ELECTRONIC APPLICATION O CLARK ENRGY COOPERATIVE FOR A GENERAL ADJUSTMEN RATES PURSUANT TO 807 KAR	E, INC. T OF)))	CASE NO. 2025-00230	
VERIFICATION OF BILLY O'BRIAN FRASURE				
COMMONWEALTH OF KENTUCKY COUNTY OF CLARK))			

Billy O'Brian Frasure, Vice President of Finance and Office Services of Clark Energy Cooperative, Inc. being duly sworn, states that he has supervised the preparation of the updated response to Commission Staff's First Request for Information in the above-referenced case and that the matters and things set forth therein are true and accurate to the best of his knowledge, information and belief, formed after reasonable inquiry.

Billy O'Brian Frasure

The foregoing Verification was signed, acknowledged and sworn to before me this the 2nd day of October 2025, by Billy O'Brian Frasure.

Notary ID: KYNP 21860

Commission expiration:

Commission Staff's First Request for Information

Request 2: Refer to Wolfram Direct Testimony, Exhibit JW-6 at 1. Confirm the Residential

Time of Use rate serves 1 customer. If not confirmed, provide the correct number of customers.

Response 2: Confirmed. Please see the Application, Exhibit 33, Direct Testimony of John

Wolfram at 5.

October 1, 2025, Update:

During the preparation of the Comments in this proceeding, Clark Energy became aware that its

response to Commission Staff's First Request for Information, Item 2 appeared incorrect. Clark

Energy realized it was not logical that one residential member would have recorded the usage

levels in the report that was generated for the Time-of-Use Rate.

To obtain an accurate count on the Time-of-Use Rate, Clark Energy had to review different reports

than had been used for usage and revenue totals. Upon reviewing these reports, the usage reported

was correct, however, the number of residential members taking service on the Time-of-Use Rate

was incorrect. The correct number of residential members that were billed under this rate was 69.

It is important to note that the usage and revenue amounts contained in Clark Energy's Cost of

Service Study are accurate. Only the number of customers was incorrect. It is also important to

note that although the original report used indicated there was one residential customer taking

service under this rate schedule, there should have been zero customers listed. This rate is not the

primary rate for any members. The primary rate for each of the 69 members that have usage under

this rate is the residential rate R. The Time-of-Use is for members that participated in an old DSM

offering where special meters were installed specifically for an Electric Thermal Storage (ETS)

heating system, and at the time of installation was considered energy efficient. The Time-of-Use

usage is a reading derived from those meters. Customers receive a discounted rate for the usage

registered on Time-of-Use meters, which is only for the use of the installed ETS heating system.
