KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 3

1. DEFINITIONS APPLICABLE TO RULES & REGULATIONS

1.1 "Commission" means the Kentucky Public Service Commission.

1.2 "Company" shall mean the Kentucky-American Water Company acting through its officers, managers, or other duly authorized employees or agents.

1.3 "Customer" shall mean any person, firm, corporation, entity or municipality supplied with water service by Kentucky-American Water Company pursuant to these Rules and Regulations.

1.4 "Bona fide prospective customer" shall mean any owner or lessee who is to be the occupant of an existing developed premises having a curb line abutting on that part of a street or public highway in which there is, or is to be, located a distribution main of the Company, who shall file a signed application for a new street service connection and for water service to such premises to be occupied.

1.5 "Residential" – Sales to single premise residences, or to multiple premises residences where each premises is served through a single Meter. Sprinkler services added to existing premises coded as residential would also be coded as residential. For premises served through a single Meter with multiple owners, where usage is primary for residential purposes, and the water is billed to a homeowner association such as a condominium complex they will be classified as residential and charged the residential rate.

1.6 "Commercial" – Sales to multiple premises residences served through a single Meter or battery of Meters. This would include two (or more) family houses and apartment houses. Sales to private schools, colleges, hospitals, churches and other private educational, cultural, social or religious organizations. Sales to business or manufacturing establishments where the water is not used principally in manufacturing or processing functions. This would include commercial offices of public utilities. Examples under this category are: stores, laundries, cleaners, shoe repair and other service establishments, garages and service stations, office buildings, sales offices or manufacturing or processing establishments, retail florists, theaters, bowling alleys, swim clubs, golf courses, manufacturing or processing establishment where water is used principally for sanitary purposes, barber shops. Water used for irrigation for agricultural purposes would normally be coded as commercial. Sprinkler services added to existing premises coded as commercial or industrial would also be coded as commercial.

1.7 "Industrial" – Sales to manufacturing of processing establishments where the water is used principally in manufacturing or processing function. This would include public or private utility plants using water for steam generation, power production, etc.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 4

1.8 Other Public Authority or "OPA" – Sales to municipal, county, state or federal agencies (other than the sales of water for resale). Examples under this category are: city buildings, public schools, public housing developments, libraries and hospitals, fire stations, county, state and federal buildings and agencies.

1.9 Sales for Resale or "Resale" – Sales to private or public water utilities where the water is to be resold to customers of the utilities.

1.10 "Meter" means a device which measures and records the quantity of water supplied to a Customer.

1.11 "Company Service Line" means that portion of the water service line and appurtenances from the main to the Customer Service Line that is paid for and/or owned by the Company.

1.12 "Customer Service Line" means that portion of the water service line and appurtenances from the Customer's Premises to the Company Service Line, which is paid for and/or owned by the Customer. When the Meter is outside the Premises, the Customer Service Line is from the Meter pit to the Premises. When the Meter is inside the Premises, the Customer Service Line is from the stop box to the Premises.

1.13 "Premises" as contemplated in these Rules, shall mean and include:

1.13.1 A building under one roof and occupied as one business or residence; or

1.13.2 A combination of buildings owned or leased by one party in one common enclosure or a single tract of land not crossed by public streets, roads, or ways, and occupied by one family or business; or

1.13.3 a building owned or leased by one party, having two or more apartments, offices, or suites of offices, and using one or more halls and entrances in common; or

1.13.4 a double house having a solid vertical partition wall or a building erected as a single family residence served through one street service connection and subsequently converted into apartments or offices or a combination of such, and where separate water supply plumbing would not be practicable; or

1.13.5 each residential or business single occupancy unit, served through one street service connection in a building which is not a premise otherwise defined in these Rules.

1.13.6 any other location at which the Company provides metered service to a Customer in

accordance with these Rules regardless of whether there is a structure or building at that exact location.

1.14 “Fire Service Connection” is one to which is attached fixtures from which water is taken only for the extinguishment of fire.

1.15 "Public Fire Hydrant" - All public fire hydrants contracted for or ordered by Urban County, Municipality, County, State or Federal Agencies or Institutions. These must be located on or immediately adjacent to public right-of-way.

1.16 "Private Fire Hydrant" – All hydrants contracted for or by private entities on private property for the use of that entity or on private right-of-way. Also for public agencies for hydrants not located on public right-of-way.

1.17 “New Private Fire Hydrant Service” is available to areas before such time as a unit of government shall agree to pay public fire protection charges thereon in accordance with Rule 11 herein.

1.18 "Private Fire Service" – All private and public fire protection service lines with hose connections or sprinkler systems charged by line size.

1.19 “Temporary Service Connection” is one which is installed for the temporary use of water, including service to individual mobile homes. Provided: They are located on lots having a curb line abutting on that part of a street or public highway in which there is, or is to be, located a distribution main of the Company extending for at least one-half of the frontage of the lot on said street or highway.

1.20 “Rate” means the Company’s Schedules of Rates and Tariffs then in effect.

1.21 “Rules” or “Rule” means these Company Rules and Regulations applicable to water service.

2. SERVICE & APPLICATIONS

2.1 Rules and Regulations Governing Rendering of Service

(a) The Rules and Regulations in their entirety as hereinafter set forth or as they may hereafter be altered or amended in a regular and legal manner shall govern the rendering of water service and every Customer will be bound thereby. The Rules and Regulations and Service Classifications contained in this tariff apply in the service territory of Kentucky-American

Water Company.

(b) Except fire and some special connection services, all service will be rendered on a Meter basis. Residential, commercial, industrial and OPA service are only regularly available for single Premises as "Premises" is defined in these Rules.

2.2 Requests for Water Service

(a) All persons, entities, firms, corporations or OPA's desiring water service, must request service from the Company in a manner prescribed by the Company, setting forth all purposes for which water will be used at the Premises for which service is requested. All information provided by the Customer must be true, accurate and kept up to date.

(b) Any change in the identity of the Customer at a Premises will require a new request for water service and the Company may, after reasonable notice, discontinue the water supply until such new request has been made and accepted.

(c) A Customer who has requested service and been accepted by the Company, shall be held liable for all water service furnished to the Premises until such time as the Customer properly notifies the Company to discontinue the service for his/her account at the Premises.

(d) An activation fee will be charged in accordance with the Company's Tariff.

(e) No Customer receiving water service from the Company will be permitted to use water for any other purpose than that for which they shall have requested and the Company shall have approved.

(f) The Company may refuse service to a Customer with an outstanding, unpaid balance due until the Customer pays the balance due.

2.3 Special Arrangements for Water Service

(a) Water for building or construction purposes must be specially applied for.

(b) Connections for private fire service and private fire hydrant service must be specially applied for.

(c) Water for transient or temporary purposes must be specially applied for.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 7

3. BILLING, ABATEMENTS & REFUNDS

3.1 Abatements and Refunds

Abatement shall be made for leaks in service pipes or fixtures belonging to the Customer in accordance to Tariff.

3.2 Meter Bill Adjustment

(a) Whenever a Meter in service is found upon periodic request or complaint test to be more than two percent (2%) fast, additional tests shall be made at once to determine the average error of the Meter. Said tests shall be made in accordance with the Commission's regulation applicable to the type of Meter involved. Meter testing shall be conducted in accordance with the then-applicable Rules.

(b) Determination of Meter Error for Bill Adjustment Purposes. When upon periodic request or complaint test, a Meter is found to be in error in excess of the limits allowed by the Commission's regulations, three additional tests shall be made; one at 75% of rated maximum capacity; one at 50% of rated maximum capacity; one at 25% of rated maximum capacity. The average Meter error shall be the algebraic average of the errors of the three tests.

(c) If the result of tests on a Customer's Meter shows an average error greater than two percent (2%) fast, then the Customer's bill, for the period during which the Meter error is known to have existed, shall be recomputed and the account adjusted on the basis of the test. If the period during which the error existed cannot be determined with reasonable precision, the time period shall be estimated using the data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of a similar class of customers shall be used for comparison purposes in calculating the time period. (See exception in Section (f) of this Rule).

(d) If the result of tests on a Customer's Meter shows an average error greater than two percent (2%) slow, then the Customer's bill for the period during which the Meter error is known to have existed, may be recomputed and the account adjusted on the basis of the test. If the period during which the error existed cannot be determined with reasonable precision, the time period shall be estimated using the data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of a similar class of customers shall be used for

comparison purposes in calculating the time period. The Company will limit the period of recovery for under-billing to only the most recent twelve (12) months of under-billing, even if the under-billing occurred for a longer period.

(e) It shall be understood that when a Meter is found to have an error in excess of two percent (2%) fast or slow the figure for calculating the amount of refund or the amount to be collected by the Company shall be that percentage of error as determined by the test; i.e., it is the duty of the Company to maintain the accuracy of its measuring device as nearly one hundred percent (100%) as is commercially practicable. Therefore, percent error shall be that difference between one hundred percent (100%) and that amount of error as indicated by the test.

(f) The burden of maintaining measuring equipment so that it will register accurately is upon the Company; therefore, if Meters are found upon test to register fast and if time for periodic test has overrun to the extent that one-half (1/2) of the time elapsed since the last previous test exceeds twelve (12) months, the refund shall be as specified in Section C of this Rule and in addition thereto, a like refund for those months exceeding the periodic test period; provided, however, that the Commission may relieve the utility from this requirement in any particular case in which it is shown that the failure to make the periodic test was due to causes beyond the utility's control.

3.3 Terms and Conditions of Billing and Payment

(a) All fire service charges shall be payable monthly in arrears.

(b) Bills for water service by Meter will be rendered monthly with ending dates as may be determined by the Company.

(c) Bills for private fire hydrants shall be payable monthly in advance, except that the charges for private fire hydrant service shall be payable as set forth in Rule 11.

(d) Special charges shall be payable upon demand.

(e) All bills for water and service are due and payable when rendered and are considered delinquent if not paid in accordance with Tariff and Commission regulations. Failure to pay will render the Customer subject to disconnection and subject to payment of reconnection in Tariff. If any bill for water service is not paid in accordance with Tariff, the service may be discontinued in accordance with Rule 4, Disconnecting & Reconnecting Service.

(f) Customers are responsible for furnishing the Company with their correct billing

addresses (email or postal address). Failure to receive bills will not be considered an excuse for non-payment nor permit an extension of the date when the account would be considered delinquent.

(g) All bills will be sent to the billing address (email or postal address) provided when requesting water service unless the Company is notified in writing by the Customer of any change of billing address.

(h) The Company will not be bound by bills rendered under mistake of fact as to the quantity of service rendered.

(i) The use of water by the same Customer in different Premises or localities will not be combined.

(j) If for any reason service is discontinued before the expiration of twenty-five (25) days from commencement of service, a bill for a prorated portion of the minimum service charge for the month will be rendered.

(k) Residential Customers may elect to participate in a monthly budget billing payment plan. Under such a plan, Customers shall pay a fixed monthly amount determined by the Company based on historical or estimated usage. A Customer may enroll in such a plan at any time by contacting the Company. The Company will issue bills so as to bring each customer's account current once each 12-month period or through a series of levelized adjustments on a monthly basis if usage indicates that the account will not be current upon payment of the last monthly budget amount. If a Customer fails to pay bills as required under the plan, the Company reserves the right to remove the Customer from the plan, restore the customer to regular billing, and require immediate payment of any deficiency.

4. DISCONNECTING AND RECONNECTING SERVICE

4.1 Discontinuance of Water Service

(a) Water service will be discontinued to any Premises on account of temporary vacancy upon request of the Customer, without in any way affecting the agreement in force, and upon payment of all charges due as provided for in the Rates and Rules of the Company.

(b) The Company shall discontinue the Customer's service for violation of any Rule or for non-payment of bills upon providing the Customer with at least ten (10) days written notice

delivered by mail or personally delivered to him/her or a member of his/her household, advising the Customer of what Rule had been violated and for which service will be discontinued if violation continues. However, discontinuance of service shall be effected no less than twenty (20) days after the mailing date of the original bill unless, prior to discontinuance, a residential customer presents to the Company a written certificate, signed by a physician, registered nurse or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises. In that case, discontinuance may not be effected for thirty (30) days beyond the termination date as calculated above. Where fraudulent use of water is detected, or where the Company's regulating or measuring equipment has been tampered with, or where a dangerous condition is found to exist on the Customer's Premises, service may be shut off without advance notice. Subject to the foregoing provisions, service rendered under any application, contract or agreement may be discontinued by the Company for any of the following reasons:

i. For willful or indifferent waste of water due to any cause which adversely affects either water service to other Customers or the Company's utility operation.

ii. For failure to protect from injury or damage the Meter and connections, or for failure to protect and maintain the service pipe or fixtures on the property of the Customer, in a condition satisfactory to the Company.

iii. For interfering or tampering by the Customer, or others with the knowledge of the Customer, with any Meter, connection, service pipe, curb stop, seal or any other appliance of the Company controlling or regulating the Customer's water supply.

iv. For failure to provide the Company's employees free and reasonable access to the Premises or for obstructing the way of ingress to the Meter or other appliance of the Company controlling or regulating the Customer's water supply (with at least fifteen (15) days advance written notice).

v. For non-payment of any account for water supplied, for water service, or for Meter or service maintenance, or for any other fee or charge at the Premise accruing under these Rates and Rules. Discontinuation of service for non-payment on an account shall only be made at the Premise associated with that Account and will not occur for other accounts held by the same Customer that are current in payments unless the Customer has requested multiple accounts or premises be combined for billing purposes.

vi. In case of vacancy of the premises.

vii. For violation of any other Rule or Regulation of the Company or State and Municipal Rules and Regulations applying to the Company's water service.

(c) In cases where plumbing has been installed prior to adoption of and not in accordance with these Rules, and where water is being taken through a single service pipe to supply two or more Premises, the party making application shall be responsible for all water bills and other legitimate charges. Any violation of the Company Rules with reference to either or any of the said Premises or for the supply of water thereto, shall be deemed a violation as to all, and the Company may enforce compliance with these Rules by shutting off the entire service except that such action will not be taken until the innocent Customer who is not in violation of the Company's Rules, has been given a reasonable notice and opportunity to attach his pipes to a separately controlled curb stop, to be provided by and at the expense of the Company.

(d) Discontinuing the supply of water to a Premises for any such reason shall not prevent the

Company from pursuing any lawful remedy by action at law or otherwise for the collection of moneys due from the Customer.

4.2 Renewal of Water Service After Discontinuance

(a) When water service to a Premises has been terminated for any reason other than temporary vacancy, it will be renewed only after the conditions, circumstances or practices which caused the water service to be discontinued are corrected to the satisfaction of the Company, and upon payment of all charges due and payable by the Customer in accordance with the Rates and Rules.

(b) No Customer whose service has been turned off shall turn on same, or have same done by anyone other than the Company.

4.3 Reconnection Charge

When it has been necessary to discontinue water service to any Premises because of a violation of the Rules or on account of non-payment of any bill, a charge will be made to cover the expense as set forth in the Company's Schedule of Rates and Charges. This charge, together with any arrears that may be due the Company for charges against the Customer, must be paid before the water will be reconnected.

5. COMPLAINTS

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 12

5.1 Customer Complaints

Any complaint against the service or employees of the Company may be made at the office of the Company or by telephone, mail or email. The Company will handle all Complaints in accordance with regulatory requirements.

6. METERS, TESTING AND ACCURACY

6.1 Meters

(a) Water will be sold by Meter measurement only.

(b) All Meters, except private detector devices and/or private service line Meters, will be installed, maintained and replaced by, and at the expense of the Company, but in case of damage to such Meters by reason of any act, neglect or omission on the part of the Customer (such as damages occasioned by accident or misuse or purposeful actions) the Customer shall pay to the Company the cost of its repair on presentation of bill therefore.

(c) The Company reserves the right to determine the kind and size of Meter that shall be placed on any service pipe, and such Meters will be furnished, installed and removed by the Company alone, and shall remain its property.

(d) Each Premise shall be supplied through an independent Meter setting.

(e) If more than one Meter setting is installed upon a Customer's Premise, the usage of all Meters on a Premise may be combined for billing purposes if so requested by the Customer. Combined billing will be continued as long as the Premises criteria is met.

(f) All Meters are accurately tested before installation and are also periodically tested in accordance with the Public Service Commission's regulations. The Company may at any time remove any Meter for periodic tests or for repairs or replacement and may, at its option and expense, test any Meter when the Company has reason to believe that it is registering inaccurately.

(g) The Company shall make any test of any Meter upon written request of the Customer if the request is not made more frequently than once each twelve (12) months. The Customer shall be given the opportunity to be present at the requested test. The Customer may be billed the actual cost of making the test, but should the said Meter be found, upon said test, to be more than two percent incorrect to the prejudice of the Customer, the fee so charged shall be returned to the Customer.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 13

(h) The Company reserves the right to put seals on any water Meter, or on couplings in and for any premises, and may shut off the supply if such seals are found broken or removed.

(i) Once any Meter has been placed, any change in location requested by the Customer will be done by the Company, at the expense of the Customer, if the location is acceptable pursuant to 6.1(k).

(j) Monitoring of Customer usage shall be in compliance with the then-applicable Rules and Regulations. The Company monitors Customer usage on a monthly basis through its collection of usage information. Upon the collection of that information, the Company compares usage for a particular month with a Customer's historical usage. To the extent the current month's usage shows an unusual deviation from historical usage, the Company will notify the Customer and take steps to determine the reason for the unusual deviation.

(k) Meters may be located either in an outdoor Meter box or vault, at the option of the Company. The location of the Meter must be acceptable to the Company and allow for the Meter to be easily examined, tested, repaired, read, removed or replaced. The Meter box or vault shall be located in a convenient and readily accessible location acceptable to the Company. The Meter box or vault must be constructed to protect the Meter from freezing and damage by vehicular traffic, and its location and design shall prevent, as far as possible, the inflow of surface water. After a Meter is installed by the Company, a Customer shall not tamper with, alter, repair or remove the Meter or allow anyone other than the Company to do so. Any plumbing, piping, grading or structural modification which could result in the relocation of the Meter or impact accessibility must first be approved by the Company.

6.2 Accuracy Requirements of Water Meters

(a) General. All meters used for measuring the quantity of water delivered to a customer shall be in good mechanical condition and shall be adequate in size and design for the type of service which they measure.

(b) Determination of Accuracy. No new, rebuilt or repaired meter shall be placed in service if it registers outside the parameters established in the then-applicable Rules and Regulations.

(c) As Found Tests. All meters tested in accordance with the rules for periodic, request or complaint tests, shall be tested in the condition as found in the Customer's service prior to any alteration or adjustment in order to determine the average meter error.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 14

7. PROTECTION OF PUBLIC WATER SYSTEM

7.1 Intercepting and Storage Tanks

(a) Customer Service Lines shall not be connected to the suction side of pumps, unless approved by the Company. Customers who require a large quantity of water within a short period of time must have intercepting or intermediate storage tanks, pump discharge control valves, or other controls approved by the Company.

(b) The inlet connection for the tanks attached directly or indirectly to the Customer Service Line shall discharge at a point no less than two (2) times the diameter of the inlet pipe above the overflow of such tanks and must be approved by the Company.

7.2 Check Valves, Flush Valves and Vacuum Breakers

(a) Customers having boilers or hot water heating systems connected with mains of the Company must have a check valve in the supply pipe to the boilers and hot water heating systems, together with a relief valve at some point between the check valve and heating system. A vacuum valve should be installed, in accordance to applicable plumbing requirements, in the steam line to prevent collapse in case the water supply is interrupted. The Company, however, will not be responsible for accidents or damages resulting from the imperfect action or failure of said valves.

(b) Flush valve or direct flushing closets should not be installed in Premises where the service pipe supplying such Premises is connected to a main two inches or less in diameter. All flush valves shall be equipped with approved type vacuum breakers.

7.3 Plumbing Work Must Be Approved by Company

All plumbing work done in connection with pipe and fixtures connected with the Company's mains shall be submitted for the approval of the Company before such work is covered up. Whenever the Company determines that plumbing work is defective, the Company may require it be corrected before the water will be turned on.

7.4 Cross-Connections

(a) No cross-connection will be permitted unless an acceptable form of protection against contamination by backflow into the water distribution system is provided by a testable backflow prevention assembly. Acceptable forms of protection must comply with all applicable state and local requirements and approved by the Company. The required protective device or system shall be provided, installed and maintained by the Customer in good working condition, at the

Customer's expense, and shall be subject to testing and approval of the Company before being placed in service, and at such times thereafter as may be deemed necessary by the Company.

(b) Any cross-connection existing which is in violation of these Rules shall be immediately removed or corrected. Failure of the Customer to do so may result in immediate termination of water service in accordance with Rule 4.

8. RIGHTS AND RESPONSIBILITIES

8.1 Customers Requiring Uninterrupted Supply

(a) The Company will endeavor to give reasonable service but does not guarantee a sufficient or consistent pressure or an absolutely uninterrupted supply of water, and Customers are cautioned to provide sufficient storage of water where an absolutely uninterrupted supply must be assured, such as for steam boilers, domestic hot water systems, gas engines, etc.

(b) Fixtures or devices taking a supply of water directly from the service pipes, depending upon the hydraulic pressure of the pipe system of the Company for supplying same under working pressure, will do so at the risk of the parties making such attachments, as the Company will not be responsible for any accidents or damages to which such fixtures or devices are subject.

8.2 Interruptions in Water Supply

(a) The Company reserves the right at any time to shut off the water in the Mains without notice in case of accident or emergency, or for the purpose of making connections, extensions, improvements, alterations, repairs, changes, or for other proper business reasons, and may restrict the use of water to reserve a sufficient supply in its reservoirs for fire protection or other emergencies whenever the public welfare may so require in accordance with Commission Rules. Notwithstanding any other provision in these Rules or any contract or agreement between the Company and any Customer, when, in the judgment of the Company, sufficient supplies of water are not available to the Company, for any reason, to meet all existing and reasonably anticipated demands for service or to preserve and replenish its storage in amounts sufficient to provide fire protection on its system, the Company shall have the right to restrict, limit, curtail or interrupt water service to or water usage by any Customer or Customers.

(b) The temporary shutting off of water from any Premises for any cause, whether non-payment of bills, leaking pipes, fixtures, etc. shall not cancel a contract for water supply service except at the option of the Company or upon notice from the Customer.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 16

8.3 Liability of Company

(a) The Company shall not in any way or under any circumstances be held liable or responsible to any person or persons for any loss or damage from any excess or deficiency in the pressure, volume, or supply of water, due to any cause whatsoever. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in the service, but it cannot and does not guarantee that such will not occur.

(b) The Company will make every effort to maintain a pressure on the distribution system that is required for reasonable service and is compliant with federal and state requirements, but it does not guarantee to furnish at all times any given quantity for fire uses or for general purposes.

(c) The Company shall not be responsible for accidents or damages to boilers, hot water tanks, etc., resulting from the discontinuance of service, nor by reason of the breaking of any main, water pipe, fixture or appliance whether owned by the company or Customer, and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption of service. The Company will exercise every care in this matter, and in the event of the necessity of turning off water, every reasonable effort will be made to notify the Customer.

(d) The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise. The Company agrees to furnish such supply of water as shall then be available and not other or greater, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

8.4 Meters

No person shall turn the water on or off at any street valve, Company stop, curb stop or other street connection, or at meter setting or meter vault, or disconnect, remove or bypass any meter without the consent of the Company. The Company has the right to prosecute for any damage resulting from any unauthorized tampering with Company property.

8.4 Electrical Ground

No electric wires shall be grounded on the mains of the Company or on any Company Service Lines or pipes or fixtures of any kind which have a metallic connection with the mains of the Company. The Company has the right to prosecute for any damage resulting violation of this Rule.

Executive Director
EFFECTIVE
12/16/2025
PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

ISSUED BY: **/s/ Robert Burton**
Robert Burton
President
2300 Richmond Road, Lexington, KY 40502

Issued by authority of an Order of the Public Service Commission in Case No. 2025-00122 dated Dec. 16, 2025

8.5 Limitations on Resale of Water

Water furnished to any customer, except for a customer classified as a "Sales for Resale" customer, is for the customer's use only and such water shall not be resold by the customer to any other person, firm, or corporation on the customer's premises or for use on any other premise. This restriction, however, does not preclude a customer from allocating the Company's billing to the customer to any other person, firm, or corporation provided the sum of such allocations does not exceed the Company's billing.

9. CUSTOMER AND COMPANY SERVICE LINES

9.1 Company Service Lines

(a) Subject to Rule 10 on Main extensions and subject to the terms of any applicable Main extension agreement, the Company will install a Company Service Line provided that it is required for the immediate and continuous supply of water in order to furnish general water service, and that the Premise to be served abuts a street, highway or right-of-way in which a Main is located.

(b) The Customer shall install the Customer Service Line to a point approved by an authorized employee of the Company, after which the Company will have the Company Service Line installed from the Main to the Customer Service Line upon payment by the Customer of the tap fee. Where the Company Service Line is already installed, the Customer Service Line shall be connected to the Company Service Line at a point approved by an authorized employee of the Company.

(c) The Company Service Line shall be sized, furnished, installed, owned and maintained only by the Company and shall remain under its sole control. Only the Company may make connections to its Mains. Nothing may be attached to the Company Service Line except a Customer Service Line. The connection to the Company Service Line must be made by an authorized employee or agent of the Company, or a licensed plumber.

9.2 Customer Service Lines

(a) The Company will specify the location of the connection to the Customer Service Line. The Customer Service Line shall be installed, maintained, and/or owned by the Customer, at the Customer's expense and risk. The Customer Service Lines shall be installed in accordance with applicable plumbing requirements.

(b) Each Premise shall be served by no more than one Customer Service Line unless otherwise approved by the Company. Customer Service Lines supplying the Premises shall not pass through or across any other Premises. No water pipes or plumbing in any Premises shall be extended from

there to any other Premises.

When a Customer Service Line is relocated at the Customer's request, or when no associated relocation of the Company's Service Lines or other infrastructure is occurring, the Customer shall be responsible for the cost of such relocation. In instances where a Customer Service Line is required to be relocated due to roadway construction or other causes not within Company control, and the Company's Service Lines or other infrastructure is also being relocated, the Customer shall not be responsible for the cost of such relocation unless the Customer requests a specific location different than that specified by the Company.

A Customer's Service Line which is irregularly located because there was no Main abutting the Premises at the time such Customer Service Line was installed shall, at the Customer's expense, be relocated and connected to a new Company Service Line on the Main abutting the Premises when it becomes necessary for such Customer Service Line to be repaired or replaced.

(c) A Customer, occupant, owner, or any agent thereof is not authorized to attach the Customer Service Line to Company property or shut the water line on or off. If a Customer, occupant, owner, or any agent thereof does so, and in making an attachment or in shutting off or turning on water does not properly replace the curb box cap or Meter lid, or damages the curb stop, curb box, copper setter, or other property of the Company, repairs shall be made only by the Company, but at the Customer's expense. If a Customer, occupant, owner, or any agent thereof takes any unauthorized action described therein, the Company shall not be liable for any personal and property damage caused to Customer's property.

(d) The Customer Service Line and all connections and fixtures attached thereto shall be subject to the approval of the Company before water will be turned on. All Premises receiving a supply of water and all Company Service Lines and Meters and appurtenances, including any and all fixtures within the Premises, shall at all reasonable hours be subject to inspection by any duly authorized employee or agent of the Company.

(e) Only an authorized agent of the Company may turn water on and off in the meter box. In case of emergencies, licensed plumbers may turn water on and off if a shut off valve is not available in the Premise and must notify Company within 24 hours of doing so.

10. WATER MAIN EXTENSIONS

10.1 General Main Extensions Rules

(a) In estimating the cost of an extension, the estimate shall be based on the diameter of the pipe to be

used, provided, however, the estimated cost to the Customer or Customers shall not be based on a pipe diameter in excess of eight (8) inches, unless actual consumption estimated for the proposed Customer or Customers requires a larger pipe.

(b) No interest will be paid by the Company on the Applicant's payment or on any balances not refunded. At the expiration of said ten-year period, the refund account will be closed, and no further refunds will be made.

(c) Extensions made under this Rule shall be and remain the property of the Company.

(d) The Company reserves the right to further extend its water mains from and beyond the end of each Water Main Extension made under this Rule. The Applicant or the Applicant's agent paying for an extension shall not be entitled to any refund for the connecting of Customers to any further extension of mains installed.

(e) In determining the length of main extensions to be installed, the main shall be extended to fully cover the frontage of the property, and if the last lot to be served is a corner lot or a lot immediately adjacent to a corner lot, the terminal point of the extension made hereunder shall be located so that the main laid hereunder ties in with the existing main located in the intersecting street; and further provided that if there is no main located in the intersecting street, the terminal point of the extension made hereunder shall be located at the nearest street line of the intersecting street or to the edge of subdivision property, including common area.

10.2 Main Extensions for Other than in New Subdivisions

(a) For Free Extensions, the Company will, upon written request for Residential service by a prospective Residential Customer or a group of prospective Customers located in the same

neighborhood, make free of charge an extension necessary to give service, when the estimated total revenue, for a period of three (3) years from the prospective Customer or Customers is approximately equal to the cost of the extension; provided that the prospects are that the patronage or demand will be of such permanency as to warrant the capital expenditure involved.

(b) For Extension Above Limit, if the extension required in order to furnish general water service at any point within the corporate limits of the municipality or for any adjacent suburb of the municipality is greater than the cost of the free extension specified herein, such an extension will be made under the following conditions: the Company shall require a deposit of the cost of the extension above the free limit and will, in such case, for each additional Customer directly connected to the extension between its original beginning and original end within a period of ten

(10) years from the making of such extension, refund an amount equal to three times the estimated annual revenue of the new Customer, but at no time shall the aggregate refund made to any Customer exceed the original deposit of such Customer.

(c) The free extension or refund amount shall not be reduced below that applicable to fifty (50) feet of main per Customer. A prospective Customer is one who will connect to such main extension within the refund period after the date the water is turned on in the main; provided further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customer will take water service within the aforementioned refund period.

10.3 Main Extensions for New Subdivision

(a) Definitions

i. The term "new subdivision" as used herein shall mean any new subdivision of residential and/or commercial lots for which a preliminary or final plat has been approved by the local planning and zoning authority, and in which the owner thereof has the right, under the rules of said Authority, to construct streets, sidewalks, curbs and other improvements.

ii. The term "lot" as used herein shall mean any plot of ground laid out for building purposes, the front footage of which does not exceed one hundred feet. Should the frontage of any plot exceed one hundred feet, it shall, for the purposes of this Rule be considered as a single lot, if the average footage of all lots in the subdivision does not exceed one hundred feet. If the average frontage of all lots in the subdivision does exceed one hundred feet, the total number of lots in the subdivision shall be determined by dividing the total frontage of all the lots in the subdivision by one hundred feet.

iii. The term "on site facilities" as used herein shall include only those water mains and related facilities, if any, to be installed by Company and located within the boundaries of the new subdivision or part thereof as said boundaries are depicted on the preliminary (or final, if applicable) plat of such subdivision or part thereof approved by the local planning and zoning authority.

iv. The term "off-site facilities" as used herein shall include all water mains and related facilities, if any, to be installed by Company and located outside of the boundaries of said new subdivision as said boundaries are depicted on

the preliminary (or final, if applicable) plat of said subdivision as approved by the local planning and zoning authority, in order to deliver an adequate supply of water from existing mains of Company to such new subdivision.

v. The term "current estimated cost" as used herein shall mean that sum determined by Company as the estimated cost of installing one foot of water main, together with that sum determined by Company as the estimated cost of installing each type of appurtenant related facility based upon current materials costs, bids received, and other current project data. Such average cost per foot and such average cost per appurtenant facility shall be deemed to be the "current estimated cost" for such mains and facilities during the twelve month period immediately following such determinations, it being contemplated that the current estimated cost will be revised annually in order to keep same as current as practicable.

(b) Before water lines will be laid hereunder in any new subdivision, it is understood and agreed that the road surface shall be brought to the established sub-grade; and the developer or builder of such new subdivision shall furnish the Company with a right-of-way agreement suitable in form to the Company, unless the streets of the new subdivision have been dedicated to the public use.

(c) When an extension of Company's water distribution system into any new subdivision or part thereof as defined herein is requested by the owner of such subdivision, such extension will be made under the terms of a "New Subdivision Extension Deposit Agreement for Off Site Facilities" as hereinafter set forth in the Appendix, and/or a "New Subdivision Extension Deposit

Agreement for On Site Facilities" as hereinafter set forth in the Appendix, which Agreements shall be entered into upon the following basis:

i. Company shall have the exclusive right to determine the type, location and size of mains to be installed and of the related facilities required to render adequate service.

ii. The owner of the new subdivision may elect to develop it in sections or units and to have main extensions made into such sections or units from time to time as the same are ready for development and may elect further to have the entire subdivision considered as a whole for the purpose of making deposits and receiving refunds for off-site facilities under Company Rule No. 10. In such event, owners shall furnish Company with preliminary or final plats of the unit or units thereof to be initially developed, such plats to be

approved as hereinafter provided, such plats to be so furnished prior to the making of any extensions into said new Subdivision. As subsequent units of said subdivision are thereafter developed, preliminary or final plats so approved thereof shall be furnished to Company as hereinafter provided. Upon delivery to Company by the owner of such subdivision of four (4) copies of a preliminary or final plat of the subdivision or units thereof, duly approved by the Local planning and zoning authority, which plats shall depict the location and grade of all streets, sidewalks, building plots, building lines and utility easements contained therein, together with evidence of the owner's authority to construct streets, sidewalks, curbs and other improvements therein, Company shall prepare appropriate plans and specifications for the installation of necessary mains and related facilities to render adequate service therein, including where applicable, such off site facilities as deemed necessary and upon delivery to Company by the owner of such subdivision, any other information requested by the Company.

iii. Separate Extension Deposit Agreements, in the form provided in the Appendix, shall be entered into by the owner of the subdivision and Company for off-site facilities and for each separate unit in which on site facilities are requested, provided, moreover, that the ten (10) year refund period applicable in such agreements shall apply separately to each such transaction.

iv. When plans and specifications for installation of such mains and related facilities are completed, Company shall determine the presumed cost of construction and installation of such mains and related facilities which presumed cost shall be the aggregate of (1) the total number of feet of each size and grade of main required in such construction multiplied, respectively by Company's current estimated cost for each such size and grade of main, and (2) the total cost of installation of all related facilities required in such construction as determined by Company's current estimated cost for each of such facilities. In absence of actual cost data upon which to prepare a current estimated cost for any particular required related facility or size and grade of main, the presumed cost thereto shall be the best estimate of Company with respect to the cost of such mains or related facilities based on available information with respect to same. In

making such determinations of presumed cost of construction, Company shall separately compute the cost of installation and construction of on-site mains and facilities required and the cost of off-site mains and facilities required.

v. When such determination of presumed cost of on-site mains and facilities and presumed cost of off-site mains and facilities required has been completed, the sums to be deposited by the owner of such subdivision with Company under the terms of the "New Subdivision Extension Deposit Agreement for On Site Facilities" and the "New Subdivision Extension Deposit Agreement for Off Site Facilities" if applicable, shall be determined by Company and shall be (1) the total presumed cost of all on site mains and related facilities of the new subdivision or any part thereof to be constructed as determined as herein provided, and (2) (a) the presumed cost of ten (10) feet of off-site mains and facilities multiplied by the total number of building plots shown on and included within the whole of said new subdivision or (2) (b) the presumed cost of all required off site facilities, whichever be the smaller sum. The presumed cost per foot of off-site mains and facilities as used in this computation shall be determined by dividing the total presumed cost of all off site mains and related facilities by the total footage of such off site mains. In the event it is necessary to construct off site mains for a distance in feet greater than ten (10) times the number of building plots included within the whole of said subdivision as depicted on the initial submitted plat thereof, such excess off site extension will not be made under the "New Subdivision Extension Deposit Agreement for Off Site Facilities", but shall be made under an Extension Deposit Agreement as provided in the Appendix of these Rules.

vi. For each Premises served for which a street service connection shall be directly attached to such main extension between its original beginning or original terminus, excluding connections to further extensions or branches thereof, and crediting no more than one such service connection per building plot, Company shall refund to the owner of such subdivision under terms and provisions of New Subdivision Extension Deposit Agreements separately executed each for on-site and off-site improvements, amounts determined as follows:

a. For on-site facilities, the quotient obtained by dividing the total presumed cost of all on site mains and related facilities, determined as provided in Section (c) vi above for that part of the new subdivision then to be developed, by the total number of lots,

determined as provided in Section (a) ii herein, which will be served by the on-site facilities then to be developed and as shown

on the preliminary or final plat of the part of the subdivision to be developed.

b. For off-site facilities, the quotient obtained by dividing the deposit for off-site facilities, determined as provided in Section (c) iv above, by the total number of building plots shown on and included within the whole of said subdivision and shown on the preliminary or final plat of the whole subdivision delivered to Company as provided in Section (c) ii above.

vii. The owner of such subdivision, in consideration of an accelerated development of said subdivision to be obtained through Company's proceeding, on the basis of a preliminary plat, with its plans and specifications, and, at Company's option, with construction of its mains and facilities, shall, as a part of the New Subdivision Extension Deposit Agreements for both Off Site and On Site Facilities, warrant to Company that the location and grade of streets, curbs, sidewalks, building plots, building lines and utility easements as depicted on said preliminary plat will not be altered or changed in any respect in the final plat of said subdivision or part thereof, as finally approved by the local planning and zoning authority and recorded in the Office of the County Clerk. In the event the location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements be altered, amended or changed in the final plat or in an amended plat of said subdivision or part thereof as approved by said Authority or as recorded in the office of said Clerk, whether such changes are made with or without the consent of said subdivider, and in the event such alteration,

amendment or change requires, in the sole judgment of Company, the relocation, removal, replacement, reconstruction, change in site or additions to the mains and related facilities, the subdivider shall indemnify and hold harmless Company of and from any and all damages and costs of such removal, replacement, relocation, reconstruction and any all other expenses or costs relating to Company because of the change of location or grade of streets, curbs, sidewalks, lots, building lines or utility easements in said subdivision or part thereof.

(d) Company shall, upon written request of any owner of a new subdivision, with who a contract has

been entered into under these Rules, made within thirty (30) days after effective date of these Rules, re-execute such agreements under terms of these Rules.

11. PUBLIC AND PRIVATE FIRE SERVICE

11.1 Application for Private Fire Service

(a) The extent of the rights of the Customer for private fire service is to receive, but only at times of fire at the Premises served by the private fire service, such supply of water as shall then be available. The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fires, or to protect any persons or property against loss or damage by fire, or otherwise, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water failure to supply water or pressure, or for any other cause whatsoever.

(b) The applicant or its agent shall complete an "Application for Special Connection," which is available at the Company's offices. Service connections for water to be taken for the extinguishment of fire shall be made only upon the terms as provided for in the "Application for Special Connection," and then only after such application has been submitted by the Customer and approved in writing by the Company and the applicable Fire Department.

(c) A gate valve with post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the Company, and said valve and post indicator shall be furnished, installed and maintained by the Company at the expense of the Customer, and unless otherwise approved by the Company, said valve shall be installed which shall be furnished, installed and maintained by and at the expense of the Customer.

(d) The Company will make the connection to its mains at the cost and expense of the Customer, and the service connection from the main to the post indicator valve as described in Section 11.1 (c) will be furnished, installed, owned and maintained by the Company and at the cost and expense of the Customer.

(e) The entire private fire service system on the Customer's premises shall be installed by and at the expense of the Customer and shall be subject to the inspection, test and approval of the Company before the service is made effective, and at such time thereafter as may be deemed necessary by the Company.

(f) A private fire service connection is furnished for the sole purpose of supplying water for the testing of the system and the extinguishment of fires, and the use of water from such a connection for any other purpose is absolutely forbidden.

(g) Private fire protection service may at any time be furnished at the option of the Company through a line

guarded by an approved fire line meter or detector device which shall be furnished and installed by the Company at the expense of the Customer. The meter shall be set in an approved vault or chamber, properly drained and protected, located at a point as near as possible to the curb line, and said vault or chamber shall be constructed and maintained by the Company at the expense of the Customer. The private fire meter or private detector device will be maintained by the Company, but at the expense of the Customer.

(h) Hydrants and other fixtures connected with a private fire service connection may be sealed by the Company, and such seals shall be broken only in case of fire or as specially permitted by the Company, and the Customer must immediately notify the Company of the breaking of any such seal.

(i) No pipe or fixtures connected with a private fire service connection served by the Company shall be connected with pipes or fixtures supplied with water from any other source. An industry approved backflow prevention device reviewed by the Company must be installed on private fire service connections and such device must be tested annually thereafter.

(j) The entire private fire service connection and all parts of it which are located outside of the property line of the Customer and any meter or other indicating or controlling device and all parts and appurtenances thereof no matter where located shall be accessible and available in a safe manner to the Company at all times.

(k) The Company shall determine the size and location of any connections made to its mains for private fire service.

(l) The Customer shall furnish an accurate sketch or drawing showing the pipes, valves, hydrants, connections and appurtenances on the premises of the Customer and connected with the mains of the Company and also an accurate sketch of any other water pipe system and fixtures that may exist on the premises.

(m) Whenever a fire service system is to be tested under the regulations of the fire insurance underwriters, the Customer shall notify the Company of such proposed test, naming the day and hour when same is to be made, so that, if desired, the Company may have an inspector present during the test.

(n) All applications for private fire protection shall be subject to the written approval of the applicable Fire Department. It is the Customer's responsibility to obtain this approval.

(o) All subsequent owners of the property containing private fire service, assume all responsibilities under the original Application for Special Connection.

11.2 Terms and Conditions for New Private Fire Hydrant Service

(a) Applicants and Customers subject to this tariff are also subject to Rule 11.1(a), (b), and (f), which are

incorporated by reference as if set forth herein.

(b) The entire cost for labor, materials and other expenses incurred in installing the private fire hydrant connection, consisting of tapping the main and installing the hydrant branch and hydrant at a convenient point between the curb and property line, will be paid by the Applicant and any work done by the Company in connection therewith will be at the expense and risk of the Applicant.

(c) Advance payment of three years' private service rate in Service Classification No. 4 for each private fire hydrant by the applicant will be required at the time the contract is signed for private fire hydrant service.

(d) Water used for extinguishing fires will not be charged. Prompt notice of hydrant use is to be given to the Company in order that the installation may be inspected.

(e) Except for hydrants owned by private entities as set forth in their contract with the Company, title to the service connection and hydrant shall, upon completion of construction, become vested in the Company, which thereafter shall assume responsibility for maintenance. Regardless of ownership, all parts and appurtenances shall be accessible and available to the Company at all times.

(f) No private fire hydrant will be installed at a location where the normal flow from the hydrant is less than 500 gallons per minute with a 20 pounds per square inch residual pressure in the main serving the hydrant.

(g) After expiration of the initial three-year advance payment of the private service rate by the applicant, the applicant will continue to be responsible for charges for this service. The applicant may request the Company's consent to transfer responsibility for the private service rate to an entity in good standing in the state in which the entity was organized. Any such request must be approved by the applicant, the entity to which the responsibility is being transferred, and the Company in order to be effective.

(h) Failure to pay the private service rate shall be sufficient cause for discontinuance of water service after reasonable notice by the Company.

(i) The private service rate shall continue in effect until such time as a unit of government shall agree to pay public fire protection charges thereon.

11.3 Public Fire Hydrants

(a) No person, except for the legitimate purpose of extinguishing fires or for other purposes herein provided, shall open any fire hydrant without the consent of the Company.

(b) During freezing weather, the City or County shall notify the Company after it has opened any hydrant.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. 28

(c) Any expenses for repairs caused by the negligence of the employees of the municipality or by members of the fire department shall be paid for by the municipality.

(d) The use of fire hydrants will be restricted to the taking of water for the extinguishing of fires, and water shall not be taken from any fire hydrant for construction purposes, sprinkling streets, flushing trenches, sewers or gutters or for any other use, unless specifically permitted by the Company for the particular time and occasion.

(e) Inspections and tests of public fire hydrants will be made by the Company at convenient times and reasonable intervals.

(f) Whenever a change in location, size or type of a fire hydrant is ordered, requested, or made necessary due to change in line or grade of any roadway, curb or walk, said change will be made by the Company at the expense of the municipality or other party ordering, requesting, or making necessary such change.

(g) In the event that the City or County shall order in writing the installation of additional fire hydrants on existing mains having an internal diameter of six inches or larger, the Company will install such hydrants at its own cost and expense, provided that such mains are of adequate capacity to provide the required fire flows.

(h) Where pipe line installations are required to carry out a written order of the City or County to install fire hydrants, or where existing mains, in the opinion of the Company, are inadequate to provide required fire flows to such hydrants, and the City or County orders in writing the installation of a water main of adequate size to provide such flows to the hydrant or hydrants so ordered, the Company will install such mains and hydrants at its own cost and expense, provided that the estimated cost of the extension does not exceed the estimated total revenue for a period of three (3) years from such hydrant or hydrants and from prospective Customers who will connect to such main within thirty (30) days after the date that water is turned into the main; and provided, further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customers will take water service at their premises within thirty (30) days after the date that water is turned into the main. If the estimated cost of the proposed extension and hydrants required in order to furnish fire service exceeds three (3) times the Company's estimate of immediate annual revenue, such extensions will be made under the following conditions: the Company may require a deposit in the amount by which the cost of the extension, including the cost of hydrants which might be connected thereto, exceeds three (3) times the annual revenue estimated to be received from the hydrant and prospective Customers and will, in such case, for each additional Customer directly connected to the extension between its original beginning and original end with a period of ten (10) years from the making of such extension, refund an amount equal to three (3) times the estimated revenue of the new Customer, but at no time shall the aggregate refund made exceed the original deposit.

CLASSIFICATION OF SERVICE
SERVICE CLASSIFICATION NO. 4

Applicable
Applicable to the entire Service Territory of Kentucky-American Water Company unless otherwise noted.

Availability of Service
Available for municipal or private fire connections used exclusively for fire protection purposes.

Rates for Public Fire Service

		Rate Per Month	Rate per Annum
(I)	For each public fire hydrant contracted for or ordered by Urban County, County, State or Federal Governmental Agencies or Institutions.	$75.00	$900.00

Rates for Private Service

(I)	For each private fire hydrant contracted for by Industries or Private Institutions.	$120.00	$1,440.00

Fire service connections are furnished for the sole purpose of supplying water for the extinguishment of fires. If the Company has reason to believe water is being used for other purposes, including that the connection or line is leaking, the Company may install a meter to monitor usage, and, in addition, to the rates for fire protection listed above, all usage shall be billed at the Commercial rate in Service Classification No. 1. The applicable Service Charge listed In Service Classification No. 1 shall also be charged.
The charges under this provision are in addition to any general water service charges.

Special Provisions
A few hydrants are connected to mains by a "special connection." A "special connection" exists when a customer and the Company entered into a service contract in which the customer agreed to maintain an unmetered water line from a Company main to the customer's service line. If the Company has reason to believe water from a special connection is being used for purposes other than fire protection, including that the connection or line is leaking, the Company may install a meter and charge for usage under this tariff. The Company may require the customer to pay for the meter and its installation if:

(1) the Company gives the customer written notice of the usage problem, requests that the customer correct the problem, and informs the customer that failure to correct the problem within 90 days could

CLASSIFICATION OF SERVICE
SERVICE CLASSIFICATION NO. 5

Applicable

Applicable to the entire Service Territory of Kentucky-American Water Company.

Availability of Service

Available for Water Used for Construction, Street Washing, Pool Filling, and Similar Purposes.

Rates

Where a meter is installed on a fire hydrant or on a temporary service connection for construction, street washing, pool filling, and similar purposes, the minimum payment for water shall be the monthly service charge for general water service, payable in advance based upon the size of the meter installed. If more than one fire hydrant or temporary service connection is used, the service charge is to apply to each such hydrant or temporary service connection so used.

The Company may require an application to be signed and either the service charge paid in advance or, at the option of the Company, a meter deposit made, and the account handled in the same manner as any other metered account. This service charge will not entitle the Customer to any water and all water used shall be billed at the meter rate schedule. In addition to such charges the Customer shall pay all reasonable costs incurred in connection with the installation and removal of the meter.

Applicable

Applicable to all customers in the Service Territory of Kentucky-American Water Company.

Availability of Service

Available for Residential, Commercial, Industrial, Other Public Authority and Sales for Resale customers.

Rates

There shall be added to the Customer's bill, as a separate item, an amount equal to the proportionate part of any license, occupation, franchise, fee or other similar fee, charge or tax now or hereafter imposed upon the Company by local taxing authorities or the Kentucky River Authority, whether imposed by ordinance, franchise, statute or otherwise, and which fee, tax or charge is based upon Kentucky River water usage or a percentage of the gross receipts, net receipts, or revenues from sales of water or services rendered by the Company to the customer. Where more than one such charge, fee or tax is imposed, the total of such charges, fees or taxes applicable to a Customer may be billed to the customer as a single amount. Charges, fees or taxes herein referred to shall in all instances be billed to customers on the basis of Company rates or usage effective at the time of billing, and on the basis of the tax rate of usage effective at the time billing is made.

There shall be added to the Customer's bill, as a separate item, an amount equal to the proportionate amount of school tax in any county requiring a utility gross receipts license tax for schools under KRS 160.613.

There shall also be added to the Customer's bill, as a separate item, any fee, tax or charge imposed upon the customer by a municipality or governmental agency, the purpose of which is to allocate among those customers identified by ordinance, franchise, statute, or otherwise, the cost of fire hydrants imposed upon the municipality or governmental agency. Failure to pay this charge shall not constitute grounds for termination of service.

P.S.C. KY NO. 11
Original Sheet No. 37.1

CLASSIFICATION OF SERVICE
PFAS LITIGATION UNIVERSAL SURCREDIT ("PLUS")

APPLICABILITY

Applicable to the entire Service Territory of Kentucky-American Water Company.

Kentucky-American Water Company sought compensation from various manufacturers of chemicals of Aqueous Film Forming Foam. This litigation was consolidated for the limited purpose of pursuing settlements into multi-district litigation No. 2873 ("MDL") which are overseen by the United States District Court for the District of South Carolina. Kentucky-American Water Company has entered into multiple settlements in the MDL and may enter into further agreements. These settlements may provide one or more payments. The proceeds will be net of any costs to be paid out of the settlement funds incurred to administer or achieve the settlement. The purpose of this tariff is to credit Kentucky-American Water Company customers the proceeds Kentucky-American Water Company receives from these MDL settlements.

The proceeds from the MDL shall be credited to customers as a one-time credit within a reasonable time after Kentucky-American Water Company receives payment of the funds. Kentucky-American Water Company shall provide notice to the Commission of the amount of proceed included and a workpaper showing the determination of the credit as outlined below. Kentucky-American Water Company may combine proceeds resulting from the MDL settlement.

Determination of the Credit

The litigation or settlement proceed credit shall be calculated as follows:

$$\text{PLUS Credit} = \frac{\text{MDL Proceeds}}{\text{Total Water Customer Count}} \quad \text{or} \quad \text{PLUS Credit} = \frac{(MDLP)}{CC}$$

Where:

PLUS Credit	Represents the proceeds credit each customer will receive as a result of proceeds paid from MDL settlements.
MDLP	Represents the proceeds received from the one or more MDL settlements.
CC	Total active water customer counts, inclusive of all customer classes at the time of credit calculation.

P.S.C. KY NO. 11
Original Sheet No. 44

SERVICE CLASSIFICATION NO. 6
SERVICE LINE LEAK ADJUSTMENT RATE

Applicable
Applicable to entire Service Territory of Kentucky-American Water Company.

Availability of Service
Available for Residential, Commercial and OPA customers.

Rates
A charge of twenty-five (25) percent of the applicable tariff will be applied to all water usage determined to be the result of a service line leak.

Terms and Conditions
A service line leak is defined as a leak in the customer service line between the meter and the premises. Service line leak adjustments will be granted to residential, commercial, and OPA customers. The customer must provide a plumber's statement or list of materials showing that the leak has been repaired. After verification of repairs by the Water Company, the bill will be adjusted by comparing the usage during the leak billing period to the average usage for the past six billing periods. A reasonable estimate will be used in cases when six prior periods of information do not exist. The excess usage will be billed at the rate specified above. During the lifetime of a water service line only two leak adjustments will be permitted. Each adjustment may cover a maximum of two billing periods. Before a third adjustment can be considered, the entire water service line from the meter box to the premises must be replaced. Plastic pipe for repair of underground water service lines must be certified to withstand a working pressure of 160 pounds per square inch or greater.

SERVICES

Go Paperless: Save time. Save money. Sign up for **Paperless Billing** and **Auto Pay** on My Account at amwater.com/myaccount. Not registered? Log in and be sure to have your account number handy.

Water Quality: We take water quality seriously. When it comes to complying with federal drinking water standards, we consistently score better than the industry average. For a copy of the annual water quality report for your area, visit kentuckyamwater.com. Under Water Quality, select Water Quality Reports.

H20 Help To Others: This program helps low-income customers who qualify with their water bills. For more information, visit kentuckyamwater.com. Under Customer Service & Billing, select Low Income Program.

EXPLANATION OF OTHER TERMS

Payment by Check: Paying by check authorizes American Water to send the information from your check electronically to your bank for payment. The transaction will appear on your bank statement. The physical check will not be presented to your financial institution or returned to you.

Estimated Bill: This occurs when we are unable to read the water meter. Your usage from the same billing period the prior year is used to calculate the estimated bill. The next actual meter reading corrects any over or under estimates.

Disputes: If you have questions or complaints about your bill, please call us at 1-800-678-6301 before the due date. If your bill is unusually high, it may indicate that there is a leak in your plumbing. For tips on how to detect leaks and use water wisely, visit us online. You'll find helpful tools under the Water Information menu. Every drop counts!

Rates: A detailed listing of charges that make up your bill is available upon request by contacting Customer Service or visiting us online at kentuckyamwater.com. Under Customer Service & Billing, select Your Water Rates.

Correspondence: Please send written correspondence to PO Box 578, Alton, IL 62002-0578. Be sure to include your name, account number, service address, mailing address and phone number including area code. Please do not send correspondence with your payment, as it may delay processing your payment and correspondence.

Understanding Your Bill

The information below defines some of the new terms you may find on your bill:

- **Service Related Charges:** This section includes charges for services related to water, wastewater and fire protection.
- **Fees and Adjustments:** This section provides details related to additional charges or adjustments for the service period referenced. Fees, when applicable, would include items such as service activation and late payment charges. Additionally, any credit or debits related to billing corrections would be found in this section.
- **Pass Through Charges:** Charges in this section, when applicable, are separated from other service related charges to provide visibility into what portion of your bill is being remitted to other entities. Payment received for these charges does not remain with American Water. While we may bill and collect for them, the payments received are passed along to other companies and agencies.
- **Billing Units:** One billing unit equals 100 gallons of water used. If the meter serving your property measures your water use in cubic feet or a different unit of measure, we convert the usage to gallons to make it easier to understand.
- **Average Daily Use:** The gallons shown in the water droplet above represent your average daily water use for the current billing period. Tracking the amount of water you use can help you manage your overall water use from month to month.
- **Still have questions?** We are here to help. Our customer service representatives are available M–F, 7 a.m. to 7 p.m. More information on understanding your bill and charges can also be found on our website. See the link below.

For more information about your charges and rates, please visit: https://amwater.com/kyaw/customer-service-billing/your-water-and-wastewater-rates.

QUALIFIED INFRASTRUCTURE PROGRAM RIDER ("QIP RIDER") (D)

APPLICABLE SERVICE AREA (D)

Applicable to the entire Service Territory of Kentucky American Water Company unless otherwise noted. (D) (D)

APPLICABILITY OF RIDER (D)

Applicable to Residential, Commercial, Industrial, Other Public Authority, Sales for Resale, Public and Private Fire Service and Hydrant customers. (D) (D)

CALCULATION OF QUALIFIED INFRASTRUCTURE PROGRAM RIDER REVENUE REQUIREMENT (D) (D)

The QIP rate base in any forecasted period will be calculated in a manner consistent with 807 KAR 5:001, Section 16(6)(c). The QIP Rider Revenue Requirement includes the following: (D) (D) (D)

a. QIP-eligible Plant In-Service not included in base water rates minus the associated QIP-related accumulated depreciation and accumulated deferred income taxes, grossed up by applying the gross revenue conversion factor authorized in the Company's latest base water rate case; (D) (D) (D) (D)
b. Retirement and removal of plant related to QIP-eligible construction; (D)
c. Return on the net QIP-eligible plant in-service at the overall rate of return on capital authorized in the Company's latest base water rate case, grossed up for federal and state income taxes; (D) (D) (D)
d. Depreciation expense on the QIP-eligible Plant In-Service less retirement and removals; (D)
e. Property taxes related to the QIP. (D)

QIP ELIGIBLE UTILITY PLANT: (D)

Distribution Infrastructure – distribution and transmission system structures and improvements, mains and valves installed as replacements for existing facilities; hydrants, distribution tanks; services, meters and meter installations, power generation and pumping equipment installed as replacements for existing facilities; (D) (D) (D)

unreimbursed funds related to capital projects to relocate facilities required by governmental infrastructure projects. (D)
Water Treatment Infrastructure – source of supply and water treatment structures, pipe and equipment including sampling equipment, SCADA equipment, power generation and pumping equipment installed as replacements for existing facilities. (D)

RATES (D)

All customers subject to this QIP Rider receiving water service shall be assessed a monthly QIP Rider charge in addition to the service charge, consumption charge or monthly fee component of their applicable rate schedule that will enable the Company to complete the Qualified Infrastructure Program. (D)

The QIP Rider will be updated annually in a filing that includes the (1) projected costs for each QIP period and (2) a balancing adjustment that trues up the projected program costs and revenues with the actuals for the preceding annual QIP period. The annual filing will be submitted at least 120 days prior to the commencement of the QIP period, which will commence on September 1 each year and run through August 31 of the subsequent year. (D)

The monthly QIP Rider charges for all respective water service classifications will be calculated as a percentage and applied to all water charges including meter fees, volumetric water sales, fire service fees, and public and private hydrant fees from the Company's most recent base rate case, but excluding any other surcharge or add-on taxes. The percentage is calculated by dividing the QIP revenue requirement by the water revenues authorized in the Company's most recent rate case and multiplying the resulting QIP period by the number of days the QIP percentage will be in effect, divided by 365 days (366 days in a leap year). It will be listed as a separate line item on the customer bill. The QIP percentage shall be calculated on an annual prospective basis. The QIP Rider charge effective on and after the effective date is: (D)

11.09% (D)

APPENDIX

Form of New Subdivision Extension Deposit Agreement for Off Site Facilities:

THIS AGREEMENT, entered into this _day of _____, _____by and between KENTUCKY AMERICAN WATER, a Kentucky corporation, having its office at 2300 Richmond Road, Lexington, Kentucky, hereinafter called "COMPANY", and _____, hereinafter called "SUBDIVIDER",

WITNESSETH:

THAT, WHEREAS, SUBDIVIDER is the present owner of a certain tract of land located within the service area of COMPANY, which tract is now being developed by SUBDIVIDER as a new subdivision or unit thereof (hereinafter called the subdivision), and

WHEREAS, the _____ Commission has heretofore approved a preliminary or final plat of said proposed subdivision, upon which plat the location and grade of streets, curbs, sidewalks, building plots, building lines and utility easements are depicted, a copy of which plat is annexed hereto and made a part hereof, marked Exhibit "B" for identification, and

WHEREAS, SUBDIVIDER desires the extension of the off site water mains and facilities of COMPANY on the site of said subdivision as hereinafter described,

NOW, THEREFORE, in consideration of the premises and the mutual covenants of the parties hereto as hereinafter set forth, it is hereby agreed by and between the parties hereto as follows, to-wit:

FIRST: COMPANY contracts and agrees to lay the water main(s) and other related facilities, if any, as shown in red on the plat attached hereto and made a part hereof, marked Exhibit "B" for identification, which main(s) and facilities, if any, are described and located as follows:

SECOND: It is expressly understood and agreed that if COMPANY shall be delayed or prevented from

installing the water main(s) and other related facilities, if any, hereinabove described because of its failure to secure pipe or other construction materials, or for any other causes beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than ninety (90) days from date of deposit, SUBDIVIDER shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to COMPANY, and thereafter both parties shall be relieved of all duties

and obligations arising hereunder. But this right to cancel and terminate by SUBDIVIDER shall not be invoked if COMPANY has received the construction material and SUBDIVIDER has made the deposit as hereinafter required, in which event COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: SUBDIVIDER hereby agrees to deposit with COMPANY, upon notice from COMPANY that it is prepared and able to go forward with the work provided in Paragraph FIRST hereof, the sum of _____, which sum is the presumed cost of installation of said off site main(s) and related facilities, if any, as determined under Section C(4) of Rule 10.3 of COMPANY'S Rules and Regulations. No adjustment in deposit will be made, either by way of adding to or reducing the deposit required hereunder, because of a variance between the presumed cost mentioned herein and the actual cost of installation of such main(s) and related facilities, if any.

FOURTH: SUBDIVIDER represents to and covenants with COMPANY that the number of residential and/or commercial building plots to be developed within the whole of said subdivision, as shown on the plat attached hereto as Exhibit "B", being a total of _____building plots, will not be decreased in the final plats of said subdivision as the same are hereafter recorded in the office of the Clerk of the Fayette County Court. Upon such representation and covenant, COMPANY hereby agrees to refund to SUBDIVIDER during the period of ten (10) years from the actual date of deposit, an amount equal to _____ of the total deposit made by SUBDIVIDER under the terms of Paragraph THIRD above, being the sum of _____, for each premises served within said subdivision (as said subdivision is depicted on the plat attached hereto and marked Exhibit "B" for identification) for which a street service connection shall be directly attached to the mains constructed on the site of such subdivision between their original beginning and original termini (not including, however, connections to further extensions or branches thereof, and being limited to one such service connection per building plot) and for which a bona fide residential or commercial customer has executed a service contract with COMPANY, provided, however, that the total amount returned shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said

FIRST: COMPANY contracts and agrees to lay the water main(s) and other related facilities, if any, as shown in red on the plat attached hereto and made a part hereof, marked Exhibit 'A' for identification, which main(s) and facilities, if any, are described and located as follows:

SECOND: It is expressly understood and agreed that if COMPANY shall be delayed or prevented from installing the water main(s) and other related facilities, if any, hereinabove described because of its failure to secure pipe or other construction materials, or for any other cause beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than ninety (90) days from date of deposit, SUBDIVIDER shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to COMPANY, and thereafter both parties shall be relieved of all duties and obligations arising hereunder. But this right to cancel and terminate by SUBDIVIDER shall not be invoked if COMPANY has received the construction material and SUBDIVIDER has made the deposit as hereinafter required, in which event COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: SUBDIVIDER hereby agrees to deposit with COMPANY, upon notice from COMPANY, that it is prepared and able to go forward with the work provided in Paragraph FIRST hereof, the sum of _____, which sum is the presumed cost of installation of said on-site mains and related facilities, if any, as determined under Section C(4) of Rule 10.3 of COMPANY'S Rules and Regulations. No adjustment in deposit will be made, either by way of adding to or reducing the deposit required hereunder, because of a variance between the presumed cost mentioned herein and the actual cost of installation of such main(s) and related facilities, if any.

FOURTH: SUBDIVIDER represents to and covenants with COMPANY that the number of residential and/or commercial building plots to be developed within said subdivision, as shown on the plat attached hereto as Exhibit "A", being a total of _____ building plots which, according to Section A(2) of Rule 10.3 of COMPANY's Rules and Regulations, is equal to _____ lots, will not be decreased in the final plat of said subdivision as the same is hereafter recorded in the office of the Clerk of the Fayette County Court. Upon such representation and covenant, COMPANY hereby agrees to refund to SUBDIVIDER, during the period of ten (10) years from the actual date of deposit, an amount equal to _____ of the total deposit made by SUBDIVIDER under the terms of Paragraph THIRD above, being the sum _____, for each premises served within said subdivision (as said subdivision is depicted on Exhibit "A" attached hereto) for which a street service connection shall be directly attached to the main extension herein provided between its original beginning and original terminus (not including, however, connections to further extensions or branches thereof, and being limited to one such service connection per

building plot) and for which a bona fide residential or commercial customer has executed a service contract with COMPANY, provided, however, that the total amount returned shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said ten (10) year period shall become the property of COMPANY.

FIFTH: SUBDIVIDER may request refunds under Paragraph FOURTH, once in each calendar quarter, furnishing COMPANY, at such time, a listing of premises claimed to be additional premises; however, failure on the part of SUBDIVIDER to make such request shall not constitute a waiver of any rights hereunder or relieve COMPANY of the obligation to make refunds with reasonable promptness.

SIXTH: As a material consideration for COMPANY'S agreement to design and construct all or some portion of the main(s) and related facilities, if any, described on Exhibit "A" and in Paragraph FIRST hereof on the basis of a preliminary plat of said subdivision, without withholding or delaying such action until a final plat thereof has been approved by the Planning and Zoning Commission and recorded in the office of the Clerk of the Fayette County Court, SUBDIVIDER represents to COMPANY and covenants with COMPANY that the location and grade of streets, sidewalks, curbs, building plots, building lines and utility easements as depicted on the preliminary plat attached hereto as Exhibit "A" will not be altered or changed in any respect in the final plat of said subdivision, as finally approved by the Lexington-Fayette County Planning and Zoning Commission and as recorded in the office of the Clerk of the Fayette County Court. In the event the location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements be altered, amended or changed in the final plat or in an amended plat of said subdivision as approved by said Commission or as recorded in the office of said Clerk, whether such changes are made with or without the consent of SUBDIVIDER, or in the event a final plat is not approved or recorded, and in event such alteration, amendment, change, failure of approval or of recording requires, in the sole judgment of COMPANY, the relocation, removal, replacement, reconstruction, change in size or addition to the main(s) and related facilities to be constructed by COMPANY pursuant to the Agreement, SUBDIVIDER will immediately, upon demand from COMPANY, pay to COMPANY the actual cost to COMPANY of making such relocations, removals, replacements, changes in sizes and additions to such main(s) and related facilities, if any, so required in the sole judgment of COMPANY, as a result of such changes in location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements. No part of the sums payable to COMPANY by SUBDIVIDER under the terms and provisions of this Paragraph SIXTH shall be subject to refund to SUBDIVIDER. In event SUBDIVIDER fails to pay to COMPANY such sums as may be demanded by COMPANY under provisions of this Paragraph SIXTH within ten (10) days from such demand, COMPANY shall have the right, in addition to and not in limitation of all other remedies, which right shall be superior to the rights of any intervening assignee or creditor of SUBDIVIDER, to apply refunds coming due under Paragraph FOURTH of the Agreement to the reduction and extinguishment of the debt of SUBDIVIDER to COMPANY under terms of this Paragraph SIXTH.

SEVENTH: By execution of this Agreement, SUBDIVIDER grants unto COMPANY, its successors and assigns, the permanent right and privilege to lay and construct its main(s) and related facilities, if any, on, over and through the lands of SUBDIVIDER at the locations depicted on Exhibit "A" and described in Paragraph FIRST above, together with the right to enter upon the adjacent lands of SUBDIVIDER for the purpose of installing,

construction, repairing, renewing, replacing and inspecting such main(s) and related facilities, if any.

EIGHTH: SUBDIVIDER will furnish to COMPANY immediately upon recordation thereof in the office of the Clerk of _____ five (5) copies of the final plat of said subdivision as approved by the _____.

NINTH: The ownership of the water main(s) laid hereunder shall at all times be in COMPANY, its successors and assigns.

TENTH: This Agreement shall be valid and binding on COMPANY only when executed by its Director of Engineering.

ELEVENTH: This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the respective parties.

TWELFTH: Any notice given hereunder shall be deemed sufficient if in writing and sent by registered mail to COMPANY at 2300 Richmond Road, Lexington, Kentucky and to SUBDIVIDER at _____.

THIRTEENTH: This Agreement is entered into pursuant to the legally established Rules and Regulations of COMPANY and the words, phrases and terms hereof are to be understood and interpreted in conformity with said Rules and Regulations, which are hereby incorporated herein by reference.

APPLICATION FOR SPECIAL CONNECTION

Account No.	
Contract No.	
WBS Element No.	

This Application, made in duplicate this _____day of _, 20 _____ _____, by _____,
hereinafter called the "APPLICANT", to KENTUCKY AMERICAN WATER, a Kentucky corporation located at 2300 Richmond Road, Lexington, Kentucky, 40502, hereinafter called the 'WATER COMPANY."

The APPLICANT, upon the terms and conditions hereinafter set forth, hereby applies to the WATER COMPANY for a private service, consisting of the right to connect a service pipe to a _____ public water main on in Lexington and attach to said service pipe the following fixtures and openings:

One (1) _____-inch fire service to _____ supply ; one _____-inch service line, post indicator and valve with all related fittings to supply a sprinkler system of approximately _____ sprinkler heads, covering approximately _____ square feet of _____ space;

all of which fixtures and openings to be located within or upon the premise of the APPLICANT abutting the street on which the said main of the WATER COMPANY is located.

In consideration for which privilege the APPLICANT agrees to be bound by all the terms and conditions of this Application and pay the WATER COMPANY for private fire protection service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this Application may be accepted by the WATER COMPANY are as follows:

FIRST: That this Application and the acceptance thereof by the WATER COMPANY may be subject to the prior approval of the fire department having jurisdiction of the premises to be served.

SECOND: That the entire service system on APPLICANT's premises shall be subject to the inspection, test and approval of the WATER COMPANY, and the WATER COMPANY by its representatives, shall have the right to enter the premises of the APPLICANT at any reasonable time for the purpose of making such reasonable inspections as it may deem necessary, and to insure compliance with the terms and conditions of this Application.

THIRD: That all pipes and appurtenances shall be constructed and maintained in good condition by and at the expense of the APPLICANT.

FOURTH: That a fire line meter or detector device, approved by both the WATER COMPANY and the fire underwriters, will be required on the service at a location approved by the WATER COMPANY. Such meter or device shall be installed and maintained by and at the cost and expense of the APPLICANT, but subject to the inspection and approval of the WATER COMPANY. The bypass meter only, used with the detector device, shall be furnished, installed and maintained by the WATER COMPANY at its cost and expense.

FIFTH: That a gate valve with the post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the WATER COMPANY, and shall be furnished, installed and maintained by and at the expense of the APPLICANT, and unless otherwise approved by the WATER COMPANY, said valve shall be installed in a valve pit or vault which shall also be furnished, installed and maintained by and at the expense of the APPLICANT.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 11
Original Sheet No. A-11

SIXTH: That all hydrants and other fixtures connected to any private fire protection service system shall be kept closed and sealed, and not opened or used except during times of fire or testing. Upon extinguishment of each fire or following each test, the APPLICANT shall immediately close such fixtures and notify the WATER COMPANY so that they may be sealed. Whenever a private fire protection service system is to be tested, the APPLICANT shall notify the WATER COMPANY at least two business days in advance of such proposed test, requesting approval of the method, day and hour on which it is to be made.

SEVENTH: That no antifreeze or any other substance not specifically approved by the Environmental Protection Agency as non-detrimental to the public water supply, shall be introduced into sprinkling systems or into any pipe, fixture, appurtenance or other portion of the APPLICANT's private fire protection service system.

EIGHTH: That the APPLICANT understands and agrees that the extent of the rights of the APPLICANT under this Application is to receive, at times of fire on said premises, such supply of water as shall then be available and no other or greater quantity. The APPLICANT further acknowledges and agrees the WATER COMPANY shall not be considered in any way or manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and the WATER COMPANY shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

NINTH: That this Application does not contemplate uses of fixtures other than those shown on Exhibit A. Any waste of water or use of water through this connection for purposes other than testing or the extinguishment of fire, shall be deemed a violation of the terms and conditions of this Application and of the rules, regulations and conditions of service of the WATER COMPANY.

TENTH: That if private fire hydrants are included as part of this Application, they shall be painted any color other than that adopted by the WATER COMPANY for public fire hydrants.

ELEVENTH: That the APPLICANT shall furnish, attach and make a part hereof marked Exhibit A, three (3) complete sets of drawings showing the pipes, pumps, valves, hydrants, sprinkler systems, hose outlets and connections, standpipes, tanks and other openings and appurtenances contemplated in this Application. Such drawings, which shall be stamped "Approved" by the Insurance Services Office or other comparable agency approved by the WATER COMPANY, must also show all other water supply systems and pipelines and appurtenances which are proposed or which may exist on the premises to be served.

TWELFTH: That no pipe, fixture or appurtenance connected with the private fire protection service served by this Application shall be connected with any pipe, fixture or appurtenance supplied with water from any other source, unless specifically approved in writing by the WATER COMPANY.

THIRTEENTH: That the APPLICANT agrees to obtain in writing in advance the approval of the WATER COMPANY for any change, alteration, addition or deletion contemplated in the pipes, fixtures, openings and appurtenances and uses herein specified. Notwithstanding the approval of the WATER COMPANY, APPLICANT agrees that, except for those facilities which the WATER COMPANY had specifically agreed to provide and maintain, APPLICANT is and will be solely responsible for the design, adequacy, function and maintenance of its private fire protection service system referred to in this Application.

FOURTEENTH: That the WATER COMPANY has the right to discontinue or disconnect the service pipe herein applied for, and to terminate service under this Application, after due written notice to the APPLICANT, for failure to pay any bill when due, for failure to supply information to WATER COMPANY about the service system when so requested in writing, for leakage within APPLICANT's system, for violation of any of the terms and conditions of this Application, or for any violation of its rules, regulations and conditions of service; and the WATER COMPANY also has the right to shut off all or any part of its facilities by the WATER COMPANY(1) if a condition dangerous or hazardous to life, physical safety or property exists, (2) upon order by any court, the Public Service Commission or other duly authorized public authority, (3) if fraudulent or unauthorized use of water by APPLICANT is detected, or if the WATER COMPANY's regulating or measuring equipment has been tampered with by the APPLICANT.

FIFTEENTH: That upon acceptance of this Application by the WATER COMPANY and the completion of the installation of the service applied for, this Application shall be in full force and effect as a contract and shall continue as such until cancelled by written notice given thirty (30) days in advance by the APPLICANT to the WATER COMPANY, except as otherwise provided in numbered paragraph (14) above.

SIXTEENTH: The acceptance of this Application by the WATER COMPANY must be executed by its Director of Engineering before same

becomes effective.

SEVENTEENTH: If ownership of the property served by the service applied for herein changes, notice thereof shall be given to the WATER COMPANY within thirty (30) days and the new owner shall be identified by name, address and proper person to contact.

EIGHTEENTH: That the APPLICANT or his agent is responsible for payment of the deposit for the estimated cost of construction to WATER COMPANY. To the extent there is any refund to be made at the end of the project after all costs are accrued, such refund will be paid to the APPLICANT by check made payable to the APPLICANT. To the extent that any amount is owed to WATER COMPANY at the end of the project after all costs are accrued, payment of such amounts is the responsibility of the APPLICANT. To the extent the APPLICANT owes any of the refunded amount to the contractors, APPLICANT agrees it is responsible for these amounts owed and that WATER COMPANY has no responsibility in that regard.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 3

1. DEFINITIONS APPLICABLE TO RULES & REGULATIONS

1.1 "Commission" means the Kentucky Public Service Commission.

1.2 "Company" shall mean the Kentucky-American Water Company acting through its officers, managers, or other duly authorized employees or agents.

1.3 "Customer" shall mean any person, firm, corporation, entity or municipality supplied with water service by Kentucky-American Water Company pursuant to these Rules and Regulations.

1.4 "Bona fide prospective customer" shall mean any owner or lessee who is to be the occupant of an existing developed premises having a curb line abutting on that part of a street or public highway in which there is, or is to be, located a distribution main of the Company, who shall file a signed application for a new street service connection and for water service to such premises to be occupied.

1.5 "Residential" – Sales to single premise residences, or to multiple premises residences where each premises is served through a single Meter. Sprinkler services added to existing premises coded as residential would also be coded as residential. For premises served through a single Meter with multiple owners, where usage is primary for residential purposes, and the water is billed to a homeowner association such as a condominium complex they will be classified as residential and charged the residential rate.

1.6 "Commercial" – Sales to multiple premises residences served through a single Meter or battery of Meters. This would include two (or more) family houses and apartment houses. Sales to private schools, colleges, hospitals, churches and other private educational, cultural, social or religious organizations. Sales to business or manufacturing establishments where the water is not used principally in manufacturing or processing functions. This would include commercial offices of public utilities. Examples under this category are: stores, laundries, cleaners, shoe repair and other service establishments, garages and service stations, office buildings, sales offices or manufacturing or processing establishments, retail florists, theaters, bowling alleys, swim clubs, golf courses, manufacturing or processing establishment where water is used principally for sanitary purposes, barber shops. Water used for irrigation for agricultural purposes would normally be coded as commercial. Sprinkler services added to existing premises coded as commercial or industrial would also be coded as commercial.

1.7 "Industrial" – Sales to manufacturing of processing establishments where the water is used principally in manufacturing or processing function. This would include public or private utility plants using water for steam generation, power production, etc.

ISSUED: **May 15, 2026** **Approved:**
EFFECTIVE: **June 14, 2026**

ISSUED BY: **/s/ Robert Burton**
Robert Burton
President
2300 Richmond Road, Lexington, KY 40502

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 4

1.8 Other Public Authority or "OPA" – Sales to municipal, county, state or federal agencies (other than the sales of water for resale). Examples under this category are: city buildings, public schools, public housing developments, libraries and hospitals, fire stations, county, state and federal buildings and agencies.

1.9 Sales for Resale or "Resale" – Sales to private or public water utilities where the water is to be resold to customers of the utilities.

1.10 "Meter" means a device which measures and records the quantity of water supplied to a Customer.

1.11 "Company Service Line" means that portion of the water service line and appurtenances from the main to the Customer Service Line that is paid for and/or owned by the Company.

1.12 "Customer Service Line" means that portion of the water service line and appurtenances from the Customer's Premises to the Company Service Line, which is paid for and/or owned by the Customer. When the Meter is outside the Premises, the Customer Service Line is from the Meter pit to the Premises. When the Meter is inside the Premises, the Customer Service Line is from the stop box to the Premises.

1.13 "Premises" as contemplated in these Rules, shall mean and include:

1.13.1 A building under one roof and occupied as one business or residence; or

1.13.2 A combination of buildings owned or leased by one party in one common enclosure or a single tract of land not crossed by public streets, roads, or ways, and occupied by one family or business; or

1.13.3 a building owned or leased by one party, having two or more apartments, offices, or suites of offices, and using one or more halls and entrances in common; or

1.13.4 a double house having a solid vertical partition wall or a building erected as a single family residence served through one street service connection and subsequently converted into apartments or offices or a combination of such, and where separate water supply plumbing would not be practicable; or

1.13.5 each residential or business single occupancy unit, served through one street service connection in a building which is not a premise otherwise defined in these Rules.

1.13.6 any other location at which the Company provides metered service to a Customer in

accordance with these Rules regardless of whether there is a structure or building at that exact location.

1.14 “Fire Service Connection” is one to which is attached fixtures from which water is taken only for the extinguishment of fire.

1.15 "Public Fire Hydrant" - All public fire hydrants contracted for or ordered by Urban County, Municipality, County, State or Federal Agencies or Institutions. These must be located on or immediately adjacent to public right-of-way.

1.16 "Private Fire Hydrant" – All hydrants contracted for or by private entities on private property for the use of that entity or on private right-of-way. Also for public agencies for hydrants not located on public right-of-way.

1.17 “New Private Fire Hydrant Service” is available to areas before such time as a unit of government shall agree to pay public fire protection charges thereon in accordance with Rule 11 herein.

1.18 "Private Fire Service" – All private and public fire protection service lines with hose connections or sprinkler systems charged by line size.

1.19 “Temporary Service Connection” is one which is installed for the temporary use of water, including service to individual mobile homes. Provided: They are located on lots having a curb line abutting on that part of a street or public highway in which there is, or is to be, located a distribution main of the Company extending for at least one-half of the frontage of the lot on said street or highway.

1.20 “Rate” means the Company’s Schedules of Rates and Tariffs then in effect.

1.21 “Rules” or “Rule” means these Company Rules and Regulations applicable to water service.

2. SERVICE & APPLICATIONS

2.1 Rules and Regulations Governing Rendering of Service

(a) The Rules and Regulations in their entirety as hereinafter set forth or as they may hereafter be altered or amended in a regular and legal manner shall govern the rendering of water service and every Customer will be bound thereby. The Rules and Regulations and Service Classifications contained in this tariff apply in the service territory of Kentucky-American

Water Company.

(b) Except fire and some special connection services, all service will be rendered on a Meter basis. Residential, commercial, industrial and OPA service are only regularly available for single Premises as "Premises" is defined in these Rules.

2.2 Requests for Water Service

(a) All persons, entities, firms, corporations or OPA's desiring water service, must request service from the Company in a manner prescribed by the Company, setting forth all purposes for which water will be used at the Premises for which service is requested. All information provided by the Customer must be true, accurate and kept up to date.

(b) Any change in the identity of the Customer at a Premises will require a new request for water service and the Company may, after reasonable notice, discontinue the water supply until such new request has been made and accepted.

(c) A Customer who has requested service and been accepted by the Company, shall be held liable for all water service furnished to the Premises until such time as the Customer properly notifies the Company to discontinue the service for his/her account at the Premises.

(d) An activation fee will be charged in accordance with the Company's Tariff.

(e) No Customer receiving water service from the Company will be permitted to use water for any other purpose than that for which they shall have requested and the Company shall have approved.

(f) The Company may refuse service to a Customer with an outstanding, unpaid balance due until the Customer pays the balance due.

2.3 Special Arrangements for Water Service

(a) Water for building or construction purposes must be specially applied for.

(b) Connections for private fire service and private fire hydrant service must be specially applied for.

(c) Water for transient or temporary purposes must be specially applied for.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 7

3. BILLING, ABATEMENTS & REFUNDS

3.1 Abatements and Refunds

Abatement shall be made for leaks in service pipes or fixtures belonging to the Customer in accordance to Tariff.

3.2 Meter Bill Adjustment

(a) Whenever a Meter in service is found upon periodic request or complaint test to be more than two percent (2%) fast, additional tests shall be made at once to determine the average error of the Meter. Said tests shall be made in accordance with the Commission's regulation applicable to the type of Meter involved. Meter testing shall be conducted in accordance with the then-applicable Rules.

(b) Determination of Meter Error for Bill Adjustment Purposes. When upon periodic request or complaint test, a Meter is found to be in error in excess of the limits allowed by the Commission's regulations, three additional tests shall be made; one at 75% of rated maximum capacity; one at 50% of rated maximum capacity; one at 25% of rated maximum capacity. The average Meter error shall be the algebraic average of the errors of the three tests.

(c) If the result of tests on a Customer's Meter shows an average error greater than two percent (2%) fast, then the Customer's bill, for the period during which the Meter error is known to have existed, shall be recomputed and the account adjusted on the basis of the test. If the period during which the error existed cannot be determined with reasonable precision, the time period shall be estimated using the data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of a similar class of customers shall be used for comparison purposes in calculating the time period. (See exception in Section (f) of this Rule).

(d) If the result of tests on a Customer's Meter shows an average error greater than two percent (2%) slow, then the Customer's bill for the period during which the Meter error is known to have existed, may be recomputed and the account adjusted on the basis of the test. If the period during which the error existed cannot be determined with reasonable precision, the time period shall be estimated using the data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of a similar class of customers shall be used for

comparison purposes in calculating the time period. The Company will limit the period of recovery for under-billing to only the most recent twelve (12) months of under-billing, even if the under-billing occurred for a longer period.

(e) It shall be understood that when a Meter is found to have an error in excess of two percent (2%) fast or slow the figure for calculating the amount of refund or the amount to be collected by the Company shall be that percentage of error as determined by the test; i.e., it is the duty of the Company to maintain the accuracy of its measuring device as nearly one hundred percent (100%) as is commercially practicable. Therefore, percent error shall be that difference between one hundred percent (100%) and that amount of error as indicated by the test.

(f) The burden of maintaining measuring equipment so that it will register accurately is upon the Company; therefore, if Meters are found upon test to register fast and if time for periodic test has overrun to the extent that one-half (1/2) of the time elapsed since the last previous test exceeds twelve (12) months, the refund shall be as specified in Section C of this Rule and in addition thereto, a like refund for those months exceeding the periodic test period; provided, however, that the Commission may relieve the utility from this requirement in any particular case in which it is shown that the failure to make the periodic test was due to causes beyond the utility's control.

3.3 Terms and Conditions of Billing and Payment

(a) All fire service charges shall be payable monthly in arrears.

(b) Bills for water service by Meter will be rendered monthly with ending dates as may be determined by the Company.

(c) Bills for private fire hydrants shall be payable monthly in advance, except that the charges for private fire hydrant service shall be payable as set forth in Rule 11.

(d) Special charges shall be payable upon demand.

(e) All bills for water and service are due and payable when rendered and are considered delinquent if not paid in accordance with Tariff and Commission regulations. Failure to pay will render the Customer subject to disconnection and subject to payment of reconnection in Tariff. If any bill for water service is not paid in accordance with Tariff, the service may be discontinued in accordance with Rule 4, Disconnecting & Reconnecting Service.

(f) Customers are responsible for furnishing the Company with their correct billing

addresses (email or postal address). Failure to receive bills will not be considered an excuse for non-payment nor permit an extension of the date when the account would be considered delinquent.

(g) All bills will be sent to the billing address (email or postal address) provided when requesting water service unless the Company is notified in writing by the Customer of any change of billing address.

(h) The Company will not be bound by bills rendered under mistake of fact as to the quantity of service rendered.

(i) The use of water by the same Customer in different Premises or localities will not be combined.

(j) If for any reason service is discontinued before the expiration of twenty-five (25) days from commencement of service, a bill for a prorated portion of the minimum service charge for the month will be rendered.

(k) Residential Customers may elect to participate in a monthly budget billing payment plan. Under such a plan, Customers shall pay a fixed monthly amount determined by the Company based on historical or estimated usage. A Customer may enroll in such a plan at any time by contacting the Company. The Company will issue bills so as to bring each customer's account current once each 12-month period or through a series of levelized adjustments on a monthly basis if usage indicates that the account will not be current upon payment of the last monthly budget amount. If a Customer fails to pay bills as required under the plan, the Company reserves the right to remove the Customer from the plan, restore the customer to regular billing, and require immediate payment of any deficiency.

4. DISCONNECTING AND RECONNECTING SERVICE

4.1 Discontinuance of Water Service

(a) Water service will be discontinued to any Premises on account of temporary vacancy upon request of the Customer, without in any way affecting the agreement in force, and upon payment of all charges due as provided for in the Rates and Rules of the Company.

(b) The Company shall discontinue the Customer's service for violation of any Rule or for non-payment of bills upon providing the Customer with at least ten (10) days written notice

delivered by mail or personally delivered to him/her or a member of his/her household, advising the Customer of what Rule had been violated and for which service will be discontinued if violation continues. However, discontinuance of service shall be effected no less than twenty (20) days after the mailing date of the original bill unless, prior to discontinuance, a residential customer presents to the Company a written certificate, signed by a physician, registered nurse or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises. In that case, discontinuance may not be effected for thirty (30) days beyond the termination date as calculated above. Where fraudulent use of water is detected, or where the Company's regulating or measuring equipment has been tampered with, or where a dangerous condition is found to exist on the Customer's Premises, service may be shut off without advance notice. Subject to the foregoing provisions, service rendered under any application, contract or agreement may be discontinued by the Company for any of the following reasons:

i. For willful or indifferent waste of water due to any cause which adversely affects either water service to other Customers or the Company's utility operation.

ii. For failure to protect from injury or damage the Meter and connections, or for failure to protect and maintain the service pipe or fixtures on the property of the Customer, in a condition satisfactory to the Company.

iii. For interfering or tampering by the Customer, or others with the knowledge of the Customer, with any Meter, connection, service pipe, curb stop, seal or any other appliance of the Company controlling or regulating the Customer's water supply.

iv. For failure to provide the Company's employees free and reasonable access to the Premises or for obstructing the way of ingress to the Meter or other appliance of the Company controlling or regulating the Customer's water supply (with at least fifteen (15) days advance written notice).

v. For non-payment of any account for water supplied, for water service, or for Meter or service maintenance, or for any other fee or charge at the Premise accruing under these Rates and Rules. Discontinuation of service for non-payment on an account shall only be made at the Premise associated with that Account and will not occur for other accounts held by the same Customer that are current in payments unless the Customer has requested multiple accounts or premises be combined for billing purposes.

vi. In case of vacancy of the premises.

vii. For violation of any other Rule or Regulation of the Company or State and Municipal Rules and Regulations applying to the Company's water service.

(c) In cases where plumbing has been installed prior to adoption of and not in accordance with these Rules, and where water is being taken through a single service pipe to supply two or more Premises, the party making application shall be responsible for all water bills and other legitimate charges. Any violation of the Company Rules with reference to either or any of the said Premises or for the supply of water thereto, shall be deemed a violation as to all, and the Company may enforce compliance with these Rules by shutting off the entire service except that such action will not be taken until the innocent Customer who is not in violation of the Company's Rules, has been given a reasonable notice and opportunity to attach his pipes to a separately controlled curb stop, to be provided by and at the expense of the Company.

(d) Discontinuing the supply of water to a Premises for any such reason shall not prevent the

Company from pursuing any lawful remedy by action at law or otherwise for the collection of moneys due from the Customer.

4.2 Renewal of Water Service After Discontinuance

(a) When water service to a Premises has been terminated for any reason other than temporary vacancy, it will be renewed only after the conditions, circumstances or practices which caused the water service to be discontinued are corrected to the satisfaction of the Company, and upon payment of all charges due and payable by the Customer in accordance with the Rates and Rules.

(b) No Customer whose service has been turned off shall turn on same, or have same done by anyone other than the Company.

4.3 Reconnection Charge

When it has been necessary to discontinue water service to any Premises because of a violation of the Rules or on account of non-payment of any bill, a charge will be made to cover the expense as set forth in the Company's Schedule of Rates and Charges. This charge, together with any arrears that may be due the Company for charges against the Customer, must be paid before the water will be reconnected.

5. COMPLAINTS

5.1 Customer Complaints

Any complaint against the service or employees of the Company may be made at the office of the Company or by telephone, mail or email. The Company will handle all Complaints in accordance with regulatory requirements.

6. METERS, TESTING AND ACCURACY

6.1 Meters

(a) Water will be sold by Meter measurement only.

(b) All Meters, except private detector devices and/or private service line Meters, will be installed, maintained and replaced by, and at the expense of the Company, but in case of damage to such Meters by reason of any act, neglect or omission on the part of the Customer (such as damages occasioned by accident or misuse or purposeful actions) the Customer shall pay to the Company the cost of its repair on presentation of bill therefore.

(c) The Company reserves the right to determine the kind and size of Meter that shall be placed on any service pipe, and such Meters will be furnished, installed and removed by the Company alone, and shall remain its property.

(d) Each Premise shall be supplied through an independent Meter setting.

(e) If more than one Meter setting is installed upon a Customer's Premise, the usage of all Meters on a Premise may be combined for billing purposes if so requested by the Customer. Combined billing will be continued as long as the Premises criteria is met.

(f) All Meters are accurately tested before installation and are also periodically tested in accordance with the Public Service Commission's regulations. The Company may at any time remove any Meter for periodic tests or for repairs or replacement and may, at its option and expense, test any Meter when the Company has reason to believe that it is registering inaccurately.

(g) The Company shall make any test of any Meter upon written request of the Customer if the request is not made more frequently than once each twelve (12) months. The Customer shall be given the opportunity to be present at the requested test. The Customer may be billed the actual cost of making the test, but should the said Meter be found, upon said test, to be more than two percent incorrect to the prejudice of the Customer, the fee so charged shall be returned to the Customer.

(h) The Company reserves the right to put seals on any water Meter, or on couplings in and for any premises, and may shut off the supply if such seals are found broken or removed.

(i) Once any Meter has been placed, any change in location requested by the Customer will be done by the Company, at the expense of the Customer, if the location is acceptable pursuant to 6.1(k).

(j) Monitoring of Customer usage shall be in compliance with the then-applicable Rules and Regulations. The Company monitors Customer usage on a monthly basis through its collection of usage information. Upon the collection of that information, the Company compares usage for a particular month with a Customer's historical usage. To the extent the current month's usage shows an unusual deviation from historical usage, the Company will notify the Customer and take steps to determine the reason for the unusual deviation.

(k) Meters may be located either in an outdoor Meter box or vault, at the option of the Company. The location of the Meter must be acceptable to the Company and allow for the Meter to be easily examined, tested, repaired, read, removed or replaced. The Meter box or vault shall be located in a convenient and readily accessible location acceptable to the Company. The Meter box or vault must be constructed to protect the Meter from freezing and damage by vehicular traffic, and its location and design shall prevent, as far as possible, the inflow of surface water. After a Meter is installed by the Company, a Customer shall not tamper with, alter, repair or remove the Meter or allow anyone other than the Company to do so. Any plumbing, piping, grading or structural modification which could result in the relocation of the Meter or impact accessibility must first be approved by the Company.

6.2 Accuracy Requirements of Water Meters

(a) General. All meters used for measuring the quantity of water delivered to a customer shall be in good mechanical condition and shall be adequate in size and design for the type of service which they measure.

(b) Determination of Accuracy. No new, rebuilt or repaired meter shall be placed in service if it registers outside the parameters established in the then-applicable Rules and Regulations.

(c) As Found Tests. All meters tested in accordance with the rules for periodic, request or complaint tests, shall be tested in the condition as found in the Customer's service prior to any alteration or adjustment in order to determine the average meter error.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 14

7. PROTECTION OF PUBLIC WATER SYSTEM

7.1 Intercepting and Storage Tanks

(a) Customer Service Lines shall not be connected to the suction side of pumps, unless approved by the Company. Customers who require a large quantity of water within a short period of time must have intercepting or intermediate storage tanks, pump discharge control valves, or other controls approved by the Company.

(b) The inlet connection for the tanks attached directly or indirectly to the Customer Service Line shall discharge at a point no less than two (2) times the diameter of the inlet pipe above the overflow of such tanks and must be approved by the Company.

7.2 Check Valves, Flush Valves and Vacuum Breakers

(a) Customers having boilers or hot water heating systems connected with mains of the Company must have a check valve in the supply pipe to the boilers and hot water heating systems, together with a relief valve at some point between the check valve and heating system. A vacuum valve should be installed, in accordance to applicable plumbing requirements, in the steam line to prevent collapse in case the water supply is interrupted. The Company, however, will not be responsible for accidents or damages resulting from the imperfect action or failure of said valves.

(b) Flush valve or direct flushing closets should not be installed in Premises where the service pipe supplying such Premises is connected to a main two inches or less in diameter. All flush valves shall be equipped with approved type vacuum breakers.

(T) 7.3 Plumbing Work Must Be Approved by Company and Is Subject to Subsequent Inspection

(T) All plumbing done in connection with pipe and fixtures connected with the Company's mains,
(T) including existing plumbing, shall be subject to inspection by the Company. The Company shall have the
(T) right to inspect plumbing to determine compliance with applicable standards, including the presence of
(T) lead and copper materials, whether before such work is covered up or as part of inspecting existing
(T) facilities. If the Company determines that plumbing work is defective, the Company may require it be
(T) corrected before water is turned on.

7.4 Cross-Connections

(a) No cross-connection will be permitted unless an acceptable form of protection against contamination by backflow into the water distribution system is provided by a testable backflow prevention assembly. Acceptable forms of protection must comply with all applicable state and local requirements and approved by the Company. The required protective device or system shall be provided, installed and maintained by the Customer in good working condition, at the

2300 Richmond Road, Lexington, KY 40502

Customer's expense, and shall be subject to testing and approval of the Company before being placed in service, and at such times thereafter as may be deemed necessary by the Company.

(b) Any cross-connection existing which is in violation of these Rules shall be immediately removed or corrected. Failure of the Customer to do so may result in immediate termination of water service in accordance with Rule 4.

8. RIGHTS AND RESPONSIBILITIES

8.1 Customers Requiring Uninterrupted Supply

(a) The Company will endeavor to give reasonable service but does not guarantee a sufficient or consistent pressure or an absolutely uninterrupted supply of water, and Customers are cautioned to provide sufficient storage of water where an absolutely uninterrupted supply must be assured, such as for steam boilers, domestic hot water systems, gas engines, etc.

(b) Fixtures or devices taking a supply of water directly from the service pipes, depending upon the hydraulic pressure of the pipe system of the Company for supplying same under working pressure, will do so at the risk of the parties making such attachments, as the Company will not be responsible for any accidents or damages to which such fixtures or devices are subject.

8.2 Interruptions in Water Supply

(a) The Company reserves the right at any time to shut off the water in the Mains without notice in case of accident or emergency, or for the purpose of making connections, extensions, improvements, alterations, repairs, changes, or for other proper business reasons, and may restrict the use of water to reserve a sufficient supply in its reservoirs for fire protection or other emergencies whenever the public welfare may so require in accordance with Commission Rules. Notwithstanding any other provision in these Rules or any contract or agreement between the Company and any Customer, when, in the judgment of the Company, sufficient supplies of water are not available to the Company, for any reason, to meet all existing and reasonably anticipated demands for service or to preserve and replenish its storage in amounts sufficient to provide fire protection on its system, the Company shall have the right to restrict, limit, curtail or interrupt water service to or water usage by any Customer or Customers.

(b) The temporary shutting off of water from any Premises for any cause, whether non-payment of bills, leaking pipes, fixtures, etc. shall not cancel a contract for water supply service except at the option of the Company or upon notice from the Customer.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 16

8.3 Liability of Company

(a) The Company shall not in any way or under any circumstances be held liable or responsible to any person or persons for any loss or damage from any excess or deficiency in the pressure, volume, or supply of water, due to any cause whatsoever. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in the service, but it cannot and does not guarantee that such will not occur.

(b) The Company will make every effort to maintain a pressure on the distribution system that is required for reasonable service and is compliant with federal and state requirements, but it does not guarantee to furnish at all times any given quantity for fire uses or for general purposes.

(c) The Company shall not be responsible for accidents or damages to boilers, hot water tanks, etc., resulting from the discontinuance of service, nor by reason of the breaking of any main, water pipe, fixture or appliance whether owned by the company or Customer, and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption of service. The Company will exercise every care in this matter, and in the event of the necessity of turning off water, every reasonable effort will be made to notify the Customer.

(d) The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise. The Company agrees to furnish such supply of water as shall then be available and not other or greater, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

8.4 Meters

No person shall turn the water on or off at any street valve, Company stop, curb stop or other street connection, or at meter setting or meter vault, or disconnect, remove or bypass any meter without the consent of the Company. The Company has the right to prosecute for any damage resulting from any unauthorized tampering with Company property.

8.4 Electrical Ground

No electric wires shall be grounded on the mains of the Company or on any Company Service Lines or pipes or fixtures of any kind which have a metallic connection with the mains of the Company. The Company has the right to prosecute for any damage resulting violation of this Rule.

ISSUED: **May 15, 2026** **Approved:**
EFFECTIVE: **June 14, 2026**

2300 Richmond Road, Lexington, KY 40502

8.5 Limitations on Resale of Water

Water furnished to any customer, except for a customer classified as a "Sales for Resale" customer, is for the customer's use only and such water shall not be resold by the customer to any other person, firm, or corporation on the customer's premises or for use on any other premise. This restriction, however, does not preclude a customer from allocating the Company's billing to the customer to any other person, firm, or corporation provided the sum of such allocations does not exceed the Company's billing.

9. CUSTOMER AND COMPANY SERVICE LINES

9.1 Company Service Lines

(a) Subject to Rule 10 on Main extensions and subject to the terms of any applicable Main extension agreement, the Company will install a Company Service Line provided that it is required for the immediate and continuous supply of water in order to furnish general water service, and that the Premise to be served abuts a street, highway or right-of-way in which a Main is located.

