physically. As such, these transactions are designated as trading activities for financial reporting purposes, due to their settlement characteristics. Results of operations from trading activities are reported on a net basis in natural gas expenses.

In the course of its business, Spire Marketing enters into commitments associated with the purchase or sale of natural gas. In accordance with U.S. GAAP, some of its purchase and sale transactions are not recognized in earnings until the natural gas is physically delivered, while other energy-related transactions, including those designated as trading activities, are required to be accounted for as derivatives with the changes in their fair value (representing unrealized gains or losses) recorded in earnings in periods prior to settlement. Because related transactions of a purchase and sale strategy may be accounted for differently, there may be timing differences in the recognition of earnings under GAAP and economic earnings realized upon settlement. The Company reports both GAAP and net economic earnings (non-GAAP), as discussed in the section "Non-GAAP Measures".

Midstream

In its Midstream segment, Spire seeks to drive growth through supporting natural gas grid reliability, the ability to manage exposure to gas price volatility, and providing access to key supply basins for the shipment of natural gas. These transportation and storage operations serve a variety of natural gas customers, including Spire's other businesses.

Absolute natural gas prices do not directly impact the results of this segment, but there is a relationship between natural gas prices and the revenues derived from the transportation and storage of natural gas. Natural gas price trends and demand for natural gas influence these price relationships through market volatility or changes in absolute prices of one supply/market point to another. Further, natural gas price differences between the various hubs Spire serves could influence the volumes of gas transported or stored on Spire's system and the related transportation and storage rates.

Spire carefully monitors the creditworthiness of counterparties to its transactions. It performs in-house credit reviews of potential customers and may require credit assurances such as prepayments, letters of credit or

parental guaranties when appropriate. Credit limits for customers are established and monitored.

NON-GAAP MEASURES

Net income, earnings per share and operating income reported by Spire, Spire Missouri and Spire Alabama are determined in accordance with GAAP. Spire, Spire Missouri and Spire Alabama also provide the non-GAAP financial measures of net economic earnings, net economic earnings per share and contribution margin. Management and the Board of Directors use non-GAAP financial measures, in addition to GAAP financial measures, to understand and compare operating results across accounting periods, for financial and operational decision making, for planning and forecasting, to determine incentive compensation and to evaluate financial performance. These non-GAAP operating metrics should not be considered as alternatives to, or more meaningful than, the related GAAP measures. Reconciliations of non-GAAP financial measures to the most directly comparable GAAP measures are provided on the following pages.

Net Economic Earnings and Net Economic Earnings Per Share

Net economic earnings and net economic earnings per share are non-GAAP measures that exclude from net income, as applicable, the impacts of fair value accounting and timing adjustments associated with energy-related transactions, the impacts of acquisition, divestiture and restructuring activities, and the largely non-cash impacts of impairments and other non-recurring or unusual items such as certain regulatory, legislative or GAAP standard-setting actions. In addition, net economic earnings per share would exclude the impact, in the fiscal year of issuance, of any shares issued to finance acquisitions that have yet to be included in net economic earnings.

The fair value and timing adjustments are made in instances where the accounting treatment differs from what management considers the economic substance of the underlying transaction, including the following:

- Net unrealized gains and losses on energy-related derivatives that are required by GAAP fair value accounting associated with current changes in the fair value of financial and physical transactions prior to their completion and settlement. These unrealized gains and losses result primarily from two sources:
  1) changes in the fair values of physical and/or financial derivatives prior to the period of settlement; and
  2) ineffective portions of accounting hedges, required to be recorded in earnings prior to settlement, due to differences in commodity price changes between the locations of the forecasted physical purchase or sale transactions and the locations of the underlying hedge instruments;
- Lower of cost or market adjustments to the carrying value of commodity inventories resulting when the net realizable value of the commodity falls below its original cost, to the extent that those commodities are economically hedged; and
- Realized gains and losses resulting from the settlement of economic hedges prior to the sale of the physical commodity.

These adjustments eliminate the impact of timing differences and the impact of current changes in the fair value of financial and physical transactions prior to their completion and settlement. Unrealized gains or losses are recorded in each period until being replaced with the actual gains or losses realized when the associated physical transactions occur. Management believes that excluding the earnings volatility caused by recognizing changes in fair value prior to settlement and other timing differences associated with related purchase and sale transactions provides a useful representation of the economic effects of only the actual settled transactions and their effects on results of operations. While management uses these non-GAAP measures to evaluate all of its businesses, the net effect of these fair value and timing adjustments on the Utilities' earnings is minimal because gains or losses on their natural gas derivative instruments are deferred pursuant to state regulation.

Contribution Margin

In addition to operating revenues and operating expenses, management also uses the non-GAAP measure of contribution margin when evaluating results of operations. Contribution margin is defined as operating revenues less natural gas costs and gross receipts tax expense. The Utilities pass to their customers (subject to prudence review by, as applicable, the MoPSC, APSC or MSPSC) increases and decreases in the wholesale cost of natural gas in accordance with their PGA clauses or GSA riders. The volatility of the wholesale natural gas market results in fluctuations from period to period in the recorded levels of, among other items, revenues and natural gas cost expense. Nevertheless, increases and decreases in the cost of gas associated with system gas sales volumes and gross receipts tax expense (which are calculated as a percentage of revenues), with the same amount (excluding immaterial timing differences) included in revenues, have no direct effect on operating income. Therefore,

management believes that contribution margin is a useful supplemental measure, along with the remaining operating expenses, for assessing the Company's and the Utilities' performance.

EARNINGS

This section contains discussion and analysis of the results for the year ended September 30, 2023 compared to the results for the year ended September 30, 2022. The discussion and analysis of the results for the year ended September 30, 2022 compared to the results of the year ended September 30, 2021 can be found in Part II, Item 7 of Spire Inc.'s fiscal 2022 Annual Report on Form 10-K, filed with the U.S. Securities and Exchange Commission (SEC) on November 16, 2022.

The following sections present and discuss the financial metrics in total and by registrant and segment.

Spire

The following tables reconcile the Company's net economic earnings to the most comparable GAAP number, net income.

	Gas Utility	Gas Marketing	Midstream	Other	Consol-idated	Per Diluted Share**
Year Ended September 30, 2023						
Net Income (Loss) [GAAP]	$ 200.5	$ 39.1	$ 12.0	$ (34.1)	$ 217.5	$ 3.85
Adjustments, pre-tax:						
Fair value and timing adjustments	—	11.4	—	—	11.4	0.21
Acquisition activities	—	—	2.5	—	2.5	0.05
Income tax effect of adjustments*	—	(2.9)	(0.4)	—	(3.3)	(0.06)
Net Economic Earnings (Loss) [Non-GAAP]	$ 200.5	$ 47.6	$ 14.1	$ (34.1)	$ 228.1	$ 4.05

* Income tax effect is calculated by applying federal, state and local income tax rates applicable to ordinary income to the amounts of the pre-tax reconciling items and then adding any estimated effects of enacted state or local income tax laws for periods before the related effective date and, in the case of fiscal 2022, includes the $4.1 Spire Missouri regulatory adjustment discussed below.

** Net economic earnings per share is calculated by replacing consolidated net income with consolidated net economic earnings in the GAAP diluted earnings per share calculation, which includes reductions for cumulative preferred dividends and participating shares.

Reconciliations of contribution margin to the most directly comparable GAAP measure are shown below.

	Gas Utility	Gas Marketing	Midstream	Other	Eliminations	Consolidated
Year Ended September 30, 2023

Select changes from the year ended September 30, 2022 to the year ended September 30, 2023 are summarized in the following table and discussed below.

Changes FY23 from FY22	Gas Utility	Gas Marketing	Midstream	Other, Net of Eliminations	Consolidated
Net Income	$ 1.9	$ 3.5	$ 0.9	$ (9.6)	$ (3.3)
Net Economic Earnings [Non-GAAP]	(2.2)	20.6	3.0	(9.6)	11.8
Operating Revenues	510.8	(55.8)	13.0	(0.2)	467.8
Contribution Margin [Non-GAAP]	88.1	7.8	13.0	(0.0)	108.9
Operation and Maintenance Expenses	48.5	4.8	8.3	6.4	68.0
Other Income (Expense)					32.1
Interest Expense					65.9
Income Tax					(20.1)

The increase in interest expense reflects the significant increase in short-term interest rates and higher long-term debt levels versus the prior year, combined with higher average levels of short-term borrowings in the current year. Weighted-average short-term interest rates were 5.0% in the current year, versus 1.1% in the prior year.

The change in other income was $22.6 after removing the impact of the Postretirement Non-Service Cost Transfer (NSC Transfer) of $9.5. This increase was driven primarily by Spire Missouri, the result of increased inventory carrying-cost credits combined with favorable mark-to-market valuations on non-qualified retirement trusts. The year-over-year growth also benefited from investment gains experienced by other subsidiaries.

Income tax expense decreased $20.1. The current year benefited from lower pre-tax income and a one-time tax credit study, while the prior year included $4.1 expense related to the 2021 Missouri rate order.

Gas Utility

For the twelve months ended September 30, 2023, Gas Utility net income was $1.9 higher than the prior-year period, as the $2.6 and $1.8 growth at Spire Missouri and Spire EnergySouth, respectively, was partly offset by the $2.5 decrease at Spire Alabama. Net economic earnings in the current year was $2.2 lower than the prior year, which tracks net income after removing the Spire Missouri $4.1 GAAP regulatory tax adjustment in the prior-year period. These results are described in further detail below.

The increase in Gas Utility operating revenues for fiscal 2023 was attributable to the following factors:

Spire Missouri and Spire Alabama – Higher PGA/GSA gas cost recoveries	$ 436.1
Spire Missouri – 2021 and 2022 rate case outcomes	60.7
Spire Alabama – RSE: net adjustments	22.0
Spire Missouri and Spire Alabama – Higher gross receipts taxes	21.5
Spire EnergySouth	6.9
Spire Missouri – Volumetric usage including weather mitigation impact	4.1
Spire Alabama – Volumetric usage including weather mitigation impact	(30.6)
Spire Missouri and Spire Alabama – Lower off-system sales	(12.3)
All other factors	2.4
Total Variation	$ 510.8

The primary driver of revenue growth in the current year was $436.1 in higher gas cost recoveries at the utilities of Spire Missouri and Spire Alabama, reflecting higher average gas costs being passed through to customers. The current year also benefited from a $60.7 increase at Spire Missouri resulting from the current-year impacts of the 2022 and 2021 rate orders. The current year results also include $22.0 in net favorable rate adjustments under the RSE mechanism at Spire Alabama, higher gross receipts taxes of $21.5 at Spire Missouri and Spire Alabama, growth of $6.9 at Spire EnergySouth, and favorable volume/usage of $4.1 at Spire Missouri. These benefits were only partly offset by a $30.6 reduction due to volume/usage at Spire Alabama, and a combined $12.3 reduction in off-system sales between Spire Missouri and Spire Alabama.

The year-over-year increase in Gas Utility contribution margin was attributable to the following factors:

Spire Missouri – 2021 and 2022 rate case outcomes	$	60.7
Spire Alabama – RSE: net adjustments		19.6
Spire Missouri - Volumetric usage including weather mitigation impact		5.4
Spire EnergySouth		3.3
Spire Alabama – Volumetric usage including weather mitigation impact		(2.2)
All other factors		1.3
Total Variation	$	88.1

The contribution margin growth was primarily driven by the $60.7 increase from the Spire Missouri 2022 and 2021 rate order implementations, $19.6 from favorable rate adjustments within the RSE framework at Spire Alabama, and a $3.3 increase at Spire EnergySouth. The $5.4 favorable volume impact at Spire Missouri was partly offset by the $2.2 volume decline at Spire Alabama, both net of weather mitigation impacts.

O&M expenses for the twelve months ended September 30, 2023, were $48.5 higher than the prior year. Expenses increased $15.4 after removing the $9.1 impact of the NSC Transfer and approximately $24 due to the change in treatment of Spire Missouri general overheads that were being deferred in the prior-year period. The O&M increase was driven by a $22.1 increase in operations and customer experience costs and a $5.0 increase in bad debt expense. These increases were only partly offset by a $5.3 reduction in outside services, favorable administrative and general (A&G) expenses, and lower employee-related expenses.

Taxes, other than income taxes, increased $34.1, and were driven by $21.9 in higher pass-through gross receipts taxes, along with higher property taxes resulting from the continued infrastructure build-out by the Utilities. Depreciation and amortization expenses for fiscal 2023 were $16.5 higher than the same period in the prior year primarily driven by continued infrastructure capital expenditures across all the Utilities.

Gas Marketing

Net income growth of $3.5 reflects the strong operating results experienced in the current-year, driven by favorable market conditions in the first half of fiscal 2023 that allowed the business to take advantage of regional basis differentials to optimize storage and transportation positions. These gains were partly offset by unfavorable year-over-year after-tax unrealized fair market value adjustments of $17.1, and slightly higher O&M costs associated with higher employee-related expenses. Net economic earnings exceeds net income growth as net economic earnings excludes the impacts of the unrealized fair market value adjustments.

The decline in operating revenues primarily reflects lower commodity pricing in fiscal 2023 versus the prior year.

Gas Marketing contribution margin increased $7.8 from the same period last year, driven by incremental optimization of storage and transportation assets in the current year, which were only partly offset by unfavorable year-over-year fair value adjustments of $22.8.

Midstream

Net income and net economic earnings for the Company's Midstream segment increased $0.9 and $3.0, respectively, for the year ended September 30, 2023 versus the prior-year period. Strong net income performance at Spire Storage West reflecting optimized operational and withdrawal commitments that were partly offset by the acquisition of Spire Storage Salt Plains, whose impacts are excluded from net economic earnings.

The $13.0 increase in operating revenues and contribution margin is attributable to the $8.1 growth at Spire Storage West and to the Spire Storage Salt Plains acquisition in April 2023. The O&M increase of $8.3 is driven by a $2.1 increase at Spire Storage West supporting the higher level of billable storage activity, with the remaining increase due principally to Spire Storage Salt Plains operations as well as acquisition and transaction costs for the previously announced and pending Missouri Gas Company (MoGas) acquisition.

Other

The Company's other activities incurred a $34.1 loss for the twelve months ended September 30, 2023, $9.6 higher than the prior-year period. The larger current-year loss was driven by higher interest expense, reflecting both higher borrowings and interest rates, combined with higher corporate costs, partly offset by lower income tax expense.

Spire Missouri

	Year Ended September 30,	
	2023	2022
Operating Income	$ **207.1**	$ **204.0**
Operation and maintenance expenses	296.2	255.7
Depreciation and amortization	158.7	145.3
Taxes, other than income taxes	157.5	129.0
Less: Gross receipts tax expense	(96.7)	(79.6)
Contribution Margin [Non-GAAP]	**722.8**	**654.4**
Natural gas costs	943.4	587.0
Gross receipts tax expense	96.7	79.6
Operating Revenues	$ **1,762.9**	$ **1,321.0**
Net Income	$ **117.5**	$ **114.9**

Operating revenues for the twelve months ended September 30, 2023 were $441.9 higher than the comparable prior-year period. A key driver was an increase in gas recovery costs totaling $362.3. Further, $60.7 of the increase attributable to fiscal 2023 results represent the cumulative impacts of the implementation of the 2022 and 2021 rate orders. Higher gross receipts taxes contributed a $17.1 increase, and volume (net of weather mitigation) contributed $4.1 growth. These revenue growth drivers were only partially offset by lower off-system sales of $5.2.

Temperatures in Spire Missouri's service areas during fiscal 2023 were 1.4% warmer than during fiscal 2022 and 10.4% warmer than normal. The Spire Missouri total system volume sold and transported was 1,592.0 million centum of cubic feet (CCF) for the year ended September 30, 2023, compared with 1,602.8 million CCF last year. Total off-system volume sold and transported was 14.5 million CCF for fiscal 2023, compared with 19.1 million for fiscal 2022.

Contribution margin for the fiscal year ended September 30, 2023 increased $68.4 from the same period in the prior year. The increase was the result of the previously mentioned timing of the 2022 and 2021 rate case implementations generating $60.7 incremental contribution margin, combined with favorable volumetric impacts of $5.4.

Reported O&M expenses for the current year period increased $40.5 versus the prior year. Expenses increased $8.6 after removing the $7.9 impact of the NSC Transfer and the approximately $24 of general overheads that were deferred in the prior year. The increase reflects higher non-employee operations expense of $14.7 and higher bad debt expense of $2.2, partly offset by lower outside service costs and favorable A&G expenses in the current year.

Depreciation and amortization expenses were up $13.4, the result of continued investment in infrastructure upgrades. Other income was higher by $18.4, after removing the $7.9 due to the NSC Transfer. This variance is primarily attributable to increased natural gas inventory carrying cost credits, combined with favorable mark-to-market valuations on non-qualified retirement trusts. Interest expense increased $36.5, primarily reflecting higher short-term interest rates and net long-term debt issuances in the current year.

Net income increased $2.6 over the comparable prior-year period.

Spire Alabama

	Year Ended September 30,	
	2023	2022
Operating Income	$ **119.7**	$ **112.6**
Operation and maintenance expenses	136.4	130.1
Depreciation and amortization	69.3	66.8
Taxes, other than income taxes	43.0	38.1
Less: Gross receipts tax expense	(29.9)	(25.5)
Contribution Margin [Non-GAAP]	**338.5**	**322.1**
Natural gas costs	202.7	161.5
Gross receipts tax expense	29.9	25.5
Operating Revenues	$ **571.1**	$ **509.1**
Net Income	$ **66.0**	$ **68.5**

The $62.0 increase in operating revenues reflects a $73.8 increase in gas cost recoveries pursuant to the GSA mechanism, $22.0 higher net rate adjustments under the RSE mechanism, and higher gross receipts taxes of $4.4. These favorable impacts were partly offset by a $30.6 reduction attributable to weather/volumetric impacts, and a $7.1 decrease in off-system sales.

Temperatures in Spire Alabama's service area during fiscal 2023 were 10.7% warmer than during fiscal 2022 and 18.8% warmer than normal. Spire Alabama's total system volume sold and transported was 1,026.2 million CCF during the year ended September 30, 2023, compared with 1,010.8 million CCF during the prior year. Off-system sales volume for fiscal 2023 totaled 98.8 million CCF compared with 63.1 million CCF for fiscal 2022.

Contribution margin increased $16.4, which was principally a result of net favorable RSE adjustments of $19.6. This growth was tempered by unfavorable weather/volumetric impacts totaling $2.2, after applying weather mitigation.

Excluding the impact of the NSC Transfer of $1.1, the increase in O&M of $5.2 was largely due to a $2.3 increase in bad debt expense. Depreciation expense was up $2.5 reflecting the continued infrastructure investments in the service territory.

The variance in other income is primarily the impact of the year-over-year change in the NSC Transfer. Interest expense increased $13.6, primarily reflecting higher short-term interest rates and long-term debt issuances in the current year. Resulting fiscal 2023 net income declined $2.5 versus fiscal 2022.

LIQUIDITY AND CAPITAL RESOURCES

Recent Cash Flows

	2023	2022	2021
Net cash provided by operating activities	$ 440.2	$ 55.0	$ 249.8
Net cash used in investing activities	(695.5)	(546.7)	(622.0)
Net cash provided by financing activities	260.6	500.9	379.4

Net cash provided by operating activities increased $385.2 from 2022 to 2023 after decreasing $194.8 from 2021 to 2022. In addition to the changes in net income between the respective periods (discussed above), the remaining changes were related to regulatory timing and fluctuations in working capital items, as discussed below in the Future Cash Requirements section. Specifically, the timing and amounts of regulatory adjustments for purchased gas costs resulted in a large change in deferred recovery in 2022, greatly reducing net cash provided by operating activities that year.

In 2023, the Company's net cash used in investing activities was $148.8 more than in 2022, primarily driven by a $110.3 increase in capital expenditures and the $37.0 acquisition of Spire Storage Salt Plains. Capital expenditures increased $60.0 in the Gas Utility segment (primarily due to meter and other infrastructure upgrades) and $51.0 in the Midstream segment (primarily due to the ongoing Wyoming storage facility expansion).

In 2022, the Company used $75.3 less cash in investing activities than in 2021, primarily driven by a $72.6 decrease in capital expenditures, with Gas Utility down $61.8 and Midstream down $10.4.

Net cash provided by financing activities was down $240.3 in 2023 compared to 2022 as a result of lower net debt issuances, lower common stock issuances, and higher dividends. Although the net increase in long-term debt was $473.8 in fiscal 2023 compared to only $244.2 in fiscal 2022, Spire reduced short-term debt by $82.0 in fiscal 2023 after increasing short-term borrowings $365.5 in 2022.

Net cash provided by financing activities was up $121.5 in 2022 compared to 2021. As noted above, 2022 net short-term debt issuances were $365.5, which was $341.5 higher than in 2021. In addition, the combination of lower net repayments of long-term debt ($59.6) and higher cash generated from the issuance of common stock ($50.9) in 2022 contributed $110.5 to the year-over-year increase. A significant offset to these increases was a $329.1 decline in cash generated from the issuance of long-term debt, coupled with $8.7 higher common stock dividend payments.

Future Cash Requirements

The Company’s short-term borrowing requirements typically peak during colder months when the Utilities borrow money to cover the lag between when they purchase natural gas and when their customers pay for that gas. Changes in the wholesale cost of natural gas (including cash payments for margin deposits associated with Spire Missouri’s use of natural gas derivative instruments), variations in the timing of collections of gas cost under the Utilities’ PGA clauses and GSA riders, the seasonality of accounts receivable balances, and the utilization of stored gas inventories cause short-term cash requirements to vary during the year and from year to year, and may cause significant variations in the Company’s cash provided by or used in operating activities.

Spire’s material cash requirements as of September 30, 2023, are related to capital expenditures, principal and interest payments on long-term debt, natural gas purchase obligations, and common and preferred stock dividends.

Total Company capital expenditures are planned to be $765 for fiscal 2024, though Spire had purchase commitments for less than a quarter of these as of September 30, 2023.

As detailed in Note 6, Long-Term Debt, of the Notes to Financial Statements in Item 8, $156.6 of the total $3,732.7 principal amount is due in fiscal 2024. Using each long-term debt instrument’s stated maturity and fixed rates or variable rates as of September 30, 2023, interest payments are projected to total $1,817.3, of which $150.7 is due in fiscal 2024.

Spire’s natural gas purchase obligations totaled $1,613.2, including $650.1 for fiscal 2024, representing the minimum payments required under existing natural gas transportation and storage contracts and natural gas supply agreements. The amounts reflect fixed obligations as well as obligations to purchase natural gas at future market prices, calculated using forward market prices as of September 30, 2023. Each of the Utilities generally recovers costs related to its purchases, transportation and storage of natural gas through the operation of its PGA clause or GSA rider, subject to prudence review by the appropriate regional public service commission. Additional contractual commitments are generally entered into prior to or during the heating season.

Spire dividends declared and payable as of September 30, 2023, totaled $43.1, while annualized dividends based on the regular quarterly amounts declared on November 10, 2023, are estimated at $175.3.

Spire will pay $175 cash, subject to customary working capital and other closing adjustments, to acquire MoGas Pipeline, an interstate natural gas pipeline, and Omega Pipeline, a connected gas distribution system, from CorEnergy Infrastructure Trust, Inc. if the transaction closes (currently anticipated in the second quarter of fiscal 2024). For further discussion of this pending acquisition, see Note 16, Commitments and Contingencies, of the Notes to Financial Statements in Item 8.

36

Source of Funds

It is management's view that the Company, Spire Missouri and Spire Alabama have adequate access to capital markets and will have sufficient capital resources, both internal and external, to meet anticipated requirements.

The Company's, Spire Missouri's and Spire Alabama's access to capital markets, including the commercial paper market, and their respective financing costs, may depend on the credit rating of the entity that is accessing the capital markets. Their debt is rated by two rating agencies: Standard & Poor's Corporation ("S&P") and Moody's Investors Service ("Moody's"). As of September 30, 2023, the debt ratings of the Company, Spire Missouri and Spire Alabama (shown in the following table) remain at investment grade with a stable outlook (other than Moody's negative outlook for Spire Alabama debt).

	S&P	Moody's
Spire Inc. senior unsecured long-term debt	BBB+	Baa2
Spire Inc. preferred stock	BBB	Ba1
Spire Inc. short-term debt	A-2	P-2
Spire Missouri senior secured long-term debt	A	A1
Spire Alabama senior unsecured long-term debt	A-	A2

Cash and Cash Equivalents

Bank deposits were used to support working capital needs of the business. Spire had no temporary cash investments as of September 30, 2023 or 2022.

Short-term Debt

The Company's short-term cash requirements can be met through the sale of commercial paper or the use of a revolving credit facility. For information about these resources, see Note 7, Notes Payable and Credit Agreements, of the Notes to Financial Statements in Item 8 and "Interest Rate Risk" under "Market Risk" below.

Long-term Debt and Equity

At September 30, 2023, Spire had outstanding principal of long-term debt totaling $3,732.7, of which $1,798.0 was issued by Spire Missouri, $750.0 was issued by Spire Alabama, and $229.7 was issued by other subsidiaries. For more information about long-term debt, see Note 6 of the Notes to Financial Statements in Item 8 and "Interest Rate Risk" under "Market Risk" below.

Effective March 5, 2022, Spire Missouri was authorized by the MoPSC to issue conventional term loans, first mortgage bonds, unsecured debt, preferred stock and common stock in an aggregate amount of up to $800.0 for financings placed any time before December 31, 2024. Under this authorization through September 30, 2023, Spire Missouri has issued $79.1 of common stock and $400.0 of first mortgage bonds. Spire Alabama has no standing authority to issue long-term debt and must petition the APSC for each planned issuance.

On October 13, 2022, Spire Alabama issued $90.0 of notes due October 15, 2029, bearing interest at 5.32% and $85.0 of notes due October 15, 2032, bearing interest at 5.41%. Interest is payable semi-annually. The notes are senior unsecured obligations and rank equal in right to payment with all other senior unsecured indebtedness of Spire Alabama. Also on October 13, 2022, Spire Gulf issued $30.0 of first mortgage bonds due October 15, 2037, bearing interest at 5.61% payable semi-annually. The bonds rank equal in right to payment with the other first mortgage bonds issued by Spire Gulf. The bonds were issued under a supplemental indenture with collateral fall away provisions whereby, under certain conditions, Spire Gulf may elect to exchange the bonds, which are secured, for unsecured notes.

On February 13, 2023, Spire Missouri issued $400.0 aggregate principal amount of its 4.80% Series First Mortgage Bonds due 2033. Interest is payable semi-annually. The notes are senior secured indebtedness of Spire Missouri and rank equally with all other existing and future senior secured indebtedness issued by Spire Missouri under its mortgage and deed of trust. The bonds are secured by a first mortgage lien on substantially all of the real properties of Spire Missouri, subject to limited exceptions.

On March 7, 2023, Spire issued $150.0 aggregate principal amount of its 5.80% Series 2023 Senior Notes due March 15, 2033. Interest is payable semi-annually. The notes are senior unsecured obligations of the Company.

Spire has a shelf registration statement on Form S-3 on file with the SEC for the issuance and sale of up to 250,000 shares of common stock under its Dividend Reinvestment and Direct Stock Purchase Plan. There were 244,182 and 237,891 shares at September 30, 2023 and November 10, 2023, respectively, remaining available for issuance under this Form S-3. Spire and Spire Missouri also have a universal shelf registration statement on Form S-3 on file with the SEC for the issuance of various equity and debt securities, which expires on May 9, 2025.

Spire has an "at-the-market" (ATM) equity distribution agreement, pursuant to which the Company may offer and sell, from time to time, shares of its common stock (including shares of common stock that may be sold pursuant to forward sale agreements entered into in connection with the ATM equity distribution agreement). In the second and third quarters of fiscal 2023, Spire executed forward sale agreements for a total of 2,315,921 shares, 1,744,549 of which must be settled on or before December 28, 2023 and 571,372 of which were settled on September 27, 2023, generating net proceeds of $38.5. Had the remaining shares under the forward agreements been settled as of September 30, 2023, it would have generated net proceeds of $111.2. As of September 30, 2023, Spire may sell additional shares with an aggregate offering price of up to $17.9 under the current Board of Directors authorization expiring May 2025. For additional information about the ATM program, see Note 5 of the Notes to Financial Statements in Item 8.

In February 2021, Spire issued 3.5 million equity units for an aggregate stated amount of $175.0, resulting in net proceeds of $169.3 after underwriting fees and other issuance costs. See Note 5, Shareholders' Equity, of the Notes to Financial Statements in Item 8 for additional discussion of these equity units.

Including the current portion of long-term debt, the Company's long-term consolidated capitalization consisted of 44% equity at September 30, 2023 and 46% equity at September 30, 2022. For more information about equity, see Note 5 of the Notes to Financial Statements in Item 8.

ENVIRONMENTAL MATTERS

The Utilities and other Spire subsidiaries own and operate natural gas distribution, transmission and storage facilities, the operations of which are subject to various environmental laws, regulations and interpretations. While environmental issues resulting from such operations arise in the ordinary course of business, such issues have not materially affected the Company's, Spire Missouri's or Spire Alabama's financial position and results of operations. As environmental laws, regulations and their interpretations change, however, the Company and the Utilities may be required to incur additional costs. For information relative to environmental matters, see Contingencies in Note 16 of the Notes to Financial Statements in Item 8.

REGULATORY MATTERS

For discussions of regulatory matters for Spire, Spire Missouri, and Spire Alabama, see Note 15, Regulatory Matters, of the Notes to Financial Statements in Item 8.

ACCOUNTING PRONOUNCEMENTS

The Company, Spire Missouri and Spire Alabama have evaluated recently issued accounting standards and concluded that none will have a material impact on their financial position or results of operations upon adoption.

CRITICAL ACCOUNTING ESTIMATES

Our discussion and analysis of our financial condition, results of operations, liquidity and capital resources are based upon our financial statements, which have been prepared in accordance with GAAP, which requires that we make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an ongoing basis. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. We believe the following represent the more significant items requiring the use of judgment and estimates in preparing our financial statements:

Regulatory Accounting – The Utilities account for their regulated operations in accordance with FASB Accounting Standards Codification Topic 980, *Regulated Operations*. The provisions of this accounting guidance require, among other things, that financial statements of a rate-regulated enterprise reflect the actions of regulators, where appropriate. These actions may result in the recognition of revenues and expenses in time periods that are different than non-rate-regulated enterprises. When this occurs, costs are deferred as assets in the balance sheet (regulatory assets) and recorded as expenses when those amounts are reflected in rates. Also, regulators can impose liabilities upon a regulated company for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future (regulatory liabilities). Management believes that the current regulatory environment supports the continued use of these regulatory accounting principles and that all regulatory assets and regulatory liabilities are recoverable or refundable through the regulatory process. For Spire Missouri and Spire Alabama, management believes the following represent the more significant items recorded through the application of this accounting guidance:

PGA Clause – Spire Missouri's PGA clauses allows it to flow through to customers, subject to a prudence review by the MoPSC, the cost of purchased gas supplies, including the costs, cost reductions and related carrying costs associated with the use of natural gas derivative instruments to hedge the purchase price of natural gas. The difference between actual costs incurred and costs recovered through the application of the PGA clauses are recorded as regulatory assets and regulatory liabilities that are recovered or refunded in a subsequent period. The PGA clauses also permit the application of carrying costs to all over- or under-recoveries of gas costs, including costs and cost reductions associated with the use of derivative instruments, and also provide for a portion of income from off-system sales and capacity release revenues to be flowed through to customers.

GSA Rider – Spire Alabama's rate schedules for natural gas distribution charges contain a GSA rider, established in 1993, which permits the pass-through to customers of changes in the cost of gas supply. Spire Alabama's tariff provides a temperature adjustment mechanism, also included in the GSA, that is designed to moderate the impact of departures from normal temperatures on Spire Alabama's earnings. The temperature adjustment applies primarily to residential, small commercial and small industrial customers. Other non-temperature weather related conditions that may affect customer usage are not included in the temperature adjustment. In prior years, Spire Alabama entered into cash flow derivative commodity instruments to hedge its exposure to price fluctuations on its gas supply. Spire Alabama recognizes all derivatives at fair value as either assets or liabilities on the balance sheet. Any realized gains or losses are passed through to customers using the mechanisms of the GSA rider in accordance with Spire Alabama's APSC approved tariff and are recognized as a regulatory asset or regulatory liability. All derivative commodity instruments in a gain position are valued on a discounted basis incorporating an estimate of performance risk specific to each related counterparty. Derivative commodity instruments in a loss position are valued on a discounted basis incorporating an estimate of performance risk specific to Spire Alabama. Spire Alabama currently has no active gas supply derivative positions.

ISRS – The ISRS allows Spire Missouri expedited recovery for its investment to upgrade its infrastructure and enhance its safety and reliability without the necessity of a formal rate case. Spire Missouri records ISRS revenues as authorized by the MoPSC and estimates the probability and amount of any refunds based on commission precedent, current legal rulings, the opinion of legal counsel, and other considerations.

For more information, see Note 15, Regulatory Matters, of the Notes to Financial Statements in Item 8.

Employee Benefits and Postretirement Obligations – Pension and postretirement obligations are calculated by actuarial consultants that utilize several statistical factors and other assumptions provided by management related to future events, such as discount rates, returns on plan assets, compensation increases, and mortality rates. For the Utilities, the amount of expense recognized and the amounts reflected in other comprehensive income are dependent upon the regulatory treatment provided for such costs, as discussed further below. Certain liabilities related to group medical benefits and workers' compensation claims, portions of which are self-insured and/or contain "stop-loss" coverage with third-party insurers to limit exposure, are established based on historical trends.

The amount of net periodic pension and other postretirement benefit costs recognized in the financial statements related to the Utilities' qualified pension plans and other postretirement benefit plans is based upon allowances, as approved by the MoPSC (for Spire Missouri) and as approved by the APSC (for Spire Alabama). The allowances have been established in the rate-making process for the recovery of these costs from customers. The differences between these amounts and actual pension and other postretirement benefit costs incurred for financial reporting purposes are deferred as regulatory assets or regulatory liabilities. GAAP also requires that changes that affect the funded status of pension and other postretirement benefit plans, but that are not yet required to be recognized as components of pension and other postretirement benefit costs, be reflected in other comprehensive income. For the Utilities' qualified pension plans and other postretirement benefit plans, amounts that would otherwise be reflected in other comprehensive income are deferred with entries to regulatory assets or regulatory liabilities.

For more information, see Note 13, Pension Plans and Other Postretirement Benefits, of the Notes to Financial Statements in Item 8.

The tables below reflect the sensitivity of Spire's plans to potential changes in key assumptions:

Pension Plan Benefits:			
Actuarial Assumptions	**Increase/ (Decrease)**	**Estimated Increase/ (Decrease) to Projected Benefit Obligation**	**Estimated Increase/ (Decrease) to Annual Net Pension Cost***
Discount Rate	0.25%	$ (9.3)	$ 0.1
	(0.25)%	9.7	(0.1)
Expected Return on Plan Assets	0.25%	—	(1.0)
	(0.25)%	—	1.0
Rate of Future Compensation Increase	0.25%	0.6	0.1
	(0.25)%	(0.6)	(0.1)

Postretirement Benefits:			
Actuarial Assumptions	**Increase/ (Decrease)**	**Estimated Increase/ (Decrease) to Projected Postretirement Benefit Obligation**	**Estimated Increase/ (Decrease) to Annual Net Postretirement Benefit Cost***
Discount Rate	0.25%	$ (2.5)	$ —
	(0.25)%	2.6	—
Expected Return on Plan Assets	0.25%	—	(0.7)
	(0.25)%	—	0.7

* Excludes the impact of regulatory deferral mechanism. See Note 13, Pension Plans and Other Postretirement Benefits, of the Notes to Financial Statements in Item 8 for information regarding the regulatory treatment of these costs.

Income Taxes – Income tax calculations require estimates due to book-tax differences, estimates with respect to regulatory treatment of certain items, and uncertainty in the interpretation of tax laws and regulations. Critical assumptions and judgments also include projections of future taxable income to determine the ability to utilize net operating losses and credit carryforwards prior to their expiration. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Management regularly assesses financial statement tax provisions to identify any change in regulatory treatment or tax related estimates and assumptions that could have a material impact on cash flows, financial position and/or results of operations. For more information, see Note 12, Income Taxes, of the Notes to Financial Statements in Item 8.

For further discussion of significant accounting policies, see Note 1, Summary of Significant Accounting Policies, of the Notes to Financial Statements in Item 8.

MARKET RISK

Commodity Price Risk

Gas Utility

The Utilities' commodity price risk, which arises from market fluctuations in the price of natural gas, is primarily managed through the operation of Spire Missouri's PGA clauses and Spire Alabama's GSA rider. The PGA clauses and GSA rider allows the Utilities to flow through to customers, subject to prudence review by the MoPSC and APSC, the cost of purchased gas supplies. Spire Missouri is allowed the flexibility to make up to three discretionary PGA changes during each year, in addition to its mandatory November PGA change, so long as such changes are separated by at least two months. Spire Missouri is able to mitigate, to some extent, changes in commodity prices through the use of physical storage supplies and regional supply diversity. Spire Alabama is allowed to make monthly changes to the GSA rate, but increases cannot exceed a 5% increase over the prior effective residential billing rate. The Utilities also have risk management policies that allow for the purchase of natural gas derivative instruments with the goal of managing its price risk associated with purchasing natural gas on behalf of its customers. These policies prohibit speculation. As of September 30, 2023, Spire Missouri had active natural gas derivative positions, but Spire Alabama did not. Costs and cost reduction, including carrying costs, associated with the use of natural gas derivative instruments are allowed to be passed on to customers through the operation of the PGA clauses or GSA rider. Accordingly, the Utilities do not expect any adverse earnings impact as a result of the use of these derivative instruments. However, the timing of recovery for cash payments related to margin requirements may cause short-term cash requirements to vary. For more information about the Utilities' natural gas derivative instruments, see Note 10, Derivative Instruments and Hedging Activities, of the Notes to Financial Statements in Item 8.

Gas Marketing

In the course of its business, Spire's non-regulated gas marketing subsidiary, Spire Marketing, enters into contracts to purchase and sell natural gas at fixed prices and natural gas index-based prices. Commodity price risk associated with these contracts has the potential to impact earnings and cash flows. To minimize this risk, Spire Marketing has a risk management policy that provides for daily monitoring of a number of business measures, including fixed price commitments. In accordance with the risk management policy, Spire Marketing manages the price risk associated with its fixed price commitments. This risk is currently managed either by closely matching the offsetting physical purchase or sale of natural gas at fixed-prices or through the use of natural gas futures, options and swap contracts traded on or cleared through the New York Mercantile Exchange (NYMEX) and Intercontinental Exchange (ICE) to lock in margins. At September 30, 2023 and 2022, Spire Marketing's unmatched fixed-price positions were not material to Spire's financial position or results of operations.

As mentioned above, Spire Marketing uses natural gas futures, options and swap contracts traded on or cleared through the NYMEX and ICE to manage the commodity price risk associated with its fixed-price natural gas purchase and sale commitments. These derivative instruments may be designated as cash flow hedges of forecasted purchases or sales. Such accounting treatment, if elected, generally permits a substantial portion of the gain or loss to be deferred from recognition in earnings until the period that the associated forecasted purchase or sale is recognized in earnings. To the extent a hedge is effective, gains or losses on the derivatives will be offset by changes in the value of the hedged forecasted transactions. At September 30, 2022 and 2021, Spire Marketing had no designated cash flow hedges. Information about the fair values of Spire Marketing's exchange-traded/cleared natural gas derivative instruments is presented below:

	Derivative Fair Values	Cash Margin	Derivatives and Cash Margin
Net balance of derivative assets at September 30, 2022	$ 10.6	$ 15.2	$ 25.8
Changes in fair value	(35.0)	—	(35.0)
Settlements/purchases - net	12.2	—	12.2
Changes in cash margin	—	3.1	3.1
Net balance of derivative assets at September 30, 2023	$ (12.2)	$ 18.3	$ 6.1

	As of September 30, 2023					
Maturity by Fiscal Year	**Total**	**2024**	**2025**	**2026**	**2027**	**2028**
Fair values of exchange-traded/cleared natural gas derivatives - net	$ (12.1)	$ (8.6)	$ (3.3)	$ (0.2)	$ —	$ —
Fair values of basis swaps - net	0.5	0.7	—	(0.1)	(0.1)	—
Fair values of puts and calls - net	(0.1)	(0.1)	—	—	—	—
Position volumes [millions of MMBtu, long or (short)]:						
Net futures/swap/option positions	21.4	7.9	9.9	2.3	1.2	0.1
Net basis swap positions	14.1	6.2	3.7	2.2	1.8	0.2
Net puts and calls positions	(0.8)	(0.8)	—	—	—	—

Certain of Spire Marketing's physical natural gas derivative contracts are designated as normal purchases or normal sales, as permitted by GAAP. This election permits the Company to account for the contract in the period the natural gas is delivered. Contracts not designated as normal purchases or normal sales, including those designated as trading activities, are accounted for as derivatives with changes in fair value recognized in earnings in the periods prior to settlement.

Below is a reconciliation of the beginning and ending balances for physical natural gas contracts accounted for as derivatives, none of which will settle beyond fiscal 2024:

Net balance of derivative liabilities at September 30, 2022	$ (8.9)
Changes in fair value	19.6
Settlements	(1.7)
Net balance of derivative liabilities at September 30, 2023	$ 9.0

For further details related to Spire Marketing's derivatives and hedging activities, see Note 10, Derivative Instruments and Hedging Activities, of the Notes to Financial Statements in Item 8.

Counterparty Credit Risk

Spire Marketing has concentrations of counterparty credit risk in that a significant portion of its transactions are with energy producers, utility companies and pipelines. These concentrations of counterparties have the potential to affect the Company's overall exposure to credit risk, either positively or negatively, in that each of these three groups may be affected similarly by changes in economic, industry or other conditions. Spire Marketing also has concentrations of credit risk with certain individually significant counterparties. To the extent possible, Spire Marketing enters into netting arrangements with its counterparties to mitigate exposure to credit risk. It is also exposed to credit risk associated with its derivative contracts designated as normal purchases and normal sales. Spire Marketing closely monitors its credit exposure and, although uncollectible amounts have not been significant, increased counterparty defaults are possible and may result in financial losses and/or capital limitations. For more information on these and other concentrations of credit risk, including how Spire Marketing manages these risks, see Note 11, Concentrations of Credit Risk, of the Notes to Financial Statements in Item 8.

Interest Rate Risk

The Company is subject to interest rate risk associated with its short-term debt issuances. Based on average short-term borrowings during fiscal 2023, an increase of 100 basis points in the underlying average interest rate for short-term debt would have caused an increase in interest expense (and a decrease in pre-tax earnings and cash flows) of approximately $8.4 on an annual basis. Portions of such an increase may be offset through the Utilities' application of PGA and GSA carrying costs. At September 30, 2023, Spire had fixed-rate long-term debt totaling $3,432.7, of which $1,498.0 was issued by Spire Missouri, $750.0 was issued by Spire Alabama, and $1,184.7 was issued by Spire and other subsidiaries. While the long-term debt issues are fixed-rate, they are subject to changes in fair value as market interest rates change. However, increases or decreases in fair value would impact earnings and cash flows only if the Company were to reacquire any of these issues in the open market prior to maturity. Under GAAP applicable to the Utilities' regulated operations, losses or gains on early redemptions of long-term debt would typically be deferred as regulatory assets or regulatory liabilities and amortized over a future period.

Refer to Note 10, Derivative Instruments and Hedging Activities, of the Notes to Financial Statements in Item 8 for details on the Company's interest rate swap transactions.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Spire Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Spire Inc. and subsidiaries (the "Company") as of September 30, 2023, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2023, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended September 30, 2023, of the Company and our report dated November 16, 2023, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for their assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Reports on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Spire Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Spire Inc. and subsidiaries (the "Company") as of September 30, 2023 and 2022, the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows, for each of the three years in the period ended September 30, 2023, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2023 and 2022, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2023, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of September 30, 2023, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated November 16, 2023, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Regulatory Matters – Impact of Rate Regulation on the Financial Statements – Refer to Note 15 to the financial statements

Critical Audit Matter Description

The Company accounts for their regulated operations in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 980, *Regulated Operations*. The provisions of this accounting guidance require, among other things, that financial statements of a rate-regulated enterprise reflect the actions of regulators, where appropriate. These actions may result in the recognition of revenues and expenses in time periods that are different than non-rate-regulated enterprises. When this occurs, costs are deferred as assets in the balance sheet (regulatory assets) and recorded as expenses when those amounts are reflected in rates. Also,

regulators can impose liabilities upon a regulated company for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future (regulatory liabilities).

The Company is subject to rate regulation by the Missouri and Alabama Public Service Commissions (the "Commissions"), which have jurisdiction with respect to the rates of natural gas companies within their respective geographies. The Company has stated that all regulatory assets and regulatory liabilities are recoverable or refundable through the regulatory process.

Accounting for the economics of rate regulation affects multiple financial statement line items, including property, plant, and equipment; regulatory assets and liabilities; operating revenues; and depreciation expense, and affects multiple disclosures in the Company's financial statements. There is a risk that the Commissions will not approve full recovery of the costs of providing utility service or recovery of all amounts invested in the utility business and a reasonable return on that investment. As a result, we identified the impact of rate regulation as a critical audit matter due to the high degree of subjectivity involved in assessing the impact of current and future regulatory orders on events that have occurred as of September 30, 2023, and the judgments made by management to support its assertions about impacted account balances and disclosures. Management judgments included assessing the likelihood of (1) recovery in future rates of incurred costs or (2) refunds to customers or future reduction in rates. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commissions, auditing these rate-impacted account balances and disclosures, and the related judgments, requires specialized knowledge of accounting for rate regulation due to the inherent complexities associated with the specialized rules related to accounting for the effects of cost-based regulation.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the uncertainty of future decisions by the Commissions included the following, among others:

- We tested the effectiveness of management's controls over evaluating the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates or of a future reduction in rates.
- We evaluated the Company's disclosures related to the impacts of rate regulation, including the balances recorded and regulatory developments, in the financial statements.
- We read relevant regulatory orders issued by the Commissions for the Company in Missouri, Alabama, and Mississippi; regulatory statutes, interpretations, procedural memorandums, and filings made by interveners; and other publicly available information to assess the likelihood of recovery in future rates or of a future reduction in rates based on precedents of the Commissions' treatment of similar costs under similar circumstances.
- We obtained from management the regulatory orders that support the probability of recovery, refund, and/or future reduction in rates for regulatory assets and liabilities and assessed management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

/s/ Deloitte & Touche LLP

St. Louis, Missouri
November 16, 2023

We have served as the Company's auditor since 1953.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholder and the Board of Directors of Spire Missouri Inc.

Opinion on the Financial Statements

We have audited the accompanying balance sheets of Spire Missouri Inc. (a wholly owned subsidiary of Spire Inc.) (the "Company") as of September 30, 2023 and 2022, the related statements of comprehensive income, shareholder's equity, and cash flows, for each of the three years in the period ended September 30, 2023, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2023 and 2022, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2023, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Regulatory Matters – Impact of Rate Regulation on the Financial Statements – Refer to Note 15 to the financial statements

Critical Audit Matter Description

The Company accounts for their regulated operations in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 980, *Regulated Operations*. The provisions of this accounting guidance require, among other things, that financial statements of a rate-regulated enterprise reflect the actions of regulators, where appropriate. These actions may result in the recognition of revenues and expenses in time periods that are different than non-rate-regulated enterprises. When this occurs, costs are deferred as assets in the balance sheet (regulatory assets) and recorded as expenses when those amounts are reflected in rates. Also,

regulators can impose liabilities upon a regulated company for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future (regulatory liabilities).

The Company is subject to rate regulation by the Missouri Public Service Commission (the "Commission"), which has jurisdiction with respect to the rates of natural gas companies within Missouri's geography. The Company has stated that all regulatory assets and regulatory liabilities are recoverable or refundable through the regulatory process.

Accounting for the economics of rate regulation affects multiple financial statement line items, including property, plant, and equipment; regulatory assets and liabilities; operating revenues; and depreciation expense, and affects multiple disclosures in the Company's financial statements. There is a risk that the Commission will not approve full recovery of the costs of providing utility service or recovery of all amounts invested in the utility business and a reasonable return on that investment. As a result, we identified the impact of rate regulation as a critical audit matter due to the high degree of subjectivity involved in assessing the impact of current and future regulatory orders on events that have occurred as of September 30, 2023, and the judgments made by management to support their assertions about impacted account balances and disclosures. Management judgments included assessing the likelihood of (1) recovery in future rates of incurred costs or (2) refunds to customers or future reduction in rates. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commission, auditing these rate-impacted account balances and disclosures, and the related judgments, requires specialized knowledge of accounting for rate regulation due to the inherent complexities associated with the specialized rules related to accounting for the effects of cost-based regulation.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the uncertainty of future decisions by the Commission included the following, among others:

- We tested the effectiveness of management's controls over evaluating the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates or of a future reduction in rates.
- We evaluated the Company's disclosures related to the impacts of rate regulation, including the balances recorded and regulatory developments, in the financial statements.
- We read relevant regulatory orders issued by the Commission for the Company in Missouri; regulatory statutes, interpretations, procedural memorandums, and filings made by interveners; and other publicly available information to assess the likelihood of recovery in future rates or of a future reduction in rates based on precedents of the Commission's treatment of similar costs under similar circumstances.
- We obtained from management the regulatory orders that support the probability of recovery, refund, and/or future reduction in rates for regulatory assets and liabilities and assessed management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

We have served as the Company's auditor since 1953.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholder and the Board of Directors of Spire Alabama Inc.

Opinion on the Financial Statements

We have audited the accompanying balance sheets of Spire Alabama Inc. (a wholly owned subsidiary of Spire Inc.) (the "Company") as of September 30, 2023 and 2022, the related statements of income, shareholder's equity, and cash flows, for each of the three years in the period ended September 30, 2023, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2023 and 2022, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2023, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Regulatory Matters – Impact of Rate Regulation on the Financial Statements – Refer to Note 15 to the financial statements

Critical Audit Matter Description

The Company accounts for their regulated operations in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 980, *Regulated Operations*. The provisions of this accounting guidance require, among other things, that financial statements of a rate-regulated enterprise reflect the actions of regulators, where appropriate. These actions may result in the recognition of revenues and expenses in time periods that are different than non-rate-regulated enterprises. When this occurs, costs are deferred as assets in the balance sheet (regulatory assets) and recorded as expenses when those amounts are reflected in rates. Also,

regulators can impose liabilities upon a regulated company for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future (regulatory liabilities).

The Company is subject to rate regulation by the Alabama Public Service Commission (the "Commission"), which has jurisdiction with respect to the rates of natural gas companies within Alabama's geography. The Company has stated that all regulatory assets and regulatory liabilities are recoverable or refundable through the regulatory process.

Accounting for the economics of rate regulation affects multiple financial statement line items, including property, plant, and equipment; regulatory assets and liabilities; operating revenues; and depreciation expense, and affects multiple disclosures in the Company's financial statements. There is a risk that the Commission will not approve full recovery of the costs of providing utility service or recovery of all amounts invested in the utility business and a reasonable return on that investment. As a result, we identified the impact of rate regulation as a critical audit matter due to the high degree of subjectivity involved in assessing the impact of current and future regulatory orders on events that have occurred as of September 30, 2023, and the judgments made by management to support their assertions about impacted account balances and disclosures. Management judgments included assessing the likelihood of (1) recovery in future rates of incurred costs or (2) refunds to customers or future reduction in rates. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commission, auditing these rate-impacted account balances and disclosures, and the related judgments, requires specialized knowledge of accounting for rate regulation due to the inherent complexities associated with the specialized rules related to accounting for the effects of cost-based regulation.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the uncertainty of future decisions by the Commission included the following, among others:

- We tested the effectiveness of management's controls over evaluating the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates or of a future reduction in rates.
- We evaluated the Company's disclosures related to the impacts of rate regulation, including the balances recorded and regulatory developments, in the financial statements.
- We read relevant regulatory orders issued by the Commission for the Company in Alabama; regulatory statutes, interpretations, procedural memorandums, and filings made by interveners; and other publicly available information to assess the likelihood of recovery in future rates or of a future reduction in rates based on precedents of the Commission's treatment of similar costs under similar circumstances.
- We obtained from management the regulatory orders that support the probability of recovery, refund, and/or future reduction in rates for regulatory assets and liabilities and assessed management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

SPIRE INC., SPIRE MISSOURI INC., AND SPIRE ALABAMA INC.
NOTES TO FINANCIAL STATEMENTS
(Dollars in millions, except per share, per unit and per gallon amounts)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION – These notes are an integral part of the accompanying audited financial statements of Spire Inc. ("Spire" or the "Company") presented on a consolidated basis, Spire Missouri Inc. ("Spire Missouri") and Spire Alabama Inc. ("Spire Alabama"). Spire Missouri, Spire Alabama and Spire EnergySouth Inc. ("Spire EnergySouth") are wholly owned subsidiaries of Spire. Spire Missouri, Spire Alabama and the subsidiaries of Spire EnergySouth (Spire Gulf Inc. and Spire Mississippi Inc.) are collectively referred to as the "Utilities." Unless otherwise indicated, references to years herein are references to the fiscal years ending September 30 for the Company and its subsidiaries.

The accompanying audited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The consolidated financial position, results of operations and cash flows of Spire include the accounts of the Company and all its subsidiaries. Transactions and balances between consolidated entities have been eliminated from the consolidated financial statements of Spire. In compliance with GAAP, transactions between Spire Missouri and Spire Alabama and their affiliates, as well as intercompany balances on their balance sheets, have not been eliminated from their separate financial statements.

NATURE OF OPERATIONS – Spire has three reportable segments: Gas Utility, Gas Marketing, and Midstream. The Gas Utility segment consists of the regulated natural gas distribution operations of the Company and is the core business segment of Spire in terms of revenue and earnings. The Gas Utility segment is comprised of the operations of: Spire Missouri, serving St. Louis, Kansas City, and other areas in Missouri; Spire Alabama, serving central and northern Alabama; and the subsidiaries of Spire EnergySouth, serving the Mobile, Alabama area and south-central Mississippi. The Gas Marketing segment includes Spire's primary gas-related business, Spire Marketing Inc. ("Spire Marketing"), which provides non-regulated natural gas services throughout the United States (U.S.). The Midstream segment includes Spire STL Pipeline and Spire Storage, which are subsidiaries engaged in the transportation and storage of natural gas. The activities of the Company's other subsidiaries are reported as Other and are described in Note 14, Information by Operating Segment. Spire Missouri and Spire Alabama each have a single reportable segment.

USE OF ESTIMATES – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

SYSTEM OF ACCOUNTS – The accounts of the Utilities are maintained in accordance with the Uniform System of Accounts prescribed by the applicable state public service commissions, which systems substantially conform to that prescribed by the Federal Energy Regulatory Commission (FERC).

REGULATED OPERATIONS – The Utilities account for their regulated operations in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 980, *Regulated Operations*. This topic sets forth the application of GAAP for those companies whose rates are established by or are subject to approval by an independent third-party regulator. The provisions of this accounting guidance require, among other things, that financial statements of a regulated enterprise reflect the actions of regulators, where appropriate. These actions may result in the recognition of revenues and expenses in time periods that are different than non-regulated enterprises. When this occurs, costs are deferred as assets in the balance sheet (regulatory assets) and recorded as expenses when those amounts are reflected in rates. In addition, regulators can impose liabilities upon a regulated company for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future (regulatory liabilities). Management believes that the current regulatory environment supports the continued use of these regulatory accounting principles and that all regulatory assets and regulatory liabilities are recoverable or refundable through the regulatory process. See additional discussion on regulated operations in Note 15, Regulatory Matters.

PROPERTY, PLANT, AND EQUIPMENT –

Utility Plant – Utility plant is stated at original cost. The cost of additions to utility plant includes contracted work, direct labor and materials, allocable overheads and an allowance for funds used during construction. The costs of units of property retired, replaced or renewed are removed from utility plant and are charged to accumulated depreciation. Maintenance and repairs of property and replacement and renewal of items determined to be less than units of property are charged to maintenance expenses.

Utility plant is depreciated using the composite method on a straight-line basis over the estimated service lives of the various classes of property at rates approved by the applicable regulatory commission. For Spire Missouri and for Spire Alabama, the annual depreciation and amortization expense in fiscal years 2023, 2022 and 2021 averaged approximately 3% of the original cost of depreciable and amortizable property.

Non-utility Property – Non-utility property is recorded at the original cost of acquisition or construction, which includes material, labor, contractor services and, for FERC-regulated projects, an allowance for funds used during construction. Repairs, replacements and renewals of items of property determined to be less than a unit of property or that do not increase the property's life or functionality are charged to maintenance expense. Upon retirement or sale of non-utility property, the original cost and related accumulated depreciation are removed from the accounts and any gain or loss is included in the income statements. Costs related to software developed or obtained for internal use are capitalized and amortized on a straight-line basis over the estimated useful life of the related software. If software is retired prior to being fully amortized, the difference is recorded as a loss in the income statements.

Accrued Capital Expenditures – Accrued capital expenditures, shown in the following table, are excluded from capital expenditures in the statements of cash flows until paid.

September 30	2023	2022	2021
Spire	$ 104.3	$ 77.8	$ 59.5
Spire Missouri	56.5	45.6	37.1
Spire Alabama	4.6	19.2	13.6

ASSET RETIREMENT OBLIGATIONS – Spire, Spire Missouri and Spire Alabama record legal obligations associated with the retirement of long-lived assets in the period in which the obligations are incurred, if sufficient information exists to reasonably estimate the fair value of the obligations. Obligations are recorded as both a cost of the related long-lived asset and as a corresponding liability. Subsequently, the asset retirement costs are depreciated over the life of the asset and the asset retirement obligations are accreted to the expected settlement amounts. Spire, Spire Missouri and Spire Alabama record asset retirement obligations associated with certain safety requirements to purge and seal gas distribution mains upon retirement, the plugging and abandonment of storage wells and other storage facilities, specific service line obligations, and certain removal and disposal obligations related to components of Spire Missouri's, Spire Alabama's and Spire Gulf's distribution systems and general plant. Asset retirement obligations recorded by Spire's other subsidiaries are not material. As authorized by the Missouri Public Service Commission (MoPSC) and the Alabama Public Service Commission (APSC), Spire Missouri, Spire Alabama and Spire Gulf accrue future asset removal costs associated with their property, plant and equipment even if a legal obligation does not exist. Such accruals are provided for through depreciation expense and are recorded with corresponding credits to regulatory liabilities or regulatory assets. When those utilities retire depreciable utility plant and equipment, they charge the associated original costs to accumulated depreciation and amortization, and any related removal costs incurred are charged to regulatory liabilities or regulatory assets. The difference between removal costs recognized in depreciation rates and the accretion expense and depreciation expense recognized for financial reporting purposes is a timing difference between recovery of these costs in rates and their recognition for financial reporting purposes. Accordingly, these differences are deferred as regulatory liabilities or regulatory assets. In the rate setting process, the regulatory liabilities or regulatory assets are excluded from the rate base upon which those utilities have the opportunity to earn their allowed rates of return.

The following table presents a reconciliation of the beginning and ending balances of asset retirement obligations at September 30, as reported in the balance sheets.

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Asset retirement obligations, beginning of year	$ 520.9	$ 519.6	$ 110.6	$ 143.4	$ 398.7	$ 362.8
Liabilities incurred during the period	7.9	3.2	0.9	1.2	2.0	0.5
Liabilities settled during the period	(6.8)	(9.2)	(2.5)	(4.1)	(2.5)	(2.0)
Accretion	21.5	21.1	4.5	5.9	16.5	14.7
Revisions in estimated cash flows	33.9	(13.8)	(2.4)	(35.8)	36.3	22.7
Asset retirement obligations, end of year	$ 577.4	$ 520.9	$ 111.1	$ 110.6	$ 451.0	$ 398.7

NATURAL GAS AND PROPANE GAS – For Spire Missouri's eastern region, inventory of natural gas in storage is priced on a last in, first out (LIFO) basis and inventory of propane gas in storage is priced on a first in, first out (FIFO) basis. For the rest of the Gas Utility segment, inventory of natural gas in storage is priced on the weighted average cost basis. The replacement cost of Spire Missouri's natural gas for current use in eastern Missouri at September 30, 2023 was less than the LIFO cost by $21.1. The replacement cost of Spire Missouri's natural gas for current use in eastern Missouri at September 30, 2022 was more than the LIFO cost by $37.3. The carrying value of the Utilities' inventory is never adjusted to a lower net realizable value or market value because, pursuant to Purchased Gas Adjustment (PGA) clauses or a Gas Supply Adjustment (GSA) rider, actual gas costs are recovered in customer rates. Natural gas and propane gas storage inventory in Spire's other operating segments is recorded at the lower of average cost or net realizable value.

BUSINESS COMBINATIONS AND GOODWILL – Spire's acquisitions were accounted for using business combination accounting. Under this method, the purchase price paid by the acquirer is allocated to the assets acquired and liabilities assumed as of the acquisition date based on their fair value. Goodwill is measured as the excess of the acquisition-date fair value of the consideration transferred over the amount of acquisition-date identifiable assets acquired net of assumed liabilities. At September 30, 2023, goodwill included in Spire's Gas Utility, Gas Marketing, and Midstream segments was $210.2, zero, and zero, respectively, with the remainder held at the corporate level. Goodwill amounts have not changed since fiscal 2017, and there are no accumulated impairment losses. Spire and Spire Missouri evaluate goodwill for impairment as of July 1 of each year, or more frequently if events and circumstances indicate that goodwill might be impaired. At each test date, the assessments concluded that goodwill was not impaired. The Company updated the assessments as of September 30, 2023, determining that it remained more likely than not that the fair value of each reporting unit exceeded its carrying value.

A subsidiary of Spire in the Midstream segment acquired a natural gas storage facility in northern Oklahoma, now named Spire Storage Salt Plains LLC, on April 1, 2023. The $37 purchase price was fully allocated to the assets acquired and liabilities assumed based on their fair value at the acquisition date, consisting almost entirely of base gas and other property, plant and equipment, resulting in no goodwill.

IMPAIRMENT OF LONG-LIVED ASSETS – Long-lived assets classified as held and used are evaluated for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. Whether impairment has occurred is determined by comparing the estimated undiscounted cash flows attributable to the assets with the carrying value of the assets. If the carrying value exceeds the undiscounted cash flows, the Company recognizes an impairment charge equal to the amount of the carrying value that exceeds the estimated fair value of the assets. In the period in which the Company determines an asset meets held-for-sale criteria, an impairment charge is recorded to the extent the book value exceeds its fair value less cost to sell.

DERIVATIVES – In the course of their business, certain subsidiaries of Spire enter into commitments associated with the purchase or sale of natural gas. Certain of their derivative natural gas contracts are designated as normal purchases or normal sales and, as such, are excluded from the scope of FASB ASC Topic 815, *Derivatives and Hedging*. Those contracts are accounted for as executory contracts and recorded on an accrual basis. Revenues and expenses from such contracts are recorded gross. Contracts not designated as normal purchases or normal sales are recorded as derivatives with changes in fair value recognized in earnings in the periods prior to physical delivery. Certain of Spire Marketing's wholesale purchase and sale transactions are classified as trading activities for financial reporting purposes, with income and expenses presented on a net basis in natural gas expenses in the Consolidated Statements of Income. Spire also enters into cash flow hedges through execution of interest rate swap contracts to protect itself against adverse movements in interest rates. Refer to Note 10, Derivative Instruments and Hedging Activities, for more information about derivatives.

INCOME TAXES – Spire and its subsidiaries account for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amount of existing assets and liabilities and the respective tax basis and for tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled. The effects on deferred tax assets and liabilities of a change in enacted tax rates is recognized in income or loss for non-regulated operations, and in a regulatory asset or regulatory liability for regulated operations. A valuation allowance is established when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company accounts for uncertain tax positions in accordance with authoritative guidance. The authoritative guidance addresses the determination of whether tax benefits claimed, or expected to be claimed, on a tax return should be recorded in the financial statements. Spire may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the position will be sustained upon examination by the taxing authority, based on the technical merits of the position. Tax-related interest and penalties, if any, are classified as a liability on the balance sheets. For additional information on the accounting for income taxes, refer to Note 12, Income Taxes.

CASH, CASH EQUIVALENTS, AND RESTRICTED CASH – All highly liquid debt instruments purchased with original maturities of three months or less are considered to be cash equivalents. Such instruments are carried at cost, which approximates market value. Outstanding checks on the Company's and Utilities' bank accounts in excess of funds on deposit create book overdrafts (which are funded at the time checks are presented for payment) and are classified as Other in the Current Liabilities section of the balance sheets. Changes in book overdrafts are reflected as Operating Activities in the statements of cash flows. In Spire's statements of cash flows, total Cash, Cash Equivalents, and Restricted Cash included $20.2 and $14.0 of restricted cash reported in "Other Investments" on the Company's balance sheet as of September 30, 2023 and 2022, respectively (in addition to amounts shown as "Cash and cash equivalents"). This restricted cash has been segregated and invested in debt securities in a trust account based on collateral requirements for reinsurance at Spire's risk management company.

NATURAL GAS RECEIVABLE – Spire Marketing enters into natural gas transactions with natural gas pipeline and storage companies known as park and loan arrangements. Under the terms of the arrangements, Spire Marketing purchases natural gas from a third party and delivers that natural gas to the pipeline or storage company for the right to receive the same quantity of natural gas from that company at the same location in a future period. These arrangements are accounted for as non-monetary transactions under GAAP and are recorded at the carrying amount. As such, natural gas receivables are reflected in "Other" current assets on the Consolidated Balance Sheets at cost, which includes related fees associated with the transactions. In the period that the natural gas is returned to Spire Marketing, concurrent with the sale of the natural gas to a third party, the related natural gas receivable is expensed in the Consolidated Statements of Income. In conjunction with these transactions, Spire Marketing usually enters into New York Mercantile Exchange (NYMEX) and Intercontinental Exchange (ICE) natural gas futures, options, and swap contracts or fixed price sales agreements to protect against market changes in future sales prices.

EARNINGS PER COMMON SHARE – GAAP requires dual presentation of basic and diluted earnings per share (EPS). EPS is computed using the two-class method, which is an earnings allocation method for computing EPS that treats a participating security as having rights to earnings that would otherwise have been available to common shareholders. Certain of the Company's stock-based compensation awards pay non-forfeitable dividends to the participants during the vesting period and, as such, are deemed participating securities. Basic EPS is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted EPS is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding that are increased for additional shares that would be outstanding if potentially dilutive securities were converted to common shares, pursuant to the treasury stock method. Shares attributable to equity units, non-participating performance-contingent restricted stock awards, and time-vested restricted stock/units are excluded from the calculation of diluted earnings per share if the effect would be antidilutive. Shares attributable to non-participating performance-contingent restricted stock awards are only included in the calculation of diluted earnings per share to the extent the underlying performance and/or market conditions are satisfied (a) prior to the end of the reporting period or (b) would be satisfied if the end of the reporting period were the end of the related contingency period and the result would be dilutive. The Company's EPS computations are presented in Note 4, Earnings Per Common Share.

TRANSACTIONS WITH AFFILIATES – Transactions between affiliates of the Company have been eliminated from the consolidated financial statements of Spire. Spire Missouri and Spire Alabama borrowed funds from the Company and incurred related interest, as reflected in their separate financial statements, and they participated in normal intercompany shared services transactions. In addition, Spire Missouri's and Spire Alabama's other transactions with affiliates included:

	Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021
Natural gas purchases from Spire Marketing	$ 57.4	$ 86.3	$ 92.5	$ 4.7	$ 3.2	$ 10.4
Natural gas sales to Spire Marketing	0.4	—	1.1	—	0.5	0.1
Transportation services from Spire STL Pipeline LLC	32.0	32.0	32.0	—	—	—
Natural gas storage services from Spire Storage Salt Plains LLC	0.7	—	—	—	—	—
Transportation services from Spire NGL Inc.	—	—	0.5	—	—	—

ACCOUNTS RECEIVABLE AND ALLOWANCE FOR CREDIT LOSSES – Trade accounts receivable are recorded at the amounts due from customers, including unbilled amounts. Accounts receivable are written off when they are deemed to be uncollectible. An allowance for expected credit losses is estimated and updated based on relevant data and trends such as accounts receivable aging, historical write-off experience, current write-off trends, economic conditions, and the impact of weather and availability of customer payment assistance on collection trends. For the Utilities, net write-offs as a percentage of revenue has historically been the best predictor of base net write-off experience over time. Management judgment is applied in the development of the allowance due to the complexity of variables and subjective nature of certain relevant factors. The accounts receivable of Spire's non-utility businesses are evaluated separately from those of the Utilities. The allowance for credit losses for those other businesses is based on a continuous evaluation of the individual counterparty risk and is not significant for the periods presented. Activity in the allowance for credit losses is shown in the following table.

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Allowance at beginning of year	$ 31.9	$ 30.3	$ 24.9	$ 24.9	$ 22.6	$ 18.1	$ 6.3	$ 6.6	$ 5.5
Provision for expected credit losses	16.6	11.6	14.7	13.3	11.2	11.1	2.6	0.3	3.1
Write-offs, net of recoveries	(16.0)	(10.0)	(9.3)	(12.0)	(8.9)	(6.6)	(3.2)	(0.6)	(2.0)
Allowance at end of year	$ 32.5	$ 31.9	$ 30.3	$ 26.2	$ 24.9	$ 22.6	$ 5.7	$ 6.3	$ 6.6

FINANCE RECEIVABLES – Spire Alabama finances third party contractor sales of merchandise including gas furnaces and appliances. At September 30, 2023 and 2022, Spire Alabama's finance receivable totaled approximately $6.7 and $7.1, respectively. Financing is available only to qualified customers who meet creditworthiness thresholds for customer payment history and external agency credit reports. Spire Alabama relies upon ongoing payments as the primary indicator of credit quality during the term of each contract. The allowance for credit losses is recognized using an estimate of write-off percentages based on historical experience. Delinquent accounts are evaluated on a case-by-case basis and, absent evidence of debt repayment, after 90 days are due in full and assigned to a third-party collection agency. The remaining finance receivable is written off approximately 12 months after being assigned to the third-party collection agency. Spire Alabama had finance receivables past due 90 days or more of $0.3 at September 30, 2023 and 2022.

GROUP MEDICAL AND WORKERS' COMPENSATION RESERVES – The Company self-insures its group medical and workers' compensation costs and carries stop-loss coverage in relation to medical claims and workers' compensation claims. Reserves for amounts incurred but not reported are established based on historical cost levels and lags between occurrences and reporting.

FAIR VALUE MEASUREMENTS – Certain assets and liabilities are recognized or disclosed at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs used to measure fair value.

The levels of the hierarchy are described below:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 – Pricing inputs other than quoted prices included within Level 1, which are either directly or indirectly observable for the asset or liability as of the reporting date. These inputs are derived principally from, or corroborated by, observable market data.
- Level 3 – Pricing that is based upon inputs that are generally unobservable that are based on the best information available and reflect management's assumptions about how market participants would price the asset or liability.

Assessment of the significance of a particular input to the fair value measurements may require judgment and may affect the valuation of the asset or liability and its placement within the fair value hierarchy. Additional information about fair value measurements is provided in Note 8, Fair Value of Financial Instruments, Note 9, Fair Value Measurements, and Note 13, Pension Plans and Other Postretirement Benefits.

STOCK-BASED COMPENSATION – The Company accounts for share-based compensation arrangements in accordance with ASC Topic 718, *Compensation - Stock Compensation*. The Company measures stock-based compensation awards at fair value at the date of grant and recognizes the compensation cost of the awards over the requisite service period. Forfeitures are recognized in the period they occur. Refer to Note 3, Stock-Based Compensation, for further discussion of the accounting for the Company's stock-based compensation plans.

2. REVENUE

The following tables show revenue disaggregated by source and customer type.

	2023	2022	2021
Spire			
Gas Utility:			
Residential	$ 1,648.5	$ 1,416.6	$ 1,234.0
Commercial & industrial	606.0	338.9	586.0
Transportation	121.6	118.0	122.9
Off-system & other incentive	30.0	42.0	152.7
Other customer revenue	16.1	19.9	22.2
Total revenue from contracts with customers	2,422.2	1,935.4	2,117.8
Changes in accrued revenue under alternative revenue programs	34.7	10.7	1.5
Total Gas Utility operating revenues	2,456.9	1,946.1	2,119.3
Gas Marketing	179.1	234.9	96.5
Midstream	66.1	53.1	52.6
Other	16.7	16.1	15.1
Total before eliminations	2,718.8	2,250.2	2,283.5
Intersegment eliminations (see Note 14, Information by Operating Segment)	(52.5)	(51.7)	(48.0)
Total Operating Revenues	$ 2,666.3	$ 2,198.5	$ 2,235.5
Spire Missouri			
Residential	$ 1,261.3	$ 1,061.4	$ 882.1
Commercial & industrial	411.9	177.2	436.1
Transportation	33.2	33.3	33.5

Other customer revenue	3.6	5.5	1.9
Total revenue from contracts with customers	564.4	507.4	490.6
Changes in accrued revenue under alternative revenue programs	6.7	1.7	3.4
Total Operating Revenues	$ 571.1	$ 509.1	$ 494.0

The Utilities sell natural gas to residential and other customers. The sale of natural gas is governed by the various state utility commissions, which set rates, charges, and terms and conditions of service, collectively included in a "tariff." The performance obligation, which relates to the promise to provide natural gas, is satisfied over time as the customer simultaneously receives and consumes the natural gas, and revenue is recognized accordingly.

The Utilities' transportation revenue relates to the promise to transport the specified quantities of natural gas at tariff rates. This performance obligation is satisfied over time as the gas is transported, and revenue is recognized as invoiced monthly.

The Utilities have alternative revenue programs (ARPs), which represent an agreement between the utility and its regulator, currently consisting of decoupling mechanisms (also known as weather normalization adjustments) and incentive programs (primarily Alabama's Cost Control Measure). When the criteria to recognize additional (or reduced) revenue from ARPs have been met, the Utilities establish a regulatory asset (or liability). When amounts previously recognized for ARPs are billed, the Utilities reduce the regulatory asset (or liability) and increase (or decrease) accounts receivable. Billed amounts, which are part of the overall tariff paid by customers, are included in revenue from contracts with customers, while the change in the related regulatory asset or liability is presented as revenue from ARPs. Depending on whether the beginning accrued ARP balance was a regulatory asset or liability and depending on the size and direction of the current period accrual, the amount presented as revenue from ARPs could be negative.

The Utilities read meters and bill customers on monthly cycles. Spire Missouri, Spire Gulf and Spire Mississippi record their gas utility revenues from gas sales and transportation services on an accrual basis that includes estimated amounts for gas delivered but not yet billed. The accruals for unbilled revenues are reversed in the subsequent accounting period when meters are actually read and customers are billed. Spire Alabama records natural gas distribution revenues in accordance with the tariff established by the APSC. Unbilled revenue is accrued in an amount equal to the related gas cost, as profit margin is not considered earned until billed. Spire's other subsidiaries, including Spire Marketing, record revenues when earned, as the product is delivered or as services are performed.

Gas Marketing's contracts are derivatives. Wholesale contracts (with producers, municipalities, and utility companies) are subject to derivative accounting. Retail contracts (with large commercial and industrial customers) are designated as "normal purchase, normal sale" arrangements and are therefore accounted for as revenue from contracts with customers. The performance obligation is satisfied over time by the transfer of control of natural gas to the customer, and revenue is recognized as invoiced monthly.

Payments are generally required within 30 days of billing, and contracts generally do not have a significant financing component. Spire's revenues are not subject to significant returns, refunds, or warranty obligations.

Spire, Spire Missouri, and Spire Alabama have elected to apply a "right to invoice" practical expedient, recognizing revenue for volumes delivered for which they have a right to invoice, as long as that amount corresponds with the value to the customer. Disclosures about remaining performance obligations are not required because either contracts have an original expected duration of one year or less, or revenue is recognized under the right to invoice practical expedient, or both.

Sales taxes imposed on applicable Spire Alabama and Spire Missouri sales are billed to customers. These amounts are not recorded in the statements of income but are recorded as tax collections payable and included in the "Other" line of the Current Liabilities section of the balance sheets.

Gross receipts taxes associated with the Company's natural gas utility services are imposed on the Company, Spire Missouri, and Spire Alabama and billed to its customers. The expense amounts (shown in the table below) are reported gross in the "Taxes, other than income taxes" line in the statements of income, and corresponding revenues are reported in "Operating Revenues."

	2023	2022	2021
Spire	$ 131.8	$ 109.8	$ 94.0
Spire Missouri	96.7	79.6	64.3
Spire Alabama	29.9	25.5	25.1

3. STOCK-BASED COMPENSATION

The Spire 2015 Equity Incentive Plan (EIP) was approved by shareholders of Spire on January 29, 2015 and amended on November 9, 2018. The purpose of the EIP is to encourage directors, officers, and key employees of the Company and its subsidiaries to contribute to the Company's success and align their interests with that of shareholders. To accomplish this purpose, the Compensation and Human Resources Committee ("Committee") of Spire's Board of Directors (the "Board") may grant awards under the EIP that may be earned by achieving performance objectives and/or other criteria as determined by the Committee. Under the terms of the EIP, officers and employees of the Company and its subsidiaries, as determined by the Committee, are eligible to be selected for awards. The EIP provides for restricted stock, restricted stock units, qualified and non-qualified stock options, stock appreciation rights, and performance shares payable in stock, cash, or a combination of both. The EIP generally provides a minimum vesting period of at least three years for each type of award, with pro rata vesting permitted during the minimum three-year vesting period. The maximum number of shares reserved for issuance under the EIP is 1,000,000.

The Company allows participants in the EIP the ability to defer a portion or all of their award. As of September 30, 2023, a total of 244,618 share equivalents (at target payout) have been deferred by participants. Such units are included in the data presented below. After the required holding period, deferred awards are ultimately paid in cash rather than in shares of stock. Upon vesting, the Company issues new shares to satisfy awards that are not deferred.

Restricted Stock Awards

During fiscal 2023, the Company granted116,390 performance-contingent restricted share units to executive officers and key employees at a weighted average grant date fair value of $79.88 per share. This number represents the target shares that can be earned pursuant to the terms of the awards. The share units have a performance period ending September 30, 2026. While the participants have no interim voting rights on these share units, dividends accrue during the performance period and are paid to the participants upon vesting but are subject to forfeiture if the underlying share units do not vest.

The number of share units that will ultimately vest is dependent upon the attainment of certain levels of earnings, as well as the Company's level of total shareholder return (TSR) during the performance period relative to a comparator group of peer companies. This TSR provision is considered a market condition under GAAP and is discussed further below. The maximum amount of shares or share equivalents that can be earned pursuant to the terms of the awards is 200% of the target units granted.

The weighted average grant date fair value of performance-contingent restricted share units granted during fiscal years 2022 and 2021 was $67.43 and $68.69 per share, respectively.

Fiscal 2023 activity of restricted stock units subject to performance and/or market conditions is presented below:

	Units	Weighted Average Grant Date Fair Value Per Unit
Non-vested at September 30, 2022	343,524	$ 70.14
Granted	116,390	$ 79.88
Adjusted for performance	(13,459)	$ 76.91
Vested	(74,556)	$ 76.91
Forfeited	(23,546)	$ 71.73
Non-vested at September 30, 2023	348,353	$ 71.76

For the year ended September 30, 2023, the total number of shares or share equivalents that could be issued if all outstanding award grants attain maximum performance payout is 696,706.

