Sharon,

As a follow up to your request below, please see my notes below for this year. The comments are like last year's response. Please let me know if you have any questions.

Thank you. Trevor

- Western Lewis does not have physical gas storage facilities, but does have a storage contract with TC Energy on their TCO pipeline that Symmetry uses to balance the WL city gate meter
 - The storage contract is owned and maintained by the pipeline
- The attached storage is the activity month to month for the current contact year of April 2025-March 2026. (The March 2026 activity has not been finalized)
 - The report reflects the monthly injection and withdrawal activity, including the current pipeline storage charges for any activity
 - We track the running the running wacog (weighted average cost of gas) as we move through the year and that wacog is impacted by the monthly injection and withdrawals.
 - Ending wacog as of February 28th, 2026 was \$2.7983

Subject: Fw: Western Lewis Rectorville

Sharon. When do you need this? I'm out of office and limited access. I should be able to do something for you when I get home this weekend