(b) The Customer shall install the Customer Service Line to a point approved by an authorized employee of the Company, after which the Company will have the Company Service Line installed from the Main to the Customer Service Line upon payment by the Customer of the tap fee. Where the Company Service Line is already installed, the Customer Service Line shall be connected to the Company Service Line at a point approved by an authorized employee of the Company.

(c) The Company Service Line shall be sized, furnished, installed, owned and maintained only by the Company and shall remain under its sole control. Only the Company may make connections to its Mains. Nothing may be attached to the Company Service Line except a Customer Service Line. The connection to the Company Service Line must be made by an authorized employee or agent of the Company, or a licensed plumber.

9.2 Customer Service Lines

(a) The Company will specify the location of the connection to the Customer Service Line. The Customer Service Line shall be installed, maintained, and/or owned by the Customer, at the Customer's expense and risk. The Customer Service Lines shall be installed in accordance with applicable plumbing requirements.

(b) Each Premise shall be served by no more than one Customer Service Line unless otherwise approved by the Company. Customer Service Lines supplying the Premises shall not pass through or across any other Premises. No water pipes or plumbing in any Premises shall be extended from

there to any other Premises.

When a Customer Service Line is relocated at the Customer's request, or when no associated relocation of the Company's Service Lines or other infrastructure is occurring, the Customer shall be responsible for the cost of such relocation. In instances where a Customer Service Line is required to be relocated due to roadway construction or other causes not within Company control, and the Company's Service Lines or other infrastructure is also being relocated, the Customer shall not be responsible for the cost of such relocation unless the Customer requests a specific location different than that specified by the Company.

A Customer's Service Line which is irregularly located because there was no Main abutting the Premises at the time such Customer Service Line was installed shall, at the Customer's expense, be relocated and connected to a new Company Service Line on the Main abutting the Premises when it becomes necessary for such Customer Service Line to be repaired or replaced.

(c) A Customer, occupant, owner, or any agent thereof is not authorized to attach the Customer Service Line to Company property or shut the water line on or off. If a Customer, occupant, owner, or any agent thereof does so, and in making an attachment or in shutting off or turning on water does not properly replace the curb box cap or Meter lid, or damages the curb stop, curb box, copper setter, or other property of the Company, repairs shall be made only by the Company, but at the Customer's expense. If a Customer, occupant, owner, or any agent thereof takes any unauthorized action described therein, the Company shall not be liable for any personal and property damage caused to Customer's property.

(d) The Customer Service Line and all connections and fixtures attached thereto shall be subject to the approval of the Company before water will be turned on. All Premises receiving a supply of water and all Company Service Lines and Meters and appurtenances, including any and all fixtures within the Premises, shall at all reasonable hours be subject to inspection by any duly authorized employee or agent of the Company.

(e) Only an authorized agent of the Company may turn water on and off in the meter box. In case of emergencies, licensed plumbers may turn water on and off if a shut off valve is not available in the Premise and must notify Company within 24 hours of doing so.

10. WATER MAIN EXTENSIONS

10.1 General Main Extensions Rules

(a) In estimating the cost of an extension, the estimate shall be based on the diameter of the pipe to be

used, provided, however, the estimated cost to the Customer or Customers shall not be based on a pipe diameter in excess of eight (8) inches, unless actual consumption estimated for the proposed Customer or Customers requires a larger pipe.

(b) No interest will be paid by the Company on the Applicant's payment or on any balances not refunded. At the expiration of said ten-year period, the refund account will be closed, and no further refunds will be made.

(c) Extensions made under this Rule shall be and remain the property of the Company.

(d) The Company reserves the right to further extend its water mains from and beyond the end of each Water Main Extension made under this Rule. The Applicant or the Applicant's agent paying for an extension shall not be entitled to any refund for the connecting of Customers to any further extension of mains installed.

(e) In determining the length of main extensions to be installed, the main shall be extended to fully cover the frontage of the property, and if the last lot to be served is a corner lot or a lot immediately adjacent to a corner lot, the terminal point of the extension made hereunder shall be located so that the main laid hereunder ties in with the existing main located in the intersecting street; and further provided that if there is no main located in the intersecting street, the terminal point of the extension made hereunder shall be located at the nearest street line of the intersecting street or to the edge of subdivision property, including common area.

10.2 Main Extensions for Other than in New Subdivisions

(a) For Free Extensions, the Company will, upon written request for Residential service by a prospective Residential Customer or a group of prospective Customers located in the same

neighborhood, make free of charge an extension necessary to give service, when the estimated total revenue, for a period of three (3) years from the prospective Customer or Customers is approximately equal to the cost of the extension; provided that the prospects are that the patronage or demand will be of such permanency as to warrant the capital expenditure involved.

(b) For Extension Above Limit, if the extension required in order to furnish general water service at any point within the corporate limits of the municipality or for any adjacent suburb of the municipality is greater than the cost of the free extension specified herein, such an extension will be made under the following conditions: the Company shall require a deposit of the cost of the extension above the free limit and will, in such case, for each additional Customer directly connected to the extension between its original beginning and original end within a period of ten

(10) years from the making of such extension, refund an amount equal to three times the estimated annual revenue of the new Customer, but at no time shall the aggregate refund made to any Customer exceed the original deposit of such Customer.

(c) The free extension or refund amount shall not be reduced below that applicable to fifty (50) feet of main per Customer. A prospective Customer is one who will connect to such main extension within the refund period after the date the water is turned on in the main; provided further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customer will take water service within the aforementioned refund period.

10.3 Main Extensions for New Subdivision

(a) Definitions

i. The term "new subdivision" as used herein shall mean any new subdivision of residential and/or commercial lots for which a preliminary or final plat has been approved by the local planning and zoning authority, and in which the owner thereof has the right, under the rules of said Authority, to construct streets, sidewalks, curbs and other improvements.

ii. The term "lot" as used herein shall mean any plot of ground laid out for building purposes, the front footage of which does not exceed one hundred feet. Should the frontage of any plot exceed one hundred feet, it shall, for the purposes of this Rule be considered as a single lot, if the average footage of all lots in the subdivision does not exceed one hundred feet. If the average frontage of all lots in the subdivision does exceed one hundred feet, the total number of lots in the subdivision shall be determined by dividing the total frontage of all the lots in the subdivision by one hundred feet.

iii. The term "on site facilities" as used herein shall include only those water mains and related facilities, if any, to be installed by Company and located within the boundaries of the new subdivision or part thereof as said boundaries are depicted on the preliminary (or final, if applicable) plat of such subdivision or part thereof approved by the local planning and zoning authority.

iv. The term "off-site facilities" as used herein shall include all water mains and related facilities, if any, to be installed by Company and located outside of the boundaries of said new subdivision as said boundaries are depicted on

the preliminary (or final, if applicable) plat of said subdivision as approved by the local planning and zoning authority, in order to deliver an adequate supply of water from existing mains of Company to such new subdivision.

v. The term "current estimated cost" as used herein shall mean that sum determined by Company as the estimated cost of installing one foot of water main, together with that sum determined by Company as the estimated cost of installing each type of appurtenant related facility based upon current materials costs, bids received, and other current project data. Such average cost per foot and such average cost per appurtenant facility shall be deemed to be the "current estimated cost" for such mains and facilities during the twelve month period immediately following such determinations, it being contemplated that the current estimated cost will be revised annually in order to keep same as current as practicable.

(b) Before water lines will be laid hereunder in any new subdivision, it is understood and agreed that the road surface shall be brought to the established sub-grade; and the developer or builder of such new subdivision shall furnish the Company with a right-of-way agreement suitable in form to the Company, unless the streets of the new subdivision have been dedicated to the public use.

(c) When an extension of Company's water distribution system into any new subdivision or part thereof as defined herein is requested by the owner of such subdivision, such extension will be made under the terms of a "New Subdivision Extension Deposit Agreement for Off Site Facilities" as hereinafter set forth in the Appendix, and/or a "New Subdivision Extension Deposit

Agreement for On Site Facilities" as hereinafter set forth in the Appendix, which Agreements shall be entered into upon the following basis:

i. Company shall have the exclusive right to determine the type, location and size of mains to be installed and of the related facilities required to render adequate service.

ii. The owner of the new subdivision may elect to develop it in sections or units and to have main extensions made into such sections or units from time to time as the same are ready for development and may elect further to have the entire subdivision considered as a whole for the purpose of making deposits and receiving refunds for off-site facilities under Company Rule No. 10. In such event, owners shall furnish Company with preliminary or final plats of the unit or units thereof to be initially developed, such plats to be

approved as hereinafter provided, such plats to be so furnished prior to the making of any extensions into said new Subdivision. As subsequent units of said subdivision are thereafter developed, preliminary or final plats so approved thereof shall be furnished to Company as hereinafter provided. Upon delivery to Company by the owner of such subdivision of four (4) copies of a preliminary or final plat of the subdivision or units thereof, duly approved by the Local planning and zoning authority, which plats shall depict the location and grade of all streets, sidewalks, building plots, building lines and utility easements contained therein, together with evidence of the owner's authority to construct streets, sidewalks, curbs and other improvements therein, Company shall prepare appropriate plans and specifications for the installation of necessary mains and related facilities to render adequate service therein, including where applicable, such off site facilities as deemed necessary and upon delivery to Company by the owner of such subdivision, any other information requested by the Company.

iii. Separate Extension Deposit Agreements, in the form provided in the Appendix, shall be entered into by the owner of the subdivision and Company for off-site facilities and for each separate unit in which on site facilities are requested, provided, moreover, that the ten (10) year refund period applicable in such agreements shall apply separately to each such transaction.

iv. When plans and specifications for installation of such mains and related facilities are completed, Company shall determine the presumed cost of construction and installation of such mains and related facilities which presumed cost shall be the aggregate of (1) the total number of feet of each size and grade of main required in such construction multiplied, respectively by Company's current estimated cost for each such size and grade of main, and (2) the total cost of installation of all related facilities required in such construction as determined by Company's current estimated cost for each of such facilities. In absence of actual cost data upon which to prepare a current estimated cost for any particular required related facility or size and grade of main, the presumed cost thereto shall be the best estimate of Company with respect to the cost of such mains or related facilities based on available information with respect to same. In

making such determinations of presumed cost of construction, Company shall separately compute the cost of installation and construction of on-site mains and facilities required and the cost of off-site mains and facilities required.

v. When such determination of presumed cost of on-site mains and facilities and presumed cost of off-site mains and facilities required has been completed, the sums to be deposited by the owner of such subdivision with Company under the terms of the "New Subdivision Extension Deposit Agreement for On Site Facilities" and the "New Subdivision Extension Deposit Agreement for Off Site Facilities" if applicable, shall be determined by Company and shall be (1) the total presumed cost of all on site mains and related facilities of the new subdivision or any part thereof to be constructed as determined as herein provided, and (2) (a) the presumed cost of ten (10) feet of off-site mains and facilities multiplied by the total number of building plots shown on and included within the whole of said new subdivision or (2) (b) the presumed cost of all required off site facilities, whichever be the smaller sum. The presumed cost per foot of off-site mains and facilities as used in this computation shall be determined by dividing the total presumed cost of all off site mains and related facilities by the total footage of such off site mains. In the event it is necessary to construct off site mains for a distance in feet greater than ten (10) times the number of building plots included within the whole of said subdivision as depicted on the initial submitted plat thereof, such excess off site extension will not be made under the "New Subdivision Extension Deposit Agreement for Off Site Facilities", but shall be made under an Extension Deposit Agreement as provided in the Appendix of these Rules.

vi. For each Premises served for which a street service connection shall be directly attached to such main extension between its original beginning or original terminus, excluding connections to further extensions or branches thereof, and crediting no more than one such service connection per building plot, Company shall refund to the owner of such subdivision under terms and provisions of New Subdivision Extension Deposit Agreements separately executed each for on-site and off-site improvements, amounts determined as follows:

a. For on-site facilities, the quotient obtained by dividing the total presumed cost of all on site mains and related facilities, determined as provided in Section (c) vi above for that part of the new subdivision then to be developed, by the total number of lots,

determined as provided in Section (a) ii herein, which will be served by the on-site facilities then to be developed and as shown

on the preliminary or final plat of the part of the subdivision to be developed.

b. For off-site facilities, the quotient obtained by dividing the deposit for off-site facilities, determined as provided in Section (c) iv above, by the total number of building plots shown on and included within the whole of said subdivision and shown on the preliminary or final plat of the whole subdivision delivered to Company as provided in Section (c) ii above.

vii. The owner of such subdivision, in consideration of an accelerated development of said subdivision to be obtained through Company's proceeding, on the basis of a preliminary plat, with its plans and specifications, and, at Company's option, with construction of its mains and facilities, shall, as a part of the New Subdivision Extension Deposit Agreements for both Off Site and On Site Facilities, warrant to Company that the location and grade of streets, curbs, sidewalks, building plots, building lines and utility easements as depicted on said preliminary plat will not be altered or changed in any respect in the final plat of said subdivision or part thereof, as finally approved by the local planning and zoning authority and recorded in the Office of the County Clerk. In the event the location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements be altered, amended or changed in the final plat or in an amended plat of said subdivision or part thereof as approved by said Authority or as recorded in the office of said Clerk, whether such changes are made with or without the consent of said subdivider, and in the event such alteration,

amendment or change requires, in the sole judgment of Company, the relocation, removal, replacement, reconstruction, change in site or additions to the mains and related facilities, the subdivider shall indemnify and hold harmless Company of and from any and all damages and costs of such removal, replacement, relocation, reconstruction and any all other expenses or costs relating to Company because of the change of location or grade of streets, curbs, sidewalks, lots, building lines or utility easements in said subdivision or part thereof.

(d) Company shall, upon written request of any owner of a new subdivision, with who a contract has been entered into under these Rules, made within thirty (30) days after effective date of these Rules,

re-execute such agreements under terms of these Rules.

11. PUBLIC AND PRIVATE FIRE SERVICE

11.1 Application for Private Fire Service

(a) The extent of the rights of the Customer for private fire service is to receive, but only at times of fire at the Premises served by the private fire service, such supply of water as shall then be available. The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fires, or to protect any persons or property against loss or damage by fire, or otherwise, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water failure to supply water or pressure, or for any other cause whatsoever.

(b) The applicant or its agent shall complete an "Application for Special Connection," which is available at the Company's offices. Service connections for water to be taken for the extinguishment of fire shall be made only upon the terms as provided for in the "Application for Special Connection," and then only after such application has been submitted by the Customer and approved in writing by the Company and the applicable Fire Department.

(c) A gate valve with post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the Company, and said valve and post indicator shall be furnished, installed and maintained by the Company at the expense of the Customer, and unless otherwise approved by the Company, said valve shall be installed which shall be furnished, installed and maintained by and at the expense of the Customer.

(d) The Company will make the connection to its mains at the cost and expense of the Customer, and the service connection from the main to the post indicator valve as described in Section 11.1 (c) will be furnished, installed, owned and maintained by the Company and at the cost and expense of the Customer.

(e) The entire private fire service system on the Customer's premises shall be installed by and at the expense of the Customer and shall be subject to the inspection, test and approval of the Company before the service is made effective, and at such time thereafter as may be deemed necessary by the Company.

(f) A private fire service connection is furnished for the sole purpose of supplying water for the testing of the system and the extinguishment of fires, and the use of water from such a connection for any other purpose is absolutely forbidden.

(g) Private fire protection service may at any time be furnished at the option of the Company through a line

guarded by an approved fire line meter or detector device which shall be furnished and installed by the Company at the expense of the Customer. The meter shall be set in an approved vault or chamber, properly drained and protected, located at a point as near as possible to the curb line, and said vault or chamber shall be constructed and maintained by the Company at the expense of the Customer. The private fire meter or private detector device will be maintained by the Company, but at the expense of the Customer.

(h) Hydrants and other fixtures connected with a private fire service connection may be sealed by the Company, and such seals shall be broken only in case of fire or as specially permitted by the Company, and the Customer must immediately notify the Company of the breaking of any such seal.

(i) No pipe or fixtures connected with a private fire service connection served by the Company shall be connected with pipes or fixtures supplied with water from any other source. An industry approved backflow prevention device reviewed by the Company must be installed on private fire service connections and such device must be tested annually thereafter.

(j) The entire private fire service connection and all parts of it which are located outside of the property line of the Customer and any meter or other indicating or controlling device and all parts and appurtenances thereof no matter where located shall be accessible and available in a safe manner to the Company at all times.

(k) The Company shall determine the size and location of any connections made to its mains for private fire service.

(l) The Customer shall furnish an accurate sketch or drawing showing the pipes, valves, hydrants, connections and appurtenances on the premises of the Customer and connected with the mains of the Company and also an accurate sketch of any other water pipe system and fixtures that may exist on the premises.

(m) Whenever a fire service system is to be tested under the regulations of the fire insurance underwriters, the Customer shall notify the Company of such proposed test, naming the day and hour when same is to be made, so that, if desired, the Company may have an inspector present during the test.

(n) All applications for private fire protection shall be subject to the written approval of the applicable Fire Department. It is the Customer's responsibility to obtain this approval.

(o) All subsequent owners of the property containing private fire service, assume all responsibilities under the original Application for Special Connection.

11.2 Terms and Conditions for New Private Fire Hydrant Service

(a) Applicants and Customers subject to this tariff are also subject to Rule 11.1(a), (b), and (f), which are incorporated by reference as if set forth herein.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 27

(b) The entire cost for labor, materials and other expenses incurred in installing the private fire hydrant connection, consisting of tapping the main and installing the hydrant branch and hydrant at a convenient point between the curb and property line, will be paid by the Applicant and any work done by the Company in connection therewith will be at the expense and risk of the Applicant.

(T) (c) At the Company's discretion, advance payment of three years' private service rate in Service Classification No. 4 for each private fire hydrant by the applicant will be required at the time the contract is signed for private fire hydrant service.

(d) Water used for extinguishing fires will not be charged. Prompt notice of hydrant use is to be given to the Company in order that the installation may be inspected.

(e) Except for hydrants owned by private entities as set forth in their contract with the Company, title to the service connection and hydrant shall, upon completion of construction, become vested in the Company, which thereafter shall assume responsibility for maintenance. Regardless of ownership, all parts and appurtenances shall be accessible and available to the Company at all times.

(f) No private fire hydrant will be installed at a location where the normal flow from the hydrant is less than 500 gallons per minute with a 20 pounds per square inch residual pressure in the main serving the hydrant.

(g) After expiration of the initial three-year advance payment of the private service rate by the applicant, the applicant will continue to be responsible for charges for this service. The applicant may request the Company's consent to transfer responsibility for the private service rate to an entity in good standing in the state in which the entity was organized. Any such request must be approved by the applicant, the entity to which the responsibility is being transferred, and the Company in order to be effective.

(h) Failure to pay the private service rate shall be sufficient cause for discontinuance of water service after reasonable notice by the Company.

(i) The private service rate shall continue in effect until such time as a unit of government shall agree to pay public fire protection charges thereon.

11.3 Public Fire Hydrants

(a) No person, except for the legitimate purpose of extinguishing fires or for other purposes herein provided, shall open any fire hydrant without the consent of the Company.

(b) During freezing weather, the City or County shall notify the Company after it has opened any hydrant.

(c) Any expenses for repairs caused by the negligence of the employees of the municipality or by members of the fire department shall be paid for by the municipality.

(d) The use of fire hydrants will be restricted to the taking of water for the extinguishing of fires, and water shall not be taken from any fire hydrant for construction purposes, sprinkling streets, flushing trenches, sewers or gutters or for any other use, unless specifically permitted by the Company for the particular time and occasion.

(e) Inspections and tests of public fire hydrants will be made by the Company at convenient times and reasonable intervals.

(f) Whenever a change in location, size or type of a fire hydrant is ordered, requested, or made necessary due to change in line or grade of any roadway, curb or walk, said change will be made by the Company at the expense of the municipality or other party ordering, requesting, or making necessary such change.

(g) In the event that the City or County shall order in writing the installation of additional fire hydrants on existing mains having an internal diameter of six inches or larger, the Company will install such hydrants at its own cost and expense, provided that such mains are of adequate capacity to provide the required fire flows.

(h) Where pipe line installations are required to carry out a written order of the City or County to install fire hydrants, or where existing mains, in the opinion of the Company, are inadequate to provide required fire flows to such hydrants, and the City or County orders in writing the installation of a water main of adequate size to provide such flows to the hydrant or hydrants so ordered, the Company will install such mains and hydrants at its own cost and expense, provided that the estimated cost of the extension does not exceed the estimated total revenue for a period of three (3) years from such hydrant or hydrants and from prospective Customers who will connect to such main within thirty (30) days after the date that water is turned into the main; and provided, further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customers will take water service at their premises within thirty (30) days after the date that water is turned into the main. If the estimated cost of the proposed extension and hydrants required in order to furnish fire service exceeds three (3) times the Company's estimate of immediate annual revenue, such extensions will be made under the following conditions: the Company may require a deposit in the amount by which the cost of the extension, including the cost of hydrants which might be connected thereto, exceeds three (3) times the annual revenue estimated to be received from the hydrant and prospective Customers and will, in such case, for each additional Customer directly connected to the extension between its original beginning and original end with a period of ten (10) years from the making of such extension, refund an amount equal to three (3) times the estimated revenue of the new Customer, but at no time shall the aggregate refund made exceed the original deposit.

Rates for Public Fire Service

		Rate Per Month	Rate per Annum
(R)	For each public fire hydrant contracted for or ordered by Urban County, County, State or Federal Governmental Agencies or Institutions.	$11.53	$138.36

Rates for Private Service

	For each private fire hydrant contracted for by Industries or Private Institutions.	$120.00	$1,440.00

Fire service connections are furnished for the sole purpose of supplying water for the extinguishment of fires. If the Company has reason to believe water is being used for other purposes, including that the connection or line is leaking, the Company may install a meter to monitor usage, and, in addition, to the rates for fire protection listed above, all usage shall be billed at the Commercial rate in Service Classification No. 1. The applicable Service Charge listed In Service Classification No. 1 shall also be charged.
The charges under this provision are in addition to any general water service charges.

Special Provisions
A few hydrants are connected to mains by a "special connection." A "special connection" exists when a customer and the Company entered into a service contract in which the customer agreed to maintain an unmetered water line from a Company main to the customer's service line. If the Company has reason to believe water from a special connection is being used for purposes other than fire protection, including that the connection or line is leaking, the Company may install a meter and charge for usage under this tariff. The Company may require the customer to pay for the meter and its installation if:

(1) the Company gives the customer written notice of the usage problem, requests that the customer correct the problem, and informs the customer that failure to correct the problem within 90 days could

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 34

result in liability of the customer for the cost of installing a meter to monitor usage, (2) the customer does not substantially correct the problem within 90 days of the written notice, and, (3) the Company thereafter gives three business days' notice, which shall include a cost estimate, that it will install the meter at the customer's expense.

Applicable

Applicable to the entire Service Territory of Kentucky-American Water Company.

Availability of Service

Available for Water Used for Construction, Street Washing, Pool Filling, and Similar Purposes.

Rates

Where a meter is installed on a fire hydrant or on a temporary service connection for construction, street washing, pool filling, and similar purposes, the minimum payment for water shall be the monthly service charge for general water service, payable in advance based upon the size of the meter installed. If more than one fire hydrant or temporary service connection is used, the service charge is to apply to each such hydrant or temporary service connection so used.

The Company may require an application to be signed and either the service charge paid in advance or, at the option of the Company, a meter deposit made, and the account handled in the same manner as any other metered account. This service charge will not entitle the Customer to any water and all water used shall be billed at the meter rate schedule. In addition to such charges the Customer shall pay all reasonable costs incurred in connection with the installation and removal of the meter.

Rates

There shall be added to the Customer's bill, as a separate item, an amount equal to the proportionate part of any license, occupation, franchise, fee or other similar fee, charge or tax now or hereafter imposed upon the Company by local taxing authorities or the Kentucky River Authority, whether imposed by ordinance, franchise, statute or otherwise, and which fee, tax or charge is based upon Kentucky River water usage or a percentage of the gross receipts, net receipts, or revenues from sales of water or services rendered by the Company to the customer. Where more than one such charge, fee or tax is imposed, the total of such charges, fees or taxes applicable to a Customer may be billed to the customer as a single amount. Charges, fees or taxes herein referred to shall in all instances be billed to customers on the basis of Company rates or usage effective at the time of billing, and on the basis of the tax rate of usage effective at the time billing is made.

There shall be added to the Customer's bill, as a separate item, an amount equal to the proportionate amount of school tax in any county requiring a utility gross receipts license tax for schools under KRS 160.613.

There shall also be added to the Customer's bill, as a separate item, any fee, tax or charge imposed upon the customer by a municipality or governmental agency, the purpose of which is to allocate among those customers identified by ordinance, franchise, statute, or otherwise, the cost of fire hydrants imposed upon the municipality or governmental agency. Failure to pay this charge shall not constitute grounds for termination of service.

CLASSIFICATION OF SERVICE
PFAS LITIGATION UNIVERSAL SURCREDIT ("PLUS")

APPLICABILITY

Applicable to the entire Service Territory of Kentucky-American Water Company.

Kentucky-American Water Company sought compensation from various manufacturers of chemicals of Aqueous Film Forming Foam. This litigation was consolidated for the limited purpose of pursuing settlements into multi-district litigation No. 2873 ("MDL") which are overseen by the United States District Court for the District of South Carolina. Kentucky-American Water Company has entered into multiple settlements in the MDL and may enter into further agreements. These settlements may provide one or more payments. The proceeds will be net of any costs to be paid out of the settlement funds incurred to administer or achieve the settlement. The purpose of this tariff is to credit Kentucky-American Water Company customers the proceeds Kentucky-American Water Company receives from these MDL settlements.

The proceeds from the MDL shall be credited to customers as a one-time credit within a reasonable time after Kentucky-American Water Company receives payment of the funds. Kentucky-American Water Company shall provide notice to the Commission of the amount of proceed included and a workpaper showing the determination of the credit as outlined below. Kentucky-American Water Company may combine proceeds resulting from the MDL settlement.

Determination of the Credit

The litigation or settlement proceed credit shall be calculated as follows:

$$\text{PLUS Credit} = \frac{\text{MDL Proceeds}}{\text{Total Water Customer Count}}$$

$$\text{PLUS Credit} = \frac{(MDLP)}{CC}$$

Where:

PLUS Credit	Represents the proceeds credit each customer will receive as a result of proceeds paid from MDL settlements.
MDLP	Represents the proceeds received from the one or more MDL settlements.
CC	Total active water customer counts, inclusive of all customer classes at the time of credit calculation.

LATE PAYMENT FEE

Applicable

Applicable to the entire Service Territory of Kentucky-American Water Company.

Availability of Service

Available for all customers.

Rates

Kentucky American Water Company shall charge a 5% late fee on all charges that are paid after the due date on the bill. The late payment fee is 5% calculated upon all amounts owed with the exception of any amounts Kentucky-American Water Company collects pursuant to a third-party billing services contract, or on previously assessed late payment fees or other penalty charges. The late payment charge will only be assessed once on any bill for rendered services. Customers who receive a pledge for or notice of low income water assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received.

Original Sheet No. 44

SERVICE CLASSIFICATION NO. 6
SERVICE LINE LEAK ADJUSTMENT RATE

Applicable
Applicable to entire Service Territory of Kentucky-American Water Company.

Availability of Service
Available for Residential, Commercial and OPA customers.

Rates
A charge of twenty-five (25) percent of the applicable tariff will be applied to all water usage determined to be the result of a service line leak.

Terms and Conditions
A service line leak is defined as a leak in the customer service line between the meter and the premises. Service line leak adjustments will be granted to residential, commercial, and OPA customers. The customer must provide a plumber's statement or list of materials showing that the leak has been repaired. After verification of repairs by the Water Company, the bill will be adjusted by comparing the usage during the leak billing period to the average usage for the past six billing periods. A reasonable estimate will be used in cases when six prior periods of information do not exist. The excess usage will be billed at the rate specified above. During the lifetime of a water service line only two leak adjustments will be permitted. Each adjustment may cover a maximum of two billing periods. Before a third adjustment can be considered, the entire water service line from the meter box to the premises must be replaced. Plastic pipe for repair of underground water service lines must be certified to withstand a working pressure of 160 pounds per square inch or greater.

SERVICES

Go Paperless: Save time. Save money. Sign up for **Paperless Billing** and **Auto Pay** on My Account at amwater.com/myaccount. Not registered? Log in and be sure to have your account number handy.

Water Quality: We take water quality seriously. When it comes to complying with federal drinking water standards, we consistently score better than the industry average. For a copy of the annual water quality report for your area, visit kentuckyamwater.com. Under Water Quality, select Water Quality Reports.

H2O Help To Others: This program helps low-income customers who qualify with their water bills. For more information, visit kentuckyamwater.com. Under Customer Service & Billing, select Low Income Program.

EXPLANATION OF OTHER TERMS

Payment by Check: Paying by check authorizes American Water to send the information from your check electronically to your bank for payment. The transaction will appear on your bank statement. The physical check will not be presented to your financial institution or returned to you.

Estimated Bill: This occurs when we are unable to read the water meter. Your usage from the same billing period the prior year is used to calculate the estimated bill. The next actual meter reading corrects any over or under estimates.

Disputes: If you have questions or complaints about your bill, please call us at 1-800-678-6301 before the due date. If your bill is unusually high, it may indicate that there is a leak in your plumbing. For tips on how to detect leaks and use water wisely, visit us online. You'll find helpful tools under the Water Information menu. Every drop counts!

Rates: A detailed listing of charges that make up your bill is available upon request by contacting Customer Service or visiting us online at kentuckyamwater.com. Under Customer Service & Billing, select Your Water Rates.

Correspondence: Please send written correspondence to PO Box 578, Alton, IL 62002-0578. Be sure to include your name, account number, service address, mailing address and phone number including area code. Please do not send correspondence with your payment, as it may delay processing your payment and correspondence.

Understanding Your Bill

The information below defines some of the new terms you may find on your bill:

- **Service Related Charges:** This section includes charges for services related to water, wastewater and fire protection.
- **Fees and Adjustments:** This section provides details related to additional charges or adjustments for the service period referenced. Fees, when applicable, would include items such as service activation and late payment charges. Additionally, any credit or debits related to billing corrections would be found in this section.
- **Pass Through Charges:** Charges in this section, when applicable, are separated from other service related charges to provide visibility into what portion of your bill is being remitted to other entities. Payment received for these charges does not remain with American Water. While we may bill and collect for them, the payments received are passed along to other companies and agencies.
- **Billing Units:** One billing unit equals 100 gallons of water used. If the meter serving your property measures your water use in cubic feet or a different unit of measure, we convert the usage to gallons to make it easier to understand.
- **Average Daily Use:** The gallons shown in the water droplet above represent your average daily water use for the current billing period. Tracking the amount of water you use can help you manage your overall water use from month to month.
- **Still have questions?** We are here to help. Our customer service representatives are available M–F, 7 a.m. to 7 p.m. More information on understanding your bill and charges can also be found on our website. See the link below.

For more information about your charges and rates, please visit: https://amwater.com/kyaw/customer-service-billing/your-water-and-wastewater-rates.

(N) **SYSTEM IMPROVEMENT PROGRAM SURCHARGE ("SIP") RIDER**

(N) **APPLICABLE SERVICE AREA**
(N) Applicable to the entire Service Territory of Kentucky-American Water Company.

(N) **APPLICABILITY OF RIDER**
(N) Applicable to Residential, Commercial, Industrial, Other Public Authority, Sale for Resale, and Public and
(N) Private Fire Service customers.

(N) **DETERMINATION OF THE SIP SURCHARGE PERCENTAGE**
(N) (A) The following terms not otherwise defined in this Rider shall have the following meaning given to them:
(N) (1.) "SIP Qualified Infrastructure Investments" include the below recurring and investment projects that are not
(N) for the purpose of serving a new customer ("non-revenue producing plant"):
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)

- Water Mains: scheduled replacement, renewal, improvement, or relocation of existing water mains
- Hydrants and Valves: replacement of existing hydrants and valves
- Service Lines: replacement of existing service lines
- Meters: replacement or improvement of existing meters and end-points
- SCADA Equipment and Systems: installation or replacement of Supervisory Control and Data Acquisition ("SCADA") systems and equipment
- Process Plant Facilities and Equipment: new purchase or replacement of existing components of water supply, treatment, pumping, storage, and pressure regulation facilities, including associated building components and equipment; replacement of existing laboratory equipment; replacement of existing filter media used in treatment
- Booster Stations: replacement or improvement of existing booster stations
- Water Storage Tanks: replacement or improvement of existing water storage tanks

(N) (2.) "SIP Period" means the 12-month period (or portion thereof) during which SIP Qualified Infrastructure
(N) Investments are being tracked.

(N) (3.) "Annual Filing" means the filing to be made at least 90 days prior (by October 1) to the rate effective date
(N) of the SIP Period (January 1) that will establish a SIP Surcharge Percentage on a prospective basis and will
(N) include updates to forecasted SIP Qualified Infrastructure Investments, including an additional year of
(N) forecasted capital expenditures, any shifts in spend between eligible projects and categories of
(N) investments, as well as shifts in spend between years, according to business and operational needs.

ISSUED: **May 15, 2026** **Approved:**
EFFECTIVE: **June 14, 2026**

ISSUED BY: **/s/ Robert Burton**
Robert Burton
President
2300 Richmond Road, Lexington, KY 40502

(N) (4.) "Balancing Adjustment" means the annual filing to be made at least 90 days prior (by March 1) to the rate effective date (June 1) of the Balancing Adjustment for the most recently concluded SIP Period that will (1) true up the forecasted costs of capital, depreciation, and taxes associated with SIP Qualified Infrastructure Investments in the most recently concluded SIP Period to actual costs and compare the resulting trued up total revenue requirement to actual SIP revenues billed to customers during that SIP Period, and (2) update the current SIP Period total revenue requirement to minimize the future Balancing Adjustment.

(N) (5.) "Base Water Revenues" mean all billed base water revenue, including water service charges based on the size of meter installed, volumetric water service charges based on consumption, municipal or private fire connection water service charges based on size of service, and water service charges for public or private fire hydrants, but excluding any other separately billed surcharges, surcredits, or taxes such as the Kentucky River Authority ("KRA") Withdrawal Fee, the PFAS Litigation Universal Surcredit ("PLUS"), Franchise Taxes, and School District Taxes.

(N) (6.) "SIP Surcharge Percentage" is the percentage determined as described below and to be updated in tariff filings.

(N) (7.) "SIP-related costs" or "SIP costs" mean costs of capital, depreciation, and taxes associated with SIP Qualified Infrastructure Investments.

(N) (8.) "System Improvement Program Surcharge" or "SIP Surcharge" means the amount added to a customer bill when the SIP Surcharge Percentage is applied in accordance with this tariff.

(N) (B) The SIP Surcharge Percentage shall be expressed as a percentage carried to two (2) decimal places. The SIP Surcharge Percentage shall be applied to the total amount Base Water Revenues billed to each Customer.

(N) (C) The SIP Surcharge Percentage will be calculated as follows:

$$S\% = \frac{(\text{PTR} + \text{DEPRa} + \text{POTXa})}{\text{BWR}} \text{ x } 100\% - \text{SGRC\%} + \text{BA\%}$$

(N) Where:

(N) S% = SIP Surcharge Percentage

(N) PTR = Pre-Tax Return calculated by: (1) multiplying the 13-month average rate base for the SIP Period by the debt and equity components of the total after-tax rate of return as authorized in the most recent water

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. 50

(N) general rate case ("GRC"), and (2) then multiplying the resulting debt and equity after-tax return components by their respective gross revenue conversion factors, where the debt component is grossed up for uncollectible expense and the Public Service Commission Assessment Fee, and the equity component is grossed up for the same plus state and federal income taxes. The 13-month average rate base for the SIP Period is calculated as the 13-month average utility plant in-service and accumulated depreciation ("NetUPIS") balances for the SIP Qualified Infrastructure Investments, less the related accumulated deferred income taxes ("ADIT") that have been prorated for the SIP Period.

(N) DEPRa = Depreciation Expense After Gross Up calculated monthly during the SIP Period by: (1) multiplying the prior month's gross UPIS balances for SIP Qualified Infrastructure Investments by annual depreciation rates, divided by 12, as last approved for the respective plant accounts to which the SIP Qualified Infrastructure Investments were recorded, and (2) grossing up for uncollectible expense and the Public Service Commission Assessment Fee.

(N) POTXa = Property Tax Expense After Gross Up calculated by: (1) multiplying the net UPIS balance as of December 31 of the prior year by the effective property tax rate per dollar of net UPIS used to calculate property tax as approved in the most recent water GRC, and (2) grossing up for uncollectible expense and the Public Service Commission Assessment Fee.

(N) BWR = Base Water Revenues

(N) SGRC% = SIP Surcharge Percentage in Base Water Revenues (when applicable)

(N) BA% = Balancing Adjustment Percentage (when applicable) from the most recent Balancing Adjustment calculated by: (1) subtracting actual SIP revenues billed to customers during the recently completed SIP Period from the trued up total revenue requirement for that SIP Period, (2) dividing the resulting over or under recovery for that SIP Period by prorated Base Water Revenues authorized from the most recent GRC, where prorated Base Water Revenues are calculated by dividing the number of days the Balancing Adjustment Percentage will be effective (214 days for service rendered on and after June 1 through December 31) by 365 days, and multiplying by Base Water Revenues authorized from the most recent water GRC, and (3) multiply by 100%.

(N) **EFFECTIVE SIP SURCHARGE PERCENTAGE**

(N) The SIP Surcharge Percentage effective for service rendered on and after January 1, 2027 is:

0.00%

APPENDIX

Form of New Subdivision Extension Deposit Agreement for Off Site Facilities:

THIS AGREEMENT, entered into this _day of _____, _____by and between KENTUCKY AMERICAN WATER, a Kentucky corporation, having its office at 2300 Richmond Road, Lexington, Kentucky, hereinafter called "COMPANY", and _____, hereinafter called "SUBDIVIDER",

WITNESSETH:

THAT, WHEREAS, SUBDIVIDER is the present owner of a certain tract of land located within the service area of COMPANY, which tract is now being developed by SUBDIVIDER as a new subdivision or unit thereof (hereinafter called the subdivision), and

WHEREAS, the _____ Commission has heretofore approved a preliminary or final plat of said proposed subdivision, upon which plat the location and grade of streets, curbs, sidewalks, building plots, building lines and utility easements are depicted, a copy of which plat is annexed hereto and made a part hereof, marked Exhibit "B" for identification, and

WHEREAS, SUBDIVIDER desires the extension of the off site water mains and facilities of COMPANY on the site of said subdivision as hereinafter described,

NOW, THEREFORE, in consideration of the premises and the mutual covenants of the parties hereto as hereinafter set forth, it is hereby agreed by and between the parties hereto as follows, to-wit:

FIRST: COMPANY contracts and agrees to lay the water main(s) and other related facilities, if any, as shown in red on the plat attached hereto and made a part hereof, marked Exhibit "B" for identification, which main(s) and facilities, if any, are described and located as follows:

SECOND: It is expressly understood and agreed that if COMPANY shall be delayed or prevented from

installing the water main(s) and other related facilities, if any, hereinabove described because of its failure to secure pipe or other construction materials, or for any other causes beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than ninety (90) days from date of deposit, SUBDIVIDER shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to COMPANY, and thereafter both parties shall be relieved of all duties

and obligations arising hereunder. But this right to cancel and terminate by SUBDIVIDER shall not be invoked if COMPANY has received the construction material and SUBDIVIDER has made the deposit as hereinafter required, in which event COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: SUBDIVIDER hereby agrees to deposit with COMPANY, upon notice from COMPANY that it is prepared and able to go forward with the work provided in Paragraph FIRST hereof, the sum of _____, which sum is the presumed cost of installation of said off site main(s) and related facilities, if any, as determined under Section C(4) of Rule 10.3 of COMPANY'S Rules and Regulations. No adjustment in deposit will be made, either by way of adding to or reducing the deposit required hereunder, because of a variance between the presumed cost mentioned herein and the actual cost of installation of such main(s) and related facilities, if any.

FOURTH: SUBDIVIDER represents to and covenants with COMPANY that the number of residential and/or commercial building plots to be developed within the whole of said subdivision, as shown on the plat attached hereto as Exhibit "B", being a total of _____building plots, will not be decreased in the final plats of said subdivision as the same are hereafter recorded in the office of the Clerk of the Fayette County Court. Upon such representation and covenant, COMPANY hereby agrees to refund to SUBDIVIDER during the period of ten (10) years from the actual date of deposit, an amount equal to _____ of the total deposit made by SUBDIVIDER under the terms of Paragraph THIRD above, being the sum of _____, for each premises served within said subdivision (as said subdivision is depicted on the plat attached hereto and marked Exhibit "B" for identification) for which a street service connection shall be directly attached to the mains constructed on the site of such subdivision between their original beginning and original termini (not including, however, connections to further extensions or branches thereof, and being limited to one such service connection per building plot) and for which a bona fide residential or commercial customer has executed a service contract with COMPANY, provided, however, that the total amount returned shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said

ten (10) year period shall become the property of COMPANY.

FIFTH: SUBDIVIDER may request refunds under Paragraph FOURTH, once in each calendar quarter, furnishing COMPANY, at such time, a listing of premises claimed to be additional premises; however, failure on the part of SUBDIVIDER to make such request shall not constitute a waiver of any rights hereunder or relieve COMPANY of the obligation to make refunds with reasonable promptness.

SIXTH: SUBDIVIDER will furnish to COMPANY immediately upon recordation thereof in the office of the _____ County Court five (5) copies of the final plat of said subdivision or units thereof as approved by the _____ Commission.

SEVENTH: The ownership of the water main(s) laid hereunder shall at all times be in COMPANY, its successors and assigns.

EIGHTH: This Agreement shall be valid and binding on COMPANY only when executed by its President.

NINTH: This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the respective parties.

TENTH: Any notice given hereunder shall be deemed sufficient if in writing and sent by registered mail to COMPANY at 2300 Richmond Road, Lexington, Kentucky and to SUBDIVIDER at _____.

ELEVENTH: This Agreement is entered into pursuant to the legally established Rules and Regulations of COMPANY and the words, phrases and terms hereof are to be understood and interpreted in conformity with said Rules and Regulations, which are hereby incorporated herein by reference.

Executed by the parties hereto in duplicate this the day and year first above written.

Original Sheet No. A-6

FIRST: COMPANY contracts and agrees to lay the water main(s) and other related facilities, if any, as shown in red on the plat attached hereto and made a part hereof, marked Exhibit 'A' for identification, which main(s) and facilities, if any, are described and located as follows:

SECOND: It is expressly understood and agreed that if COMPANY shall be delayed or prevented from installing the water main(s) and other related facilities, if any, hereinabove described because of its failure to secure pipe or other construction materials, or for any other cause beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than ninety (90) days from date of deposit, SUBDIVIDER shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to COMPANY, and thereafter both parties shall be relieved of all duties and obligations arising hereunder. But this right to cancel and terminate by SUBDIVIDER shall not be invoked if COMPANY has received the construction material and SUBDIVIDER has made the deposit as hereinafter required, in which event COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: SUBDIVIDER hereby agrees to deposit with COMPANY, upon notice from COMPANY, that it is prepared and able to go forward with the work provided in Paragraph FIRST hereof, the sum of _____**,** which sum is the presumed cost of installation of said on-site mains and related facilities, if any, as determined under Section C(4) of Rule 10.3 of COMPANY'S Rules and Regulations. No adjustment in deposit will be made, either by way of adding to or reducing the deposit required hereunder, because of a variance between the presumed cost mentioned herein and the actual cost of installation of such main(s) and related facilities, if any.

FOURTH: SUBDIVIDER represents to and covenants with COMPANY that the number of residential and/or commercial building plots to be developed within said subdivision, as shown on the plat attached hereto as Exhibit "A", being a total of _____ building plots which, according to Section A(2) of Rule 10.3 of COMPANY's Rules and Regulations, is equal to _____ lots, will not be decreased in the final plat of said subdivision as the same is hereafter recorded in the office of the Clerk of the Fayette County Court. Upon such representation and covenant, COMPANY hereby agrees to refund to SUBDIVIDER, during the period of ten (10) years from the actual date of deposit, an amount equal to _____ of the total deposit made by SUBDIVIDER under the terms of Paragraph THIRD above, being the sum _____**,** for each premises served within said subdivision (as said subdivision is depicted on Exhibit "A" attached hereto) for which a street service connection shall be directly attached to the main extension herein provided between its original beginning and original terminus (not including, however, connections to further extensions or branches thereof, and being limited to one such service connection per

building plot) and for which a bona fide residential or commercial customer has executed a service contract with COMPANY, provided, however, that the total amount returned shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said ten (10) year period shall become the property of COMPANY.

FIFTH: SUBDIVIDER may request refunds under Paragraph FOURTH, once in each calendar quarter, furnishing COMPANY, at such time, a listing of premises claimed to be additional premises; however, failure on the part of SUBDIVIDER to make such request shall not constitute a waiver of any rights hereunder or relieve COMPANY of the obligation to make refunds with reasonable promptness.

SIXTH: As a material consideration for COMPANY'S agreement to design and construct all or some portion of the main(s) and related facilities, if any, described on Exhibit "A" and in Paragraph FIRST hereof on the basis of a preliminary plat of said subdivision, without withholding or delaying such action until a final plat thereof has been approved by the Planning and Zoning Commission and recorded in the office of the Clerk of the Fayette County Court, SUBDIVIDER represents to COMPANY and covenants with COMPANY that the location and grade of streets, sidewalks, curbs, building plots, building lines and utility easements as depicted on the preliminary plat attached hereto as Exhibit "A" will not be altered or changed in any respect in the final plat of said subdivision, as finally approved by the Lexington-Fayette County Planning and Zoning Commission and as recorded in the office of the Clerk of the Fayette County Court. In the event the location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements be altered, amended or changed in the final plat or in an amended plat of said subdivision as approved by said Commission or as recorded in the office of said Clerk, whether such changes are made with or without the consent of SUBDIVIDER, or in the event a final plat is not approved or recorded, and in event such alteration, amendment, change, failure of approval or of recording requires, in the sole judgment of COMPANY, the relocation, removal, replacement, reconstruction, change in size or addition to the main(s) and related facilities to be constructed by COMPANY pursuant to the Agreement, SUBDIVIDER will immediately, upon demand from COMPANY, pay to COMPANY the actual cost to COMPANY of making such relocations, removals, replacements, changes in sizes and additions to such main(s) and related facilities, if any, so required in the sole judgment of COMPANY, as a result of such changes in location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements. No part of the sums payable to COMPANY by SUBDIVIDER under the terms and provisions of this Paragraph SIXTH shall be subject to refund to SUBDIVIDER. In event SUBDIVIDER fails to pay to COMPANY such sums as may be demanded by COMPANY under provisions of this Paragraph SIXTH within ten (10) days from such demand, COMPANY shall have the right, in addition to and not in limitation of all other remedies, which right shall be superior to the rights of any intervening assignee or creditor of SUBDIVIDER, to apply refunds coming due under Paragraph FOURTH of the Agreement to the reduction and extinguishment of the debt of SUBDIVIDER to COMPANY under terms of this Paragraph SIXTH.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. A-8

SEVENTH: By execution of this Agreement, SUBDIVIDER grants unto COMPANY, its successors and assigns, the permanent right and privilege to lay and construct its main(s) and related facilities, if any, on, over and through the lands of SUBDIVIDER at the locations depicted on Exhibit "A" and described in Paragraph FIRST above, together with the right to enter upon the adjacent lands of SUBDIVIDER for the purpose of installing,

construction, repairing, renewing, replacing and inspecting such main(s) and related facilities, if any.

EIGHTH: SUBDIVIDER will furnish to COMPANY immediately upon recordation thereof in the office of the Clerk of _____ five (5) copies of the final plat of said subdivision as approved by the _____.

NINTH: The ownership of the water main(s) laid hereunder shall at all times be in COMPANY, its successors and assigns.

TENTH: This Agreement shall be valid and binding on COMPANY only when executed by its Director of Engineering.

ELEVENTH: This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the respective parties.

TWELFTH: Any notice given hereunder shall be deemed sufficient if in writing and sent by registered mail to COMPANY at 2300 Richmond Road, Lexington, Kentucky and to SUBDIVIDER at _____.

THIRTEENTH: This Agreement is entered into pursuant to the legally established Rules and Regulations of COMPANY and the words, phrases and terms hereof are to be understood and interpreted in conformity with said Rules and Regulations, which are hereby incorporated herein by reference.

Executed by the parties hereto in duplicate this the day and year first above written.

KENTUCKY-AMERICAN WATER COMPANY

P.S.C. KY NO. 12
Original Sheet No. A-10

APPLICATION FOR SPECIAL CONNECTION

Account No.	
Contract No.	
WBS Element No.	

This Application, made in duplicate this _____day of _, 20 _____ _____, by _____, hereinafter called the "APPLICANT", to KENTUCKY AMERICAN WATER, a Kentucky corporation located at 2300 Richmond Road, Lexington, Kentucky, 40502, hereinafter called the 'WATER COMPANY."

The APPLICANT, upon the terms and conditions _____ hereinafter set forth, hereby applies to the WATER COMPANY for a private service, consisting of the right to connect a service pipe to a public water main on _____ in Lexington and attach to said service pipe the following fixtures and openings:

One (1) _____-inch fire service to supply ; one _____-inch service line, post indicator and valve with all related fittings to supply a sprinkler system of approximately _____ sprinkler heads, covering approximately _____ square feet of _____ space;

all of which fixtures and openings to be located within or upon the premise of the APPLICANT abutting the street on which the said main of the WATER COMPANY is located.

In consideration for which privilege the APPLICANT agrees to be bound by all the terms and conditions of this Application and pay the WATER COMPANY for private fire protection service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this Application may be accepted by the WATER COMPANY are as follows:

FIRST: That this Application and the acceptance thereof by the WATER COMPANY may be subject to the prior approval of the fire department having jurisdiction of the premises to be served.

SECOND: That the entire service system on APPLICANT's premises shall be subject to the inspection, test and approval of the WATER COMPANY, and the WATER COMPANY by its representatives, shall have the right to enter the premises of the APPLICANT at any reasonable time for the purpose of making such reasonable inspections as it may deem necessary, and to insure compliance with the terms and conditions of this Application.

THIRD: That all pipes and appurtenances shall be constructed and maintained in good condition by and at the expense of the APPLICANT.

FOURTH: That a fire line meter or detector device, approved by both the WATER COMPANY and the fire underwriters, will be required on the service at a location approved by the WATER COMPANY. Such meter or device shall be installed and maintained by and at the cost and expense of the APPLICANT, but subject to the inspection and approval of the WATER COMPANY. The bypass meter only, used with the detector device, shall be furnished, installed and maintained by the WATER COMPANY at its cost and expense.

FIFTH: That a gate valve with the post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the WATER COMPANY, and shall be furnished, installed and maintained by and at the expense of the APPLICANT, and unless otherwise approved by the WATER COMPANY, said valve shall be installed in a valve pit or vault which shall also be furnished, installed and maintained by and at the expense of the APPLICANT.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 12**
Original Sheet No. A-11

SIXTH: That all hydrants and other fixtures connected to any private fire protection service system shall be kept closed and sealed, and not opened or used except during times of fire or testing. Upon extinguishment of each fire or following each test, the APPLICANT shall immediately close such fixtures and notify the WATER COMPANY so that they may be sealed. Whenever a private fire protection service system is to be tested, the APPLICANT shall notify the WATER COMPANY at least two business days in advance of such proposed test, requesting approval of the method, day and hour on which it is to be made.

SEVENTH: That no antifreeze or any other substance not specifically approved by the Environmental Protection Agency as non-detrimental to the public water supply, shall be introduced into sprinkling systems or into any pipe, fixture, appurtenance or other portion of the APPLICANT's private fire protection service system.

EIGHTH: That the APPLICANT understands and agrees that the extent of the rights of the APPLICANT under this Application is to receive, at times of fire on said premises, such supply of water as shall then be available and no other or greater quantity. The APPLICANT further acknowledges and agrees the WATER COMPANY shall not be considered in any way or manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and the WATER COMPANY shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

NINTH: That this Application does not contemplate uses of fixtures other than those shown on Exhibit A. Any waste of water or use of water through this connection for purposes other than testing or the extinguishment of fire, shall be deemed a violation of the terms and conditions of this Application and of the rules, regulations and conditions of service of the WATER COMPANY.

TENTH: That if private fire hydrants are included as part of this Application, they shall be painted any color other than that adopted by the WATER COMPANY for public fire hydrants.

ELEVENTH: That the APPLICANT shall furnish, attach and make a part hereof marked Exhibit A, three (3) complete sets of drawings showing the pipes, pumps, valves, hydrants, sprinkler systems, hose outlets and connections, standpipes, tanks and other openings and appurtenances contemplated in this Application. Such drawings, which shall be stamped "Approved" by the Insurance Services Office or other comparable agency approved by the WATER COMPANY, must also show all other water supply systems and pipelines and appurtenances which are proposed or which may exist on the premises to be served.

TWELFTH: That no pipe, fixture or appurtenance connected with the private fire protection service served by this Application shall be connected with any pipe, fixture or appurtenance supplied with water from any other source, unless specifically approved in writing by the WATER COMPANY.

THIRTEENTH: That the APPLICANT agrees to obtain in writing in advance the approval of the WATER COMPANY for any change, alteration, addition or deletion contemplated in the pipes, fixtures, openings and appurtenances and uses herein specified. Notwithstanding the approval of the WATER COMPANY, APPLICANT agrees that, except for those facilities which the WATER COMPANY had specifically agreed to provide and maintain, APPLICANT is and will be solely responsible for the design, adequacy, function and maintenance of its private fire protection service system referred to in this Application.

FOURTEENTH: That the WATER COMPANY has the right to discontinue or disconnect the service pipe herein applied for, and to terminate service under this Application, after due written notice to the APPLICANT, for failure to pay any bill when due, for failure to supply information to WATER COMPANY about the service system when so requested in writing, for leakage within APPLICANT's system, for violation of any of the terms and conditions of this Application, or for any violation of its rules, regulations and conditions of service; and the WATER COMPANY also has the right to shut off all or any part of its facilities by the WATER COMPANY(1) if a condition dangerous or hazardous to life, physical safety or property exists, (2) upon order by any court, the Public Service Commission or other duly authorized public authority, (3) if fraudulent or unauthorized use of water by APPLICANT is detected, or if the WATER COMPANY's regulating or measuring equipment has been tampered with by the APPLICANT.

FIFTEENTH: That upon acceptance of this Application by the WATER COMPANY and the completion of the installation of the service applied for, this Application shall be in full force and effect as a contract and shall continue as such until cancelled by written notice given thirty (30) days in advance by the APPLICANT to the WATER COMPANY, except as otherwise provided in numbered paragraph (14) above.

SIXTEENTH: The acceptance of this Application by the WATER COMPANY must be executed by its Director of Engineering before same

becomes effective.

SEVENTEENTH: If ownership of the property served by the service applied for herein changes, notice thereof shall be given to the WATER COMPANY within thirty (30) days and the new owner shall be identified by name, address and proper person to contact.

EIGHTEENTH: That the APPLICANT or his agent is responsible for payment of the deposit for the estimated cost of construction to WATER COMPANY. To the extent there is any refund to be made at the end of the project after all costs are accrued, such refund will be paid to the APPLICANT by check made payable to the APPLICANT. To the extent that any amount is owed to WATER COMPANY at the end of the project after all costs are accrued, payment of such amounts is the responsibility of the APPLICANT. To the extent the APPLICANT owes any of the refunded amount to the contractors, APPLICANT agrees it is responsible for these amounts owed and that WATER COMPANY has no responsibility in that regard.

1. DEFINITIONS APPLICABLE TO RULES & REGULATIONS

1.1 "Commission" means the Kentucky Public Service Commission.

1.2 "Company" shall mean the Kentucky-American Water Company acting through its officers, managers, or other duly authorized employees or agents.

1.3 "Customer" shall mean any person, firm, corporation, entity or municipality supplied with water service by Kentucky-American Water Company pursuant to these Rules and Regulations.

1.4 "Bona fide prospective customer" shall mean any owner or lessee who is to be the occupant of an existing developed premises having a curb line abutting on that part of a street or public highway in which there is, or is to be, located a distribution main of the Company, who shall file a signed application for a new street service connection and for water service to such premises to be occupied.

1.5 "Residential" – Sales to single premise residences, or to multiple premises residences where each premises is served through a single Meter. Sprinkler services added to existing premises coded as residential would also be coded as residential. For premises served through a single Meter with multiple owners, where usage is primary for residential purposes, and the water is billed to a homeowner association such as a condominium complex they will be classified as residential and charged the residential rate.

1.6 "Commercial" – Sales to multiple premises residences served through a single Meter or battery of Meters. This would include two (or more) family houses and apartment houses. Sales to private schools, colleges, hospitals, churches and other private educational, cultural, social or religious organizations. Sales to business or manufacturing establishments where the water is not used principally in manufacturing or processing functions. This would include commercial offices of public utilities. Examples under this category are: stores, laundries, cleaners, shoe repair and other service establishments, garages and service stations, office buildings, sales offices or manufacturing or processing establishments, retail florists, theaters, bowling alleys, swim clubs, golf courses, manufacturing or processing establishment where water is used principally for sanitary purposes, barber shops. Water used for irrigation for agricultural purposes would normally be coded as commercial. Sprinkler services added to existing premises coded as commercial or industrial would also be coded as commercial.

1.7 "Industrial" – Sales to manufacturing of processing establishments where the water is used principally in manufacturing or processing function. This would include public or private utility plants using water for steam generation, power production, etc.

1.8 Other Public Authority or "OPA" – Sales to municipal, county, state or federal agencies (other than the sales of water for resale). Examples under this category are: city buildings, public schools, public housing developments, libraries and hospitals, fire stations, county, state and federal buildings and agencies.

1.9 Sales for Resale or "Resale" – Sales to private or public water utilities where the water is to be resold to customers of the utilities.

1.10 "Meter" means a device which measures and records the quantity of water supplied to a Customer.

1.11 "Company Service Line" means that portion of the water service line and appurtenances from the main to the Customer Service Line that is paid for and/or owned by the Company.

1.12 "Customer Service Line" means that portion of the water service line and appurtenances from the Customer's Premises to the Company Service Line, which is paid for and/or owned by the Customer. When the Meter is outside the Premises, the Customer Service Line is from the Meter pit to the Premises. When the Meter is inside the Premises, the Customer Service Line is from the stop box to the Premises.

1.13 "Premises" as contemplated in these Rules, shall mean and include:

1.13.1 A building under one roof and occupied as one business or residence; or

1.13.2 A combination of buildings owned or leased by one party in one common enclosure or a single tract of land not crossed by public streets, roads, or ways, and occupied by one family or business; or

1.13.3 a building owned or leased by one party, having two or more apartments, offices, or suites of offices, and using one or more halls and entrances in common; or

1.13.4 a double house having a solid vertical partition wall or a building erected as a single family residence served through one street service connection and subsequently converted into apartments or offices or a combination of such, and where separate water supply plumbing would not be practicable; or

1.13.5 each residential or business single occupancy unit, served through one street service connection in a building which is not a premise otherwise defined in these Rules.

1.13.6 any other location at which the Company provides metered service to a Customer in

Issued by authority of an Order of the Public Service Commission in Case No. 2025-00122 dated Dec. 16, 2025

1.8 Other Public Authority or "OPA" – Sales to municipal, county, state or federal agencies (other than the sales of water for resale). Examples under this category are: city buildings, public schools, public housing developments, libraries and hospitals, fire stations, county, state and federal buildings and agencies.

1.9 Sales for Resale or "Resale" – Sales to private or public water utilities where the water is to be resold to customers of the utilities.

1.10 "Meter" means a device which measures and records the quantity of water supplied to a Customer.

1.11 "Company Service Line" means that portion of the water service line and appurtenances from the main to the Customer Service Line that is paid for and/or owned by the Company.

1.12 "Customer Service Line" means that portion of the water service line and appurtenances from the Customer's Premises to the Company Service Line, which is paid for and/or owned by the Customer. When the Meter is outside the Premises, the Customer Service Line is from the Meter pit to the Premises. When the Meter is inside the Premises, the Customer Service Line is from the stop box to the Premises.

1.13 "Premises" as contemplated in these Rules, shall mean and include:

1.13.1 A building under one roof and occupied as one business or residence; or

1.13.2 A combination of buildings owned or leased by one party in one common enclosure or a single tract of land not crossed by public streets, roads, or ways, and occupied by one family or business; or

1.13.3 a building owned or leased by one party, having two or more apartments, offices, or suites of offices, and using one or more halls and entrances in common; or

1.13.4 a double house having a solid vertical partition wall or a building erected as a single family residence served through one street service connection and subsequently converted into apartments or offices or a combination of such, and where separate water supply plumbing would not be practicable; or

1.13.5 each residential or business single occupancy unit, served through one street service connection in a building which is not a premise otherwise defined in these Rules.

1.13.6 any other location at which the Company provides metered service to a Customer in

accordance with these Rules regardless of whether there is a structure or building at that exact location.

1.14 “Fire Service Connection” is one to which is attached fixtures from which water is taken only for the extinguishment of fire.

1.15 "Public Fire Hydrant" - All public fire hydrants contracted for or ordered by Urban County, Municipality, County, State or Federal Agencies or Institutions. These must be located on or immediately adjacent to public right-of-way.

1.16 "Private Fire Hydrant" – All hydrants contracted for or by private entities on private property for the use of that entity or on private right-of-way. Also for public agencies for hydrants not located on public right-of-way.

1.17 “New Private Fire Hydrant Service” is available to areas before such time as a unit of government shall agree to pay public fire protection charges thereon in accordance with Rule 11 herein.

1.18 "Private Fire Service" – All private and public fire protection service lines with hose connections or sprinkler systems charged by line size.

1.19 “Temporary Service Connection” is one which is installed for the temporary use of water, including service to individual mobile homes. Provided: They are located on lots having a curb line abutting on that part of a street or public highway in which there is, or is to be, located a distribution main of the Company extending for at least one-half of the frontage of the lot on said street or highway.

1.20 “Rate” means the Company’s Schedules of Rates and Tariffs then in effect.

1.21 “Rules” or “Rule” means these Company Rules and Regulations applicable to water service.

2. SERVICE & APPLICATIONS

2.1 Rules and Regulations Governing Rendering of Service

(a) The Rules and Regulations in their entirety as hereinafter set forth or as they may hereafter be altered or amended in a regular and legal manner shall govern the rendering of water service and every Customer will be bound thereby. The Rules and Regulations and Service Classifications contained in this tariff apply in the service territory of Kentucky-American

Water Company.

(b) Except fire and some special connection services, all service will be rendered on a Meter basis. Residential, commercial, industrial and OPA service are only regularly available for single Premises as "Premises" is defined in these Rules.

2.2 Requests for Water Service

(a) All persons, entities, firms, corporations or OPA's desiring water service, must request service from the Company in a manner prescribed by the Company, setting forth all purposes for which water will be used at the Premises for which service is requested. All information provided by the Customer must be true, accurate and kept up to date.

(b) Any change in the identity of the Customer at a Premises will require a new request for water service and the Company may, after reasonable notice, discontinue the water supply until such new request has been made and accepted.

(c) A Customer who has requested service and been accepted by the Company, shall be held liable for all water service furnished to the Premises until such time as the Customer properly notifies the Company to discontinue the service for his/her account at the Premises.

(d) An activation fee will be charged in accordance with the Company's Tariff.

(e) No Customer receiving water service from the Company will be permitted to use water for any other purpose than that for which they shall have requested and the Company shall have approved.

(f) The Company may refuse service to a Customer with an outstanding, unpaid balance due until the Customer pays the balance due.

2.3 Special Arrangements for Water Service

(a) Water for building or construction purposes must be specially applied for.

(b) Connections for private fire service and private fire hydrant service must be specially applied for.

(c) Water for transient or temporary purposes must be specially applied for.

3. BILLING, ABATEMENTS & REFUNDS

3.1 Abatements and Refunds

Abatement shall be made for leaks in service pipes or fixtures belonging to the Customer in accordance to Tariff.

3.2 Meter Bill Adjustment

(a) Whenever a Meter in service is found upon periodic request or complaint test to be more than two percent (2%) fast, additional tests shall be made at once to determine the average error of the Meter. Said tests shall be made in accordance with the Commission's regulation applicable to the type of Meter involved. Meter testing shall be conducted in accordance with the then-applicable Rules.

(b) Determination of Meter Error for Bill Adjustment Purposes. When upon periodic request or complaint test, a Meter is found to be in error in excess of the limits allowed by the Commission's regulations, three additional tests shall be made; one at 75% of rated maximum capacity; one at 50% of rated maximum capacity; one at 25% of rated maximum capacity. The average Meter error shall be the algebraic average of the errors of the three tests.

(c) If the result of tests on a Customer's Meter shows an average error greater than two percent (2%) fast, then the Customer's bill, for the period during which the Meter error is known to have existed, shall be recomputed and the account adjusted on the basis of the test. If the period during which the error existed cannot be determined with reasonable precision, the time period shall be estimated using the data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of a similar class of customers shall be used for comparison purposes in calculating the time period. (See exception in Section (f) of this Rule).

(d) If the result of tests on a Customer's Meter shows an average error greater than two percent (2%) slow, then the Customer's bill for the period during which the Meter error is known to have existed, may be recomputed and the account adjusted on the basis of the test. If the period during which the error existed cannot be determined with reasonable precision, the time period shall be estimated using the data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of a similar class of customers shall be used for

comparison purposes in calculating the time period. The Company will limit the period of recovery for under-billing to only the most recent twelve (12) months of under-billing, even if the under-billing occurred for a longer period.

(e) It shall be understood that when a Meter is found to have an error in excess of two percent (2%) fast or slow the figure for calculating the amount of refund or the amount to be collected by the Company shall be that percentage of error as determined by the test; i.e., it is the duty of the Company to maintain the accuracy of its measuring device as nearly one hundred percent (100%) as is commercially practicable. Therefore, percent error shall be that difference between one hundred percent (100%) and that amount of error as indicated by the test.

(f) The burden of maintaining measuring equipment so that it will register accurately is upon the Company; therefore, if Meters are found upon test to register fast and if time for periodic test has overrun to the extent that one-half (1/2) of the time elapsed since the last previous test exceeds twelve (12) months, the refund shall be as specified in Section C of this Rule and in addition thereto, a like refund for those months exceeding the periodic test period; provided, however, that the Commission may relieve the utility from this requirement in any particular case in which it is shown that the failure to make the periodic test was due to causes beyond the utility's control.

3.3 Terms and Conditions of Billing and Payment

(a) All fire service charges shall be payable monthly in arrears.

(b) Bills for water service by Meter will be rendered monthly with ending dates as may be determined by the Company.

(c) Bills for private fire hydrants shall be payable monthly in advance, except that the charges for private fire hydrant service shall be payable as set forth in Rule 11.

(d) Special charges shall be payable upon demand.

(e) All bills for water and service are due and payable when rendered and are considered delinquent if not paid in accordance with Tariff and Commission regulations. Failure to pay will render the Customer subject to disconnection and subject to payment of reconnection in Tariff. If any bill for water service is not paid in accordance with Tariff, the service may be discontinued in accordance with Rule 4, Disconnecting & Reconnecting Service.

(f) Customers are responsible for furnishing the Company with their correct billing

addresses (email or postal address). Failure to receive bills will not be considered an excuse for non-payment nor permit an extension of the date when the account would be considered delinquent.

(g) All bills will be sent to the billing address (email or postal address) provided when requesting water service unless the Company is notified in writing by the Customer of any change of billing address.

(h) The Company will not be bound by bills rendered under mistake of fact as to the quantity of service rendered.

(i) The use of water by the same Customer in different Premises or localities will not be combined.

(j) If for any reason service is discontinued before the expiration of twenty-five (25) days from commencement of service, a bill for a prorated portion of the minimum service charge for the month will be rendered.

(k) Residential Customers may elect to participate in a monthly budget billing payment plan. Under such a plan, Customers shall pay a fixed monthly amount determined by the Company based on historical or estimated usage. A Customer may enroll in such a plan at any time by contacting the Company. The Company will issue bills so as to bring each customer's account current once each 12-month period or through a series of levelized adjustments on a monthly basis if usage indicates that the account will not be current upon payment of the last monthly budget amount. If a Customer fails to pay bills as required under the plan, the Company reserves the right to remove the Customer from the plan, restore the customer to regular billing, and require immediate payment of any deficiency.

4. DISCONNECTING AND RECONNECTING SERVICE

4.1 Discontinuance of Water Service

(a) Water service will be discontinued to any Premises on account of temporary vacancy upon request of the Customer, without in any way affecting the agreement in force, and upon payment of all charges due as provided for in the Rates and Rules of the Company.

(b) The Company shall discontinue the Customer's service for violation of any Rule or for non-payment of bills upon providing the Customer with at least ten (10) days written notice

delivered by mail or personally delivered to him/her or a member of his/her household, advising the Customer of what Rule had been violated and for which service will be discontinued if violation continues. However, discontinuance of service shall be effected no less than twenty (20) days after the mailing date of the original bill unless, prior to discontinuance, a residential customer presents to the Company a written certificate, signed by a physician, registered nurse or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises. In that case, discontinuance may not be effected for thirty (30) days beyond the termination date as calculated above. Where fraudulent use of water is detected, or where the Company's regulating or measuring equipment has been tampered with, or where a dangerous condition is found to exist on the Customer's Premises, service may be shut off without advance notice. Subject to the foregoing provisions, service rendered under any application, contract or agreement may be discontinued by the Company for any of the following reasons:

i. For willful or indifferent waste of water due to any cause which adversely affects either water service to other Customers or the Company's utility operation.

ii. For failure to protect from injury or damage the Meter and connections, or for failure to protect and maintain the service pipe or fixtures on the property of the Customer, in a condition satisfactory to the Company.

iii. For interfering or tampering by the Customer, or others with the knowledge of the Customer, with any Meter, connection, service pipe, curb stop, seal or any other appliance of the Company controlling or regulating the Customer's water supply.

iv. For failure to provide the Company's employees free and reasonable access to the Premises or for obstructing the way of ingress to the Meter or other appliance of the Company controlling or regulating the Customer's water supply (with at least fifteen (15) days advance written notice).

v. For non-payment of any account for water supplied, for water service, or for Meter or service maintenance, or for any other fee or charge at the Premise accruing under these Rates and Rules. Discontinuation of service for non-payment on an account shall only be made at the Premise associated with that Account and will not occur for other accounts held by the same Customer that are current in payments unless the Customer has requested multiple accounts or premises be combined for billing purposes.

vi. In case of vacancy of the premises.

vii. For violation of any other Rule or Regulation of the Company or State and Municipal Rules and Regulations applying to the Company's water service.

(c) In cases where plumbing has been installed prior to adoption of and not in accordance with these Rules, and where water is being taken through a single service pipe to supply two or more Premises, the party making application shall be responsible for all water bills and other legitimate charges. Any violation of the Company Rules with reference to either or any of the said Premises or for the supply of water thereto, shall be deemed a violation as to all, and the Company may enforce compliance with these Rules by shutting off the entire service except that such action will not be taken until the innocent Customer who is not in violation of the Company's Rules, has been given a reasonable notice and opportunity to attach his pipes to a separately controlled curb stop, to be provided by and at the expense of the Company.

(d) Discontinuing the supply of water to a Premises for any such reason shall not prevent the

Company from pursuing any lawful remedy by action at law or otherwise for the collection of moneys due from the Customer.

4.2 Renewal of Water Service After Discontinuance

(a) When water service to a Premises has been terminated for any reason other than temporary vacancy, it will be renewed only after the conditions, circumstances or practices which caused the water service to be discontinued are corrected to the satisfaction of the Company, and upon payment of all charges due and payable by the Customer in accordance with the Rates and Rules.

(b) No Customer whose service has been turned off shall turn on same, or have same done by anyone other than the Company.

4.3 Reconnection Charge

When it has been necessary to discontinue water service to any Premises because of a violation of the Rules or on account of non-payment of any bill, a charge will be made to cover the expense as set forth in the Company's Schedule of Rates and Charges. This charge, together with any arrears that may be due the Company for charges against the Customer, must be paid before the water will be reconnected.

5.1 Customer Complaints

Any complaint against the service or employees of the Company may be made at the office of the Company or by telephone, mail or email. The Company will handle all Complaints in accordance with regulatory requirements.

6. METERS, TESTING AND ACCURACY

6.1 Meters

(a) Water will be sold by Meter measurement only.

(b) All Meters, except private detector devices and/or private service line Meters, will be installed, maintained and replaced by, and at the expense of the Company, but in case of damage to such Meters by reason of any act, neglect or omission on the part of the Customer (such as damages occasioned by accident or misuse or purposeful actions) the Customer shall pay to the Company the cost of its repair on presentation of bill therefore.

(c) The Company reserves the right to determine the kind and size of Meter that shall be placed on any service pipe, and such Meters will be furnished, installed and removed by the Company alone, and shall remain its property.

(d) Each Premise shall be supplied through an independent Meter setting.

(e) If more than one Meter setting is installed upon a Customer's Premise, the usage of all Meters on a Premise may be combined for billing purposes if so requested by the Customer. Combined billing will be continued as long as the Premises criteria is met.

(f) All Meters are accurately tested before installation and are also periodically tested in accordance with the Public Service Commission's regulations. The Company may at any time remove any Meter for periodic tests or for repairs or replacement and may, at its option and expense, test any Meter when the Company has reason to believe that it is registering inaccurately.

(g) The Company shall make any test of any Meter upon written request of the Customer if the request is not made more frequently than once each twelve (12) months. The Customer shall be given the opportunity to be present at the requested test. The Customer may be billed the actual cost of making the test, but should the said Meter be found, upon said test, to be more than two percent incorrect to the prejudice of the Customer, the fee so charged shall be returned to the Customer.

(h) The Company reserves the right to put seals on any water Meter, or on couplings in and for any premises, and may shut off the supply if such seals are found broken or removed.

(i) Once any Meter has been placed, any change in location requested by the Customer will be done by the Company, at the expense of the Customer, if the location is acceptable pursuant to 6.1(k).

(j) Monitoring of Customer usage shall be in compliance with the then-applicable Rules and Regulations. The Company monitors Customer usage on a monthly basis through its collection of usage information. Upon the collection of that information, the Company compares usage for a particular month with a Customer's historical usage. To the extent the current month's usage shows an unusual deviation from historical usage, the Company will notify the Customer and take steps to determine the reason for the unusual deviation.

(k) Meters may be located either in an outdoor Meter box or vault, at the option of the Company. The location of the Meter must be acceptable to the Company and allow for the Meter to be easily examined, tested, repaired, read, removed or replaced. The Meter box or vault shall be located in a convenient and readily accessible location acceptable to the Company. The Meter box or vault must be constructed to protect the Meter from freezing and damage by vehicular traffic, and its location and design shall prevent, as far as possible, the inflow of surface water. After a Meter is installed by the Company, a Customer shall not tamper with, alter, repair or remove the Meter or allow anyone other than the Company to do so. Any plumbing, piping, grading or structural modification which could result in the relocation of the Meter or impact accessibility must first be approved by the Company.

6.2 Accuracy Requirements of Water Meters

(a) General. All meters used for measuring the quantity of water delivered to a customer shall be in good mechanical condition and shall be adequate in size and design for the type of service which they measure.

(b) Determination of Accuracy. No new, rebuilt or repaired meter shall be placed in service if it registers outside the parameters established in the then-applicable Rules and Regulations.

(c) As Found Tests. All meters tested in accordance with the rules for periodic, request or complaint tests, shall be tested in the condition as found in the Customer's service prior to any alteration or adjustment in order to determine the average meter error.

7. PROTECTION OF PUBLIC WATER SYSTEM

7.1 Intercepting and Storage Tanks

(a) Customer Service Lines shall not be connected to the suction side of pumps, unless approved by the Company. Customers who require a large quantity of water within a short period of time must have intercepting or intermediate storage tanks, pump discharge control valves, or other controls approved by the Company.

(b) The inlet connection for the tanks attached directly or indirectly to the Customer Service Line shall discharge at a point no less than two (2) times the diameter of the inlet pipe above the overflow of such tanks and must be approved by the Company.

7.2 Check Valves, Flush Valves and Vacuum Breakers

(a) Customers having boilers or hot water heating systems connected with mains of the Company must have a check valve in the supply pipe to the boilers and hot water heating systems, together with a relief valve at some point between the check valve and heating system. A vacuum valve should be installed, in accordance to applicable plumbing requirements, in the steam line to prevent collapse in case the water supply is interrupted. The Company, however, will not be responsible for accidents or damages resulting from the imperfect action or failure of said valves.

(b) Flush valve or direct flushing closets should not be installed in Premises where the service pipe supplying such Premises is connected to a main two inches or less in diameter. All flush valves shall be equipped with approved type vacuum breakers.

7.3 Plumbing Work Must Be Approved by Company

All plumbing work done in connection with pipe and fixtures connected with the Company's mains shall be submitted for the approval of the Company before such work is covered up. Whenever the Company determines that plumbing work is defective, the Company may require it be corrected before the water will be turned on.

7.4 Cross-Connections

(a) No cross-connection will be permitted unless an acceptable form of protection against contamination by backflow into the water distribution system is provided by a testable backflow prevention assembly. Acceptable forms of protection must comply with all applicable state and local requirements and approved by the Company. The required protective device or system shall be provided, installed and maintained by the Customer in good working condition, at the

Customer's expense, and shall be subject to testing and approval of the Company before being placed in service, and at such times thereafter as may be deemed necessary by the Company.

(b) Any cross-connection existing which is in violation of these Rules shall be immediately removed or corrected. Failure of the Customer to do so may result in immediate termination of water service in accordance with Rule 4.

8. RIGHTS AND RESPONSIBILITIES

8.1 Customers Requiring Uninterrupted Supply

(a) The Company will endeavor to give reasonable service but does not guarantee a sufficient or consistent pressure or an absolutely uninterrupted supply of water, and Customers are cautioned to provide sufficient storage of water where an absolutely uninterrupted supply must be assured, such as for steam boilers, domestic hot water systems, gas engines, etc.

(b) Fixtures or devices taking a supply of water directly from the service pipes, depending upon the hydraulic pressure of the pipe system of the Company for supplying same under working pressure, will do so at the risk of the parties making such attachments, as the Company will not be responsible for any accidents or damages to which such fixtures or devices are subject.

8.2 Interruptions in Water Supply

(a) The Company reserves the right at any time to shut off the water in the Mains without notice in case of accident or emergency, or for the purpose of making connections, extensions, improvements, alterations, repairs, changes, or for other proper business reasons, and may restrict the use of water to reserve a sufficient supply in its reservoirs for fire protection or other emergencies whenever the public welfare may so require in accordance with Commission Rules. Notwithstanding any other provision in these Rules or any contract or agreement between the Company and any Customer, when, in the judgment of the Company, sufficient supplies of water are not available to the Company, for any reason, to meet all existing and reasonably anticipated demands for service or to preserve and replenish its storage in amounts sufficient to provide fire protection on its system, the Company shall have the right to restrict, limit, curtail or interrupt water service to or water usage by any Customer or Customers.

(b) The temporary shutting off of water from any Premises for any cause, whether non-payment of bills, leaking pipes, fixtures, etc. shall not cancel a contract for water supply service except at the option of the Company or upon notice from the Customer.

8.3 Liability of Company

(a) The Company shall not in any way or under any circumstances be held liable or responsible to any person or persons for any loss or damage from any excess or deficiency in the pressure, volume, or supply of water, due to any cause whatsoever. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in the service, but it cannot and does not guarantee that such will not occur.

(b) The Company will make every effort to maintain a pressure on the distribution system that is required for reasonable service and is compliant with federal and state requirements, but it does not guarantee to furnish at all times any given quantity for fire uses or for general purposes.

(c) The Company shall not be responsible for accidents or damages to boilers, hot water tanks, etc., resulting from the discontinuance of service, nor by reason of the breaking of any main, water pipe, fixture or appliance whether owned by the company or Customer, and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption of service. The Company will exercise every care in this matter, and in the event of the necessity of turning off water, every reasonable effort will be made to notify the Customer.

(d) The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise. The Company agrees to furnish such supply of water as shall then be available and not other or greater, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

8.4 Meters

No person shall turn the water on or off at any street valve, Company stop, curb stop or other street connection, or at meter setting or meter vault, or disconnect, remove or bypass any meter without the consent of the Company. The Company has the right to prosecute for any damage resulting from any unauthorized tampering with Company property.

8.4 Electrical Ground

No electric wires shall be grounded on the mains of the Company or on any Company Service Lines or pipes or fixtures of any kind which have a metallic connection with the mains of the Company. The Company has the right to prosecute for any damage resulting violation of this Rule.

8.5 Limitations on Resale of Water

Water furnished to any customer, except for a customer classified as a "Sales for Resale" customer, is for the customer's use only and such water shall not be resold by the customer to any other person, firm, or corporation on the customer's premises or for use on any other premise. This restriction, however, does not preclude a customer from allocating the Company's billing to the customer to any other person, firm, or corporation provided the sum of such allocations does not exceed the Company's billing.

9. CUSTOMER AND COMPANY SERVICE LINES

9.1 Company Service Lines

(a) Subject to Rule 10 on Main extensions and subject to the terms of any applicable Main extension agreement, the Company will install a Company Service Line provided that it is required for the immediate and continuous supply of water in order to furnish general water service, and that the Premise to be served abuts a street, highway or right-of-way in which a Main is located.

(b) The Customer shall install the Customer Service Line to a point approved by an authorized employee of the Company, after which the Company will have the Company Service Line installed from the Main to the Customer Service Line upon payment by the Customer of the tap fee. Where the Company Service Line is already installed, the Customer Service Line shall be connected to the Company Service Line at a point approved by an authorized employee of the Company.

(c) The Company Service Line shall be sized, furnished, installed, owned and maintained only by the Company and shall remain under its sole control. Only the Company may make connections to its Mains. Nothing may be attached to the Company Service Line except a Customer Service Line. The connection to the Company Service Line must be made by an authorized employee or agent of the Company, or a licensed plumber.

9.2 Customer Service Lines

(a) The Company will specify the location of the connection to the Customer Service Line. The Customer Service Line shall be installed, maintained, and/or owned by the Customer, at the Customer's expense and risk. The Customer Service Lines shall be installed in accordance with applicable plumbing requirements.

(b) Each Premise shall be served by no more than one Customer Service Line unless otherwise approved by the Company. Customer Service Lines supplying the Premises shall not pass through or across any other Premises. No water pipes or plumbing in any Premises shall be extended from

8.5 Limitations on Resale of Water

Water furnished to any customer, except for a customer classified as a "Sales for Resale" customer, is for the customer's use only and such water shall not be resold by the customer to any other person, firm, or corporation on the customer's premises or for use on any other premise. This restriction, however, does not preclude a customer from allocating the Company's billing to the customer to any other person, firm, or corporation provided the sum of such allocations does not exceed the Company's billing.

9. CUSTOMER AND COMPANY SERVICE LINES

9.1 Company Service Lines

(a) Subject to Rule 10 on Main extensions and subject to the terms of any applicable Main extension agreement, the Company will install a Company Service Line provided that it is required for the immediate and continuous supply of water in order to furnish general water service, and that the Premise to be served abuts a street, highway or right-of-way in which a Main is located.

(b) The Customer shall install the Customer Service Line to a point approved by an authorized employee of the Company, after which the Company will have the Company Service Line installed from the Main to the Customer Service Line upon payment by the Customer of the tap fee. Where the Company Service Line is already installed, the Customer Service Line shall be connected to the Company Service Line at a point approved by an authorized employee of the Company.

(c) The Company Service Line shall be sized, furnished, installed, owned and maintained only by the Company and shall remain under its sole control. Only the Company may make connections to its Mains. Nothing may be attached to the Company Service Line except a Customer Service Line. The connection to the Company Service Line must be made by an authorized employee or agent of the Company, or a licensed plumber.

9.2 Customer Service Lines

(a) The Company will specify the location of the connection to the Customer Service Line. The Customer Service Line shall be installed, maintained, and/or owned by the Customer, at the Customer's expense and risk. The Customer Service Lines shall be installed in accordance with applicable plumbing requirements.

(b) Each Premise shall be served by no more than one Customer Service Line unless otherwise approved by the Company. Customer Service Lines supplying the Premises shall not pass through or across any other Premises. No water pipes or plumbing in any Premises shall be extended from

there to any other Premises.

When a Customer Service Line is relocated at the Customer's request, or when no associated relocation of the Company's Service Lines or other infrastructure is occurring, the Customer shall be responsible for the cost of such relocation. In instances where a Customer Service Line is required to be relocated due to roadway construction or other causes not within Company control, and the Company's Service Lines or other infrastructure is also being relocated, the Customer shall not be responsible for the cost of such relocation unless the Customer requests a specific location different than that specified by the Company.

A Customer's Service Line which is irregularly located because there was no Main abutting the Premises at the time such Customer Service Line was installed shall, at the Customer's expense, be relocated and connected to a new Company Service Line on the Main abutting the Premises when it becomes necessary for such Customer Service Line to be repaired or replaced.

(c) A Customer, occupant, owner, or any agent thereof is not authorized to attach the Customer Service Line to Company property or shut the water line on or off. If a Customer, occupant, owner, or any agent thereof does so, and in making an attachment or in shutting off or turning on water does not properly replace the curb box cap or Meter lid, or damages the curb stop, curb box, copper setter, or other property of the Company, repairs shall be made only by the Company, but at the Customer's expense. If a Customer, occupant, owner, or any agent thereof takes any unauthorized action described therein, the Company shall not be liable for any personal and property damage caused to Customer's property.

(d) The Customer Service Line and all connections and fixtures attached thereto shall be subject to the approval of the Company before water will be turned on. All Premises receiving a supply of water and all Company Service Lines and Meters and appurtenances, including any and all fixtures within the Premises, shall at all reasonable hours be subject to inspection by any duly authorized employee or agent of the Company.

(e) Only an authorized agent of the Company may turn water on and off in the meter box. In case of emergencies, licensed plumbers may turn water on and off if a shut off valve is not available in the Premise and must notify Company within 24 hours of doing so.

10. WATER MAIN EXTENSIONS

10.1 General Main Extensions Rules

(a) In estimating the cost of an extension, the estimate shall be based on the diameter of the pipe to be

there to any other Premises.

When a Customer Service Line is relocated at the Customer's request, or when no associated relocation of the Company's Service Lines or other infrastructure is occurring, the Customer shall be responsible for the cost of such relocation. In instances where a Customer Service Line is required to be relocated due to roadway construction or other causes not within Company control, and the Company's Service Lines or other infrastructure is also being relocated, the Customer shall not be responsible for the cost of such relocation unless the Customer requests a specific location different than that specified by the Company.

A Customer's Service Line which is irregularly located because there was no Main abutting the Premises at the time such Customer Service Line was installed shall, at the Customer's expense, be relocated and connected to a new Company Service Line on the Main abutting the Premises when it becomes necessary for such Customer Service Line to be repaired or replaced.

(c) A Customer, occupant, owner, or any agent thereof is not authorized to attach the Customer Service Line to Company property or shut the water line on or off. If a Customer, occupant, owner, or any agent thereof does so, and in making an attachment or in shutting off or turning on water does not properly replace the curb box cap or Meter lid, or damages the curb stop, curb box, copper setter, or other property of the Company, repairs shall be made only by the Company, but at the Customer's expense. If a Customer, occupant, owner, or any agent thereof takes any unauthorized action described therein, the Company shall not be liable for any personal and property damage caused to Customer's property.

(d) The Customer Service Line and all connections and fixtures attached thereto shall be subject to the approval of the Company before water will be turned on. All Premises receiving a supply of water and all Company Service Lines and Meters and appurtenances, including any and all fixtures within the Premises, shall at all reasonable hours be subject to inspection by any duly authorized employee or agent of the Company.

(e) Only an authorized agent of the Company may turn water on and off in the meter box. In case of emergencies, licensed plumbers may turn water on and off if a shut off valve is not available in the Premise and must notify Company within 24 hours of doing so.

10. WATER MAIN EXTENSIONS

10.1 General Main Extensions Rules

(a) In estimating the cost of an extension, the estimate shall be based on the diameter of the pipe to be

ISSUED: **May 15, 2026**

used, provided, however, the estimated cost to the Customer or Customers shall not be based on a pipe diameter in excess of eight (8) inches, unless actual consumption estimated for the proposed Customer or Customers requires a larger pipe.

(b) No interest will be paid by the Company on the Applicant's payment or on any balances not refunded. At the expiration of said ten-year period, the refund account will be closed, and no further refunds will be made.

(c) Extensions made under this Rule shall be and remain the property of the Company.

(d) The Company reserves the right to further extend its water mains from and beyond the end of each Water Main Extension made under this Rule. The Applicant or the Applicant's agent paying for an extension shall not be entitled to any refund for the connecting of Customers to any further extension of mains installed.

(e) In determining the length of main extensions to be installed, the main shall be extended to fully cover the frontage of the property, and if the last lot to be served is a corner lot or a lot immediately adjacent to a corner lot, the terminal point of the extension made hereunder shall be located so that the main laid hereunder ties in with the existing main located in the intersecting street; and further provided that if there is no main located in the intersecting street, the terminal point of the extension made hereunder shall be located at the nearest street line of the intersecting street or to the edge of subdivision property, including common area.

10.2 Main Extensions for Other than in New Subdivisions

(a) For Free Extensions, the Company will, upon written request for Residential service by a prospective Residential Customer or a group of prospective Customers located in the same

neighborhood, make free of charge an extension necessary to give service, when the estimated total revenue, for a period of three (3) years from the prospective Customer or Customers is approximately equal to the cost of the extension; provided that the prospects are that the patronage or demand will be of such permanency as to warrant the capital expenditure involved.

(b) For Extension Above Limit, if the extension required in order to furnish general water service at any point within the corporate limits of the municipality or for any adjacent suburb of the municipality is greater than the cost of the free extension specified herein, such an extension will be made under the following conditions: the Company shall require a deposit of the cost of the extension above the free limit and will, in such case, for each additional Customer directly connected to the extension between its original beginning and original end within a period of ten

(10) years from the making of such extension, refund an amount equal to three times the estimated annual revenue of the new Customer, but at no time shall the aggregate refund made to any Customer exceed the original deposit of such Customer.

(c) The free extension or refund amount shall not be reduced below that applicable to fifty (50) feet of main per Customer. A prospective Customer is one who will connect to such main extension within the refund period after the date the water is turned on in the main; provided further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customer will take water service within the aforementioned refund period.

10.3 Main Extensions for New Subdivision

(a) Definitions

i. The term "new subdivision" as used herein shall mean any new subdivision of residential and/or commercial lots for which a preliminary or final plat has been approved by the local planning and zoning authority, and in which the owner thereof has the right, under the rules of said Authority, to construct streets, sidewalks, curbs and other improvements.

ii. The term "lot" as used herein shall mean any plot of ground laid out for building purposes, the front footage of which does not exceed one hundred feet. Should the frontage of any plot exceed one hundred feet, it shall, for the purposes of this Rule be considered as a single lot, if the average footage of all lots in the subdivision does not exceed one hundred feet. If the average frontage of all lots in the subdivision does exceed one hundred feet, the total number of lots in the subdivision shall be determined by dividing the total frontage of all the lots in the subdivision by one hundred feet.

iii. The term "on site facilities" as used herein shall include only those water mains and related facilities, if any, to be installed by Company and located within the boundaries of the new subdivision or part thereof as said boundaries are depicted on the preliminary (or final, if applicable) plat of such subdivision or part thereof approved by the local planning and zoning authority.

iv. The term "off-site facilities" as used herein shall include all water mains and related facilities, if any, to be installed by Company and located outside of the boundaries of said new subdivision as said boundaries are depicted on

(10) years from the making of such extension, refund an amount equal to three times the estimated annual revenue of the new Customer, but at no time shall the aggregate refund made to any Customer exceed the original deposit of such Customer.

(c) The free extension or refund amount shall not be reduced below that applicable to fifty (50) feet of main per Customer. A prospective Customer is one who will connect to such main extension within the refund period after the date the water is turned on in the main; provided further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customer will take water service within the aforementioned refund period.

10.3 Main Extensions for New Subdivision

(a) Definitions

i. The term "new subdivision" as used herein shall mean any new subdivision of residential and/or commercial lots for which a preliminary or final plat has been approved by the local planning and zoning authority, and in which the owner thereof has the right, under the rules of said Authority, to construct streets, sidewalks, curbs and other improvements.

ii. The term "lot" as used herein shall mean any plot of ground laid out for building purposes, the front footage of which does not exceed one hundred feet. Should the frontage of any plot exceed one hundred feet, it shall, for the purposes of this Rule be considered as a single lot, if the average footage of all lots in the subdivision does not exceed one hundred feet. If the average frontage of all lots in the subdivision does exceed one hundred feet, the total number of lots in the subdivision shall be determined by dividing the total frontage of all the lots in the subdivision by one hundred feet.

iii. The term "on site facilities" as used herein shall include only those water mains and related facilities, if any, to be installed by Company and located within the boundaries of the new subdivision or part thereof as said boundaries are depicted on the preliminary (or final, if applicable) plat of such subdivision or part thereof approved by the local planning and zoning authority.

iv. The term "off-site facilities" as used herein shall include all water mains and related facilities, if any, to be installed by Company and located outside of the boundaries of said new subdivision as said boundaries are depicted on

the preliminary (or final, if applicable) plat of said subdivision as approved by the local planning and zoning authority, in order to deliver an adequate supply of water from existing mains of Company to such new subdivision.

v. The term "current estimated cost" as used herein shall mean that sum determined by Company as the estimated cost of installing one foot of water main, together with that sum determined by Company as the estimated cost of installing each type of appurtenant related facility based upon current materials costs, bids received, and other current project data. Such average cost per foot and such average cost per appurtenant facility shall be deemed to be the "current estimated cost" for such mains and facilities during the twelve month period immediately following such determinations, it being contemplated that the current estimated cost will be revised annually in order to keep same as current as practicable.

(b) Before water lines will be laid hereunder in any new subdivision, it is understood and agreed that the road surface shall be brought to the established sub-grade; and the developer or builder of such new subdivision shall furnish the Company with a right-of-way agreement suitable in form to the Company, unless the streets of the new subdivision have been dedicated to the public use.

(c) When an extension of Company's water distribution system into any new subdivision or part thereof as defined herein is requested by the owner of such subdivision, such extension will be made under the terms of a "New Subdivision Extension Deposit Agreement for Off Site Facilities" as hereinafter set forth in the Appendix, and/or a "New Subdivision Extension Deposit

Agreement for On Site Facilities" as hereinafter set forth in the Appendix, which Agreements shall be entered into upon the following basis:

i. Company shall have the exclusive right to determine the type, location and size of mains to be installed and of the related facilities required to render adequate service.

ii. The owner of the new subdivision may elect to develop it in sections or units and to have main extensions made into such sections or units from time to time as the same are ready for development and may elect further to have the entire subdivision considered as a whole for the purpose of making deposits and receiving refunds for off-site facilities under Company Rule No. 10. In such event, owners shall furnish Company with preliminary or final plats of the unit or units thereof to be initially developed, such plats to be

approved as hereinafter provided, such plats to be so furnished prior to the making of any extensions into said new Subdivision. As subsequent units of said subdivision are thereafter developed, preliminary or final plats so approved thereof shall be furnished to Company as hereinafter provided. Upon delivery to Company by the owner of such subdivision of four (4) copies of a preliminary or final plat of the subdivision or units thereof, duly approved by the Local planning and zoning authority, which plats shall depict the location and grade of all streets, sidewalks, building plots, building lines and utility easements contained therein, together with evidence of the owner's authority to construct streets, sidewalks, curbs and other improvements therein, Company shall prepare appropriate plans and specifications for the installation of necessary mains and related facilities to render adequate service therein, including where applicable, such off site facilities as deemed necessary and upon delivery to Company by the owner of such subdivision, any other information requested by the Company.

iii. Separate Extension Deposit Agreements, in the form provided in the Appendix, shall be entered into by the owner of the subdivision and Company for off-site facilities and for each separate unit in which on site facilities are requested, provided, moreover, that the ten (10) year refund period applicable in such agreements shall apply separately to each such transaction.

iv. When plans and specifications for installation of such mains and related facilities are completed, Company shall determine the presumed cost of construction and installation of such mains and related facilities which presumed cost shall be the aggregate of (1) the total number of feet of each size and grade of main required in such construction multiplied, respectively by Company's current estimated cost for each such size and grade of main, and (2) the total cost of installation of all related facilities required in such construction as determined by Company's current estimated cost for each of such facilities. In absence of actual cost data upon which to prepare a current estimated cost for any particular required related facility or size and grade of main, the presumed cost thereto shall be the best estimate of Company with respect to the cost of such mains or related facilities based on available information with respect to same. making such determinations of presumed cost of construction, Company shall separately compute the cost of installation and construction of on-site mains and facilities required and the cost of off-site mains and facilities required.

v. When such determination of presumed cost of on-site mains and facilities and presumed cost of off-site mains and facilities required has been completed, the sums to be deposited by the owner of such subdivision with Company under the terms of the "New Subdivision Extension Deposit Agreement for On Site Facilities" and the "New Subdivision Extension Deposit Agreement for Off Site Facilities" if applicable, shall be determined by Company and shall be (1) the total presumed cost of all on site mains and related facilities of the new subdivision or any part thereof to be constructed as determined as herein provided, and (2) (a) the presumed cost of ten (10) feet of off-site mains and facilities multiplied by the total number of building plots shown on and included within the whole of said new subdivision or (2) (b) the presumed cost of all required off site facilities, whichever be the smaller sum. The presumed cost per foot of off-site mains and facilities as used in this computation shall be determined by dividing the total presumed cost of all off site mains and related facilities by the total footage of such off site mains. In the event it is necessary to construct off site mains for a distance in feet greater than ten (10) times the number of building plots included within the whole of said subdivision as depicted on the initial submitted plat thereof, such excess off site extension will not be made under the "New Subdivision Extension Deposit Agreement for Off Site Facilities", but shall be made under an Extension Deposit Agreement as provided in the Appendix of these Rules.

vi. For each Premises served for which a street service connection shall be directly attached to such main extension between its original beginning or original terminus, excluding connections to further extensions or branches thereof, and crediting no more than one such service connection per building plot, Company shall refund to the owner of such subdivision under terms and provisions of New Subdivision Extension Deposit Agreements separately executed each for on-site and off-site improvements, amounts determined as follows:

a. For on-site facilities, the quotient obtained by dividing the total presumed cost of all on site mains and related facilities, determined as provided in Section (c) vi above for that part of the new subdivision then to be developed, by the total number of lots,

11. PUBLIC AND PRIVATE FIRE SERVICE

11.1 Application for Private Fire Service

(a) The extent of the rights of the Customer for private fire service is to receive, but only at times of fire at the Premises served by the private fire service, such supply of water as shall then be available. The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fires, or to protect any persons or property against loss or damage by fire, or otherwise, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water failure to supply water or pressure, or for any other cause whatsoever.

(b) The applicant or its agent shall complete an "Application for Special Connection," which is available at the Company's offices. Service connections for water to be taken for the extinguishment of fire shall be made only upon the terms as provided for in the "Application for Special Connection," and then only after such application has been submitted by the Customer and approved in writing by the Company and the applicable Fire Department.

(c) A gate valve with post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the Company, and said valve and post indicator shall be furnished, installed and maintained by the Company at the expense of the Customer, and unless otherwise approved by the Company, said valve shall be installed which shall be furnished, installed and maintained by and at the expense of the Customer.