During fiscal 2023, the Company granted 55,524 shares of time-vested restricted stock to executive officers and key employees at a weighted average grant date fair value of $71.91 per share. Unless forfeited based on terms of the agreements, these shares will vest in fiscal 2025. In the interim, participants receive full voting rights and dividends, which are not subject to forfeiture. The weighted average grant date fair value of time-vested restricted stock and restricted stock units awarded to employees during fiscal years 2022 and 2021 was $63.57 and $64.29 per share, respectively.

During fiscal 2023, the Company granted 12,720 shares of time-vested restricted stock to non-employee directors at a weighted average grant date fair value of $75.59 per share. These shares vested in fiscal 2023, six months after the grant date. The weighted average grant date fair value of restricted stock awarded to non-employee directors during fiscal years 2022 and 2021 was $66.31 and $62.35 per share, respectively.

Time-vested restricted stock and stock unit activity for fiscal 2023 is presented below:

	Shares/ Units	Weighted Average Grant Date Fair Value Per Share
Non-vested at September 30, 2022	122,245	$ 66.60
Granted	68,244	$ 72.60
Vested	(59,040)	$ 75.27
Forfeited	(8,460)	$ 65.36
Non-vested at September 30, 2023	122,989	$ 65.85

For restricted stock and stock units (performance-contingent and time-vested) that vested during fiscal years 2023, 2022, and 2021, the Company withheld 18,428 shares, 28,055 shares, and 16,787 shares, respectively, at weighted average prices of $72.03, $63.97 and $65.99 per share, respectively, pursuant to elections by employees to satisfy tax withholding obligations. The total fair value of restricted stock (performance-contingent and time-vested) that vested during fiscal years 2023, 2022, and 2021 was $8.6, $10.1, and $6.5, respectively, and the related tax benefit was $3.2, $3.8, and $2.5, respectively. None of the tax benefits have been realized.

Equity Compensation Costs

Compensation cost for performance-contingent restricted stock and stock unit awards is based upon the probable outcome of the performance conditions. For shares or units that do not vest or that are not expected to vest due to the outcome of the performance conditions (excluding market conditions), no compensation cost is recognized and any previously recognized compensation cost is reversed.

The fair value of awards of performance-contingent and time-vested restricted stock and restricted stock units, not subject to the TSR provision, are estimated using the closing price of the Company's stock on the grant date. For those awards that do not pay dividends during the vesting period, the estimate of fair value is reduced by the present value of the dividends expected to be paid on the Company's common stock during the performance period, discounted using an appropriate U.S. Treasury yield. For shares subject to the TSR provision, the estimated impact of this market condition is reflected in the grant date fair value per share of the awards. Accordingly, compensation cost is not reversed to reflect any actual reductions in the awards that may result from the TSR provision. However, if the Company's TSR during the performance period ranks below the level specified in the award agreements, relative to a comparator group of companies, and the Committee elects not to reduce the award (or reduce by a lesser amount), this election would be accounted for as a modification of the original award and additional compensation cost would be recognized at that time. The grant date fair value of the awards subject to the TSR provision awarded during fiscal years 2023, 2022 and 2021 was valued by a Monte Carlo simulation model that assessed the probabilities of various TSR outcomes. The significant assumptions used in the Monte Carlo simulations are as follows:

	2023	2022	2021
Risk-free interest rate	4.26%	0.79%	0.22%
Expected dividend yield of stock	—	—	—
Expected volatility of stock	33.8%	32.2%	31.4%
Performance period (in years)	3.0	3.0	3.0

The risk-free interest rate was based on the yield on U.S. Treasury securities matching the vesting period. A zero-percent dividend yield was used, which is mathematically equivalent to the assumption that dividends are reinvested as they are paid. The expected volatility is based on the historical volatility of the Company's stock. Volatility assumptions were also made for each of the companies included in the comparator group. The vesting period is equal to the performance period set forth in the terms of the award.

The amounts of compensation cost recognized for share-based compensation arrangements are presented below:

	2023	2022	2021
Total compensation cost	$ 11.2	$ 7.5	$ 16.6
Compensation cost capitalized	(1.4)	(1.1)	(2.7)
Compensation cost recognized in net income	9.8	6.4	13.9
Income tax benefit recognized in net income	(2.2)	(1.5)	(3.2)
Compensation cost recognized in net income, net of income tax	$ 7.6	$ 4.9	$ 10.7

As of September 30, 2023, there was $12.1 of total unrecognized compensation cost related to non-vested share-based compensation arrangements, which is expected to be recognized over a weighted average period of 1.7 years.

4. EARNINGS PER COMMON SHARE

	2023	2022	2021
Basic Earnings Per Common Share:			
Net Income	$ 217.5	$ 220.8	$ 271.7
Less: Provision for preferred dividends	14.8	14.8	14.8
Income allocated to participating securities	0.3	0.3	0.4
Net Income Available to Common Shareholders	$ 202.4	$ 205.7	$ 256.5
Weighted Average Common Shares Outstanding (in millions)	52.5	52.0	51.6
Basic Earnings Per Share of Common Stock	$ 3.86	$ 3.96	$ 4.97
Diluted Earnings per Common Share:			
Net Income	$ 217.5	$ 220.8	$ 271.7
Less: Provision for preferred dividends	14.8	14.8	14.8
Income allocated to participating securities	0.3	0.3	0.4
Net Income Available to Common Shareholders	$ 202.4	$ 205.7	$ 256.5
Weighted Average Common Shares Outstanding (in millions)	52.5	52.0	51.6
Dilutive Effect of Restricted Stock and Restricted Stock Units (in millions)*	0.1	0.1	0.1
Weighted Average Diluted Common Shares (in millions)	52.6	52.1	51.7
Diluted Earnings Per Share of Common Stock	$ 3.85	$ 3.95	$ 4.96
* Calculation excludes certain outstanding common shares (shown in millions by period at the right) attributable to common stock forward contracts, stock units subject to performance or market conditions, and restricted stock, which could have a dilutive effect in the future	1.9	0.1	0.1

5. SHAREHOLDERS' EQUITY

Spire

Preferred Stock

At September 30, 2023 and 2022, Spire had authorized 5,000,000 shares of preferred stock.

On May 21, 2019, Spire completed the public offering of 10,000,000 depositary shares (the "Depositary Shares"), each representing a 1/1,000th interest in a share of the Company's 5.90% Series A Cumulative Redeemable Perpetual Preferred Stock, par value $25.00 per share, with a liquidation preference of $25,000 per share (the "Preferred Stock"). The transaction resulted in $242.0 of net proceeds, after deducting commissions and sale expenses, which proceeds were used to (i) refinance long-term and short-term Spire debt and (ii) fund capital expenditures at both the Utilities and Spire's gas-related businesses.

Dividends on the Preferred Stock, when declared by the Board, are payable on the liquidation preference amount, on a cumulative basis, quarterly in arrears on the 15th day of February, May, August and November of each year, beginning on August 15, 2019. Dividends are payable out of amounts legally available for the payment of dividends at an annual rate equal to 5.90% of the liquidation preference per share of Preferred Stock (equivalent to $25.00 per Depositary Share). Dividends accumulate daily and are cumulative from May 21, 2019.

Under the terms of the Preferred Stock, the Company's ability to declare or pay dividends on, or purchase or redeem, shares of its common stock or any class or series of capital stock of the Company that rank junior to the Preferred Stock are subject to certain restrictions in the event that the Company does not declare and pay the full cumulative dividends on the Preferred Stock through the most recently completed quarterly dividend period.

Spire may, at its option, redeem the Preferred Stock (i) in whole, but not in part, at any time prior to August 15, 2024, within 120 days after a ratings event where a rating agency amends, clarifies or changes the criteria it uses to assign equity credit for securities such as the Preferred Stock, at a redemption price in cash equal to $25,500 per share, or (ii) in whole or in part, from time to time, on or after August 15, 2024, at a redemption price in cash equal to $25,000 per share, plus, in each case, all accumulated and unpaid dividends (whether declared or not) up to such redemption date.

Shareholders of the Preferred Stock generally have no voting rights with respect to matters that generally require the approval of voting stockholders. The limited voting rights of holders of the Preferred Stock include the right to vote on certain matters that may affect the preference or special rights of the Preferred Stock. In addition, if and whenever dividends on any shares of Preferred Stock have not been declared and paid for at least six dividend periods, whether or not consecutive, the number of directors then constituting the Board shall automatically be increased by two (to be elected by the holders of the Preferred Stock) until all accumulated and unpaid dividends on the Preferred Stock have been paid in full.

Equity Units

In February 2021, Spire issued 3.5 million equity units, initially in the form of Corporate Units, for an aggregate stated amount of $175.0, resulting in net proceeds (after underwriting fees and other issuance costs) of $169.3. Each "Corporate Unit" has a stated amount of fifty dollars and consists of (i) a stock purchase contract and (ii) a 1/20, or 5%, undivided beneficial ownership interest in one thousand dollars principal amount of Spire's 2021 Series A 0.75% Remarketable Senior Notes due March 1, 2026 (RSNs). The RSNs are pledged as collateral to secure the holder's obligation under the related stock purchase contracts. Each stock purchase contract obligates the holder to purchase, and Spire to issue and deliver, on March 1, 2024, for a price of fifty dollars in cash, a variable number of shares of its common stock as follows (subject to anti-dilution adjustments).

If the applicable market value* per share of Spire common stock is:	Number of shares to be purchased per stock purchase contract is:
Equal to or greater than $78.6906 ("threshold appreciation price")	0.6354 ("minimum settlement rate")
Less than $78.6906, but greater than $64.24	$50.00 ÷ applicable market value*
Less than or equal to $64.24 ("reference price")	0.7783 ("maximum settlement rate")

*Based on the volume-weighted average price of Spire common stock during the 20 trading days before settlement.

If a holder elects to settle purchase contracts early, the holder would pay fifty dollars per unit and receive 0.6354 shares per unit.

The Company makes quarterly interest payments on the RSNs at the rate of 0.75% per year and quarterly contract adjustment payments on the stock purchase contracts at the rate of 6.75%. The RSNs and the contract adjustment payments are structurally subordinated to all liabilities of Spire's subsidiaries.

At issuance, the Company recorded the $35.0 present value of the stock purchase contract payments as a liability (reflected in "Other" current and noncurrent liabilities on the balance sheet) offset by a charge to additional paid-in capital in equity. This noncash financing activity has been excluded from the statement of cash flows. Interest payments on the RSNs are recorded as interest expense and stock purchase contract payments are charged against the liability. Accretion of the stock purchase contract liability is recorded as imputed interest expense. In calculating diluted EPS, the Company applies the treasury stock method to the Corporate Units. These securities have not had an effect on diluted EPS.

In order to secure funds necessary for the holders to pay the purchase price of the common stock on the purchase contract settlement date, the remarketing agent will remarket the RSNs on behalf of the current holders to new third-party investors. Following any successful remarketing of the RSNs, the interest rate on the RSNs will be reset, interest will be payable on a semi-annual basis, and Spire will cease to have the option to redeem the RSNs, other than in connection with the occurrence or continuance of certain special events.

ATM Program

On February 6, 2019, Spire entered into an "at-the-market" (ATM) equity distribution agreement, supplemented as of May 14, 2019, pursuant to which the Company may offer and sell, from time to time, shares of its common stock (including shares of common stock that may be sold pursuant to forward sale agreements entered into in connection with the ATM equity distribution agreement). On April 28, 2022, Spire's board approved a new authorization for the sale of additional shares with an aggregate offering price of up to $200.0 through May 2025.

Settled sales under this ATM program are included in "Common stock issued" in the Condensed Consolidated Statements of Shareholders' Equity. Also, in the second and third quarters of fiscal 2023, Spire executed forward sale agreements for 228,690 shares and 2,087,231 shares, respectively, of its common stock. On September 27, 2023, 571,372 of these shares were settled, generating $38.5 of net proceeds. The third quarter forward sales included a block sale of 1,744,549 shares which must be settled on or before December 28, 2023. Had all shares under this forward agreement been settled as of September 30, 2023, it would have generated net proceeds of $111.2.

As of September 30, 2023, under the ATM program, Spire may sell additional shares with an aggregate offering price of up to $17.9.

Other Equity Information

Spire has a shelf registration statement on Form S-3 on file with the U.S. Securities and Exchange Commission (SEC) for the issuance and sale of up to 250,000 shares of common stock under its Dividend Reinvestment and Direct Stock Purchase Plan. There were 244,182 and 237,891 shares at September 30, 2023 and November 10, 2023, respectively, remaining available for issuance under this Form S-3. Spire also has a universal shelf registration statement on Form S-3 on file with the SEC for the issuance of various equity and debt securities, which expires on May 9, 2025.

Spire Missouri

Substantially all of Spire Missouri's plant is subject to the liens of its first mortgage bonds. The mortgage contains several restrictions on Spire Missouri's ability to pay cash dividends on its common stock or to make loans to its parent company. These mortgage restrictions are applicable regardless of whether the stock is publicly held or held solely by Spire Missouri's parent company. Under the most restrictive of these provisions, no cash dividend may be declared or paid if, after the dividend, the aggregate net amount spent for all dividends after September 30, 1953 would exceed a maximum amount determined by a formula set out in the mortgage. Under that formula, the maximum amount is the sum of $8.0 plus earnings applicable to common stock (adjusted for stock repurchases and issuances) for the period from September 30, 1953 to the last day of the quarter before the declaration or payment date for the dividends. As of September 30, 2023 and 2022, the amount under the mortgage's formula that was available to pay dividends was $1,678.5 and $1,579.4, respectively. Thus, all of Spire Missouri's retained earnings were free from such dividend restrictions as of those dates.

Spire Missouri has a universal shelf registration statement on Form S-3 on file with the SEC for the issuance of various equity and debt securities, which expires on May 9, 2025. Effective March 5, 2022, Spire Missouri was authorized by the MoPSC to issue conventional term loans, first mortgage bonds, unsecured debt, preferred stock and common stock in an aggregate amount of up to $800.0 for financings placed any time before December 31, 2024. Under this authorization through September 30, 2023, Spire Missouri has issued $79.1 of common stock and $400.0 of first mortgage bonds.

At September 30, 2023 and 2022, Spire Missouri had authorized 1,480,000 shares of preferred stock, but none were issued and outstanding.

Spire Alabama

At September 30, 2023 and 2022, Spire Alabama had authorized 120,000 shares of preferred stock, but none were issued and outstanding.

Accumulated Other Comprehensive Income

The components of accumulated other comprehensive income (AOCI), net of income taxes, recognized in the balance sheets at September 30 were as follows:

	Net Unrealized Gain (Loss) on Cash Flow Hedges	Defined Benefit Pension and Other Postretirement Benefit Plans	Net Unrealized Gain (Loss) on Available-for-Sale Debt Securities	Total
Spire				
Balance at September 30, 2021	$ 7.9	$ (4.2)	$ (0.1)	$ 3.6
Other comprehensive income (loss)	42.5	1.5	(0.4)	43.6
Balance at September 30, 2022	50.4	(2.7)	(0.5)	47.2
Other comprehensive income	0.1	0.2	0.1	0.4
Balance at September 30, 2023	$ 50.5	$ (2.5)	$ (0.4)	$ 47.6
Spire Missouri				
Balance at September 30, 2021	$ —	$ (4.2)	$ —	$ (4.2)
Other comprehensive income	—	1.5	—	1.5
Balance at September 30, 2022	—	(2.7)	—	(2.7)
Other comprehensive income	—	0.2	—	0.2
Balance at September 30, 2023	$ —	$ (2.5)	$ —	$ (2.5)

Income tax expense (benefit) recorded for items of other comprehensive income (loss) reported in the statements of comprehensive income is calculated by applying statutory federal, state, and local income tax rates applicable to ordinary income. The tax rates applied to individual items of other comprehensive income (loss) are similar within each reporting period. For the periods presented, Spire Alabama had no AOCI balances.

6. LONG-TERM DEBT

The composition of long-term debt as of September 30 is shown in the following tables.

	2023	2022
Spire		
3.31% Notes Payable, due December 15, 2022	$ —	$ 25.0
3.54% Senior Notes, due February 27, 2024	150.0	150.0

4.64% Notes, due January 15, 2049	90.0	90.0
4.02% Notes, due January 15, 2058	30.0	30.0
Total principal of Spire Alabama long-term debt	750.0	575.0
Less: Unamortized discounts and debt issuance costs	(4.1)	(3.5)
Spire Alabama long-term debt, excluding current portion	$ 745.9	$ 571.5

Spire Missouri's $300.0 of first mortgage bonds due December 2, 2024 are secured equally with all its other first mortgage bonds. Interest is payable quarterly in arrears at a floating rate based on the compounded secured overnight financing rate plus 50 basis points, with a maximum rate of the lesser of 8% or the maximum rate then permitted by applicable law.

Maturities of long-term debt for Spire on a consolidated basis, Spire Missouri and Spire Alabama for the five fiscal years after September 30, 2023 are as follows:

	2024	2025	2026	2027	2028
Spire	$ 156.6	$ 342.0	$ 312.5	$ 108.1	$ 53.6
Spire Missouri	—	300.0	—	—	45.0
Spire Alabama	—	35.0	—	—	—

The long-term debt agreements of Spire, Spire Missouri and Spire Alabama contain customary financial covenants and default provisions. As of September 30, 2023, there were no events of default under these financial covenants.

Spire

At September 30, 2023, Spire had outstanding principal of long-term debt totaling $3,732.7, of which $1,798.0 was issued by Spire Missouri, $750.0 was issued by Spire Alabama and $229.7 was issued by other subsidiaries. Except for $300.0 of Spire Missouri floating-rate bonds, all long-term debt bears fixed rates and is subject to changes in fair value as market interest rates change. However, increases and decreases in fair value would impact earnings and cash flows only if the Company were to reacquire any of these issues in the open market prior to maturity. Under GAAP applicable to the Utilities' regulated operations, losses or gains on early redemption of long-term debt would typically be deferred as regulatory assets or regulatory liabilities and amortized over a future period. Interest expense shown on Spire's consolidated statement of income is net of capitalized interest totaling $8.6, $4.5 and $4.4 for the years ended September 30, 2023, 2022 and 2021, respectively.

As indicated in Note 5, Shareholders' Equity, Spire has a shelf registration statement on Form S-3 on file with the SEC for the issuance of equity and debt securities.

Spire Missouri

At September 30, 2023, Spire Missouri had outstanding principal of long-term debt totaling $1,798.0. Except for $300.0 of floating-rate bonds, all long-term debt bears fixed rates and is subject to changes in fair value as market interest rates change. Interest expense shown on Spire Missouri's statement of comprehensive income is net of capitalized interest totaling $3.1, $0.6 and $0.2 for the years ended September 30, 2023, 2022 and 2021, respectively.

As indicated in Note 5, Shareholders' Equity, Spire Missouri has a shelf registration on Form S-3 on file with the SEC for issuance of equity and debt securities, which expires on May 9, 2025. Effective March 5, 2022, Spire Missouri was authorized by the MoPSC to issue conventional term loans, first mortgage bonds, unsecured debt, preferred stock and common stock in an aggregate amount of up to $800.0 for financings placed any time before December 31, 2024. Under this authorization through September 30, 2023, Spire Missouri has issued $79.1 of common stock and $400.0 of first mortgage bonds.

Substantially all of Spire Missouri's plant is subject to the liens of its first mortgage bonds. The mortgage contains several restrictions on Spire Missouri's ability to pay cash dividends on its common stock, which are described in Note 5, Shareholders' Equity.

Spire Alabama

At September 30, 2023, Spire Alabama had outstanding principal of fixed-rate long-term debt totaling $750.0. While these long-term debt issues are fixed-rate, they are subject to changes in fair value as market interest rates change. Interest expense shown on Spire Alabama's statement of income is net of capitalized interest totaling $2.3, $3.2 and $3.2 for the years ended September 30, 2023, 2022 and 2021, respectively.

Spire Alabama has no standing authority to issue long-term debt and must petition the APSC for each planned issuance.

7. NOTES PAYABLE AND CREDIT AGREEMENTS

Spire, Spire Missouri and Spire Alabama have a syndicated revolving credit facility pursuant to a loan agreement with 12 banks through July 22, 2027. The loan agreement has an aggregate credit commitment of $1,300.0, including sublimits of $450.0 for the Spire holding company, $575.0 for Spire Missouri and $275.0 for Spire Alabama. These sublimits may be reallocated from time to time among the three borrowers within the $1,300.0 aggregate commitment, with commitment fees and interest margins applied for each borrower relative to its credit rating, as well as sustainability rate adjustments based on Spire's DART ("Days Away Restricted or Transferred") rate and methane emissions reductions. The Spire holding company may use its line to provide for the funding needs of various subsidiaries. The agreement also contains financial covenants limiting each borrower's consolidated total debt, including short-term debt, to no more than 70% of its total capitalization. As defined in the line of credit, on September 30, 2023, total debt was less than 65% of total capitalization for each borrower. There were no borrowings against this credit facility as of September 30, 2023 and 2022.

Spire has a commercial paper program ("CP Program") pursuant to which it may issue short-term, unsecured commercial paper notes. Amounts available under the CP Program may be borrowed, repaid and re-borrowed from time to time, with the aggregate face or principal amount of the notes outstanding under the CP Program at any time not to exceed $1,300.0. The notes may have maturities of up to 365 days from date of issue.

On January 5, 2023, Spire Missouri entered into a loan agreement with several banks for a $250.0 unsecured term loan due October 5, 2023. Interest was based on the secured overnight financing rate ("SOFR") plus an adjustment of 0.10% per annum plus a margin of 0.80% per annum. The loan was repaid on May 8, 2023.

Information about short-term borrowings, including Spire Missouri's and Spire Alabama's borrowings from Spire, is presented in the following table. As of September 30, 2023, $706.9 of Spire's short-term borrowings were used to support lending to the Utilities.

	Spire (Parent Only)	Spire Missouri		Spire Alabama	Spire
	CP Program	Term Loan	Spire Note	Spire Note	Consol-idated
Year Ended September 30, 2023					
Highest borrowings outstanding	$ 1,282.0	$ 250.0	$ 656.9	$ 274.0	$ 1,482.0
Lowest borrowings outstanding	354.4	—	3.8	76.7	489.0

Notes payable - associated companies	260.9	260.9	—	260.9
Long-term debt	571.5	485.0	—	485.0

9. FAIR VALUE MEASUREMENTS

The information presented below categorizes the assets and liabilities in the balance sheets that are accounted for at fair value on a recurring basis in periods subsequent to initial recognition.

The mutual funds included in Level 1 are valued based on exchange-quoted market prices of individual securities. The mutual funds included in Level 2 are valued based on the closing net asset value per unit.

Derivative instruments included in Level 1 are valued using quoted market prices on the NYMEX or the Intercontinental Exchange (ICE). Derivative instruments classified in Level 2 include physical commodity derivatives and interest rate swaps that are valued using broker or dealer quotation services whose prices are derived principally from, or are corroborated by, observable market inputs. Also included in Level 2 are certain derivative instruments that have values that are similar to, and correlate with, quoted prices for exchange-traded instruments in active markets. Derivative instruments included in Level 3 are valued using generally unobservable inputs that are based upon the best information available and reflect management's assumptions about how market participants would price the asset or liability. There were no Level 3 balances as of September 30, 2023 or 2022. The Company's and the Utilities' policy is to recognize transfers between the levels of the fair value hierarchy, if any, as of the beginning of the interim reporting period in which circumstances change or events occur to cause the transfer.

The mutual funds are included in "Other investments" on the Company's balance sheets and in "Other Property and Investments" on Spire Missouri's balance sheets. Changes in their recurring valuations are recorded as unrealized investment gains or losses in the corresponding periodic income statement. Derivative assets and liabilities, including receivables and payables associated with cash margin requirements, are presented net on the balance sheets when a legally enforceable netting agreement exist between the Company, Spire Missouri or Spire Alabama and the counterparty to the derivative contract. For additional information on derivative instruments, see Note 10, Derivative Instruments and Hedging Activities.

* Subsequent to the issuance of its consolidated financial statements for the year ended September 30, 2022, during the fourth quarter of fiscal 2023, the Company identified an error in the fair value level presentation for certain line items in the Fair Value Measurements table. The presentation has been corrected to reflect the impacted line items in Level 2 rather than Level 1 as of September 30, 2022. This immaterial correction did not impact the reported fair values or the consolidated financial statements.

Spire Alabama

Spire Alabama occasionally utilizes a gasoline derivative program to stabilize the cost of fuel used in operations. As of September 30, 2023 and September 30, 2022, there were no gasoline derivatives outstanding.

10. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Spire

Spire Missouri has a risk management policy to utilize various derivatives, including futures contracts, exchange-traded options and swaps for the explicit purpose of managing price risk associated with purchasing and delivering natural gas on a regular basis to customers in accordance with its tariffs. The objective of this policy is to limit Spire Missouri's exposure to natural gas price volatility and to manage, hedge and mitigate substantial price risk. Further discussion of this policy can be found in the Spire Missouri section.

From time to time Spire Missouri and Spire Alabama purchase NYMEX futures and options contracts to help stabilize operating costs associated with forecasted purchases of gasoline and diesel fuels used to power vehicles and equipment. Further information on these derivatives can be found in the Spire Missouri and Spire Alabama sections, respectively.

In the course of its business, Spire's gas marketing subsidiary, Spire Marketing enters into commitments associated with the purchase or sale of natural gas. Certain of Spire Marketing's derivative natural gas contracts are designated as normal purchases or normal sales and, as such, are excluded from the scope of ASC Topic 815 and are accounted for as executory contracts on an accrual basis. Any of Spire Marketing's derivative natural gas contracts that are not designated as normal purchases or normal sales are accounted for at fair value. At September 30, 2023, the fair values of 567.0 million MMBtu of non-exchange-traded natural gas commodity contracts were reflected in the Consolidated Balance Sheet. Of these contracts, 379.1 million MMBtu will settle during fiscal 2024, and 151.1 million MMBtu, 26.4 million MMBtu, and 3.8 million MMBtu, will settle during fiscal years 2025, 2026, and 2027, respectively. A total of 6.6 million MMBtu will settle in the years 2028-2030. These

contracts have not been designated as hedges; therefore, changes in the fair value of these contracts are reported in earnings each period.

Furthermore, Spire Marketing manages the price risk associated with its fixed-priced commitments by either closely matching the offsetting physical purchase or sale of natural gas at fixed prices or through the use of NYMEX or ICE futures, swap, and option contracts to lock in margins.

At September 30, 2023, Spire Marketing's unmatched fixed-price positions were not material to Spire's financial position or results of operations. Spire Marketing's NYMEX and ICE natural gas futures, swap and option contracts used to lock in margins may be designated as cash flow hedges of forecasted transactions for financial reporting purposes.

Spire enters into cash flow hedges through the execution of interest rate swap contracts to protect itself against adverse movements in interest rates. At September 30, 2023, the following swaps were outstanding:

Period Originated	Contract Hedge Term (Years)	Notional Amount	Fixed Interest Rate	Fiscal 2023 Mark-to-Market Gain
Quarter 1, fiscal 2022	10	$ 50.0	1.4918%	$ 2.7
Quarter 2, fiscal 2022	10	75.0	1.6475%	4.0
Quarter 2, fiscal 2022	10	25.0	1.7460%	1.5
Quarter 1, fiscal 2023	10	50.0	3.4480%	2.4
Quarter 2, fiscal 2023	10	50.0	3.6850%	0.9
Quarter 2, fiscal 2023	10	25.0	3.5350%	0.5
Quarter 2, fiscal 2023	10	25.0	3.3850%	0.6
Quarter 3, fiscal 2023	30	50.0	2.7470%	7.8
Quarter 3, fiscal 2023	10	25.0	2.9020%	2.2
Quarter 3, fiscal 2023	10	25.0	3.0180%	2.0
		$ 400.0		$ 24.6

As of September 30, 2023, the Company has recorded through other comprehensive income a cumulative mark-to-market net asset of $44.2 on open swaps.

The Company's and Spire Missouri's exchange-traded/cleared derivative instruments consist primarily of NYMEX and ICE positions. The NYMEX is the primary national commodities exchange on which natural gas derivatives are traded. Open NYMEX and ICE natural gas futures and swap positions at September 30, 2023 and 2022 were as follows:

	September 30, 2023		September 30, 2022	
Gas Marketing	Notional (MMBtu millions)	Maximum Term (Months)	Notional (MMBtu millions)	Maximum Term (Months)
Natural gas futures purchased	61.3	51	76.3	54
Natural gas options purchased, net	4.9	15	3.7	12
Natural gas basis swaps purchased	44.1	51	61.7	39
Gas Utility				
Natural gas futures purchased	66.5	24	13.0	12

At September 30, 2023, Spire Missouri also had 16.3 million MMBtu of other price mitigation in place through the use of NYMEX natural gas option-based strategies.

Derivative instruments designated as cash flow hedges of forecasted transactions are recognized on the balance sheets of the Company at fair value, and the change in fair value of the effective portion of these hedge instruments is recorded, net of income tax, in other comprehensive income or loss (OCI). Accumulated other comprehensive income or loss (AOCI) is a component of Total Common Stock Equity. Amounts are reclassified from AOCI into earnings when the hedged items affect net income, using the same revenue or expense category that the hedged item impacts. Based on market prices at September 30, 2023, it is expected that $2.8 of net gains will be reclassified into the Consolidated Statements of Income of the Company during the next twelve months. Cash flows from hedging transactions are classified in the same category as the cash flows from the items that are being hedged in the Consolidated Statements of Cash Flows.

Effect of Derivative Instruments on the Consolidated Statements of Income and Comprehensive Income

	Location of Gain (Loss) Recorded in Income	2023	2022	2021
Derivatives in Cash Flow Hedging Relationships				
Effective portion of gain recognized in OCI on derivatives:				
Interest rate swaps		$ 20.1	$ 56.7	$ 61.2
Effective portion of gain reclassified from AOCI to income:				
Interest rate swaps	Interest Expense	$ (2.4)	$ (1.2)	$ (1.3)
Derivatives Not Designated as Hedging Instruments*				
Gain (Loss) recognized in income on derivatives:				
Gas / diesel futures	Non-Operating Expense: Other Income	$ 0.3	$ —	$ —
Natural gas commodity contracts	Operating Expenses: Natural Gas	18.0	52.6	54.1
NYMEX / ICE natural gas contracts	Operating Expenses: Natural Gas	(35.0)	43.3	(77.5)
Total		$ (16.7)	$ 95.9	$ (23.4)

* Gains and losses on Spire Missouri's natural gas derivative instruments, which are not designated as hedging instruments for financial reporting purposes, are deferred pursuant to the Missouri Utilities' PGA clauses and initially recorded as regulatory assets or regulatory liabilities. These gains and losses are excluded from the table above because they have no direct impact on the statements of income. Such amounts are recognized in the statements of income as a component of natural gas operating expenses when they are recovered through the PGA clause and reflected in customer billings.

Fair Value of Derivative Instruments in the Consolidated Balance Sheets

	Derivative Assets*		Derivative Liabilities*	
September 30, 2023	**Balance Sheet Location**	**Fair Value**	**Balance Sheet Location**	**Fair Value**

Subtotal		206.2		178.5
Total derivatives		$ 269.8		$ 178.5

* The fair values of Derivative Assets and Derivative Liabilities exclude the fair value of cash margin receivables or payables with counterparties subject to netting arrangements. Fair value amounts of derivative contracts (including the fair value amounts of cash margin receivables and payables) for which there is a legal right to set off are presented net on the balance sheets. As such, the gross balances presented in the table above are not indicative of the Company's net economic exposure. Refer to Note 9, Fair Value Measurements, for information on the valuation of derivative instruments.

Following is a reconciliation of the amounts in the tables above to the amounts presented in the consolidated balance sheets:

	2023	2022
Fair value of derivative assets presented above	$ 97.4	$ 269.8
Fair value of cash margin receivable offset with derivatives	49.3	(36.6)
Netting of assets and liabilities with the same counterparty	(69.4)	(117.0)
Total	$ 77.3	$ 116.2
Derivative Instrument Assets, per Consolidated Balance Sheets:		
Current Assets: Other	$ 71.8	$ 113.1
Deferred Charges and Other Assets: Other	5.5	3.1
Total	$ 77.3	$ 116.2
Fair value of derivative liabilities presented above	$ 100.2	$ 178.5
Netting of assets and liabilities with the same counterparty	(69.4)	(117.0)
Total	$ 30.8	$ 61.5
Derivative Instrument Liabilities, per Consolidated Balance Sheets:		
Current Liabilities: Other	$ 23.2	$ 51.1
Deferred Credits and Other Liabilities: Other	7.6	10.4
Total	$ 30.8	$ 61.5

Additionally, at September 30, 2023 2022, the Company had zero and $49.8, respectively, in cash margin receivables not offset with derivatives, which are presented in Accounts Receivable – Other.

Spire Missouri

Spire Missouri has a risk management policy to utilize various derivatives, including futures contracts, exchange-traded options, swaps and over-the-counter instruments for the explicit purpose of managing price risk associated with purchasing and delivering natural gas on a regular basis to customers in accordance with its tariffs. The objective of this policy is to limit Spire Missouri's exposure to natural gas price volatility and to manage, hedge and mitigate substantial price risk. This policy strictly prohibits speculation and permits Spire Missouri to hedge current physical natural gas purchase commitments or forecasted or anticipated future peak (maximum) physical need for natural gas delivered. Costs and cost reductions, including carrying costs, associated with Spire Missouri's use of natural gas derivative instruments are allowed to be passed on to Spire Missouri customers through the operation of its PGA clause, through which the MoPSC allows Spire Missouri to recover gas supply costs, subject to prudence review by the MoPSC. Accordingly, Spire Missouri does not expect any adverse earnings impact as a result of the use of these derivative instruments.

Spire Missouri does not designate these instruments as hedging instruments for financial reporting purposes because gains or losses associated with the use of these derivative instruments are deferred and recorded as regulatory assets or regulatory liabilities pursuant to ASC Topic 980, *Regulated Operations*, and, as a result, have no direct impact on the statements of income.

The timing of the operation of the PGA clause may cause interim variations in short-term cash flows, because Spire Missouri is subject to cash margin requirements associated with changes in the values of these instruments. Nevertheless, carrying costs associated with such requirements are recovered through the PGA clause.

From time to time, Spire Missouri purchases NYMEX futures and options contracts to help stabilize operating costs associated with forecasted purchases of gasoline and diesel fuels used to power vehicles and equipment used in the course of its business. The gains and losses on these contracts are not subject to Spire Missouri's PGA clause. At September 30, 2023, Spire Missouri did not have a material amount of gasoline futures contracts outstanding.

Derivative instruments designated as cash flow hedges of forecasted transactions are recognized on the balance sheets at fair value and the change in the fair value of the effective portion of these hedge instruments is recorded, net of income tax, in OCI. AOCI is a component of Total Common Stock Equity. Amounts are reclassified from AOCI into earnings when the hedged items affect net income, using the same revenue or expense category that the hedged item impacts. As in both 2022 and 2021, there will be no reclassifications into the statements of income during fiscal 2024. Cash flows from hedging transactions are classified in the same category as the cash flows from the items that are being hedged in the statements of cash flows.

Spire Missouri's derivative instruments consist primarily of NYMEX positions. The NYMEX is the primary national commodities exchange on which natural gas derivatives are traded. Open NYMEX natural gas futures positions at September 30, 2023 and 2022 were as follows:

	September 30, 2023		September 30, 2022	
	Notional (MMBtu millions)	Maximum Term (Months)	Notional (MMBtu millions)	Maximum Term (Months)
Natural gas futures purchased	66.5	24	13.0	12

At September 30, 2023, Spire Missouri had also had 16.3 million MMBtu of other price mitigation in place through the use of NYMEX natural gas option-based strategies.

Gains and losses on Spire Missouri's natural gas derivative instruments, which are not designated as hedging instruments for financial reporting purposes, are deferred pursuant to the Spire Missouri's PGA clauses and initially recorded as regulatory assets or regulatory liabilities. Such amounts are recognized in the statements of income as a component of natural gas operating expenses when they are recovered through the PGA clause and reflected in customer billings.

Fair Value of Derivative Instruments in the Balance Sheets

	Derivative Assets*		Derivative Liabilities*	
September 30, 2023	**Balance Sheet Location**	**Fair Value**	**Balance Sheet Location**	**Fair Value**
Derivatives not designated as hedging instruments				
Natural gas contracts	Current Assets: Other	$ 6.3	Current Liabilities: Other	$ 50.8
Gasoline and heating oil contracts	Current Assets: Other	0.1		
Total derivatives		$ 6.4		$ 50.8
September 30, 2022				
Derivatives not designated as hedging instruments				
Natural gas contracts	Current Assets: Other	$ 57.8	Current Liabilities: Other	$ 30.7

* The fair values of Derivative Assets and Derivative Liabilities exclude the fair value of cash margin receivables or payables with counterparties subject to netting arrangements. Fair value amounts of derivative contracts (including the fair value amounts of cash margin receivables and payables) for which there is a legal right to set off are presented net on the balance sheets. As such, the gross balances presented in the table above are not indicative of Spire Missouri's net economic exposure. Refer to Note 9, Fair Value Measurements, for information on the valuation of derivative instruments.

Following is a reconciliation of the amounts in the tables above to the amounts presented in Spire Missouri's balance sheets:

	2023	2022
Fair value of derivative assets presented above	$ 6.4	$ 57.8
Fair value of cash margin (payable) receivable offset with derivatives	37.6	(27.1)
Netting of assets and liabilities with the same counterparty	(44.0)	(30.7)
Total	$ —	$ —
Fair value of derivative liabilities presented above	$ 50.8	$ 30.7
Netting of assets and liabilities with the same counterparty	(44.0)	(30.7)
Total	$ 6.8	$ —
Derivative Instrument Liabilities, per Balance Sheets:		
Derivative instrument liabilities	$ 6.8	$ —
Total	$ 6.8	$ —

Additionally, at September 30, 2023 and 2022, Spire Missouri had zero and $24.0, respectively, in cash margin receivables not offset with derivatives, which are presented in Accounts Receivable – Other.

Spire Alabama

Spire Alabama periodically employs a gasoline derivative program to help stabilize operating costs associated with forecasted purchases of gasoline and diesel fuels used to power vehicles and equipment used in the course of its business. The gains or losses on these derivative instruments are not subject to Spire Alabama's GSA rider. There were no such contracts outstanding as of September 30, 2023 and 2022.

11. CONCENTRATIONS OF CREDIT RISK

Spire's Gas Utility segment serves 1.7 million customers in three states across multiple rate classes resulting in a significant amount of revenue diversity. Credit risk is mitigated by the high percentage of residential customers as well as the geographic diversity of the Utilities, though customers for each of the Utilities are concentrated in a single state.

Spire Marketing's accounts receivable attributable to utility companies and their marketing affiliates totaled $53.4 at September 30, 2023. The concentration of transactions with these counterparties has the potential to affect the Company's overall exposure to credit risk, either positively or negatively, in that customers in this group may be affected similarly by changes in economic, industry, or other conditions. Spire Marketing also has concentrations of credit risk with certain individually significant counterparties. At September 30, 2023, the amounts included in accounts receivable from its five largest counterparties (in terms of net accounts receivable exposure) totaled $26.7. Three of these five counterparties are investment-grade-rated integrated utilities, one is a liquefied natural gas project facility with a senior debt issue rating one notch below investment-grade with a positive outlook, and one is a utility marketing affiliate which is not rated but whose owners are all investment-grade public power companies.

To manage these risks, Spire Marketing has established procedures to determine the creditworthiness of its counterparties. These procedures include obtaining credit ratings and credit reports, analyzing counterparty financial statements to assess financial condition, and considering the industry environment in which the counterparty operates. This information is monitored on an ongoing basis. In some instances, Spire Marketing may require credit assurances such as prepayments, letters of credit, or parental guaranties. In addition, Spire Marketing may enter into netting arrangements to mitigate credit risk with counterparties in the energy industry with whom it conducts both sales and purchases of natural gas. Where there is no netting arrangement, Spire Marketing records accounts receivable, accounts payable, and prepayments for physical sales and purchases of natural gas on a gross basis. Sales are typically made on an unsecured credit basis with payment due the month following delivery. Accounts receivable amounts are closely monitored and provisions for uncollectible amounts are accrued when losses are probable.

95

12. INCOME TAXES

The Company, Spire Missouri, and Spire Alabama are subject to federal income tax as well as income tax in various state and local jurisdictions. Spire files a consolidated federal income tax return and various state income tax returns and allocates income taxes to Spire Missouri, Spire Alabama and its other subsidiaries as if each entity were a separate taxpayer.

The provision for income taxes during the fiscal years ended September 30, 2023, 2022, and 2021 was as follows:

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Federal:									
Current	$ 0.7	$ 0.5	$ 0.2	$ —	$ —	$ —	$ —	$ —	$ —
Deferred	30.4	47.0	49.5	10.1	18.2	22.0	15.8	18.1	19.8
Investment tax credits	(0.2)	(0.2)	(0.2)	(0.2)	(0.2)	(0.2)	—	—	—
State and local:									
Current	1.2	0.5	1.3	—	—	—	—	—	—
Deferred	6.7	11.1	17.7	1.7	3.3	3.5	4.5	5.1	5.2
Total income tax expense	$ 38.8	$ 58.9	$ 68.5	$ 11.6	$ 21.3	$ 25.3	$ 20.3	$ 23.2	$ 25.0

The effective income tax rate varied from the federal statutory income tax rate for each year due to the following:

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Federal income tax statutory rate	21.0%	21.0%	21.0%	21.0%	21.0%	21.0%	21.0%	21.0%	21.0%
State and local income taxes, net of federal income tax benefits	3.7	3.6	3.6	2.6	2.6	2.6	4.1	4.1	4.1
Certain expenses capitalized on books and deducted on tax return	(1.4)	(1.6)	(1.6)	(2.7)	(3.2)	(3.3)	—	—	—
Taxes related to prior years	—	(0.3)	(0.5)		(0.6)	(0.2)	—	—	—
Tax credits *	(3.3)	—	—	(4.2)	—	—	(1.9)	—	—
Amortization of excess deferred taxes	(5.1)	(3.5)	(2.5)	(7.7)	(7.3)	(5.0)	0.2	—	—
Other items – net **	0.2	1.9	0.1	—	3.1	(0.2)	0.1	0.2	0.2
Effective income tax rate	15.1%	21.1%	20.1%	9.0%	15.6%	14.9%	23.5%	25.3%	25.3%

* In 2023, the Company completed a research and development study which encompassed fiscal years 2014 to 2022.

** Other consists primarily of property adjustments.

The significant items comprising the net deferred tax liability or asset as of September 30 were as follows:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Deferred tax assets:						
Reserves not currently deductible	$ 27.7	$ 33.5	$ —	$ 4.0	$ 3.9	$ 7.4
Pension and other postretirement benefits	64.4	72.6	44.7	52.6	17.0	—
Goodwill	—	—	—	—	58.8	73.0
Operating losses	239.2	255.1	89.2	116.9	159.8	140.3
Regulatory amount due to customers, net	30.4	34.5	27.6	30.7	—	—
Other	35.8	24.9	10.5	—	3.0	—
Total deferred tax assets	397.5	420.6	172.0	204.2	242.5	220.7
Deferred tax liabilities:						
Relating to property	(788.0)	(740.0)	(507.7)	(489.3)	(218.7)	(201.6)
Regulatory pension and other postretirement benefits	(80.6)	(92.8)	(53.0)	(72.3)	(25.9)	(1.6)
Deferred gas costs	(67.0)	(75.8)	(64.1)	(74.0)	—	—
Other ***	(205.6)	(187.1)	(79.0)	(68.7)	(7.0)	(6.5)
Total deferred tax liabilities	(1,141.2)	(1,095.7)	(703.8)	(704.3)	(251.6)	(209.7)
Net deferred tax (liability) asset	$ (743.7)	$ (675.1)	$ (531.8)	$ (500.1)	$ (9.1)	$ 11.0

*** For Spire, Other consists primarily of goodwill-related liabilities.

As indicated in Note 1, Summary of Significant Accounting Policies, the Company's regulated operations accounting for income taxes is impacted by ASC Topic 980, *Regulated Operations*. The Tax Cuts and Jobs Act of 2017 (TCJA) reduced the corporate federal income tax rate, and the corresponding reductions in deferred income tax balances resulted in amounts previously collected from utility customers for these deferred taxes becoming refundable to such customers, generally through reductions in future rates. The TCJA includes provisions that stipulate how these excess deferred taxes are to be passed back to customers for certain accelerated tax depreciation benefits. In fiscal 2018, the MoPSC Amended Report and Order took effect and the estimated excess accumulated deferred income tax began to be returned to Spire Missouri customers in rates. During the prior fiscal year, the amount of excess accumulated deferred income taxes was trued up as part of the rate proceeding. The amount being returned related to the TCJA has been updated and in addition the excess accumulated deferred income taxes related to the Missouri tax rate change began to be returned in fiscal 2022. For Spire Missouri, excess accumulated deferred taxes of $10.0, $9.9, and $8.4, respectively, were returned in fiscal year 2023, 2022, and 2021. The treatment for accumulated deferred income tax balances for Spire Alabama, Spire Gulf and Spire Mississippi started to be accounted for during fiscal 2023. For Spire Gulf, $3.1 was returned to ratepayers. Spire Mississippi returned less than $0.1. For Spire Alabama, the deferred tax position resulted in a collection from customers of $0.2 for fiscal 2023.

On April 14, 2023, the IRS issued Revenue Procedure 2023-15 that provides a safe harbor method of accounting that taxpayers may use to determine whether to deduct or capitalize expenditures to repair, maintain, replace, or improve natural gas transmission and distribution property. Under the revenue procedure, the method of accounting will depend on the property's classification as linear transmission property, linear distribution property, or non-linear property. The revenue procedure may be adopted in tax years ending after May 1, 2023. The Company is evaluating the revenue procedure and the impact adopting the safe harbor would have on its property that is subject to this guidance.

In assessing whether deferred tax assets are realizable, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. Management considers all significant available positive and negative evidence, including the existence of losses in recent years, the timing of deferred tax liability reversals, projected future taxable income, taxable income in carryback years, and tax planning strategies to assess the need for a valuation allowance. Based upon this evidence, management believes it is more likely than not the Company, Spire Missouri and Spire Alabama will realize the benefits of these deferred tax assets.

As of September 30, 2023, Spire, and on a separate company basis, Spire Missouri and Spire Alabama, had federal and state loss carryforwards, contribution carryforwards, and various tax credit carryforwards as shown below.

	Spire	Spire Missouri	Spire Alabama
Federal and state loss carryforwards	$ 1,000.3	$ 352.4	$ 624.1
Contribution carryforwards	6.1	5.6	-
Tax credit carryforwards	13.1	8.5	1.6

For federal tax purposes, Spire Missouri's and Spire Alabama's loss carryforwards may be utilized against income from another member of the consolidated group. The loss carryforwards begin to expire in fiscal 2030 for certain state purposes and fiscal 2035 for federal and other state purposes. Contribution carryforwards and tax credit carryforwards are expected to be utilized prior to their expiration.

The Company, Spire Missouri and Spire Alabama recognize the tax benefit from a tax position only if it is at least more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. Unrecognized tax benefits are reported as a reduction of a deferred tax asset for an operating loss carryforward to the extent the recognition of the benefit would impact the operating loss carryforward, pursuant to ASU 2013-11. The following table presents a reconciliation of the beginning and ending balances of unrecognized tax benefits:

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Unrecognized tax benefits, beginning of year	$ 19.6	$ 16.4	$ 13.2	$ 19.3	$ 16.1	$ 13.0	$ —	$ —	$ —
Increases related to tax positions taken in current year	4.2	3.3	3.2	3.6	3.2	3.1	0.3	—	—
Reductions due to lapse of applicable statute of limitations	—	(0.1)	—	—	—	—	—	—	—
Unrecognized tax benefits, end of year	$ 23.8	$ 19.6	$ 16.4	$ 22.9	$ 19.3	$ 16.1	$ 0.3	$ —	$ —

As of September 30, 2023 and 2022, the amounts of unrecognized tax benefits which, if recognized, would affect the effective tax rate were $5.9 and $4.0, respectively, for the Company, $5.1 and $3.7, respectively, for Spire Missouri, and $0.3 and $0.0, respectively, for Spire Alabama. It is reasonably possible that events will occur in the next 12 months that could increase or decrease the amount of the unrecognized tax benefits. The Company, Spire Missouri, and Spire Alabama do not expect that any such change will be significant to the balance sheets. Spire Alabama reported no unrecognized tax benefits for fiscal years 2022 and 2021.

The Company, Spire Missouri, and Spire Alabama record potential interest and penalties related to uncertain tax positions as interest expense and other income deductions, respectively. As of September 30, 2023 and 2022, interest accrued associated with uncertain tax positions was de minimis, and no penalties were accrued.

The Company, Spire Missouri, and Spire Alabama are no longer subject to examination for fiscal years prior to 2020, except to the extent the net operating losses from prior years are reviewed.

13. PENSION PLANS AND OTHER POSTRETIREMENT BENEFITS

Pension Plans

Spire and the Utilities maintain pension plans for their employees. Spire Missouri and Spire Alabama have non-contributory, defined benefit, trusteed forms of pension plans covering the majority of their employees. Qualified plan assets are comprised of mutual and commingled funds consisting of U.S. equities with varying strategies, global equities, alternative investments, and fixed income investments.

The net periodic pension cost includes components shown in the following table. The components other than the service costs and regulatory adjustment are presented in "Other Income, Net" in the income statement, except for Spire Alabama's losses on lump-sum settlements. Such losses are capitalized in regulatory balances and amortized over the remaining actuarial life of individuals in the plan, and that amortization is presented in "Other Income, Net."

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Service cost – benefits earned during the period	$ 16.3	$ 20.0	$ 21.7	$ 11.4	$ 14.4	$ 15.4	$ 4.2	$ 4.8	$ 5.5
Interest cost on projected benefit obligation	25.1	21.5	20.7	17.8	14.7	14.2	4.8	4.7	4.6
Expected return on plan assets	(24.5)	(31.3)	(31.6)	(18.0)	(22.7)	(22.5)	(3.5)	(5.2)	(5.8)
Amortization of prior service credit	(4.5)	(4.5)	(3.1)	(1.9)	(1.9)	(0.6)	(2.4)	(2.4)	(2.3)
Amortization of actuarial loss	6.6	11.9	14.9	6.1	9.6	11.0	0.9	2.4	3.9
Loss on lump-sum settlements and curtailments	9.7	33.6	18.2	0.6	27.3	11.6	9.1	6.3	6.6
Subtotal	28.7	51.2	40.8	16.0	41.4	29.1	13.1	10.6	12.5
Regulatory adjustment	26.3	12.5	20.6	27.1	9.9	19.0	(1.7)	1.7	0.7
Net pension cost	$ 55.0	$ 63.7	$ 61.4	$ 43.1	$ 51.3	$ 48.1	$ 11.4	$ 12.3	$ 13.2

Other changes in plan assets and pension benefit obligations recognized in other comprehensive income or loss include the following:

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Current year actuarial loss (gain)	$ 14.5	$(16.9)	$ (8.1)	$ 5.7	$ 0.9	$ (0.9)	$ 9.0	$(16.0)	$ (1.5)

Spire pension obligations are driven by separate plan and regulatory provisions governing Spire Missouri, Spire Alabama and Spire EnergySouth pension plans.

Pursuant to the provisions of Spire Missouri's and Spire Alabama's pension plans, pension obligations may be satisfied by monthly annuities, lump-sum cash payments, or special termination benefits. Lump-sum payments are recognized as settlements (which can result in gains or losses) only if the total of such payments exceeds the sum of service and interest costs in a specific year. Special termination benefits, when offered, are also recognized as settlements which can result in gains or losses.

In the fiscal year ended September 30, 2023, one Spire Missouri plan and two Spire Alabama plans met the criteria for settlement recognition, requiring re-measurement of the obligation under those plans using updated census data and assumptions for discount rate and mortality. For the remeasurements, the discount rate for the Missouri plan was updated to 6.3% at September 30, 2023 (from 5.8% at September 30, 2022), and the discount rate for the Alabama plans were updated to 6.2% and 6.25%, respectively, (from 5.7% and 5.65%, respectively). Lump-sum payments recognized as settlements during fiscal 2023 was $48.7 ($9.9 attributable to Spire Missouri and $38.8 to Spire Alabama). The Alabama regulatory tariff requires that settlement losses be amortized over the remaining actuarial life of the individuals in the plan, and in fiscal 2023 the amortization periods range from 11.8 years to 13.4 years. Therefore, no lump sum settlement expenses were recorded in the fiscal year ended September 30, 2023.

In the fiscal year ended September 30, 2022, two Spire Missouri plans and two Spire Alabama plans met the criteria for settlement recognition, requiring re-measurement of the obligation under those plans using updated census data and assumptions for discount rate and mortality. For the remeasurements, the discount rates for the Missouri plans were updated to 5.7% and 5.8%, respectively, for each plan at September 30, 2022 (from 3.0%, at September 30, 2021), and the discount rate for the Alabama plans were updated to 5.7% and 5.65%, respectively, (from 3.1% and 3.0%, respectively). Lump-sum payments recognized as settlements during fiscal 2022 was $109.3 ($87.0 attributable to Spire Missouri and $22.3 to Spire Alabama). The Alabama regulatory tariff requires that settlement losses be amortized over the remaining actuarial life of the individuals in the plan, and in fiscal 2022 the amortization periods range from 11.4 years to 12.3 years. Therefore, no lump sum settlement expenses were recorded in the fiscal year ended September 30, 2022.

Effective December 23, 2021, the pension cost for Spire Missouri's western territory (Missouri West) included in customer rates was reduced from $5.5 to $4.4 per year, the pension cost included in Spire Missouri's eastern territory (Missouri East) customer rates was increased from $29.0 to $32.4 per year. Subsequently, on December 26, 2022, the amount in Missouri East was lowered to $29.9. The difference between these amounts and pension expense as calculated pursuant to the above and that otherwise would be included in the statements of income and statements of comprehensive income is deferred as a regulatory asset or regulatory liability.

Also effective December 23, 2021, Missouri East prepaid pension assets and other postretirement benefits that were previously being included in rates at $21.6 per year for eight years were reduced to $11.0 per year, with the amortization period being reset for another eight years. Missouri West net liability for pension and other postretirement benefits that were previously reducing rates by $3.3 per year for eight years were reduced to a $1.1 reduction in rates per year, with the amortization period being reset for another eight years. Subsequently, on December 26, 2022, Missouri East amortization was lowered to $6.9 and Missouri West to a reduction of $0.8.

The following table shows the reconciliation of the beginning and ending balances of the pension benefit obligation at September 30:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Benefit obligation, beginning of year	$ 464.4	$ 689.6	$ 320.6	$ 479.0	$ 97.8	$ 149.4
Service cost	16.3	20.0	11.4	14.4	4.2	4.8
Interest cost	25.1	21.5	17.8	14.7	4.8	4.7
Actuarial (gain) loss	(1.1)	(173.9)	(4.9)	(116.2)	5.4	(42.4)
Settlement loss	9.7	33.4	0.6	27.9	9.1	5.6
Settlement benefits paid	(48.8)	(109.3)	(9.9)	(87.0)	(38.8)	(22.3)
Regular benefits paid	(26.9)	(16.9)	(22.4)	(12.2)	(1.9)	(2.0)
Benefit obligation, end of year	$ 438.7	$ 464.4	$ 313.2	$ 320.6	$ 80.6	$ 97.8
Accumulated benefit obligation, end of year	$ 433.1	$ 457.1	$ 309.5	$ 315.0	$ 78.8	$ 96.2

In 2023, qualified plans except Spire Alabama's experienced actuarial gains. These gains were driven by the discount rates increasing by between 50 and 55 basis points, and were only partly offset by actuarial asset losses, as the trusts experienced actual returns below the actuarial expected returns. However, Spire Alabama had actuarial losses relating to larger than projected settlements, which, when combined with the actuarial asset losses, more than offset the gains relating to the increase in the discount rate.

The following table sets forth the reconciliation of the beginning and ending balances of the fair value of plan assets at September 30:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Fair value of plan assets, beginning of year	$ 332.7	$ 498.9	$ 235.9	$ 364.0	$ 57.3	$ 82.8
Actual return on plan assets	9.1	(92.5)	7.5	(66.7)	—	(15.6)
Employer contributions	58.9	52.4	30.3	37.8	27.9	14.4
Settlement benefits paid	(39.1)	(109.3)	(9.3)	(87.0)	(29.7)	(22.3)
Regular benefits paid	(26.9)	(16.8)	(22.4)	(12.2)	(1.9)	(2.0)
Fair value of plan assets, end of year	$ 334.7	$ 332.7	$ 242.0	$ 235.9	$ 53.6	$ 57.3
Funded status of plans, end of year	$ (104.0)	$ (131.7)	$ (71.2)	$ (84.7)	$ (27.0)	$ (40.5)

The following table sets forth the amounts recognized in the balance sheets at September 30:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Current liabilities	$ (1.6)	$ (1.1)	$ (1.6)	$ (1.1)	$ —	$ —
Noncurrent liabilities	(102.4)	(130.6)	(69.6)	(83.6)	(27.0)	(40.5)
Total	$ (104.0)	$ (131.7)	$ (71.2)	$ (84.7)	$ (27.0)	$ (40.5)

Pre-tax amounts recognized in accumulated other comprehensive loss not yet recognized as components of net periodic pension cost consist of:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Net actuarial loss	$ 130.1	$ 132.0	$ 92.5	$ 93.6	$ 40.2	$ 41.2
Prior service credit	(31.2)	(35.7)	(16.2)	(18.1)	(13.9)	(16.3)
Subtotal	98.9	96.3	76.3	75.5	26.3	24.9
Adjustments for amounts included in regulatory assets	(95.9)	(93.1)	(73.3)	(72.3)	(26.3)	(24.9)
Total	$ 3.0	$ 3.2	$ 3.0	$ 3.2	$ —	$ —

The assumptions used to calculate net periodic pension costs for Spire Missouri are as follows:

	2023	2022	2021
Weighted average discount rate - Spire Missouri East plan	5.70%	3.00%	2.85%
Weighted average discount rate - Spire Missouri West plan	5.80%	3.00%	2.75%
Weighted average rate of future compensation increase	3.00%	3.00%	3.00%
Expected long-term rate of return on plan assets	6.50%	6.75%	6.75%

The assumptions used to calculate net periodic pension costs for Spire Alabama are as follows:

	2023	2022	2021
Weighted average discount rate	5.65%/5.7%	3.10%/3.0%	2.95%/2.80%
Weighted average rate of future compensation increase	3.00%	3.00%	3.00%
Expected long-term rate of return on plan assets	6.50%	6.75%	6.75%

The discount rate is based on long-term, high quality bond indices at the measurement date. The expected long-term rate of return on plan assets is based on historical and projected rates of return for current and planned asset classes in the investment portfolio. Assumed projected rates of return for each asset class were selected after analyzing historical experience and future expectations of the returns. The overall expected rate of return for the portfolio was developed based on the target allocation for each class.

The assumptions used to calculate the benefit obligations are as follows:

	2023	2022
Weighted average discount rate - Spire Missouri East plan	6.25%	5.70%
Weighted average discount rate - Spire Missouri West plan	6.30%	5.80%
Weighted average discount rate - Spire Alabama plans	6.2%/6.25%	5.70%/5.65%
Weighted average rate of future compensation increase	3.00%	3.00%
Cash balance interest crediting rate - Spire Alabama / Spire Missouri	4.25%	4.25%

The following table sets forth the year-end projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for plans that have a projected benefit obligation and an accumulated benefit obligation in excess of plan assets:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Projected benefit obligation	$ 438.7	$ 464.4	$ 313.2	$ 320.6	$ 80.6	$ 97.8
Accumulated benefit obligation	433.1	457.1	309.5	315.0	78.8	96.2
Fair value of plan assets	334.7	332.7	242.0	235.9	53.6	57.3

The following tables set forth the targeted and actual plan assets by category as of September 30 of each year for Spire Missouri and Spire Alabama:

Spire Missouri	2023 Target	2023 Actual	2022 Target	2022 Actual
Return seeking assets	70.0%	77.0%	70.0%	74.3%
Liability hedging assets	30.0%	20.0%	30.0%	22.8%
Cash and cash equivalents	—%	3.0%	—%	2.9%
Total	100.0%	100.0%	100.0%	100.0%

Spire Alabama	2023 Target	2023 Actual	2022 Target	2022 Actual
Return seeking assets	75.0%	76.0%	70.0%	68.7%
Liability hedging assets	25.0%	15.0%	30.0%	25.3%
Cash and cash equivalents	—%	9.0%	—%	6.0%
Total	100.0%	100.0%	100.0%	100.0%

The Spire Inc. Retirement Plans Committee is responsible for the administration of the various plans, and all payments under the plans require direction of that committee. The Spire Inc. Defined Benefit Plan Investment Review Committee utilizes an Outsourced Chief Investment Officer (OCIO) model where investment decisions are outsourced to investment consultants (Willis Towers Watson), who in turn become co-fiduciaries with the committee.

For all plans, the Company employs a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets with a prudent level of risk. Risk tolerance is established through consideration of plan liabilities, plan funded status, corporate financial condition and market conditions. The Company has developed an investment strategy that focuses on asset allocation, diversification and quality guidelines. The investment goals are to obtain an adequate level of return to meet future obligations of the plan by providing above average risk-adjusted returns with a risk exposure in the mid-range of comparable funds. Comparative market and peer group benchmarks are utilized to ensure that investment managers are performing satisfactorily. The Company seeks to maintain an appropriate level of diversification to minimize the risk of large losses in a single asset class. Accordingly, plan assets for the pension plans do not have a concentration of assets in a single entity, industry, country, commodity or class of investment fund.

The following table sets forth expected pension benefit payments for the succeeding five fiscal years, and in aggregate for the five fiscal years thereafter, for Spire, Spire Missouri, and Spire Alabama:

	2024	2025	2026	2027	2028	2029 – 2032
Spire	$ 52.4	$ 45.3	$ 41.8	$ 41.8	$ 43.3	$ 202.8
Spire Missouri	41.0	34.1	30.4	29.4	30.5	139.1
Spire Alabama	8.0	7.7	7.8	8.7	8.9	44.1

The funding policy of Spire Missouri and Spire Alabama is to contribute an amount not less than the minimum required by government funding standards nor more than the maximum deductible amount for federal income tax purposes. Spire Missouri's contributions to the pension plans in fiscal 2024 are anticipated to be $21.6 into the qualified trusts, and $0 into the non-qualified plans. Spire Alabama's contributions to the pension plans in fiscal 2024 are anticipated to be $16.4 into the qualified trusts.

Other Postretirement Benefits

Spire and the Utilities provide certain life insurance benefits at retirement. Spire Missouri plans provide for medical insurance after early retirement until age 65. For retirements prior to January 1, 2015, the Missouri West plans provided medical insurance after retirement until death. The Spire Alabama plans provide medical insurance upon retirement until death for certain retirees depending on the type of employee and the date the employee was originally hired.

Net periodic postretirement benefit costs consist of the following components:

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Service cost – benefits earned during the period	$ 4.8	$ 7.5	$ 7.3	$ 4.0	$ 6.3	$ 6.2	$ 0.7	$ 1.1	$ 0.9
Interest cost on accumulated postretirement benefit obligation	8.5	6.0	6.0	6.5	4.5	4.5	1.8	1.4	1.3
Expected return on plan assets	(15.8)	(16.8)	(16.1)	(10.5)	(11.3)	(10.9)	(5.0)	(5.2)	(4.9)
Amortization of prior service cost (credit)	0.3	1.0	1.0	0.6	0.7	0.7	(0.3)	0.3	0.3
Amortization of actuarial gain	(4.0)	(2.2)	(1.6)	(3.2)	(1.9)	(1.5)	(0.5)	—	—
Subtotal	(6.2)	(4.5)	(3.4)	(2.6)	(1.7)	(1.0)	(3.3)	(2.4)	(2.4)
Regulatory adjustment	0.6	3.3	13.2	1.8	5.0	15.0	(1.3)	(1.8)	(1.8)
Net postretirement benefit (income) cost	$ (5.6)	$ (1.2)	$ 9.8	$ (0.8)	$ 3.3	$ 14.0	$ (4.6)	$ (4.2)	$ (4.2)

Other changes in plan assets and postretirement benefit obligations recognized in OCI include the following:

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Current year actuarial (gain) loss	$(24.4)	$ 15.8	$(41.0)	$(21.5)	$ 9.8	$(29.0)	$ (1.1)	$ 5.9	$ (9.9)
Amortization of actuarial gain	4.0	2.2	1.6	3.2	1.9	1.5	0.5	—	—
Current year prior service cost	—	(6.3)	—		(1.1)	—	—	(5.2)	—

Total recognized in OCI	$ —	$ —	$ —	$ —	$ —	$ —	$ —	$ —	$ —

Pursuant to a MoPSC Order, the return on plan assets is based on the market-related value of plan assets implemented prospectively over a four-year period. Gains and losses not yet includible in postretirement benefit cost are amortized only to the extent that such gain or loss exceeds 10% of the greater of the accumulated postretirement benefit obligation or the market-related value of plan assets. Such excess is amortized over the average remaining service life of active participants. Effective December 23, 2021, the $8.6 allowance for recovery in rates for Spire Missouri's postretirement benefit plans was discontinued. The difference between no recovery in rates and postretirement expense as calculated pursuant to the above and that otherwise would be included in the statements of income and statements of comprehensive income is deferred as a regulatory asset or regulatory liability. Effective with the resolution of the 2022 Missouri rate case in December 2022, net liabilities

for postretirement benefits reduced rates $0.9 and $0.1 per year for Missouri East and Missouri West, respectively.

The following table sets forth the reconciliation of the beginning and ending balances of the postretirement benefit obligation at September 30:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Benefit obligation, beginning of year	$ 148.1	$ 204.2	$ 114.8	$ 151.7	$ 29.9	$ 48.0
Service cost	4.8	7.5	4.0	6.3	0.7	1.1
Interest cost	8.5	6.0	6.5	4.5	1.8	1.4
Actuarial (gain) loss	(10.6)	(52.6)	(13.4)	(37.7)	4.2	(13.6)
Plan amendments	—	(6.2)	—	(1.0)	—	(5.2)
Retiree drug subsidy program	0.2	0.2	0.2	0.2	—	—
Benefits paid	(8.4)	(11.0)	(6.8)	(9.2)	(1.5)	(1.8)
Benefit obligation, end of year	$ 142.6	$ 148.1	$ 105.3	$ 114.8	$ 35.1	$ 29.9

In fiscal 2023, the actuarial gains for all qualified Spire plans were driven by the increase in the discount rate used to calculate the benefit obligation, combined with actuarial asset gains resulting from actual trust returns exceeding the expected returns. For Spire Alabama, these gains were more than offset by the loss associated with the difference between actual and assumed enrollment in Health Retirement Accounts.

The following table sets forth the reconciliation of the beginning and ending balances of the fair value of plan assets at September 30:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Fair value of plan assets at beginning of year	$ 264.7	$ 326.9	$ 176.7	$ 221.7	$ 83.3	$ 99.4
Actual return on plan assets	29.9	(51.6)	18.8	(36.2)	10.2	(14.3)
Employer contributions	0.1	0.4	0.1	0.4	—	—
Benefits paid	(8.4)	(11.0)	(6.8)	(9.2)	(1.5)	(1.8)
Fair value of plan assets, end of year	$ 286.3	$ 264.7	$ 188.8	$ 176.7	$ 92.0	$ 83.3
Funded status of plans, end of year	$ 143.7	$ 116.6	$ 83.5	$ 61.9	$ 56.9	$ 53.4

The following table sets forth the amounts recognized in the balance sheets at September 30:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Noncurrent assets	$ 180.7	$ 151.6	$ 120.5	$ 96.9	$ 56.9	$ 53.4
Current liabilities	(0.4)	(0.3)	(0.4)	(0.3)	—	—
Noncurrent liabilities	(36.6)	(34.7)	(36.6)	(34.7)	—	—
Total	$ 143.7	$ 116.6	$ 83.5	$ 61.9	$ 56.9	$ 53.4

Pre-tax amounts recognized in accumulated other comprehensive loss not yet recognized as components of net periodic postretirement benefit cost consist of:

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Net actuarial gain	$ (103.3)	$ (83.3)	$ (92.3)	$ (74.2)	$ (6.1)	$ (5.6)
Prior service cost (credit)	7.0	7.1	7.4	7.9	(0.4)	(0.8)
Subtotal	(96.3)	(76.2)	(84.9)	(66.3)	(6.5)	(6.4)
Adjustments for amounts included in regulatory assets	96.3	76.2	84.9	66.3	6.5	6.4
Total	$ —	$ —	$ —	$ —	$ —	$ —

The assumptions used to calculate net periodic postretirement benefit costs for Spire Missouri are as follows:

	2023	2022	2021
Weighted average discount rate - Spire Missouri plans	5.80%	2.95%	2.75%
Weighted average rate of future compensation increase	3.00%	3.00%	3.00%
Expected long-term rate of return on plan assets - Spire Missouri plans	5.50%	5.75%	5.75%

The assumptions used to calculate net periodic postretirement benefit costs for Spire Alabama are as follows:

	2023	2022	2021
Weighted average discount rate	5.80%	2.95%	2.75%
Expected long-term rate of return on plan assets	4.75%/6.0%	5.00%/6.25%	5.00%/6.25%

The discount rate is based on long-term, high quality bond indices at the measurement date. The expected long-term rate of return on plan assets is based on historical and projected rates of return for current and planned asset classes in the investment portfolio. Assumed projected rates of return for each asset class were selected after analyzing historical experience and future expectations of the returns. The overall expected rate of return for the portfolio was developed based on the target allocation for each class.

The assumptions used to calculate the accumulated postretirement benefit obligations are as follows:

	2023	2022
Weighted average discount rate - Spire Alabama plans and Spire Missouri Plans	6.30%	5.80%
Weighted average rate of future compensation increase - Spire Missouri East plans	3.00%	3.00%

The assumed medical cost trend rates at September 30 are as follows:

	2023	2022
Medical cost trend assumed for next year - Spire Alabama and Spire Missouri	6.50%	6.75%
Rate to which the medical cost trend rate is assumed to decline (the ultimate medical cost trend rate)	5.00%	5.00%
Year the rate reaches the ultimate trend	2030	2028

The following tables set forth the targeted and actual plan assets by category as of September 30 of each year for Spire Missouri and Spire Alabama:

Spire Missouri	Target	2023 Actual	2022 Actual
Equity securities	60.0%	58.9%	58.7%
Debt securities	40.0%	38.1%	40.5%
Cash and cash equivalents	—%	3.0%	0.8%
Total	100.0%	100.0%	100.0%

Spire Alabama	Target	2023 Actual	2022 Actual
Equity securities	60.5%	59.9%	57.7%
Debt securities	39.5%	40.1%	42.3%
Total	100.0%	100.0%	100.0%

Missouri and Alabama state laws provide for the recovery in rates of costs accrued pursuant to GAAP provided that such costs are funded through an independent, external funding mechanism. The Utilities have established Voluntary Employees' Beneficiary Association and Rabbi Trusts as external funding mechanisms. Their investment policies seek to maximize investment returns consistent with their tolerance for risk. Outside investment management specialists are utilized in each asset class. Such specialists are provided with guidelines, where appropriate, designed to ensure that the investment portfolio is managed in accordance with policy. Performance and compliance with the guidelines is regularly monitored. Spire Missouri and Spire Alabama currently invest in mutual funds which are rebalanced periodically to the target allocation. The mutual funds are diversified across U.S. stock and bond markets, and for Spire Alabama, international stock markets.

The following table sets forth expected postretirement benefit payments for the succeeding five fiscal years, and in aggregate for the five fiscal years thereafter for Spire, Spire Missouri, and Spire Alabama:

	2024	2025	2026	2027	2028	2029 – 2032
Spire	$ 14.6	$ 14.8	$ 14.9	$ 14.8	$ 14.5	$ 68.6
Spire Missouri	11.6	11.8	11.8	11.7	11.4	52.2
Spire Alabama	2.9	2.9	2.9	2.9	2.9	15.0

The Utilities' funding policy is to contribute amounts to the trusts equal to the periodic benefit cost calculated pursuant to GAAP as recovered in rates. For both Spire Missouri and Spire Alabama there are no anticipated contributions to the postretirement plans in fiscal 2024.

Other Plans

Spire Services Inc. sponsors a 401(k) plan that cover substantially all employees of Spire Inc. and its subsidiaries. The plan allows employees to contribute a portion of their base pay in accordance with specific guidelines. The cost of the defined contribution plan for Spire Inc. totaled $15.5, for fiscal years 2023, 2022, and 2021, respectively. Spire Missouri provides a match of such contributions within specific limits. The cost of the defined contribution plan for Spire Missouri amounted to $9.1, $10.9, and $10.9 for fiscal years 2023, 2022, and 2021, respectively. Spire Alabama also provides a match of employee contributions within specific limits. The cost of the defined contribution plan for Spire Alabama amounted to $3.1, $3.6, and $2.9 for fiscal years 2023, 2022, and 2021, respectively.

Fair Value Measurements of Pension and Other Postretirement Plan Assets

Spire

The table below categorizes the fair value measurements of the Spire pension plan assets:

	As of September 30, 2023			As of September 30, 2022		
	Quoted Prices in Active Markets (Level 1)	Significant Observable Inputs (Level 2)	Total	Quoted Prices in Active Markets (Level 1)	Significant Observable Inputs (Level 2)	Total
Cash and cash equivalents	$ 14.8	$ —	$ 14.8	$ 11.5	$ —	$ 11.5
Equity funds - global (including U.S.)	—	139.0	139.0	—	122.2	122.2
Real asset funds	—	55.2	55.2	—	61.0	61.0

14. INFORMATION BY OPERATING SEGMENT

The Company has three reportable segments: Gas Utility, Gas Marketing, and Midstream. The Gas Utility segment is the aggregation of the operations of the Utilities. The Gas Marketing segment includes the results of Spire Marketing, a subsidiary engaged in the non-regulated marketing of natural gas and related activities, including utilizing natural gas storage contracts for providing natural gas sales. The Midstream segment includes Spire STL Pipeline, a subsidiary of Spire providing interstate natural gas pipeline transportation services, and Spire Storage, a subsidiary of Spire providing interstate natural gas storage services. Other components of the Company's consolidated information include Spire's subsidiaries engaged in the operation of a propane pipeline and risk management, among other activities, and unallocated corporate items, including certain debt and associated interest costs.

Accounting policies are described in Note 1, Summary of Significant Accounting Policies. Intersegment transactions include sales of natural gas from Spire Marketing to Spire Missouri and Spire Alabama, sales of natural gas from Spire Missouri to Spire Marketing, sales of natural gas from Spire Alabama to Spire Marketing, propane transportation services provided by Spire NGL Inc. to Spire Missouri, and propane storage services provided by Spire Missouri to Spire NGL Inc.

Management evaluates the performance of the operating segments based on the computation of net economic earnings. Net economic earnings exclude from reported net income, as applicable, the after-tax impacts of fair value accounting and timing adjustments associated with energy-related transactions, the impacts of acquisition, divestiture and restructuring activities, and the largely non-cash impacts of other non-recurring or unusual items such as certain regulatory, legislative or GAAP standard-setting actions.

2023	Gas Utility	Gas Marketing	Midstream	Other	Eliminations	Consolidated

15. REGULATORY MATTERS

As discussed below for Spire Missouri and Spire Alabama, the Purchased Gas Adjustment (PGA) clauses and Gas Supply Adjustment (GSA) riders allow the Utilities to pass through to customers the cost of purchased gas supplies. Regulatory assets and regulatory liabilities related to the PGA clauses and the GSA rider are both labeled Unamortized Purchased Gas Adjustments herein.

The following regulatory assets and regulatory liabilities were reflected in the balance sheets of the Company, Spire Missouri and Spire Alabama as of September 30, 2023 and 2022.

	Spire		Spire Missouri		Spire Alabama	
September 30	**2023**	**2022**	**2023**	**2022**	**2023**	**2022**
Regulatory Assets:						
Current:						
Unamortized purchased gas adjustments	$ 293.2	$ 322.2	$ 269.4	$ 275.1	$ 21.7	$ 43.8
Other	55.1	33.2	23.7	13.0	19.9	13.1
Total Current Regulatory Assets	348.3	355.4	293.1	288.1	41.6	56.9
Noncurrent:						
Future income taxes due from customers	144.5	137.8	136.2	129.2	2.0	2.2
Pension and postretirement benefit costs	261.0	294.5	189.1	222.9	67.8	66.5
Cost of removal	633.2	493.7	97.0	25.2	536.2	468.5
Unamortized purchased gas adjustments	23.0	—	23.0	—	—	—
Energy efficiency	56.3	57.2	56.3	57.2	—	—
Other	131.2	129.2	116.0	113.1	0.9	1.0
Total Noncurrent Regulatory Assets	1,249.2	1,112.4	617.6	547.6	606.9	538.2
Total Regulatory Assets	$ 1,597.5	$ 1,467.8	$ 910.7	$ 835.7	$ 648.5	$ 595.1
Regulatory Liabilities:						
Current:						
Other	$ 7.3	$ 3.7	$ —	$ —	$ —	$ —
Total Current Regulatory Liabilities	7.3	3.7	—	—	—	—
Noncurrent:						
Deferred taxes due to customers	128.0	145.3	114.8	127.9	—	—
Pension and postretirement benefit costs	185.2	172.6	156.5	143.6	17.9	19.4
Accrued cost of removal	126.6	32.9	90.4	—	—	—
Unamortized purchased gas adjustments	11.2	53.0	11.2	53.0	—	—
Other	21.4	14.4	16.5	7.3	3.3	3.6
Total Noncurrent Regulatory Liabilities	472.4	418.2	389.4	331.8	21.2	23.0
Total Regulatory Liabilities	$ 479.7	$ 421.9	$ 389.4	$ 331.8	$ 21.2	$ 23.0

A portion of the Company's and Spire Missouri's regulatory assets are not earning a return, as shown in the table below:

	Spire		Spire Missouri	
September 30	**2023**	**2022**	**2023**	**2022**
Pension and postretirement benefit costs	$ 133.4	$ 152.9	$ 133.4	$ 152.9
Future income taxes due from customers	142.5	135.6	136.2	129.2
Unamortized purchase gas adjustments	292.4	275.1	292.4	275.1
Other	104.2	122.7	104.2	122.7
Total Regulatory Assets Not Earning a Return	$ 672.5	$ 686.3	$ 666.2	$ 679.9

Like all the Company's regulatory assets, these regulatory assets as of September 30, 2023 are expected to be recovered from customers in future rates. The recovery period for the future income taxes due from customers and pension and other postretirement benefit costs could be 20 years or longer, based on current Internal Revenue Service guidelines and average remaining service life of active participants, respectively. The recovery period for the PGA assets is less than two years. The other items not earning a return are expected to be recovered over a period not to exceed 15 years, consistent with precedent set by the MoPSC, except for certain debt costs expected to be recovered over the related debt term, up to 35 years. Spire Alabama does not have any regulatory assets that are not earning a return.

