Major Water Projects

Provide details about each major water project which is planned but has not yet been submitted for approval to the Public Service commission.

For the limited purpose of this report, a "Major Project" is defined as one which is not in the ordinary course of business, and will increase your current utilityplant by at least 20 percent.

Brief Project Description: (improvement, replacement,building construction, expansion. If expansion, provide the estimated number of new customers):

This project will include the replacement of approximately 9,000LF of 8" and 4" problematic PVC water main, and the interior blasting and painting of the existing Barbersville, Concord and Hickory Ridge Tanks. Also included will be the replacement of 1,600 existing out-dated meters with new radio read meters. The pump stations located at Concord, Blue Licks and Office will all be replaced wand the Concord station will have a new RTU. The aged East Union pump station will be removed from service as the new Concord BPS will make it expendable. Approximately 1,600LF of 4" water main will be installed to get new service to the prospective customers on the west side of the new US 68 highway. Miscellaneous items such as a new portable generator and a limited number of new copper setters will also be included.

Projected Costs and Funding Sources/Amounts:

1,925,000 Funding Agencies - RD and Cleaner Water

Approval Status: (Application for financial assistance filed, but not approved; or application approved, but have not advertised for construction bids)

Location: (community, area or nearby roads)

Barbersville, Concord, Hickory Ridge