(d) The Company will make the connection to its mains at the cost and expense of the Customer, and the service connection from the main to the post indicator valve as described in Section 11.1 (c) will be furnished, installed, owned and maintained by the Company and at the cost and expense of the Customer.

(e) The entire private fire service system on the Customer's premises shall be installed by and at the expense of the Customer and shall be subject to the inspection, test and approval of the Company before the service is made effective, and at such time thereafter as may be deemed necessary by the Company.

(f) A private fire service connection is furnished for the sole purpose of supplying water for the testing of the system and the extinguishment of fires, and the use of water from such a connection for any other purpose is absolutely forbidden.

(g) Private fire protection service may at any time be furnished at the option of the Company through a line

11. PUBLIC AND PRIVATE FIRE SERVICE

11.1 Application for Private Fire Service

(a) The extent of the rights of the Customer for private fire service is to receive, but only at times of fire at the Premises served by the private fire service, such supply of water as shall then be available. The Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fires, or to protect any persons or property against loss or damage by fire, or otherwise, and it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water failure to supply water or pressure, or for any other cause whatsoever.

(b) The applicant or its agent shall complete an "Application for Special Connection," which is available at the Company's offices. Service connections for water to be taken for the extinguishment of fire shall be made only upon the terms as provided for in the "Application for Special Connection," and then only after such application has been submitted by the Customer and approved in writing by the Company and the applicable Fire Department.

(c) A gate valve with post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the Company, and said valve and post indicator shall be furnished, installed and maintained by the Company at the expense of the Customer, and unless otherwise approved by the Company, said valve shall be installed which shall be furnished, installed and maintained by and at the expense of the Customer.

(d) The Company will make the connection to its mains at the cost and expense of the Customer, and the service connection from the main to the post indicator valve as described in Section 11.1 (c) will be furnished, installed, owned and maintained by the Company and at the cost and expense of the Customer.

(e) The entire private fire service system on the Customer's premises shall be installed by and at the expense of the Customer and shall be subject to the inspection, test and approval of the Company before the service is made effective, and at such time thereafter as may be deemed necessary by the Company.

(f) A private fire service connection is furnished for the sole purpose of supplying water for the testing of the system and the extinguishment of fires, and the use of water from such a connection for any other purpose is absolutely forbidden.

(g) Private fire protection service may at any time be furnished at the option of the Company through a line

guarded by an approved fire line meter or detector device which shall be furnished and installed by the Company at the expense of the Customer. The meter shall be set in an approved vault or chamber, properly drained and protected, located at a point as near as possible to the curb line, and said vault or chamber shall be constructed and maintained by the Company at the expense of the Customer. The private fire meter or private detector device will be maintained by the Company, but at the expense of the Customer.

(h) Hydrants and other fixtures connected with a private fire service connection may be sealed by the Company, and such seals shall be broken only in case of fire or as specially permitted by the Company, and the Customer must immediately notify the Company of the breaking of any such seal.

(i) No pipe or fixtures connected with a private fire service connection served by the Company shall be connected with pipes or fixtures supplied with water from any other source. An industry approved backflow prevention device reviewed by the Company must be installed on private fire service connections and such device must be tested annually thereafter.

(j) The entire private fire service connection and all parts of it which are located outside of the property line of the Customer and any meter or other indicating or controlling device and all parts and appurtenances thereof no matter where located shall be accessible and available in a safe manner to the Company at all times.

(k) The Company shall determine the size and location of any connections made to its mains for private fire service.

(l) The Customer shall furnish an accurate sketch or drawing showing the pipes, valves, hydrants, connections and appurtenances on the premises of the Customer and connected with the mains of the Company and also an accurate sketch of any other water pipe system and fixtures that may exist on the premises.

(m) Whenever a fire service system is to be tested under the regulations of the fire insurance underwriters, the Customer shall notify the Company of such proposed test, naming the day and hour when same is to be made, so that, if desired, the Company may have an inspector present during the test.

(n) All applications for private fire protection shall be subject to the written approval of the applicable Fire Department. It is the Customer's responsibility to obtain this approval.

(o) All subsequent owners of the property containing private fire service, assume all responsibilities under the original Application for Special Connection.

11.2 Terms and Conditions for New Private Fire Hydrant Service

(n) All applications for private fire protection shall be subject to the written approval of the applicable Fire Department. It is the Customer's responsibility to obtain this approval.

(o) All subsequent owners of the property containing private fire service, assume all responsibilities under the original Application for Special Connection.

11.2 Terms and Conditions for New Private Fire Hydrant Service

(a) Applicants and Customers subject to this tariff are also subject to Rule 11.1(a), (b), and (f), which are incorporated by reference as if set forth herein.

ISSUED: May 15, 2026
EFFECTIVE: June 14, 2026

Approved:

ISSUED BY: /s/ Robert Burton

incorporated by reference as if set forth herein.

(b) The entire cost for labor, materials and other expenses incurred in installing the private fire hydrant connection, consisting of tapping the main and installing the hydrant branch and hydrant at a convenient point between the curb and property line, will be paid by the Applicant and any work done by the Company in connection therewith will be at the expense and risk of the Applicant.

(c) Advance payment of three years' private service rate in Service Classification No. 4 for each private fire hydrant by the applicant will be required at the time the contract is signed for private fire hydrant service.

(d) Water used for extinguishing fires will not be charged. Prompt notice of hydrant use is to be given to the Company in order that the installation may be inspected.

(e) Except for hydrants owned by private entities as set forth in their contract with the Company, title to the service connection and hydrant shall, upon completion of construction, become vested in the Company, which thereafter shall assume responsibility for maintenance. Regardless of ownership, all parts and appurtenances shall be accessible and available to the Company at all times.

(f) No private fire hydrant will be installed at a location where the normal flow from the hydrant is less than 500 gallons per minute with a 20 pounds per square inch residual pressure in the main serving the hydrant.

(g) After expiration of the initial three-year advance payment of the private service rate by the applicant, the applicant will continue to be responsible for charges for this service. The applicant may request the Company's consent to transfer responsibility for the private service rate to an entity in good standing in the state in which the entity was organized. Any such request must be approved by the applicant, the entity to which the responsibility is being transferred, and the Company in order to be effective.

(h) Failure to pay the private service rate shall be sufficient cause for discontinuance of water service after reasonable notice by the Company.

(i) The private service rate shall continue in effect until such time as a unit of government shall agree to pay public fire protection charges thereon.

11.3 Public Fire Hydrants

(a) No person, except for the legitimate purpose of extinguishing fires or for other purposes herein provided, shall open any fire hydrant without the consent of the Company.

(b) During freezing weather, the City or County shall notify the Company after it has opened any hydrant.

(c) Any expenses for repairs caused by the negligence of the employees of the municipality or by members of the fire department shall be paid for by the municipality.

(d) The use of fire hydrants will be restricted to the taking of water for the extinguishing of fires, and water shall not be taken from any fire hydrant for construction purposes, sprinkling streets, flushing trenches, sewers or gutters or for any other use, unless specifically permitted by the Company for the particular time and occasion.

(e) Inspections and tests of public fire hydrants will be made by the Company at convenient times and reasonable intervals.

(f) Whenever a change in location, size or type of a fire hydrant is ordered, requested, or made necessary due to change in line or grade of any roadway, curb or walk, said change will be made by the Company at the expense of the municipality or other party ordering, requesting, or making necessary such change.

(g) In the event that the City or County shall order in writing the installation of additional fire hydrants on existing mains having an internal diameter of six inches or larger, the Company will install such hydrants at its own cost and expense, provided that such mains are of adequate capacity to provide the required fire flows.

(h) Where pipe line installations are required to carry out a written order of the City or County to install fire hydrants, or where existing mains, in the opinion of the Company, are inadequate to provide required fire flows to such hydrants, and the City or County orders in writing the installation of a water main of adequate size to provide such flows to the hydrant or hydrants so ordered, the Company will install such mains and hydrants at its own cost and expense, provided that the estimated cost of the extension does not exceed the estimated total revenue for a period of three (3) years from such hydrant or hydrants and from prospective Customers who will connect to such main within thirty (30) days after the date that water is turned into the main; and provided, further, that there is delivered to the Company a written guarantee by a financially responsible person or firm that such prospective Customers will take water service at their premises within thirty (30) days after the date that water is turned into the main. If the estimated cost of the proposed extension and hydrants required in order to furnish fire service exceeds three (3) times the Company's estimate of immediate annual revenue, such extensions will be made under the following conditions: the Company may require a deposit in the amount by which the cost of the extension, including the cost of hydrants which might be connected thereto, exceeds three (3) times the annual revenue estimated to be received from the hydrant and prospective Customers and will, in such case, for each additional Customer directly connected to the extension between its original beginning and original end with a period of ten (10) years from the making of such extension, refund an amount equal to three (3) times the estimated revenue of the new Customer, but at no time shall the aggregate refund made exceed the original deposit.

KENTUCKY AMERICAN WATER COMPANY P.S.C. KY NO. 11
Original Sheet No. 30.1

CLASSIFICATION OF SERVICE
SERVICE CLASSIFICATION NO. 2.1 (N) (N)

Applicability (N) (N)
Applicable to all customers previously served by Livingston Municipal Water Works.

Meter Rates (N) (N)
The following shall be the rates for consumption:

Inside City Limits		(N)
First 2,000 gallons	$29.74 minimum bill	(N)
2,001 to 999,999 gallons	$11.11 per 1,000 gallons	(N)
Outside City Limits		(N)
First 2,000 gallons	$31.42 minimum bill	(N)
2,001 to 999,999 gallons	$11.11 per 1,000 gallons	(N)

NOTE: The Commission approved the acquisition of Livingston Municipal Water Works in Case No. 2026-00066. The tariff sheet with the Livingston rates is under review by the Commission, in TFS2026-00193.

Sheet No. 30.1 has been included for completeness to demonstrate the proposed change to this Service Classification in this rate proceeding.

KENTUCKY AMERICAN WATER COMPANY P.S.C. KY NO. 12
Original Sheet No. 30.1

CLASSIFICATION OF SERVICE
SERVICE CLASSIFICATION NO. 2.1 (D) (D)

Applicability (D) (D)
Applicable to all customers previously served by Livingston Municipal Water Works.

Meter Rates (D) (D)
The following shall be the rates for consumption:

Inside City Limits		(D)
First 2,000 gallons	$29.74 minimum bill	(D)
2,001 to 999,999 gallons	$11.11 per 1,000 gallons	(D)
Outside City Limits		(D)
First 2,000 gallons	$31.42 minimum bill	(D)
2,001 to 999,999 gallons	$11.11 per 1,000 gallons	(D)

NOTE: The Commission approved the acquisition of Livingston Municipal Water Works in Case No. 2026-00066. The tariff sheet with the Livingston rates is under review by the Commission, along with the Table of Contents that reflects the addition.

KAW explained in Case No. 2026-00066 that it would propose moving the former Livingston customers to KAW's unified rates in its next rate case. The (D) tariff notations reflect that proposal in this case, along with proposing deletion of this sheet on Sheet No. 1 in the Table of Contents.

SERVICE CLASSIFICATION NO. 5

Applicable

Applicable to the entire Service Territory of Kentucky-American Water Company.

Availability of Service

Available for Water Used for Construction, Street Washing, Pool Filling, and Similar Purposes.

Rates

Where a meter is installed on a fire hydrant or on a temporary service connection for construction, street washing, pool filling, and similar purposes, the minimum payment for water shall be the monthly service charge for general water service, payable in advance based upon the size of the meter installed. If more than one fire hydrant or temporary service connection is used, the service charge is to apply to each such hydrant or temporary service connection so used.

The Company may require an application to be signed and either the service charge paid in advance or, at the option of the Company, a meter deposit made, and the account handled in the same manner as any other metered account. This service charge will not entitle the Customer to any water and all water used shall be billed at the meter rate schedule. In addition to such charges the Customer shall pay all reasonable costs incurred in connection with the installation and removal of the meter.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 11**
Original Sheet No. 37.1

CLASSIFICATION OF SERVICE
PFAS LITIGATION UNIVERSAL SURCREDIT ("PLUS")

APPLICABILITY

Applicable to the entire Service Territory of Kentucky-American Water Company.

Kentucky-American Water Company sought compensation from various manufacturers of chemicals of Aqueous Film Forming Foam. This litigation was consolidated for the limited purpose of pursuing settlements into multi-district litigation No. 2873 ("MDL") which are overseen by the United States District Court for the District of South Carolina. Kentucky-American Water Company has entered into multiple settlements in the MDL and may enter into further agreements. These settlements may provide one or more payments. The proceeds will be net of any costs to be paid out of the settlement funds incurred to administer or achieve the settlement. The purpose of this tariff is to credit Kentucky-American Water Company customers the proceeds Kentucky-American Water Company receives from these MDL settlements.

The proceeds from the MDL shall be credited to customers as a one-time credit within a reasonable time after Kentucky-American Water Company receives payment of the funds. Kentucky-American Water Company shall provide notice to the Commission of the amount of proceed included and a workpaper showing the determination of the credit as outlined below. Kentucky-American Water Company may combine proceeds resulting from the MDL settlement.

Determination of the Credit

The litigation or settlement proceed credit shall be calculated as follows:

$$\text{PLUS Credit} = \frac{\text{MDL Proceeds}}{\text{Total Water Customer Count}}$$

$$\text{PLUS Credit} = \frac{(MDLP)}{CC}$$

Where:

PLUS Credit	Represents the proceeds credit each customer will receive as a result of proceeds paid from MDL settlements.
MDLP	Represents the proceeds received from the one or more MDL settlements.
CC	Total active water customer counts, inclusive of all customer classes at the time of credit calculation.

INSPECTION OF SERVICE LINE

Applicable:
Applicable to the entire service territory of Kentucky-American Water Company where neither the Kentucky Department of Housing, Building and Construction or local government conducts an inspection of service lines comparable to that required of water utilities by 807 KAR 5:066 Section 9(3).

Availability of Service:
Inspection of service lines is available to all customers of Kentucky-American Water Company where neither the Kentucky Department of Housing, Building and Construction or local government conducts an inspection of service lines comparable to that required of water utilities by 807 KAR 5:066 Section 9(3). The customer shall leave the trench open and the service line uncovered. The service line must be determined to be free from any tee, branch connection, irregularity or defect before service will be initiated.

Rate:
The customer shall be charged $25.00 for each inspection of a service line.

Original Sheet No. 44

SERVICE CLASSIFICATION NO. 6
SERVICE LINE LEAK ADJUSTMENT RATE

Applicable
Applicable to entire Service Territory of Kentucky-American Water Company.

Availability of Service
Available for Residential, Commercial and OPA customers.

Rates
A charge of twenty-five (25) percent of the applicable tariff will be applied to all water usage determined to be the result of a service line leak.

Terms and Conditions
A service line leak is defined as a leak in the customer service line between the meter and the premises. Service line leak adjustments will be granted to residential, commercial, and OPA customers. The customer must provide a plumber's statement or list of materials showing that the leak has been repaired. After verification of repairs by the Water Company, the bill will be adjusted by comparing the usage during the leak billing period to the average usage for the past six billing periods. A reasonable estimate will be used in cases when six prior periods of information do not exist. The excess usage will be billed at the rate specified above. During the lifetime of a water service line only two leak adjustments will be permitted. Each adjustment may cover a maximum of two billing periods. Before a third adjustment can be considered, the entire water service line from the meter box to the premises must be replaced. Plastic pipe for repair of underground water service lines must be certified to withstand a working pressure of 160 pounds per square inch or greater.

SERVICES

Go Paperless: Save time. Save money. Sign up for **Paperless Billing** and **Auto Pay** on My Account at amwater.com/myaccount. Not registered? Log in and be sure to have your account number handy.

Water Quality: We take water quality seriously. When it comes to complying with federal drinking water standards, we consistently score better than the industry average. For a copy of the annual water quality report for your area, visit kentuckyamwater.com. Under Water Quality, select Water Quality Reports.

H20 Help To Others: This program helps low-income customers who qualify with their water bills. For more information visit kentuckyamwater.com. Under Customer Service & Billing, select Low Income Program.

EXPLANATION OF OTHER TERMS

Payment by Check: Paying by check authorizes American Water to send the information from your check electronically to your bank for payment. The transaction will appear on your bank statement. The physical check will not be presented to your financial institution or returned to you.

Estimated Bill: This occurs when we are unable to read the water meter. Your usage from the same billing period the prior year is used to calculate the estimated bill. The next actual meter reading corrects any over or under estimates.

Disputes: If you have questions or complaints about your bill, please call us at 1-800-678-6301 before the due date. If your bill is unusually high, it may indicate that there is a leak in your plumbing. For tips on how to detect leaks and use water wisely, visit us online. You'll find helpful tools under the Water Information menu. Every drop counts!

Rates: A detailed listing of charges that make up your bill is available upon request by contacting Customer Service or visiting us online at kentuckyamwater.com. Under Customer Service & Billing, select Your Water Rates.

Correspondence: Please send written correspondence to PO Box 678, Alton, IL 62002-0678. Be sure to include your name, account number, service address, mailing address and phone number including area code. Please do not send correspondence with your payment, as it may delay processing your payment and correspondence.

Understanding Your Bill

The information below defines some of the new terms you may find on your bill:

- **Service Related Charges:** This section includes charges for services related to water, wastewater and fire protection.
- **Fees and Adjustments:** This section provides details related to additional charges or adjustments for the service period referenced. Fees, when applicable, would include items such as service activation and late payment charges. Additionally, any credit or debits related to billing corrections would be found in this section.
- **Pass Through Charges:** Charges in this section, when applicable, are separated from other service related charges to provide visibility into what portion of your bill is being remitted to other entities. Payment received for these charges does not remain with American Water. While we may bill and collect for them, the payments received are passed along to other companies and agencies.
- **Billing Units:** One billing unit equals 100 gallons of water used. If the meter serving your property measures your water use in cubic feet or a different unit of measure, we convert the usage to gallons to make it easier to understand.
- **Average Daily Use:** The gallons shown in the water droplet above represent your average daily water use for the current billing period. Tracking the amount of water you use can help you manage your overall water use from month to month.
- **Still have questions?** We are here to help. Our customer service representatives are available M–F, 7 a.m. to 7 p.m. More information on understanding your bill and charges can also be found on our website. See the link below.

QUALIFIED INFRASTRUCTURE PROGRAM RIDER ("QIP RIDER") (D)

APPLICABLE SERVICE AREA (D)

Applicable to the entire Service Territory of Kentucky American Water Company unless otherwise noted. (D) (D)

APPLICABILITY OF RIDER (D)

Applicable to Residential, Commercial, Industrial, Other Public Authority, Sales for Resale, Public and Private Fire Service and Hydrant customers. (D) (D)

CALCULATION OF QUALIFIED INFRASTRUCTURE PROGRAM RIDER REVENUE REQUIREMENT (D) (D)

The QIP rate base in any forecasted period will be calculated in a manner consistent with 807 KAR 5:001, Section 16(6)(c). The QIP Rider Revenue Requirement includes the following: (D) (D)

a. QIP-eligible Plant In-Service not included in base water rates minus the associated QIP-related accumulated depreciation and accumulated deferred income taxes, grossed up by applying the gross revenue conversion factor authorized in the Company's latest base water rate case; (D) (D) (D)
b. Retirement and removal of plant related to QIP-eligible construction; (D)
c. Return on the net QIP-eligible plant in-service at the overall rate of return on capital authorized in the Company's latest base water rate case, grossed up for federal and state income taxes; (D) (D) (D)
d. Depreciation expense on the QIP-eligible Plant In-Service less retirement and removals; (D)
e. Property taxes related to the QIP. (D)

QIP ELIGIBLE UTILITY PLANT: (D)

Distribution Infrastructure – distribution and transmission system structures and improvements, mains and valves installed as replacements for existing facilities; hydrants, distribution tanks; services, meters and meter installations, power generation and pumping equipment installed as replacements for existing facilities; (D) (D) (D)

SYSTEM IMPROVEMENT PROGRAM SURCHARGE ("SIP") RIDER (N)

APPLICABLE SERVICE AREA (N)
Applicable to the entire Service Territory of Kentucky-American Water Company. (N)

APPLICABILITY OF RIDER (N)
Applicable to Residential, Commercial, Industrial, Other Public Authority, Sale for Resale, and Public and Private Fire Service customers. (N) (N)

DETERMINATION OF THE SIP SURCHARGE PERCENTAGE (N)
(A) The following terms not otherwise defined in this Rider shall have the following meaning given to them: (N)
(1.) "SIP Qualified Infrastructure Investments" include the below recurring and investment projects that are not for the purpose of serving a new customer ("non-revenue producing plant"): (N) (N)

- Water Mains: scheduled replacement, renewal, improvement, or relocation of existing water mains (N)
- Hydrants and Valves: replacement of existing hydrants and valves (N)
- Service Lines: replacement of existing service lines (N)
- Meters: replacement or improvement of existing meters and end-points (N)
- SCADA Equipment and Systems: installation or replacement of Supervisory Control and Data Acquisition ("SCADA") systems and equipment (N)
- Process Plant Facilities and Equipment: new purchase or replacement of existing components of water supply, treatment, pumping, storage, and pressure regulation facilities, including associated building components and equipment; replacement of existing laboratory equipment; replacement of existing filter media used in treatment (N)
- Booster Stations: replacement or improvement of existing booster stations (N)
- Water Storage Tanks: replacement or improvement of existing water storage tanks (N)

(2.) "SIP Period" means the 12-month period (or portion thereof) during which SIP Qualified Infrastructure Investments are being tracked. (N) (N)

(3.) "Annual Filing" means the filing to be made at least 90 days prior (by October 1) to the rate effective date of the SIP Period (January 1) that will establish a SIP Surcharge Percentage on a prospective basis and will include updates to forecasted SIP Qualified Infrastructure Investments, including an additional year of forecasted capital expenditures, any shifts in spend between eligible projects and categories of investments, as well as shifts in spend between years, according to business and operational needs. (N) (N) (N) (N) (N) (N)

ISSUED: May 15, 2026 **Approved:**

unreimbursed funds related to capital projects to relocate facilities required by governmental infrastructure projects. (D)
Water Treatment Infrastructure – source of supply and water treatment structures, pipe and equipment including sampling equipment, SCADA equipment, power generation and pumping equipment installed as replacements for existing facilities. (D)

RATES (D)

All customers subject to this QIP Rider receiving water service shall be assessed a monthly QIP Rider charge in addition to the service charge, consumption charge or monthly fee component of their applicable rate schedule that will enable the Company to complete the Qualified Infrastructure Program. (D)

The QIP Rider will be updated annually in a filing that includes the (1) projected costs for each QIP period and (2) a balancing adjustment that trues up the projected program costs and revenues with the actuals for the preceding annual QIP period. The annual filing will be submitted at least 120 days prior to the commencement of the QIP period, which will commence on September 1 each year and run through August 31 of the subsequent year. (D)

The monthly QIP Rider charges for all respective water service classifications will be calculated as a percentage and applied to all water charges including meter fees, volumetric water sales, fire service fees, and public and private hydrant fees from the Company's most recent base rate case, but excluding any other surcharge or add-on taxes. The percentage is calculated by dividing the QIP revenue requirement by the water revenues authorized in the Company's most recent rate case and multiplying the resulting QIP period by the number of days the QIP percentage will be in effect, divided by 365 days (366 days in a leap year). It will be listed as a separate line item on the customer bill. The QIP percentage shall be calculated on an annual prospective basis. The QIP Rider charge effective on and after the effective date is: (D)

11.09% (D)

PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

(4.) "Balancing Adjustment" means the annual filing to be made at least 90 days prior (by March 1) to the rate effective date (June 1) of the Balancing Adjustment for the most recently concluded SIP Period that will (1) true up the forecasted costs of capital, depreciation, and taxes associated with SIP Qualified Infrastructure Investments in the most recently concluded SIP Period to actual costs and compare the resulting trued up total revenue requirement to actual SIP revenues billed to customers during that SIP Period, and (2) update the current SIP Period total revenue requirement to minimize the future Balancing Adjustment. (N)

(5.) "Base Water Revenues" mean all billed base water revenue, including water service charges based on the size of meter installed, volumetric water service charges based on consumption, municipal or private fire connection water service charges based on size of service, and water service charges for public or private fire hydrants, but excluding any other separately billed surcharges, surcredits, or taxes such as the Kentucky River Authority ("KRA") Withdrawal Fee, the PFAS Litigation Universal Surcredit ("PLUS"), Franchise Taxes, and School District Taxes. (N)

(6.) "SIP Surcharge Percentage" is the percentage determined as described below and to be updated in tariff filings. (N)

(7.) "SIP-related costs" or "SIP costs" mean costs of capital, depreciation, and taxes associated with SIP Qualified Infrastructure Investments. (N)

(8.) "System Improvement Program Surcharge" or "SIP Surcharge" means the amount added to a customer bill when the SIP Surcharge Percentage is applied in accordance with this tariff. (N)

(B) The SIP Surcharge Percentage shall be expressed as a percentage carried to two (2) decimal places. The SIP Surcharge Percentage shall be applied to the total amount Base Water Revenues billed to each Customer. (N)

(C) The SIP Surcharge Percentage will be calculated as follows: (N)

$$S\% = \frac{(\text{PTR} + \text{DEPRa} + \text{POTXa})}{\text{BWR}} \text{ x } 100\% - \text{SGRC\%} + \text{BA\%}$$ (N)

Where: (N)

S% = SIP Surcharge Percentage (N)

PTR = Pre-Tax Return calculated by: (1) multiplying the 13-month average rate base for the SIP Period by the debt and equity components of the total after-tax rate of return as authorized in the most recent water (N)

ISSUED: **May 15, 2026** **Approved:**
EFFECTIVE: **June 14, 2026**

ISSUED BY: **/s/ Robert Burton**
Robert Burton
President
2300 Richmond Road, Lexington, KY 40502

SHEET NO. 50 DOES NOT EXIST IN THE CURRENT TARIFF

(N) general rate case ("GRC"), and (2) then multiplying the resulting debt and equity after-tax return components by their respective gross revenue conversion factors, where the debt component is grossed up for uncollectible expense and the Public Service Commission Assessment Fee, and the equity component is grossed up for the same plus state and federal income taxes. The 13-month average rate base for the SIP Period is calculated as the 13-month average utility plant in-service and accumulated depreciation ("NetUPIS") balances for the SIP Qualified Infrastructure Investments, less the related accumulated deferred income taxes ("ADIT") that have been prorated for the SIP Period.

(N) DEPRa = Depreciation Expense After Gross Up calculated monthly during the SIP Period by: (1) multiplying the prior month's gross UPIS balances for SIP Qualified Infrastructure Investments by annual depreciation rates, divided by 12, as last approved for the respective plant accounts to which the SIP Qualified Infrastructure Investments were recorded, and (2) grossing up for uncollectible expense and the Public Service Commission Assessment Fee.

(N) POTXa = Property Tax Expense After Gross Up calculated by: (1) multiplying the net UPIS balance as of December 31 of the prior year by the effective property tax rate per dollar of net UPIS used to calculate property tax as approved in the most recent water GRC, and (2) grossing up for uncollectible expense and the Public Service Commission Assessment Fee.

(N) BWR = Base Water Revenues

(N) SGRC% = SIP Surcharge Percentage in Base Water Revenues (when applicable)

(N) BA% = Balancing Adjustment Percentage (when applicable) from the most recent Balancing Adjustment calculated by: (1) subtracting actual SIP revenues billed to customers during the recently completed SIP Period from the trued up total revenue requirement for that SIP Period, (2) dividing the resulting over or under recovery for that SIP Period by prorated Base Water Revenues authorized from the most recent GRC, where prorated Base Water Revenues are calculated by dividing the number of days the Balancing Adjustment Percentage will be effective (214 days for service rendered on and after June 1 through December 31) by 365 days, and multiplying by Base Water Revenues authorized from the most recent water GRC, and (3) multiply by 100%.

(N) **EFFECTIVE SIP SURCHARGE PERCENTAGE**

(N) The SIP Surcharge Percentage effective for service rendered on and after January 1, 2027 is:

(N) 0.00%

installing the water main(s) and other related facilities, if any, hereinabove described because of its failure to secure pipe or other construction materials, or for any other causes beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than ninety (90) days from date of deposit, SUBDIVIDER shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to COMPANY, and thereafter both parties shall be relieved of all duties

and obligations arising hereunder. But this right to cancel and terminate by SUBDIVIDER shall not be invoked if COMPANY has received the construction material and SUBDIVIDER has made the deposit as hereinafter required, in which event COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: SUBDIVIDER hereby agrees to deposit with COMPANY, upon notice from COMPANY that it is prepared and able to go forward with the work provided in Paragraph FIRST hereof, the sum of _____, which sum is the presumed cost of installation of said off site main(s) and related facilities, if any, as determined under Section C(4) of Rule 10.3 of COMPANY'S Rules and Regulations. No adjustment in deposit will be made, either by way of adding to or reducing the deposit required hereunder, because of a variance between the presumed cost mentioned herein and the actual cost of installation of such main(s) and related facilities, if any.

FOURTH: SUBDIVIDER represents to and covenants with COMPANY that the number of residential and/or commercial building plots to be developed within the whole of said subdivision, as shown on the plat attached hereto as Exhibit "B", being a total of _____building plots, will not be decreased in the final plats of said subdivision as the same are hereafter recorded in the office of the Clerk of the Fayette County Court. Upon such representation and covenant, COMPANY hereby agrees to refund to SUBDIVIDER during the period of ten (10) years from the actual date of deposit, an amount equal to _____ of the total deposit made by SUBDIVIDER under the terms of Paragraph THIRD above, being the sum of _____, for each premises served within said subdivision (as said subdivision is depicted on the plat attached hereto and marked Exhibit "B" for identification) for which a street service connection shall be directly attached to the mains constructed on the site of such subdivision between their original beginning and original termini (not including, however, connections to further extensions or branches thereof, and being limited to one such service connection per building plot) and for which a bona fide residential or commercial customer has executed a service contract with COMPANY, provided, however, that the total amount returned shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 11**
Original Sheet No. A-6

FIRST: COMPANY contracts and agrees to lay the water main(s) and other related facilities, if any, as shown in red on the plat attached hereto and made a part hereof, marked Exhibit 'A' for identification, which main(s) and facilities, if any, are described and located as follows:

SECOND: It is expressly understood and agreed that if COMPANY shall be delayed or prevented from installing the water main(s) and other related facilities, if any, hereinabove described because of its failure to secure pipe or other construction materials, or for any other cause beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than ninety (90) days from date of deposit, SUBDIVIDER shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to COMPANY, and thereafter both parties shall be relieved of all duties and obligations arising hereunder. But this right to cancel and terminate by SUBDIVIDER shall not be invoked if COMPANY has received the construction material and SUBDIVIDER has made the deposit as hereinafter required, in which event COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: SUBDIVIDER hereby agrees to deposit with COMPANY, upon notice from COMPANY, that it is prepared and able to go forward with the work provided in Paragraph FIRST hereof, the sum of _____, which sum is the presumed cost of installation of said on-site mains and related facilities, if any, as determined under Section C(4) of Rule 10.3 of COMPANY'S Rules and Regulations. No adjustment in deposit will be made, either by way of adding to or reducing the deposit required hereunder, because of a variance between the presumed cost mentioned herein and the actual cost of installation of such main(s) and related facilities, if any.

FOURTH: SUBDIVIDER represents to and covenants with COMPANY that the number of residential and/or commercial building plots to be developed within said subdivision, as shown on the plat attached hereto as Exhibit "A", being a total of _____ building plots which, according to Section A(2) of Rule 10.3 of COMPANY's Rules and Regulations, is equal to _____ lots, will not be decreased in the final plat of said subdivision as the same is hereafter recorded in the office of the Clerk of the Fayette County Court. Upon such representation and covenant, COMPANY hereby agrees to refund to SUBDIVIDER, during the period of ten (10) years from the actual date of deposit, an amount equal to _____ of the total deposit made by SUBDIVIDER under the terms of Paragraph THIRD above, being the sum _____, for each premises served within said subdivision (as said subdivision is depicted on Exhibit "A" attached hereto) for which a street service connection shall be directly attached to the main extension herein provided between its original beginning and original terminus (not including, however, connections to further extensions or branches thereof, and being limited to one such service connection per

building plot) and for which a bona fide residential or commercial customer has executed a service contract with COMPANY, provided, however, that the total amount returned shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said ten (10) year period shall become the property of COMPANY.

FIFTH: SUBDIVIDER may request refunds under Paragraph FOURTH, once in each calendar quarter, furnishing COMPANY, at such time, a listing of premises claimed to be additional premises; however, failure on the part of SUBDIVIDER to make such request shall not constitute a waiver of any rights hereunder or relieve COMPANY of the obligation to make refunds with reasonable promptness.

SIXTH: As a material consideration for COMPANY'S agreement to design and construct all or some portion of the main(s) and related facilities, if any, described on Exhibit "A" and in Paragraph FIRST hereof on the basis of a preliminary plat of said subdivision, without withholding or delaying such action until a final plat thereof has been approved by the Planning and Zoning Commission and recorded in the office of the Clerk of the Fayette County Court, SUBDIVIDER represents to COMPANY and covenants with COMPANY that the location and grade of streets, sidewalks, curbs, building plots, building lines and utility easements as depicted on the preliminary plat attached hereto as Exhibit "A" will not be altered or changed in any respect in the final plat of said subdivision, as finally approved by the Lexington-Fayette County Planning and Zoning Commission and as recorded in the office of the Clerk of the Fayette County Court. In the event the location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements be altered, amended or changed in the final plat or in an amended plat of said subdivision as approved by said Commission or as recorded in the office of said Clerk, whether such changes are made with or without the consent of SUBDIVIDER, or in the event a final plat is not approved or recorded, and in event such alteration, amendment, change, failure of approval or of recording requires, in the sole judgment of COMPANY, the relocation, removal, replacement, reconstruction, change in size or addition to the main(s) and related facilities to be constructed by COMPANY pursuant to the Agreement, SUBDIVIDER will immediately, upon demand from COMPANY, pay to COMPANY the actual cost to COMPANY of making such relocations, removals, replacements, changes in sizes and additions to such main(s) and related facilities, if any, so required in the sole judgment of COMPANY, as a result of such changes in location or grade of streets, sidewalks, curbs, building plots, building lines or utility easements. No part of the sums payable to COMPANY by SUBDIVIDER under the terms and provisions of this Paragraph SIXTH shall be subject to refund to SUBDIVIDER. In event SUBDIVIDER fails to pay to COMPANY such sums as may be demanded by COMPANY under provisions of this Paragraph SIXTH within ten (10) days from such demand, COMPANY shall have the right, in addition to and not in limitation of all other remedies, which right shall be superior to the rights of any intervening assignee or creditor of SUBDIVIDER, to apply refunds coming due under Paragraph FOURTH of the Agreement to the reduction and extinguishment of the debt of SUBDIVIDER to COMPANY under terms of this Paragraph SIXTH.

APPLICATION FOR SPECIAL CONNECTION

Account No.	
Contract No.	
WBS Element No.	

This Application, made in duplicate this _____day of _____, 20____ _____, by _____,
hereinafter called the "APPLICANT", to KENTUCKY AMERICAN WATER, a Kentucky corporation located at 2300 Richmond Road, Lexington, Kentucky, 40502, hereinafter called the 'WATER COMPANY."

The APPLICANT, upon the terms and conditions hereinafter set forth, hereby applies to the WATER COMPANY for a private service, consisting of the right to connect a service pipe to a _____ public water main on _____ in Lexington and attach to said service pipe the following fixtures and openings:

One (1) _____-inch fire service to _____ supply ; one _____-inch service line, post indicator and valve with all related fittings to supply a sprinkler system of approximately _____ sprinkler heads, covering approximately _____ square feet of _____ space;

all of which fixtures and openings to be located within or upon the premise of the APPLICANT abutting the street on which the said main of the WATER COMPANY is located.

In consideration for which privilege the APPLICANT agrees to be bound by all the terms and conditions of this Application and pay the WATER COMPANY for private fire protection service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this Application may be accepted by the WATER COMPANY are as follows:

FIRST: That this Application and the acceptance thereof by the WATER COMPANY may be subject to the prior approval of the fire department having jurisdiction of the premises to be served.

SECOND: That the entire service system on APPLICANT's premises shall be subject to the inspection, test and approval of the WATER COMPANY, and the WATER COMPANY by its representatives, shall have the right to enter the premises of the APPLICANT at any reasonable time for the purpose of making such reasonable inspections as it may deem necessary, and to insure compliance with the terms and conditions of this Application.

THIRD: That all pipes and appurtenances shall be constructed and maintained in good condition by and at the expense of the APPLICANT.

FOURTH: That a fire line meter or detector device, approved by both the WATER COMPANY and the fire underwriters, will be required on the service at a location approved by the WATER COMPANY. Such meter or device shall be installed and maintained by and at the cost and expense of the APPLICANT, but subject to the inspection and approval of the WATER COMPANY. The bypass meter only, used with the detector device, shall be furnished, installed and maintained by the WATER COMPANY at its cost and expense.

FIFTH: That a gate valve with the post indicator controlling the entire supply shall be placed at the curb or property line of the street in which the main is located or at such other point as may be approved by the WATER COMPANY, and shall be furnished, installed and maintained by and at the expense of the APPLICANT, and unless otherwise approved by the WATER COMPANY, said valve shall be installed in a valve pit or vault which shall also be furnished, installed and maintained by and at the expense of the APPLICANT.

KENTUCKY-AMERICAN WATER COMPANY **P.S.C. KY NO. 11**
Original Sheet No. A-11

SIXTH: That all hydrants and other fixtures connected to any private fire protection service system shall be kept closed and sealed, and not opened or used except during times of fire or testing. Upon extinguishment of each fire or following each test, the APPLICANT shall immediately close such fixtures and notify the WATER COMPANY so that they may be sealed. Whenever a private fire protection service system is to be tested, the APPLICANT shall notify the WATER COMPANY at least two business days in advance of such proposed test, requesting approval of the method, day and hour on which it is to be made.

SEVENTH: That no antifreeze or any other substance not specifically approved by the Environmental Protection Agency as non-detrimental to the public water supply, shall be introduced into sprinkling systems or into any pipe, fixture, appurtenance or other portion of the APPLICANT's private fire protection service system.

EIGHTH: That the APPLICANT understands and agrees that the extent of the rights of the APPLICANT under this Application is to receive, at times of fire on said premises, such supply of water as shall then be available and no other or greater quantity. The APPLICANT further acknowledges and agrees the WATER COMPANY shall not be considered in any way or manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and the WATER COMPANY shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

NINTH: That this Application does not contemplate uses of fixtures other than those shown on Exhibit A. Any waste of water or use of water through this connection for purposes other than testing or the extinguishment of fire, shall be deemed a violation of the terms and conditions of this Application and of the rules, regulations and conditions of service of the WATER COMPANY.

TENTH: That if private fire hydrants are included as part of this Application, they shall be painted any color other than that adopted by the WATER COMPANY for public fire hydrants.

ELEVENTH: That the APPLICANT shall furnish, attach and make a part hereof marked Exhibit A, three (3) complete sets of drawings showing the pipes, pumps, valves, hydrants, sprinkler systems, hose outlets and connections, standpipes, tanks and other openings and appurtenances contemplated in this Application. Such drawings, which shall be stamped "Approved" by the Insurance Services Office or other comparable agency approved by the WATER COMPANY, must also show all other water supply systems and pipelines and appurtenances which are proposed or which may exist on the premises to be served.

TWELFTH: That no pipe, fixture or appurtenance connected with the private fire protection service served by this Application shall be connected with any pipe, fixture or appurtenance supplied with water from any other source, unless specifically approved in writing by the WATER COMPANY.

THIRTEENTH: That the APPLICANT agrees to obtain in writing in advance the approval of the WATER COMPANY for any change, alteration, addition or deletion contemplated in the pipes, fixtures, openings and appurtenances and uses herein specified. Notwithstanding the approval of the WATER COMPANY, APPLICANT agrees that, except for those facilities which the WATER COMPANY had specifically agreed to provide and maintain, APPLICANT is and will be solely responsible for the design, adequacy, function and maintenance of its private fire protection service system referred to in this Application.

FOURTEENTH: That the WATER COMPANY has the right to discontinue or disconnect the service pipe herein applied for, and to terminate service under this Application, after due written notice to the APPLICANT, for failure to pay any bill when due, for failure to supply information to WATER COMPANY about the service system when so requested in writing, for leakage within APPLICANT's system, for violation of any of the terms and conditions of this Application, or for any violation of its rules, regulations and conditions of service; and the WATER COMPANY also has the right to shut off all or any part of its facilities by the WATER COMPANY(1) if a condition dangerous or hazardous to life, physical safety or property exists, (2) upon order by any court, the Public Service Commission or other duly authorized public authority, (3) if fraudulent or unauthorized use of water by APPLICANT is detected, or if the WATER COMPANY's regulating or measuring equipment has been tampered with by the APPLICANT.

FIFTEENTH: That upon acceptance of this Application by the WATER COMPANY and the completion of the installation of the service applied for, this Application shall be in full force and effect as a contract and shall continue as such until cancelled by written notice given thirty (30) days in advance by the APPLICANT to the WATER COMPANY, except as otherwise provided in numbered paragraph (14) above.

SIXTEENTH: The acceptance of this Application by the WATER COMPANY must be executed by its Director of Engineering before same

AMENDED AND RESTATED ARTICLES OF INCORPORATION OF KENTUCKY-AMERICAN WATER COMPANY

The undersigned, Kentucky-American Water Company (the "Corporation"), hereby restates and amends in its entirety its Articles of Incorporation, as amended and duly adopted on November 22, 2013 pursuant to KRS 271B.10-030 by the affirmative vote of the shareholders of the Corporation entitled to vote. These Amended and Restated Articles of Incorporation shall be effective on the date approved by the Kentucky Secretary of State.

ARTICLE I

The name of the corporation is Kentucky-American Water Company (the "Corporation").

ARTICLE II

The registered agent of the Corporation is CT Corporation System, 306 W. Main Street, Suite 512, Frankfort, KY 40601. The Principal Office is 2300 Richmond Road, Lexington, KY 40502.

ARTICLE III

Current Article Language:
The capital stock which the Corporation shall be authorized to have is: Two million one hundred fifty thousand (2,150,000) shares consisting of 150,000 shares of Preference Stock, with a par value of $100 each, for an aggregate par value of Fifteen Million dollars ($15,000,000), and 2,000,000 shares of Common Stock, having no par value.

ARTICLE IV

The preferences, qualifications, limitations, restrictions, and the special and relative rights in respect of the shares of the Corporation's Preference and Common Stock are as follows:

PREFERENCE STOCK

(1) The shares of Preference Stock may be divided into and issued in series from time to time, as herein provided. All shares of reference Stock of all series, whether now or hereafter created, shall be of equal rank and all shares of any particular series of Preference Stock shall be identical except as to the date or dates from which dividends on such shares shall be cumulative, as provided by subdivision (2) of this Preference Stock section of Article Four of the Corporation's Amended and Restated Articles of Incorporation. The shares of Preference Stock of different series, subject to any applicable provisions of law, may vary as to the following relative rights and preferences, and restrictions and qualifications thereof, which shall be fixed by the Corporation's Board of Directors, in the case of each series, at any time prior to the issuance of any shares thereof, in the manner provided in this subdivision (1):

(a) the distinctive designation of such series and the number of shares which shall constitute such series;
(b) the annual dividend rate on shares of such series, and the date or dates from which dividends on shares of such series shall be cumulative (hereinafter

sometimes called the Date of Cumulation);

(c) the price or prices at which, and the terms and conditions on which, the shares of such series may be redeemed by the Corporation (hereinafter sometimes called the Redemption Prices);

(d) the amount or amounts payable upon the shares of such series in the event of voluntary liquidation, dissolution or winding up to the affairs of the Corporation (hereinafter sometimes called the Voluntary Liquidation Price);

(e) whether or not the shares of such series shall be entitle to the benefit of a Sinking Fund to be applied to the purchase or redemption of shares of such series, and if so entitled, the amount of such fund and the manner of its application, including the price or prices at which the shares of such series may be redeemed or purchased through the application of such fund;

(f) whether or not the shares of such series shall be made convertible into shares of any other class or of any other series of the same or any other class or classes of stock of the Corporation, and if made so convertible the conversion price or prices, and the adjustments thereof, if any, at which such conversion may be made, and any other terms and conditions of such conversion;

(g) any other preferences, and relative, participating, option or other special rights qualifications, limitations or restrictions thereof so far as they are not inconsistent with the provision of Article Four of the Corporation's Amended and Restated Articles of Incorporation and to the full extent now or hereafter permitted by the laws of Kentucky.

Shares of Preference Stock shall be issued only as fully-paid and non-assessable shares.

(2) Dividends.

(a) Out of any funds of the Corporation legally available therefor remaining after Accrued Dividends to the end of the then current quarterly dividend period upon the Preferred Stock of all series then outstanding shall have been paid or declared and a sum sufficient for the payment thereof set apart for such payment, and after the Corporation shall have complied with any Sinking Fund provisions with respect of any and all amount then or theretofore required to be set aside or applied in respect of any Sinking Funds for any series of Preferred Stock, then and not otherwise the holders of Preference Stock of each series shall, subject to the provisions of this Article Four of the Corporation's Amended and Restated Articles of Incorporation and the terms of any resolution of the Corporation's Board of Directors establishing and designating any series of the Preferred Stock and fixing and determining the relative rights and preferences thereof, be entitle to receive, when and as declared by the Board of Directors, dividends in cash at the rate per annum for such series fixed in accordance with subdivision (1) of this Preference Stock section of this Article Four, and no more, payable on the first days of January, April, July and October in each year (the quarterly period ending on the first day of such months, respectively, being herein designated as Dividend Periods), in each case from the Date of Cumulation of the particular shares of such series; provided that the initial dividend with respect to any particular shares of any series shall be payable on such of such dates as next succeeds the expiration of 30 days after the date of issue of the first shares of such series to be issued, unless otherwise determined by the Board of Directors in any resolution establishing and designating any series of Preference Stock and fixing and determining the relative rights and preferences thereof. Such dividends shall be

cumulative in the case of all particular shares of each particular series as follows: (i) as to shares issued on or prior to the record date of the first dividend on shares of such series, the Date of Cumulation shall be as fixed for this purpose as provided in subdivision (1) above; (ii) as to shares issued during the period commencing the day after the record date for a dividend on shares of such series and terminating on the ensuing date of payment for such dividend, the Date of Cumulation shall be said date of payment; and (iii) as to shares issued any other time, the Date of Cumulation shall be the date of payment next preceding the date of issue of such shares, except if any shares are issued on a quarterly dividend payment date, the Date of Cumulation shall be such date. In addition (whether or not in any Dividend Period or Periods there shall be funds of the Corporation legally available for the payment of such dividends), if at any time accrued dividends upon the outstanding Preference Stock of all series to the end of the then current Dividend Period shall not have been paid or declared and a sum sufficient for the payment thereof set apart for such payment, the amount of the deficiency shall be fully paid, but without interest, or dividends in such amount declared on each such series and a sum sufficient for the payment thereof set apart for such payment, before any sum or sums shall be set aside for or applied to the purchase, redemption, Sinking Fund or other acquisition of Preference Stock of any series and before any dividend shall be declared or paid upon or set apart for, or any other distribution shall be orders or made in respect of, Subordinate Stock and before any shares of Subordinate Stock shall be purchased, redeemed, or otherwise acquired by the Corporation.

(b) No dividends shall be declared or paid on any particular series of Preference Stock to the exclusion of any other series thereof and all dividends declared on the Preference Stock of the respective series outstanding shall be declared pro rate, so that the amount of the dividend declared on any particular series of the Preference stock shall be in the proportion that the annual dividend requirements of the shares of such series bear to the total annual dividend requirements of the Preference Stock of all series at the time outstanding.

(3) Preference on Liquidation. In the event of any liquidation or dissolution or winding up of the Corporation, voluntary or involuntary, after there shall have been paid or set aside in cash for the holders of the Preferred Stock of all series then outstanding the full preferential amounts to which they are entitled under the provisions of Article Four of the Corporation Amended and Restated Articles of Incorporation, the holders of the Preference Stock of each series shall be entitle to receive, out of the Corporations available for distribution to its stockholders, before any distribution of assets shall be made to the holders of Subordinate Stock, (i) if such liquidation, dissolution or winding up shall be involuntary, the sum of $100 per share plus Accrued Dividends thereon to the Date of Final Distribution to the holders of the Preference Stock, and (ii) if such liquidation, dissolution or winding up shall be voluntary, the Voluntary Liquidation Price to the holders of the Preference Stock; and the holders of the Subordinate Stock shall be entitled, to the exclusion of the holders of the Preference Stock of any and all series, to share in all the assets of the Corporation then remaining as hereinafter provided. If upon any liquidation or dissolution or winding up of the Corporation the net assets of the Corporation shall be insufficient to pay the holders of all outstanding shares of the Preference Stock the full amounts to which they respectively shall be entitled, the holders of shares of Preference Stock of all series shall share ratably in any distribution

of assets according to the respective amounts which would be payable in respect to the shares held by them upon such distribution of all amounts payable on or with respect to the Preference Stock of all series were paid in full. Neither the merger nor consolidation of the Corporation into or with any other corporation, nor the merger or consolidation of any other corporation into or with the Corporation, nor a sale, transfer or lease of all or part of the assets of the Corporation, shall be deemed to be a liquidation, dissolution or winding up of the Corporation.

(4) Sinking Fund. Out of any funds of the Corporation legally available therefor remaining after Accrued Dividends to the end of the then current dividend period upon the Preferred Stock and the current Dividend Period upon the Preference Stock of all series then outstanding shall have been paid or declared and a sum sufficient for the payment thereof set apart for such payment, and after there have been set aside any sums with respect to any Sinking Funds for any series of Preferred Stock, and before any dividends shall be declared or paid upon or set apart for, or any other distribution shall be ordered or made in respect of, Subordinate Stock and before any dividends shall be declared or paid upon or set apart for, or any other distribution shall be ordered or made in respect of Subordinate Stock and before any shares of Subordinate Stock shall be purchased, redeemed or otherwise acquired by the Corporation, the Corporation shall set aside, in respect of each series of Preference Stock any shares which shall at the time be outstanding and in respect of which a Sinking Fund for the purchase or redemption thereof has been provided in accordance with this Preference Stock section of this Article Four, the sum or sums then or theretofore required to be set aside as a Sinking Fund, to be applied in the manner specified in the provisions creating such fund.

(5) Redemption.

(a) The Preference Stock, of all or any series, or any part thereof, at any time outstanding may, subject to any applicable restrictions with respect to the redemption of shares ranking junior to the Preferred Stock as to dividends or assets, be redeemed by the Corporation, at is election expressed by resolution of the Board of Directors, at any time or from time to time (which time, when fixed in each case and specified in the notice of redemption, is hereinafter called the Redemption Date), upon not less than 30 days previous notice to the holders of records of the Preference Stock to be redeemed, given by mail in such manner as may be prescribed by resolution of the Board of Directors (but not inadvertent failure to give such notice or any defect in the notice or giving thereof shall affect the validity of the proceedings for such redemption), at the Redemption Price then applicable to the Preference Stock to be redeemed, plus Accrued Dividends thereon to the redemption date; provided, however, that less than all the Preference Stock of all series there outstanding may be redeemed only after Accrued Dividends to the end of the then current Dividend Period upon the Preference Stock of all series than outstanding (other than the shares to be redeemed) shall have been paid or declared and a sum sufficient for the payment thereof set apart for such payment, and all Sinking Fund payment requirements with respect to the Preference Stock have been met. If less than all the outstanding Preference Stock of any series is to be redeemed, the selection of shares for redemption may be made either by lot or pro rate in such manner as may be prescribed by resolution of the Board of Directors. The Corporation may, if it shall so elect, deposit the amount of the Redemption Price plus such Accrued Dividends for the account of the holders of Preference Stock entitle thereto with a bank or trust corporation doing business in the

Commonwealth of Kentucky, and having capital and surplus of at least $5,000,000, at any time prior to the Redemption Date (the date of such deposit being hereinafter in this subdivision (5) referred to as the Date of Deposit).

(b) Notice of the Corporation's election to make such deposit including the Date of Deposit and the name and address of the bank or trust corporation with which the deposit has been or will be made, shall be included in the notice of redemption. On and after the Date of Deposit (unless default shall be made by the Corporation in providing moneys for the payment of the Redemption Price, plus such Accrued Dividend, pursuant to the notice of redemption), all dividends on the Preference Stock so called for redemption shall cease to accrue, and, notwithstanding that any certificate for shares of Preference Stock so called for redemption shall not have been surrendered for cancellation, the shares represented thereby shall no longer be deemed outstanding and all rights of the holders thereof as stockholders of the Corporation shall cease and terminate, except the right to receive the Redemption Price, plus such accrued Dividends, as hereinafter provided and except any conversion rights not theretofore expired. Such conversion rights, however, in any event shall cease and terminate upon the Redemption Date or upon any earlier date duly fixed for the termination of such rights. At any time on or after the Redemption Date, or if the Corporation shall elect to deposit their moneys for such redemption as herein provided, then at any time on or after the Date of Deposit, which time shall be specified by the Corporation in the notice of redemption but shall not be later than the Redemption Date, the respective holders of record of the Preference Stock to be redeemed shall be entitled to receive the Redemption Price, plus such Accrued Dividends, upon actual delivery to the Corporation or, in the event of such deposit, to the bank or trust corporation with which such deposit shall be made, or certificates for the shares to be redeemed, such certificates, if required, to be properly stamped for transfer and duly endorsed in blank. Any moneys so deposited which shall remain unclaimed by the holders of such Preference Stock at the end of two years after the Redemption Date shall be paid by such bank or trust corporation to the Corporation; provided, however, that all moneys so deposited which shall not be required for such redemption because of the exercise of any right of conversion shall be returned to the Corporation forthwith. Any interest accrued on moneys so deposited shall be paid to the Corporation from time to time.

(4) Restrictions on Certain Corporate Action; Other Voting Rights.

(a) So long as any shares of Preference Stock are outstanding, the consent of the holders of at least two-thirds, of the Preference Stock at the time outstanding, given in person or by proxy, either in writing without a meeting (if permitted by law) or by vote at any meeting called for the purpose, shall be necessary for effecting or validating any amendment, alteration or repeal of the Amended and Restated Articles of Incorporation, or By-laws of the Corporation which would:

(i) alter or change the preferences, special rights, or powers given to the Preference Stock so as to affect them adversely, or

(ii) increase the authorized number of, or increase or decrease the authorized number of shares of Preferred Stock, or

(iii) create any new class of stock ranking on a parity with or having preference over the Preference Stock as to dividends or assets, or create any obligating or security of the Corporation convertible into

or exchangeable for shares of stock of any class having such preference over the Preference Stock; provided, however, that if such amendment, alteration or repeal affects adversely the preferences. Special rights or powers given one or more but not all series of Preference Stock at the time outstanding, only the consent of the holders of at least two-thirds of all series so affected, voting together, shall be required; and provided, further that the amendment of the Amended and Restated Articles of Incorporation to create, or increase or decrease the authorized number of shares of, any Subordinate Stock or any obligation or security of the Corporation convertible into any such stock shall not be deemed to affect adversely the preferences, special rights or powers of the Preference Stock.

(b) If and whenever the dividends on the Preference Stock, regardless of series, shall be in arrears and such arrears shall aggregate an amount equal to or in excess of eight (8) quarterly dividends upon such stock, the number of directors then constituting the Board of Directors shall be increased by one and the holders of the Preference Stock, voting separately as a class, shall be entitled, at any annuals meeting of the stockholder or at a special meeting of the holders of the Preference Stock called as hereinafter provided, to elect the additional directors. Whenever all arrears in dividends on the Preference Stock then outstanding shall have been paid and dividends thereon for the current quarterly Dividend Period shall have been paid or declared and set aside for payment, then the rights of the holders of the Preference Stock to elect such additional director shall cease, but subject to the same provisions for the vesting of such voting rights in the case of any similar future arrearages in dividends, and the term of office of the person elected as a director by the holders of the Preference Stock shall be reduced accordingly.

At any time after such voting power shall have been vested in the Preference Stock, the Secretary of the Corporation may, and upon written request of the holders of record of ten percent (10%) or more in amount of the Preference stock then outstanding, addressed to him at the principal office of the Corporation, shall, call a special meeting of the holders of the Preference Stock for the selection of the one director to be elected by them as herein provided, to be held within thirty (30) days after such call and at the place and upon the notice provided by law or by the By-laws of the Corporation for the holding of meetings of stockholders. If any such special meeting required to be called as above provide shall not be called by the Secretary within twenty (20) days after receipt of any such request, then the holders of record of ten percent (10%) or more in amount of the Preference Stock then outstanding may designate in writing one of their number to call such meeting, and the person so designated may call such meeting to be held at the place and upon the notice above provided, and for that propose shall have access to the stock books of the Corporation. If any such special meeting shall be called as above provided and if the holders of at least a majority of the Preference Stock then outstanding shall be present or represented by proxy at such meeting or any adjournment thereof, then the holders of at least a majority of the Preference Stock present or so represented at such meeting shall be entitle to elect the additional director above provided for. The director elected at any such special meeting

shall hold office until the nest annual meeting of the stockholders, unless his term of office shall sooner terminate as provided hereinabove. In case any vacancy shall occur with respect to the director elected by the holders of the Preference Stock, such directorship shall remain vacant unless the holders of record of ten percent (10%) or more of the Preference Stock shall request in writing a special meeting of said holder to fill said vacancy pursuant to the terms of this subdivision 6(b) at which meeting said vacancy will be so filled.

At any annual meeting of stockholders, the holders of at least a majority of the Preference Stock then outstanding, present or represented by proxy, shall constitute a quorum for the purpose of election of such additional director and the holders of at least a majority of the Preference Stock present or so represented at such meeting shall be entitle to elect the additional director above provided for.

(c) Except when required by law and as provided in subdivision 6(a)(i) hereof, whenever two or more series of Preference Stock are outstanding, no particular series of Preference Stock shall be entitled to vote or consent as a separate series shall be deemed to constitute but one class for any purpose for which a vote or consent of the stockholders by classes may now or hereafter be required.

(d) Holders of Preference Stock shall not be entitled to receive notice of any meeting of stockholders at which they are not entitled to vote or consent, except as otherwise required by law.

(5) No Subscription or Preemptive Rights.

(a) No holder of the Preference Stock shall, as such holder, have any right to purchase or subscribe for (i) any stock of any class, or any warrant or warrants, option or options or other instrument or instruments that shall confer upon the holder or holders that of the right to subscribe for or purchase or receive from the Corporation any stock of any class or classes which the Corporation may issue or sell, whether or not such stock shall be convertible into or exchangeable for any other stock of the Corporation of any class or classes and whether or not such stock shall be unissued shares authorized by the Amended and Restated Articles of Incorporation or by any amendment thereto or shares of stock of the Corporation acquired by it after the issue thereof, or (ii) any obligation which the Corporation may issue or sell that shall be convertible into or exchangeable for any shares of stock of the Corporation of any class or classes, or to which shall be attached or appurtenant any warrant or warrants, option or options or other instrument or instruments that shall confer upon the holder or holders of such obligation the right to subscribe for or purchase or receive from the Corporation any shares of its stock of any class or classes.

(b) Upon any issue for money or other consideration of any stock of the Corporation that may be authorized from time to time no holder of stock, irrespective of the kind of such stock, shall have any preemptive or other right to subscribe for, purchase or receive any proportionate or other share of the stock so issued, but the Board of Directors may dispose of all or any portion of such stock as and when it may determine free of any such rights, whether by

offering the same to stockholders or by sale or other disposition as said Board may deem advisable.

(8) Definitions.

(a) The term "Subordinate Stock" as used in this Preference Stock section of this Article Four shall be deemed to mean all stock of any class of the Corporation ranking junior to the Preference Stock as to dividends or assets;

(b) The term "Sinking Fund" shall mean any fund or requirement for the periodic retirement of shares;

(c) The term "Accrued Dividends", with respect to any share of any series of Preferred and Preference Stock, shall mean an amount computed at the annual dividend rate for the series of which the particular share is a part, from the date on which dividends on such share become cumulative (called the "Date of Cumulation" with respect to the Preference Stock" to and including the date to which such dividends are to be accrued, less the aggregate amount of all dividends theretofore paid thereon;

(d) The term "Date of Final Distribution" shall mean the date on which distribution or payment in liquidation is actually made to the holders of Preference Stock; but if written notice of the terms and manner of distribution or payment shall have been mailed to the holders of Preference Stock by the Corporation (or by a receiver, trustee or other liquidator of the Corporation) at least five days prior to the date on which such distribution or payment shall be made available to such holders against surrender of their certificates, then the term "Date of Final Distribution" shall mean the date on which such distribution or payment has been made available to such holders against surrender of their certificates.

COMMON STOCK

(1) Dividends. Out of any assets of the Corporation legally available therefor remaining after Accrued Dividends to the end of the then current dividend period upon the Preferred Stock and Preference Stock of all series then outstanding shall have been paid or declared and the sum sufficient for the payment thereof set apart for such payment, and after setting aside the sum or sums there or theretofore required to be set aside as a Sinking Fund provided for any one or more series of the Preferred Stock and Preference Stock, then and not otherwise the holders of Common Stock shall, subject to the provisions of this Article Four of the Corporation's Amended and Restated Articles of Incorporation and of the terms of any resolution of the Board of Directors establishing and designating any series of the Preferred Stock or Preference Stock and fixing and determining the relative rights and preferences thereof, be entitled to receive such dividends as may from time to time be declared by the Board of Directors.

(2) Liquidation. In the event of any liquidation, dissolution or winding up of the Corporation, after there shall have been paid or set aside in case for the holders of the Preferred Stock and Preference Stock the full preferential amounts to which they are entitled under the provisions of this Article Four of the Corporation's Amended and Restated Articles of Incorporation, the holders of the Common Stock shall be entitled to receive pro rata all of the remaining assets of the Corporation available for distribution to its stockholders.

(3) Voting Rights; Cumulative Voting. At all meetings of the stockholders, every registered holder of Common Stock shall be entitled to vote and shall have one vote for each share standing in his name on the books of the Corporation on any record date fixed for such

purpose or, if no such date be fixed, on the date of such meeting; provided that (so long as the laws of Kentucky shall so require) in all elections for directors, such stockholder shall have the right to cast as many votes in the aggregate as he shall be entitled to vote hereunder multiplied by the number of directors to be elected at such election, and he may cast the whole number of votes for one candidate, or distribute such votes among two or more candidates.

ARTICLE V

8.47% SERIES PREFERENCE STOCK
45,000 shares, with a par value of $100 per share (herein sometimes referred to as the "8.47% Series")

The rights and preferences, and restrictions and qualification thereof, of the 8.47% Series, in addition to those set forth with respect to the Preference Stock in Article Four of the Charter and Articles of Incorporation of the Corporation, as amended (the Amended and Restated Articles of Incorporation as so amended being referred to as the "Amended and Restated Articles of Incorporation"), are hereby fixed as follows:

(a) The annual dividend rate payable on shares of the 8.47% Series shall be 8.47% of the par value of said shares, and no more, and the Date of Cumulation (as defined in Article Four of the Amended and Restated Articles of Incorporation) on all shares of the 8.47% Series issued prior to the record date for the first dividend shall be the date of issuance.

(b) (i) The shares of the 8.47% Series shall not be redeemable prior to December 1, 2001 at the option of the Corporation.

(ii) The shares of the 8.47% Series may be redeemed at any time, or from time to time, on or after December 1, 2001 at the option of the Corporation, in whole or in part, upon payment of a redemption price equal to the sum of (1) $100 per share plus (2) Accrued Dividends (as defined in Article Four of the Amended and Restated Articles of Incorporation) thereon to the date of redemption plus (3) a premium equal to the Make-Whole Premium (hereinafter defined).

The Make-Whole Premium shall be determined five (5) business days prior to the date fixed for redemption. Notice of the Make-Whole Premium, if any, together with the calculations, in reasonable detail, used to determine any such premium shall be given to each holder of the 8.47% Series on the day it is determined, by telecopy or other same-day communication.

"Make-Whole Premium" shall mean, in connection with any redemption, the excess, if any, of (i) the aggregate present value as of the date of such redemption of the par value of the shares of the 8.47% Series being redeemed and the amount of dividends (exclusive of dividends accumulated tot the date of redemption) that would have been payable in respect of such shares if such redemption had not been made (assuming all such shares would otherwise be redeemed on December 1, 2036), said present value to be determined by discounting such amount at the Reinvestment Rate (thereinafter defined) from the respective dates on which such amounts would have been payable, over (ii) 100% of the par value of the outstanding shares of the 8.47% Series being redeemed if the Reinvestment Rate is quail to or higher than 8.47%, the Make-Whole

Premium shall be zero.

"Reinvestment Rate" shall mean the sum of (i) 0.4% plus (ii) the arithmetic mean of the yields under the respective headings "This Week" and "Last Week" published in the Statistical Release (hereinafter defined) under the caption "Treasury Constant Maturities" for the maturity date of December 1, 2036. If no maturity exactly corresponds to such date, yields for the two published maturities most closely corresponding to such date shall be calculated pursuant to the immediately preceding sentence and the Reinvestment Rate shall be interpolated or extrapolated from such yields on a straight-line basis, rounding in each of such relevant periods to the nearest month. For the purposes of calculating the Reinvestment Rate, the most recent Statistical Release published prior to the date of determination of the premium hereunder shall be used.

"Statistical Release" shall mean the statistical release designated "H.15(519)" or any successor publication which is published weekly by the Federal Reserve System and which establishes yields on actively traded United States Government Securities adjusted to constant maturities or, if such statistical release is not published at the time of any determination hereunder, then such other reasonably comparable index which shall be designated by the holders of not less than 66-2/3% of the outstanding shares of the 8.47% Series.

(iii) In addition to the option to redeem granted to the Corporation in clause (ii) of this subparagraph (b), at any time during the period of twelve (12) consecutive calendar months beginning on December 2, 2001 and ending November 30, 2012 both date inclusive, and during each like period of twelve (12) consecutive calendar months thereafter so long as any shares of the 8.47% Series remain outstanding, the Corporation may at its option redeem up to and including, but not exceeding, four thousand five hundred (4,500) shares of the 8.47% Series at a redemption price equal to the sum of (1) $100 per share plus (2) Accrued Dividends thereon to the date of redemption; provided, however, that the option of the Corporation to redeem up to and including, but not exceeding, four thousand five hundred (4,500) shares of the 8.47% Series during each such twelve (12) consecutive calendar month period at such redemption price shall not be cumulative and any shares redeemed during such period in excess thereto shall be redeemed at the redemption price specified in clause (ii) of this subparagraph (b).

(iv) If less than all outstanding shares of the 8.47% Series shall be redeemed at any time or times pursuant to the provisions of either clause (ii) or clause (iii) of this subparagraph (b), the shares to be redeemed shall be selected on a pro rata basis as nearly as practicable, in full shares only, according to the number of outstanding shares of the 8.47% Series held by each holder thereof.

(v) The Voluntary Liquidation Price (as defined in Article Four of the Amended and Restated Articles of Incorporation) for shares of the 8.47% Series shall be the sum of (1) $100 per share plus (2) Accrued Dividends to the date of redemption.

(vi) All then outstanding shares of the 8.47% Series shall be redeemed by the Corporation on December 1, 2036 at a redemption price equal to the sum of (1) $100 per share plus (2) Accrued Dividends thereon to the date of redemption; from and after December 1, 2036 and until the first to occur of (a) the date on which all such shares have been redeemed or (b) the date of Deposit (as defined in subdivision (5) of Article

Four of the Amended and Restated Articles of Incorporation) for the redemption of all such shares (assuming that proper notice of redemption and deposit of moneys has been made by the Corporation in compliance with Article Four of the Amended and Restated Articles of Incorporation), no dividend shall be paid or declared (except dividends payable solely in the Common Stock of the Corporation), nor shall any other distribution be made, on any Subordinate Stock (as defined in Article Four of the Articles of Incorporation) of the Corporation, nor shall any shares of Subordinated Stock be purchased or otherwise acquired for value by the Corporation.

(c) There shall not be any sinking, purchase or analogous fund for the redemption of the shares of the 8.47% Series.

(d) The holders of shares of the 8.47% Series shall have no rights of conversion, exchange or participation, nor any other preferences, or relative, participating, option or other special rights, qualifications, limitations or restrictions other than those specified therein and in the Articles of Incorporation, as amended.

ARTICLE VI

The duration of the Corporation is perpetual.

ARTICLE VII

The Corporation is formed for the following purposes:

To purchase, erect and maintain water and wastewater works and to supply water for public and private purposes;

To supply water and wastewater services for public and private purposes in the State of Kentucky as it deems appropriate for its purposes;

To purchase, lease, take or otherwise acquire and own, use, hold, sell, exchange, convey, lease, mortgage, work, improve, develop, subdivide, cultivate and otherwise handle, dispose of and deal in real estate, real property and any interest or right therein and to contract for and engage the services of other parties for the purpose of carrying on the same;

To perform all functions, reasonably attendant to implementing those purposes, to do anything necessary and proper for the accomplishment of those objects or necessary or incidental to the attainment of the purposes of the Corporation, and to exercise any powers which are granted to Corporations organized under The Business Corporation Law of Kentucky, as amended from time to time;

These are objects and purposes of the Corporation, and are not a limit, restraint or restriction in any manner on its powers.

ARTICLE VIII

The business of the Corporation shall be transacted within such counties within the State of Kentucky.

ARTICLE IX

The business of the Corporation shall be managed under the direction of a board of directors. Except as otherwise set forth in these Amended and Restated Articles of Incorporation, the number of directors shall be such as from time to time fixed by or in the manner provided in the By-laws, and such number may be altered from time to time in the manner provided in the By-laws or by amendment thereof adopted by the Board of Directors.

Ambleside Private Fire Surcharge	4.59	4.59	0.00	0.00%

Kentucky American Water has also proposed additions to its tariff to include a System Improvement Program surcharge that would apply to Residential, Commercial, Industrial, Other Public Authority, Sale for Resale, Public and Private Fire Service classifications for qualified infrastructure investments. This surcharge would be calculated annually based on forecasted qualified infrastructure costs and applied to each customer’s monthly bill. Kentucky American Water is also proposing tariff revisions to (1) clarify its ability to inspect existing plumbing and (2) provide flexibility regarding the advance payment terms for private fire hydrants.

In the preceding paragraphs, "Black Mountain” refers to customers served by Black Mountain Utility District, as Kentucky American Water and Black Mountain have submitted a request to the Commission in Case No. 2026-00097 to transfer control of Black Mountain’s assets to Kentucky American Water. Kentucky American Water is also including a request in this rate case regarding the valuation of the Black Mountain acquisition. “Livingston” refers to customers served by the City of Livingston, as the Commission approved the transfer of Livingston’s assets to Kentucky American Water in Case No.2025-00364. “Bell and Hickman Counties” refers to customers served by Water Service Company of Kentucky, Inc., as the Commission approved the transfer of Water Service’s assets in those counties to Kentucky American Water in Case No. 2025-00171.

This application may be examined at the offices of Kentucky American Water located at 2300 Richmond Road in Lexington, Kentucky.

This application may also be examined at the offices of the Public Service Commission located at 211 Sower Boulevard in Frankfort, Kentucky, Monday through Friday from 8:00 am – 4:30 pm or on the Commission’s website at http://psc.ky.gov.

Comments regarding this application may be submitted by mail to the Public Service Commission, Post Office Box 615, Frankfort KY 40602; or through its website at http://psc.ky.gov.

The rates contained in this notice are the rates proposed by Kentucky American Water, but the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice.

Any person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, which establishes the grounds for the request including the status and interest of the party.

If the Public Service Commission does not receive a written request for intervention within thirty (30) days of the providing of this notice, the Public Service Commission may take final action on the application.

Re: Adjustment of Water Rates of Kentucky American Water

Dear Ms. Bridwell:

In conformity with 807 KAR 5:001, Section 16(2), this letter is to provide notice to the Public Service Commission of the Commonwealth of Kentucky of the intention of Kentucky American Water to file an Application for an increase in its water rates no earlier than 30 days from the date of this letter. The rate application will be supported by a fully forecasted test period. Enclosed please find a Notice of Election of Use of Electronic Filing Procedures. Please acknowledge receipt of this notice and assign a case number to the Application to be filed.

I hereby certify that this electronic filing is a true and accurate copy of the original documents in paper medium; that the electronic filing has been transmitted to the Commission on April 15, 2026; and that no party has been excused from participation by electronic means.

Very truly yours,

Lindsey W. Ingram III

Enclosure

Case No. 2026-00094

Notice of Election to Use Electronic Filing Procedures
Revised June 2014

NOTICE OF ELECTION OF USE OF ELECTRONIC FILING PROCEDURES

(Complete All Shaded Areas and Check Applicable Boxes)

In accordance with 807 KAR 5:001, Section 8, Kentucky American Water gives notice of its intent to file an application for adjustment of water rates with the Public Service Commission no later than 30-60 days after April 15, 2026 and to use the electronic filing procedures set forth in that regulation.

Kentucky American Water further states that:

		Yes	No
1.	It requests that the Public Service Commission assign a case number to the intended application and advise it of that number as soon as possible;	xx	
2.	It or its authorized representatives have registered with the Public Service Commission and are authorized to make electronic filings with the Public Service Commission;	xx	
3.	Neither it nor its authorized representatives have registered with the Public Service Commission for authorization to make electronic filings but will do so no later than seven days before the date of its filing of its application for rate adjustment;		xx
4.	It or its authorized agents possess the facilities to receive electronic transmissions;	xx	
5.	The following persons are authorized to make filings on its behalf and to receive electronic service of Public Service Commission orders and any pleadings filed by any party or the Public Service Commission Staff:		

Name	Electronic Mail Address
Anne Trout	anne.trout@amwater.com
Emily Bytnar	emily.bytnar@amwater.com
Monica Braun	monica.braun@skofirm.com
Lindsey Ingram	L.Ingram@skofirm.com

6.	It and its authorized representatives listed above have read and understand the procedures for electronic filing set forth in 807 KAR 5:001 and will fully comply with those procedures unless the Public Service Commission directs otherwise.	xx	

Signed /s/ Lindsey Ingram

KENTUCKY-AMERICAN WATER COMPANY
CASE NO. 2026-00094
FORECASTED TEST PERIOD FILING REQUIREMENTS
EXHIBIT NO. 14

Description of Filing Requirement:

Statement of Attestation signed by Kentucky-American Water Company's Chief Officer in charge of Kentucky Operations.

Response:

Please see attached.

For electronic version, see KAW_APP_EX14_051526.pdf.

KENTUCKY PUBLIC SERVICE COMMISSION

KENTUCKY-AMERICAN WATER COMPANY

CASE NO. 2026-00094

Comes Robert Burton, President of Kentucky-American Water Company, and as required by 807 KAR 5:001, Section 16(7)(e), does hereby attest as follows:

1. That the forecast utilized by Kentucky-American Water Company in Case No. 2026-00094 is reasonable, reliable, made in good faith, and all basic assumptions used in the forecast have been identified and justified;

2. That the forecast utilized by Kentucky-American Water Company in Case No. 2026-00094 contains the same assumptions and methodologies as in the forecast prepared for use by management, except for the differences that have been identified and explained in the filing requirements and schedules thereto; and

3. That productivity and efficiency gains are included in the forecast.

Robert Burton

Date: May 5th, 2026

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 5TH day of May, 2026.

Notary Public

My Commission Expires:

July 31, 2029

Notary ID: KYNP26988

MOLLY MCCLEESE VAN OVER

Prospectus Supplement to Prospectus dated February 20, 2024

AMERICAN WATER

American Water Capital Corp.

$700,000,000 5.200% Senior Notes due 2036

This is an offering by American Water Capital Corp., which is referred to as AWCC or the issuer, of its 5.200% Senior Notes due 2036, which are referred to as the notes. The issuer will pay interest semi-annually in arrears on the notes on April 1 and October 1 of each year, beginning on October 1, 2026. The notes will mature on April 1, 2036. However, the issuer may at any time and from time to time redeem all or a portion of the notes, in each case at the applicable redemption prices set forth in this prospectus supplement under "Description of the Notes—Optional Redemption by the Issuer." The notes will be issued only in registered form and in denominations of $1,000 and integral multiples of $1,000 in excess thereof.

The notes will be unsecured, will rank equal in right of payment with the issuer's existing and future senior debt and will rank senior in right of payment to the issuer's future subordinated debt. The notes will rank effectively junior in right of payment to all of the issuer's future secured indebtedness to the extent of the value of the assets securing such indebtedness. The notes will have the benefit of a support agreement from American Water Works Company, Inc., the issuer's parent company. The notes will not be guaranteed by any of American Water Works Company, Inc.'s subsidiaries. The issuer is a finance subsidiary whose activities are limited to borrowing funds and issuing its debt securities, and lending proceeds from those financing activities under loan agreements with American Water Works Company, Inc. and subsidiaries comprising its regulated utility operations.

Investing in these notes involves risks. See "Risk Factors" beginning on page S-6 of this prospectus supplement to read about factors you should consider before buying these notes.

Neither the Securities and Exchange Commission nor any state securities commission or other regulatory body has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

	Price to Public(1)	Underwriting Discount	Proceeds to AWCC
Per note	99.923%	0.650%	99.273%
Total	$699,461,000	$ 4,550,000	$694,911,000

(1) Plus accrued interest from April 1, 2026, if settlement occurs after that date.

The underwriters expect to deliver the notes in book-entry form only through the facilities of The Depository Trust Company for the accounts of its participants, including Clearstream Banking, *société anonyme*, and Euroclear Bank SA/NV, as operator of the Euroclear system, against payment in New York, New York on or about April 1, 2026.

ABOUT THIS PROSPECTUS SUPPLEMENT

All references in this prospectus supplement to "American Water" and the "Company" refer to American Water Works Company, Inc. and its consolidated subsidiaries taken together as a whole, except in the sections entitled "Where You Can Find More Information," "Use of Proceeds," "Description of the Notes," "Underwriting," and "Legal Matters," where such terms shall refer to American Water Works Company, Inc. and not to any of its subsidiaries, in each case unless the context otherwise requires. All references in this prospectus supplement to the "support provider" refer to American Water Works Company, Inc., without its subsidiaries, unless the context otherwise requires. All references in this prospectus supplement to "AWCC" or the "issuer" refer to American Water Capital Corp.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering and certain other matters. The second part, the accompanying prospectus, gives more general information about the issuer, American Water and their securities. Generally, the reference to "this prospectus" is to both parts of this document combined. To the extent information in this prospectus supplement conflicts with information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

Neither AWCC nor American Water Works Company, Inc. is making an offer or sale of these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information in this prospectus supplement or in the accompanying prospectus is accurate only as of the date on the front cover of those documents and any information incorporated by reference is only accurate as of the date of the document incorporated by reference. American Water's business, financial condition, results of operations and prospects may have changed since the date of such information.

"American Water" and its logos are trademarks of American Water Works Company, Inc. Other service marks, trademarks and trade names referred to in this prospectus are the property of their respective owners.

Table of Contents

WHERE YOU CAN FIND MORE INFORMATION

American Water files annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission, which is referred to as the SEC. These SEC filings are available to the public over the Internet at the SEC's website at *http://www.sec.gov* and American Water's website at *https://amwater.com*. The information contained on or accessible from American Water's website does not constitute a part of this prospectus and is not incorporated by reference herein.

American Water and the issuer have filed a registration statement on Form S-3 under the Securities Act of 1933, as amended, which is referred to as the Securities Act, with the SEC to register the securities offered by this prospectus supplement. This prospectus is a part of the registration statement, but does not contain all the information contained in the registration statement because certain parts of the registration statement are omitted in accordance with the rules and regulations of the SEC. The registration statement and the documents filed as exhibits to the registration statement are available to the public over the Internet at the SEC's website and American Water's website, each as described above.

American Water is "incorporating by reference" into this prospectus specific documents that it files with the SEC, which means that important information can be disclosed to you by referring you to those documents that are considered part of this prospectus. Information that American Water files subsequently with the SEC will automatically update and supersede this information. American Water incorporates by reference the documents listed below, and any future documents that it files with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, which is referred to as the Exchange Act, until the offering of the securities covered by this prospectus has been completed or terminated.

American Water is "incorporating by reference" into this prospectus the following documents filed with the SEC (excluding any portions of such documents that have been "furnished" but not "filed" for purposes of the Exchange Act):

Filings	Period Covered or Date Filed
Annual Report on Form 10-K	Year ended December 31, 2025
Current Reports on Form 8-K	Filed on January 16, 2026, January 27, 2026, February 10, 2026 (Item 5.07 only), March 2, 2026 and March 10, 2026

American Water will provide to each person, including any beneficial owner, to whom this prospectus is delivered, upon written or oral request and without charge, a copy of the documents referred to above that have been incorporated in this prospectus by reference. You can request copies of such documents if you call or write American Water at the following address or telephone number: American Water Works Company, Inc., 1 Water Street, Camden, New Jersey, 08102-1658, Attention: General Counsel, (856) 955-4001.

This prospectus contains summaries of certain agreements that American Water has filed as exhibits to various SEC filings, as well as certain agreements that American Water and the issuer will enter into in connection with this offering. The descriptions of these agreements contained in this prospectus or information incorporated by reference herein do not purport to be complete and are subject to, or qualified in their entirety by reference to, the definitive agreements. You can obtain copies of the definitive agreements without charge to you by making a written or oral request to American Water as described above.

American Water and the issuer are only responsible for the information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus or contained in any free writing prospectus prepared by or on behalf of American Water and the issuer. Neither American Water nor the issuer has authorized anyone to provide you with information other than that contained or incorporated by reference in

Table of Contents

this prospectus supplement or in the accompanying prospectus, and American Water and the issuer take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus to the extent that a statement contained herein, or in any other subsequently filed document which also is or is deemed to be incorporated by reference herein, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus.

Table of Contents

FORWARD-LOOKING STATEMENTS

American Water has made statements under "Risk Factors" and in other sections of this prospectus and in the documents incorporated by reference herein that are forward-looking statements within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act, and the Private Securities Litigation Reform Act of 1995. In some cases, these forward-looking statements can be identified by words with prospective meanings such as "intend," "plan," "estimate," "believe," "anticipate," "expect," "predict," "project," "propose," "assume," "forecast," "likely," "uncertain," "outlook," "future," "pending," "goal," "objective," "potential," "continue," "seek to," "may," "can," "should," "will" and "could" or the negative of such terms or other variations or similar expressions. Forward-looking statements may relate to, among other things: American Water's future financial performance, liquidity and cash flows; the timing and amount of rate and revenue adjustments, including through general rate case filings, filings for infrastructure surcharges and other governmental agency authorizations and proceedings, and filings to address regulatory lag; American Water's ability to execute its current and long-term business, operational, capital expenditures and growth plans and strategies; the timing and outcome of pending or future acquisition activity (including, without limitation, the support provider's merger agreement with Essential Utilities, Inc. ("Essential") and the proposed acquisition by the support provider of systems owned indirectly by Nexus Water Group, Inc.), and the ability to achieve organic customer growth; the ability of American Water's California subsidiary to obtain adequate alternative water supplies in lieu of diversions from the Carmel River; the amount, allocation and timing of projected capital expenditures and related funding requirements; American Water's ability to repay or refinance debt; the future impacts of increased or increasing financing costs, inflation and interest rates; American Water's ability to finance current and projected operations, capital expenditure needs and growth initiatives by accessing the debt and equity capital markets and sources of short-term liquidity; the future settlement or settlements of American Water's forward-sale agreements, adjustments to the forward sale price thereunder, and the amount of and the intended use of net proceeds from any such future settlement or settlements; the outcome and impact on American Water of governmental and regulatory investigations, class action lawsuits, and other litigation and legal proceedings, and related potential fines, penalties and other sanctions; the ability to meet or exceed American Water's stated environmental and sustainability goals, including its greenhouse gas ("GHG") emission reduction, water delivery efficiency and water system resiliency goals; the ability to complete, and the timing and efficacy of, the design, development, implementation and improvement of technology and other strategic initiatives; American Water's ability to comply with new and changing environmental regulations; the ability to capitalize on existing or future utility privatization opportunities; trends in the water and wastewater industries in which American Water operates, including macro trends with respect to American Water's efforts and projects related to customer, technology and work efficiency and execution; regulatory, legislative, tax policy or legal developments; and impacts that future significant tax legislation, and the imposition, utilization or change in various economic tariffs (or any attempt or effort to do so), may have on American Water and on its business, results of operations, cash flows and liquidity.

Forward-looking statements are predictions based on American Water's current expectations and assumptions regarding future events. They are not guarantees or assurances of any outcomes, financial results, levels of activity, performance or achievements, and investors are cautioned not to place undue reliance upon them. These forward-looking statements are subject to a number of estimates, assumptions, known and unknown risks, uncertainties and other factors. American Water's actual results may vary materially from those discussed in the forward-looking statements included in this prospectus and in the documents incorporated by reference herein. Factors that could cause actual results to differ from those discussed in forward-looking statements include, but are not limited to, the factors discussed under "Risk Factors" in this prospectus supplement, and the following important factors:

- the decisions of governmental and regulatory bodies, including decisions to raise or lower customer rates;
- the timeliness and outcome of regulatory commissions' and other authorities' actions concerning rates, capital structure, authorized return on equity, capital investment, system acquisitions and dispositions, taxes, permitting, water supply and management, and other decisions;

- changes in customer demand for, and patterns of use of, water and energy, such as may result from conservation efforts, or otherwise;
- limitations on the availability of American Water's water supplies or sources of water, or restrictions on its use thereof, resulting from allocation rights, governmental or regulatory requirements and restrictions, drought, overuse or other factors;
- a loss of one or more large industrial or commercial customers due to adverse economic conditions, or other factors;
- present and future proposed changes in laws, governmental regulations and policies, including with respect to the environment (such as, for example, potential improvements or changes to existing Federal regulations with respect to lead and copper service lines and galvanized steel pipe), health and safety, data and consumer privacy, security and protection, water quality and water quality accountability, contaminants of emerging concern (including without limitation per- and polyfluoroalkyl substances (collectively, "PFAS")), public utility and tax regulations and policies, and impacts resulting from U.S., state and local elections and changes in federal, state and local executive administrations;
- American Water's ability to collect, distribute, use, secure and store consumer data in compliance with current or future governmental laws, regulations and policies with respect to data and consumer privacy, security and protection;
- weather conditions and events, climate variability patterns, and natural disasters, including drought or abnormally high rainfall, prolonged and abnormal ice or freezing conditions, strong winds, coastal and intercoastal flooding, pandemics and epidemics, earthquakes, landslides, hurricanes, tornadoes, wildfires, electrical storms, sinkholes and solar flares;
- the outcome of litigation and similar governmental and regulatory proceedings, investigations or actions;
- the risks associated with American Water's aging infrastructure, and its ability to appropriately improve the resiliency of or maintain, update, redesign and/or replace, current or future infrastructure and systems, including its technology and other assets, and manage the expansion of its businesses;
- exposure or infiltration of American Water's technology and critical infrastructure systems, including the disclosure of sensitive, personal or confidential information contained therein, through physical or cyber attacks or other means, and impacts from required or voluntary public and other disclosures, as well as civil class action and other litigation or legal, regulatory or administrative proceedings, related thereto;
- American Water's ability to obtain permits and other approvals for projects and construction, update, redesign and/or replacement of various water and wastewater facilities;
- changes in American Water's capital requirements;
- American Water's ability to control operating expenses and to achieve operating efficiencies, and American Water's ability to create, maintain and promote initiatives and programs that support the affordability of American Water's regulated utility services;
- the intentional or unintentional actions of a third party, including contamination of American Water's water supplies or the water provided to its customers;
- American Water's ability to obtain and have delivered adequate and cost-effective supplies of pipe, equipment (including personal protective equipment), chemicals, power and other fuel, water and other raw materials, and to address or mitigate supply chain constraints that may result in delays or shortages in, as well as increased costs of, supplies, products and materials that are critical to or used in American Water's business operations;

- American Water's ability to successfully meet its operational growth projections, either individually or in the aggregate, and capitalize on growth opportunities, including, among other things, with respect to:
  - acquiring, closing and successfully integrating regulated operations, including without limitation American Water's ability to (i) obtain all required regulatory and other consents and approvals for such acquisitions, (ii) prevail in litigation or other challenges related to such acquisitions, and (iii) recover in rates the fair value of assets of the acquired regulated operations;
  - American Water's Military Services Group ("MSG") entering into new military installation contracts, price redeterminations, and other agreements and contracts, with the U.S. government; and
  - realizing anticipated benefits and synergies from new acquisitions;
- in addition to the foregoing, various risks and other uncertainties associated with the support provider's merger agreement with Essential and the related proposed merger, including:
  - a fixed exchange ratio that will not adjust or account for fluctuations in the support provider's or Essential's stock price;
  - limitations on the parties' ability to pursue alternatives to the proposed merger;
  - an event, change or other circumstance that could give rise to the termination of the merger agreement;
  - a delay in the timing to consummate the proposed merger;
  - each party's ability to obtain required governmental and regulatory approvals required for the proposed merger (and/or that such approvals may result in the imposition of burdensome or commercially undesirable conditions, including required dispositions, that could adversely affect the combined company or the expected benefits of the proposed merger);
  - financial impacts of the proposed merger on American Water and the combined company's earnings, earnings per share, financial condition, results of operations, cash flows and share price, and any related accounting impacts;
  - any impact of the proposed merger on the support provider's and the combined company's ability to declare and pay quarterly dividends on its common stock;
  - the risk of litigation related to the proposed merger;
  - changes in the parties' key management and personnel;
  - the amount and nature of incurred transaction costs associated with the proposed merger; and
  - reduced ownership and voting interests for the support provider's and Essential's shareholders upon completion of the proposed merger;
- in addition to the foregoing, various risks and other uncertainties associated with the agreement to acquire certain water and wastewater systems from a subsidiary of Nexus Water Group, Inc., including:
  - the final amount of the rate base to be acquired, and the amount of post-closing adjustments to the purchase price, if any, as contemplated by the acquisition agreement;
  - the various impacts and effects of (i) compliance, or attempted compliance, with the terms and conditions of the acquisition agreement, and/or (ii) the completion of, or actions taken by American Water to complete, the acquisition, on American Water's operations, strategy, guidance, expectations and plans with respect to its Regulated Businesses (as defined below) (considered individually or together as a whole), its current or future capital expenditures, its current and future debt and equity capital needs, dividends, earnings (including earnings per share), growth, future regulatory outcomes, expectations with respect to rate base growth, and other financial and operational goals, plans, estimates and projections; and

- any requirement by the support provider to pay a termination fee in the event the closing does not occur;

- risks and uncertainties following the completion of the sale of American Water's Homeowner Services Group ("HOS"), including the ability of American Water to redeploy successfully and timely the net proceeds of this transaction into American Water's Regulated Businesses;
- risks and uncertainties associated with contracting with the U.S. government, including ongoing compliance with applicable government procurement, security and cybersecurity regulations;
- cost overruns relating to improvements in or the expansion of American Water's operations;
- American Water's ability to successfully develop and implement new technologies and to protect related intellectual property;
- American Water's ability to maintain safe work sites;
- American Water's exposure to liabilities related to environmental laws and regulations, including those enacted or adopted and under consideration, and the substances related thereto, including without limitation copper, lead and galvanized steel, PFAS and other contaminants of emerging concern, and similar matters resulting from, among other things, water and wastewater service provided to customers;
- the ability of energy providers, state governments and other third parties to achieve or fulfill their GHG emission reduction goals, including without limitation through stated renewable portfolio standards and carbon transition plans;
- with respect to any of American Water's forward sale agreements: (i) the inability of the forward purchasers (or their affiliates) to perform their obligations thereunder, (ii) the timing and method of any settlement thereof, (iii) the amount and intended use of proceeds that may be received by American Water from any such settlement, and (iv) the timing and amount of any common stock dilution resulting therefrom;
- changes in general economic, political, business and financial market conditions;
- access to sufficient debt and/or equity capital on satisfactory terms and as needed to support operations and capital expenditures;
- fluctuations in inflation or interest rates, and American Water's ability to address or mitigate the impacts thereof;
- the ability to comply with affirmative or negative covenants in the current or future indebtedness of American Water or any of its subsidiaries, or the issuance of new or modified credit ratings or outlooks by credit rating agencies with respect to American Water or any of its subsidiaries (or any current or future indebtedness thereof), which could increase financing costs or funding requirements and affect American Water's or its subsidiaries' ability to issue, repay or redeem debt, pay dividends or make distributions;
- fluctuations in the value of, or assumptions and estimates related to, its benefit plan assets and liabilities, including with respect to its pension and other post-retirement benefit plans, that could increase expenses and plan funding requirements;
- changes in federal or state general, income and other tax laws, and the imposition, utilization or change in economic tariffs (or any attempt or effort to do so), including (i) future significant tax legislation or regulations (including without limitation impacts related to the corporate alternative minimum tax), and (ii) the availability of, or American Water's compliance with, the terms of applicable tax credits and tax abatement programs;
- migration of customers into or out of American Water's service territories and changes in water and energy consumption resulting therefrom;

- the use by municipalities of the power of eminent domain or other authority to condemn the systems of one or more of American Water's utility subsidiaries, including without limitation litigation and other proceedings with respect to the water system assets of American Water's California subsidiary located in Monterey, California, or the assertion by private landowners of similar rights against such utility subsidiaries;
- any difficulty or inability to obtain insurance for American Water, its inability to obtain insurance at acceptable rates and on acceptable terms and conditions, or its inability to obtain reimbursement under existing or future insurance programs and coverages for any losses sustained;
- the incurrence of impairment charges, changes in fair value and other adjustments related to American Water's goodwill or the value of its other assets;
- labor actions, including work stoppages and strikes;
- American Water's ability to retain and attract highly qualified and skilled employees and talent;
- civil disturbances or unrest, or terrorist threats or acts, or public apprehension about future disturbances, unrest, or terrorist threats or acts; and
- the impact of new, and changes to existing, accounting standards.

These forward-looking statements are qualified by, and should be read together with, the risks and uncertainties set forth above and the risk factors discussed under "Risk Factors" beginning on page S-6 of this prospectus supplement and the risk factors and other statements contained in the documents incorporated by reference in this prospectus and investors should refer to such risks, uncertainties, risk factors and other statements in evaluating such forward-looking statements. Any forward-looking statements made by American Water speak only as of the date of such statements. Except as required by the federal securities laws, American Water does not have any obligation, and American Water specifically disclaims any undertaking or intention, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or otherwise. New factors emerge from time to time, and it is not possible for American Water to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on American Water's businesses, either viewed independently or together, or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights information contained elsewhere in this prospectus or in the documents incorporated by reference herein. It may not contain all the information that is important to you. You should carefully read this prospectus and the documents incorporated by reference herein in their entirety before making an investment decision.

The Company

American Water Works Company, Inc. is the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. As a holding company, American Water conducts substantially all of its business through its subsidiaries. American Water employs approximately 7,000 professionals who provide drinking water, wastewater and other related services to approximately 14 million people in 24 states. In 2025 and 2024, American Water generated $5,140 million and $4,684 million, respectively, in total consolidated operating revenues and $1,111 million and $1,051 million, respectively, in net income attributable to common shareholders.

American Water conducts the majority of its business through a reportable segment that is referred to in this prospectus as the Regulated Businesses, which includes utilities that are regulated by public utilities commissions and that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers, and sales to public authorities and other utilities and community water systems under bulk contracts for the supply of water or the treatment of wastewater for their own customers. American Water also operates other businesses, including MSG, that provide water and wastewater services to the U.S. government on military installations, as well as to municipalities. These other businesses are not subject to public utility commission regulation and the services provided generally do not require significant capital investment by American Water. Individually, these other businesses do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States ("GAAP"). In this prospectus, "Other" refers to these businesses, together with corporate costs that are not allocated to the Company's Regulated Businesses, interest income related to the secured seller promissory note originally received as part of the consideration for the sale of HOS, income from assets not associated with the Regulated Businesses, eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment.

For 2025, American Water's Regulated Businesses segment generated $4,723 million in operating revenues, which accounted for approximately 92% of American Water's total consolidated operating revenues. For the same period, Other generated $417 million in operating revenues, which accounted for approximately 8% of American Water's total consolidated operating revenues.

On October 26, 2025, American Water Works Company, Inc. entered into an Agreement and Plan of Merger (the "Essential Merger Agreement") with Essential to combine the two companies in a stock-for-stock transaction. The Essential Merger Agreement provides that, upon the completion of the proposed merger, Essential's shareholders will receive 0.305 shares of support provider common stock in exchange for each share of Essential common stock eligible for exchange in the merger. Upon completion of the proposed merger, Essential will be a wholly owned subsidiary of the support provider, and the support provider will retain its existing name and remain headquartered in Camden, New Jersey. The completion of the proposed merger is subject to certain customary conditions. The support provider currently estimates that the closing of the proposed merger will occur by the end of the first quarter of 2027.

Table of Contents

American Water Capital Corp.

American Water's financing activities include, among other things, the issuance of long-term and short-term debt, primarily through AWCC, its wholly owned finance subsidiary. AWCC has no significant assets or operations other than as associated with these financing activities. AWCC loans all of the net proceeds of its long-term debt financings to American Water's operating subsidiaries in its Regulated Businesses segment, as well as to American Water. AWCC also provides liquidity to the Regulated Businesses segment and American Water through AWCC's revolving credit facility and commercial paper program. AWCC may also perform other ancillary services directly related to these financing activities, including cash management activities and hedging of interest-rate and other market risk exposures associated with its indebtedness. The proceeds of all of AWCC's long-term debt have been loaned to subsidiaries in American Water's Regulated Businesses segment or to American Water, which debt is evidenced by promissory notes issued to AWCC by such subsidiaries or American Water, as applicable. As of December 31, 2025, American Water had a total of $15,847 million in total debt, including (i) $14,259 million in total long-term debt, of which the current portion was $1,479 million, and (ii) at AWCC, $1,588 million in commercial paper borrowings net of discount. As of December 31, 2025, AWCC additionally had $84 million of outstanding letters of credit under its revolving credit facility.

Executive Offices

American Water and AWCC are each corporations incorporated under the laws of Delaware. Their principal executive offices are located at 1 Water Street, Camden, New Jersey 08102-1658 and the telephone number is (856) 955-4001. American Water's website address is *https://amwater.com*. The information contained on or accessible from American Water's website does not constitute a part of this prospectus and is not incorporated by reference herein.

Table of Contents

The Offering

The summary below describes the principal terms of the notes. Certain of the terms and conditions described below are subject to important limitations and exceptions. A more detailed description of the terms and conditions of the notes is contained under the headings "Description of the Notes" in this prospectus supplement and "Description of AWCC Debt Securities and American Water Support Agreement" in the accompanying prospectus.