Spire Missouri

As authorized by the MoPSC, the PGA clause allows Spire Missouri to flow through to customers, subject to prudence review by the MoPSC, the cost of purchased gas supplies. To better match customer billings with market natural gas prices, Spire Missouri is allowed to file to modify, on a periodic basis, the level of gas costs in its PGA. Certain provisions of the PGA clause are included below:

- Spire Missouri has a risk management policy that allows for the purchase of natural gas derivative instruments with the goal of managing price risk associated with purchasing natural gas on behalf of its customers. The MoPSC clarified that costs, cost reductions, and carrying costs associated with the Utility's use of natural gas derivative instruments are gas costs recoverable through the PGA mechanism.
- The tariffs allow Spire Missouri flexibility to make up to three discretionary PGA changes during each year, in addition to its mandatory November PGA change, so long as such changes are separated by at least two months.
- Spire Missouri is authorized to apply carrying costs to all over- or under-recoveries of gas costs, including cost increases and cost reductions associated with the use of derivative instruments, including cash payments for margin deposits.
- Pre-tax income from off-system sales and capacity release revenues is shared with customers (such that customers receive 75% and Spire Missouri receives 25%).

Pursuant to the provisions of the PGA clause, the difference between actual costs incurred and costs recovered through the application of the PGA clause, as well as the actual amount of off-system sales and capacity release revenues allocated to customers, are reflected as a regulatory asset or liability at the end of the fiscal year. At that time, the balance is classified as a current asset or current liability and recovered from, or credited to, customers over an annual period commencing in the subsequent November. The balance in the current account is amortized as amounts are reflected in customer billings. In fiscal 2023, Spire Missouri filed two changes to its tariff, which were approved and became effective November 29, 2022 and January 19, 2023.

In mid- February 2021, the central U.S. experienced a period of unusually severe cold weather ("Winter Storm Uri"), and Spire Missouri implemented an Operational Flow Order (OFO) to preserve the integrity of its distribution system. During this time, Spire Missouri was required to purchase additional natural gas supply, both to ensure adequate supply for its firm utility customers, and to cover the shortfall created when third-party marketers failed to deliver natural gas supply to its city gates on behalf of their customers. In accordance with its MoPSC-approved OFO tariff, Spire Missouri invoiced the cost of gas and associated penalties totaling $195.8 to non-compliant marketers and recorded accounts receivable. Recoveries collected are an offset to cost of natural gas for firm utility customers through the PGA and Actual Cost Adjustment (ACA), so are net income neutral to Spire Missouri. The three largest counterparties did not remit payment when due, so Spire Missouri filed suit against them in federal court to recover the invoiced amounts. In late February 2022, the parties to the OFO waiver suits agreed to a settlement in principle, pursuant to which marketers will reimburse Spire Missouri for the actual cost of its incremental gas purchases to serve marketers' customers during Winter Storm Uri, so Spire Missouri reduced revenue, accounts receivable, cost of gas and regulatory liabilities by approximately $150 in the second quarter of fiscal 2022. The settlement, which reduced the total amount due from the three marketers to approximately $42, was approved by the MoPSC in late May 2022, and the marketers are making timely payments to Spire Missouri.

As a result of the significant net deferred gas costs and average inventory cost in the second quarter of fiscal 2021, primarily due to Winter Storm Uri, Spire Missouri filed for and received MoPSC approval for an adjustment to the PGA tariff to increase a Filing Adjustment Factor (FAF) credit on customers' bills for three years. This lowered the net PGA rate to mitigate the impact of Winter Storm Uri costs on customers. All gas costs will eventually be recovered by Spire Missouri through the PGA or ACA mechanisms and carrying costs will be applied per the terms of the tariff.

In the first quarter of fiscal 2022, the MoPSC approved Spire Missouri compliance tariffs with an effective date of December 23, 2021, consistent with its order in Spire Missouri's general rate case. These new tariffs were designed to increase Spire Missouri's aggregate annual gross base rate revenues by $72.2, which includes $24.9 incremental and $47.3 already being collected through the Infrastructure System Replacement Surcharge (ISRS). The MoPSC required Spire Missouri to defer all non-operational overheads from December 23, 2021 through September 30, 2022 into a regulatory asset totaling $42.8. On April 1, 2022, Spire Missouri filed tariff sheets to initiate a new general rate case proceeding intended to address the deferred amounts, along with other matters. The parties reached a Full Unanimous Stipulation and Agreement (the "Stipulation") to resolve all issues in the

case, which was filed with the MoPSC on November 4, 2022. On November 18, 2022, the Stipulation was approved, including authorization of $78.0 in new base rate revenue (including $19.0 already being collected through ISRS) and recovery of deferred overheads through amortization of the related regulatory asset. New base rates became effective on December 26, 2022.

ISRS allows Spire Missouri expedited recovery for its investment to replace qualifying components of its infrastructure without the necessity of a formal rate case. As noted above, all prior ISRS revenues were reset to zero as of December 26, 2022 as a result of Spire Missouri's most recent base rate case. On April 20, 2023, the MoPSC approved an incremental annual ISRS revenue increase of $7.7, effective May 6, 2023, reflecting eligible pipe replacement from October 2022 through February 2023. On October 4, 2023, the MoPSC approved an incremental annual ISRS revenue increase of $12.4, effective October 23, 2023, reflecting eligible pipe replacement from March 2023 through August 2023.

On May 27, 2022, the MoPSC staff filed an ACA Review Recommendation and Report for the ACA period that first includes transportation charges incurred by Spire Missouri for service on the Spire STL Pipeline. That report concluded that the transaction complied with Missouri affiliate transaction rules and was prudent, and it recommended no disallowance of any Spire STL Pipeline related costs from the ACA mechanism. On July 11, 2022, Spire Missouri filed its response comments in support of the recommendation. The Missouri Office of the Public Counsel and Environmental Defense Fund (EDF) filed comments on July 29 and August 1, 2022, respectively, raising concerns about the Spire STL Pipeline transaction, the ACA process itself, and other matters. On January 6, 2023, Spire Missouri filed a Partial Stipulation and Agreement resolving all other issues raised by the MoPSC staff in its Recommendation and Report. The partial stipulation was approved by the MoPSC on January 25, 2023, resulting in a $0.6 credit to the ACA balance, but issues relating to Spire STL Pipeline costs remained contested. An evidentiary hearing on this matter was scheduled to be held July 25-26, 2023; however, on July 21, 2023, MoPSC suspended the procedural schedule in recognition that the parties had reached an agreement in principle to resolve the matter via settlement stipulation. The stipulation and agreement was approved by the Commission on August 23, 2023 and included an increase in customer assistance program funding among other non-monetary commitments.

In 2022, the MoPSC initiated their annual ACA dockets (GR-2022-0135 and GR-2022-0136) to audit gas commodity and transportation costs for the 2020-2021 heating season, which included the impact of Winter Storm Uri on Spire Missouri's natural gas portfolio. On December 15, 2022, the MoPSC staff filed its Reports and Recommendations in these cases proposing various disallowances relating to imbalance cash-outs and an off-system sale. On January 19, 2023, Spire Missouri filed its response to this proposal setting forth its position that there is no basis in law or fact for either disallowance. On July 12, 2023, the MoPSC entered a scheduling order in this matter which includes several rounds of pre-filed testimony prior to an evidentiary hearing to be held in early May 2024. On November 2, 2023, Spire Missouri filed an unopposed settlement stipulation by which the MoPSC Staff agreed to withdraw its recommendation of a proposed disallowance relating to imbalance cash-outs. The proposed disallowance relating to an off-system sale remains pending in the case. Management believes the likelihood of an unfavorable outcome is remote.

Spire Alabama

In September 2022, the APSC approved the renewal of RSE through September 30, 2025, with certain modifications to the previous terms. Under RSE, the APSC conducts reviews in March, June and September to determine whether Spire Alabama's return on average common equity (ROE) at the end of the rate year will be within the allowed range of return. Reductions in rates can be made quarterly to bring the projected ROE within the allowed range; increases, however, are allowed only once each rate year, effective December 1, and cannot exceed 4% of prior-year revenues. Effective October 1, 2022, Spire Alabama's allowed range of ROE is 9.50% to 9.90% with an adjusting point of 9.70%. Previously, the allowed range was 10.15% to 10.65% with an adjusting point of 10.40%. Spire Alabama is subject to a performance-based adjustment of plus or minus 10 basis points to the ROE adjusting point, based upon the terms of the previously approved Accelerated Infrastructure Modernization (AIM) Program tariff; however, Spire applied for and received approval to suspend the operation of the AIM performance-based adjustment for 2022, 2023, and 2024, impacting fiscal years 2023 through 2025. Spire Alabama's equity as a percent of total capitalization is limited to 55.5%, and Average Common Equity growth is limited to 6.00% each year.

The inflation-based Cost Control Measure (CCM) established by the APSC allows for annual changes in operation and maintenance ("O&M") expense relative to an index range. Effective October 1, 2022, the Base Year O&M expense was computed by averaging the actual O&M expenses for 2020, 2021, and 2022. The Base CPI-U was computed by averaging the August CPI-U for 2020, 2021, 2022. The "Index" is computed by measuring the change from the Base CPI-U to the August CPI-U of the most recently completed fiscal year, less a factor of 1.50%. The index range will be computed by adjusting the Index plus or minus 1.50%. If rate year O&M expense falls within the index range, no adjustment is required. If rate year O&M expense exceeds the index range, three-quarters of the difference is returned to customers through future rate adjustments. To the extent rate year O&M is less than the index range, Spire Alabama benefits by one-half of the difference through future rate adjustments. If a benefit is achieved, the Base Year and the Base CPI-U for the following year will each be reset to an average of the three preceding completed years. If a benefit is not achieved, the Base Year and Base CPI-U will not be updated. Certain items that fluctuate based on situations demonstrated to be beyond Spire Alabama's control may be excluded from the CCM calculation.

The RSE reduction for September 30, 2021 following the year-end point of test was $2.2 to bring the expected rate of return on average common equity to within the allowed rate of return. The CCM benefit for rate year 2021 was $8.8. To mitigate the impact on ratepayers, Spire Alabama requested and received approval from the APSC to recover the 2021 CCM benefit over five years (with recognition of revenue only up to 24 months in advance of recovery). As a part of the annual update for RSE, on December 29, 2021, Spire Alabama filed an increase for rate year 2022 of $5.3. The 2021 RSE reduction of $2.2, the five-year recovery of the 2021 CCM benefit of $8.8 and the annual RSE increase of $5.3 were all effective on January 1, 2022. There was no RSE reduction in 2022 for the January 31, April 30, July 31 or September 30 quarterly points of test. Spire Alabama recorded a CCM benefit for rate year 2022 of $17.2. Similar to the rate year 2021 CCM benefit, Spire requested and received approval to recover the rate year 2022 CCM benefit over five years. On October 26, 2022, Spire Alabama made its annual RSE rate filing with the APSC, presenting the utility's budget for the fiscal year ended September 30, 2023, including net income and a calculation of allowed ROE. The budget reflected the start of amortization of the accumulated deferred income tax (ADIT) adjustment related to the Tax Cuts and Jobs Act of 2017 (TCJA). New rates designed to provide an annual revenue increase of $15.0 became effective January 1, 2023. There was no RSE reduction in 2023 for the March 31, June 30 or September 30 points of test. Spire Alabama recorded a CCM benefit for rate year 2023 of $4.4. On October 26, 2023, Spire Alabama made its annual RSE rate filing, presenting the utility's budget for the fiscal year ending September 30, 2024, including net income and a calculation of allowed ROE. New rates designed to provide an annual revenue increase of $15.8 are anticipated to become effective December 1, 2023.

Spire Alabama's rate schedules for natural gas distribution charges contain a GSA rider which permits the pass-through to customers of changes in the cost of gas supply. Spire Alabama's tariff provides a temperature adjustment mechanism, also included in the GSA rider, which is designed to moderate the impact of departures from normal temperatures on Spire Alabama's earnings. The temperature adjustment applies primarily to residential, small commercial and small industrial customers. Other non-temperature weather-related conditions that may affect customer usage are not included in the temperature adjustment. There is also a mechanism under Spire Alabama's GSA rider allowing the utility to create value through off-system sales of excess natural gas supply and capacity and to give 75% of the value created to customers while retaining 25%. As of April 2022, the first $1.6 of value from capacity release goes entirely to customers before Spire Alabama retains 25%. In the past year, Spire Alabama filed GSA rate increases effective December 1, 2022 and January 1, 2023, and GSA rate decreases effective October 1, 2023 and anticipated to become effective December 1, 2023, primarily attributable to changes in natural gas prices.

The APSC approved an Enhanced Stability Reserve (ESR) in 1998, which was subsequently modified and expanded in 2010. As currently approved, the ESR provides deferred treatment and recovery for the following: (1) extraordinary O&M expenses related to environmental response costs; (2) extraordinary O&M expenses related to self-insurance costs that exceed $1.0 per occurrence; (3) extraordinary O&M expenses, other than environmental response costs and self-insurance costs, resulting from a single force majeure event or multiple force majeure events greater than $0.3 and $0.4, respectively, during a rate year; and (4) negative individual large commercial and industrial customer budget revenue variances that exceed $0.4 during a rate year. Charges to the ESR are subject to certain limitations which may disallow deferred treatment and which prescribe the timing of recovery. Subject to APSC authorization, Spire Alabama expects to be able to recover underfunded ESR balances over a five-year amortization period with an annual limitation of $0.7. Amounts in excess of this limitation are deferred for recovery in future years.

115

Spire

In addition to those discussed above for Spire Missouri and Spire Alabama, Spire is affected by the following regulatory matters.

Spire Gulf has similar rate regulation to Spire Alabama. Its RSE rate-setting mechanism was renewed in September 2021 for a four-year term through September 2025. The RSE allowed ROE range was 10.45% to 10.95% with an adjusting point of 10.70% in fiscal 2021, while the ROE range is 9.70% to 10.30% with an adjusting point of 9.95% for fiscal 2022 through fiscal 2025. In October 2021 and 2022, Spire Gulf made its annual RSE rate filings with the APSC based on its budget for the new fiscal year and an allowed ROE of 9.95%, and new rates designed to provide increased annual revenues of $1.0 and $2.5 became effective at the beginning of January 2022 and 2023, respectively. The fiscal 2023 budget reflected the start of amortization of the excess ADIT from the TCJA. Spire Gulf filed its RSE point of test as of April 30, 2023 with the APSC reflecting that its projected ROE exceeded the allowed ROE resulting in an annualized refund of $1.8 that became effective July 1, 2023. Spire Gulf filed its RSE point of test as of September 30, 2023, reflecting that its actual ROE exceeded the allowed ROE resulting in an additional annualized refund of $2.0 that are anticipated to become effective December 1, 2023. The CCM has similar evaluation and recovery provisions when expenses exceed or are under a band of plus or minus 1.50% around the CPI-U inflated O&M per customer expense level from the base year, excluding expenses for pensions and gas bad debt. The base year for the O&M index was 2017 for fiscal 2021 and was 2021 for fiscal 2022. Since a CCM benefit was recorded in fiscal 2022, the base year O&M index for fiscal 2023 through fiscal 2025 will be the 2022 O&M level. Spire Gulf recorded a CCM benefit for rate year 2021 of $2.3 to revenues, resulting in a net income benefit of $1.6. A CCM benefit of $1.7 was recorded for fiscal 2022 to an economic development fund that can be used for economic development purposes subject to APSC approval. Spire Gulf's O&M for fiscal 2023 was within the O&M per customer inflation adjusted band. Spire Gulf has a Cast Iron Main Replacement Factor (CIF) that provides an enhanced return on the pro-rata costs associated with cast iron main replacement exceeding 10 miles per year based on a 75% weighting for the equity content. Capital expenditures recovered under the CIF have not increased since fiscal 2019 pursuant to applicable tariff provisions although the Company is continuing to recover costs of service associated with accumulated expenditures under the CIF. Spire Gulf also has an ESR for negative revenue variances over $0.1 or a force majeure event expense of $0.1 (or two events that exceed $0.15) and an Environmental Cost Recovery Factor that recovers 90% of prudently incurred costs for compliance with environmental laws, rules and regulations. Spire Gulf has an APSC-approved intercompany revolving credit agreement with Spire to borrow in a principal amount not to exceed $75.0 and to loan up to $25.0.

Spire Mississippi utilizes a formula rate-making process under the Rate Stabilization Adjustment Rider (RSA). An allowed return on equity (currently 10.04%) is computed annually and compared to the actual return on equity based on a rate year ending June 30. If the actual equity return on an end of period rate base is beyond the allowed return on equity by 1.0%, then 75% of any shortfall is recovered through a rate increase and 50% of any excess results in a rate decrease. Updates may include known and measurable adjustments to historic costs from the 12 months ended June 30, submitted September 15 for an effective date of November 1, unless disputed by the Mississippi Public Utilities Staff (MPUS), with any disputes to be resolved by the Mississippi Public Service Commission (MSPSC) by January 15 of the following year. The MSPSC approved stipulation agreements between the MPUS and Spire Mississippi that provided for increased annual revenues of $0.8 through rates effective on February 1, 2022 and an additional $0.8 effective on January 1, 2023. Spire Mississippi's RSA filing made on September 1, 2023 reflected a rate increase of $1.3 and is pending review by the MPUS. Additionally, a Supplemental Growth Rider provides recovery of certain Spire Mississippi system expansion projects to serve qualified economic development projects.

In August 2018, the FERC approved an order issuing Certificates of Public Convenience and Necessity ("FERC Certificates") for the Spire STL Pipeline ("August 2018 Order"). In June 2021, the U.S. Court of Appeals for the District of Columbia Circuit issued an order vacating the FERC Certificates and remanding the matter back to the FERC for further action. In September and December 2021, the FERC issued temporary certificates for the continued authorized operation of the Spire STL Pipeline pending the outcome of its determination on remand. On December 15, 2022, the FERC issued its order on remand reissuing permanent FERC Certificates for the continued operation of the Spire STL Pipeline, and that order is final and no longer appealable.

16. COMMITMENTS AND CONTINGENCIES

Commitments

The Company and the Utilities have entered into contracts with various counterparties, expiring on dates through calendar 2039, for the storage, transportation, and supply of natural gas. Minimum payments required under the contracts in place at September 30, 2023, are estimated at $1,613.2, $1,182.0 and $251.6 for the Company, Spire Missouri and Spire Alabama, respectively. Additional contracts are generally entered into prior to or during the heating season of November through April. The Utilities recover their costs from customers in accordance with their PGA clauses or GSA riders.

In May 2023, Spire entered into an agreement to acquire MoGas Pipeline, an interstate natural gas pipeline, and Omega Pipeline, a connected gas distribution system, from CorEnergy Infrastructure Trust, Inc., for $175 cash, subject to customary working capital and other closing adjustments. Spire has received a request for additional information ("Second Request") from the Federal Trade Commission (FTC) with regard to this proposed acquisition. The Company is cooperating fully with the FTC regarding the Second Request and expects to close in the second quarter of fiscal 2024 subject to receiving FTC approval.

A consolidated subsidiary of Spire is a limited partner in Inter-Atlantic Energy Capital Ventures, L.P., an unconsolidated partnership focusing on sustainability initiatives largely tied to the natural gas utility sector. Spire committed to contribute a total of $10.0 of capital to the partnership as and when requested by the general partner. As of September 30, 2023, the remaining unfunded commitment was $4.9.

Contingencies

The Company and the Utilities account for contingencies, including environmental liabilities, in accordance with accounting standards under the loss contingency guidance of ASC Topic 450, *Contingencies*, when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated.

In addition to matters noted below, the Company and the Utilities are involved in other litigation, claims, and investigations arising in the normal course of business. Management, after discussion with counsel, believes the final outcome will not have a material effect on the statements of income, balance sheets, and statements of cash flows of the Company, Spire Missouri, or Spire Alabama. However, there is uncertainty in the valuation of pending claims and prediction of litigation results.

The Company and the Utilities own and operate natural gas distribution, transmission, and storage facilities, the operations of which are subject to various environmental laws, regulations, and interpretations. While environmental issues resulting from such operations arise in the ordinary course of business, such issues have not materially affected the Company's or Utilities' financial position and results of operations. As environmental laws, regulations, and their interpretations change, the Company or the Utilities may incur additional environmental liabilities that may result in additional costs, which may be material.

In the natural gas industry, many gas distribution companies have incurred environmental liabilities associated with sites they or their predecessor companies formerly owned or operated where manufactured gas operations took place. The Utilities each have former manufactured gas plant (MGP) operations in their respective service territories, some of which are discussed under the Spire Missouri and Spire Alabama headings below. To the extent costs are incurred associated with environmental remediation activities, the Utilities would request authority from their respective regulators to defer such costs (less any amounts received from insurance proceeds or as contributions from other potentially responsible parties (PRPs)) and collect them through future rates.

To date, costs incurred for all Spire MGP sites for investigation, remediation and monitoring have not been material. However, the amount of costs relative to future remedial actions at these and other sites is unknown and may be material. The actual future costs that Spire Missouri and Spire Alabama may incur could be materially higher or lower depending upon several factors, including whether remediation will be required, final selection and regulatory approval of any remedial actions, changing technologies and government regulations, the ultimate ability of other PRPs to pay, and any insurance recoveries.

In 2020, Spire retained an outside consultant to conduct probabilistic cost modeling of its former MGP sites in Missouri and Alabama. The purpose of this analysis was to develop an estimated range of probabilistic future liability for each of their MGP sites. That analysis, completed in March 2021, provided a range of demonstrated possible future expenditures to investigate, monitor and remediate the former MGP sites. Spire Missouri and Spire Alabama have recorded their best estimates of the probable expenditures that relate to these matters. The amount remains immaterial, and Spire Missouri, Spire Alabama and the Company do not expect potential liabilities that may arise from remediating these sites to have a material impact on their future financial condition or results of operations.

Spire Missouri

Spire Missouri has identified three former MGP sites in the city of St. Louis, Missouri (the "City") where costs have been incurred and claims have been asserted. Spire Missouri has enrolled two of the sites in the Missouri Department of Natural Resources (MoDNR) Brownfields/Voluntary Cleanup Program (BVCP). The third site is the result of an assertion by the United States Environmental Protection Agency (EPA).

In conjunction with redevelopment of the Carondelet Coke site, Spire Missouri and another former owner of the site entered into an agreement (the "Remediation Agreement") with the City development agencies, the developer, and an environmental consultant that obligates one of the City agencies and the environmental consultant to remediate the site and obtain a No Further Action (NFA) letter from the MoDNR. The Remediation Agreement also provides for a release of Spire Missouri and the other former site owner from certain liabilities related to the past and current environmental condition of the site and requires the developer and the environmental consultant to maintain certain insurance coverage, including remediation cost containment, premises pollution liability, and professional liability. The operative provisions of the Remediation Agreement were triggered on December 20, 2010, on which date Spire Missouri and the other former site owner, as full consideration under the Remediation Agreement, paid a small percentage of the cost of remediation of the site. The property was divided into seven parcels, and MoDNR NFA letters have been received for six of the parcels. Remediation is ongoing on the last parcel.

In a letter dated June 29, 2011, the Attorney General for the State of Missouri informed Spire Missouri that the MoDNR had completed an investigation of the second site, Station A. The Attorney General requested that Spire Missouri participate in the follow up investigations of the site. In a letter dated January 10, 2012, Spire Missouri stated that it would participate in future environmental response activities at the site in conjunction with other PRPs. Accordingly, Spire Missouri entered into a cost sharing agreement for remedial investigation with other PRPs. MoDNR never approved the agreement, so no remedial investigation took place. Recently, Spire Missouri was approached by a real estate developer interested in purchasing the northern half of the Station A site and developing the same for industrial purposes. Consequently, Spire Missouri is now in discussions with the developer, other PRPs and MoDNR to develop a new remedial investigation plan for the site.

Additionally, in correspondence dated November 30, 2016, Region 7 of the EPA has asserted that Spire Missouri is liable under Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) for alleged coal gas waste contamination at a third site, Station B. Spire Missouri and the site owner notified the EPA that information and data provided by the EPA to date does not rise to the level of documenting a threat to the public health or environment. As such, in March 2017 Spire Missouri requested more information from the EPA. Spire Missouri never received a response from the EPA.

Spire Missouri has notified its insurers that it seeks reimbursement for costs incurred in the past and future potential liabilities associated with these MGP sites. While some of the insurers have denied coverage and reserved their rights, Spire Missouri retains the right to seek potential reimbursements from them.

On March 10, 2015, Spire Missouri received a Section 104(e) information request under CERCLA from EPA Region 7 regarding the former Thompson Chemical/Superior Solvents site in the City. In turn, Spire Missouri issued a Freedom of Information Act (FOIA) request to the EPA on April 3, 2015, to identify the basis of the inquiry. The FOIA response from the EPA was received on July 15, 2015, and a response was provided to the EPA on August 15, 2015. Spire Missouri has received no further inquiry from the EPA regarding this matter.

In its western service area, Spire Missouri has six owned MGP sites enrolled in the BVCP, including Joplin MGP #1, St. Joseph MGP #1, Kansas City Coal Gas Station B, Kansas City Station A Railroad area, Kansas City Coal Gas Station A, and Independence MGP #2. Source removal has been conducted at all the owned sites since 2003 with the exception of Joplin. On September 15, 2016, a request was made with the MoDNR for a restrictive covenant use limitation with respect to Joplin. Remediation efforts at the six sites are at various stages of completion, ranging from groundwater monitoring and sampling following source removal activities to the aforementioned request for the Joplin site. As part of its participation in the BVCP, Spire Missouri communicates regularly with the MoDNR with respect to its remediation efforts and monitoring activities at these sites. On May 11, 2015, MoDNR approved the next phase of investigation at the Kansas City Station A Railroad area.

Spire Alabama

Spire Alabama is in the chain of title of nine former MGP sites, four of which it still owns, and five former manufactured gas distribution sites, one of which it still owns. All are located in the state of Alabama.

In 2011, a removal action was completed and an NFA letter was received at the Huntsville MGP site pursuant to an Administrative Settlement Agreement and Order on Consent among the EPA, Spire Alabama and the current site owner.

In 2012, Spire Alabama responded to an EPA Request for Information Pursuant to Section 104 of CERCLA relating to the 35th Avenue Superfund Site located in North Birmingham, Jefferson County, Alabama. Spire Alabama was identified as a PRP under CERCLA for the cleanup of the site or costs the EPA incurs in cleaning up the site. At this point, Spire Alabama has not been provided information that would allow it to determine the extent, if any, of its potential liability with respect to the 35th Avenue Superfund Site and vigorously denies its inclusion as a PRP.

Assessments were performed by the EPA of the former MGP sites in Gadsden and Anniston, and NFA letters were received after each assessment.

Spire

In addition to those discussed above for Spire Missouri and Spire Alabama, Spire is aware of the following contingent matters.

Spire Marketing, along with many natural gas industry participants, faced the unprecedented effects of Winter Storm Uri in February 2021. Numerous natural gas producers and midstream operators were unable to deliver natural gas to market as they experienced wellhead freeze-offs, power outages and equipment failure due to the extreme weather. These events resulted in supply curtailments, and related notices of force majeure to excuse performance, from and to certain counterparties. Further, these events have made Spire Marketing subject to various commercial disputes (including regarding force majeure). As such, Spire Marketing has recorded an estimate of potential liabilities for damages based on communications with counterparties and the facts and circumstances surrounding each transaction. These estimates are adjusted as new facts emerge or settlement agreements are reached, and it is possible that final settlement amounts may materially differ from the current estimate.

17. LEASES

The lease agreement covering the Company's primary office space in St. Louis extends through February 2035, with an option to renew for an additional five years. Spire Alabama's lease agreement for office space in Birmingham extends through January 2037, with an option to renew for two additional five-year terms. The lease agreement covering Spire Marketing and Spire Storage office space in Houston extends through December 2028, with options to terminate three years earlier or to renew for an additional five years. The renewal options in the St. Louis and Houston leases are reasonably certain to be exercised and are included in the lease term used to determine the right-of-use assets and lease liabilities. The Company and its subsidiaries have other relatively minor rental arrangements for real estate and equipment with remaining terms of up to ten years.

Operating lease cost, cash flow and noncash information are shown in the following table.

	Spire			Spire Missouri			Spire Alabama		
	2023	2022	2021	2023	2022	2021	2023	2022	2021
Operating lease cost, including amounts capitalized	$ 7.3	$ 7.4	$ 7.2	$ 0.5	$ 0.5	$ 0.4	$ 2.0	$ 2.1	$ 2.1
Cash flow and noncash information about operating leases:									
Operating cash flows representing cash paid for amounts included in the measurement of lease liabilities	7.3	7.3	7.2	0.5	0.5	0.4	2.1	2.1	2.1

Right-of-use assets obtained in exchange for lease liabilities	0.8	24.6	—	0.8	1.1	—	—	23.5	—

The following table shows year-end balance sheet and weighted-average information about operating leases.

	Spire		Spire Missouri		Spire Alabama	
	2023	2022	2023	2022	2023	2022
Right-of-use assets	$ 70.6	$ 73.7	$ 2.1	$ 1.7	$ 19.2	$ 20.2
Lease liabilities, current	6.8	6.5	0.5	0.4	1.9	1.9
Lease liabilities, noncurrent	70.2	73.7	1.8	1.5	23.5	24.6
Weighted-average remaining lease term (in years)	14.1	15.0	5.6	5.1	13.3	14.3
Weighted-average discount rate	4.2%	4.1%	3.3%	2.2%	3.7%	3.7%

On the balance sheets, right-of-use assets are included in “Deferred Charges and Other Assets: Other,” current lease liabilities are in “Current Liabilities: Other,” and noncurrent lease liabilities are in “Deferred Credits and Other Liabilities: Other.”

Following is a maturity analysis by fiscal year for operating lease liabilities as of September 30, 2023.

	Spire	Spire Missouri	Spire Alabama
2024	$ 6.9	$ 0.5	$ 1.9
2025	7.5	0.6	2.2
2026	7.5	0.4	2.2
2027	7.4	0.3	2.3
2028	7.4	0.3	2.3
Thereafter	65.9	0.5	21.7
Total undiscounted lease payments	102.6	2.6	32.6
Less present value discount	(25.6)	(0.3)	(7.2)
Total current and noncurrent lease liabilities	$ 77.0	$ 2.3	$ 25.4

There are no significant finance leases, short-term leases, subleases, variable lease payments, residual value guarantees, restrictions or covenants pertaining to leases.

The Company elected, for all asset classes, not to recognize right-of-use assets and lease liabilities for short-term leases. Instead, the lease payments for short-term leases are recognized in profit or loss on a straight-line basis over the lease term and variable lease payments are recognized in the period in which the obligation for those payments is incurred. The Company elected, for all asset classes, not to separate nonlease components from lease components and instead to account for each separate lease component and the nonlease components associated with that lease component as a single lease component.

The discount rate used for all the leases is the applicable incremental borrowing rate, which is the rate of interest that a lessee would have to pay to borrow on a collateralized basis over a similar term an amount equal to the lease payments in a similar economic environment. For a subsidiary lessee, the rate applicable to the subsidiary is used unless the lease terms are influenced by parent credit.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There have been no changes in or disagreements on accounting and financial disclosure with Spire's, Spire Missouri's, or Spire Alabama's outside auditors that are required to be disclosed.

Item 9A. Controls and Procedures

Spire

Management Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. Spire Inc.'s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Spire Inc.'s management, including its Chief Executive Officer and Chief Financial Officer, conducted an assessment of the effectiveness of Spire Inc.'s internal control over financial reporting as of September 30, 2023. In making this assessment, management used the criteria in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, management concluded that Spire Inc.'s internal control over financial reporting was effective as of September 30, 2023. Deloitte & Touche LLP, an independent registered public accounting firm, has issued an attestation report on Spire Inc.'s internal control over financial reporting, which is included in Item 8, Financial Statements and Supplementary Data.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based upon such evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective.

Change in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Spire Missouri

Management Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. Spire Missouri Inc.'s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Spire Missouri Inc.'s management, including its Chief Executive Officer and Chief Financial Officer, conducted an assessment of the effectiveness of Spire Missouri Inc.'s internal control over financial reporting as of September 30, 2023. In making this assessment, management used the criteria in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, management concluded that Spire Missouri Inc.'s internal control over financial reporting was effective as of September 30, 2023.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Spire Alabama

Management Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. Spire Alabama Inc.'s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Spire Alabama Inc.'s management, including its Chief Executive Officer and Chief Financial Officer, conducted an assessment of the effectiveness of Spire Alabama Inc.'s internal control over financial reporting as of September 30, 2023. In making this assessment, management used the criteria in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, management concluded that Spire Alabama Inc.'s internal control over financial reporting was effective as of September 30, 2023.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures pursuant to Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

During the quarterly period ended September 30, 2023, no director or officer of the Company adopted or terminated any contract, instruction or written plan for the purchase or sale of securities of the Company intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) of the Exchange Act or any "non-Rule 10b5-1 trading arrangement" (as defined in the Exchange Act).

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information about:

- our directors is incorporated by reference from the discussion under Proposal 1 of our proxy statement to be filed on or about December 13, 2023 ("2023 proxy statement");
- our executive officers is reported in Part I of this Form 10-K;
- our Financial Code of Ethics is posted on our website, www.SpireEnergy.com, under Investors/Governance/Governance documents (http://investors.spireenergy.com/governance/governance-documents); and
- our Audit Committee, our Audit Committee financial experts, and submitting nominations to the Corporate Governance Committee

is incorporated by reference from the discussion in our 2023 proxy statement under the heading "Governance."

In addition, our Code of Business Conduct, Corporate Governance Guidelines, and charters for our Audit, Compensation and Corporate Governance Committees are available under "Governance documents" on our website, as indicated above, and a copy will be sent to any shareholder upon written request.

Item 11. Executive Compensation

Information about director and executive compensation is incorporated by reference from the discussion in our 2023 proxy statement under the headings "Directors' compensation" and "Executive compensation."

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information about:

- security ownership of certain beneficial owners and management and
- aggregate information regarding the Company's equity compensation plan

is incorporated by reference from the discussion in our 2023 proxy statement under "Beneficial ownership of Spire stock."

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information about:

- our policy and procedures for related party transactions and
- the independence of our directors

is included in our 2023 proxy statement under "Governance" and is incorporated by reference. There were no related party transactions in fiscal 2023.

Item 14. Principal Accounting Fees and Services

Information about fees paid to our independent registered public accountant and our policy for pre-approval of services provided by our independent registered public accountant is incorporated by reference from our 2023 proxy statement under "Fees of independent registered public accountant" and "Governance," respectively.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) (1) Financial Statements

See Item 8, Financial Statements and Supplementary Data, filed herewith, for a list of financial statements.

(2) Financial Statement Schedules

Schedules have been omitted because they are not applicable, related significance tests were not met, or the required data has been included in the financial statements or notes to financial statements.

\r\n\r\n

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +23.89% per year. These returns cover a period from January 1, 1988 through March 3, 2025. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations. Zacks may license the Zacks Mutual Fund rating provided herein to third parties, including but not limited to the issuer.

\r\n\r\n

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +23.89% per year. These returns cover a period from January 1, 1988 through March 3, 2025. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations. Zacks may license the Zacks Mutual Fund rating provided herein to third parties, including but not limited to the issuer.

\r\n\r\n

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +23.89% per year. These returns cover a period from January 1, 1988 through March 3, 2025. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations. Zacks may license the Zacks Mutual Fund rating provided herein to third parties, including but not limited to the issuer.

At the center of everything we do is a strong commitment to independent research and sharing its profitable discoveries with investors. This dedication to giving investors a trading advantage led to the creation of our proven Zacks Rank stock-rating system. Since 1988 it has more than doubled the S&P 500 with an average gain of +23.89% per year. These returns cover a period from January 1, 1988 through March 3, 2025. Zacks Rank stock-rating system returns are computed monthly based on the beginning of the month and end of the month Zacks Rank stock prices plus any dividends received during that particular month. A simple, equally-weighted average return of all Zacks Rank stocks is calculated to determine the monthly return. The monthly returns are then compounded to arrive at the annual return. Only Zacks Rank stocks included in Zacks hypothetical portfolios at the beginning of each month are included in the return calculations. Zacks Ranks stocks can, and often do, change throughout the month. Certain Zacks Rank stocks for which no month-end price was available, pricing information was not collected, or for certain other reasons have been excluded from these return calculations. Zacks may license the Zacks Mutual Fund rating provided herein to third parties, including but not limited to the issuer.

TABLE OF CONTENTS

Domestic Commentary – Highlights of March 26 & 27 Survey **p. 1**

Domestic Summary Table – Table of consensus forecasts of U.S. interest rates and key economic assumptions **p. 2**

International Summary Table – Table of consensus forecasts of international interest rates and foreign exchange values **p. 3**

International Commentary (by Andy Cates) **p. 3**

Individual Panel Member's U.S. Forecasts – Of interest rates and key assumptions for the next six quarters **p. 4-9**

Individual Panel Member's International Forecasts – Of international interest rates and foreign exchange values **p. 10-11**

Viewpoints – A sampling of views on the economy and government policy excerpted from recent reports issued by our panel members **p. 12-13**

Special Questions – Results of special questions posed to panel members about the economy, financial markets and government policy **p. 14**

Databank – Monthly historical data on many key indicators of economic activity **p. 15**

Calendar – Release dates for important upcoming economic data, FOMC meetings, etc. **p. 16**

List of Contributing Economists – To Domestic and International Survey **inside of back cover**

Stagflation-lite Poses a Threat to Financial Markets

At the end of last year, financial markets generally thought that the near-term US economic outlook was bright. The Fed appeared to be on the way to achieving the historically elusive "soft landing" where it reins in inflation without a meaningful rise in unemployment. Moreover, the incoming Trump administration, accompanied by Republican majorities in both houses of Congress, engendered expectations of a growth-enhancing macroeconomic policy environment—less government, lower taxes and reduced regulation. But how quickly things can change. Over the past couple of months, policy uncertainty has skyrocketed, not just in the US but across the globe, significantly increasing financial market volatility.

Stagflation-lite. The Trump Administration's on again, off again tariff increases threaten to boost already sticky inflation. And the threat of a trade war, coupled with imposed restraints on immigration and the possibility of significantly lower federal government spending, have generated fears of an economic slowdown. In short, the specter of stagflation (more accurately, stagflation-lite—a period of elevated inflation accompanied by below-trend GDP growth) is now concerning financial markets. Indeed, the Blue Chip Financial Forecasts (BCFF) consensus estimates a 48% probability that the US economy will experience "stagflation-lite" during the next 12 months.

Rising inflation expectations. The anxiety over the inflation outlook is being reflected in rising longer-term US interest rates. After having fallen since mid-January, the yield on the benchmark 10-year Treasury note has generally risen since early March. Survey-based inflation expectations continue to surge. After jumping from 4.2% in January to 4.7% in February, the Conference Board's year-ahead inflation expectations leapt to 5.1% in March. Similarly, year-ahead inflation expectations in the University of Michigan survey have risen markedly, from 3.3% in January to 4.3% in February and 5.0% in March. Even with rising inflation expectations, the BCFF consensus expects that the recent rebound in longer-term yields has essentially run its course, most likely due to slower growth. It looks for little change in longer-term rates from current levels over the remainder of this year.

Increased tariffs are seen as a primary factor behind the worsening inflation outlook. The FOMC raised its 2025 inflation outlook markedly in the Summary of Economic Projections released after the mid-March FOMC meeting. In the ensuing press conference, Fed Chair Powell noted repeatedly that the near-term inflation outlook had been boosted by the increase in tariffs. Similarly, the BCFF consensus estimates a 47% probability of a meaningful acceleration in inflation over the next six months, up from 40% last month with increased tariffs a primary cause. Ninety-six percent of respondents think that increased tariffs will boost inflation significantly although only 34% think that the impact on inflation will be lasting. The other 62% think that increased tariffs will provide only a one-time boost to prices and inflation. Still, with inflation expectations already on the rise, there is a real risk that even a temporary boost to inflation could raise expectations further and thereby provide a more extended fillip to inflation.

Rising observed inflation. The March flash PMI report provided some empirical support for a tariff-driven increase in prices. It showed that cost pressures have intensified for both goods and services. Input costs increased at the fastest pace in 23 months, surging particularly in manufacturing (where the rate of inflation hit a 31-month high). The primary factor given for the increased pressure on input prices was higher tariffs. Furthermore, higher input costs are feeding through into a faster rise in manufacturers' selling prices, which rose in March at the fastest rate in 25 months. Also, PCE price inflation has accelerated recently to worryingly high rates. In January and February, the headline PCE price index increased at a 3.6% annual rate from Q4 versus a 2.4% quarterly gain in Q4. Similarly, the core PCE price index rose 3.2% annualized in January/February versus 2.6% in Q4.

The BCFF consensus outlook for economic growth and inflation reflects the stagflation risks the economy currently faces. The probability of the economy falling into recession over the next 12 months increased by 9%-points in this survey to a still relatively low 33%, but this is the highest estimated probability since last April. The BCFF panel was not asked for a Q1 GDP forecast in this month's survey, but gauging from the downgrade to its Q2 forecast, the forecast for Q1 GDP growth has likely been lowered meaningfully from last month's 2.3%. The consensus now anticipates that GDP growth will drop to 1.6% in Q2 and then be followed by an extended period of below-trend GDP growth, averaging just 1.7% over the last three quarters of this year, down from 1.9% expected in last month's survey. Accordingly, unemployment is expected to rise with the unemployment rate increasing to 4.4% by year-end.

For inflation, the consensus had already raised its outlook for Q1 in last month's survey. Moreover, in this month's survey, the consensus raised its outlook markedly for the rest of this year. It now looks for PCE price inflation of 2.8% in Q2, 2.7% on Q3, and 2.6% in Q4 up from 2.6%, 2.5% and 2.5%, respectively, in last month's survey and for inflation to remain above the Fed's 2% target over the entire six-quarter forecast period.

Sticky interest rates. With inflation sticky and expected to be boosted further by tariff increases, the BCFF consensus continues to look for a more cautious and patient Fed on interest rates. Only two respondents expect a cut in the fed funds rate (FFR) at the May FOMC meeting while 41% expect the next cut in June with 51% not looking for the next cut to occur until later than June. There is a unanimous view that the next cut will be only 25bps. The consensus expects 49bps of cuts in the FFR in 2025, about the same as it expected last month.

Shorter-term market interest rates were little changed in March, reflecting the Fed having refrained from changing the FFR at both its late January and mid-March FOMC meetings. Going forward, the BCFF consensus looks for shorter-term rates to continue to follow the Fed. For example, it looks for roughly 45bps of decline in the 3-month Treasury bill rate from current levels over the rest of this year.

Sandy Batten (Haver Analytics, New York, NY)

Forecasts of panel members are on pages 10 and 11. Definitions of variables are as follows: [1]Monetary policy rates. [2]Government bonds are yields to maturity. [3]Foreign exchange rate forecasts for U.K., Australia and the Euro are U.S. dollars per currency unit. For the U.S dollar, forecasts are of the U.S. Federal Reserve Board's AFE Dollar Index.

International. In recent weeks, financial markets have been gripped by rising uncertainty over US trade policy, slowing domestic growth, and broader global concerns. The Trump administration's latest round of tariffs has injected fresh volatility, as investors weigh their inflation impact against the potential impact on supply chains. Geopolitical tensions in the Middle East have also intensified. The ceasefire agreed to in January between Israel and Hamas has collapsed, with renewed Israeli airstrikes and escalating violence ending the fragile truce. In the meantime, momentum around a possible ceasefire in Ukraine has picked up, but doubts persist over the durability of any agreement.

In response to a more protectionist US trade policy and lingering geopolitical tensions, Europe—led by Germany—is potentially ramping up fiscal support, both to boost infrastructure investment as well as to increase defense spending. At the same time, China has also instigated a looser fiscal policy with some targeted stimulus measures designed to shore up its economy. This combination of US trade disruption, geopolitical shifts and fiscal intervention from Europe and China have led to a broader recalibration in financial markets with US equity markets underperforming global peers, global (ex US) bond yields shifting higher, and the US dollar softening, albeit modestly, as relative growth and interest rate expectations converged.

Latest data have reinforced this reassessment of relative growth prospects. In the US, recent economic indicators have been disappointing, with softer-than-expected retail sales and weakening consumer confidence signaling that economic momentum may be fading. In stark contrast, activity in the euro area has shown some signs of improvement, with stronger-than-expected regional industrial production figures and a recovery in business sentiment, suggesting that the worst of the region's slowdown may be behind it. In the meantime, China's economy has exhibited signs of stabilization, with a recent pick up in export activity helping to counterbalance lingering property sector woes. Although concerns over deflation persist, consumer spending and investment spending have also shown some signs of recovery.

Against this backdrop, and notwithstanding signs of improvement in Europe and China, our panelists are stressing the downside risks to the global economic outlook. More specifically, in response to a special question, 69% of our panelists suggested there were moderate downside risks to their forecasts over the next 12-24 months, while 31% suggested there were significant downside risks.

To counter these headwinds, several major central banks eased policy in recent weeks. The ECB and BoC, for instance, cut policy rates by 25bps in mid-March, following similar moves from the BoE and, for the first time this cycle, the RBA in February. As these decisions were widely anticipated, most panelists left their policy rate forecasts broadly unchanged this month. Further modest cuts are still expected.

Our panelists have, however, revised up their outlook for European bond yields, likely reflecting the fiscal policy activism discussed earlier. For instance, Germany's 10-year bund yield is now projected to reach 2.86% in 12 months, up from 2.53% in last month's survey, and compared with a current level of around 2.67%. In contrast, expectations for 10-year US Treasury yields have changed far less, implying a greater narrowing of interest rate differentials between the US and Europe in coming months relative to previous projections. This shift has also influenced our panelists' exchange rate forecasts, with a slightly larger projected weakening of the US dollar versus last month.

A similar pattern emerges in our panelists' views on Japan, though for somewhat different reasons. Here, the narrative is focused more on rising inflation concerns and a slightly greater willingness by the Bank of Japan to begin normalizing its still-accommodative monetary policy. Panelists now expect nearly 50bps of rate hikes over the next 12 months, with more than half anticipating some tightening as early as June. This outlook, alongside firming inflation expectations, has translated into higher forecasts for JGB yields, and, via narrowing interest differentials, a stronger forecast for the yen versus the US dollar.

Second Quarter 2025

March FOMC Meeting: Watch And Wait . . . At Least For Now

› The FOMC made no change to the Fed funds rate target range, leaving the mid-point of the target range at 4.375 percent
› The updated dot plot implies fifty basis points of funds rate cuts by year-end 2025, matching the December edition

As was widely expected, the FOMC made no changes to the Fed funds rate target range at this week's meeting, leaving the mid-point of the target range at 4.375 percent. The main questions around this week's meeting centered on the updated Summary of Economic Projections (SEP). Specifically, whether, or to what extent, the revised projections would show slower real GDP growth, a higher unemployment rate, and higher inflation in Q4 2025 relative to the SEP issued in December, and whether the updated dot plot would deviate from the two twenty-five basis point funds rate cuts by year-end 2025 implied in the December edition. While the updated SEP did indeed downgrade the growth outlook and up the inflation forecast, the updated dot plot again implies two funds rate cuts by year-end 2025 while the median year-end dots for 2026 and 2027 are also unchanged from the December edition. The Committee expressed greater uncertainty around the path of the labor market and the broader economy and seem to have gone into "watch and wait" mode as they, like the rest of us, await clarity on the policy front in terms of trade, fiscal, regulatory, and immigration policy. The FOMC did vote to slow the pace at which the Federal Reserve's balance sheet is being run down, which they had telegraphed in advance of today's meeting. The vote to keep the Fed funds rate target range unchanged was unanimous, but Governor Waller opposed slowing the pace of balance sheet run-off.

Interestingly, the post-meeting policy statement again characterizes economic activity as expanding at "a solid pace" despite what seem clear signs of a slowing pace of activity. Along those same lines, labor market conditions are again characterized as "solid" despite a steadily slowing trend rate of job growth, suggesting that the unemployment rate remains the main labor market indicator members are watching even as what should be a much slower pace of labor supply growth this year will blunt upward pressure on the unemployment rate as job growth slows further. The statement did note that "uncertainty around the economic outlook has increased" while dropping the passage noting that the risks to the dual mandate of price stability and full employment are roughly in balance.

The updated SEP show real GDP growth of 1.7 percent in 2025, on a Q4/Q4 basis, down from 2.1 percent in the December SEP while showing a slightly higher Q4 2025 unemployment rate – 4.4 percent – than in the December SEP. Most notably, PCE inflation, again on a Q4/Q4 basis, is now expected to run at 2.7 percent for 2025 while core PCE inflation is now expected to run at 2.8 percent, up from 2.5 percent in the December SEP and 2.2 percent in the September SEP. Though acknowledging that higher tariffs may, over the course of 2025, delay further progress on pushing inflation back to the FOMC's 2.0 percent target rate, Chair Powell noted in his post-meeting press conference that while the Committee's base case is that higher tariffs will not lead to sustained inflation pressures, it is simply too soon to know and that "we are going to have to see how things actually work out."

At the same time they downgraded their growth forecasts, Committee members significantly changed their assessments of risks to those forecasts. Eighteen of the nineteen Committee members see the risks to their GDP forecast as being weighted to the downside, up from five who did so in December and the most in the history of the SEP (which go back to 2012). At the same time, seventeen members assessed the risks to their unemployment rate forecast as being weighted to the upside, up from the seven who did so in December. Risks to the inflation forecasts were again heavily weighted to the upside, with eighteen members making that assessment for both total and core PCE inflation.

The changes to the growth and inflation forecasts reflect a FOMC left somewhat in a bind by a volatile and uncertain policy landscape. In that sense, it is fitting that the updated dot plot conveys no change in how members see the appropriate path of the funds rate. That said, the dispersion of the dots is more hawkish than in the December edition. Chair Powell stressed that the Committee need not be in a hurry to adjust their policy stance, particularly as the hard data remain "solid." Chair Powell did acknowledge the deterioration in survey (sentiment) data, but also noted that survey data are not always a good barometer of how the hard data will evolve. As long as the Committee consider the labor market and the broader economy to be on solid ground, they have time to wait for clarity on the policy front. Chair Powell's post-meeting press conference made it clear that they intend to make full use of that time.

February Personal Income/Spending: Services Spending Softens

› Personal income rose by 0.8 percent in February, personal spending rose by 0.4 percent, and the saving rate rose to 4.6 percent
› The PCE Deflator rose by 0.3 percent and the core PCE Deflator rose by 0.4 percent in February; on an over-the-year basis, the PCE Deflator is up 2.5 percent and the core PCE Deflator is up 2.8 percent

Total personal income rose by 0.8 percent in February, blowing past what we and the consensus expected, while total personal spending rose by 0.4 percent, right between what we (0.3 percent) and the consensus (0.5 percent) expected. With income growth easily outpacing spending growth, the personal saving rate rose to 4.6 percent from 4.3 percent in January though, as we'll explain below, there is less to the reported saving rate than meets the eye. The PCE Deflator, the FOMC's preferred gauge of price changes, rose by 0.3 percent in February, in line with expectations, while the core PCE Deflator rose by 0.4 percent, matching our above-consensus forecast. As of February, the total PCE Deflator is up 2.5 percent year-on-year and the core PCE

Viewpoints:

A Sampling of Views on the Economy, Financial Markets and Government Policy
Excerpted from Recent Reports Issued by our Blue Chip Panel Members and Others

Deflator is up 2.8 percent. Adjusting for price changes, total consumer spending was up 0.1 percent in February, retracing very little of the ground lost in January, when real spending fell by 0.6 percent. Barring a March binge of epic proportions, this leaves real consumer spending on course to at best post a negligible gain in Q1, which will act as a powerful drag on Q1 real GDP growth. As for the jump in the core PCE Deflator, many fear that is but a preview of what lies ahead as higher tariffs go into place and in turn unleash renewed upward pressure on goods prices, even if the extent to which either of those will actu ally occur is hard to get a grip on at present.

Our miss on our forecast of income growth owes mainly to a significantly larger increase in transfer payments than we anticipated. On the heels of January's 1.8 percent advance, total transfer payments rose by another 2.2 percent in February. February's increase in transfer payments in part reflects another round of sizable increases in Medicare and Medicaid outlays and in part, according to BEA, reflects payments of settlements of liability claims filed against a domestic medical device manufacturer and a social media company. A point we commonly make is that while transfer payments are included in personal income, a sizable portion of transfer payments do not reflect cash payments to consumers but instead, as in the cases of Medicare and Medicaid, reflect payments to providers of services made on behalf of consumers. As such, the measured personal saving rate can be skewed by sizable increases in non-cash transfer payments. This also goes to why we consider after-tax personal income excluding transfer payments as the more meaningful guide as to the funds available to consumers for consumption and debt service. To that point, after-tax personal income excluding transfer payments rose by 0.5 percent in February, leaving it up 3.3 percent year-on-year. Aggregate private sector wage and salary earnings, the largest single component of personal income were up by 0.5 percent in February, while rental income rose by 0.9 percent and asset-based income rose by 0.4 percent, a stronger gain than we anticipated which also helps account for our miss on growth in total personal income.

As we anticipated, services spending was notably soft in February, up by just 0.2 percent, which is the smallest monthly increase since last August. At the same time, spending on goods rose by 0.9 percent, slightly ahead of our forecast, which accounts for our forecast miss on the spending side of the ledger. We anticipated a marked slowdown in discretionary services spending, which proved to be the case, with our proxy for such spending up by just 0.2 percent and down after adjusting for price changes. After surging in December and January, utilities outlays fell in February, which acted as a drag on overall services spending. Spending on consumer durable goods was notably strong in February, with sizable increases in categories such as motor vehicles, furniture, and appliances, gains which in part could reflect consumers pulling purchases forward to avoid tariff-related price increases down the line.

Though down considerably from its peak, core inflation is proving to be frustratingly persistent. Moreover, many are concerned that higher tariffs will unleash another round of upward pressure on goods prices, pushing overall core inflation higher. Even aside from that, recent months have shown core inflation more or less leveling off, not getting worse but neither getting closer to the FOMC's 2.0 percent target rate. Core services prices excluding housing rose by 0.4 percent in February, though if we are correct in expecting discretionary services spending to slow further, that will take some of the steam out of services prices. Even so, inflation returning to 2.0 percent any time soon seems most unlikely.

February Residential Construction: Evening Out The Score After January's Dip

› Total housing starts rose to an annualized rate of 1.501 million units; total housing permits fell to an annualized rate of 1.456 million units

› Single family starts rose to 1.108 million units and single family permits fell to 992,000 units (seasonally adjusted annualized rates)

› Multi-family starts rose to 393,000 units and multi-family permits fell to 464,000 units (seasonally adjusted annualized rates)

Total housing starts rose to an annual rate of 1.501 million units in February, easily trouncing even the highest forecast, while total housing permits fell to an annual rate of 1.456 million units, stopping short of our forecast. Recall that thanks to atypically harsh winter weather across much of the nation, residential construction activity slowed sharply in January, particularly in the South region. While we anticipated some payback in the February data, we thought that any such payback would be somewhat muted given sagging builder confidence stemming from elevated spec inventories and softening demand. We were wrong on that score, as single family starts bounced more strongly than we anticipated, particularly in the South region. Our premise that the jump in housing starts in February was more payback from weather-related disruptions in January than builders gearing up for the spring sales season would seem to be supported by the permits data, with single family permits basically flat, and by a further deterioration in builder sentiment in February. While the decline in mortgage interest rates over recent weeks has helped draw out what we believe is still a high degree of pent-up demand for home purchases, that doesn't mean builders are suddenly planning to ramp up starts. Spec inventories remain uncomfortably higher for many builders, whose main focus right now is paring those inventories down. If we're correct on this point, the March data will show a slower pace of starts, perhaps dramatically so given how harsh the March seasonal adjustment factors will be.

Richard F. Moody (Regions Financial Corporation)

Special Questions:

1. a. At what FOMC meeting will the next fed funds rate (FFR) cut occur?

May 2025	7%	Jun 2025	41%	Jul 2025	10%	Later	41%

b. How much will the next cut be? 25 bps 100% 50 bps 0%

c. By how much will the FFR target decline in total in 2025? 49 bps

d. What is your estimate of the long-term neutral (nominal) fed funds rate? 3.30%

2. What is the probability of a recession occurring over the next 12 months in:

the US	33%	the euro area	35%	the UK	36%

3. a. What is the probability that US inflation readings turn up meaningfully again over the next 6 months??

Consensus	47%	Top 10	65%	Bot 10	28%	Median	50%

b. Will the expected increase in tariffs provide a significant boost to US inflation?

No meaningful effect on inflation	3%
A one-time increase in prices only	62%
A longer-lasting pickup in inflation as tariffs interact with firm economic growth to stir inflation expectations	34%

4. What is the probability that the US experiences "stagflation-lite" during the next 12 months - that is, an extended period of rising inflation and below-trend GDP growth?

Consensus	48%	Top 10	67%	Bot 10	30%	Median	50%

5. a. What is your estimate of the US unemployment rate in: Dec 2025 4.4% Jun 2026 4.4%

b. What is your estimate of the long-run natural unemployment rate? 4.1%

6. What is your estimate of the US potential GDP growth rate?

Consensus	2.0%	Top 10	2.1%	Bot 10	1.9%	Median	2.0%

7. a. When will the next ECB policy rate cut occur?

Apr 2025	48%	Jun 2025	52%	Jul 2025	0%	Later	0%

b. When will the next BoE Bank rate cut occur?

May 2025	57%	Jun 2025	35%	Aug 2025	9%	Later	0%

c. When will the Bank of Japan next increase its uncollateralized overnight call rate?

Apr 2025	22%	Jun 2025	35%	Jul 2025	17%	Later	26%	The next move is more likely to be a cut	0%

8. Given the current global economic backdrop, how is the evolving geopolitical climate - including US trade policy shifts and ongoing ceasefire negotiations in Ukraine and the Middle East - shaping your economic outlook over the next 12-24 months?

Significant downside risk	31%
Moderate downside risk	69%
Neutral impact	0%
Moderate upside risk	0%
Significant upside risk	0%

Elections Have Consequences

What comes next? After winning the 2008 presidential election, Barack Obama commented that elections have consequences. That will likely be the case for the recent US national election that saw Donald Trump record an unexpectedly large victory in the presidential election, with the Republicans retaining control of the House and retaking control of the Senate, albeit with relatively small majorities. Financial markets are now attempting to figure out what the consequences of this political trifecta will be. On the one hand, it is widely expected that the economy will be boosted by lower taxes, less regulation and re-energized domestic energy markets. Also, there are expectations that the government will be downsized somewhat.

On the other hand, there is more uncertainty surrounding the range of policy changes that will be enacted and the fear that looser fiscal policy in an economy already growing above trend will lead to overheating and a rebound in inflation. Along with that, the prospect of meaningfully higher tariffs raises the specter of global trade conflict accompanied by higher domestic prices. And restraint on immigration could slow labor supply growth, putting upward pressure on wages and potentially on prices.

Financial markets are forward looking. So, they are already attempting to price in what the economic environment might look like in the near future. US equity markets appear to think that the new political environment will be good for businesses and profits. While a little of the initial run-up in equity prices has faded recently, the S&P500 stock price index has risen a little more than 5% since the election. The US dollar has also participated in this surge of optimism with its value against the euro rising about 4% since the election.

Market interest rates have continued to diverge. With the Fed cutting its fed funds rate (FFR) target another 25bps at the November 6-7 FOMC meeting, shorter-term market rates are continuing to follow the FFR lower. Longer-term rates have continued to edge up, likely reflecting an anticipated boost to economic growth from looser fiscal policy ahead and renewed concern over the inflation outlook. Recent inflation readings have been sticky, and market-based five-year inflation expectations have risen about 50bps since mid-September.

While the Blue Chip Financial Forecasts (BCFF) consensus inflation outlook is still relatively benign, it was increased slightly in the most recent survey all across the forecast period. Moreover, the consensus estimates a 36% probability of inflation reaccelerating over the next six months (up from 30% last month) with 63% of respondents saying that this estimate has risen since the election. None of the respondents thought it had declined. Even with higher inflation concerns, the consensus thinks that the rise in longer-term interest rates has about run its course. For example, it anticipates that the yield on the 10-year Treasury note will decline by about 30bps over the six-quarter forecast horizon but will end the period 32bps higher than expected last month.

Fed expected to slow pace of rate cuts. Both financial markets and the BCFF panel (79% of respondents) are expecting that the election results will slow the pace of FFR cuts going forward. FFR-cut expectations had already begun to recede ahead of the election, mostly on sticky inflation news and comments from Fed officials. But the expected slowdown in rate cuts has gained momentum since the election. The FFR futures market is currently pricing in just a 56% chance of a 25bps rate cut at the December FOMC meeting, down from around 80% just a month or so ago.

Not only has the FFR futures market lowered the probability of a near-term rate cut, it has also significantly lowered rate-cut expectations for the coming year. It is now pricing in a 76% chance of one 25bps cut in the first quarter of next year and an 84% chance of just one 25bps cut in the second quarter. For all of 2025, the FFR futures market now expects only 67bps of rate cuts. At the end of October, it had looked for 90bps of cuts in 2025 and at the beginning of October, it had anticipated 140bps of cuts next year.

While the BCFF consensus has also lowered its FFR cut expectations, the reduction has not been as dramatic as that in the FFR futures market. The consensus is still fully expecting a 25bps cut at the December FOMC meeting. For 2025, the BCFF consensus now looks for 103bps of cuts versus 126bps of cuts in the November survey. Some of this decline likely reflects the outcome of the election but a meaningful part also reflects statements made by Fed Chair Powell in the middle of November that pointed to a more patient Fed ahead and were subsequently supported by remarks from other Fed officials.

Long-range outlook. This month's survey also contains the semiannual long-range forecasts—extending out to 2035. The BCFF consensus looks for 2.0% growth in real GDP in 2026-2030 and 1.9% in the 2031-35 period. Each estimate is 0.1%-point lower than the June forecast, but still in line with the CBO estimate of the economy's potential growth rate. However, GDP growth is expected to be much slower than the 2.5% experienced during the five years prior to the pandemic.

On inflation, the consensus expects the Federal Reserve to essentially achieve its 2% target with the PCE price index inflation rate (the measure that the Fed targets) expected to average 2.2% from 2026 to 2030 and to slow to 2.1% over the following five years. The expectation for 2026-2030 is slightly above the June survey (2.1%) while the 2031-2035 estimate is the same. Both are well above the 1.3% that was experienced in the five years prior to the pandemic.

Of particular interest is that even though the economy is expected to grow at around its potential rate and that inflation is expected to stabilize near the Fed's target over the ten years from 2026, these occur at markedly higher expected interest rate levels (both short- and long-term) than in the five years prior to the pandemic. The fed funds rate is expected to average 3.25% over the entire 10-year period compared with 1.10% in the five years before the pandemic. This implies a meaningfully higher neutral FFR and higher real (inflation-adjusted) interest rates over the longer term than experienced in the five years preceding the pandemic.

Sandy Batten (Haver Analytics, New York, NY)

Forecasts for interest rates and the Federal Reserve's Advanced Foreign Economies Index represent averages for the quarter. Forecasts for Real GDP, GDP Price Index, CPI and PCE Price Index are seasonally adjusted annual rates of change (saar). Individual panel members' forecasts are on pages 4 through 9. Historical data: Treasury rates from the Federal Reserve Board's H.15; AAA-AA and A-BBB corporate bond yields from Bank of America-Merrill Lynch and are 15+ years, yield to maturity; State and local bond yields from Bank of America-Merrill Lynch, A-rated, yield to maturity; Mortgage rates from Freddie Mac, 30-year, fixed; SOFR from the New York Fed. All interest rate data are sourced from Haver Analytics. Historical data for Fed's Major Currency Index are from FRSR H.10. Historical data for Real GDP, GDP Price Index and PCE Price Index are from the Bureau of Economic Analysis (BEA). Consumer Price Index history is from the Department of Labor's Bureau of Labor Statistics (BLS).

Forecasts of panel members are on pages 10 and 11. Definitions of variables are as follows: [1]Monetary policy rates. [2]Government bonds are yields to maturity. [3]Foreign exchange rate forecasts for U.K., Australia and the Euro are U.S. dollars per currency unit. For the U.S dollar, forecasts are of the U.S. Federal Reserve Board's AFE Dollar Index.

International. The policy implications of a new US administration have been driving financial market sentiment since the election on November 5. So far, investors have responded with a more optimistic take on the outlook for the US economy but with more pessimistic views about the rest of the world. A potential easing of US fiscal policy (e.g., via tax cuts) has also triggered a re-evaluation of Fed policy, causing US yields and the value of the dollar to climb. The reverberations for the rest of the world could, in part, be felt via a stronger US dollar particularly for those countries that hold sizeable reservoirs of USD-denominated debt. A stronger dollar raises the cost of servicing this debt, straining public and private balance sheets in vulnerable economies. But potential protectionist measures mean that trade channels will also be significant not least for economies with large US exposures and/or those that have been heavily reliant on US import demand to fuel economic growth in recent months.

These broader global concerns have been reflected in our panelists' expectations for the world economy in the year ahead. As a result of the US election outcome, 46% of our panelists have lowered their forecast for global (ex US) growth for 2025 while 32% have left that forecast unchanged. However, 21% of panelists have raised their global (ex US) growth outlook, a likely consequence perhaps of shifts in US economic policy, their potential boost to US economic growth, and some spill-over from firmer US demand into activity elsewhere.

The consensus view regarding the potential benefits for the US economy and potential losses for the rest of the world have found a big echo, so far, in the incoming data. Latest flash PMI survey data for the US, for example, showed that business activity grew at a strong and accelerating pace in November. That contrasted, however, with the message from Europe, where the flash PMIs pointed to a renewed downturn in the euro area and, to a lesser degree, in the UK. Japan's PMI data, in the meantime, additionally revealed that a downturn persisted in November for the second consecutive month, albeit not as marked as recorded in October.

Europe's worsening plight has been exacerbated of late by a number of domestic factors including political gridlock in Germany and France, and an October budget that lifted the tax burden on the UK corporate sector. Implications for monetary policy, however, are ambiguous in light of the ramifications for the Fed and the role of interest rate differentials in driving exchange rates. In response to a special question, most of our panelists, specifically 84%, do not believe that likely US policy changes will slow the pace of policy rate reductions from either the ECB or the BoE in the year ahead. That contrasts with the US where 79% of panelists believe that those policy changes will necessitate a slower pace of policy rate reductions from the Fed. As noted, these views have already found an echo via a strengthening US dollar. But our panelists' forecasts for EUR/USD have additionally seen some big reductions at the 3-, 6- and 12-month ahead horizons.

Similar global dynamics have engulfed the outlook for Japan with our panelists now expecting a weaker JPY in the year ahead compared with November. However, forecasts for the BoJ's policy rate have also been lifted a little. This likely reflects Japan's persistent CPI inflation, especially in services, which is seen as positive for the economic outlook due to its link with domestic wage growth and the sustainability of higher inflation in coming months.

Finally, in China, concerns about the economic outlook have also intensified in financial markets largely thanks to the specific trade policy intentions of a new US administration. President-elect Trump has, for example, suggested raising tariffs on Chinese imports by up to 60%. Beyond the direct damage to China's exports, that could trigger some retaliation and lead to weaker world trade growth and global supply chain disruption. These tariffs align with a broader US policy goal of further decoupling the US from China and curbing its progress in key technologies..

Overseas Consequences of the U.S. Election: How will U.S. trading partners react to trade risks?

In sport, play is limited by time or innings. Lineups are set, rules are fixed and boundaries are defined. Winners are determined objectively. Commerce and politics operate differently. Players come and go, the rules are changeable and the clock never stops. It is much harder to identify victors in these arenas. The lineup in Washington will be changing next year. Other players around the globe will be challenged to adapt their tactics to the new roster, and the new rules they will try to enforce. Following is a look at how selected countries and regions may fare under a second Trump administration.

Europe. The European continent is extremely vulnerable to Trump's agenda, owing to close commercial and national security linkages with the United States. The most immediate economic worry will be tariffs, as the incoming president seeks to close the €155 billion trade deficit with the eurozone; he has threatened a blanket 10% to 20% levy on all imports. Germany, Italy and Ireland are among the most vulnerable due to their high export volumes to America. Germany's struggling auto sector will be top of the list.

The implications for the U.K. economy will also be significant. America is Britain's most important bilateral trade, security and defense partner. Industries like pharmaceuticals, medical goods, automotive and liquor would be particularly exposed to new U.S tariffs. Trump's trade agenda, if implemented to the fullest, will likely deliver a hit of anywhere between 0.6% to 1.1% to real gross domestic product (GDP) across the European continent, according to Goldman Sachs.

The trade deficit is not the only elephant in the room. European nations will come under increased pressure to decouple from China. The incoming president could impose counter-measures against European digital services taxes and states that have implemented the Organization for Economic Co-operation and Development's global minimum tax, as it is seen to disadvantage American corporations.

The President-elect also wants all the European states to meet the defense spending targets required of North Atlantic Treaty Organization (NATO), threatening withdrawal of U.S troops and weapons. Out of the 32 NATO allies, seven European states are unlikely to meet the 2% of GDP spending target in 2024, including Italy and Spain.

Asia Pacific. China is bracing for an unstable and unpredictable path ahead, at a time when its economy is struggling to return to pre-pandemic levels of growth. During Trump's first term in office, goods from China faced tariffs of as much as 25%. Proposed tariffs as high as 60% on Chinese imports, along with more technology controls, would decimate Chinese trade with the U.S. Escalating trade disputes will significantly hurt corporate confidence and capital expenditures. Seven years of trade tensions have allowed mainland businesses to diversify, and America has also reduced its dependence on Chinese products. However, shrinking external and weak domestic demand will further exacerbate deflationary pressures.

The looming trade war could set in motion the steady decline of China's decades-old manufacturing and export growth model. Global supply chains will come under scrutiny as the Trump administration will also likely target Chinese goods being re-routed to the United States through other markets. Beijing could retaliate by targeting U.S. farm products, blacklisting American corporations and restricting access to essential materials like rare earth metals. However, in order to offset tariff costs, Chinese policymakers will have to weaken the renminbi, increase export tax rebates and implement more stimulus. An unprecedented scale of currency depreciation will be required to mitigate the higher levies. According to Morgan Stanley, factoring in tariffs already in place since 2018, the renminbi would need to fall by 50% against the dollar to keep U.S. import prices stable.

The Australian economy will not be immune from repercussions from the U.S. election, as it shares close commercial ties with both China and the United States. About 97% of Australian imports into the U.S. are currently tariff-free, thanks to a free trade deal signed in 2004. Beyond the shock of potential new tariffs, Australia could be collateral damage of a renewed U.S.-China trade war. Weaker demand for Chinese goods would diminish demand for Australian input commodities like iron ore. If all of Trump's policies are implemented, Australia's economic growth would be between 0.8% and 1.5% lower than it would otherwise have been, according to an analysis by KPMG.

North America. Few nations are as closely tied with the U.S. as Canada and Mexico, with supply chains deeply integrated and continental trade flows exceeding a trillion dollars annually. Trump's promise of universal 10% tariffs raises worries across this network.

Canada exports 75% of its goods to the U.S., with energy, autos and other heavy manufacturing industries among the top export products. These industries rely on its southern neighbor for raw inputs and as a market for finished products. Any retaliatory tariffs from Canada are only going to compound the pain of these businesses, in the form of higher input costs. Increased American oil production and weaker demand from China would weigh on the Canadian energy industry.

The Trump administration could spell even bigger trouble for Mexico, not only because of the large trade surplus it runs with the U.S. The President-elect has warned to implement "whatever tariffs are required — 100%, 200%, 1,000%" to prevent imports of Chinese cars via Mexico and a blanket 25% tariff on all Mexican goods due to the flow of migrants through the country.

His administration is also likely to insist on modifications to the United States-Mexico-Canada Agreement, the deal he inked during his first term, when it comes up for review in 2026.

As much as the President-elect would like to believe that the U.S. will emerge a winner from trade disputes, past trade conflicts have not worked to any nation's benefit. Losing the least may have to count as a win.

Vaibhav Tandon (Northern Trust)

Long-Range Survey:

The table below contains the results of our twice-annual long-range CONSENSUS survey. There are also Top 10 and Bottom 10 averages for each variable. Shown are consensus estimates for the years 2026 through 2030 and averages for the five-year periods 2026-2030 and 2031-2035. Apply these projections cautiously. Few if any economic, demographic and political forces can be evaluated accurately over such long time spans.

LEGEND OF SYMBOLS

Legend of symbols This section will identify all symbols used in the tariff to identify changes resulting from the filing of the specific sheet change. The list will include the required symbols and their meanings, and any other utility-specific symbol with its meaning, consistent with the requirements identified in WAC 480-80.

(a) Locate the symbols on the right hand side of the changed text directly across from the change;

(b) Must use the following list of symbols to signify change:

(c) May use additional symbols for other purposes when it has identified the symbols in its tariff as provided for in WAC 480-80.

Tariff symbols Each time a tariff sheet(s) is revised, a utility must code all changes with the tariff symbol that best reflects the purpose and effect of the change.

D – discontinued rate, service, regulation, or condition;

N – new rate, service, regulation, condition, or sheet;

I – a rate increase;

R – a rate reduction;

C – changed condition or regulation;

K – that material has been transferred **to** another sheet in the tariff. (A footnote is required on the tariff sheet to identify the material's new sheet number);

M – that material has been transferred **from** another sheet in the tariff. (A footnote is required on the tariff sheet to identify the material's former sheet number);

T – a change in text for clarification;

O – no change. (This symbol is discretionary unless specifically requested by the commission).

WATER SERVICE
RULES AND REGULATIONS

Rule 1 – Adoption of Rules of Regulatory Authorities

The rules pertaining to water service prescribed by the Washington Utilities and Transportation Commission (Commission) described in Revised Code of Washington (RCW) Title 80 and Washington Administrative Code (WAC) Title 480 are thereby adopted and made a part of this tariff. See generally and without limitation, Chapter 80.28 RCW and Chapter 480-110 WAC.

Rule 2 – Schedules and Conditions

The schedules and conditions specified in this tariff for water service are subject to change according to the public service laws of the State of Washington. The amount of water furnished is subject to the Washington State Department of Health (DOH) required standards of quantity and quality. The water resources and water rights are subject to the Washington State Department of Ecology (DOE) required standards of issued permits and certificates for ground water withdrawal. All schedules for water service apply to customers receiving water service from the Utility.

Rule 3 – Application and Agreement for Service

Each prospective customer desiring water service is required to sign the Utility's standard form of application before service is supplied. *The application shall state fully and truly all the purposes for which water may be required. The application is contingent upon approval by the Utility.*

An application for service is notice that the prospective customer desires water service from the Utility and represents agreement to comply with the Utility's rules and regulations on file with the Commission and in effect at the time service is furnished. In the absence of a signed application for water service, the delivery of water by the Utility through a standard connection and the taking thereof by the customer will constitute an agreement by and between the Utility and the customer for the delivery and acceptance of service under the applicable rate schedule(s) and these rules and regulations. For new customers, a survey will be required as part of the application prior to accepting the applicant as a customer.
See WAC 480-110-325.

Original Sheet No. 5
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 4 – Definition of Service

Service will be supplied as described in these rules and under the applicable rate schedule(s). Service will be supplied only to those who secure their source of water exclusively from the Utility, unless otherwise provided under written contract. Water service will be used only for the purpose specified in the service agreement and applicable rate schedule(s). A customer will not sell or permit others to use such service, unless authorized to do so under written contract with the Utility.

The customer will not increase demand or use of service as stated in the application for service without giving prior notice of such increase and receiving approval from the Utility. In the event of such increase, the customer is required to pay the Utility's regularly published rates for the increased service from the date of connection and use of the service.

Whenever the customer wants to permanently discontinue the use of water through any fixtures mentioned in the original application, the customer must cause the fixture to be removed and the branch pipe or service supplying the same to be capped or plugged, and must notify the Utility in writing before any reduction in charge will be made. See WAC 480-110-365.

Rule 5 – Disconnection Visit Charge

When a Utility employee is dispatched to disconnect service, that employee must accept payment of a delinquent account and disconnect visit charge if specified in **Schedule X**. If amount owing is tendered in cash, Utility employee will not be required to dispense change for excess of the amount due and owing. Any excess payment will be credited to the customer's account. The Utility will restore service when the cause of discontinuance has been removed and payments of all proper charges due from the customer have been made.

Rule 6 – Reconnection Visit Charge

A reconnection visit charge, as specified in **Schedule X,** will apply for reconnection of the customer's service to the Utility's distribution system. Such charge applies where service has been discontinued: (i) for non-payment; (ii) at the request of the customer; (iii) for cross connection control (no proof of backflow assembly; (iv) for backflow assembly testing (annual testing report is not provided); (v) refusal to make proper repairs; or (vi) similar cause. No charge will be made for reconnection of service if the shut-off was made for the convenience of the Utility.

Original Sheet No. 6
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 7 - Installation of Service Pipes and Meters

The Utility will construct service connections of a proper size from its distribution mains to the customer's property. The Utility reserves the right to refuse to construct a service connection to any property if the applicant's pipes are not properly constructed and protected.

'Utility Meter Installation' – The Utility may meter any flat rate service at its discretion. The Utility's metered service rates will become effective after the customer has received thirty (30) days' written notice. All meters so placed will be installed and maintained by the Utility without direct retrofit cost to the customer.

See, WAC 480-110-415 and WAC 480-110-445.

Rule 8 – Distribution Main Extension

'Utility Allowance' – Where elevation and construction conditions allow and one or more bona fide prospective permanent customer(s) request a main extension, the Utility will construct and pay for the same, if the Utility has sufficient capacity available to meet DOH standards of quantity and quality.

'Customer Prorate Share' – The cost of main extension in excess of the estimated customer(s) revenue for three (3) years (Utility allowance) must be paid by the prospective customer(s) in advance.

'Construction Contract' – No main extension will be considered as coming under this rule where the total cost of the main extension is greater than the estimated customer(s) revenue for six (6) years. Water main extensions and/or fire hydrants will be installed after contracts have been approved by the Commission pursuant to WAC's for special contracts for water utilities and distribution extensions.

See, WAC 480-110-435.

Rule 9 – Responsibility for, and Maintenance of, Services

'Point of Delivery' – The point at which water will be delivered to and received by the customer will be on the property line of the customer's property at a point designated by the Utility.

The Utility will install its meter or other connection device at the Point of Delivery, except, at its option, the Utility may install its meter at some other agreed upon point on the property of the customer, provided that in such event the property line will nevertheless be deemed the Point of Delivery.

Original Sheet No. 7
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 9 – Responsibility for, and Maintenance of, Services (cont'd)
The customer will assume all responsibility after Point of Delivery for water supplied by the Utility. The Utility will be exempt from all liability for loss or damage caused by leakage or escape of water furnished by the Utility after water has passed the Point of Delivery. If the customer has an Approved Backflow Prevention Assembly installed, the assembly must be tested annually by a certified Backflow Assembly Tester specialist.

All service pipes and fixtures on the customer's side of the Point of Delivery shall be provided and must be maintained and protected from freezing at the customer's expense. Where there are leaking or defective pipes or fixtures, the water may be turned off at the option of the Utility until the leaking or defective pipes or fixtures are properly repaired. The Utility may require any service to be equipped with freeze prevention devices to be used during cold weather conditions instead of permitting water to run continuously from faucets. See, WAC-480-110-445.

Rule 10 – Access to Premises
The Utility's regularly authorized agents or employees will have access to the premises of the customer at reasonable hours for meter reading, maintenance, testing, inspection, installation, connection, disconnection, repair or removal of the Utility's property. See, WAC 480-110-305.

Rule 11
Reserved

Rule 12 – Interruption to Service
The Utility will make a diligent effort to render uninterrupted service and supply of water. In cases where shut-off is necessary for repair, reconstruction, damage prevention or similar cause, the Utility will give advance notice to its customers of such scheduled shut-off. However, the Utility will not be responsible for any damage that may result from any cessation of services such as above outlined, nor for failure to give notice of shut-off when circumstances are such that it is impossible to give notice as stated above. See, WAC 480-110-365.

Rule 13 – Bills
All bills shall be paid monthly in arrears and are due and payable upon receipt and are considered delinquent no less than fifteen (15) days after the date mailed. Bills will be deemed received upon personal delivery to the customer or three (3) days following the deposit of the bill in the United States mail to the customer's last known address. Where the meter has not been read, a minimum bill will be rendered and adjusted when the next succeeding meter reading is available.

Original Sheet No. 8
WN U-3

Washington Water Service Company For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 13 – Bills (cont'd)
A customer may elect to receive an electronic billing in lieu of a paper bill that is mailed to the customer. If the customer makes this election, all bills shall be due and payable upon receipt and are considered delinquent no less than fifteen (15) days from the date of electronic mail. Bills will be deemed received upon sending of the electronic mail. In order to elect electronic billing, the customer must have enrolled in the Utility's auto-pay service. See, WAC 480-110-375.

Rule 14
Reserved

Rule 15 – Deposits
The Utility may require a deposit in situations when a customer is unable to establish or maintain credit with the Utility, or where a customer's service has been disconnected for nonpayment of amounts owed to the Utility as defined by Commission rules. The deposit will not be more than an average two-twelfths (2/12) of estimated annual billing (for customers billed monthly).

When the Utility collects customer deposits, interest must be paid for each calendar year, at the rate for the one-year Treasury Constant Maturity calculated by the U.S. Treasury and published in the Federal Reserve's Statistical Release H.15 on January 15 of that year. Interest is computed from the date of deposit to the date of refund or when applied directly to the customer's account.

The Utility must refund deposits plus accrued interest when there has been satisfactory payment, as defined by Commission rules or upon termination of service, less any amounts due to the Utility by the customer. In addition, the Utility will comply with all provisions of the Commission's deposit rules pursuant to WACs for establishing credit and deposits for water utilities. See, WAC 480-110-335.

Rule 16 – Responsibility for Delinquent Accounts
The Utility will not refuse or discontinue service to an applicant or customer who is not in arrears to the Utility even though there are unpaid charges due from the premises occupied by the applicant or a customer, due to the unpaid bill of a prior tenant unless there is evidence of intent to defraud.

The Utility may not permanently deny service to an applicant because of a prior obligation to the Utility. See, WAC 480-110-345.

Original Sheet No. 9
WN U-3

Washington Water Service Company For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 17 – Discontinuance of Service

The Utility reserves the right to discontinue service to its customers for:

1. Unpaid bills, as provided for in this tariff.
2. Water uses for purposes or properties other than those specified in the customer's application for service.
3. Willful waste of water through improper or defective piping, equipment, or otherwise.
4. Piping or equipment that does not meet the Utility's standards or fails to comply with other applicable codes and regulations.
5. Tampering with the Utility's property.
6. Vacating the premises.
7. Nonpayment of any proper charges, including deposit, as provided in this tariff.
8. Refusing to allow access as required in Commission rules.
9. Violating rules, service agreements, or effective tariffs, including violation of outdoor watering instructions given to customers in order to curtail water use during time of shortage.
10. Use of equipment that detrimentally affects the Utility's service to its other customers.
11. Service obtained by fraud.
12. Failure to comply with cross connection control requirements.

The right to discontinue service may be exercised whenever and as often as any of the foregoing situations occur, and neither delay nor omission by the Utility to enforce this rule any time will be deemed a waiver of its right to discontinue service.

The Utility shall not be liable for loss, damage, or claims that arise from or relate to the discontinuance of service as a result of any of the foregoing reasons described in the rule.

WN U-3

Washington Water Service Company | For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 17 – Discontinuance of Service (cont'd)
Discontinuance of service by a customer - Customer shall be required to give 24 hour notice to the Utility of their intention to discontinue service.

Required notice prior to disconnecting service: The Utility must serve a written disconnection notice on the customer, either by mail, or, at the Utility's option, by personal delivery of the notice to the customer's address, attached to the primary door.

A minimum of eight (8) business days' written notice will be given a customer before service is discontinued, except in the case of danger to life or property. Before disconnecting service, the Utility must in addition to the first (1st) notice as described above, provide a second (2nd) notice by one of the two options listed below.

a. Delivered notice - The Utility must deliver a second (2nd) notice to the customer and attach it to the customer's primary door. The notice must contain a deadline for compliance that is no less then twenty-four (24) hours after the of delivery that allows the customer until 5:00 p.m. of the following day to comply, or

b. Mailed notice - The Utility must mail a second (2nd) notice, which must include a deadline for compliance that is no less than three (3) business days after the date of mailing if mailed from within the state of Washington.

Disconnection notice will expire after ten (10) business days from the first day that the Utility may disconnect service, unless other mutually agreed upon arrangements have been made and confirmed in writing by the Utility. If mutually accepted arrangements are not kept, the Utility may disconnect service without further notice.

In addition to the foregoing, if a customer presents compelling evidence of financial difficulties acceptable to the Utility, in lieu of disconnection, the Utility will install a flow restrictor at the customer's agreement to such installation. The flow restrictor will be in place for a maximum of ninety (90) days to allow the customer the opportunity to bring the bill current. During that ninety (90) day period of time, the customer will be charged only the base rate as set out in **Schedule 2 or Schedule 2.1**. If the customer is not able to bring the bill current during that ninety (90) day period of time, then the Utility may initiate discontinuance of service pursuant to this rule and Commission rules. This opportunity will be offered to a customer no more than once each calendar year. See, WAC 480-110-355.

First Revised Sheet No. 10.1
Cancelling
Substitute Original Sheet No. 10.1
WN U-3

Washington Water Service Company For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 17 – Discontinuance of Service (cont'd)

a. In accordance with Engrossed Substitute House Bill 1329 (ESHB 1329), Utility will not disconnect any residential customer (including residents of metered apartment buildings and mobile homes) for nonpayment when the National Weather Service has issued, or has announced it intends to issue a heat-related alert such as an excessive heat warning, a heat advisory, an excessive heat watch, or similar alert (all of which is as "alert") for the area in which the residential user's address is located for the duration of the alert. (T)

b. In the event the National Weather Service (NWS) issues or intends to issue a heat-related alert in the customer's area, and their water service has been disconnected due to non-payment, the customer may request reconnection by contacting the Utility at 253-851-4060. Upon receipt of such a request, the Utility will promptly make a reasonable attempt to restore the customer's water service and water service will remain active for the duration of the heat-related alert. (N) (N)

Original Sheet No. 11
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 18 – Sprinkling and Irrigation

Water used for sprinkling and irrigation must be paid for at the regular prescribed tariff rates for such service. The hours for such use will be as prescribed from time to time by the Utility. During peak use months (June through September), and at such other times when demand may be high, the Utility may prohibit or limit sprinkling and irrigation to preserve water for domestic consumption.

No person will use water for sprinkling or irrigation purposes during any fire in the area, and all sprinkling or irrigation must be stopped immediately when a fire alarm is sounded. Water use may resume three (3) hours after the fire has been extinguished.

Rule 19 – Rates

Rates for water service and supply are those published in the Utility's tariff on file with the Commission. Unless otherwise stated in this tariff, the rates apply to a single service, to one customer at one premise. Water service must be subscribed to on an annual basis. No proration or reduction in billing is allowed unless this tariff prescribes temporary or seasonal rates.

When conditions require that two or more consumers with separate housekeeping establishments occupy the same or separate dwellings (Accessory Dwelling Units) be supplied through a *non-metered service*, the consumers using water through a single connection are considered a single customer and will be charged the base charge as provided by the schedule of rates.

When conditions require that two or more consumers with separate housekeeping establishments occupy the same or separate dwellings (Accessory Dwelling Units) be supplied through *one metered service*, consumers using water will be considered a single customer and will be charged the base charge as provided by the schedule of rates for the size of meter installed. If the consumption as shown by the meter exceeds the allowance or usage blocks for the size of the meter, the excess consumption charge will be computed at the regular rates for one customer for the size of meter installed.
See, RCW 80.28.050, RCW 80.28.080, WAC 480-110-431, WAC 480-110-433.

Original Sheet No. 12
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 20 – Account Set-Up Charge

An account set-up charge as specified in **Schedule X** will be made for each new account or change of account responsibility on an existing service. Such charge will be included in the initial billing to the customer. This charge includes the Utility dispatching an employee to establish a base meter reading. An account set-up charge does not apply to installation of a new meter.

Rule 21 – Non-Sufficient Funds (NSF) Charge

An NSF check charge as specified in **Schedule X** will be made for handling customer checks that have been returned by the bank as NSF or account closed. This charge will be applied to the next billing to the customer.

Rule 22 - Water Availability Analysis Charge

Any prospective customer seeking a water availability letter (sometimes called Lender Letter) or certificate of water availability from the Utility must first pay the appropriate charge as specified in **Schedule X**. A Lender Letter simply states a prospective customer's property is within the Utility's service area and that the Utility can potentially provide water service to the property. The Utility is not required to provide service to applicants requesting a Lender Letter, nor are applicants required to receive service.

If a customer needs a more detailed analysis and cost projection as to what it would take to provide service to their property or project, they must pay the Water Availability Analysis Charge as specified in **Schedule X**. If the applicant's property consists of ≤ 2 Equivalent Residential Units (ERUs), the ≤ 2 ERUs charge applies; if the applicant's property consists of ≥ 3 ERUs, the ≥ 3 ERUs charge applies. An ERU is defined using the definition provided in DOH Publication 331-441. A letter and cost projection will be provided to the applicant outlining the costs and process for moving forward to obtain water service. If a contract to provide service is not entered into by both the applicant and the Utility, the cost projection expires in 30 days. Once a contractual agreement is made, and the applicant meets the requirements of that agreement, the Utility is obligated to provide service. Once the physical infrastructure has been installed to provide service to the property or project, the applicant is required to receive service, either as a ready-to-serve or active customer.

Original Sheet No. 13
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 23 – Cross Connection Control

The Utility's Cross Connection Control Program is designed to meet the requirements of WAC 246-290-490. The Cross Connection Control Program is a tool used for the protection of public health.

The program requires a cross connection control survey to be sent to customers no less often than every three years. The survey must be returned within 60 days. If the customer does not return the survey within 60 days, a second survey will be sent. If a completed survey is still not received within the following 30 days, the Utility will assume that a potential cross connection exists and the customer will be notified that an assembly is required for premise isolation.

Applicants for new service must complete a cross connection control survey as part of the application for service.

The surveys are reviewed by the Utility's Certified Cross Connection Control Specialist (CCS), or designated responsible person, to determine if a cross connection hazard exists and if so, the degree of health hazard that the existing or proposed cross connection presents. Each service identified as a health hazard and not installed with a backflow prevention assembly will receive a *Notice to Install a Backflow Assembly* indicating the need for a backflow assembly and the type of backflow assembly required to be installed. The customer will be given 90 days from the date of the *Notice to Install a Backflow Assembly* to have an approved assembly installed. Installation will be at the customer's expense.

If proof of installation is not received within 90 days from the date of the *Notice to Install a Backflow Assembly* the customer will be sent a *Disconnection Notice* indicating that water service will be disconnected 45 days from the date of the notice if the Utility does not receive proof that a backflow assembly has been installed. Water service will be reconnected when the Utility confirms a backflow assembly is installed. If service is disconnected, the Utility will charge the customer its current Reconnection Charge, listed on **Schedule X** of this Tariff.

Original Sheet No. 14
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 24 – Backflow Assembly Testing and Inspection

If the customer has an Approved Backflow Prevention Assembly installed the assembly must be tested annually by a certified Backflow Assembly Tester (BAT) specialist. The Utility will maintain a list of certified BAT specialists that are acceptable to the Utility and the customer may choose from any such BAT specialist on the Utility's list or the residential customer may elect the Utility to provide this service and charge the customer its current annual Backflow Assembly Testing & Report Fee listed on **Schedule X**. The Utility service for annual backflow assembly testing shall be subscribed to on an annual basis and is not subject to cancellation or reduction for partial periods.

The customer will provide a copy of the acceptable annual report from the BAT specialist. If the annual report is not provided within thirty (30) days of the anniversary date of the installation of the Approved Backflow Prevention Assembly, then the Utility will provide a notice of disconnection pursuant to WAC's for discontinuing of service for water utilities. If a copy of the annual report is not received by the date for disconnection as specified in the notice, the Utility will disconnect the customer's service as specified in **Rule 17** of this tariff.

If service is disconnected, the Utility will charge the customer its current Reconnection Visit Charge as specified in **Schedule X** of this tariff.

Original Sheet No. 15
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 25 – Limitations of Liability

The Utility's liability, if any, for its gross negligence, willful misconduct or violation of RCW Chapter 19.122 is not limited by this tariff. With respect to any other claim or suit, by a customer or by any other party, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, the Utility's liability, if any shall not exceed an amount equal to the proportionate part of the monthly recurring charge for the service for the period during which the service was affected.

THERE SHALL BE NO LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES. THE UTILITY EXPRESSLY DISCLAIMS ALL WARRANTIES, STATED OR IMPLIED, EXCEPT THOSE SPECIFICALLY SET FORTH IN THIS TARIFF, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The charge for services rendered under this tariff are expressly based on the limitations of damages and disclaimer of warranties set forth above.

Rule 26 – Unauthorized Use of Service

Where service has been disconnected either through the request of the customer or through action of the Utility, and the service – which includes, but is not limited to, the saddle, curb stop, piping, meter setter, angle stop, check valve, meter – has been locked, authorized service cannot be restored without the Utility first reinitiating service.

In addition, the Utility will charge the customer receiving unauthorized service the tariff rate for all service that the Utility estimates was taken plus all of the Utility's costs resulting from the unauthorized use and all applicable fees for discontinuing of service.

WATER SERVICE
RULES AND REGULATIONS

Rule 27 – Damage and Repairs Charge

The Utility shall be responsible for maintaining meter boxes and their contents, along with fire hydrants and services on the street side of the Point of Delivery. However, if a customer or the customer's contractor, invitee or agent causes damage to the meter box, fire hydrant, pipes, mains or other equipment of the Utility's infrastructure, the customer will be responsible for paying for the damage and repairs at time and materials basis.

Rule 28 – Water Leak Procedures

When the Utility determines that a leak has occurred on the customer's property, the Utility will adjust the customer's bill; after the customer submits a bill from a plumber or other evidence that the leak has been repaired, the Utility must re-calculate the customer's bill for the *'relevant time period'*. The *'relevant time period'* for this adjustment will not exceed two (2) months for any given leak. The customer's bill will be adjusted by:

- Estimating the customer's *'projected normal usage'* during the relevant period(s) and billing this amount according to the usage rate shown on **Schedule 2 or Schedule 2.1**.
- Billing the *'excess usage'* during the relevant period using 50% the usage rate(s) shown on **Schedule 2 or Schedule 2.1**.
- Crediting the difference between the original bill for the relevant period and the sum of the bills described in Steps 1 and 2.

'Projected Normal Usage' – as an estimate of what the customer's water consumption would have been had there been no leak. This estimate will be based on the same period from the prior year.

'Excess Usage' – as the actual metered usage minus the projected normal usage.

Note: The credit described in this Rule is available to a customer only once every twenty-four calendar months.

Original Sheet No. 17
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 29 - Meter Accuracy Testing

The Utility will perform a meter accuracy test and share the results with the customer when requested. The test will be at no charge to the customer, except when multiple tests are requested by the customer within a twelve-month period. After the first test, additional tests in a twelve month period shall be billed to a customer at a time and material basis. See, WAC 480-110-405.

Rule 30 - Compound Meter Procedures

'Compound Meter' – is a combination of a large meter and a small meter, with a special change-over valve to accurately measure an extremely broad range of flow rates.
When the Utility determines that a compound meter is needed to accurately measure flow rates, then a compound meter is billed as a single customer; this is done by applying the larger meter size to determine the monthly metered rate service per **Schedule 2 or Schedule 2.1** for base rate and usage blocks; the total billed usage amount is determined by combining the usage of both the large and small meters.

Rule 31 - Landlord Reversion Agreement

The Utility will automatically revert accounts into the landlord's name and responsibility, when tenants move out if the Landlord Reversion Authorization has been submitted to the Utility. The form is available for download at the Utility's website or a hard copy can be requested by the landlord. Reversion will remain on file with the Utility and can only be canceled with a 30-day written notification.

WATER SERVICE
RULES AND REGULATIONS

Rule 32 - Water Use Efficiency

Water Use Efficiency rules require that water systems demonstrate good stewardship and efficient use of Washington State's water resources. To do so, each water system is required to set goals for reducing water loss and for effecting sustained reductions in customer consumption through conservation. Water systems are required to report their progress toward meeting these goals annually. Water systems report calendar year performance to the Washington State Department of Health, Office of Drinking Water, on or before July 1st of each year. These reports are accessible and available to the public at the Office of Drinking Water web site at http://www.doh.wa.gov/ehp/dw. Summary reporting is also provided by the Utility at http://www.wawater.com.

Washington Water Service Company has established and currently strives to achieve three goals for all of the Group A water systems (i.e., those serving 15 or more residences or routinely serving a population of 25 people or more per day) that it owns, as follows:

Distribution System Leakage Goal

The goal is to have no drinking water system exceed an annual Distribution System Leakage (DSL) rate of 10%.

Supply Side Goal

The companywide goal is to have no drinking water system needing to withdraw or divert from its source more than 0.40 acre-feet per year per residence or Equivalent Residential Unit (ERU) in order to produce and deliver the drinking water required at its customers' meters.

Customer (Demand Side) Conservation Goal

The companywide goal is to have no drinking water system exceed an annual metered customer consumption rate of 0.36 acre-feet per year per ERU. This is the equivalent to an average of approximately 1300 cubic feet per month or 320 gallons per day.

WATER SERVICE
RULES AND REGULATIONS

Rule 33 – Construction Meters

Temporary water service maybe requested for customers engaged in construction and temporary activities within the Utility service area. Note that construction meters may also be referred to as hydrant meters. Monthly quantity rates and service charge listed on **Schedule 2 or Schedule 2.1** will apply to service furnished under this rule. The following conditions apply to this rule:

1. Where it is necessary to obtain a temporary or construction meter, the customer will be required to sign an agreement and deposit $2,400 for a construction meter with a Reduced Pressure (RP) or backflow prevention assembly (BPA).
2. If hardware is lost, stolen, damaged beyond repair, relocated without Utility approval, or not inspected and tested according to requirements set forth by the Department of Health, the customer will forfeit the entire deposit. The deposit less the cost of any repairs other than those due to normal depreciation will be returned to the customer after termination of the service for which the meter was obtained.
3. If Utility requires customer to call, fax, or email the meter reading, it is the customer's responsibility to do so by the 15th of each month. Customers that do not call, fax, or email the meter reading by the 15th of each month will be charged for 10,000 cubic feet of water use.
4. In the event of failure to provide a meter read for a period of:
    - Two months, meter may be removed and permit revoked (if utility is unable to contact customer).
    - Six months, the meter will be considered abandoned, and deposit forfeited.
5. Meter can only be used in locations approved by the local fire department and Utility; and meter cannot be relocated without utility approval.
6. Once water passes through meter it is no longer potable.
7. Water taken from a utility hydrant may not be transported out of the Utility's designated service area unless authorized by Washington Water in writing.
8. Meter must be inspected annually by Utility. Customer is responsible for arranging inspection appointment.
9. RP and BPA must be tested according to the requirements set forth by the Department of Health by a certified backflow specialist. Fee for testing is the responsibility of customer.
10. Utility will require customer to apply for a permanent service to obtain potable water to a premises. This rule gives customer no implied rights for obtaining building permits and permanent extensions to serve customers are to be made under Rule 8.

Washington Water Service Company | For Commission's Receipt Stamp

WATER SERVICE
RULES AND REGULATIONS

Rule 33 – Construction Meters (cont'd)

11. Meter is not to be used for fire protection such as fire sprinkler or on-site fire hydrants. This rule does not imply that any fire protection standards required by local or state authorities are met.
12. It is the customer's duty to notify the local fire protection agency of any connection to a fire hydrant and to disclose the intended use of water.
13. Failure of a customer to use proper spanner wrenches on the Utility's fire hydrant operating nut, or any damage to the water distribution system by the customer, can result in the immediately termination of service and use of the meter. The costs for making repairs to the damaged facilities shall be borne by the customer.
14. Persons found using water from a Utility hydrant location without the use of proper metering equipment will receive a warning letter and citation. A second citation may result in the suspension of all hydrant use permits issued to that customer for a period of six months. Additionally, copies of the citations will be sent to the local law enforcement authorities and the fire department will be notified that all hydrant use permits have been revoked.

SCHEDULE NO. 2
METERED RATE SERVICE - LEGACY

Available
Within the limits of all Washington Water Service Company Water Service Areas except the East Pierce Service Area and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applicable to customers served by the Utility on a metered basis.

Conditions
The charge for this service is not subject to cancelation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service. For multiple unit residential customers served through one meter, see **Rule 19**. Usage rates for each block below are shown per 100 cubic foot of water. Billing for any block shall be calculated on a per 100 cubic foot amount used and based on the usage rate charge of that block.

Monthly Rates

Each connection or customer:

Each connection	Meter Size Factor	Base Rate	1st Block (cubic feet)	1st Usage Rate	2nd Block (cubic feet)	2nd Usage Rate	3rd Block (cubic feet)	3rd Usage Rate

SCHEDULE NO. 2.1
METERED RATE SERVICE – EAST PIERCE

Available
Within the limits of Washington Water Service Company's East Pierce Service Area and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applicable to customers served by the Utility on a metered basis. Water services to a residential connection defined as single family residences, multifamily residences consisting of four (4) each or fewer separate dwelling units, standalone mobile homes, or mobile homes in mobile home parks.

Conditions
The charge for this service is not subject to cancelation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service. For multiple unit residential customers served through one meter, see **Rule 19**. Usage rates for each block below are shown per 100 cubic foot of water. Billing for any block shall be calculated on a per 100 cubic foot amount used and based on the usage rate charge of that block.

Each connection or customer: (T)

Each connection	Base Rate	1st Block (cubic feet)	1st Usage Rate	2nd Block (cubic feet)	2nd Usage Rate	3rd Block (cubic feet)	3rd Usage Rate
3/4-inch or smaller	$ 19.68	0-600	$ 1.66	601-2,200	$ 2.49	Over 2,200	$ 3.32
1-inch	$ 33.46	0-1,168	$ 1.66	1,169-4,449	$ 2.49	Over 4,449	$ 3.32
1 1/2 -inch	$ 64.94	0-2,335	$ 1.66	2,336-8,897	$ 2.49	Over 8,897	$ 3.32
2-inch	$ 104.30	0-3,736	$ 1.66	3,737-14,235	$ 2.49	Over 14,235	$ 3.32
3-inch	$ 196.80	0-7,005	$ 1.66	7,006-26,690	$ 2.49	Over 26,690	$ 3.32
4-inch	$ 328.66	0-11,675	$ 1.66	11,676-44,484	$ 2.49	Over 44,484	$ 3.32
6-inch	$ 655.34	0-23,350	$ 1.66	23,351-88,967	$ 2.49	Over 88,967	$ 3.32
8-inch	$ 655.34	0-23,350	$ 1.66	23,351-88,967	$ 2.49	Over 88,967	$ 3.32

SCHEDULE NO. 2.2 (T)
METERED RATE SERVICE – STROH

Available
Within the limits of Washington Water Service Company's Stroh Service Area and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applicable beginning July 17, 2023, to customers served by the Utility on a metered basis. Water services to a residential connection is defined as single family residences, multifamily residences consisting of four (4) each or fewer separate dwelling units, standalone mobile homes, or mobile homes in mobile home parks.

Conditions
The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service. For multiple unit residential customers served through one meter, see **Rule 19**. Usage rates for the block below is shown per 100 cubic foot of water. Billing for the block shall be calculated on a per 100 cubic foot amount used and based on the usage rate charge for the block.

Monthly Rates (except for residential customers with 1 inch or smaller for the period from May 1 to September 30):

Meter Size	Meter Size Factor	Base Rate	Allowance	1st Block (cu.ft.)	1st Usage Rate
¾ - inch	1.00	$17.75	0-500	Over 500	$0.65
1-inch	1.67	$27.00	0-750	Over 750	$0.65
1 ½ - inch	3.33	$53.25	0-1,500	Over 1,500	$0.65
2 – inch	5.33	$93.19	0-2,625	Over 2,625	$0.65
3 – inch	10.00	$204.13	0-5,750	Over 5,750	$0.65
4 – inch	28.40	$355.00	0-10,000	Over 10,000	$0.65

SCHEDULE NO. 3
WATER SYSTEM FACILITIES CHARGE
EQUIVALENT RESIDENTIAL CUSTOMER

Available
Within the limits of all Water Service Areas except the East Pierce Service Area and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applies to all new applicants for properties not currently served, only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity, arrangements satisfactory to the Utility are made for construction of additional facilities for connection to an existing main or for wholesale applicants, when surplus source capacity is available.

Conditions
1. The Utility will own and maintain all materials and facilities involved in the construction for water service.
2. The Water System Facilities Charge will be in addition to any line extension, service connection, or any other charges that may be provided elsewhere in this tariff.
3. If further subdivision of the property is made at a later date, each newly created lot will be subject to an additional facilities charge upon application for water service. If service is greater than residential equivalent, then multiple equivalents may be charged.
4. Exemptions:
   a) Any end use customer covered by an existing written contract, which specifies that, no charge or a lower charge will be paid.
   b) Any end use customer connecting to a water system which was contributed to the Utility or for which the Utility paid a nominal amount. However, the developer of such system may be subject to the charge.

Charge

Water System Region SW of the Legacy Service Area – See **Service Area-Legacy Sheet Nos. 22-28**	$1500 + federal income tax gross-up

Original Sheet No. 32.1
WN U-3

Washington Water Service Company For Commission's Receipt Stamp

SCHEDULE NO. 3.1
GENERAL FACILITIES CHARGE

Available
Within the limits of Washington Water Service Company's East Pierce Service Area and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applies to all new applicants for properties not currently served, only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity, arrangements satisfactory to the Utility are made for construction of additional facilities for connection to an existing main or for wholesale applicants, when surplus source capacity is available.

Rate
$1,549 per ERU plus the applicable Federal Income Tax gross up as per the provisions of the Tax Cuts and Jobs Acts of 2017 and subsequent Congressional amendments.

Conditions

1. ERU is defined as equivalent residential unit. One ERU generally equates to a ¾" or smaller connection. This means that ERUs are related to meter size. The number of ERUs for any project is associated with the nature of the project and type of connection For example, for a development that is approved for ninety single family house and two irrigation connections, the project would be assessed at 92 ERUs. Other projects are generally assessed by the size of meter, although it can vary depending on fire protection requirements. The utility shall determine the number of ERUs for a project based upon the greater of water use demands, fire flow requirements and other project considerations or meter size; provided that if the project considerations support use of a 1" or 1 ½" meter, the utility may require the use of a 2" compound meter to capture low water flows that a 1" or 1 ½" meter may not measure accurately. In the case where the utility requires use of a 2" compound meter to capture low water flows in lieu of a 1" or 1 ½" meter, that 2" meter will not be used as the basis of calculating the number of ERUs for the project. Where meter size is used to determine ERUs, the meter size to ERU relationships, as developed by the American Water Works Association (AWWA) are set out on the Tale in Condition 6.

2. Any owner, owner's agent, developer, purchaser or purchaser's agent who is a "water service applicant" shall pay the charge set for on this schedule at the time a water availability letter is provided by the Utility; provided that in the case of a development requiring preliminary plat approval, the developer shall pay the charge set forth in this Schedule at the time a final water availability letter is provided by the utility. A "water service applicant" is a person or entity who has requested water service but has not yet become a "customer".

Original Sheet No. 32.2
WN U-3

Washington Water Service Company | For Commission's Receipt Stamp

SCHEDULE NO. 3.1
GENERAL FACILITIES CHARGE

Conditions (cont'd):

3. For the purposes of this tariff, a customer is defined as a person or entity whose property is directly connected to the water system.
4. The Utility will own and maintain all materials involved in the provision of water service.
5. If a main or extension is required to provide service, the terms of the main extension shall be set out in a contract between the water service applicant and the Utility.
6. Funds collected under this Schedule will be maintained in a separate bank account. Funds will be used for developing and purchasing equipment and facilities needed for source, storage and transmission. Reports concerning the collection and use of funds will be provided to the Commission in accordance with WAC 480-110-455.

Meter Size	AWWA Meter Size Factor*	Charge	
¾ inch or smaller	1.00	$ 1,549	Base Charge
1 inch	1.67	$ 2,857	
1 ½ inch	3.33	$ 5,158	
2 inch	5.33	$ 8,256	
3 inch	10.00	$ 15,490	
4 inch	16.67	$ 25,822	
6 inch	33.33	$ 51,628	

Anything larger than a 6 inch meter will be assessed by the AWWA standards.
*AWWA Factor based on ¾ inch basis.

SCHEDULE NO. 4
READY TO SERVE SERVICE

Available
Within the limits of all Washington Water Service Company Water Service Areas and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
To any property owner who has completed and signed a Water Service Application, Certificate of Water Availability, and paid all applicable fees required for the Utility to commit service to a meter service connection. Applicable to domestic residential customers, where meters have not yet been installed.

Conditions
The charge for this service is not subject to cancelation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service. At the time water service begins, the customer shall be converted to the metered rates on **Schedule 2 or Schedule 2.1**. Charge and commitment is limited to 1 ERU or connection per parcel.

Monthly Rates	Rate	
Each connection or customer within the Legacy Service Area	$24.72	**(I)**
Each connection or customer within the East Pierce Service Area	$19.68	**(I)**

Note: The Ready to Serve charge may be discontinued upon receiving written request from the customer or for non-payment of the Ready to Serve charge. Termination of the charge will allow the Utility to remove the service connection. This disconnection or removal will allow the Utility to make that available service capacity to supply other connections on the water system.

After a commitment has been revoked for discontinued service, future service to the property will require a new application for service, payment of service connection charges and will be subject to the availability of service company capacity at such time as the future application for service is made.

SCHEDULE NO. 5
FIRE FLOW RATE

Available
Within the limits of all Water Service Areas except the East Pierce Service Area and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applicable to all commercial customers and residential multi-unit structures (where larger than a duplex) where there is approved hydrant fire flow available in addition to monthly metered rate and flat rate schedules and where fire flow requirements are in excess of that of a single-family residential fire flow.

Conditions
The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service.

SCHEDULE NO. 6
RESIDENTIAL FIRE SPRINKLER SERVICE INSTALLATION

Availability
This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
For the customer(s) that desire to install fire suppression systems in accordance with NFPA 13D where the customer's residence that is served by the Utility and where the Utility has confirmed the adequacy of the Utility's service capacity.

Charges
Installation of residential fire system -Time and Materials

Conditions

1. The Utility will deny a customer's request for a residential fire sprinkler service if it cannot provide the pressure, flow or level of service required by the customer's fire suppression system.

2. The customer shall construct, at its own discretion, its own fire suppression system on the customer's property. The customer is providing and constructing such system based upon the customer's own knowledge and for the customer's own purposes. The customer will retain ownership and shall be responsible for the maintenance and operation of the fire suppression system.

3. The Utility shall provide to the customer the facilities to provide water to the customer's fire suppression system, consisting of a leak detection device being no larger than a one-inch (1") meter and connection to the Utility's water main, which will flow through a leak detection device to be installed by the Utility. The connection, leak detection device and assorted appurtenances shall be provided to the customer on a time and material basis. Meters larger than one inch (1") will be considered upsized and will be charged in accordance with **Schedule 2 or Schedule 2.1**. A combined service may be used for connections 1" or smaller. A connection larger than 1" shall be used only for the provision of the fire suppression system and shall not be used for any other purpose, including, but not limited to, domestic water service. The customer must provide, at the customer's sole expense, a backflow prevention device, which complies with the Utility's Cross Connection Control program as defined in **Rule 23** of this tariff.

Original Sheet No. 36
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

SCHEDULE NO. 6
RESIDENTIAL FIRE SPRINKLER SERVICE INSTALLATION (cont'd)

Conditions (cont'd)

4. The customer agrees to pay all charges for the installation of facilities and the annual inspection fee within thirty (30) days of date of invoice for such charges. Failure of the customer to pay such charges in a timely manner will result in disconnection of the facilities provided under this agreement.

5. The customer covenants and agrees that it shall be responsible for maintaining the backflow prevention device in working order. The backflow prevention device shall be inspected and tested, at the customer's expense, by a certified BAT specialist as required under WAC 246-290-490. The Utility will maintain a list of certified BAT specialists that are acceptable to the Utility and the customer may choose from any such BAT specialist on the Utility's list. A copy of satisfactory certification will be provided to Utility prior to the date of providing service under this agreement and on an ongoing basis as testing certifications are required by state law and regulation (currently on an annual basis). The backflow prevention device shall be accessible to the Utility and its employees at all times.

6. The customer shall indemnify and hold the Utility and the Utility's directors, officers, employees and agents harmless from any claim for damage to property or personal injury or death resulting from or in connection with the work done under this agreement or the facilities provided under this agreement, including attorney's fees and court costs, except that which is the result of the gross negligence or intentional misconduct of Utility or a violation of RCW 19.122 by the Utility. This **Condition 6** is in addition to, and not in lieu of, the Limitations of Liability set out in **Rule 25** of this tariff.

Original Sheet No. 37
WN U-3

Washington Water Service Company

For Commission's Receipt Stamp

SCHEDULE NO. 6
RESIDENTIAL FIRE SPRINKLER SERVICE INSTALLATION (cont'd)

Conditions (cont'd)

7. The customer understands and agrees that the Utility is not acting as an insurer of the customer or customer's property or property of others on the property. The Utility shall not be liable for any loss of life, personal injury, loss, or damage to property of the customer, its family members, agents, guests or invitees whether or not caused by failure of the facilities and the customer shall hold the Utility and the Utility's directors, officers, employees and agents harmless from any such claim. The Utility makes no warranties or representations as to performance of the facilities. Nor shall the Utility be liable under any theory in law or equity to the customer or customer's family members, agents, guests or invitees for any consequential, incidental, punitive or other loss or damage beyond direct damages caused by the Utility's gross negligence or intentional misconduct or a violation of RCW 19.122 by the Utility, and then only in an amount not to exceed ten-thousand dollars ($10,000.00).

8. The customer hereby agrees to purchase insurance, in such amount as the customer deems adequate, to protect against loss by fire, which insurance customer agrees shall be the customer's sole source of recovery for failure of the facilities, except for the Utility's gross negligence or intentional misconduct or the Utility's violation of RCW 19.122. Said insurance policy shall include a waiver of subrogation as applied to the Utility, its directors, officers, employees and agents.

9. Only closed loop or single/double head loop fire suppression systems may be connected to the Utility's system.

10. Authorized use of water through a fire suppression system meter shall be billed to the customer at the normal water usage rates established by the Utility on **Schedule 2 or Schedule 2.1**. Authorized use of water through a fire suppression system meter is limited to fire suppression system testing, maintenance, or actual fire prevention or control.

Original Sheet No. 38
WN U-3

Washington Water Service Company — For Commission's Receipt Stamp

SCHEDULE NO. 6
RESIDENTIAL FIRE SPRINKLER SERVICE INSTALLATION (cont'd)

Conditions (cont'd)

11. Unauthorized use of water through a fire suppression system meter shall be billed to the customer at a rate of twelve (12) times the water usage rate established by the Utility on **Schedule 2 or Schedule 2.1**.

12. Except as noted in **Condition 13** below, should the unauthorized use of water through a fire suppression system meter not be permanently eliminated by the customer within thirty (30) business days of receipt of written notice of unauthorized use from the Utility, the fire suppression system water service shall be deemed a normal domestic service with all related fees and charges due and payable immediately. Alternatively, if payment of fees and charges is not received, the customer shall be provided notice of disconnection of the fire suppression system water service, after which the fire suppression system water service will be disconnected.

13. Should the unauthorized use of water through the fire suppression system occur concurrently with the disconnection of domestic water service to the property due to lack of payment for the domestic service, the customer will be provided notice of fire suppression system service disconnection by posting such notice of disconnection on the door of the residence. Copies of such notice shall be provided to the appropriate county official and the local fire district and retained by the Utility and shall include the date, time, and name of the Utility employee posting the notice.

Original Sheet No. 39
WN U-3

Washington Water Service Company — For Commission's Receipt Stamp

SCHEDULE NO. 7
FIRE HYDRANT INSTALLATION

Availability
This schedule is available to customers taking service under either **Schedules 1, 1.1, 2 or 2.1** of this tariff. This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
To the installation of fire hydrants, where requested by customer(s).

Conditions
Fire hydrants will be constructed only after a customer has made a deposit equal to one-half (1/2) of the estimated cost of installation of the hydrant and then only where the Utility can provide fire flow, which meets minimum standards for state and county or, if applicable, city ordinance.

Installation of a fire hydrant by the Utility shall not constitute a warranty or guaranty by the Utility that a fire will be extinguished. The customer is advised at all times to maintain adequate fire insurance to cover the customer's expected loss from a fire, which may occur.

The Utility will deny a customer request for a hydrant if the system serving the customer cannot provide the level of service required for fire flow under state and county or, if applicable, city ordinance or if the request is for an area that is not capable of service from an existing main without a main extension.

Installation Charge	Rate
Each fire hydrant	$9,200 + federal income tax gross up as applicable

SCHEDULE NO. 8
SERVICE CONNECTION CHARGE

Available
Within the limits of all Water Service Areas and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applies to all new applicants for properties not currently served and within the Commission Service Area (as defined in the tariff) for the Utility only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity.

Conditions
1. A charge will be made the first time a customer's service pipe is connected to the Utility's main. The charge for a larger connection will be the cost of labor and materials. A meter will be furnished, installed and maintained by the Utility without direct cost to the customer.
2. The Utility owns and maintains all materials involved in making a service connection.
3. The service connection charge must be paid before installation.
4. In addition, when it is necessary to bore under or trench through an existing road beyond what is required of a tap and push, the cost of boring or trenching will be in addition to the Service Connection Charge.
5. Meter will be placed in a suitable meter box located at the customer's property line, except when this is not practicable. The meter will be installed upon the customer's premises in some convenient location approved by the Utility where the meter will at all times be accessible for reading, inspection and testing. (See **Rules 7, 8 & 9**).
6. Service Connections will be installed within 30 days from payment, unless prior arrangements in writing are agreed upon by both the customer and the Utility.

Size of Service Connection	Service Connection Charge
For lots requiring new service connection 5/8 x 3/4 inch service setting	$3,950 + federal income tax gross-up
For lots with a service line and angle stop only 3/4 inch service setting	$515 + federal income tax gross-up
1 inch meter service setting (new or existing service)	$6,100 + federal income tax gross-up
Larger than 3/4 inch service setting (new or existing service)	Labor, Materials, and Taxes

SCHEDULE NO. 9
IRRIGATION SERVICE

Availability
This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
To water service through a connection used primarily for irrigation and not for service to provide domestic consumption. This service is applicable to lot(s) that is not buildable or is designated as open space on filed plats or as may be agreed by contract between the Utility and customer (or customer's predecessor-in-interest). Incidental use for drinking fountains or other domestic consumption shall not change the primary use for irrigation purposes.

Monthly Charge
Monthly rates are set out on **Schedule 2 and 2.1**.

Conditions

1. Consumption under this Schedule for each billing period beginning with the period covered by the June bill issued by the Utility and ending with the period covered by the October bill issued by the Utility (*'Restricted Period'*) is limited to one-hundred and seven (107) cubic feet per day measured as a monthly total.

   a. Cubic feet per day average is computed as billed usage divided by the number of days in that billing cycle.

2. Consumption that exceeds the limit of one-hundred and seven (107) cubic feet per day in one billing period may, at the discretion of the Utility, result in service being restricted or discontinued for the remainder of the *'Restricted Period'*. If the computed per day usage is less than the average one-hundred and seven (107) cubic feet per day in any one billing cycle, the difference cannot be banked and used in subsequent billing periods.

3. Each customer must install and maintain a rain sensor as part of their irrigation service so that irrigation will not occur when there is rain.

SCHEDULE NO. 9
IRRIGATION SERVICE (cont'd)

Conditions (cont'd)

4. Each customer will follow a best practices approach to the use of irrigation service. This best practices approach includes the following:

   a. Revisiting existing landscaping to determine if modifications are needed to reduce use of water.

   b. Irrigating grass areas at a rate of no more than one-inch (1") per week.

   c. Sizing irrigation sprinklers and installing irrigation sprinklers to provide as near a uniform coverage of grass-landscaped areas as feasible.

   d. Not using watering practices that involve a *'sponge'* approach where water is applied in one area with the thought that it will eventually provide coverage of other areas through the water traveling over, through or under the ground.

   e. Not irrigating when the temperature is forecasted to exceed ninety degrees Fahrenheit (90°F).

5. If the Utility issues a no irrigation order for the water system to which the customer is connected, the customer must immediately cease irrigation until the no irrigation order is lifted.

SCHEDULE NO. 10
CITY TAX ADJUSTMENT SCHEDULE

Applicable
These adjustments apply to all charges for sales of water service pursuant to this tariff within the jurisdiction imposing a tax, as provided in this tariff.

Tax Adjustment
The rates and charges named in this tariff shall be proportionately increased by an adjustment equivalent to the amount of the tax imposed by the jurisdiction and effective as listed below titled as "Rate Applied to Customer's Tariff Charges."

Application
These adjustments apply to all charges for sales of water service pursuant to this tariff within the jurisdiction imposing a tax, as provided in this tariff.

Washington Water Service Company For Commission's Receipt Stamp

SCHEDULE NO. 11
WHOLESALE WATER

CITY OF TACOMA

Available
To water service taken by the Company from the City of Tacoma through interties constructed between the Company and City of Tacoma.

Rates
The rate for such service will be at the rate charged by the City of Tacoma to the Company at the time the water is delivered from the City of Tacoma to the Company. A copy of the invoice from the City of Tacoma can be provided by the Company to UTC upon request.

LAKEWOOD WATER DISTRICT

Available
To water service taken by the Company from the Lakewood Water District through interties constructed between the Company and Lakewood Water District.

Rates
The rate for such service will be at the rate charged by the Lakewood Water District to the Company at the time the water is delivered from the Lakewood Water District to the Company. A copy of the invoice from Lakewood Water District can be provided by the Company to UTC upon request.

Washington Water Service Company For Commission's Receipt Stamp

SCHEDULE NO. 12
CAPITAL IMPROVEMENT SURCHARGE*

Available
Within the limits of the Cristalina service area and at utility's option and capability to maintain Department of Health standards of quantity and quality.

Applicable
Applicable to any connection or customer of the utility company.

Conditions
The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service and will be in addition to other charges as provided in this tariff.

Monthly Rates
Each connection or customer will pay a surcharge of $32.00 that will be in addition to the monthly minimum bill plus other allowable charges as provided in this tariff.

Purpose
The surcharge being sought after will include the following Capital Improvements:

> Installation of a hydro pneumatic booster pumping facility to provide adequate volume and pressure to all residents.
> Replacement of substandard leaking and water lines.
> Increasing security of water supply.
> A dedicated and regularly maintained on-site generator with backup power in the event of power outages.

These improvements are both mandatory to be in compliance with the Department of Health and Safe Drinking water requirements as well as the voluntary improvement of the backup generator that has been requested by customers, but is not required for water quality. Surcharge to expire June 1, 2029 or upon recovery of $555,000 loan principle plus interest charges and state excise taxes, whichever occurs first. Surcharge may be paid (within 90 days of effective date) in a one-time payment sum of $6,607 per customer and save interest cost.

*This tariff is adopted pursuant to Order No. UW-141301 Order 01 Paragraphs 34 and 35.

FOREWORD

These Rules and Regulations have been adopted to establish uniform practices governing water service and to define the obligations of the Company to customers and of customers to the Company.

It is the policy of the Company to render fully satisfactory service to all customers and to encourage courtesy to the public by all its employees. The Company desires to cooperate with customers to eliminate the waste of water and thus minimize charges to the customer. Customers are advised to obtain information from the Company on the availability of water, pressure conditions and other pertinent data to assure satisfactory service.

It is the Company's objective to deliver potable water to customers, and irrigation water to selected customers, at a minimum cost consistent with the Company receiving a reasonable rate of return.

The Company will comply with the U.S.E.P.A. Safe Drinking Water Act and all State Department of Health drinking-water program requirements.

RULE I
DEFINITIONS

For the purpose of these Rules and Regulations, unless it is plainly evident from the context that a different meaning is intended, certain words and phrases used herein are defined as follows:

1. The word "Company" shall mean the WAIKOLOA WATER CO., INC., a Hawaii corporation dba WEST HAWAII WATER COMPANY, a subsidiary of HAWAII WATER SERVICE COMPANY, INC., a Hawaii corporation.

2. The word "customer" shall mean the person or persons, firm, corporation, association, or governmental department, whether owner or tenant, whose name(s) appear on the records of the Company as the party receiving water service and responsible and liable for payment of charges to the Company.

3. The term "service connection" shall mean the main tap, pipe, fittings, and valves, from the water main to and including the meter and shut-off valve. Meter boxes are normally installed in the public right of way adjacent to the property line. See Exhibit A for typical service connection.

4. The term "cost of service connection" shall mean the sum of the cost of the labor, materials, transportation, equipment, and road repair, if any, and other incidental charges necessary for the complete installation of a service connection, including the cost of the meter.

5. The term "customer's supply pipe" shall mean the pipe extending from the shut-off valve to the customer's facility.

6. The word "main" or "main pipe" shall mean the Company s supply or distribution pipe to which service connections are made.

7. "Company water system" means the system owned and operated by the Company.

8. "Notice to stop" means oral or written notice to the Company by a customer that the customer wishes to discontinue service. Oral notice will be received only during business hours, Monday through Friday not including holidays. Written notice is effective the date correspondence is stamped received by the Company.

RULE II
GENERAL CONDITIONS

1. Any prospective customer whose premises are within service limits established by the Company and adjacent to a distribution main, where pressure conditions permit, may obtain water service provided that the Company has a sufficient water supply developed for domestic use and for fire protection to take on new or additional service without detriment to those already served.

2. A non-refundable contribution in aid of construction may be required as a condition to receiving service in accordance with Rule XX.

3. Where an extension of mains is necessary refer to Rule XXI.

4. All water supplied by the Company will be measured by means of suitable meters registering in gallons. When it is impractical to meter the service, a flat rate may be charged. The amounts to be paid for water and water service shall be in accordance with the rates on file with the Public Utilities Commission of the State of Hawai`i.

5. The Company shall provide services in the areas listed and identified below, which are shown on Exhibit B.

(a) Lots 4, 8, and 9 which make up the Waikoloa Village area and Lots 1, 2, 3, 5, 6, and 7 surrounding Waikoloa Village on File Plan 1172 on file with the State Bureau of Conveyance.

(b) All lots as shown in both Section A and Section B of File Plan 1139 on file with the State Bureau of Conveyances.

(c) Portions of Lot 1, File Plan 1435, and Lot 3B, File Plan 1653, being TMKs (3) 6-9-01:por. 27 and por. 5, respectively, from their eastern property lines and extending westward to the location of Easement W-1 as shown on File Plan 1653, recorded I the Bureau of Conveyances of the State of Hawai`i, being Tank 300 site, and extending the width of each parcel along a meandering line running at approximately the 300 foot elevation contour line.

RULE III

CONSERVATION MEASURES AND INTERRUPTION OF WATER SUPPLY

1. The Company will exercise reasonable diligence and care to deliver an adequate supply of water to the customer, to avoid shortages or interruptions in water service and to maintain adequate pressure in its water mains. The Company will not be liable for any interruption, shortage, insufficiency of supply, lack of or excessive water pressure, or for termination of water service without notice for conservation measures and for other reasons deemed necessary and proper, as provided herein.

2. The Company will not be liable for temporary colored or turbid water conditions caused by emergency repair of water mains.

3. Whenever, in the Company's opinion, special conservation measures are advisable in order to forestall water shortage and a consequent emergency, the Company may restrict the use of water by any reasonable method of control. In determining the priorities in restricting the use of water, the health and safety of the public shall be given first consideration over other uses.

4. The Company reserves the right at any and all times to shut off water from the mains without notice for the purpose of making repairs, extensions, alterations, or for other reasons relating to the operations of the water system. Customers depending upon a continuous supply of water shall provide emergency water storage and any check valves or other devices necessary for the protection of plumbing or fixtures against failure of the pressure or supply of water in the Company's mains. Repairs or improvements will be prosecuted as rapidly as practicable and, insofar as practicable, at such times as will cause the least inconvenience to the customer. Except in the case of emergency repairs, the Company shall use best efforts to give the Consumer at least 24 hours notice before shutting off service.

5. As a condition to providing service to a new development, the Company may require the developer to record against the property to be served a Declaration of Covenants, Conditions and Restriction ("CC&Rs") that contains conservation measures and water usage restrictions, including, without limitation, landscaping and irrigation requirements, limitations on water usage for landscaping purposes, the right of the Company to require installation of dual water meters to measure and restrict landscaping water usage, the imposition of additional contributions in aid of construction if water usage exceeds the amounts on which the original contributions in aid of construction were based, and other remedies for failing to comply with such CC&Rs.

RULE IV

ELEVATION AGREEMENT, PRESSURE CONDITIONS

1. Where property is situated at such an elevation that it cannot be assured of a dependable supply or of adequate service from the Company's distribution system, the consumer, in consideration of connection with the Company's system, must agree to accept such water service as the Company is able to render from its existing facilities, or to install if necessary and maintain at the customer's expense a tank and pump of suitable design and of sufficient capacity to furnish an adequate and dependable supply of water. The Company shall make every effort to maintain pressure in its water mains, but shall not accept responsibility for failing to maintain pressure or accept any liability for any loss due to lack of pressure. The customer shall execute a written release in favor of the Company for all claims on account of any inadequacy in the Company's system or inadequacy of water supply to the customer.

2. When the pressure of the Company's supply is higher than that for which individual fixtures are designed, the customer shall protect such fixtures by installing and maintaining pressure reducing and relief valves. The Company will not be liable for damage due to pressure conditions caused by or arising from the failure or defective condition of such pressure regulators and relief valves or for damage that may occur through the installation, maintenance, or use of such equipment.

3. When required by the Company the customer shall install an air gap or other protective devices between the customer's supply pipe and the service connection.

4. Wherever a check valve or pressure reducing valve is installed on the customer's cold water supply line between the main and a hot water storage tank and/or heater, there shall be installed on the customer's hot water distributing system a suitable pressure relief valve.

RULE V

APPLICATION FOR WATER SERVICE AND SERVICE CONNECTION

1. Each prospective customer shall be required to sign the standard application form (see Exhibit C) for the water service desired, assuming responsibility for the payment of future charges for water service at the designated location, before water is turned on for any use whatever. The customer signing the application form shall be held liable for the payment of all charges for water and water service at the designated location. Owners of residences where tenants or lessees request water service will be required to also sign the standard application form and will be responsible for payment of water bills in the event tenant/lessee defaults.

2. Service will be granted, without advance deposit required, to property owners or to those having leases with at least a one year term. Service may be provided to tenants of shorter duration if a deposit is made equal to three months estimated billing. The deposit shall be subject to the provisions set forth in Section 4 of this rule.

3. Charges will begin when the water service is established and will continue until notice to stop is received from the customer, or until discontinuation by the Company for failure of the customer to comply with the Rules and Regulations. See definition of "Notice to stop" in Rule I.

4. When an application for water service is made by a customer who was responsible for and failed to pay all bills previously rendered, regardless of location or time incurred, the Company may refuse to furnish water service to such applicant until the outstanding bills are paid. Further, in this case, the Company may charge a deposit equal to three months estimated billing. Such deposit shall be held for the benefit of customer with interest. Interest will accrue at the prevailing interest rate for Regular Savings Accounts at First Hawaiian Bank. Deposit with interest shall be refunded within 30 days after final bill is paid or two years of timely payment, whichever comes first.

5. A connection deposit of not less than $150.00 and at least equal to the Company's estimate of the cost of the service connection shall be required of the applicant before the connection is installed. If the actual cost of the connection is in excess of the deposit, the applicant will be billed and shall pay for the difference. If the actual cost is less than the deposit, the applicant will be refunded the difference.

6. When the application for service connection has been approved, such connection will be installed by the Company at the expense of the applicant and thereafter will be

maintained by the Company at its expense. There shall be one meter for each service connection unless the Company, because of operating necessity, installs two or more meters in parallel. All meters will be sealed by the Company before installation and no seal shall be altered or broken except by one of its authorized employees. All meters shall be installed in locations selected by the Company. The stopcock before the meter is installed for the use of the Company.

7. All service connections shall become the property of the Company for its operation and maintenance after installation, and new connections or disconnections may be made thereto by the Company at any time.

8. The customer shall install and connect at his expense his supply pipe to the shut-off valve installed by the Company. The customer's supply pipe shall at all times remain the sole property of the customer, who shall be responsible for its maintenance and repair.

9. Only employees of the Company will be allowed to connect or disconnect the service connection to or from the Company's main.

10. The Company will determine the location and size of all service connections to its systems. No service connection or water main will be installed by the Company in any private road, lane, street, alley, court or place, until such private streets are open to the public and brought to proper grade and unless the Company is given proper easements or other rights satisfactory to the Company for the main or service connection. Otherwise, an applicant desiring water service to property fronting on such private roads, lanes, etc., must extend his supply pipe to the nearest public street on which a main exists.

11. When the proper size of service connection for any premises has been determined and the installation has been made, the Company has fulfilled its obligations insofar as the size of the service and the location are concerned. If the customer subsequently desires a change in size of the service connection or a change in the location thereof, he shall bear all costs of such change.

12. A readily accessible shut-off valve controlling all outlets will be installed by the Company at the expense of the customer on his supply pipe at a location to be determined by the Company. If a replacement of the shut-off valve is necessary, it shall be paid for by the customer.

WEST HAWAII WATER COMPANY
A subsidiary of Hawaii Water Service Company, Inc.
Waikoloa, Hawaii

WHWC Tariff No. 1
Third Revised Sheet 10
Cancels Second Revised Sheet 10

13. All work and materials in connection with the change in location or elevation of any part of the existing water system made necessary by the new service connection shall be at the expense of the applicant.

14. When required by the Company, contours or elevations shall be furnished by the applicant, based upon [U.S.C.G.S.] National Geodetic Survey or County of Hawaii data.

15. No obstruction shall be placed on or around any water meter, fire hydrant, or valve so as to render it inaccessible.

RULE VI

METER READING AND RENDERING OF BILLS

1. Meters are read and bills are rendered monthly or semimonthly at the option of the Company. Special readings will be made, when necessary, for closing accounts or for other reasons.

2. Readings of separate meters are not combined. For the purpose of computing charges, all meters serving the customer's premises shall be considered separately, and the readings thereof shall not be combined except in cases where the Company, because of operating necessity, installs two or more meters in parallel to serve the same customer's supply pipe.

3. All bills shall be due and payable upon deposit in the United States mail, receipt by the customer, or other presentation to the customer. Payment shall be made in cash at the office of the Company, or by personal check, cashier's check, or money order, in person or by U.S. mail, at the office of the Company, or at the Company's option, to duly authorized collectors of the Company. Payment may also be made by credit or debit card or by automatic payment service. In the case of payment by credit or debit card, any applicable transaction and processing fees charged by the credit / debit card company will be paid by the customer. If the charges payable hereunder by the customer are not paid within 30 days after presentation or deposit in the United States mail, there may be added as a late payment charge an amount equal to one percent (1%) per month of the unpaid balance. In addition, if any bill is not paid within thirty (30) days after presentation or deposit in the United States mail, the water service shall be subject to discontinuance in accordance with Rule VII.3, and a reconnection charge of $25.00 will be required in addition to payment of the amount due and payable in order to re-establish water service. Also, the Company shall require the customer to put up a deposit subject to Rule V.4. Any bill for which a bank check written in payment has been dishonored will be due and payable immediately upon written notice to the customer by the Company of the check's dishonorment. Within 5 days of issuance of written notice, the full amount of the bill must be paid in cash, money order or cashier's check to the Company's office, along with a $10.00 service charge. Should the customer fail to make payment on the dishonored check, the Company may discontinue service under Rule VII.3, with the thirty-day period running from the date that the original bill was mailed or presented to the customer.

4. The customer shall submit any dispute regarding the charges appearing on the bill to the Company in writing no later than twenty (20) days following the due date for the bill. The Company shall furnish a written response regarding its investigation and determination as to the correctness of or any adjustments to the bill within fifteen (15) days of its receipt of the written dispute. The customer may pay the disputed bill under protest within the time required by this rule to avoid discontinuation of service, in which event the dispute may be submitted to the Hawaii Public Utilities Commission for final determination.

5. If a meter fails to register due to any cause except the non-use of water, an average bill may be rendered. Such average bill will be subject to equitable adjustment taking into account all factors before, during, and after the period of said bill.

6. Any customer who, for any reason, doubts the accuracy of the meter serving his premises may request a test of the meter. The customer, if he so requests, will be notified as to the time of the test and may witness the test

if he so desires. No charge will be made for meter tests if the meter is inaccurate. The customer will be charged the actual costs connected with such test if the meter is accurate within range of plus or minus two percent (2%) for small meters (5/8" and 3/4") and plus or minus five percent (5%) for large meters (1" and larger).

7. If, as a result of the test, the meter is found to register more than two percent fast for small meters or five percent (5%) fast for large meters under conditions of normal operation, the Company will refund to the customer the overcharge based on past consumption, for a period not exceeding six months unless it can be proved that the error was due to some cause, the date of which can be fixed. In this latter case, the overcharge shall be computed back to, but not beyond, such date.

8. If, as a result of the test, the meter is found to register more than two percent (2%) slow for small meters or five percent (5%) slow for large meters under conditions of normal operation, the Company will bill the customer the undercharge based on past consumption, for a period not exceeding six months, unless it can be proved that the error was due to some cause, the date of which can be fixed. In this latter case, the additional charge shall be computed back to, but not beyond, such date.

RULE VII

TERMINATION OF SERVICE AND DISCONNECTION

1. Each customer about to vacate any premises supplied with water by the Company shall give two days notice of his intention to vacate prior thereto, specifying the date service is desired to be discontinued; otherwise the customer shall be held responsible for all water service furnished to such premises until the Company has received such notice of discontinuance. Before any buildings are demolished the Company should be notified so the service connection can be closed. See definition of the term "Notice to stop" in Rule I.

2. Closing bills will ordinarily be determined by measuring the amount of water used since the last bill, as indicated by the meter reading, and adding a pro-rated service charge. In pro-rating service charges, a billing month will be considered as 30 days. If a meter cannot be read, an estimated billing will be rendered.

3. If any bill is not paid within thirty (30) days after the mailing or presentation thereof to the customer, the Company may discontinue service after it has made a reasonable attempt to collect payment and has given the customer written notice that the customer has at least fifteen (15) days within which to settle the customer's account or have service discontinued.

4. Water service may also be discontinued for non-payment of a sewer service bill to the extent that a premises receives water service from the Company and sewer service from Waikoloa Sanitary Sewer Company, Inc., dba West Hawaii Sewer Company, Inc. ("WHSC"), and to the extent that sewer and water service has been contracted for by the same person or persons, in accordance with paragraph 3 above.

5. If the customer fails to comply with any of these Rules and Regulations, or tampers with the service facilities of the Company, the Company will have the right to discontinue the service.

6. The Company may refuse to grant service or may discontinue existing water service to any premises to protect itself against fraud, abuse or unauthorized use of water.

7. Where negligent or wasteful use of water exists on any premises, the Company may discontinue the service if such conditions are not corrected within five days after giving the customer written notice of intent to do so.

8. The Company may refuse to furnish water, and may discontinue the service to any premises, where the demands of the customer will result in inadequate service to others.

9. Unless otherwise stated or unless termination without notice is necessary to protect against a condition determined by the Company to be hazardous or to prevent an abuse of service that adversely affects the Company water system or its service to other customers, a customer shall be given at least five (5) days written notice prior to termination of

service, and the customer's service shall not be discontinued on the day preceding or days on which the Company's business office is closed.

RULE VIII

DAMAGE AND ACCESSIBILITY TO COMPANY'S PROPERTY, METER DAMAGED BY HOT WATER

1. Any damage to Company facilities shall be reported as soon as possible. Any damage to water mains, service connections, valves, fire hydrants, or other property of the Company, including consequential damage caused by damage to water facilities, shall be paid for by the person or organization responsible for the damage.

2. The customer shall be liable for any damage to a meter or other equipment or property of the Company caused by the customer or his tenants, agents, employees, contractors, licensees or permittees, on the customer's premises, and the Company shall be promptly reimbursed by the customer for any such damage upon presentation of a bill therefore.

3. When a meter is found to have been damaged by hot water or steam emanating from the premises served, the customer shall pay for all costs required to repair and/or replace the meter.

RULE IX

INGRESS TO AND EGRESS FROM CUSTOMER'S PREMISES

Any officer or employee of the Company shall have the right of ingress to and egress from the customer's premises at all reasonable hours for purposes reasonably connected with the furnishing of water to said premises and the exercise of any and all rights secured to the Company by law or these Rules and Regulations. In case any such officer or employee is refused admittance to any premises, or being admitted shall be hindered or prevented from making such inspection, the Company may cause the water to be turned off from said premises after giving 24 hours notice to the owner or occupant of said premises of its intention to do so.

RULE X

RESPONSIBILITY FOR WATER RECEIVING EQUIPMENT

1. The customer shall at his own risk and expense furnish, install and keep in good and safe condition all equipment that may be required for receiving, controlling, applying and utilizing water. The Company will not be responsible for any loss or damage caused by the improper installation of such equipment, or the negligence, want of proper care, or wrongful act of the customer or of any of his tenants, agents, employees, contractors, licensees or permittees in installing, maintaining, using, operating or interfering with any such equipment.

2. Water service may be discontinued to any customer whose water system includes plumbing fixtures, or water containers in any form, or of any use, which in the opinion of the Company may endanger the Company's water supply from a public health standpoint. Any such discontinuation of service shall continue until objectionable installations have been corrected and the Company has been assured that the objectionable uses and practices will not be resumed.

3. The Company will not be responsible, and the customer will be responsible, for water damage or other damage to property caused by spigots, faucets, valves and other equipment that may be open when water is turned on at the meter, whether this occurs at the time of first installation or after a temporary shutdown.

4. All equipment belonging to the Company and installed upon the customer's premises for measurement, test, check or any other purpose, shall continue to be the property of the Company, and may be repaired, replaced or removed by the Company at any time without the consent of the customer. The customer shall exercise reasonable care to prevent damage to meters and other equipment of the Company upon said premises and shall in no way interfere with the operation of the same.

RULE XI

ABATEMENT OF NOISES

1. Where it has been determined that noises emanating from a customer's premises are caused by plumbing fixtures or other equipment attached to water pipes and such noises are being transmitted through the water pipes and causing annoyance to other customers, the Company may issue a notice in writing to the offending customer or to the owner of such premises, or to his agent, giving reasonable time within which to correct or to remove the cause of complaint. Failure on the part of such customer, owner, or person responsible to correct or remove the cause of the noise will be sufficient reason for discontinuance of water service to the customer until such time as the condition complained of has been remedied.

RULE XII

ELECTRICAL GROUNDING

1. Protective grounding of alternating current secondary distribution circuits made to the water system shall be subject to the following conditions:

(a) The grounding installation shall conform in all details with the National Electrical Code of the National Board of Fire Underwriters and with the County Building Code. The Company shall not be responsible for any damage or injury caused by any electrical grounding.

(b) The installation of the bonding jumper around the meter shall be the responsibility of the installer of the grounding connection. The bonding jumper shall be installed in such a manner as not to interfere with the installation of any of the Company's facilities.

(c) Whenever grounding fault occurs and causes electrical current to flow into the pipeline system, the customer shall have the correction made immediately and shall pay for any damages attributable to such grounding fault. Corrections not made will be subject to discontinuance of water service.

2. No grounding of direct current system to any portion of the water system shall be permitted.

3. No grounding other than as provided in paragraph 1, (a) and (b) hereof shall be made to any portion of the water system without the Company's written approval.

4. The Company does not maintain a continuous metallic water piping system and disavows any liability to public utility electric companies, electric customers, or any other agency or individual to maintain or operate such a system.

WEST HAWAII WATER COMPANY
A subsidiary of Hawaii Water Service Company, Inc.
Waikoloa, Hawaii

WHWC Tariff No. 1
Second Revised Sheet 20
Cancels First Revised Sheet 20

RULE XIII

CUSTOMER'S PUMPING INSTALLATIONS

1. Customers shall not be permitted to install or operate pumps pumping water directly from the mains of the Company's system except in cases approved in writing. No such approval will be given in cases where it is the opinion of the Company that such an installation and the operation thereof may adversely affect the water service extended by the Company to other customers.

2. No pump shall be equipped with a direct water supply connection for priming purposes except with the written permission of the Company.

RULE XIV

CROSS-CONNECTIONS, BACKFLOW PROTECTION AND IRRIGATION SYSTEM ANTI-SIPHON VALVES

1. In order to provide proper sanitary protection to the Company's water supply and to comply with the applicable regulations of the United States Public Health Service and of the State Department of Health, as adopted or amended from time to time, the Company will require that following the effective date of these Rules and Regulations no cross-connections with other water supplies, or other physical connections, shall exist, or be installed, located, maintained or operated which could permit backflow of contaminated water or any other dangerous, impure, unsanitary, or unpotable substance from the consumer s premises into the Company's water supply system, except as provided below:

(a) Owners or operators of presently existing water supplies which are in active use and cross-connected to the Company's system will be required to secure permits for the continuance of such cross-connections. Permits will be granted on a provisional basis, renewable yearly, under the following conditions:

(i) Where such water supplies are regularly examined by the Company, or other agencies satisfactory to the Company, and are approved by the Company as acceptable, safe and sanitary supplies and continue as such at all times while the connections are in existence.

(ii) Where such water supplies do not meet the requirements of (i) above, are not normally under pressure and are maintained solely for fire fighting purposes, and where adequate protection against backflow to the Company's water system is provided by mechanical, or other, methods or devices satisfactory to the Company.

(iii) The company may waive the requirement of a permit and allow cross-connections to be continued or established if the connections are with water supplies defined as primary or community supplies by the State Department of Health and approved by the Company and the State Department of Health as acceptable, safe and sanitary supplies.

(b) Other physical connections may be permitted if, in the judgment of the Company, adequate protection can be provided the water supply of the Company against backflow by the installation of mechanical, or other methods or devices approved by the Company and installed, maintained and operated by the customer in a manner satisfactory to the Company at all times; provided, however, that the Company may require the customer to eliminate or rearrange designated plumbing or piping connections or fixtures, or to install a backflow device at the meter or other location subject to the approval of the company, as an added safety measure in addition to any and all other backflow protection required or provided by mechanical, or other, methods or devices, whenever (1) the customer is engaged in the handling of dangerous or corrosive liquids or industrial or process waters, highly contaminated water or sewage, or is engaged in the medical or dental treatment of persons who might have diseases transmittable by water, or whenever (2) in the judgment of the Company there exists a danger of backflow into the Company's mains because of the possibility of unauthorized connections being created through non-compliance or inadvertence on account of the complexity of the system or systems or because of failure by the customer to provide adequately qualified personnel and supervision for maintenance and extension of the consumer s piping system or systems, or for any other sufficient reason or cause.

2. The Company will require the installation of mechanical, or other, methods or devices on the customer's side of the meter to prevent backflow whenever the customer maintains a separate pressure system or a separate storage facility, or in any way increases the pressures of the water within his premises above the pressure furnished by the Company or has such equipment devices or arrangement of piping, storage or industrial methods or processes that might under certain conditions raise the pressure of the water within his premises above the pressure of the water in the mains of the Company. Plans for such installations must be approved by the Company.

3. As a protection to the customer's plumbing system a suitable pressure relief valve must be installed and maintained by him at his expense when backflow devices are installed on the consumer s side of the meter.

4. Any device installed for the prevention of backflow as may be required under these Rules and Regulations, shall, unless the Company approves otherwise in writing, be located

above ground and in such a manner as to be safe from flooding or submergence in water or other liquids, properly protected from external damage, freely accessible and with adequate working room for inspections, testing and repairing.

All such devices shall be tested by customer at least once every four months and inspected internally not less than once annually by customer. Repairs, replacement of parts, etc., shall be made whenever necessary at the expense of the customer. Making of tests and annual inspections shall be the responsibility of the customer and shall be made by the customer or other qualified person or persons in accordance with methods acceptable to the Company. The customer is required to maintain a log of tests and inspections made. Records of tests and inspections shall be made on forms prescribed by the Company and a copy of such records shall be furnished to the Company. Failure of the customer to make the proper tests and submission of records may, at the option of the Company, result in the Company's making the tests, needed repairs and replacements and charging the costs thereof to the customer.

5. In the case the customer connects an irrigation system to the Company's system, an anti-siphon valve or backflow prevention valve, which provides an air gap when there is no water flow into the irrigation system, shall be installed before the irrigation system begins. Inspection and approval of such devices shall be by the Company. Installation, maintenance and operation shall be by the customer.

6. Upon request of the Company, the customer shall present an affidavit either certifying to the fact that there are no connections or other installations of the type prohibited in paragraph 1 of this Section on his premises or describing in detail all non-conforming connections or installations.

7. The several conditions relative to the installation and maintenance of cross-connections and other physical connections referred to in this Section shall be subject to change to meet changing requirements of the State and Federal health authorities and of the county Building Code.

8. Failure on the part of the customer to comply with the Company's requirements relative to cross-connections and backflow protection will be sufficient reason for discontinuing water service until such time as the requirements have been met.

RULE XV

AUTOMATIC FIRE SPRINKLER SERVICE

1. Separate automatic fire sprinkler service may be furnished upon Company approval only and where adequate provision is made to prevent diversion of water through such service to other purposes. The fire service connection will be installed by the Company and shall be paid for by the customer in accordance with the provisions for the installation of new service connections. After the water is turned on, the Company assumes no liability for damage of any kind whatsoever that may occur to the premises served, regardless of cause.

2. No charge will be made for water used through such connection for fire protection purposes but any water lost through leakage or used in violation of the conditions contained herein shall be paid for by the customer at the regular schedule of water rates and charges. The Company may disconnect and remove the said service connection if water is used for other than fire protection purposes or if leaks are not corrected. Whenever such disconnection is in effect, the Company shall not be held in any way liable for loss or damage sustained due to such condition.

3. Service charges will be in accordance with the rates established by the Company from time to time.

4. All automatic fire sprinkler services may be metered with a detector check valve and a by-pass meter of a type approved by the Company. The meter and the meter box required therefor shall be furnished by the customer and approved as to size and type by the Company. All service connections shall become the property of the Company after installation.

RULE XVI

USE OF AND DAMAGE TO FIRE HYDRANTS, CHANGE IN HYDRANT LOCATION, RESPONSIBILITY FOR MAINTENANCE AND OPERATION OF PRIVATE HYDRANTS

1. Any use of a fire hydrant or tampering therewith or the taking of water there from for purposes other than fire protection by persons other than authorized employees of the Fire Department or the Company is prohibited, except upon prior application to and written permit by the Company. The Fire Department shall have the prior right to use any hydrant at any time and shall have the authority to remove peremptorily, if necessary in case of fire, any connection that may be made to a hydrant under a permit and the connections thereto shall be subject to the direction and approval of the Company. The customer shall not use hydrant main line valves to control flows.

2. Application for a permit for the use of a fire hydrant for purposes other than fire protection shall be made in writing to the Company and when required, shall be accompanied by a deposit in cash. It shall be non-transferable and shall be shown upon demand by the permittee, its agents or employees. The Company reserves the right to reject any application, to refuse to issue any permit and to revoke any permit at any time. The Company also reserves the right to perform for the permittee at his expense the work of installing and removing the connections and of operating the hydrant. No permit will be issued unless the permittee agrees to notify the Company as soon as the use of the hydrant is finished. In the event that a permit shall be revoked, the use of the hydrant thereunder shall cease immediately and all connections thereto shall be properly removed forthwith. The Company will inspect each hydrant which has been used under a permit, and all costs of repairs which the Company may adjudge to be due to such use and the cost of inspection shall be paid for by the permittee. All water drawn from a hydrant under permit shall be metered or estimated as to quantity in a manner satisfactory to the Company and shall be paid for by the permittee at the current water rates. The permittee shall pay all of the costs of connecting to and disconnecting from the hydrant.

3. Only regulation fire hydrant wrenches which shall have been approved by the Company shall be used for the operation of fire hydrants. The use of any other type of wrench or operating device shall not be permitted. The permit will be revoked if other than approved regulation fire hydrant wrenches are used.

4. The permittee shall report promptly any defect in or damage to the hydrant. The cost of any damage to property or of any injury to persons resulting from the use of the hydrant shall be paid for by the permittee. The company will not be held responsible for any damage to property or injury to persons arising from the use of any hydrant for any cause whatsoever. Any damage to fire hydrants shall be paid by the person or organization responsible for the damage.

5. The Company will, if it approves the request for a change in location of a hydrant, change such location provided the cost of all labor, material, equipment and all other charges are paid by the person requesting such change.

6. The Company will not be responsible for the operations and maintenance of private fire hydrants located within customers' lot(s). The customer shall at his expense test periodically and keep in good and safe working condition including proper maintenance all private hydrants under his control and not under the jurisdiction of the Company.

RULE XVII

REFRIGERATION AND AIR CONDITIONING EQUIPMENT

1. No new installation or replacement installation of refrigeration or air conditioning equipment requiring the use of water from the Company water system shall be made on any premises until such installation has been authorized in writing by the Company. Before new or replacement installation of such refrigeration or air conditioning equipment is made, the owner shall inform the Company in writing of the make, type, horsepower and tonnage of installation, the minimum and maximum water requirements, the name and address of the applicant, the location of the premises where the unit is to be installed, and such additional information regarding the proposed installation as may be required by the Company.

2. Any water using unit of refrigeration or air conditioning equipment of small size shall be equipped with an automatic water regulating device and/or water conserving device which will limit the total flow of water to 6 gallons per minute momentary actual load or 2 gallons per minute per ton of refrigeration, whichever is the less, and which will automatically stop the flow of water when the unit stops.

3. Any large size water using unit of refrigeration or air conditioning equipment shall be equipped with water conserving device which will (a) limit the flow of water to not more than 0.2 gallons per minute per ton of refrigeration, actual load and (b) automatically stop the flow of water when the unit is shut down.

4. For the purpose of these regulations a unit of less than 25 tons rated capacity shall be considered a small unit.

5. Where several units serve the same premises, their combined capacity shall be considered to be the capacity of the unit.

6. All installations of water using refrigeration and air conditioning equipment, regardless of capacity, which are to be served by the Company water system must conform with all other applicable Rules and Regulations.

7. Any change in the customer's refrigeration or air conditioning equipment which results in an increase in average water consumption may require a payment of a CIAC Fee per Rule XX.7.

RULE XVIII

RESALE OF WATER

Unless specifically agreed upon, the customer shall not resell any water received by him from the Company.

RULE XIX
SEVERABILITY

If any rule, section, sentence, clause, or phrase of these Rules and Regulations or its application to any person or circumstance or property is held to be unconstitutional or invalid, the remaining portions of these Rules and Regulations or the application of these Rules and Regulations to other persons or circumstances or property shall not be affected. The Company hereby declares that it would have adopted these Rules and Regulations, and each and every rule, section, sentence, clause, or phrase thereof, irrespective of the fact that any one or more other rules, sections, sentences, clauses, or phrases be declared unconstitutional or invalid.

RULE XX

CONTRIBUTION IN AID OF CONSTRUCTION FEE
(FACILITIES CHARGES)

1. As a condition of receiving service or substantially increasing water consumption to new or substantially modified facilities, developer and commercial applicants shall be required to pay a contribution in aid of construction to the Company, which shall be non-refundable except as provided in this Rule.

2. Contribution in aid of construction payments are used by the Company for the purpose of expanding the capacity of the water system, including:

(a) Construction of new wells or increasing the capacity of existing wells;

(b) Construction of new reservoirs;

(c) Construction of new primary transmission system or improvements to increase the capacity or efficiency of the existing primary transmission system;

(d) Construction of water treatment facilities;

(e) Related improvements intended to increase the capacity, efficiency or quality of the primary water system; and

(f) Increased capacity or improved service of electrical systems required for Items 2a-e above.

3. New facilities shall mean premises or facilities that have not been connected to the Company s water system, but shall not include any new connections to single family lots if the lots were in existence as of January 1, 1988.

4. Substantially modified facilities shall mean premises or facilities to which any material change is made in the size of the premises or facilities, or in the character or extent of any commercial activities conducted at the premises or facilities, that results in an estimated increase in annual average water usage by the customer in excess of 300 gallons per day.

5. The contribution in aid of construction required as a condition of service to a new facility shall be payable only once for such facility, provided that an additional contribution in aid of construction may be required from developers or commercial customers for facilities that are substantially modified.

6. The amount of the contribution in aid of construction shall be equal to an equivalent per gallon charge, calculated as follows:

(a) If the Company has no capacity available at the time a request for service or substantial modification is made, the contribution in aid of construction payment shall be based on the Company's good faith estimate, based on engineering and construction analyses, of the anticipated total cost to construct the next capacity addition, and is calculated as follow:

Estimated Daily Gallons for Proposed or Existing Development	X	Estimated Cost per Gallon of the Company's Next Capacity Addition	X	If CIAC is Based On Historical Costs: CPI in the year of payment / CPI for the base year (last capacity addition used in calculating CIAC)

(b) If the Company has capacity available at the time the request for service is made, the applicant shall pay a contribution in aid of construction payment as follows:

Estimated Daily Gallons for Proposed or Existing Development	X	Actual Cost per Gallon of the Company's Most Recent Capacity Addition	X	CPI in year of contribution payment / CPI for base year (last capacity addition used in calculating CIAC)

"CPI" shall mean the "Consumers Price Index for all urban Consumers, Honolulu, Hawaii, ALL ITEMS", as published by the Bureau of Labor Statistics, United States Department of Labor.

(c) Where the contribution in aid of construction is based on estimated construction costs, promptly following completion of construction, the Company shall deliver to the applicant a statement showing the actual costs of construction and a recalculation of the contribution in aid of construction based on actual construction costs. Any difference between the originally calculated and recalculated contribution in aid of construction shall be payable by the Company or the applicant, as applicable, within thirty (30) days of the date of the statement.

7. The contribution in aid of construction shall be calculated on the basis of the Company's estimate of (a) the customer's annual average water consumption, in the case of new facilities, or (b) the customer's increased water consumption, above historical trends in the case of substantially modified facilities.

8. The following guidelines are currently being used by the Company to estimate water consumption:

(a) Single-family detached residences: 600 gpd.

(b) Apartment/condominiums: 400 gpd.

(c) Commercial uses: 220 gpd per 1,000 square feet plus estimated irrigation usage.

(d) Other uses by estimates of consumption approved by the Company.