Issuer	American Water Capital Corp.
Securities Offered	$700,000,000 aggregate principal amount of 5.200% Senior Notes due 2036.
Maturity Date	The notes will mature on April 1, 2036.
Interest Payment Dates	The issuer will pay interest on the notes semi-annually in arrears on each April 1 and October 1, beginning on October 1, 2026, to the holders of the notes as of the day that is 15 calendar days (whether or not a business day) prior to the relevant interest payment date and, if applicable, upon redemption.
Support Agreement	The notes will have the benefit of a support agreement dated June 22, 2000 and amended as of July 26, 2000 from the support provider, referred to as the support agreement, pursuant to which the support provider has agreed to pay to any debt investor or lender of the issuer any principal or interest owed by the issuer to such debt investor or lender that the issuer fails to pay on a timely basis.
Optional Redemption	Prior to January 1, 2036 (three months prior to their maturity date) (the "Par Call Date"), the issuer may redeem the notes at its option, in whole or in part, at any time and from time to time, at a redemption price (expressed as a percentage of principal amount and rounded to three decimal places) equal to the greater of: • (a) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the date of redemption (assuming the notes matured on the Par Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate (as defined below) plus 15 basis points less (b) interest accrued to the date of redemption; and • 100% of the principal amount of the notes to be redeemed; plus, in either case, accrued and unpaid interest thereon to that date of redemption. On or after the Par Call Date, the issuer may redeem the notes at its option, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest thereon to the date of redemption.
Ranking	The notes will be the issuer's unsecured senior obligations and will: • rank equal in right of payment with all of the issuer's existing and future unsecured obligations that are not, by their terms, expressly subordinated in right of payment to the notes;

Table of Contents

	• rank senior in right of payment to all of the issuer's future obligations that are, by their terms, expressly subordinated in right of payment to the notes; and • rank effectively junior in right of payment to all of the issuer's future secured indebtedness to the extent of the value of the assets securing such indebtedness. Similarly, obligations of the support provider under the support agreement will be unsecured senior obligations of the support provider and will: • rank equal in right of payment with all of the support provider's existing and future unsecured obligations that are not, by their terms, expressly subordinated in right of payment to such obligations; • rank senior in right of payment to all of the support provider's future obligations that are, by their terms, expressly subordinated in right of payment to such obligations; and • rank (i) effectively junior in right of payment to all of the support provider's future secured indebtedness to the extent of the value of the assets securing such indebtedness and (ii) structurally junior in right of payment to any liabilities of the support provider's subsidiaries. As of December 31, 2025: • the issuer had no secured indebtedness; • the issuer had $14,738 million of senior indebtedness, including (i) $12,961 million of senior notes, (ii) $187 million of tax-exempt indebtedness, and (iii) $1,590 million of commercial paper, and no subordinated indebtedness; • the support provider had no indebtedness other than (i) its obligations under the support agreement with respect to the issuer's indebtedness and (ii) its borrowings from AWCC; and • the subsidiaries of the support provider (other than the issuer) had $1,155 million of indebtedness and similar obligations.
Certain Covenants	The indenture governing the notes contains certain covenants that, among other things, limit the support provider's ability and the ability of its subsidiaries to: • create or assume liens; and • enter into sale and leaseback transactions. These limitations are subject to a number of significant exceptions. See "Description of AWCC Debt Securities and American Water Support Agreement—Certain Covenants" in the accompanying prospectus.
Use of Proceeds	The issuer estimates that the proceeds from this offering, net of the underwriting discounts and estimated offering expenses, will be approximately $693.0 million.

Table of Contents

	The issuer intends to use the net proceeds from this offering: • to lend funds to the support provider and its subsidiaries in the Regulated Businesses segment; • to repay commercial paper obligations of the issuer; and • for general corporate purposes. See "Use of Proceeds."
Risk Factors	Investing in the notes involves risks. See "Risk Factors" beginning on page S-6 of this prospectus supplement for a discussion of factors that you should refer to and carefully consider before deciding to invest in these notes.
Governing Law	The indenture and the notes are governed by, and construed in accordance with, the laws of the State of New York.
Conflicts of Interest	Certain of the underwriters and their affiliates may hold a portion of the commercial paper that the issuer intends to repay using the net proceeds from this offering. In such event, it is possible that one or more of the underwriters or their affiliates could receive at least 5% of the net proceeds from the offering and, in that case, such underwriter would be deemed to have a conflict of interest under Rule 5121 of the Financial Industry Regulatory Authority, Inc., which is referred to as FINRA. In the event of any such conflict of interest, such underwriter would be required to conduct the distribution of the notes in accordance with FINRA Rule 5121. If the distribution is conducted in accordance with FINRA Rule 5121, such underwriter would not be permitted to confirm a sale to an account over which it exercises discretionary authority without first receiving specific written approval from the account holder.

RISK FACTORS

An investment in the notes involves risks. This prospectus does not describe all of these risks. You should carefully consider the risks described below and the risks described in Part I, Item 1A., "Risk Factors," in American Water's Annual Report on Form 10-K for the year ended December 31, 2025, as updated in subsequently filed reports with the SEC, which risk factors and subsequently filed reports are incorporated by reference herein, as well as the other information included or incorporated by reference in this prospectus, before making an investment decision. American Water's business, financial condition or results of operations could be materially adversely affected by any of these risks.

The issuer's ability to service its debt and the support provider's ability to make payments pursuant to its obligations under the support agreement depend on the performance of the support provider's operating subsidiaries and their continued ability to make distributions to the support provider or repayments to the issuer. There can be no assurance that the support provider or the issuer will continue to receive such distributions or repayments or, if they are received, that they will be in amounts similar to past distributions or repayments.

The notes are being issued by AWCC, the support provider's finance subsidiary. The issuer has no significant assets, other than the support provider's obligations and those of certain of American Water's subsidiaries in its Regulated Businesses segment, to repay certain intercompany loans made to them by AWCC. The support provider has entered into a support agreement with the issuer, which serves as the functional equivalent of a full and unconditional guarantee by the support provider. Under the terms of the support agreement, if the issuer is unable to make timely payment of any interest or principal or premium, if any, on the notes, the support provider has agreed to provide to the issuer, at the issuer's request or at the request of any holder of the notes, funds to make such payment in full. Because the support provider is a holding company and substantially all of its operations are conducted through its subsidiaries other than the issuer, the support provider's ability to fulfill its obligations under the support agreement will be dependent upon its receipt of sufficient cash distributions from its operating subsidiaries. Furthermore, the issuer's ability to make interest and principal payments on the notes will be dependent upon its receipt of sufficient payments of principal and interest owed pursuant to the terms of its intercompany loans to the support provider and certain of its subsidiaries in the Regulated Businesses segment and from the issuer's ability to issue indebtedness or otherwise obtain loans in the future. The distributions the support provider receives from its operating subsidiaries and the repayments the issuer receives from the support provider and such subsidiaries in the Regulated Businesses segment might not be adequate to permit the support provider to make required payments of interest and principal pursuant to the support agreement or the issuer to make required payments under the notes, as applicable, on a timely basis, or at all.

The support provider's obligations under the support agreement are effectively subordinated to all of the obligations of its subsidiaries other than the issuer.

The support provider has entered into a support agreement with the issuer. The notes are not guaranteed by any of the support provider's subsidiaries and are the obligations only of the issuer, and of the support provider, by virtue of the support agreement. The support provider is a holding company that derives substantially all of its income from its operating subsidiaries, and the issuer is a finance subsidiary with no significant operations of its own, other than related to making loans to the support provider and its subsidiaries in its Regulated Businesses segment. The support provider's operating subsidiaries are separate and distinct legal entities and, other than the issuer, have no obligation to make any payments on the notes, or to make any funds available for such payment, other than through their repayment obligations under intercompany loans, if any, with the issuer. Therefore, the support provider's obligations under the support agreement will be effectively subordinated to all indebtedness and other liabilities, including trade payables, lease commitments and monies borrowed, or other indebtedness incurred or issued by American Water's subsidiaries other than the issuer.

The notes do not restrict the support provider's or its subsidiaries' ability to incur additional indebtedness, which could adversely affect the support provider's ability to pay its obligations under the notes arising by virtue of the support agreement.

Although the terms of the notes restrict the support provider's ability and the ability of its subsidiaries to incur certain liens and to enter into certain sale and leaseback transactions, the incurrence of other indebtedness or other liabilities by any of the support provider's subsidiaries is not specifically prohibited in connection with the notes and could adversely affect the support provider's ability to pay any obligations to holders of the notes arising out of its obligations under the support agreement. As of December 31, 2025, total indebtedness and similar obligations of the support provider's subsidiaries other than the issuer were $1,155 million, consisting of (i) $717 million in private activity bonds and government funded debt, all but $8 million of which is collateralized, (ii) $435 million in mortgage bonds, and (iii) $3 million in redeemable preferred stock. American Water anticipates that from time to time its subsidiaries will incur additional debt and other liabilities. Any debt incurred by the support provider's subsidiaries other than the issuer will be effectively senior to the support provider's obligations under the support agreement.

Other than as described under "Description of AWCC Debt Securities and American Water Support Agreement—Support Agreement" in the accompanying prospectus, neither the issuer nor the support provider is required in connection with the notes to meet any financial tests that measure their working capital, interest coverage or fixed charges in order to maintain compliance with the terms of the notes.

If there is no active trading market for the notes you may not be able to resell them.

If there is no active trading market for the notes, you may not be able to resell the notes at their fair market value or at all.

The liquidity of any market for the notes will depend upon various factors, including:

- the number of holders of the notes;
- the interest of securities dealers in making a market for the notes;
- American Water's financial performance or prospects; and
- the prospects for companies in American Water's industry generally.

Accordingly, neither American Water nor the issuer can assure you that a market or liquidity will develop for the notes.

Table of Contents

USE OF PROCEEDS

The issuer estimates that it will receive net proceeds from this offering, after deducting the underwriting discounts and estimated offering expenses, of approximately $693.0 million.

The issuer intends to use the net proceeds from this offering:

- to lend funds to the support provider and its subsidiaries in the Regulated Businesses segment;
- to repay commercial paper obligations of the issuer; and
- for general corporate purposes.

On March 27, 2026, the issuer had $1,355 million in aggregate principal amount of commercial paper outstanding, with a weighted-average maturity of 8.6 days and a weighted-average interest rate of 4.06%.

Table of Contents

DESCRIPTION OF THE NOTES

The following description is a summary of the material provisions of the indenture. It does not restate such agreement in its entirety. You are urged to read the indenture because it, and not this description, defines your rights as holders of the notes. The indenture was filed as an exhibit to the registration statement of which this prospectus forms a part.

The notes will be a separate, new series of debt securities, as described under the heading "Description of AWCC Debt Securities and American Water Support Agreement" in the accompanying prospectus. Please read the following information concerning the notes in conjunction with the statements under "Description of AWCC Debt Securities and American Water Support Agreement" in the accompanying prospectus, which the following information supplements and, in the event of any inconsistencies, supersedes.

Unless the context otherwise requires, solely for purposes of this Description of the Notes, "American Water" or the "Company" refers to American Water Works Company, Inc. and not to any of its subsidiaries.

General

The notes will be issued under the indenture, dated as of December 4, 2009, between the issuer and Computershare Trust Company, N.A., as successor to Wells Fargo Bank, National Association, as indenture trustee, referred to as the indenture.

The aggregate principal amount of the notes offered by this prospectus supplement is $700,000,000.

The notes will have the benefit of a support agreement from American Water described in this prospectus.

The notes will be the issuer's unsecured senior obligations and will:

- rank equal in right of payment with all of the issuer's existing and future unsecured obligations that are not, by their terms, expressly subordinated in right of payment to the notes;
- rank senior in right of payment to all of the issuer's future obligations that are, by their terms, expressly subordinated in right of payment to the notes; and
- rank effectively junior in right of payment to all of the issuer's future secured indebtedness to the extent of the value of the assets securing such indebtedness.

Similarly, American Water's obligations as support provider under the support agreement will be unsecured senior obligations of American Water and will:

- rank equal in right of payment with all of American Water's existing and future unsecured obligations that are not, by their terms, expressly subordinated in right of payment to such obligations;
- rank senior in right of payment to all of American Water's future obligations that are, by their terms, expressly subordinated in right of payment to such obligations; and
- rank (i) effectively junior in right of payment to all of American Water's future secured indebtedness to the extent of the value of the assets securing such indebtedness and (ii) structurally junior in right of payment to any liabilities of American Water's subsidiaries.

The notes will not be subject to a sinking fund provision.

The indenture trustee will initially be the security registrar and the paying agent for the notes. The notes initially will be issued in registered global form and will be in denominations of $1,000 and integral multiples of

$1,000 in excess thereof, without coupons, and may be transferred or exchanged, without service charge but upon payment of any taxes or other governmental charges payable in connection with the transfer or exchange, at the office described below. Payments on notes issued as a global security will be made to the depositary or a successor depositary. A beneficial interest in a global note may only be exchanged for a note in certificated form in certain circumstances. See "Description of AWCC Debt Securities and American Water Support Agreement—Book-Entry, Delivery and Form—Exchanges of Global Securities for Certificated Debt Securities" in the accompanying prospectus and "—Book-Entry Only Issuance" in this prospectus supplement. Principal and interest with respect to certificated notes will be payable thereon, the transfer of the notes will be registrable and notes will be exchangeable for notes of a like aggregate principal amount in denominations of $1,000, and integral multiples of $1,000 in excess thereof, at the office or agency maintained by the issuer. The issuer has initially designated the corporate trust office of the indenture trustee as that office. However, at the issuer's option, payment of interest may be made by check mailed to the address of the holder entitled to payment or by wire transfer to an account appropriately designated by the holder entitled to payment.

The indenture does not limit American Water's ability or the ability of the issuer to issue or incur other unsecured debt or issue preferred stock.

Principal, Maturity and Interest

The initial aggregate principal amount of the notes is $700,000,000. The notes mature on April 1, 2036.

The notes will bear interest at 5.200% per annum, accruing from April 1, 2026. The issuer will pay interest on the notes semi-annually in arrears on each April 1 and October 1, beginning on October 1, 2026, to the holders of the notes as of the day that is 15 calendar days (whether or not a business day) prior to the relevant interest payment date and, if applicable, upon redemption.

Computation of Interest

The amount of interest payable on the notes for any period will be computed on the basis of a 360-day year consisting of twelve 30-day months. In the event that any date on which principal or interest is payable on the notes is not a business day, then payment of the principal or interest payable on such date will be made on the next day that is a business day (and without any interest or other payment in respect of any such delay).

Optional Redemption by the Issuer

Prior to the Par Call Date, the issuer may redeem the notes at its option, in whole or in part, at any time and from time to time, at a redemption price (expressed as a percentage of principal amount and rounded to three decimal places) equal to the greater of:

- (a) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the date of redemption (assuming the notes matured on the Par Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 15 basis points less (b) interest accrued to the date of redemption; and
- 100% of the principal amount of the notes to be redeemed;

plus, in either case, accrued and unpaid interest thereon to that date of redemption.

On or after the Par Call Date, the issuer may redeem the notes at its option, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest thereon to the date of redemption.

Treasury Rate

"*Treasury Rate*" means, with respect to any date of redemption for the notes, the yield determined by the issuer in accordance with the following two paragraphs.

The Treasury Rate shall be determined by the issuer after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third business day preceding the date of redemption based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as "Selected Interest Rates (Daily)—H.15" (or any successor designation or publication) ("H.15") under the caption "U.S. government securities—Treasury constant maturities—Nominal" (or any successor caption or heading) ("H.15 TCM"). In determining the Treasury Rate, the issuer shall select, as applicable:

(1) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the date of redemption to the Par Call Date (the "Remaining Life"); or

(2) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields—one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the Remaining Life—and shall interpolate to the Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or

(3) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life.

For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the date of redemption.

If on the third business day preceding the date of redemption H.15 TCM is no longer published, the issuer shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second business day preceding such date of redemption of the United States Treasury security maturing on, or with a maturity that is closest to, the Par Call Date, as applicable. If there is no United States Treasury security maturing on the Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the Par Call Date, one with a maturity date preceding the Par Call Date and one with a maturity date following the Par Call Date, the issuer shall select the United States Treasury security with a maturity date preceding the Par Call Date. If there are two or more United States Treasury securities maturing on the Par Call Date, or two or more United States Treasury securities meeting the criteria of the preceding sentence, the issuer shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The issuer's actions and determinations in determining the redemption price shall be conclusive and binding for all purposes, absent manifest error.

Notice and Selection

Notices of redemption will be mailed by first class mail and, so long as the notes are held by The Depository Trust Company ("DTC"), given in accordance with the policies and procedures of DTC, at least 30 but not more

than 60 days before a date of redemption, except that redemption notices may be sent more than 60 days prior to a date of redemption if the notice is issued in connection with a satisfaction and discharge of the indenture. Notices of redemption may not be conditional.

If any note is to be redeemed in part only, the notice of redemption that relates to that note will state the portion of the principal amount and the CUSIP number of that note that is to be redeemed. A new note in principal amount equal to the unredeemed portion of the original note will be issued in the name of the holder of notes upon cancellation of the original note (or through book-entry transfer). The notes called for redemption become due on the date fixed for redemption.

If less than all of the notes are to be redeemed in connection with any redemption, the indenture trustee will select notes (or portions of notes) for redemption as follows:

- if the notes are listed on any national securities exchange, in compliance with the requirements of the principal national securities exchange on which the notes are listed; or
- if the notes are not listed on any national securities exchange, on a pro rata basis, by lot or in such manner as the indenture trustee shall deem appropriate and fair; however, as long as the notes are represented by global notes registered in the name of DTC, or its nominee, beneficial interests in such global notes will be selected for redemption by DTC in accordance with the applicable policies and procedures of DTC.

The unredeemed portion of the principal amount of any note shall be in a denomination of at least $1,000 or integral multiples of $1,000.

Unless the issuer defaults in the payment of the redemption price, on or after the date fixed for redemption interest will cease to accrue on the notes or portion of the notes redeemed.

Assumption

American Water may directly assume the due and punctual payment of the principal of, premium, if any, and interest on all debt securities issued under the indenture, including the notes, and the performance of every covenant of the indenture on the part of the issuer to be performed or observed. Upon any such assumption, American Water will succeed to and be substituted for and may exercise every right and power of the issuer under the indenture with the same effect as if it had been named as the issuer in the indenture and the issuer will be released from its liability as obligor on such debt securities, including the notes. No such assumption shall be permitted unless American Water has delivered to the indenture trustee an officers' certificate of American Water and an opinion of counsel for American Water, each stating that such assumption and supplemental indenture comply with this covenant and that all conditions precedent in the indenture relating to such transaction have been complied with.

Book-Entry Only Issuance

The notes will trade through DTC. The notes will be represented by one or more global securities and registered in the name of Cede & Co., DTC's nominee. Upon issuance of the notes, DTC or its nominee will credit, on its book-entry registration and transfer system, the principal amount of the notes represented by such global securities to the accounts of institutions that have an account with DTC or its participants. The accounts to be credited shall be designated by the underwriters. Ownership of beneficial interests in the global securities will be limited to participants or persons that may hold interests through participants. The global securities will be deposited with the indenture trustee as custodian for DTC.

Holders of notes may elect to hold interests in a global security through DTC, Clearstream Banking, *société anonyme* ("Clearstream, Luxembourg"), or Euroclear Bank SA/NV, as operator of the Euroclear System ("Euroclear"), directly if they are participants in such systems, or indirectly through organizations which are participants in such systems.

Clearstream, Luxembourg and Euroclear will hold interests on behalf of their participants through customers' securities accounts in Clearstream, Luxembourg's and Euroclear's names on the books of their respective depositaries, which in turn will hold such interests in customers' securities accounts in the depositaries' names on DTC's books.

For a description of DTC and its book-entry system, see "Description of AWCC Debt Securities and American Water Support Agreement—Book-Entry, Delivery and Form—Depository Procedures" in the accompanying prospectus.

Purchases of global securities under the DTC system must be made by or through direct participants, which will receive a credit for the global securities on DTC's records. The ownership interest of each actual purchaser of each security ("Beneficial Owner") is in turn to be recorded on the direct and indirect participants' records and Clearstream, Luxembourg and Euroclear will credit on their book-entry registration and transfer systems the number of notes sold to certain non-U.S. persons to the account of institutions that have accounts with Euroclear, Clearstream, Luxembourg or their respective nominee participants. Beneficial Owners will not receive written confirmation from DTC of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the direct participant or indirect participant through which the Beneficial Owner entered into the transaction.

Title to book-entry interests in the notes will pass by book-entry registration of the transfer within the records of Clearstream, Luxembourg, Euroclear or DTC, as the case may be, in accordance with their respective procedures. Book-entry interests in the notes may be transferred within Clearstream, Luxembourg and Euroclear and between Clearstream, Luxembourg and Euroclear in accordance with procedures established for these purposes by Clearstream, Luxembourg and Euroclear. Book-entry interests in the notes may be transferred within DTC in accordance with procedures established for this purpose by DTC. Transfers of book-entry interests in the notes among Clearstream, Luxembourg, Euroclear and DTC may be effected in accordance with procedures established for this purpose by Clearstream, Luxembourg, Euroclear and DTC.

Cross-market transfers between persons holding directly or indirectly through DTC on the one hand, and directly or indirectly through Clearstream, Luxembourg participants or Euroclear participants, on the other, will be effected through DTC in accordance with DTC's rules; however, such cross-market transactions will require delivery of instructions to the relevant European international clearing system by the counterparty in such system in accordance with its rules and procedures and within the established deadlines of such system.

Although DTC, Clearstream, Luxembourg and Euroclear have agreed to the foregoing procedures in order to facilitate transfers of the notes among participants of DTC, Clearstream, Luxembourg and Euroclear, they are under no obligation to perform or continue to perform such procedures and such procedures may be changed or discontinued at any time.

The information in this section and in the accompanying prospectus under "Description of AWCC Debt Securities and American Water Support Agreement—Book-Entry, Delivery and Form" concerning DTC and DTC's book-entry system, Clearstream, Luxembourg and Euroclear has been obtained from sources that the issuer and the support provider believe to be reliable, but none of the issuer, the support provider or the underwriters take any responsibility for the accuracy of this information.

Table of Contents

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS

The following discussion is a summary of certain U.S. federal income tax consequences relevant to the purchase, ownership and disposition of the notes by the beneficial owners thereof, which are referred to as Holders. This discussion is limited to the tax consequences to the initial Holders of notes who purchase the notes at the initial offering price and does not address the tax consequences to subsequent purchasers of notes. This summary does not purport to be a complete analysis of all of the potential U.S. federal income tax consequences relating to the purchase, ownership and disposition of the notes, nor does this summary describe any state, local, federal estate, gift or non-U.S. tax consequences. There can be no assurance that the Internal Revenue Service (the "IRS") will take a similar view of the tax consequences described herein. Furthermore, this discussion does not address all aspects of taxation that might be relevant to particular purchasers in light of their individual circumstances. For instance, this discussion does not address the alternative minimum tax provisions of the Code (as defined below) or special rules applicable to certain categories of purchasers (including dealers in securities or foreign currencies, traders in securities that elect to use a mark-to-market method of accounting for the securities holdings, insurance companies, real estate investment trusts, regulated investment companies, financial institutions, tax-exempt entities, persons required to report income with respect to a note no later than such income is reported on an "applicable financial statement" under Section 451 of the Internal Revenue Code of 1986, as amended (the "Code"), U.S. Holders (as defined below) whose functional currency is not the U.S. dollar and, except to the extent discussed below, Non-U.S. Holders (as defined below)) or to purchasers who acquire or sell the notes as part of a wash sale for tax purposes or hold the notes as part of a hedge, straddle, conversion or constructive sale transaction or other risk reduction transaction.

This discussion is based on the provisions of the Code, the Treasury Regulations promulgated thereunder, and administrative and judicial interpretations thereof, all as in effect as of the date hereof and all of which are subject to change (possibly with retroactive effect). The discussion below assumes that Holders hold the notes as capital assets within the meaning of Section 1221 of the Code.

If a partnership, or an entity treated as a partnership for U.S. federal income tax purposes, holds any notes, the tax treatment of such entity and each partner will generally depend on the status of the partner and the activities of the partnership. Partnerships and their partners should consult their tax advisors regarding the tax consequences of owning the notes.

Prospective Holders are urged to consult their tax advisors as to the specific tax consequences of a purchase of the notes in light of their particular tax situation, including the application and effect of the Code, as well as state, local and foreign income and other tax laws.

Tax Consequences to U.S. Holders

The following summary is a general description of certain U.S. federal income tax consequences applicable to a "U.S. Holder." For the purpose of this discussion, "U.S. Holder" means a Holder of a note that is for U.S. federal income tax purposes (i) a citizen or resident of the United States, (ii) a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or of any political subdivision thereof (including the District of Columbia), (iii) an estate, the income of which is subject to U.S. federal income taxation regardless of its source, or (iv) a trust, if (A) the administration of the trust is subject to the primary supervision of a court within the United States and one or more U.S. persons has the authority to control all substantial decisions of the trust, or (B) has a valid election in place under applicable U.S. Treasury Regulations to be treated as a U.S. person.

As described above in "Description of the Notes—Optional Redemption by the Issuer," the issuer may make payments upon a redemption in excess of the principal amount of the notes. The issuer has determined the likelihood is remote that it will redeem notes in circumstances in which the redemption price (not taking into account accrued and unpaid interest) payable to Holders would exceed 100% of the principal amount of the notes

to be redeemed. Our determination regarding such likelihood is not binding on the IRS. However, our determination is binding on you, unless you explicitly disclose to the IRS on your federal income tax return for the year during which you acquire the notes that you are taking a different position. Given the issuer's determination, the issuer does not intend to treat the notes as contingent payment debt instruments for U.S. federal income tax purposes. If the IRS or a court were to take a contrary position, the notes could be subject to U.S. federal income tax rules governing contingent payment debt instruments, in which case the amount and timing of income inclusions with respect to the notes and the character of income recognized on a sale, exchange or redemption of a note, could differ materially and adversely from what is described below. The remainder of this discussion assumes that the notes will not be subject to the contingent payment debt instrument rules. This assumption is made solely for U.S. federal income tax purposes and is not an indication of the issuer's intention to call or not to call the notes at any time.

Payments of Stated Interest

The issuer expects that the notes will not be issued with original issue discount (other than *de minimis* original issue discount). Generally, stated interest paid on a note will be taxable to a U.S. Holder as ordinary interest income at the time the interest accrues or is received in accordance with the U.S. Holder's method of accounting for U.S. federal income tax purposes.

Sale, Exchange, Redemption or Retirement of the Notes

In general, upon the sale, exchange, redemption or retirement of a note, a U.S. Holder will recognize capital gain or loss equal to the difference between the amount realized on such sale, exchange, redemption, retirement (not including any amount attributable to accrued but unpaid interest) and such U.S. Holder's adjusted tax basis in the note. To the extent attributable to accrued but unpaid interest, the amount recognized by the U.S. Holder will be treated as a payment of interest. See "—Payments of Stated Interest" above. A U.S. Holder's adjusted tax basis in a note generally will equal the cost of the note to such U.S. Holder. The capital gain or loss will be long-term if a U.S. Holder's holding period is more than one year at the time of sale, exchange, redemption, retirement or other disposition and will be short-term if a U.S. Holder's holding period is one year or less. Long-term capital gains of individuals are generally eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

If an assumption described above in "Description of the Notes—Assumption" occurs, it may be treated as a "deemed exchange" of a note for a new note of the assuming corporation for U.S. federal income tax purposes. If the assumption is treated as a deemed exchange, then the consequences in the preceding paragraph would apply. Prospective Holders are urged to consult their tax advisors regarding the tax consequences of such an assumption.

Under certain circumstances described in "Description of AWCC Debt Securities and American Water Support Agreement—Discharge" in the accompanying prospectus, the issuer will be discharged from any and all obligations in respect of the notes. Such discharge may be treated as a taxable exchange for U.S. federal income tax purposes. U.S. Holders should consult their own tax advisors regarding the U.S. federal, state, and local tax consequences of such a discharge.

Medicare Tax

Certain U.S. Holders that are individuals, estates or trusts will be subject to a 3.8% tax on all or a portion of their "net investment income," which may include all or a portion of their interest income and net gains from the disposition of the notes. Each U.S. Holder that is an individual, estate or trust should consult its tax advisors regarding the applicability of this Medicare tax to its income and gains in respect of its investment in the notes.

Tax Consequences to Non-U.S. Holders

The following summary is a general description of certain U.S. federal income tax consequences to a "Non-U.S. Holder." A "Non-U.S. Holder" means, for purposes of this discussion, a Holder (other than a partnership, or other entity treated as a partnership for U.S. federal income tax purposes) that is not a U.S. Holder. Special rules may apply to certain Non-U.S. Holders such as "controlled foreign corporations," "passive foreign investment companies" and certain U.S. individuals that are expatriates and such Non-U.S. Holders should consult their tax advisors.

Stated Interest

Subject to the discussions below under "—Backup Withholding and Information Reporting" and "—Withholdable Payments to Foreign Financial Entities" and assuming that a Non-U.S. Holder's interest income on a note is not effectively connected with the conduct by such Non-U.S. Holder of a trade or business in the United States, payments of interest on a note by the issuer or any paying agent to a Non-U.S. Holder will not be subject to U.S. federal income tax or withholding tax, provided that the Non-U.S. Holder:

- does not own, actually or constructively, 10% or more of the total combined voting power of all classes of the issuer's stock entitled to vote;
- is not, for U.S. federal income tax purposes, a controlled foreign corporation related, directly or indirectly, to the issuer through stock ownership;
- is not a bank receiving interest "on an extension of credit made pursuant to a loan agreement entered into in the ordinary course of its trade or business" within the meaning of Section 881(c)(3)(A) of the Code; and
- either (1) meets the certification requirements under Code Section 871(h) or 881(c) and Treasury Regulations thereunder (summarized below) in an applicable statement or (2) is a securities clearing organization, bank, or other financial institution that holds customers' securities in the ordinary course of its trade or business and holds the securities on behalf of the Non-U.S. Holder and certifies under penalties of perjury that such a statement has been received from the Non-U.S. Holder and furnishes a copy to the applicable withholding agent.

Payments of interest on a note that do not satisfy all of the foregoing requirements are generally subject to U.S. federal income tax and withholding tax at a flat rate of 30% (or a lower applicable treaty rate, provided certain certification requirements are met).

Except to the extent otherwise provided under an applicable tax treaty, a Non-U.S. Holder generally will be subject to U.S. federal income tax in the same manner as a U.S. Holder with respect to interest that is effectively connected with a U.S. trade or business conducted by the Non-U.S. Holder. Effectively connected interest income received by a corporate Non-U.S. Holder may also, under certain circumstances, be subject to an additional "branch profits tax" at a 30% rate, or, if applicable, a lower treaty rate. Such effectively connected interest income will not be subject to withholding tax if the Non-U.S. Holder delivers an IRS Form W-8ECI to the payor.

Under Code Sections 871(h) and 881(c) and the underlying U.S. Treasury Regulations, in order to obtain the exemption from withholding tax described above, the Non-U.S. Holder of a note must provide its name and address, and certify, under penalties of perjury, to the applicable withholding agent that such Holder is a Non-U.S. Holder. Such certification may be made on IRS Form W-8BEN or W-8BEN-E as applicable. In general, a certificate described in this paragraph is effective only with respect to payments of interest made to the certifying Non-U.S. Holder after issuance of the certificate in the calendar year of its issuance and the three immediately succeeding calendar years (or, if earlier, until a change in circumstances makes any of the information in the form incorrect).

Repayment of Principal and Realized Gain

Subject to the discussions below under "—Backup Withholding and Information Reporting," a Non-U.S. Holder of a note will not be subject to U.S. federal withholding tax on the receipt of payments of principal on the note, and a Non-U.S. Holder will not be subject to U.S. federal income tax on any gain realized on the sale, exchange, redemption, retirement or other disposition of such note (other than amounts attributable to accrued but unpaid interest, which will be treated as described under "—Tax Consequences to Non-U.S. Holders—Stated Interest" above), or receipt of principal, unless:

- such Non-U.S. Holder is a nonresident alien individual who is present in the United States for 183 or more days in the taxable year of disposition and certain other conditions are met;
- the Non-U.S. Holder is required to pay tax pursuant to the provisions of U.S. tax law applicable to certain U.S. expatriates; or
- the gain is effectively connected with the conduct of a U.S. trade or business of and, if a tax treaty so provides, is attributable to a U.S. permanent establishment of, the Non-U.S. Holder.

Backup Withholding and Information Reporting

Under current U.S. federal income tax law, backup withholding and information reporting requirements apply to certain payments of principal and interest made to, and to the proceeds of sale before maturity by, certain U.S. Holders.

In the case of a non-corporate U.S. Holder, information reporting requirements will apply to payments of principal or interest made by the issuer or any paying agent thereof on a note. The payor will be required to withhold backup withholding tax at the current rate of 24% with respect to certain "reportable payments," including interest on or principal (and premium, if any) of a note and the gross proceeds from a disposition of a note if:

- a U.S. Holder fails to furnish its Taxpayer Identification Number ("TIN") (which, for an individual, is his or her Social Security number) to the payor in the manner required;
- a U.S. Holder furnishes an incorrect TIN and the payor is so notified by the IRS;
- in the case of an interest payment, the payor is notified by the IRS that such U.S. Holder has failed to properly report payments of interest or dividends; or
- in the case of an interest payment, a U.S. Holder fails to certify under penalties of perjury that it has furnished a correct TIN, is a U.S. person, and has not been notified by the IRS that it is subject to backup withholding for failure to report interest or dividend payments.

Backup withholding and information reporting do not apply with respect to payments made to certain exempt recipients, which currently include entities treated as corporations for U.S. federal income tax purposes provided their exemptions from backup withholding are properly established.

In the case of a Non-U.S. Holder, under currently applicable Treasury Regulations, backup withholding and information reporting will not apply to payments of principal or interest made by the issuer or any paying agent thereof on a note (absent actual knowledge or reason to know that the Holder is actually a U.S. Holder) if such Non-U.S. Holder has provided the required certification under penalties of perjury that it is not a U.S. Holder or has otherwise established an exemption. However, the issuer and other payors are required to report payments of interest on a Non-U.S. Holder's notes on IRS Form 1042-S even if the payments are not otherwise subject to information reporting requirements. If such Holder provides the required certification, such Holder may nevertheless be subject to withholding of U.S. federal income tax as described above under "—Tax Consequences to Non-U.S. Holders—Stated Interest." The rules regarding withholding, backup withholding and information reporting for Non-U.S. Holders are complex, may vary depending on a Non-U.S. Holder's particular situation and are subject to change. In addition, special rules apply to certain types of Non-U.S. Holders,

including partnerships, trusts and other entities treated as pass-through entities for U.S. federal income tax purposes. Non-U.S. Holders of notes should accordingly consult their tax advisors regarding the application of information reporting and backup withholding in their particular situations, the availability of an exemption therefrom, and the procedure for obtaining such an exemption if applicable.

Backup withholding is not an additional tax; any amounts withheld from a payment to a Holder under the backup withholding rules will be allowed as a credit against such Holder's U.S. federal income tax liability and may entitle such Holder to a refund, provided that certain required information is furnished to the IRS.

Withholdable Payments to Foreign Financial Entities

The Foreign Account Tax Compliance provisions of the Hiring Incentives to Restore Employment Act (commonly referred to as "FATCA") generally impose a U.S. federal withholding tax of 30% on any interest on the notes paid (i) to a "foreign financial institution" (as defined in the Code) unless such foreign financial institution agrees to verify, report and disclose its U.S. accountholders and meets certain other requirements, or (ii) to a "non-financial foreign entity" (as defined in the Code) unless such entity certifies that it does not have any "substantial United States owners" (as defined in the Code) or provides the name, address and taxpayer identification number of each substantial United States owner and meets certain other requirements. Foreign financial institutions located in jurisdictions that have intergovernmental agreements with the United States may be subject to different rules. If payment of this withholding tax is made, Non-U.S. Holders that are otherwise eligible for an exemption from, or reduction of, U.S. federal withholding taxes with respect to such interest will be required to seek a credit or refund from the IRS to obtain the benefit of such exemption or reduction. However, even if a beneficial owner of a note is entitled to have any such withholding refunded, the required procedures could be cumbersome and significantly delay the Holder's receipt of any amounts withheld. Proposed Treasury regulations (which taxpayers are permitted to rely upon until final Treasury regulations are issued) eliminate FATCA withholding on payments of gross proceeds. Holders should consult their tax advisors regarding the potential application of these withholding rules to their investment in the notes.

The U.S. federal income tax discussion set forth above is included for general information only and may not be applicable depending upon a Holder's particular situation. Holders should consult their tax advisors regarding the tax consequences to them of the purchase, ownership and disposition of notes, including the tax consequences under state, local, foreign and other tax laws.

Table of Contents

UNDERWRITING

Subject to the terms and conditions set forth in an underwriting agreement dated the date of this prospectus supplement between the issuer, American Water and the underwriters named below, for whom Wells Fargo Securities, LLC, PNC Capital Markets LLC, RBC Capital Markets, LLC and U.S. Bancorp Investments, Inc. are acting as representatives, the issuer has agreed to sell to each of the underwriters, and each of the underwriters has severally and not jointly agreed to purchase from the issuer, the principal amount of notes set forth opposite its name below:

Underwriter	Principal Amount
Wells Fargo Securities, LLC	$ 115,500,000
PNC Capital Markets LLC	101,500,000
RBC Capital Markets, LLC	101,500,000
U.S. Bancorp Investments, Inc.	101,500,000
BofA Securities, Inc.	42,000,000
J.P. Morgan Securities LLC	42,000,000
Mizuho Securities USA LLC	42,000,000
TD Securities (USA) LLC	38,500,000
Truist Securities, Inc.	38,500,000
Huntington Securities, Inc.	14,000,000
Regions Securities LLC	14,000,000
Scotia Capital (USA) Inc.	14,000,000
BNY Mellon Capital Markets, LLC	10,500,000
Siebert Williams Shank & Co., LLC	10,500,000
Academy Securities, Inc.	3,500,000
Independence Point Securities LLC	3,500,000
Roberts & Ryan, Inc.	3,500,000
Samuel A. Ramirez & Company, Inc.	3,500,000
Total	$ 700,000,000

The offering of the notes by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part. The underwriting agreement provides that the underwriters are obligated to purchase all of the notes in the offering if any are purchased.

The underwriters have advised the issuer and American Water that they propose initially to offer the notes at the price to public set forth on the cover of this prospectus supplement, and to certain dealers at such price less a concession not in excess of 0.400% of the principal amount of the notes. The underwriters may allow, and such dealers may reallow, a concession not in excess of 0.250% of the principal amount of the notes to certain other dealers. If all notes are not sold at the price to public set forth on the cover page of this prospectus supplement, the offering price and other selling terms for the notes may be changed by the underwriters.

American Water estimates that the total expenses of the offering, including registration, printing fees and legal and accounting expenses but excluding the underwriting discounts, will be approximately $1.9 million.

The issuer and the support provider have agreed to indemnify the underwriters against liabilities relating to this offering, including liabilities under the Securities Act, or contribute to payments that the underwriters may be required to make in that respect.

The notes are a new issue of securities with no established trading market. The issuer does not intend to apply for listing of the notes on any securities exchange or on any automated dealer quotation system. American Water and the issuer have been advised by the underwriters that they presently intend to make a market in the

notes as permitted by applicable laws and regulations. The underwriters are not obligated, however, to make a market in the notes and any such market making may be discontinued without notice at any time at the sole discretion of the underwriters. Accordingly, no assurance can be given as to the liquidity of, or trading market for, the notes.

In connection with the offering, the underwriters may engage in stabilizing transactions, over-allotment transactions, covering transactions and penalty bids in accordance with Regulation M under the Exchange Act.

- Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum.
- Over-allotment involves sales by the underwriters of notes in excess of the principal amount of notes the underwriters are obligated to purchase, which creates a short position.
- The underwriters may bid for and purchase notes in the open market.
- Penalty bids permit the underwriters to reclaim a selling concession from a dealer when the notes originally sold by the underwriters are purchased in a stabilizing covering transaction to cover short positions.

These stabilizing transactions, covering transactions and penalty bids may have the effect of raising or maintaining the market price of the notes or preventing or retarding a decline in the market price of the notes. As a result, the price of the notes may be higher than the price that might otherwise exist in the open market. These transactions may be discontinued at any time without notice.

Conflicts of Interest

The underwriters and their affiliates have engaged, and may in the future engage, in transactions with, and from time to time have performed services for, the issuer, the support provider and the support provider's affiliates in the ordinary course of business, for which they have received and will receive customary compensation. Affiliates of certain of the underwriters are also lenders under the issuer's revolving credit facility and/or serve as the paying agent and/or dealers under the issuer's commercial paper program.

Certain of the underwriters and their affiliates may hold a portion of the commercial paper that the issuer intends to repay using the net proceeds from this offering. In such event, it is possible that one or more of the underwriters or their affiliates could receive at least 5% of the net proceeds from the offering, and, in that case, such underwriter would be deemed to have a conflict of interest under FINRA Rule 5121. In the event of any such conflict of interest, such underwriter would be required to conduct the distribution of the notes in accordance with FINRA Rule 5121. If the distribution is conducted in accordance with FINRA Rule 5121, such underwriter would not be permitted to confirm a sale to an account over which it exercises discretionary authority without first receiving specific written approval from the account holder.

In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the issuer, the support provider or the support provider's affiliates. If any of the underwriters or their affiliates have a lending relationship with the issuer, the support provider or the support provider's affiliates, certain of those underwriters or their affiliates routinely hedge, and certain other of those underwriters or their affiliates may hedge, their credit exposure to the issuer, the support provider or the support provider's affiliates consistent with their customary risk management policies. Typically, these underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities of the issuer, the support provider or the support provider's affiliates, including potentially the notes offered hereby. Any such credit default swaps or short positions could adversely affect

future trading prices of the notes offered hereby. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Selling Restrictions

No action has been taken in any jurisdiction (except in the United States) that would permit a public offering of the notes, or the possession, circulation or distribution of this prospectus or any other material relating to American Water or the notes in any jurisdiction where action for that purpose is required. Accordingly, the notes may not be offered or sold, directly or indirectly, and neither this prospectus nor any other offering material or advertisements in connection with the notes may be distributed or published, in or from any country or jurisdiction except in compliance with any applicable rules and regulations of any such country or jurisdiction.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission ("ASIC"), in relation to the offering. This prospectus does not constitute a prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (the "Corporations Act"), and does not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the notes may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the notes without disclosure to investors under Chapter 6D of the Corporations Act.

The notes applied for by Exempt Investors in Australia must not be offered for sale in Australia in the period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring notes must observe such Australian on-sale restrictions.

This prospectus contains general information only and does not take account of the investment objectives, financial situation or particular needs of any particular person. It does not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Canada

The notes may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus supplement and the accompanying prospectus (including any amendment

thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts ("NI 33-105"), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

European Economic Area

Prohibition of Sales to European Economic Area Retail Investors

The notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("EEA"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the "Insurance Distribution Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) No. 2017/1129 (as amended, the "EU Prospectus Regulation"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

United Kingdom

Prohibition of Sales to United Kingdom Retail Investors

The notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (the "UK"). For these purposes, a "retail investor" means a person who is neither: (i) a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, the "EUWA"); nor (ii) a qualified investor as defined in paragraph 15 of Schedule 1 to the Public Offers and Admissions to Trading Regulations 2024. Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of UK domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

Other Regulatory Restrictions

In the UK, this offering document is only being distributed to and is only directed at persons (i) who fall within Article 19(5) ("investment professionals") of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 as amended (the "Financial Promotion Order") or (ii) who fall within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations etc.") of the Financial Promotion Order (all such persons together being referred to as "relevant persons").

In the UK, any investment or investment activity to which this offering document relates, including the notes, is available only to relevant persons and will be engaged in only with relevant persons. In the UK, this offering document must not be acted on or relied on by persons who are not relevant persons.

Each underwriter has represented and agreed that:

- it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the Financial Services and Markets Act 2000 (as amended, the "FSMA")) received by it in connection with the issue or sale of the notes in circumstances in which Section 21(1) of the FSMA does not apply to American Water; and
- it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the notes in, from or otherwise involving the UK.

Hong Kong

The notes have not been offered or sold and will not be offered or sold in Hong Kong by means of any document other than (i) to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) (the "SFO") and any rules made thereunder or (ii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32, Laws of Hong Kong) (the "C(WUMP)O") or which do not constitute an offer to the public within the meaning of the C(WUMP)O; and no advertisement, invitation or document relating to the notes has been or will be issued or has been or will be in the possession of any person for the purposes of issue (in each case, whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to notes which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the SFO and any rules made thereunder.

Japan

The notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended) (the "FIEA"), and accordingly, the notes have not been offered or sold and will not be offered or sold, directly or indirectly, in Japan or to, or for the account or benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan), or to others for re-offering or resale, directly or indirectly, in Japan or to, or for the account or benefit of, any resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the FIEA and any other applicable laws, regulations and guidelines promulgated by the relevant Japanese governmental and regulatory authorities and in effect at the relevant time.

Singapore

This prospectus has not been and will not be registered as a prospectus by the Monetary Authority of Singapore. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the notes may not be circulated or distributed, nor may the notes be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the "SFA") pursuant to Section 274 of the SFA, or (ii) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA.

Singapore Securities and Futures Act Product Classification—Solely for the purposes of its obligations pursuant to Sections 309B(1)(a) and 309B(1)(c) of the SFA, the issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A of the SFA) that the notes are "prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Switzerland

The notes may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("SIX") or on any other stock exchange or regulated trading facility in Switzerland. This document has been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other stock exchange or regulated trading facility in Switzerland. Neither this document nor any other offering or marketing material relating to the notes or the offering may be publicly distributed or otherwise made publicly available in Switzerland.

Neither this document nor any other offering or marketing material relating to the offering, American Water, or the notes have been or will be filed with or approved by any Swiss regulatory authority. In particular, this document will not be filed with, and the offer of notes will not be supervised by, the Swiss Financial Market Supervisory Authority ("FINMA"), and the offer of notes has not been and will not be authorized under the Swiss Federal Act on Collective Investment Schemes ("CISA"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend to acquirers of notes.

Taiwan

The notes have not been, and will not be, registered with the Financial Supervisory Commission of Taiwan, the Republic of China ("Taiwan") pursuant to applicable securities laws and regulations. No person or entity in Taiwan is authorized to distribute or otherwise intermediate the offering of the notes or the provision of information relating to the offering of the notes, including, but not limited to, this prospectus supplement and the accompanying prospectus. The notes may be made available for purchase outside Taiwan by investors residing in Taiwan (either directly or through properly licensed Taiwan intermediaries acting on behalf of such investors), but may not be issued, offered or sold in Taiwan.

Dubai Financial Centre

This prospectus relates to an Exempt Offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority ("DFSA"). This prospectus is intended for distribution only to persons of a type specified in the Offered Securities Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus nor taken steps to verify the information set forth herein and has no responsibility for the prospectus. The notes to which this prospectus relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the notes offered should conduct their own due diligence on the notes. If a prospective purchaser does not understand the contents of this prospectus, the prospective purchaser should consult an authorized financial advisor.

Settlement

It is expected that delivery of the notes will be made on or about the date specified on the cover page of this prospectus supplement, which will be the second business day (T+2) following the date of this prospectus supplement. Under Rule 15c6-1 of the Exchange Act, trades in the secondary market generally are required to settle in one business day (T+1), unless the parties to any such trade expressly agree otherwise. Accordingly, by virtue of the fact that the initial delivery of the notes will not be made on a T+1 basis, investors who wish to trade the notes prior to the business day before a final settlement may be required to specify an alternative settlement cycle at the time of any such trade to prevent a failed settlement and should consult their own advisors.

Table of Contents

LEGAL MATTERS

Certain legal matters in connection with this offering, including the validity of the notes, will be passed upon for AWCC and American Water by Morgan, Lewis & Bockius LLP, New York, New York. Certain legal matters in connection with this offering will be passed upon for AWCC and American Water by Jeffrey M. Taylor, Secretary of AWCC and Senior Vice President, Chief SEC Counsel and Secretary of American Water. The validity of the notes will be passed upon for the underwriters by Sullivan & Cromwell LLP, New York, New York. As of March 27, 2026, Mr. Taylor owned 2,862 shares of American Water's common stock, 3,344 unvested performance stock units (at target), and 989 unvested restricted stock units.

EXPERTS

The consolidated financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to American Water Works Company, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2025 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

Debt Securities

The securities covered by this prospectus may be sold by American Water Works Company, Inc., or American Water, from time to time, independently or together with American Water Capital Corp., or AWCC, a wholly-owned subsidiary of American Water Works Company, Inc. Any debt securities issued by AWCC will have the benefit of a support agreement from American Water. In addition, selling security holders who may be named in a prospectus supplement may offer and sell from time to time securities in such amounts as set forth in such prospectus supplement. We may, and any selling security holder may, offer the securities independently or together in any combination for sale directly to purchasers or through underwriters, dealers or agents to be designated at a future date. We may, and any selling security holder may, offer and sell these securities in amounts, at prices and on terms determined at the time of the offering. Unless otherwise set forth in a prospectus supplement, we will not receive any proceeds from the sale of securities by any selling security holders.

When we offer securities, a prospectus supplement will describe the specific terms of the specific issue of securities. Prospectus supplements may also add, update or change the information in this prospectus. You should carefully read this prospectus and the prospectus supplement relating to the specific issue of securities, together with the documents incorporated by reference, before you decide to invest in any of these securities.

American Water Works Company, Inc. common stock is listed on the New York Stock Exchange under the symbol "AWK." The mailing address of our principal executive offices is 1 Water Street, Camden, New Jersey 08102-1658, and the telephone number is (856) 955-4001.

Investing in these securities involves certain risks. See "Risk Factors" on page i of this prospectus. You should carefully review the risks and uncertainties described under the heading "Risk Factors" contained in this prospectus and any risk factors set forth in each applicable prospectus supplement and any related free writing prospectus, and under similar headings in the other documents incorporated by reference into this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The securities may be offered and sold to or through underwriters, dealers, agents or other third parties as designated from time to time, or directly to one or more other purchasers or through a combination of such methods on a continuous or delayed basis. See "Plan of Distribution" on page 31. If any underwriters, dealers or agents are involved in the sale of any of the securities, their names, and any applicable purchase price, fee, commission or discount arrangements between or among them, will be set forth, or will be calculable from the information set forth, in the applicable prospectus supplement.

The date of this prospectus is February 20, 2024.

Table of Contents

RISK FACTORS

An investment in our securities involves risk. Before you invest in securities issued by us, you should carefully consider the risks involved. Accordingly, you should carefully consider:

- the information contained in or incorporated by reference into this prospectus;
- the information contained in or incorporated by reference into any prospectus supplement relating to specific offerings of securities;
- the risks described in American Water's Annual Report on Form 10-K for its most recent fiscal year and in any Quarterly Report on Form 10-Q which American Water has filed since its most recent Annual Report on Form 10-K, each of which is incorporated by reference into this prospectus; and
- other risks and other information that may be contained in, or incorporated by reference from, other filings we make with the SEC, including in any prospectus supplement relating to specific offerings of securities.

The discussion of risks related to our business contained in or incorporated by reference into this prospectus or into any prospectus supplement comprises material risks of which American Water or AWCC is aware. If any of the events or developments described actually occurs, our business, financial condition or results of operations would likely suffer.

You should also be aware that new risks may emerge in the future at any time, and we cannot predict such risks or estimate the extent to which they may affect our business, financial condition or results of operations. The prospectus supplement applicable to each type or series of securities we offer may contain a discussion of additional risks applicable to an investment in us and the particular type of securities we are offering under that prospectus supplement.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that American Water and AWCC filed with the Securities and Exchange Commission, or the SEC, using a "shelf" registration process. Under this shelf registration process, we, or certain of our security holders, may sell the securities described in this prospectus in one or more offerings from time to time. Each time we, or, under certain circumstances, certain of our security holders, sell securities under this shelf registration, we will provide a prospectus supplement that will contain specific information about the terms of the offering. The prospectus supplement may also add to, modify or supersede the information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement together with the additional information referred to under "Where You Can Find More Information." If there is any inconsistency between the information in the prospectus and the prospectus supplement, you should rely on the information in the prospectus supplement.

The prospectus supplement will describe: the terms of the securities offered, any initial public offering price, any price paid to us for the securities, the net proceeds to us, if any, the manner of distribution and any underwriting compensation and the other specific material terms related to the offering of the applicable securities. For more detail on the terms of the securities, you should read the exhibits filed with or incorporated by reference in our registration statement of which this prospectus forms a part.

The term "American Water" refers to American Water Works Company, Inc. The term "AWCC" refers to American Water Capital Corp. All references in this prospectus to "we," "our" and "us" generally refer to:

- American Water, specifically with respect to securities issued by American Water;
- American Water and AWCC, specifically with respect to debt securities issued by AWCC;
- American Water or American Water and AWCC, together, as the context requires, in the section entitled "Plan of Distribution"; and
- American Water and its consolidated subsidiaries in the sections entitled "Forward-Looking Statements," "Risk Factors" and "American Water Works Company, Inc.," and otherwise in descriptions of American Water's operations.

References to "securities" include any security that we or our security holders might sell under this prospectus or any prospectus supplement.

This prospectus contains summaries of certain provisions contained in some of the documents described herein. Please refer to the actual documents for complete information. All of the summaries are qualified in their entirety by reference to the actual documents. Copies of the documents referred to herein have been filed, or will be filed or incorporated by reference as exhibits to the registration statement of which this prospectus is a part, and you may obtain copies of those documents as described under "Where You Can Find More Information."

We have not authorized anyone to provide you with information other than that contained or incorporated by reference in this prospectus or any accompanying prospectus supplement or in any related free writing prospectus filed by us with the SEC. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. The distribution of this prospectus and sale of these securities in certain jurisdictions may be restricted by law. You should inform yourself about and observe any such restrictions. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate as of the date on the front cover of this prospectus only and any information we have incorporated by reference is only accurate as of the date of the document incorporated by reference. Our business, financial condition, results of operations and prospects may have changed since that date.

Table of Contents

FORWARD-LOOKING STATEMENTS

This prospectus and any prospectus supplement, the documents incorporated by reference or any other written or oral statements made by or on behalf of us may include statements that reflect current views with respect to future events. These statements are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, which is referred to as the "Securities Act," Section 21E of the Securities Exchange Act of 1934, as amended, which is referred to as the "Exchange Act," and the Private Securities Litigation Reform Act of 1995. In some cases, these forward-looking statements can be identified by words with prospective meanings such as "intend," "plan," "estimate," "believe," "anticipate," "expect," "predict," "project," "propose," "assume," "forecast," "likely," "uncertain," "outlook," "future," "pending," "goal," "objective," "potential," "continue," "seek to," "may," "can," "should," "will" and "could" or the negative of such terms or other variations or similar expressions.

Forward-looking statements are predictions based on our current expectations and assumptions regarding future events. Accordingly, these forward-looking statements are qualified by, and should be read together with, the risk factors and other cautionary statements contained in American Water's Annual Report on Form 10-K for the year ended December 31, 2023, and its other filings with the SEC, which are incorporated by reference into this prospectus, and you should refer to such risks, uncertainties and risk factors in evaluating such forward-looking statements. Any forward-looking statements we make speak only as of the date of the document in which they are contained. Except as required by the federal securities laws, we do not have any obligation, and we specifically disclaim any undertaking or intention, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or otherwise. New factors emerge from time to time, and it is not possible for us to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on our businesses, either viewed independently or together, or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

Table of Contents

AMERICAN WATER WORKS COMPANY, INC.

We are the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. As a holding company, American Water conducts substantially all of its business operations through its subsidiaries. We employ approximately 6,500 employees to provide an estimated 14 million people with drinking water, wastewater and other water-related services in 24 states.

American Water's primary business involves the ownership of utilities that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers, collectively referred to in this prospectus as the Regulated Businesses. Services provided by the Regulated Businesses are subject to regulation by multiple state utility commissions or other entities engaged in utility regulation, collectively referred to as public utility commissions ("PUCs"). American Water also operates other businesses that provide water and wastewater services to the U.S. government on military installations, as well as municipalities. Individually, these businesses do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States ("GAAP"), and are collectively referred to in this prospectus as Other. As used in this prospectus, Other also includes (i) corporate costs that are not allocated to the Company's Regulated Businesses segment, (ii) interest income related to a secured seller promissory note, as amended, representing a portion of the consideration for the December 2021 sale of American Water's Homeowner Services Group ("HOS"), (iii) income from assets not associated with the Regulated Businesses, (iv) eliminations of inter-segment transactions and (v) fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses.

American Water's principal executive offices are located at 1 Water Street, Camden, New Jersey 08102-1658 and its telephone number is (856) 955-4001.

AMERICAN WATER CAPITAL CORP.

American Water's financing activities include, among other things, the issuance of long-term and short-term debt, primarily through AWCC, its wholly owned finance subsidiary. AWCC has no significant assets or operations other than as associated with these financing activities. AWCC loans all of the net proceeds of its long-term debt financings to American Water's operating subsidiaries in its Regulated Businesses segment, as well as to American Water. AWCC also provides liquidity to the Regulated Businesses segment and American Water through AWCC's revolving credit facility and commercial paper program. AWCC may also perform, provide or assist in providing other ancillary services directly related to these financing activities, including cash management activities and hedging of interest-rate and other market risk exposures associated with its indebtedness. The proceeds of all of AWCC's long-term debt have been loaned to subsidiaries in American Water's Regulated Businesses segment and American Water, which debt is evidenced by promissory notes issued to AWCC by such subsidiaries and American Water, as applicable.

AWCC's principal executive offices are located at 1 Water Street, Camden, New Jersey 08102-1658 and its telephone number is (856) 955-4001.

Table of Contents

USE OF PROCEEDS

Unless otherwise set forth in a prospectus supplement, the net proceeds from the sale of AWCC debt securities will be used to repay certain of AWCC's outstanding indebtedness or loaned to American Water and/or the subsidiaries in its Regulated Businesses segment, and American Water and/or such subsidiaries may use the proceeds of such loans, and American Water may use the net proceeds from the sale of securities issued by American Water, for the following purposes:

- the repayment of, or the funding of sinking fund payments with respect to, long-term or short-term indebtedness incurred by American Water or one or more subsidiaries in American Water's Regulated Businesses segment;
- the repurchase of capital stock of American Water or one or more subsidiaries in its Regulated Businesses segment;
- acquisitions; and/or
- general corporate purposes, including without limitation for working capital, operation and maintenance expenses, infrastructure improvements and other capital expenditures.

Unless otherwise set forth in a prospectus supplement, we will not receive any proceeds from any sales of securities by any selling security holder who may be named in a prospectus supplement.

SELLING SECURITY HOLDERS

We may register securities covered by this prospectus for re-offer and resale by any selling security holder who may be named in a prospectus supplement. We may add secondary sales of securities by any selling security holder by filing a prospectus supplement with the SEC. We may register these securities to permit selling security holders to resell their securities when they deem appropriate. A selling security holder may resell all, a portion or none of their securities at any time and from time to time. We may register reoffers and resales of those securities through an underwriter or other plan of distribution as set forth in a prospectus supplement. See "Plan of Distribution."

Selling security holders may also sell, transfer or otherwise dispose of some or all of their securities in transactions exempt from the registration requirements of the Securities Act. We may pay all expenses incurred with respect to the registration of the securities owned by the selling security holders, other than underwriting fees, discounts or commissions, which will be borne by the selling security holders. A prospectus supplement may name the selling security holders and specify the amount of securities to be registered and sold and any other terms of the securities that may be sold by a selling security holder. The applicable prospectus supplement will also disclose whether any of the selling security holders has held any position or office with, has been employed by or otherwise has had a material relationship with us during the three years prior to the date of the applicable prospectus supplement.

Table of Contents

DESCRIPTION OF CAPITAL STOCK

The following description of American Water's common stock and preferred stock is not intended to be complete. For more information regarding the common stock and preferred stock that may be offered by this prospectus, please refer to American Water's restated certificate of incorporation, which is referred to below as American Water's "certificate of incorporation," and American Water's amended and restated bylaws, which is referred to below as American Water's "bylaws." The certificate of incorporation and bylaws are incorporated by reference as exhibits to the registration statement of which this prospectus is a part. The terms of these securities also may be affected by the General Corporation Law of the State of Delaware, which is referred to below as the DGCL.

General

American Water's authorized capital stock consists of 500,000,000 shares of common stock, par value $0.01 per share, and 50,000,000 shares of preferred stock. As of February 6, 2024, there were 194,755,320 shares of common stock outstanding and no shares of preferred stock outstanding.

Common Stock

Voting Rights

Other than with respect to director elections, except as otherwise required by law, all matters to be voted on by American Water's shareholders must be approved by a majority of the shares present in person or proxy at such meeting and entitled to vote on the subject matter. With respect to uncontested director elections, American Water's bylaws require that in order to be elected, a director nominee must receive a majority of the votes cast (for this purpose, a majority of the votes cast means that the number of shares voted "for" a director nominee must exceed the number of votes cast "against" that nominee). For contested director elections where the number of nominees exceeds the number of directors to be elected, American Water's bylaws require that the directors shall be elected by the vote of a plurality of the shares represented in person or by proxy at any such meeting and entitled to vote on the election of directors.

Dividends

Holders of common stock will share equally in any dividend declared by American Water's board of directors, subject to the rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event of any voluntary or involuntary liquidation, dissolution or winding up of American Water's affairs, holders of American Water's common stock would be entitled, after payment of the liquidation preference to all holders of any outstanding preferred stock, to share ratably in American Water's assets that are legally available for distribution to shareholders after payment of liabilities. American Water must pay the applicable distribution to any holders of its preferred stock before it may pay distributions to the holders of its common stock.

Other Rights

American Water's shareholders have no preemptive or other rights to subscribe for additional shares.

Preferred Stock

American Water's board of directors may authorize the issuance of preferred stock from time to time in one or more series, without shareholder approval. Subject to the limits imposed by the DGCL, the board of directors

is authorized to fix for any series of preferred stock the number of shares of such series and the voting powers (if any), designation, preferences and relative, participating, optional or other special rights, and qualifications, limitations or restrictions of such series. American Water's board of directors is also authorized to increase or decrease the number of shares of any series, but not below the number of shares of that series then outstanding, without any further vote or action by American Water's shareholders.

American Water's board of directors may authorize the issuance of preferred stock with voting or conversion rights that affect adversely the voting power or other rights of American Water's common shareholders. The issuance of preferred stock, while providing flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of delaying, deferring or preventing a change in control, causing the market price of shares of American Water's common stock to decline, or impairing the voting and other rights of the holders of American Water's common stock. Any restriction on the repurchase or redemption of shares of preferred stock while dividends on such shares are in arrears shall be set forth in the applicable prospectus supplement. You should read both this prospectus and the applicable prospectus supplement together with the additional information referred to under "Where You Can Find More Information."

For any series of preferred stock that American Water may issue, American Water's board of directors will determine and the prospectus supplement relating to such series will describe:

- the number of shares constituting such series and the distinctive designation of the series;
- the dividend rate on the shares of the series, the conditions and dates upon which dividends thereon shall be payable, the extent, if any, to which dividends thereon shall be cumulative, and the relative rights of preference, if any, of payment of dividends thereon;
- whether or not the shares of the series are redeemable and, if redeemable, the time or times during which they shall be redeemable and the amount per share payable on redemption thereof, which amount may, but need not, vary according to the time and circumstances of such redemption;
- the amount payable in respect of the shares of the series, in the event of any liquidation, dissolution or winding up of American Water, which amount may, but need not, vary according to the time or circumstances of such action, and the relative rights of preference, if any, of payment of such amount;
- any requirement as to a sinking fund for the shares of the series, or any requirement as to the redemption, purchase or other retirement by American Water of the shares of the series;
- whether or not the shares of the series will have priority over or be on a parity with or be junior to the shares of any other series or class of stock in any respect, or will be entitled to the benefit of limitations restricting the issuance of shares of any other series or class of stock, restricting the payment of dividends on or the making of other distributions in respect of shares of any other series or class of stock ranking junior to the shares of the series as to dividends or assets, or restricting the purchase or redemption of the shares of any such junior series or class, and the terms of any such restriction;
- the right, if any, to exchange or convert shares of the series into other securities or property, and the rate or basis, time, manner and condition of exchange or conversion;
- the voting rights, if any, to which the holders of shares of the series shall be entitled in addition to the voting rights provided by law; and
- any other term, condition or provision with respect to the series not inconsistent with the provisions of American Water's certificate of incorporation or any resolution adopted by the board of directors pursuant thereto.

Certain Anti-Takeover Provisions of American Water's Certificate of Incorporation and Bylaws, and the DGCL

The following provisions of American Water's certificate of incorporation and bylaws could deter, delay or prevent a third party from acquiring American Water, even if doing so would benefit American Water's shareholders.

Undesignated Preferred Stock

The ability to authorize undesignated preferred stock makes it possible for American Water's board of directors to authorize the issuance of preferred stock with super voting, special approval, dividend or other rights or preferences on a discriminatory basis that could impede the success of any attempt to acquire American Water. These and other provisions may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of American Water.

Requirements for Advance Notification of Shareholder Meetings, Nominations and Proposals

American Water's bylaws provide that special meetings of shareholders may be called only upon the request of the majority of the members of American Water's board of directors, upon request of American Water's Board Chair, or by American Water's Secretary upon request of shareholders holding at least 15% of American Water's outstanding common stock. American Water's bylaws prohibit the conduct of any business at a special meeting other than as specified in the notice for such meeting.

American Water's bylaws establish advance notice procedures with respect to shareholder proposals for annual meetings and the nomination of candidates for election as directors, other than nominations made by or at the direction of American Water's board of directors or a committee of the board of directors. A shareholder who wishes to bring a matter before a meeting or submit candidates for nomination as directors must comply with American Water's advance notice requirements and provide American Water with certain information and, if applicable under the bylaws, provide to American Water certain agreements and undertakings. Additionally, vacancies and newly created directorships may be filled only by a vote of a majority of the members of American Water's board of directors then in office, even though less than a quorum, or by shareholders. These provisions may defer, delay or discourage a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of American Water.

Shareholder Action by Written Consent

As permitted by Section 228 of the DGCL, American Water's certificate of incorporation states that any action required or permitted to be taken by American Water's shareholders must be effected at a duly called annual or special meeting of American Water's shareholders and may not be effected by consent in writing by such shareholders.

Approval of Acquisition of Control by Public Utility Commission

A significant number of American Water's regulated subsidiaries are subject to economic regulation by state public utility commissions. Some of these states have enacted laws that require regulatory approval for the acquisition of "control" of any regulated utility. In those states, obtaining "control" of the parent or any other company that controls a regulated utility also requires prior regulatory approval. The threshold for a change in control is a fact-specific inquiry that varies by state. For example, in some states, a presumption of control will arise when an acquiring party acquires more than 9.9% of the voting securities of the regulated utility or the controlling entity. In addition to ownership, other states may analyze the degree of influence or control an acquiror may exert over American Water. Any person acquiring American Water's common stock in an offering or in any other purchase of American Water's common stock in an amount sufficient to trigger a change in control under state law would need the prior approval of the applicable state public utility commission.

Certain Other Provisions of American Water's Certificate of Incorporation and Bylaws and the DGCL

Board of Directors

American Water's certificate of incorporation provides that the number of directors is fixed in the manner provided in American Water's bylaws. American Water's bylaws provide that the number of directors will be fixed from time to time by American Water's board of directors.

Business Combinations Under the DGCL

American Water is subject to Section 203 of the DGCL, which prohibits a publicly held Delaware corporation from engaging in a "business combination" with an "interested stockholder" for a period of three years after the time the shareholder became an "interested stockholder," subject to certain exceptions, including if, prior to such time, the board of directors approved the business combination or the transaction which resulted in the shareholder becoming an "interested stockholder." "Business combinations" include mergers, asset sales and other transactions resulting in a financial benefit to the "interested stockholder." Subject to various exceptions, an "interested stockholder" is a person who, together with his or her affiliates and associates, owns, or within the prior three years did own, 15% or more of the corporation's outstanding voting stock. These restrictions generally prohibit or delay the accomplishment of mergers or other takeover or change-in-control attempts that are not approved by a company's board of directors.

Limitations of Liability and Indemnification of Directors and Officers

The DGCL authorizes corporations to limit or eliminate the personal liability of directors and officers to corporations and their shareholders for monetary damages for breaches of directors' fiduciary duties. American Water's certificate of incorporation includes a provision that eliminates the personal liability of directors (but not officers) for monetary damages for actions taken as a director to the fullest extent authorized by the DGCL. The DGCL does not permit exculpation for liability:

- for breach of the duty of loyalty;
- for acts or omissions not in good faith or involving intentional misconduct or knowing violation of law;
- under Section 174 of the DGCL (relating to unlawful dividends or stock repurchases); or
- for transactions from which the director derived an improper personal benefit.

American Water's certificate of incorporation and bylaws provide that American Water will indemnify its directors and officers to the fullest extent permitted by law. American Water's bylaws also expressly authorize American Water to carry directors' and officers' insurance providing indemnification for American Water's directors, officers and certain employees and agents for certain liabilities.

The limitation of liability and indemnification provisions in American Water's certificate of incorporation and bylaws may discourage shareholders from bringing a lawsuit against American Water's directors for breach of their fiduciary duty. These provisions may also have the effect of reducing the likelihood of derivative litigation against American Water's directors and officers, even though such an action, if successful, might otherwise benefit American Water and its shareholders. In addition, your investment in American Water's common stock may be adversely affected to the extent American Water pays the costs of settlement and damage awards against directors and officers in accordance with these indemnification provisions.

Proxy Access

American Water's bylaws permit an eligible shareholder or group of shareholders to include up to a specified number of director nominees in American Water's proxy materials for an annual meeting of shareholders. To qualify, the shareholders (or group of up to 20 shareholders) must have continuously owned for

Table of Contents

at least three years 3% or more of American Water's outstanding common stock. The maximum number of shareholder nominees permitted under this proxy access provision is the greater of (i) two or (ii) 20% of the total number of directors on American Water's board of directors as of the last day on which a proxy access notice may be submitted, rounded down to the nearest whole number.

Transfer Agent and Registrar

Equiniti Trust Company, LLC serves as the registrar and transfer agent for American Water's common stock.

New York Stock Exchange Symbol

American Water's common stock is listed on the New York Stock Exchange under the trading symbol "AWK."

DESCRIPTION OF AWCC DEBT SECURITIES AND AMERICAN WATER SUPPORT AGREEMENT

The following description of the terms of the debt securities sets forth certain general terms and provisions of the debt securities to which any prospectus supplement may relate. The particular terms of the debt securities offered by any prospectus supplement will be described in the prospectus supplement relating to those debt securities. Accordingly, for a description of the terms of a particular issue of debt securities, reference must be made to both the prospectus supplement relating thereto and to the following description.

AWCC may issue debt securities from time to time in one or more series. The debt securities will be general obligations of AWCC. Any debt securities issued by AWCC will have the benefit of a support agreement from American Water. In the event that any series of debt securities will be subordinated to other indebtedness that AWCC has outstanding or may incur, the terms of the subordination will be set forth in the prospectus supplement relating to the subordinated debt securities. Each series of debt securities offered by this prospectus will be issued under an indenture dated as of December 4, 2009, between AWCC and Computershare Trust Company, N.A., as successor to Wells Fargo Bank, National Association, as trustee, as the same may be amended or supplemented from time to time. The indenture and the form of supplemental indenture or other instrument establishing the debt securities of a particular series are filed as exhibits to, or will be subsequently incorporated by reference into, the registration statement of which this prospectus is a part. There is no requirement under the indenture that future issuances of AWCC's debt securities be issued exclusively under the indenture, and we will be free to employ other indentures or documentation, containing provisions different from those included in the indenture or applicable to one or more issuances of debt securities in connection with future issuances of other debt securities.

The following discussion of certain provisions of the indenture is a summary only and should not be considered a complete description of the terms and provisions of the indenture. Accordingly, the following discussion is qualified in its entirety by reference to the provisions of the indenture, including the definition of certain terms used below.

General

The debt securities represent direct, unsecured, general obligations of AWCC and:

- may rank equally with other unsubordinated debt or may be subordinated to other debt AWCC has or may incur;
- may be issued in one or more series with the same or various maturities;
- may be issued at a price of 100% of their principal amount or at a premium or discount;
- may be issued in registered or bearer form and certificated or uncertificated form;
- may be represented by one or more global securities registered in the name of a designated depositary's nominee; and
- will have the benefit of a support agreement, dated June 22, 2000, and amended on July 26, 2000, between AWCC and American Water, which is referred to as the "support agreement."

The aggregate principal amount of debt securities that AWCC may authenticate and deliver under the indenture is unlimited. The debt securities may be issued in one or more series as may be authorized from time to time. We will include some or all of the following information about a particular series of debt securities in a prospectus supplement relating to that particular series of debt securities:

(1) the title of the debt securities of the series (which shall distinguish the debt securities of that particular series from the debt securities of any other series);

(2) the price or prices of the debt securities of the series;

(3) any limit upon the aggregate principal amount of the debt securities of the series which may be authenticated and delivered under the indenture (except for debt securities authenticated and delivered upon registration of transfer of, or in exchange for, or in lieu of, other debt securities of the series and except for any debt securities which are deemed never to have been authenticated and delivered);

(4) the person to whom any interest on a debt security of the series shall be payable, if other than the person in whose name that debt security (or one or more predecessor securities) is registered at the close of business on the regular record date for such interest;

(5) the date or dates on which the principal and premium of any debt securities of the series are payable;

(6) the rate or rates (which may be fixed or variable) at which any debt securities of the series shall bear interest (if any), or the method of determining such rate or rates, the date or dates from which any such interest shall accrue, the interest payment dates on which any such interest shall be payable, and the regular record date for any such interest payable on any interest payment date;

(7) the period or periods within which, the price or prices at which and the terms and conditions upon which any debt securities of the series may be redeemed, in whole or in part, at the option of AWCC (including without limitation the number of basis points specified for such series for purposes of determining any make-whole amount in respect thereof, and any reference treasury dealers for such series) and, if other than by a board resolution, the manner in which any election by AWCC to redeem the debt securities shall be evidenced;

(8) the obligation, if any, of AWCC to redeem or purchase any debt securities of the series at the option of the holder thereof, or at the option of any other person, and the period or periods within which, the price or prices at which and the terms and conditions upon which any debt securities of the series shall be redeemed or purchased, in whole or in part, pursuant to such obligation;

(9) if other than the currency of the United States of America, the currency, currencies or currency units in which the principal of or any premium or interest on any debt securities of the series shall be payable and the manner of determining the equivalent thereof in the currency of the United States of America for any purpose, and such other or additional provisions (including, without limitation, in respect of defeasance and covenant defeasance) as shall be necessary and desirable in connection therewith;

(10) if other than the entire principal amount thereof, the portion of the principal amount of any debt securities of the series which shall be payable upon declaration of acceleration of the maturity thereof;

(11) if the principal amount payable at the stated maturity of any debt securities of the series will not be determinable as of any one or more dates prior to the stated maturity, the amount which shall be deemed to be the principal amount of such debt securities as of any such date for any purpose thereunder or hereunder, including the principal amount thereof which shall be due and payable upon any maturity other than the stated maturity or which shall be deemed to be outstanding as of any date prior to the stated maturity (or, in any such case, the manner in which such amount deemed to be the principal amount shall be determined);

(12) if applicable, that any debt securities of the series shall be issuable in whole or in part in the form of one or more debt securities in registered, global form without interest coupons, which are referred to as “global securities,” and, in such case, the respective depositaries for such global securities, the form of any legend or legends which shall be borne by any such global security, whether such global securities shall be in the form of registered securities, restricted securities or Regulation S securities and any circumstances in which any such global security may be exchanged in whole or in part for debt securities registered, and any transfer of such global security in whole or in part may be registered, in the name or names of persons other than the depositary for such global security or a nominee thereof;

(13) the terms, if any, upon which the debt securities of the series may be convertible into or exchanged for AWCC's other debt securities or other securities of any kind and the terms and conditions upon which such conversion or exchange shall be effected, including the initial conversion or exchange price or rate, the conversion or exchange period and any other additional provisions;

(14) if other than denominations of $1,000 and any integral multiple thereof, the denominations in which the debt securities of the series shall be issuable;

(15) if the amount of principal, premium or interest with respect to the debt securities of the series may be determined with reference to an index or pursuant to a formula, the manner in which such amounts will be determined;

(16) any changes or additions to the provisions of the indenture dealing with defeasance;

(17) the terms, if any, of the transfer, mortgage, pledge or assignment as security for the debt securities of the series of any properties, assets, moneys, proceeds, securities or other collateral, including whether certain provisions of the Trust Indenture Act of 1939, as amended, or the "Trust Indenture Act", are applicable and any corresponding changes to provisions of the indenture as then in effect;

(18) any addition to or change in the events of default with respect to any debt securities of the series and any change in the right of the trustee or the holders of such series of debt securities to declare the principal, premium and interest, if any, on such series of debt securities due and payable;

(19) any trustee, authenticating agent, paying agent, transfer agent or registrar;

(20) the applicability of, and any addition to or change in, the covenants and definitions set forth in the indenture which applies to the debt securities;

(21) the subordination, if any, of the debt securities of the series pursuant to the indenture and any changes or additions to the provisions of the indenture relating to subordination;

(22) with regard to debt securities of the series that do not bear interest, the dates for certain required reports to the trustee;

(23) any material U.S. federal income tax consequences applicable to the debt securities; and

(24) any other terms of the series.

All debt securities of one series need not be issued at the same time, and a series may be re-opened for issuances of additional debt securities of such series. This means that AWCC may from time to time, without notice to, or without the consent of any existing holders of the previously-issued debt securities of a particular series, create and issue additional debt securities of such series. Such additional debt securities will have the same terms as the previously-issued debt securities of such series in all respects except for the issue date and, if applicable, the initial interest payment date. The additional debt securities will be consolidated and form a single series with the previously-issued debt securities of such series.

Support Agreement

AWCC's indebtedness (including debt securities) has the benefit of the support agreement. The support agreement, which, under the circumstances described below, is the functional equivalent of a guarantee, provides, among other things, that:

- American Water owns, and during the term of the support agreement shall continue to own, all of the voting stock of AWCC free and clear of any lien, security interest or other charge or encumbrance;
- American Water will provide to AWCC, at its request or the request of any lender (including any holder of debt securities), funds in the form of cash or liquid assets (as equity or, if American Water and AWCC agree, as a loan subordinated to any and all indebtedness, whether or not that indebtedness is outstanding at the time of the loan) as required if AWCC is unable to make timely payment of interest, principal or premium, if any, on any indebtedness issued by it;

- American Water will cause AWCC to have at all times a positive tangible net worth (total assets less liabilities less intangible assets), as determined in accordance with GAAP; and
- if AWCC fails or refuses to take timely action to enforce certain rights under the support agreement or if AWCC defaults in the timely payment of interest, principal or premium, if any, owed to a lender (including any holder of debt securities) when due, that lender may proceed directly against American Water to enforce such rights or to obtain payment of the defaulted interest, principal or premium, if any, owed to that lender.

No amendment to the support agreement that adversely affects the rights of any lender (including any holder of debt securities) and no termination of the support agreement will be effective until such time as all indebtedness of AWCC shall have been irrevocably paid in full and all commitments for indebtedness have been terminated, unless the lenders (including holders of debt securities or the trustee acting on behalf of debt security holders) holding all of the aggregate principal amount of debt outstanding and (to the extent not outstanding) committed to consent in writing thereto. Notwithstanding the foregoing sentence, any amendment to the support agreement for the purposes of (i) increasing the minimum net worth as provided in the support agreement, (ii) establishing or increasing a minimum interest coverage ratio, (iii) establishing or reducing a maximum amount of debt leverage, (iv) increasing the aggregate principal amount of debt outstanding whose holders are required to consent to the termination or amendment of the support agreement, or (v) any combination of clauses (i), (ii), (iii) and (iv) of this sentence, shall be effective without the consent of any lender (including any holder of debt securities or trustee acting on behalf of such holder). In addition, nothing in the prior two sentences shall derogate from, or override, any provision in an instrument, indenture, agreement or other document pursuant to which indebtedness is or will be issued that requires the written consent of the holders of a specified amount or percentage of that indebtedness to consent to an amendment or termination of the support agreement.

Certain Covenants

Unless otherwise provided in the prospectus supplement for a particular series of debt securities, the indenture, as supplemented for a particular series of debt securities, will contain the following covenants for the benefit of the holders of such series of debt securities, which will be applicable (unless waived or amended) so long as any of the debt securities of such series are outstanding:

Restrictions on Liens

AWCC will not, and will not allow American Water, as the support provider, or any of its subsidiaries, as defined below, to, create, incur, issue or assume any liens, as defined below, on American Water's or its subsidiaries' respective property to secure debt, as defined below, where the debt secured by those liens would exceed an amount equal to 15% of our consolidated tangible total assets, as defined below (calculated to exclude debt secured by permitted liens). This restriction does not apply to the following permitted liens:

(a) liens existing, or created pursuant to the terms of agreements existing, on the date of the indenture;

(b) liens consisting of (i) pledges or deposits in the ordinary course of business to secure obligations under workmen's compensation laws or similar legislation, (ii) deposits in the ordinary course of business to secure or in lieu of surety, appeal or customs bonds to which AWCC, American Water or any of its subsidiaries is a party, (iii) liens created by or resulting from any litigation or legal proceeding which is currently being contested in good faith by appropriate proceedings diligently conducted, (iv) pledges or deposits in the ordinary course of business to secure performance in connection with bids, tenders or contracts (other than contracts for the payment of money) or (v) materialmen's, mechanics', carriers', workmen's repairmen's or other like liens incurred in the ordinary course of business for sums not yet due or currently being contested in good faith by appropriate proceedings diligently conducted;

(c) liens created to secure tax-exempt debt, in connection with the financing or refinancing of the purchase, lease or construction of properties;

(d) any lien on any asset of any person existing at the time the person is merged or consolidated with or into, or such asset is acquired by AWCC, American Water or any of its subsidiaries and not created in contemplation of such event;

(e) liens created to secure sales of accounts receivable and other receivables;

(f) licenses of intellectual property granted by AWCC, American Water or any of its subsidiaries in the ordinary course of business and not interfering in any material respect with the ordinary conduct of business;

(g) liens of landlords arising under real property leases to the extent those liens arise in the ordinary course of business and do not secure any past due obligation for the payment of money;

(h) any interest or title of a lessor or sublessor under any lease permitted by the indenture;

(i) liens securing debt which has neither been assumed by AWCC, American Water or any of its subsidiaries nor upon which AWCC, American Water or any of its subsidiaries customarily pay interest charges, existing upon real property, or rights in or relating thereto, which real property or rights were acquired for right-of-way purposes;

(j) zoning laws and ordinances;

(k) any leases required to be capitalized on a balance sheet of the lessee in accordance with GAAP;

(l) easements, rights-of-way, restrictions, conditions and other similar encumbrances, minor defects or irregularities of title, and alleys, streets and highways, which in the aggregate do not materially impair the usefulness of the mortgaged property in the present business of AWCC, American Water or any of its subsidiaries;

(m) leases of the properties of AWCC, American Water or any of its subsidiaries, in each case entered into in the ordinary course of business and that do not, individually or in the aggregate, (i) interfere in any material respect with the ordinary course of business or (ii) materially impair the value of the property subject thereto;

(n) liens arising out of conditional sale, title retention, consignment or similar arrangements for the sale of goods entered into by AWCC, American Water or any of its subsidiaries in the ordinary course of business in accordance with the past practices of AWCC, American Water or such subsidiary;

(o) bankers' liens, right of setoff and other similar liens (including deposits required by interest rate swap agreements) existing solely with respect to cash and cash equivalents on deposit in one or more accounts maintained by AWCC, American Water or any of its subsidiaries, in each case granted in the ordinary course of business in favor of the financial institutions with which such accounts are maintained, securing amounts owing to such financial institutions with respect to cash management and operating account arrangements, including those involving pooled accounts and netting arrangements; provided that, unless such liens are non-consensual and arise by operation of law, in no case shall any such liens secure (either directly or indirectly) the repayment of any debt;

(p) liens for taxes, assessments or governmental charges or levies not yet delinquent and which may subsequently be paid without interest or penalties and liens for taxes, assessments or governmental charges or levies which are being contested in good faith by appropriate proceedings for which reserves have been established to the extent required by GAAP;

(q) any lien on any property of AWCC, American Water or any of its subsidiaries securing obligations not exceeding in the aggregate $100 million outstanding any time;

(r) liens on any property, acquired, constructed or improved by AWCC, American Water or any of its subsidiaries after the date of the indenture, and any improvements thereon, accessions thereto or other property acquired or constructed for use in connection therewith or related thereto, which are created or assumed prior to or contemporaneously with, or within 180 days after, such acquisition or completion

of such construction or improvement, or within one year thereafter pursuant to a firm commitment for financing arranged with a lender or investor within such 180-day period, to secure or provide for the payment of all or any part of the purchase price of such property or the cost of such construction or improvement incurred after the date of the indenture or liens on any property existing at the time of acquisition thereof; *provided*, that the liens shall not extend to any property theretofore owned by AWCC, American Water or any of its subsidiaries other than, in the case of any such construction or improvement, (i) unimproved real property on which the property so constructed or the improvement is located, (ii) other property (or improvement thereon) which is an improvement to or is acquired or constructed for use in connection therewith or related thereto, (iii) any right and interest under any agreement or other documents relating to the property being so constructed or improved or such other property and (iv) the stock of any subsidiary of American Water created or maintained for the primary purpose of owning the property so constructed or improved;

(s) liens on property securing debt if, prior to or concurrently with the issuance, assumption or guarantee of such debt, the debt securities (together with, if AWCC shall so determine, (i) any other debt of or guaranteed by AWCC ranking equally with the debt securities or (ii) any debt of American Water or any of its subsidiaries then existing or thereafter created) are secured by such property equally and ratably with (or prior to) such debt (for so long as such debt is secured by such liens);

(t) liens securing the debt securities;

(u) liens securing debt owed to AWCC, American Water or any of its subsidiaries; and

(v) liens created for the sole purpose of refinancing, extending, renewing or replacing in whole or in part debt or other obligations secured by any lien referred to in the foregoing subsections (a) through (t); *provided*, *however*, that the principal amount of debt or obligations secured thereby shall not exceed the principal amount of debt or obligations so secured at the time of such refinancing, extension, renewal or replacement *plus* the amount of any premiums required to be paid thereon and reasonable fees and expenses associated therewith and that such refinancing, extension, renewal or replacement, as the case may be, shall be limited to all or a part of the property that secured the lien or mortgage so refinanced, extended, renewed or replaced (and any improvements on such property).

"Debt" means, for any person (without duplication), all (i) indebtedness for borrowed money, (ii) obligations evidenced by bonds, debentures, notes or other similar instruments, (iii) obligations to pay the deferred purchase price of property or service (other than trade payables not overdue by more than 90 days incurred in the ordinary course of business and long term water purchase contracts), (iv) obligations under capital leases, (v) indebtedness of the type referred to in clauses (i) through (iv) above secured by (or for which the holder of such indebtedness has an existing right, contingent or otherwise, to be secured by), any lien or encumbrance on, or security interest in, property (including, without limitation, accounts and contract rights) owned by such person, even though such person has not assumed or become liable for the payment of such indebtedness, and (vi) all obligations of such person for indebtedness or obligations of others of the kinds referred to in clauses (i) through (iv) above under direct or indirect guarantees, excluding, in all cases, (i) advances for construction and contributions in aid of construction as set forth on the consolidated balance sheet of American Water and its subsidiaries, (ii) reimbursement obligations (contingent or otherwise) in respect of outstanding letters of credit and (iii) attributable debt in respect of sale and leaseback transactions, as defined below.

"Lien" means any mortgage, lien, pledge, charge, security interest or other encumbrance, or any interest or title of any vendor, lessor, lender or other secured party to or of such person under any conditional sale or other title retention agreement or capital lease, upon or with respect to any property or asset of such person.

"Subsidiary" means a corporation more than 50% of the outstanding voting stock of which is owned, directly or indirectly, by American Water or by one or more other subsidiaries, or by American Water and one or more other subsidiaries.

Table of Contents

Restrictions on Sales and Leasebacks

AWCC will not, and will not allow American Water or any of its subsidiaries to, enter into any sale and leaseback transaction without effectively providing that the debt securities will be secured equally and ratably with or prior to the sale and leaseback transaction, unless:

- the aggregate amount of the attributable debt of AWCC, American Water and its subsidiaries in respect of sale and leaseback transactions then outstanding would not exceed an amount equal to 15% of consolidated tangible total assets, as defined below, or
- AWCC, American Water or any of its subsidiaries, within 12 months of the sale and leaseback transaction, retire an amount of secured debt which is not subordinate to the debt securities in an amount equal to the greater of (1) the net proceeds of the sale or transfer of the property or other assets that are the subject of the sale and leaseback transaction or (2) the fair market value of the property leased.

A "sale and leaseback transaction" is an arrangement between AWCC, American Water or any of its subsidiaries and a bank, insurance company or other lender or investor where AWCC, American Water or any of its subsidiaries leases property for an initial term of three years or more that was or will be sold by AWCC, American Water, or such subsidiary to that lender or investor for a sale price of $1 million or its equivalent or more.

"Attributable debt" means the lesser of (1) the fair market value of the asset subject to the sale and leaseback transaction and (2) the present value, determined in accordance with GAAP (discounted at a rate equal to the rate of interest implicit in such transaction), of the obligations of the lessee for the net rental payments (excluding amounts on account of maintenance and repairs, insurance, taxes, assessments and similar charges and contingent rents) during the term of the lease.

"Consolidated tangible total assets" means, as at any applicable time of determination, consolidated total assets less, without duplication, all intangible assets such as goodwill, trademarks, trade names, patents and unamortized debt discount and expense carried as an asset, in each case as set forth in American Water's most recent consolidated balance sheet.

"Consolidated total assets" means, as at any applicable time of determination, the consolidated total assets of American Water and its subsidiaries as set forth in American Water's most recent consolidated financial statements.

Merger, Consolidation or Sale of Assets

Neither AWCC nor American Water will consolidate with or merge into any other person or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless:

(i) the successor formed by a consolidation or the survivor of a merger or the person that acquires by conveyance, transfer or lease all or substantially all of the assets of AWCC or American Water as an entirety, as the case may be, is a person organized and existing under the laws of the United States or any State thereof (including the District of Columbia), and expressly assumes, in the case of AWCC, the due and punctual payment of the principal of and any premium and interest on all the debt securities and the performance or observance of every covenant of the indenture on the part of AWCC to be performed or observed, and, in the case of American Water, all the obligations under the support agreement to be performed or observed, and such person shall have caused to be delivered to the trustee an officers' certificate and an opinion of counsel to the effect that such consolidation, merger, conveyance, transfer or lease complies with this covenant; and

(ii) immediately before and immediately after giving effect to such transaction, no event of default, and no event which, after notice or lapse of time or both, would become an event of default, has occurred and is continuing.

Upon any consolidation by AWCC or American Water with or merger by AWCC or American Water into any other person or any conveyance, transfer or lease of either AWCC's or American Water's properties and assets substantially as an entirety in accordance with this covenant, the successor person formed by such consolidation or into which it is merged or to which such conveyance, transfer or lease is made will succeed to, and be substituted for, and may exercise every right and power of, AWCC or American Water, as applicable, under the indenture and the support agreement with the same effect as if such successor person had been named as AWCC or American Water, as applicable, therein, and thereafter, except in the case of a lease, the predecessor person will be relieved of all obligations and covenants, in the case of AWCC under the indenture, the debt securities and, in the case of American Water, under the support agreement.

Support Agreement

American Water may not (a) cancel or terminate the support agreement or (b) amend or otherwise modify the terms of the support agreement, except in accordance with the support agreement. See "Support Agreement."

Subordination

A series of debt securities may be subordinated, which are referred to as "subordinated debt securities," to senior indebtedness (as would be defined in the applicable prospectus supplement) to the extent set forth in the prospectus supplement relating thereto. To the extent American Water conducts its operations through subsidiaries, the holders of debt securities (whether or not subordinated debt securities) will be structurally subordinated to the creditors of American Water's subsidiaries with respect to American Water's obligations under the support agreement, except to the extent such subsidiary is a guarantor of such series of debt securities.

Events of Default

Each of the following constitutes an event of default under the indenture with respect to any series of debt securities:

(1) default for 30 days in the payment when due of interest on any debt security of that series;

(2) default in the payment when due of the principal of, or premium, if any, on any debt security of that series;

(3) default in the deposit of any sinking fund payment, when and as due by the terms of debt securities of that series;

(4) failure by AWCC or American Water to comply with the provisions described under the caption "—Certain Covenants—Merger, Consolidation or Sale of Assets";

(5) default in the performance, or breach by AWCC or American Water, as applicable, of any other covenant or warranty in the indenture or the support agreement for 60 days after (i) AWCC and American Water receive written notice of such default or breach from the trustee or (ii) AWCC, American Water and the trustee receive written notice of such default or breach from the holders of at least 25% in principal amount of the debt securities of that series; provided, however, that except with respect to defaults under or breaches of the covenant described under "—Certain Covenants—Restrictions on Liens," holders of a series of debt securities will be deemed to have agreed to an extension of such 60-day period to 120 days so long as corrective action is initiated by AWCC or American Water within such 60-day period unless such corrective action is no longer being diligently pursued;

(6) default under any mortgage, indenture or instrument under which there may be issued or by which there may be secured or evidenced any indebtedness for money borrowed by AWCC or American Water (or the payment of which is guaranteed by AWCC or American Water), if that default is caused by a failure to pay principal at its stated maturity after giving effect to any applicable grace

period, or results in the acceleration of such indebtedness prior to its stated maturity and, in each case, the principal amount of any such indebtedness, together with the principal amount of any other indebtedness under which there has been a payment default after stated maturity or the maturity of which has been so accelerated, aggregates $100 million or more;

(7) failure by AWCC or American Water to pay final judgments aggregating (to the extent not paid or insured) in excess of $100 million, which judgments are not, within 60 days after entry thereof, bonded, discharged or stayed pending appeal, or are not discharged within 60 days after the expiration of such stay;

(8) except as permitted by the indenture, the support agreement shall cease for any reason to be in full force or effect or American Water, or any person acting on behalf of American Water, shall deny or disaffirm American Water's obligations under the support agreement; and

(9) certain events of bankruptcy or insolvency described in the indenture with respect to AWCC or American Water.

Any addition to or changes in the foregoing events of default may be described in the prospectus supplement for a particular series of debt securities.

In the case of an event of default arising from certain events of bankruptcy or insolvency, with respect to AWCC or American Water, all outstanding debt securities of such series will become due and payable immediately without further action or notice. If any other event of default occurs and is continuing, the trustee or the holders of at least 25% in aggregate principal amount of the outstanding debt securities of such series may declare the principal amount of all the securities of that series to be due and payable immediately. After any such acceleration, but before a judgment or decree based on acceleration is obtained by the trustee, the holders of a majority in aggregate principal amount of the outstanding debt securities of such series may, under certain circumstances, rescind and annul such acceleration and waive such event of default if all events of default, other than the nonpayment of accelerated principal have been cured or waived as provided for in the indenture.

Holders of debt securities of a series may not enforce the indenture or such debt securities except as provided in the indenture. Subject to certain limitations, holders of a majority in principal amount of the then outstanding debt securities of a series may direct the trustee in its exercise of any trust or power. The trustee may withhold from holders of a series of debt securities notice of any continuing default if it determines that withholding notice is in their interest, except a default relating to the payment of principal or interest.

Subject to the provisions of the indenture relating to the duties of the trustee, in case an event of default shall occur and be continuing, the trustee will be under no obligation to exercise any of its rights or powers under the indenture at the request or direction of any of the holders of a series of debt securities, unless such holders shall have offered to the trustee reasonable indemnity or security against any loss, liability or expense. Subject to such provisions for indemnification of the trustee, the holders of a majority in principal amount of a series of debt securities then outstanding will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee or exercising any trust or power conferred on the trustee with respect to such series of outstanding debt securities.

The holders of a majority in aggregate principal amount of debt securities of a series then outstanding may, on behalf of the holders of all debt securities of such series, waive any past default and its consequences under the indenture except a default in the payment of interest on, or the principal of, debt securities of such series (other than the non-payment of principal of or interest on debt securities of such series that became due solely because of the acceleration of debt securities of such series) or a covenant or provision of the indenture that cannot be modified or amended without the consent of each holder of each debt security of such series affected.

AWCC is required to deliver to the trustee within 90 days after the end of each fiscal year a statement regarding compliance with the indenture during that fiscal year. Promptly (and in any event within 5 business

days) upon a responsible officer, as defined below, of AWCC becoming aware of any default or event of default, AWCC is required to deliver to the trustee a statement specifying that default.

"Responsible officer" means the chief executive officer, chief operating officer, general counsel, any senior financial officer and any other officer of AWCC with responsibility for the administration of the indenture.

"Senior financial officer" means the chief financial officer, principal accounting officer, treasurer or controller of AWCC.

Modification or Waiver

Except as provided below, AWCC and the trustee may supplement and amend the indenture with the consent of the holders of not less than a majority in principal amount of the outstanding debt securities. The consent of the holder of each outstanding debt security affected is required to:

- change the stated maturity of the principal of, or any installment of interest on, the debt securities;
- reduce the principal amount or the rate of interest on, or any premium payable upon the redemption of, the debt securities;
- change the place or currency of payment of principal of, interest on, or premium, if any, on, the debt securities;
- impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of the debt securities or any redemption date for the debt securities;
- reduce the percentage of outstanding debt securities necessary to modify or amend the indenture or to consent to any waiver under the indenture;
- modify provisions related to waivers of past defaults or waivers of certain covenants, other than to increase the percentage of outstanding debt securities necessary for such waivers; or
- modify any of the above requirements.

AWCC and the trustee may supplement and amend the indenture without the consent of any holder for the following purposes:

- to evidence the succession of another entity to AWCC as obligor under the indenture and the debt securities;
- to add to the covenants of AWCC, American Water or a subsidiary of American Water for the benefit of the holders of the debt securities or to surrender any right or power conferred upon AWCC, American Water or any subsidiary of American Water;
- to provide for uncertificated debt securities in addition to or in place of certificated debt securities (provided that the uncertificated debt securities are issued in registered form for purposes of Section 163(f) of the Internal Revenue Code, or in a manner such that the uncertificated debt securities are described in Section 163(f)(2)(B) of the Internal Revenue Code);
- to secure the debt securities or add guarantees with respect to the debt securities;
- to establish the form or terms of debt securities as permitted by the indenture;
- to provide for the acceptance of appointment by a successor trustee;
- to cure any ambiguity, defect or inconsistency in the indenture or to make any other change that does not adversely affect the rights of any holder of the debt securities;
- to effect the assumption of the indenture by American Water; or

- to comply with any requirement of the SEC in connection with the qualification of the indenture under the Trust Indenture Act.

The consent of the holders of the debt securities is not necessary under the indenture to approve the particular form of any proposed amendment or supplemental indenture. It is sufficient if such consent approves the substance of the proposed amendment or supplemental indenture.

Prescription Period

Any money that AWCC deposits with the trustee or any paying agent for the payment of principal, premium, if any, or interest on any debt security that remains unclaimed for two years after the date upon which the principal, premium, if any, and interest are due and payable will be repaid to AWCC upon AWCC's request unless otherwise required by mandatory provisions of any applicable unclaimed property law. After that time, unless otherwise required by mandatory provisions of any unclaimed property law, the holder of any debt security will be able to seek any payment to which that holder may be entitled only from AWCC.

No Personal Liability of Directors, Officers, Employees and Shareholders

No director, officer, employee, incorporator or shareholder of AWCC or American Water, will have any liability for any obligations of AWCC or American Water under the debt securities, the indenture or the support agreement, or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each holder of a debt security by accepting such debt security waives and releases all such liability. The waiver and release are part of the consideration for issuance of the debt securities. The waiver may not be effective to waive liabilities under the Securities Act and it is the view of the SEC that such waiver is against public policy.

Defeasance

At any time, AWCC may terminate all its obligations under debt securities of a series and the indenture with respect to such debt securities, which is referred to as "legal defeasance," except for certain obligations, including those respecting the defeasance trust and obligations to register the transfer or exchange of debt securities of such series, to replace mutilated, destroyed, lost or stolen debt securities of such series and to maintain a registrar and paying agent in respect of the debt securities of such series.

In addition, at any time AWCC may terminate its obligations under certain specified covenants with respect to a series of debt securities.