(e) Estimates of consumption are to be made by the Company and, if by the customer, will require adequate justification for Company approval.

These guidelines are approximate and each development will be evaluated based on design and other factors that influence water usage.

9. Notwithstanding anything contained herein to the contrary, an additional contribution in aid of construction may be required from customers whose water consumption results in an increase in annual average water usage in excess of the greater of 300 gallons per day or 20% over the annual average water consumption that was initially utilized in calculating the contribution in aid of construction initially paid by a developer in the case of new or modified facilities pursuant to paragraph 6.

10. The contribution in aid of construction ("CIAC") for new facilities shall be estimated at the time that an applicant makes a request of the Company for a "will serve" letter. A subsequently issued "will serve" letter will only state the Company's ability and willingness to supply the applicant with the requested service, conditioned upon the applicant's execution of an Extension Agreement within a specified period of time, payment of the CIAC, and construction of or contribution to the cost of any special facilities required to serve the applicant that are not paid for with CIAC. The total CIAC fee to be paid will be dependent on the rate provided for in the Company's Rules and Regulations in effect at the time that final payment is tendered. CIAC shall be payable in full upon execution of an Extension Agreement. If the full CIAC is not paid upon execution of the Extension Agreement, the Extension Agreement and the "will serve" letter shall be null and void. Any Extension Agreement issued by the Company shall not be binding until payment is received.

11. The contribution in aid of construction for substantially modified facilities shall be payable (a) within thirty (30) days after the customer receives a building permit, or (b) as of the date upon which the customer increases water usage as a result of the modification if the customer fails to provide the company with prior written notice of the modification.

12. Any will-serve agreement entered into after June 30, 2015 shall automatically terminate if the applicant does not execute an Extension Agreement and satisfy all other conditions contained in the will-serve agreement within the time set forth in the will-serve agreement. In addition, any Extension Agreement entered into after June 30, 2015 shall automatically terminate if the applicant has not completed construction of the project for which service was requested within one year after the date of the Extension Agreement, or such longer or shorter time as may be set forth in the Extension Agreement. The Company may agree to extend this date if facilities constructed or to be constructed with the CIAC are not required by another user. In the event of such termination of either the will-serve agreement or the Extension Agreement: (a) the Company's commitment to reserve capacity for the applicant shall be null and void; and (b) if the applicant subsequently requests service for the same property, applicant will be required to sign a new will-serve agreement and a new Extension Agreement under which the contribution-in-aid of construction will be recalculated based on the cost of facilities required to serve applicant and applicant will receive a credit in the amount of the unreimbursed balance of the contribution in aid of construction previously paid. In the event of such termination, the Company shall have no obligation to reimburse the applicant for any contribution in aid of construction paid by the applicant. However, the Company will reimburse the applicant for all or a part of the contribution in aid of construction paid by the applicant if (i) such funds have not yet been used and are not required to complete construction of the facilities for which they were collected, or (ii) to the extent that the Company has received contributions in aid of construction from another applicant who will utilize the capacity originally reserved for the applicant.

13. In lieu of requiring an applicant to pay a contribution in aid of construction pursuant to this Rule, the Company may, in its discretion, allow an applicant to contribute or construct facilities that are required to serve the applicant's project pursuant to Rule XXI, System Extensions. Such facilities may include those described in Section 2 of this Rule. Further, in addition to requiring an applicant to pay a contribution in aid of construction pursuant to this Rule, the Company may require an applicant to construct or contribute to the cost of constructing special facilities that are required to serve the Applicant pursuant to Rule XXI to the extent that the cost of such facilities is not included in the contribution in aid of construction.

14. Section 12 of this Rule shall not apply to any applicant who has entered into a will-serve agreement before June 30, 2015. Section 6 of this Rule shall not apply to any applicant who has entered a will serve agreement before June 30, 2015, except to the extent that the terms of such agreement are consistent with the terms of Section 6; provided that, if full payment of the CIAC due under such will-serve agreement has not been paid and the will-serve agreement provides that final payment will be dependent on the rate in effect at the time of such payment, the total CIAC payable will be calculated in accordance with Section 6 above**.** In addition, Section 6 shall not apply to any residential units that are subject to the Memorandum of Understanding dated March 2, 1988 by between Transcontinental Development Company and the County of Hawaii.

RULE XXI
SYSTEM EXTENSIONS

1. Extensions of mains from the Company water system to serve new customers, and connections to main extensions with respect to which customer contributions were made, shall be made under the provisions of this rule. In addition, the Company may, in its discretion, allow an applicant to contribute or construct additional property or facilities that are required to serve the applicant's project pursuant to this Rule XXI in lieu of, or in addition to, requiring the applicant to pay a contribution in aid of construction pursuant to this Rule XXI. As used in this Rule XXI, an "extension" shall include any such additional property or facilities. An extension contract shall be executed by the Company and the applicant before the Company commences construction work on an extension or, if an extension has been constructed by applicant, before the property or facilities comprising the extension are transferred to the Company.

2. Customer contributions may be either refundable or non-refundable depending on their use. The non-refundable construction cost, for the purposes of this rule, shall be the cost of installing facilities of adequate capacity for the service requested. If the Company, at its option, determines that it is appropriate to install facilities with a larger capacity or resulting in a greater footage of extension than required for the service requested, or if the applicant elects to construct such larger facilities, the oversizing cost, for the purposes of this rule, shall be the difference between the total construction cost of the facilities installed and the non-refundable construction cost. Such oversizing cost shall be subject to refund in accordance with Sections 6(g) and 6(h) of this rule.

3. Ownership, design and construction of property and facilities shall be in accordance with the following provisions:

(a) Any facilities installed or property dedicated hereunder shall be the sole property of the Company.

(b) The size, type, and quality of materials, and their location, shall be specified by the Company, and the actual construction shall be done by the Company or by a contractor acceptable to it.

(c) When an extension must comply with an ordinance, regulation, or specification of a public authority, the estimated and actual construction costs of the extension shall be based upon the facilities required to comply therewith.

(d) The Company may, but will not be required to, make extensions under this rule in easements or rights of way where final grades have not been established, or where street grades have not been brought to those established by public authority. If extensions are made when grades have not been established and there is a reasonable probability that the existing grade will be changed, the Company may require that the applicant or applicants for the extension deposit, at the time of execution of the extension contract, the estimated net cost of relocating, raising or lowering facilities upon establishment of final grades. Adjustment of any difference between the amount so deposited and the actual cost of relocating, raising or lowering facilities shall be made within ten days after the Company has ascertained such actual cost. The net deposit representing actual cost is not subject to refund. When such displacements are determined by proper authority not to be required, the entire deposit related to the proposed relocation, raising or lowering shall be refunded.

4. Estimates, plans and specifications shall be required of the applicant as follows:

(a) As part of the application for an extension, the applicant s engineer shall prepare a preliminary sketch and rough estimates of the cost of installation to be contributed by said applicant.

(b) The Company shall review plans submitted to it within a reasonable time after receipt of such plans, specifications and cost estimates of the proposed extension. If the extension is to include oversizing of facilities for which there will be an oversizing cost, appropriate details shall be set forth in the plans, specifications and cost estimates.

(c) The applicant shall furnish a map to a suitable scale showing the street and lot layouts and, when requested by the Company, contours or other indication of the relative elevation of the various parts of the area to be developed. If changes are made subsequent to the presentation of this map by the applicant, and these changes require additional expense in revising plans, specifications and cost estimate, the applicant s engineer shall make those changes at no expense to the Company.

5. Timing and adjustment of customer contributions shall be in accordance with the following provisions:

(a) Unless the applicant for the extension elects to arrange for the installation of the extension himself, as permitted by Section 6(e), the full amount of the required customer contribution will be required by the Company at the time of execution of the extension contract. An acceptable surety bond may, at the sole discretion of the Company, also be acceptable.

(b) If the applicant for an extension posts a surety bond in lieu of cash, such surety bond must be replaced with cash not less than ten (10) calendar days before construction is to commence. However, the applicant may be required to deposit sufficient cash to cover the cost of materials before they are ordered by the Company.

(c) An applicant for an extension who makes a contribution shall be provided with a statement of actual construction cost and oversizing cost showing in reasonable detail the costs incurred for material, labor, any other direct and indirect costs, overheads, and total costs, unit costs or contract costs, whichever are appropriate.

(d) The statement shall be submitted within a reasonable time after the actual construction costs of the installation have been ascertained by the Company.

(e) Any difference between the actual construction costs and the total amount of the customer contribution shall be shown as a revision of the amount of the customer contribution and shall be payable by the applicant, or by the Company, as applicable, within thirty (30) days of date of submission of statement.

6. Customer contributions and refunds shall be treated in the following manner:

(a) Unless the procedure outlined in Section 6(e) is followed, an applicant for an extension to serve a new development, subdivision, tract, housing project, industrial development or organized commercial district, etc., shall be required to pay to the Company, before construction is commenced, a non-refundable contribution equal to the estimated

non-refundable construction cost of the extension to be actually installed, from the nearest Company facility at least equal in size or capacity to the extension required to serve both the new customer and a reasonable estimate of the potential customers who might be served directly from the extension without additional extension. The cost of the extension shall include necessary connections, pipes, fittings, valves, valve boxes, meters, meter enclosures, booster stations, pressure regulating stations, and other water system distribution appurtenances and Hawaii and Federal income taxes applicable to the contribution calculated by the full gross up method.

(b) If special facilities consisting of items not covered by Section 6(a) are required for the service requested, the cost of the special facilities shall be included in the customer contribution.

(c) In addition to the non-refundable contribution required by Sections 6(a) and 6(b), an applicant for an extension shall be required to advance to the Company the oversizing cost estimated by the Company for the extension deemed to be appropriate by the Company. (This additional contribution shall be refundable in accordance with Sections 6(g) and 6(h) of this rule.)

(d) A pioneer, for the purposes of this rule, shall be a developer/customer who makes a contribution to pay the oversizing cost of an extension.

(e) In lieu of providing the customer contribution in accordance with Sections 6(a), 6(b) and 6(c), the applicant for an extension shall be permitted, if deemed to be qualified in the sole judgment of the Company, to construct and install the facilities, or to arrange for their installation. If extension facilities are arranged for by applicant and constructed by others, the extension shall be installed pursuant to competitive bidding procedures unless waived by the Company. The cost, including the cost of inspection and supervision by the Company, shall be paid directly by applicant. The applicant shall provide the Company with a statement of actual construction cost in reasonable detail. The installation shall be in accordance with the plans and specifications submitted by the Company pursuant to Section 4(b). All facilities shall be dedicated to the Company through appropriate deeds, rights of way, easements, bills of sale or other

instruments as required upon completion, in accordance with Section 3(a) of this rule. At the time of dedication, the customer/developer will pay to the Company Hawaii and Federal income taxes calculated by the full gross up method based on the value of the system being dedicated as determined in this section above.

(f) If a subsequent applicant connects to an extension which was paid for by one or more pioneers, that subsequent applicant shall be required to pay a non-refundable extension refund charge equal to its proportionate share of the oversizing cost of such extension based on anticipated consumption. Such extension refund charge shall only be assessed to the extent that it is to be paid by the Company to the pioneer or pioneers pursuant to Sections 6(g) and 6(h), or to the extent that the Company has previously reimbursed the pioneer for such oversizing costs.

(g) A refund of all or part of the refundable customer contribution made by a pioneer shall be made if subsequent applicants are provided service from the extension and pay an extension refund charge based on their proportionate share of the oversizing cost of the extension. The refunds, if any, shall be made from subsequent extension refund charges covering a proportionate share of the oversizing cost for the extension.

(h) Refunds to pioneers, if any, will be made annually in the first quarter of each applicable year to pioneers on record as of December 31 of the previous year, for a period of ten years following the year that the extension was placed into service. Refunds shall be made without interest. The total refunds which a pioneer may receive shall not exceed the amount of the customer contribution paid by the pioneer.

(i) All customer contributions and extension refund charges shall include the Hawaii and federal income tax applicable to the contribution calculated at the marginal income tax rate applicable to corporations using a full gross-up method.

7. Any contract entered into under this rule may be assigned, after settlement of actual construction costs, after written notice to the Company by the holder of said contract as shown by the Company's records. Such assignment shall apply only to those refunds which become due more than thirty (30) days after the date of receipt by the Company of

the notice of assignment. The Company shall not be required to make any one refund payment under such contract to more than a single assignee.

8. Extension contracts may be terminated as follows: Any contract entered into under Section 6 of this rule may be purchased by the Company and terminated, provided the payment is not in excess of the remaining contract balance.

9. If an applicant constructs or contributes to the cost of construction of facilities pursuant to this Rule, and if the applicant does not use such facilities within the time required under the Extension Agreement, the Company may elect to terminate the Extension Agreement and to use any such facilities to serve other customers. In that event, (a) the Company's commitment to reserve capacity for the applicant shall be null and void; and (b) if the applicant subsequently requests service for the same property, the applicant will be required to sign a new will-serve agreement and a new Extension Agreement, and will receive a credit in the amount of the unreimbursed balance of amounts previously paid by the applicant for facilities to serve such property under this Rule. In the event of such termination, the Company shall have no obligation to reimburse the applicant for any amounts paid by the applicant for such facilities, except for refundable contributions which shall be refunded in accordance with Section 6 of this Rule. However, the Company may, it its discretion, reimburse the applicant for all or a part of the amounts paid by the applicant pursuant to this rule if (i) such funds have not yet been used and are not required to complete construction of the facilities for which they were collected, or (ii) the Company has received funds from another applicant who will utilize the capacity originally reserved for the applicant.

Meter Charge by Meter Size (inches)	Phase 1 (Effective 1/1/19)	Phase 2 (Effective 1/1/20)
5/8" (Residential & Non-Residential)	$ 12.07	$ 12.39
3/4" (Residential & Non-Residential)	$ 12.07	$ 12.39
1"	$ 23.14	$ 23.74
1 1/2"	$ 40.59	$ 41.64
2"	$ 55.35	$ 56.78
3"	$ 110.70	$ 113.56
4"	$ 184.48	$ 189.25
6"	$ 368.94	$ 378.48
8"	$ 664.10	$ 681.28

Monthly Water Consumption Charge

Quantity Charge	Phase 1 (Effective 1/1/19)	Phase 2 (Effective 1/1/20)
per 1,000 gallons of water consumption	$ 1.3177	$ 1.3517

Water Availability Charge

$2.00 per month will be charged to the owner of each lot at which a service connection is possible but has not been applied for.

Private Fire Service Charges

For each connection for automatic fire sprinklers or other private fire protection, there shall be a charge per month based on the size of the connection as follows:

Private Water Service by Meter Size (inches)	Phase 1 (Effective 1/1/19)	Phase 2 (Effective 1/1/20)
3"	$ 110.70	$ 113.56
4"	$ 184.48	$ 189.25
6"	$ 368.94	$ 378.48
8"	$ 664.10	$ 681.28

WEST HAWAII WATER COMPANY

WHWC Tariff No. 1
Fifth Revised Sheet 39
Cancels Fourth Revised Sheet 39

POWER COST CHARGE

All water use shall be subject to the imposition of a Power Cost Charge in addition to the Monthly Standby Charge and the Monthly Water Consumption Charge. The Power Cost Charge is assessed per 1,000 gallons. The amount of the Power Cost Charge shall be computed by multiplying the actual cost per kilowatt hour for the billing period by the pump efficiency factor of 5.63 kilowatt hours per thousand gallons, and then adding the associated Public Service Company tax of 5.885% and the Public Utility Commission fee of 0.50%.

Formula to be used:

Power Cost Charge Per Thousand Gallons =
Actual electrical cost per kwh
Times 5.63 kwh per thousand gallons
Times 1.06385

NEW MEXICO WATER SERVICE COMPANY
SEWER
THIRTEENTH REVISED RATE NO. 1
CANCELING TWELFTH REVISED RATE NO. 1

RESIDENTIAL SEWER SERVICE

APPLICABILITY:
This rate is applicable for sewer service for all single family residences.

TERRITORY:
All single family residences provided with sewer service.

MONTHLY RATES:

Customer Charge: $33.32 X

Plus Commodity Charge:
$7.24 for each 1,000 gallons of average monthly winter water use, prorated per 100 gallons. X

Average winter water use determined from billings for the residence made in each January, February, and March period. Monthly charge adjusted on billings made each April and would be constant through March of the following year.

Rates when average monthly winter water use is not known:
If a customer 1) occupies a newly constructed residence or has not established a winter quarter average, or 2) does not receive water service from New Mexico Water Service Co., the monthly Rate will be the average of all the billings for residential customers for which average monthly winter water use information is available.

Minus Return Flow Use Credit:
$.174 for each 1,000 gallons of average monthly winter water use, prorated per 100 gallons.

EFFECTIVE

THIRTEENTH REVISED RATE NO. 1
CANCELING TWELFTH REVISED RATE NO. 1

RESIDENTIAL SEWER SERVICE

MONTHLY MINIMUM:
Customer Charge plus applicable taxes.

TERMS OF PAYMENT:
All bills under this rate are due and payable when rendered and become delinquent twenty (20) calendar days thereafter.

TERMS AND CONDITIONS:
New Mexico Water Service Co.'s filed rules apply to service under this schedule.

TAX ADJUSTMENT CLAUSE:
Billings under this schedule may be increased by an amount equal to the taxes payable under the Gross Receipts and Compensation Tax Act and all other taxes, fees or charges (exclusive of ad valorem taxes and state and federal income taxes) payable by New Mexico Water Service Co. and levied or assessed by any governmental authority on the utility service rendered, or on the right or privilege of rendering the service, or on any object or event incidental to the rendition of this service.

CANCELING TWELFTH REVISED RATE NO. 2

COMMERCIAL SEWER SERVICE

APPLICABILITY:
This rate is applicable for sewer service for all customers except for residential (Rate No. 1) and institutional (Rate No. 4) customers.

TERRITORY:
All customers provided with sewer service, except residential and schools.

MONTHLY RATES:

Customer Charge based on size of water meter as follows:

Water Meter Size (inches)	Customer Charge	
5/8	$ 33.32	X
3/4	$ 41.66	X
1	$ 53.37	X
1 1/2	$ 86.72	X
2	$ 120.09	X
3	$ 233.53	X
4	$ 417.05	X
6	$ 850.80	X
8	$ 967.58	X

Where meter size is indicated by two sizes, the larger size will be used to determine the Customer Charge. For example, the Customer Charge for a customer with a ¾-inch X 1-inch meter will be based on a 1-inch meter.

Plus Commodity Charge:
$7.24 for each 1,000 gallons of average monthly winter water use, prorated per 100 gallons. X

Average winter water use determined from customer billings made in each January, February, and March period. Monthly charge adjusted on billings made each April and would be constant through March of the following year.

COMMERCIAL SEWER SERVICE

Rates when average monthly winter water use is not known:
The initial monthly rate will be established by estimating average monthly winter water use. This will be determined by the utility company using information readily available to it, and information provided by the customer. Once actual average monthly winter use is known, the utility company will prepare an adjusted customer billing or credit, as applicable, for the difference between the initial rate and the actual rate for all months in which the initial monthly rate was applied.

Charges in addition to those indicated above for customers having sewage with characteristics differing from normal domestic sewage, such as wastewater with an elevated biochemical oxygen demand or industrial wastewater containing heavy metals or other unusual constituents, or wastewater having unusually high intermittent flows:

110 percent of all costs incurred by company for collection, treatment, sampling, analysis, monitoring, administration, professional services, facilities, and equipment which would not have been incurred if customer's sewage had been normal domestic sewage.

Minus Return Flow Use Credit:
$.174 for each 1,000 gallons of average monthly winter water use, prorated per 100 gallons.

MONTHLY MINIMUM:
Customer Charge plus applicable taxes.

TERMS OF PAYMENT:
All bills under this rate are due and payable when rendered and become delinquent twenty (20) calendar days thereafter.

TERMS AND CONDITIONS:
New Mexico Water Service Co.'s filed rules apply to service under this schedule.

TAX ADJUSTMENT CLAUSE:

AN INTRODUCTION TO CUSTOMERS

The tariff located here in the Company's offices is available and open for your review. The Company is responsible to maintain its tariff on an absolutely current basis and must, by State law and regulations, maintain it in exactly the same format as its Company's tariff which is on file at the Board of Public Utilities, ., 44 South Clinton Avenue, 9th Floor, Trenton, NJ.

If, after your review of this tariff and discussion with appropriate utility employees, you still have questions regarding clarification or interpretations, please contact the Board of Public Utilities, Division of Water and Sewer, Bureau of Rates and Tariff Design at 1-609-633-9800 or the Board's Division of Customer Assistance at 1-609-341-9188 or 1-800-624-0241 or on their website at www.nj.gov/bpu/.

As a customer, you have the right to review this tariff at the Company's offices or at the Board's office in Trenton. Your inquiries will be handled by the Board's Staff in an expeditious manner in order to protect your rights as well as those of the water company. Please feel free to exercise this right by telephoning or by visiting the Board's offices at any time between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, or by writing a letter. The letter should contain the writer's name, address and phone number. If the writer is a customer of record, the account number should be included.

The Company has available, here in its office, and will provide for your review, a handout entitled " Customer Rights, Responsibilities and Frequently Asked Questions.." This is a summary of the most frequent customer complaints and rights; it does not include all customer rights or utility obligations.

The Board of Public Utilities is responsible for the final interpretation and enforcement of a utility's tariff provisions and rates. The utility is bound by New Jersey's statutes and the Board's regulations. If a conflict should exist, the Board's regulations supersede the tariff provision absent approval to the contrary by the Board.

First Revised Sheet B

B.P.U. No. 2 – WATER

AN OVERVIEW OF COMMON CUSTOMER COMPLAINTS AND CUSTOMER RIGHTS

(1) No public utility shall refuse to furnish or supply service to a qualified applicant.

DEPOSITS

(2) If after notice of the methods of establishing credit and being afforded an opportunity, a customer has not established credit, the utility may require a reasonable deposit as a condition of supplying service.

(3)
The utility shall furnish a receipt to each customer that makes a deposit. If the deposit is provided by mail, internet or telephone, the utility may comply with this requirement by displaying the amount of the deposit on the customer's next bill. (N.J.A.C. 14:3-3.4(i)).

Each utility shall review a residential customer's account at least once every year and a nonresidential customer's account at least every two years. If this review indicates that the customer has met the utility's standard requirements for establishing credit, the utility shall refund the customer's deposit. (N.J.A.C. 14:3-3.5 (a)).

Interest payments on the customer deposits held to secure residential accounts shall be made to the customer at least once during each 12-month period in which a deposit is held. (N.J.A.C. 14:3-3.5(g)).

When a utility refunds a deposit or pays a customer interest on a deposit, the utility shall offer the customer the option of a credit to the customer's account or a separate check. In either case, the utility shall provide the full refund or payment within one billing period after the review required under N.J.A.C. 14:3-3.5(a) is completed, or after the interest payment is due, as applicable, unless other reasonable arrangements are made between the customer and the utility. (N.J.A.C. 14:3-3.5(h)).

(4) Where a water or sewer utility furnishes unmetered service, for which payment is received in advance, it may not request a deposit. (N.J.A.C. 14:3-3.4(j)).

DEFERRED PAYMENT ARRANGEMENTS

(5) A customer is entitled to at least one deferred payment plan in one year. In the case of a residential customer who received more than one utility service from the same utility (ex: water and sewer; gas and electric) and the amount which is in arrears is a combination of those services, the utility shall offer a separate deferred payment agreement for each service based on the outstanding balance for that service. (N.J.A.C. 14:3-7.7(b).2) If the customer defaults on the terms of the agreement, the utility may discontinue service after providing the customer with a notice of discontinuance. In the case of a residential customer who receives more than one utility service from the same utility and has subsequently entered into an agreement for each separate service, default on one such agreement shall constitute grounds for discontinuance of only that service. (N.J.A.C. 14:3-7. 7(f))

DISCONTINUANCE OF SERVICE

(6)
A utility shall not discontinue service because of nonpayment in cases where a charge is in dispute, provided the undisputed charges are paid and the customer has requested that the Board of Public Utilities investigate the disputed charge. (N.J.A.C. 14:3-3A.2(e)5)

In accordance with N.J.A.C. 14:3-7.6(b) the utility shall notify the customer that they may make a request to the Board of Public Utilities for an investigation of the disputed charge.

(7)
A notice of discontinuance sent to the customer shall be postmarked no earlier than (15) days after the postmark date of the outstanding bill. The notice of discontinuance for nonpayment shall provide the customer with at least 10 days written notice of the utility's intention to discontinue service. (N.J.A.C. 14:3-3A.3)

The utility shall make good faith efforts to determine which of their residential customers are over 65 years of age, and shall make good faith efforts to notify such customers of discontinuance of service by telephone in addition to notice by regular mail. This effort may consist of an appropriate inquiry set forth on the notice informing customers that they may designate a third party to receive notice of discontinuance. (N.J.A.C. 14:3-3A.4(c))

(8) Public utilities shall not discontinue residential service except between the hours of 8:00 AM and 4:00 PM Monday through Thursday, unless there is a safety related emergency. There shall be no involuntary termination of service on Fridays, Saturdays, and Sundays or on the day before a holiday or on a holiday absent such emergency. (N.J.A.C. 14:3-3A.1(c))

(9) The occupant of a multiple family dwelling has the right to be notified of a pending service discontinuance at least fifteen (15) days prior to the service being discontinued. (N.J.A.C. 14:3-3A.6)

(10) A customer has the right to have any complaint against the utility handled promptly by that utility. (Board Order, Docket No. CO8602155)

(11) Each utility shall, upon request, furnish its customers with such information as is reasonable in order that the customers may obtain safe, adequate and proper service. (N.J.A.C. 14:3-3.3(a)) Each utility shall inform its customers, where peculiar or unusual circumstances prevail, as to the conditions under which sufficient and satisfactory service may be secured from its system. (N.J.A.C. 14:3-3.3(c)) Each utility shall supply its customers with information on the furnishing and performance of service in a manner that tends to conserve energy resources and preserve the quality of the environment. (N.J.A.C. 14:3-3.3(d))

B.P.U. No. 2 – WATER

METERS

(12) The utility must provide for one free water meter test within a year if the customer so requests it. The customer can request that the Company or the Board test the meter. A meter of a customer who has a complaint filed with the Board reflecting on the accuracy of the meter shall not be removed from service by the utility during the pendency of said complaint or during the following thirty (30) days unless otherwise authorized or directed by the Board. When a billing dispute is known to exist, the utility shall, prior to removing the meter, advise the customer that the meter may be tested by the utility or may have the Board of Public Utilities conduct the test of the meter or witness a testing of the meter by the utility, or the customer may have the test witnessed by a third party. (N.J.A.C. 14:3-4.5) Upon application to the Board, for a meter test, a $5.00 fee, in accordance with N.J.S.A. 48:2-56, shall be paid by the customer at the time application is made. (N.J.A.C. 14:3-4.5) A meter test arising from a billing dispute may be appropriate in instances which include, but are not limited to, unexplained increased consumption, crossed meters, consumption while an account is vacant or any other instance where the meter's accuracy might be an issue in the bill dispute. (N.J.A.C. 14:3-4.5)

(13) Whenever a water meter is found to be registering fast by more than one and one-half percent, an adjustment of charges shall be made in accordance with the following: (1) If the date when the meter had first become inaccurate can be definitely ascertained then the adjustment shall be such percentage as the meter is found to be in error at the time of test adjusted on the amount of the bills covering the entire period that the meter has registered inaccurately. In all other cases, the adjustment shall be such percentage as the meter is found to be in error at the time of the test on one-half of the total amount of the billing affected by the fast meter since the previous test. No adjustment shall be made for a period greater than the time during which the customer has received service through that meter. No adjustment shall be made for a meter that is found to be registering less than 100 percent except in the case of meter tampering, non-registering meters or in circumstances in which the customer should reasonably have known that his bill did not reflect his usage. (N.J.A.C. 14:3-4.6)

(14) A utility must maintain records of customers' accounts for each billing period occurring within a six year period. Such records shall contain all information necessary to permit computation of the bill. (N.J.A.C. 14:3-6.1(b))

THE UTILITY CUSTOMER'S

BILL OF RIGHTS

ESTABLISHED BY THE BOARD OF PUBLIC UTILITIES (BPU)

The following utility Customer's Bill of Rights is a synopsis of the most frequently cited sections of the New Jersey Administrative Code Title 14, Chapter 3. The Utility Customer's Bill of Rights is not meant to replace the regulations contained in N.J.A.C. 14:3 but is intended to give the utility customer a concise plain language guide to the regulations. Any application of the Utility Customer's Bill of Rights must be consistent with the regulations as contained in N.J.A.C. 14:3.

1. You have the right to utility service if you are a qualified applicant.

2. You shall not be asked to pay unreasonably high deposits as a condition of service, nor to make unreasonable payments on past-due bills.

3. You have the right to budget billing, or payment plans if you are a water customer.

4. You are entitled to at least one deferred payment plan in one year.

5. You have the right to have any complaint against your utility handled promptly by that utility.

6. You have the right to call upon the New Jersey State Board of Public Utilities (BPU) to investigate your utility complaints and inquiries. Your service may not be terminated for nonpayment during a BPU investigation.

7. If you suspect it is not working properly, you have the right to have your meter tested, free of charge once a year by your utility. For a $5 fee the meter test will be conducted under the supervision of the staff of the BPU.

8. You have the right to a written notice of termination, ten days prior to discontinuance of service.

THE UTILITY CUSTOMER'S

BILL OF RIGHTS
(Continued)

9. Residential service may be shut-off, after proper notice, Monday through Thursday, 8:00 a.m. to 4:00 p.m. A utility may not shut-off residential service on Friday, Saturday, Sunday or a holiday or the day before a holiday or if a valid medical emergency exists in your household.

10. If you live in a multi-family dwelling, you have the right to receive posted notice of any impending shutoff. This notice must be posted in a common area and/or sent individually to occupants.

11. You have the right to have a "diversion of service" investigation if you suspect that the level of consumption reflected in your utility bill is unexplainably high.

12. Service shall not be shut-off for non-payment of repair charges, merchandise charges or yellow page charges nor shall notice threatening such discontinuance be given.

13. You have the option of having a deposit refund applied to your account as a credit or of having the deposit refunded by separate check.

STANDARD TERMS AND CONDITIONS

1. DEFINITIONS

1.1 TARIFF, as referred to herein, is this entire "Tariff for Water Service" as the same may be amended or revised from time to time.

1.2 WATER SERVICE includes all service necessary to supply customers with water at their premises.

1.3 A CUSTOMER is a person, partnership, firm, corporation, governmental subdivision or agency receiving water service to premises, or water from a non premises location, as hereinafter defined.

1.4 PREMISES include the following:

(a) A building under one roof owned or leased by one customer, and occupied as one residence or one place of business.

(b) A combination of buildings owned or leased by one customer, in one common enclosure, occupied by one customer.

(c) The one side of a double house, having a solid vertical partition wall, or

(d) A building owned or leased by one customer having a number of apartments, offices, or lofts which are rented to tenants, using one or more halls and entrances in common.

(e) A combination of buildings owned or leased by one customer, in one common enclosure, none of the individual buildings of which is adapted to separate ownership.

(f) A cooperative apartment.

(g) A condominium unit.

(h) A public building.

(i) A single plot, such as a park, playground or cemetery.

(j) A water utility.

(k) Any point of connection from which water from the Company is taken by the end-use customer (for example, a fire hydrant).

STANDARD TERMS AND CONDITIONS

1 DEFINITIONS (Continued)

1.5 A TRANSMISSION MAIN is a pipe of large diameter which delivers water from wells, pumping stations, and or distribution reservoirs to the distribution mains.

1.6 A DISTRIBUTION MAIN is a pipe which delivers water to the service pipes attached thereto to serve the premises of customers.

1.7 A TAP or CORPORATION STOP is the valve or fitting on the distribution main to which the service pipe is attached. It is used for shutting off water to the service pipe.

1.8 A SERVICE PIPE is a supply pipe leading from the valve or corporation stop at the main to the valve or curb stop at the premises served.

1.9 A CURB STOP is the fitting or valve attached to the service pipe at the premises served for turning on and shutting off water.

1.10 A CONNECTING PIPE is the supply pipe connected to the service pipe at the curb stop and leading therefrom to the meter on the customer's premises.

1.11 A METER is a device which measures and registers the quantity of water supplied to the customer.

1.12 A PRESSURE REGULATOR is a device which is placed in pipelines to maintain automatically a given working pressure on its outlet side regardless of the pressure on the inlet side.

1.13 A PRESSURE RELIEF VALVE is a device installed in pipelines and other pressure systems to relieve automatically excess house system pressure, above the predetermined setting of the relief valve.

1. DEFINITIONS (continued)

1.14 A CHECK VALVE is an automatically operated valve designed to permit the flow of water in one direction only.

1.15 A BACKFLOW PREVENTER is any effective device, method or construction used to prevent backflow into a public potable water system. The term APPROVED BACKFLOW PREVENTER is a device which has been approved by the licensed operator of the public community water system in accordance with NJAC 7:10-10.2(e) and the Company's Cross Connection Control Plan.

1.16 A WATER MAIN EXTENSION is an addition to the existing system of transmission and distribution mains.

1.17 A METER ENCLOSURE, is a structure, approved by the Company, designed to contain, protect and provide accessibility for water meters and appurtenances installed outside of a premise.

1.18 A LOCK VALVE is a special valve that can be secured in the closed position by a padlock.

B.P.U. No. 2 - WATER

First Revised Sheet No. 11

STANDARD TERMS AND CONDITIONS

2. APPLICATION FOR ESTABLISHMENT OF SERVICE

2.1 Application for water service may be made by telephone, by mail or in person. Such application shall be made, and accepted, and any applicable deposits and fees shall be paid before any service is provided.

2.2 Written application is required only for establishment of service to a location not previously served. Application forms, where required, will be provided by the Company upon request.

2.3 All applications shall be made by the prospective customer or that customer's duly authorized agent.

2.4 A separate application for water service must be made for each water connection, including fire and irrigation service.

2.5 Applications for water service are not transferable. Each new owner or occupant of the premises to be supplied is required to make a new application.

2.6 Application shall not be accepted from a present or former customer in arrears on a valid bill for water service on any other premises for which the customer had made application for water service except in cases where a mutually agreed payment plan has been established between such customer and the Company for payment of a valid bill which is past due.

2.7 Each customer shall notify the Company promptly of any change of ownership of the premises supplied under his application.

2.8 Where more than one rate schedule is available to particular customers, the utility shall have at all times the duty to assist such customers in the selection of the rate schedule most favorable for their individual requirements and to make every reasonable effort to insure that such customers are served under the most advantageous schedule.

STANDARD TERMS AND CONDITIONS

2. APPLICATION FOR ESTABLISHMENT OF SERVICE (Continued)

2.9 Application may be made for a new connection and service pipe through which water service is not immediately desired. A special form of agreement shall be entered into, which provides that the customer shall bear the entire expense of making the connection, subject to a refund of the cost of installing the service line from the main to the curb, including the curb stop, whenever regular service is commenced. No refunds will be made after ten years from the date of installation of the connection.

2.10 The Company may reject applications for water service where such service is not available, or where such service might affect the supply to other customers or for failure of the applicant to agree to comply with any of these standard terms and conditions.

Second Revised Sheet No. 13

B.P.U. No. 2 – WATER

STANDARD TERMS AND CONDITIONS

3. CUSTOMERS' DEPOSITS

3.1 Deposits may be required of any existing customer or any applicant for existing water service who has not established or maintained satisfactory credit. The amount of the deposit will not exceed the estimated average bill for the billing period and type of service under the applicable rate schedule plus one month where monthly billing periods apply or one third when quarterly billing periods apply.

3.2 A customer in default in the payment of bills may be required to furnish a deposit or increase the existing deposit in an amount sufficient to secure the payment of future bills. Service may be discontinued for failure to make such deposit, after proper notice.

3.3 If a customer who has made a deposit fails to pay a bill, the Company may apply as much of such deposit as is necessary to pay the bill and may require that the deposit be restored to its original amount.

3.4 The Company will furnish a receipt to each customer who has made a deposit.

3.5 The Company shall review a residential customer's account at least once every year and a non-residential customer's account at least once every two years and if such review indicates that the customer has established credit satisfactory to the Company, then the outstanding deposit shall be refunded to the customer. The Company shall afford its customer the option of having the deposit refund applied to the customer's account in the form of a credit or of having the deposit refunded by separate check in a period not to exceed one billing cycle. (N.J.A.C. 14:3-3.5(a)).

3.6 Simple interest at a rate prescribed by the Board of Public Utilities shall be paid by the utility on all deposits held by it as required by N.J.A.C. 14:3-3.5(d). Interest payments shall be made at least once during each twelve-month period in which a deposit is held and shall take the form of credits on bills toward utility service rendered or to be rendered. The effect of this subsection shall be limited to those deposits, if any, held by electric, gas, telephone and water utilities to secure residential accounts (N.J.A.C. 14:3-3.5(g)).

3. CUSTOMERS' DEPOSITS (Continued)

3.7 Following discontinuance of service, the customer will receive a refund of any deposit, together with outstanding interest, less any amount due for unpaid bills.

3.8 Deposits will be required to guarantee the payment for metered water used for construction purposes where no advance payments have been made. These deposits will be based upon the cost of the meter, plus the estimated amount of water which may be used during construction. When the meter is returned to the Company in good condition, the deposit will be refunded together with outstanding interest, less any amount due for unpaid bills.

STANDARD TERMS AND CONDITIONS

4. SERVICE PIPES

4.1 The service pipe from the distribution main to the curb line, including the curb stop, meter pit and meter, will be furnished, installed and maintained by the Company at its expense, except as otherwise provided in this Tariff.

4.2 Only employees or other persons authorized by the Company will be permitted to make connections to the mains, access meter pits, operate curb stops and remove, service, or repair meters of the Company.

4.3 The Company will control the size of the opening to be made in the distribution main and the size of the service pipe to be installed.

4.4 No service pipe will be installed until the connecting pipe has been installed and staked by the Customer within 24" of the curb or edge of pavement; or where the connecting pipe is installed in the same trench with sewer pipe, gas pipe, electric conduit or any other facility.

4.5 A curb stop and meter pit will be installed by the Company at or near the premises, in such a manner as to permit the attachment of the customer's connecting pipe up to and including 2" diameter pipe. The curb stop or meter pit is available for turning on and shutting off the supply of water in emergencies or for purposes of repair. Only Company employees or persons duly authorized to do so by the Company are permitted to operate the curb stop or meter pit.

4.6 No premises shall be supplied by more than one service pipe, unless agreed upon by the Company and the customer.

4.7 Where two or more customers are supplied through a single service pipe, the piping of the premises or meter housing shall provide a separate lock valve ahead of the inlet to each customer's meter.

STANDARD TERMS AND CONDITIONS

4. SERVICE PIPES (Continued)

4.9 Any change requested by the customer in the location or configuration of the existing service pipe, if approved by the Company, shall be made at the expense of the customer including the necessary modifications to comply with the Company's cross connection control and exterior meter enclosure requirements.

4.10 Where a service pipe is for temporary use, the customer shall bear the entire expense of making the connection, subject to a refund whenever service is established on a permanent basis.

4.11 Where a service pipe is available for a customer's premises, the customer may obtain a larger size service without charge, provided such service is established on a permanent basis. Any subsequent request for a reduction in the size of the meter shall be subject to Company approval and the payment by the customer of the cost of installing the larger size service.

4.12 Where a large size service pipe has been installed at the request of a customer, for premises not previously supplied, any subsequent request for a reduction in the size of the meter shall be subject to Company approval and the payment by the customer of the difference between the cost of installing the service pipe and the cost of installing a service line that is usually installed with the new sized meter.

4.13 Charges and costs, if any, associated with special road opening and restoration requirements imposed by the governing agency shall be reimbursed by the customer (or prospective customer) requesting said work resulting in the need to open a roadway under moratorium.. This includes fines or charges in excess of normal road opening permit fees, costs for restoration work required, and any other costs incurred by the Company for this work. The burden of obtaining the approval of the governing agency for this road opening, and any costs related to this approval shall be the responsibility of the customer (or prospective customer).

4.14 Charges for service pipe installation that are excessive shall be paid by the Customer. The cost of a service pipe installation shall be considered excessive if the cost of the installation exceeds two (2) times the average cost of the same diameter service of the previous 12 month calendar year. The Customer shall reimburse the Company for the difference between the actual installation costs and the amount used to determine if the costs is excessive.

STANDARD TERMS AND CONDITIONS

5. CONNECTING PIPES

5.1 A connecting pipe attached to the service pipe shall be installed at the expense of the customer to convey the water supply within the property of the customer.

5.2 The connecting pipe is the property of the customer and shall be maintained and kept in repair by the customer. The un-metered length of any connecting pipe shall not exceed 10' in length, as measured from the curb stop or curb line to the proposed point of metering.

5.3 The connecting pipe shall be of strength and quality approved by the local municipal construction code or other authority with jurisdiction.

5.4 The connecting pipe shall be installed by a licensed plumber or other approved mechanic prior to the installation of the Company's service pipe. The Connecting pipe shall be installed to within 24" of the curb or edge of pavement, the termination point staked and the pipe shall be properly sealed by the plumber or mechanic to prevent the entry of ground water into the pipe. The pipe shall be installed without sharp bends, at right angles to the line of the street, in a trench not less than four feet in depth, to avoid damage and possible interruption to service caused by freezing. The pipe shall not be installed within three feet of any permanent excavation or vault or other subsurface structure. Other utility service pipes, such as sewer or gas, shall not be installed in the same trench.

5.5 The Company reserves the right to inspect the installation prior to backfilling the trench and to withhold the supply of water service whenever such installation or any part thereof is deemed by the Company to be leaking, unsafe, inadequate or unsuitable for receiving service, or to interfere with or impair the continuity or quality of service to the customer or to others.

5.6 No attachment shall be made to the service or connecting pipe, or any branch thereof, between the meter and the main.

5.7 The customer shall make all changes in the connecting pipe due to changes in grade, relocation of mains, or other causes, at the customer's expense, unless the change is instituted by the Company.

5.8 Where it is necessary to install a connecting pipe on the property of persons other than the applicant for service, written authority from such property owners, in a form approved by the Company, shall be obtained by the applicant.

STANDARD TERMS AND CONDITIONS

6. METERS

6.1 The Company will furnish, install, own, and maintain meters without charge, except as otherwise provided in this Tariff, and will determine the size, type and make of meter to be used, based on the service desired.

6.2 No unmetered connections are permitted.

6.3 Meters will be maintained and may be tested in accordance with regulatory requirements or as determined appropriate by the Company. The Customer shall provide and maintan acceptable access to the meter installation for Company representatives and agents to perform these activities.

6.4 If access to the meter and meter installation is not provided by the Customer, either by denial of access or by non response to Company requests for access, the Company may utilize an additional meter installation as determined appropriate by the Company for the purpose of billing. In this situation the new meter shall be used for billing, the original meter shall cease to be used for billing, and the original meter installation shall become the property and responsibility of the Customer.

6.5 The Company may require a remote meter reading device to be installed by the Company at the expense of the Company

6.6 (Reserved for Future Use.)

6.7 The location of the meter and the arrangement of the fittings and pipe shall be subject to inspection and approval by the Company. Valves are to be installed on the inlet and outlet side of the meter.

6.8 Meters shall be installed inside a permanent meter enclosure located no more than 10-feet from the curb stop unless otherwise required or agreed to by the Company. When meters are permitted by the Company to be installed inside the customer's commercial, multi-unit dwelling or industrial building, the meters shall be located in a clean, dry, heated, illuminated, safe place not subject to great variations in temperature, within 5-feet to the point of entrance of the connecting pipe. The location shall be separated from the remainder of the premise by a permanent wall with a single exterior entrance such as to be easily accessible, with a minimum of inconvenience to the Company, for reading, inspecting, testing, changing and making necessary adjustments or repairs. For meters larger than 4" located within the premise, the customer shall provide a paved concrete surface that is readily accessible to self-propelled, mechanical lifting equipment without the need to dismantle or remove any portions of the structure, landscape or features of the property to remove the meter.

PINELANDS WATER COMPANY

STANDARD TERMS AND CONDITIONS

6. METERS (Continued)

6.9 For meters one and one-half inches (l-l/2") in size and larger, if requested by the Customer, or when service cannot readily be interrupted for testing or replacing the meter per BPU regulations, or upon the Company's discovery of open bypass, the installation for said meter shall be equipped with metered and cross connection controlled bypass piping of a type and arrangement approved by the Company which will permit the removal or testing of the meter without interruption of water service.

6.10 (Reserved for Future Use.)

6.11 Where it is necessary to install a meter enclosure outside of the public right-of-way, or in a driveway, roadway, or any other location determined to be unacceptable by the Company the installation is subject to the approval of the Company and the cost of installing, operating and maintaining the meter enclosure shall be the responsibility of the customer.
Where it is necessary to set a meter outside of a building, the meter shall be placed in a convenient meter box or vault, referred to as the meter housing. This installation is subject to the approval of the Company. The cost of installing and maintaining the meter housing is the responsibility of the customer. Housing for small meters can be purchased from the Company at cost.

6.12 Company installed and owned meter enclosure shall be located in an accessible place, protected from vehicular traffic, away from terraces, fences or other structures and shall be so located that they will not be a hazard to pedestrians.

6.13 If the meter enclosure is installed upon property which is not owned by the customer, the customer is required to furnish the Company written permission from the owner of the property which will be binding on the owner, and the owner's administrators, executors, heirs, successors and assigns.

6.14 The meter enclosure shall be frost-proof, heated when above-ground and either well drained or watertight and shall be provided with a secure cover or access door with a convenient locking device. Meter enclosures shall be kept clear of snow, ice, dirt, mulch, tress/shrubs, fences, landscaping, vehicles, equipment or any other objects which might prevent ready accessibility for reading, inspecting, testing, changing and making necessary adjustments or repairs of the meter.

STANDARD TERMS AND CONDITIONS

6. METERS (Continued)

6.15 The Company maintains and repairs meters except in case of misuse or damage by frost, hot water or external causes, in which event the cost of repairing and replacing the meter shall be charged to the customer, said charge to be based on the direct labor and equipment costs of removing, repairing, replacing and/or resetting the meter.

6.16 All meters are carefully tested before being placed in service and are inspected periodically while in service. Therefore, the quantity of water recorded by the meter, as ascertained by periodic meter readings, shall be taken to be the amount delivered to the customer, except where the meter has been found to be registering fast or has ceased to register.

6.17 Where the meter has ceased to register or where access to the meter cannot be obtained, meter readings may be estimated by a fair and reasonable method based upon the best information available.

6.18 If a customer observes an unusual increase over the average quantity of water used, which cannot be accounted for, the customer is to inform the Company immediately.

6.19 When a billing dispute is known to exist, the utility shall, prior to removing the meter, advise the customer that the customer may have the meter tested by the utility or may have the Board either conduct a test of the meter or witness a testing of the meter by the utility, and that in any event the customer may have the test witnessed by a third party. (N.J.A.C. 14:3-4.5(c))

A meter test arising from a billing dispute may be appropriate in instances which include, but are not limited to, unexplained increased consumption, crossed meters, consumption while account is vacant or any other instance where the meter's accuracy might be an issue in a bill dispute.

A report giving results of such tests shall be made to the customer, and a complete record of such test shall be kept on file at the office of the utility in accordance with N.J.A.C. 14:3-4.7 Meter records.

6. METERS (Continued)

6.20 If a meter is found to be registering fast by more than 1 ½ percent, an adjustment of charges will be made.

6.21 If a meter, upon test, is found to register within the prescribed limits of accuracy, the Company reserves the right to reset the same meter in the premises from which it was removed.

6.22 Only employees or persons authorized by the Company shall remove the meter under any circumstances.

6.23 Tampering with the meter, meter pit, curbstops, or its connections is prohibited.

6.24 Winterizing of Irrigation Meters – the Customer shall be responsible for protecting and insuring that meters in meter housings are properly protected when irrigation systems are winterized. Only personnel approved and registered by the Company may work on, remove, and reinstall irrigation meters in accordance with Company requirements. These registered personnel, or any other persons, CANNOT operate the Company's Curb Stop shutoff valve. Only Company personnel, or its agents, may operate the Curb Stop valve.

STANDARD TERMS AND CONDITIONS

7. CUSTOMERS' PREMISES

7.1 The Company may refuse to provide a water service connection with any customer's piping system or furnish water to any connecting pipe already installed, when the customer's piping system is not installed in accordance with the regulations of the Company (including but not limited to the Cross Connection Control Plan) and of the municipality in which the premises are located; or when the piping system on the premises has not been protected from allowing groundwater/soil to enter the connecting pipe or when it is not at sufficient depth to prevent freezing.

7.2 The Company shall have the right of reasonable access to a customer's premises and to all property supplied by it, at reasonable times, for the purpose of inspection incident to the rendering of service, reading meters or inspecting, testing or repairing its facilities used in connection with supplying service, or for the removal of its property.

7.3 The customer shall obtain or cause to be obtained, all permits and other authorizations needed by the Company for access to its facilities. The Company, where necessary, will make application for any street opening permits for installing its service connections and shall not be required to furnish service until after such permits are granted. The municipal charge, if any, for permission to open the street shall be paid by the customer.

7.4 Reserved.

7.5 The customer shall not permit access to the meter or other facilities of the Company except to authorized employees of the Company, duly authorized state regulatory officials and the customer’s certified backflow prevention device testers..

7.6 In case of defective service, the customer shall not interfere with the apparatus or appliances belonging to the Company but shall notify the Company immediately.

7.7 All piping within a customer's premises shall comply with State, municipal and other regulations in force with respect thereto.

STANDARD TERMS AND CONDITIONS

7. CUSTOMERS' PREMISES (Continued)

7.8 Physical connections, such as cross connections, either permanent or temporary, between pipes on a customer's premises supplied by the Company and any unapproved source of supply are prohibited.

7.9 In any premises where a NJ DEP Approved auxiliary water source is permitted, the pipes carrying water from the mains of the Company are required to be marked in some distinctive manner for ready identification.

7.10 No device or connection shall be permitted between pipes or fixtures carrying water from the mains of the Company and any portion of the plumbing system of the premises or any other piping system on the premises in cases where the system is not designed to prevent backflow or back-siphonage in accordance with the Company's Cross Connection Control Plan.

7.11 If a premise is to remain unoccupied for an indefinite period, customers are cautioned to have the interior plumbing drained, especially during cold weather, to avoid damage to pipes and fixtures. When requested, the Company will suspend service to unoccupied premises temporarily by shutting off the water at the curb and removing the meter.

7.12 Whenever leakage occurs from pipes or facilities owned by the customer, the customer, at the customer's expense, shall make the necessary repairs without delay. If the customer fails to make said repairs, the Company reserves the right to discontinue the supply until such time as the leak is repaired. A reconnection charge will apply should the Company take action to physically discontinue water service.

7.13 All costs associated with periodic testing of an approved backflow prevention device and reporting of said test results shall be the responsibility of the Customer. The reporting format and mechanism for reporting test results shall be determined by the Company.

STANDARD TERMS AND CONDITIONS

8. BILLS

8.1 All bills will be computed in accordance with the rates of the Company as shown in this Tariff, as the same may be amended or revised from time to time. Rates are subject to such changes as the State regulatory body having jurisdiction may require, authorize or allow.

8.2 Bills for metered water service will be rendered at least once in each calendar quarter. Bills may be rendered monthly when the consumption charges for the last four quarters have exceeded $1,200.00 or when mutually agreed upon by the customer and Company.

8.3 Bills will show the meter reading at the beginning and end of the billing period, the dates on which the meter is read, the number and kind of units measured, a statement of explanation of any conversion from meter reading to billing units or any other calculations or factors used in determining the bill, a distinctive marking to indicate estimated or actual bill and a statement that approximately 13 percent or $ of your current period charges reflect the average gross receipts and franchise taxes which are paid to the State of New Jersey and largely distributed to New Jersey Municipalities. For purposes of bills, only those meters actually read by Company personnel are considered actual meter readings. The bill shall contain a statement indicating that an actual meter read may be an electronic read. The bill shall also indicate a statement that the rate schedule is available upon request. (N.J.A.C. 14:3-7.2)

8.4 Where a bill has been estimated due to the fact that the Company has been unable to gain access to the meter, it will be so noted on the bill. An appropriate adjustment will be made for any difference between actual use and estimated use of water when the next regular meter reading is obtained.

8.5 Except in cases where a meter that is fast by more than 1-1/2 percent, the amount of the bill, based on the reading of the meter is deemed conclusive and must be paid. No adjustment shall be made for a meter that is registering less than 100 percent except in the case of meter tampering, non registering meters or in circumstances in which the customer should reasonably have known that his bill did not reflect the customer's actual usage.

8.6 Facilities charges are based on the size of the meter.

B.P.U. No. 2 - WATER

STANDARD TERMS AND CONDITIONS

8. BILLS (Continued)

8.7 A customer having two or more meters (excluding meters for Private Fire Protection and irrigation under applicable Rate Schedules) on the same premises will be charged at the Facilities charge for each plus the consumption rate for the quantity of water equivalent to the sum registered on all of the meters on the premises. Each installation under applicable Rate Schedule No. 2 Private Fire Service (PFS) will be charged separately.

8.8 A customer wishing to discontinue service must give notice to that effect. Where such notice is not received by the Company the customer shall be liable for service until the final reading of the meter is taken. Notice to discontinue service will not relieve a customer from any minimum or guaranteed payment under any contract or rate.

8.9 If requested in writing by the customer, the Company will send bills to, and will receive payments from agents or tenants. However, this accommodation shall in no way relieve the customer of the responsibility of paying such charge. In the case of a residential account, if such charges are not paid, and notice is issued with intent to discontinue service, notice shall be served on both the billing address and the service address. (N.J.A.C. 14:3-3A.6)

8.10 At least fifteen (15) days' time for payment shall be allowed after sending a bill. The Company may discontinue service for nonpayment of bills provided it gives the customer at least ten (10) days' written notice of its intention to discontinue. The notice of discontinuance shall not be served until the expiration of the said l5 day period. However, in case of fraud, illegal use, or when it is clearly indicated that the customer is preparing to leave, immediate payment of accounts may be required.

8.11 Accounts that are not paid in a timely manner automatically receive a low credit rating. Should a bill remain unpaid after normal collection procedures have been applied, water service will be discontinued after proper written notice is issued, as provided in the regulation of the Board of Public Utilities. If service is discontinued, the Company reserves the right to issue a bill for a deposit, the amount of such deposit being determined as provided in paragraph 3.1 on Sheet No. 13.

8. BILLS (Continued)

8.12 Where water service is discontinued for nonpayment of bills, service will not be resumed until payment or satisfactory arrangements for payment have been made. Under such circumstances, the Company may require a deposit from the customer to insure prompt payment of future bills.

8.13 In case of fraud or where it is indicated that the customer is preparing to vacate the premises served, immediate payment of accounts may be required.

8.14 Sales to other utilities which are exempt from revenue-based taxes will be credited with an amount equivalent to the tax exemptions.

8.15 Late Payment Charge: A late payment charge at the rate of 0.75% per monthly period shall be applied to the accounts of non-residential customers taking service under Rate Schedules No. 1 and No. 2 contained herein. Service to state, county or municipal government entities will not be subject to a late payment charge. The charge will be applied to all amounts billed including accounts payable and unpaid finance charges applied to previous bills, and will not be applied sooner than 25 days after a bill is rendered, in accordance with N.J.A.C. 14:3-7.1(e). The amount of the finance charge to be added to the unpaid balance shall be calculated by multiplying the unpaid balance by the late payment charge rate. When payment is received by the Company from a customer who has an unpaid balance which includes charges for late payment, the payment shall be applied first to unpaid water service charges and then to the remainder of the unpaid balance.

Second Revised Sheet No. 27

STANDARD TERMS AND CONDITIONS

9. DISCONTINUANCE OF SERVICE

9.1 The Company shall, upon reasonable notice, when it can be reasonably given, have the right to suspend or curtail or discontinue service for the following reasons:

9.1.1 For the purpose of making permanent or temporary repairs, changes or improvements in any part of its system;

9.1.2 For compliance in good faith with any governmental order or directive , including water diversion or other permit, notwithstanding such order or directive subsequently may be held to be invalid;

9.1.3 For any or the following acts or omissions on the part of the customer:

(a) Nonpayment of a valid bill due for service furnished at a present or previous location. However, nonpayment for business service shall not be a reason for discontinuance of residence service, except in cases of diversion of service pursuant to N.J.A.C. 14:3-7.8, and service shall not be discontinued for nonpayment of repairs charges, merchandise charges and non-tariff contracted service charges between the customer and the utility, nor shall notice threatening such discontinuance be given.

(b) Tampering with any facility of the Company; theft of service, failure to install, test and maintain adequate cross connection control as required under the Company's Cross Connection Control Plan.

(c) Fraudulent representation in relation to the use of service.

(d) Customer moving from the premises, unless the customer requests that service be discontinued;

(e) Providing the Company's service to another without approval of the Company.

(f) Failure to make a deposit as provided for in N.J.A.C. 14:3-3A.1(a)(4) or the Company's tariff;

9. DISCONTINUANCE OF SERVICE (Continued)

9.1.3 (Continued)

(g) Refusal to contract for service where such contract is required;

(h) Connecting and operating in such manner as to produce disturbing effects on the service of the Company or other customers, includes but is not limited to failure to comply with the Company's Cross Connection Control Plan;

(i) Failure of the customer to comply with any reasonable standard terms and conditions contained in the Company's tariff;

(j) Where the condition of the customer's installation presents a hazard to life or property;

(k) Failure of customer to repair any faulty facility of the customer.

(l) Nonpayment of a valid bill for wastewater service furnished at a present or previous location by Pinelands Wastewater Company; However, nonpayment for business service shall not be a reason for discontinuance of residence service, except in cases of diversion of service pursuant to N.J.A.C. 14:3-7.8, and service shall not be discontinued for nonpayment of repairs charges, merchandise charges and non-tariff contracted service charges between the customer and the utility, nor shall notice threatening such discontinuance be given.

9.1.4 For refusal of reasonable access to customer's premises for necessary purposes in connection with rendering of service, including meter installation, reading or testing, or the maintenance or removal of the Company's property.

9.2 A customer wishing to discontinue service must give notice to that effect. Where such notice is not received by the Company, the customer shall be liable for service until the final reading of the meter is taken. Notice to discontinue service will not relieve a customer from any minimum or guaranteed payment under any contract or rate.

9. DISCONTINUANCE OF SERVICE (Continued)

9.3 Public Utilities shall not discontinue residential service except between the hours of 8:00 A.M. and 4:00 P.M. Monday through Thursday, unless there is a safety related emergency. There shall be no involuntary termination of service on Fridays, Saturdays, and Sundays or on the day before a holiday or on a holiday, absent such emergency. The Company shall not discontinue service unless the customer's arrearage is more than $100.00 or the account is more than three months in arrears. N.J.A.C. 14:3-3A.2(a).

9.4 Discontinuance of residential service for nonpayment is prohibited if a medical emergency exists within the premises which would be aggravated by discontinuance of service and the customer gives reasonable proof of inability to pay. Discontinuance shall be prohibited for a period of up to two months when a customer submits a physician's statement in writing to the Company as to the existence of the emergency, its nature and probable duration, and that termination of service will aggravate the medical emergency. Recertification by the physician as to continuance of the medical emergency shall be submitted to the Company after 30 days. However, at the end of such period of emergency, the customer shall still remain liable for payment of service(s) rendered, subject to the provisions of N.J.A.C. 14:3-3A.2(i).

(a) The Board may extend the 60-day period for good cause.
(b) The Company may in its discretion delay discontinuance of residential service for nonpayment prior to submissions of the physician's statement required by this subsection when a medical emergency is known to exist.

STANDARD TERMS AND CONDITIONS

10. PRIVATE FIRE PROTECTION SERVICE

10.1 Customers are required to make separate written application for private fire protection service and enter into an agreement pertaining to conditions for service.

10.2 Private fire service installations shall be made in accordance with the provisions of this Tariff regarding the installation of service and connecting pipes and other facilities. Private fire protection systems that include storage tanks, pumping equipment, fire hydrants and/or any combination of these will be required to comply with the Company's Cross Connection Control Plan.

10.3 Private fire service lines that do not include fire hydrants, storage tanks, pumping equipment and/or any combination of these shall be equipped with a rated fire service meter and double check valve assembly in accordance with the Company's Cross Connection Control Plan; private fire service lines without private hydrants shall be equipped with detector-check type meters and shall be used exclusively for fire protection purposes. The connecting pipe shall be the at least the same size as the meter.

10.4 No water shall be used through private fire protection facilities except for purposes of testing or in case of fire.

10.5 The charge for private fire service is based on the size of the meter. Bills are rendered monthly. No charge is made for water used solely for fire extinguishing purposes or for reasonable testing purposes, provided the Company is notified in advance that tests are to be made.

10.6 Where a tank, standpipe or other storage facility is used, it shall be so constructed and arranged as to protect the water from pollution and shall conform with all applicable rules and regulations of the State Department of Environmental Protection and the Company's Cross Connection Control Plan.

10.7 Authorized representatives of the Company shall have the right to inspect all fire protection facilities on a customer's premises at reasonable hours.

10.8 The customer shall be responsible for all costs associated with a fire watch program is required by local officials in response to emergency or planned work performed by the Company that interrupts or is anticipated to interrupt water supply to fire services

STANDARD TERMS AND CONDITIONS

11 MUNICIPAL SERVICE

11.1 Upon application of duly authorized representatives of municipalities or fire districts in the territory supplied, the Company will install fire hydrants for purposes of public fire protection, at locations agreed upon by the municipalities or fire districts and the Company.

11.2 Such hydrants are owned by the company and subject to regular inspection and maintenance by the Company.

11.3 Municipalities and fire districts shall pay a monthly charge for municipal service as provided in the applicable Rate Schedule set forth in this Tariff.

11.4 Hydrants are not to be used for any purpose, other than public fire protection, without the written permission of the Company.

11.5 Municipal fire departments or fire districts should inform the Company promptly of any hydrant which is leaking, or in need of attention so that such hydrant may be placed in readiness for instant operation.

11.6 Where it is necessary to use hydrants for any purpose other than public fire protection, a special permit is required, issued by the Company under restrictions imposed in the interest of the public.

11.7 Only special hydrant wrenches, approved by the Company shall be used for opening or closing a hydrant.

11.8 No attachment of any sort shall be left connected to a hydrant except when it is in actual use. No hydrant shall be left unattended while attachments are connected during the time it is in use. Before closing time each day, the hydrant shall be shut, attachments removed, caps replaced and the hydrant left in readiness for instant use.

12. WATER MAIN EXTENSIONS

12.1 Applications for extensions may be made in person, by telephone or by mail, at any Commercial Office of the Company. Upon receipt of such application, the Company will advise the applicant as to the most suitable plan for installing the proposed extension and the probable cost to the customer.

12.2 Distribution mains will be extended only in public streets or highways or in new streets or highways, not yet accepted, but which have been laid out according to an accepted plan approved by the appropriate authority to be in public streets or highways. The Company will require an easement in cases where the streets or highways have not been accepted. In no case, however, will distribution mains be installed until streets or highways have been rough graded to an established and approved grade. In the alternative, and at the sole and absolute discretion of the Company, mains may be installed in properly configured and recorded easements with terms acceptable to the Company

12.3 Water main extensions will be installed pursuant to agreements which will be prepared in accordance with all applicable laws of the State and Board of Public Utilities regulations and orders including but not limited to those regulations contained in N.J.A.C. 14:3-1, N.J.A.C. 14:3-6, and N.J.A.C. 14:3-8.

12.4 Each extension shall become a part of the distribution system of the Company and shall be owned, maintained and controlled by the Company.

12.5 The Company shall have the right to connect additional customers to an extension and to construct further extensions thereto.

STANDARD TERMS AND CONDITIONS

13. GENERAL RULES

13.1 The Company reserves the right to install services and meters on the basis of the normal requirements for service. The Company does not undertake to provide service for unduly high rates of water demand prevailing only for short periods of time and reserves the right to refuse to install oversize services or meters to serve such high demands.

13.2 The Company will endeavor to provide a regular and uninterrupted supply of water through its facilities, but in case service is interrupted, irregular, defective or fails because of breakdown or emergency, or from causes beyond the control of the Company, the Company will not be liable for damage or inconvenience resulting therefrom.

13.3 The Company does not undertake to render any special service or maintain any fixed pressure. In the event of an accident or for other reasons, the Company may shut off the water in its mains and pipes and may restrict the use of water whenever the public welfare may require it. All customers requiring an uninterrupted supply or a uniform pressure of water for steam boilers, hot water or other apparatus, or for any other purpose, shall provide their own means of obtaining such service.

13.4 When the supply of water is to be shut off temporarily or curtailed, a notice stating the purpose and probable duration of the shutoff or curtailment will be given to customers affected whenever practicable.

13.5 The Company may make rules reasonably designed for compliance with its water diversion or other permits. Such rules may include outdoor water use restrictions such as alternate day or “odd-even” outdoor water use limitations.

13.6 The Company does not undertake to supply any uniform quality of water for special purposes, such as dialysis centers, medical/dental ofices, adult/child care facilities, manufacturing or processing plants, laboratories, swimming pools, bleaching or dyeing plants or laundries. Customers requiring water of special quality, or water at all times free from discoloration or turbidity, shall provide their own means of treating the water or shall provide such other protection as may be deemed necessary for the purposes required.

STANDARD TERMS AND CONDITIONS

13. GENERAL RULES (Continued)

13.7 Neither by inspection approval nor nonrejection, nor in any other way, does the Company give any guarantee, or assume any responsibility, expressed or implied, as to the adequacy, safety or characteristics of any structures, equipment, pipes, appliances or devices owned, installed, or maintained by the customer or leased by the customer from third parties.

13.8 Except as to the liability, if any, imposed by law, the Company will not assume responsibility for any injury, casualty, or damage resulting from the supply, or use of water service, or from the presence or operation of the Company's structures, equipment, pipes, appliances or devices on the customer's premises.

13.9 No person, unless authorized by the Company, is permitted to turn the water on or off at any hydrant, street valve, corporation stop and curb stop, or other street connection, or tamper with, disconnect or remove, any meter without the consent of the Company. Penalties provided by law for any such action will be rigidly enforced.

13.10 No agent, representative or employee of the Company has authority to modify any provision contained in this Tariff or to bind the Company by any promise or representation contrary thereto.

13.11 From time to time, the Company may provide public notices, specific notices, correspondence or other notifications ("Notices") regarding the presence of conditions affecting the quality and/or quantity of water service provided by the Company. (Examples of such Notices include, but are not limited to, boil water alerts, notice of hydrant or main flushing, and notice of water quality testing results.) These Notices may contain information about actions members of the public may wish to, are recommended to, or should take in response to the conditions identified in the Notice. In the event the Company issues a Notice, the Company will not be liable for any expenses or costs incurred by a customer or end-user for any action taken in response to any condition identified in the Notice.

13.12 This Tariff is made a part of all agreements for the supply of water service unless specifically modified in a particular Rate Schedule. A copy of the Company's Tariff with terms and conditions will be furnished to any customer upon request.

13.13 The Company reserves the right to terminate, change, revise or supplement this Tariff, to the extent permitted by law, or permitted by the applicable regulations of the State regulatory body having jurisdiction.

13.14 The Regulations of the New Jersey Board of Public Utilities applicable to water utilities are incorporated herein by reference to the extent that the subject matter of any Regulation has not been covered herein.

13.15 Use of public fire hydrants for the purposes of anything other than public fire protection and by persons other than Public Fire Protection and Company personnel is prohibited.

14. EMERGENCY RESPONSES DUE TO EXTRAORDINARY DEMAND AND/OR DIMINISHED SUPPLY

14.1.1 Discontinuance of service for failure to comply with use restrictions.

For compliance by the utility in good faith with any governmental order or directive, notwithstanding that such order or directive subsequently may be held to be invalid, the Company may, upon reasonable notice, as set forth in sections 14.2.l and 14.2.3 herein, suspend, curtail, or discontinue service pursuant to N.J.S.A. 48:2-23, N.J.S.A. 48:2-24, N.J.A.C. 14:3-3A.1 and N.J.A.C. 14:3-3A.2 for any of the following acts or omissions on the part of the customer:

(1) Connecting or operating any piping or other facility, including but not limited to, lawn sprinkling on the customer's premises in such a manner as to adversely affect the safety or adequacy of service provided to other customers present or prospective; or

(2) Continuing waste of water by customers, after notice from the utility, through improper or imperfect pipes, fixtures, or failure to comply with restrictions; or

(3) Failure to comply with the standard terms and conditions contained in this tariff or failure to comply with any state law, or the rules, regulations, orders or restrictions of any governmental authority having jurisdiction.

14.l.2 Water service shall be restored when the conditions under which such service was discontinued, as specified above, are corrected and upon the payment of the SPECIAL RESTORATION OF SERVICE CHARGE of $100.00 for each restoration.

14.2.l The Company will endeavor to provide a regular and uninterrupted supply of water through its facilities. However, if because of emergencies beyond the control of the Company, including governmental mandate, service is interrupted, irregular, defective or fails, the Company will not be liable for damage or inconvenience resulting therefrom. In the event of an extraordinary demand and/or diminished supply, the Company may restrict the use of water whenever the public

welfare may require it and, if necessary, may shut off the water in its mains and pipes. In such cases the Company shall advise its customers by placing a prominent advertisement detailing the conditions and restrictions in a newspaper of general circulation in the utility service area. The notice will state the purpose and probable duration of the restriction or discontinuance. Failure to provide regular and uninterrupted service due to breakdowns is covered under other sections of this tariff.

14.2.2 The Company may restrict water service during certain periods, where the Company advises the Board of Public Utilities, in order to protect the public water supply, or otherwise to comply with any regulations, orders or decrees issued by the Governor of New Jersey or the Department of Environmental Protection pursuant to the Water Supply Management Act. Such interruptions or restrictions shall be reported to the Department of Environmental Protection and the Board by each utility by the speediest means of communications available, followed by a detailed written report, pursuant to the provisions of N.J.A.C. 14: 3-3.7(g), within one week. Thereafter the utility shall provide weekly reports for the duration of the emergency.

14.2.3 When the supply of water to individual customers is to be shut off or curtailed for failure to comply with emergency water restrictions imposed because of extraordinary demand or diminished supply, the Company shall advise its customers by placing a doortag on the front door of the home of the individual(s) in violation of the restrictions, at least twenty-four (24) hours prior to discontinuance or curtailment, or by giving another form of notice acceptable to the Board. The Company will advise business and commercial customers, in writing, by mailing a notice to the customers' billing address. In the case of doortags, they shall be sequentially numbered and include the date, time and nature of the violation and the procedure for restoration of service. All such notices shall be accounted for by the utility.

STANDARD TERMS AND CONDITIONS (Continued)

15. MULTI-USE SERVICE REQUIREMENTS

By applying for multi-use service, the customer or builder certifies that:

15.1. The customer or builder has hydraulically calculated the demand for the customer's or builder's water system, based on the simultaneous domestic demand and fire sprinkler demand. The customer or builder shall make this calculation in accordance with the Uniform Construction Code.

15.2. The customer or builder will ensure that the system is installed in accordance with the Uniform Construction Code at N.J.A.C. 5:23.

15.3. The customer will, prior to installation of the meter, obtain a construction permit in accordance with the Uniform Construction Code from the enforcing agency having jurisdiction over the system.

15.4. By applying for multi-use service, the customer agrees to be responsible for all claims, costs and liability for personal injury, death and/or property damage, resulting from the customer's individual water system, unless caused by the negligence of the water utility.

By applying for multi-use service, and operating the same, the customer agrees:

15.5. To include cross connection control device(s) in accordance with the Company's Cross Connection Control Plan.

15.6. To be solely responsible for all costs and expenses relating to the installation, operation, maintenance, repair and replacement of the customer's water system, including the fire suppression system and compliance with the Company's Cross Connection Control Plan.

15.7. To ensure the customer's water system complies with the applicable requirements of the Uniform Construction Code in effect at the time of system installation, including any applicable building, plumbing and fire protection subcodes.

15.8. To ensure that the customer's water system is maintained in accordance with all applicable law so as to protect against backflow, back-siphonage and contamination of the potable water system in accordance with the Company's Cross Connection Control Plan.

15.9. A water utility may terminate a customer's multi-use service for non-payment of a valid water bill for multi-use service, in accordance with the Board's rules governing discontinuance of service at N.J.A.C. 14:3-3A.4(j).

Original Sheet No. 42

RATE SCHEDULE NO. 4

MISCELLANEOUS SERVICE

APPLICABILITY:

Applicable to the following types of miscellaneous service throughout the entire territory.

CHARACTER OF SERVICE:

Continuous except as limited by "Standard Terms and Conditions".

RATE:

WATER FOR BUILDING OR OTHER TEMPORARY PURPOSE

Metered
Water for building or other temporary purpose will be supplied through meters when feasible and charged for at General Water Service Rate.

See rates for General Water Service, Rate Schedule No. 1, Sheet No. 37 and Sheet No. 38.

Unmetered:
The rates shall be the same as set forth under the General Water Service, Rate Schedule No. 1, on the basis of the Company's estimate of the volume of water to be used. Charges shall be payable in advance.

Special Provisions
Where metered service is provided, a deposit equal to the cost of the meter shall be made with the Company. The meter shall be kept safe and accessible during its use. The deposit, less the cost of repairs to the meter, if any, will be returned to the applicant by the Company after surrender of the meter and payment of all charges for water supplied through it.

MISCELLANEOUS SERVICE

CHARGES NOT INVOLVING USE OF WATER

Resumption of service after discontinuance due to nonpayment of bills or violation of the Company's Tariff.

During regular business hours	$40.00
During nonbusiness hours	$50.00

A utility shall not make any charge for replacing a meter where such replacement is requested by a customer, unless the meter first referred to has been in use less than two years in which case a charge, which shall not exceed the cost of making the replacement, may be made. No charge shall be made for replacing a meter for test purposes, or for replacing a meter necessitated by a change in service characteristics which conform to the provisions of these regulations, or for replacing a defective meter, unless the defect is due to the negligence of the customer in which case a charge which shall not exceed the cost of making the replacement may be made.

Replacing meters within a period of one year at the request of the customer.

5/8 and 3/4 inch meters $52.00

1 inch and over - At cost, including labor, materials and transportation. Meter repair is not to exceed the costs that the Company would incur for its purchase of a new meter.

Multiple meters at same location - at cost, including labor, materials

Removing and replacing meters damaged due to negligence of customer including frozen and broken meters.

Meter size - 5/8 inch	$60.00
3/4 inch	$72.00
1 inch	$84.00

Over 1 inch - At cost, including labor, materials and transportation. Meter repair is not to exceed the costs that the Company would incur for its purchase of a new meter.

MISCELLANEOUS SERVICE

CHARGES NOT INVOLVING USE OF WATER (Continued)

Turn off charge - when service is discontinued at the request of the customer, such as for seasonal reasons or termination of service.

Turn off charge $40.00

Multiple meters at same location - at cost including labor, materials and transportation.

Turn on charge - when service had been discontinued at the request of the customer for seasonal reasons when meter is not removed. During turn off period facilities charges, including minimum or consumption charges, will not be in effect.

Turn on charge $40.00

Multiple meters at same location - at cost, including labor, materials and transportation.

Bad check charge - Should the Company receive a negotiable instrument from a customer in payment of a bill, charge, or deposit due and such instrument is subsequently dishonored or uncollectible for any reason, the Company shall charge the customer a handling charge of $25.00 per instrument.

Meter testing charge - Where the customer is to be charged for meter testing as provided for by this tariff, the charges shall be as follows:

For meters sized up to 2 inches - $68.00.
For meters sized over 2 inches - At cost including labor, meters and transportation.

TERM:

As required to meet the class of service rendered.

TERMS OF PAYMENT:

A customer has at least 15 days to pay a valid bill for service after the Company sends it. The Company will take into consideration mailing time but reserves the right to issue a written notice of its intention to discontinue water service.

MISCELLANEOUS SERVICE

CHARGES NOT INVOLVING USE OF WATER (Continued)

SPECIAL PROVISIONS:

See "Standard Terms and Conditions".

UNAUTHORIZED WATER USE

APPLICABILITY:

Applicable when the Company has determined the unauthorized use of potable water from the Company water system by any party, including, but not limited to customers and/or other entities or personnel.

CHARACTER OF SERVICE:

Unauthorized and used without knowledge of the Company at the time of the unauthorized usage. This can be unauthorized use of water through Fire Hydrant use, or other connection to the Company water system.

RATE:

CHARGES FOR UNAUTHORIZED WATER USE

All unauthorized usage is unmetered. Meters that may be used by unauthorized users are not recognized by the Company and may not be considered in determining the amount of water used. The Company will have the authority to estimate usage based on its records, observations and judgement.

In addition to any legal action that may be initiated by the Company and/or any criminal action initated by the appropriate governmental authority, the following charges are in effect for unauthorized use of water;consisting of an incident charge plus a volumetric charge:

Charge per incident: $1,000 for the first incident; increasing in increments of $1,000 for each successive incident, without limit.

Volumetric Charge: $1.00 per gallon of water used, as determined by the Company.

SPECIAL PROVISIONS:

See "Standard Terms and Conditions".

TIDEWATER UTILITIES, INC.

I. RULES AND REGULATIONS GOVERNING WATER SERVICE AND SERVICE RATES AND CHARGES

1. APPLICATIONS FOR SERVICE

1.1 DEFINITIONS:

a) "Customer" means the owner or lessee of the property, or any person, partnership, firm, association or corporation or governmental agency being supplied with water by the Company.

b) "Company" means Tidewater Utilities, Inc.

c) "Premises" means the land and building or structure owned, rented or leased by the customer.

d) "Water Main" means a water pipe line owned and maintained by the Company, located in public rights-of-way or utility easements, which distributes water to the premises of one or more customers.

e) "Commission" means Delaware Public Service Commission.

f) "Unit" means commercial space from which a business is operated or a dwelling occupied or intended to be occupied as separate living quarters by a single family, a group of persons living together as a household or a person living alone, consisting of a house, townhouse, mobile home, apartment or efficiency apartment, containing private kitchen, bathroom and sleeping facilities.

g) "Office of the Company" means 1100 South Little Creek Road, Dover Delaware 19901; Telephone (800) 523-7224 or (302) 734-7500.

TIDEWATER UTILITIES, INC.
P.S.C. DEL. NO. 6
FIRST REVISED PAGE NO. 2
CANCELING
ORIGINAL PAGE NO. 2
DECEMBER 1, 2000
EFFECTIVE DATE: FEBRUARY 28, 2007

1.2 WRITTEN APPLICATION FOR CONNECTION AND SERVICE:

A new water service connection will be made and water furnished upon receipt of written application signed by the property owner or lessee, or his properly authorized agent, together with payment of the service connection charge and deposit, if any. Application forms for this purpose will be furnished by the Company and all applications must receive the approval of the Company before connection is made or water furnished.

1.3 APPLICATION FOR SERVICE:

Where a connection had been previously installed and new water service is desired, for example, because of a change of ownership or occupancy, a proper written or oral notification is to be made by the owner or lessee. The Company shall have the right upon ten days notice to disconnect water service to the premises until such notification is made and approved.

1.4 COMMENCEMENT OF SERVICE:

Upon installation of a service connection and turn on of water service to the property, the quarterly billing period will commence, regardless of the date when the customer may make first actual use of such connected and available services.

1.5 RENEWAL OF DISCONTINUED SERVICE:

Service will be renewed under a proper application when the conditions under which such service was discontinued are corrected and upon the payment of all charges and amounts due as provided in the schedule of rates and rules of the Company.

FIRST REVISED PAGE NO. 3
CANCELING
ORIGINAL PAGE NO. 3
JANUARY 25, 2002
EFFECTIVE DATE: FEBRUARY 1, 2003

2. CUSTOMER DEPOSITS AND BILLINGS

2.1 GENERAL:

The Company may require deposits from customers who have failed to make timely payment to secure future payment of bills for water service. The amount of the deposit shall equal the applicable minimum service charge for a period of two billing periods.

2.2 INTEREST ON DEPOSITS:

Interest on the deposit will accrue at the current rate approved by the Commission. Interest accruing on customer deposits will be credited to the customers' bills once every twelve months.

2.3 RETURN OF DEPOSITS:

Deposits received from customers will be held for eight consecutive billing periods. If the depositor's water bill has been paid in full by the due date for each such eight consecutive billing periods, the deposit will be refunded by a credit to the customer's account, with interest, on the ninth quarterly billing period.

3. SERVICE CONNECTIONS

3.1 COMPANY MAINS AND SERVICE LINES:

The Company will make all connections to its mains, furnish and install and maintain all service lines from the main to and including the curb stop and box, or meter stop and meter box, which will be placed inside the curb line, all of which service lines will be the property of the Company and under its control. The Company reserves the right to determine the size and kind of the Company service line which runs from the water main to the curb stop or meter stop and which is to be installed by the Company at the rates usually charged for such installation. The minimum size service for commercial customers shall be one inch.

3.2 PROPERTY OWNER SERVICE LINE:

The Company will prescribe the size, type and class of pipe and all materials laid between the curb stop and the property which is to be furnished and installed by the owner of the property. All service lines must have a meter pit with approved yoke and stops installed within ten feet of the property line. All service lines from the curb to the property must be laid in a straight line and at least 42" below the surface of the ground.

The customer shall install all service lines located on its premises in accordance with the following Company specifications: Minimum size of ¾ inch diameter pipe: SCH 40 PVC, SDR-7 or SDR-9, connected only with glue or compression fittings. No hose clamp fittings shall be permitted. The customer shall also install a proper shut-off valve in the service line before such line enters the customer's building, structure or water fixtures.

The Company shall not be responsible for low water pressure caused by abnormally long and/or undersized service lines.

3.3 STANDBY OR SUPPLEMENTAL CONNECTION:

A customer desiring water service for standby to supplement his present water supply shall make application for service and agree to a water service contract. Under no circumstances shall a Company water service be connected to any other source of water. A positive air break of at least six inches must be maintained between Company water supplies and any other water source.

3.4 SEPARATE TRENCH:

No water service pipe shall be laid in the same trench with gas pipe, drain or sewer pipe, or electric cable, or any other facility. All sewer connections must be laid in a separate trench having a minimum 10-foot separation.

TIDEWATER UTILITIES, INC.
P.S.C. DEL. NO. 6
FIRST REVISED PAGE NO. 5
CANCELING
ORIGINAL PAGE NO. 5
NOVEMBER 25, 2013
EFFECTIVE DATE: AUGUST 19, 2014

3.5 PROPERTY SUPPLIED BY SINGLE SERVICE LINE:

A customer service line from the meter to a property shall not supply more than one property, except under special circumstances approved in writing by the Company. Any such property upon written request of the owner may be supplied by two or more meters, each of which shall be considered for billing purposes as being one customer account, and provided that each supply to each such meter has an individual control at or near the curb. Installation or continuance of any such multiple meter applications shall be in the discretion of the Company, and the Company shall have the right to reduce, modify or discontinue any service as it sees fit.

3.6 CROSS CONNECTION CONTROL

a) A cross connection is any pipe, valve or other physical connection or other arrangement or device connecting the pipelines of the Company, or facilities directly or indirectly connected therewith, to and with pipes or fixtures by which any contamination might be admitted or drawn from lines other than the Company's into the distribution system of the Company, or into lines connected therewith.

b) No direct connection of pumping equipment for any purpose or cross-connection with any other piping system will be allowed unless approved in writing by the Company.

c) The Company reserves the right to require any customer, owner or tenant to install, at their expense, and as part of a service connection such equipment or material which it deems necessary and as may be acceptable or required from time to time by any regulatory agency or good engineering practices, to prevent backflow into the water supply and minimize or eliminate contamination of its water supply system.

d) Backflow preventors shall be required in all domestic, commercial, industrial, public and municipal services where water is used in any process which, in the opinion of the Company, could constitute a cross-connection and/or health hazard. Customer shall install backflow preventers on their service lines when they connect any irrigation system or equipment on their property. All back flow prevention equipment must be approved by the Company prior to installation.

TIDEWATER UTILITIES, INC.
P.S.C. DEL. NO. 6
ORIGINAL PAGE NO. 5A
NOVEMBER 25, 2013
EFFECTIVE DATE: AUGUST 19, 2014

3.6 CROSS CONNECTION CONTROL – Continued

e) Upon issuance of a non-potable water well permit and installation of such non-potable well on customer's property, and in accordance with Title 7 Chapter 60 §6075 (d), the Company may inspect the well at any reasonable time to insure that there are not interconnections with any portion of any building's plumbing and/or the Company's water service connection. Additionally, the Company may conduct an inspection for interconnections with a non-potable well upon valid reasons including suspicious water usage

4. DISCONTINUANCE OF SERVICE

4.1 AT THE REQUEST OF THE CUSTOMER:

All agreements regarding water service shall continue in full force and effect until and unless reasonable oral or written notice is given of a desire to terminate the contract by reason of a customer moving off the Company's system in the event of a change in ownership or occupancy. Water may be turned off from the premises temporarily upon the oral or written request of the customer and upon payment to the Company of the approved Turn-off Charge without in any way affecting the existing agreement for service or the customer's duty to pay the approved Facilities Charges. In the event a Seasonal Turn Off is requested, the customer shall pay the approved seasonal Turn-off Charge at the time of the turn off. In each case service will be restored upon payment of any required Turn-on Charge and other amounts due before service is restored.

4.2 BY COMPANY:

Service may be discontinued by the Company for any of the following reasons:

(a) For the use of water for any property or purpose other than described in the application.

(b) For the willful waste of water through improper or imperfect pipes, fixtures, use or otherwise.

(c) For tampering with or damaging any service pipe, meter, curb stop, cock, or seal, or any other equipment or appliance of the Company.

(d) In case of vacancy of the property.

(e) For neglecting to make or renew deposits or for nonpayment of any charge due under the rules or tariff of the Company.

(f) For refusal of reasonable access to the property for purpose of inspecting, reading, or removing the meter, and for failure to afford Company access to the meter at least once every three months during the Company's regular working hours, on Monday through Friday.

(g) For making or refusing to sever any cross-connection between a pipe or a fixture carrying water furnished by the Company and a pipe or fixture carrying water from any other source.

(h) For nonpayment of water service or repair charges.

(i) For interfering with or adversely affecting or impairing service to other customers of the Company.

(j) For extending service lines or other water lines to other buildings, structures or water fixtures without first obtaining prior written approval of the Company and/or refusing to pay the applicable tariff for such extensions of the Company's water service.

(k) For refusal to have water pipes properly arranged for meter installation.

(l) If water bills have not been paid in twenty days, water service may be discontinued in accordance with the delinquent bill procedures provided in these rules. For temporary shut-off either requested by a customer or for failure to pay past due bills there will be a charge for turning off and there will be a charge for turning back on.

(m) For violation of any rules of the Company as filed with the Public Service Commission or any violation of State or Municipal regulations governing such water service.

(n) The Company can discontinue service immediately when it receives notice that a customer has issued a bad check to cover a past due water account that was scheduled for disconnection due to non-payment.

(o) For any other reasons set forth in the regulations of the Commission ("Minimum Standards Governing Service Provided by Public Water Companies").

4.3 TURNING OFF WATER WITHOUT AUTHORITY:

A service may be turned on or turned off only by the Company. The customer shall not turn the water on or off at any curb or meter stop or disconnect or remove the meter or permit its disconnection or removal without the written consent of the Company. Turning on or turning off service shall not be deemed as a discontinuance of service or a termination of the service contract.

4.4 TEMPORARY DISCONTINUANCE OF SERVICE:

As necessity may arise in the case of breakdown, emergency or any other unavoidable cause, the Company shall have the right to shut off the water supply temporarily in order to make the necessary repairs, connections, etc.; but the Company will use all reasonable and practical measures to notify the customer in advance of such temporary discontinuance of service. In such case, the Company shall not in any way be liable for any loss or damage or any inconvenience suffered by the customer or any claim of any nature for interruption in service, lessening of supply, inadequate pressure, poor quality of water, or for any other cause beyond its control. When a supply of water is to be temporarily shut off, notice will be given, when practicable, to all customers affected by the shutting off, stating the probable duration of the interruption of service, and also the purpose for which the shut off is made.

4.5 RESERVATION AND REGULATION OF SUPPLY:

The Company shall have the right to reserve a sufficient supply of water at all times in its reservoirs to provide for fire service (if applicable) and other emergencies, and may restrict or regulate the quantity or manner of water used by the customer in case of scarcity or whenever the public welfare may require it.

4.6 ACCESS:

Company's authorized agent may have access to customer's premises during regular business hours or at such other times as may be necessary in the case of an emergency. Whenever practicable, the Company will notify the customer in advance of its intent to access the premises.

5. METERS

5.1 METERS FURNISHED BY THE COMPANY:

All meters will be furnished and installed by the Company and will remain the property of the Company and be accessible to and subject to its control.

5.2 ALL SERVICES TO BE METERED:

Each service line from a curb to a property shall be metered, and the Company reserves the right to determine the size and type of the meter (including remote meters and appurtenances).

5.3 LOCATION OF METERS:

All meters shall be set in suitable below ground meter boxes or in a suitable location on the outside or inside of a building on the premises, by the Company. A below-ground meter box shall be located within ten feet of the property line. Meters 1-1/2" and larger shall be set within the building in an open space so that the meter is accessible at all times for reading and repair. A meter shall never be placed behind an appliance, heating equipment, or other fixtures hindering its free and easy access. In cases where it is not practical to put a meter within a building, or at the discretion of the Company, a brick or concrete pit shall be provided at the owner's cost to house the meter. A suitable steel or cast-iron cover shall be provided. The Company shall make available to the customer or his agents a drawing of the meter box. All meters three inches and larger shall be provided with a bypass to provide the customer with emergency water. After plumbing has been installed and tested, the meter bars must be removed, bypasses closed, and the water shut off at the curb so that the water is not available until the meter has been installed.

Remote meters and related appurtenances may be installed in a form and location determined by the Company. The customer shall provide reasonable access to such equipment.

Water service for construction purposes will be supplied through a metered connection.

5.4 RESPONSIBILITY FOR DAMAGE:

Meters will be maintained and repaired by the Company so far as ordinary wear and tear are concerned; but damage due to freezing, hot water, or external damage due to negligence of the customer shall be paid for by the customer. The Company's judgment shall be final and binding in all matters pertaining to repairs to meters.

5.5 COST OF REPAIR OR REINSTALLATION:

The charge for repair or reinstallation or changing of the meter when removed because of damage in any way due to the negligence of the customer will be charged for on the basis of labor and materials to repair.

5.6 MINIMUM CHARGE:

Every meter is installed subject to a fixed Facilities Charge in accordance with the Company's established service rates.

5.7 NOTICE TO COMPANY OF METER PROBLEMS:

The customer shall immediately notify the Company of injury to or the inaccuracy or non-working of the meter as soon as it comes to his knowledge.

5.8 REGISTRATION CONCLUSIVE:

The quantity recorded by the meter shall be conclusive on both the customer and the Company, except when the meter has been found to be registering inaccurately or has ceased to register. In such case the quantity may be determined by the average registration of the meter when in order.

5.9 DISPUTED ACCOUNT:

In case of a disputed account involving the accuracy of the meter, such meter will be tested upon the request of the customer in conformity with the provisions of the rules and regulations of the Commission pertaining to water utilities. In the event that the meter so tested is found to have an error in registration in excess of 2%, slow or fast, the bills will be increased or decreased accordingly, as provided by the aforesaid rules.

SECOND REVISED PAGE NO. 11
CANCELING
FIRST REVISED PAGE NO. 11
APRIL 26, 2004
EFFECTIVE DATE: APRIL 27, 2005

5.10 REQUEST FOR METER TEST:

When meters are removed after installation, at the request of the customer for testing, the following rules of the Commission will apply:

Upon request by a customer, the utility shall make a test of the accuracy of the registration of the meter serving his premises.

If the meter is found to be within 2% of zero error the customer may be billed for the testing. The amount of the fee shall be $30.06, for meter service up to one inch, and for other domestic services up to two inches the fee shall be $60.11. If the meter is found to be greater than 2% of zero error the customer shall not be charged for testing.

The customer or his representative may be present when the meter is tested. In either case, a written report of the results of the test shall be made to the customer within a reasonable time after the completion of the test. A record of the report along with the complete record of the test shall be kept on file at the utility's office for at least three years.

5.11 PERIODIC METER TESTS:

In order to check the accuracy of registration of meters in service, periodic tests shall be made by the Company and at intervals not exceeding the following rules of the Commission:

(1)	5/8 in. and ¾ in.	Once every 15 years
(2)	1 in. and 1-1/2 in.	Once every 10 years
(3)	2 in., 3 in., and 4 in.	Once every 3 years
(4)	6 in. and larger	Once every year

6. PUBLIC FIRE SERVICE

6.1 ALLOWABLE USE:

No person except an authorized agent of the Company or other person authorized by the Company shall take water from any public fire hydrant or hose plug, except for fire purposes or the use of the fire department in case of fire, and no public fire hydrant shall be used for sprinkling streets, flushing sewers or gutters, or for any other purposes except with the approval and consent of the Company.

6.2 MAINTENANCE:

All Company-owned fire hydrants shall be maintained by the Company. The Company assumes no maintenance, repair or ownership responsibility for any fire hydrant installed by a developer, builder or customer unless and until such fire hydrant has been accepted by the Company as part of its public fire service system.

6.3 CHANGE OF LOCATION:

Upon written request for a change in the location of any fire hydrant, the Company, if an approved location can be found, will make such change at the expense of the person making the request. Charges shall be based on time and material to make such changes.

6.4 INSPECTION:

Upon request of the Fire Marshall or duly authorized officials of any municipality or governing body, the Company will make inspections at convenient times and at reasonable intervals to determine the condition of the fire hydrants, such inspections to be made by a representative of the Company and a duly authorized representative of the Fire Marshall or municipality.

TIDEWATER UTILITIES, INC.
P.S.C. DEL. NO. 6
ORIGINAL PAGE NO. 13
SEPTEMBER 20, 1999
EFFECTIVE DATE: DECEMBER 1, 2000

7. RESPONSIBILITY OF THE COMPANY

7.1 LIMITATION OF COMPANY RESPONSIBILITY:

It is agreed by the parties receiving fire service and any other water service, that the Company does not assume any liability as insurer of property or person and that the Company does not guarantee any continuing or special service, pressure, capacity, or facility. It is agreed by the parties receiving services that the Company shall be free and exempt of any and all claims for loss, damage or injury to any person or property by reason of fire, water leak or flood, failure to maintain water pressure or capacity.

8. BILLS AND PAYMENT

8.1 PLACE OF PAYMENT:

Bills are payable at the office of the Company or other designated location, forthwith upon receipt.

8.2 BILLS RENDERED AND DUE:

Regular meter readings will be made quarterly and bills will be rendered as soon as possible after the reading of the meter. All bills are due and payable upon presentation or delivery. All billings are payable at the Office of the Company.

All charges will be in accordance with tariffs approved by the Commission, a copy of which is attached hereto.

Quarterly Facilities Charges shall not be reduced or discounted for any reason except in the event of a Seasonal Turn Off, or new customer connection in which case the Facilities Charge will be prorated.

8.3 DELINQUENT BILLS:

If a bill remains unpaid for a period of twenty-five (25) days from the date rendered it shall be classified as delinquent, and a late notice will be sent. If the bill is then not paid within ten (10) days of mailing of the late notice and if payment arrangements are not made service will be terminated. If service is thus terminated it will not be restored until all unpaid bills and charges including the turn off and turn on charges are paid or satisfactory arrangements are made for payment. If the bill serves a multi-dwelling premise, a tag will be attached to the entrance door and the service will be terminated within forty-eight (48) hours.

The Company shall charge a late fee payment of 0.75% per month on all account balances that are not paid within thirty (30) days from the date rendered.

8.4 SEASONAL TURN OFFS:

Customers may request a Seasonal Turn Off by giving notice to the Company and paying the Seasonal Turn Off Charge. During the period of the Seasonal Turn Off, the Customer will not be required to make payment of the Facilities Charge. Service thus suspended will not be restored until all unpaid bills and charges including turn off charges are paid or satisfactory arrangements are made for payment. The amount of the Seasonal Turn Off Charge will depend upon meter size and is set forth below.

8.5 TEMPORARY SHUT OFFS:

Customers desiring an abatement from water bills due to vacancy shall give notice in writing to the Company requesting that water service be temporarily shut off. Temporary Turn-off and Turn-on Charges will apply. No abatement on water bills will be made for leaks or for water wasted by damaged fixtures.

9. GENERAL

9.1 COMPLAINTS:

Complaints with regard to the character of quality of service furnished or the reading of meters or the bills rendered, must be made at the Company's office, and a record of such complaint will be kept by the Company, giving the name and address of the complainant, the date and nature of the complaint, and the date and nature of the remedial action taken by the Company.

9.2 GENERAL:

All pipes, meters and fixtures shall be subject at all reasonable hours to inspection by properly identified employees of the Company. No plumber, owner, or other unauthorized person shall turn the water on or off at the curb or meter stop or disconnect or remove the meter without the consent of the Company.

No agent or employee of the Company has authority to bind it to any promise, agreement, or representation not provided for in these rules and regulations.

The Company reserves the right, subject to the approval of the Public Service Commission, to change, take from, or add to, the foregoing rules and regulation.

II. RULES GOVERNING EXTENSIONS

1. PURPOSE

1.01 The purpose of these rules is to establish a uniform system for the control of all engineering, construction and account procedures used by Tidewater Utilities, Inc. in making water main extensions.

1.02 Any policies or procedures indicated herein which may conflict with the provisions of any written agreement pertaining to the installation of water facilities to or within any property development or subdivision shall be superseded by the terms of such specific agreement.

2. PLANS

2.01 The developer shall submit two sets of preliminary plot plans of new developments or subdivisions or of changes within a subdivision to the Company at the same time that such information is presented to other agencies having jurisdiction or control.

2.02 Upon approval of the plot plan by other controlling agencies, the developer will furnish the Company with two sets of such approved drawings showing street names, street numbers (if available) and lot numbers. The Company will design and layout the water distribution systems showing the size of mains, location of valves, fittings, hydrants, and other appurtenances, and will return one set of drawings to the developer for approval.

2.03 The developer shall be responsible to furnish the Company with a drawing reproducible in written and electronic form, showing street names, street numbers (if available), lot numbers, and the water distribution system as laid out by the Company and approved by the developer, at no cost to the Company.

3. REQUESTS FOR WATER MAIN EXTENSIONS

3.01 The developer shall submit to the Company, in writing, all requests for water main extensions. Said requests will indicate the street names and lot numbers proposed to be served by the extension.

3.02 Upon receipt of a request for an extension, the Company will prepare and submit to the developer an appropriate agreement pertaining to the facilities to be provided and the work proposed to be done.

3.03 The developer shall execute said agreement and return same to the Company with a deposit equal to the total estimated cost, as set forth in the agreement, prior to the time when he desires work to be started.

3.04 The developer should take into account the time required to obtain materials and necessary permits. Materials will not be ordered until executed agreements and deposits are received by the Company.

3.05 If an individual customer is not near an existing main, the customer must apply for the necessary extension. If the Company cannot justify the cost of a main extension, the Company and customer shall enter into an agreement providing for payment of the cost of such extension.

4. PERMITS

4.01 The Company will be responsible for obtaining Department of Health, Fire Marshall, State Highway Department, and such other water facility construction permits as may be required.

5. WATER MAIN INSTALLATIONS

5.01 The installation of all water mains and appurtenances shall be performed by the Company or the Company's contractor. No developer shall be permitted to enter into a contract for the installation of water mains, nor shall he be permitted to make such installation with his own equipment and personnel, unless approved in advance and inspected by the Company. All installations shall conform to the Company's specifications.

5.02 The developer shall be responsible to perform and furnish the following:

(a) Provide a suitable area for stockpiling or stringing of pipe materials so that they may remain in a fixed location until completion of installation.

(b) Rough grade the limits of street rights-of-way for the total length of the extension.

(c) Provide a water main stake-out on the property line of the same side of the street on which the main is to be laid. Said stake-out shall indicate the off-set distance from the stake to the center line of pipeline, the cut required from the top of stake to the invert of the pipeline (the minimum cover from finished grade to top of pipe is four feet), the location of valves, fittings and fire hydrants. Stakes are to be set no farther apart than one hundred feet on straight runs and fifty feet on all curves.

5.03 When the provisions of Paragraph 5.02 have been met and materials have been received, construction of water main will begin.

5.04 Upon completion of installation, the water main will be tested and disinfected for twenty-four hours prior to being thoroughly flushed, after which time it shall be put into service.

6. REQUESTS FOR SERVICE INSTALLATIONS

6.01 All water service lines extending from the main to the property will be installed by the Company or the Company's contractor.

6.02 The service connection fee for water services shall be the tariff in effect as approved by the Commission. Services provided for this fee include the furnishing and installing of water meter, meter pit and stops for ¾" and 1" services and furnishing and installing water meter and stops for 1-1/2" and 2" services. The customer shall provide the meter pit and stops for 1-1/2" or larger meters.

6.03 Requests for water service installations will be made in writing by the developer, or the property owner or lessees, at least forty-five (45) days in advance of the date on which they are desired to put into service. Said requests will make reference to specific street addresses and lot numbers for which water service is requested. Payment in accordance with Paragraph 6.02 shall accompany a request for water service installations.

6.04 Water services will not be connected to mains until said mains have been tested, disinfected, flushed and put into service.

6.05 The Company shall determine the location of the water service location. Finished grade will be indicated by the developer or owner on a stake so that the meter box can be installed to grade.

6.06 Upon completion of installation the Company or its contractor shall install a stake extending at least three feet above-ground level immediately adjacent to the meter box to indicate its location.

7. ADJUSTMENTS TO FACILITIES

7.01 Any adjustments of the Company's facilities which may be necessitated due to changes in grade or due to damage by others will be done by the Company or its contractor at developer's expense.

7.02 If any valve boxes, curb boxes, or meter pits are covered up or damaged by others, these facilities will be located and brought to proper grade by the Company or its contractor at developer's expense.

7.03 Developer shall not, under any circumstances, operate or alter or allow others to operate or alter the Company's facilities. Any operation or alteration of the Company's facilities will be done by the Company's personnel upon request.

8. MISCELLANEOUS

8.01 These rules and regulations supplement all applicable regulations governing service supplied by water companies adapted by the Commission ("Minimum Standards Governing Service Provided by Public Water Companies").

8.02 The Company reserves the right to amend, change, revoke or add to these rules, and any such change shall have only prospective effect.

TARIFF SCHEDULE OF RATES

1. GENERAL WATER SERVICE CHARGES:

General Water Service customers are charged a Facilities Charge plus a Water Consumption Charge and a Public Fire Hydrant Charge, where applicable:

(a) FACILITIES CHARGES:

A Facilities Charge payable in advance is based on the customer's meter size, as follows:

Meter Size	Monthly Facilities Charge	Quarterly Facilities Charge
5/8" - 3/4"	$ 17.11	$ 51.33
1"	$ 28.51	$ 85.53
1-1/2"	$ 51.34	$ 154.02
2"	$ 79.86	$ 239.58
3"	$ 154.01	$ 462.03
4"	$ 239.58	$ 718.74
6"	$ 467.74	$ 1,403.22
8"	$ 730.13	$ 2,190.39
10"	$ 970.89	$ 2,912.67

(b) WATER CONSUMPTION CHARGES:

Quarterly Residential Customers	Rate per Thousand Gallons
0 – 5,000 gallons	$7.2619
5,001 – 20,000 gallons	$7.3555
Over 20,000 gallons	$7.4503

All other general water service customers are charged for consumption at $7.4493 per thousand gallons registered on the meter.

(c) PUBLIC FIRE HYDRANT CHARGES:

Where fire hydrants are installed, such districts will be termed Fire Hydrant Districts. A service charge of $13.38 per quarter, or $4.46 per month, will be added to the regular Facilities Charge on all services in these districts. Apartment houses, hotels, motels and other multiple unit buildings will be charged one such hydrant service charge of $13.38 per quarter, or $4.46 per month, for every four units.

TENTH REVISED PAGE NO. 22
AUGUST 31, 2022
EFFECTIVE DATE: SEPTEMBER 1, 2022

2. PRIVATE FIRE SERVICE CHARGES:

a) Customers with one service line providing both General Water Service and Private Fire Service (not used for General Water Service purposes) are charged a Private Fire Facilities Charge equal to the charge for a meter the same size as the service line, plus a charge for General Water Service based on the size of the meter, plus a Water Usage Charge, plus a Public Fire Hydrant Charge, if applicable. The Private Fire Facilities Charge is as follows:

Size of Meter	Monthly Facilities Charge	Quarterly Facilities Charge
1”	$ 8.43	$ 25.29
2”	$ 29.57	$ 88.71
4”	$125.43	$ 376.29
6”	$280.47	$ 841.41
8”	$498.95	$ 1,496.85

b) Customers with a dedicated Private Fire Service line are charged a Private Fire Facilities Charge based on the meter size or, if there is no meter, based on the charge for a meter the same size as the service line, plus a Water Usage Charge, plus a Public Fire Hydrant Charge, if applicable. The Private Fire Facilities Charge is as follows:

Size of Meter	Monthly Facilities Charge	Quarterly Facilities Charge
1”	$ 8.43	$ 25.29
2”	$ 29.57	$ 88.71
4”	$125.43	$ 376.29
6”	$280.47	$ 841.41
8”	$498.95	$ 1,496.85

c) Customers applying for one service line based on meter size and who also have Private Fire Service after the meter are charged a General Water Service Charge and a Public Fire Hydrant Charge, if applicable. In each case, any water available for fire protection, but used for purposes other than fire protection, is to be metered and to be subject to a Water Consumption Charge.

3. TURN-OFF AND TURN-ON CHARGES:

When temporary shut-off is made at the request of a customer, or for the failure of the customer to pay past-due bills or for another reason set forth in this tariff, a service charge of $38.63 will be made. An additional charge of $38.63 will be made for turning the service back on.

There shall be no discount on these charges. These charges will apply during regular working hours, and should it be necessary to perform such work after normal hours, the charge will be $57.94.

4. SEASONAL TURN-OFF CHARGES:

Customers may request a Seasonal Turn Off by giving notice to the Company and paying the Seasonal Turn Off Charge. During the period of the Seasonal Turn Off, the customer will not be required to make payment of the Facilities Charge. The amount of the Seasonal Turn-off Charge will depend upon meter size as follows:

5/8" – ¾"	$ 175.58
1"	263.37
1-1/2"	526.73
2"	877.91
3"	1,580.24
4"	2,633.73
6"	5,267.43
8"	8,427.89

5. SERVICE CONNECTION CHARGES:

a) Service Connection Charges will be as follows:

5/8" - 3/4" service	$ 987.80
1" service	$ 1,395.27
1-1/2" service	$ 2,457.18
2" service	$ 2,778.18
3" service	$ 8,890.23
4" service	$10,458.36
6" service	$15,199.26
8" service	$23,067.03

b) The charge for installing ¾" metered service to existing customers having formerly paid a Service Connection Charge shall be the difference between the Service Connection Charge in effect at the time metering commences and the Service Connection Charge previously paid. No charge will be assessed to customers having paid a tapping fee which included metered service.

c) In addition to the Service Connection Charge above, customers within the franchise territory yet outside a particular service area will be charged an extension fee of $987.80 per service.

d) In addition to the Service Connection Charge above, customers within the Development of Indian River Acres will be charged a subdivision specific tariff of $2,807.71 for each service.

6. OTHER MISCELLANEOUS CHARGES:

Service call to read a meter due to change of ownership or occupancy of a dwelling unit:
Transfer charge will be $43.90.

Service call for frozen service lines or leaks that are the customer's responsibility:
The service charge will be $38.63.
After hours charge will be $57.94.

Unauthorized entry of meter pit:
The charge will be $87.79 plus cost of repair or damage for each occurrence.

Unauthorized water withdrawal from fire hydrants:
The charge will be $263.36 for each occurrence.

The Company shall charge each customer $20.00 for any returned check it receives as payment for any service, charge or deposit.

9. CONTRIBUTION IN AID OF CONSTRUCTION (CIAC)

a) All CIAC including, but not limited to, Category 1A, Category 1B and, as defined in subsection 9.b below, Category 2, received by the Company in the form of cash or in-kind utility property, is subject to an income tax liability gross-up payment by the contributor based on the value of the CIAC, in addition to the CIAC cost payment. The income tax liability gross-up payment shall be based on the maximum Federal and Delaware income tax in effect at the time the CIAC is received by the Company. The CIAC income tax liability gross-up factor in effect on the date of this Second Revised Tariff Page No. 26 is 38.644%.

b) Pursuant to PSC Order No. 6873 (PSC Regulation Docket 15), Category 2 Costs refer to transmission, supply, treatment and/or other utility plant costs that are not directly assignable to a specific project or where the Category 1 (1A and 1B) costs have not included sufficient direct costs for transmission, supply, treatment, and/or other utility plant costs to supply water to the project. These costs will be contributed by the contractor, builder, developer, municipality, homeowner, or other project sponsor, as CIAC with no refunds. This tariff rate section applies to new customer service connections associated with water service agreements entered into after April 11, 2006.

Category 2 CIAC Charges by Service Size, including the income tax liability gross-up amount are as follows:

Service Size	
5/8" – ¾"	$2,079.66
1"	$2,162.85
1-1/2"	$2,246.04
2"	$2,474.80
3"	$4,159.33
4"	$4,783.23
6"	$6,238.99
8"	$7,902.72

10. DOVER AIR FORCE BASE (FEDERAL ENCLAVE)

PUBLIC FIRE HYDRANT CHARGES:

Each fire hydrant within the perimeter of the Dover Air Force Base (Federal Enclave) is subject to a service charge of $30.00 per quarter, or $10.00 per month.

PROSPECTUS SUPPLEMENT
(To Prospectus dated February 25, 2021)

11,000,000 Shares

American Water Works Company, Inc.

Common Stock

American Water Works Company, Inc., which is referred to as American Water, is offering and selling an aggregate of 11,000,000 shares of American Water's common stock, par value $0.01 per share, in this offering.

American Water's common stock is listed on the New York Stock Exchange, which is referred to as the NYSE, under the symbol "AWK." On February 27, 2023, the closing price of American Water's common stock on the NYSE was $139.78 per share.

Investing in American Water's common stock involves risks. See "Risk Factors" beginning on page S-4 of this prospectus supplement to read about factors you should consider before buying American Water's common stock.

Neither the Securities and Exchange Commission nor any state securities commission or other regulatory body has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

	Per Share	Total
Public offering price	$ 135.5000	$ 1,490,500,000
Underwriting discount	$ 2.0325	$ 22,357,500
Proceeds, before expenses, to American Water	$ 133.4675	$ 1,468,142,500

The underwriters have been granted an option to purchase up to an additional 1,650,000 shares of common stock from American Water at the public offering price, less the underwriting discount, for a period of 30 days following the date of this prospectus supplement.

The underwriters expect that the shares of American Water's common stock will be delivered against payment on or about March 3, 2023.

ABOUT THIS PROSPECTUS SUPPLEMENT

All references in this prospectus supplement to "American Water" and the "Company" refer to American Water Works Company, Inc. and its consolidated subsidiaries taken together as a whole, except in the sections entitled "Where You Can Find More Information," "Use of Proceeds," "Description of American Water's Capital Stock," "Underwriting," and "Legal Matters," where such terms shall refer to American Water Works Company, Inc. and not to any of its subsidiaries, in each case, unless the context otherwise requires.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering and certain other matters. The second part, the accompanying prospectus, gives more general information about American Water and its securities. Generally, the reference to "this prospectus," is to both parts of this document combined. To the extent information in this prospectus supplement conflicts with information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

American Water is not making an offer or sale of these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information in this prospectus supplement or in the accompanying prospectus is accurate only as of the date on the front cover of those documents and any information incorporated by reference is only accurate as of the date of the document incorporated by reference. American Water's business, financial condition, results of operations and prospects may have changed since the date of such information.

"American Water" and its logos are trademarks of American Water Works Company, Inc. Other service marks, trademarks and trade names referred to in this prospectus are the property of their respective owners.

Table of Contents

WHERE YOU CAN FIND MORE INFORMATION

American Water files annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission, which is referred to as the SEC. These SEC filings are available to the public over the Internet at the SEC's website at *https://www.sec.gov* and American Water's website at *https://www.amwater.com*. The information contained on or accessible from American Water's website does not constitute a part of this prospectus and is not incorporated by reference herein.

American Water has filed a registration statement on Form S-3 under the Securities Act of 1933, as amended, which is referred to as the Securities Act, with the SEC to register the securities offered by this prospectus supplement. This prospectus is a part of the registration statement, but does not contain all the information contained in the registration statement because certain parts of the registration statement are omitted in accordance with the rules and regulations of the SEC. The registration statement and the documents filed as exhibits to the registration statement are available to the public over the Internet at the SEC's website and American Water's website, each as described above.

American Water is "incorporating by reference" into this prospectus specific documents that it files with the SEC, which means that important information can be disclosed to you by referring you to those documents that are considered part of this prospectus. Information that American Water files subsequently with the SEC will automatically update and supersede this information. American Water incorporates by reference the documents listed below, and any future documents that it files with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, which is referred to as the Exchange Act, until the offering of the securities covered by this prospectus has been completed or terminated.

American Water is "incorporating by reference" into this prospectus the following documents filed with the SEC (excluding any portions of such documents that have been "furnished" but not "filed" for purposes of the Exchange Act):

Filings	Period Covered or Date Filed
Annual Report on Form 10-K	Year ended December 31, 2022
The portions of the Definitive Proxy Statement on Schedule 14A for American Water's 2022 Annual Meeting of Shareholders that are incorporated by reference into American Water's Annual Report on Form 10-K for the year ended December 31, 2021	Filed on March 29, 2022

American Water will provide to each person, including any beneficial owner, to whom this prospectus is delivered, upon written or oral request and without charge, a copy of the documents referred to above that have been incorporated in this prospectus by reference. You can request copies of such documents if you call or write American Water at the following address or telephone number: American Water Works Company, Inc., 1 Water Street, Camden, New Jersey, 08102-1658, Attention: General Counsel, (856) 955-4001.

This prospectus contains summaries of certain agreements that American Water has filed as exhibits to various SEC filings, as well as certain agreements that American Water will enter into in connection with this offering. The descriptions of these agreements contained in this prospectus or information incorporated by reference herein do not purport to be complete and are subject to, or qualified in their entirety by reference to, the definitive agreements. You can obtain copies of the definitive agreements without charge to you by making a written or oral request to American Water as described above.

American Water is only responsible for the information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus or contained in any free writing prospectus prepared by or on behalf of American Water. American Water has not authorized anyone to provide you with information

Table of Contents

other than that contained or incorporated by reference in this prospectus supplement or in the accompanying prospectus, and American Water takes no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus to the extent that a statement contained herein, or in any other subsequently filed document which also is or is deemed to be incorporated by reference herein, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus.

Table of Contents

FORWARD-LOOKING STATEMENTS

American Water has made statements under "Risk Factors" and in other sections of this prospectus and in the documents incorporated by reference herein that are forward-looking statements within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act, and the Private Securities Litigation Reform Act of 1995. In some cases, these forward-looking statements can be identified by words with prospective meanings such as "intend," "plan," "estimate," "believe," "anticipate," "expect," "predict," "project," "propose," "assume," "forecast," "likely," "uncertain," "outlook," "future," "pending," "goal," "objective," "potential," "continue," "seek to," "may," "can," "should," "will" and "could" or the negative of such terms or other variations or similar expressions. Forward-looking statements may relate to, among other things: American Water's future financial performance, liquidity and cash flows; the timing and amount of rate and revenue adjustments, including through general rate case filings, filings for infrastructure surcharges and other governmental agency authorizations and proceedings, and filings to address regulatory lag; American Water's growth and portfolio optimization strategies, including the timing and outcome of pending or future acquisition activity; the ability of American Water's California subsidiary to obtain adequate alternative water supplies in lieu of diversions from the Carmel River; the amount and allocation of projected capital expenditures and related funding requirements; American Water's ability to repay or refinance debt; the future impacts of increased or increasing financing costs, inflation and interest rates; American Water's ability to execute its current and long-term business, operational and capital expenditures strategies; American Water's ability to finance current operations, capital expenditures and growth initiatives by accessing the debt and equity capital markets; the outcome and impact on American Water of governmental and regulatory proceedings and related potential fines, penalties and other sanctions; the ability to meet or exceed American Water's stated environmental and sustainability goals, including its greenhouse gas ("GHG") emission reduction, water delivery efficiency and water system resiliency goals; the ability to complete, and the timing and efficacy of, the design, development, implementation and improvement of technology and other strategic initiatives; the impacts to American Water of the ongoing COVID-19 pandemic; the ability to capitalize on existing or future utility privatization opportunities; trends in the water and wastewater industries in which American Water operates, including macro trends with respect to American Water's efforts related to customer, technology and work execution; regulatory, legislative, tax policy or legal developments; and impacts that future significant tax legislation may have on American Water and on its business, results of operations, cash flows and liquidity.

Forward-looking statements are predictions based on American Water's current expectations and assumptions regarding future events. They are not guarantees or assurances of any outcomes, financial results, levels of activity, performance or achievements, and you are cautioned not to place undue reliance upon them. These forward-looking statements are subject to a number of estimates, assumptions, known and unknown risks, uncertainties and other factors. American Water's actual results may vary materially from those discussed in the forward-looking statements included in this prospectus and in the documents incorporated by reference herein. Factors that could cause actual results to differ from those discussed in forward-looking statements include, but are not limited to, the factors discussed under "Risk Factors" in this prospectus supplement and the following important factors:

- the decisions of governmental and regulatory bodies, including decisions to raise or lower customer rates;
- the timeliness and outcome of regulatory commissions' and other authorities' actions concerning rates, capital structure, authorized return on equity, capital investment, system acquisitions and dispositions, taxes, permitting, water supply and management, and other decisions;
- changes in customer demand for, and patterns of use of, water and energy, such as may result from conservation efforts, or otherwise;
- limitations on the availability of American Water's water supplies or sources of water, or restrictions on its use thereof, resulting from allocation rights, governmental or regulatory requirements and restrictions, drought, overuse or other factors;

Table of Contents

- a loss of one or more large industrial or commercial customers due to adverse economic conditions, or other factors;
- changes in laws, governmental regulations and policies, including with respect to the environment, health and safety, data and consumer privacy, security and protection, water quality and water quality accountability, contaminants of emerging concern, public utility and tax regulations and policies, and impacts resulting from U.S., state and local elections and changes in federal, state and local executive administrations;
- American Water's ability to collect, distribute, use, secure and store consumer data in compliance with current or future governmental laws, regulations and policies with respect to data and consumer privacy, security and protection;
- weather conditions and events, climate variability patterns, and natural disasters, including drought or abnormally high rainfall, prolonged and abnormal ice or freezing conditions, strong winds, coastal and intercoastal flooding, pandemics (including COVID-19) and epidemics, earthquakes, landslides, hurricanes, tornadoes, wildfires, electrical storms, sinkholes and solar flares;
- the outcome of litigation and similar governmental and regulatory proceedings, investigations or actions;
- the risks associated with American Water's aging infrastructure, and its ability to appropriately improve the resiliency of or maintain and replace, current or future infrastructure and systems, including its technology and other assets, and manage the expansion of its businesses;
- exposure or infiltration of American Water's technology and critical infrastructure systems, including the disclosure of sensitive, personal or confidential information contained therein, through physical or cyber attacks or other means;
- American Water's ability to obtain permits and other approvals for projects and construction of various water and wastewater facilities;
- changes in American Water's capital requirements;
- American Water's ability to control operating expenses and to achieve operating efficiencies;
- the intentional or unintentional actions of a third party, including contamination of American Water's water supplies or the water provided to its customers;
- American Water's ability to obtain and have delivered adequate and cost-effective supplies of pipe, equipment (including personal protective equipment), chemicals, power and other fuel, water and other raw materials, and to address or mitigate supply chain constraints that may result in delays or shortages in, as well as increased costs of, supplies, products and materials that are critical to or used in American Water's business operations;
- American Water's ability to successfully meet its operational growth projections, either individually or in the aggregate, and capitalize on growth opportunities, including, among other things, with respect to:
    - acquiring, closing and successfully integrating regulated operations;
    - American Water's Military Services Group entering into new military installation contracts, price redeterminations, and other agreements and contracts, with the U.S. government; and
    - realizing anticipated benefits and synergies from new acquisitions;
- risks and uncertainties following the completion of the sale of American Water's Homeowner Services Group ("HOS"), including:
    - American Water's ability to receive any contingent consideration provided for in the HOS sale, as well as amounts due, payable and owing to American Water under the seller note when due; and
    - the ability of American Water to redeploy successfully and timely the net proceeds of this transaction into American Water's Regulated Businesses (as defined in this prospectus supplement);

Table of Contents

- risks and uncertainties associated with contracting with the U.S. government, including ongoing compliance with applicable government procurement and security regulations;
- cost overruns relating to improvements in or the expansion of American Water's operations;
- American Water's ability to successfully develop and implement new technologies and to protect related intellectual property;
- American Water's ability to maintain safe work sites;
- American Water's exposure to liabilities related to environmental laws and similar matters resulting from, among other things, water and wastewater service provided to customers;
- the ability of energy providers, state governments and other third parties to achieve or fulfill their GHG emission reduction goals, including without limitation through stated renewable portfolio standards and carbon transition plans;
- changes in general economic, political, business and financial market conditions;
- access to sufficient debt and/or equity capital on satisfactory terms and as needed to support operations and capital expenditures;
- fluctuations in inflation or interest rates, and American Water's ability to address or mitigate the impacts thereof;
- the ability to comply with affirmative or negative covenants in the current or future indebtedness of American Water or any of its subsidiaries, or the issuance of new or modified credit ratings or outlooks by credit rating agencies with respect to American Water or any of its subsidiaries (or any current or future indebtedness thereof), which could increase financing costs or funding requirements and affect American Water's or its subsidiaries' ability to issue, repay or redeem debt, pay dividends or make distributions;
- fluctuations in the value of, or assumptions and estimates related to, its benefit plan assets and liabilities, including with respect to its pension and other post-retirement benefit plans, that could increase expenses and plan funding requirements;
- changes in federal or state general, income and other tax laws, including (i) future significant tax legislation, and (ii) the availability of, or American Water's compliance with, the terms of applicable tax credits and tax abatement programs;
- migration of customers into or out of American Water's service territories and changes in water and energy consumption resulting therefrom;
- the use by municipalities of the power of eminent domain or other authority to condemn the systems of one or more of American Water's utility subsidiaries, or the assertion by private landowners of similar rights against such utility subsidiaries;
- any difficulty or inability to obtain insurance for American Water, its inability to obtain insurance at acceptable rates and on acceptable terms and conditions, or its inability to obtain reimbursement under existing or future insurance programs and coverages for any losses sustained;
- the incurrence of impairment charges, changes in fair value and other adjustments related to American Water's goodwill or the value of its other assets;
- labor actions, including work stoppages and strikes;
- American Water's ability to retain and attract highly qualified and skilled employees and/or diverse talent;
- civil disturbances or unrest, or terrorist threats or acts, or public apprehension about future disturbances, unrest, or terrorist threats or acts; and
- the impact of new, and changes to existing, accounting standards.

Table of Contents

These forward-looking statements are qualified by, and should be read together with, the risks and uncertainties set forth above, and the risk factors discussed under “Risk Factors” beginning on page S-4 of this prospectus supplement and the risk factors and other statements contained in the documents incorporated by reference in this prospectus and investors should refer to such risks, uncertainties, risk factors and other statements in evaluating such forward-looking statements. Any forward-looking statements made by American Water speak only as of the date of such statements. Except as required by the federal securities laws, American Water does not have any obligation, and American Water specifically disclaims any undertaking or intention to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or otherwise. New factors emerge from time to time, and it is not possible for American Water to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on American Water’s businesses, either viewed independently or together, or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

Table of Contents

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights information contained elsewhere in this prospectus or in the documents incorporated by reference herein. It may not contain all the information that is important to you. You should carefully read this prospectus and the documents incorporated by reference herein in their entirety before making an investment decision.

The Company

American Water Works Company, Inc. is the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. As a holding company, American Water conducts substantially all of its business through its subsidiaries. American Water employs approximately 6,500 professionals who provide drinking water, wastewater and other related services to over 14 million people in 24 states.

In 2022 and 2021, American Water generated $3,792 million and $3,930 million, respectively, in total consolidated operating revenues and $820 million and $1,263 million, respectively, in net income attributable to common shareholders.

American Water conducts the majority of its business through a reportable segment which is referred to in this prospectus as the Regulated Businesses segment, which includes regulated utilities that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers, and sales to public authorities and other utilities and community water systems under bulk contracts for the supply of water or the treatment of wastewater for their own customers. American Water also operates market-based businesses that provide water and wastewater services to the U.S. government on military installations, as well as municipalities. Individually, these businesses do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States. In this prospectus, Other refers to these market-based businesses, together with corporate costs that are not allocated to the Company's Regulated Businesses segment, interest income related to the seller promissory note and income from the revenue share agreement (each arising out of the sale of HOS), eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment.

For 2022, American Water's Regulated Businesses segment generated $3,505 million in operating revenues, which accounted for 92% of American Water's total consolidated operating revenues. For the same period, American Water's Other segment generated $287 million in operating revenues, which accounted for 8% of American Water's total consolidated operating revenues.

Executive Offices

American Water is a corporation incorporated under the laws of Delaware. American Water's principal executive offices are located at 1 Water Street, Camden, New Jersey 08102-1658 and the telephone number is (856) 955-4001. American Water's website address is *https://www.amwater.com*. The information contained on or accessible from American Water's website does not constitute a part of this prospectus and is not incorporated by reference herein.

Table of Contents

THE OFFERING

Issuer	American Water Works Company, Inc.
Shares of Common Stock Offered by American Water	11,000,000 shares of common stock.
Option to Purchase Additional Shares of Common Stock	American Water has granted the underwriters an option to purchase up to 1,650,000 additional shares of common stock. This option is exercisable, in whole or in part, for a period of 30 days following the date of this prospectus supplement.
Shares of Common Stock to be Outstanding Immediately After the Offering (1)	192,966,530 shares of American Water's common stock (or 194,616,530 shares if the underwriters exercise in full their option to purchase additional shares of common stock).
Use of Proceeds	American Water estimates that it will receive net proceeds from this offering, after deducting the underwriting discount and estimated offering expenses, of approximately $1,467.4 million (or $1,687.7 million if the underwriters exercise in full their option to purchase additional shares of common stock). American Water currently intends to use the net proceeds from this offering: • to repay short-term commercial paper obligations of American Water Capital Corp., its wholly owned finance subsidiary, which is referred to as AWCC; and • for general corporate purposes. See "Use of Proceeds."
NYSE Symbol	American Water's common stock is listed on the NYSE under the symbol "AWK."
Risk Factors	Investing in American Water's common stock involves risks. See "Risk Factors" beginning on page S-4 of this prospectus supplement.
Conflicts of Interest	Certain of the underwriters and their affiliates may hold a portion of the commercial paper of AWCC that may be repaid using the net proceeds from this offering. In such event, it is possible that one or more of the underwriters or their affiliates could receive at least 5% of the net proceeds from the offering and, in that case, such underwriter would be deemed to have a conflict of interest under Rule 5121 of the Financial Industry Regulatory Authority, Inc., which is referred to as FINRA. In the event of any such conflict of interest, such underwriter would be required to conduct the distribution of the common stock in accordance with FINRA Rule 5121. If the distribution is conducted in accordance with FINRA Rule 5121, such underwriter would not be permitted to confirm a sale to an account over which it exercises discretionary authority without first receiving specific written approval from the account holder.

Table of Contents

(1) The number of shares of American Water's common stock to be outstanding after this offering is based on 181,966,530 shares of American Water's common stock outstanding as of February 23, 2023, which does not include 610,165 shares of American Water's common stock reserved for issuance upon vesting of outstanding restricted stock units and performance stock units (assuming maximum performance is achieved).

Table of Contents

RISK FACTORS

An investment in American Water's common stock involves risks. This prospectus does not describe all of these risks. You should carefully consider the risks described below and the risks described in Part I, Item 1A., "Risk Factors," in American Water's Annual Report on Form 10-K for the year ended December 31, 2022, as well as the other information included or incorporated by reference in this prospectus, before making an investment decision. American Water's business, financial condition or results of operations could be materially adversely affected by any of these risks.

American Water's management will have broad discretion over the use of the net proceeds from this offering and might not apply such proceeds in ways that increase the value of your investment.

American Water intends to use the net proceeds from this offering to repay short-term commercial paper obligations of AWCC, and for general corporate purposes. See "Use of Proceeds" on page S-6 of this prospectus supplement. However, American Water's management will have broad discretion over the use of the net proceeds from this offering, and you will be relying on the judgment of management regarding the application of these proceeds. American Water's management may not apply the net proceeds of this offering in ways that increase the value of your investment. The amounts and timing of American Water's actual expenditures will depend on numerous factors, including the factors described under "Risk Factors" in this prospectus supplement and accompanying prospectus, and in the documents incorporated by reference herein and therein, as well as the amount of cash used in American Water's business operations. American Water may find it necessary or advisable to use the net proceeds for other purposes, and management will have significant flexibility in applying the net proceeds from this offering.

American Water's shareholders may experience dilution as a result of this offering and they may experience further dilution if American Water issues additional common stock in future offerings.

The issuance of any common stock by American Water to the underwriters will have a dilutive effect on American Water's earnings per share. Any additional future issuances of American Water's common stock will reduce the percentage of American Water's common stock owned by investors purchasing shares in this offering who do not participate in future issuances. In most circumstances, as is the case here, shareholders will not be entitled to vote on whether or not American Water issues additional common stock. In addition, depending on the terms and pricing of an additional offering of American Water's common stock, American Water's shareholders may experience dilution in both the book value and fair value of their shares.

Future sales of American Water's shares of common stock or preferred stock could adversely affect the market price of American Water's common stock.

Future sales of substantial amounts of American Water common stock in the public market following this offering, whether by American Water or its existing shareholders, or the perception that such sales could occur, may adversely affect the market price of its common stock, which could decline significantly. Sales by American Water's existing shareholders might also make it more difficult for American Water to raise equity capital by selling new common stock at a time and price that it deems appropriate. American Water may also raise capital by issuing shares of preferred stock that have super voting, special approval, dividend or other rights or preferences that are senior to its common stock. Shares of preferred stock may also be convertible into shares of American Water's common stock, which may dilute the value of its common stock. American Water's board of directors may authorize the issuance of preferred stock from time to time in one or more series, without shareholder approval. See "Description of American Water's Capital Stock" beginning on page S-7 of this prospectus supplement.

Table of Contents

The price of American Water's common stock may fluctuate significantly.

The market price of American Water's common stock may fluctuate significantly. You may not be able to resell your shares at or above the offering price due to fluctuations in the market price of American Water's common stock caused by changes in American Water's operating performance or prospects and other factors, including broad market fluctuations. Some specific factors that may have a significant effect on the market price of American Water's common stock, in addition to those set forth under "Forward-Looking Statements" in this prospectus supplement, include:

- actual or anticipated variations in American Water's operating results or future prospects;
- the public's and the financial markets' reaction to American Water's press releases, its other public announcements and its filings with the SEC;
- strategic actions by American Water or its competitors, such as acquisitions, dispositions or restructurings;
- changes in accounting standards, policies, guidance, interpretations or principles;
- price and volume fluctuations in the overall equity capital markets from time to time;
- adverse conditions in the financial markets or general economic conditions, including those resulting from war, incidents of terrorism and responses to such events;
- future sales of common stock by American Water or its directors or executive officers; and
- changes in securities analyst estimates, projections or recommendations regarding American Water or its common stock or other securities, other comparable companies or their securities, or the water and wastewater industries generally.

Table of Contents

USE OF PROCEEDS

American Water estimates that it will receive net proceeds from this offering, after deducting the underwriting discount and estimated offering expenses, of approximately $1,467.4 million (or $1,687.7 million if the underwriters exercise in full their option to purchase additional shares of common stock).

American Water currently intends to use the net proceeds from this offering:

- to repay short-term commercial paper obligations of AWCC; and
- for general corporate purposes.

On December 31, 2022, AWCC had $1,177 million in aggregate principal amount of commercial paper outstanding, with a weighted-average maturity of 13 days and a weighted-average interest rate of 4.41%.

This expected use of the net proceeds from this offering represents American Water's intentions based upon American Water's current plans and business conditions. The amounts and timing of any actual expenditures may vary significantly depending on numerous factors, including the factors described under "Risk Factors" in this prospectus supplement and accompanying prospectus and in the documents incorporated by reference herein and therein. American Water may find it necessary or advisable to use the net proceeds for other purposes, and American Water's management will have significant flexibility in applying the net proceeds from this offering.

Table of Contents

DESCRIPTION OF AMERICAN WATER'S CAPITAL STOCK

The following description of American Water's common stock and preferred stock is not intended to be complete. For more information regarding American Water's common stock and preferred stock, please refer to American Water's restated certificate of incorporation, which is referred to below as American Water's "certificate of incorporation," and American Water's amended and restated bylaws, which is referred to below as American Water's "bylaws." The certificate of incorporation and bylaws are incorporated by reference as exhibits to the registration statement of which this prospectus is a part. The terms of these securities also may be affected by the General Corporation Law of the State of Delaware, which is referred to below as the DGCL.

General

American Water's authorized capital stock consists of 500,000,000 shares of common stock, par value $0.01 per share, and 50,000,000 shares of preferred stock. As of February 23, 2023, there were 181,966,530 shares of common stock outstanding and no shares of preferred stock outstanding.

Common Stock

Voting Rights

Other than with respect to director elections, except as otherwise required by law, all matters to be voted on by American Water's shareholders must be approved by a majority of the shares present in person or proxy at such meeting and entitled to vote on the subject matter. With respect to uncontested director elections, American Water's bylaws require that in order to be elected, a director nominee must receive a majority of the votes cast (for this purpose, a majority of the votes cast means that the number of shares voted "for" a director nominee must exceed the number of votes cast "against" that nominee). For contested director elections where the number of nominees exceeds the number of directors to be elected, American Water's bylaws require that the directors shall be elected by the vote of a plurality of the shares represented in person or by proxy at any such meeting and entitled to vote on the election of directors.

Dividends

Holders of common stock will share equally in any dividend declared by American Water's board of directors, subject to the rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event of any voluntary or involuntary liquidation, dissolution or winding up of American Water's affairs, holders of American Water's common stock would be entitled, after payment of the liquidation preference to all holders of any outstanding preferred stock, to share ratably in American Water's assets that are legally available for distribution to shareholders after payment of liabilities. American Water must pay the applicable distribution to any holders of its preferred stock before it may pay distributions to the holders of its common stock.

Other Rights

American Water's shareholders have no preemptive or other rights to subscribe for additional shares.

Preferred Stock

American Water's board of directors may authorize the issuance of preferred stock from time to time in one or more series, without shareholder approval. Subject to the limits imposed by the DGCL, the board of directors is authorized to fix for any series of preferred stock the number of shares of such series and the voting powers

Table of Contents

(if any), designation, preferences and relative, participating, optional or other special rights, and qualifications, limitations or restrictions of such series. American Water's board of directors is also authorized to increase or decrease the number of shares of any series, but not below the number of shares of that series then outstanding, without any further vote or action by American Water's shareholders.

American Water's board of directors may authorize the issuance of preferred stock with voting or conversion rights that affect adversely the voting power or other rights of American Water's common shareholders. The issuance of preferred stock, while providing flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of delaying, deferring or preventing a change in control, causing the market price of a share of American Water's common stock to decline, or impairing the voting and other rights of the holders of American Water's common stock.

Certain Anti-Takeover Provisions of American Water's Certificate of Incorporation and Bylaws, and the DGCL

The following provisions of American Water's certificate of incorporation and bylaws could deter, delay or prevent a third party from acquiring American Water, even if doing so would benefit American Water's shareholders.

Undesignated Preferred Stock

The ability to authorize undesignated preferred stock makes it possible for American Water's board of directors to authorize the issuance of preferred stock with super voting, special approval, dividend or other rights or preferences on a discriminatory basis that could impede the success of any attempt to acquire American Water. These and other provisions may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of American Water.

Requirements for Advance Notification of Shareholders Meetings, Nominations and Proposals

American Water's bylaws provide that special meetings of shareholders may be called only upon the request of the majority of the members of American Water's board of directors, upon request of American Water's Board Chair, or by American Water's Secretary upon request of shareholders holding at least 15% of American Water's outstanding common stock. American Water's bylaws prohibit the conduct of any business at a special meeting other than as specified in the notice for such meeting.

American Water's bylaws establish advance notice procedures with respect to shareholder proposals for annual meetings and the nomination of candidates for election as directors, other than nominations made by or at the direction of American Water's board of directors or a committee of the board of directors. A shareholder who wishes to bring a matter before a meeting or submit candidates for nomination as directors must comply with American Water's advance notice requirements and provide American Water with certain information and, if applicable under the bylaws, provide to American Water certain agreements and undertakings. Additionally, vacancies and newly created directorships may be filled only by a vote of a majority of the members of American Water's board of directors then in office, even though less than a quorum, or by shareholders. These provisions may defer, delay or discourage a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of American Water.

Shareholder Action by Written Consent

As permitted by Section 228 of the DGCL, American Water's certificate of incorporation states that any action required or permitted to be taken by American Water's shareholders must be effected at a duly called annual or special meeting of American Water's shareholders and may not be effected by consent in writing by such shareholders.

Table of Contents

Approval of Acquisition of Control by Public Utility Commission

A significant number of American Water's regulated subsidiaries are subject to economic regulation by state public utility commissions. Some of these states have enacted laws that require regulatory approval for the acquisition of "control" of any regulated utility. In those states, obtaining "control" of the parent or any other company that controls a regulated utility also requires prior regulatory approval. The threshold for a change in control is a fact-specific inquiry that varies by state. For example, in some states, a presumption of control will arise when an acquiring party acquires more than 9.9% of the voting securities of the regulated utility or the controlling entity. In addition to ownership, other states may analyze the degree of influence or control an acquiror may exert over American Water. Any person acquiring American Water's common stock in an offering or in any other purchase of American Water's common stock in an amount sufficient to trigger a change in control under state law would need the prior approval of the applicable state public utility commission.

Certain Other Provisions of American Water's Certificate of Incorporation and Bylaws and the DGCL

Board of Directors

American Water's certificate of incorporation provides that the number of directors is fixed in the manner provided in American Water's bylaws. American Water's bylaws provide that the number of directors will be fixed from time to time by American Water's board of directors.

Business Combinations under the DGCL

American Water is subject to Section 203 of the DGCL, which prohibits a publicly held Delaware corporation from engaging in a "business combination" with an "interested stockholder" for a period of three years after the time the shareholder became an "interested stockholder," subject to certain exceptions, including if, prior to such time, the board of directors approved the business combination or the transaction which resulted in the shareholder becoming an "interested stockholder." "Business combinations" include mergers, asset sales and other transactions resulting in a financial benefit to the "interested stockholder." Subject to various exceptions, an "interested stockholder" is a person who, together with his or her affiliates and associates, owns, or within the prior three years did own, 15% or more of the corporation's outstanding voting stock. These restrictions generally prohibit or delay the accomplishment of mergers or other takeover or change-in-control attempts that are not approved by a company's board of directors.

Limitations of Liability and Indemnification of Directors and Officers

The DGCL authorizes corporations to limit or eliminate the personal liability of directors and officers of corporations and their shareholders for monetary damages for breaches of directors' fiduciary duties. American Water's certificate of incorporation includes a provision that eliminates the personal liability of directors (but not officers) for monetary damages for actions taken as a director to the fullest extent authorized by the DGCL. The DGCL does not permit exculpation for liability:

- for breach of the duty of loyalty;
- for acts or omissions not in good faith or involving intentional misconduct or knowing violation of law;
- under Section 174 of the DGCL (relating to unlawful dividends or stock repurchases); or
- for transactions from which the director derived an improper personal benefit.

American Water's certificate of incorporation and bylaws provide that American Water will indemnify its directors and officers to the fullest extent permitted by law. American Water's bylaws also expressly authorize American Water to carry directors' and officers' insurance providing indemnification for American Water's directors, officers and certain employees and agents for certain liabilities.

Table of Contents

The limitation of liability and indemnification provisions in American Water's certificate of incorporation and bylaws may discourage shareholders from bringing a lawsuit against American Water's directors for breach of their fiduciary duty. These provisions may also have the effect of reducing the likelihood of derivative litigation against American Water's directors and officers, even though such an action, if successful, might otherwise benefit American Water and its shareholders. In addition, your investment in American Water's common stock may be adversely affected to the extent American Water pays the costs of settlement and damage awards against directors and officers in accordance with these indemnification provisions.

Proxy Access

American Water's bylaws permit an eligible shareholder or group of shareholders to include up to a specified number of director nominees in American Water's proxy materials for an annual meeting of shareholders. To qualify, the shareholders (or group of up to 20 shareholders) must have continuously owned for at least three years 3% or more of American Water's outstanding common stock. The maximum number of shareholder nominees permitted under this proxy access provision is the greater of (i) two or (ii) 20% of the total number of directors on American Water's board of directors as of the last day on which a proxy access notice may be submitted, rounded down to the nearest whole number.

Transfer Agent and Registrar

American Stock Transfer & Trust Company, LLC serves as the registrar and transfer agent for American Water's common stock.

New York Stock Exchange Listing

American Water's common stock is listed on the New York Stock Exchange under the trading symbol "AWK."

Table of Contents

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS FOR NON-U.S. HOLDERS

The following discussion summarizes certain U.S. federal income tax considerations relevant to the acquisition, ownership and disposition of shares of American Water's common stock, and does not purport to be a complete analysis of all potential U.S. federal income tax considerations. This discussion only applies to shares of American Water's common stock that are held as capital assets, within the meaning of section 1221 of the Internal Revenue Code of 1986, as amended (the "Code"), and that are purchased in this offering by Non-U.S. Holders (as defined below). This summary is based on the Code, administrative pronouncements, judicial decisions and regulations of the Treasury Department as of the date of this prospectus supplement, changes to any of which subsequent to the date of this prospectus supplement may affect the tax consequences described herein. This discussion does not describe all of the U.S. federal income tax considerations that may be relevant to Non-U.S. Holders in light of their particular circumstances or to Non-U.S. Holders subject to special rules, such as certain financial institutions, tax-exempt organizations, insurance companies, traders or dealers in securities or commodities, persons holding shares of American Water's common stock as part of a hedge or other integrated transaction, accrual method taxpayers subject to special tax accounting rules as a result of their use of financial statements or certain former citizens or residents of the United States. This discussion does not address any U.S. federal income tax consequences for U.S. taxpayers who purchase shares of American Water's common stock. Persons considering the purchase of shares of American Water's common stock are urged to consult their tax advisors with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction. Furthermore, this discussion does not describe the effect of U.S. federal estate and gift tax laws or the effect of any applicable foreign, state or local laws.

American Water has not and will not seek any rulings or opinions from the Internal Revenue Service (the "IRS") with respect to the matters discussed below. There can be no assurance that the IRS will not take a different position concerning the tax consequences of the acquisition, ownership or disposition of shares of its common stock or that any such position would not be sustained.

Prospective investors should consult their own tax advisors with regard to the application of the U.S. federal income tax considerations discussed below to their particular situations as well as the application of any state, local, foreign or other tax laws, including gift and estate tax laws.

For purposes of this summary, a "Non-U.S. Holder" means a beneficial owner of shares of American Water's common stock that, for U.S. federal income tax purposes, is not (i) an individual that is a citizen or resident of the United States; (ii) a corporation or other entity treated as a corporation for U.S. federal income tax purposes that is created or organized under the laws of the United States, any state thereof or the District of Columbia; (iii) an estate the income of which is subject to U.S. federal income taxation regardless of its source; or (iv) a trust if (A) a court within the United States is able to exercise primary supervision over its administration and one or more United States persons (as defined in the Code) have the authority to control all substantial decisions of such trust, or (B) the trust has made an election under the applicable Treasury regulations to be treated as a United States person.

If a partnership, or other entity or arrangement treated as a partnership for U.S. federal income tax purposes, holds shares of American Water's common stock, the tax treatment of a partner in such a partnership will generally depend upon the status of the partner and the activities of the partnership. Partners in a partnership holding shares of American Water's common stock should consult their tax advisor as to the particular U.S. federal income tax considerations relevant to the acquisition, ownership and disposition of such shares of American Water's common stock applicable to them.

Table of Contents

Distributions

In general, a distribution that American Water makes to a Non-U.S. Holder with respect to shares of its common stock will constitute a dividend for U.S. federal income tax purposes to the extent paid out of American Water's current or accumulated earnings and profits as determined under the Code. To the extent the amount of a distribution exceeds American Water's current and accumulated earnings and profits, such excess will constitute a return of capital and will first reduce the Non-U.S. Holder's adjusted tax basis in American Water's common stock, but not below zero, and then will be treated as gain from the sale of American Water's common stock (see "—Sale or Other Taxable Disposition of Common Stock" below). Subject to the discussions below under "—Information Reporting and Backup Withholding" and "—Foreign Account Tax Compliance Act," dividends paid to a Non-U.S. Holder that are not effectively connected with the Non-U.S. Holder's conduct of a trade or business within the United States will generally be subject to U.S. federal withholding tax at a rate of 30% of the gross amount of the dividends (unless such dividend is eligible for a reduced rate under an applicable income tax treaty). In order to obtain a reduced rate of withholding, a Non-U.S. Holder is generally required to provide to the applicable withholding agent an IRS Form W-8BEN, IRS Form W-8BEN-E (or a suitable substitute form) or other applicable certification properly certifying such Non-U.S. Holder's eligibility for the reduced rate. Non-U.S. Holders that do not timely provide the applicable withholding agent with the required certification, but that qualify for a reduced withholding rate, may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for a refund with the IRS. Non-U.S. Holders should consult their tax advisors regarding their entitlement to benefits under an applicable income tax treaty and the timing and manner of claiming the benefits.

Subject to the discussions below under "—Information Reporting and Backup Withholding" and "—Foreign Account Tax Compliance Act," dividends that are effectively connected with a Non-U.S. Holder's conduct of a trade or business in the United States and, if an applicable income tax treaty so requires, are attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States, are taxed on a net-income basis at the regular graduated rates and in the manner applicable to U.S. persons. The Non-U.S. Holder is generally required to provide to the applicable withholding agent a properly executed IRS Form W-8ECI (or a suitable substitute form) in order to claim an exemption from, or reduction in, U.S. federal withholding. In addition, a "branch profits tax" may be imposed at a 30% rate (or a reduced rate under an applicable income tax treaty) on a foreign corporation's effectively connected earnings and profits for the taxable year, as adjusted for certain items.

Sale or Other Taxable Disposition of Common Stock

Subject to the discussions below under "—Information Reporting and Backup Withholding" and "—Foreign Account Tax Compliance Act," a Non-U.S. Holder generally will not be subject to U.S. federal withholding tax with respect to gain, if any, recognized on the sale or other taxable disposition of shares of American Water's common stock. A Non-U.S. Holder will also generally not be subject to U.S. federal income tax with respect to such gain, unless (i) the gain is effectively connected with the conduct by such Non-U.S. Holder of a trade or business within the United States, and, if an applicable income tax treaty so requires, is attributable to a permanent establishment or fixed base maintained by the Non-U.S. Holder within the United States, (ii) in the case of a Non-U.S. Holder that is a nonresident alien individual, such Non-U.S. Holder is present in the United States for 183 or more days in the taxable year of the disposition and certain other conditions are satisfied, or (iii) American Water's common stock constitutes a U.S. real property interest by reason of American Water's status as a U.S. real property holding corporation (a "USRPHC") for U.S. federal income tax purposes.

In the case described in (i) above, gain or loss recognized on the disposition of shares of American Water's common stock generally will be subject to U.S. federal income taxation in the same manner as if such gain or loss were recognized by a United States person, and, in the case of a Non-U.S. Holder that is a foreign corporation, may also be subject to the branch profits tax at a rate of 30% (or a lower applicable treaty branch profits tax rate). In the case described in (ii) above, the Non-U.S. Holder will be subject to a 30% tax (or a lower

Table of Contents

applicable treaty rate) on any capital gain recognized on the disposition of shares of American Water's common stock (after being offset by certain U.S.-source capital losses). In the case described in (iii) above, American Water has not determined whether it is a USRPHC; however, even if it is a USRPHC, so long as shares of its common stock continue to be regularly traded on an established securities market in the United States, within the meaning of applicable Treasury regulations, a Non-U.S. Holder will not be subject to U.S. federal income tax on the disposition of shares of American Water's common stock if the Non-U.S. Holder has not held more than 5% (actually or constructively) of American Water's total outstanding common stock at any time during the shorter of the five-year period preceding the date of disposition, or such Non-U.S. Holder's holding period. If a Non-U.S. Holder exceeds the limits described in the last sentence with respect to common stock and American Water is a USRPHC, the Non-U.S. Holder generally will be subject to U.S. federal income tax at the regular graduated rates applicable to U.S. persons upon its disposition at a gain. In such a case, a Non-U.S. Holder that exceeds such limits generally would also be subject to such tax with respect to any distribution on such common stock to the extent such distribution would not be treated as a dividend if such Non-U.S. Holder were a U.S. person. If a Non-U.S. Holder is subject to the tax described in the preceding sentences, the Non-U.S. Holder will be required to file a U.S. federal income tax return with the IRS.

Non-U.S. Holders should consult their tax advisors regarding the U.S. federal income tax consequences of investing in shares of American Water's common stock if American Water were to be treated as a USRPHC. Non-U.S. Holders should also consult their tax advisors regarding potentially applicable income tax treaties that may provide for different rules.

Information Reporting and Backup Withholding

Information returns will be filed annually with the IRS in connection with any dividends paid on American Water's common stock to a Non-U.S. Holder. Copies of these information returns may also be made available under the provisions of a specific tax treaty or other agreement to the tax authorities of the country in which the Non-U.S. Holder resides. Unless the Non-U.S. Holder complies with certification procedures to establish that it is not a United States person (by providing a valid IRS Form W-8BEN, W-8BEN-E, or other applicable certification), information returns may be filed with the IRS in connection with the proceeds from a sale or other disposition, and the Non-U.S. Holder may be subject to backup withholding (currently at a rate of 24%) on dividends paid on American Water's common stock or on the proceeds from a sale or other disposition of shares of American Water's common stock. Backup withholding is not an additional tax. The amount of any backup withholding from a payment to a Non-U.S. Holder generally will be allowed as a credit against the Non-U.S. Holder's U.S. federal income tax liability and may entitle the Non-U.S. Holder to a refund, provided that the required information is furnished to the IRS in a timely manner.

Foreign Account Tax Compliance Act

Under sections 1471 to 1474 of the Code and related IRS guidance (commonly referred to as the Foreign Account Tax Compliance Act ("FATCA")), a 30% U.S. withholding tax is imposed on dividends paid on American Water's common stock and on gross proceeds from the sale or other disposition (including redemption) of shares of American Water's common stock in each case if paid to a "foreign financial institution" or a "non-financial foreign entity" (each as defined in the Code) (including, in some cases, when such foreign financial institution or entity is acting as an intermediary), unless (i) in the case of a foreign financial institution, such institution undertakes certain diligence and reporting obligations, (ii) in the case of a non-financial foreign entity, such entity either certifies that it does not have any "substantial United States owners" (as defined in the Code) or provides the withholding agent with a certification identifying each direct and indirect substantial United States owner of the entity, or (iii) the foreign financial institution or non-financial foreign entity otherwise qualifies for an exemption from these rules and provides appropriate documentation. Under proposed Treasury regulations promulgated by the Treasury Department on December 13, 2018, which state that taxpayers may rely on the proposed Treasury regulations until final Treasury regulations are issued, this withholding tax will not apply to the gross proceeds from the sale or disposition of shares of American Water's common stock. If the

Table of Contents

payee is a foreign financial institution and is subject to the diligence and reporting requirements in (i) above, it must enter into an agreement with the U.S. Department of the Treasury requiring, among other things, that it undertake to identify accounts held by certain "specified United States persons" or "United States owned foreign entities" (each as defined in the Code), annually report certain information about such accounts and withhold 30% on payments to non-compliant foreign financial institutions and certain other account holders. Certain Non-U.S. Holders located in a jurisdiction with an intergovernmental agreement with the United States governing FATCA may be subject to different rules. American Water will not be obligated to make any "gross up" or additional payments in respect of amounts withheld on shares of its common stock if American Water determines that it must so withhold in order to comply with FATCA in respect of the amounts described above. Prospective investors should consult their own tax advisors regarding FATCA and whether it may be relevant to the ownership and disposition of shares of American Water's common stock.

Table of Contents

UNDERWRITING

Subject to the terms and conditions set forth in an underwriting agreement dated the date of this prospectus supplement between American Water and the underwriters named below, for whom BofA Securities, Inc., Wells Fargo Securities, LLC and RBC Capital Markets, LLC are acting as representatives, American Water has agreed to sell to each of the underwriters, and each of the underwriters has severally agreed to purchase from American Water, the number of shares of American Water's common stock shown opposite its name below:

Underwriter	Number of Shares
BofA Securities, Inc.	2,475,000
Wells Fargo Securities, LLC	2,475,000
RBC Capital Markets, LLC	2,475,000
J.P. Morgan Securities LLC	825,000
Mizuho Securities USA LLC	825,000
Evercore Group L.L.C.	330,000
Guggenheim Securities, LLC	330,000
Scotia Capital (USA) Inc.	275,000
TD Securities (USA) LLC	275,000
Truist Securities, Inc.	275,000
Huntington Securities, Inc.	165,000
Regions Securities LLC	165,000
Loop Capital Markets LLC	55,000
Roberts & Ryan Investments Inc.	55,000
Total	11,000,000

The offering of the shares of American Water's common stock by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part. The underwriting agreement provides that the underwriters are obligated to purchase all of the shares of common stock in the offering if any are purchased.

The underwriters have advised American Water that they propose initially to offer the shares of American Water's common stock in this offering at the price to public set forth on the cover of this prospectus supplement. If all of such shares of common stock are not sold at the price to public set forth on the cover page of this prospectus supplement, the offering price and other selling terms may be changed by the underwriters.

Option to Purchase Additional Shares

American Water has granted the underwriters an option to purchase from American Water directly up to an additional 1,650,000 shares of common stock. The shares purchased under this option will be purchased at the public offering price, less the underwriting discount. The underwriters may exercise this option at any time, in whole or in part, for a period of 30 days from the date of this prospectus supplement. If any additional shares of American Water's common stock are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered.

If the underwriters exercise their option, each underwriter will be obligated, subject to the conditions contained in the underwriting agreement, to purchase a number of additional shares of common stock in approximately the same proportion as shown in the table above.

Discount

The underwriting discount is equal to the public offering price per share of common stock less the amount paid by the underwriters to American Water per share of common stock. The following table shows the per share

Table of Contents

and total underwriting discount to be paid to the underwriters assuming both no exercise and full exercise of the underwriters' option to purchase additional shares.

	Per Share	Without Option Exercise	With Full Option Exercise
Public offering price	$ 135.5000	$ 1,490,500,000	$ 1,714,075,000
Underwriting discount	$ 2.0325	$ 22,357,500	$ 25,711,125
Proceeds, before expenses, to American Water	$ 133.4675	$ 1,468,142,500	$ 1,688,363,875

Expenses and Indemnification

American Water estimates that the total expenses of the offering, including registration, listing and printing fees and legal and accounting expenses but excluding the underwriting discount, will be approximately $700,000.

American Water has agreed to indemnify the underwriters against liabilities relating to this offering, including liabilities under the Securities Act, or contribute to payments that the underwriters may be required to make in that respect.

Conflicts of Interest

Certain of the underwriters and their affiliates may hold a portion of the commercial paper of AWCC that may be repaid using the net proceeds from this offering. In such event, it is possible that one or more of the underwriters or their affiliates could receive at least 5% of the net proceeds from the offering and, in that case, such underwriter would be deemed to have a conflict of interest under FINRA Rule 5121. In the event of any such conflict of interest, such underwriter would be required to conduct the distribution of the common stock in accordance with FINRA Rule 5121. If the distribution is conducted in accordance with FINRA Rule 5121, such underwriter would not be permitted to confirm a sale to an account over which it exercises discretionary authority without first receiving specific written approval from the account holder.

Price Stabilization and Short Positions

Until the distribution of the shares of common stock is completed, SEC rules may limit underwriters and selling group members from bidding for and purchasing American Water's common stock. However, the representatives may engage in transactions that stabilize the price of the common stock, such as bids or purchases to peg, fix or maintain that price.

In connection with the offering, the underwriters may purchase and sell American Water's common stock in the open market. These transactions may include short sales, purchases on the open market to cover positions created by short sales and stabilizing transactions. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering. "Covered" short sales are sales made in an amount not greater than the underwriters' option to purchase additional shares described above. The underwriters may close out any covered short position by either exercising their option to purchase additional shares or purchasing shares in the open market. In determining the source of shares to close out the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the option granted to them. "Naked" short sales are sales in excess of such option. The underwriters must close out any naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of American Water's common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of shares of American Water's common stock made by the underwriters in the open market prior to the completion of the offering.

Table of Contents

Similar to other purchase transactions, the underwriters' purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of American Water's common stock or preventing or retarding a decline in the market price of American Water's common stock. As a result, the price of American Water's common stock may be higher than the price that might otherwise exist in the open market. The underwriters may conduct these transactions on the New York Stock Exchange, in the over-the-counter market or otherwise.

Neither American Water nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of American Water's common stock. In addition, neither American Water nor any of the underwriters make any representation that the representatives of the underwriters will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

Lock-Up Agreement

American Water has agreed that, subject to certain limited exceptions, without the prior written consent of the representatives of the underwriters, American Water will not directly or indirectly during the period commencing on the date hereof and ending 90 days after the date hereof (1) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, or file with, or submit to, the SEC a registration statement under the Securities Act relating to any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock, or publicly disclose the intention to make any offer, sale, pledge, disposition, submission or filing or (2) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of the common stock or any such other securities, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of common stock or such other securities, in cash or otherwise.

Furthermore, American Water's directors and executive officers have agreed that, subject to certain limited exceptions, without the prior written consent of the representatives of the underwriters, they will not, directly or indirectly, during the period commencing on the date hereof and ending 60 days after the date hereof (1) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock, or publicly disclose the intention to make any offer, sale, pledge or disposition, (2) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of the common stock or such other securities, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of common stock or such other securities, in cash or otherwise, or (3) make any demand for or exercise any right with respect to the registration of any shares of common stock or any security convertible into or exercisable or exchangeable for common stock.