AWCC may exercise its legal defeasance option with respect to a series of debt securities notwithstanding its prior exercise of its covenant defeasance option with respect to such series of debt securities. If AWCC exercises its legal defeasance option with respect to a series of debt securities, payment of the debt securities of such series may not be accelerated because of an event of default with respect thereto. If AWCC exercises its covenant defeasance option with respect to a series of debt securities, payment of the debt securities of such series may not be accelerated because of a default related to the specified covenants.

In order to exercise either defeasance option with respect to debt securities of a series, AWCC must irrevocably deposit in trust, which is referred to as the "defeasance trust," with the trustee money or U.S. government obligations, or both, in an amount deemed sufficient in the opinion of a nationally recognized firm of independent public accountants for the payment of principal and premium, if any, and interest on such debt securities to maturity, and must comply with certain other conditions, including delivery to the trustee of an opinion of counsel to the effect that holders of the debt securities of such series will not recognize gain or loss for U.S. federal income tax purposes as a result of such deposit and defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such deposit and defeasance had not occurred (and, in the case of legal defeasance only, such opinion of counsel must be based on a ruling of the Internal Revenue Service or change in applicable U.S. federal income tax law).

Discharge

When (i) AWCC delivers to the trustee all outstanding debt securities of a series (other than any debt securities replaced because of mutilation, loss, destruction or wrongful taking) for cancellation or (ii) all outstanding debt securities of such series have become due and payable, or are by their terms due and payable within one year whether at maturity or are to be called for redemption within one year under arrangements reasonably satisfactory to the trustee, and in the case of clause (ii) AWCC irrevocably deposits with the trustee funds sufficient to pay at maturity or upon redemption all outstanding debt securities of such series, including interest thereon, and if in either case AWCC pays all other sums related to the applicable series of debt securities payable under the indenture by AWCC, then the indenture shall, subject to certain surviving provisions, cease to be of further effect with respect to such series. The trustee shall acknowledge satisfaction and discharge of the indenture with respect to the applicable series of debt securities on request of AWCC accompanied by an officers' certificate and an opinion of counsel of AWCC.

Governing Law

The indenture and the debt securities will be governed by, and construed in accordance with, the laws of the State of New York, without regard to conflicts of laws principles thereof.

Book-Entry, Delivery and Form

Except as set forth in the applicable prospectus supplement, each series of debt securities will be issued in registered, global form and will be represented by one or more global securities. Upon issuance, each of the global securities will be deposited with the trustee as custodian for The Depository Trust Company, which is referred to as "DTC," in New York, New York, and registered in the name of DTC or its nominee, in each case for credit to an account of a direct or indirect participant in DTC as described below.

Except as set forth below, the global securities may be transferred, in whole and not in part, only to another nominee of DTC or to a successor of DTC or its nominee. Beneficial interests in the global securities may not be exchanged for definitive debt securities in registered certificated form, which is referred to as "certificated debt securities," except in the limited circumstances described below. See "—Exchanges of Global Securities for Certificated Debt Securities." Except in the limited circumstances described below, owners of beneficial interests in the global securities will not be entitled to receive physical delivery of the debt securities in certificated form.

Transfers of beneficial interests in the global securities will be subject to the applicable rules and procedures of DTC and its direct or indirect participants, which may change from time to time.

Exchanges of Global Securities for Certificated Debt Securities

A beneficial interest in a global security may not be exchanged for a debt security in certificated form unless (i) DTC (x) notifies AWCC that it is unwilling or unable to continue as depository for such global security or (y) has ceased to be a clearing agency registered under the Exchange Act, or (ii) there shall have occurred and be continuing an event of default with respect to the debt securities. In all cases, certificated debt securities delivered in exchange for any global security or beneficial interests therein will be registered in the names, and issued in approved denominations, requested by or on behalf of DTC (in accordance with its customary procedures).

Depository Procedures

The following description of the operations and procedures of DTC is provided solely as a matter of convenience. These operations and procedures are solely within the control of the respective settlement systems and are subject to changes by them from time to time. American Water, AWCC and the trustee take no responsibility for these operations and procedures and urge investors to contact the system or their participants directly to discuss these matters.

Upon the issuance of the global securities, DTC will credit, on its internal system, the respective principal amount of the individual beneficial interests represented by such global securities to the accounts with DTC, which are referred to as "participants," or persons who hold interests through participants. Ownership or beneficial interests in the global securities will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC or its nominee (with respect to interests of participants) and the records of participants (with respect to interest of persons other than participants).

As long as DTC, or its nominee, is the registered holder of a global security, DTC or such nominee, as the case may be, will be considered the sole owner and holder of the debt securities represented by such global security for all purposes under the indenture and the debt securities. Except in the limited circumstances described above under "—Exchanges of Global Securities for Certificated Debt Securities," owners of beneficial interests in a global security will not be entitled to have portions of such global security registered in their names, will not receive or be entitled to receive physical delivery of debt securities in definitive form and will not be considered the owners or holders of the global security (or any debt securities presented thereby) under the indenture or the debt securities. In addition, no beneficial owner of an interest in a global security will be able to transfer that interest except in accordance with DTC's applicable procedures, in addition to those under the indenture referred to herein.

Investors may hold their interests in the global securities directly through DTC, if they are participants in such system, or indirectly through organizations which are participants in such system. All interests in a global security may be subject to the procedures and requirements of DTC.

The laws of some jurisdictions may require that certain persons take physical delivery in definitive form of securities that they own. Consequently, the ability to transfer beneficial interests in a global security to such persons may be limited to that extent. Because DTC can act only on behalf of participants, which in turn act on behalf of indirect participants and certain banks, the ability of a person having beneficial interests in a global security to pledge such interests to persons or entities that do not participate in the DTC system, or otherwise take action in respect of such interests, may be affected by the lack of a physical certificate evidencing such interests.

Payments of the principal of and interest on global securities will be made to DTC or its nominee as the registered holder thereof. Neither AWCC, the trustee nor any of their respective agents will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the global securities or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

AWCC expects that DTC or its nominee, upon receipt of any payment of principal or interest in respect of a global security representing any debt securities held by it or its nominee, will immediately credit participants' accounts with payment in amounts proportionate to their respective beneficial interests in the principal amount of such debt securities as shown on the records of DTC or its nominee. AWCC also expects that payments by participants to owners of beneficial interests in such global securities held through such participants will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers registered in "street name." Such payments will be the responsibility of such participants.

Transfers between participants in DTC will be effected in accordance with DTC's procedures.

DTC has advised AWCC that DTC will take any action permitted to be taken by a holder of debt securities (including the presentation of debt securities for exchange as described below) only at the direction of one or more participants to whose account with DTC interests in the global securities are credited and only in respect of such portion of the aggregate principal amount of the debt securities as to which such participant or participants has or have given such direction. However, if there is an event of default under the debt securities, DTC reserves the right to exchange the global securities for legended debt securities in certificated form, and to distribute such debt securities to its participants.

DTC has advised AWCC that DTC is:

- a limited purpose trust company organized under the New York Banking Law,
- a "banking organization" within the meaning of the New York Banking Law,
- a member of the Federal Reserve System,
- a "clearing corporation" within the meaning of the New York Uniform Commercial Code, as amended, and
- a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act.

DTC was created to hold securities for its participants and facilitate the clearance and settlement of securities transactions between participants through electronic book-entry changes in accounts of its participants, thereby eliminating the need for physical transfer and delivery of certificates. Participants include securities brokers and dealers, banks, trust companies and clearing corporations and may include certain other organizations. DTC is partially owned by some of these participants or their representatives. Indirect access to the DTC system is available to other entities such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a participant, either directly or indirectly, which we refer to as indirect participants.

Although DTC has agreed to the foregoing procedures in order to facilitate transfers of beneficial ownership interests in the global securities among participants of DTC, it is under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. None of AWCC, the trustee nor any of their respective agents will have any responsibility for the performance by DTC or its participants or indirect participants of its respective obligations under the rules and procedures governing its operations, including maintaining, supervising or reviewing the records relating to, or payments made on account of, beneficial ownership interests in global securities.

Settlement and Payment

AWCC will make payments in respect of the debt securities represented by the global securities (including principal, premium, if any, and interest) by wire transfer of immediately available funds to the accounts specified by the global security holder. AWCC will make all payments of principal, interest and premium, if any, with respect to certificated debt securities by wire transfer of immediately available funds to the accounts specified by the holders of the certificated debt securities or, if no such account is specified, by mailing a check to each such holder's registered address.

Table of Contents

DESCRIPTION OF DEPOSITARY SHARES

The following summary of certain provisions of the depositary shares does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the depositary agreement that will be filed with the SEC in connection with the offering of such depositary shares.

American Water may offer fractional shares of preferred stock, rather than full shares of preferred stock. If American Water decides to offer fractional shares of preferred stock, American Water will issue receipts for depositary shares. Each depositary share will represent a fraction of a share of a particular series of preferred stock, and the prospectus supplement will indicate that fraction. The shares of preferred stock represented by depositary shares will be deposited under a depositary agreement between American Water and a depositary that is a bank or trust company that meets certain requirements and is selected by American Water. The depositary will be specified in the applicable prospectus supplement. Each owner of a depositary share will be entitled to all of the rights and preferences of the preferred stock represented by the depositary share. The depositary shares will be evidenced by depositary receipts issued pursuant to the depositary agreement. Depositary receipts will be distributed to those persons purchasing the fractional shares of preferred stock in accordance with the terms of the offering.

American Water has summarized selected provisions of the depositary agreement and the depositary receipts, but the summary is qualified in its entirety by reference to the provisions of the depositary agreement and the depositary receipts. The particular terms of any series of depositary shares will be described in the applicable prospectus supplement. If so indicated in the prospectus supplement, the terms of any such series may differ from the terms set forth below.

Dividends and Other Distributions

The depositary will distribute all cash dividends or other cash distributions received by it in respect of the preferred stock to the record holders of depositary shares relating to such preferred shares in proportion to the numbers of depositary shares held on the relevant record date. The amount made available for distribution will be reduced by any amounts withheld by the depositary or American Water on account of taxes.

In the event of a distribution other than in cash, the depositary will distribute securities or property received by it to the record holders of depositary shares in proportion to the numbers of depositary shares held on the relevant record date, unless the depositary determines that it is not feasible to make such distribution. In that case, the depositary may make the distribution by such method as it deems equitable and practicable. One such possible method is for the depositary to sell the securities or property and then distribute the net proceeds from the sale as provided in the case of a cash distribution.

Withdrawal of Shares

Upon surrender of depositary receipts representing any number of whole shares at the depositary's office, unless the related depositary shares previously have been called for redemption, the holder of the depositary shares evidenced by the depositary receipts will be entitled to delivery of the number of whole shares of the related series of preferred stock and all money and other property, if any, underlying such depositary shares. However, once such an exchange is made, the preferred stock cannot thereafter be redeposited in exchange for depositary shares. Holders of depositary shares will be entitled to receive whole shares of the related series of preferred stock on the basis set forth in the applicable prospectus supplement. If the depositary receipts delivered by the holder evidence a number of depositary shares representing more than the number of whole shares of preferred stock of the related series to be withdrawn, the depositary will deliver to the holder at the same time a new depositary receipt evidencing the excess number of depositary shares.

Redemption of Depositary Shares

Whenever American Water redeems shares of the preferred stock, the depositary will redeem a number of depositary shares representing the same number of shares of preferred stock so redeemed. If fewer than all of the depositary shares are to be redeemed, the depositary shares to be redeemed will be selected by lot, pro-rata or by any other equitable method as the depositary may determine.

Voting of Underlying Shares

Upon receipt of notice of any meeting at which the holders of the preferred stock of any series are entitled to vote, the depositary will mail the information contained in the notice of the meeting to the record holders of the depositary shares relating to that series of preferred shares. Each record holder of the depositary shares on the record date will be entitled to instruct the depositary as to the exercise of the voting rights represented by the number of shares of preferred stock underlying the holder's depositary shares. The depositary will endeavor, to the extent it is practical to do so, to vote the number of whole shares of preferred stock underlying such depositary shares in accordance with such instructions. American Water will agree to take all action that the depositary may deem reasonably necessary in order to enable the depositary to do so. To the extent the depositary does not receive specific instructions from the holders of depositary shares relating to such preferred shares, it will abstain from voting such shares of preferred stock.

Amendment and Termination of Depositary Agreement

The form of depositary receipt evidencing the depositary shares and any provision of the applicable depositary agreement may at any time be amended by agreement between American Water and the depositary. American Water may, with the consent of the depositary, amend the depositary agreement from time to time in any manner that American Water desires. However, if the amendment would materially and adversely alter the rights of the existing holders of depositary shares, the amendment would need to be approved by the holders of at least a majority of the depositary shares then outstanding.

The depositary agreement may be terminated by American Water or the depositary if:

- all outstanding depositary shares have been redeemed; or
- there has been a final distribution in respect of the shares of preferred stock of the applicable series in connection with American Water's liquidation, dissolution or winding up and such distribution has been made to the holders of depositary receipts.

Resignation and Removal of Depositary

The depositary may resign at any time by delivering to us notice of its election to do so. American Water may remove a depositary at any time. Any resignation or removal will take effect upon the appointment of a successor depositary and its acceptance of appointment.

Charges of Depositary

American Water will pay all transfer and other taxes and governmental charges arising solely from the existence of any depositary arrangements. American Water will pay all charges of each depositary in connection with the initial deposit of the preferred shares of any series, the initial issuance of the depositary shares, any redemption of such preferred shares and any withdrawals of such preferred shares by holders of depositary shares. Holders of depositary shares will be required to pay any other transfer taxes.

Notices

Each depositary will forward to the holders of the applicable depositary shares all notices, reports and communications from American Water which are delivered to such depositary and which are required to be furnished to the holders of the preferred shares.

Table of Contents

Limitation of Liability

The depositary agreement will contain provisions that limit American Water's liability and the liability of the depositary to the holders of depositary shares. Both the depositary and American Water will also be entitled to an indemnity from the holders of the depositary shares prior to bringing, or defending against, any legal proceeding. American Water or any depositary may rely upon written advice of counsel or accountants, or information provided by persons presenting preferred shares for deposit, holders of depositary shares or other persons believed by American Water to be competent and on documents believed by American Water or them to be genuine.

Table of Contents

DESCRIPTION OF STOCK PURCHASE CONTRACTS AND STOCK PURCHASE UNITS

The following summary of certain provisions of the stock purchase contracts and stock purchase units does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the stock purchase contract or stock purchase unit, as applicable, that will be filed with the SEC in connection with the offering of such securities.

American Water may issue stock purchase contracts, including contracts obligating holders to purchase from American Water, and obligating American Water to sell to the holders, a specified number of shares of common stock or other securities at a future date or dates, which are referred to as "stock purchase contracts." The price per share of the securities and the number of shares of the securities may be fixed at the time the stock purchase contracts are issued or may be determined by reference to a specific formula set forth in the stock purchase contracts. The stock purchase contracts may be issued separately or as part of units consisting of a stock purchase contract and debt securities, preferred securities, warrants or debt obligations of third parties, including U.S. treasury securities, securing the holders' obligations to purchase the securities under the stock purchase contracts, which are referred to as "stock purchase units." The stock purchase contracts may require holders to secure their obligations under the stock purchase contracts in a specified manner. The stock purchase contracts also may require American Water to make periodic payments to the holders of the stock purchase units or vice versa, and those payments may be unsecured or refunded on some basis.

The applicable prospectus supplement will describe the terms of the stock purchase contracts or stock purchase units. The description in the prospectus supplement will not necessarily be complete, and reference will be made to the stock purchase contracts, and, if applicable, collateral or depositary arrangements, relating to the stock purchase contracts or stock purchase units, which will be filed with the SEC each time American Water issues stock purchase contracts or stock purchase units. Material U.S. federal income tax considerations applicable to the stock purchase units and the stock purchase contracts will also be discussed in the applicable prospectus supplement.

Table of Contents

DESCRIPTION OF SUBSCRIPTION RIGHTS

The following summary of certain provisions of the subscription rights does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the certificate evidencing the subscription rights that will be filed with the SEC in connection with the offering of such subscription rights.

General

American Water may issue subscription rights to purchase common stock, preferred stock, depositary shares or warrants to purchase preferred stock, common stock or depositary shares. Subscription rights may be issued independently or together with any other offered security and may or may not be transferable by the person purchasing or receiving the subscription rights. In connection with any subscription rights offering to American Water's shareholders, American Water may enter into a standby underwriting arrangement with one or more underwriters pursuant to which such underwriters will purchase any offered securities remaining unsubscribed for after such subscription rights offering. In connection with a subscription rights offering to American Water's shareholders, American Water will distribute certificates evidencing the subscription rights and a prospectus supplement to American Water's shareholders on or about the record date that American Water sets for receiving subscription rights in such subscription rights offering.

The applicable prospectus supplement will describe the following terms of subscription rights in respect of which this prospectus is being delivered:

- the title of such subscription rights;
- the securities for which such subscription rights are exercisable;
- the exercise price for such subscription rights;
- any provisions for changes to or adjustments in the exercise price for such subscription rights;
- the number of such subscription rights each shareholder will be entitled to receive, on a per share basis;
- the extent to which such subscription rights are transferable;
- if applicable, a discussion of the material U.S. federal income tax considerations applicable to the issuance or exercise of such subscription rights;
- the date on which the right to exercise such subscription rights shall commence, and the date on which such rights shall expire (subject to any extension);
- the extent to which such subscription rights include an over-subscription privilege with respect to unsubscribed securities;
- if applicable, the material terms of any standby underwriting or other purchase arrangement that American Water may enter into in connection with the subscription rights offering; and
- any other terms of such subscription rights, including terms, procedures and limitations relating to the exchange and exercise of such subscription rights.

Exercise of Subscription Rights

Each subscription right will entitle the holder of the subscription right to purchase for cash such amount of shares of preferred stock, depositary shares, common stock, warrants or any combination thereof, at such exercise price as shall in each case be set forth in, or be determinable as set forth in, the prospectus supplement relating to the subscription rights offered thereby. Subscription rights may be exercised at any time up to the close of business on the expiration date for such subscription rights set forth in the prospectus supplement. After the close of business on the expiration date, all unexercised subscription rights will become void.

Table of Contents

Subscription rights may be exercised as set forth in the prospectus supplement relating to the subscription rights offered thereby. Upon receipt of payment and the subscription rights certificate properly completed and duly executed at the corporate trust office of the subscription rights agent or any other office indicated in the prospectus supplement, American Water will forward, as soon as practicable, the shares of preferred stock or common stock, depositary shares or warrants purchasable upon such exercise. American Water may determine to offer any unsubscribed offered securities directly to persons other than shareholders, to or through agents, underwriters or dealers or through a combination of such methods, including pursuant to standby underwriting arrangements, as set forth in the applicable prospectus supplement.

Table of Contents

DESCRIPTION OF WARRANTS

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

General

American Water may issue warrants for the purchase of debt securities, preferred stock, depositary shares or common stock. Warrants may be issued independently or together with debt securities, preferred stock, depositary shares or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between American Water and a bank or trust company, as warrant agent. The warrant agent will act solely as American Water's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following:

- the title of such debt warrants;
- the offering price for such debt warrants, if any;
- the aggregate number of such debt warrants;
- the designation and terms of the debt securities purchasable upon exercise of such debt warrants;
- if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each such debt security;
- if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable;
- the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property);
- the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire;
- if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time;
- whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form;
- information with respect to book-entry procedures, if any;
- the currency or currency units in which the offering price, if any, and the exercise price are payable;
- if applicable, a discussion of material U.S. federal income tax considerations;
- the antidilution provisions of such debt warrants, if any;
- the redemption or call provisions, if any, applicable to such debt warrants;
- any provisions for changes to or adjustments in the exercise price for the debt warrants; and

- any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Stock Warrants

The prospectus supplement relating to any particular issue of warrants for preferred stock, depositary shares or common stock will describe the terms of such warrants, including the following:

- the title of such warrants;
- the offering price for such warrants, if any;
- the aggregate number of such warrants;
- the designation and terms of the preferred stock, depositary shares or common stock purchasable upon exercise of such warrants;
- if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security;
- if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable;
- the number of shares of preferred or common stock, or the number of depositary shares, purchasable upon exercise of a warrant, and the price at which such shares may be purchased upon exercise;
- the date on which the right to exercise such warrants shall commence and the date on which such right shall expire;
- if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time;
- the currency or currency units in which the offering price, if any, and the exercise price are payable;
- if applicable, a discussion of material U.S. federal income tax considerations;
- the antidilution provisions of such warrants, if any;
- the redemption or call provisions, if any, applicable to such warrants;
- any provisions for changes to or adjustments in the exercise price for the stock warrants; and
- any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

PLAN OF DISTRIBUTION

We and any selling security holder may offer and sell the securities covered by this prospectus from time to time, in one or more transactions, at market prices prevailing at the time of sale, at prices related to market prices, at a fixed price or prices subject to change, at varying prices determined at the time of sale or at negotiated prices, by a variety of methods, including the following:

- through agents;
- to or through underwriters;
- through brokers or dealers;
- directly by us or any selling security holders to purchasers, including through a specific bidding, auction or other process; or
- through a combination of any of these foregoing methods of sale.

Registration of the securities covered by this prospectus does not mean that those securities necessarily will be offered or sold.

In effecting sales, brokers or dealers engaged by us may arrange for other brokers or dealers to participate. Broker-dealer transactions may include:

- purchases of the securities by a broker-dealer as principal and resales of the securities by the broker-dealer for its account pursuant to this prospectus;
- ordinary brokerage transactions; or
- transactions in which the broker-dealer solicits purchasers.

In addition, we and any selling security holder may sell any securities covered by this prospectus in private transactions or under Rule 144 of the Securities Act rather than pursuant to this prospectus.

In connection with the sale of securities covered by this prospectus, broker-dealers may receive commissions or other compensation from us in the form of commissions, discounts or concessions. Broker-dealers may also receive compensation from purchasers of the securities for whom they act as agents or to whom they sell as principals or both. Compensation as to a particular broker-dealer may be in excess of customary commissions or in amounts to be negotiated. In connection with any underwritten offering, underwriters may receive compensation in the form of discounts, concessions or commissions from us or from purchasers of the securities for whom they act as agents. Underwriters may sell the securities to or through dealers, and such dealers may receive compensation in the form of discounts, concessions or commissions from the underwriters and/or commissions from the purchasers for whom they may act as agents. Any underwriters, broker-dealers, agents or other persons acting on our behalf that participate in the distribution of the securities may be deemed to be “underwriters” within the meaning of the Securities Act, and any profit on the sale of the securities by them and any discounts, commissions or concessions received by any of those underwriters, broker-dealers, agents or other persons may be deemed to be underwriting discounts and commissions under the Securities Act.

In connection with the distribution of the securities covered by this prospectus or otherwise, we or any selling security holder may enter into hedging transactions with broker-dealers or other financial institutions. In connection with such transactions, broker-dealers or other financial institutions may engage in short sales of our securities in the course of hedging the positions they assume with us or any selling security holder. We or any selling security holder may also sell securities short and deliver the securities offered by this prospectus to close out short positions. We or any selling security holder may also enter into option or other transactions with broker-dealers or other financial institutions, which require the delivery to such broker-dealer or other financial institution of securities offered by this prospectus, which securities such broker-dealer or other financial institution may resell pursuant to this prospectus, as supplemented or amended to reflect such transaction. We or any selling security holder may also from time to time pledge our securities pursuant to the margin provisions of customer agreements with brokers. Upon a default, the broker may offer and sell such pledged securities from time to time pursuant to this prospectus, as supplemented or amended to reflect such transaction.

At any time a particular offer of the securities covered by this prospectus is made, a prospectus supplement, or, if required, a revised prospectus, will be distributed which will set forth the aggregate amount of securities covered by this prospectus being offered and the terms of the offering, including the name or names of any underwriters, dealers, brokers or agents, any discounts, commissions, concessions and other items constituting compensation from us and any discounts, commissions or concessions allowed or reallowed or paid to dealers. Such prospectus supplement, and, if necessary, a post-effective amendment to the registration statement of which this prospectus is a part, will be filed with the SEC to reflect the disclosure of additional information with respect to the distribution of the securities covered by this prospectus. In order to comply with the securities laws of certain states, if applicable, the securities sold under this prospectus may only be sold through registered or licensed broker-dealers. In addition, in some states the securities may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from registration or qualification requirements is available and is complied with.

We may solicit offers to purchase directly. Offers to purchase securities also may be solicited by agents designated by us from time to time. Any such agent involved in the offer or sale of the securities in respect of which this prospectus is delivered will be named, and any commissions payable by us to such agent will be set forth, in the applicable prospectus supplement. Unless otherwise indicated in such prospectus supplement, any such agent will be acting on a reasonable best efforts basis for the period of its appointment. Any such agent may be deemed to be an underwriter, as that term is defined in the Securities Act, of the securities so offered and sold.

American Water may offer its equity securities into an existing trading market on the terms described in the applicable prospectus supplement. Underwriters, dealers and agents who may participate in any at-the-market offerings will be described in the prospectus supplement relating thereto.

Securities may also be offered and sold, if so indicated in the applicable prospectus supplement, in connection with a remarketing upon their purchase, in accordance with a redemption or repayment pursuant to their terms, or otherwise, by one or more firms acting as principals for their own accounts or as agents, which are referred to as "remarketing firms." Any remarketing firm will be identified and the terms of its agreement, if any, with us and its compensation will be described in the applicable prospectus supplement. Remarketing firms may be deemed to be underwriters, as that term is defined in the Securities Act, in connection with the securities remarketed thereby.

If so indicated in the applicable prospectus supplement, we may authorize agents, dealers or underwriters to solicit offers by certain institutions to purchase securities from us at the public offering price set forth in the applicable prospectus supplement pursuant to delayed delivery contracts providing for payment and delivery on the date or dates stated in the applicable prospectus supplement. Such delayed delivery contracts will be subject to only those conditions set forth in the applicable prospectus supplement. A commission indicated in the applicable prospectus supplement will be paid to underwriters and agents soliciting purchases of securities pursuant to delayed delivery contracts accepted by us.

In connection with an underwritten offering, we and any selling security holder would execute an underwriting agreement with an underwriter or underwriters. Unless otherwise indicated in the revised prospectus or applicable prospectus supplement, such underwriting agreement would provide that the obligations of the underwriter or underwriters are subject to certain conditions precedent, and that the underwriter or underwriters with respect to a sale of the covered securities will be obligated to purchase all of the covered securities, if any such securities are purchased. We or any selling security holder may grant to the underwriter or underwriters an option to purchase additional securities at the public offering price, less any underwriting discount, as may be set forth in the revised prospectus or applicable prospectus supplement. If we or any selling security holder grants any such option, the terms of that option will be set forth in the revised prospectus or applicable prospectus supplement.

Underwriters, agents, brokers or dealers may be entitled, pursuant to relevant agreements entered into with us, to indemnification by us or any selling security holder against certain civil liabilities, including liabilities under the Securities Act that may arise from any untrue statement or alleged untrue statement of a material fact, or any omission or alleged omission to state a material fact in this prospectus, any supplement or amendment hereto, or in the registration statement of which this prospectus forms a part, or to contribution with respect to payments which the underwriters, agents, brokers or dealers may be required to make.

LEGAL MATTERS

The validity of the securities offered in this prospectus and any related prospectus supplement and certain legal matters will be passed upon for us by Morgan, Lewis & Bockius LLP, New York, New York, and/or counsel named in the applicable prospectus supplement. If the securities are being distributed in an underwritten offering, certain legal matters will be passed upon for the underwriters by counsel identified in the related prospectus supplement.

EXPERTS

The consolidated financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2023, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

American Water files annual, quarterly and current reports, proxy statements and other information with the SEC. These SEC filings are available to the public via the Internet at the SEC's website at *http://www.sec.gov* and our website at *https://amwater.com*. American Water's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and any amendments to such reports, that are filed with or furnished to the SEC, are also made available on American Water's Investor Relations website, *https://ir.amwater.com,* as soon as reasonably practicable after such reports are filed with or furnished to the SEC. The information contained on or accessible from our website does not constitute a part of this prospectus and is not incorporated by reference herein.

American Water is "incorporating by reference" into this prospectus specific documents that it files with the SEC, which means that important information can be disclosed to you by referring you to those documents that are considered part of this prospectus. Information that American Water files subsequently with the SEC will automatically update and supersede this information. American Water incorporates by reference the documents listed below, and any future documents that it files with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Exchange Act, until the termination of the offerings of all of the securities covered by this prospectus. This prospectus is part of a registration statement filed with the SEC.

American Water is incorporating by reference into this prospectus the following documents filed with the SEC (excluding any portions of such documents that have been "furnished" but not "filed" for purposes of the Exchange Act):

Filings	Period Covered or Date Filed
Annual Report on Form 10-K	Year ended December 31, 2023, as filed with the SEC on February 14, 2024
Current Reports on Form 8-K (other than the portions not deemed to be filed)	Filed on January 16, 2024, January 19, 2024, January 25, 2024, February 5, 2024, and February 15, 2024
Amendment No. 1 to Registration Statement on Form 8-A/A for a description of American Water's common stock, par value $0.01 per share	Filed on May 1, 2018, including any amendments or reports filed to update such description (including Exhibit 4.24 to American Water's Annual Report on Form 10-K for the fiscal year ended December 31, 2023, filed with the SEC on February 14, 2024)

American Water will provide to each person, including any beneficial owner, to whom this prospectus is delivered, upon written or oral request and without charge, a copy of the documents referred to above that have been incorporated in this prospectus by reference. You can request copies of such documents if you call or write to American Water at the following address or telephone number: American Water Works Company, Inc., 1 Water Street, Camden, New Jersey 08102-1658, Attention: Secretary, (856) 955-4001, or such other address and telephone number as may be provided in a prospectus supplement.

Table of Contents

This prospectus, any accompanying prospectus supplement or information incorporated by reference herein or therein, contains summaries of certain agreements that we have filed as exhibits to various SEC filings, as well as certain agreements that we will enter into in connection with the offering of securities covered by any particular accompanying prospectus supplement. The descriptions of these agreements contained in this prospectus, any accompanying prospectus supplement or information incorporated by reference herein or therein do not purport to be complete and are subject to, and qualified in their entirety by reference to, the definitive agreements. Copies of the definitive agreements will be made available without charge to you by making a written or oral request to us.

We have not authorized anyone to provide you with information other than that contained or incorporated by reference in this prospectus or any accompanying prospectus supplement or in any related free writing prospectus filed by us with the SEC. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. You should not assume that the information appearing in this prospectus is accurate as of any date other than the date on the front cover of this prospectus.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in any accompanying prospectus supplement, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus.

AMERICAN WATER

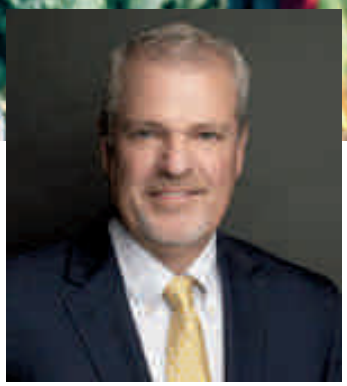
WE KEEP LIFE FLOWING®

2024 Annual Report



TO OUR SHAREHOLDERS,

It is my pleasure, for the seventh year in a row as Board Chair of the American Water Board of Directors, to report that American Water again delivered on its strategic plan with a disciplined approach to operations, capital deployment and regulatory execution. American Water's 2024 financial performance demonstrates that the company is growing strategically and is well-positioned for the future.

For the year ended December 31, 2024, earnings per share (EPS) growth and dividend growth exceeded 8 percent, which aligns with the long-term compounded annual growth target of 7-9 percent for both.

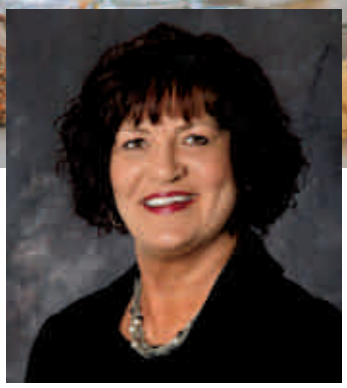
With these results and expectations for consistent future earnings growth, the Board again increased the dividends paid in 2024, the 16th consecutive year of increases. Annual dividends paid have grown at a compounded annual rate of 8.9 percent over the last five years.

These positive results are an outcome of the commitment and adherence to company values and sound execution of the business strategy by the company's dedicated employees. The American Water Board of Directors would like to thank you, our shareholders, for your continued trust and support. Please plan to join the virtual Annual Meeting of Shareholders at 10:00 a.m., Eastern Time, on Wednesday, May 14, 2025.

Sincerely,

KARL F. KURZ
Board Chair

COMPOUNDED ANNUAL GROWTH RATE OF ANNUAL DIVIDENDS PAID OVER THE LAST FIVE YEARS



DEAR FELLOW SHAREHOLDERS,

American Water is pleased to announce another year of achieving planned results, with notable growth for both earnings and dividends, all while maintaining a very strong balance sheet. This success is due to the unwavering commitment and hard work of our dedicated employees, whose efforts have been instrumental in driving our strategic goals forward.

This report outlines how we adhere to our strategy and values and effectively implement our plans. Our key stakeholders are integral to how and why we execute on our mission. The work we do every day is guided by goals we have set for ourselves to align with our key stakeholder groups — our customers, our colleagues, our shareholders and the regulators and policymakers who enable us to operate.

The company successfully executed its comprehensive plan, achieving top-tier industry growth for both earnings and dividends in 2024. We invested $3.3 billion in regulated operations, which prominently focused on infrastructure renewal. Additionally, through acquisitions and organic growth, we expanded our customer base by nearly 90,000 and achieved the company's acquisition customer growth target of 2 percent.

We continue to be the leader in all aspects of the water and wastewater utility industry inspired by our corporate mission—delivering safe, clean, reliable and affordable water and wastewater services to 14 million people, and growing, in this country.

We have achieved a five-year total shareholder return (TSR) of 11 percent and a ten-year TSR of 183 percent. Though certain macro-economic issues have impacted our near term relative TSR performance, we are certain that our industry-leading results in 2024, together with our earnings growth and dividend growth expectations, continue to offer exceptional value for our shareholders.

Building on 2024's success, we expect to thrive in 2025 and beyond as a solutions provider for our customers and the communities we serve. Our proven record as a trusted regulated water utility will continue. We offer low-risk, predictable growth. We plan to invest $40-$42 billion in capital over the next decade, balanced by O&M cost control, regulatory and legislative support, as well as application of new technologies. While the majority of our capital plan is dedicated to basic replacement of aging pipes, we are also focused on fortifying our water and wastewater systems through resilience spending and investments in water quality projects to meet increasing standards of compliance.

The execution of our strategy contributes to our performance and aligns with our core values. Already this year, the company was recognized by Forbes as one of America's Most Trusted Companies; acknowledged by Newsweek as one of America's Most Responsible Companies; named one of America's Most JUST companies by JUST Capital; and recognized by CNBC for our commitment to employees, customers, communities and shareholders.

And as we continue to look to the future, as we announced in February, I am retiring on May 14, 2025. John Griffith, currently serving as our president, will lead American Water as its new president and CEO. Under John's stewardship, American Water is poised to maintain its exemplary record of industry leadership and high performance. This seamless transition underscores the company's dedication to executive succession planning, helping ensure that American Water benefits from a capable and experienced leadership team for years to come.

As I step into retirement, I want to thank our board of directors, our talented leadership team and our dedicated employees for their unwavering commitment to excellence at American Water. You are simply the best. And I want to thank you, our investors, for your strong support of our company. It has been an honor to lead such a dedicated, high-performing team for the last six years and I look forward to seeing the company's future achievements under John's leadership.

I look forward to the bright future of this great company and hope you do too.

Sincerely,

M. SUSAN HARDWICK
Chief Executive Officer

Stock Market
Common stock of American Water Works Company, Inc. is traded on the New York Stock Exchange (NYSE) under the symbol AWK.

Annual Meeting
The 2025 annual meeting of shareholders is scheduled for 10:00 a.m. ET on Wednesday, May 14, 2025, to be held virtually (and not at a physical location). All holders of our outstanding common stock at the close of business on March 17, 2025, are entitled to notice of, and to vote at, the meeting. Notice of the meeting and proxy materials will be distributed to shareholders and accessible to the public on our Investor Relations page at https://ir.amwater.com. Management encourages all investors to have their votes counted at the annual meeting.

Executive Certifications
American Water has included as exhibits to its 2024 Annual Report on Form 10-K filed with the Securities and Exchange Commission certifications of the chief executive officer and chief financial officer of the company regarding the company's public disclosures contained therein. The company also provides annually to the NYSE a certificate of the CEO certifying that, among other things, it is not aware of any violation by the company of NYSE corporate listing standards.

Dividends
Dividends paid on the company's common stock in 2024 were:

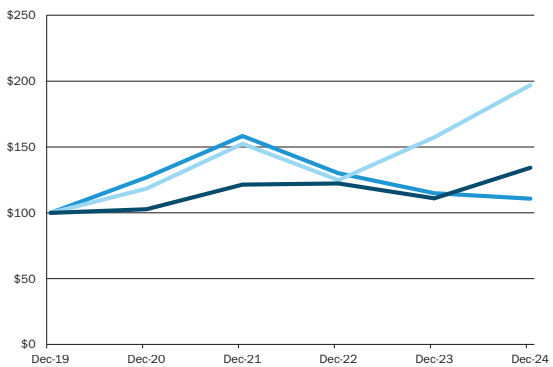
March 1, 2024	$0.7075
June 3, 2024	$0.7650
September 4, 2024	$0.7650
December 3, 2024	$0.7650

Stock Performance Graph
The graph below compares the cumulative total return on American Water's common stock with the cumulative total return of the Standard & Poor's 500 Index and the PHLX Utility Sector Index from December 31, 2019, through December 31, 2024. The comparison assumes $100 was invested on December 31, 2019, and that dividends were reinvested.

The Company has successfully executed on its financial and operating plans the last several years, including meeting or exceeding its EPS guidance and its dividend growth target. The Company believes that its relative TSR performance in 2024 and for the five years ended in 2024 was diminished due to the combination of rising interest rates and the shifting of investments from water utilities to other investment options that have data center-driven growth expectations, including electric and gas utilities.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN*

Among American Water Works Company, Inc., the S&P 500 Index, and the PHLX Utility Sector Index



*$100 invested in each security on 12/31/2019, assumes reinvestment of dividends. Fiscal year ending December 31.

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol	Name of each exchange on which registered
Common stock, par value $0.01 per share	**AWK**	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒	Accelerated filer ☐
Non-accelerated filer ☐	Smaller reporting company ☐
	Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter. Common Stock, $0.01 par value—$22,045,400,000 as of June 28, 2024 (solely for purposes of calculating this aggregate market value, American Water has defined its affiliates to include (i) those persons who were, as of June 28, 2024, its executive officers, directors or known beneficial owners of more than 10% of its common stock, and (ii) such other persons who were deemed, as of June 28, 2024, to be controlled by, or under common control with, American Water or any such persons in clause (i) above).

Indicate the number of shares outstanding of each of the registrant's classes of common stock as of the latest practicable date: Common Stock, $0.01 par value per share—194,947,313 shares as of February 10, 2025.

FORWARD-LOOKING STATEMENTS

Statements included in Item 1—Business, Item 1A—Risk Factors, and Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations, and in other sections of this Annual Report on Form 10-K, or incorporated by reference therein, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the Private Securities Litigation Reform Act of 1995. In some cases, these forward-looking statements can be identified by words with prospective meanings such as "intend," "plan," "estimate," "believe," "anticipate," "expect," "predict," "project," "propose," "assume," "forecast," "likely," "uncertain," "outlook," "future," "pending," "goal," "objective," "potential," "continue," "seek to," "may," "can," "should," "will" and "could" or the negative of such terms or other variations or similar expressions. Forward-looking statements may relate to, among other things: the Company's future financial performance, liquidity and cash flows; the timing and amount of rate and revenue adjustments, including through general rate case filings, filings for infrastructure surcharges and other governmental agency authorizations and proceedings, and filings to address regulatory lag; the Company's ability to execute its current and long-term business, operational, capital expenditures and growth plans and strategies; the timing and outcome of pending or future acquisition activity, and the ability to achieve organic customer growth; the ability of the Company's California subsidiary to obtain adequate alternative water supplies in lieu of diversions from the Carmel River; the amount, allocation and timing of projected capital expenditures and related funding requirements; the Company's ability to repay or refinance debt; the future impacts of increased or increasing financing costs, inflation and interest rates; the Company's ability to finance current and projected operations, capital expenditure needs and growth initiatives by accessing the debt and equity capital markets and sources of short-term liquidity; the outcome and impact on the Company of governmental and regulatory investigations, class action lawsuits, and other litigation and legal proceedings, and related potential fines, penalties and other sanctions; the ability to meet or exceed the Company's stated environmental and sustainability goals, including its greenhouse gas ("GHG") emission reduction, water delivery efficiency and water system resiliency goals; the ability to complete, and the timing and efficacy of, the design, development, implementation and improvement of technology and other strategic initiatives; the Company's ability to comply with new and changing environmental regulations; the ability to capitalize on existing or future utility privatization opportunities; trends in the water and wastewater industries in which the Company operates, including macro trends with respect to the Company's efforts and projects related to customer, technology and work efficiency and execution; regulatory, legislative, tax policy or legal developments; and impacts that future significant tax legislation may have on the Company and on its business, results of operations, cash flows and liquidity.

Forward-looking statements are predictions based on the Company's current expectations and assumptions regarding future events. They are not guarantees or assurances of any outcomes, financial results, levels of activity, performance or achievements, and readers are cautioned not to place undue reliance upon them. These forward-looking statements are subject to a number of estimates, assumptions, known and unknown risks, uncertainties and other factors. The Company's actual results may vary materially from those discussed in the forward-looking statements included herein as a result of the factors discussed under Item 1A—Risk Factors, and the following important factors:

- the decisions of governmental and regulatory bodies, including decisions to raise or lower customer rates;
- the timeliness and outcome of regulatory commissions' and other authorities' actions concerning rates, capital structure, authorized return on equity, capital investment, system acquisitions and dispositions, taxes, permitting, water supply and management, and other decisions;
- changes in customer demand for, and patterns of use of, water and energy, such as may result from conservation efforts, or otherwise;
- limitations on the availability of the Company's water supplies or sources of water, or restrictions on its use thereof, resulting from allocation rights, governmental or regulatory requirements and restrictions, drought, overuse or other factors;

- a loss of one or more large industrial or commercial customers due to adverse economic conditions, or other factors;
- present and future proposed changes in laws, governmental regulations and policies, including with respect to the environment (such as, for example, potential improvements to existing Federal regulations with respect to lead and copper service lines and galvanized steel pipe), health and safety, data and consumer privacy, security and protection, water quality and water quality accountability, contaminants of emerging concern (including without limitation per- and polyfluoroalkyl substances (collectively, "PFAS")), public utility and tax regulations and policies, and impacts resulting from U.S., state and local elections and changes in federal, state and local executive administrations;
- the Company's ability to collect, distribute, use, secure and store consumer data in compliance with current or future governmental laws, regulations and policies with respect to data and consumer privacy, security and protection;
- weather conditions and events, climate variability patterns, and natural disasters, including drought or abnormally high rainfall, prolonged and abnormal ice or freezing conditions, strong winds, coastal and intercoastal flooding, pandemics and epidemics, earthquakes, landslides, hurricanes, tornadoes, wildfires, electrical storms, sinkholes and solar flares;
- the outcome of litigation and similar governmental and regulatory proceedings, investigations or actions;
- the risks associated with the Company's aging infrastructure, and its ability to appropriately improve the resiliency of or maintain, update, redesign and/or replace, current or future infrastructure and systems, including its technology and other assets, and manage the expansion of its businesses;
- exposure or infiltration of the Company's technology and critical infrastructure systems, including the disclosure of sensitive, personal or confidential information contained therein, through physical or cyber attacks or other means, and impacts from required or voluntary public and other disclosures, as well as civil class action and other litigation or legal, regulatory or administrative proceedings, related thereto;
- the Company's ability to obtain permits and other approvals for projects and construction, update, redesign and/or replacement of various water and wastewater facilities;
- changes in the Company's capital requirements;
- the Company's ability to control operating expenses and to achieve operating efficiencies, and the Company's ability to create, maintain and promote initiatives and programs that support the affordability of the Company's regulated utility services;
- the intentional or unintentional actions of a third party, including contamination of the Company's water supplies or the water provided to its customers;
- the Company's ability to obtain and have delivered adequate and cost-effective supplies of pipe, equipment (including personal protective equipment), chemicals, power and other fuel, water and other raw materials, and to address or mitigate supply chain constraints that may result in delays or shortages in, as well as increased costs of, supplies, products and materials that are critical to or used in the Company's business operations;
- the Company's ability to successfully meet its operational growth projections, either individually or in the aggregate, and capitalize on growth opportunities, including, among other things, with respect to:
    - acquiring, closing and successfully integrating regulated operations;
    - the Company's Military Services Group ("MSG") entering into new military installation contracts, price redeterminations, and other agreements and contracts, with the U.S. government; and
    - realizing anticipated benefits and synergies from new acquisitions;

- risks and uncertainties following the completion of the sale of the Company's Homeowner Services Group ("HOS"), including:
    - the Company's ability to receive amounts due, payable and owing to the Company under the amended secured seller note when due; and
    - the ability of the Company to redeploy successfully and timely the net proceeds of this transaction into the Company's Regulated Businesses;
- risks and uncertainties associated with contracting with the U.S. government, including ongoing compliance with applicable government procurement, security and cybersecurity regulations;
- cost overruns relating to improvements in or the expansion of the Company's operations;
- the Company's ability to successfully develop and implement new technologies and to protect related intellectual property;
- the Company's ability to maintain safe work sites;
- the Company's exposure to liabilities related to environmental laws and regulations, including those enacted or adopted and under consideration, and the substances related thereto, including without limitation copper, lead and galvanized steel, PFAS and other contaminants of emerging concern, and similar matters resulting from, among other things, water and wastewater service provided to customers;
- the ability of energy providers, state governments and other third parties to achieve or fulfill their GHG emission reduction goals, including without limitation through stated renewable portfolio standards and carbon transition plans;
- changes in general economic, political, business and financial market conditions;
- access to sufficient debt and/or equity capital on satisfactory terms and as needed to support operations and capital expenditures;
- fluctuations in inflation or interest rates, and the Company's ability to address or mitigate the impacts thereof;
- the ability to comply with affirmative or negative covenants in the current or future indebtedness of the Company or any of its subsidiaries, or the issuance of new or modified credit ratings or outlooks by credit rating agencies with respect to the Company or any of its subsidiaries (or any current or future indebtedness thereof), which could increase financing costs or funding requirements and affect the Company's or its subsidiaries' ability to issue, repay or redeem debt, pay dividends or make distributions;
- fluctuations in the value of, or assumptions and estimates related to, its benefit plan assets and liabilities, including with respect to its pension and other post-retirement benefit plans, that could increase expenses and plan funding requirements;
- changes in federal or state general, income and other tax laws, including (i) future significant tax legislation or regulations (including without limitation impacts related to the Corporate Alternative Minimum Tax ("CAMT")), and (ii) the availability of, or the Company's compliance with, the terms of applicable tax credits and tax abatement programs;
- migration of customers into or out of the Company's service territories and changes in water and energy consumption resulting therefrom;
- the use by municipalities of the power of eminent domain or other authority to condemn the systems of one or more of the Company's utility subsidiaries, including without limitation litigation and other proceedings with respect to the water system assets of the Company's California subsidiary ("Cal Am") located in Monterey, California (the "Monterey system assets"), or the assertion by private landowners of similar rights against such utility subsidiaries;

- any difficulty or inability to obtain insurance for the Company, its inability to obtain insurance at acceptable rates and on acceptable terms and conditions, or its inability to obtain reimbursement under existing or future insurance programs and coverages for any losses sustained;
- the incurrence of impairment charges, changes in fair value and other adjustments related to the Company's goodwill or the value of its other assets;
- labor actions, including work stoppages and strikes;
- the Company's ability to retain and attract highly qualified and skilled employees and talent;
- civil disturbances or unrest, or terrorist threats or acts, or public apprehension about future disturbances, unrest, or terrorist threats or acts; and
- the impact of new, and changes to existing, accounting standards.

These forward-looking statements are qualified by, and should be read together with, the risks and uncertainties set forth above and the risk factors included in Item 1A—Risk Factors and other statements contained in this Annual Report on Form 10-K, and readers should refer to such risks, uncertainties and risk factors in evaluating such forward-looking statements. Any forward-looking statements the Company makes shall speak only as of the date this Annual Report on Form 10-K was filed with the U.S. Securities and Exchange Commission ("SEC"). Except as required by the federal securities laws, the Company does not have any obligation, and it specifically disclaims any undertaking or intention, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or otherwise. New factors emerge from time to time, and it is not possible for the Company to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on the Company's businesses, either viewed independently or together, or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

PART I

ITEM 1. BUSINESS

The Company

With a history dating back to 1886, American Water is the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. A holding company originally incorporated in Delaware in 1936, the Company employs approximately 6,700 professionals who provide drinking water, wastewater and other related services to over 14 million people in 24 states. The Company conducts the majority of its business through regulated utilities that provide water and wastewater services, collectively presented as one reportable segment, referred to as the "Regulated Businesses." The Company also operates other businesses that provide water and wastewater services to the U.S. government on military installations, as well as municipalities. Individually, these other businesses do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States ("GAAP"), and are collectively presented throughout this Annual Report on Form 10-K within "Other," which is consistent with how management assesses the results of these businesses.

Throughout this Annual Report on Form 10-K, unless the context otherwise requires, references to "we," "us," "our," the "Company," and "American Water" mean American Water Works Company, Inc. and its subsidiaries, taken together as a whole. References to "parent company" mean American Water Works Company, Inc., without its subsidiaries.

Regulated Businesses

The Company's primary business involves the ownership of utilities that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers. The Company's utilities operate in 14 states in the United States, with 3.5 million active customers in its water and wastewater networks. Services provided by the Company's utilities are subject to regulation by multiple state utility commissions or other entities engaged in utility regulation, collectively referred to as public utility commissions ("PUCs"). Federal, state and local governments also regulate environmental, health and safety, and water quality and water accountability matters. The Company reports the results of the services provided by its utilities in the Regulated Businesses segment. Operating revenues for the Regulated Businesses were $4,296 million for 2024, $3,920 million for 2023 and $3,505 million for 2022, accounting for 92%, 93% and 92%, respectively, of the Company's total operating revenues for the same periods.

Presented in the table below is a geographic summary of the Regulated Businesses' operating revenues and the number of customers the Company serves, by type of service, for and as of the year ended December 31, 2024:

	Operating Revenues (in millions)				Number of Customers (in thousands)			
	Water (a)	Wastewater	Total	% of Total	Water	Wastewater	Total	% of Total
New Jersey	$ 990	$ 61	$1,051	24.5%	672	70	742	20.9%
Pennsylvania	872	167	1,039	24.2%	688	115	803	22.6%
Missouri	487	21	508	11.8%	485	24	509	14.4%
Illinois	359	73	432	10.1%	300	77	377	10.6%
California	342	4	346	8.1%	191	3	194	5.5%
Total—Top Five States (b)	3,050	326	3,376	78.6%	2,336	289	2,625	74.0%
Other (c)	883	37	920	21.4%	881	40	921	26.0%
Total Regulated Businesses	$3,933	$ 363	$4,296	100.0%	3,217	329	3,546	100.0%

(a) Includes other operating revenues consisting primarily of miscellaneous utility charges, fees and rents.
(b) The Company's "Top Five States" are determined based upon operating revenues.
(c) Includes the Company's utility operations in the following states: Georgia, Hawaii, Indiana, Iowa, Kentucky, Maryland, Tennessee, Virginia and West Virginia and other revenue attributable collectively to the Regulated Businesses.

Customers

The Company's Regulated Businesses have a large and geographically diverse customer base. A customer is defined as a person, business, municipality or any other entity that purchases the Company's water or wastewater services as of the last business day of a reporting period. One single customer may purchase the Company's services for use by multiple individuals or businesses. Examples of these customers are homes, apartment complexes, businesses and governmental entities.

The vast majority of the Company's regulated water customers are metered, which allows the Company to measure and bill for its customers' water usage, typically on a monthly basis. The Company employs a variety of methods of customer meter reading to monitor consumption. These methods range from meters with mechanical registers where consumption is manually recorded by meter readers, to meters with electronic registers capable of transmitting consumption data to proximity devices or via radio frequency to mobile or fixed network data collectors. The Company's wastewater customers are billed either a flat rate or based upon their water consumption.

Residential customers make up a substantial portion of the Company's customer base in all of the states in which it operates. The Company also serves (i) commercial customers, such as food and beverage providers, commercial property developers and proprietors, and energy suppliers, (ii) fire service customers, where the Company supplies water through its distribution systems to public fire hydrants for firefighting purposes and to private fire customers for use in fire suppression systems in office buildings and other facilities, (iii) industrial customers, such as large-scale manufacturers, mining and production operations, (iv) public authorities, such as government buildings and other public sector facilities, including schools and universities, and (v) other utilities and community water and wastewater systems in the form of bulk contracts for the supply of water or the treatment of wastewater for their own customers.

Presented in the table below is a breakout of the Company's Regulated Businesses' operating revenue by class of customer, for the years ended December 31, 2024, 2023 and 2022:

	2024		2023		2022	
(In millions)	**Revenue**	**Percentage of Revenue**	**Revenue**	**Percentage of Revenue**	**Revenue**	**Percentage of Revenue**
Water services:						
Residential	$2,349	55%	$2,143	55%	$1,941	55%
Commercial	885	21%	798	20%	710	20%
Fire service	164	4%	158	4%	147	4%
Industrial	184	4%	167	4%	153	4%
Public and other water (a)	301	7%	284	7%	267	8%
Wastewater	363	8%	327	8%	242	7%
Other (b)	50	1%	43	2%	45	2%
Total	$4,296	100%	$3,920	100%	$3,505	100%

(a) Includes water revenues from public authorities and other utilities, community water systems under bulk contracts and alternative revenue programs.

(b) Includes other operating revenues consisting primarily of miscellaneous utility charges, fees and rents.

Presented in the table below is the number of water and wastewater customers the Company's Regulated Businesses served by class of customer as of December 31, 2024, 2023 and 2022, which represents approximately 13 million people served as of December 31, 2024:

	2024		2023		2022	
(In thousands)	Water	Wastewater	Water	Wastewater	Water	Wastewater
Residential	2,920	307	2,893	279	2,870	270
Commercial	222	21	221	18	219	17
Fire service	53	—	52	—	51	—
Industrial	4	—	4	—	4	—
Public and other (a)	18	1	18	1	17	1
Total	3,217	329	3,188	298	3,161	288

(a) Includes public authorities and other utilities and community water and wastewater systems under bulk contracts. Bulk contracts, which are accounted for as a single customer in the table above, generally result in service to multiple customers.

Customer growth in the Company's Regulated Businesses is primarily from (i) adding new customers to its customer base through acquisitions of water and/or wastewater utility systems, (ii) population growth in its authorized service areas, and (iii) sale of water to other water utilities and community water systems.

Water Supply and Wastewater Services

The Company's Regulated Businesses generally own the physical assets used to store, pump, treat and deliver water to its customers and collect, treat, transport and recycle wastewater. Typically, the Company does not own the water. The water the Company treats and delivers is held in public trust and is allocated to the Company through contracts, permits and allocation rights granted by federal and state or multi-state agencies or through the ownership of water rights pursuant to local law. The Company is dependent on defined sources of water supply and obtains its water supply from surface water sources such as reservoirs, lakes, rivers and streams; from groundwater sources, such as wells and aquifers; and water purchased from third-party water suppliers. The level of water treatment the Company applies varies significantly depending upon the quality of the water source and any state requirements that are more restrictive than federal water quality standards. Surface water sources typically require significant treatment, while groundwater sources often require chemical treatment only.

Presented in the table below are the percentages of water supply by source type for the Company's Top Five States individually and the Regulated Businesses collectively for the year ended December 31, 2024:

	Surface Water	Ground Water	Purchased Water
New Jersey	74%	22%	4%
Pennsylvania	91%	7%	2%
Missouri	83%	16%	1%
Illinois	53%	35%	12%
California	—%	64%	36%
Regulated Businesses	70%	23%	7%

The Company's ability to meet the existing and future water demands of its customers depends on an adequate water supply. Drought, governmental restrictions, overuse of sources of water, the protection of threatened species or habitats, contamination or other factors may limit the availability of ground and surface water. The Company employs a variety of measures in an effort to obtain adequate sources of water supply, both in the short-term and over the long-term. The geographic diversity of the Company's service areas may mitigate some of the economic effects on the water supply associated with weather extremes the Company might encounter in any particular service territory. For example, in any given summer, some areas may experience drier than average weather, which may reduce the amount of source water available, while other areas the Company serves may experience wetter than average weather.

The Company evaluates quality, quantity, growth needs and alternate sources of water supply as well as transmission and distribution capacity to provide water service to its customers. Water supply is seasonal in nature and weather conditions can have a pronounced effect on supply. To support the maintenance of adequate water supplies, the Company uses long-term planning processes and maintains contingency plans to minimize the potential impact on service caused by climate variability and a wide range of weather fluctuations. The Company reviews current climate science and global models related to temperature, precipitation and sea level rise on an ongoing basis. Where actionable forecasts are available, the Company will use this information in its comprehensive planning studies and asset management plans. These studies and plans, which are used by the Company to develop its asset management and system reliability strategies, assess the climate risk and resiliency of the Company's water and wastewater systems over short-, medium- and long-term time horizons, and include evaluations of the availability of water supplies and system capacity against a number of different factors, projections and estimates.

In connection with supply planning for most surface or groundwater sources, the Company employs models to determine safe yields under different rainfall and drought conditions. Surface and ground water levels are routinely monitored in an effort to predict and mitigate supply capacity deficits through demand management and additional supply development. In California, where the state recently experienced a multi-year drought, the Company utilizes multiple water supply options including numerous ground water wells in multiple aquifers as well as various long-term purchase water agreements with regional water suppliers to optimize supplies while seeking resiliency during dry years. An example of the Company's use of long-term planning intended to ensure an adequate water supply is Cal Am's development and support of the Monterey Peninsula Water Supply Project (the "Water Supply Project") in California. The Water Supply Project includes the construction of a desalination plant, to be owned by Cal Am, and the construction of wells that would supply water to the desalination plant. In addition, the Water Supply Project also includes Cal Am's purchase of water from a groundwater replenishment project (the "GWR Project") between Monterey One Water (formerly known as the Monterey Regional Water Pollution Control Agency) and the Monterey Peninsula Water Management District (the "MPWMD"), as well as an expanded aquifer storage and recovery program. The Water Supply Project is intended, among other things, to fulfill obligations of Cal Am to eliminate unauthorized diversions from the Carmel River as required under orders of the California State Water Resources Control Board (the "SWRCB"). For more information, see Item 3—Legal Proceedings—Alternative Water Supply in Lieu of Carmel River Diversions and Note 16—Commitments and Contingencies—Contingencies—Alternative Water Supply in Lieu of Carmel River Diversions, in the Notes to the Consolidated Financial Statements.

Wastewater services involve the collection of wastewater from customers' premises through sewer lines. The wastewater is then transported through a sewer network to a treatment facility, where it is treated to meet required regulatory standards for wastewater before being returned to the environment. The solid waste by-product of the treatment process is disposed of or recycled in accordance with applicable standards and regulations.

Capital Investment

The Company plans to invest between $40 billion and $42 billion over the next 10 years for capital improvements, including acquisitions, to its Regulated Businesses' water and wastewater infrastructure, largely for pipe replacement and upgrading aging water and wastewater treatment facilities. The Company is proactively improving its pipe renewal rate from a 250-year replacement cycle in 2009 to an approximate 125-year replacement cycle by 2029, which it anticipates will enable the Company to replace nearly 2,000 miles of mains and collection pipes between 2025 and 2029. In addition, from 2025 to 2029, the Company's capital investment in treatment plants, storage tanks and other key, above-ground facilities is expected to increase, further seeking to address infrastructure renewal, resiliency, water quality, operational efficiency, technology and innovation, and emerging regulatory compliance needs. The Company continues to invest significantly in resiliency projects to address the impacts of climate and weather variability by hardening its assets.

Regulation and Rate Making

The operations of the Company's Regulated Businesses are generally subject to regulation by PUCs in the states in which they operate, with the primary responsibility of the PUCs being the promotion of the overall public interest by balancing the interest of customers and utility investors. Specific authority might differ from state to state, but in most states, PUCs review and approve rates charged to customers, accounting treatments, long-term financing applications and cost of capital, operation and maintenance ("O&M") expenses, capital expenditures, taxes, affiliated transactions and relationships, reorganizations, mergers and acquisitions, and dispositions, along with imposing certain penalties or granting certain incentives. Regulatory policies vary from state to state and can change over time. These policies will affect the timing, as well as the extent, of recovery of expenses and the realized return on invested capital.

Periodic changes in customer rates generally occur through the filing of a rate case by the utility with the PUC. The timing of rate case filings is typically determined by either periodic requirements in the regulatory jurisdiction or by the utility's need to increase its revenue requirement to recover capital investment costs, changes in operating revenues, operating costs or other market conditions. The Company attempts to minimize "regulatory lag," which is the time between the occurrence of an event that triggers a change in the utility's revenue requirement and the recognition in rates of that change.

The Company's Regulated Businesses support regulatory practices at the PUCs and state legislatures that mitigate the adverse impact of regulatory lag. Presented in the table below are examples of approved regulatory practices:

Regulatory Practices	Description	States Allowed
Infrastructure replacement surcharge mechanisms	Allows rates to change periodically, outside a general rate case proceeding, to reflect recovery of capital investments made to replace infrastructure necessary to sustain safe and reliable services for the Company's customers. These mechanisms typically involve periodic filings and reviews to ensure transparency.	IA, IL, IN, KY, MO, NJ, PA, TN, VA, WV
Future test year	A "test year" is a period used for setting rates, and a future test year describes the first 12 months that new rates are proposed to be effective. The use of a future test year allows current or projected revenues, expenses and capital investments to be collected on a more timely basis.	CA, HI, IA, IL, IN, KY, PA, TN, VA
Hybrid test year	A historical test year sets rates using data from a 12-month period that ends prior to a general rate case filing. A hybrid test year allows an update to historical data for "known and measurable" changes that occur subsequent to the historical test year.	MD, MO, NJ, WV
Utility plant recovery mechanisms	Allows recovery of the full return on utility plant costs during the construction period, instead of capitalizing an allowance for funds used during construction ("AFUDC"). In addition, some states allow the utility to seek pre-approval of certain capital projects and associated costs. In this pre-approval process, the PUC may assess the prudency of such projects.	CA, IL, KY, PA, TN, VA
Expense mechanisms	Allows changes in certain operating expenses, which may fluctuate based on conditions beyond the utility's control, to be recovered outside of a general rate case proceeding or deferred until the next general rate case proceeding.	CA, HI, IL, IN, MD, MO, NJ, PA, TN, VA

Regulatory Practices	Description	States Allowed
Revenue stability mechanisms	Adjusts rates periodically to ensure that a utility recovers the revenues authorized in its general rate case, regardless of sales volume, including recognition of declining sales resulting from reduced consumption, while providing an incentive for customers to use water more efficiently. In California, the ratemaking tool provides partial revenue recovery with a focus on promotion of conservation signals in the pricing structure.	CA, IL
Consolidated tariffs	Use of a unified rate structure for water systems owned and operated by a single utility, which may or may not be physically interconnected. The consolidated tariff pricing structure may be used fully or partially in a state, and is generally used to moderate the price impact of periodic fluctuations in local costs, while lowering administrative costs for customers. Pennsylvania and West Virginia also permit a blending of water and wastewater revenue requirements.	CA, IA, IL, IN, KY, MD, MO, NJ, PA, VA, WV
Deferred accounting	A regulator's willingness to defer recognition of financial impacts when setting rates for utilities.	All

The Company pursues enhancements to these regulatory practices to facilitate efficient recovery of its costs and capital investments and to continue to provide safe, clean, reliable and affordable services to its customers. The ability to seek regulatory treatment using the regulatory practices described above does not guarantee that the PUCs will accept the Company's proposal in the context of a particular rate case, and these regulatory practices may reduce, but not eliminate, regulatory lag associated with traditional rate making processes. It is also the Company's strategy to expand the use of these mechanisms in areas where they may not currently apply and enhance certain mechanisms where they already exist.

Acquisitions and Strategic Growth

The U.S. water and wastewater industries include investor-owned systems as well as municipal systems that are owned and operated by local governments or governmental subdivisions. According to the U.S. Environmental Protection Agency ("EPA"), as of 2024, approximately 84% of the water market is served by municipal systems and, as of 2022, approximately 98% of the country's wastewater systems are government owned. The EPA also estimates, as of 2024, that there are over 50,000 community water systems and, as of 2022, over 17,000 community wastewater systems in the United States, with approximately 80% of the community water systems serving a population of approximately 3,000 or less.

A fundamental aspect of the Company's growth strategy is to pursue acquisitions of water and/or wastewater systems in geographic proximity to areas where the Company operates its Regulated Businesses, see Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations for additional information. The Company leverages its collective size and scale to achieve operational efficiencies, prioritize capital investments and utilize employee knowledge to manage acquired systems. Operational efficiencies and investment needs allow the Company to be successful in integrating and managing the systems acquired with its regulated service areas. The Company's current customer mix of 91% water and 9% wastewater also presents strategic opportunities for wastewater growth and consolidation, allowing the Company to add wastewater customers where it already serves water customers. The Company intends to continue to expand its regulated footprint geographically by acquiring water and wastewater systems in its existing markets and, if appropriate, pursuing acquisition opportunities in certain domestic markets where the Company does not currently operate its Regulated Businesses. Before entering new regulatory jurisdictions (states), the Company will evaluate the

regulatory, legislative and business climates for the opportunity to achieve an appropriate rate of return on its investment while maintaining its high standards of services to customers. The Company will also evaluate whether there is a line of sight to grow to sufficient scale in a new regulated market so that it can attain efficiencies and promote customer affordability after entering a new domestic market. Increasingly stringent environmental, health and safety, cybersecurity and water quality and water accountability regulations, the amount of infrastructure in need of significant capital investment, financial challenges and industry legislation are several elements, among others, that may drive more municipalities to consider selling their water and wastewater assets.

Industry Legislation

American Water continues to advocate for constructive policies at the federal level that align with the Company's strategic priorities and would be beneficial to its customers. These include bi-partisan, bi-cameral legislation to establish a permanent, nationwide, low to moderate income water assistance program, given the expiration of the previous program in 2023; establishing liability exemptions under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA") for certain entities, notably passive receivers of hazardous substances, specifically related to PFAS (such as water and wastewater utilities); and granting investor-owned wastewater utilities the opportunity to access state revolving loan funds. Efforts to advance these legislative priorities will continue in 2025.

The Company's regulated subsidiaries in New Jersey, Indiana and Missouri have versions of water quality or safety accountability acts that require operational or safety and security standards for water and wastewater utilities serving a certain number of customers. In New Jersey, the law imposes requirements in areas such as asset management, water quality reporting, remediation of notices of violation, hydrant and valve maintenance and cybersecurity. In Indiana, the law requires water and wastewater utilities to conduct rate analyses, develop capital asset management plans and conduct cybersecurity and water loss audits. In Missouri, the act requires water and wastewater utilities to create cybersecurity, valve inspection and hydrant inspection programs.

The Company's regulated subsidiaries in California, Illinois, Indiana, Iowa, Kentucky, Maryland, Missouri, New Jersey, Pennsylvania, Tennessee, Virginia and West Virginia have access to utility valuation legislation and regulation for private sector investment in public sector water and wastewater systems. The Company supports full optionality for municipalities, including state legislation that enables the consolidation of the largely fragmented water and wastewater industries through third-party fair market valuations of purchased property. Fair market value assessment of water and wastewater systems is an alternative to the traditional depreciated original cost method of valuation, and allows the Company to offer municipalities a purchase price for their system assets that is reflective of the assets' fair market value, while providing the Company with increased opportunity to recover the purchase price over the life of the purchased system assets, subject to PUC approval.

Consolidated tariffs use a unified rate structure for systems owned and operated by a single utility, which may or may not be physically interconnected. Consolidated tariff pricing moderates the impact of periodic fluctuations in local costs and promotes a more universal water infrastructure investment in a jurisdiction. As a result, consolidated tariffs can make it easier to incorporate new systems into an existing utility, support economies of scale for even the smallest of systems and prioritize capital needs across the jurisdiction. Overall, the Company believes that consolidated tariffs bring cost-effective, high-quality services to a larger number of customers. Eleven of the Company's regulated jurisdictions currently have some form of consolidated tariff pricing, including California, Illinois, Indiana, Iowa, Kentucky, Maryland, Missouri, New Jersey, Pennsylvania, Virginia and West Virginia.

Seasonality

Customer demand for the Company's water service is affected by weather and tends to vary with temperature and amount and frequency of rainfall. Customer demand is generally greater during the warmer

months, primarily due to increased outdoor water use, including irrigation systems. As such, the Company typically expects its operating revenues to be the highest in the third quarter of each year. Weather that is warmer and/or drier than average generally increases operating revenues, whereas, weather that is cooler and/or wetter than average generally suppresses customer water demand and can reduce water operating revenues. Two of the Company's jurisdictions, California and Illinois, have adopted revenue stability mechanisms which permit the Company to collect a portion or all of state PUC-authorized revenue for a given period that is not tied to the volume of water sold during that period, thereby lessening the impact of weather variability. See—Regulation and Rate Making for additional information regarding revenue stability mechanisms.

Affordability

As a water utility, the Company's water must be safe, reliable and affordable. Through increased efficiency, conservation and affordability support programs and tariffs, on average across the enterprise, the Company achieves water costs that are at or below 1% of median household income. Succeeding in water affordability positively affects the health and safety of the Company's customers and contributes to the economic prosperity of the communities in which it operates.

The Company continues to advocate for federal and state customer affordability support and monitors the number of customers enrolled in its assistance programs to make sure that it is effectively responding to customer needs. In addition, the Company advocates for low income rate discount programs and rate design reform measures in state rate proceedings that will improve the affordability of service specifically for lower income customers.

Competition

The Company's Regulated Businesses generally do not face direct competition in their existing markets because (i) the Company operates in those markets pursuant to franchises, charters, certificates of public convenience and necessity or similar authorizations (collectively, "CPCNs") issued by state PUCs or other authorities, and (ii) the high cost of constructing a new water and wastewater system in an existing market creates a significant barrier to market entry. However, the Company's Regulated Businesses face competition from governmental agencies, other investor-owned utilities, large industrial customers with the ability to provide their own water supply/treatment process and strategic buyers that are entering new markets and/or making strategic acquisitions. When pursuing acquisitions, the Company's largest investor-owned competitors, based on a comparison of operating revenues and population served, include Essential Utilities, Inc., American States Water Company and California Water Service Group. From time to time, the Company also faces competition from infrastructure funds, multi-utility companies and others, such as Algonquin Power and Utilities Corp. and Nexus Water Group.

Condemnation and Eminent Domain

All or portions of the Regulated Businesses' utility assets could be acquired by state, municipal or other government entities through one or more of the following methods: (i) eminent domain (also known as condemnation); (ii) the right of purchase given or reserved by a municipality or political subdivision when the original CPCN was granted; and (iii) the right of purchase given or reserved under the law of the state in which the utility subsidiary was incorporated or from which it received its CPCN. The acquisition consideration related to such a proceeding initiated by a local government may be determined consistent with applicable eminent domain law, or may be negotiated or fixed by appraisers as prescribed by the law of the state or the jurisdiction of the particular CPCN.

As such, the Regulated Businesses are periodically subject to condemnation proceedings in the ordinary course of business. For example, the Monterey system assets of Cal Am are the subject of a condemnation lawsuit filed by the MPWMD stemming from a November 2018 public ballot initiative. For more information on this matter, see Item 3—Legal Proceedings—Proposed Acquisition of Monterey System Assets — Potential Condemnation.

Furthermore, the law in certain jurisdictions in which the Regulated Businesses operate provides for eminent domain rights allowing private property owners to file a lawsuit to seek just compensation against a public utility, if a public utility's infrastructure has been determined to be a substantial cause of damage to that property. In these actions, the plaintiff would not have to prove that the public utility acted negligently. In California, for example, lawsuits have been filed in connection with large-scale natural events such as wildfires. Some of these lawsuits have included allegations that infrastructure of certain utilities triggered the natural event that resulted in damage to the property. In some cases, the PUC has allowed certain costs or losses incurred by the utility to be recovered from customers in rates, but in other cases such recovery in rates has been disallowed. Also, the utility may have obtained insurance that could respond to some or all of such losses, although the utility would be at risk for any losses not ultimately subject to rate or insurance recovery or losses that exceed the limits of such insurance.

Other

Other primarily includes the MSG business, which enters into long-term contracts with the U.S. government to provide water and wastewater services on military installations. The Contract Services Group ("CSG"), also included in Other, has three contracts with municipal customers to operate and manage water and wastewater facilities and provide other related services. Other also includes corporate costs that are not allocated to the Company's Regulated Businesses, interest income related to the secured seller promissory note from the sale of HOS, income from assets not associated with the Regulated Businesses, eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment. The businesses included within Other are not subject to regulation by state PUCs and the services provided generally do not require significant capital investment by the Company. Operating revenues for Other were $388 million for 2024, $314 million for 2023 and $287 million for 2022, accounting for 8%, 7% and 8%, respectively, of the Company's total operating revenues for the same periods.

Military Services Group

MSG operates on 18 military installations under 50-year contracts with the U.S. government as part of its Utilities Privatization Program. The scope of these contracts generally includes the operation and maintenance of the installation's water and wastewater systems and a capital program focused on asset replacement and, in certain instances, systems expansion. The replacement of assets assumed when a contract is awarded to MSG is completed either through a discrete set of projects executed in the first five years of the contract or through the long-term recapitalization program performed over the life of the contract. Traditionally, both of these programs are funded from the contract fee. At times, new assets are required to support the installation's mission, and the construction of these assets is funded by the U.S. government as separate modifications or amendments to the contract. The capital for these assets historically has not been funded through the Company's debt or equity issuances; rather, the Company has used limited working capital for short-term needs under these contracts. The U.S. Army has a requirement that a bidder must offer financing in its proposal for these new capital projects under existing contracts, but the U.S. Army's implementation of this requirement on existing contracts has limited the need for such financing. However, recent U.S. Army and Navy Utilities Privatization solicitations have included requirements for the successful bidder to finance discrete initial capital projects over either a five- or ten-year period after project completion. Four of MSG's current contracts require such capital project financing, which the Company is currently addressing through internal sources of liquidity.

The contract price for three of MSG's contracts with the U.S. government is subject to redetermination two years after commencement of operations, and every three years thereafter. Price redetermination is a contract mechanism to periodically adjust the service fee in the next period, to reflect changes in contract obligations and anticipated market conditions. The remaining 15 contracts with the U.S. government are subject to annual price adjustments under a mechanism called "Economic Price Adjustment." All 18 contracts could be terminated, in whole or in part, prior to the end of the 50-year term for convenience of the U.S. government, or as a result of default or non-performance by the MSG subsidiary performing the contract. In either event, pursuant to termination provisions

applicable to all of these contracts, MSG would be entitled to recover allowable costs that it may have incurred under the contract, plus the contract profit margin on incurred costs. MSG's backlog of revenue associated with its contracts with the U.S. government is approximately $7.4 billion, with an average remaining contract term of 38 years.

Competition

MSG faces competition primarily from American States Water Company.

Environmental, Health and Safety, Water Quality and Other Regulation

The Company's water and wastewater operations, including the services provided by its Regulated Businesses, MSG and CSG, are subject to extensive federal, state and local laws and regulations governing the protection of the environment, health and safety, the provision of water and wastewater services, particularly with respect to the quality of water the Company delivers to its customers, and the manner in which it collects, treats, discharges, recycles and disposes of wastewater. In the United States, these regulations are developed under federal legislation including the Safe Drinking Water Act, the Reduction of Lead in Drinking Water Act and the Clean Water Act, and under a variety of applicable state laws. Environmental, health and safety, and water quality regulations are complex and may vary from state to state in those instances where a state has adopted a standard that is more stringent than the federal standard. The Company is also subject to various federal, state, and local laws and regulations governing the storage of hazardous materials, the management and disposal of hazardous and solid wastes, discharges to air and water, the cleanup of contaminated sites, dam safety and other matters relating to the protection of the environment and health and safety. PUCs also set conditions and standards for the water and wastewater services the Company delivers.

The Company maintains an environmental program that includes responsible business practices focused on compliance with environmental laws and regulations and the effective use of natural resources, recognizing that drinking water standards have generally, over time, increased in number and become increasingly more stringent. As newer or stricter standards are introduced, the Company's capital and operating costs needed to comply with them will likely increase. The Company incurs substantial costs associated with compliance with the environmental, health and safety, and water quality standards to which its operations are subject and the Company invests in technology solutions for enhanced detection and monitoring of water quality issues. The Company estimates that it will make capital expenditures of approximately $1.4 billion over the next five years, and $275 million in 2025, to address water quality issues; most of which are focused on compliance with environmental laws and regulations. The Company believes that its operations are materially in compliance with, and in many cases surpass, minimum standards required by applicable environmental laws and regulations.

The Company's operations also involve the use, storage and disposal of hazardous substances and wastes. For example, the Company's water and wastewater treatment facilities store and use a variety of chemicals, including, for example, gaseous chlorine, that generate waste and require proper handling and disposal under applicable environmental requirements. The Company also could incur remedial costs in connection with any contamination relating to its operations or facilities or its off-site disposal of waste. CERCLA authorizes the EPA, and comparable state laws authorize state environmental authorities, to issue orders and bring enforcement actions to compel responsible parties to investigate and take remedial actions at any site that is determined to present an actual or potential threat to human health or the environment because of an actual or threatened release of one or more hazardous substances. Parties that generated or transported hazardous substances to such sites, as well as current and former owners and operators of such sites, may be deemed liable, without regard to fault, under CERCLA or comparable state laws. Although the Company is not aware of any material cleanup or decontamination obligations, the discovery of contamination or the imposition of such obligations in the future could result in additional costs to the Company. The Company's facilities and operations are also subject to requirements under the U.S. Occupational Safety and Health Act and inspections thereunder.

Safe Drinking Water Act

The Safe Drinking Water Act and related regulations establish national quality standards for drinking water. The EPA has issued rules governing the levels of numerous, naturally occurring and manufactured chemical and microbial contaminants and radionuclides allowable in drinking water, and continues to propose new rules. These rules also prescribe testing requirements for detecting regulated contaminants, the treatment systems that may be used for removing those contaminants, and other requirements. To date, the EPA has set standards for over 90 contaminants and water quality indicators for drinking water, and there is a process in place to make a regulatory determination on at least five additional compounds every five years.

The process of developing new drinking water standards is long and complex, but the Company actively participates with the EPA and other water industry groups by sharing research and water quality operational knowledge. See Item 1—Business—Research and Development—Contaminants of Emerging Concern for additional information.

The Company is within the EPA's time frame for compliance with standards and rules developed under the regulation of the Safe Drinking Water Act, which includes sample collection, data analysis, and, in some instances engineering planning and implementation of treatment enhancements. Further, the EPA is actively considering development of a new regulation for perchlorate and updates to the current microbial and disinfection byproduct regulations. The Company does not anticipate that any such regulations, if enacted, will require implementation in 2025.

Although it is difficult to project the ultimate costs of complying with the above or other pending or future requirements, the Company expects current cost requirements under the Safe Drinking Water Act and other similar laws to be recoverable through the regulatory process and therefore compliance costs are not expected to have a material impact on its operations or financial condition. In addition, capital expenditures and operating costs to comply with environmental mandates have been traditionally recognized by PUCs as appropriate for inclusion in establishing rates. As a result, the Company expects to recover the operating and capital costs resulting from these pending or future requirements.

Reduction of Potential Lead Exposure in Drinking Water

Over the last 40 years, there have been numerous federal regulations aimed at reducing the potential exposure of lead from plumbing materials into drinking water. Regulations have addressed both piping system materials and water quality. In 1986, the Safe Drinking Water Act was amended to prohibit the installation of pipe, solder and flux in public water systems and premise plumbing systems that was not lead-free. In 1991, the EPA published the Lead and Copper Rule ("LCR") to reduce the corrosivity of water and control lead and copper in drinking water. In 2011, the Reduction of Lead in Drinking Water Act was enacted, further limiting the use and introduction into commerce of lead pipes, plumbing fittings for fixtures, solder and flux. Since that time, the EPA has issued several minor revisions (2000, 2004 and 2007) and two major revisions (2021 and 2024) to the LCR.

While these measures have made an impact in reducing potential lead exposure in drinking water in the United States and educating water consumers, the 2021 Lead and Copper Rule Revisions ("LCRR") and 2024 Lead and Copper Rule Improvements ("LCRI") rules further advance public health protections by addressing the legacy lead service lines as well as lead plumbing materials, primarily in building plumbing, that still remain in many communities. The 2021 and 2024 revisions are discussed below.

On January 15, 2021, the EPA published the final LCRR with a revised final compliance date of October 16, 2024. The LCRR is designed to better identify high levels of lead, improve the reliability of lead tap sampling results, strengthen corrosion control treatment requirements, expand consumer awareness and improve risk communication. On October 30, 2024, the EPA published the LCRI with a "Compliance Date" of November 1, 2027. The LCRI focus includes requirements related to (i) replacing all lead and certain galvanized service lines

under a utility's control by October 30, 2037, 10 years after the Compliance Date; (ii) identifying the materials of all service lines of unknown material; (iii) improving tap sampling; (iv) reducing the lead action level; and (v) strengthening protections to reduce exposure to lead. The LCRI also deferred the compliance date of certain requirements of the LCRR to allow for compliance with both new rules.

The Infrastructure Investment and Jobs Act was signed into law in November 2021 and provides for up to $15 billion for lead service line replacement through drinking water state revolving funds. The Company will evaluate its service territories and apply for funding for those areas that meet applicable requirements. With regard to future acquisitions, the Company will work with those communities as part of the acquisition process to set lead service lines ("LSLs") removal goals appropriate for those systems. The prioritization of LSL removal is dependent on several factors, including the Company's planned water main and service line renewal projects, adjacent projects by municipalities or other utilities, LCRI compliance monitoring results, and cooperation with its customers with respect to replacing the customer-owned portion of the LSL as necessary. In certain cases, these and other factors may result in a shorter or longer time frame for replacement. Because replacing the external LSL in its entirety is advised by several water industry organizations including the U.S. National Drinking Water Advisory Council, the Lead Service Line Replacement Collaborative, and the American Water Works Association, the Company's preferred approach is to replace the entire external LSL if lead is found on either the Company or customer portion of the service line; full LSL replacement is also consistent with the LCRR and final LCRI. The Lead Service Line Replacement Collaborative is a diverse group of public health, water utility, environmental, labor, consumer and housing organizations from across the country working together to encourage communities to accelerate the full replacement of LSLs through collaborative efforts at the local level.

As part of its ongoing water main replacement and service line renewal projects, and in accordance with applicable state regulations and anticipation of updated federal regulation, the Company has been replacing LSLs for many years in accordance with current scientific guidance. Also, the Company utilizes appropriate corrosion control techniques as necessary to comply with current water quality regulatory requirements.

National Primary Drinking Water Regulations

On April 10, 2024, the EPA announced a final National Primary Drinking Water Regulation ("NPDWR") for six PFAS, including perfluorooctanoic acid ("PFOA"), perfluorooctane sulfonic acid ("PFOS"), perfluorononanoic acid ("PFNA"), hexafluoropropylene oxide dimer acid ("HFPO-DA", commonly known as "GenX Chemicals"), perfluorohexane sulfonic acid ("PFHxS"), and perfluorobutane sulfonic acid ("PFBS"). The NPDWR for PFAS establishes legally enforceable levels, called Maximum Contaminant Levels ("MCLs"), for PFAS in drinking water. Utilities will be required to complete their initial monitoring for PFAS by 2027, followed by ongoing compliance monitoring. Utilities will be required to comply with the new MCLs by April 2029, implementing solutions to reduce PFAS levels where needed. Beginning in April 2029, utilities that exceed any of the PFAS MCLs will be required to provide notification to the public of the violation.

The Company estimates an investment of approximately $1 billion of capital expenditures to install additional treatment facilities in order to comply with the new regulations by April 2029. Additionally, the Company estimates that it will incur annual operating expenses of up to approximately $50 million related to testing and treatment, with the majority of the operating expenses beginning near the April 2029 compliance deadline. The actual level of capital investment and expenses may differ from these estimates and will be dependent upon market dynamics upon implementation of solutions to comply with the NPDWR for PFAS.

The Company has entered into a nine-year exclusive contract with a third-party vendor to supply granular activated carbon, equipment and reactivation services to more than 50 of the Company's treatment sites across 10 states through 2033. The equipment and services provided through the contract will aid the Company in treating drinking water to assist in complying with the NPDWR for PFAS.

The Company supports sound policies and compliance with the NPDWR for PFAS by all water utilities, while protecting customers and communities from the costly burden of monitoring and mitigating PFAS contamination in water systems. The Company continues to advocate for policies that hold polluters accountable and is participating in the multi-district litigation and other lawsuits filed against certain PFAS manufacturers seeking damages and reimbursement of costs incurred and continuing to be incurred to address contamination of public water supply systems by PFAS. For more information on the PFAS multi-district litigation, see Item 3—Legal Proceedings—PFAS Multi-District Litigation.

On April 19, 2024, the EPA issued a final rule to designate PFOA and PFOS as hazardous substances under CERCLA. The Company, along with a coalition of other water and wastewater organizations, is actively advocating for and supporting bipartisan legislation that would provide PFAS liability protections under CERCLA for water and wastewater systems, as passive receivers of PFAS, and to hold polluters, and not the public or customers, accountable for PFAS-related liability.

Clean Water Act

The Clean Water Act regulates discharges from drinking water and wastewater treatment facilities into lakes, rivers, streams and groundwater. In addition to requirements applicable to the Company's wastewater collection systems, its operations require discharge permits under the National Pollutant Discharge Elimination System ("NPDES") permit program established under the Clean Water Act, which must be renewed every five years. Pursuant to the NPDES permit program, the EPA and implementing states set maximum discharge limits for wastewater effluents and overflows from wastewater collection systems. Discharges that exceed the limits specified under NPDES permits can lead to the imposition of fines and penalties, and persistent non-compliance could lead to significant fines and penalties and other compliance costs. In addition, the difficulty of obtaining and complying with NPDES permits, and renewing expiring permits, may impose time and cost burdens on the Company's operations. From time to time, discharge violations occur at the Company's facilities, some of which result in fines. The Company does not expect any such violations or fines to have a material impact on its results of operations or financial condition. The EPA has identified wastewater discharge permitting and permits for the application of biosolids, or sewage sludge, containing PFAS as areas of focus in its PFAS Strategic Roadmap. Individual states may also take action in these areas. As indicated previously, capital expenditures and operating costs to comply with environmental mandates have been traditionally recognized by PUCs as appropriate for inclusion in establishing rates. As a result, the Company expects to recover the operating and capital costs resulting from any new requirements in these areas.

Research and Development

The Company's Research and Development Program

The Company maintains an industry-leading research and development ("R&D") program that is designed to enhance its services, support its compliance activities, improve service quality and operational effectiveness, and provide environmental leadership. For more than four decades from its inception, American Water's R&D program has evolved into an industry-leading effort and has achieved numerous advancements in the science of drinking water, wastewater, and desalination. Through laboratory and industry resources and the team's expertise, efforts are focused on contaminants of emerging concern, including but not limited to PFAS, Legionella, cyanotoxin-forming algal blooms, a variety of pathogens (for example, Cryptosporidium, Giardia, viruses, and various bacteria), microbial indicators and disinfection byproducts. The Company's R&D personnel are located at the Company's corporate headquarters and at two laboratory testing facilities in New Jersey and Illinois, the latter housing its quality control and testing laboratory, which supports the Company's R&D activities through testing and analysis.

The Company continues to leverage its expertise and collaborates with the EPA and state agencies to help establish effective environmental, health and safety, and water quality standards and regulations. This relationship includes sharing of the Company's research, such as its treatment and distribution system

optimization research and its national water quality monitoring data. The Company's engagement with the EPA provides it with early insight into emerging regulatory issues and initiatives, thereby allowing the Company to anticipate and to accommodate its future compliance requirements. The Company also frequently engages with the Centers for Disease Control and Prevention, other state environmental agencies, and national and international water research foundations. The Company believes that continued R&D activities are critical for providing safe, clean, reliable and affordable services, as well as maintaining its leadership position in the industry, which provides the Company with a competitive advantage as it seeks business and operational growth.

Contaminants of Emerging Concern

Contaminants of emerging concern include numerous chemicals such as PFAS, pharmaceuticals, personal care products, pesticides, herbicides, antibiotic resistant bacteria, antibiotic resistant genes, endocrine disrupting compounds, microplastics and industrial chemicals, as well as certain naturally occurring microbes, such as bacteria, viruses and parasites, which may be detected in drinking water supplies, for which the risk to the public's health is not fully understood and/or has not been assessed. Technological advances have only recently made it possible to detect many of these contaminants at trace levels. The ability to detect contaminants at trace levels contributes to setting improved water quality goals.

The Chemicals Abstract Service Registry contains over 219 million registered chemicals, with an estimated 1,400 species of disease-causing microbes that can affect humans. The Company is continually investigating new substances and contaminants, employing a team of scientists, engineers and public health professionals to identify threats to its water supply, to act on emerging regulations and new health advisories, and to evaluate the benefits of alternative or advanced treatment technologies. The Company utilizes water quality testing equipment and implements new and emerging technologies to help detect potential water supply contamination issues. Examples of the Company's efforts include:

- monitoring impacts of environmental pathogen loads and removal through wastewater systems;
- characterizing factors that contribute to the formation of potentially carcinogenic disinfection by-products to define best practices for their mitigation;
- advancing the science on holistic management strategies to improve distribution system water quality further;
- using its research findings to communicate information to its customers regarding potential actions to limit occurrences of Legionella in their buildings; in this regard, the Centers for Disease Control and Prevention statistics indicate that water-associated disease from Legionella is on the rise, with exposure typically associated with customer-owned plumbing systems in large buildings;
- defining a framework to support management or possible future regulation of opportunistic pathogens;
- developing expanded monitoring methods for short-chain and fluorinated replacement PFAS;
- systematically investigating PFAS removal from a variety of water matrices using established and emerging treatment technologies;
- leading a PFAS risk communication strategy for the water sector and sharing utility perspectives with external stakeholders through regional, national and international conferences;
- using innovative technologies (e.g., satellite imagery) for early detection and response to algal blooms to manage public health impacts and prevent taste and odor events before cyanotoxins get into the water treatment plant;
- monitoring of taste and odor issues that impact customer satisfaction using expanded analytical methods to detect compounds, and evaluating and recommending treatment practices;
- implementing water source assessment tools, including sensors and data analytics, to evaluate and track chemical storage and aid in the identification of source water contamination events;

- developing methodology and advanced measurement techniques for contaminants of emerging concern to investigate transport, occurrence and treatment; and
- implementing activated carbon, biofiltration and ion exchange treatment to seek to control contaminants of emerging concern.

Service Company and Security

American Water Works Service Company, Inc. ("Service Company") is a wholly owned subsidiary of the Company that provides support and operational services to the Company and its affiliates. These services are predominantly provided to the Company's Regulated Businesses under contracts that have been approved by PUCs, where necessary, and are also provided to the MSG and CSG businesses as requested or may otherwise be necessary. Services provided by Service Company may include accounting and finance, administration, business development, communications, compliance, education and training, engineering, environmental, health and safety, human resources, information systems, internal audit, investor relations, legal and governance, operations, procurement, R&D, rates and regulatory support, security, risk management and insurance, treasury, and water quality. Service Company also provides customer support to the Company's Regulated Businesses, which includes call handling, billing, a major accounts program and other related services. Services are provided by Service Company at cost, enabling the Company's operating subsidiaries to fulfill their responsibilities in a cost-effective manner, while providing them access to in-depth, functional expertise.

The Company's security team, through Service Company, provides oversight and policy guidance on physical, cyber and information security, as well as business continuity, throughout the Company's operations. The security team is responsible for designing, implementing, monitoring and supporting effective physical and technical security controls for the Company's physical assets, business systems and operational technologies, as well as for the Company's executive management and other employees. Risk assessments are conducted periodically to evaluate the effectiveness of existing security controls and serve as the basis for additional safeguards, security controls and measures. For additional information concerning this team and the Company's cybersecurity program, see Item 1C—Cybersecurity.

Sustainability

The Company considers environmental, social responsibility and governance principles fundamental to its corporate sustainability strategy and values. Integration of these principles into the Company's daily operations emphasizes its belief that "how" a company operates is just as important as "what" a company does. Delivering safe, clean, reliable and affordable water services to customers and treating wastewater has been fundamental to the Company's business for decades. The Company has an opportunity to make a positive, sustainable impact in thousands of communities by serving them with skilled employees and maintaining the governance and diligence to meet or exceed service expectations.

Demonstrated Leadership

The Company's values and actions have achieved recognitions for demonstrating its leadership in several areas related to trust, responsibility, sustainability and support of its communities, customers and employees. Among others, these include the following:

- recognized as one of the *Forbes* 2025 Most Trusted Companies in America, in addition to being ranked first in the utilities industry category on *Forbes* America's Best Large Employers List for 2024;
- recognized on *Newsweek*'s America's Most Responsible Companies 2025 List;
- ranked on *Barron*'s 100 Most Sustainable U.S. Companies 2024 List; and
- named one of America's Most JUST companies by JUST Capital and CNBC for its continued commitment to employees, customers, communities and shareholders.

Oversight

Management Oversight

The Company has adopted a cross-functional approach for developing and implementing its sustainability strategy, principles and reporting. The Company's management function around sustainability involves the direct involvement and participation by a number of its business units, including without limitation, its executive leadership team, as well as environmental, health and safety, human resources, legal, finance, accounting and investor relations. In addition, the Company has developed a steering committee that reports to the Chief Operating Officer and is led by the Director of Sustainability. The committee is designed to foster sustainability governance, strategic planning, performance management and increased visibility of key goals and metrics disclosed through various channels.

Board of Directors Oversight

The Board of Directors oversees the Company's strategy and performance related to sustainability through its four standing committees:

- The Safety, Environmental, Technology and Operations Committee (the "SETO Committee") has oversight and responsibility with respect to, among other things: water quality and emerging contaminants; operational matters and functions; environmental and climate-related matters; and physical security and cybersecurity.
- The Audit, Finance and Risk Committee has oversight and responsibility with respect to, among other things: the Company's risk assessment and enterprise risk management; the Company's financial statements and accounting; the Company's independent auditor; internal audit and controls; and ethics and compliance matters.
- The Executive Development and Compensation Committee ("ED&CC") oversees, among other things: the Company's human capital management; culture and related engagement with employees; and executive development, succession and compensation.
- The Nominating/Corporate Governance Committee (the "Nominating Committee") has oversight and responsibility with respect to, among other things: corporate governance; Board and committee membership, leadership and composition; director independence, nominations and succession; and director education.

Reporting, Disclosures and Transparency

Information on the performance and management of the Company's key metrics can be found on the Company's Investor Relations website at *https://ir.amwater.com/sustainability*. The Company also discloses on its website its Political Contribution Policy, and, on an annual basis, information related to political contributions, certain payments to tax-exempt organizations and trade associations (including Section 501(c)(4) organizations), and lobbying expenditures.

Human Capital Resources

Overview

American Water is committed to supporting a high performing workforce. The Company seeks to attract and retain employees who share its purpose and values and understand the needs of the communities they serve. The Company demonstrates this commitment to its employees through its values of safety first; trust, dignity and respect; one team; environmental leadership; and high performance. American Water believes that investing time, energy and resources in its workforce generates new ideas, continuous improvement and high-quality and reliable service for its customers and communities.

Safety First

Safety is a core value at American Water and a critical component of its operational focus. The Company's goal is to achieve zero incidents, injuries and fatalities for its employees and contractors.

American Water believes all employees and contractors deserve to return home from work in the same, or better, condition than when they arrived. The Company's commitment to employee health and safety includes physical safety, emotional safety and overall well-being. To support its commitment to safety, the Company's employees completed approximately 126,000 hours of safety training, including physical security and cybersecurity, in 2024. Additionally, the Company focuses on proactive safety programs through collaboration with employees at all levels of the organization. Employees are empowered to demonstrate safety leadership by utilizing a number of safety procedures embedded in the Company's culture, such as the use of (i) daily and pre-meeting safety messages, (ii) "Stop Work Authority" (the power to stop working immediately and mitigate a hazard whenever an employee believes a task is unsafe) and (iii) pre-job briefings to proactively identify hazards that may be encountered. Notwithstanding the Company's commitment to a hazard free workplace, even when employees implement all appropriate and effective safety measures and precautions, accidents, injuries and even fatalities can and do occur. In 2024, a third-party vehicle entered a secure work zone striking four Company employees, due to no fault of its employees, which resulted in several serious injuries and one employee fatality. Additionally, in January 2025, a Company employee was fatally injured when struck by a train. For 2024, the Company had an OSHA Recordable Incident Rate ("ORIR") of 0.40 (25 recordable injuries, and does not include the fatality or injuries, which were determined to be not preventable), which reflects a 54% decrease in recordable injuries compared to 2023, when the ORIR was 0.86 (54 injuries). Also, the number of Days Away Restricted or Transferred ("DART") injuries decreased by 73% compared to 2023, primarily due to a decrease in strain, sprain and tear injuries, as well as a reduction in slip, trip and fall injuries. For 2024, the Company had a DART rate of 0.14 (9 injuries), compared to 0.52 (33 injuries) in 2023.

Talent Attraction, Retention and Development

The Company's talent and retention strategy is aimed at building and maintaining a high performing and engaged workforce across all levels of the business. The Company's performance depends on a highly skilled workforce with the requisite experience in areas including engineering, regulatory, water quality, finance and operations, in order to deliver safe, clean and reliable water and wastewater services to customers. The Company leverages various recruiting channels and partnerships as well as its employer brand to access a broad pool of talent and to hire what the Company believes are the most qualified candidates. In 2024, the Company filled approximately 1,000 positions, 67% of which with external candidates and 33% with internal candidates.

The Company has created and implemented programs aimed at developing and retaining talent. The Company collaborates with business leaders to identify the essential behaviors and competencies needed for safe and high performing operations, as well as to achieve its short and long-term business goals. Through the Company's workforce planning process, the Company evaluates key positions across the organization, identifies potential talent risks, and develops action plans to mitigate those risks. Additionally, the Company has created and implemented programs aimed at attracting, motivating, developing and retaining talent. These programs promote a culture of learning where employees are encouraged to continuously enhance their skills and knowledge through on-the-job experiences, social learning and formal learning opportunities. By committing to achieve 25 hours of learning annually, employees develop skills for their ongoing professional growth. Approximately 84% of active employees hired before October 1, 2024, have completed at least 25 hours of learning, resulting in approximately 262,000 hours of total learning completed during the year.

Developing talent to provide a pathway to executive leadership is a critical priority for the Company. During 2024, the Company enhanced its succession planning process by increasing the number of business impact roles covered by a succession plan. These succession plans support the Company's business continuity plans and goals, through the identification and development of current and future leaders, and promote employee retention, as well as the Company's employee culture and talent development priorities.

In addition to succession planning for executive and senior leadership roles, during 2024, the Company conducted local and enterprise-wide talent reviews, identifying top and emerging talent with a focus on strengths, gaps and development needs against the critical skills needed for certain roles. Through these talent review processes, business leaders identified a pool of high-potential employees to allow the Company to support their career goals and aspirations, and to promote more effective employee experience and talent retention efforts. The Company also utilizes annual six-month mentoring programs designed to accelerate emerging leaders' abilities to demonstrate leadership capabilities and relationships, with the guidance of an experienced executive mentor.

Total Rewards

In order to attract, retain and motivate a skilled and high-performing workforce, American Water provides a comprehensive and highly competitive Total Rewards program, including base pay, Annual Performance Plan ("APP") for all employees, long-term performance plan compensation for certain leadership positions, and a wide range of benefits consisting of, among others, medical, prescription, dental, vision, life and disability insurance coverage, a retirement savings plan, an employee stock purchase plan, educational assistance, paid time off through holidays and vacation and sick time. The Company's Total Rewards offerings also include a health and wellness program, paid family leave benefit and a menu of additional voluntary benefits.

All the Company's employees, including those who are union-represented, participate in the APP to promote the alignment of performance-based compensation with the achievement of the Company's short-term performance goals. In addition, the Company regularly reviews its success in achieving fair compensation practices, whereby pay decisions would be based on the responsibilities, talents and skills of its employees, rather than unrelated factors such as gender, race or ethnicity.

All employees who average 30 hours or more per week are eligible for full-time benefits. Approximately 89% of all benefit eligible employees are enrolled in the Company's healthcare benefits. Full-time employees pay approximately 16% of the total premium cost of medical, dental and vision coverage. The Company's medical benefits include, among others, coverage for applied behavior analysis, autism treatment, transgender service, hearing aids and fertility assistance.

Trust, Dignity and Respect

In 2024, the Company launched the Catalyst for Change framework in support of its values of trust, dignity and respect. The pillar areas of commitment, consistency, clarity, courage and conviction, allow employees to work collectively to build the desired culture. At all levels, the Company strives to understand, value and provide opportunities to each employee, and to foster an environment where all employees are celebrated regardless of their background or life experiences. To achieve the desired state, all leaders are expected to model those behaviors that are consistent with the Catalyst for Change framework.

The Company believes that employees are at their best when they can bring their authentic selves to work every day. This belief is the central component of the Company's "Beautifully Different" philosophy, which recognizes, embraces and celebrates the uniqueness of its employees. The Company also believes that having employees with different ideas, viewpoints, experiences and backgrounds improves its ability to serve its customers. To this end, the Company is committed to attracting and retaining a workforce that understands the needs of the communities in which it serves.

Employee Experience

The Company has established its weCARE employee value proposition that focuses on employee experience as an influencer of an employee's opinions and emotional response about the Company as an employer. weCARE is composed of five elements—deeper connections, personal growth, shared purpose, flexibility, and well-being. weCARE represents the Company's commitment to valuing its employees and

building a safe, healthy and inclusive culture where employees know their value and are appreciated for their talents and commitment to supporting the Company's success. The Company is also committed to improving the employee experience by listening to employees through focus group discussions and employee surveys, among other tools. In 2024, the Company administered two pulse surveys, seeking feedback on employee experience, which had an overall participation rate of 68%.

Workforce Data

As of December 31, 2024, the Company had approximately 6,700 employees. For 2024, the Company's annualized employee turnover rate, which the Company defines as the ratio of the number of separated employees to the 12-month average headcount during 2024, was 10.5%, down from 11.5% in 2023. American Water seeks to reduce regrettable employee turnover by assessing the effectiveness of weCARE and through its efforts to foster the Company's employee experience.

As of December 31, 2024, approximately 46% of the Company's workforce was represented under 75 collective bargaining agreements with 14 different unions. In 2024, the Company renegotiated 26 collective bargaining agreements that were set to expire during the year. During 2025, 25 of the Company's collective bargaining agreements will expire in accordance with their terms and the Company expects to be able to negotiate these agreements during the year. In addition, the Company's national benefits agreement, which expires on July 31, 2028, covers approximately 3,000 of the Company's union-represented employees and their families and provides them with healthcare and other benefits. The Company also collaborates with unions on topics such as safety, customer, technology and employee benefits in forums such as the Joint Healthcare Committee, National Safety Council, Tools Committee and local Labor-Management Committees. The Company continues to work with several local labor unions and the Federal Mediation and Conciliation Service to host discussions among management and union leaders with the goal of supporting and enhancing constructive relationships with these unions.

Board Oversight

The ED&CC of the Board of Directors establishes and reviews the Company's overall compensation philosophy and oversees the compensation and benefits plans and programs for its executive officers. The ED&CC oversees the process of planning for executive officer succession. The ED&CC's charter requires that it oversee the Company's human capital management, culture and related engagement activities. Further, the ED&CC's charter requires that the ED&CC have responsibility for reviewing and assessing, at least annually, the Company's organizational and leadership development plans and programs, and its programs designed to identify, attract and retain high-potential employees.

Information About Our Executive Officers

Presented in the table below are the name, age, offices held and business experience for each of the Company's executive officers, as of February 19, 2025:

Name	Age	Office and Experience
M. Susan Hardwick	62	**Chief Executive Officer.** Ms. Hardwick served as President and Chief Executive Officer of the Company from February 2, 2022, to August 1, 2024, and has served as Chief Executive Officer of the Company since August 1, 2024. She joined the Company in June 2019 as the Company's Executive Vice President—Finance and served as the Company's Chief Financial Officer from July 2019 until May 16, 2022. From December 7, 2021 until January 31, 2022, Ms. Hardwick also served as Interim Chief Executive Officer. Prior to joining the Company, Ms. Hardwick served as the Executive Vice President and Chief Financial Officer of Vectren Corporation ("Vectren"), which was sold to CenterPoint Energy, Inc., an electric and natural gas utility ("CenterPoint"), on February 1, 2019. Ms. Hardwick joined Vectren in January 2000 and served in a variety of positions, including: Vice President, Controller and Assistant Treasurer; Senior Vice President, Finance; Senior Vice President, Chief Financial Officer; and Executive Vice President and Chief Financial Officer. Prior to joining Vectren, Ms. Hardwick was Assistant Corporate Comptroller at Cinergy Corp. She began her career with Arthur Andersen & Co. Ms. Hardwick is a Certified Public Accountant. Since September 2020, Ms. Hardwick has served on the Board of Directors of New Jersey Resources Corporation, a diversified energy services company, where she is currently serving a three-year term expiring in 2027, and since January 1, 2021, she has served as a member of its Audit Committee.
John C. Griffith	58	**President.** Mr. Griffith has served as the Company's President since August 1, 2024, with responsibility for the day-to-day operations of the Company. He joined the Company on May 16, 2022, as its Executive Vice President and Chief Financial Officer. Prior to joining the Company, since 2014, Mr. Griffith served as Managing Director, Mergers and Acquisitions, for Bank of America Securities' Global Regulated Utilities and Renewable Energy practice. Prior to joining Bank of America Securities, from 2008 to 2014, Mr. Griffith served as the Chief Executive Officer of HighWave Energy, a renewable fuels start-up company, and from 1995 to 2008, he served in various capacities of increasing responsibility with Merrill Lynch & Co.
David M. Bowler	46	**Executive Vice President and Chief Financial Officer.** Mr. Bowler has served as the Company's Executive Vice President and Chief Financial Officer since August 1, 2024, and as Senior Vice President, Deputy Chief Financial Officer and Treasurer from October 31, 2022 to August 1, 2024. Mr. Bowler joined the Company in May 2020 as its Senior Vice President of Corporate Tax, Accounting Technology and Regulatory Services, and served as Senior Vice President of Planning, Regulatory and Financial Services from July 2021 to November 2022. Prior to joining the Company, Mr. Bowler served as Director of Finance and Accounting Integration at CenterPoint from February 2019 to April 2020, and in a number of roles of increasing responsibility, most recently as Vice President, Controller and Assistant Treasurer at Vectren from January 2007 to February 2019. Mr. Bowler is a Certified Public Accountant.

Name	Age	Office and Experience
Maureen Duffy	55	**Executive Vice President, Communications and External Affairs**. Ms. Duffy has served as the Company's Executive Vice President, Communications and External Affairs since October 29, 2024 and has had over 25 years of employment with the Company. Ms. Duffy served as the Company's Senior Vice President, Communications and External Affairs from January 2020 until October 29, 2024, as Vice President, Corporate Communications and Federal Affairs from May 2017 through December 2019, and as Vice President, Corporate Communications and External Affairs from September 2011 to May 2017. She also has held various positions with the Company's New Jersey subsidiary, including Government Affairs/Media Specialist, Communications Manager and Director of Corporate Communications. Prior to joining American Water, Ms. Duffy reported and produced news for WNJN/WNET-TV.
Melanie M. Kennedy	51	**Executive Vice President, Chief Human Resources Officer.** Ms. Kennedy has served as the Company's Executive Vice President, Chief Human Resources Officer since December 2021, and as Senior Vice President, Chief Human Resources Officer from December 2020 to December 2021. Prior to that, she served as the Company's Senior Vice President, Human Resources from March 2017 to December 2020. From August 2014 through February 2017, Ms. Kennedy served as the Company's Vice President, Human Resources, and from August 2012 to August 2014, she served as Director, Human Resources in the Company's Northeast Division. Ms. Kennedy initially joined the Company in 2007, and before that time, she practiced law for nine years.
Stacy A. Mitchell	49	**Executive Vice President and General Counsel.** Ms. Mitchell has served as the Company's Executive Vice President and General Counsel since June 5, 2024. Prior to that, she served as the Company's Senior Vice President and Deputy General Counsel beginning in February 2023. She joined the Company in August 2019 as Vice President and Chief Regulatory Counsel. Prior to joining the Company, Ms. Mitchell served as the Vice President of Rates and Regulatory Affairs at South Jersey Industries, Inc. and its gas utility subsidiary. Prior to that time, she practiced litigation, regulatory and environmental law in private practice for 15 years. Ms. Mitchell serves as a member of the American Water Works Association's Water Utility Council, and as its Treasurer.
Cheryl Norton	60	**Executive Vice President and Chief Operating Officer.** Ms. Norton has 36 years of employment with the Company serving in various roles, including operational leadership, environmental stewardship, laboratory management, and research. She has been serving as the Company's Executive Vice President and Chief Operating Officer since March 2021 and served as its Senior Vice President, Chief Environmental Officer from March 2020 to March 2021. She was also the Company's Senior Vice President, Eastern Division and President of its New Jersey subsidiary from March 2019 to March 2021. Prior to that, Ms. Norton served as President of the Company's Missouri subsidiary from November 2015 to March 2019, and President of its Kentucky subsidiary from January 2011 until November 2015. In addition, Ms. Norton also serves as a member of the Board of Directors of the Water Research Foundation.

Each executive officer is elected annually by the Board of Directors and serves until their respective successor has been elected and qualified or their earlier death, resignation or removal.

Available Information

The Company maintains a website at *https://amwater.com,* an Investor Relations website at *https://ir.amwater.com* and a Sustainability website at *https://ir.amwater.com/sustainability*. Information contained on the Company's websites, including its Sustainability Report and other reports or documents, shall not be deemed incorporated into, or to be a part of, this report, and any website references included herein are not intended to be made through active hyperlinks. The Company recognizes its websites as key channels of distribution to reach public investors and as a means of disclosing information to comply with SEC Regulation FD.

The Company is subject to the reporting requirements of the Exchange Act. The Company files or furnishes annual, quarterly and current reports, proxy statements and other information with the SEC. Readers may obtain a copy of the Company's Annual Reports on Form 10-K, its Quarterly Reports on Form 10-Q or its Current Reports on Form 8-K, or any amendments to them, that are filed with or furnished to the SEC, free of charge, from the Company's Investor Relations website, *https://ir.amwater.com,* as soon as reasonably practicable after the Company files or furnishes the information to the SEC.

The Corporate Governance Guidelines and the charters for each of the standing committees of the Board of Directors, together with the American Water Code of Ethics and additional information regarding the Company's corporate governance, are available on the Company's Investor Relations website, and will be made available, without charge, in print to any shareholder who requests such documents from the Company's Investor Relations Department in writing by mail at American Water Works Company, Inc., 1 Water Street, Camden, NJ, 08102.

ITEM 1A. RISK FACTORS

We operate in a market and regulatory environment that involves significant risks, many of which are beyond our control. In addition to the other information included or incorporated by reference in this Annual Report on Form 10-K, the following material factors should be considered in evaluating our business and future prospects. Any of the following risks, either alone or taken together, could materially and adversely affect our business, financial position, results of operations, cash flows and liquidity.

Risks Related to Our Industry and Business Operations

Our Regulated Businesses are subject to extensive regulation by PUCs and other regulatory agencies, which significantly affects our business, financial condition, results of operations and cash flows. Our Regulated Businesses also may be subject to fines, penalties and other sanctions for an inability to meet these regulatory requirements.

Our Regulated Businesses provide water and wastewater services to our customers through subsidiaries that are subject to regulation by PUCs. This regulation affects the rates we charge our customers and has a significant impact on our business and operations. Generally, PUCs authorize us to charge rates that they determine are sufficient to recover our prudently incurred operating expenses, including, but not limited to, operating and maintenance costs, depreciation, financing costs and taxes, and provide us with the opportunity to earn an appropriate rate of return on invested capital.

Our ability to successfully implement our business plan and strategy depends on the rates authorized by the various PUCs. We periodically file rate increase applications with PUCs. The ensuing administrative process may be lengthy and costly. Our rate increase requests may or may not be approved, or may be partially approved, and any approval may not occur in a timely manner. Moreover, a PUC may not approve a rate request in an amount that is sufficient to:

- recover our cost of operations, including: purchased water; chemicals; and fuel, power and other commodities used in our operations;
- recover our operational labor and labor-related expenses, including without limitation costs and expenses associated with our pension and other post-employment benefits;
- enable us to recover our investment; and
- provide us with an opportunity to earn an appropriate rate of return on our investment.

Approval by the PUCs is also required in connection with other aspects of our Regulated Businesses, which are required to have numerous permits, approvals and CPCNs from the PUCs that regulate their businesses and authorize acquisitions, dispositions, debt and/or equity financing, and, in certain cases, affiliated transactions. Some PUCs are empowered to impose financial penalties, fines and other sanctions for non-compliance with applicable rules and regulations. Although we believe that each utility subsidiary has obtained or sought renewal of the material permits, approvals and certificates necessary for its existing operations, we are unable to predict the impact that future regulatory activities may have on our business.

In any of these cases, our business, financial condition, results of operations, cash flows and liquidity may be adversely affected. Even if the rates approved are sufficient, we face the risk that we will not achieve the rates of return on equity permitted by PUCs. This could occur if certain conditions exist, including, but not limited to, (i) water usage is less than the level anticipated in establishing rates, (ii) customers increase their conservation efforts, (iii) we experience unusual or emergent situations, events or conditions, (iv) we experience a significant increase in customers without recovery of the operating and other costs associated with serving them, or a decrease in customers that causes a decrease in operating revenue, or (v) our investments or expenses prove to be higher than the levels estimated in establishing rates. It may be difficult to predict the outcome or impact of these events on us or the actions that may be taken by the PUCs or other governmental authorities in response thereto.

Our operations and the quality of water we supply are subject to extensive and increasingly stringent environmental, water quality and health and safety laws and regulations, including with respect to contaminants of emerging concern, compliance with which could impact both our operating costs and capital expenditures, and violations of which could subject us to substantial liabilities and costs, as well as damage to our reputation.

Our water and wastewater operations are subject to extensive federal, state and local laws and regulations. These requirements include, among others, CERCLA, the Clean Water Act, the Safe Drinking Water Act, the LCR (as amended), and each of their implementing rules and regulations, as well as other federal and state requirements. For example, PUCs and environmental regulators set conditions and standards for the water and wastewater services we deliver. We are also required to obtain various environmental permits from regulatory agencies for our operations. If the water or wastewater services we provide to our customers do not comply with regulatory standards, or otherwise violate environmental laws, regulations or permits, or other health and safety and water quality regulations, we could incur substantial fines, penalties or other sanctions or costs, as well as damage to our reputation, as a result of governmental proceedings and private litigation. In the most serious cases, regulators could reduce requested rate increases or force us to discontinue operations and sell our operating assets to another utility or to a municipality. Given the nature of our business which, in part, involves providing water service for human consumption, any potential non-compliance with, or violation of, environmental, water quality and health and safety laws or regulations would likely pose a more significant risk to us than to a company not similarly involved in the water and wastewater industry. In addition, CERCLA authorizes the EPA to issue orders and bring enforcement actions to compel responsible parties to investigate and take remedial actions with respect to actual or threatened releases of hazardous substances, and can impose joint and several liability, without regard to fault, on responsible parties for the costs thereof. In addition, in April 2024, the EPA issued a final rule designating PFOA and PFOS as hazardous substances under CERCLA. While the EPA has stated that it will focus on holding responsible under CERCLA entities that significantly contributed to the release of PFAS into the environment, it is not yet known whether liability protection will be afforded to passive receivers of PFAS, including water and wastewater utilities.

We incur substantial operating and capital costs on an ongoing basis to comply with environmental, water quality and health and safety laws and regulations. These laws and regulations and their enforcement, have become more stringent over time, and new or stricter requirements, such as the final EPA drinking water regulations for PFAS, the LCRR and the recently implemented LCRI, are expected to increase our costs. For example, the designation of PFOA and PFOS as hazardous substances under CERCLA may impact our ability to dispose of material used to treat impacted systems and may increase our costs as a result. Although we may seek to recover ongoing compliance costs in our Regulated Businesses through customer rates, and certain jurisdictions in which our Regulated Businesses operate have passed laws authorizing recovery of such costs, there can be no guarantee that the various other regulatory PUCs or similar regulatory bodies that govern our Regulated Businesses would approve rate increases that would enable us to recover such costs or that such costs will not materially and adversely affect our financial condition, results of operations, cash flows and liquidity. We may also incur liabilities if, under environmental laws and regulations, we are required to investigate and clean up environmental contamination, including potential releases of certain hazardous chemicals, which are used in our treatment processes, or at off-site locations where we have disposed of residual waste or caused an adverse environmental impact. The discovery of previously unknown conditions, or the imposition of cleanup obligations in the future, including those obligations related to the disposal of PFAS residuals and other waste, could result in significant costs and could adversely affect our financial condition, results of operations, cash flows and liquidity. Such remediation costs may not be covered by insurance and may make it difficult for us to secure insurance at acceptable rates in the future.

Attention is being given to contaminants of emerging concern, including, without limitation, chemicals and other substances that currently do not have any regulatory standard in drinking water or have been recently created or discovered (including by means of scientific achievements in the analysis and detection of trace amounts of substances). We rely upon governmental agencies to set appropriate regulatory standards to protect

the public from these and other contaminants, and our role is to provide service that meets these standards, if any. In some of our states, PUCs may disapprove of cost recovery, in whole or in part, for implementation of treatment infrastructure for a contaminant in the absence of a regulatory standard. Furthermore, given the rapid pace at which these contaminants are being created and/or discovered, we may not be able to detect and/or mitigate all such substances in our drinking water system or supplies, which could have a material adverse impact on our financial condition, results of operations and reputation. In addition, we believe these contaminants will continue to form the basis for additional or increased federal or state regulatory initiatives and requirements in the future, which could significantly increase the cost of our operations.

Limitations on availability of water supplies or restrictions on our use of water supplies because of government regulation or action may adversely affect our access to sources of water, our ability to supply water to customers or the demand for our water services.

Our ability to meet the existing and future demand of our customers depends on the availability of an adequate supply of water. As a general rule, sources of public water supply, including rivers, lakes, streams, groundwater aquifers and recycled water sources, are held in the public trust and are not generally owned by private interests. As a result, we typically do not own the source water that we use in our operations, and the availability of our water supply is established through allocation rights (determined by legislation or court decisions) and passing-flow requirements set by governmental entities or by entering into water purchase agreements. These requirements, which can change from time to time, and vary by state or region, may adversely impact our water supply. Supply issues, such as drought, overuse of sources of water, the protection of threatened species or habitats, contamination or other factors may limit the availability of ground and surface water. If we are unable to secure available or alternative sources of water, our business, financial condition, results of operations and cash flows could be adversely affected.

For example, in our Monterey County, California operations, we are seeking to augment our sources of water supply, principally to comply with the cease and desist orders issued by the SWRCB in July 1995 and October 2009 (the "1995 Order," the "2009 Order" and, as amended in July 2016, the "2016 Order" and, collectively, the "Orders") that require Cal Am to significantly decrease its diversions from the Carmel River. See Item 3—Legal Proceedings—Alternative Water Supply in Lieu of Carmel River Diversions, which includes additional information regarding this matter. While the Company cannot currently predict the likelihood or result of any adverse outcome associated with these matters, further attempts to comply with the Orders may result in material additional costs or obligations, including fines and penalties against Cal Am in the event of noncompliance with the Orders, which could have a material adverse effect upon us and our business, results of operations and cash flows.

Service disruptions caused by severe weather conditions, climate variability patterns or natural or other disasters may disrupt our operations or reduce the demand for our water and wastewater services, which could adversely affect our financial condition, results of operations, cash flows and liquidity.

Service interruptions due to severe weather, climate variability patterns and natural or other events are possible across all our businesses. These include, among other things, storms, ice or freezing conditions, high rainfall and wind conditions, hurricanes, tornadoes, earthquakes, landslides, drought, wildfires, coastal and intercoastal floods or high water conditions, including those in or near designated flood plains, pandemics and epidemics, severe electrical storms, sinkholes, solar flares and chemical spills or other contamination causing temporary unavailability of our source water supplies. Weather and other natural events such as these may affect the condition or operability of our facilities, limiting or preventing us from delivering water or wastewater services to our customers, or requiring us to make substantial capital expenditures to repair any damage. Tariffs in place or cost recovery proceedings with respect to our Regulated Businesses may not provide reimbursement to us, in whole or in part, for any of these impacts.

Government restrictions on water use may also result in decreased use of water and wastewater services, even if our water supplies are sufficient to serve our customers, which may adversely affect our financial

condition, results of operations and cash flows. Seasonal and other drought conditions, such as those experienced during 2024 in New Jersey, for example, that may impact our water services are possible across all of our service areas. Governmental restrictions imposed in response to a drought may apply to all systems within a region independent of the supply adequacy of any individual system. Responses may range from voluntary to mandatory water use restrictions (including those mandated in New Jersey in 2024), rationing restrictions, water conservation regulations, and requirements to minimize water system leaks. While expenses incurred in implementing water conservation and rationing plans may generally be recoverable provided the relevant PUC determines they were reasonable and prudent, we cannot be certain that any such expenses incurred will, in fact, be fully recovered. Moreover, reductions in water consumption, including those resulting from installation of equipment or changed consumer behavior, may persist even after a drought has ended and restrictions are lifted, which could adversely affect our business, financial condition, results of operations and cash flows.

Climate variability may cause increased volatility in weather and may impact water usage and related revenue or require additional expenditures, all of which may not be fully recoverable in rates or otherwise.

The issue of climate variability is receiving increasing attention nationally and worldwide. There is consensus among climate scientists that there will be worsening of weather volatility in the future associated with climate variability. Many climate variability predictions present several potential challenges to water and wastewater utilities, including us, such as:

- increased frequency and duration of droughts;
- increased precipitation and flooding;
- increased frequency and severity of storms and other weather events;
- challenges associated with changes in temperature or increases in ocean levels;
- potential degradation of water quality;
- decreases in available water supply and changes in water usage patterns;
- increases in the number, length and severity of disruptions in service;
- increased costs to repair damaged facilities; or
- increased costs to reduce risks associated with the increasing frequency and severity of natural events, including to improve the resiliency and reliability of our water and wastewater treatment and conveyance facilities and systems.

Because of the uncertainty of weather volatility related to climate variability, we cannot predict its potential impact on our business, financial condition, results of operations, cash flows and liquidity. Furthermore, both Federal and state laws and regulations have been enacted or proposed that seek to reduce or limit greenhouse gas emissions and require or would require additional reporting, monitoring and disclosure, and these regulations may become more pervasive or stringent in light of changing governmental agendas and priorities, although the exact nature and timing of these changes is uncertain. Although some or all potential expenditures and costs associated with the impact of climate variability and related laws and regulations on our Regulated Businesses could be recovered through rates, infrastructure replacement surcharges or other regulatory mechanisms, there can be no assurance that PUCs would authorize rate increases to enable us to recover such expenditures and costs, in whole or in part.

The current regulatory rate setting process may result in a significant delay, also known as "regulatory lag," from the time that we invest in infrastructure improvements, incur increased operating expenses as a result of inflation or other factors, incur increased cost of capital, including as a result of increasing short- and long-term interest rates, or experience declining water usage, to the time at which we can seek to address these events in general rate cases; our inability to mitigate or minimize regulatory lag or the impacts thereof could adversely affect our business.

There is typically a delay, known as "regulatory lag," between the time our Regulated Businesses make a capital investment or incur an operating expense increase, including as a result of inflation or other factors, and the time when those costs are reflected in rates. In addition, billings permitted by PUCs typically are, to a considerable extent, based on the volume of water used in addition to a minimum base rate. Thus, we may experience regulatory lag between the time our revenues are affected by declining usage and the time we are able to adjust the rate per gallon of usage to address declining usage. Our inability to mitigate or reduce regulatory lag or the impacts thereof could have an adverse effect on our financial condition, results of operations, cash flows and liquidity.

We endeavor to mitigate or reduce regulatory lag by pursuing constructive regulatory practices and certain regulatory mechanisms. See Item 1—Business—Regulated Businesses—Regulation and Rate Making for a discussion of these practices and mechanisms. While these practices and mechanisms may serve to mitigate or reduce regulatory lag in certain of our regulated jurisdictions, we continue to seek approval of regulatory practices and mechanisms to mitigate or reduce regulatory lag in other jurisdictions that have not approved them. Furthermore, PUCs may fail to adopt new surcharges or those permitted by applicable law, and existing practices and mechanisms may not continue in their current form, or at all, and we may be unable or become ineligible to continue to utilize them in the future. Although we intend to continue to seek regulatory PUC approval of practices or mechanisms to mitigate or reduce regulatory lag, our efforts may not be successful in whole or in part, and even to the extent successful, our business, financial condition, results of operations, cash flows and liquidity may be materially and adversely affected by regulatory lag.

Changes in laws and regulations can significantly and materially affect our business, financial condition, results of operations, cash flows and liquidity.

The impact of any future revisions or changes in interpretations of existing regulations or the adoption of new laws and regulations applicable to our Regulated Businesses is uncertain. Changes in laws or regulations, the imposition of additional laws and regulations, changes in enforcement practices of regulators, government policies or court decisions can materially affect our operations, results of operations and cash flows. Certain of the individuals who serve as regulators are elected or political appointees. Therefore, elections which result in a change of political administration or new appointments may also result in changes of the individuals who serve as regulators and changes in the policies of the regulatory agencies that they serve. New laws or regulations, new interpretations of existing laws or regulations, changes in agency policy, including those made in response to shifts in public opinion, or conditions imposed during the regulatory hearing process could have the following consequences, among others:

- making it more difficult for us to increase our rates and, as a consequence, to recover our costs or earn our expected rates of return;
- changing the determination of the costs, or the amount of costs, that would be considered recoverable in rate cases and other regulatory proceedings;
- restricting our ability to terminate our services to customers who owe us money for services previously provided or limiting our bill collection efforts;
- requiring us to provide water or wastewater services at reduced rates to certain customers;
- limiting or restricting our ability to acquire water or wastewater systems, purchase or dispose of assets, or issue long-term debt or equity, or making it less cost-effective for us to do so;

- negatively impacting, among other things: (i) tax rates or positions or the deductibility of expenses under federal or state tax laws, (ii) the availability or amount of, or our ability to comply with the terms and conditions of, tax credits or tax abatement benefits, (iii) the amount of taxes owed or paid, including as a result of the CAMT provisions, (iv) the timing of tax effects on rates or (v) the ability to utilize our net operating loss carryforwards;
- increasing the associated costs of, and/or of difficulty complying with, environmental, health, safety, consumer privacy, water quality, and water quality accountability laws and regulations to which our operations are subject;
- changing or placing additional limitations on change in control requirements relating to any concentration of ownership of our common stock;
- making it easier for governmental entities to convert our assets to public ownership via condemnation, eminent domain or other similar process, or for governmental agencies or private plaintiffs to assess liability against us for damages under these or similar processes;
- increasing the costs and/or difficulty of complying with proposed changes to federal contractor affirmative action audits;
- placing limitations, prohibitions or other requirements with respect to the sharing of information and participation in transactions by or between a regulated subsidiary and us or our other affiliates, including Service Company and any of our other subsidiaries;
- restricting or prohibiting our extraction of water from rivers, streams, reservoirs or aquifers; and
- revoking or altering the terms of a CPCN issued to us by a PUC or other governmental authority.

Regulatory and environmental risks associated with the collection, treatment and disposal of wastewater may impose significant costs and liabilities.

The wastewater collection, treatment and disposal operations of our subsidiaries are subject to substantial regulation and involve environmental risks. If collection, treatment or disposal systems fail, overflow, or do not operate properly, untreated or inadequately treated wastewater or other contaminants could spill onto nearby properties or into nearby streams and rivers, causing damage to persons or property, injury to aquatic life and economic damages. This risk is most acute during periods of substantial rainfall or flooding, which are the main causes of sewer overflow and system failure. Liabilities resulting from such damage could adversely and materially affect our business, financial condition, results of operations and cash flows. Some of our wastewater systems have commercial and industrial customers that are subject to specific limitations on the type, character and concentration of the wastewater they are permitted to discharge into our systems. The failure by these commercial and industrial customers to comply with their respective discharge requirements could, in turn, negatively impact our operations, damage our facilities or cause us to exceed applicable discharge limitations and requirements. Liabilities resulting from such exceedance events could adversely and materially affect our business, financial condition, results of operations and cash flows.

A loss of one or more large industrial or commercial customers could have a material adverse impact upon the results of operations of one or more of our Regulated Businesses.

Adverse economic conditions may cause our customers, particularly industrial and large commercial customers, to curtail operations. A curtailment of operations by such a customer typically results in reduced water usage by that customer. In more severe circumstances, the decline in usage could be permanent. Any decrease in demand resulting from difficult economic conditions affecting these customers could adversely affect our financial condition and results of operations. Tariffs in place with respect to our Regulated Businesses may not reimburse us, in whole or in part, for any of these impacts.

Our Regulated Businesses require significant capital expenditures and may suffer if we fail to secure appropriate funding to make investments, experience increases in short- and long-term interest rates or if we experience delays in completing major capital expenditure projects.

The water and wastewater utility business is capital intensive. We invest significant amounts of capital to add, replace and maintain property, plant and equipment, and to improve aging infrastructure. In 2024, we invested $2.8 billion in net Company-funded capital improvements. The level of capital expenditures necessary to maintain the integrity of our systems will continue into the future and, we believe, will increase. If we are not able to obtain sufficient financing through current or future sources of liquidity, we may be unable to maintain our existing property, plant and equipment, fund our capital investment strategies or expand our rate base to enable us to meet our growth targets. Even with adequate financial resources to make required capital expenditures, we face the additional risk that we will not complete our major capital projects on time, as a result of supply chain interruptions, construction delays, permitting delays, labor shortages or other disruptions, environmental restrictions, legal and regulatory challenges, or other obstacles. Each of these outcomes could adversely affect our business, financial condition, results of operations and cash flows.

Aging infrastructure may lead to service disruptions, property damage and increased capital expenditures and O&M expenses and other costs, all of which could negatively impact our financial results.

We have risks associated with aging infrastructure, including water and sewer mains, pumping stations and water and wastewater treatment facilities. Additionally, we may have limited information regarding buried and newly-acquired assets, which could challenge our ability to conduct efficient asset management and maintenance practices. Assets that have aged beyond their expected useful lives may experience a higher rate of failure. Failure of aging infrastructure could result in increased capital expenditures and O&M expenses and other costs. In addition, failure of aging infrastructure may result in property damage, and in safety, environmental and public health impacts. To the extent that any increased costs or expenditures are not fully recovered in rates, our results of operations, liquidity and cash flows could be negatively impacted.

Seasonality could adversely affect the volume of water sold and our revenues.

The volume of water we sell during the warmer months, typically in the summer, is generally greater than during other months, due primarily to increased water usage for irrigation systems, swimming pools, cooling systems and other applications. Throughout the year, and particularly during typically warmer months, the volume of water sold tends to vary with temperature, rainfall levels and rainfall frequency. In the event that temperatures during the typically warmer months are cooler than normal, or if there is more rainfall than normal, the amount of water we sell may decrease and adversely affect our revenues. Two of our regulated jurisdictions currently have a revenue stability mechanism that permit us to recover a portion or all of our authorized revenues in a general rate case, regardless of volumetric consumption. These mechanisms are designed to recognize declining sales resulting from reduced consumption, while providing an incentive for customers to use water more efficiently. In those jurisdictions that have not adopted a revenue stability mechanism, our operating results could continue to be affected by seasonality.

Contamination of water supplies or our water service provided to our customers could result in service limitations and interruptions and exposure to substances not typically found in potable water supplies, and could subject us and our subsidiaries to reductions in usage and other responsive obligations, government enforcement actions, damage to our reputation and private litigation.

The water supplies that flow into our treatment plants or are delivered through our distribution system, or the water service that is provided to our customers, may be subject to contamination, including, among other types, contamination from naturally-occurring compounds, chemicals in groundwater systems, pollution resulting from manufactured sources (such as perchlorate, perfluorinated and polyfluorinated compounds, methyl tertiary butyl ether, 1,4-dioxane, lead and other materials, or chemical spills or other incidents that result in contaminants

entering the water source), and contamination resulting from new and emerging contaminants as well as cyber attacks, possible terrorist attacks or other similar incidents. If one of our water supplies or the water service provided to our customers is contaminated, depending on the nature of the contamination, we may have to take responsive actions that could include, among other things (1) limiting use of the water supply under a "Do Not Use" protective order that enables continuation of basic sanitation and essential fire protection, or (2) interrupting the use of that water supply, in whole or in part, potentially impacting basic sanitation and fire protection needs. If service is disrupted, our financial condition, results of operations, cash flows, liquidity and reputation may be adversely affected. In addition, we may incur significant costs in order to treat the contaminated source through the expansion of our current treatment facilities or the development of new sources of supply or new treatment methods. We may be unable to recover costs associated with treating or decontaminating water supplies through insurance, customer rates, tariffs or contract terms, and any recovery of these costs that we are able to obtain through regulatory proceedings or otherwise may not occur in a timely manner. Moreover, we could be subject to claims for damages arising from government enforcement actions or toxic tort or other lawsuits, including class action lawsuits brought by affected parties, arising out of an interruption of service or human exposure to hazardous substances in our drinking water and water supplies. See Item 3—Legal Proceedings for information on certain pending lawsuits and other proceedings related to interruptions of water service.

Since we are engaged in the business of providing water service to our customers, contamination of the water supply, or the water service provided to our customers, could result in substantial injury or damage to our customers, employees or others and we could be exposed to substantial claims and litigation. Such claims could relate to, among other things, personal injury, loss of life, business interruption and expenses related thereto, property damage, pollution, and environmental damage and may be brought by our customers or third parties. Litigation and regulatory proceedings are subject to inherent uncertainties and unfavorable rulings can and do occur. We may not be protected from these claims or negative impacts of these claims in whole or in part by tariffs or other contract terms. Negative impacts to our reputation may occur even if we are not liable for any contamination or other environmental damage or the consequences arising out of human exposure to contamination or hazardous substances within the water supply or distributed finished drinking water. In addition, insurance coverage may not cover all or a portion of these losses and are subject to deductibles and other limitations. Pending or future claims against us could have a material adverse impact on our business, financial condition, results of operations and cash flows.

We are subject to adverse publicity and reputational risks, which make us vulnerable to negative customer perception and could lead to increased regulatory oversight or sanctions.

Our business and operations have a large direct and indirect customer base and, as a result, we are exposed to public criticism regarding, among other things, the reliability of water service, wastewater and related or ancillary services, the quality of water provided, and the amount, timeliness, content, accuracy and format of bills that are provided for such services. Adverse publicity and negative consumer sentiment arising out of our operations may render legislatures and other governing bodies, PUCs and other regulatory authorities, and government officials less likely to view us in a favorable light, and may cause us to be susceptible to less favorable legislative, regulatory and economic outcomes, as well as increased regulatory investigations or other oversight and more stringent regulatory or economic requirements. Unfavorable regulatory and economic outcomes may include negative investigative conclusions and/or findings, the enactment of more stringent laws and regulations governing our operations and less favorable economic terms in our long-term contracts related to MSG, as well as fines, penalties or other sanctions or requirements. The imposition of any of the foregoing could have a material negative impact on us and our financial condition, results of operations and cash flows.

The failure of, or the requirement to repair, upgrade or dismantle, any of our dams may adversely affect our financial condition, results of operations, cash flows and liquidity.

The properties of our Regulated Businesses segment include 75 dams, the majority of which are earthen dams. The failure of any of these dams could result in personal injury and property damage, including without

limitation downstream property damage, for which we may be liable. The failure of a dam would also adversely affect our ability to supply water in sufficient quantities to our customers and could adversely affect our financial condition and results of operations. Any losses or liabilities incurred due to a failure of one of our dams might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance at acceptable rates in the future.

We also are required from time to time to decommission, repair or upgrade the dams that we own. The cost of such repairs or upgrades can be and has been material. The federal and state agencies that regulate our operations may adopt rules and regulations requiring us to dismantle our dams, which also could entail material costs. Although in most cases the PUC has permitted recovery of expenses and capital investment related to dam rehabilitation, we might not be able to recover costs of repairs, upgrades or dismantling through rates in the future. The inability to recover these costs or delayed recovery of the costs as a result of regulatory lag can affect our financial condition, results of operations, cash flows and liquidity.

Any failure of our network of water and wastewater pipes, water mains and water reservoirs could result in losses and damages that may affect our financial condition and reputation.

Our operating subsidiaries distribute water and collect wastewater through an extensive network of pipes, water and wastewater collection mains and storage systems located across the United States. A failure of major pipes, mains or reservoirs could result in injuries, property and other damage for which we may be liable. The failure of major pipes, mains and reservoirs may also result in the need to shut down some facilities or parts of our network in order to conduct repairs. Such failures and shutdowns may limit our ability to supply water in sufficient quantities to our customers and to meet the water and wastewater delivery requirements prescribed by government regulators, including PUCs with jurisdiction over our operations, and adversely affect our financial condition, results of operations, cash flows, liquidity and reputation. Any business interruption or other losses might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance at acceptable rates in the future. Moreover, to the extent such business interruptions or other losses are not covered by insurance, they may not be recovered through rate adjustments.

An important part of our growth strategy is the acquisition of water and wastewater systems, which involves risks, including competition for acquisition opportunities from other regulated utilities, governmental entities and other buyers, which may hinder or limit our ability to grow our business.

An important element of our growth strategy is the acquisition and optimization of water and wastewater systems to broaden our current, and move into new, service areas. We may not be able to acquire other systems or businesses if we cannot identify suitable acquisition opportunities or reach mutually agreeable terms with acquisition candidates, and whether or not any particular acquisition is successfully completed, these activities are expensive and time consuming and are subject to the availability of capital and personnel resources to complete such acquisitions.

As consolidation activity increases in the water and wastewater industries and competition from other regulated utilities, governmental entities and other strategic and financial buyers continues to increase, the prices for suitable acquisition candidates may increase and our ability to expand through acquisitions may otherwise be limited.

The negotiation and execution of potential acquisitions as well as the integration of acquired systems or businesses with our existing operations could require us to incur significant costs and cause diversion of our management’s time and resources. Future acquisitions by us could result in, among other things:

- unanticipated capital expenditures;
- unanticipated acquisition-related expenses;

- incurrence or assumption of debt, contingent liabilities and environmental liabilities and obligations, including liabilities that were unknown or undisclosed at the time of acquisition;
- failure to sufficiently utilize or apply new or existing fair market value legislation or recover acquisition adjustments or premiums due to unfavorable decisions or interpretations by PUCs, courts and other governmental authorities;
- failure to maintain effective internal control over financial reporting;
- recording goodwill and other intangible assets at values that ultimately may be subject to impairment charges;
- fluctuations in quarterly and/or annual results;
- failure to realize anticipated or perceived benefits and synergies, such as desired return on equity or profitability, cost savings and revenue enhancements; and
- difficulties in integrating or assimilating acquired systems' operations, personnel, benefits, services and systems and water quality, cybersecurity and infrastructure protection measures.

Some or all of these items could have a material adverse effect on our business. In addition, state laws on acquisition treatment or PUC interpretation thereof may affect our ability to recover costs associated with our investments in newly-acquired water and wastewater systems and any difficulties we encounter in the negotiation, execution or integration process could have a material adverse impact on our results of operations, reduce our net income and profitability or adversely affect our internal control over financial reporting.

Our Regulated Businesses are subject to condemnation and other proceedings through eminent domain or other similar authorized process, which could materially and adversely affect their results of operations and financial condition.

Municipalities and other government subdivisions have historically been involved in the provision of water and wastewater services in the United States, and organized efforts may arise from time to time in one or more of the service areas in which our Regulated Businesses operate to convert our assets to public ownership and operation through exercise of the governmental power of eminent domain, or another similar authorized process. A municipality, other government subdivision or a citizen group may seek to acquire our assets through eminent domain or such other process, either directly or indirectly as a result of a citizen petition. For example, on December 15, 2023, the MPWMD filed eminent domain litigation against Cal Am in Monterey County Superior Court with respect to the Monterey system assets and the case is pending. See Item 3—Legal Proceedings—Proposed Acquisition of Monterey System Assets—Potential Condemnation for additional information regarding this matter.

Furthermore, the law in certain jurisdictions in which our Regulated Businesses operate provides for eminent domain rights allowing private property owners to file a lawsuit to seek just compensation against a public utility, if the public utility's infrastructure has been determined to be a substantial cause of damage to that property. In these actions, the plaintiff would not have to prove that the public utility acted negligently. In California, lawsuits have been filed in connection with large-scale natural events such as wildfires. Some of these lawsuits have included allegations that infrastructure of certain utilities triggered the natural event that resulted in damage to the property. In some cases, the PUC has disallowed recovery in rates of losses incurred by these utilities as a result of such lawsuits.

Contesting an exercise of condemnation, eminent domain or other similar process, or responding to a citizen petition, may result in costly legal proceedings and may divert the attention of management. Moreover, our efforts to resist the condemnation, eminent domain or other process may not be successful, which may require us to sell the operations at issue in a condemnation proceeding or to pay a private property owner compensation for the property damage suffered. If a municipality or other government subdivision succeeds in acquiring the assets

of one or more of our Regulated Businesses through eminent domain or other process, there is a risk that we will not receive adequate compensation for the business, that we will not be able to keep the compensation, or that we will not be able to divest the business without incurring significant charges. Any of these outcomes may have a material adverse effect on our business, results of operations, financial condition, cash flows and liquidity.

We have been, and may in the future be, subject to physical and cyber attacks.

As owners and operators of critical infrastructure, we face a heightened risk of physical attack and cyber attacks from internal or external sources, including nation-state cyber actors. Our water and wastewater systems have been, and may in the future be, vulnerable to disability or failures as a result of physical or cyber attacks, acts of war or terrorism, vandalism and other causes. By way of example, on October 3, 2024, we identified unauthorized activity within our information technology computer networks and systems, which we determined to be the result of a cybersecurity incident. See Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations—Other Matters—Cybersecurity Incident, for more information regarding this incident. Our operational and information technology systems are also vulnerable to unauthorized external or internal access, due to hacking, viruses, social engineering attacks, acts of violence, war or terrorism, and other causes. Unauthorized access to confidential information located or stored on these systems could negatively and materially impact our reputation, customers, employees, suppliers and other third parties. Such unauthorized access could be caused through, among other causes, failure to follow established policies and procedures on the part of our employees, agents, vendors, suppliers, contractors or other third parties. Further, third parties, including vendors, suppliers and contractors, who perform certain services for us or administer and maintain our networks and sensitive information, have been, and may in the future be, targets of cyber attacks and unauthorized access to their operational or information technology systems, and any cyber incident affecting our third-party business partners could significantly disrupt our operations.

While we believe that we have appropriate security measures and safeguards to protect our operational and information technology systems, the recent cybersecurity incident that we experienced in October 2024 demonstrated that those protections alone may not prevent a cyber attack, and we cannot guarantee that such protections will be completely successful in preventing or mitigating a future cyber attack. The Company has completed its investigation into the scope, nature and impact of the cybersecurity incident and determined the incident did not have a material effect on the Company or its financial condition or results of operations; however, the Company remains subject to various risks as a result of this incident, including those related to litigation, governmental and regulatory scrutiny, including from putative class action lawsuits that have been filed in connection with the recent incident. See Item 3—Legal Proceedings—Cybersecurity Incident Class Action Lawsuits.

Future cybersecurity events could cause our operations to be disrupted, property to be damaged, and customer and other confidential information to be lost or stolen; we could experience substantial loss of revenues, response costs and other financial loss; we would likely suffer a loss or redirection of management time, attention and resources from our regular business operations; we may be subject to increased regulatory requirements; our ability to comply with environmental standards and to continue to provide reliable service to our customers may be impacted; we would likely experience litigation and other claims against us; and we may suffer damage to our reputation, any of which could have a negative impact on our business, financial condition, results of operations and cash flows. Applicable laws and regulations or contracts may require us to report cybersecurity events or breaches of securely maintained confidential data, which may cause us to incur costs related to legal claims or proceedings and regulatory fines or penalties. These types of events, and their resulting impacts, either to our facilities or assets, those of third parties, or the industry in general, may also cause us to incur additional security and insurance related costs. In addition, in the ordinary course of business, we collect and retain sensitive information, including personally identifiable information, about our customers and employees. In many cases, we outsource administration of certain functions to vendors that have been and will continue to be targets of cyber attacks. Any theft, loss or fraudulent use of customer, employee or proprietary data as a result of a cyber attack on us or a vendor, supplier, contractor or other third-party business partner could

also subject us to significant litigation, liability and costs, as well as adversely impact our reputation with customers and regulators, among others.

We have obtained insurance to provide coverage for a portion of the losses and damages that may result from a physical attack, cyber attack or a security breach, but such insurance is subject to a number of exclusions and may not cover the total loss or damage caused by an attack or a breach. We have incurred, and may continue to incur, certain expenses related to the October 2024 cybersecurity incident, and we maintain a cybersecurity insurance policy as part of our overall insurance program. However, adequate insurance may not be available at rates that we believe are reasonable, and the costs of responding to and recovering from a physical attack, cyber attack or security breach incident may not, in whole or in part, be covered by insurance or recoverable in rates. See Item 1A—Risk Factors Risks Related to our Industry and Business Operations—We may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured, below for more information.

Our business is subject to complex and evolving federal, state and local laws and regulations regarding consumer privacy and the protection or transfer of data relating to individuals, which could result in, among other things, public disclosure of incidents, private or governmental claims or litigation against us, changes to our business practices, monetary penalties, reputational harm and increased cost of operations.

Laws and regulations are changing and increasing rapidly with respect to data and consumer privacy, security and protection. We are subject to an increasing number of complex and continually evolving data and consumer privacy, security and protection laws and regulations administered by various federal, state and local governments, including, for example, the California Privacy Rights Act, together with its amendments and implementing regulations, the Virginia Consumer Data Protection Act and the Cyber Incident Reporting for Critical Infrastructure Act of 2022. New laws and regulations may require us to disclose incidents to authorities, regulators and/or the public, when we otherwise may not have been required to disclose such incidents under previous laws and regulations, and such disclosures could negatively and materially impact our reputation, customers, employees, suppliers and other third parties. Federal and state governments have also adopted or are proposing other limitations on, or requirements regarding, the collection, distribution, use, security and storage of personally identifiable information. In addition, the Federal Trade Commission and state attorneys general are applying federal and state consumer protection laws to impose standards on the collection, use and dissemination of data. Moreover, we expect that current laws, regulations and industry standards concerning privacy, data protection and information security in the United States will continue to evolve and increase, and we cannot determine the impact that compliance with such future laws, regulations or standards will have on us or on our business. Any failure or perceived failure by us to comply with current or future federal, state, or local data or consumer privacy or security laws, regulations, policies, guidance, industry standards, or legal obligations, or any incident resulting in unauthorized access to, or the acquisition, release, or transfer of, personally identifiable information or other data relating to our customers, employees and others, may result in private or governmental enforcement actions, litigation, including, for example, from putative class action lawsuits filed in connection with our recent cybersecurity incident, or other claims against us, fines and penalties, or adverse perception or publicity about us and our businesses. See Item 3—Legal Proceedings—Cybersecurity Incident Class Action Lawsuits. These events could also require us to change our business practices, and the events or such changes may result in significant diversions of resources, distract management and divert the focus and attention of our security and technical personnel from other critical activities. Any of the foregoing consequences could have a material adverse effect on our business, reputation, financial condition, results of operations, cash flows and liquidity.

We may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured.

We maintain insurance coverage, some of which may be self-insured, as part of our overall legal and risk management strategy to minimize potential liabilities arising from our operations. Our insurance programs have

varying coverage limits, exclusions and maximums, and insurance companies may seek to deny claims we might make. Generally, our insurance policies cover property damage, worker's compensation, employer's liability, general liability, cybersecurity, terrorism risks and automobile liability. Each policy includes deductibles or self-insured retentions and policy limits for covered claims. As a result, we may sustain losses that exceed or that are excluded from our insurance coverage, or for which we are self-insured and must therefore utilize our own financial resources to cover such losses. Although in the past we have been generally able to obtain insurance coverage related to our business, there can be no assurance that we can secure all necessary or appropriate insurance in the future, or that such insurance can be economically secured. For example, catastrophic events can result in decreased coverage limits, more limited coverage, increased premium costs or deductibles.

We rely on technology to facilitate the management of our business as well as our customer and supplier relationships, and a failure or disruption of implemented technology could materially and adversely affect our business.

Technology is an integral part of our business and operations, and any failure or disruption of the technology or related systems we implement, including as a result of a cyber incident, could significantly limit our ability to manage and operate our business effectively and efficiently, which, in turn, could cause our business and competitive position to suffer and adversely affect our results of operations. We use technology systems to, among other things, obtain meter readings, bill customers, process orders, provide customer service, and manage certain plant operations and construction projects, including systems to support environmental compliance, provide for the safety of the water distributed to customers, create and manage our financial records and other operational data, track assets, remotely monitor our plants and facilities, and manage human resources, supply chain, inventory, and accounts receivable collections. In addition, we have invested resources to develop and adopt new technologies, including cloud-based systems, which rely on the security of our infrastructure, including hardware and other components provided by third parties, to support the reliability of our services and protect our data. While any failures that we have experienced have not to date had a material adverse effect on our operations, there can be no assurance that efforts to address performance failures or other issues we may experience with implemented technology will be successful in the future and that these or future failures of water meters or other technological issues will not have a material adverse effect on us.

Although we do not believe that the technology we have implemented or may in the future implement is at a materially greater risk of failure than that used by other similar organizations, our technology and operations that use or rely on technology, including cloud-based systems, remain vulnerable to damage or interruption from, among other things: failure or interruption of the technology or its related systems; loss or failure of power, internet, telecommunications or data network systems; and operator error or improper operation by, the negligent or improper supervision of, or the intentional acts of, employees, contractors and other third parties. Any or all of these events could have a material adverse impact on our business, results of operations, financial condition and cash flows.

An inability to successfully develop and implement new technologies poses substantial risks to our business and operational excellence strategies, which could have a material adverse effect on our business and financial results.

A significant part of our long-term strategic plan focuses on safety, operational excellence, cost and expense efficiency (including O&M expense efficiency), water quality and affordability, asset and capital management and the customer experience. For example, we have made and plan to continue to make significant investments in developing, deploying, integrating, enhancing and maintaining customer-facing technologies, applications to support field service and customer service operations, water source monitoring technologies, meter data management and analytics, and intelligent automation technologies. There can be no assurance that we will be successful in designing, developing, deploying, integrating or maintaining these new technologies. Because these efforts can be long-term in nature, these new technologies may be more costly or time-consuming than expected to design, develop, integrate and complete and may not ultimately deliver the expected or desired benefits upon

completion. While we have and will continue to seek to recover costs and earn a return on capital expenditures with respect to the costs and expenses of development and deployment of these new technologies in our Regulated Businesses, there can be no assurance that we will be able to do so in every instance or at all, and our inability to do so may adversely affect our ability to achieve intended cost and expense, including O&M expense, efficiencies or other key performance results and, ultimately, could materially and adversely impact our business, financial condition, results of operations and cash flows.

Our inability to efficiently upgrade and improve our operational and technology systems, or implement new systems, could result in higher than expected costs or otherwise adversely impact our internal controls environment, operations and profitability.

Upgrades and improvements to computer systems and networks, or the implementation of new systems, may require substantial amounts of management's time and financial resources to complete, and may also result in system or network defects or operational errors due to multiple factors, including employees' ability to effectively use the new or upgraded system. We have implemented, and will continue to implement, technology to improve our business processes and customer interactions (including, without limitation, in connection with the installation or upgrade of our enterprise resource planning systems, and to support our cybersecurity program), and have installed new, and upgraded existing, technology systems. Any technical or other difficulties in upgrading and improving existing or implementing new technology systems may increase costs beyond those anticipated and have an adverse or disruptive effect on our operations and reporting processes, including our internal control over financial reporting. We may also experience difficulties integrating current systems with new or upgraded systems, which may impact our ability to serve our customers effectively or efficiently. Although we make efforts to minimize any adverse impact on our controls, business and operations, we cannot assure that all such impacts have been or will be mitigated, and any such impacts could harm our business (individually or collectively) and have a material adverse effect on our results of operations, financial condition and cash flows.

Disruptions in our supply chain related to goods, such as pipe, chemicals, power and other fuel, equipment, water and other raw materials, and services, could adversely impact our operations and our ability to serve our customers, as well as our financial results.

Our ability to serve our customers and operate our business in compliance with regulatory requirements is dependent upon purchasing or securing necessary goods and services from our suppliers and vendors. These items include but are not limited to contracted services, chemicals, pipe, valves, hydrants, fittings, equipment (including personal protective equipment), water, and power and other fuel. Examples of supply chain disruptions include reduced quantities of goods available in the marketplace, delays in manufacturing or shipping goods, labor shortages at our suppliers or vendors, natural or other disasters and operational impacts to some of our suppliers or vendors. Disruptions in our supply chain related to goods and services have occurred and we anticipate will continue to occur into the foreseeable future.

Supply chain disruptions may cause us to be unable to purchase or otherwise obtain needed goods or services at a reasonable price or at all, and may significantly increase the price of goods and services we may obtain from suppliers and vendors. This, in turn, may adversely impact our operations and our ability to serve our customers in compliance with regulatory requirements, as well as our associated results of operations, cash flows and financial condition. While we attempt to plan for and have contingencies in place to address supply chain disruptions, our mitigation efforts may not be successful or may have further negative impacts on us.

Our business has inherently dangerous work sites. If we fail to maintain safe work sites, we may experience workforce or customer injuries or loss of life, and be exposed to financial losses, including penalties and other liabilities.

Safety is a core value at American Water. Our safety performance and progress to our ultimate desired goal of zero injuries are critical to our ability to carry out our operations effectively and to serve our customers, and thereby, to support our reputation. We maintain health and safety practices to protect our employees, customers, contractors, vendors and the public.

At our business sites, including construction and maintenance sites, our employees, contractors and others are often in close proximity to large mechanical operating equipment, moving vehicles, pressurized water, electric and gas utility lines, below grade trenches and vaults, electrical and pneumatic hazards, fall from height hazards, suspended loads, hazardous chemicals and other regulated materials. On many sites, we are responsible for safety and, accordingly, must implement important safety procedures and practices above governmental regulatory requirements. As an essential business that provides water and wastewater services, we are focused on the health and safety of our employees, contractors, vendors, customers and others who work at or visit our worksites. If the procedures we implement are ineffective or are not followed by our employees, contractors or others, or we fail to implement procedures, our employees, contractors and others may experience illness, or minor, serious or fatal injuries. Even when employees implement all appropriate and effective safety measures and precautions, accidents, injuries and even fatalities can and do occur. See Item 1—Business—Human Capital Resources—Safety First. Unsafe work sites have the potential to increase employee turnover, expose us to litigation and raise our operating costs. Any of the foregoing could result in financial losses, which could have a material adverse impact on our business, financial condition, results of operations and cash flows.

In addition, our operations can involve the delivery, handling, storage, use and disposal of hazardous chemicals, which, if improperly delivered, handled, stored, used or disposed of, or if the location and identification of these chemicals are not reported accurately or timely, serious injury, death, environmental damage or property damage could result, and we could be subjected to fines, penalties or other liabilities. We are also subject to various environmental, transportation and occupational health and safety regulations. Although we maintain functional employee groups whose primary purpose is to implement effective environmental health and safety work procedures and practices throughout our organization, including construction sites and operating facilities, the failure to comply with these regulations or procedures could subject us to liability.

Work stoppages and other labor relations matters could adversely affect our results of operations and the ability to serve our customers.

As of December 31, 2024, approximately 46% of our workforce was represented by unions, and we had 75 collective bargaining agreements in place with 14 different unions representing our unionized employees. These collective bargaining agreements, 25 of which are scheduled to expire during 2025, are subject to periodic renewal and renegotiation. We may not be able to successfully renew or renegotiate these labor contracts, or enter into new agreements, on terms that are acceptable to us. Any negotiations or dispute resolution processes undertaken in connection with our labor contracts could be delayed or affected by labor actions or work stoppages and by external political, economic and social factors. Labor actions, work stoppages or the threat of work stoppages, and our failure to obtain favorable labor contract terms during renegotiations, may disrupt our operations, negatively impact the ability to serve our customers, and result in higher labor costs, which could adversely affect our reputation, financial condition, results of operations, cash flows and liquidity. While we have developed contingency plans to be implemented as necessary if a work stoppage or strike does occur, a strike or work stoppage may have a material adverse impact on our financial position, results of operations and cash flows.

Financial, Economic and Market-Related Risks

Our indebtedness could adversely affect our business and limit our ability to plan for or respond to changes in our business, and we may be unable to generate sufficient cash flows to satisfy our liquidity needs.

As of December 31, 2024, our aggregate long-term and short-term debt balance (including preferred stock with mandatory redemption requirements) was $14.0 billion, and our working capital (defined as current assets less current liabilities) was in a deficit position. Our indebtedness could have important consequences, including:

- limiting our ability to obtain additional financing to fund future working capital requirements or capital expenditures;
- exposing us to interest rate risk with respect to the portion of our indebtedness that bears interest at variable rates;
- limiting our ability to pay dividends on our common stock or make payments in connection with our other obligations;
- impairing our access to the capital markets for debt and equity;
- requiring that an increasing portion of our cash flows from operations be dedicated to the payment of the principal and interest on our debt, thereby reducing funds available for future operations, dividends on our common stock or capital expenditures;
- limiting our ability to take advantage of significant business opportunities, such as acquisition opportunities, and to react to changes in market or industry conditions; and
- placing us at a competitive disadvantage compared to those of our competitors that have less debt.

During 2024, we utilized existing sources of liquidity, such as our current cash balances, cash flows from operations and borrowings under our commercial paper program, to meet our short-term liquidity requirements. We believe that existing sources of liquidity will be sufficient to meet our cash requirements for the foreseeable future. In order to meet our capital expenditure and other operational needs, however, we may be required to borrow additional funds under the revolving credit facility. In the event of a sustained market deterioration, we may need to obtain additional sources of liquidity, which would require us to evaluate available alternatives and take appropriate actions. Moreover, additional borrowings may be required to repay or refinance outstanding indebtedness. Debt maturities and sinking fund payments in 2025, 2026 and 2027 will be $637 million, $1,478 million and $686 million, respectively. We can provide no assurance that we will be able to access the debt or equity capital markets on favorable terms, if at all, to repay or refinance this debt. Moreover, as new debt is added to our current debt levels, the related risks we now face could intensify, limiting our ability to repay or refinance existing debt on favorable terms.

Given our usage of long-term debt as a key component of our capital and investment strategy, one of the principal market risks to which the Company is exposed is changes in interest rates. We have in the past entered into, and in the future may enter into, financial derivative instruments, including without limitation, interest rate swaps, forward starting swaps and U.S. Treasury lock agreements. See Item 7A—Quantitative and Qualitative Disclosures About Market Risk. However, these efforts may not be effective to fully mitigate interest rate risk, and may expose us to other risks and uncertainties, including quarterly “mark to market” valuation risk associated with these instruments, that could negatively and materially affect our financial condition, results of operations and cash flows.

Our ability to pay our expenses and satisfy our debt service obligations depends in significant part on our future performance, which will be affected by the financial, business, economic, competitive, legislative (including tax initiatives and reforms, and other similar legislation or regulation), regulatory and other risk factors described in this section, many of which are beyond our control. If we do not have sufficient cash flows to pay the principal and interest on our outstanding debt, we may be required to refinance all or part of our existing debt, reduce capital investments, sell assets, borrow additional funds or sell additional equity. In addition, if our

business does not generate sufficient cash flows from operations, or if we are unable to incur indebtedness sufficient to enable us to fund our liquidity needs, we may be unable to plan for or respond to changes in our business, which could cause our financial condition, operating results and prospects to be affected materially and adversely.

Our inability to access the debt or equity capital or financial markets or other events could affect our ability to meet our long-term commitments or liquidity needs at reasonable cost, which could adversely affect our financial condition and results of operations.

In addition to cash from operations, during 2024, we relied on a $2.75 billion revolving credit facility, a $2.60 billion commercial paper program, and the debt capital markets, to satisfy our liquidity needs. Historically, we have regularly used our commercial paper program rather than the revolving credit facility as a principal source of short-term borrowing due to the generally more attractive rates we generally could obtain in the commercial paper market. As of December 31, 2024, there were no outstanding borrowings under the revolving credit facility, $880 million of commercial paper outstanding and $82 million in outstanding letters of credit. There can be no assurance that we will be able to continue to access this commercial paper program or revolving credit facility, when, as and if desired, or that the amount of capital available thereunder will be sufficient to meet all of our liquidity needs at a reasonable, or any, cost.

Our ability to comply with covenants in our revolving credit facility and our other consolidated indebtedness is subject to various risks and uncertainties, including events beyond our control. For example, under the terms of the revolving credit facility, our consolidated debt cannot exceed 70% of our consolidated capitalization, as determined under the terms of the facility. If our equity were to decline or debt were to increase to a level that causes us to exceed this limit, lenders under the facility would be entitled to refuse any further extension of credit and to declare all of the outstanding debt thereunder immediately due and payable. Events that could cause a reduction in equity include, without limitation, a significant write-down of our goodwill. To avoid such a default, a waiver or renegotiation of this covenant would be required, which would likely increase funding costs and could result in additional covenants that would restrict our operational and financing flexibility. Even if we are able to comply with this or other covenants, the limitations on our operational and financial flexibility could harm our business by, among other things, limiting our ability to incur indebtedness or reduce equity in connection with financings or other corporate opportunities that we may believe would be in our best interests or the interests of our shareholders to complete.

In order to meet our future capital expenditure needs, we currently plan over the next five years to issue a combination of short-term and long-term debt, as well as additional equity. Disruptions in the debt or equity capital markets or changes in our credit ratings or other events could limit our ability to access capital on terms favorable to us or at all. While the lending banks that participate in the revolving credit facility have to date honored their commitments under those facilities, disruptions in the credit markets, changes in our credit ratings, or deterioration of the banking industry’s financial condition could discourage or prevent lenders from meeting their existing lending commitments, extending the terms of such commitments, or agreeing to new commitments. In such a case, we may not be able to access the commercial paper, debt or equity capital markets, or other sources of potential liquidity, in the future on terms acceptable to us or at all. Furthermore, our inability to maintain, renew or replace commitments under our revolving credit facility could materially increase our cost of capital and adversely affect our financial condition, results of operations and liquidity. Short- or long-term disruptions or volatility in the debt or equity capital and credit markets as a result of economic, legislative, political or other uncertainties, including as a result of changes in U.S. tax and other laws, reduced financing alternatives, or failures of significant financial institutions could adversely affect our access to the capital necessary to provide adequate liquidity for our business. Significant volatility or disruptions in the debt or equity capital or credit markets, or financial institution failures, could require us to take measures to conserve cash until the market stabilizes or until alternative financing can be arranged. Such measures could include delaying or deferring capital expenditures, reducing or suspending dividend payments, and reducing other discretionary expenditures. Finally, even absent significant volatility or disruptions in the capital markets, there can be no

assurance that we will be able to access markets to obtain capital or financing when necessary or desirable and on terms that are reasonable or acceptable to us. The occurrence of any of these circumstances could expose us to increased interest or other expense, require us to institute cash or liquidity conservation measures or otherwise adversely and materially affect our business, financial condition, results of operations, cash flows and liquidity, which may limit or impair our ability to achieve our strategic, business and operational goals and objectives.

The conditional exchange feature of the Exchangeable Senior Notes due 2026, if triggered, may adversely affect our liquidity and financial condition and may dilute the ownership interest of our shareholders or may otherwise depress the price of parent company's common stock.

In June 2023, American Water Capital Corp., our wholly owned finance subsidiary ("AWCC"), issued $1,035 million aggregate principal amount of its 3.625% Exchangeable Senior Notes due 2026 (the "Notes"). See Note 11—Long-Term Debt in the Notes to the Consolidated Financial Statements for a description of the Notes. In the event the conditional exchange feature of the Notes is triggered and one or more holders elect to exchange their Notes, AWCC would be required to settle any exchanged principal through the payment of cash, which could adversely affect our liquidity. In addition, in that case, even if holders do not elect to exchange their Notes, we would be required under applicable accounting rules to reclassify all or a portion of the outstanding principal of the Notes as a current rather than long-term liability, which would result in a material reduction of our net working capital. If AWCC elects to settle the portion, if any, of an exchange obligation in excess of the aggregate principal amount of the Notes being exchanged in shares of parent company common stock or a combination of cash and shares of such common stock, any sales in the public market of the common stock deliverable upon such exchange could adversely affect prevailing market prices of parent company common stock. In addition, the existence of the Notes may encourage short selling by market participants because the exchange of the Notes could be used to satisfy short positions, and any anticipated exchange of the Notes for shares of such common stock could depress the price of such common stock.

Parent company may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds.

Parent company is a holding company and, as such, it has no substantive operations of its own. Substantially all of our consolidated assets are held by subsidiaries. Parent company's ability to meet its financial obligations and to pay dividends on its common stock is primarily dependent on the net income and cash flows of its subsidiaries and their ability to pay upstream dividends or repay indebtedness to parent company. Prior to paying dividends to parent company, our regulated subsidiaries must comply with applicable regulatory restrictions and financial obligations, including, for example, debt service and preferred and preference stock dividends, as well as applicable corporate, tax and other laws and regulations and agreements, and our covenants and other agreements. Our subsidiaries are separate legal entities and have no obligation to pay or upstream dividends to parent company. A failure or inability of any of these subsidiaries to pay such dividends or repay intercompany obligations could have a material adverse impact on our liquidity and parent company's ability to pay dividends on its common stock and meet its other obligations.

We have a significant amount of goodwill and other assets measured and recorded at fair value on a recurring basis, and we may be required to record impairments or changes in fair value to these assets, which may negatively affect our financial condition and results of operations.

Our assets as of December 31, 2024, included $1.1 billion of goodwill and $218 million of total assets measured and recorded at fair value on a recurring basis. The goodwill is primarily associated with the acquisition of American Water by an affiliate of our previous owner in 2003. Goodwill represents the excess of the purchase price the purchaser paid over the fair value of the net tangible and other intangible assets acquired. Goodwill is recorded at fair value on the date of an acquisition and is reviewed annually or more frequently if changes in circumstances indicate the carrying value may not be recoverable. As required by the applicable accounting rules, in the past, we have taken significant non-cash charges to operating results for impairments to

goodwill or other intangible assets, and have recorded changes in fair value of financial instruments and other assets. We may be required to recognize in the future an impairment of goodwill or a change in fair value of financial instruments or certain other assets due to market conditions, other factors related to our performance or the performance of an acquired business, or other circumstances that may impact the fair value of a financial instrument or the other asset. See Note 18—Fair Value of Financial Information in the Notes to the Consolidated Financial Statements for information on the fair value of financial and other assets. These market conditions could include a decline over a period of time of our stock price, a decline over a period of time in valuation multiples of comparable water utilities, market price performance of our common stock that compares unfavorably to our peer companies, decreases in control premiums, or other circumstances. A decline in the results forecasted in our business plan due to events such as changes in rate case results, capital investment budgets or interest rates, could also result in an impairment charge. Recognition of impairments of goodwill and any changes in fair value of other assets would result in a charge to income in the period in which the impairment or change occurred, which may negatively affect our financial condition, results of operations and total capitalization. The effects of any such impairment or change could be material and could make it more difficult to maintain our credit ratings, secure financing on attractive terms, maintain compliance with debt covenants and meet the expectations of our regulators.

Market volatility and other conditions may impact the value of benefit plan assets and liabilities, as well as assumptions related to the benefit plans, which may require us to provide significant additional funding.

The performance of the capital markets affects the values of the assets that are held in trust to satisfy significant future obligations under our pension and postretirement benefit plans. The value of these assets is subject to market fluctuations and volatility, which may cause investment returns to fall below our projected return rates. A decline in the market value of our pension and postretirement benefit plan assets as of the measurement date or a change in the projection of the future return on plan assets can increase the funding requirements under our pension and postretirement benefit plans. Additionally, our pension and postretirement benefit plan liabilities are sensitive to changes in interest rates. Interest rates have experienced volatility and are subject to potential further adjustments based on the actions of the U.S. Federal Reserve, and others. If interest rates are lower at the current measurement date than the prior measurement date, our liabilities would increase, potentially increasing benefit expense and funding requirements. Further, changes in assumptions, such as increases in life expectancy assumptions and increasing trends in health care costs may also increase our funding requirements. Future increases in pension and other postretirement costs as a result of reduced plan assets may not be fully recoverable in rates, in which case our results of operations and financial position could be negatively affected. In addition, market factors can affect assumptions we use in determining funding requirements with respect to our pension and postretirement plans. For example, a relatively modest change in our assumptions regarding discount rates can materially affect our calculation of funding requirements. To the extent that the discount rate used in our assumptions is reduced, our benefit obligations could be materially increased, which could adversely affect our financial position, results of operations and cash flows.

Additional Risks Related to Other Businesses

Parent company provides performance guarantees with respect to certain of the obligations of our Other businesses (primarily MSG), including financial guarantees or deposits, which may adversely affect parent company if the guarantees are successfully enforced.

Under the terms of certain agreements under which our Other businesses, primarily MSG, provide water and wastewater services to municipalities and federal governmental entities, parent company provides guarantees of specified performance obligations, including financial guarantees or deposits. In the event these obligations are not performed, the entity holding the guarantees may seek to enforce the performance commitments against parent company or proceed against the deposit. In that event, our financial condition, results of operations, cash flows and liquidity could be adversely affected. At December 31, 2024, we had remaining performance commitments, as measured by remaining contract revenue, and primarily related to MSG's contracts, totaling

approximately $8.1 billion, of which $1.2 billion are guaranteed by parent company and the remainder is guaranteed by certain wholly owned subsidiaries of parent company. The aggregate amount of remaining performance commitments is likely to increase as the number of military installations served by MSG increases. The presence of these commitments may adversely affect our financial condition and make it more difficult for us to secure financing on attractive terms.

MSG's operations are subject to various risks associated with doing business with the U.S. government.

MSG enters into contracts with the U.S. government for the operation and maintenance of water and wastewater systems, which contracts may be terminated, in whole or in part, prior to the end of the 50-year term for convenience of the U.S. government or as a result of default or non-performance by the subsidiary performing the contract. In addition, the contract price for each of these military contracts is typically subject to either an annual economic price adjustment, or a price redetermination two years after commencement of operations and every three years thereafter. Any early contract termination or unfavorable annual economic price adjustment or price redetermination could adversely affect our financial condition, results of operations and cash flows. Moreover, entering into contracts with the U.S. government subjects us to a number of operational and compliance risks, including dependence on the level of government spending and compliance with and changes in governmental procurement and security (including cybersecurity) regulations. We are subject to potential government investigations of our business practices and compliance with government procurement, security and cybersecurity regulations, which are complex, and compliance with these regulations can be expensive and burdensome. If we were charged with wrongdoing as a result of an investigation, we could be suspended or debarred from bidding on or receiving awards of new contracts with the U.S. government or our existing contracts could be terminated, which could have a material adverse effect on our results of operations and cash flows.

General Risk Factors

New accounting standards or changes to existing accounting standards could materially impact how we report our results of operations, cash flows and financial condition.

Our consolidated financial statements are prepared in accordance with GAAP. The SEC, the Financial Accounting Standards Board and other authoritative bodies or governmental entities may issue new pronouncements or new interpretations of existing accounting standards that may require us to change our accounting policies or critical accounting estimates. These changes are beyond our control, can be difficult to predict and could materially impact how we report our results of operations, cash flows and financial condition. We could be required to apply a new or revised standard retroactively, which could also adversely affect our previously reported results of operations, cash flows and financial condition.

Undetected errors in internal controls and information reporting could result in the disallowance of cost recovery and noncompliant disclosure.

Our internal controls, accounting policies and practices and internal information systems are designed to enable us to capture and process transactions and information in a timely and accurate manner in compliance with GAAP, requirements of applicable tax laws and regulations, federal securities laws and regulations and other laws and regulations applicable to us. We have also implemented corporate governance, internal control and accounting policies and procedures designed to comply with the requirements of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") and relevant SEC rules, as well as other applicable regulations. Management is also responsible for establishing and maintaining internal control over financial reporting and disclosure controls and procedures and is required to assess annually the effectiveness of these controls. While we believe these controls, policies, practices and systems are adequate to verify data integrity, unanticipated or unauthorized actions of employees or temporary lapses in internal controls due to shortfalls in oversight or resource constraints could lead to undetected errors that could result in the disallowance of cost recovery and non-compliant

disclosure and reporting. The consequences of these events could have a negative impact on our results of operations, cash flows and financial condition and could also harm our reputation, increase financing costs or adversely affect our ability to access the capital markets.

Our continued success is dependent upon our ability to attract, hire and retain highly qualified and skilled employees.

The success of our business is dependent upon our ability to attract, hire and retain highly qualified and skilled employees understanding the needs of the communities in which we serve, including engineers and licensed operators, and water quality, regulatory and management professionals, with desired knowledge, experience and expertise. We may face challenges implementing our human capital management, recruitment and employee succession plans to attract and retain employees based on a number of factors, including, among others, market conditions, retirements and geography. If we are unable to meet these human capital resource challenges, our business, financial condition, results of operations and cash flows may be materially and adversely impacted.

Our business may be adversely affected by the intentional or other misconduct of our employees and contractors.

Our Code of Ethics requires employees and contractors to make decisions ethically and in compliance with applicable law and regulatory requirements, and our Code of Ethics and its underlying policies, practices and procedures. All employees are required to complete training on and review the Code of Ethics on an annual basis, and violations of the Code of Ethics could result in disciplinary actions up to, and including, termination. Despite these efforts to prevent misconduct, it is possible for employees or contractors to engage in intentional or other misconduct and violate laws and regulations through, among other things, theft, fraud, misappropriation, bribery, corruption and engaging in conflicts of interest or related person transactions, or otherwise committing serious breaches of our Code of Ethics and our policies, practices and procedures. Intentional or other misconduct by employees or contractors could result in substantial liability, higher costs, increased regulatory scrutiny and significant reputational harm, any of which could have a material adverse effect on our financial condition, results of operations and cash flows.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

The Company's Cybersecurity Program

The Company's cybersecurity program is an integral part of the long-term sustainability and effectiveness of the Company's operational and technology environment. To protect the integrity of its data and operational and technology systems, the Company employs a "defense-in-depth" strategy that uses multiple security measures. This strategy aligns with the National Institute of Standards and Technology Cyber Security Framework and provides preventative, detective, and responsive measures to identify and manage risks. The Company periodically reviews and modifies the implementation of its cybersecurity strategy based on threat trends, program maturity, the results of assessments, and the advice of third-party security consultants.

The Company's cybersecurity program includes the following areas of focus:

- Technology that includes, among other things, encryption, threat management, monitoring, investigation support and backups for physical devices, such as mobile phones and computers, connected to the Company network;

- Identity and access management controls that include, among other things, multi-factor authentication and safeguards associated with granting elevated privileges;
- Proactive cybersecurity processes, including vulnerability scanning, penetration testing and periodic program assessments by outside security consultants and assessors;
- Reactive cybersecurity processes that are regularly evaluated using various incident response and disaster recovery exercises;
- Employee cyber risk awareness and training, including regular simulation exercises with employees, that covers cybersecurity threats and actions to prevent and report attacks; and
- Third-party risk management and security standards, including due diligence, continuous monitoring, cyber risk scoring and contractual obligations, and periodic review of third-party control environments to align the Company's risk exposure with its business requirements and risk tolerances.

Third-Party Relationships

The Company utilizes partners and third-party service providers to help deliver safe and reliable water and wastewater services across its regulated operations and has implemented a third-party risk management program to understand the cybersecurity risks to the Company that may arise out of these third-party relationships. The Company categorizes third-party relationships by risk level, which is determined primarily by the service provided by the third-party and its level of access to the Company's data. Each category has specific cybersecurity controls, data privacy and documentation requirements, which are outlined in the agreement between the Company and the third-party service provider. In addition, the Company evaluates the online security footprint for its service providers at the time of agreement, and on a regular basis, thereafter, depending on the provider's risk level. The Company reviews its agreements with third-party service providers periodically related to terms and conditions governing cybersecurity controls and data privacy. The Company also monitors, as appropriate, risks relating to potential compromises of sensitive Company information through third parties and reevaluates these risks periodically. In addition, the Company obtains annual attestation reports related to data security and privacy from certain third-party providers to further support compliance with industry-standard cybersecurity protocols.

Cybersecurity Risks

Cybersecurity threats are constantly evolving and have and will continue to become more frequent and sophisticated. Although the Company has implemented measures that it believes are reasonable to safeguard its operational and information technology systems and has sought to establish a culture of continuous monitoring and improvement, the evolving and increasingly complex nature of cybersecurity attacks and vulnerabilities means that these protections may not always be effective. By way of example, as previously disclosed, on October 3, 2024, the Company identified unauthorized activity within its information technology computer networks and systems, which was determined to be the result of a cybersecurity incident. To date, the Company has determined that it has not experienced a cybersecurity incident that has resulted in a material impact to the Company's financial condition, results of operations, cash flows, or business strategy. For additional information concerning the October 3, 2024, cybersecurity incident, and cybersecurity-related risks, see Item 1A—Risk Factors—Risks Related to Our Industry and Business Operations—We are, and may in the future be, subject to physical and cyber attacks, and —We may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured; and Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations—Other Matters—Cybersecurity Incident.

Cybersecurity Risk Management and Strategy

The Company has established an enterprise-wide cybersecurity program designed to prevent disruption to critical information systems, minimize the loss or manipulation of sensitive information, and to timely identify,

escalate and promptly remediate and recover from cybersecurity incidents and facilitate compliance with regulatory and disclosure requirements. To oversee cybersecurity risk management, the Company employs a dedicated unit, led by the Company's Chief Information Security Officer ("CISO"), to implement cybersecurity controls, assess and report on cybersecurity risks and consult with the Company's internal Enterprise Risk Management Committee, a decision-making body which supports and oversees the identification, assessment, prioritization, and mitigation strategies for enterprise-level risks, including cybersecurity risks. The CISO has over 25 years of work experience in the information technology, physical security and cybersecurity fields, including previously serving as the Company's Chief Security Officer, and holds the Certified Protection Professional, Professional Certified Investigator and Physical Security Professional certifications from ASIS International. The CISO serves on the Water Sector Coordinating Council ("WSCC"), an advisory body comprised of representatives from various U.S. water and wastewater organizations, which serves as a policy, strategy and coordination mechanism for the water sector on critical infrastructure security and resilience issues. In that role, the CISO partners with representatives from the Department of Homeland Security and the EPA on U.S. water and wastewater sector initiatives. The CISO is also the former Chair of the WSCC, the National Association of Water Companies' Safety and Security Committee, and the ASIS Utility Security Council. The CISO reports directly to the Company's Chief Technology and Information Officer, who is responsible for the Company's information technology program.

The Company's security team provides oversight and policy guidance on physical, cyber and information security, as well as business continuity, throughout the Company's operations. It is responsible for designing, implementing, monitoring and supporting effective physical and technical security controls for the Company's physical assets, business systems and operational technologies. The Company's security team also conducts annual and ongoing cybersecurity awareness training and education for the Company's employees. In 2024, 100% of the Company's active workforce completed mandatory cybersecurity training. By equipping employees with knowledge and skills, the Company strives to cultivate and maintain a cybersecurity-conscious culture within its workforce.

The Company's cybersecurity risk assessment process involves considering risks associated with the nature of its business, receiving and processing inputs from internal and external stakeholders, monitoring industry trends and risks and engaging external advisors, to assist in aligning the Company's cybersecurity processes with industry best practices. Risk assessments are conducted quarterly and annually to evaluate the effectiveness of the Company's existing security controls and serve as the basis for additional safeguards, security controls and measures. Operational and technical security controls are deployed and integrated as safeguards against unauthorized access to the Company's information systems. These controls are aimed at (i) assuring the continuity of business processes that are dependent upon automation, (ii) maintaining the integrity of the Company's data, (iii) supporting regulatory and legislative compliance requirements, and (iv) maintaining safe and reliable service to the Company's customers.

The Company has also implemented a vulnerability assessment program that is reviewed at least annually and more frequently, depending on changes to the risk environment. This process serves as a guiding enterprise-wide framework to outline the scope and procedures of the Company's cybersecurity risk management processes. By prioritizing vulnerability management and continuously evaluating the Company's internal and external environments for vulnerabilities, the Company aims to implement preventative measures to protect its information assets and technology-based infrastructure from cybersecurity threats. This approach helps to reduce the Company's exposure to material cybersecurity threat risks.

Incident Response

The Company utilizes an established internal framework designed to assess promptly the severity and materiality of cybersecurity incidents based on predefined quantitative and qualitative criteria and to determine the appropriate level of response. Incidents are escalated to the relevant management teams based on their severity and materiality for prompt response and mitigation. The Company maintains a standing crisis response

team comprised of individuals from various functional units, including without limitation Information Technology, Legal, Finance, Enterprise Risk Management, Operations and Communications, to respond to cybersecurity and physical security incidents, environmental incidents and health and safety emergencies, among others.

When a cybersecurity incident occurs, the Company establishes a cross-functional incident response team to respond to the specific cybersecurity incident. The incident response team consists of a subset of members from the standing crisis response team, including personnel with the most relevant experience related to the specific incident. This collaborative approach is intended to enable the Company to leverage expertise throughout the business to address cybersecurity events and to evaluate the potential financial, legal, operational and reputational implications of an incident, or series of related incidents. In considering the materiality of an event, related attacks, whether in terms of quantity or impact, are reviewed individually and in the aggregate to determine whether they may have a significant impact on the Company's financial condition, results of operations or business strategy, either quantitatively or qualitatively.

Cybersecurity Governance

The Board of Directors is responsible for oversight of the Company's cybersecurity program and the Company's responses to cybersecurity risk. The Board of Directors has delegated to its SETO Committee responsibility for the oversight and review of technology policy, strategy and governance, and cybersecurity issues that could impact the Company's operational performance or risk profile. The SETO Committee meets at least quarterly and receives reports related to cybersecurity threats, trends and risks, and related mitigation activities. In addition, the SETO Committee and the Board of Directors receive reports of periodic external assessments and internal testing of the effectiveness of the Company's cybersecurity program. The SETO Committee coordinates with the Audit, Finance and Risk Committee, as appropriate, on matters related to cybersecurity risk. The Audit, Finance and Risk Committee is responsible for, among other things, overseeing the adequacy and effectiveness of the Company's system of internal controls and the Company's risk assessment and management strategy, including with respect to cybersecurity risks.

ITEM 2. PROPERTIES

The Company's properties consist primarily of (i) water and wastewater treatment plants, (ii) mains and pipes used for transmission, distribution and collection of water and wastewater, (iii) wells and other sources of water supply, such as reservoirs, (iv) water and wastewater pumping stations, (v) meters and fire hydrants, (vi) general structures, including buildings, dams and treated water storage facilities, (vii) land and easements, (viii) vehicles, (ix) software rights, and (x) other equipment and facilities, the majority of which are used directly in the operation of its systems. Substantially all of the Company's properties are owned by its subsidiaries, with a large percentage subject to liens of its mortgage bonds. A wholly owned subsidiary of parent company owns the Company's corporate headquarters, located in Camden, New Jersey, and the Company and its operating subsidiaries lease office space, equipment and furniture from certain of the Company's wholly owned subsidiaries. These properties are utilized by the Company's directors, officers and staff in the conduct of the business.

The properties of the Company's Regulated Businesses consist mainly of approximately:

- 80 surface water treatment plants;
- 520 groundwater treatment plants;
- 190 wastewater treatment plants;
- 54,500 miles of transmission, distribution and collection mains and pipes;
- 1,200 groundwater wells;

- 1,800 water and wastewater pumping stations;
- 1,100 treated water storage facilities; and
- 75 dams.

The Company has ongoing infrastructure renewal programs in all states in which its Regulated Businesses operate. These programs consist of both the rehabilitation of existing mains and equipment, and the replacement of mains and equipment that have been damaged or have reached, or are near, the end of their useful service lives. The properties within Other consist mainly of office furniture and IT equipment. Approximately 50% of all properties that the Company owns are located in New Jersey and Pennsylvania.

The Company maintains property insurance against loss or damage to its properties by fire or other perils, subject to certain exceptions. For insured losses, the Company is self-insured to the extent that any losses are within the policy deductible or exceed the amount of insurance maintained.

The Company believes that its properties are generally maintained in good operating condition and in accordance with current standards of good water and wastewater industry practice.

ITEM 3. LEGAL PROCEEDINGS

Set forth below is information related to the Company's material pending legal proceedings as of February 19, 2025, other than ordinary routine litigation incidental to the business, required to be disclosed in this Annual Report on Form 10-K. The information below should be read together with Note 16—Commitments and Contingencies in the Notes to the Consolidated Financial Statements. In accordance with the SEC's disclosure rules, the Company has elected to disclose environmental proceedings involving the Company and a governmental authority if the amount of potential monetary sanctions, exclusive of interest and costs, that the Company reasonably believes will result from such proceeding is $1 million or more**.**

Alternative Water Supply in Lieu of Carmel River Diversions

Compliance with SWRCB Orders to Reduce Carmel River Diversions

Under the 2009 Order, Cal Am is required to decrease significantly its yearly diversions of water from the Carmel River according to a set reduction schedule. See Item 1—Business—Regulated Businesses—Water Supply and Wastewater Services and Item 1A—Risk Factors. The 2009 Order responded to claims that Cal Am had not sufficiently implemented actions to terminate its unpermitted diversions of water from the Carmel River as required by the 1995 Order issued by the SWRCB. In July 2016, at the request of Cal Am and several Monterey County government agencies, the SWRCB issued the 2016 Order approving a deadline of December 31, 2021, for Cal Am's compliance with the 2009 Order.

The 2009 Order includes a condition prohibiting Cal Am from diverting water from the Carmel River for new service connections or for any increased use of water at existing service addresses resulting from a change in zoning or use. In 2011, the California Public Utilities Commission (the "CPUC") issued a decision directing modifications in Cal Am's tariffs to recognize the moratorium mandated by the 2009 Order, and directing Cal Am to seek written guidance from the SWRCB with respect to any unresolved issues of interpretation or implementation of this condition. In 2012, the Deputy Director of the SWRCB sent a letter to Cal Am providing an interpretation as to the calculation of a baseline to determine increases in use of water at existing service addresses. In March 2018, the MPWMD adopted a resolution directing Cal Am to interpret the baseline in a manner that conflicts with the SWRCB's written interpretation. In May 2018, Cal Am notified the MPWMD and the SWRCB that it intends to seek declaratory relief concerning the conflicting regulatory interpretations under the 2009 Order. In an attempt to resolve these conflicting interpretations prior to seeking judicial intervention, Cal Am has met with the MPWMD and the SWRCB several times. The SWRCB agreed to circulate revisions to

its 2012 interpretive letter, which would be subject to a public comment period. Any failure to follow the MPWMD's resolution or the SWRCB's written interpretation, despite these conflicting interpretations, could potentially result in fines, penalties and other actions against Cal Am.

Following issuance by the California Coastal Commission (the "Coastal Commission") in November 2022, of a coastal development permit, as described below, Cal Am continues to work constructively with all appropriate agencies to obtain the remaining required permits for the Water Supply Project. However, there can be no assurance that the Water Supply Project in its current configuration will be completed on a timely basis, if ever. For the year ended December 31, 2024, Cal Am has complied with the diversion limitations contained in the 2016 Order. Continued compliance with the diversion limitations in 2025, and future years may be impacted by a number of factors, including without limitation potential recurrence of drought conditions in California and the reduction or exhaustion of water supply reserves, and will require successful development of alternate water supply sources sufficient to meet customer demand. The 2009 Order and the 2016 Order remain in effect until Cal Am certifies to the SWRCB, and the SWRCB concurs, that Cal Am has obtained a permanent supply of water to substitute for past unauthorized Carmel River diversions. While the Company cannot currently predict the likelihood or result of any adverse outcome associated with these matters, further attempts to comply with the 2009 Order and the 2016 Order in the future may result in material additional costs and obligations to Cal Am, including fines and penalties against Cal Am in the event of noncompliance with the 2009 Order and the 2016 Order.

Monterey Peninsula Water Supply Project

CPUC Final Approval of Water Supply Project

Cal Am's ability to move forward on the Water Supply Project is and has been subject to extensive administrative review by the CPUC and other government agencies, obtaining necessary permits, and intervention from other parties. In 2016, the CPUC unanimously approved a final decision to authorize Cal Am to enter into a water purchase agreement for the GWR Project and to construct a pipeline and pump station facilities and recover up to $50 million in associated incurred costs plus AFUDC, subject to meeting certain criteria.

In 2018, the CPUC unanimously approved another final decision finding that the Water Supply Project meets the CPUC's requirements for a CPCN and an additional procedural phase was not necessary to consider alternative projects. The CPUC's 2018 decision concludes that the Water Supply Project is the best project to address estimated future water demands in Monterey, and, in addition to the cost recovery approved in its 2016 decision, adopts Cal Am's cost estimates for the Water Supply Project, which amounted to an aggregate of $279 million plus AFUDC at a rate representative of Cal Am's actual financing costs. The 2018 final decision specifies the procedures for recovery of all of Cal Am's prudently incurred costs associated with the Water Supply Project upon its completion, subject to the frameworks included in the final decision related to cost caps, O&M costs, financing, ratemaking and contingency matters. The reasonableness of the Water Supply Project costs will be reviewed by the CPUC when Cal Am seeks cost recovery for the Water Supply Project. Cal Am is also required to implement mitigation measures to avoid, minimize or offset significant environmental impacts from the construction and operation of the Water Supply Project and comply with a mitigation monitoring and reporting program, a reimbursement agreement for CPUC costs associated with that program, and reporting requirements on plant operations following placement of the Water Supply Project in service. Cal Am has incurred $281 million in aggregate costs as of December 31, 2024, related to the Water Supply Project, which includes $88 million in AFUDC.

In September 2021, Cal Am, Monterey One Water and the MPWMD reached an agreement on Cal Am's purchase of additional water from an expansion to the GWR Project, which is not expected to produce additional water until late 2025 at the earliest. The amended and restated water purchase agreement for the GWR Project expansion is subject to review and approval of the CPUC, and in November 2021, Cal Am filed an application

with the CPUC that sought review and approval of the amended and restated water purchase agreement. Cal Am also requested rate base treatment of the additional capital investment for certain Cal Am facilities required to maximize the water supply from the expansion to the GWR Project and a related Aquifer Storage and Recovery Project, totaling approximately $81 million. This requested amount was in addition to, and consistent in regulatory treatment with, the prior $50 million of cost recovery for facilities associated with the original water purchase agreement, which was approved by the CPUC in its unanimous 2016 final decision.

On December 5, 2022, the CPUC issued a final decision that authorized Cal Am to enter into the amended water purchase agreement, and specifically to increase pumping capacity and reliability of groundwater extraction from the Seaside Groundwater Basin. The final decision sets the cost cap for the proposed facilities at approximately $62 million. Cal Am may seek recovery of amounts above the cost cap in a subsequent rate filing or general rate case. Additionally, the final decision authorizes AFUDC at Cal Am's actual weighted average cost of debt for most of the facilities.

On December 30, 2022, Cal Am filed with the CPUC an application for rehearing of the CPUC's December 5, 2022 final decision, and on March 30, 2023, the CPUC issued a decision denying Cal Am's application for rehearing but adopting its proposed AFUDC for already incurred and future costs. The decision also provided Cal Am the opportunity to serve supplemental testimony to increase its cost cap for certain of the Water Supply Project's extraction wells. The amended water purchase agreement and a memorandum of understanding to negotiate certain milestones related to the expansion of the GWR Project have been signed by the relevant parties. Further hearings were scheduled in a Phase 2 to this CPUC proceeding to focus on updated supply and demand estimates for the Water Supply Project, and Phase 2 testimony was completed in September 2022. On October 23, 2023, a status conference was held to determine procedural steps to conclude the proceeding. Further evidentiary hearings in this proceeding were held in March 2024. This matter remains pending.

While Cal Am believes that its expenditures to date have been prudent and necessary to comply with the 2009 Order and the 2016 Order, as well as relevant final decisions of the CPUC related thereto, Cal Am cannot currently predict its ability to recover all of its costs and expenses associated with the Water Supply Project and there can be no assurance that Cal Am will be able to recover all of such costs and expenses in excess of the $112 million in aggregate construction costs, plus applicable AFUDC, previously approved by the CPUC in its 2016 and December 2022 final decisions, as amended by its March 30, 2023, rehearing decision. See Note 16—Commitments and Contingencies in the Notes to the Consolidated Financial Statements for further discussion.

Coastal Development Permit Application

In 2018, Cal Am submitted a coastal development permit application (the "Marina Application") to the City of Marina (the "City") for those project components of the Water Supply Project located within the City's coastal zone. Members of the City's Planning Commission, as well as City councilpersons, have publicly expressed opposition to the Water Supply Project. In May 2019, the City issued a notice of final local action based upon the denial by the Planning Commission of the Marina Application. Thereafter, Cal Am appealed this decision to the Coastal Commission, as permitted under the City's code and the California Coastal Act. At the same time, Cal Am submitted an application (the "Original Jurisdiction Application") to the Coastal Commission for a coastal development permit for those project components located within the Coastal Commission's original jurisdiction. After Coastal Commission staff issued reports recommending denial of the Original Jurisdiction Application, noting potential impacts on environmentally sensitive habitat areas and wetlands and possible disproportionate impacts to communities of concern, in September 2020, Cal Am withdrew the Original Jurisdiction Application in order to address the staff's environmental justice concerns. In November 2020, Cal Am refiled the Original Jurisdiction Application.

In October 2022, Cal Am announced a phasing plan for the proposed desalination plant component of the Water Supply Project. The desalination plant and slant wells originally approved by the CPUC would produce up

to 6.4 million gallons of desalinated water per day. Under the phased approach, the facilities would initially be constructed to produce up to 4.8 million gallons per day of desalinated water, enough to meet anticipated demand through about 2030, and would limit the number of slant wells initially constructed. As demand increases in the future, desalination facilities would be expanded to meet the additional demand. The phased approach seeks to meet near-term demand by allowing for additional supply as it becomes needed, while also providing an opportunity for regional future public participation and was developed by Cal Am based on feedback received from the community.

In November 2022, the Coastal Commission approved the Marina Application and the Original Jurisdiction Application with respect to the phased development of the proposed desalination plant, subject to compliance with a number of conditions, all of which Cal Am expects to satisfy. Cal Am continues to seek the remaining permits necessary to construct the Water Supply Project.

In December 2022, the City, Marina Coast Water District ("MCWD"), MCWD's groundwater sustainability agency ("GSA"), and the MPWMD jointly filed a petition for writ of mandate in Monterey County Superior Court against the Coastal Commission, alleging that the Coastal Commission violated the California Coastal Act and the California Environmental Quality Act in issuing a coastal development permit to Cal Am for construction of slant wells for the Water Supply Project. Cal Am is named as a real party in interest. On April 24, 2024, the court granted defendants' motion for judgment on the pleadings and dismissed one of MCWD's causes of action in its petition. A trial commenced on December 9, 2024, and further proceedings continued in January 2025. This matter remains pending.

Subject to the impact or resolution of this litigation, construction of the desalination plant is expected to begin in 2025 and the desalination plant is estimated to be in-service by the end of 2027.

Proposed Zoning Changes at CEMEX, Inc. Site for Slant Wells

In August 2018, the City circulated a public review draft of proposed amendments to its local coastal program and zoning ordinance, and placed the matter for consideration on the Planning Commission's agenda for its September 2018 meeting. The proposed amendments would change zoning at a site owned by CEMEX, Inc. ("CEMEX") to open space and restrict future uses, including with respect to Cal Am's planned use of the site for the slant wells for the Water Supply Project. Any change to the City's local coastal program must ultimately be approved by the Coastal Commission. Cal Am, CEMEX and the Coastal Commission each submitted letters opposing the proposed amendments. At its November 2018 meeting, the Planning Commission adopted a resolution recommending that the Marina City Council consider approving the amendments.

In December 2018, the Marina City Council considered the proposed amendments. Cal Am, CEMEX and the Coastal Commission again submitted letters opposing the proposed changes, but the City Council unanimously adopted a resolution amending its local coastal plan and a draft amendment to its zoning ordinance. Changes to the ordinance require a second reading before becoming final, which occurred at the City's December 2018 meeting. The changes to the local coastal plan would need to be submitted to the Coastal Commission for approval; however, the Coastal Commission's November 2022 approval of Cal Am's coastal development permit application has rendered moot the impact of these proposed local coastal program and zoning changes on the issuance of the coastal development permit.

Test Slant Well Permitting

A preliminary step to building the Water Supply Project desalination plant is the construction and operation of a test slant well to confirm the suitability of the property on which intake wells will be located to draw water from under Monterey Bay. In November 2014, the Coastal Commission approved coastal development permits for the test slant well, enabling Cal Am to construct and operate the test slant well. Effective February 28, 2018, test slant well pumping ceased, except for minimal maintenance pumping activities, in accordance with Cal Am's

coastal development permits. Because Cal Am may use the test slant well as one of the slant wells for the Water Supply Project, Cal Am sought and obtained from the Coastal Commission permit amendments to allow the test slant well to remain in place and be maintained until February 28, 2026. A required lease obtained from the California State Lands Commission, as amended, expires on December 16, 2027.

Water Supply Project Land Acquisition and Slant Well Site Use

In July 2017, the Coastal Commission adopted a consent agreement and cease and desist order requiring sand mining operations on the property owned by CEMEX on which intake wells for the Water Supply Project will be located, to cease by the end of 2020 and the property to be sold to either a non-profit or governmental entity. The consent agreement strictly limits future use of the property but preserves Cal Am's existing property rights and allows uses consistent with existing easements and other rights of record. A permanent easement granted by CEMEX to Cal Am was recorded in June 2018 to allow Cal Am access to the property and to construct, operate and maintain the Water Supply Project intake wells. In November 2019, the City notified CEMEX that, based on this permanent easement and Cal Am's proposed use of the site for the intake wells, CEMEX has breached or will soon breach a prior 1996 annexation agreement (to which Cal Am was not a party). The City states that it intends to seek declaratory relief from CEMEX and Cal Am ordering that Cal Am's extraction is limited to 500 acre-feet per year of groundwater, that Cal Am cannot export extracted water out of the basin, and that the permanent easement granted by CEMEX to Cal Am is void. CEMEX has denied the City's claims and requested indemnification from Cal Am under the terms of the permanent easement. Cal Am and CEMEX believe that there is no valid limitation under the annexation agreement on Cal Am's right to pump brackish groundwater and seawater at the site for desalination and use by Cal Am's customers.