The representatives of the underwriters, in their sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time with or without notice. When determining whether or not to release the common stock and other securities from lock-up agreements, the representatives of the underwriters will consider, among other factors, the holder's reasons for requesting the release, the number of shares or other securities for which the release is being requested and market conditions at the time.

NYSE Symbol

American Water's common stock is listed on the NYSE under the symbol "AWK."

Table of Contents

Selling Restrictions

No action has been taken in any jurisdiction (except in the United States) that would permit a public offering of the shares of American Water's common stock, or the possession, circulation or distribution of this prospectus or any other material relating to American Water or the shares of its common stock in any jurisdiction where action for that purpose is required. Accordingly, the shares of American Water's common stock may not be offered or sold, directly or indirectly, and neither this prospectus nor any other offering material or advertisements in connection with the shares of the common stock may be distributed or published, in or from any country or jurisdiction except in compliance with any applicable rules and regulations of any such country or jurisdiction.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission ("ASIC"), in relation to the offering. This prospectus does not constitute a prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (the "Corporations Act"), and does not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the shares of American Water's common stock may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the shares without disclosure to investors under Chapter 6D of the Corporations Act.

The shares of common stock applied for by Exempt Investors in Australia must not be offered for sale in Australia in the period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring shares must observe such Australian on-sale restrictions.

This prospectus contains general information only and does not take account of the investment objectives, financial situation or particular needs of any particular person. It does not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Canada

The shares of American Water's common stock may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the shares of common stock must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus supplement and the accompanying prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Table of Contents

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts ("NI 33-105"), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

European Economic Area

Prohibition of Sales to European Economic Area Retail Investors

In relation to each Member State of the European Economic Area (each a "Relevant State"), no shares of American Water's common stock have been offered or will be offered pursuant to the offering to the public in that Relevant State prior to the publication of a prospectus in relation to the shares of common stock which has been approved by the competent authority in that Relevant State or, where appropriate, approved in another Relevant State and notified to the competent authority in that Relevant State, all in accordance with the Prospectus Regulation, except that the shares of common stock may be offered to the public in that Relevant State at any time: (a) to any legal entity which is a qualified investor as defined under Article 2 of the Prospectus Regulation; (b) to fewer than 150 natural or legal persons (other than qualified investors as defined under Article 2 of the Prospectus Regulation), subject to obtaining the prior consent of the underwriters for any such offer; or (c) in any other circumstances falling within Article 1(4) of the Prospectus Regulation, provided that no such offer of the shares of common stock shall require American Water or any underwriter to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation. For the purposes of this provision, the expression an "offer to the public" in relation to the shares of common stock in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and any shares of common stock to be offered so as to enable an investor to decide to purchase or subscribe for any shares of common stock, and the expression "Prospectus Regulation" means Regulation (EU) 2017/1129.

United Kingdom

Prohibition of Sales to UK Retail Investors

No shares of American Water's common stock have been offered or will be offered pursuant to the offering to the public in the United Kingdom ("UK") prior to the publication of a prospectus in relation to the shares of common stock which has been approved by the Financial Conduct Authority, except that the shares of common stock may be offered to the public in the UK at any time: (a) to any legal entity which is a qualified investor as defined under Article 2 of the UK Prospectus Regulation; (b) to fewer than 150 natural or legal persons (other than qualified investors as defined under Article 2 of the UK Prospectus Regulation), subject to obtaining the prior consent of the underwriters for any such offer; or (c) in any other circumstances falling within Section 86 of the Financial Services and Markets Act 2000 (the "FSMA") provided that no such offer of the shares of common stock shall require American Water or any underwriter to publish a prospectus pursuant to Section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation. For the purposes of this provision, the expression an "offer to the public" in relation to the shares of common stock in the UK means the communication in any form and by any means of sufficient information on the terms of the offer and any shares of common stock to be offered so as to enable an investor to decide to purchase or subscribe for any shares of common stock and the expression "UK Prospectus Regulation" means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018.

Other Regulatory Restrictions

In the UK, this offering document is only being distributed to and is only directed at persons (i) who fall within Article 19(5) ("investment professionals") of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 as amended (the "Financial Promotion Order") or (ii) who fall within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations etc.") of the Financial Promotion Order (all such persons together being referred to as "relevant persons").

Table of Contents

In the UK, any investment or investment activity to which this offering document relates, including the shares of common stock, is available only to relevant persons and will be engaged in only with relevant persons. In the UK, this offering document must not be acted on or relied on by persons who are not relevant persons.

Each underwriter has represented and agreed that:

- it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of the shares of common stock in circumstances in which Section 21(1) of the FSMA does not apply to American Water; and
- it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the shares of common stock in, from or otherwise involving the UK.

Hong Kong

The shares of American Water's common stock have not been offered or sold and will not be offered or sold in Hong Kong, by means of any document, other than (a) to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong and any rules made under that Ordinance; or (b) in other circumstances which do not result in the document being a "prospectus" as defined in the Companies Ordinance (Cap. 32) of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance. No advertisement, invitation or document relating to the shares of common stock has been or may be issued or has been or may be in the possession of any person for the purposes of issue, whether in Hong Kong or elsewhere, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to shares of common stock which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the Securities and Futures Ordinance and any rules made under that Ordinance.

Japan

The shares of American Water's common stock have not been and will not be registered under the Financial Instruments and Exchange Law of Japan (Law No. 25 of 1948, as amended) and, accordingly, will not be offered or sold, directly or indirectly, in Japan, or for the benefit of any Japanese Person or to others for re-offering or resale, directly or indirectly, in Japan or to any Japanese Person, except in compliance with all applicable laws, regulations and ministerial guidelines promulgated by relevant Japanese governmental or regulatory authorities in effect at the relevant time. For the purposes of this paragraph, "Japanese Person" shall mean any person resident in Japan, including any corporation or other entity organized under the laws of Japan.

Singapore

This prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, the shares of American Water's common stock were not offered or sold or caused to be made the subject of an invitation for subscription or purchase and will not be offered or sold or caused to be made the subject of an invitation for subscription or purchase, and this prospectus or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares of common stock, has not been circulated or distributed, nor will it be circulated or distributed, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time (the "SFA")) pursuant to Section 274 of the SFA, (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Table of Contents

Where the shares of common stock are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

(a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

(b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the shares of common stock pursuant to an offer made under Section 275 of the SFA except:

(a) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;

(b) where no consideration is or will be given for the transfer;

(c) where the transfer is by operation of law; or

(d) as specified in Section 276(7) of the SFA.

Switzerland

The shares of American Water's common stock may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("SIX") or on any other stock exchange or regulated trading facility in Switzerland. This document has been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other stock exchange or regulated trading facility in Switzerland. Neither this document nor any other offering or marketing material relating to the shares or the offering may be publicly distributed or otherwise made publicly available in Switzerland.

Neither this document nor any other offering or marketing material relating to the offering, American Water, or the shares have been or will be filed with or approved by any Swiss regulatory authority. In particular, this document will not be filed with, and the offer of shares will not be supervised by, the Swiss Financial Market Supervisory Authority FINMA ("FINMA"), and the offer of shares has not been and will not be authorized under the Swiss Federal Act on Collective Investment Schemes ("CISA"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend to acquirers of shares.

Taiwan

The shares of American Water's common stock have not been, and will not be, registered with the Financial Supervisory Commission of Taiwan, the Republic of China ("Taiwan") pursuant to applicable securities laws and regulations. No person or entity in Taiwan is authorized to distribute or otherwise intermediate the offering of the shares of common stock or the provision of information relating to the offering of the common stock, including, but not limited to, this prospectus supplement and the accompanying prospectus. The shares of common stock may be made available for purchase outside Taiwan by investors residing in Taiwan (either directly or through properly licensed Taiwan intermediaries acting on behalf of such investors), but may not be issued, offered or sold in Taiwan.

Dubai Financial Centre

This prospectus supplement relates to an Exempt Offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority ("DFSA"). This prospectus supplement is intended for distribution only

Table of Contents

to persons of a type specified in the Offered Securities Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus supplement nor taken steps to verify the information set forth herein and has no responsibility for the prospectus supplement. The shares of common stock to which this prospectus supplement relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the shares offered should conduct their own due diligence on the shares. If you do not understand the contents of this prospectus supplement, you should consult an authorized financial advisor.

Certain Relationships

The underwriters and their affiliates have engaged, and may in the future engage, in transactions with, and from time to time have performed services for American Water and its affiliates in the ordinary course of business, for which they have received and will receive customary compensation. Affiliates of certain of the underwriters are also lenders under AWCC's revolving credit facility and dealers under its commercial paper program.

In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve American Water securities and/or instruments or the securities and/or instruments of its affiliates. If any of the underwriters or their affiliates have a lending relationship with American Water or its affiliates, certain of those underwriters or their affiliates routinely hedge, and certain other of those underwriters may hedge, their credit exposure to American Water or its affiliates consistent with their customary risk management policies. Typically, these underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in American Water's securities or the securities of its affiliates, including potentially its common stock. Any such credit default swaps or short positions could adversely affect future trading prices of its common stock. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

LEGAL MATTERS

Certain legal matters in connection with this offering, including the validity of the common stock, will be passed upon for American Water by Morgan, Lewis & Bockius LLP, New York, New York. Certain legal matters in connection with this offering will be passed upon for American Water by Jeffrey M. Taylor, American Water's Vice President, Chief SEC Counsel and Secretary. Sullivan & Cromwell LLP, New York, New York, has acted as counsel for the underwriters. As of February 23, 2023, Mr. Taylor owned 1,686 shares of American Water's common stock, 1,973 unvested performance stock units (at target) and 603 unvested restricted stock units.

EXPERTS

The consolidated financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to American Water Works Company, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2022 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

Debt Securities

The securities covered by this prospectus may be sold by American Water Works Company, Inc., or American Water, from time to time, independently or together with American Water Capital Corp., or AWCC, a wholly-owned subsidiary of American Water Works Company, Inc. Any debt securities issued by AWCC will have the benefit of a support agreement from American Water. In addition, selling security holders who may be named in a prospectus supplement may offer and sell from time to time securities in such amounts as set forth in such prospectus supplement. We may, and any selling security holder may, offer the securities independently or together in any combination for sale directly to purchasers or through underwriters, dealers or agents to be designated at a future date. We may, and any selling security holder may, offer and sell these securities in amounts, at prices and on terms determined at the time of the offering. Unless otherwise set forth in a prospectus supplement, we will not receive any proceeds from the sale of securities by any selling security holders.

When we offer securities, a prospectus supplement will describe the specific terms of the specific issue of securities. Prospectus supplements may also add, update or change the information in this prospectus. You should carefully read this prospectus and the prospectus supplement relating to the specific issue of securities, together with the documents incorporated by reference, before you decide to invest in any of these securities.

American Water Works Company, Inc. common stock is listed on the New York Stock Exchange under the symbol "AWK." The mailing address of our principal executive offices is 1 Water Street, Camden, New Jersey 08102-1658, and the telephone number is (856) 955-4001.

Investing in these securities involves certain risks. See "Risk Factors" on page i of this prospectus. You should carefully review the risks and uncertainties described under the heading "Risk Factors" contained in this prospectus and any risk factors set forth in each applicable prospectus supplement and any related free writing prospectus, and under similar headings in the other documents incorporated by reference into this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The securities may be offered and sold to or through underwriters, dealers, agents or other third parties as designated from time to time, or directly to one or more other purchasers or through a combination of such methods on a continuous or delayed basis. See "Plan of Distribution" on page 31. If any underwriters, dealers or agents are involved in the sale of any of the securities, their names, and any applicable purchase price, fee, commission or discount arrangements between or among them, will be set forth, or will be calculable from the information set forth, in the applicable prospectus supplement.

The date of this prospectus is February 25, 2021.

Table of Contents

RISK FACTORS

An investment in our securities involves risk. Before you invest in securities issued by us, you should carefully consider the risks involved. Accordingly, you should carefully consider:

- the information contained in or incorporated by reference into this prospectus;
- the information contained in or incorporated by reference into any prospectus supplement relating to specific offerings of securities;
- the risks described in American Water's Annual Report on Form 10-K for its most recent fiscal year and in any Quarterly Report on Form 10-Q which American Water has filed since its most recent Annual Report on Form 10-K, each of which is incorporated by reference into this prospectus; and
- other risks and other information that may be contained in, or incorporated by reference from, other filings we make with the SEC, including in any prospectus supplement relating to specific offerings of securities.

The discussion of risks related to our business contained in or incorporated by reference into this prospectus or into any prospectus supplement comprises material risks of which American Water or AWCC is aware. If any of the events or developments described actually occurs, our business, financial condition or results of operations would likely suffer.

You should also be aware that new risks may emerge in the future at any time, and we cannot predict such risks or estimate the extent to which they may affect our business, financial condition or results of operations. The prospectus supplement applicable to each type or series of securities we offer may contain a discussion of additional risks applicable to an investment in us and the particular type of securities we are offering under that prospectus supplement.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that American Water and AWCC filed with the Securities and Exchange Commission, or the SEC, using a "shelf" registration process. Under this shelf registration process, we, or certain of our security holders, may sell the securities described in this prospectus in one or more offerings from time to time. Each time we, or, under certain circumstances, certain of our security holders, sell securities under this shelf registration, we will provide a prospectus supplement that will contain specific information about the terms of the offering. The prospectus supplement may also add to, modify or supersede the information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement together with the additional information referred to under "Where You Can Find More Information." If there is any inconsistency between the information in the prospectus and the prospectus supplement, you should rely on the information in the prospectus supplement.

The prospectus supplement will describe: the terms of the securities offered, any initial public offering price, any price paid to us for the securities, the net proceeds to us, if any, the manner of distribution and any underwriting compensation and the other specific material terms related to the offering of the applicable securities. For more detail on the terms of the securities, you should read the exhibits filed with or incorporated by reference in our registration statement of which this prospectus forms a part.

The term "American Water" refers to American Water Works Company, Inc. The term "AWCC" refers to American Water Capital Corp. All references in this prospectus to "we," "our" and "us" generally refer to:

- American Water, specifically with respect to securities issued by American Water;
- American Water and AWCC, specifically with respect to debt securities issued by AWCC;
- American Water or American Water and AWCC, together, as the context requires, in the section entitled "Plan of Distribution"; and
- American Water and its consolidated subsidiaries in the sections entitled "Forward-Looking Statements," "Risk Factors" and "American Water Works Company, Inc.", and otherwise in descriptions of American Water's operations.

References to "securities" include any security that we or our security holders might sell under this prospectus or any prospectus supplement.

This prospectus contains summaries of certain provisions contained in some of the documents described herein. Please refer to the actual documents for complete information. All of the summaries are qualified in their entirety by reference to the actual documents. Copies of the documents referred to herein have been filed, or will be filed or incorporated by reference as exhibits to the registration statement of which this prospectus is a part, and you may obtain copies of those documents as described under "Where You Can Find More Information."

We have not authorized anyone to provide you with information other than that contained or incorporated by reference in this prospectus or any accompanying prospectus supplement or in any related free writing prospectus filed by us with the SEC. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. The distribution of this prospectus and sale of these securities in certain jurisdictions may be restricted by law. You should inform yourself about and observe any such restrictions. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate as of the date on the front cover of this prospectus only and any information we have incorporated by reference is only accurate as of the date of the document incorporated by reference. Our business, financial condition, results of operations and prospects may have changed since that date.

Table of Contents

FORWARD-LOOKING STATEMENTS

This prospectus and any prospectus supplement, the documents incorporated by reference or any other written or oral statements made by or on behalf of us may include statements that reflect current views with respect to future events. These statements are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, which is referred to as the "Securities Act," Section 21E of the Securities Exchange Act of 1934, as amended, which is referred to as the "Exchange Act," and the Private Securities Litigation Reform Act of 1995. In some cases, these forward-looking statements can be identified by words with prospective meanings such as "intend," "plan," "estimate," "believe," "anticipate," "expect," "predict," "project," "propose," "assume," "forecast," "likely," "uncertain," "outlook," "future," "pending," "goal," "objective," "potential," "continue," "seek to," "may," "can," "should," "will" and "could" or the negative of such terms or other variations or similar expressions.

Forward-looking statements are predictions based on our current expectations and assumptions regarding future events. Accordingly, these forward-looking statements are qualified by, and should be read together with, the risk factors and other cautionary statements contained in American Water's Annual Report on Form 10-K for the year ended December 31, 2020, and its other filings with the SEC, which are incorporated by reference into this prospectus, and you should refer to such risks, uncertainties and risk factors in evaluating such forward-looking statements. Any forward-looking statements we make speak only as of the date of the document in which they are contained. Except as required by the federal securities laws, we do not have any obligation, and we specifically disclaim any undertaking or intention, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or otherwise. New factors emerge from time to time, and it is not possible for us to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on our businesses, either viewed independently or together, or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

Table of Contents

AMERICAN WATER WORKS COMPANY, INC.

We are the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. As a holding company, American Water conducts substantially all of its business operations through its subsidiaries. We employ approximately 7,000 employees to provide an estimated 15 million people with drinking water, wastewater and other water-related services in 46 states.

American Water conducts the majority of its business through its Regulated Businesses reportable segment, which includes the ownership of utilities that are generally subject to regulation and that provide water and wastewater services. American Water also operates businesses that provide a broad range of related water and wastewater services in non-regulated markets that individually do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States, which are collectively referred to in this prospectus as its Market-Based Businesses.

American Water's principal executive offices are located at 1 Water Street, Camden, New Jersey 08102-1658 and its telephone number is (856) 955-4001.

AMERICAN WATER CAPITAL CORP.

American Water's financing activities include, among other things, the issuance of long-term and short-term debt, primarily through AWCC, its wholly owned finance subsidiary. AWCC has no significant assets or operations other than as associated with these financing activities. AWCC loans all of the net proceeds of its long-term debt financings to American Water's operating subsidiaries in its Regulated Businesses segment, as well as to American Water. AWCC also provides liquidity to the Regulated Businesses segment and American Water through AWCC's revolving credit facility and commercial paper program. AWCC may also perform other ancillary services directly related to these financing activities, including cash management activities and hedging of interest-rate and other market risk exposures associated with its indebtedness. The proceeds of all of AWCC's long-term debt have been loaned to subsidiaries in American Water's Regulated Businesses segment, which debt is evidenced by promissory notes issued to AWCC by such subsidiaries or American Water, as applicable.

AWCC's principal executive offices are located at 1 Water Street, Camden, New Jersey 08102-1658 and its telephone number is (856) 955-4001.

Table of Contents

USE OF PROCEEDS

Unless otherwise set forth in a prospectus supplement, the net proceeds from the sale of AWCC debt securities will be used to repay certain of AWCC's outstanding indebtedness or loaned to American Water and/or the subsidiaries in its Regulated Businesses segment, and American Water and/or such subsidiaries may use the proceeds of such loans, and American Water may use the net proceeds from the sale of securities issued by American Water, for the following purposes:

- the repayment of, or the the funding of sinking fund payments with respect to, long-term or short-term indebtedness incurred by American Water or one or more subsidiaries in American Water's Regulated Businesses segment;
- the repurchase of capital stock of American Water or one or more subsidiaries in its Regulated Businesses segment;
- acquisitions; and/or
- general corporate purposes, including without limitation for working capital, operation and maintenance expenses, infrastructure improvements and other capital expenditures.

Unless otherwise set forth in a prospectus supplement, we will not receive any proceeds from any sales of securities by any selling security holder who may be named in a prospectus supplement.

SELLING SECURITY HOLDERS

We may register securities covered by this prospectus for re-offer and resale by any selling security holder who may be named in a prospectus supplement. We may add secondary sales of securities by any selling security holder by filing a prospectus supplement with the SEC. We may register these securities to permit selling security holders to resell their securities when they deem appropriate. A selling security holder may resell all, a portion or none of their securities at any time and from time to time. We may register reoffers and resales of those securities through an underwriter or other plan of distribution as set forth in a prospectus supplement. See "Plan of Distribution."

Selling security holders may also sell, transfer or otherwise dispose of some or all of their securities in transactions exempt from the registration requirements of the Securities Act. We may pay all expenses incurred with respect to the registration of the securities owned by the selling security holders, other than underwriting fees, discounts or commissions, which will be borne by the selling security holders. A prospectus supplement may name the selling security holders and specify the amount of securities to be registered and sold and any other terms of the securities that may be sold by a selling security holder. The applicable prospectus supplement will also disclose whether any of the selling security holders has held any position or office with, has been employed by or otherwise has had a material relationship with us during the three years prior to the date of the applicable prospectus supplement.

Table of Contents

DESCRIPTION OF CAPITAL STOCK

The following description of American Water's common stock and preferred stock is not intended to be complete. For more information regarding the common stock and preferred stock that may be offered by this prospectus, please refer to American Water's restated certificate of incorporation, which is referred to below as American Water's "certificate of incorporation," and American Water's amended and restated bylaws, which is referred to below as American Water's "bylaws." The certificate of incorporation and bylaws are incorporated by reference as exhibits to the registration statement of which this prospectus is a part. The terms of these securities also may be affected by the General Corporation Law of the State of Delaware, is referred to below as the DGCL.

General

American Water's authorized capital stock consists of 500,000,000 shares of common stock, par value $0.01 per share, and 50,000,000 shares of preferred stock. As of February 19, 2021, there were 181,439,255 shares of common stock outstanding and no shares of preferred stock outstanding.

Common Stock

Voting Rights

Other than with respect to director elections, except as otherwise required by law, all matters to be voted on by American Water's shareholders must be approved by a majority of the shares present in person or proxy at such meeting and entitled to vote on the subject matter. With respect to uncontested director elections, American Water's bylaws require that in order to be elected, a director nominee must receive a majority of the votes cast (for this purpose, a majority of the votes cast means that the number of shares voted "for" a director nominee must exceed the number of votes cast "against" that nominee). For contested director elections where the number of nominees exceeds the number of directors to be elected, American Water's bylaws require that the directors shall be elected by the vote of a plurality of the shares represented in person or by proxy at any such meeting and entitled to vote on the election of directors.

Dividends

Holders of common stock will share equally in any dividend declared by American Water's board of directors, subject to the rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event of any voluntary or involuntary liquidation, dissolution or winding up of American Water's affairs, holders of American Water's common stock would be entitled, after payment of the liquidation preference to all holders of any outstanding preferred stock, to share ratably in American Water's assets that are legally available for distribution to shareholders after payment of liabilities. American Water must pay the applicable distribution to any holders of its preferred stock before it may pay distributions to the holders of its common stock.

Other Rights

American Water's shareholders have no preemptive or other rights to subscribe for additional shares.

Preferred Stock

American Water's board of directors may authorize the issuance of preferred stock from time to time in one or more series, without shareholder approval. Subject to the limits imposed by the DGCL, the board of directors

Table of Contents

is authorized to fix for any series of preferred stock the number of shares of such series and the voting powers (if any), designation, preferences and relative, participating, optional or other special rights, and qualifications, limitations or restrictions of such series. American Water's board of directors is also authorized to increase or decrease the number of shares of any series, but not below the number of shares of that series then outstanding, without any further vote or action by American Water's shareholders.

American Water's board of directors may authorize the issuance of preferred stock with voting or conversion rights that affect adversely the voting power or other rights of American Water's common shareholders. The issuance of preferred stock, while providing flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of delaying, deferring or preventing a change in control, causing the market price of American Water's common stock to decline, or impairing the voting and other rights of the holders of American Water's common stock. Any restriction on the repurchase or redemption of shares of preferred stock while dividends on such shares are in arrears shall be set forth in the applicable prospectus supplement. You should read both this prospectus and the applicable prospectus supplement together with the additional information referred to under "Where You Can Find More Information."

For any series of preferred stock that American Water may issue, American Water's board of directors will determine and the prospectus supplement relating to such series will describe:

- the number of shares constituting such series and the distinctive designation of the series;
- the dividend rate on the shares of the series, the conditions and dates upon which dividends thereon shall be payable, the extent, if any, to which dividends thereon shall be cumulative, and the relative rights of preference, if any, of payment of dividends thereon;
- whether or not the shares of the series are redeemable and, if redeemable, the time or times during which they shall be redeemable and the amount per share payable on redemption thereof, which amount may, but need not, vary according to the time and circumstances of such redemption;
- the amount payable in respect of the shares of the series, in the event of any liquidation, dissolution or winding up of American Water, which amount may, but need not, vary according to the time or circumstances of such action, and the relative rights of preference, if any, of payment of such amount;
- any requirement as to a sinking fund for the shares of the series, or any requirement as to the redemption, purchase or other retirement by American Water of the shares of the series;
- whether or not the shares of the series will have priority over or be on a parity with or be junior to the shares of any other series or class of stock in any respect, or will be entitled to the benefit of limitations restricting the issuance of shares of any other series or class of stock, restricting the payment of dividends on or the making of other distributions in respect of shares of any other series or class of stock ranking junior to the shares of the series as to dividends or assets, or restricting the purchase or redemption of the shares of any such junior series or class, and the terms of any such restriction;
- the right, if any, to exchange or convert shares of the series into other securities or property, and the rate or basis, time, manner and condition of exchange or conversion;
- the voting rights, if any, to which the holders of shares of the series shall be entitled in addition to the voting rights provided by law; and
- any other term, condition or provision with respect to the series not inconsistent with the provisions of American Water's certificate of incorporation or any resolution adopted by the board of directors pursuant thereto.

Certain Anti-Takeover Provisions of American Water's Certificate of Incorporation and Bylaws, and the DGCL

The following provisions of American Water's certificate of incorporation and bylaws could deter, delay or prevent a third party from acquiring American Water, even if doing so would benefit American Water's shareholders.

Table of Contents

Undesignated Preferred Stock

The ability to authorize undesignated preferred stock makes it possible for American Water's board of directors to authorize the issuance of preferred stock with super voting, special approval, dividend or other rights or preferences on a discriminatory basis that could impede the success of any attempt to acquire American Water. These and other provisions may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of American Water.

Requirements for Advance Notification of Shareholder Meetings, Nominations and Proposals

American Water's bylaws provide that special meetings of shareholders may be called only upon the request of the majority of the members of American Water's board of directors, upon request of the Chairman of American Water's board of directors, or by American Water's Secretary upon request of shareholders holding at least 15% of American Water's outstanding common stock. American Water's bylaws prohibit the conduct of any business at a special meeting other than as specified in the notice for such meeting.

American Water's bylaws establish advance notice procedures with respect to shareholder proposals for annual meetings and the nomination of candidates for election as directors, other than nominations made by or at the direction of American Water's board of directors or a committee of the board of directors. A shareholder who wishes to bring a matter before a meeting must comply with American Water's advance notice requirements and provide American Water with certain information. Additionally, vacancies and newly created directorships may be filled only by a vote of a majority of the members of American Water's board of directors then in office, even though less than a quorum, or by shareholders. These provisions may defer, delay or discourage a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of American Water.

Shareholder Action by Written Consent

As permitted by Section 228 of the DGCL, American Water's certificate of incorporation states that any action required or permitted to be taken by American Water's shareholders must be effected at a duly called annual or special meeting of American Water's shareholders and may not be effected by consent in writing by such shareholders.

Acquisitions of Control of a Regulated Public Utility

A significant number of the subsidiaries in our Regulated Businesses segment are subject to economic regulation by state public utility commissions. Some of these states have enacted laws that require regulatory approval for the acquisition of "control" of any regulated utility. In those states, obtaining "control" of the parent or any other company that controls a regulated utility also requires prior regulatory approval. The threshold for a change in control is a fact-specific inquiry that varies by state. For example, in some states, a presumption of control will arise when an acquiring party acquires more than 9.9% of the voting securities of the regulated utility or the controlling entity. In addition to ownership, other states may analyze the degree of influence or control an acquiror may exert over the company. Any person acquiring American Water's common stock in an offering or in any other purchase of American Water's common stock in an amount sufficient to trigger a change in control under state law would need to obtain the prior approval of the applicable state public utility commission.

Certain Other Provisions of American Water's Certificate of Incorporation and Bylaws and the DGCL

Board of Directors

American Water's certificate of incorporation provides that the number of directors is fixed in the manner provided in American Water's bylaws. American Water's bylaws provide that the number of directors will be fixed from time to time by American Water's board of directors.

Table of Contents

Business Combinations Under the DGCL

American Water is subject to Section 203 of the DGCL, which prohibits a publicly held Delaware corporation from engaging in a "business combination" with an "interested stockholder" for a period of three years after the time a shareholder became an interested stockholder, subject to certain exceptions, including if, prior to such time, the board of directors approved the business combination or the transaction which resulted in the shareholder becoming an interested stockholder. "Business combinations" include mergers, asset sales and other transactions resulting in a financial benefit to the "interested stockholder." Subject to various exceptions, an "interested stockholder" is a person who, together with his or her affiliates and associates, owns, or within the prior three years did own, 15% or more of the corporation's outstanding voting stock. These restrictions generally prohibit or delay the accomplishment of mergers or other takeover or change-in-control attempts that are not approved by a company's board of directors.

Limitations of Liability and Indemnification of Directors and Officers

The DGCL authorizes corporations to limit or eliminate the personal liability of directors to corporations and their shareholders for monetary damages for breaches of directors' fiduciary duties. American Water's certificate of incorporation includes a provision that eliminates the personal liability of directors for monetary damages for actions taken as a director to the fullest extent authorized by the DGCL. The DGCL does not permit exculpation for liability:

- for breach of the duty of loyalty;
- for acts or omissions not in good faith or involving intentional misconduct or knowing violation of law;
- under Section 174 of the DGCL (relating to unlawful dividends or stock repurchases); or
- for transactions from which the director derived improper personal benefit.

American Water's certificate of incorporation and bylaws provide that it will indemnify its directors and officers to the fullest extent permitted by law. American Water's bylaws also expressly authorize American Water to carry directors' and officers' insurance providing indemnification for American Water's directors, officers and certain employees and agents for certain liabilities.

The limitation of liability and indemnification provisions in American Water's certificate of incorporation and bylaws may discourage shareholders from bringing a lawsuit against directors for breach of their fiduciary duty. These provisions may also have the effect of reducing the likelihood of derivative litigation against directors and officers, even though such an action, if successful, might otherwise benefit American Water and its shareholders. In addition, your investment may be adversely affected to the extent American Water pays the costs of settlement and damage awards against directors and officers in accordance with these indemnification provisions.

Proxy Access

American Water's bylaws permit an eligible shareholder or group of shareholders to include up to a specified number of director nominees in American Water's proxy materials for an annual meeting of shareholders. To qualify, the shareholders (or group of up to 20 shareholders) must have continuously owned for at least three years 3% or more of American Water's outstanding common stock. The maximum number of shareholder nominees permitted under this proxy access provision is the greater of (i) two or (ii) 20% of the total number of directors on American Water's board of directors as of the last day on which a proxy access notice may be submitted, rounded down to the nearest whole number.

Transfer Agent and Registrar

American Stock Transfer & Trust Company, LLC serves as the registrar and transfer agent for American Water's common stock.

Table of Contents

New York Stock Exchange Symbol

American Water's common stock is listed on the New York Stock Exchange under the trading symbol "AWK."

Table of Contents

DESCRIPTION OF AWCC DEBT SECURITIES AND AMERICAN WATER SUPPORT AGREEMENT

The following description of the terms of the debt securities sets forth certain general terms and provisions of the debt securities to which any prospectus supplement may relate. The particular terms of the debt securities offered by any prospectus supplement will be described in the prospectus supplement relating to those debt securities. Accordingly, for a description of the terms of a particular issue of debt securities, reference must be made to both the prospectus supplement relating thereto and to the following description.

AWCC may issue debt securities from time to time in one or more series. The debt securities will be general obligations of AWCC. Any debt securities issued by AWCC will have the benefit of a support agreement from American Water. In the event that any series of debt securities will be subordinated to other indebtedness that AWCC has outstanding or may incur, the terms of the subordination will be set forth in the prospectus supplement relating to the subordinated debt securities. Each series of debt securities offered by this prospectus will be issued under an indenture dated as of December 4, 2009, between AWCC and Wells Fargo Bank, National Association, as trustee, as the same may be amended or supplemented from time to time. The indenture and the form of supplemental indenture or other instrument establishing the debt securities of a particular series are filed as exhibits to, or will be subsequently incorporated by reference into, the registration statement of which this prospectus is a part. There is no requirement under the indenture that future issuances of AWCC's debt securities be issued exclusively under the indenture, and we will be free to employ other indentures or documentation, containing provisions different from those included in the indenture or applicable to one or more issuances of debt securities in connection with future issuances of other debt securities.

The following discussion of certain provisions of the indenture is a summary only and should not be considered a complete description of the terms and provisions of the indenture. Accordingly, the following discussion is qualified in its entirety by reference to the provisions of the indenture, including the definition of certain terms used below.

General

The debt securities represent direct, unsecured, general obligations of AWCC and:

- may rank equally with other unsubordinated debt or may be subordinated to other debt AWCC has or may incur;
- may be issued in one or more series with the same or various maturities;
- may be issued at a price of 100% of their principal amount or at a premium or discount;
- may be issued in registered or bearer form and certificated or uncertificated form;
- may be represented by one or more global securities registered in the name of a designated depositary's nominee; and
- will have the benefit of a support agreement, dated June 22, 2000, and amended on July 26, 2000, between AWCC and American Water, which is referred to as the "support agreement."

The aggregate principal amount of debt securities that AWCC may authenticate and deliver under the indenture is unlimited. The debt securities may be issued in one or more series as may be authorized from time to time. We will include some or all of the following information about a particular series of debt securities in a prospectus supplement relating to that particular series of debt securities:

(1) the title of the debt securities of the series (which shall distinguish the debt securities of that particular series from the debt securities of any other series);

(2) the price or prices of the debt securities of the series;

(3) any limit upon the aggregate principal amount of the debt securities of the series which may be authenticated and delivered under the indenture (except for debt securities authenticated and

Table of Contents

delivered upon registration of transfer of, or in exchange for, or in lieu of, other debt securities of the series and except for any debt securities which are deemed never to have been authenticated and delivered);

(4) the person to whom any interest on a debt security of the series shall be payable, if other than the person in whose name that debt security (or one or more predecessor securities) is registered at the close of business on the regular record date for such interest;

(5) the date or dates on which the principal and premium of any debt securities of the series are payable;

(6) the rate or rates (which may be fixed or variable) at which any debt securities of the series shall bear interest (if any), or the method of determining such rate or rates, the date or dates from which any such interest shall accrue, the interest payment dates on which any such interest shall be payable, and the regular record date for any such interest payable on any interest payment date;

(7) the period or periods within which, the price or prices at which and the terms and conditions upon which any debt securities of the series may be redeemed, in whole or in part, at the option of AWCC (including without limitation the number of basis points specified for such series for purposes of determining any make-whole amount in respect thereof, and any reference treasury dealers for such series) and, if other than by a board resolution, the manner in which any election by AWCC to redeem the debt securities shall be evidenced;

(8) the obligation, if any, of AWCC to redeem or purchase any debt securities of the series at the option of the holder thereof, or at the option of any other person, and the period or periods within which, the price or prices at which and the terms and conditions upon which any debt securities of the series shall be redeemed or purchased, in whole or in part, pursuant to such obligation;

(9) if other than the currency of the United States of America, the currency, currencies or currency units in which the principal of or any premium or interest on any debt securities of the series shall be payable and the manner of determining the equivalent thereof in the currency of the United States of America for any purpose, and such other or additional provisions (including, without limitation, in respect of defeasance and covenant defeasance) as shall be necessary and desirable in connection therewith;

(10) if other than the entire principal amount thereof, the portion of the principal amount of any debt securities of the series which shall be payable upon declaration of acceleration of the maturity thereof;

(11) if the principal amount payable at the stated maturity of any debt securities of the series will not be determinable as of any one or more dates prior to the stated maturity, the amount which shall be deemed to be the principal amount of such debt securities as of any such date for any purpose thereunder or hereunder, including the principal amount thereof which shall be due and payable upon any maturity other than the stated maturity or which shall be deemed to be outstanding as of any date prior to the stated maturity (or, in any such case, the manner in which such amount deemed to be the principal amount shall be determined);

(12) if applicable, that any debt securities of the series shall be issuable in whole or in part in the form of one or more debt securities in registered, global form without interest coupons, which are referred to as “global securities,” and, in such case, the respective depositaries for such global securities, the form of any legend or legends which shall be borne by any such global security, whether such global securities shall be in the form of registered securities, restricted securities or Regulation S securities and any circumstances in which any such global security may be exchanged in whole or in part for debt securities registered, and any transfer of such global security in whole or in part may be registered, in the name or names of persons other than the depositary for such global security or a nominee thereof;

Table of Contents

(13) the terms, if any, upon which the debt securities of the series may be convertible into or exchanged for AWCC's other debt securities or other securities of any kind and the terms and conditions upon which such conversion or exchange shall be effected, including the initial conversion or exchange price or rate, the conversion or exchange period and any other additional provisions;

(14) if other than denominations of $1,000 and any integral multiple thereof, the denominations in which the debt securities of the series shall be issuable;

(15) if the amount of principal, premium or interest with respect to the debt securities of the series may be determined with reference to an index or pursuant to a formula, the manner in which such amounts will be determined;

(16) any changes or additions to the provisions of the indenture dealing with defeasance;

(17) the terms, if any, of the transfer, mortgage, pledge or assignment as security for the debt securities of the series of any properties, assets, moneys, proceeds, securities or other collateral, including whether certain provisions of the Trust Indenture Act of 1939, as amended, or the "Trust Indenture Act", are applicable and any corresponding changes to provisions of the indenture as then in effect;

(18) any addition to or change in the events of default with respect to any debt securities of the series and any change in the right of the trustee or the holders of such series of debt securities to declare the principal, premium and interest, if any, on such series of debt securities due and payable;

(19) any trustee, authenticating agent, paying agent, transfer agent or registrar;

(20) the applicability of, and any addition to or change in, the covenants and definitions set forth in the indenture which applies to the debt securities;

(21) the subordination, if any, of the debt securities of the series pursuant to the indenture and any changes or additions to the provisions of the indenture relating to subordination;

(22) with regard to debt securities of the series that do not bear interest, the dates for certain required reports to the trustee;

(23) any material U.S. federal income tax consequences applicable to the debt securities; and

(24) any other terms of the series.

All debt securities of one series need not be issued at the same time, and a series may be re-opened for issuances of additional debt securities of such series. This means that AWCC may from time to time, without notice to, or the consent of any existing holders of the previously-issued debt securities of a particular series, create and issue additional debt securities of such series. Such additional debt securities will have the same terms as the previously-issued debt securities of such series in all respects except for the issue date and, if applicable, the initial interest payment date. The additional debt securities will be consolidated and form a single series with the previously-issued debt securities of such series.

Support Agreement

AWCC's indebtedness (including debt securities) has the benefit of the support agreement. The support agreement, which, under the circumstances described below, is the functional equivalent of a guarantee, provides, among other things, that:

- American Water owns, and during the term of the support agreement shall continue to own, all of the voting stock of AWCC free and clear of any lien, security interest or other charge or encumbrance;
- American Water will provide to AWCC, at its request or the request of any lender (including any holder of debt securities), funds in the form of cash or liquid assets (as equity or, if American Water

Table of Contents

and AWCC agree, as a loan subordinated to any and all indebtedness, whether or not that indebtedness is outstanding at the time of the loan) as required if AWCC is unable to make timely payment of interest, principal or premium, if any, on any indebtedness issued by it;

- American Water will cause AWCC to have at all times a positive tangible net worth (total assets less liabilities less intangible assets), as determined in accordance with generally accepted accounting principles; and
- if AWCC fails or refuses to take timely action to enforce certain rights under the support agreement or if AWCC defaults in the timely payment of interest, principal or premium, if any, owed to a lender (including any holder of debt securities) when due, that lender may proceed directly against American Water to enforce such rights or to obtain payment of the defaulted interest, principal or premium, if any, owed to that lender.

No amendment to the support agreement that adversely affects the rights of any lender (including any holder of debt securities) and no termination of the support agreement will be effective until such time as all indebtedness of AWCC shall have been irrevocably paid in full and all commitments for indebtedness have been terminated, unless the lenders (including holders of debt securities or the trustee acting on behalf of debt security holders) holding all of the aggregate principal amount of debt outstanding and (to the extent not outstanding) committed to consent in writing thereto. Notwithstanding the foregoing sentence, any amendment to the support agreement for the purposes of (i) increasing the minimum net worth as provided in the support agreement, (ii) establishing or increasing a minimum interest coverage ratio, (iii) establishing or reducing a maximum amount of debt leverage, (iv) increasing the aggregate principal amount of debt outstanding whose holders are required to consent to the termination or amendment of the support agreement, or (v) any combination of clauses (i), (ii), (iii) and (iv) of this sentence, shall be effective without the consent of any lender (including any holder of debt securities or trustee acting on behalf of such holder). In addition, nothing in the prior two sentences shall derogate from, or override, any provision in an instrument, indenture, agreement or other document pursuant to which indebtedness is or will be issued that requires the written consent of the holders of a specified amount or percentage of that indebtedness to consent to an amendment or termination of the support agreement.

Certain Covenants

Unless otherwise provided in the prospectus supplement for a particular series of debt securities, the indenture, as supplemented for a particular series of debt securities, will contain the following covenants for the benefit of the holders of such series of debt securities, which will be applicable (unless waived or amended) so long as any of the debt securities of such series are outstanding:

Restrictions on Liens

AWCC will not, and will not allow American Water, as the support provider, or any of its subsidiaries, as defined below, to, create, incur, issue or assume any liens, as defined below, on American Water's or its subsidiaries' respective property to secure debt, as defined below, where the debt secured by those liens would exceed an amount equal to 15% of our consolidated tangible total assets, as defined below (calculated to exclude debt secured by permitted liens). This restriction does not apply to the following permitted liens:

(a) liens existing, or created pursuant to the terms of agreements existing, on the date of the indenture;

(b) liens consisting of (i) pledges or deposits in the ordinary course of business to secure obligations under workmen's compensation laws or similar legislation, (ii) deposits in the ordinary course of business to secure or in lieu of surety, appeal or customs bonds to which AWCC, American Water or any of its subsidiaries is a party, (iii) liens created by or resulting from any litigation or legal proceeding which is currently being contested in good faith by appropriate proceedings diligently conducted, (iv) pledges or deposits in the ordinary course of business to secure performance in connection with bids, tenders or contracts (other than contracts for the payment of money) or

Table of Contents

(v) materialmen's, mechanics', carriers', workmen's repairmen's or other like liens incurred in the ordinary course of business for sums not yet due or currently being contested in good faith by appropriate proceedings diligently conducted;

(c) liens created to secure tax-exempt debt, in connection with the financing or refinancing of the purchase, lease or construction of properties;

(d) any lien on any asset of any person existing at the time the person is merged or consolidated with or into, or such asset is acquired by AWCC, American Water or any of its subsidiaries and not created in contemplation of such event;

(e) liens created to secure sales of accounts receivable and other receivables;

(f) licenses of intellectual property granted by AWCC, American Water or any of its subsidiaries in the ordinary course of business and not interfering in any material respect with the ordinary conduct of business;

(g) liens of landlords arising under real property leases to the extent those liens arise in the ordinary course of business and do not secure any past due obligation for the payment of money;

(h) any interest or title of a lessor or sublessor under any lease permitted by the indenture;

(i) liens securing debt which has neither been assumed by AWCC, American Water or any of its subsidiaries nor upon which AWCC, American Water or any of its subsidiaries customarily pay interest charges, existing upon real property, or rights in or relating thereto, which real property or rights were acquired for right-of-way purposes;

(j) zoning laws and ordinances;

(k) any leases required to be capitalized on a balance sheet of the lessee in accordance with generally accepted accounting principles;

(l) easements, rights-of-way, restrictions, conditions and other similar encumbrances, minor defects or irregularities of title, and alleys, streets and highways, which in the aggregate do not materially impair the usefulness of the mortgaged property in the present business of AWCC, American Water or any of its subsidiaries;

(m) leases of the properties of AWCC, American Water or any of its subsidiaries, in each case entered into in the ordinary course of business and that do not, individually or in the aggregate, (i) interfere in any material respect with the ordinary course of business or (ii) materially impair the value of the property subject thereto;

(n) liens arising out of conditional sale, title retention, consignment or similar arrangements for the sale of goods entered into by AWCC, American Water or any of its subsidiaries in the ordinary course of business in accordance with the past practices of AWCC, American Water or such subsidiary;

(o) bankers' liens, right of setoff and other similar liens (including deposits required by interest rate swap agreements) existing solely with respect to cash and cash equivalents on deposit in one or more accounts maintained by AWCC, American Water or any of its subsidiaries, in each case granted in the ordinary course of business in favor of the financial institutions with which such accounts are maintained, securing amounts owing to such financial institutions with respect to cash management and operating account arrangements, including those involving pooled accounts and netting arrangements; provided that, unless such liens are non- consensual and arise by operation of law, in no case shall any such liens secure (either directly or indirectly) the repayment of any debt;

(p) liens for taxes, assessments or governmental charges or levies not yet delinquent and which may subsequently be paid without interest or penalties and liens for taxes, assessments or governmental

Table of Contents

charges or levies which are being contested in good faith by appropriate proceedings for which reserves have been established to the extent required by generally accepted accounting principles;

(q) any lien on any property of AWCC, American Water or any of its subsidiaries securing obligations not exceeding in the aggregate $100 million outstanding any time;

(r) liens on any property, acquired, constructed or improved by AWCC, American Water or any of its subsidiaries after the date of the indenture, and any improvements thereon, accessions thereto or other property acquired or constructed for use in connection therewith or related thereto, which are created or assumed prior to or contemporaneously with, or within 180 days after, such acquisition or completion of such construction or improvement, or within one year thereafter pursuant to a firm commitment for financing arranged with a lender or investor within such 180-day period, to secure or provide for the payment of all or any part of the purchase price of such property or the cost of such construction or improvement incurred after the date of the indenture or liens on any property existing at the time of acquisition thereof; *provided*, that the liens shall not extend to any property theretofore owned by AWCC, American Water or any of its subsidiaries other than, in the case of any such construction or improvement, (i) unimproved real property on which the property so constructed or the improvement is located, (ii) other property (or improvement thereon) which is an improvement to or is acquired or constructed for use in connection therewith or related thereto, (iii) any right and interest under any agreement or other documents relating to the property being so constructed or improved or such other property and (iv) the stock of any subsidiary of American Water created or maintained for the primary purpose of owning the property so constructed or improved;

(s) liens on property securing debt if, prior to or concurrently with the issuance, assumption or guarantee of such debt, the debt securities (together with, if AWCC shall so determine, (i) any other debt of or guaranteed by AWCC ranking equally with the debt securities or (ii) any debt of American Water or any of its subsidiaries then existing or thereafter created) are secured by such property equally and ratably with (or prior to) such debt (for so long as such debt is secured by such liens);

(t) liens securing the debt securities;

(u) liens securing debt owed to AWCC, American Water or any of its subsidiaries; and

(v) liens created for the sole purpose of refinancing, extending, renewing or replacing in whole or in part debt or other obligations secured by any lien referred to in the foregoing subsections (a) through (t); *provided*, *however*, that the principal amount of debt or obligations secured thereby shall not exceed the principal amount of debt or obligations so secured at the time of such refinancing, extension, renewal or replacement *plus* the amount of any premiums required to be paid thereon and reasonable fees and expenses associated therewith and that such refinancing, extension, renewal or replacement, as the case may be, shall be limited to all or a part of the property that secured the lien or mortgage so refinanced, extended, renewed or replaced (and any improvements on such property).

"Debt" means, for any person (without duplication), all (i) indebtedness for borrowed money, (ii) obligations evidenced by bonds, debentures, notes or other similar instruments, (iii) obligations to pay the deferred purchase price of property or service (other than trade payables not overdue by more than 90 days incurred in the ordinary course of business and long term water purchase contracts), (iv) obligations under capital leases, (v) indebtedness of the type referred to in clauses (i) through (iv) above secured by (or for which the holder of such indebtedness has an existing right, contingent or otherwise, to be secured by), any lien or encumbrance on, or security interest in, property (including, without limitation, accounts and contract rights) owned by such person, even though such person has not assumed or become liable for the payment of such indebtedness, and (vi) all obligations of such person for indebtedness or obligations of others of the kinds referred to in clauses (i) through (iv) above under direct or indirect guarantees, excluding, in all cases,

Table of Contents

(i) advances for construction and contributions in aid of construction as set forth on the consolidated balance sheet of American Water and its subsidiaries, (ii) reimbursement obligations (contingent or otherwise) in respect of outstanding letters of credit and (iii) attributable debt in respect of sale and leaseback transactions, as defined below.

"Lien" means any mortgage, lien, pledge, charge, security interest or other encumbrance, or any interest or title of any vendor, lessor, lender or other secured party to or of such person under any conditional sale or other title retention agreement or capital lease, upon or with respect to any property or asset of such person.

"Subsidiary" means a corporation more than 50% of the outstanding voting stock of which is owned, directly or indirectly, by American Water or by one or more other subsidiaries, or by American Water and one or more other subsidiaries.

Restrictions on Sales and Leasebacks

AWCC will not, and will not allow American Water or any of its subsidiaries to, enter into any sale and leaseback transaction without effectively providing that the debt securities will be secured equally and ratably with or prior to the sale and leaseback transaction, unless:

- the aggregate amount of the attributable debt of AWCC, American Water and its subsidiaries in respect of sale and leaseback transactions then outstanding would not exceed an amount equal to 15% of consolidated tangible total assets, as defined below, or
- AWCC, American Water or any of its subsidiaries, within 12 months of the sale and leaseback transaction, retire an amount of secured debt which is not subordinate to the debt securities in an amount equal to the greater of (1) the net proceeds of the sale or transfer of the property or other assets that are the subject of the sale and leaseback transaction or (2) the fair market value of the property leased.

A "sale and leaseback transaction" is an arrangement between AWCC, American Water or any of its subsidiaries and a bank, insurance company or other lender or investor where AWCC, American Water or any of its subsidiaries leases property for an initial term of three years or more that was or will be sold by AWCC, American Water, or such subsidiary to that lender or investor for a sale price of $1 million or its equivalent or more.

"Attributable debt" means the lesser of (1) the fair market value of the asset subject to the sale and leaseback transaction and (2) the present value, determined in accordance with generally accepted accounting principles (discounted at a rate equal to the rate of interest implicit in such transaction), of the obligations of the lessee for the net rental payments (excluding amounts on account of maintenance and repairs, insurance, taxes, assessments and similar charges and contingent rents) during the term of the lease.

"Consolidated tangible total assets" means, as at any applicable time of determination, consolidated total assets less, without duplication, all intangible assets such as goodwill, trademarks, trade names, patents and unamortized debt discount and expense carried as an asset, in each case as set forth in American Water's most recent consolidated balance sheet.

"Consolidated total assets" means, as at any applicable time of determination, the consolidated total assets of American Water and its subsidiaries as set forth in American Water's most recent consolidated financial statements.

Merger, Consolidation or Sale of Assets

Neither AWCC nor American Water will consolidate with or merge into any other person or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless:

(i) the successor formed by a consolidation or the survivor of a merger or the person that acquires by conveyance, transfer or lease all or substantially all of the assets of AWCC or American Water as an

Table of Contents

entirety, as the case may be, is a person organized and existing under the laws of the United States or any State thereof (including the District of Columbia), and expressly assumes, in the case of AWCC, the due and punctual payment of the principal of and any premium and interest on all the debt securities and the performance or observance of every covenant of the indenture on the part of AWCC to be performed or observed, and, in the case of American Water, all the obligations under the support agreement to be performed or observed, and such person shall have caused to be delivered to the trustee an officers' certificate and an opinion of counsel to the effect that such consolidation, merger, conveyance, transfer or lease complies with this covenant; and

(ii) immediately before and immediately after giving effect to such transaction, no event of default, and no event which, after notice or lapse of time or both, would become an event of default, has occurred and is continuing.

Upon any consolidation by AWCC or American Water with or merger by AWCC or American Water into any other person or any conveyance, transfer or lease of either AWCC's or American Water's properties and assets substantially as an entirety in accordance with this covenant, the successor person formed by such consolidation or into which it is merged or to which such conveyance, transfer or lease is made will succeed to, and be substituted for, and may exercise every right and power of, AWCC or American Water, as applicable, under the indenture and the support agreement with the same effect as if such successor person had been named as AWCC or American Water, as applicable, therein, and thereafter, except in the case of a lease, the predecessor person will be relieved of all obligations and covenants, in the case of AWCC under the indenture, the debt securities and, in the case of American Water, under the support agreement.

Support Agreement

American Water may not (a) cancel or terminate the support agreement or (b) amend or otherwise modify the terms of the support agreement, except in accordance with the support agreement. See "Support Agreement."

Subordination

A series of debt securities may be subordinated, which are referred to as "subordinated debt securities," to senior indebtedness (as would be defined in the applicable prospectus supplement) to the extent set forth in the prospectus supplement relating thereto. To the extent American Water conducts its operations through subsidiaries, the holders of debt securities (whether or not subordinated debt securities) will be structurally subordinated to the creditors of American Water's subsidiaries with respect to American Water's obligations under the support agreement, except to the extent such subsidiary is a guarantor of such series of debt securities.

Events of Default

Each of the following constitutes an event of default under the indenture with respect to any series of debt securities:

(1) default for 30 days in the payment when due of interest on any debt security of that series;

(2) default in the payment when due of the principal of, or premium, if any, on any debt security of that series;

(3) default in the deposit of any sinking fund payment, when and as due by the terms of debt securities of that series;

(4) failure by AWCC or American Water to comply with the provisions described under the caption "—Certain Covenants—Merger, Consolidation or Sale of Assets";

(5) default in the performance, or breach by AWCC or American Water, as applicable, of any other covenant or warranty in the indenture or the support agreement for 60 days after (i) AWCC and American Water receive written notice of such default or breach from the trustee or (ii) AWCC,

Table of Contents

American Water and the trustee receive written notice of such default or breach from the holders of at least 25% in principal amount of the debt securities of that series; provided, however, that except with respect to defaults under or breaches of the covenant described under "—Certain Covenants—Restrictions on Liens," holders of a series of debt securities will be deemed to have agreed to an extension of such 60-day period to 120 days so long as corrective action is initiated by AWCC or American Water within such 60-day period unless such corrective action is no longer being diligently pursued;

(6) default under any mortgage, indenture or instrument under which there may be issued or by which there may be secured or evidenced any indebtedness for money borrowed by AWCC or American Water (or the payment of which is guaranteed by AWCC or American Water), if that default is caused by a failure to pay principal at its stated maturity after giving effect to any applicable grace period, or results in the acceleration of such indebtedness prior to its stated maturity and, in each case, the principal amount of any such indebtedness, together with the principal amount of any other indebtedness under which there has been a payment default after stated maturity or the maturity of which has been so accelerated, aggregates $100 million or more;

(7) failure by AWCC or American Water to pay final judgments aggregating (to the extent not paid or insured) in excess of $100 million, which judgments are not, within 60 days after entry thereof, bonded, discharged or stayed pending appeal, or are not discharged within 60 days after the expiration of such stay;

(8) except as permitted by the indenture, the support agreement shall cease for any reason to be in full force or effect or American Water, or any person acting on behalf of American Water, shall deny or disaffirm American Water's obligations under the support agreement; and

(9) certain events of bankruptcy or insolvency described in the indenture with respect to AWCC or American Water.

Any addition to or changes in the foregoing events of default may be described in the prospectus supplement for a particular series of debt securities.

In the case of an event of default arising from certain events of bankruptcy or insolvency, with respect to AWCC or American Water, all outstanding debt securities of such series will become due and payable immediately without further action or notice. If any other event of default occurs and is continuing, the trustee or the holders of at least 25% in aggregate principal amount of the outstanding debt securities of such series may declare the principal amount of all the securities of that series to be due and payable immediately. After any such acceleration, but before a judgment or decree based on acceleration is obtained by the trustee, the holders of a majority in aggregate principal amount of the outstanding debt securities of such series may, under certain circumstances, rescind and annul such acceleration and waive such event of default if all events of default, other than the nonpayment of accelerated principal have been cured or waived as provided for in the indenture.

Holders of debt securities of a series may not enforce the indenture or such debt securities except as provided in the indenture. Subject to certain limitations, holders of a majority in principal amount of the then outstanding debt securities of a series may direct the trustee in its exercise of any trust or power. The trustee may withhold from holders of a series of debt securities notice of any continuing default if it determines that withholding notice is in their interest, except a default relating to the payment of principal or interest.

Subject to the provisions of the indenture relating to the duties of the trustee, in case an event of default shall occur and be continuing, the trustee will be under no obligation to exercise any of its rights or powers under the indenture at the request or direction of any of the holders of a series of debt securities, unless such holders shall have offered to the trustee reasonable indemnity or security against any loss, liability or expense. Subject to such provisions for indemnification of the trustee, the holders of a majority in principal amount of a series of debt securities then outstanding will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee or exercising any trust or power conferred on the trustee with respect to such series of outstanding debt securities.

Table of Contents

The holders of a majority in aggregate principal amount of debt securities of a series then outstanding may, on behalf of the holders of all debt securities of such series, waive any past default and its consequences under the indenture except a default in the payment of interest on, or the principal of, debt securities of such series (other than the non-payment of principal of or interest on debt securities of such series that became due solely because of the acceleration of debt securities of such series) or a covenant or provision of the indenture that cannot be modified or amended without the consent of each holder of each debt security of such series affected.

AWCC is required to deliver to the trustee within 90 days after the end of each fiscal year a statement regarding compliance with the indenture during that fiscal year. Promptly (and in any event within 5 business days) upon a responsible officer, as defined below, of AWCC becoming aware of any default or event of default, AWCC is required to deliver to the trustee a statement specifying that default.

“Responsible officer” means the chief executive officer, chief operating officer, general counsel, any senior financial officer and any other officer of AWCC with responsibility for the administration of the indenture.

“Senior financial officer” means the chief financial officer, principal accounting officer, treasurer or controller of AWCC.

Modification or Waiver

Except as provided below, AWCC and the trustee may supplement and amend the indenture with the consent of the holders of not less than a majority in principal amount of the outstanding debt securities. The consent of the holder of each outstanding debt security affected is required to:

- change the stated maturity of the principal of, or any installment of interest on, the debt securities;
- reduce the principal amount or the rate of interest on, or any premium payable upon the redemption of, the debt securities;
- change the place or currency of payment of principal of, interest on, or premium, if any, on, the debt securities;
- impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of the debt securities or any redemption date for the debt securities;
- reduce the percentage of outstanding debt securities necessary to modify or amend the indenture or to consent to any waiver under the indenture;
- modify provisions related to waivers of past defaults or waivers of certain covenants, other than to increase the percentage of outstanding debt securities necessary for such waivers; or
- modify any of the above requirements.

AWCC and the trustee may supplement and amend the indenture without the consent of any holder for the following purposes:

- to evidence the succession of another entity to AWCC as obligor under the indenture and the debt securities;
- to add to the covenants of AWCC, American Water or a subsidiary of American Water for the benefit of the holders of the debt securities or to surrender any right or power conferred upon AWCC, American Water or any subsidiary of American Water;
- to provide for uncertificated debt securities in addition to or in place of certificated debt securities (provided that the uncertificated debt securities are issued in registered form for purposes of Section 163(f) of the Internal Revenue Code, or in a manner such that the uncertificated debt securities are described in Section 163(f)(2)(B) of the Internal Revenue Code);

Table of Contents

- to secure the debt securities or add guarantees with respect to the debt securities;
- to establish the form or terms of debt securities as permitted by the indenture;
- to provide for the acceptance of appointment by a successor trustee;
- to cure any ambiguity, defect or inconsistency in the indenture or to make any other change that does not adversely affect the rights of any holder of the debt securities;
- to effect the assumption of the indenture by American Water; or
- to comply with any requirement of the SEC in connection with the qualification of the indenture under the Trust Indenture Act.

The consent of the holders of the debt securities is not necessary under the indenture to approve the particular form of any proposed amendment or supplemental indenture. It is sufficient if such consent approves the substance of the proposed amendment or supplemental indenture.

Prescription Period

Any money that AWCC deposits with the trustee or any paying agent for the payment of principal, premium, if any, or interest on any debt security that remains unclaimed for two years after the date upon which the principal, premium, if any, and interest are due and payable will be repaid to AWCC upon AWCC's request unless otherwise required by mandatory provisions of any applicable unclaimed property law. After that time, unless otherwise required by mandatory provisions of any unclaimed property law, the holder of any debt security will be able to seek any payment to which that holder may be entitled only from AWCC.

No Personal Liability of Directors, Officers, Employees and Shareholders

No director, officer, employee, incorporator or shareholder of AWCC or American Water, will have any liability for any obligations of AWCC or American Water under the debt securities, the indenture or the support agreement, or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each holder of a debt security by accepting such debt security waives and releases all such liability. The waiver and release are part of the consideration for issuance of the debt securities. The waiver may not be effective to waive liabilities under the federal securities law and it is the view of the SEC that such waiver is against public policy.

Defeasance

At any time, AWCC may terminate all its obligations under debt securities of a series and the indenture with respect to such debt securities, which is referred to as "legal defeasance," except for certain obligations, including those respecting the defeasance trust and obligations to register the transfer or exchange of debt securities of such series, to replace mutilated, destroyed, lost or stolen debt securities of such series and to maintain a registrar and paying agent in respect of the debt securities of such series.

In addition, at any time AWCC may terminate its obligations under certain specified covenants with respect to a series of debt securities.

AWCC may exercise its legal defeasance option with respect to a series of debt securities notwithstanding its prior exercise of its covenant defeasance option with respect to such series of debt securities. If AWCC exercises its legal defeasance option with respect to a series of debt securities, payment of the debt securities of such series may not be accelerated because of an event of default with respect thereto. If AWCC exercises its covenant defeasance option with respect to a series of debt securities, payment of the debt securities of such series may not be accelerated because of a default related to the specified covenants.

In order to exercise either defeasance option with respect to debt securities of a series, AWCC must irrevocably deposit in trust, which is referred to as the "defeasance trust," with the trustee money or U.S. Government obligations, or both, in an amount deemed sufficient in the opinion of a nationally recognized firm

Table of Contents

of independent public accountants for the payment of principal and premium, if any, and interest on such debt securities to maturity, and must comply with certain other conditions, including delivery to the trustee of an opinion of counsel to the effect that holders of the debt securities of such series will not recognize gain or loss for U.S. federal income tax purposes as a result of such deposit and defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such deposit and defeasance had not occurred (and, in the case of legal defeasance only, such opinion of counsel must be based on a ruling of the Internal Revenue Service or change in applicable U.S. federal income tax law).

Discharge

When (i) AWCC delivers to the trustee all outstanding debt securities of a series (other than any debt securities replaced because of mutilation, loss, destruction or wrongful taking) for cancellation or (ii) all outstanding debt securities of such series have become due and payable, or are by their terms due and payable within one year whether at maturity or are to be called for redemption within one year under arrangements reasonably satisfactory to the trustee, and in the case of clause (ii) AWCC irrevocably deposits with the trustee funds sufficient to pay at maturity or upon redemption all outstanding debt securities of such series, including interest thereon, and if in either case AWCC pays all other sums related to the applicable series of debt securities payable under the indenture by AWCC, then the indenture shall, subject to certain surviving provisions, cease to be of further effect with respect to such series. The trustee shall acknowledge satisfaction and discharge of the indenture with respect to the applicable series of debt securities on request of AWCC accompanied by an officers' certificate and an opinion of counsel of AWCC.

Governing Law

The indenture and the debt securities will be governed by, and construed in accordance with, the laws of the State of New York, without regard to conflicts of laws principles thereof.

Book-Entry, Delivery and Form

Except as set forth in the applicable prospectus supplement, each series of debt securities will be issued in registered, global form and will be represented by one or more global securities. Upon issuance, each of the global securities will be deposited with the trustee as custodian for The Depository Trust Company, which is referred to as "DTC," in New York, New York, and registered in the name of DTC or its nominee, in each case for credit to an account of a direct or indirect participant in DTC as described below.

Except as set forth below, the global securities may be transferred, in whole and not in part, only to another nominee of DTC or to a successor of DTC or its nominee. Beneficial interests in the global securities may not be exchanged for definitive debt securities in registered certificated form, which is referred to as "certificated debt securities," except in the limited circumstances described below. See "—Exchanges of Global Securities for Certificated Debt Securities." Except in the limited circumstances described below, owners of beneficial interests in the global securities will not be entitled to receive physical delivery of the debt securities in certificated form.

Transfers of beneficial interests in the global securities will be subject to the applicable rules and procedures of DTC and its direct or indirect participants, which may change from time to time.

Exchanges of Global Securities for Certificated Debt Securities

A beneficial interest in a global security may not be exchanged for a debt security in certificated form unless (i) DTC (x) notifies AWCC that it is unwilling or unable to continue as depository for such global security or (y) has ceased to be a clearing agency registered under the Exchange Act, or (ii) there shall have occurred and be continuing an event of default with respect to the debt securities. In all cases, certificated debt securities delivered in exchange for any global security or beneficial interests therein will be registered in the names, and issued in approved denominations, requested by or on behalf of DTC (in accordance with its customary procedures).

Table of Contents

Depository Procedures

The following description of the operations and procedures of DTC is provided solely as a matter of convenience. These operations and procedures are solely within the control of the respective settlement systems and are subject to changes by them from time to time. American Water and AWCC take no responsibility for these operations and procedures and urge investors to contact the system or their participants directly to discuss these matters.

Upon the issuance of the global securities, DTC will credit, on its internal system, the respective principal amount of the individual beneficial interests represented by such global securities to the accounts with DTC, which are referred to as "participants," or persons who hold interests through participants. Ownership or beneficial interests in the global securities will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC or its nominee (with respect to interests of participants) and the records of participants (with respect to interest of persons other than participants).

As long as DTC, or its nominee, is the registered holder of a global security, DTC or such nominee, as the case may be, will be considered the sole owner and holder of the debt securities represented by such global security for all purposes under the indenture and the debt securities. Except in the limited circumstances described above under "—Exchanges of Global Securities for Certificated Debt Securities," owners of beneficial interests in a global security will not be entitled to have portions of such global security registered in their names, will not receive or be entitled to receive physical delivery of debt securities in definitive form and will not be considered the owners or holders of the global security (or any debt securities presented thereby) under the indenture or the debt securities. In addition, no beneficial owner of an interest in a global security will be able to transfer that interest except in accordance with DTC's applicable procedures, in addition to those under the indenture referred to herein.

Investors may hold their interests in the global securities directly through DTC, if they are participants in such system, or indirectly through organizations which are participants in such system. All interests in a global security may be subject to the procedures and requirements of DTC.

The laws of some jurisdictions may require that certain persons take physical delivery in definitive form of securities that they own. Consequently, the ability to transfer beneficial interests in a global security to such persons may be limited to that extent. Because DTC can act only on behalf of participants, which in turn act on behalf of indirect participants and certain banks, the ability of a person having beneficial interests in a global security to pledge such interests to persons or entities that do not participate in the DTC system, or otherwise take action in respect of such interests, may be affected by the lack of a physical certificate evidencing such interests.

Payments of the principal of and interest on global securities will be made to DTC or its nominee as the registered holder thereof. Neither AWCC, the trustee nor any of their respective agents will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the global securities or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

AWCC expects that DTC or its nominee, upon receipt of any payment of principal or interest in respect of a global security representing any debt securities held by it or its nominee, will immediately credit participants' accounts with payment in amounts proportionate to their respective beneficial interests in the principal amount of such debt securities as shown on the records of DTC or its nominee. AWCC also expects that payments by participants to owners of beneficial interests in such global securities held through such participants will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers registered in "street name." Such payments will be the responsibility of such participants.

Transfers between participants in DTC will be effected in accordance with DTC's procedures.

Table of Contents

DTC has advised AWCC that DTC will take any action permitted to be taken by a holder of debt securities (including the presentation of debt securities for exchange as described below) only at the direction of one or more participants to whose account with DTC interests in the global securities are credited and only in respect of such portion of the aggregate principal amount of the debt securities as to which such participant or participants has or have given such direction. However, if there is an event of default under the debt securities, DTC reserves the right to exchange the global securities for legended debt securities in certificated form, and to distribute such debt securities to its participants.

DTC has advised AWCC that DTC is:

- a limited purpose trust company organized under the New York Banking Law,
- a "banking organization" within the meaning of the New York Banking Law,
- a member of the Federal Reserve System,
- a "clearing corporation" within the meaning of the New York Uniform Commercial Code, as amended, and
- a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act.

DTC was created to hold securities for its participants and facilitate the clearance and settlement of securities transactions between participants through electronic book-entry changes in accounts of its participants, thereby eliminating the need for physical transfer and delivery of certificates. Participants include securities brokers and dealers, banks, trust companies and clearing corporations and may include certain other organizations. DTC is partially owned by some of these participants or their representatives. Indirect access to the DTC system is available to other entities such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a participant, either directly or indirectly, which we refer to as indirect participants.

Although DTC has agreed to the foregoing procedures in order to facilitate transfers of beneficial ownership interests in the global securities among participants of DTC, it is under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. None of AWCC, the trustee nor any of their respective agents will have any responsibility for the performance by DTC or its participants or indirect participants of its respective obligations under the rules and procedures governing its operations, including maintaining, supervising or reviewing the records relating to, or payments made on account of, beneficial ownership interests in global securities.

Settlement and Payment

AWCC will make payments in respect of the debt securities represented by the global securities (including principal, premium, if any, and interest) by wire transfer of immediately available funds to the accounts specified by the global security holder. AWCC will make all payments of principal, interest and premium, if any, with respect to certificated debt securities by wire transfer of immediately available funds to the accounts specified by the holders of the certificated debt securities or, if no such account is specified, by mailing a check to each such holder's registered address.

Table of Contents

DESCRIPTION OF DEPOSITARY SHARES

The following summary of certain provisions of the depositary shares does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the depositary agreement that will be filed with the SEC in connection with the offering of such depositary shares.

American Water may offer fractional shares of preferred stock, rather than full shares of preferred stock. If American Water decides to offer fractional shares of preferred stock, American Water will issue receipts for depositary shares. Each depositary share will represent a fraction of a share of a particular series of preferred stock, and the prospectus supplement will indicate that fraction. The shares of preferred stock represented by depositary shares will be deposited under a depositary agreement between American Water and a depositary that is a bank or trust company that meets certain requirements and is selected by American Water. The depositary will be specified in the applicable prospectus supplement. Each owner of a depositary share will be entitled to all of the rights and preferences of the preferred stock represented by the depositary share. The depositary shares will be evidenced by depositary receipts issued pursuant to the depositary agreement. Depositary receipts will be distributed to those persons purchasing the fractional shares of preferred stock in accordance with the terms of the offering.

American Water has summarized selected provisions of the depositary agreement and the depositary receipts, but the summary is qualified in its entirety by reference to the provisions of the depositary agreement and the depositary receipts. The particular terms of any series of depositary shares will be described in the applicable prospectus supplement. If so indicated in the prospectus supplement, the terms of any such series may differ from the terms set forth below.

Dividends and Other Distributions

The depositary will distribute all cash dividends or other cash distributions received by it in respect of the preferred stock to the record holders of depositary shares relating to such preferred shares in proportion to the numbers of depositary shares held on the relevant record date. The amount made available for distribution will be reduced by any amounts withheld by the depositary or American Water on account of taxes.

In the event of a distribution other than in cash, the depositary will distribute securities or property received by it to the record holders of depositary shares in proportion to the numbers of depositary shares held on the relevant record date, unless the depositary determines that it is not feasible to make such distribution. In that case, the depositary may make the distribution by such method as it deems equitable and practicable. One such possible method is for the depositary to sell the securities or property and then distribute the net proceeds from the sale as provided in the case of a cash distribution.

Withdrawal of Shares

Upon surrender of depositary receipts representing any number of whole shares at the depositary's office, unless the related depositary shares previously have been called for redemption, the holder of the depositary shares evidenced by the depositary receipts will be entitled to delivery of the number of whole shares of the related series of preferred stock and all money and other property, if any, underlying such depositary shares. However, once such an exchange is made, the preferred stock cannot thereafter be redeposited in exchange for depositary shares. Holders of depositary shares will be entitled to receive whole shares of the related series of preferred stock on the basis set forth in the applicable prospectus supplement. If the depositary receipts delivered by the holder evidence a number of depositary shares representing more than the number of whole shares of preferred stock of the related series to be withdrawn, the depositary will deliver to the holder at the same time a new depositary receipt evidencing the excess number of depositary shares.

Redemption of Depositary Shares

Whenever American Water redeems shares of the preferred stock, the depositary will redeem a number of depositary shares representing the same number of shares of preferred stock so redeemed. If fewer than all of the

Table of Contents

depositary shares are to be redeemed, the depositary shares to be redeemed will be selected by lot, pro-rata or by any other equitable method as the depositary may determine.

Voting of Underlying Shares

Upon receipt of notice of any meeting at which the holders of the preferred stock of any series are entitled to vote, the depositary will mail the information contained in the notice of the meeting to the record holders of the depositary shares relating to that series of preferred shares. Each record holder of the depositary shares on the record date will be entitled to instruct the depositary as to the exercise of the voting rights represented by the number of shares of preferred stock underlying the holder's depositary shares. The depositary will endeavor, to the extent it is practical to do so, to vote the number of whole shares of preferred stock underlying such depositary shares in accordance with such instructions. American Water will agree to take all action that the depositary may deem reasonably necessary in order to enable the depositary to do so. To the extent the depositary does not receive specific instructions from the holders of depositary shares relating to such preferred shares, it will abstain from voting such shares of preferred stock.

Amendment and Termination of Depositary Agreement

The form of depositary receipt evidencing the depositary shares and any provision of the applicable depositary agreement may at any time be amended by agreement between American Water and the depositary. American Water may, with the consent of the depositary, amend the depositary agreement from time to time in any manner that American Water desires. However, if the amendment would materially and adversely alter the rights of the existing holders of depositary shares, the amendment would need to be approved by the holders of at least a majority of the depositary shares then outstanding.

The depositary agreement may be terminated by American Water or the depositary if:

- all outstanding depositary shares have been redeemed; or
- there has been a final distribution in respect of the shares of preferred stock of the applicable series in connection with American Water's liquidation, dissolution or winding up and such distribution has been made to the holders of depositary receipts.

Resignation and Removal of Depositary

The depositary may resign at any time by delivering to us notice of its election to do so. American Water may remove a depositary at any time. Any resignation or removal will take effect upon the appointment of a successor depositary and its acceptance of appointment.

Charges of Depositary

American Water will pay all transfer and other taxes and governmental charges arising solely from the existence of any depositary arrangements. American Water will pay all charges of each depositary in connection with the initial deposit of the preferred shares of any series, the initial issuance of the depositary shares, any redemption of such preferred shares and any withdrawals of such preferred shares by holders of depositary shares. Holders of depositary shares will be required to pay any other transfer taxes.

Notices

Each depositary will forward to the holders of the applicable depositary shares all notices, reports and communications from American Water which are delivered to such depositary and which are required to be furnished to the holders of the preferred shares.

Table of Contents

Limitation of Liability

The depositary agreement will contain provisions that limit American Water's liability and the liability of the depositary to the holders of depositary shares. Both the depositary and American Water will also be entitled to an indemnity from the holders of the depositary shares prior to bringing, or defending against, any legal proceeding. American Water or any depositary may rely upon written advice of counsel or accountants, or information provided by persons presenting preferred shares for deposit, holders of depositary shares or other persons believed by American Water to be competent and on documents believed by American Water or them to be genuine.

Table of Contents

DESCRIPTION OF STOCK PURCHASE CONTRACTS AND STOCK PURCHASE UNITS

The following summary of certain provisions of the stock purchase contracts and stock purchase units does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the stock purchase contract or stock purchase unit, as applicable, that will be filed with the SEC in connection with the offering of such securities.

American Water may issue stock purchase contracts, including contracts obligating holders to purchase from American Water, and obligating American Water to sell to the holders, a specified number of shares of common stock or other securities at a future date or dates, which are referred to as "stock purchase contracts." The price per share of the securities and the number of shares of the securities may be fixed at the time the stock purchase contracts are issued or may be determined by reference to a specific formula set forth in the stock purchase contracts. The stock purchase contracts may be issued separately or as part of units consisting of a stock purchase contract and debt securities, preferred securities, warrants or debt obligations of third parties, including U.S. treasury securities, securing the holders' obligations to purchase the securities under the stock purchase contracts, which are referred to as "stock purchase units." The stock purchase contracts may require holders to secure their obligations under the stock purchase contracts in a specified manner. The stock purchase contracts also may require American Water to make periodic payments to the holders of the stock purchase units or vice versa, and those payments may be unsecured or refunded on some basis.

The applicable prospectus supplement will describe the terms of the stock purchase contracts or stock purchase units. The description in the prospectus supplement will not necessarily be complete, and reference will be made to the stock purchase contracts, and, if applicable, collateral or depositary arrangements, relating to the stock purchase contracts or stock purchase units, which will be filed with the SEC each time American Water issues stock purchase contracts or stock purchase units. Material U.S. federal income tax considerations applicable to the stock purchase units and the stock purchase contracts will also be discussed in the applicable prospectus supplement.

Table of Contents

DESCRIPTION OF SUBSCRIPTION RIGHTS

The following summary of certain provisions of the subscription rights does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the certificate evidencing the subscription rights that will be filed with the SEC in connection with the offering of such subscription rights.

General

American Water may issue subscription rights to purchase common stock, preferred stock, depositary shares or warrants to purchase preferred stock, common stock or depositary shares. Subscription rights may be issued independently or together with any other offered security and may or may not be transferable by the person purchasing or receiving the subscription rights. In connection with any subscription rights offering to American Water's shareholders, American Water may enter into a standby underwriting arrangement with one or more underwriters pursuant to which such underwriters will purchase any offered securities remaining unsubscribed for after such subscription rights offering. In connection with a subscription rights offering to American Water's shareholders, American Water will distribute certificates evidencing the subscription rights and a prospectus supplement to American Water's shareholders on or about the record date that American Water sets for receiving subscription rights in such subscription rights offering.

The applicable prospectus supplement will describe the following terms of subscription rights in respect of which this prospectus is being delivered:

- the title of such subscription rights;
- the securities for which such subscription rights are exercisable;
- the exercise price for such subscription rights;
- any provisions for changes to or adjustments in the exercise price for such subscription rights;
- the number of such subscription rights each shareholder will be entitled to receive, on a per share basis;
- the extent to which such subscription rights are transferable;
- if applicable, a discussion of the material U.S. federal income tax considerations applicable to the issuance or exercise of such subscription rights;
- the date on which the right to exercise such subscription rights shall commence, and the date on which such rights shall expire (subject to any extension);
- the extent to which such subscription rights include an over-subscription privilege with respect to unsubscribed securities;
- if applicable, the material terms of any standby underwriting or other purchase arrangement that American Water may enter into in connection with the subscription rights offering; and
- any other terms of such subscription rights, including terms, procedures and limitations relating to the exchange and exercise of such subscription rights.

Exercise of Subscription Rights

Each subscription right will entitle the holder of the subscription right to purchase for cash such amount of shares of preferred stock, depositary shares, common stock, warrants or any combination thereof, at such exercise price as shall in each case be set forth in, or be determinable as set forth in, the prospectus supplement relating to the subscription rights offered thereby. Subscription rights may be exercised at any time up to the close of business on the expiration date for such subscription rights set forth in the prospectus supplement. After the close of business on the expiration date, all unexercised subscription rights will become void.