In May 2020, the City filed a lawsuit in Monterey County Superior Court, naming Cal Am and CEMEX as defendants, and Monterey County Water Resources Agency ("MCWRA") and MCWD as real parties in interest. The lawsuit, as amended, alleges a claim for breach of contract against CEMEX and seeks declaratory relief to void the permanent easement and prohibiting extraction of water by Cal Am's slant wells at the CEMEX site in excess of 500 acre-feet per year and the export of such water outside the groundwater basin. In November 2020, Cal Am, CEMEX and MCWRA filed demurrers, which were overruled by the court at a hearing held in February 2021.

In August 2020, MCWD filed a cross-complaint in the May 2020 lawsuit against Cal Am, CEMEX and MCWRA, alleging claims for specific performance of certain provisions of the 1996 annexation agreement related to the property owned by CEMEX on which intake wells for the Water Supply Project will be located, as well as claims of water rights, nuisance and unreasonable water use, and seeking additional declaratory relief. Following various rulings on demurrers filed by Cal Am, CEMEX and MCWRA, in February 2021, the court sustained, without leave to amend, the demurrer to MCWD's nuisance claim and overruled the remainder of the demurrers. In October 2021, the court granted a motion filed by Cal Am related to MCWD's cross-complaint, which motion requested a referral of certain issues related to MCWD's water rights and unreasonable use claims to the SWRCB for its expert advisory opinion. The SWRCB held hearings in 2022 and 2023, on the referred issues before its administrative hearing officer. On September 19, 2024, the SWRCB administrative hearing officer sent a letter to the court advising that the full draft report of the SWRCB advisory opinion addressing the questions referred by the court would not be received until at least November 1, 2024. On November 22, 2024, the administrative hearing officer sent a second letter to the court advising that the draft report would be considered for approval at a public meeting of the SWRCB to be held in the first quarter of 2025. On December 31, 2024, an initial draft report was circulated by the SWRCB to the parties for review and comment.

Regional Water Quality Control Board Approval of NPDES Permit Amendment

A requirement of the desalination plant that is a key component of the Water Supply Project is the discharge of brine through Monterey One Water's outfall. As a condition to Cal Am's coastal development permit, an amendment of a NPDES permit must be obtained by Monterey One Water as the outfall owner from the Regional

Water Quality Control Board (the "RWQCB"). The RWQCB must also determine that the proposed brine discharge complies with the desalination facility requirements under the California Ocean Plan. Working in cooperation with Monterey One Water staff and consultants, Cal Am prepared an application for submission to the RWQCB, which application and submission were approved by Monterey One Water's Board on September 30, 2024.

Challenges Related to Compliance with California's Sustainable Groundwater Management Act

Under California's Sustainable Groundwater Management Act ("SGMA") enacted in 2015, groundwater basins designated by the state as critically overdrafted must be managed by a GSA by 2020 in accordance with an approved groundwater sustainability plan ("GSP") designed to achieve sustainability by 2040. Under the SGMA, GSAs have broad powers to achieve sustainability including, but not limited to, regulating groundwater extraction by imposing fees on groundwater extractions and controlling groundwater extractions by regulating, limiting or suspending extractions from wells. The 400-acre CEMEX site overlies a small portion of the 180/400 Subbasin of the Salinas Valley Groundwater Basin; the 84,000-acre 180/400 Subbasin has been designated by the state as critically overdrafted, mainly due to seawater intrusion into the subbasin.

In late 2016, the Salinas Valley Basin Groundwater Sustainability Agency (the "SVBGSA") was formed as a joint powers authority to become the GSA for the Salinas Valley Groundwater Basin and prepare a GSP. In April 2018, the City filed a notice to become the GSA for the CEMEX site, creating an overlap with the SVBGSA's filing for the 180/400 Subbasin. In 2016, the SVBGSA commenced preparation of a GSP covering the entire 180/400 Subbasin, including the CEMEX site, but in August 2019 the City filed a notice that it intends to prepare its own GSP for the CEMEX site with the intent to severely limit or prohibit groundwater pumping at that site. The State Department of Water Resources ("SDWR") has taken the position that until the overlap is resolved, it will not accept the GSP from either agency, placing the subbasin at risk of being placed in a probationary status and subject to state management. In December 2019, the County of Monterey filed its own notice to become the exclusive GSA at the CEMEX site in order to resolve the overlap, which is permitted under SGMA. SDWR accepted Monterey County's filing in December 2019, and now lists Monterey County as the exclusive GSA for the site.

In December 2019, the City filed a lawsuit in Monterey County Superior Court challenging Monterey County's filing, and SDWR's acceptance of the filing, as the exclusive GSA for the CEMEX site. The City has named Monterey County and its Board of Supervisors, its GSA, and SDWR and its director as defendants, and the SVBGSA and its Board of Directors as real parties. The City seeks to invalidate Monterey County's filing, as well as injunctive relief to preserve the City's status as a GSA for the site. To protect its interest in the matter, Cal Am filed an application to intervene in this lawsuit, which was granted. Monterey County filed cross-claims against the City and SDWR. In September 2020, Cal Am filed a separate but related complaint in Monterey County Superior Court challenging the validity of actions taken by the City and its GSA in adopting a groundwater sustainability plan for the CEMEX site, and the validity of the provisions of such plan. Due to the overlap of issues in the City's lawsuit with those in the validation action, the parties stipulated to a stay of the validation action pending determination of the claims in the City's action, which was approved by the court in December 2020. In February 2021, the City filed a separate but related *in rem* reverse validation complaint challenging the adoption by Monterey County of a GSP for the CEMEX site. On May 3, 2023, the City filed a second reverse validation complaint, challenging the adoption of amendments to the GSP for the 180/400 Subbasin.

After a hearing, in August 2021, the court denied the claims brought by the City and granted Monterey County's cross-claims, finding that the City's GSA notice was untimely, the Monterey County GSA was the exclusive GSA for the CEMEX site, and the SVBGSA's GSP was properly adopted for the entire 180/400 Subbasin, including the CEMEX site. In November 2021, the City appealed this decision, and in December 2021, Monterey County appealed the court's decision as to the finding that the City's action creating a GSA was not void. The related validation and reverse validation actions remain stayed during the pendency of the appeal. On

November 13, 2023, the California Court of Appeal affirmed the trial court's decision. On December 22, 2023, the City filed a petition for review with the California Supreme Court, which was denied on February 24, 2024. On October 31, 2024, the parties entered into an agreement settling the stayed validation complaints and all claims for attorneys' fees and costs. The validation complaints were subsequently dismissed.

Cal Am's Action for Damages Following Termination of Regional Desalination Project ("RDP")

In 2010, the CPUC had approved the RDP, which was a precursor to the current Water Supply Project and called for the construction of a desalination facility in the City of Marina. The RDP was to be implemented through a Water Purchase Agreement and ancillary agreements (collectively, the "Agreements") among MCWD, Cal Am and MCWRA. In 2011, due to a conflict of interest concerning a former member of MCWRA's Board of Directors, MCWRA stated that the Agreements were void, and, as a result, Cal Am terminated the Agreements. In ensuing litigation filed by Cal Am in 2012 to resolve the termination of the RDP, the court in 2015 entered a final judgment agreeing with Cal Am's position that four of the five Agreements are void, and one, the credit line agreement, is not void. As a result of this litigation, Cal Am was permitted to institute further proceedings, discussed below, to determine the amount of damages that may be awarded to Cal Am as a result of the failure of the RDP.

In 2015, Cal Am and MCWRA filed a complaint in San Francisco County Superior Court against MCWD and RMC Water and Environment, a private engineering consulting firm ("RMC"), seeking to recover compensatory, consequential and incidental damages associated with the failure of the RDP, as well as punitive and treble damages, statutory penalties and attorneys' fees. In 2019, MCWD was granted a motion for summary judgment related to the tort claims in the complaint. A settlement as to the non-tort claims was finalized and entered into in March 2020, in which MCWD and RMC paid Cal Am an aggregate of $5.2 million to resolve Cal Am's contract claims against MCWD and all claims against RMC relating to the RDP. Under this agreement, Cal Am's and MCWRA's right to appeal the dismissal of their tort claims against MCWD were expressly reserved.

In July 2020, Cal Am appealed the grant of summary judgment on MCWD's tort claims, and in December 2022, the trial court's decision was reversed on appeal with instructions to vacate its prior orders granting MCWD's motions for summary judgment and to enter new orders denying the motions. In February 2023, MCWD filed a petition for review of the appellate decision with the California Supreme Court, which was denied in March 2023. On June 27, 2024, MCWD filed a motion for judgment on the pleadings. Following a hearing, on December 5, 2024, the court granted MCWD's motion without leave to amend, dismissing all of Cal Am's remaining claims. Final judgment was entered on January 7, 2025. Cal Am intends to file a notice of appeal of the trial court's decision.

Proposed Acquisition of Monterey System Assets — Potential Condemnation

Local Agency Formation Commission Litigation

In November 2018, voters in Monterey, California passed "Measure J," which decided that the MPWMD should conduct a feasibility study concerning the potential purchase of Cal Am's Monterey system assets, and, if feasible, to proceed with a purchase of those assets without an additional public vote. This service territory represents approximately 40,000 customers. In 2019, the MPWMD issued a preliminary valuation and cost of service analysis report, finding in part that (i) an estimate of the Monterey system assets' total value plus adjustments would be approximately $513 million, (ii) the cost of service modeling results indicate significant annual reductions in revenue requirements and projected monthly water bills, and (iii) the acquisition of the Monterey system assets by the MPWMD would be economically feasible. In 2020, the MPWMD certified a final environmental impact report, analyzing the environmental impacts of the MPWMD's project to (i) acquire the Monterey system assets through the power of eminent domain, if necessary, and (ii) expand its geographic boundaries to include all parts of this system.

In February 2021, the MPWMD filed an application with the Local Agency Formation Commission of Monterey County ("LAFCO") seeking approval to become a retail water provider and annex approximately 58 parcels of land into the MPWMD's boundaries. In June 2021, LAFCO's commissioners voted to require a third-party independent financial study as to the feasibility of an acquisition by the MPWMD of the Monterey system assets. In December 2021, LAFCO's commissioners denied the MPWMD's application to become a retail water provider, determining that the MPWMD does not have the authority to proceed with a condemnation of the Monterey system assets. In April 2022, the MPWMD filed a lawsuit against LAFCO challenging its decision to deny the MPWMD's application seeking approval to become a retail water provider. In June 2022, the court granted, with conditions, a motion by Cal Am to intervene in the MPWMD's lawsuit against LAFCO. In December 2022, the court sustained in part, and denied in part, demurrers that had been filed by LAFCO seeking to dismiss the MPWMD's lawsuit.

On December 11, 2023, the Monterey County Superior Court issued a writ of mandate directing LAFCO to vacate and set aside its original denial of the MPWMD's application to serve as a retail water provider (in conjunction with its effort to acquire the Monterey system assets) and, if requested, to re-hear the application in compliance with all applicable law. The court held that LAFCO incorrectly applied two statutory standards and noted a lack of sufficient evidence to support certain of LAFCO's factual findings. As a result, the LAFCO denial has been nullified and LAFCO will be required to hold another hearing on the MPWMD's application. On February 8, 2024, and February 9, 2024, respectively, each of Cal Am and LAFCO filed a notice of appeal with the California Court of Appeal regarding the Monterey County Superior Court's decision to issue the writ of mandate. The MPWMD filed a notice of cross-appeal on February 15, 2024. Cal Am is evaluating potential additional actions to seek to uphold LAFCO's denial of the MPWMD's application, including filing other challenges and/or making suitable presentations at a subsequent LAFCO rehearing.

MPWMD Condemnation Action

Separate from the proceedings related to the MPWMD's application with LAFCO, by letter dated October 3, 2022, the MPWMD notified Cal Am of a decision to appraise the Monterey system assets and requested access to a number of Cal Am's properties and documents to assist the MPWMD with such an appraisal. Cal Am responded by letter on October 24, 2022, denying the request for access, stating that the MPWMD does not have the right to appraise Cal Am's system without LAFCO approval to become a retail water provider. On April 28, 2023, Cal Am rejected an offer by the MPWMD to purchase the Monterey system assets for $448.8 million. Over the written and oral objections of Cal Am, at a hearing held on October 10, 2023, the MPWMD adopted a resolution of necessity to authorize it to file an eminent domain lawsuit with respect to the Monterey system assets.

On December 15, 2023, the MPWMD filed a lawsuit against Cal Am in Monterey County Superior Court seeking to condemn the Monterey system assets. On February 26, 2024, Cal Am filed a motion requesting the Monterey County Superior Court dismiss the MPWMD's eminent domain lawsuit seeking to condemn Cal Am's Monterey system assets. Cal Am's motion asserted that the MPWMD lacks legal authorization from both the California legislature and LAFCO to become a retail water provider and the lawsuit improperly seeks to effect a taking of property outside the boundaries of the MPWMD's territory. Hearings on the motion were held on May 3, 2024, and August 23, 2024. On November 14, 2024, the court issued a final ruling denying Cal Am's motion to dismiss. Cal Am filed its answer to the complaint on December 13, 2024. This matter remains pending.

While the Company cannot currently predict the outcome of this lawsuit, the Company believes that, given existing legal authorities and its other defenses, Cal Am should be able to defend itself successfully against the MPWMD's eminent domain lawsuit.

Dunbar, West Virginia Class Action Litigation

On the evening of June 23, 2015, a 36-inch pre-stressed concrete transmission water main, installed in the early 1970s, failed. The water main is part of the West Relay pumping station located in the City of Dunbar, West Virginia and owned by West Virginia-American Water Company, the Company's West Virginia subsidiary

("WVAWC"). The failure of the main caused water outages and low pressure for up to approximately 25,000 WVAWC customers. In the early morning hours of June 25, 2015, crews completed a repair, but that same day, the repair developed a leak. On June 26, 2015, a second repair was completed and service was restored that day to approximately 80% of the impacted customers, and to the remaining approximately 20% by the next morning. The second repair showed signs of leaking but the water main was usable until June 29, 2015, to allow tanks to refill. The system was reconfigured to maintain service to all but approximately 3,000 customers while a final repair was being completed safely on June 30, 2015. Water service was fully restored by July 1, 2015, to all customers affected by this event.

On June 2, 2017, a complaint captioned *Jeffries, et al. v. West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of residents and business owners who lost water service or pressure as a result of the Dunbar main break. The complaint alleges breach of contract by WVAWC for failure to supply water, violation of West Virginia law regarding the sufficiency of WVAWC's facilities and negligence by WVAWC in the design, maintenance and operation of the water system. The *Jeffries* plaintiffs seek unspecified alleged damages on behalf of the class for lost profits, annoyance and inconvenience, and loss of use, as well as punitive damages for willful, reckless and wanton behavior in not addressing the risk of pipe failure and a large outage.

In February 2020, the *Jeffries* plaintiffs filed a motion seeking class certification on the issues of breach of contract and negligence, and to determine the applicability of punitive damages and a multiplier for those damages if imposed. In July 2020, the Circuit Court entered an order granting the *Jeffries* plaintiffs' motion for certification of a class regarding certain liability issues but denying certification of a class to determine a punitive damages multiplier. Trial in this matter had been scheduled for January 2025.

On January 17, 2025, before trial commenced, the parties notified the Circuit Court that an agreement in principle to settle this litigation was reached among the parties. Under the terms of the agreement in principle and any subsequent proposed settlement agreement, WVAWC has not admitted, and will not admit, any fault or liability for any of the allegations made by the *Jeffries* plaintiffs. The proposed maximum pre-tax amount of the settlement is approximately $18 million, of which the Company currently estimates that approximately $5 million would be contributed by the Company and WVAWC, and the remainder would be contributed by certain of the Company's general liability insurance carriers. The actual total amount to be paid to claimants through this settlement will depend upon the claims submitted and approved through a claims process to be negotiated by the parties and approved by the Circuit Court. The parties will next negotiate and enter into a proposed settlement agreement based on the terms of the agreement in principle, and the proposed settlement agreement will be subject to preliminary and final approvals by the Circuit Court.

The final amount of the Company's and WVAWC's contributions to the settlement remains subject to uncertainty; however, the Company does not currently anticipate that Company's maximum liability for the settlement will materially exceed $5 million. As a result, the Company has recorded a charge to earnings, net of insurance receivables, of $5.0 million ($3.9 million after-tax) in the fourth quarter of 2024. The Company intends to fund its and WVAWC's contributions to the settlement through existing sources of liquidity, although no contribution by the Company or WVAWC will be required unless and until a proposed settlement agreement has been entered into and finally approved by the Circuit Court.

Chattanooga, Tennessee Class Action Litigation

On September 12, 2019, Tennessee-American Water Company, the Company's Tennessee subsidiary ("TAWC"), experienced a leak in a 36-inch water transmission main, which caused service fluctuations or interruptions to TAWC customers and the issuance of a boil water notice. TAWC repaired the main by early morning on September 14, 2019, and restored full water service by the afternoon of September 15, 2019, with the boil water notice lifted for all customers on September 16, 2019.

On September 17, 2019, a complaint captioned *Bruce, et al. v. American Water Works Company, Inc., et al.* was filed in the Circuit Court of Hamilton County, Tennessee against TAWC, the Company and Service Company (collectively, the "Tennessee-American Water Defendants"), on behalf of a proposed class of individuals or entities who lost water service or suffered monetary losses as a result of the Chattanooga incident (the "Tennessee Plaintiffs"). The complaint alleged breach of contract and negligence against the Tennessee-American Water Defendants, as well as an equitable remedy of piercing the corporate veil. In the complaint as originally filed, the Tennessee Plaintiffs were seeking an award of unspecified alleged damages for wage losses, business and economic losses, out-of-pocket expenses, loss of use and enjoyment of property and annoyance and inconvenience, as well as punitive damages, attorneys' fees and pre- and post-judgment interest. In September 2020, the court dismissed all of the Tennessee Plaintiffs' claims in their complaint, except for the breach of contract claims against TAWC, which remain pending. In October 2020, TAWC answered the complaint, and the parties have been engaging in discovery. In January 2023, after hearing oral argument, the court issued an oral ruling denying the Tennessee Plaintiffs' motion for class certification. In February 2023, the Tennessee Plaintiffs sought reconsideration of the ruling by the court, and any final ruling is appealable to the Tennessee Court of Appeals, as allowed under Tennessee law. In September 2023, the court upheld its prior ruling but gave the Tennessee Plaintiffs the option to file an amended class definition. In October 2023, the Tennessee Plaintiffs filed an amended class definition seeking certification of a business customer-only class. On June 14, 2024, the court issued its written order denying the Tennessee Plaintiffs' amended class and incorporating its denial of certification of the original residential class. On June 21, 2024, the Tennessee Plaintiffs appealed both of the court's orders denying class certification. This appeal remains pending.

The Company and TAWC believe that TAWC has valid, meritorious defenses to the claims raised in this class action complaint, and TAWC will continue to vigorously defend itself against these allegations.

Mountaineer Gas Company Main Break

During the afternoon of November 10, 2023, WVAWC was informed that an 8-inch ductile iron water main owned by WVAWC, located on the West Side of Charleston, West Virginia and originally installed in approximately 1989, experienced a leak. In the early morning hours of November 11, 2023, WVAWC crews successfully completed a repair to the water main. A precautionary boil water advisory was issued the same day to approximately 300 WVAWC customers and ultimately lifted on November 12, 2023.

On November 10, 2023, a break was reported in a low-pressure natural gas main located near the affected WVAWC water main, and an inflow of water into the natural gas main and associated delivery pipelines occurred. The natural gas main and pipelines are owned by Mountaineer Gas Company, a regulated natural gas distribution company serving over 220,000 customers in West Virginia ("Mountaineer Gas"). The resulting inflow of water into the natural gas main and related pipelines resulted in a loss of natural gas service to approximately 1,500 Mountaineer Gas customers, as well as water entering customer service lines and certain natural gas appliances owned or used by some of the affected Mountaineer Gas customers. Mountaineer Gas reported that restoration of natural gas service to all affected gas mains occurred on November 24, 2023. The timing, order and causation of both the WVAWC water main break and Mountaineer Gas's main break are currently unknown and under investigation.

To date, a total of four pending lawsuits have been filed against Mountaineer Gas and WVAWC purportedly on behalf of customers in Charleston, West Virginia related to these incidents. On November 14, 2023, a complaint captioned *Ruffin et al. v. Mountaineer Gas Company and West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of Mountaineer Gas residential and business customers and other households and businesses supplied with natural gas in Kanawha County, which lost natural gas service on November 10, 2023, as a result of these events. The complaint alleges, among other things, breach of contract by Mountaineer Gas, trespass by WVAWC, nuisance by WVAWC, violation of statutory obligations by Mountaineer Gas and WVAWC, and negligence by Mountaineer Gas and WVAWC. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for loss of use of natural gas, annoyance, inconvenience and lost profits, as well as punitive damages.

On November 15, 2023, a complaint captioned *Toliver et al. v. West Virginia-American Water Company and Mountaineer Gas Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of all natural persons or entities who are citizens of the State of West Virginia and who are customers of WVAWC and/or Mountaineer Gas in the affected areas. The complaint alleges against Mountaineer Gas and WVAWC, among other things, negligence, nuisance, trespass and strict liability, as well as breach of contract against Mountaineer Gas. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for property damage, loss of use and enjoyment of property, annoyance and inconvenience and business losses, as well as punitive damages.

On November 16, 2023, a complaint captioned *Dodson et al. v. West Virginia American Water and Mountaineer Gas Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of all West Virginia citizens living between Pennsylvania Avenue south of Washington Street, and Iowa Street, who are customers of Mountaineer Gas. The complaint alleges against Mountaineer Gas and WVAWC, among other things, negligence, nuisance, trespass, statutory code violations and unfair or deceptive business practices. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for property loss and damage, loss of use and enjoyment of property, mental and emotional distress, and aggravation and inconvenience, as well as punitive damages.

On January 4, 2024, a fourth complaint, captioned *Thomas v. West Virginia-American Water Company and Mountaineer Gas Company*, was filed in West Virginia Circuit Court in Kanawha County asserting similar allegations as those included in the *Ruffin*, *Toliver* and *Dodson* lawsuits, with the addition of counts alleging unjust enrichment and violations of the West Virginia Human Rights Act and the West Virginia Consumer Credit and Protection Act.

On November 17, 2023, the *Ruffin* plaintiff filed a motion to consolidate the class action lawsuits before a single judge in Kanawha County Circuit Court. On June 14, 2024, the judge in the *Ruffin* case partially granted the motion by transferring all of the four class action lawsuits to her court but deferring as premature consolidation of the cases.

On December 5, 2023, a complaint captioned *Mountaineer Gas Company v. West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County seeking damages under theories of trespass, negligence and implied indemnity. The damages being sought related to the incident include, among other things, repair and response costs incurred by Mountaineer Gas and attorneys' fees and expenses incurred by Mountaineer Gas. On December 14, 2023, Mountaineer Gas filed a motion with the Supreme Court of West Virginia to transfer this case to the West Virginia Business Court. On December 29, 2023, WVAWC filed a joinder in the motion to transfer the case. WVAWC has also filed a partial motion to dismiss this lawsuit. On March 6, 2024, the motion to transfer this complaint to the West Virginia Business Court was granted and trial and resolution judges were assigned. Mountaineer Gas voluntarily dismissed its implied indemnity count against WVAWC, rendering moot WVAWC's partial motion to dismiss, and on May 31, 2024, WVAWC answered the complaint. The Business Court has set a trial date of October 7, 2025, for this matter.

On December 20, 2023, Mountaineer Gas filed answers to each of the first three class action lawsuits, which included cross-claims against WVAWC alleging that Mountaineer Gas is without fault for the claims and damages alleged in the lawsuits and WVAWC should be required to indemnify Mountaineer Gas for any damages and for attorneys' fees and expenses incurred by Mountaineer Gas in the lawsuits. WVAWC has filed a partial motion to dismiss certain claims in the *Ruffin, Toliver, Dodson* and *Thomas* lawsuits and a motion to dismiss the cross-claims asserted against WVAWC therein by Mountaineer Gas. Mountaineer Gas subsequently voluntarily dismissed its cross-claims. On January 30, 2024, a motion was filed with the West Virginia Supreme Court on behalf of the *Toliver* plaintiff to refer the four class action complaints and the *Mountaineer Gas* complaint to the West Virginia Mass Litigation Panel. On February 7, 2024, WVAWC filed a motion joining in that referral request. On February 19, 2024, Mountaineer Gas filed a motion opposing the referral of the four class action complaints and the *Mountaineer Gas* complaint to the West Virginia Mass Litigation Panel. On

May 31, 2024, the West Virginia Supreme Court denied the motion seeking referral. The Kanawha County Circuit Court has set a trial date of February 2, 2026, for the class action complaints.

On December 6, 2023, WVAWC initiated a process whereby Mountaineer Gas customers could file claims with WVAWC and seek payment from WVAWC of up to $2,000 in damages per affected household for the inconvenience arising from a loss of use of their appliances and documented out-of-pocket expenses as a result of the natural gas outage. In light of the diminishing number of new claims that had been filed, the claims process was concluded on March 8, 2024. As of December 31, 2024, a total of 594 Mountaineer Gas customers completed this claims process and each of those customers has been paid by WVAWC an average of approximately $1,500. In return, these customers were required to execute a partial release of liability in favor of WVAWC.

On November 16, 2023, the Public Service Commission of West Virginia (the "WVPSC") issued an order initiating a general investigation into both the water main break and natural gas outages occurring in this incident to determine the cause or causes thereof, as well as breaks and outages generally throughout the systems of WVAWC and Mountaineer Gas and the utility practices of both utilities. Following a series of disagreements among the parties regarding the scope of discovery, the WVPSC closed the general investigation into both utilities and ordered a separate general investigation for each utility. The WVPSC focused the two general investigations away from the cause of the events and instead on the maintenance practices of each utility during and after the main breaks. On January 29, 2024, the Consumer Advocate Division of the WVPSC filed a motion to intervene in the WVAWC general investigation.

On April 24, 2024, the staff issued a final joint memorandum in the Mountaineer Gas general investigation stating its view that Mountaineer Gas responded appropriately, reasonably and according to Mountaineer Gas's written procedures. The staff is making no recommendations for improvements to Mountaineer Gas and is recommending that the Mountaineer Gas general investigation be closed. On July 24, 2024, the staff issued a final joint memorandum in the WVAWC general investigation finding no indication of systematic failure by WVAWC and concluding WVAWC's maintenance and operating procedures were adequate to ensure safe and reliable service, subject to the implementation by WVAWC of three recommended operational improvements. Both general investigations remain pending.

The Company and WVAWC believe that the causes of action and other claims asserted against WVAWC in the class action complaints and the lawsuit filed by Mountaineer Gas are without merit and that WVAWC has valid, meritorious defenses to such claims. WVAWC continues to defend itself vigorously in these litigation proceedings. Given the current stage of these proceedings and the general investigation, the Company and WVAWC are currently unable to predict the outcome of any of the proceedings described above.

PFAS Multi-District Litigation

Several of the Company's utility subsidiaries are parties to a multi-district litigation (the "MDL") lawsuit, which commenced on December 7, 2018, in U.S. District Court for the District of South Carolina, against manufacturers of certain PFAS for damages, contribution and reimbursement of costs incurred and continuing to be incurred to address the presence of such PFAS in public water supply systems owned and operated by these utility subsidiaries and throughout their service areas. Settlements with several defendants in the MDL proceeding have received final approval by the MDL court. In the third quarter of 2024, the Company timely submitted to the MDL court its Phase One claims forms under settlement agreements with defendants 3M Company, The Chemours Company, Corteva, Inc. and DuPont de Nemours, Inc.

On November 22, 2024, the MDL court granted final approval to settlements with defendants Tyco Fire Products LP and BASF Corporation. The Company's utility subsidiaries have determined to remain parties to these class action settlements, and the Company has begun the process of perfecting its claims under each settlement within the time periods provided by the MDL court.

Cybersecurity Incident Class Action Lawsuits

Following the Company's previously reported October 3, 2024, cybersecurity incident, nine putative class action lawsuits against parent company have been filed in the U.S. District Court for the District of New Jersey. All of the putative plaintiffs seek to certify a nationwide class and several of the plaintiffs seek to certify a state-specific subclass. The complaints allege primarily negligence, breach of implied contract, and claims of violations of federal and/or state consumer protection and data privacy law and seek damages and injunctive relief. On February 14, 2025, the court granted a motion to consolidate the nine current pending class actions. This consolidated matter remains pending. The Company believes that the causes of action and other claims asserted in the class action complaints are without merit and that the Company has valid, meritorious defenses to such claims, and the Company is defending itself vigorously.

General

Periodically, the Company is involved in other proceedings or litigation arising in the ordinary course of business. Other than those proceedings described in this Item 3—Legal Proceedings, the Company does not believe that the ultimate resolution of these matters will materially affect its financial position or results of operations. However, litigation and other proceedings are subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. It is possible that some litigation and other proceedings could be decided unfavorably to the Company, and that any such unfavorable decisions could have a material adverse effect on its business, financial condition, results of operations and cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Since April 23, 2008, the Company's common stock has traded on the New York Stock Exchange ("NYSE") under the symbol "AWK." As of February 10, 2025, there were 194,947,313 shares of common stock outstanding held by approximately 1,922 record holders. Holders of the Company's common stock are entitled to receive dividends when they are declared by its Board of Directors. See Note 9—Shareholders' Equity in the Notes to Consolidated Financial Statements for additional information regarding the Company's dividends.

In February 2015, the Board of Directors authorized an anti-dilutive stock repurchase program to mitigate the dilutive effect of shares issued through the Company's dividend reinvestment, employee stock purchase and executive compensation activities. The program allows the Company to purchase up to 10 million shares of its outstanding common stock over an unrestricted period of time in the open market or through privately negotiated transactions. The program is conducted in accordance with Rule 10b-18 of the Exchange Act, and, to facilitate these repurchases, the Company enters into Rule 10b5-1 stock repurchase plans with a third-party broker, which allow the Company to repurchase shares of its common stock at times when it otherwise might be prevented from doing so under insider trading laws or because of self-imposed trading blackout periods. Subject to applicable regulations, the Company may elect to amend or cancel the program or the stock repurchase parameters at its discretion to manage dilution.

From April 1, 2015, the date repurchases under the anti-dilutive stock repurchase program commenced, through December 31, 2024, the Company repurchased an aggregate of 4,860,000 shares of its common stock under the program, leaving an aggregate of 5,140,000 shares available for repurchase under this program. There were no repurchases of common stock in 2024.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with the Consolidated Financial Statements and the Notes thereto included elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about the Company's business, operations and financial performance. The cautionary statements made in this Form 10-K should be read as applying to all related forward-looking statements whenever they appear in this Form 10-K. The Company's actual results may differ materially from those currently anticipated and expressed in such forward-looking statements as a result of a number of factors, including those that are discussed under "Forward-Looking Statements," Item 1A—Risk Factors and elsewhere in this Form 10-K. The Company has a disclosure committee consisting of members of senior management and other key employees involved in the preparation of the Company's SEC reports. The disclosure committee is actively involved in the review and discussion of the Company's SEC filings. For a discussion and analysis of the Company's financial statements for fiscal 2023 compared to fiscal 2022, please refer to Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2023, filed with the SEC on February 14, 2024.

Overview

American Water is the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. The Company employs approximately 6,700 professionals who provide drinking water, wastewater and other related services to over 14 million people in 24 states. The Company's primary business involves the ownership of utilities that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers, collectively presented as the "Regulated Businesses." The Company's utilities operate in 14 states in the United States, with 3.5 million active customers with services provided by its water and wastewater networks. Services provided by the Company's utilities are subject to regulation by PUCs. The Company also operates other businesses not subject to economic regulation by state PUCs that provide water and wastewater services to the U.S. government on military installations, as well as municipalities, collectively presented throughout this Form 10-K within "Other." See Item 1—Business for additional information.

Selected Financial Data

This selected financial data below should be read in conjunction with the Company's Consolidated Financial Statements and related Notes in this Annual Report on Form 10-K as well as the remainder of this Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations.

	For the Years Ended December 31,

Net cash used in investing activities	(3,379)	(2,815)	(2,127)	(1,536)	(2,061)
Net cash provided by (used in) financing activities	1,110	1,188	1,000	(345)	1,120
Capital expenditures included in net cash used in investing activities	(2,856)	(2,575)	(2,297)	(1,764)	(1,822)

Financial Results

For the years ended December 31, 2024, 2023 and 2022, diluted earnings per share (GAAP) were $5.39, $4.90 and $4.51, respectively. Increased results were driven primarily by the implementation of new rates in the Regulated Businesses from capital and acquisition investments. Results also reflect increased production and employee-related costs, increased depreciation and higher financing costs used to fund the current capital investment plan. Results for 2024 and 2023 reflect the net favorable impact of warmer, drier weather compared to normal, estimated at $0.12 per share, and $0.13 per share, respectively. Results for 2024 include incremental interest income of $0.09 per share, resulting from the early 2024 amendment to the secured seller note from the sale of the former HOS business.

Growth Through Capital Investment in Infrastructure and Regulated Acquisitions

The Company continues to grow its businesses, with the substantial majority of its growth to be achieved in the Regulated Businesses through (i) continued capital investment in the Company's infrastructure to provide safe, clean, reliable and affordable water and wastewater services to its customers, (ii) regulated acquisitions to expand the Company's services to new customers and (iii) organic growth in existing systems. In 2024, the Company invested $3.3 billion, in the Regulated Businesses, as discussed below:

- $2.8 billion capital investment in the Regulated Businesses, for infrastructure improvements and replacements; and
- $417 million to fund acquisitions in the Regulated Businesses, which added approximately 69,500 customers during 2024. This includes the acquisitions by the Company's Pennsylvania subsidiary of the wastewater collection and treatment system assets from the Butler Area Sewer Authority on October 29, 2024, for a cash purchase price of $230 million, which added approximately 15,000 customer connections, and by the Company's Illinois subsidiary of a wastewater treatment plant and related assets from Granite City on March 11, 2024, for a cash purchase price of $86 million, which added approximately 26,000 wastewater customers, including 15,500 customers indirectly in surrounding communities.
- Approximately 19,400 new customers were added through organic growth in existing systems.

The Company expects to invest between $17 billion to $18 billion over the next five years, and between $40 billion to $42 billion over the next 10 years, including $3.3 billion in 2025. The Company's expected future investments include:

- capital investment for infrastructure improvements and replacements in the Regulated Businesses of between $15.5 billion to $16 billion over the next five years, and between $36 billion to $37 billion over the next 10 years; and
- growth from acquisitions in the Regulated Businesses to expand the Company's water and wastewater customer base of between $1.5 billion to $2 billion over the next five years, and between $4 billion to $5 billion over the next 10 years.

The Company estimates the expected capital investment for infrastructure improvements in its Regulated Businesses over the next ten years will be allocated to the following purposes: infrastructure renewal 68%; resiliency 10%; water quality, including capital expenditures related to PFAS 8%; operational efficiency, technology and innovation 6%; system expansion 5%; other 3%.

As of December 31, 2024, the Company had entered into 17 agreements with a total aggregate purchase price of $105 million for pending acquisitions in the Regulated Businesses to add approximately 24,200 additional customers.

In December 2020, the Company's Pennsylvania subsidiary entered into an agreement (an acquisition intended to comply with Act 12 (discussed below)) to acquire the wastewater collection system assets of Brentwood Borough ("Brentwood") for a purchase price of approximately $19 million. On February 22, 2024, the Pennsylvania Public Utility Commission (the "PaPUC") denied the Pennsylvania subsidiary's application to acquire Brentwood. On April 3, 2024, the Pennsylvania subsidiary filed an appeal of the decision with the Pennsylvania Commonwealth Court, asserting, among other things, the PaPUC did not apply the correct legal standard in its decision. The Company cannot currently predict the outcome of this appeal, and the matter remains pending.

On July 2, 2024, the PaPUC issued the Final Supplemental Implementation Order ("FSIO"), which makes certain changes to the process by which the PaPUC considers and decides applications to acquire water and wastewater assets under Pennsylvania's existing utility valuation law, known as Act 12 of 2016 ("Act 12"). The FSIO includes, among other things, a reasonableness review ratio that would be applied to help guide the determination on the overall prudency of the transaction and reasonableness of the purchase price. The provisions of the FSIO are not retroactive and apply to acquisition applications filed after July 2, 2024. The Company cannot currently predict the impact of the FSIO, but the Company intends to continue to support outcomes that allow for consolidation and investment in water and wastewater infrastructure in Pennsylvania and in its other regulated jurisdictions.

Other Matters

Environmental, Health and Safety, and Water Quality Regulation

On April 10, 2024, the EPA announced a final NPDWR for six PFAS including PFOA, PFOS, PFNA, HFPO-DA, PFHxS, and PFBS. The NPDWR for PFAS establishes MCLs, for PFAS in drinking water. Utilities will be required to complete their initial monitoring for PFAS by 2027, followed by ongoing compliance monitoring. Utilities will be required to comply with the new MCLs by April 2029, implementing solutions to reduce PFAS levels where needed. Beginning in April 2029, utilities that exceed any of the PFAS MCLs will be required to provide notification to the public of the violation.

The Company estimates an investment of approximately $1 billion of capital expenditures to install additional treatment facilities in order to comply with the new regulations by April 2029. Additionally, the Company estimates that it will incur annual operating expenses of up to approximately $50 million related to testing and treatment, with the majority of the operating expenses beginning near the April 2029 compliance deadline. The actual level of capital investment and expenses may differ from these estimates and will be dependent upon market dynamics upon implementation of solutions to comply with the NPDWR for PFAS.

The Company has entered into a nine-year exclusive contract with a third-party vendor to supply granular activated carbon, equipment and reactivation services to more than 50 of the Company's treatment sites across 10 states through 2033. The equipment and services provided through the contract will aid the Company in treating drinking water to assist in complying with the NPDWR for PFAS.

The Company supports sound policies and compliance with the NPDWR for PFAS by all water utilities, while protecting customers and communities from the costly burden of monitoring and mitigating PFAS contamination in water systems. The Company continues to advocate for policies that hold polluters accountable

and is participating in the multi-district litigation and other lawsuits filed against certain PFAS manufacturers seeking damages and reimbursement of costs incurred and continuing to be incurred to address contamination of public water supply systems by PFAS. For more information on the PFAS multi-district litigation, see Item 3—Legal Proceedings—PFAS Multi-District Litigation.

On April 19, 2024, the EPA issued a final rule to designate PFOA and PFOS as hazardous substances under CERCLA. The Company, along with a coalition of other water and wastewater organizations, is actively advocating for and supporting bipartisan legislation that would provide PFAS liability protections under CERCLA for water and wastewater systems, as passive receivers of PFAS, and to hold polluters, and not the public or customers, accountable for PFAS-related liability.

On October 30, 2024, the EPA published the LCRI with a "Compliance Date" of November 1, 2027. The LCRI focus includes requirements related to (i) replacing all lead and certain galvanized service lines under a utilities control by October 30, 2037, 10 years from the Compliance Date; (ii) identifying the materials of all service lines of unknown material; (iii) improving tap sampling; (iv) lowering the lead action level; and (v) strengthening protections to reduce exposure. The LCRI also deferred the compliance date of certain requirements of the LCRR to allow for compliance with both new rules. The Company is in the process of developing an estimate of capital expenditures and operating costs needed to meet the specific requirements of the LCRI. Capital expenditures and operating costs associated with compliance with federal water quality regulations have been traditionally recognized by PUCs as appropriate for inclusion in establishing rates.

The Company continues to comply with the EPA's existing Lead and Copper Rule requirements by replacing lead service lines in accordance with current scientific guidance and utilizing appropriate corrosion control techniques as necessary to comply with current water quality regulatory requirements.

The Company met the LCRR requirements, effective October 16, 2024, identified as enforceable by the EPA. Remaining LCRR requirements are deferred under the LCRI.

Cybersecurity Incident

On October 3, 2024, the Company identified unauthorized activity within its information technology computer networks and systems, which was determined to be the result of a cybersecurity incident. Upon identification of this activity, the Company immediately activated its incident response protocols and third-party cybersecurity experts to assist with containment and mitigation activities and to investigate the nature and scope of the incident. The Company also promptly notified law enforcement and has coordinated fully with them. As part of the incident response, and in order to protect its systems and data, the Company disconnected and deactivated certain of its systems, which have since been reconnected and reactivated upon verification that those systems were secure.

All necessary containment, mitigation and restoration activities related to this incident have been completed. None of the Company's water or wastewater facilities were impacted by this incident, and the incident did not have a material effect on the Company or its financial condition or results of operations. In addition, a number of putative class action lawsuits have been filed in connection with this cybersecurity incident, primarily alleging claims related to federal and/or state consumer protection and data privacy laws, and while the Company believes the claims are without merit and is vigorously defending itself against these claims, it cannot currently predict the outcome or impact of these lawsuits. See Item 3—Legal Proceedings—Cybersecurity Incident Class Action Lawsuits for more information.

Regulatory Matters

General Rate Cases

The table below summarizes the annualized incremental revenues, assuming a constant sales volume and customer count, resulting from general rate case authorizations that became effective during 2024. The amounts include reductions for the amortization of the excess accumulated deferred income taxes ("EADIT") that are generally offset in income tax expense.

(In millions)	Effective Date	Amount
General rate cases by state:		
Kentucky	(a)	$ 17
New Jersey	September 15, 2024	80
Pennsylvania	August 7, 2024	99
Indiana, Step Increases	(b)	48
West Virginia	February 25, 2024	18
California	January 1, 2024	21
Total general rate case authorizations		$ 283

(a) In 2024, $6 million was effective November 6 and $11 million was effective May 3.
(b) In 2024, $23 million was effective May 10 and $25 million was effective February 21.

The table below summarizes the annualized incremental revenues, assuming a constant sales volume and customer count, resulting from general rate case authorizations that became effective on or after January 1, 2025. The amounts include reductions for the amortization of EADIT that are generally offset in income tax expense.

(In millions)	Effective Date	Amount
General rate cases by state:		
Tennessee	January 21, 2025	$ 1
Illinois	January 1, 2025	105
Total general rate case authorizations		$ 106

On January 21, 2025, the Tennessee Public Utility Commission (the "TPUC") approved a motion authorizing an adjustment of water base rates requested in a rate case filed on May 1, 2024, by the Company's Tennessee subsidiary. The TPUC approved an increase of $1 million in annualized revenues, excluding previously recovered infrastructure surcharges of $18 million, based on an authorized return on equity of 9.70%, authorized rate base of approximately $300 million, a common equity ratio of 44.19% and a debt ratio of 55.81%. This adjustment took effect on January 21, 2025, and is driven primarily by approximately $173 million in capital investments made and to be made by the Tennessee subsidiary through December 2025.

On December 5, 2024, the Illinois Commerce Commission issued a final order approving the adjustment of base rates requested in a rate case originally filed on January 25, 2024, by the Company's Illinois subsidiary. The general rate case order approved an increase of $105 million in annualized water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $5 million, based on an authorized return on equity of 9.84%, authorized rate base of $2.2 billion, and a capital structure with an equity component of 49.00% and a debt component of 51.00%. The general rate case order denied the second step increase of $16 million. The increase was effective January 1, 2025, and is driven primarily by approximately $557 million in capital investments made and to be made by the Illinois subsidiary from January 2024 through December 2025.

On December 5, 2024, the CPUC approved a final decision adopting the terms of a partial settlement agreement filed on November 17, 2023, in the Company's California subsidiary's general rate case originally filed on July 1, 2022. Incorporating the currently effective return on equity of 10.20%, the decision provides incremental annualized water and wastewater revenues of $21 million in the 2024 test year, and an estimated $16 million in the 2025 escalation year and $16 million in the 2026 attrition year. New rates were implemented

retroactively to January 1, 2024. In addition, the CPUC denied the California subsidiary's proposed Water Resources Sustainability Plan decoupling mechanism but approved continuation of its currently effective Annual Consumption Adjustment Mechanism. On December 12, 2024, the California subsidiary filed an application for rehearing of the CPUC's denial of the proposed Water Resources Sustainability Plan decoupling mechanism.

On May 3, 2024, the Kentucky Public Service Commission (the "KPSC") issued an order approving the adjustment of base rates requested in a rate case filed on June 30, 2023, by the Company's Kentucky subsidiary. The general rate case order approved an $11 million annualized increase in water revenues, excluding infrastructure surcharge revenues of $10 million, which continue to be recovered in the Kentucky subsidiary's approved infrastructure mechanism. The annualized increase is based upon an authorized return on equity of 9.70%, authorized rate base of $489 million, which reflects capital investments through January 31, 2025, and a capital structure with a common equity ratio of 52.22%. Interim rates in this proceeding were effective on February 6, 2024, and the order required that the difference between interim and final approved rates be subject to refund no later than August 26, 2024. On May 16, 2024, the Kentucky subsidiary filed with the KPSC a petition for rehearing of the KPSC's order, seeking clarification and/or correction of certain computational inconsistencies that the Kentucky subsidiary believes are reflected in the KPSC's order with respect to the authorized amount of annualized revenues to be received by the Kentucky subsidiary. On November 6, 2024, the KPSC approved a final order (the "Final Order") providing for a $17 million annualized increase in water revenues, an increase of approximately $6 million from May 3, 2024. New rates provided in the Final Order were effective November 6, 2024.

On September 4, 2024, the New Jersey Board of Public Utilities ("NJBPU") issued an order approving without modification the stipulation of settlement of a general rate case filed on January 19, 2024, by the Company's New Jersey subsidiary. The general rate case order approved an $80 million annualized increase in the New Jersey subsidiary's water and wastewater revenues, effective September 15, 2024, based on (i) an authorized return on equity of 9.60%, (ii) an authorized rate base of $5.1 billion, (iii) a common equity ratio of 55.00%, and (iv) a long-term debt ratio of 45.00%. The annualized revenue increase is driven primarily by $1.3 billion of incremental capital investments since the New Jersey subsidiary's last general rate case. The New Jersey subsidiary will continue to defer as a regulatory asset or liability, as appropriate, until its next general rate case, the difference between its pension expense and other postretirement benefits expense and those amounts included in base rates.

On July 22, 2024, the PaPUC released an order approving the adjustment of base rates requested in a general rate case filed by the Company's Pennsylvania subsidiary on November 8, 2023. The PaPUC approved a $99 million annualized increase in the Pennsylvania subsidiary's water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $20 million, based on (i) an authorized return on equity of 9.45%, (ii) an authorized rate base of $5.8 billion, which reflects, as requested and included in the general rate case, approximately $1.0 billion in capital investments to be made through mid-2025, (iii) a common equity ratio of 55.30%, and (iv) a long-term debt ratio of 44.70%. Certain acquisitions, including the acquisition of the wastewater collection and treatment system of the Butler Area Sewer Authority, were excluded from authorized base rates. The new rates were effective on August 7, 2024, except that new wastewater rates for two recently acquired systems, including the City of York, will take effect during the first half of 2025 in accordance with the terms of the relevant acquisition agreements. As part of its approval of this rate adjustment, the PaPUC initiated an investigation into certain reported water service and water quality issues in the Pennsylvania subsidiary's Northeastern service territory, which reports had been provided during public input hearings convened in the general rate case. The PaPUC is expected to conclude the investigation in the second quarter of 2025.

On February 23, 2024, the WVPSC issued an order approving the adjustment of base rates requested in a rate case filed on May 1, 2023, by the Company's West Virginia subsidiary. The general rate case order approved an $18 million annualized increase in water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $7 million, based on an authorized return on equity of 9.80%, authorized rate base of $886 million, which reflects capital investments through February 2024, a common equity ratio of 50.12% and a long-term debt ratio of 49.88%. The increased water and wastewater revenues related to the base rate adjustment

are being driven primarily by (i) $220 million of related water and wastewater system capital investments made since the completion of the West Virginia subsidiary's previous rate case, (ii) higher pension and other postretirement benefit costs, and (iii) increases in production costs, including chemicals, fuel and power costs.

On February 14, 2024, the Indiana Utility Regulatory Commission (the "IURC") issued an order approving the adjustment of base rates requested in a rate case filed on March 31, 2023, by the Company's Indiana subsidiary. The general rate case order approved a $66 million annualized increase in water and wastewater system revenues, excluding previously recovered infrastructure surcharges, based on an authorized return on equity of 9.65%, authorized rate base of $1.8 billion, a common equity ratio of 56.15% and a debt ratio of 43.85%. For purposes of determining rates, the adjustment is based on an equity component of 48.19% due to the regulatory practice in Indiana of including certain zero-cost items or tax credit balances in the capital structure calculation. The annualized revenue increase will include three step increases, with $25 million of the increase to be included in rates in February 2024, $23 million in May 2024, and $18 million in May 2025. The increases are being driven primarily by (i) over $875 million of water and wastewater system capital investments since the completion of the Indiana subsidiary's last rate case and through April 30, 2025, (ii) higher pension and other postretirement benefit costs, and (iii) increases in production costs, including chemicals, fuel and power costs.

Pending General Rate Case Filings

On August 2, 2024, the Company's Hawaii subsidiary filed a general rate case requesting approximately $2 million in annualized incremental revenues, which is based on a proposed return on equity of 10.67% and a capital structure with an equity component of 52.11% and debt component of 47.89%. The requested annualized incremental revenue is driven primarily by approximately $41 million in capital investments made and to be made by the Hawaii subsidiary through 2025. The Hawaii subsidiary anticipates that the general rate case proceeding will be completed by mid-2025.

On July 1, 2024, the Company's Missouri subsidiary filed a general rate case requesting approximately $148 million in annualized incremental revenues. The request is based on a return on equity of 10.75% and a capital structure with an equity component of 50.54% and a long-term debt component of 49.46%. The requested annualized incremental revenue is driven primarily by $1.5 billion of incremental capital investments completed and planned by the Missouri subsidiary from January 2023 through May 2026. On July 31, 2024, the Missouri Public Service Commission issued an order establishing the test year in this case, which modified the Missouri subsidiary's original proposal for a future test year through May 2026, and instead reverted to a true-up period through December 31, 2024, with an allowance for proposed discrete adjustments subsequent to this date. On September 6, 2024, the Missouri subsidiary filed supplemental testimony to revise the request to approximately $123 million in annualized incremental revenues and define the specific discrete adjustments proposed through the rate effective period, which lowered the incremental capital investments completed and planned to $1.1 billion through May 2025. The Missouri subsidiary anticipates that the general rate case proceeding will be completed by mid-2025.

On May 1, 2024, the Company's Iowa subsidiary filed a general rate case requesting approximately $21 million in additional annualized revenues, which is based on a proposed return on equity of 10.75% and a capital structure with an equity component of 52.57% and debt component of 47.43%. The requested annualized revenue increase is driven primarily by approximately $157 million in capital investments made and to be made by the Iowa subsidiary through March 2026. Interim rates became effective May 11, 2024, with the difference between interim and final approved rates subject to refund. On August 29, 2024, the Iowa subsidiary submitted supplemental testimony consistent with the procedural schedule, which was subsequently challenged by the parties in the proceeding. On October 4, 2024, the Iowa Utilities Commission issued an order that granted the inclusion of the supplemental filing and extended the procedural schedule in the case beyond the statutory ten-month period. The Iowa subsidiary now expects resolution of this proceeding by May 2025.

On December 15, 2023, the Company's California subsidiary submitted a request to delay by one year its cost of capital filing and maintain its current authorized cost of capital through 2025. On February 2, 2024, the CPUC granted the request for a one-year extension of the cost of capital filing to May 1, 2025, to set its

authorized cost of capital beginning January 1, 2026. On December 18, 2024, the California subsidiary submitted a request to further delay by one year its cost of capital filing and maintain the authorized cost of capital through 2026. On January 14, 2025, the CPUC granted the request for a one-year extension of the cost of capital filing to May 1, 2026, to set its authorized cost of capital beginning January 1, 2027.

On November 1, 2023, the Company's Virginia subsidiary filed a general rate case requesting $20 million in additional annualized revenues. The request is based on a proposed return on equity of 10.95% and a capital structure with an equity component of 45.67% and a debt and other component of 54.33%. The requested increase is driven by approximately $110 million in capital investments between May 2023 and April 2025. The request also proposed a revenue decoupling mechanism and seeks deferral of certain production cost adjustments. Interim rates became effective May 1, 2024, with the difference between interim and final approved rates subject to refund. On September 20, 2024, the Virginia subsidiary filed with the Virginia State Corporation Commission (the "SCC") a "black box" stipulation of settlement on key financial terms which agreed to a $15 million annualized increase in the Virginia subsidiary's revenues. The stipulation of settlement also agreed, solely for purposes of the Virginia subsidiary's future filings requiring a stated cost of capital and/or capital structure (including its annual information and water and wastewater infrastructure surcharge filings), that its return on equity will be 9.70% and its capital structure will consist of an equity component of 45.67% and a debt and other component of 54.33%. The stipulation of settlement remains subject to SCC review and approval.

Infrastructure Surcharges

A number of states have authorized the use of regulatory mechanisms that permit rates to be adjusted outside of a general rate case for certain costs and investments, such as infrastructure surcharge mechanisms that permit recovery of capital investments to replace aging infrastructure. Presented in the table below are annualized incremental revenues, assuming a constant sales volume and customer count, resulting from infrastructure surcharge authorizations that became effective during 2024:

(In millions)	**Effective Date**	**Amount**
Infrastructure surcharges by state:		
Missouri	(b)	$ 47
Pennsylvania	(c)	21
New Jersey	April 30, 2024	9
Iowa	March 1, 2024	1
West Virginia (a)	March 1, 2024	7
Illinois	January 1, 2024	5
Total infrastructure surcharge authorizations		$ 90

(a) On March 5, 2024, the WVPSC directed the Company's West Virginia subsidiary to interpret the distribution system improvement charge ("DSIC") Order as having included within the DSIC the three-year amortization of a prior authorized deferral associated with a large treatment plant project. The inclusion of this deferral increased the net incremental revenue by $0.7 million to a total of $6.6 million effective March 1, 2024.

(b) In 2024, $21 million was effective July 11 and $26 million was effective January 20.

(c) In 2024, $14 million was effective July 1 and $7 million was effective April 1.

Presented in the table below are annualized incremental revenues, assuming a constant sales volume and customer count, resulting from infrastructure surcharge authorizations that became effective on or after January 1, 2025:

(In millions)	**Effective Date**	**Amount**
Infrastructure surcharge filings by state:		
Missouri	February 7, 2025	$ 17
Kentucky	January 1, 2025	2
West Virginia	January 1, 2025	4
Total infrastructure surcharge filings		$ 23

Other Regulatory Matters

In September 2020, the CPUC released a decision under its Low-Income Rate Payer Assistance program rulemaking that required the Company's California subsidiary to file a proposal to alter its water revenue adjustment mechanism in its next general rate case filing in 2022, which would have become effective upon receiving an order in the rate case. On October 5, 2020, the Company's California subsidiary filed an application for rehearing of the decision and following the CPUC's denial of its rehearing application in September 2021, the Company's California subsidiary filed a petition for writ of review with the California Supreme Court on October 27, 2021. On May 18, 2022, the California Supreme Court issued a writ of review for the California subsidiary's petition and the petitions filed by other entities challenging the decision. On July 8, 2024, the California Supreme Court issued a unanimous opinion concluding that the CPUC did not regularly seek to exercise its authority when it prohibited water utilities from proposing to continue their water revenue adjustment mechanisms. Accordingly, the California Supreme Court vacated the portion of the CPUC's 2020 decision relating to this prohibition against continuation of such water revenue adjustment mechanisms.

Independent of the judicial challenge, California passed Senate Bill 1469, which allows the CPUC to consider and authorize the implementation of a mechanism that separates the water corporation's revenue and its water sales. Legislation was signed by the Governor on September 30, 2022, and became effective on January 1, 2023. In response to the legislation, on January 27, 2023, the Company's California subsidiary filed an updated application requesting the CPUC to consider a Water Resources Sustainability Plan decoupling mechanism in its 2022 general rate case. On December 5, 2024, the CPUC denied the California subsidiary's proposed Water Resources Sustainability Plan decoupling mechanism but approved continuation of its currently effective Annual Consumption Adjustment Mechanism. On December 12, 2024, the California subsidiary filed an application for rehearing of the CPUC's denial of the proposed Water Resources Sustainability Plan decoupling mechanism.

On March 2, 2021, an administrative law judge ("ALJ") in the Office of Administrative Law of New Jersey filed an initial decision with the NJBPU that recommended denial of a petition filed by the Company's New Jersey subsidiary, which sought approval of acquisition adjustments in rate base of $29 million associated with the acquisitions of Shorelands Water Company, Inc. in 2017 and the Borough of Haddonfield's water and wastewater systems in 2015. On July 29, 2021, the NJBPU issued an order adopting the ALJ's initial decision without modification. The Company's New Jersey subsidiary filed a Notice of Appeal with the New Jersey Appellate Division on September 10, 2021. On December 30, 2024, the New Jersey Appellate Division of the New Jersey Superior Court affirmed the NJBPU decision rejecting the acquisition adjustments. There is no financial impact to the Company as a result of the NJBPU's order and resulting appeal decision, since the acquisition adjustments are currently recorded as goodwill on the Consolidated Balance Sheets.

Consolidated Results of Operations

Presented in the table below are the Company's consolidated results of operations:

	For the Years Ended December 31,		
(In millions)	**2024**	**2023**	**2022**
Operating revenues	$ 4,684	$ 4,234	$ 3,792
Operating expenses:			
Operation and maintenance	1,858	1,720	1,589
Depreciation and amortization	788	704	649
General taxes	320	307	281
Other	—	(1)	—
Total operating expenses, net	2,966	2,730	2,519
Operating income	1,718	1,504	1,273

(In millions)	For the Years Ended December 31, 2024	2023	2022
Other income (expense):			
Interest expense	(523)	(460)	(433)
Interest Income	94	73	52
Non-operating benefit costs, net	28	32	77
Gain on sale of businesses	—	—	19
Other, net	42	47	20
Total other income (expense)	(359)	(308)	(265)
Income before income taxes	1,359	1,196	1,008
Provision for income taxes	308	252	188
Net income attributable to common shareholders	$ 1,051	$ 944	$ 820

Segment Results of Operations

The Company's operating segments are comprised of its businesses which generate revenue, incur expense and have separate financial information which is regularly used by the chief operating decision maker to make operating decisions, assess performance and allocate resources. The Company operates its business primarily through one reportable segment, the Regulated Businesses segment. Other primarily includes MSG, which does not meet the criteria of a reportable segment in accordance with GAAP. Other also includes corporate costs that are not allocated to the Company's Regulated Businesses, interest income related to the secured seller promissory note from the sale of HOS, income from assets not associated with the Regulated Businesses, eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment. This presentation is consistent with how management assesses the results of these businesses. For a discussion and analysis of the Company's financial statements for fiscal 2023 compared to fiscal 2022, please refer to Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2023, filed with the SEC on February 14, 2024.

Regulated Businesses Segment

Presented in the table below is financial information for the Regulated Businesses:

(In millions)	For the Years Ended December 31, 2024	2023	2022
Operating revenues	$ 4,296	$ 3,920	$ 3,505
Operation and maintenance	1,517	1,441	1,345
Depreciation and amortization	772	693	633
General taxes	301	288	264
Other operating (income) expense	—	(1)	—
Other income (expense)	(339)	(269)	(220)
Provision for income taxes	302	259	188
Net income attributable to common shareholders	$ 1,065	$ 971	$ 854

Operating Revenues

Presented in the tables below is information regarding the main components of the Regulated Businesses' operating revenues:

(In millions)	For the Years Ended December 31, 2024	2023	2022
Water services:			
Residential	$ 2,349	$ 2,143	$ 1,941
Commercial	885	798	710
Fire service	164	158	147
Industrial	184	167	153
Public and other	301	284	267
Total water services	3,883	3,550	3,218
Wastewater services:			
Residential	245	228	174
Commercial	70	62	45
Industrial	12	8	4
Public and other	36	29	19
Total wastewater services	363	327	242
Other (a)	50	43	45
Total operating revenues	$ 4,296	$ 3,920	$ 3,505

(a) Includes other operating revenues consisting primarily of miscellaneous utility charges, fees and rents.

(Gallons in millions)	For the Years Ended December 31, 2024	2023	2022
Billed water services volumes:			
Residential	163,583	160,921	162,105
Commercial	80,385	78,404	77,627
Industrial	37,217	36,404	37,265
Fire service, public and other	54,700	54,236	51,966
Total billed water services volumes	335,885	329,965	328,963

In 2024, as compared to 2023, operating revenues increased $376 million, primarily due to: (i) a $288 million increase from authorized rate increases, including infrastructure surcharges, principally to recover infrastructure investment in various states; (ii) a $41 million increase from water and wastewater acquisitions and organic growth in existing systems; (iii) a $26 million increase from changes in customer demand; and (iv) a $17 million net increase as a result of reduced amortization of EADIT, primarily in the Company's Missouri subsidiary.

Operation and Maintenance

Presented in the table below is information regarding the main components of the Regulated Businesses' operating and maintenance expense:

(In millions)	For the Years Ended December 31, 2024	2023	2022
Employee-related costs	$ 543	$ 513	$ 505
Production costs	458	438	387
Operating supplies and services	274	255	242

(In millions)	For the Years Ended December 31, 2024	2023	2022
Maintenance materials and supplies	97	102	96
Customer billing and accounting	72	65	59
Other	73	68	56
Total operation and maintenance expense	$ 1,517	$ 1,441	$ 1,345

Employee-Related Costs

(In millions)	For the Years Ended December 31, 2024	2023	2022
Salaries and wages	$ 434	$ 413	$ 395
Group insurance	69	60	59
Pensions	7	9	21
Other benefits	33	31	30
Total employee-related costs	$ 543	$ 513	$ 505

In 2024, as compared to 2023, employee-related costs increased $30 million primarily due to an increase in salaries and wages due to merit increases, which was partially offset by higher capitalized labor and overhead rates.

Production Costs

(In millions)	For the Years Ended December 31, 2024	2023	2022
Purchased water	$ 180	$ 161	$ 154
Fuel and power	112	108	104
Chemicals	107	105	78
Waste disposal	59	64	51
Total production costs	$ 458	$ 438	$ 387

In 2024, as compared to 2023, production costs increased $20 million primarily from higher purchased water cost and usage.

Operating Supplies and Services

In 2024, as compared to 2023, operating supplies and services increased $19 million primarily due to higher contracted services and software licensing costs as well as an increase in various other operating expenses.

Depreciation and Amortization

In 2024, as compared to 2023, depreciation and amortization increased $79 million primarily due to additional utility plant placed in service from capital infrastructure investments and acquisitions.

General Taxes

In 2024, as compared to 2023, general taxes increased $13 million primarily due to incremental property taxes and New Jersey Gross Receipts Tax.

Other Income (Expense)

In 2024, as compared to 2023, other expenses increased $70 million primarily due to higher interest expense from the issuance of incremental long-term debt and a decrease in AFUDC in 2024.

Provision for Income Taxes

In 2024, as compared to 2023, the Regulated Businesses' provision for income taxes increased $43 million. The Regulated Businesses' effective income tax rate was 22.1% and 21.1% for the years ended December 31, 2024 and 2023, respectively. The increase was primarily due to the decrease in the amortization of EADIT, pursuant to regulatory orders. The amortization of EADIT is generally offset with reductions in revenue.

Other

Presented in the table below is information for Other:

	For the Years Ended December 31,		
	2024	2023	2022
(In millions)			
Operating revenues	$ 388	$ 314	$ 287
Operation and maintenance	341	279	244
Depreciation and amortization	16	11	16
General taxes	19	19	17
Interest expense	(107)	(96)	(119)
Interest income	77	45	50
Gain on sale of businesses	—	—	19
Other income	10	12	6
Provision for (benefit from) income taxes	6	(7)	—
Net loss attributable to common shareholders	$ (14)	$ (27)	$ (34)

Operating Revenues

In 2024, as compared to 2023, operating revenues increased $74 million from an increase in capital projects in MSG, primarily at Naval Station Mayport, and an increase in capital projects in CSG.

Operation and Maintenance

Presented in the table below is information regarding the main components of Other's operating and maintenance expense:

	For the Years Ended December 31,		
	2024	2023	2022
(In millions)			
Operating supplies and services	$ 195	$ 150	$ 120
Maintenance materials and supplies	27	29	35
Employee-related costs	101	85	73
Production costs	10	9	10
Other	8	6	6
Total operation and maintenance expense	$ 341	$ 279	$ 244

Operating Supplies and Services

In 2024, as compared to 2023, operating supplies and services increased $45 million primarily due to costs associated with the increased capital projects in MSG.

Employee-Related Costs

In 2024, as compared to 2023, employee-related costs increased $16 million primarily due to an increase in salaries and wages.

Interest Income

In 2024, as compared to 2023, interest income increased $32 million primarily due to the increased interest rate and higher principal balance from the February 2024 amendment of the secured seller promissory note from the sale of HOS. See Note 5—Acquisitions and Divestitures—Sale of Homeowner Services Group, in the Notes to Consolidated Financial Statements for additional information.

Tax Matters

On August 16, 2022, the Inflation Reduction Act of 2022 (the "IRA") was signed into law. The IRA contains a 15% CAMT provision on applicable corporations effective January 1, 2023. To determine if a company is considered an applicable corporation subject to CAMT, the company's average adjusted financial statement income ("AFSI") for the three consecutive years preceding the tax year must exceed $1.0 billion. An applicable corporation must make several adjustments to net income when determining AFSI. A corporation paying CAMT is eligible for a future tax credit, which can be utilized when regular tax exceeds CAMT. Based on current guidance, the Company is an applicable corporation subject to CAMT beginning in 2024 and expects to owe CAMT in excess of the regular tax liability. On September 12, 2024, the Internal Revenue Service (the "IRS") and the U.S. Treasury issued Notice 2024-66, allowing corporate taxpayers to exclude amounts attributable to the CAMT liability, without penalty, from estimated tax payments with respect to a taxable year that begins during 2024. The Company will include the CAMT liability in its 2024 extension payment due April 15, 2025. The Company will continue to assess the impacts of the IRA as the U.S. Treasury and the IRS provide further guidance.

Legislative Updates

During 2024 and 2025, the Company's regulatory jurisdictions enacted the following legislation that has been approved and is effective as of February 19, 2025:

- New Jersey passed Assembly Bill 4791, establishing the "Resiliency and Environmental System Investment Charge Program," which creates a regulatory mechanism that enables water and wastewater utilities to recover the costs of investment in certain non-revenue producing utility system components that enhance water and wastewater system resiliency, environmental compliance such as existing and proposed requirements for PFAS, safety, and public health. Legislation was signed by the Governor and became effective on January 12, 2024.
- Indiana passed Senate Bill 5, which provides access to a property by a water utility to replace lead service lines when a landowner does not enroll in the offered lead service line replacement program, does not personally replace the customer owned portion of the lead service line following notice and a 45-day waiting period, or is non-responsive to attempted communication after the 45-day waiting period. Legislation was signed by the Governor and became effective on March 11, 2024.
- Iowa passed House File 207, which modifies property tax assessments to exempt property owned or operated by a public or private utility and is directly and primarily used for furnishing sanitary sewage or storm water drainage disposal by a piped collection system to the public for compensation. Legislation was signed by the Governor and became effective on May 2, 2024.
- West Virginia passed House Bill 5617, which adopts standards and authorizes the WVPSC to promulgate rules, and also allows for rate recovery, on maintenance, flushing, flow testing and marking of fire hydrants owned by water utilities. Legislation was signed by the Governor and became effective on June 4, 2024.

- Iowa passed House File 2101, which increases the threshold amount required for approval by the Iowa Utilities Commission for water and wastewater utility acquisition filings from $0.5 million to $3 million. Legislation was signed by the Governor and became effective on July 1, 2024.
- Indiana passed Senate Bill 247, which establishes a 30-day filing with the IURC by a utility for an acquisition of a utility with an appraised value and purchase price of less than $3 million. Legislation was signed by the Governor became effective on July 1, 2024.
- California passed Senate Bill 219, which amends the Climate Corporate Data Accountability Act and the Climate-Related Financial Risk Act, to allow the California Air Resources Board until July 1, 2025, to issue implementing regulations, including reporting requirements for Scope 3 emissions. Legislation was signed by the Governor on September 27, 2024, and became effective January 1, 2025.

Liquidity and Capital Resources

The Company uses its capital resources, including cash, primarily to (i) fund operating and capital requirements, (ii) pay interest and meet debt maturities, (iii) pay dividends, (iv) fund acquisitions, (v) fund pension and postretirement benefit obligations, and (vi) to pay federal income taxes. The Company invests a significant amount of cash on regulated capital projects where it expects to earn a long-term return on investment. Additionally, the Company operates in rate regulated environments in which the amount of new investment recovery may be limited, and where such recovery generally takes place over an extended period of time, and certain capital recovery is also subject to regulatory lag. See Item 1—Business—Regulated Businesses—Regulation and Rate Making for additional information. The Company expects to fund future maturities of long-term debt through a combination of external debt and, to the extent available, cash flows from operations. Since the Company expects its capital investments over the next few years to be greater than its cash flows from operating activities, the Company currently plans to fund the excess of its capital investments over its cash flows from operating activities for the next five years through a combination of long-term debt and equity issuances, in addition to the remaining proceeds from the sale of HOS. The remaining proceeds from the sale of HOS include receipt of payments under a secured seller promissory note, plus interest, see Note 5—Acquisitions and Divestitures—Sale of Homeowner Services Group, in the Notes to Consolidated Financial Statements for additional information. If necessary, the Company may delay certain capital investments or other funding requirements or pursue financing from other sources to preserve liquidity. In this event, the Company believes it can rely upon cash flows from operations to meet its obligations and fund its minimum required capital investments for an extended period of time.

The Company regularly evaluates and monitors its cash requirements for capital investments, acquisitions, operations, commitments, debt maturities, interest and dividends. The Company's business is capital intensive, with a majority of this capital funded by cash flows from operations. The Company also obtains funds from external sources, primarily in the debt markets and through short-term commercial paper borrowings, and may also access the equity capital markets as needed or desired to support capital funding requirements. In order to meet short-term liquidity needs, AWCC issues commercial paper that is supported by its revolving credit facility. The Company's access to external financing on reasonable terms may depend on, as appropriate, any or all of the following: current business conditions, including that of the utility and water utility industry in general; conditions in the debt or equity capital markets; the Company's credit ratings; and conditions in the national and international economic and geopolitical arenas. Disruptions in the credit markets may discourage lenders from extending the terms of such commitments or agreeing to new commitments. Market disruptions may also limit the Company's ability to issue debt and equity securities in the capital markets.

If these unfavorable business, market, financial and other conditions deteriorate to the extent that the Company is no longer able to access the commercial paper and/or capital markets on reasonable terms, AWCC has access to an unsecured revolving credit facility. The Company's revolving credit facility provides $2.75 billion in aggregate total commitments from a diversified group of financial institutions. AWCC's revolving credit facility is used principally to support its commercial paper program, to provide additional liquidity support, and to provide a sub-limit for the issuance of up to $150 million in letters of credit. The

maximum aggregate principal amount of short-term borrowings authorized for issuance under AWCC's commercial paper program is $2.60 billion. On October 28, 2024, the termination date of the credit agreement with respect to AWCC's revolving credit facility was extended, as permitted by the terms of the credit agreement, from October 2028 to October 2029. Subject to satisfying certain conditions, the credit agreement also permits AWCC to increase the maximum commitment under the facility by up to an aggregate of $500 million. As of December 31, 2024, AWCC had no outstanding borrowings and $82 million of outstanding letters of credit under its revolving credit facility, with $1.8 billion available to fulfill its short-term liquidity needs and to issue letters of credit.

The Company believes that its ability to access the debt and equity capital markets, the revolving credit facility and cash flows from operations will generate sufficient cash to fund the Company's short-term requirements. The Company believes it has sufficient liquidity and the ability to manage its expenditures, should there be a disruption of the capital and credit markets. However, there can be no assurance that the lenders will be able to meet existing commitments to AWCC under the revolving credit facility, or that AWCC will be able to access the commercial paper or loan markets in the future on acceptable terms or at all.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the warmer months. The Company's future cash flows from operating activities will be affected by, among other things: customers' ability to pay for service in a timely manner, economic utility regulation, inflation, compliance with environmental, health and safety standards, production costs, maintenance costs, customer growth, declining customer usage of water, employee-related costs, including pension funding, weather and seasonality, taxes and overall economic conditions. The Company's current liabilities may exceed current assets mainly from debt maturities due within one year and the use of short-term debt as a funding source, primarily to meet scheduled maturities of long-term debt, fund acquisitions and construction projects, as well as cash needs, which can fluctuate significantly due to the seasonality of the business and other factors. The Company addresses cash timing differences primarily through its short-term liquidity funding mechanisms.

Presented in the table below is a summary of the major items affecting the Company's cash flows from operating activities:

	For the Years Ended December 31,		
(In millions)	**2024**	**2023**	**2022**
Net income	$ 1,051	$ 944	$ 820
Add (less):			
Depreciation and amortization	788	704	649
Deferred income taxes and amortization of investment tax credits	156	208	80
Other non-cash activities (a)	62	(9)	(16)
Changes in assets and liabilities (b)	40	76	(355)
Pension and non-pension postretirement benefit contributions	(52)	(49)	(51)
Gain on sale of businesses	—	—	(19)
Net cash provided by operating activities	$ 2,045	$ 1,874	$ 1,108

(a) Includes provision for losses on accounts receivable, pension and non-pension postretirement benefits and other non-cash, net. Details of each component can be found on the Consolidated Statements of Cash Flows.

(b) Changes in assets and liabilities include changes to receivables and unbilled revenues, income tax receivable, accounts payable, accrued liabilities, accrued taxes and other assets and liabilities, net.

In 2024, cash flows provided by operating activities increased $171 million, primarily due to an increase in net income and depreciation, partially offset by changes in deferred income taxes.

The Company expects to make pension contributions to the plan trusts of $44 million in 2025. Actual amounts contributed could change materially from this estimate as a result of changes in assumptions and actual investment returns, among other factors.

Cash Flows from Investing Activities

Presented in the table below is a summary of the major items affecting the Company's cash flows from investing activities:

	For the Years Ended December 31,		
(In millions)	**2024**	**2023**	**2022**
Capital expenditures	$ (2,856)	$ (2,575)	$ (2,297)
Acquisitions, net of cash acquired	(417)	(81)	(315)
Proceeds from sale of assets, net of cash on hand	—	—	608
Removal costs from property, plant and equipment retirements, net	(152)	(159)	(123)
Purchases of available-for-sale fixed-income securities	(135)	—	—
Proceeds from sales and maturities of available-for-sale fixed-income securities	181	—	—
Net cash used in investing activities	$ (3,379)	$ (2,815)	$ (2,127)

In 2024, cash flows used in investing activities increased $564 million as a result of increased payments for capital expenditures and acquisitions in 2024. The Company continues to invest across all infrastructure categories, mainly replacement and renewal of transmission and distribution and services, meter and fire hydrants infrastructure in the Company's Regulated Businesses, as discussed below.

The Company's infrastructure investment plan consists of both infrastructure renewal programs, where the Company replaces mains, services, meters, hydrants and valves, as needed, and major capital investment projects, where the Company constructs new water and wastewater treatment and delivery facilities to meet new customer growth, and meet new or updated environmental and water quality regulations. The Company's projected capital expenditures and other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

Presented in the table below is a summary of the Company's capital expenditures by category:

	For the Years Ended December 31,		
(In millions)	**2024**	**2023**	**2022**
Transmission and distribution	$ 882	$ 922	$ 901
Treatment and pumping	305	322	190
Services, meter and fire hydrants	805	652	546
General structure and equipment	425	333	380
Sources of supply	163	88	95
Wastewater	276	258	185
Total capital expenditures	$ 2,856	$ 2,575	$ 2,297

In 2024, the Company's capital expenditures increased $281 million due to an increase across most infrastructure categories.

The Company also grows its business primarily through acquisitions of water and wastewater systems. These acquisitions are generally located in geographic proximity to the Company's existing Regulated Businesses and support continued geographical diversification and growth of its operations. Generally, acquisitions are funded initially with short-term debt, and later refinanced with long-term financing. During

2024, the Company paid $417 million to fund acquisitions, including deposits for pending acquisitions. The Company closed on 13 acquisitions of various regulated water and wastewater systems during 2024, which added approximately 69,500 water and wastewater customers.

As previously noted, over the next five years the Company expects to invest between $17 billion to $18 billion, with $15.5 billion to $16 billion for infrastructure improvements in the Regulated Businesses, and the Company expects to invest between $40 billion to $42 billion over the next 10 years. In 2025, the Company expects to invest $3.3 billion, consisting of infrastructure improvements and acquisitions in the Regulated Businesses.

Cash Flows from Financing Activities

Presented in the table below is a summary of the major items affecting the Company's cash flows from financing activities:

	For the Years Ended December 31,		
(In millions)	**2024**	**2023**	**2022**
Proceeds from long-term debt	$ 1,437	$ 1,264	$ 822
Repayments of long-term debt	(475)	(282)	(15)
Net proceeds from common stock financing	—	1,688	—
Net short-term borrowings (repayments) with maturities less than three months	700	(996)	591
Debt issuance costs	(14)	(16)	(7)
Dividends paid	(585)	(532)	(467)
Other financing activities, net (a)	47	62	76
Net cash provided by financing activities	$ 1,110	$ 1,188	$ 1,000

(a) Includes proceeds from issuances of common stock under various employee stock plans and the Company's dividend reinvestment and direct stock purchase plan, net of taxes paid, and advances and contributions in aid of construction, net of refunds.

In 2024, cash flows provided by financing activities decreased $78 million, primarily due to the repayment of long-term debt in the current period and the proceeds from the common stock financing in March 2023. These decreases were partially offset by a higher issuance of long-term debt and an increase in short-term commercial paper borrowings in the current year.

The Company's financing activities are primarily focused on funding regulated infrastructure expenditures, regulated acquisitions and payment of dividends. These activities included the issuance of long-term and short-term debt, primarily through AWCC and equity issuances from parent company. Based on the needs of the Regulated Businesses and the Company, AWCC may borrow funds or issue its debt in the capital markets and then, through intercompany loans, provide those borrowings to the Regulated Businesses and parent company. The Regulated Businesses and parent company are obligated to pay their portion of the respective principal and interest to AWCC, in the amount necessary to enable AWCC to meet its debt service obligations. Parent company's borrowings are not a source of capital for the Regulated Businesses, therefore, parent company is not able to recover the interest charges on its debt through regulated water and wastewater rates. As of December 31, 2024, AWCC has made long-term fixed rate loans and short-term loans to the Regulated Businesses amounting to $9.6 billion. Additionally, as of December 31, 2024, AWCC has made long-term fixed rate loans and short-term loans to parent company amounting to $3.3 billion.

On February 23, 2024, AWCC completed a $1.4 billion debt offering, which included the sale of $700 million aggregate principal amount of its 5.150% Senior Notes due 2034 and $700 million aggregate principal amount of its 5.450% Senior Notes due 2054. At the closing of this offering, AWCC received, after deduction of underwriting discounts and before deduction of offering expenses, net proceeds of approximately

$1,381 million. AWCC used the net proceeds of the offering (i) to lend funds to American Water and the Regulated Businesses; (ii) to repay at maturity AWCC's 3.850% Senior Notes due 2024; (iii) to repay AWCC's commercial paper obligations; and (iv) for general corporate purposes.

On March 3, 2023, the Company completed an underwritten public offering of an aggregate of 12,650,000 shares of parent company common stock. Upon closing of this offering, the Company received, after deduction of the underwriting discount and before deduction of offering expenses, net proceeds of approximately $1,688 million. The Company used the net proceeds of the offering to repay short-term commercial paper obligations of AWCC and for general corporate purposes.

On June 29, 2023, AWCC issued, in a private placement, $1,035 million aggregate principal amount of the Notes. AWCC received net proceeds of approximately $1,022 million, after deduction of underwriting discounts and commissions but before deduction of offering expenses payable by AWCC. A portion of the net proceeds was used to repay AWCC's commercial paper obligations and the remainder was used for general corporate purposes. See Note 11—Long-Term Debt in the Notes to Consolidated Financial Statements for additional information.

One of the principal market risks to which the Company is exposed is changes in interest rates. In order to manage the exposure, the Company follows risk management policies and procedures, including the use of derivative contracts such as treasury lock agreements. The Company also reduces exposure to interest rates by managing commercial paper and debt maturities. The Company (through AWCC) does not enter into derivative contracts for speculative purposes and does not use leveraged instruments. The derivative contracts entered into are for periods consistent with the related underlying exposures. The Company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. The Company minimizes the counterparty credit risk on these transactions by dealing only with leading, creditworthy financial institutions, having long-term credit ratings of "A" or better.

During the second half of 2024, the Company entered into eight treasury lock agreements, with a term of 10 years or 30 years, with notional amounts totaling $355 million, to reduce interest rate exposure on debt expected to be issued in 2025. These treasury lock agreements terminate in June 2025 and December 2025 and have an average fixed interest rate of 4.03%. In 2025, the Company entered into five additional treasury lock agreements, with a term of 10 years, with notional amounts totaling $275 million, to reduce interest rate exposure on debt expected to be issued in 2025. These treasury lock agreements terminate in March 2025 and have an average fixed interest rate of 4.60%. The Company designated these treasury lock agreements as cash flow hedges, with their fair value recorded in accumulated other comprehensive gain or loss.

The Company had entered into 15 treasury lock agreements through February 2024, with notional amounts totaling $825 million. The Company designated these treasury lock agreements as cash flow hedges, with their fair value recorded in accumulated other comprehensive gain or loss. In February 2024, the Company terminated the treasury lock agreements realizing a pre-tax net gain of $14 million, to be amortized through Interest expense over a 10-year period or 30-year period, in accordance with the tenor of the notes issued on February 23, 2024.

No ineffectiveness was recognized on hedging instruments for the years ended December 31, 2024, 2023 or 2022.

In February 2024, parent company and AWCC filed with the SEC a universal shelf registration statement that enables the Company to meet its capital needs through the offer and sale to the public from time to time of an unlimited amount of various types of securities, including American Water common stock, preferred stock, and other equity and hybrid securities, and AWCC debt securities, all subject to market conditions and demand, general economic conditions, and as applicable, rating status. The shelf registration statement will expire in February 2027. During 2024 and 2022, $1.4 billion and $800 million, respectively, of debt securities were issued under this and a predecessor registration statement. During 2023, under the predecessor registration statement, parent company issued 12,650,000 shares of its common stock for aggregate net proceeds of approximately $1,688 million.

Presented in the table below are the issuances of long-term debt in 2024:

Company	Type	Rate	Weighted Average Rate	Maturity	Amount (in millions)
AWCC (a)	Senior notes—fixed rate	5.15%-5.45%	5.30%	2034-2054	$ 1,400
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-1.75%	0.01%	2025-2061	46
Total issuances					$ 1,446

(a) This indebtedness is considered "debt" for purposes of a support agreement between parent company and AWCC, which serves as a functional equivalent of a full and unconditional guarantee by parent company of AWCC's payment obligations under such indebtedness. See "—Issuer and Guarantor of Senior Notes" below.

Presented in the table below are the retirements and redemptions of long-term debt in 2024 through sinking fund provisions, optional redemption or payment at maturity:

Company	Type	Rate	Weighted Average Rate	Maturity	Amount (in millions)
AWCC	Senior notes—fixed rate	3.85%	3.85%	2024	$ 400
AWCC	Private activity bonds and government funded debt—fixed rate	1.79%-2.31%	2.24%	2024-2031	1
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-5.50%	1.53%	2024-2061	14
Other American Water subsidiaries	Mortgage bonds—fixed rate	6.99%-7.17%	7.13%	2024	60
Total retirements and redemptions					$ 475

From time to time and as market conditions warrant, the Company may engage in long-term debt retirements through make-whole redemptions, tender offers, open market repurchases or other viable alternatives.

Issuer and Guarantor of Senior Notes

Outstanding unsecured senior notes issued by AWCC (other than the Notes) have been issued under two indentures, each by and between AWCC and Computershare Trust Company, N.A., as successor to Wells Fargo Bank, National Association, as trustee, providing for the rights and obligations of the parties thereto and the holders of the notes issued thereunder. The Notes were issued under an indenture, by and among AWCC, parent company and U.S. Bank Trust Company, National Association, as trustee, providing for the rights and obligations of the parties thereto and the holders of the Notes. The senior notes and the Notes have been issued with the benefit of a support agreement, as amended, between parent company and AWCC, which serves as the functional equivalent of a full and unconditional guarantee by parent company of AWCC's payment obligations under such indebtedness. No other subsidiary of parent company provides guarantees for any of such indebtedness. If AWCC is unable to make timely payment of any interest, principal or premium, if any, on such senior notes or the Notes, parent company will provide to AWCC, at its request or the request of any holder thereof, funds to make such payment in full. If AWCC fails or refuses to take timely action to enforce certain rights under the support agreement or if AWCC defaults in the timely payment of any amounts owed to any such holder, when due, the support agreement provides that such holder may proceed directly against parent company to enforce such rights or to obtain payment of the defaulted amounts owed to that holder.

As a wholly owned finance subsidiary of parent company, AWCC has no significant assets other than obligations of parent company and certain of its subsidiaries in its Regulated Businesses segment to repay certain intercompany loans made to them by AWCC. AWCC's ability to make payments of amounts owed to holders of the senior notes and the Notes will be dependent upon AWCC's receipt of sufficient payments of amounts owed pursuant to the terms of such intercompany loans and from its ability to issue indebtedness or otherwise obtain loans in the future, the proceeds of which would be used to fund the repayment of the senior notes and the Notes.

Because parent company is a holding company and substantially all of its operations are conducted through its subsidiaries other than AWCC, parent company's ability to fulfill its obligations under the support agreement will be dependent upon its receipt of sufficient cash dividends or distributions from its operating subsidiaries. See Note 9—Shareholders' Equity—Dividends and Distributions, in the Notes to the Consolidated Financial Statements for a summary of the limitations on parent company and its subsidiaries to pay dividends or make distributions. Furthermore, parent company's operating subsidiaries are separate and distinct legal entities and, other than AWCC, have no obligation to make any payments on the senior notes or the Notes or to make available or provide any funds for such payment, other than through their repayment obligations under intercompany loans, if any, with AWCC. Based on the foregoing, parent company's obligations under the support agreement will be effectively subordinated to all indebtedness and other liabilities, including trade payables, lease commitments and moneys borrowed or other indebtedness incurred or issued by parent company's subsidiaries other than AWCC.

Credit Facilities and Short-Term Debt

Interest rates on advances under the AWCC revolving credit facility are based on a credit spread to the Secured Overnight Financing Rate ("SOFR") rate (or applicable market replacement rate) or base rate, each determined in accordance with Moody's Ratings and S&P Global Ratings' then applicable credit rating on AWCC's senior unsecured, non-credit enhanced debt. The facility is used principally to support AWCC's commercial paper program, to provide additional liquidity support and to provide a sub-limit of up to $150 million for letters of credit. Indebtedness under the facility and AWCC's commercial paper are considered "debt" for purposes of a support agreement between parent company and AWCC, which serves as a functional equivalent of a full and unconditional guarantee by parent company of AWCC's payment obligations thereunder.

Presented in the tables below are the aggregate credit facility commitments, commercial paper limit and letter of credit availability under the revolving credit facility, as well as the available capacity for each, as of December 31:

	2024		
(In millions)	**Commercial Paper Limit**	**Letters of Credit**	**Total (a)**
Total availability	$ 2,600	$ 150	$ 2,750
Outstanding debt	(880)	(82)	(962)
Remaining availability as of December 31, 2024	$ 1,720	$ 68	$ 1,788

(a) Total remaining availability of $1.8 billion as of December 31, 2024, was accessible through revolver draws.

	2023		
(In millions)	**Commercial Paper Limit**	**Letters of Credit**	**Total (a)**
Total availability	$ 2,600	$ 150	$ 2,750
Outstanding debt	(180)	(75)	(255)
Remaining availability as of December 31, 2023	$ 2,420	$ 75	$ 2,495

(a) Total remaining availability of $2.5 billion as of December 31, 2023, was accessible through revolver draws.

Presented in the table below is the Company's total available liquidity as of December 31, 2024 and 2023:

(In millions)	Cash and Cash Equivalents	Availability on Revolving Credit Facility	Total Available Liquidity
Available liquidity as of December 31, 2024	$ 96	$ 1,788	$ 1,884
Available liquidity as of December 31, 2023	$ 330	$ 2,495	$ 2,825

The weighted average interest rate on AWCC's outstanding short-term borrowings was approximately 4.65% and 5.51%, for the years ended December 31, 2024 and 2023, respectively.

Capital Structure

Presented in the table below is the percentage of the Company's capitalization represented by the components of its capital structure as of December 31:

	2024	2023	2022
Total common shareholders' equity	42.4%	44.2%	38.3%
Long-term debt and redeemable preferred stock at redemption value	51.4%	52.9%	54.4%
Short-term debt and current portion of long-term debt	6.2%	2.9%	7.3%
Total	100%	100%	100%

The change in the capital structure mix in 2024 is mainly attributable to the increase in short-term commercial paper borrowings. The use of the proceeds from the common stock issuance on March 3, 2023, and the long-term debt issuance on June 29, 2023, reduced short-term commercial paper borrowings in 2023.

Debt Covenants

The Company's debt agreements contain financial and non-financial covenants. To the extent that the Company is not in compliance with these covenants, an event of default may occur under one or more debt agreements and the Company, or its subsidiaries, may be restricted in its ability to pay dividends, issue new debt or access the revolving credit facility. The long-term debt indentures contain a number of covenants that, among other things, prohibit or restrict the Company from issuing debt secured by the Company's assets, subject to certain exceptions. Failure to comply with any of these covenants could accelerate repayment obligations.

Covenants in certain long-term notes and the revolving credit facility require the Company to maintain a ratio of consolidated debt to consolidated capitalization (as defined in the relevant documents) of not more than 0.70 to 1.00. On December 31, 2024, the Company's ratio was 0.58 to 1.00 and therefore the Company was in compliance with the covenants.

Security Ratings

Presented in the table below are long-term and short-term credit ratings and rating outlooks as of February 19, 2025, as issued by Moody's Ratings on January 23, 2025, and S&P Global Ratings on March 4, 2024:

Securities	Moody's Ratings	S&P Global Ratings
Rating outlook	Stable	Stable
Senior unsecured debt	Baa1	A
Commercial paper	P-2	A-1

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon the ability to generate cash flows in an amount sufficient to service debt and meet investment plans. The Company can provide no assurances that its ability to generate cash flows is sufficient to maintain its existing ratings. The Company does not have any material borrowings that are subject to default or prepayment as a result of the downgrading of these security ratings, although such a downgrading could increase fees and interest charges under its credit facility.

As part of its normal course of business, the Company routinely enters into contracts for the purchase and sale of water, power and other fuel, chemicals and other services. These contracts either contain express provisions or otherwise permit the Company and its counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if the Company is downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to rely on such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that the Company must provide collateral to secure its obligations. The Company does not expect to post any collateral which will have a material adverse impact on the Company's results of operations, financial position or cash flows.

Access to the capital markets, including the commercial paper market, and respective financing costs in those markets, may be directly affected by the Company's securities ratings. The Company primarily accesses the debt capital markets, including the commercial paper market, through AWCC. However, the Company has also issued debt through its regulated subsidiaries, primarily in the form of mortgage bonds and tax exempt securities or borrowings under state revolving funds, to lower the overall cost of debt.

Dividends and Regulatory Restrictions

For discussion of the Company's dividends, dividend restrictions and dividend policy, see Note 9—Shareholders' Equity in the Notes to Consolidated Financial Statements for additional information.

Insurance Coverage

The Company carries various property, casualty, cyber and financial insurance policies with limits, deductibles and exclusions that it believes are consistent with industry standards. However, insurance coverage may not be adequate or available to cover unanticipated losses or claims. Additionally, annual policy renewals can be impacted by claims experience or adverse insurance market trends which in turn can impact coverage terms and conditions on a going-forward basis. The Company is self-insured to the extent that losses are within the policy deductible or exceed the amount of insurance maintained. Such losses could have a material adverse effect on the Company's short-term and long-term financial condition and its results of operations and cash flows.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with GAAP requires that management apply accounting policies and develop estimates, assumptions and judgments that could affect the Company's financial condition, results of operations and cash flows. Actual results could differ from these estimates, assumptions and judgments. Management believes that the areas described below require significant judgment in the application of accounting policy or in making estimates and assumptions in matters that are inherently uncertain and that may change in subsequent periods. Accordingly, changes in the estimates, assumptions and judgments applied to these accounting policies could have a significant impact on the Company's financial condition, results of operations and cash flows, as reflected in the Company's Consolidated Financial Statements. Management has reviewed the critical accounting polices described below with the Company's Audit, Finance and Risk

Committee, including the estimates, assumptions and judgments used in their application. Additional discussion regarding these critical accounting policies and their application can be found in Note 2—Significant Accounting Policies in the Notes to Consolidated Financial Statements.

Regulation and Regulatory Accounting

The Company's regulated utilities are subject to regulation by PUCs and, as such, the Company follows the authoritative accounting principles required for rate regulated utilities, which requires the Company to reflect the effects of rate regulation in its Consolidated Financial Statements. Use of this authoritative guidance is applicable to utility operations that meet the following criteria: (i) third-party regulation of rates; (ii) cost-based rates; and (iii) a reasonable assumption that rates will be set to recover the estimated costs of providing service, plus a return on net investment, or rate base. As of December 31, 2024, the Company concluded that the operations of its utilities met the criteria.

Application of this authoritative guidance has a further effect on the Company's financial statements as it pertains to allowable costs used in the ratemaking process. The Company makes significant assumptions and estimates to quantify amounts recorded as regulatory assets and liabilities. Such judgments include, but are not limited to, assets and liabilities related to regulated acquisitions, pension and postretirement benefits, depreciation rates and taxes. Due to timing and other differences in the collection of revenues, these authoritative accounting principles allow a cost that would otherwise be charged as an expense by a non-regulated entity, to be deferred as a regulatory asset if it is probable that such cost is recoverable through future rates. Conversely, the principles require the creation of a regulatory liability for amounts collected in rates to recover costs expected to be incurred in the future, or amounts collected in excess of costs incurred and are refundable to customers.

For each regulatory jurisdiction where the Company conducts business, the Company assesses, at the end of each reporting period, whether the regulatory assets continue to meet the criteria for probable future recovery and regulatory liabilities continue to meet the criteria for probable future settlement. This assessment includes consideration of factors such as changes in regulatory environments, recent rate orders (including recent rate orders on recovery of a specific or similar incurred cost to other regulated entities in the same jurisdiction) and the status of any pending or potential legislation. If subsequent events indicate that the regulatory assets or liabilities no longer meet the criteria for probable future recovery or probable future settlement, the Company's Consolidated Statements of Operations and financial position could be materially affected. In addition, if the Company concludes in a future period that a separable portion of the business no longer meets the criteria, the Company is required to eliminate the financial statement effects of regulation for that part of the business, which would include the elimination of any or all regulatory assets and liabilities that had been recorded in the Consolidated Financial Statements. Failure to meet the criteria of this authoritative guidance could materially impact the Company's Consolidated Financial Statements.

As of December 31, 2024 and 2023, the Company's regulatory asset balance was $1.2 billion and $1.1 billion, respectively, and its regulatory liability balance was $1.4 billion and $1.5 billion, respectively. See Note 3—Regulatory Matters in the Notes to Consolidated Financial Statements for further information regarding the Company's significant regulatory assets and liabilities.

Accounting for Income Taxes

Significant management judgment is required in determining the provision for income taxes, primarily due to the uncertainty related to tax positions taken, as well as deferred tax assets and liabilities, valuation allowances and the utilization of net operating loss carryforwards.

In accordance with applicable authoritative guidance, the Company accounts for uncertain income tax positions using a benefit recognition model with a two-step approach, including a more-likely-than-not recognition threshold and a measurement approach based on the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement. If it is not more-likely-than-not that the benefit of the tax

position will be sustained on its technical merits, no benefit is recorded. Uncertain tax positions that relate only to timing of when an item is included on a tax return are considered to have met the recognition threshold. Management evaluates each position based solely on the technical merits and facts and circumstances of the position, assuming the position will be examined by a taxing authority having full knowledge of all relevant information. Significant judgment is required to determine whether the recognition threshold has been met and, if so, the appropriate amount of unrecognized tax benefit to be recorded in the Consolidated Financial Statements.

The Company evaluates the probability of realizing deferred tax assets quarterly by reviewing a forecast of future taxable income and its intent and ability to implement tax planning strategies, if necessary, to realize deferred tax assets. The Company also assesses its ability to utilize tax attributes, including those in the form of carryforwards, for which the benefits have already been reflected in the financial statements. The Company records valuation allowances for deferred tax assets when it concludes that it is more-likely-than-not such benefit will not be realized in future periods.

Under GAAP, specifically Accounting Standards Codification ("ASC 740"), *Income Taxes*, the tax effects of changes in tax laws must be recognized in the period in which the law is enacted. ASC 740 also requires deferred tax assets and liabilities to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. For the Company's regulated entities, the change in deferred taxes are recorded as either an offset to a regulatory asset or a regulatory liability and may be subject to refund to customers. For the Company's unregulated operations, the change in deferred taxes are recorded as a non-cash re-measurement adjustment to earnings.

Actual income taxes could vary from estimated amounts due to the future impacts of various items, including changes in income tax laws, the Company's forecasted financial condition and results of operations, failure to successfully implement tax planning strategies and recovery of taxes through the regulatory process for the Regulated Businesses, as well as results of audits and examinations of filed tax returns by taxing authorities. The resulting tax balances as of December 31, 2024 and 2023, are appropriately accounted for in accordance with the applicable authoritative guidance; however, the ultimate outcome of tax matters could result in favorable or unfavorable adjustments to the Consolidated Financial Statements and such adjustments could be material. See Note 14—Income Taxes in the Notes to Consolidated Financial Statements for additional information regarding income taxes.

Accounting for Pension and Postretirement Benefits

The Company maintains noncontributory defined benefit pension plans covering eligible employees of its regulated utility and shared services operations. The Company also maintains other postretirement benefit plans providing medical and life insurance to eligible retirees. See Note 2—Significant Accounting Policies and Note 15—Employee Benefits in the Notes to Consolidated Financial Statements for additional information regarding the description of and accounting for the defined benefit pension plans and postretirement benefit plans.

The Company's pension and postretirement benefit costs are developed from actuarial valuations. Inherent in these valuations are key assumptions provided by the Company to its actuaries, including the discount rate and expected long-term rate of return on plan assets. Material changes in the Company's pension and postretirement benefit costs may occur in the future due to changes in these assumptions as well as fluctuations in plan assets. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other postretirement benefit expense that the Company recognizes. The primary assumptions are:

- Discount Rate—The discount rate is used in calculating the present value of benefits, which are based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.

- Expected Return on Plan Assets ("EROA")—Management projects the future return on plan assets considering prior performance, but primarily based upon the plans' mix of assets and expectations for the long-term returns on those asset classes. These projected returns reduce the net benefit costs the Company records currently.
- Rate of Compensation Increase—Management projects employees' pay increases, which are used to project employees' pension benefits at retirement.
- Health Care Cost Trend Rate—Management projects the expected increases in the cost of health care.
- Mortality—Management adopted the Society of Actuaries Pri-2012 base mortality table, the most recent table developed from private pension plan experience, which provides rates of mortality in 2012 and adopted the MP-2021 mortality improvement scale to gradually adjust future mortality rates downward due to increased longevity in each year after 2012.