Table of Contents

Subscription rights may be exercised as set forth in the prospectus supplement relating to the subscription rights offered thereby. Upon receipt of payment and the subscription rights certificate properly completed and duly executed at the corporate trust office of the subscription rights agent or any other office indicated in the prospectus supplement, American Water will forward, as soon as practicable, the shares of preferred stock or common stock, depositary shares or warrants purchasable upon such exercise. American Water may determine to offer any unsubscribed offered securities directly to persons other than shareholders, to or through agents, underwriters or dealers or through a combination of such methods, including pursuant to standby underwriting arrangements, as set forth in the applicable prospectus supplement.

Table of Contents

DESCRIPTION OF WARRANTS

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

General

American Water may issue warrants for the purchase of debt securities, preferred stock, depositary shares or common stock. Warrants may be issued independently or together with debt securities, preferred stock, depositary shares or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between American Water and a bank or trust company, as warrant agent. The warrant agent will act solely as American Water's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following:

- the title of such debt warrants;
- the offering price for such debt warrants, if any;
- the aggregate number of such debt warrants;
- the designation and terms of the debt securities purchasable upon exercise of such debt warrants;
- if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each such debt security;
- if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable;
- the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property);
- the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire;
- if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time;
- whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form;
- information with respect to book-entry procedures, if any;
- the currency or currency units in which the offering price, if any, and the exercise price are payable;
- if applicable, a discussion of material U.S. federal income tax considerations;
- the antidilution provisions of such debt warrants, if any;
- the redemption or call provisions, if any, applicable to such debt warrants;
- any provisions for changes to or adjustments in the exercise price for the debt warrants; and
- any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Table of Contents

Stock Warrants

The prospectus supplement relating to any particular issue of warrants for preferred stock, depositary shares or common stock will describe the terms of such warrants, including the following:

- the title of such warrants;
- the offering price for such warrants, if any;
- the aggregate number of such warrants;
- the designation and terms of the preferred stock, depositary shares or common stock purchasable upon exercise of such warrants;
- if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security;
- if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable;
- the number of shares of preferred or common stock, or the number of depositary shares, purchasable upon exercise of a warrant, and the price at which such shares may be purchased upon exercise;
- the date on which the right to exercise such warrants shall commence and the date on which such right shall expire;
- if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time;
- the currency or currency units in which the offering price, if any, and the exercise price are payable;
- if applicable, a discussion of material U.S. federal income tax considerations;
- the antidilution provisions of such warrants, if any;
- the redemption or call provisions, if any, applicable to such warrants;
- any provisions for changes to or adjustments in the exercise price for the stock warrants; and
- any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

PLAN OF DISTRIBUTION

We and any selling security holder may offer and sell the securities covered by this prospectus from time to time, in one or more transactions, at market prices prevailing at the time of sale, at prices related to market prices, at a fixed price or prices subject to change, at varying prices determined at the time of sale or at negotiated prices, by a variety of methods, including the following:

- through agents;
- to or through underwriters;
- through brokers or dealers;
- directly by us or any selling security holders to purchasers, including through a specific bidding, auction or other process; or
- through a combination of any of these foregoing methods of sale.

Registration of the securities covered by this prospectus does not mean that those securities necessarily will be offered or sold.

Table of Contents

In effecting sales, brokers or dealers engaged by us may arrange for other brokers or dealers to participate. Broker-dealer transactions may include:

- purchases of the securities by a broker-dealer as principal and resales of the securities by the broker-dealer for its account pursuant to this prospectus;
- ordinary brokerage transactions; or
- transactions in which the broker-dealer solicits purchasers.

In addition, we and any selling security holder may sell any securities covered by this prospectus in private transactions or under Rule 144 of the Securities Act rather than pursuant to this prospectus.

In connection with the sale of securities covered by this prospectus, broker-dealers may receive commissions or other compensation from us in the form of commissions, discounts or concessions. Broker-dealers may also receive compensation from purchasers of the securities for whom they act as agents or to whom they sell as principals or both. Compensation as to a particular broker-dealer may be in excess of customary commissions or in amounts to be negotiated. In connection with any underwritten offering, underwriters may receive compensation in the form of discounts, concessions or commissions from us or from purchasers of the securities for whom they act as agents. Underwriters may sell the securities to or through dealers, and such dealers may receive compensation in the form of discounts, concessions or commissions from the underwriters and/or commissions from the purchasers for whom they may act as agents. Any underwriters, broker-dealers, agents or other persons acting on our behalf that participate in the distribution of the securities may be deemed to be “underwriters” within the meaning of the Securities Act, and any profit on the sale of the securities by them and any discounts, commissions or concessions received by any of those underwriters, broker-dealers, agents or other persons may be deemed to be underwriting discounts and commissions under the Securities Act.

In connection with the distribution of the securities covered by this prospectus or otherwise, we or any selling security holder may enter into hedging transactions with broker-dealers or other financial institutions. In connection with such transactions, broker-dealers or other financial institutions may engage in short sales of our securities in the course of hedging the positions they assume with us or any selling security holder. We or any selling security holder may also sell securities short and deliver the securities offered by this prospectus to close out short positions. We or any selling security holder may also enter into option or other transactions with broker-dealers or other financial institutions, which require the delivery to such broker-dealer or other financial institution of securities offered by this prospectus, which securities such broker-dealer or other financial institution may resell pursuant to this prospectus, as supplemented or amended to reflect such transaction. We or any selling security holder may also from time to time pledge our securities pursuant to the margin provisions of customer agreements with brokers. Upon a default, the broker may offer and sell such pledged securities from time to time pursuant to this prospectus, as supplemented or amended to reflect such transaction.

At any time a particular offer of the securities covered by this prospectus is made, a prospectus supplement, or, if required, a revised prospectus, will be distributed which will set forth the aggregate amount of securities covered by this prospectus being offered and the terms of the offering, including the name or names of any underwriters, dealers, brokers or agents, any discounts, commissions, concessions and other items constituting compensation from us and any discounts, commissions or concessions allowed or reallowed or paid to dealers. Such prospectus supplement, and, if necessary, a post-effective amendment to the registration statement of which this prospectus is a part, will be filed with the SEC to reflect the disclosure of additional information with respect to the distribution of the securities covered by this prospectus. In order to comply with the securities laws of certain states, if applicable, the securities sold under this prospectus may only be sold through registered or licensed broker-dealers. In addition, in some states the securities may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from registration or qualification requirements is available and is complied with.

We may solicit offers to purchase directly. Offers to purchase securities also may be solicited by agents designated by us from time to time. Any such agent involved in the offer or sale of the securities in respect of which

Table of Contents

this prospectus is delivered will be named, and any commissions payable by us to such agent will be set forth, in the applicable prospectus supplement. Unless otherwise indicated in such prospectus supplement, any such agent will be acting on a reasonable best efforts basis for the period of its appointment. Any such agent may be deemed to be an underwriter, as that term is defined in the Securities Act, of the securities so offered and sold.

American Water may offer its equity securities into an existing trading market on the terms described in the applicable prospectus supplement. Underwriters, dealers and agents who may participate in any at-the-market offerings will be described in the prospectus supplement relating thereto.

Securities may also be offered and sold, if so indicated in the applicable prospectus supplement, in connection with a remarketing upon their purchase, in accordance with a redemption or repayment pursuant to their terms, or otherwise, by one or more firms acting as principals for their own accounts or as agents, which are referred to as "remarketing firms." Any remarketing firm will be identified and the terms of its agreement, if any, with us and its compensation will be described in the applicable prospectus supplement. Remarketing firms may be deemed to be underwriters, as that term is defined in the Securities Act, in connection with the securities remarketed thereby.

If so indicated in the applicable prospectus supplement, we may authorize agents, dealers or underwriters to solicit offers by certain institutions to purchase securities from us at the public offering price set forth in the applicable prospectus supplement pursuant to delayed delivery contracts providing for payment and delivery on the date or dates stated in the applicable prospectus supplement. Such delayed delivery contracts will be subject to only those conditions set forth in the applicable prospectus supplement. A commission indicated in the applicable prospectus supplement will be paid to underwriters and agents soliciting purchases of securities pursuant to delayed delivery contracts accepted by us.

In connection with an underwritten offering, we and any selling security holder would execute an underwriting agreement with an underwriter or underwriters. Unless otherwise indicated in the revised prospectus or applicable prospectus supplement, such underwriting agreement would provide that the obligations of the underwriter or underwriters are subject to certain conditions precedent, and that the underwriter or underwriters with respect to a sale of the covered securities will be obligated to purchase all of the covered securities, if any such securities are purchased. We or any selling security holder may grant to the underwriter or underwriters an option to purchase additional securities at the public offering price, less any underwriting discount, as may be set forth in the revised prospectus or applicable prospectus supplement. If we or any selling security holder grants any such option, the terms of that option will be set forth in the revised prospectus or applicable prospectus supplement.

Underwriters, agents, brokers or dealers may be entitled, pursuant to relevant agreements entered into with us, to indemnification by us or any selling security holder against certain civil liabilities, including liabilities under the Securities Act that may arise from any untrue statement or alleged untrue statement of a material fact, or any omission or alleged omission to state a material fact in this prospectus, any supplement or amendment hereto, or in the registration statement of which this prospectus forms a part, or to contribution with respect to payments which the underwriters, agents, brokers or dealers may be required to make.

LEGAL MATTERS

The validity of the securities offered in this prospectus and any related prospectus supplement and certain legal matters will be passed upon for us by Morgan, Lewis & Bockius LLP, New York, New York, and/or counsel named in the applicable prospectus supplement. If the securities are being distributed in an underwritten offering, certain legal matters will be passed upon for the underwriters by counsel identified in the related prospectus supplement.

Table of Contents

EXPERTS

The consolidated financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2020, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

American Water files annual, quarterly and current reports, proxy statements and other information with the SEC. These SEC filings are available to the public via the Internet at the SEC's website at http://www.sec.gov and our website at https://amwater.com. The information contained on or accessible from our website does not constitute a part of this prospectus and is not incorporated by reference herein.

American Water is "incorporating by reference" into this prospectus specific documents that it files with the SEC, which means that important information can be disclosed to you by referring you to those documents that are considered part of this prospectus. Information that American Water files subsequently with the SEC will automatically update and supersede this information. American Water incorporates by reference the documents listed below, and any future documents that it files with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Exchange Act, until the termination of the offerings of all of the securities covered by this prospectus. This prospectus is part of a registration statement filed with the SEC.

American Water is incorporating by reference into this prospectus the following documents filed with the SEC (excluding any portions of such documents that have been "furnished" but not "filed" for purposes of the Exchange Act):

Filings	Period Covered or Date Filed
Annual Report on Form 10-K	Year ended December 31, 2020, as filed with the SEC on February 24, 2021
Current Reports on Form 8-K (other than the portions not deemed to be filed)	Filed on February 18, 2021
Amendment No. 1 to Registration Statement on Form 8-A/A for a description of American Water's common stock, par value $0.01 per share	Filed on May 1, 2018, including any amendments or reports filed to update such description

American Water will provide to each person, including any beneficial owner, to whom a prospectus is delivered, upon written or oral request and without charge, a copy of the documents referred to above that are incorporated in this prospectus by reference. You can request copies of such documents if you write or call to American Water at the following address or telephone number: American Water Works Company, Inc., 1 Water Street, Camden, New Jersey 08102-1658, Attention: Secretary, (856) 955-4001, or such other address and telephone number as may be provided in a prospectus supplement.

This prospectus, any accompanying prospectus supplement or information incorporated by reference herein or therein, contains summaries of certain agreements that we have filed as exhibits to various SEC filings, as well as certain agreements that we will enter into in connection with the offering of securities covered by any particular accompanying prospectus supplement. The descriptions of these agreements contained in this prospectus, any accompanying prospectus supplement or information incorporated by reference herein or therein do not purport to be complete and are subject to, and qualified in their entirety by reference to, the definitive agreements. Copies of the definitive agreements will be made available without charge to you by making a written or oral request to us.

Table of Contents

We have not authorized anyone to provide you with information other than that contained or incorporated by reference in this prospectus or any accompanying prospectus supplement or in any related free writing prospectus filed by us with the SEC. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. You should not assume that the information appearing in this prospectus is accurate as of any date other than the date on the front cover of this prospectus.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in any accompanying prospectus supplement, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus.

KAW_R_PSCDR2_NUM010_070725_Attachment_29_CONFIDENTIAL FILED UNDER SEAL PURSUANT TO THE PETITION FOR CONFIDENTIAL TREATMENT FILED ON JULY 7, 2025

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Ann Bulkley

11. Refer to the Bulkley Direct Testimony, page 19. For both the natural gas companies and the electric companies in the proxy group, explain how the operational risk, business risk, and the current and future environmental requirements specifically compare to the regulated water industry.

Response:

In developing the proxy group, it is essential to balance the relative risk of the companies included in the proxy group with the overall size of the group. Therefore, given the small number of water utilities that can be included in the proxy group, Ms. Bulkley considered the inclusion of electric and natural gas utilities. Ms. Bulkley required that each natural gas and electric utility included in the proxy group derive a majority of their operating income from regulated operations. Further, electric utilities were required to: (1) own water operations and (2) have operations that were primarily transmission and distribution only and thus own limited generation.[1] Thus, Ms. Bulkley's screening criteria resulted in the inclusion of electric and natural gas utilities that were generally comparable to KAWC.

Furthermore, as discussed on page 20, line 24 through page 21, line 26 of Ms. Bulkley's Direct Testimony, several regulatory commissions including the Massachusetts Department of Public Utilities, the Florida Public Service Commission and the Illinois Commerce Commission have considered the results of a proxy group that included both water and natural gas companies when determining the ROE for a water utility. Additionally, as shown in Figure 4 of Ms. Bulkley's Direct Testimony, over the past 10 years, the annual average authorized returns for water, natural gas and transmission and distributing only ("T&D") electric utilities have been generally comparable indicating that the risk of these utilities is also generally comparable.

Finally, it is always the case that the proxy companies do not have exactly the same risk profile as the subject company, KAWC. This is true for not only the electric and natural gas utilities but also for the water utilities included in Ms. Bulkley's proxy group. Therefore, Ms. Bulkley did not specifically compare the risks of the electric and natural gas utilities to the risks of the regulated water industry but instead more appropriately evaluated the relative risks of the proxy group companies and KAWC to determine how the Company's risk profile compares with the group to determine the appropriate placement of the ROE within the range of results established using the proxy group companies. Please see Section VII (pages 35-48) of Ms. Bulkley's Direct Testimony for a discussion of the specific regulatory, business, and financial risks faced by KAWC as compared with the proxy group. Additionally, the analyses presented by Ms. Bulkley related to the relative business, financial and overall investment risk of KAWC as

compared to the proxy group are presented in Exhibit AEB-7, Exhibit AEB-8 and Exhibit AEB-9.

[1] As discussed on page 18, lines 14-15 of Ms. Bulkley's Direct Testimony, while Ms. Bulkley considered electric companies for potential inclusion in the proxy group, none of the electric companies met the screening criteria that she specified.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Ann Bulkley

12. Refer to the Bulkley Direct Testimony, page 28, lines 11-13.

    a. Provide support for the use of S&P Capital IQ consensus analysts' forecasts of earnings growth in the DCF analyses.

    b. Provide a comparison of Yahoo! Finance and S&P Capital IQ as sources of analysts' forecasts for growth.

Response:

a. Similar to the projected 3 to 5-year EPS growth rates reported by Zacks and those previously reported by Yahoo! Finance, S&P Capital IQ Pro provides consensus estimates of the projected 3 to 5-year EPS growth rates (*i.e.,* reflect the views of multiple brokerage analysts). S&P Capital IQ is a leading data source for market information on the utilities sector, therefore, it is reasonable to expect that investors consider the projected 3 to 5-year EPS growth provided by S&P Capital IQ Pro.

   Further, as discussed on page 28, lines 11-13 of Ms. Bulkley's Direct Testimony, Ms. Bulkley previously relied on projected EPS growth rates from Yahoo! Finance, Value Line and Zacks; however, because Yahoo! Finance no longer reports projected 3 to 5-year EPS growth rates, Ms. Bulkley has replaced the consensus estimates previously relied upon from this source with the S&P Capital IQ data estimates to maintain three data sources, two of which are consensus estimates.

b. As discussed on page 28, lines 11-13 of Ms. Bulkley's Direct Testimony, Yahoo! Finance no longer reports projected 3 – 5-year projected EPS growth rates; therefore, Ms. Bulkley is unable to develop the requested comparison.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Ann Bulkley

13. Refer to the Bulkley Direct Testimony, page 29, lines 19-20. Confirm that Kentucky-American did not exclude any other outliers in the return on equity evaluation. If Kentucky-American did exclude other outliers, identify all excluded outliers, and explain why they were excluded.

Response:

Confirmed. Ms. Bulkley did not exclude any projected EPS growth rates from her constant growth DCF analysis. Instead, as discussed on page 30, lines 1-5 of Ms. Bulkley's Direct Testimony, Ms. Bulkley relied on the median of the proxy group as opposed to the mean when conducting her constant growth DCF analysis since the median is the measure of central tendency that is not significantly affected by the presence of outliers.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Ann Bulkley

14. Refer to the Bulkley Direct Testimony, page 32, lines 8-17.

    a. Explain the time and which stock indices serve as the basis for the Value Line and Bloomberg beta coefficients.

    b. Explain the time and basis for Yahoo! Finance beta calculations and why they could not also be included in the analysis.

    c. Provide an update to the calculation found on page 35 of the Bulkley Direct Testimony including adjusted Yahoo! Finance beta values. If Yahoo! Finance beta values are unadjusted, provide the formula for adjusting the beta values.

Response:

a. As discussed on page 32, lines 11-12 of Ms. Bulkley's Direct Testimony, the Bloomberg Beta coefficients were calculated using ten years of weekly returns relative to S&P 500 as of March 31, 2025. Additionally, as discussed on page 32, lines 12-14 of Ms. Bulkley's Direct Testimony, the Value Line beta coefficients are calculated using five years of weekly returns against the New York Stock Exchange Composite Index. Ms. Bulkley relied on the beta coefficients calculated by Value Line and provided in the individual Value Line reports for each of the companies in her proxy group; therefore, the Value Line beta coefficients for the companies classified as "Water Utilities" that were included in Ms. Bulkley's proxy group were as of January 3, 2025, while the Value Line beta coefficients for the companies classified as "Natural Gas Distribution Utilities" that were included in Ms. Bulkley's proxy group were as of February 21, 2025.

b. Yahoo! Finance calculates raw betas using monthly returns for the past five years. However, Yahoo! Finance does not specify the market index that is relied on to calculate beta. Further, Ms. Bulkley did not rely on the betas published by Yahoo! Finance because the calculation is based on monthly returns as opposed to weekly returns. Betas based on weekly returns are better predictors of forward returns than those based on monthly returns which is important in the current proceeding where the cost of equity is being estimated for KAWC for the future period when rates will be in effect. For example, in 2022, Agrrawal, Gilbert, and Harkins conducted a study (provided as KAW_R_PSCDR2_NUM014_070725_Attachment 1) that examined betas calculated using daily, weekly, and monthly returns over periods of 1 to 5 years

to determine which methodology was most appropriate for predicting returns over the next day, week, and month and concluded the following:

> In this paper, we have empirically considered whether the standard 60-month window length for calculating CAPM betas for portfolios is optimal for all trading interval lengths. Considering the condensed output of 540 cells (of portfolios TE's [Tracking Error]) from this study, over the period 2000 to 2021 (three rectangular matrices of 180 cells), we find that forecast interval lengths matched to daily or weekly return-based betas are more likely to lead to the lowest tracking errors. When considering the plurality of options for all types of market capitalizations (large, mid and small), the weekly return frequency performs best in producing the lowest TE for 1-period forward returns.
>
> ***
>
> Thus, while there is no optimal combination, the analysis leans towards shorter return intervals (daily or weekly but not monthly) and longer estimation periods (four or five years of returns). This combination can be very intense on computing time, but is nothing compared to the scale of crypto mining and blockchain authentication (Lei et al. 2021; Verhoeven et al. 2018). Results indicate that the generally witnessed practice of utilizing monthly interval betas (over a 60-month estimation period) to estimate next day or next week portfolio returns, or to control for portfolio risk in a market-neutral setting, may not be optimal and is likely a vestige of legacy issues that are no longer relevant (in an era of cloud computing, high frequency data, machine readable data and AI). Agrrawal (2009) demonstrated that pricing data for new firms could be programmatically harvested from the web much before they get archived in a machine-readable format from the larger data providers (WRDS 2022).

Of the methodologies examined, weekly betas vastly outperformed monthly betas at predicting one period forward returns. Thus, Agrrawal, Gilbert and Harkins noted that their analysis supported the use of either daily or weekly returns over periods of 4 to 5 years which most closely approximates the approach relied on by Value line to calculate beta (*i.e.*, 5 years of weekly returns). Moreover, the authors stated that the use of monthly returns over the period of 5 years to estimate beta (*i.e.*, the approach employed by Yahoo! Finance) "may not be optimal and is likely a vestige of legacy issues that are no longer relevant".

c. Ms. Bulkley did not rely on the betas published by Yahoo! Finance for the reasons discussed in PSC 14, part b; therefore, Ms. Bulkley has not developed a version of her CAPM analysis that relies on the betas from Yahoo! Finance.

Time Dependence of CAPM Betas on the Choice of Interval Frequency and Return Timeframes: Is There an Optimum?

Pankaj Agrrawal *, Faye W. Gilbert and Jason Harkins

Maine Business School, University of Maine, 5723 D. P. Corbett Business Building, Orono, ME 04469, USA
* Correspondence: pankaj.agrrawal@maine.edu

Abstract: AbstractsThe traditional CAPM beta is almost exclusively calculated over a return period that spans a window length of 60-months, at one-month return frequencies. It is one of the most utilized models in the asset management industry to assess systematic risk. Yet there is limited evidence to suggest that these estimation parameters are optimal. Utilizing data between January 2000 and December 2021 for the Russell 1000 index, we test daily, weekly, and monthly beta estimations to calculate tracking errors (TE) for the use of these betas in predicting subsequent performance over daily, weekly, and monthly timeframes. We identify that daily CAPM betas are best for predicting subsequent period daily returns and that weekly CAPM betas are strongly correlated with forward weekly and monthly period returns. Leveraging the significant advances in computing resources and the increasing utilization of high frequency trading strategies, we argue that additional window length and return interval-based CAPM betas should be calculated for estimating the systematic risk embedded in diversified portfolios.

1. Introduction

The assertion that there is a relation between portfolio beta and the market return has been analyzed and debated for decades. The Sharpe-Linter-Black CAPM model (1964) supports this theory and states that the expected return is a positive linear function of beta, the risk free rate and the expected market return, while other researchers question the usefulness of the beta in predicting the expected return. More recently, Lin (2021) tested the consistency of a five-factor process as applied to an intertemporal CAPM model. Fama and French (1992) asserted that there is no systematic relationship between beta and security returns. Some others agree on the relationship but introduce non-linearity in the relationship (Carroll and Wei 1988). Chen et al. (1986) argued in favor of measuring the relationship between security expected returns using several macroeconomic variables. Lakonishok and Shapiro (1986) presented the case that there is empirical evidence that security returns are affected by an unsystematic risk component. Hollstein et al. (2020), in a recent study, find that intra-day high frequency return-based betas explain the size anomaly better than the conditional betas based on daily returns.

With all these differing and evolving views on the validity of the CAPM beta, a practitioner still cannot look beyond the fact that the traditional CAPM beta remains one of the most widely used factors in the capital markets. According to Graham and Harvey (2001) in a survey of industry participants, over seventy percent of respondents always or almost always look at the traditional CAPM beta, especially when it comes to assessing the extent of systematic risk in the portfolio.

The CAPM model, however, does not give any guidance into whether the beta should be measured daily, weekly, monthly, quarterly, or annually (Roman and Terraza 2018). The beta coefficient of a security will vary across different return frequencies. The phenomenon is referred to as the intervalling (or intervaling) effect bias in beta (Hawawini 1980; Fung et al. 1985; Corhay 1992). CAPM modeling also does not indicate the optimal regression window length that should be utilized to estimate betas. With a longer estimation window (greater than, say, 24 or 60 months) there are more observations in the regression; however, going much further back could introduce issues related to a transformed company with a different set of characteristics, even though it remains under the same company name (or CUSIP number as in the CRSP Pricing database 2022); this can happen when a larger company merges with others over time.

The purpose of this study is not to argue the validity of the CAPM model or its linearity, it is rather to answer the question of what is the optimal interval period (of returns) and window-length of estimation that would yield a beta estimate, whose utilization would make the daily, weekly, or monthly estimation and forecast of systematic portfolio risk more robust. The quantitative community in the US asset management industry primarily uses vendor-supplied betas, which are based on a 60-month return calculation (monthly interval frequency combined with a 60-month window-length of estimation period). We think that there is a legacy issue here, borne out of computational and data limitations years ago (Sharpe 1964) when beta first started getting deployed en masse in industrial portfolio evaluation.[1] These considerations do not exist at the time of writing of this research. The impact of in-the-money vested options, warrants or other convertible securities on EPS dilution was first systematically documented by Goldsticker and Agrrawal (1999), subsequently Akono et al. (2019) found that Regulation FD was partially successful at curbing the influence of management incentives on analysts' research when signaling expected underperformance by way of rounding to zero the EPS estimates; nonetheless such EPS volatility then feeds into stock valuation volatility, eventually resulting in unstable betas. As will be shown in the results, stocks with higher volatility are increasingly sensitive to varying frequency and estimation window lengths.

A survey of literature did not turn up any substantial/formalized insights into what is the effect of changing the interval of returns (monthly, weekly, and daily frequency of returns) on the traditional CAPM beta calculation, or the impact of altering the window-length (apart from the traditional 60-month window) on the accuracy/stability of the CAPM beta's prediction of the forward one-day return. In particular, there appears to be no justification to employing a 60-month beta, based on monthly return intervals to indicate/estimate a one-day or one-week portfolio systematic risk. We also think that with the growth of the market-neutral hedge fund industry, the need for daily portfolio rebalancing may necessitate the use of differing interval betas, with a drift towards higher frequency information (Hollstein et al. 2020), and thus shorter intervals.

2. Literature Review

The literature on the impact of 'intervalling' and window length variation on CAPM beta estimation is somewhat intermittent, though deep. Most of the work discusses the effect of different intervals on the return distributions and dispersion of residuals. Hollstein et al. (2020), find that intra-day high frequency return-based betas explain the size anomaly better than the conditional betas based on daily returns. Hawawini (1980), in his seminal paper on the intervalling effect, demonstrated "mathematically that the skewness of securities' returns—the ratio of the third moment to the standard deviation cubed—is sensitive to the length of the differencing interval over which returns are measured." In his paper, he demonstrates that "the higher the moment's order, the more sensitive it is to the length of the differencing interval over which securities' returns are measured." Smith (1978) estimated the "characteristic lines of 200 common stocks (are examined) over the period 1950–1969. With respect to measurement, geometric mean return decreased slightly and predictably with intervalling. The dispersion of return distribu-

tions decreased with longer intervals. Return distributions exhibited positive skewness. Goodness-of-fit for characteristic lines improved with the use of longer intervals. Estimates of beta increase with intervalling for aggressive stocks." These studies apply the Gaussian distribution to the return random variable x, with the mean and standard deviation of the distribution denoted by μ, σ respectively.

$$f(x) = \frac{1}{\sigma\sqrt{2\pi}} e^{-\frac{1}{2}\left(\frac{x-\mu}{\sigma}\right)^2}$$

The cumulative distribution function (CDF) of a standard normal distribution with $\mu = 0$, $\sigma = 1$ is the integral of the PDF given above from minus infinity to a value of z and is given by:

$$\Phi(z) = \frac{1}{\sqrt{2\pi}} \int_{-\infty}^{x} e^{-x^2/2}\, dx$$

In the area of quantitative financial analysis, the distribution of stock prices (x) is, however, modeled as a log-normal distribution, since $x \geq 0$ with parameters μ, σ modified as:

$$\mu = \ln\left(\frac{\mu_X^2}{\sqrt{\mu_X^2 + \sigma_X^2}}\right) \text{ and } \sigma^2 = \ln\left(1 + \frac{\sigma_X^2}{\mu_X^2}\right)$$

However, when the call option writing is applied to portfolios, the single time unit portfolio returns are no longer normally distributed. Despite the asymmetry of returns introduced by option writing, Buckle (2022) shows that the long-run portfolio returns, in fact, become normally distributed, for any invariant option-adjusted portfolio. For the bivariate (x, y), standard normal distribution ($\mu = 0$, $\sigma = 1$) with correlation ρ, the joint PDF is given as:

$$f(x,y) = \frac{1}{2\pi\sigma_X\sigma_Y\sqrt{1-\rho^2}} \exp\left(-\frac{1}{2(1-\rho^2)}\left[\left(\frac{x-\mu_X}{\sigma_X}\right)^2 - 2\rho\left(\frac{x-\mu_X}{\sigma_X}\right)\left(\frac{y-\mu_Y}{\sigma_Y}\right) + \left(\frac{y-\mu_Y}{\sigma_Y}\right)^2\right]\right)$$

Hawawini and Vora (1980) find that there is a consistent pattern of leads or lags for securities' daily returns and it does not hold over monthly returns for securities traded on the NYSE and the AMEX. Girard and Sinha (2006) explore the risk premiums and time varying covariance structures in emerging markets and find that their response mechanisms are not just linked to the local risk factors. Global ETFs can be easily deployed to produce efficient portfolios in a multi-asset mean-variance optimized framework (Agrrawal 2013), who demonstrated that a multi-asset six ETF global portfolio can have 30% less systematic risk (beta) than a pure equity index, such as the S&P 500. Reilly and Wright (1988) noticed discrepancies in published betas estimated over the same five-year period and conducted a factorial analysis of variance to test whether the betas were indeed statistically different. They concluded that: "1. the main reason for observed variation between published betas is the interval effect, and 2. the security market value is a significant predictor of the magnitude and the direction of the difference." The predictive ability of the varying interval betas was, however, not explored in their paper.

Corhay (1992) studied 250 domestic securities traded on the spot market of the Brussels Stock Exchange from January 1977 through December 1985 and noted that "an important issue related to the systematic risk or beta coefficient of a security is its sensitivity to the length of the differencing interval used to measure the returns. The results indicate that an intervalling effect bias is present in the estimated security betas for short differencing intervals. The bias in the betas is very important, especially for small market value securities, and it decreases when the differencing interval used to measure the returns is lengthened. The results also demonstrate that small firms have, on average, lower beta coefficients than large firms.[2]"

Corhay and Rad (1993) finds that in a sample of 50 thinly trading Dutch stocks the "beta estimates from short intervals are on average lower than those obtained from longer intervals" and that there is variability in the coefficients for varying interval lengths. The Corhay (1992) study has its focus on the matter of asynchronous trading and the problems that such non-overlapping estimation windows introduce into robust beta estimation.[3]

Groenewold and Fraser (2000) discuss that CAPM betas are generally estimated from historical data using a "5-year rule of thumb" and explore their ability to correlate with subsequent period returns. They estimate various "time-varying beta" regression models, which are then subsequently used for forecasting. They report that, "forecasting equations have good explanatory power but that their forecasts are dominated, on average, by the 5-year rule of thumb." Levy et al. (2001) report that there is a pronounced impact on the regression and "even a shift from weekly data to quarterly data affects the regression coefficient substantially." They analyze this in a multiplicative-additive framework of creating sub-periods (intervals) from the available period. Ho and Tsay (2001) find that for small-cap stocks, the downward bias in beta estimates diminishes once options are listed on the underlying stock, indicating that the price-adjustment process mitigates the intervalling effect, which is pronounced with smaller-sized stocks. Armitage and Brzeszczynski (2011) found a downward bias in daily betas as a result of the higher idiosyncratic component in daily returns (manifesting in heteroscedasticity of the error term). Intraday volatility is an increasingly impactful factor that creates bias in risk measures (Fang et al. 2012); hence, the assumption that a single beta estimation method would be universally applicable to different portfolio styles may not yield optimally. Mantsios and Xanthopoulos (2016) found a significant intervalling effect in the outcomes of the betas of stocks traded on the Athens Stock Exchange during their 2007–2012 economic crisis. Jurdi and AlGhnaimat (2021) find that firm-level variables such as size, leverage, dividend payments, and diversification impact firm total risk and thus beta. Abate et al. (2022) utilize monthly returns in their constrained optimization models to arrive at efficient allocations. The liquidity of prominent ETFs and its primary drivers have been evaluated in Agrrawal et al. (2014).

3. Data and Methodology

For our stock universe, Russell 1000, which we examined using the test period from 1 January 2000 through 31 December 2021 (CRSP via WRDS 2022), the first beta calculations involve estimation windows that end on 31 December 2021. The top 1000 of stocks on US exchanges comprise about 92% of the total market cap of all listed stocks in the U.S. equity market. Our WRDS/CRSP dataset provided us with CRSP tracked firms incorporated in the US and listed on the NYSE, AMEX, or NASDAQ that have a CRSP share code of 10 or 11 at the beginning of month t, extracted from the WRDS/CRSP files. The survivorship bias free portfolio formation is conducted over the period of 2000–2021. Betas are endogenously calculated using the standard market model (Equations (1)–(4), next section). The results of our work are not state dependent on say a unique set of macro, geo-political, or interest rate regimes (such as pre or post the Bretton Woods currency/gold standard agreement (Eichengreen 2021)). There could be future research conducted to compare indexes, such as the Russell 3000, the Wilshire 5000 and then to the Morgan Stanley MSCI international EAFE Index and see whether there are places where the optimal Beta window is more or less pronounced while calculating the subsequent tracking errors. Extending it back in time would further indicate that the frequency effect and intervaling matching spans time. Cremers and Petajisto (2009), in their seminal paper on suggesting a modification to the Fama and French (1992) paper, use return data that is over the 1980–2003 period. Additionally, the results we find are invariant year over year, and a priori we expect they will stay that way over previous time frames, since it is only a methodological readjustment that we have introduced.

Our purpose is to determine whether different criteria employed in the calculation of the beta lead to a better predictive ability of subsequent portfolio returns. In this paper, we examine two dimensions in the computation of portfolio betas: the interval length of the

returns and the length of the estimation window. The intervals are the return periods used for the comparisons of security returns to the market portfolio. We calculate betas based on daily, weekly and monthly returns. The estimation window is the period of time over which the beta is calculated. The traditional beta calculation uses a monthly interval length and a five-year estimation window (Corhay 1992). If recent systematic risk is deemed more relevant to near term portfolio performance (hedge funds or portfolios with more of a tactical asset allocation approach), then betas with shorter estimation periods might prove more appropriate. We use estimation windows of 1 to 5 years.

Thus, for instance, the first set of betas with a 5-year estimation window were calculated with a start date of 31 December 2016, while the first beta calculations involving 1-year estimation windows had a 31 December 2020 start date. The estimation windows are then run over a loop to produce the vector of betas, with varying return frequencies (D, W, M) and estimation window lengths (1 through 5 years). There are three forward looking time periods for which the tracking errors are calculated (1 day, 1 week and 1 month). The predictive ability of the various calculated betas are then gauged for their effectiveness in explaining subsequent daily, weekly and monthly returns.

The OLS beta for individual securities is estimated with the standard market model, with additional specifications with respect to a time interval of L and a window-length of estimation T.

$$r_i = \alpha_i + \beta_i r_M + e_i \tag{1}$$

$$r_{iLT} = \alpha_{iL} + \beta_{iL} r_{MLT} + e_{iLT} \tag{2}$$

and;

r_i is the return on security i
r_M is the return on the market
β_i is the calculated beta coefficient
α_i is the intercept term, and
e_i is the residual term

For each beta interval length (frequency) and estimation window period, betas are calculated using the two pass OLS return methodology, as listed below (Cohen et al. 1983b). The OLS beta is estimated from the standard market model, with additional specifications with respect to a time interval of L days (implying that the return interval would vary from a daily beta, a weekly return-based beta and a monthly beta). Additionally, we vary the window-length of estimation T, which is sub-divided into a set of periods determined by L and is equal to a rounded integer value of T/L[4]. Both r_{iLT} and r_{MLT} are continuously compounded returns over the specified interval L, and computed as the difference between the natural logarithms of successive closing prices, adjusted for dividends and corporate action.

$$\hat{\beta}_i^{OLS} \equiv {\beta_i}^L$$

$$r_{iLT} = {}^1\alpha_{iL} + {}^1\beta_{iL} r_{MLT} + {}^1e_{iLT} \tag{3}$$

$${}^1\beta_{iL} = {}^2\alpha_i + {}^2\beta_i f_i(L) + {}^2e_{iL} \tag{4}$$

$\forall L \equiv$ interval length in days (D, W, M);
for each security $i = 1, \ldots .. N$;
and over time $T = [1, \ldots, n \text{ days}]/L \equiv$ window length.

A one-year return period will have 252 trading days.

Portfolios are then formed based on the security betas and market capitalization levels (three fractiles for Large, Mid and Small capitalization groups, since we are operating within the Russell 1000 universe) at that point in time t. EW (Equal Weighted) portfolios when aggregated would have a performance drift from the observable VW (Value Weighted) index return over the same time period [due to the small-cap risk factor manifesting, this was noted in Carhart (1997)] and also by Cremers and Petajisto (2009), who pointed out that in the Fama and French (1992) paper, the sub-portfolio returns were based on equal-

weighted returns. Hence, the sub-portfolio returns in this study are value weighted-based, based on the prior period capitalization. The beta-based fraciles are EW (CRSP via WRDS 2022). The actual portfolio returns for the subsequent period ($t + 1$) were then compared to the expected returns based on the portfolio betas and actual returns of the market. This was conducted for daily (D), weekly (W) and monthly (M) forecast lengths. Then, new betas were calculated with a window estimation period ending one month later; and new portfolio combinations formed. The interval and window-length combinations that yielded the lowest tracking error would provide the preferred beta estimate for each portfolio combination and forecast length (forward 1 day, 1 week or 1 year).

Since the CAPM is more relevant for portfolios, where unsystematic risk has been diversified away and beta is the only relevant measure of the risk in security, the analysis was conducted on a portfolio level rather than an individual security level. We formed various portfolio combinations from the Russell 1000 universe based on market capitalization, beta, as calculated above, and a combination of market capitalization and beta (Table 1 (A, B, C)).

We use the annualized tracking error of forward-looking portfolio return estimates as our measure of the explanatory power of the various beta coefficients. The annualized tracking error, TE, is derived from the standard deviation of differences between the actual and expected portfolio returns, as demonstrated below:

$$TE = \sqrt{\lambda \sum_{t=1}^{N} (r_{P,t+1} - \beta_P r_{M,t+1})} \quad (5)$$

where:

N = The total number of periods examined (our current sample has 186 periods);
λ = The number of return periods per year (when forecasting daily returns, λ = 252; for weekly returns, λ = 52; and for monthly returns, λ = 12);
β_P = The equal-weighted portfolio beta based on a given interval and estimation window;
$r_{p,t+1}$ = The actual portfolio return for the period immediately following the beta calculations and portfolio formation;
$r_{m,t+1}$ = The actual return of the Market, as proxied by the total return of the Russell 1000, for the period immediately following the beta calculations and portfolio formation.

Table 1. Annualized Tracking Error of Actual Portfolio Return vs Beta Estimated Portfolio Return—All Periods.

Green-Daily Beta with lowest TE; Red-Weekly Beta with lowest TE; Yellow-Month Beta with lowest TE; p-value < 0.10 for all cells.

4. Results

The estimation of tracking errors for varying time frames (window lengths and interval return frequencies) is discussed in this section. Milonas and Rompotis (2013) examined the intervalling effect bias in a sample of forty ETFs' systematic risk, as well as the relation between beta and capitalization of ETFs and also the intervalling effect bias in ETFs' tracking error. They find a positive association between the intervalling effect and tracking error, as well as the return interval. For our set of the Russell 1000 stocks, we compare the tracking errors (Chu and Xu 2021)[5] of the various combinations of estimated betas (e.g., 1 year daily, . . . , 5 year daily, 5 year weekly, 5 year monthly, etc., for a total of twelve such variations).

The following exhibits labeled as, Table 1 (A, B, C) depict forecast windows of 1 day, 1 week and 1 month, respectively (in the rows). We first establish whether there is a particular interval length (daily, weekly or monthly) that generates the highest occurrence of return prediction stability across varying forecast windows, by identifying the cells with the lowest tracking error (TE). Thereafter, the tracking errors of the different combinations of Beta-Size[6] groups (twelve such groups) are listed in the successive columns, in each of the tables. The lower the tracking TE, the higher the subsequent period return predictability. This generates a total of 3 rectangular matrices of 15 × 12 dimensions each, thus totaling 540 (180 cells times 3 sets) unique TE's. We further synthesize these three information matrices (of tracking errors) by distilling the 540 TE cells into a consolidated 3 × 3 classification matrix. That matrix will be presented and discussed after the three core tables that show the TE's associated with daily, weekly and monthly forward returns, respectively. While the three sub-panels in Table 1 look similar, they differ in the length of the forward return period. For Table 1.A, the cells demonstrate the TE's associated with a 1 *Day* forward return; for Table 1.B, the cells demonstrate the TE's associated with a 1 *Week* forward return; for Table 1.C, the cells demonstrate the TE's associated with a 1 *Month* forward return. These are a few TE horizons for institutional portfolio managers with varying risk mandates. The lowest TE (most desirable) is highlighted for each column. In each case, the TE is between the observed forward return and the estimated portfolio return based on β_P, the portfolio beta based on a given interval and estimation window. The objective is to test the efficacy of varying interval and frequency betas in estimating portfolio returns that would most closely align with next period of returns (which could be 1 Day, 1 Week or 1 Month, the results of which are in Table 1 (A, B, C) [Combined Table 1].

The tables above are highly condensed output, derived from a large set of return numbers (three different return frequencies, for 1000 stocks per year and over a twenty-year period, with overlapping window length regressions), so that the reader can focus on the core findings. In order to further distill and simplify the embedded information in Table 1, we subsequently reduce the 15 × 12 matrix comprising of 540 cells and 3 sub-matrices, into a 3 × 3 Classification matrix.[7]

This is accomplished by first flagging the minimal TE value across each Beta-Size combination *within* each forecast window—this step reduces the 180-cell matrix to a 12-element array (one minimum TE value for each column). The second step involves aggregating each of the 'minimal' TE's across one of the three interval lengths used in the beta estimation, irrespective of the window-length utilized. As an example, the 'Daily 3 Years' and the 'Daily 4 Years' beta series would be classified under 'Daily Betas' interval length (in the classification matrix shown here), and the number of minimal TE's occurring within the daily beta panel be noted. A total of 36 minimal TE occurrences are thus classified for accuracy.

Each cell lists the number of occurrences a minimum TE was observed for the beta~forecast length combination, as listed in Table 1 (A, B, C). A few inferences and deductions from Table 2 are in order. It appears that there is an observable overlap between interval length and forecast window length, particularly for the daily and the weekly settings. While the classical CAPM gives us little guidance on this matter, we do find some indications, which appear to be intuitively justified, that daily beta-based portfolio returns would be the most correlated with next period daily returns. While nine of the twelve daily forecast returns with minimum TE were attributable to daily interval betas

(3 × 3 matrix cell a1), only four of the twelve monthly forecast returns with minimum TE were attributable to monthly interval betas (cell c3). In fact, it may be possible that weekly interval betas are more robust predictors of 1-month ahead returns (6 of the 12 occurrences; cell in b2).

Table 2. 3 × 3 Classification Matrix of 'Minimum' Tracking Errors.

Interval Length Forecast Length	Daily Betas	Weekly Betas	Monthly Betas	Total TE's	%Best
1 Day	9, a1	2	1	12	75.0%, a1
1 Week	0	6, b2	6	12	50.0%, b2
1 Month	2	6	4, c3	12	33.3%, c3

For daily return forecasting, the use of betas estimated by utilizing daily returns appears to be the interval of choice; 75% (nine of the twelve TE's)[8] of the daily beta and 1 day forecast return combinations had minimal TE's when using daily betas for daily return estimation. Apart from the fact that monthly betas appear to have limited monthly return predictability, we also notice that there is only one occurrence within monthly betas that generates a minimal TE in predicting 1-day ahead returns. In other words, the use of monthly betas to forecast daily portfolio returns does not seem to be a good approach (long-short market neutral hedge funds can have very short performance attribution periods, as an example).

The diagonals on the classification matrix also indicate that for daily and weekly single period forecasts, the returns based on daily and weekly interval betas would have greater accuracy. As such, these that tables provide metrics that indicate that the generally witnessed practice of utilizing a monthly interval beta (over a 60-month estimation period) to estimate next day portfolio returns or to control for portfolio risk in a market-neutral setting, may not be optimal.

Parametric and non-parametric tests for equality of means, medians and variances reject the null hypotheses of equality between the three types of betas (daily, weekly and monthly) are presented in Table 3. Apart from the Kruskal–Wallis and Welch F-tests, we also utilize the Levene's (1960) test for group variance equality. The formulation for Levene's $W = \frac{(N-k)}{(k-1)} \cdot \frac{\sum_{i=1}^{k} N_i (Z_{i.} - Z_{..})^2}{\sum_{i=1}^{k} \sum_{j=1}^{N_i} (Z_{ij} - Z_{i.})^2}$ with $Z_{ij} = \left| Y_{ij} - \overline{Y_{i.}} \right|$ where k is the number of different groups to which the sampled cases belong, N_i is the number of cases in the ith group, N is the total number of cases in all groups, and $Y_{i,j}$ is the value of the measured variable for the jth case from the ith group. The variance increase (Armitage and Brzeszczynski 2011) can also be observed in Figure 1 and is noticeable for betas above the 2.0 level.

Table 3. Tests for equality of means and variance homogeneity (daily, weekly and monthly betas).

Test for equal means					
	Sum of Squares	df	Mean square	F	*p* (same)
Between Beta groups:	1.7319	2	0.8660	4.5720	**0.010420**
Within Beta groups:	543.8350	2871	0.1894	Permutation p (n = 99,999)	
Total:	545.5670	2873	0.0105		
Kruskal-Wallis test for equal medians			H (chi2):	6.327	
(non-parametric test)			*p* (same):	**0.04227**	
There is a significant difference betweenthe sample means and also the medians					
Levene's test for homogeneity of variance			*p* (same):	$\mathbf{4.94 \times 10^{-27}}$	
Welch F test for unequal variances: F = 5.734, df = 1857, *p* = **0.003293**					

All *p*-values indicate that the Betas for Daily, Weekly and Monthly intervals differ in means, medians and variance.

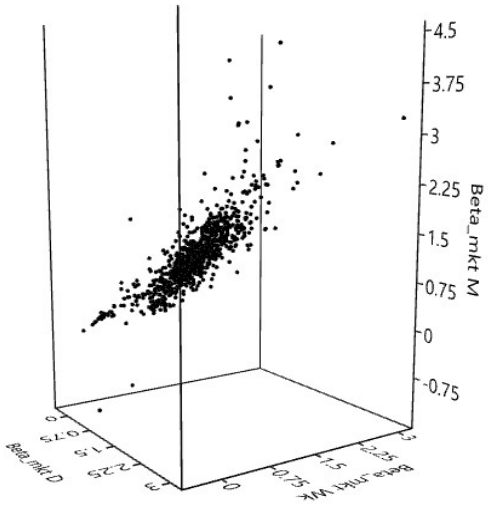

Figure 1. Scatterplot (3-D) of betas derived from daily, weekly and monthly returns (2000–2021).

Parametric and non-parametric tests for equality of means, medians and variances reject the null hypotheses of equality between the three types of betas (daily, weekly and monthly). While the Kruskal–Wallis and Welch F-test are standard tests, we utilize the Levene's (1960) test for group variance equality, given that our return series are based on varying periodicity. The variance escalation can also be observed in Figure 1 and is noticeable for betas above the 2.0 level.

The dispersion of betas is higher for the monthly frequency betas and is concentrated towards values $\beta > 2.25$. Values of $\beta < 0.5$ also show some dispersion for the weekly and daily series. This is also observed in the fat tails of the histograms shown in Figure A1, Appendix A. Figure 2 has a surface plot rendition of the varying interval beta series, below:

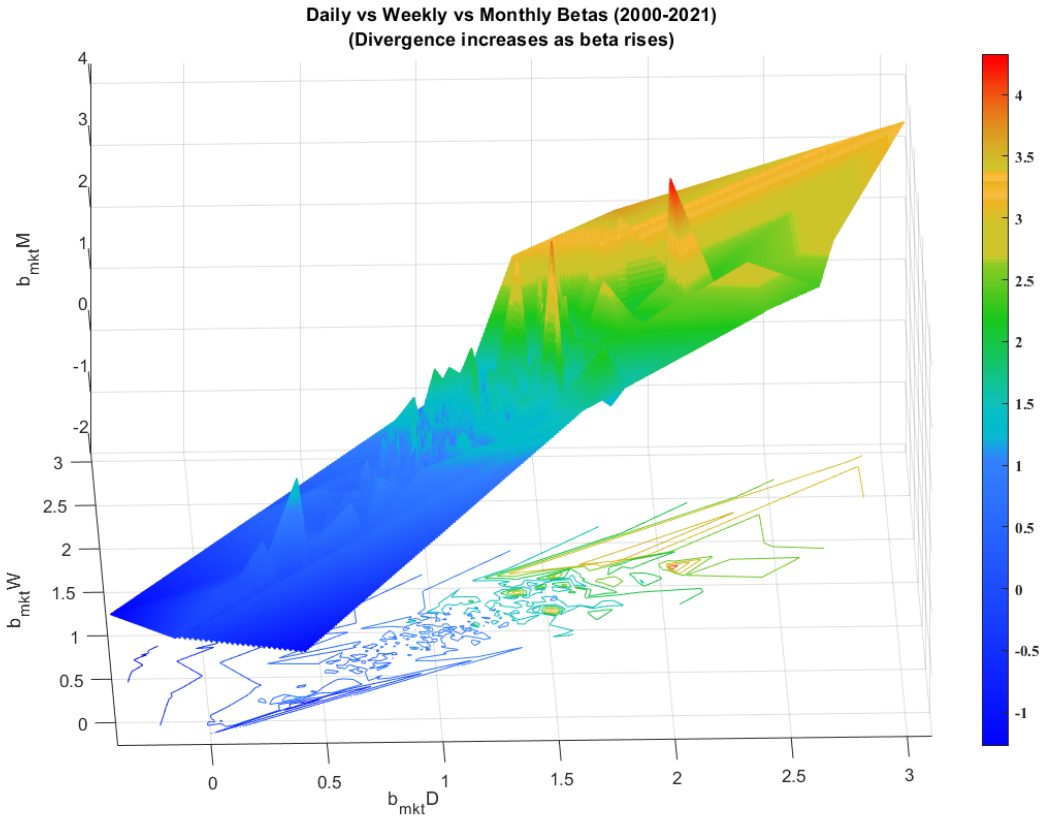

Figure 2. Surface plot of betas derived from daily, weekly and monthly returns (2000−2021).

The frequency of returns does seem to impact the estimated beta values and the 1-period forward return tracking errors. In Figure 3, we observe that of the three types of betas, the one using the weekly return frequency has, for most market capitalization groups, the lowest tracking error for 1-period forward returns (higher bars are better). The 'purple' colored bars are for the Large Cap stocks and have the highest occurrence of the lowest observed tracking errors, especially for the weekly return series and for the 3-, 4- and 5-year estimation period. The 1-year and 2-year window length estimation period yields the most unstable betas, particularly for the daily and monthly return frequencies (lowest occurrence of low TE's). The 'maroon' colored bars are for Mid Cap stocks and have the highest occurrence of the lowest observed tracking errors for the daily return series (3 and 4 year) estimation periods. Figures A1 and A2, in the Appendix A provide a visual representation of the distribution of the three beta series and their overlap densities.

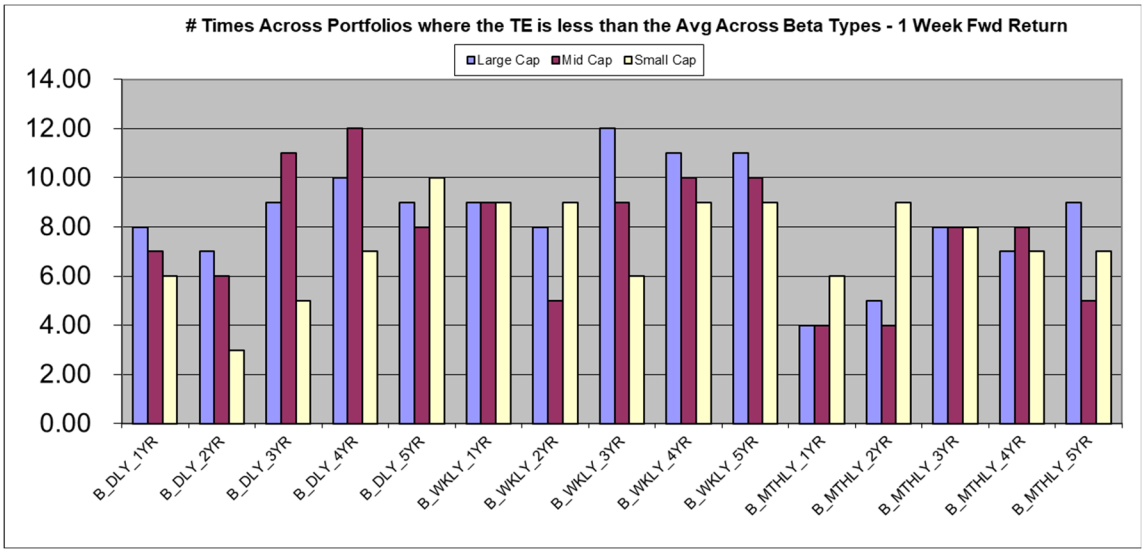

Figure 3. Weekly and daily betas have tracking errors mostly lower than monthly betas.

The primary driver for very short-term volatility is systematic risk, as most of the high frequency data pertains to market/economy wide events (Corhay 1992), while idiosyncratic risk is most likely to be triggered by low frequency events (Terraza and Roman 2021). For small-firms, the release of new information is at an even lower frequency. For short differencing intervals (daily), an overlap of the information set used to derive the beta estimates (captured at a higher frequency daily returns) with the return forecasting period, seems to yield better results (lower TE's) than cross-matched combinations (e.g., monthly forecast period vs. daily betas). Mantsios and Xanthopoulos (2016) also found a significant intervalling effect in the betas of stocks traded on the Athens Stock Exchange during their 2007–2012 economic crisis. Our study finds support for their work, and over a much longer period (2000–2021) in the US equity market.

"Wrong" or rather mismatched optimal windows of beta estimation would result in higher TE (tracking errors). Portfolio managers are likely to increase portfolio turnover with higher TE to reduce volatility with higher levels of trading, but suboptimal beta calibration for their forecast/holding period duration would mean that trading would not be effective. In a perfect world, the beta frequency and estimation window could be customized to observable portfolio holding periods and turnover ratios, to derive the lowest possible tracking errors. However, the turnover would be excessive; hence, we limit the beta frequencies to be D, W and M. We demonstrate that the TEs are higher with mismatched beta frequencies and windows and suggest additional work in the domain, in order to identify and develop mechanisms for PMs to align the beta frequencies/windows (for their risk reports) with their portfolio strategies and turnover.

5. Further Research

To identify and isolate any effect of market directionality on the relationship between interval type, window-length and subsequent period TE, this analysis could be divided into conditional dual periods based on the up and down markets (Pettengill et al. 1995; Cooper 2009).

A. Some preliminary work indicates that, in down markets, it appears that weekly betas accomplish lower TE's than daily betas. It would be interesting to explore this further, though we do think that the increased volatility witnessed during down-markets may have an association with this observation and that the use of daily betas during bear markets may be too unstable for next day forecasting (Alexeev et al. 2016). With r_i and r_{mD} as the excess returns to security i and down market excess returns, respectively, where r_m is the full market excess return, then the downside dual beta (Chong 2022) is:

$$\beta^- = \frac{Cov(r_i, r_{mD} | r_{mD} < r_m)}{Var(r_{mD} | r_{mD} < r_m)}$$

The upside dual beta would be of a similar construct but with the inequalities reversed.

B. Given the extensive amount of computational time it took to analyze the time series of returns in their various permutations and combinations, additional work could be undertaken to design an appropriate and efficient scanning mechanism to identify the optimal combinations of interval, window-lengths and the beta-size dimension.

C. The impact of varying intervals and window-lengths on the one-period ahead predictability of systematic risk can alternatively (to the tracking error, TE) be assessed by the Information Coefficient (IC); stable and robust betas will likely result in higher IC's, but the formal assessment could be a future research item (Appendix B).

6. Conclusions

In this paper, we have empirically considered whether the standard 60-month window length for calculating CAPM betas for portfolios is optimal for all trading interval lengths. Considering the condensed output of 540 cells (of portfolios TE's) from this study, over the period 2000 to 2021 (three rectangular matrices of 180 cells), we find that forecast interval lengths matched to daily or weekly return-based betas are more likely to lead to the lowest tracking errors. When considering the plurality of options for all types of market capitalizations (large, mid and small), the weekly return frequency performs best in producing the lowest TE for 1-period forward returns. Large Cap stocks have the highest occurrence of the lowest observed tracking errors, especially for the weekly return series. The 1-year and 2-year window length estimation period yields the most unstable betas, particularly for the daily and monthly return frequencies (they have the lowest occurrence of low TE's). Mid Cap stocks have the lowest tracking errors associated with daily or weekly intervals and estimation window lengths of four and five years. Thus, while there is no optimal combination, the analysis leans towards shorter return intervals (daily or weekly but not monthly) *and* longer estimation periods (four or five years of returns). This combination can be very intense on computing time, but is nothing compared to the scale of crypto mining and blockchain authentication (Lei et al. 2021; Verhoeven et al. 2018). Results indicate that the generally witnessed practice of utilizing monthly interval betas (over a 60-month estimation period) to estimate next day or next week portfolio returns, or to control for portfolio risk in a market-neutral setting, may not be optimal and is likely a vestige of legacy issues that are no longer relevant (in an era of cloud computing, high frequency data, machine readable data and AI). Agrrawal (2009) demonstrated that pricing data for new firms could be programmatically harvested from the web much before they get archived in a machine-readable format from the larger data providers (WRDS 2022).

A non-overlapping series of betas will result in a more robust tracking error estimation resulting from a matching interval frequency with the forecast period, eventually resulting

in greater portfolio stability (less churn, less portfolio turnover and fewer expenses, the benefits of which will eventually percolate to the investor). Given the advent of HFT strategies and also high-volume IPOs, many newly floated companies just do not have 60 months of inception-to-date pricing data. As such, a shorter estimation window but higher frequency (e.g., 18 months of weekly return-based betas, instead of 5-year monthly return-based betas), would still meet the Central Limit Theorem caveats and have sufficient return observations to have usable betas for portfolio risk estimation. Stable and robust betas can result in higher IC's (information coefficients) and is demonstrated in the Appendix A. That is also a future research item.

Considering the findings herein, and given how common it is for industry participants to consider CAPM betas for portfolio risk estimation, we think that additional research is needed to understand how the interplay between interval frequency and estimation period length impacts the CAPM betas and the resulting tracking errors for investment portfolios. In the age of Fintech and cloud computing, the market participants do not have to have their portfolio risk calibrated by a metric that has mostly served well, but was derived over fifty years ago (Sharpe 1964; Lintner 1965; Black 1972).

Appendix A

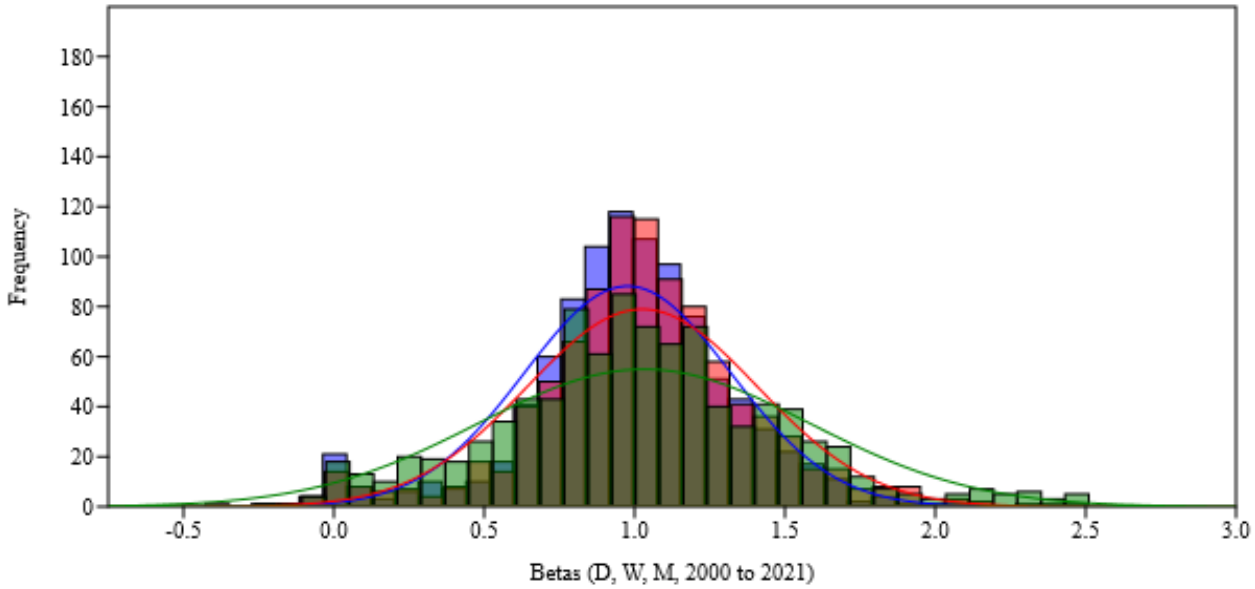

Figure A1. Histograms of betas (daily, weekly and monthly return series, 2000–2021).

The monthly betas have the relatively largest variance (flattest histogram, in green hue), while the daily betas have the lowest variance (blue histogram). A total of 99% of betas are in the [−1, +3] range. Conducting the Jarque-Bera test (Jarque and Bera 1980) for

normality $JB = \frac{n}{6}\left(S^2 + \frac{1}{4}(K-3)^2\right)$, indicates that the daily betas have more of a normal approximation than the monthly betas.

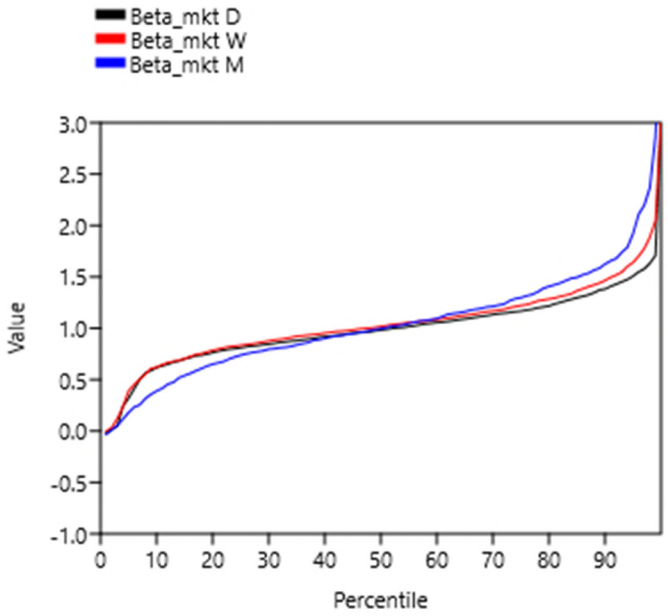

Figure A2. Percentile plot of betas (daily, weekly and monthly return series, 2000−2021).

The percentile plot or CDF (cumulative density function) for the three beta estimates are shown here. The monthly betas (blue CDF line) have a distinct separation from the daily and weekly beta CDFs. This is also observed in the histograms and from the Jarque-Bera test. Percentiles associated with the beta levels can be read directly off the X-Y point of intersection.

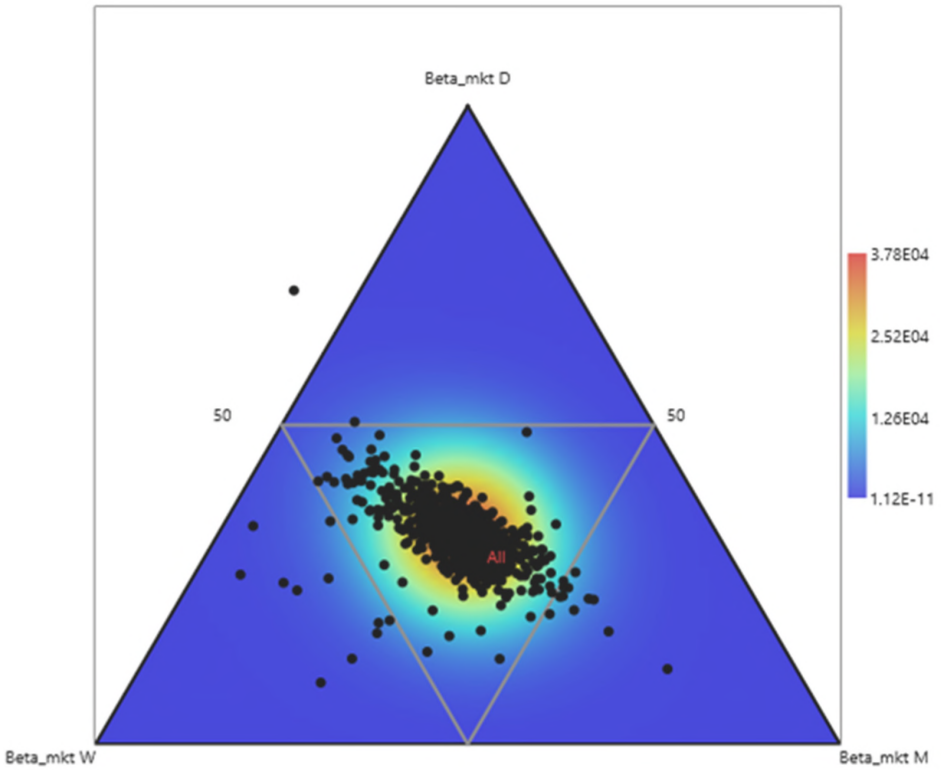

Figure A3. Ternary density plot of betas (daily, weekly and monthly return series, 2000–2021).

We utilize this plot to visually observe that while the three types of beta estimates are clustered with each other, there is a higher level of scatter for the weekly and monthly betas.

Appendix B

To capture the varying of the interval effect, Ho and Tsay, 2001 deployed the following three functional forms. Furthermore, there are varying values of n with a lower bound of zero. Cohen et al. (1983a) find that $n = 0.08$ produces the best linear fit for the power function.

The negative "n" form is essentially the inverse of the interval length (L):

$$f(L) = L^{-n}$$

and the logarithmic form:

$$f(L) = \ln\left(1 + L^{-n}\right) \text{ and } n > 0$$

and the exponential function form:

$$f(L) = e^{-L^n}$$

The above methodology (Ho and Tsay 2001), provides the distribution of betas with varying interval lengths and window-lengths of estimation.

To obtain the Spearman cross-correlations of the individual security betas for each interval length, the following will populate a symmetric triangular $\eta \times \lambda$ (where $\eta = \lambda$ return periods in the interval) matrix with all diagonal elements equaling 1.

$$\begin{bmatrix} 1 & & & - & - \\ & 1 & & & - \\ & & 1 & & \\ & \rho_S\left({\beta_i}^{L\eta}, {\beta_i}^{L\lambda}\right) & & 1 & \\ - & & & & 1 \end{bmatrix}_{\eta x \lambda} \quad \forall \eta,\ \lambda = 1, \ldots 45$$

If the betas are close to one and significant, it would be indicative of a weak intervalling impact on the ranking of betas across varying interval lengths.

The impact of varying intervals and window-lengths on the one-period ahead predictability of systematic risk can alternatively (to the tracking error, TE) be assessed by the Information Coefficient (IC); stable and robust betas will likely result in higher IC's, but a formal assessment could be a future research item.

$$\text{IC}_\text{s} = \rho_S\left({\beta_{i,t}}^{L\eta}, {r_{i,t+1}}^{L\lambda}\right)$$

where:

$$\text{For each market state } s \equiv \begin{Bmatrix} Rm > Rf \\ Rm < Rf \end{Bmatrix}$$

$\eta,\ \lambda = 1, \ldots 45$ and $\eta = \lambda$ for each T and where $t \subset T$,
t is a discrete period $1 \ldots N$ within each interval length of size T,
r_{it} is the return on each security at time t within each interval T, and
IC is the information coefficient.

Notes

1 Advent of firms such as BARRA, Berkeley, 1975 and Vestek Systems, San Francisco, 1983.

2 Does not equate with lower total risk (volatility).

3 The inverse relationship between interval length and average beta values, especially for smaller sized firms is intriguing. Perhaps there is an implicit tradeoff between a downward bias in the estimated beta and its ability to correctly provide an estimate for next period systematic risk. The idiosyncratic component of risk for small capitalization stocks is generally higher than for large

capitalization stocks, thus it is not surprising that a longer estimation interval would smooth out the variability (influential residuals canceling each other out) resulting in a reduction in the downward bias reported by Corhay (1992). It may be possible that there is information decay and loss with the increase in the estimation interval.

4 To keep the computational implications reasonable (each pass data file would be about 10 MB, with 1000 × 252 rows for just a 1 year run, with a moving window depending on the interval length), our interval length iterations have 1, 5 and 21 trading days corresponding to D, W and M return frequencies. Our window lengths vary from 1 through 5 years. While most of current literature uses a 60 monthly period window, the only other length we observe is the use of the full period for which data is available. This also meets the minimum lower bound of 30 based on the Central Limit Theorem.

5 TE is the standard deviation of the difference between the realized and CAPM based forecast return vector.

6 We are operating within the Russell 1000 universe in a long time series dimension, hence three fractiles for Large, Mid and Small capitalization groups are formed.

7 p-value < 0.10 for all cells in Table 1 (A, B, C)

8 Across Row 1, in the 3 × 3 Classification matrix.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Ann Bulkley

15. Refer to the Bulkley Direct Testimony, page 47, lines 20-21 and page 48, lines 1-2.

    a. Provide whether the final cost of equity results incorporated any explicit adjustments for other factors such as credit risk or size. If such adjustments were incorporated identify the adjustments and provide the size and basis for the adjustments

    b. Provide whether adjustment factors were considered in identifying a recommended ROE in addition to flotation costs. If so, explain the adjustment factors.

Response:

a. As discussed on page 2, lines 12-16 of Ms. Bulkley's Direct Testimony, Ms. Bulkley considered the relative business and financial risk of the Company as compared to the proxy group. Specifically, Ms. Bulkley evaluated the relative business and financial risk by considering the following factors: (1) capital expenditures; (2) timely cost recovery through cost recovery mechanisms; (3) flotation costs; and (4) leverage in the capital structure. However, Ms. Bulkley did not apply an "explicit" adjustment to her recommended ROE for any of the factors considered. Instead, as discussed on page 2, lines 16-18 of Ms. Bulkley's Direct Testimony, Ms. Bulkley considered the cumulative of effect of each of the factors when determining where her recommended ROE would fall within the range results produced by the constant growth DCF, CAPM and ECAPM analyses using her proxy group.

b. Please see the response to part a above.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Ann Bulkley

16. Refer to the Bulkley Direct Testimony, Exhibit AEB-3. The projected earnings per share (EPS) growth rate values from Zacks shows 'n/a' for multiple proxy group companies. Confirm that these unavailable values were not supplemented in the Average Projected EPS Growth Rate calculation, and rather this calculation relied only on the available EPS data from Value Line and S&P Capital IQ for these companies. If not confirmed, explain.

Response:

Confirmed. For the companies included in Ms. Bulkley's proxy group where the projected EPS growth rate from Zacks was listed as "n/a", the average projected EPS growth rate was based on the projected EPS growth rates provided by Value Line and S&P Capital IQ Pro.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Robert Prendergast

17. Refer to the Direct Testimony of Robert Prendergast (Prendergast Direct Testimony), page 13, line 6. Explain the 6.5 percent increase applied to Purchased Power especially since Kentucky Utilities Company (KU) has filed for a rate increase.[2]

Response:

Please refer to response to KAW_R_PSCDR2_NUM005_070725.

[2] Case No. 2025-00113, *Electronic Application of Kentucky Utilities Company for an Adjustment of its Electric Rates and Approval of Certain Regulatory and Accounting Treatments* (May 30, 2025).

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Michael Adams

18. Refer to the Direct Testimony of Michael Adams (Adams Direct Testimony) page 4, lines 21-22 through page 5, lines 1-2; and page 8, lines 19-23 through page 9, lines 1-2. Explain why the comparison to electric company filings is appropriate when analyzing a water service company. As part of this response, include a list of the electric utilities evaluated, the number of customers and the service territory, and an explanation of the difference between the information provided in the list on page 14 of the report.

Response:

The comparison to electric company's filings is appropriate because the filings provide a reliable source of publicly available data which is FERC Form 60. FERC Form 60 is filed by service company affiliates of utility holding companies. There is no publicly available source of data about service companies that provide services to only water utilities.
The use of electric companies as referenced in page 8, lines 19–23 through page 9, lines 1–2 of the testimony is appropriate. This is because regulated electric companies are required to file FERC Form 1, which is a reliable source of data to determine the customer account services expenses (per customer) for these companies.

Utility	State of Operation	Total Retail Electric Customers
Ameren Illinois Company	Illinois	1,226,027
Appalachian Power Company	West Virginia	965,517
Cleveland Electric Illuminating Company	Ohio	756,673
Commonwealth Edison Company	Illinois	4,130,538
Dayton Power and Light Company	Ohio	539,127
Empire District Electric Company	Missouri	183,990
Duke Energy Indiana, LLC	Indiana	894,160
Duke Energy Kentucky, Inc.	Kentucky	151,127
Duke Energy Ohio, Inc.	Ohio	752,909
Indiana Michigan Power Company	Indiana	610,647
Indianapolis Power & Light Company	Indiana	523,395
Evergy Missouri West, Inc.	Missouri	343,879
Kentucky Power Company	Kentucky	162,742
Kentucky Utilities Company	Kentucky	569,612
Kingsport Power Company	Tennessee	49,139
Louisville Gas and Electric Company	Kentucky	434,120
MidAmerican Energy Company	Illinois	820,668
Monongahela Power Company	West Virginia	396,728
Northern Indiana Public Service Company	Indiana	487,079
Ohio Edison Company	Ohio	1,069,766
Ohio Power Company	Ohio	1,523,794
Potomac Edison Company	West Virginia	441,657
Southern Indiana Gas and Electric Company	Indiana	155,182
Toledo Edison Company	Ohio	315,061
Union Electric Company	Missouri	1,254,162
Virginia Electric and Power Company	Virginia	2,752,726
Wheeling Power Company	West Virginia	41,401

The table above lists the electric utilities which Kentucky American Water Company ("KAWC") customers account services expenses were compared with.

The list included in the table on page 14 of the report lists all the utility holding companies whose affiliates provide retail service and whose service companies filed a FERC Form 60 for the calendar year 2023. This list was developed to compare KAWC's A&G cost per customer charged by the American Water Works Service Company, with the A&G cost per customer charged by the other service companies.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Michael Adams

19. Refer to Adams Direct Testimony, page 8, lines 2-3. Provide the supporting documentation or basis for the conclusory statement therein, that "Outside service providers generally bill for every hour worked."

Response:

For profit service providers typically provide services based upon the firm's current hourly billing rates. If a service is not provided on a fixed price basis, the provider would most likely bill all time expended on a project at the individual's actual billing rates, including overtime.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Michael Adams

20. Refer to Adams Direct Testimony, Report, Table 7. Identify the water companies that are investor-owned utilities. If none of them are, explain why these utilities were considered comparable to Kentucky-American.

Response:

None of the water companies listed in Table 7 of the report are investor-owned water companies. In Kentucky, there are only 5[1] investor-owned water companies which does not provide a large enough sample size against which KAWC costs/per customer can be compared. Consequently, non-investor owned water companies serving customers in Kentucky were considered for inclusion in the proxy group. The companies were considered comparable to KAWC because, similar to KAWC, the companies serve customers within the same jurisdiction as KAWC and would be subject to similar regulatory oversight as KAWC. Further, only water companies with a total number of customers of 6,000 or more were considered.

---

[1] KY Public Service Commission - Utility Type Summary

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Michael Adams

21. Refer to Adams Direct Testimony, Report, Table 25.

    a. Identify the percentage of calls attributed to with American Water Works Company (American Water) that are related to Kentucky-American's service or related to Kentucky-American.

    b. Identify the inputs for the percentage attributed to American Water's average calls per customers.

Response:

a. In 2024, 4% of calls American Water received were related to Kentucky-American.
b. Please see the chart below, the Clearing and National calls were allocated between all affiliates. As such, 55,911 calls out of the 1,354,222 calls received in 2024 were related to Kentucky-American or allocated from the clearing and national buckets based on KAWC's proportion share.

Company	Calls Answered
Clearing	8,919
National	54,327
Kentucky	51,046
Total	1,354,222

COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Dominic DeGrazia

22. Refer to the Direct Testimony of Dominic Degrazia, (Degrazia Direct Testimony), Exhibit DD-3. Provide the workpapers used to create Exhibit DD-3 in Excel spreadsheet format with all formulas, columns, and rows unprotected and fully accessible.

Response:

Please refer to KAW_R_PSCDR2_NUM022_070725_Attachment.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Dominic DeGrazia

23. Refer to the Degrazia Direct Testimony, page 18, lines 19-21. Provide the support for a two-year regulatory expense amortization period as opposed to a three-year regulatory expense amortization period.

Response:

The Company is requesting a two-year amortization timeframe to align with the amount of time since its last rate case filing.

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2025-00122
COMMISSION STAFF'S SECOND REQUEST FOR INFORMATION

Witness: Dominic DeGrazia

24. Kentucky-American has filed a joint application with American Water, Nexus Regulated Utilities, LLC (Nexus), and Water Service Company of Kentucky, Inc. (Water Service) (collectively, Joint Applicants) in Case No. 2025-00171,[3] for approval of (1) Nexus's sale of its equity and ownership interest in Water Service to American Water; (2) American Water's acquisition of Nexus's equity and ownership interest in Water Service; and (3) the merger of Water Service into Kentucky-American and Kentucky-American's assumption of all Water Service's assets, rights and obligations, including its water systems in Bell and Clinton Counties, Kentucky.

a. Explain how the proposed merger will affect the proposed rates in Kentucky-American's application.

b. If the proposed merger is approved by the Commission, explain whether the current Water Service Kentucky customers will be subject to the proposed rates in this application.

c. If the rates proposed in this application will not be affected by the proposed merger, describe the timeframe in which Kentucky-American expects the current Water Service customers to fall under Kentucky-American's tariff rates.

Response:

a. The proposed transaction currently before the Commission in Case No. 2025-00171 has no impact on the proposed rates in Kentucky-American's rate case application 2025-00122.

b. If the proposed merger is approved by the Commission, current Water Service Kentucky customers will not be subject to the proposed rates in this application. Kentucky American plans for the Water Service Kentucky customers to fall under Kentucky-American's base rates in Kentucky-American's next rate case proceeding, the timing of which has not been determined.

c. Please refer to the response to part b.