The discount rate assumption, which is determined for the pension and postretirement benefit plans independently, is subject to change each year, consistent with changes in applicable high-quality, long-term corporate bond indices. The Company uses an approach that approximates the process of settlement of obligations tailored to the plans' expected cash flows by matching the plans' cash flows to the coupons and expected maturity values of individually selected bonds. For each plan, the discount rate was developed as the level equivalent rate that would yield the same present value as using spot rates aligned with the projected benefit payments. The weighted-average discount rate assumption for determining pension benefit obligations was 5.70%, 5.18% and 5.58% at December 31, 2024, 2023 and 2022, respectively. The weighted-average discount rate assumption for determining other postretirement benefit obligations was 5.69%, 5.22% and 5.60% at December 31, 2024, 2023 and 2022, respectively.

In selecting an EROA, the Company considered tax implications, past performance and economic forecasts for the types of investments held by the plans. The weighted-average EROA assumption used in calculating pension cost was 6.73% for 2024, 6.79% for 2023 and 6.50% for 2022. The weighted-average EROA assumption used in calculating other postretirement benefit costs was 5.00% for 2024, 5.00% for 2023 and 3.60% for 2022.

Presented in the table below are the allocations of the pension plan assets by asset category:

Asset Category	2025 Target Allocation	Percentage of Plan Assets as of December 31,	
		2024	2023
Equity securities	37%	44%	41%
Fixed income	63%	56%	59%
Total	100%	100%	100%

Presented in the table below are the allocations of the other postretirement benefit plan assets by asset category:

Asset Category	2025 Target Allocation (a)	Percentage of Plan Assets as of December 31,	
		2024	2023
Equity securities	27%	34%	32%
Fixed income	73%	66%	68%
Total	100%	100%	100%

(a) Refer to Note 15—Employee Benefits in the Notes to Consolidated Financial Statements for additional details on the allocations of assets and the trusts which fund the other postretirement benefit plans

The investments of the pension and postretirement welfare plan trusts are invested in a number of separately managed accounts, commingled funds and limited partnerships including equities, fixed income securities, guaranteed annuity contracts with insurance companies, real estate funds and real estate investment trusts. The trustee for the Company's defined benefit pension and postretirement welfare plans uses an independent valuation firm to calculate the fair value of plan assets.

In selecting a rate of compensation increase, the Company considers past experience in light of movements in inflation rates. The Company's rate of compensation increase was 3.51% for 2024, 2023 and 2022.

In selecting health care cost trend rates, the Company considers past performance and forecasts of increases in health care costs. As of January 1, 2024, the Company's health care cost trend rate assumption used to calculate the periodic benefit cost was 6.75% in 2024 gradually declining to 5.00% in 2031 and thereafter. As of December 31, 2024, the Company projects that medical inflation will be 6.50% in 2025 gradually declining to 5.00% in 2031 and thereafter.

The Company will use a weighted-average discount rate and EROA of 5.70% and 6.63%, respectively, for estimating its 2025 pension costs. Additionally, the Company will use a weighted-average discount rate and EROA of 5.69% and 5.00%, respectively, for estimating its 2025 other postretirement benefit costs. A decrease in the discount rate or the EROA would increase the Company's pension expense. The Company's 2024 pension and postretirement total net benefit credit was $3 million and the 2023 pension and postretirement total net benefit credit was $6 million. The Company expects to make pension contributions to the plan trusts of $44 million in 2025; however, the actual amounts contributed could change materially from this estimate. The assumptions are reviewed annually and at any interim re-measurement of the plan obligations. The impact of assumption changes is reflected in the recorded pension and postretirement benefit amounts as they occur, or over a period of time if allowed under applicable accounting standards.

Revenue Recognition

Revenue from the Company's Regulated Businesses is generated primarily from water and wastewater services delivered to customers. These contracts contain a single performance obligation, the delivery of water and/or wastewater services, as the promise to transfer the individual good or service is not separately identifiable from other promises within the contracts and, therefore, is not distinct. Revenues are recognized over time, as services are provided. There are generally no significant financing components or variable consideration. Revenues include amounts billed to customers on a cycle basis, and unbilled amounts calculated based on estimated usage from the date of the meter reading associated with the latest customer bill, to the end of the accounting period. The amounts that the Company has a right to invoice are determined by each customer's actual usage, an indicator that the invoice amount corresponds directly to the value transferred to the customer.

Increases or decreases in the volumes delivered to customers and rate mix due to changes in usage patterns in customer classes in the period could be significant to the calculation of unbilled revenue. In addition, changes in the timing of meter reading schedules and the number and type of customers scheduled for each meter reading date would also have an effect on the unbilled revenue calculation. Unbilled revenue for the Company's regulated utilities as of December 31, 2024 and 2023 was $219 million and $193 million, respectively.

The Company also recognizes revenues for certain ratemaking mechanisms that meet the criteria for alternative revenue program accounting. These mechanisms, which include the Company's revenue stability mechanisms, qualify as alternative revenue programs if they have been authorized for rate recovery, are objectively determinable and probable of recovery, and are expected to be collected within 24 months following the end of the period in which they were recognized.

The Company also has long-term, fixed fee contracts to operate and maintain water and wastewater systems for the U.S. government on military installations and facilities owned by municipal customers. Billing and revenue recognition for the fixed fee revenues occurs ratably over the term of the contract, as customers

simultaneously receive and consume the benefits provided by the Company. Additionally, these contracts allow the Company to make capital improvements to underlying infrastructure, which are initiated through separate modifications or amendments to the original contract, whereby stand-alone, fixed pricing is separately stated for each improvement. The Company has determined that these capital improvements are separate performance obligations, with revenue recognized over time based on performance completed at the end of each reporting period. Losses on contracts are recognized during the period in which the losses first become probable and estimable. Revenues recognized during the period in excess of billings on construction contracts are recorded as unbilled revenues or other long-term assets, with billings in excess of revenues recorded as other current or long-term liabilities until the recognition criteria are met. Changes in contract performance and related estimated contract profitability may result in revisions to costs and revenues and are recognized in the period in which revisions are determined. Unbilled revenue within Other as of December 31, 2024 and 2023, was $96 million and $109 million, respectively.

Accounting for Contingencies

The Company records loss contingencies when management determines that the outcome of future events is probable of occurring and when the amount of the loss or a range of losses can be reasonably estimated. The determination of a loss contingency is based on management's judgment and estimates about the likely outcome of the matter, which may include an analysis of different scenarios. Liabilities are recorded or adjusted when events or circumstances cause these judgments or estimates to change. In assessing whether a loss is reasonably possible, management considers many factors, which include, but are not limited to: the nature of the litigation, claim or assessment, review of applicable law, opinions or views of legal counsel and other advisors, and the experience gained from similar cases or situations. The Company provides disclosures for material contingencies when management deems there is a reasonable possibility that a loss or an additional loss may be incurred. The Company provides estimates of reasonably possible losses when such estimates may be reasonably determined, either as a single amount or within a reasonable range.

Actual amounts realized upon settlement or other resolution of loss contingencies may be different than amounts recorded and disclosed and could have a significant impact on the liabilities, revenue and expenses recorded on the Consolidated Financial Statements. See Note 16—Commitments and Contingencies in the Notes to Consolidated Financial Statements for additional information regarding contingencies.

Recent Accounting Standards

See Note 2—Significant Accounting Policies in the Notes to Consolidated Financial Statements for a description of recent accounting standards.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to market risk associated with changes in commodity prices, equity prices and interest rates. The Company is exposed to risks from changes in interest rates as a result of its issuance of variable and fixed rate debt and commercial paper. The Company manages its interest rate exposure by limiting its variable rate exposure and by monitoring the effects of market changes in interest rates. The Company also has the ability to enter into financial derivative instruments, which could include instruments such as, but not limited to, interest rate swaps, forward starting swaps and U.S. Treasury lock agreements to manage and mitigate interest rate risk exposure. As of December 31, 2024, a hypothetical 1% increase in average interest rates applied to the Company's short-term borrowing balances throughout 2024 would result in an increased annual interest expense of approximately $2 million.

As of December 31, 2024, the Company had eight treasury lock agreements, each with a term of 10 years or 30 years, with notional amounts totaling $355 million, to reduce interest rate exposure on debt expected to be issued in 2025. These treasury lock agreements terminate in June 2025 and December 2025 and have an average fixed rate of 4.03%. When entering into treasury locks, the Company is subject to market risk with respect to

changes in the underlying benchmark interest rate that impacts the fair value of the treasury locks. The Company manages market risk by matching the terms of the treasury locks with the critical terms of the expected debt issuance. The fair value of the treasury locks at December 31, 2024, was in a gain position of $24 million. A hypothetical 1% favorable change in interest rates would result in an increase in the fair value of the treasury locks to a gain position of approximately $60 million at December 31, 2024.

The Company's risks associated with price increases for chemicals, electricity and other commodities are reduced through contractual arrangements and the expected ability to recover price increases through rates, in the next general rate case proceeding or other regulatory mechanism, as authorized by each regulatory jurisdiction. Non-performance by these commodity suppliers could have a material adverse impact on the Company's results of operations, financial position and cash flows.

The market price of the Company's common stock may experience fluctuations, which may be unrelated to its operating performance. In particular, the Company's stock price may be affected by general market movements as well as developments specifically related to the water and wastewater industry. These could include, among other things, interest rate movements, quarterly variations or changes in financial estimates by securities analysts and governmental or regulatory actions. This volatility may make it difficult for the Company to access the capital markets in the future through additional offerings of its common stock or other equity securities, regardless of its financial performance, and such difficulty may preclude the Company from being able to take advantage of certain business opportunities or meet business obligations.

The Company is exposed to credit risk through its water, wastewater and related services. The Company's Regulated Businesses serve residential, commercial, industrial and other customers, while the businesses within Other engage in business activities with government entities and other customers. The Company's primary credit risk is exposure to customer default on contractual obligations and the associated loss that may be incurred due to the non-payment of customer accounts receivable balances. The Company's credit risk is managed through established credit and collection policies which are in compliance with applicable regulatory requirements and involve monitoring of customer exposure and the use of credit risk mitigation measures such as letters of credit or prepayment arrangements. The Company's credit portfolio is diversified with no significant customer or industry concentrations. In addition, the Regulated Businesses are generally able to recover all prudently incurred costs including uncollectible customer accounts receivable expenses and collection costs through rates.

The Company's retirement trust assets are exposed to the market prices of debt and equity securities. Changes to the retirement trust asset values can impact the Company's pension and other benefits expense, funded status and future minimum funding requirements. Changes in interest rates can impact retirement liabilities. The Company aims to reduce risk through asset diversification and by investing in long duration fixed-income securities that have a duration similar to that of its pension liabilities, seeking to hedge some of the interest rate sensitivity of its liabilities. That way, if interest rates fall and liabilities increase, the Company expects that the fixed-income assets in its retirement trust will also increase in value. The Company also expects its risk to be reduced through its ability to recover pension and other benefit costs through rates.

The Company is also exposed to a potential national economic recession or deterioration in local economic conditions in the markets in which it operates. The credit quality of the Company's customer accounts receivable is dependent on the economy and the ability of its customers to manage through unfavorable economic cycles and other market changes. In addition, there can be no assurances that regulators will grant sufficient rate authorizations. Therefore, the Company's ability to fully recover operating expense, recover its investment and provide an appropriate return on invested capital made in the Regulated Businesses may be adversely impacted.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
American Water Works Company, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of American Water Works Company, Inc. and its subsidiaries (the "Company") as of December 31, 2024 and 2023, and the related consolidated statements of operations, of comprehensive income, of changes in shareholders' equity and of cash flows for each of the three years in the period ended December 31, 2024, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control—Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023**,** and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control—Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in

accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Accounting for the Effects of Rate Regulation

As described in Notes 2 and 3 to the consolidated financial statements, the Company's consolidated regulatory assets and liabilities balances were $1,169 million and $1,416 million, respectively, as of December 31, 2024. The Company's regulated utilities are subject to regulation by multiple state utility commissions and the Company follows authoritative accounting principles required for rate regulated utilities, which requires the effects of rate regulation to be reflected in the Company's consolidated financial statements. As disclosed by management, for each regulatory jurisdiction where the Company conducts business, the Company assesses, at the end of each reporting period, whether the regulatory assets continue to meet the criteria for probable future recovery and regulatory liabilities continue to meet the criteria for probable future settlement. This assessment includes consideration of factors such as changes in regulatory environments, recent rate orders (including recent rate orders on recovery of a specific or similar incurred cost to other regulated entities in the same jurisdiction) and the status of any pending or potential legislation.

The principal considerations for our determination that performing procedures relating to accounting for the effects of rate regulation is a critical audit matter are the significant judgment by management in accounting for regulatory assets and liabilities relative to whether regulatory assets continue to meet the criteria for probable future recovery and regulatory liabilities continue to meet the criteria for probable future settlement as a result of changes in regulatory environments, recent rate orders, and the status of any pending or potential legislation. This in turn led to a high degree of auditor judgment, subjectivity, and effort in performing audit procedures and evaluating audit evidence obtained relating to management's judgments.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Company's regulatory accounting process, including controls over management's assessment and consideration of factors related to the probability of future recovery or settlement. These procedures also included, among others, evaluating the reasonableness of management's judgments regarding the probability of recovery and settlement based on the Company's correspondence with regulators,

status of regulatory proceedings, past practices, and other relevant information; evaluating the related accounting and disclosure implications; and evaluating regulatory asset and liability balances based on provisions and formulas outlined in rate orders and other correspondence with the Company's regulators.

American Water Works Company, Inc. and Subsidiary Companies

Notes to Consolidated Financial Statements
(Unless otherwise noted, in millions, except per share data)

Note 1: Organization and Operation

American Water Works Company, Inc. (the "Company" or "American Water") is a holding company for subsidiaries that provide water and wastewater services throughout the United States. References to "parent company" mean American Water Works Company, Inc., without its subsidiaries. The Company's primary business involves the ownership of regulated utilities that provide water and wastewater services in 14 states in the United States, collectively referred to as the "Regulated Businesses." The Company also operates other businesses that provide water and wastewater services to the U.S. government on military installations, as well as municipalities. These other businesses do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States ("GAAP"), and are collectively presented throughout this Annual Report on Form 10-K within "Other." See Note 20—Segment Information for additional information.

Note 2: Significant Accounting Policies

Regulation

The Company's regulated utilities are subject to regulation by multiple state utility commissions or other entities engaged in utility regulation, collectively referred to as Public Utility Commissions ("PUCs"). As such, the Company follows authoritative accounting principles required for rate regulated utilities, which requires the effects of rate regulation to be reflected in the Company's Consolidated Financial Statements. PUCs generally authorize revenue at levels intended to recover the estimated costs of providing service, plus a return on net investments, or rate base. Regulators may also approve accounting treatments, long-term financing programs and cost of capital, operation and maintenance ("O&M") expenses, capital expenditures, taxes, affiliated transactions and relationships, reorganizations, mergers, acquisitions and dispositions, along with imposing certain penalties or granting certain incentives. Due to timing and other differences in the collection of a regulated utility's revenues, these authoritative accounting principles allow a cost that would otherwise be charged as an expense by a non-regulated entity, to be deferred as a regulatory asset if it is probable that such cost is recoverable through future rates. Conversely, these principles also require the creation of a regulatory liability for amounts collected in rates to recover costs expected to be incurred in the future, or amounts collected in excess of costs incurred and are refundable to customers. See Note 3—Regulatory Matters for additional information.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires that management make estimates, assumptions and judgments that could affect the Company's financial condition, results of operations and cash flows. Actual results could differ from these estimates, assumptions and judgments. The Company considers its critical accounting estimates to include (i) the application of regulatory accounting principles and the related determination and estimation of regulatory assets and liabilities, (ii) revenue recognition and the estimates used in the calculation of unbilled revenue, (iii) accounting for income taxes, (iv) benefit plan assumptions and (v) the estimates and judgments used in determining loss contingencies. The Company's critical accounting estimates that are particularly sensitive to change in the near term are amounts reported for regulatory assets and liabilities, income taxes, benefit plan assumptions and contingency-related obligations.

Principles of Consolidation

The accompanying Consolidated Financial Statements include the accounts of American Water and all of its subsidiaries in which a controlling interest is maintained after the elimination of intercompany balances and transactions.

Property, Plant and Equipment

Property, plant and equipment consists primarily of utility plant utilized by the Company's regulated utilities. Additions to utility plant and replacement of retirement units of utility plant are capitalized and include costs such as materials, direct labor, payroll taxes and benefits, indirect items such as engineering and supervision, transportation and an allowance for funds used during construction ("AFUDC"). Costs for repair, maintenance and minor replacements are charged to O&M expense as incurred.

The cost of utility plant is depreciated using the straight-line average remaining life, group method. The Company's regulated utilities record depreciation in conformity with amounts approved by PUCs, after regulatory review of the information the Company submits to support its estimates of the assets' remaining useful lives.

Nonutility property consists primarily of buildings and equipment utilized by the Military Services Group ("MSG") and for internal operations. This property is stated at cost, net of accumulated depreciation, which is calculated using the straight-line method over the useful lives of the assets.

When units of property, plant and equipment are replaced, retired or abandoned, the carrying value is credited against the asset and charged to accumulated depreciation. To the extent the Company recovers cost of removal or other retirement costs through rates after the retirement costs are incurred, a regulatory asset is recorded. In some cases, the Company recovers retirement costs through rates during the life of the associated asset and before the costs are incurred. These amounts result in a regulatory liability being reported based on the amounts previously recovered through customer rates, until the costs to retire those assets are incurred.

The costs incurred to acquire and internally develop computer software for internal use are capitalized as a unit of property. The carrying value of these costs, net of amortization, amounted to $398 million and $419 million as of December 31, 2024 and 2023, respectively.

Cash and Cash Equivalents, and Restricted Funds

Substantially all cash is invested in interest-bearing accounts. All highly liquid investments with a maturity of three months or less when purchased are considered to be cash equivalents.

Restricted funds consist primarily of proceeds from financings for the construction and capital improvement of facilities, and deposits for future services under O&M projects, primarily performed by MSG. Proceeds are held in escrow or interest-bearing accounts until the designated expenditures are incurred. Restricted funds are classified on the Consolidated Balance Sheets as either current or long-term based upon the intended use of the funds.

Presented in the table below is a reconciliation of the cash and cash equivalents and restricted funds amounts as presented on the Consolidated Balance Sheets to the sum of such amounts presented on the Consolidated Statements of Cash Flows for the years ended December 31:

	2024	2023
Cash and cash equivalents	$ 96	$ 330
Restricted funds	29	34
Restricted funds included in other long-term assets	15	—
Cash and cash equivalents and restricted funds as presented on the Consolidated Statements of Cash Flows	$ 140	$ 364

Accounts Receivable and Unbilled Revenues

Accounts receivable include regulated utility customer accounts receivable, which represent amounts billed to water and wastewater customers generally on a monthly basis. Credit is extended based on the guidelines of the applicable PUCs and collateral is generally not required. Also included are the trade accounts receivable of other businesses, primarily MSG, and nonutility customer receivables of the Regulated Businesses. Unbilled revenues are accrued when service has been provided but has not been billed to customers and when costs exceed billings on certain construction contracts.

Allowance for Uncollectible Accounts

Allowances for uncollectible accounts are maintained for estimated probable losses resulting from the Company's inability to collect receivables from customers. Accounts that are outstanding longer than the payment terms are considered past due. A number of factors are considered in determining the allowance for uncollectible accounts, including the length of time receivables are past due, previous loss history, current economic and societal conditions and reasonable and supportable forecasts that affect the collectability of receivables from customers. The Company generally writes off accounts when they become uncollectible or are over a certain number of days outstanding. See Note 7—Allowance for Uncollectible Accounts for additional information.

Materials and Supplies

Materials and supplies are stated at the lower of cost or net realizable value. Cost is determined using the average cost method.

Seller Promissory Note

The Company's secured seller promissory note is accounted for under Accounting Standards Codification ("ASC") Topic 310, *Receivables*, and is classified as held for investment and accounted for at amortized cost at the present value of consideration received for the sale of its Homeowner Services Group ("HOS") business. Interest income from the secured seller promissory note is accrued based on the principal amount outstanding and earned over the contractual life of the loan.

Leases

The Company has operating and finance leases involving real property, including facilities, utility assets, vehicles, and equipment. The Company determines if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use ("ROU") assets, accrued liabilities and operating lease liabilities on the Consolidated Balance Sheets. Finance leases are included in property, plant and equipment, accrued liabilities and other long-term liabilities on the Consolidated Balance Sheets. The Company has made an accounting policy election not to include operating leases with a lease term of twelve months or less.

ROU assets represent the right to use an underlying asset for the lease term and the lease liabilities represent the obligation to make lease payments arising from the lease. ROU assets and lease liabilities are generally recognized at the commencement date based on the present value of discounted lease payments over the lease term. As most of the Company's leases do not provide an implicit rate, the Company uses its incremental borrowing rate based on the information available at the commencement date in determining the present value of discounted lease payments. The implicit rate is used when readily determinable. ROU assets also include any upfront lease payments and excludes lease incentives. The Company's lease terms may include options to extend or terminate the lease when it is reasonably certain that the option will be exercised. Lease expense is recognized on a straight-line basis over the lease term.

The Company has lease agreements with lease components (e.g., fixed payments including rent, real estate taxes and insurance costs) and non-lease components (e.g., common-area maintenance costs), which are generally accounted for separately; however, the Company accounts for the lease and non-lease components as a single lease component for certain leases. Certain lease agreements include variable rental payments adjusted periodically for inflation. Additionally, the Company applies a portfolio approach to effectively account for the ROU assets and lease liabilities. The Company's lease agreements do not contain any material residual value guarantees or material restrictive covenants.

Goodwill

Goodwill represents the excess of the purchase price paid over the estimated fair value of the assets acquired and liabilities assumed in the acquisition of a business. Goodwill is not amortized and must be allocated at the reporting unit level, which is defined as an operating segment or one level below, and tested for impairment at least annually, or more frequently if an event occurs or circumstances change that would more likely than not, reduce the fair value of a reporting unit below its carrying value.

The Company's goodwill is primarily associated with the acquisition of American Water by an affiliate of the Company's previous owner in 2003 and has been allocated to reporting units based on the fair values at the date of the acquisitions. For purposes of testing goodwill for impairment, the reporting units in the Regulated Businesses segment are aggregated into a single reporting unit. The goodwill of Other is attributable to the MSG reporting unit.

The Company's annual impairment testing is performed as of November 30 of each year. The Company assesses qualitative factors to determine whether quantitative testing is necessary. If it is determined, based upon qualitative factors, that the estimated fair value of a reporting unit is, more likely than not, greater than its carrying value, no further testing is required. If the Company bypasses the qualitative assessment or performs the qualitative assessment and determines that the estimated fair value of a reporting unit, is more likely than not, less than its carrying value, a quantitative, fair value-based assessment is performed. This quantitative testing compares the estimated fair value of the reporting unit to its respective net carrying value, including goodwill, on the measurement date. An impairment loss will be recognized in the amount equal to the excess of the reporting unit's carrying value compared to its estimated fair value, limited to the total amount of goodwill allocated to that reporting unit.

Application of goodwill impairment testing requires management judgment, including the identification of reporting units and determining the fair value of reporting units. Management estimates fair value using a discounted cash flow analysis. Significant assumptions used in these fair value estimations include, but are not limited to, forecasts of future operating results, discount rate and growth rate.

The Company believes the assumptions and other considerations used to value goodwill to be appropriate, however, if actual experience differs from the assumptions and considerations used in its analysis, the resulting change could have a material adverse impact on the Consolidated Financial Statements. See Note 8—Goodwill for additional information.

Impairment of Long-Lived Assets

Long-lived assets, other than goodwill, primarily include property, plant and equipment. The Company evaluates long-lived assets for impairment when circumstances indicate the carrying value of those assets may not be recoverable. The Company determines if long-lived assets are potentially impaired by comparing the undiscounted expected future cash flows to the carrying value when indicators of impairment exist. When the undiscounted cash flow analysis indicates a long-lived asset may not be recoverable, the amount of the impairment loss is determined by measuring the excess of the carrying amount of the long-lived asset or asset group over its fair value.

The long-lived assets of the Company's regulated utilities are grouped on a separate entity basis for impairment testing, as they are integrated state-wide operations that do not have the option to curtail service and generally have uniform tariffs. A regulatory asset is charged to earnings if and when future recovery in rates of that asset is no longer probable.

The Company believes the assumptions and other considerations used to value long-lived assets to be appropriate, however, if actual experience differs from the assumptions and considerations used in its estimates, the resulting change could have a material adverse impact on the Consolidated Financial Statements.

Advances for Construction and Contributions in Aid of Construction

Regulated utility subsidiaries may receive advances for construction and contributions in aid of construction from customers, home builders and real estate developers to fund construction necessary to extend service to new areas.

Advances are refundable for limited periods of time as new customers begin to receive service or other contractual obligations are fulfilled. Included in other current liabilities as of December 31, 2024 and 2023, on the Consolidated Balance Sheets are estimated refunds of $21 million and $18 million, respectively. These amounts represent expected refunds during the next 12-month period.

Advances that are no longer refundable are reclassified to contributions in aid of construction. Contributions in aid of construction are permanent collections of plant assets or cash for a particular construction project. For ratemaking purposes, the amount of such contributions generally serves as a rate base reduction since the contributions represent non-investor supplied funds.

Generally, the Company depreciates utility plant funded by contributions and amortizes its contributions in aid of construction balance as a reduction to depreciation expense, producing a result which is functionally equivalent to reducing the original cost of the utility plant for the contributions. In accordance with applicable regulatory guidelines, some of the Company's utility subsidiaries do not amortize contributions in aid of construction, and any contribution received remains on the balance sheet indefinitely. Amortization of contributions in aid of construction was $46 million, $40 million and $37 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Revenue Recognition

Under ASC Topic 606, *Revenue From Contracts With Customers,* and all related amendments (collectively, "ASC 606"), a performance obligation is a promise within a contract to transfer a distinct good or service, or a series of distinct goods and services, to a customer. Revenue is recognized when performance obligations are satisfied and the customer obtains control of promised goods or services. The amount of revenue recognized reflects the consideration to which the Company expects to be entitled to receive in exchange for goods or services. Under ASC 606, a contract's transaction price is allocated to each distinct performance obligation. To determine revenue recognition for arrangements that the Company determines are within the scope of ASC 606, the Company performs the following five steps: (i) identifies the contracts with a customer; (ii) identifies the performance obligations within the contract, including whether any performance obligations are distinct and capable of being distinct in the context of the contract; (iii) determines the transaction price; (iv) allocates the transaction price to the performance obligations in the contract; and (v) recognizes revenue when, or as, the Company satisfies each performance obligation.

The Company's revenues from contracts with customers are discussed below. Customer payments for contracts are generally due within 30 days of billing and none of the contracts with customers have payment terms that exceed one year; therefore, the Company elected to apply the significant financing component practical expedient and no amount of consideration has been allocated as a financing component.

Regulated Businesses Revenue

Revenue from the Company's Regulated Businesses is generated primarily from water and wastewater services delivered to customers. These contracts contain a single performance obligation, the delivery of water and/or wastewater services, as the promise to transfer the individual good or service is not separately identifiable from other promises within the contracts and, therefore, is not distinct. Revenues are recognized over time, as services are provided. There are generally no significant financing components or variable consideration. Revenues include amounts billed to customers on a cycle basis and unbilled amounts calculated based on estimated usage from the date of the meter reading associated with the latest customer bill, to the end of the accounting period. The amounts that the Company has a right to invoice are determined by each customer's actual usage, an indicator that the invoice amount corresponds directly to the value transferred to the customer.

The Company recognizes revenues for certain ratemaking mechanisms that meet the criteria for alternative revenue program accounting. These mechanisms, which include the Company's revenue stability mechanisms, qualify as alternative revenue programs if they have been authorized for rate recovery, are objectively determinable and probable of recovery and are expected to be collected within 24 months following the end of the period in which they were recognized. For mechanisms that meet these criteria, the Company adjusts revenue and records an offsetting regulatory asset or liability once the condition or event allowing additional billing or refund has occurred. See Note 4—Revenue Recognition for disaggregated revenue information.

Other Revenue

The Company has long-term, fixed fee contracts to operate and maintain water and wastewater systems for the U.S. government on military installations and facilities owned by municipal customers. Billing and revenue recognition for the fixed fee revenues occurs ratably over the term of the contract, as customers simultaneously receive and consume the benefits provided by the Company. Additionally, these contracts allow the Company to make capital improvements to underlying infrastructure, which are initiated through separate modifications or amendments to the original contract, whereby stand-alone, fixed pricing is separately stated for each improvement. The Company has determined that these capital improvements are separate performance obligations, with revenue recognized over time based on performance completed at the end of each reporting period. Losses on contracts are recognized during the period in which the losses first become probable and estimable. Revenues recognized during the period in excess of billings on construction contracts are recorded as unbilled revenues or other long-term assets, with billings in excess of revenues recorded as other current or long-term liabilities until the recognition criteria are met. Changes in contract performance and related estimated contract profitability may result in revisions to costs and revenues and are recognized in the period in which revisions are determined. See Note 4—Revenue Recognition for additional information.

Income Taxes

The Company and its subsidiaries participate in a consolidated federal income tax return for U.S. tax purposes. Members of the consolidated group are charged with the amount of federal income tax expense determined as if they filed separate returns.

Certain income and expense items are accounted for in different time periods for financial reporting than for income tax reporting purposes. The Company provides deferred income taxes on the difference between the tax basis of assets and liabilities and the amounts at which they are carried in the financial statements. These deferred income taxes are based on the enacted tax rates expected to be in effect when these temporary differences are projected to reverse. In addition, the regulated utility subsidiaries recognize regulatory assets and liabilities for the effect on revenues expected to be realized as the tax effects of temporary differences, previously flowed through to customers, reverse.

Investment tax credits have been deferred by the regulated utility subsidiaries and are being amortized to income over the average estimated service lives of the related assets.

The Company recognizes accrued interest and penalties related to tax positions as a component of income tax expense and accounts for sales tax collected from customers and remitted to taxing authorities on a net basis. See Note 14—Income Taxes for additional information.

Allowance for Funds Used During Construction

AFUDC is a non-cash credit to income with a corresponding charge to utility plant that represents the cost of borrowed funds or a return on equity funds devoted to plant under construction. The regulated utility subsidiaries record AFUDC to the extent permitted by the PUCs. The portion of AFUDC attributable to borrowed funds is shown as a reduction of interest expense in the Consolidated Statements of Operations. Any portion of AFUDC attributable to equity funds would be included in Other, net in the Consolidated Statements of Operations. Presented in the table below is AFUDC for the years ended December 31:

	2024	2023	2022
Allowance for other funds used during construction	$ 38	$ 41	$ 20
Allowance for borrowed funds used during construction	21	24	14

Derivative Financial Instruments

The Company uses derivative financial instruments primarily for purposes of hedging exposures to fluctuations in interest rates. These derivative contracts are entered into for periods consistent with the related underlying exposures and do not constitute positions independent of those exposures. The Company does not enter into derivative contracts for speculative purposes and does not use leveraged instruments.

All derivatives are recognized on the balance sheet at fair value. On the date the derivative contract is entered into, the Company designates the derivative as a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash-flow hedge).

The gains and losses on the effective portion of cash-flow hedges are recorded in other comprehensive income, until earnings are affected by the variability of cash flows. Any ineffective portion of designated cash-flow hedges is recognized in current-period earnings.

Cash flows from derivative contracts are included in net cash provided by operating activities on the Consolidated Statements of Cash Flows. See Note 11—Long-Term Debt for additional information.

Pension and Other Postretirement Benefits

The Company maintains defined benefit pension plans and other postretirement benefit plans for eligible employees and retirees. The plan obligation and costs of providing benefits under these plans are annually measured as of December 31. The measurement involves various factors, assumptions and accounting elections. The impact of assumption changes or experience different from that assumed on pension and other postretirement benefit obligations is recognized over time rather than immediately recognized in the Consolidated Statements of Operations and the Consolidated Statements of Comprehensive Income. Cumulative gains and losses that are in excess of 10% of the greater of either the projected benefit obligation or the fair value of plan assets are amortized over the expected average remaining future service period of the current active membership for the plans, with the exception of the American Water Pension Plan for Certain Inactive Participants, which is amortized over the average remaining life expectancy of the inactive participants. See Note 15—Employee Benefits for additional information.

The Company's policy is to recognize curtailments when the total expected future service of plan participants is reduced by greater than 10% due to an event that results in terminations and/or retirements.

New Accounting Standards

Presented in the table below are new accounting standards that were adopted by the Company in 2024:

Standard	Description	Date of Adoption	Application	Effect on the Consolidated Financial Statements
Segment Reporting	The guidance in this standard expands reportable segment disclosure requirements, primarily through enhanced disclosures about significant segment expenses. Additionally, the guidance enhances interim disclosure requirements, clarifies circumstances in which an entity can disclose multiple segment measures of profit and loss, provides new segment disclosure requirements for entities with a single reportable segment, and other disclosure requirements.	Fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024	Retrospective	The Company adopted the standard as of December 31, 2024, including a recast of 2023 and 2022 information, by including additional required disclosures within the Notes to the Consolidated Financial Statements. See Note 20—Segment Information for further details.

Presented in the table below are recently issued accounting standards that have not yet been adopted by the Company as of December 31, 2024:

Standard	Description	Date of Adoption	Application	Effect on the Consolidated Financial Statements
Income Taxes	The guidance in this standard requires disclosure of a tax rate reconciliation table, in both percentages and reporting currency amounts, which includes additional categories of information about federal, state, and foreign income taxes and provides further details about reconciling items in certain categories that meet a quantitative threshold. The guidance also requires an annual disclosure of income taxes paid, net of refunds, disaggregated by federal, state, and foreign taxes paid, and further disaggregated by jurisdiction based on a quantitative threshold. The standard includes other disclosure requirements and eliminates certain existing disclosure requirements.	Annual periods beginning after December 15, 2024	Prospective, with retrospective application also permitted	The Company is evaluating the impact on its Consolidated Financial Statements and the timing of adoption.
Income Statement Disaggregation	The guidance in this standard enhances disclosures related to income statement expenses to further disaggregate expenses in the footnotes to the financial statements. The standard requires disaggregation of any relevant expense caption presented on the face of the income statement that contains the following expense categories: purchases of inventory, employee compensation, depreciation, intangible asset amortization, and depletion. Further, the standard requires disclosure of the total amount and the entity's definition of selling expenses.	Annual periods beginning after December 15, 2026 and interim periods within fiscal years beginning after December 15, 2027	Prospective, with retrospective application also permitted.	The Company is evaluating the impact on its Consolidated Financial Statements and the timing of adoption.

Standard	Description	Date of Adoption	Application	Effect on the Consolidated Financial Statements
Induced Conversions of Convertible Debt Instruments	The guidance in this standard clarifies the requirements for determining whether to account for certain settlements of convertible debt instruments as induced conversions or extinguishments. The guidance requires an entity to account for a settlement as an induced conversion if the inducement offer includes the issuance of all of the consideration issuable under the conversion privileges provided in the terms of the existing convertible debt instrument.	Annual periods beginning after December 15, 2025 and interim reporting period within those annual reporting periods	Prospective, with retrospective application also permitted.	The Company is evaluating the impact on its Consolidated Financial Statements and the timing of adoption.

Reclassifications

Certain reclassifications have been made to prior periods in the Consolidated Financial Statements and Notes to conform to the current presentation.

Note 3: Regulatory Matters

General Rate Cases

The table below summarizes the annualized incremental revenues, assuming a constant sales volume and customer count, resulting from general rate case authorizations that became effective during 2024. The amounts include reductions for the amortization of the excess accumulated deferred income taxes ("EADIT") that are generally offset in income tax expense.

	Effective Date	Amount
General rate cases by state:		
Kentucky	(a)	$ 17
New Jersey	September 15, 2024	80
Pennsylvania	August 7, 2024	99
Indiana, Step Increases	(b)	48
West Virginia	February 25, 2024	18
California	January 1, 2024	21
Total general rate case authorizations		$ 283

(a) In 2024, $6 million was effective November 6 and $11 million was effective May 3.

(b) In 2024, $23 million was effective May 10 and $25 million was effective February 21.

The table below summarizes the annualized incremental revenues, assuming a constant sales volume and customer count, resulting from general rate case authorizations that became effective on or after January 1, 2025. The amounts include reductions for the amortization of EADIT that are generally offset in income tax expense.

	Effective Date	Amount
General rate cases by state:		
Tennessee	January 21, 2025	$ 1
Illinois	January 1, 2025	105
Total general rate case authorizations		$ 106

On January 21, 2025, the Tennessee Public Utility Commission (the "TPUC") approved a motion authorizing an adjustment of water base rates requested in a rate case filed on May 1, 2024, by the Company's Tennessee subsidiary. The TPUC approved an increase of $1 million in annualized revenues, excluding previously recovered infrastructure surcharges of $18 million, based on an authorized return on equity of 9.70%, authorized rate base of approximately $300 million, a common equity ratio of 44.19% and a debt ratio of 55.81%. This adjustment took effect on January 21, 2025, and is driven primarily by approximately $173 million in capital investments made and to be made by the Tennessee subsidiary through December 2025.

On December 5, 2024, the Illinois Commerce Commission issued a final order approving the adjustment of base rates requested in a rate case originally filed on January 25, 2024, by the Company's Illinois subsidiary. The general rate case order approved an increase of $105 million in annualized water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $5 million, based on an authorized return on equity of 9.84%, authorized rate base of $2.2 billion, and a capital structure with an equity component of 49.00% and a debt component of 51.00%. The general rate case order denied the second step increase of $16 million. The increase was effective January 1, 2025, and is driven primarily by approximately $557 million in capital investments made and to be made by the Illinois subsidiary from January 2024 through December 2025.

On December 5, 2024, the California Public Utilities Commission (the "CPUC") approved a final decision adopting the terms of a partial settlement agreement filed on November 17, 2023, in the Company's California subsidiary's general rate case originally filed on July 1, 2022. Incorporating the currently effective return on equity of 10.20%, the decision provides incremental annualized water and wastewater revenues of $21 million in the 2024 test year, and an estimated $16 million in the 2025 escalation year and $16 million in the 2026 attrition year. New rates were implemented retroactively to January 1, 2024. In addition, the CPUC denied the California subsidiary's proposed Water Resources Sustainability Plan decoupling mechanism but approved continuation of its currently effective Annual Consumption Adjustment Mechanism. On December 12, 2024, the California subsidiary filed an application for rehearing of the CPUC's denial of the proposed Water Resources Sustainability Plan decoupling mechanism.

On May 3, 2024, the Kentucky Public Service Commission (the "KPSC") issued an order approving the adjustment of base rates requested in a rate case filed on June 30, 2023, by the Company's Kentucky subsidiary. The general rate case order approved an $11 million annualized increase in water revenues, excluding infrastructure surcharge revenues of $10 million, which continue to be recovered in the Kentucky subsidiary's approved infrastructure mechanism. The annualized increase is based upon an authorized return on equity of 9.70%, authorized rate base of $489 million, which reflects capital investments through January 31, 2025, and a capital structure with a common equity ratio of 52.22%. Interim rates in this proceeding were effective on February 6, 2024, and the order required that the difference between interim and final approved rates be subject to refund no later than August 26, 2024. On May 16, 2024, the Kentucky subsidiary filed with the KPSC a petition for rehearing of the KPSC's order, seeking clarification and/or correction of certain computational inconsistencies that the Kentucky subsidiary believes are reflected in the KPSC's order with respect to the authorized amount of annualized revenues to be received by the Kentucky subsidiary. On November 6, 2024, the KPSC approved a final order (the "Final Order") providing for a $17 million annualized increase in water revenues, an increase of approximately $6 million from May 3, 2024. New rates provided in the Final Order were effective November 6, 2024.

On September 4, 2024, the New Jersey Board of Public Utilities ("NJBPU") issued an order approving without modification the stipulation of settlement of a general rate case filed on January 19, 2024, by the Company's New Jersey subsidiary. The general rate case order approved an $80 million annualized increase in the New Jersey subsidiary's water and wastewater revenues, effective September 15, 2024, based on (i) an authorized return on equity of 9.60%, (ii) an authorized rate base of $5.1 billion, (iii) a common equity ratio of 55.00%, and (iv) a long-term debt ratio of 45.00%. The annualized revenue increase is driven primarily by $1.3 billion of incremental capital investments since the New Jersey subsidiary's last general rate case. The New

Jersey subsidiary will continue to defer as a regulatory asset or liability, as appropriate, until its next general rate case, the difference between its pension expense and other postretirement benefits expense and those amounts included in base rates.

On July 22, 2024, the Pennsylvania Public Utility Commission (the "PaPUC") released an order approving the adjustment of base rates requested in a general rate case filed by the Company's Pennsylvania subsidiary on November 8, 2023. The PaPUC approved a $99 million annualized increase in the Pennsylvania subsidiary's water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $20 million, based on (i) an authorized return on equity of 9.45%, (ii) an authorized rate base of $5.8 billion, which reflects, as requested and included in the general rate case, approximately $1.0 billion in capital investments to be made through mid-2025, (iii) a common equity ratio of 55.30%, and (iv) a long-term debt ratio of 44.70%. Certain acquisitions, including the acquisition of the wastewater collection and treatment system of the Butler Area Sewer Authority, were excluded from authorized base rates. The new rates were effective on August 7, 2024, except that new wastewater rates for two recently acquired systems, including the City of York, will take effect during the first half of 2025 in accordance with the terms of the relevant acquisition agreements. As part of its approval of this rate adjustment, the PaPUC initiated an investigation into certain reported water service and water quality issues in the Pennsylvania subsidiary's Northeastern service territory, which reports had been provided during public input hearings convened in the general rate case. The PaPUC is expected to conclude the investigation in the second quarter of 2025.

On February 23, 2024, the West Virginia Public Service Commission (the "WVPSC") issued an order approving the adjustment of base rates requested in a rate case filed on May 1, 2023, by the Company's West Virginia subsidiary. The general rate case order approved an $18 million annualized increase in water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $7 million, based on an authorized return on equity of 9.80%, authorized rate base of $886 million, which reflects capital investments through February 2024, a common equity ratio of 50.12% and a long-term debt ratio of 49.88%. The increased water and wastewater revenues related to the base rate adjustment are being driven primarily by (i) $220 million of related water and wastewater system capital investments made since the completion of the West Virginia subsidiary's previous rate case, (ii) higher pension and other postretirement benefit costs, and (iii) increases in production costs, including chemicals, fuel and power costs.

On February 14, 2024, the Indiana Utility Regulatory Commission issued an order approving the adjustment of base rates requested in a rate case filed on March 31, 2023, by the Company's Indiana subsidiary. The general rate case order approved a $66 million annualized increase in water and wastewater system revenues, excluding previously recovered infrastructure surcharges, based on an authorized return on equity of 9.65%, authorized rate base of $1.8 billion, a common equity ratio of 56.15% and a debt ratio of 43.85%. For purposes of determining rates, the adjustment is based on an equity component of 48.19% due to the regulatory practice in Indiana of including certain zero-cost items or tax credit balances in the capital structure calculation. The annualized revenue increase will include three step increases, with $25 million of the increase to be included in rates in February 2024, $23 million in May 2024, and $18 million in May 2025. The increases are being driven primarily by (i) over $875 million of water and wastewater system capital investments since the completion of the Indiana subsidiary's last rate case and through April 30, 2025, (ii) higher pension and other postretirement benefit costs, and (iii) increases in production costs, including chemicals, fuel and power costs.

Pending General Rate Case Filings

On August 2, 2024, the Company's Hawaii subsidiary filed a general rate case requesting approximately $2 million in annualized incremental revenues, which is based on a proposed return on equity of 10.67% and a capital structure with an equity component of 52.11% and debt component of 47.89%. The requested annualized incremental revenue is driven primarily by approximately $41 million in capital investments made and to be made by the Hawaii subsidiary through 2025. The Hawaii subsidiary anticipates that the general rate case proceeding will be completed by mid-2025.

On July 1, 2024, the Company's Missouri subsidiary filed a general rate case requesting approximately $148 million in annualized incremental revenues. The request is based on a return on equity of 10.75% and a capital structure with an equity component of 50.54% and a long-term debt component of 49.46%. The requested annualized incremental revenue is driven primarily by $1.5 billion of incremental capital investments completed and planned by the Missouri subsidiary from January 2023 through May 2026. On July 31, 2024, the Missouri Public Service Commission issued an order establishing the test year in this case, which modified the Missouri subsidiary's original proposal for a future test year through May 2026, and instead reverted to a true-up period through December 31, 2024, with an allowance for proposed discrete adjustments subsequent to this date. On September 6, 2024, the Missouri subsidiary filed supplemental testimony to revise the request to approximately $123 million in annualized incremental revenues and define the specific discrete adjustments proposed through the rate effective period, which lowered the incremental capital investments completed and planned to $1.1 billion through May 2025. The Missouri subsidiary anticipates that the general rate case proceeding will be completed by mid-2025.

On May 1, 2024, the Company's Iowa subsidiary filed a general rate case requesting approximately $21 million in additional annualized revenues, which is based on a proposed return on equity of 10.75% and a capital structure with an equity component of 52.57% and debt component of 47.43%. The requested annualized revenue increase is driven primarily by approximately $157 million in capital investments made and to be made by the Iowa subsidiary through March 2026. Interim rates became effective May 11, 2024, with the difference between interim and final approved rates subject to refund. On August 29, 2024, the Iowa subsidiary submitted supplemental testimony consistent with the procedural schedule, which was subsequently challenged by the parties in the proceeding. On October 4, 2024, the Iowa Utilities Commission issued an order that granted the inclusion of the supplemental filing and extended the procedural schedule in the case beyond the statutory ten-month period. The Iowa subsidiary now expects resolution of this proceeding by May 2025.

On December 15, 2023, the Company's California subsidiary submitted a request to delay by one year its cost of capital filing and maintain its current authorized cost of capital through 2025. On February 2, 2024, the CPUC granted the request for a one-year extension of the cost of capital filing to May 1, 2025, to set its authorized cost of capital beginning January 1, 2026. On December 18, 2024, the California subsidiary submitted a request to further delay by one year its cost of capital filing and maintain the authorized cost of capital through 2026. On January 14, 2025, the CPUC granted the request for a one-year extension of the cost of capital filing to May 1, 2026, to set its authorized cost of capital beginning January 1, 2027.

On November 1, 2023, the Company's Virginia subsidiary filed a general rate case requesting $20 million in additional annualized revenues. The request is based on a proposed return on equity of 10.95% and a capital structure with an equity component of 45.67% and a debt and other component of 54.33%. The requested increase is driven by approximately $110 million in capital investments between May 2023 and April 2025. The request also proposed a revenue decoupling mechanism and seeks deferral of certain production cost adjustments. Interim rates became effective May 1, 2024, with the difference between interim and final approved rates subject to refund. On September 20, 2024, the Virginia subsidiary filed with the Virginia State Corporation Commission (the "SCC") a "black box" stipulation of settlement on key financial terms which agreed to a $15 million annualized increase in the Virginia subsidiary's revenues. The stipulation of settlement also agreed, solely for purposes of the Virginia subsidiary's future filings requiring a stated cost of capital and/or capital structure (including its annual information and water and wastewater infrastructure surcharge filings), that its return on equity will be 9.70% and its capital structure will consist of an equity component of 45.67% and a debt and other component of 54.33%. The stipulation of settlement remains subject to SCC review and approval.

Infrastructure Surcharges

A number of states have authorized the use of regulatory mechanisms that permit rates to be adjusted outside of a general rate case for certain costs and investments, such as infrastructure surcharge mechanisms that permit recovery of capital investments to replace aging infrastructure. Presented in the table below are annualized

incremental revenues, assuming a constant sales volume and customer count, resulting from infrastructure surcharge authorizations that became effective during 2024:

	Effective Date	Amount
Infrastructure surcharges by state:		
Missouri	(b)	$ 47
Pennsylvania	(c)	21
New Jersey	April 30, 2024	9
Iowa	March 1, 2024	1
West Virginia (a)	March 1, 2024	7
Illinois	January 1, 2024	5
Total infrastructure surcharge authorizations		$ 90

(a) On March 5, 2024, the WVPSC directed the Company's West Virginia subsidiary to interpret the distribution system improvement charge ("DSIC") Order as having included within the DSIC the three-year amortization of a prior authorized deferral associated with a large treatment plant project. The inclusion of this deferral increased the net incremental revenue by $0.7 million to a total of $6.6 million effective March 1, 2024.
(b) In 2024, $21 million was effective July 11 and $26 million was effective January 20.
(c) In 2024, $14 million was effective July 1 and $7 million was effective April 1.

Presented in the table below are annualized incremental revenues, assuming a constant sales volume and customer count, resulting from infrastructure surcharge authorizations that became effective on or after January 1, 2025:

	Effective Date	Amount
Infrastructure surcharge filings by state:		
Missouri	February 7, 2025	$ 17
Kentucky	January 1, 2025	2
West Virginia	January 1, 2025	4
Total infrastructure surcharge filings		$ 23

Other Regulatory Matters

In September 2020, the CPUC released a decision under its Low-Income Rate Payer Assistance program rulemaking that required the Company's California subsidiary to file a proposal to alter its water revenue adjustment mechanism in its next general rate case filing in 2022, which would have become effective upon receiving an order in the rate case. On October 5, 2020, the Company's California subsidiary filed an application for rehearing of the decision and following the CPUC's denial of its rehearing application in September 2021, the Company's California subsidiary filed a petition for writ of review with the California Supreme Court on October 27, 2021. On May 18, 2022, the California Supreme Court issued a writ of review for the California subsidiary's petition and the petitions filed by other entities challenging the decision. On July 8, 2024, the California Supreme Court issued a unanimous opinion concluding that the CPUC did not regularly seek to exercise its authority when it prohibited water utilities from proposing to continue their water revenue adjustment mechanisms. Accordingly, the California Supreme Court vacated the portion of the CPUC's 2020 decision relating to this prohibition against continuation of such water revenue adjustment mechanisms.

Independent of the judicial challenge, California passed Senate Bill 1469, which allows the CPUC to consider and authorize the implementation of a mechanism that separates the water corporation's revenue and its water sales. Legislation was signed by the Governor on September 30, 2022, and became effective on January 1, 2023. In response to the legislation, on January 27, 2023, the Company's California subsidiary filed an updated application requesting the CPUC to consider a Water Resources Sustainability Plan decoupling mechanism in its 2022 general rate case. On December 5, 2024, the CPUC denied the California subsidiary's proposed Water

Resources Sustainability Plan decoupling mechanism but approved continuation of its currently effective Annual Consumption Adjustment Mechanism. On December 12, 2024, the California subsidiary filed an application for rehearing of the CPUC's denial of the proposed Water Resources Sustainability Plan decoupling mechanism.

On March 2, 2021, an administrative law judge ("ALJ") in the Office of Administrative Law of New Jersey filed an initial decision with the NJBPU that recommended denial of a petition filed by the Company's New Jersey subsidiary, which sought approval of acquisition adjustments in rate base of $29 million associated with the acquisitions of Shorelands Water Company, Inc. in 2017 and the Borough of Haddonfield's water and wastewater systems in 2015. On July 29, 2021, the NJBPU issued an order adopting the ALJ's initial decision without modification. The Company's New Jersey subsidiary filed a Notice of Appeal with the New Jersey Appellate Division on September 10, 2021. On December 30, 2024, the New Jersey Appellate Division of the New Jersey Superior Court affirmed the NJBPU decision rejecting the acquisition adjustments. There is no financial impact to the Company as a result of the NJBPU's order and resulting appeal decision, since the acquisition adjustments are currently recorded as goodwill on the Consolidated Balance Sheets.

Regulatory Assets

Regulatory assets represent costs that are probable of recovery from customers in future rates. Approximately 50% of the Company's total regulatory asset balance at December 31, 2024, earns a return. Presented in the table below is the composition of regulatory assets as of December 31:

	2024	2023
Removal costs recoverable through rates	$ 356	$ 322
Deferred pension expense	318	308
Customer lead line replacements	86	66
Unamortized debt expense	84	82
Regulatory balancing accounts	71	81
Programmed maintenance expense	57	58
Purchase premium recoverable through rates	50	52
Other	128	137
Total regulatory assets	$ 1,150	$ 1,106

Removal costs recoverable through rates represent costs incurred for removal of property, plant and equipment or other retirement costs.

The Company's deferred pension expense includes a portion of the underfunded status that is probable of recovery through rates in future periods of $304 million and $300 million as of December 31, 2024 and 2023, respectively. The remaining portion is the pension expense in excess of authorized amounts which is deferred by certain subsidiaries and probable of recovery in future service rates.

Customer lead line replacements are the costs incurred to replace customer owned lead service lines. Costs are recovered through a customer's surcharge or through base rates, depending on the jurisdiction.

Unamortized debt expense is amortized over the lives of the respective issues. Call premiums on the redemption of long-term debt, as well as unamortized debt issuance costs, are deferred and amortized to the extent they will be recovered through future service rates.

Programmed maintenance expense are costs incurred to inspect or paint water tanks and are amortized on a straight line basis over a period determined by each state regulator.

Purchase premiums recoverable through rates are being recovered over periods up to 40 years.

Regulatory balancing accounts accumulate differences between revenues recognized and authorized revenue requirements until they are collected from customers or are refunded. Regulatory balancing accounts include low income programs, purchased power and water accounts, dam removal costs and other cost balancing mechanisms.

Other regulatory assets include the financial impacts relating to the COVID-19 pandemic, certain construction costs for treatment facilities, property tax stabilization, employee-related costs, business services project expenses, coastal water project costs, rate case expenditures and environmental remediation costs among others. These costs are deferred because the amounts are being recovered in rates or are probable of recovery through rates in future periods.

The Company has current regulatory assets of $19 million and $13 million included in other current assets on the Consolidated Balance Sheets as of December 31, 2024 and 2023, respectively.

Regulatory Liabilities

Regulatory liabilities generally represent amounts that are probable of being credited or refunded to customers through the rate making process. Also, if costs expected to be incurred in the future are currently being recovered through rates, the Company records those expected future costs as regulatory liabilities. Presented in the table below is the composition of regulatory liabilities as of December 31:

	2024	2023
Income taxes recovered through rates	$ 1,016	$ 1,064
Removal costs recovered through rates	245	254
Postretirement benefit liability	71	85
Other	84	78
Total regulatory liabilities	$ 1,416	$ 1,481

Income taxes recovered through rates relate to deferred taxes that will be refunded to the Company's customers. The enactment of the Tax Cuts and Jobs Act of 2017 (the "TCJA") required a re-measurement of the Company's deferred income taxes. The portion of this re-measurement related to the Regulated Businesses was substantially offset by a regulatory liability as EADIT which will be used to benefit its regulated customers in future rates. All of the Company's regulated subsidiaries are amortizing EADIT and crediting customers.

Removal costs recovered through rates are estimated costs to retire assets at the end of their expected useful lives that are recovered through customer rates over the lives of the associated assets.

Postretirement benefit liability includes a portion of the over-funded status that is probable of refund through rates in future periods. The remaining portion represents prior service credits resulting from announced plan amendments which changed benefits for certain union and non-union plan participants.

Other regulatory liabilities include the financial impacts relating to the COVID-19 pandemic, TCJA reserves on revenue, pension and other postretirement benefit balancing accounts, legal settlement proceeds, deferred gains, refunds to customers related to tax overpayments, and various regulatory balancing accounts.

The Company has no current regulatory liabilities and had $1 million of current regulatory liabilities included in other current liabilities on the Consolidated Balance Sheets as of December 31, 2024 and 2023, respectively.

Note 4: Revenue Recognition

Disaggregated Revenues

Presented in the table below are operating revenues disaggregated for the year ended December 31, 2024:

	Revenues from Contracts with Customers	Other Revenues Not from Contracts with Customers (a)	Total Operating Revenues
Regulated Businesses:			
Water services:			
Residential	$ 2,344	$ 5	$ 2,349
Commercial	881	4	885
Fire service	164	—	164
Industrial	182	2	184
Public and other	291	—	291
Total water services	3,862	11	3,873
Wastewater services:			
Residential	243	2	245
Commercial	70	—	70
Industrial	12	—	12
Public and other	36	—	36
Total wastewater services	361	2	363

Alternative revenue programs	—	15	15
Lease contract revenue	—	9	9
Total Regulated Businesses	3,475	30	3,505
Other	288	(1)	287
Total operating revenues	$ 3,763	$ 29	$ 3,792

(a) Includes revenues associated with alternative provisional rates, revenue programs, lease contracts and intercompany rent, which are outside the scope of ASC 606, and accounted for under other existing GAAP.

Contract Balances

Contract assets and contract liabilities are the result of timing differences between revenue recognition, billings and cash collections. In MSG, certain contracts are billed as work progresses in accordance with agreed-upon contractual terms, either at periodic intervals or upon achievement of contractual milestones. Contract assets are recorded when billing occurs subsequent to revenue recognition and are reclassified to accounts receivable when billed and the right to consideration becomes unconditional. Contract liabilities are recorded when the Company receives advances from customers prior to satisfying contractual performance obligations, particularly for construction contracts, and are recognized as revenue when the associated performance obligations are satisfied.

Contract assets of $84 million, $95 million and $86 million are included in unbilled revenues on the Consolidated Balance Sheets as of December 31, 2024, 2023 and 2022, respectively. Also, contract assets of $39 million are included in other long-term assets on the Consolidated Balance Sheets as of December 31, 2024, and there were no contract assets in other long-term assets on the Consolidated Balance Sheets as of December 31, 2023 and 2022. There were $114 million of contract assets added during 2024, and $86 million of contract assets were transferred to accounts receivable during 2024. There were $87 million of contract assets added during 2023, and $78 million of contract assets were transferred to accounts receivable during 2023.

Contract liabilities of $40 million, $63 million and $91 million are included in other current liabilities on the Consolidated Balance Sheets as of December 31, 2024, 2023 and 2022, respectively. Also, contract liabilities of

$14 million are included in other long-term liabilities on the Consolidated Balance Sheets as of December 31, 2024, and there were no contract liabilities in other long-term liabilities on the Consolidated Balance Sheets as of December 31, 2023 and 2022. There were $83 million of contract liabilities added during 2024, and $92 million of contract liabilities were recognized as revenue during 2024. There were $103 million of contract liabilities added during 2023, and $131 million of contract liabilities were recognized as revenue during 2023.

Remaining Performance Obligations

Remaining performance obligations ("RPOs") represent revenues the Company expects to recognize in the future from contracts that are in progress. The Company enters into agreements for the provision of services to water and wastewater facilities for the U.S. military, municipalities and other customers. As of December 31, 2024, the Company's O&M and capital improvement contracts have RPOs. Contracts with the U.S. government for work on military installations expire between 2051 and 2073 and have RPOs of $7.4 billion as of December 31, 2024, as measured by estimated remaining contract revenue. Such contracts are subject to customary termination provisions held by the U.S. government, prior to the agreed-upon contract expiration. Contracts with municipalities and commercial customers expire between 2026 and 2038 and have RPOs of $612 million as of December 31, 2024, as measured by estimated remaining contract revenue.

Note 5: Acquisitions and Divestitures

Regulated Businesses

During 2024, the Company closed on 13 acquisitions of various regulated water and wastewater systems for a total aggregate purchase price of $417 million, of which $415 million was funded in 2024, and which acquisitions added approximately 69,500 water and wastewater customers. These totals include the acquisitions from the Butler Area Sewer Authority and Granite City noted below. Assets acquired from all 2024 acquisitions, principally utility plant, totaled $426 million and liabilities assumed totaled $10 million. Seven of these acquisitions were accounted for as business combinations. The preliminary purchase price allocations related to acquisitions accounted for as business combinations will be finalized once the valuation of assets acquired has been completed, no later than one year after their respective acquisition date.

On October 29, 2024, the Company's Pennsylvania subsidiary acquired the wastewater collection and treatment system assets from the Butler Area Sewer Authority for a purchase price of $230 million, in cash. This system provides wastewater service for approximately 15,000 customer connections. Assets acquired from this acquisition, principally utility plant, totaled $229 million and $1 million of goodwill. This acquisition was accounted for as a business combination.

On March 11, 2024, the Company's Illinois subsidiary completed the acquisition of a wastewater treatment plant and related assets from Granite City for a cash purchase price of $86 million, which added approximately 26,000 wastewater customers, including 15,500 customers indirectly in surrounding communities. Assets acquired from this acquisition, principally utility plant, totaled $91 million and liabilities assumed totaled $5 million. This acquisition was accounted for as a business combination.

During 2023, the Company closed on 23 acquisitions of various regulated water and wastewater systems for a total aggregate purchase price of $77 million, $2 million of which was funded as a deposit in 2021, and which acquisitions added approximately 18,100 water and wastewater customers. Assets acquired from these acquisitions, principally utility plant, totaled $81 million and liabilities assumed totaled $4 million. Five of these acquisitions were accounted for as business combinations.

The pro forma impact of the Company's acquisitions was not material to the Consolidated Statements of Operations for the years ended December 31, 2024, 2023 and 2022.

Sale of Homeowner Services Group

On December 9, 2021 (the "Closing Date"), the Company sold all of the equity interests in subsidiaries that comprised HOS to a wholly owned subsidiary (the "Buyer") of funds advised by Apax Partners LLP, a global private equity advisory firm, for total consideration of approximately $1.275 billion. The consideration at closing was comprised of $480 million in cash, a secured seller note payable in cash and issued by the Buyer in the principal amount of $720 million, with an interest rate of 7.00% per year, and a contingent cash payment of $75 million payable upon satisfaction of certain conditions on or before December 31, 2023.

On February 2, 2024, this note was amended to increase the principal amount from $720 million to $795 million, in full satisfaction of the $75 million contingent cash payment payable under the HOS sale agreement. In addition, the interest rate payable on the secured seller note has increased from 7.00% per year to 10.00% per year until maturity. The Company recognized $77 million, $50 million, and $50 million of interest income during the years ended December 31, 2024, 2023 and 2022, respectively, from this note. The secured seller note requires compliance with affirmative and negative covenants (subject to certain conditions, limitations and exceptions), including a covenant limiting the incurrence by the Buyer and certain affiliates of additional indebtedness in excess of certain thresholds, but does not include any financial maintenance covenants. Certain of these covenants were amended, including to provide for annual reductions of specified debt incurrence ratios. Furthermore, the amendment to the secured seller note eliminated the conditional right, beginning December 9, 2024, to require a repayment, without premium or penalty, of 100% of the outstanding principal amount in full in cash together with all accrued and unpaid interest and other obligations thereunder. The final maturity date of the secured seller note remains December 9, 2026. The repayment obligations of the Buyer under this note are secured by a first priority security interest in certain property of the Buyer and the former HOS subsidiaries, including their cash and securities accounts, as well as a pledge of the equity interests in each of those subsidiaries, subject to certain limitations and exceptions.

On December 3, 2024, a covenant in the secured seller note was amended to increase the maximum aggregate principal amount of revolving facility indebtedness (as defined and described thereunder) that could be incurred at any time by the Buyer and certain affiliates.

The secured seller note may not be prepaid at the Buyer's election (except in certain limited circumstances) before the fourth anniversary of the Closing Date. If the Buyer seeks to repay the secured seller note in breach of this non-call provision, an event of default will occur under the secured seller note and the Company may, among other actions, demand repayment in full together with a premium ranging from 105.5% to 107.5% of the outstanding principal amount of the loan and a customary "make-whole" payment.

Note 6: Property, Plant and Equipment

Presented in the table below are the major classes of property, plant and equipment by category as of December 31:

	2024	2023	Range of Remaining Useful Lives	Weighted Average Useful Life
Utility plant:				
Land and other non-depreciable assets	$ 302	$ 293		
Sources of supply	1,124	1,081	20 to 127 years	46 years
Treatment and pumping	4,786	4,594	3 to 101 years	39 years
Transmission and distribution	14,745	13,900	9 to 128 years	66 years
Services, meters and fire hydrants	6,356	5,696	2 to 109 years	29 years
General structures and equipment	2,813	2,512	3 to 109 years	17 years
Waste collection	1,986	1,719	5 to 113 years	53 years
Waste treatment, pumping and disposal	1,425	1,191	2 to 153 years	34 years
Construction work in progress	1,359	1,040		
Other plant	22	24		
Total utility plant	34,918	32,050		
Nonutility property	141	139	3 to 50 years	12 years
Total property, plant and equipment	$35,059	$32,189		

Property, plant and equipment depreciation expense amounted to $690 million, $617 million and $552 million for the years ended December 31, 2024, 2023 and 2022, respectively, and was included in depreciation and amortization expense on the Consolidated Statements of Operations. The provision for depreciation expressed as a percentage of the aggregate average depreciable asset balances was 2.73%, 2.68% and 2.60% for the years ended December 31, 2024, 2023 and 2022, respectively. Additionally, the Company had capital expenditures acquired on account but unpaid of $347 million and $399 million included in accrued liabilities on the Consolidated Balance Sheets as of December 31, 2024 and 2023, respectively.

In connection with the Company's capital investment in its corporate headquarters in Camden, New Jersey, the New Jersey Economic Development Authority ("NJEDA") determined that the Company was qualified to receive $161 million in tax credits over a 10-year period commencing in 2019.

The Company is required to meet various annual requirements, including the maintenance of qualified full-time positions at the qualified business facility, in order to monetize one-tenth of the tax credits annually and is subject to a claw-back period if the Company does not meet certain NJEDA requirements of the tax credit program in years 11 through 15.

In December and January of 2024, the NJEDA issued to the Company the utilization certificates for the 2022 and 2021 tax credits in the amount of $15 million and $16 million, respectively. In March of 2023, the NJEDA issued to the Company the utilization certificate for the 2020 tax credits in the amount of $16 million. The Company sold the 2022, 2021, and 2020 tax credits to an external party for $14 million, $15 million and $15 million, respectively. For the years ended December 31, 2024, 2023 and 2022, the Company recorded losses of $2 million, $1 million and $1 million, respectively, to Other income (expense) in the Consolidated Statements of Operations from the sale of tax credits. As of December 31, 2024, the Company had no current assets and $90 million of long-term assets included in Other on the Consolidated Balance Sheets for the 2023 through 2028 tax credits. As of December 31, 2023, the Company had current assets of $32 million included in Other and $90 million of long-term assets included in Other on the Consolidated Balance Sheets for the 2021 through 2028 tax credits. In 2023, the Company reduced net realizable value of the future tax credit receivable by approximately $7 million as the Company does not expect it will be eligible to recognize the full amount of the

tax credit as it expects to have lower than required eligible headcount in the future. The Company has made the necessary annual filing for the year ended December 31, 2023, and expects to make the 2024 filing in April 2025, prior to the required filing deadline. The submitted filings are under review by the NJEDA and it is expected that the Company will receive final NJEDA approval and monetize the 2023 tax credits in 2026.

Note 7: Allowance for Uncollectible Accounts

Presented in the table below are the changes in the allowances for uncollectible accounts for the years ended December 31:

	2024	2023	2022
Balance as of January 1	$ (51)	$ (60)	$ (75)
Amounts charged to expense	(31)	(24)	(24)
Amounts written off	31	28	27
Other, net (a)	(2)	5	12
Balance as of December 31	$ (53)	$ (51)	$ (60)

(a) This portion of the allowance for uncollectible accounts is primarily related to COVID-19 related regulatory asset activity.

Note 8: Goodwill

Goodwill

Presented in the table below are the changes in the carrying value of goodwill for the years ended December 31, 2024 and 2023:

	Regulated Businesses		Other		Consolidated		
	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Total Net
Balance as of January 1, 2023	$3,470	$ (2,332)	$113	$ (108)	$3,583	$ (2,440)	$ 1,143
Goodwill from acquisitions	—	—	—	—	—	—	—
Balance as of December 31, 2023	$3,470	$ (2,332)	$113	$ (108)	$3,583	$ (2,440)	$ 1,143
Goodwill from acquisitions	1	—	—	—	1	—	1
Balance as of December 31, 2024	$3,471	$ (2,332)	$113	$ (108)	$3,584	$ (2,440)	$ 1,144

The Company completed its annual impairment testing of goodwill as of November 30, 2024, which included qualitative assessments of its Regulated Businesses and MSG reporting units. Based on these assessments, the Company determined that there were no factors present that would indicate that the fair value of these reporting units was less than their respective carrying values as of November 30, 2024.

In 2024, the Company acquired goodwill of $1 million associated with one of its acquisitions in the Regulated Businesses segment. In 2023, there were no additions or impairments to the Company's goodwill.

Note 9: Shareholders' Equity

Common Stock Offering

On March 3, 2023, the Company completed an underwritten public offering of an aggregate of 12,650,000 shares of parent company common stock. Upon closing of this offering, the Company received, after deduction of the underwriting discount and before deduction of offering expenses, net proceeds of approximately $1,688 million. The Company used the net proceeds of the offering to repay short-term commercial paper obligations of American Water Capital Corp. ("AWCC"), the wholly owned finance subsidiary of parent company, and for general corporate purposes.

Dividend Reinvestment and Direct Stock Purchase Plan

Under the Company's dividend reinvestment and direct stock purchase plan (the "DRIP"), shareholders may reinvest cash common stock dividends and purchase additional shares of Company common stock, up to certain limits, through the plan administrator without paying brokerage commissions. Shares purchased by participants through the DRIP may be newly issued shares, treasury shares, or at the Company's election, shares purchased by the plan administrator in the open market or in privately negotiated transactions. Purchases generally will be made and credited to DRIP accounts once each week. As of December 31, 2024, there were approximately 4.1 million shares available for future issuance under the DRIP.

Anti-dilutive Stock Repurchase Program

In February 2015, the Company's Board of Directors authorized an anti-dilutive stock repurchase program, which allows the Company to purchase up to 10 million shares of its outstanding common stock from time to time over an unrestricted period of time. The Company did not repurchase shares of common stock during the years ended December 31, 2024 and 2023. As of December 31, 2024, there were 5.1 million shares of common stock available for purchase under the program.

Accumulated Other Comprehensive Loss

Presented in the table below are the changes in accumulated other comprehensive loss by component, net of tax, for the years ended December 31, 2024, 2023 and 2022:

	Defined Benefit Plans					
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial Loss	Gain (Loss) on Cash Flow Hedge	Gain (Loss) on Fixed-Income Securities	Accumulated Other Comprehensive Income (Loss)
Beginning balance as of January 1, 2022	$ (107)	$ 1	$ 67	$ (6)	$ —	$ (45)
Other comprehensive income before reclassification	14	—	—	5	—	19
Amounts reclassified from accumulated other comprehensive income	—	—	3	—	—	3
Net other comprehensive income	14	—	3	5	—	22
Ending balance as of December 31, 2022	$ (93)	$ 1	$ 70	$ (1)	$ —	$ (23)
Other comprehensive (loss) income before reclassification	(3)	—	—	(8)	4	(7)
Amounts reclassified from accumulated other comprehensive income	—	—	4	—	—	4
Net other comprehensive (loss) income	(3)	—	4	(8)	4	(3)
Ending balance as of December 31, 2023	$ (96)	$ 1	$ 74	$ (9)	$ 4	$ (26)
Other comprehensive income (loss) before reclassification	1	—	—	39	(2)	38
Net other comprehensive income (loss)	1	—	—	39	(2)	38
Ending balance as of December 31, 2024	$ (95)	$ 1	$ 74	$ 30	$ 2	$ 12

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive loss directly to net income in its entirety, as a portion of these costs have been deferred as a regulatory asset. These accumulated other comprehensive loss components are included in the computation of net periodic pension cost. See Note 15—Employee Benefits for additional information.

The amortization of the gain (loss) on cash flow hedges is reclassified to net income during the period incurred and is included in Interest expense in the accompanying Consolidated Statements of Operations.

An unrealized gain (loss) on available-for-sale fixed-income securities is reclassified to net income upon sale of the securities as a realized gain or loss and is included in Other, net in the accompanying Consolidated Statements of Operations.

Dividends and Distributions

The Company's Board of Directors authorizes the payment of dividends. The Company's ability to pay dividends on its common stock is subject to having access to sufficient sources of liquidity, net income and cash flows of the Company's subsidiaries, the receipt of dividends and direct and indirect distributions from, and repayments of indebtedness of, the Company's subsidiaries, compliance with Delaware corporate and other laws, compliance with the contractual provisions of debt and other agreements and other factors.

The Company's dividend rate on its common stock is determined by the Board of Directors on a quarterly basis and takes into consideration, among other factors, current and possible future developments that may affect the Company's income and cash flows. When dividends on common stock are declared, they are typically paid in March, June, September and December. Historically, dividends have been paid quarterly to holders of record as of a date less than 30 days prior to the distribution date. Since the dividends on the Company's common stock are not cumulative, only declared dividends are paid.

During 2024, 2023 and 2022, the Company paid $585 million, $532 million and $467 million in cash dividends, respectively. Presented in the table below is the per share cash dividends paid for the years ended December 31:

	2024	2023	2022
December	$0.7650	$0.7075	$0.6550
September	$0.7650	$0.7075	$0.6550
June	$0.7650	$0.7075	$0.6550
March	$0.7075	$0.6550	$0.6025

On December 6, 2024, the Company's Board of Directors declared a quarterly cash dividend payment of $0.7650 per share payable on March 4, 2025, to shareholders of record as of February 7, 2025.

Under applicable law, the Company's subsidiaries may pay dividends on their capital stock or other equity only from retained, undistributed or current earnings. A significant loss recorded at a subsidiary may limit the amount of the dividend that the subsidiary can pay. The ability of the Company's subsidiaries to pay upstream dividends, make other upstream distributions or repay indebtedness to parent company or AWCC, as applicable, is subject to compliance with applicable corporate, tax and other laws, regulatory restrictions and financial and other contractual obligations, including, for example, (i) regulatory capital, surplus or net worth requirements, (ii) outstanding debt service obligations, (iii) requirements to make preferred and preference stock dividend payments, and (iv) other contractual agreements, covenants or obligations made or entered into by the Company and its subsidiaries.

Regulatory Restrictions on Indebtedness

The issuance of long-term debt or equity securities by the Company or long-term debt by AWCC does not require authorization of any state PUC if no guarantee or pledge of the regulated subsidiaries is utilized. Based on the needs of the Regulated Businesses and parent company, AWCC may borrow funds or issue its debt in the capital markets and then, through intercompany loans, provide these borrowings to the Regulated Businesses or parent company. PUC authorization is generally required for the regulated subsidiaries to incur long-term debt. The Company's regulated subsidiaries normally obtain these required PUC authorizations on a periodic basis to cover their anticipated financing needs for a period of time, or, as necessary, in connection with a specific financing or refinancing of debt.

Note 10: Stock Based Compensation

The Company has granted stock units, stock awards and dividend equivalents to non-employee directors, officers and employees pursuant to the terms of the 2017 Omnibus Equity Compensation Plan (the "2017

Omnibus Plan"), approved by the Company's shareholders in May 2017. Stock units under the 2017 Omnibus Plan generally vest based on (i) continued employment with the Company ("RSUs"), or (ii) continued employment with the Company where distribution of the shares is subject to the satisfaction in whole or in part of stated performance-based goals ("PSUs"). A total of 7.2 million shares of common stock may be issued under the 2017 Omnibus Plan. As of December 31, 2024, 5.8 million shares were available for grant under the 2017 Omnibus Plan. The 2017 Omnibus Plan provides that grants of awards may be in any of the following forms: incentive stock options, nonqualified stock options, stock appreciation rights, stock units, stock awards, other stock-based awards and dividend equivalents. Dividend equivalents may be granted only on stock units or other stock-based awards. The 2017 Omnibus Plan expires in 2027.

The Company had granted stock options, stock units, including RSUs and PSUs, and dividend equivalents to non-employee directors, officers and other key employees of the Company under its 2007 Omnibus Equity Compensation Plan (the "2007 Plan"). The 2007 Plan has been replaced by the 2017 Omnibus Plan, as defined above, and no additional awards may be granted under the 2007 Plan. However, shares may still be issued under the 2007 Plan pursuant to the terms of awards previously issued under that plan prior to May 12, 2017.

The cost of services received from employees in exchange for the issuance of restricted stock awards is measured based on the grant date fair value of the awards issued. The value of stock unit awards at the date of the grant is amortized through expense over the requisite service period. All awards granted in 2024, 2023 and 2022 are classified as equity. The Company recognizes compensation expense for stock awards over the vesting period of the award. The Company stratified its grant populations and used historic employee turnover rates to estimate employee forfeitures. The estimated rate is compared to the actual forfeitures at the end of the reporting period and adjusted as necessary. There have been no significant adjustments to the forfeiture rates during 2024, 2023 and 2022. There were no grants of stock options to employees after 2016, and there were no stock options outstanding as of December 31, 2022. Presented in the table below is the stock-based compensation expense recorded in O&M expense in the accompanying Consolidated Statements of Operations for the years ended December 31:

	2024	2023	2022
RSUs and PSUs	$ 34	$ 23	$ 26
Nonqualified employee stock purchase plan	2	2	2
Stock-based compensation	36	25	28
Income tax benefit	(8)	(6)	(6)
Stock-based compensation expense, net of tax	$ 28	$ 19	$ 22

There were no significant stock-based compensation costs capitalized during the years ended December 31, 2024, 2023 and 2022.

Subject to limitations on deductibility imposed by the Internal Revenue Code of 1986, as amended, the Company receives a tax deduction based on the intrinsic value of the award at the exercise date for stock options and the distribution date for stock units. For each award, throughout the requisite service period, the Company records the tax impacts related to compensation costs as deferred income tax assets. The tax deductions in excess of the deferred benefits recorded throughout the requisite service period are recorded to the Consolidated Statements of Operations and are presented in the financing section of the Consolidated Statements of Cash Flows.

Stock Units

During 2024, 2023 and 2022, the Company granted RSUs to certain employees under the 2017 Omnibus Plan. RSUs generally vest based on continued employment with the Company over periods ranging from one to three years. The RSUs are valued at the closing price of the Company's common stock on the date of the grant and the majority vest ratably over a three-year service period. These RSUs are amortized through expense over the requisite service period using the straight-line method.

During 2024, 2023 and 2022, the Company granted stock units to non-employee directors under the 2017 Omnibus Plan. The stock units were vested in full on the date of grant. Prior to 2024, distribution of the shares was made within 30 days of the earlier of (i) 15 months after the date of the last annual meeting of shareholders, subject to any deferral election by the director, or (ii) the participant's separation from service. Beginning in 2024, the shares are distributed within 30 days after the date of grant. Because these stock units vested on the grant date, the total grant date fair value was recorded in operation and maintenance expense on the grant date.

The grant date fair value of RSUs granted to certain employees and stock units granted to non-employee directors totaled $10 million, $9 million and $9 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Presented in the table below is RSU and director stock unit activity for the year ended December 31, 2024:

	Shares (in thousands)	Weighted Average Grant Date Fair Value (per share)
Non-vested total as of December 31, 2023	64	$ 134.61
Granted	81	123.07
Vested	(59)	148.13
Forfeited	(11)	140.79
Non-vested total as of December 31, 2024	75	$ 131.20

As of December 31, 2024, $5 million of total unrecognized compensation cost related to the non-vested RSUs is expected to be recognized over the weighted average remaining life of 1.67 years. The total fair value of stock units and RSUs vested was $9 million, $6 million and $6 million for the years ended December 31, 2024, 2023 and 2022, respectively.

During 2024, 2023 and 2022, the Company granted PSUs to certain employees under the 2017 Omnibus Plan with grant date fair values totaling $23 million, $28 million and $20 million, respectively. The majority of PSUs vest ratably based on continued employment with the Company over the three-year performance period (the "Performance Period"). Distribution of the performance shares is contingent upon the achievement of one or more internal performance measures and, separately, a relative total shareholder return performance measure, over the Performance Period.

Presented in the table below is PSU activity for the year ended December 31, 2024:

	Shares (in thousands)	Weighted Average Grant Date Fair Value (per share)
Non-vested total as of December 31, 2023	245	$ 143.26
Granted	177	127.18
Vested	(60)	157.83
Forfeited	(40)	181.71
Non-vested total as of December 31, 2024	322	$ 130.04

As of December 31, 2024, $7 million of total unrecognized compensation cost related to the non-vested PSUs is expected to be recognized over the weighted average remaining life of 0.83 years. The total fair value of PSUs vested was $23 million, $31 million and $24 million for the years ended December 31, 2024, 2023 and 2022, respectively.

PSUs granted with one or more internal performance measures are valued at the market value of the closing price of the Company's common stock on the date of grant. PSUs granted with a relative total shareholder return condition are valued, for accounting purposes, using a Monte Carlo simulation model. Expected volatility is based on historical volatilities of traded common stock of the Company and comparative companies using daily

stock prices over the past three years. The expected term is three years and the risk-free interest rate is based on the three-year U.S. Treasury rate in effect as of the measurement date. Presented in the table below are the weighted average assumptions used in the Monte Carlo simulation and the weighted average grant date fair values of PSUs granted for the years ended December 31:

	2024	2023	2022
Expected volatility	22.98%	25.45%	29.69%
Risk-free interest rate	4.39%	4.31%	1.90%
Expected life (years)	3.0	3.0	3.0
Grant date fair value per share	$118.95	$168.00	$99.23

The grant date fair value of PSUs that vest ratably and have market and/or performance conditions are amortized through expense over the requisite service period using the graded-vesting method.

Employee Stock Purchase Plan

The Company maintains a nonqualified employee stock purchase plan (the "ESPP") that expires in 2027 through which employee participants (which excludes certain of the Company's executives) may use payroll deductions to acquire Company common stock at a purchase price of 85% of the fair market value of the common stock at the end of a three-month purchase period. A total of 2.0 million shares may be issued under the ESPP, and as of December 31, 2024, there were 1.4 million shares of common stock reserved for issuance under the ESPP. The ESPP is considered compensatory. During the years ended December 31, 2024, 2023 and 2022, the Company issued approximately 90,000, 87,000 and 82,000 shares, respectively, under the ESPP.

Note 11: Long-Term Debt

The Company obtains long-term debt through AWCC primarily to fund capital expenditures of the Regulated Businesses, to repay or refinance existing long-term and short-term debt, and to lend funds to parent company to refinance debt and for other purposes. Presented in the table below are the components of long-term debt as of December 31:

	Rate	Weighted Average Rate	Maturity	2024	2023
Long-term debt of AWCC: (a)					
Senior notes—fixed rate	2.30%-8.27%	4.02%	2025-2054	$ 11,786	$ 10,786
Private activity bonds and government funded debt—fixed rate	0.00%-3.88%	3.07%	2028-2045	187	188
Long-term debt of other American Water subsidiaries:					
Private activity bonds and government funded debt—fixed rate	0.00%-5.00%	2.04%	2025-2061	761	729
Mortgage bonds—fixed rate	6.35%-9.19%	7.41%	2025-2039	456	516
Mandatorily redeemable preferred stock	8.47%-9.75%	8.64%	2036	3	3
Long-term debt		4.01%		13,193	12,222
Unamortized debt discount, net (b)				(20)	(11)
Unamortized debt issuance costs				(15)	(18)
Less current portion of long-term debt				(637)	(475)
Total long-term debt				$ 12,521	$ 11,718

(a) This indebtedness is considered "debt" for purposes of a support agreement between parent company and AWCC, which serves as a functional equivalent of a full and unconditional guarantee by parent company of AWCC's payment obligations under such indebtedness.

(b) Includes debt discount, net of fair value adjustments previously recognized in acquisition purchase accounting.

All mortgage bonds and $752 million of the private activity bonds and government funded debt held by the Company's subsidiaries were collateralized as of December 31, 2024.

Long-term debt agreements contain a number of covenants that, among other things, limit, subject to certain exceptions, AWCC from issuing debt secured by the Company's consolidated assets. Certain long-term note covenants require the Company to maintain a ratio of consolidated total indebtedness to consolidated total capitalization (each as defined in the relevant documents) of not more than 0.70 to 1.00. The ratio as of December 31, 2024, was 0.58 to 1.00. In addition, the Company has $824 million of notes which include the right to redeem the notes at par value, in whole or in part, from time to time, subject to certain restrictions, with a weighted average interest rate of 2.51%.

Presented in the table below are future sinking fund payments and debt maturities:

	Amount
2025	$ 637
2026	1,478
2027	686
2028	868
2029	936
Thereafter	8,588

Presented in the table below are the issuances of long-term debt in 2024:

Company	Type	Rate	Weighted Average Rate	Maturity	Amount
AWCC	Senior notes—fixed rate	5.15%-5.45%	5.30%	2034-2054	$ 1,400
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-1.75%	0.01%	2025-2061	46
Total issuances					$ 1,446

The Company incurred debt issuance costs of $14 million related to the above issuances.

Presented in the table below are the retirements and redemptions of long-term debt in 2024 through sinking fund provisions, optional redemption or payment at maturity:

Company	Type	Rate	Weighted Average Rate	Maturity	Amount
AWCC	Senior notes—fixed rate	3.85%	3.85%	2024	$ 400
AWCC	Private activity bonds and government funded debt—fixed rate	1.79%-2.31%	2.24%	2024-2031	1
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-5.50%	1.53%	2024-2061	14
Other American Water subsidiaries	Mortgage bonds—fixed rate	6.99%-7.17%	7.13%	2024	60
Total retirements and redemptions					$ 475

On February 23, 2024, AWCC completed a $1.4 billion debt offering, which included the sale of $700 million aggregate principal amount of its 5.150% Senior Notes due 2034 and $700 million aggregate principal amount of its 5.450% Senior Notes due 2054. At the closing of this offering, AWCC received, after deduction of underwriting discounts and before deduction of offering expenses, net proceeds of approximately $1,381 million. AWCC used the net proceeds of the offering (i) to lend funds to American Water and the Regulated Businesses; (ii) to repay at maturity AWCC's 3.850% Senior Notes due 2024; (iii) to repay AWCC's commercial paper obligations; and (iv) for general corporate purposes.

On June 29, 2023, AWCC issued $1,035 million aggregate principal amount of 3.625% Exchangeable Senior Notes due 2026 (the "Notes"). AWCC received net proceeds of approximately $1,022 million, after deduction of underwriting discounts and commissions but before deduction of offering expenses payable by AWCC. A portion of the net proceeds was used to repay AWCC's commercial paper obligations and the remainder was used for general corporate purposes. The Notes will mature on June 15, 2026 (the "Maturity Date"), unless earlier exchanged or repurchased.

The Notes are exchangeable at an initial exchange rate of 5.8213 shares of parent company's common stock per $1,000 principal amount of Notes (equivalent to an initial exchange price of approximately $171.78 per share of common stock). The initial exchange rate of the Notes is subject to adjustment as provided in the indenture pursuant to which the Notes were issued (the "Note Indenture"). Prior to the close of business on the business day immediately preceding March 15, 2026, the Notes are exchangeable at the option of the noteholders only upon the satisfaction of specified conditions and during certain periods described in the Note Indenture. On or after March 15, 2026, until the close of business on the business day immediately preceding the Maturity Date, the Notes will be exchangeable at the option of the noteholders at any time regardless of these conditions or periods. Upon any exchange of the Notes, AWCC will (i) pay cash up to the aggregate principal amount of the Notes and (ii) pay or deliver (or cause to be delivered), as the case may be, cash, shares of parent company's common stock, or a combination of cash and shares of such common stock, at AWCC's election, in respect of the remainder, if any, of AWCC's exchange obligation in excess of the aggregate principal amount of the Notes being exchanged.

AWCC may not redeem the Notes prior to the Maturity Date, and no sinking fund is provided for the Notes. Subject to certain conditions, holders of the Notes will have the right to require AWCC to repurchase all or a portion of their Notes upon the occurrence of a fundamental change, as defined in the Note Indenture, at a repurchase price of 100% of their principal amount plus any accrued and unpaid interest.

One of the principal market risks to which the Company is exposed is changes in interest rates. In order to manage the exposure, the Company follows risk management policies and procedures, including the use of derivative contracts such as treasury lock agreements. The Company also reduces exposure to interest rates by managing commercial paper and debt maturities. The Company does not enter into derivative contracts for speculative purposes and does not use leveraged instruments. The derivative contracts entered into are for periods consistent with the related underlying exposures. The Company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations and minimizes this risk by dealing only with leading, creditworthy financial institutions having long-term credit ratings of "A-" or better.

During the second half of 2024, the Company entered into eight treasury lock agreements, with a term of 10 years or 30 years, with notional amounts totaling $355 million, to reduce interest rate exposure on debt expected to be issued in 2025. These treasury lock agreements terminate in June 2025 and December 2025 and have an average fixed interest rate of 4.03%. In 2025, the Company entered into five additional treasury lock agreements, with a term of 10 years, with notional amounts totaling $275 million, to reduce interest rate exposure on debt expected to be issued in 2025. These treasury lock agreements terminate in March 2025 and have an average fixed interest rate of 4.60%. The Company designated these treasury lock agreements as cash flow hedges, with their fair value recorded in accumulated other comprehensive gain or loss.

The Company had entered into 15 treasury lock agreements through February 2024, with notional amounts totaling $825 million. The Company designated these treasury lock agreements as cash flow hedges, with their fair value recorded in accumulated other comprehensive gain or loss. In February 2024, the Company terminated the treasury lock agreements realizing a pre-tax net gain of $14 million, to be amortized through Interest expense over a 10-year period or 30-year period, in accordance with the tenor of the notes issued on February 23, 2024.

No ineffectiveness was recognized on hedging instruments for the years ended December 31, 2024, 2023 or 2022.

Note 12: Short-Term Debt

Liquidity needs for capital investment, working capital and other financial commitments are generally funded through cash flows from operations, public and private debt offerings, issuances of commercial paper and equity, and, if and to the extent necessary, borrowings under the AWCC revolving credit facility. AWCC maintains an unsecured revolving credit facility which provides $2.75 billion in aggregate total commitments from a diversified group of financial institutions. On October 28, 2024, the termination date of the credit agreement with respect to AWCC's revolving credit facility was extended, as permitted by the terms of the credit agreement, from October 2028 to October 2029. The revolving credit facility is used principally to support AWCC's commercial paper program, to provide additional liquidity support and to provide a sub-limit for the issuance of up to $150 million in letters of credit. Letters of credit are non-debt instruments maintained to provide credit support for certain transactions as requested by third parties. Subject to satisfying certain conditions, the credit agreement permits AWCC to increase the maximum commitment under the facility by up to an aggregate of $500 million. The Company regularly evaluates the capital markets and closely monitors the financial condition of the financial institutions with contractual commitments in its revolving credit facility. Interest rates on advances under the facility are based on a credit spread to the Secured Overnight Financing Rate (or applicable market replacement rate) or base rate, each determined in accordance with Moody's Ratings and S&P Global Ratings' then applicable credit rating on AWCC's senior unsecured, non-credit enhanced debt.

Short-term debt consists of commercial paper borrowings totaling $880 million and $180 million as of December 31, 2024 and 2023, respectively, or net of discount $879 million and $179 million as of December 31, 2024 and 2023, respectively. As of December 31, 2024 and 2023, AWCC had no outstanding borrowings under the revolving credit facility and there were no commercial paper borrowings outstanding with maturities greater than three months.

Presented in the tables below are the aggregate credit facility commitment, commercial paper limit and letter of credit availability under the revolving credit facility, as well as the available capacity for each, as of December 31:

	2024		
	Commercial Paper Limit	Letters of Credit	Total (a)
Total availability	$ 2,600	$ 150	$2,750
Outstanding debt	(880)	(82)	(962)
Remaining availability as of December 31, 2024	$ 1,720	$ 68	$1,788

(a) Total remaining availability of $1.8 billion as of December 31, 2024, was accessible through revolver draws.

	2023		
	Commercial Paper Limit	Letters of Credit	Total (a)
Total availability	$ 2,600	$ 150	$2,750
Outstanding debt	(180)	(75)	(255)
Remaining availability as of December 31, 2023	$ 2,420	$ 75	$2,495

(a) Total remaining availability of $2.5 billion as of December 31, 2023, was accessible through revolver draws.

Presented in the table below is the Company's total available liquidity as of December 31, 2024 and 2023, respectively:

	Cash and Cash Equivalents	Availability on Revolving Credit Facility	Total Available Liquidity
Available liquidity as of December 31, 2024	$ 96	$ 1,788	$ 1,884
Available liquidity as of December 31, 2023	$ 330	$ 2,495	$ 2,825

Presented in the table below is the short-term borrowing activity for AWCC for the years ended December 31:

	2024	2023
Average borrowings	$ 161	$ 288
Maximum borrowings outstanding	$ 880	$ 1,570
Weighted average interest rates, as of December 31	4.65%	5.51%

The credit facility requires the Company to maintain a ratio of consolidated debt to consolidated capitalization of not more than 0.70 to 1.00. The ratio as of December 31, 2024, was 0.58 to 1.00.

The Company does not have any material borrowings that are subject to default or prepayment as a result of a downgrading of securities, although such a downgrading could increase fees and interest charges under AWCC's revolving credit facility.

Note 13: General Taxes

Presented in the table below are the components of general tax expense for the years ended December 31:

	2024	2023	2022
Property and capital stock	$ 125	$ 119	$ 108
Gross receipts and franchise	140	134	124
Payroll	41	38	36
Other general	14	16	13
Total general taxes	$ 320	$ 307	$ 281

Note 14: Income Taxes

Presented in the table below are the components of income tax expense for the years ended December 31:

	2024	2023	2022
Current income taxes:			
State	$ 16	$ 16	$ 26
Federal	136	28	82
Total current income taxes	$ 152	$ 44	$ 108
Deferred income taxes:			
State	$ 53	$ 44	$ 24
Federal	104	165	57
Amortization of deferred investment tax credits	(1)	(1)	(1)
Total deferred income taxes	156	208	80
Provision for income taxes	$ 308	$ 252	$ 188

Presented in the table below is a reconciliation between the statutory federal income tax rate and the Company's effective tax rate for the years ended December 31:

	2024	2023	2022
Income tax at statutory rate	21.0%	21.0%	21.0%
Increases (decreases) resulting from:			
State taxes, net of federal taxes	4.0%	4.0%	4.1%
EADIT	(2.7)%	(4.2)%	(6.5)%
Other, net	0.4%	0.3%	0.1%
Effective tax rate	22.7%	21.1%	18.7%

Presented in the table below are the components of the net deferred tax liability as of December 31:

	2024	2023
Deferred tax assets:		
Advances and contributions	$ 493	$ 478
Tax losses and credits	128	17
Regulatory income tax assets	181	191
Pension and other postretirement benefits	64	75
Other	163	172
Total deferred tax assets	1,029	933
Valuation allowance	(8)	(11)
Total deferred tax assets, net of allowance	$ 1,021	$ 922
Deferred tax liabilities:		
Property, plant and equipment	$ 3,553	$ 3,269
Deferred pension and other postretirement benefits	86	84
Other	244	268
Total deferred tax liabilities	3,883	3,621
Total deferred tax liabilities, net of deferred tax assets	$ (2,862)	$ (2,699)

As of December 31, 2024 and 2023, the Company had state net operating loss ("NOL") carryforwards of $251 million and $238 million, respectively, a portion of which are offset by a valuation allowance as the Company does not believe these NOLs are more likely than not to be realized. The state NOL carryforwards expire in 2025 through 2044.

On August 16, 2022, the Inflation Reduction Act of 2022 (the "IRA") was signed into law. The IRA contains a 15% Corporate Alternative Minimum Tax ("CAMT") provision on applicable corporations effective January 1, 2023. To determine if a company is considered an applicable corporation subject to CAMT, the company's average adjusted financial statement income ("AFSI") for the three consecutive years preceding the tax year must exceed $1.0 billion. An applicable corporation must make several adjustments to net income when determining AFSI. A corporation paying CAMT is eligible for a future tax credit, which can be carried forward indefinitely and utilized when regular tax exceeds CAMT. Based on current guidance, the Company is an applicable corporation subject to CAMT beginning in 2024. As of December 31, 2024, the Company has a CAMT credit carryforward of $111 million.

On September 12, 2024, the Internal Revenue Service ("IRS") and the U.S. Treasury issued Notice 2024-66, allowing corporate taxpayers to exclude amounts attributable to the CAMT liability, without penalty, from estimated tax payments with respect to a taxable year that begins during 2024. The Company will include the

CAMT liability in its 2024 extension payment due April 15, 2025. The Company will continue to assess the impacts of the IRA as the U.S. Treasury and the IRS provide further guidance.

The Company files income tax returns in the United States federal jurisdiction and various state jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state or local or non-U.S. income tax examinations by tax authorities for taxable years ended December 31, 2019 and prior.

Presented in the table below are the changes in gross liability, excluding interest and penalties, for unrecognized tax benefits:

	Amount
Balance as of January 1, 2022	$ 140
Increases in current period tax positions	26
Decreases in prior period measurement of tax positions	(8)
Balance as of December 31, 2022	$ 158
Increases in current period tax positions	27
Decreases in prior period measurement of tax positions	(37)
Balance as of December 31, 2023	$ 148
Increases in current period tax positions	34
Increases in prior period measurement of tax positions	21
Balance as of December 31, 2024	$ 203

The Company's tax positions relate primarily to the deductions claimed for repair and maintenance costs on its utility plant. The Company expects a reduction of approximately $81 million in its unrecognized tax benefits within the next year due to the expiration of statutes of limitation, offset by current year activity.

If the Company sustains all of its positions as of December 31, 2024, an unrecognized tax benefit of $8 million, excluding interest and penalties, would impact the Company's effective tax rate. The Company had an immaterial amount of interest and penalties related to its tax positions as of December 31, 2024 and 2023.

Presented in the table below are the changes in the valuation allowance:

	Amount
Balance as of January 1, 2022	$ 10
Increases in current period tax positions	1
Balance as of December 31, 2022	$ 11
Increases in current period tax positions	—
Balance as of December 31, 2023	$ 11
Decreases in current period tax positions	(3)
Balance as of December 31, 2024	$ 8

Note 15: Employee Benefits

Overview of Pension and Other Postretirement Benefits Plans

The Company maintains noncontributory defined benefit pension plans covering eligible employees of its regulated utility and shared services operations. Benefits under the plans are based on the employee's years of service and compensation. The pension plans have been closed for all new employees. The pension plans were closed for most employees hired on or after January 1, 2006. Union employees hired on or after January 1, 2001,

except for specific eligible groups specified in the plan, had their accrued benefit frozen and will be able to receive this benefit as a lump sum upon termination or retirement. Union employees hired on or after January 1, 2001, and non-union employees hired on or after January 1, 2006, are provided with a defined contribution plan that includes a 5.25% of base pay Company-funded defined contribution account. The Company does not participate in a multi-employer plan. The Company also has unfunded noncontributory supplemental nonqualified pension plans that provide additional retirement benefits to certain employees.

The Company's pension funding practice is to contribute at least the greater of the minimum amount required by the Employee Retirement Income Security Act of 1974 or the normal cost. Further, the Company will consider additional cash contributions and/or available prefunding balances if needed to avoid "at risk" status and benefit restrictions under the Pension Protection Act of 2006 ("PPA"). The Company may also consider increased contributions, based on other financial requirements and the plans' funded position. Pension expense in excess of the amount contributed to the pension plans is deferred by certain regulated subsidiaries pending future recovery in rates charged for utility services as contributions are made to the plans. See Note 3—Regulatory Matters for additional information. Pension plan assets are invested in a number of actively managed, commingled funds, and limited partnerships including equities, fixed income securities, guaranteed annuity contracts with insurance companies, real estate funds and real estate investment trusts ("REITs").

The Company maintains other postretirement benefit plans providing varying levels of medical and life insurance to eligible retirees. The retiree welfare plans are closed for union employees hired on or after January 1, 2006. The plans had previously closed for non-union employees hired on or after January 1, 2002. The Company's policy is to fund other postretirement benefit costs up to the amount recoverable through rates. Assets of the plans are invested in a number of actively managed funds in the form of separate accounts, commingled funds and limited partnerships, including equities and fixed income securities.

The Company engages third-party investment managers for all invested assets. Managers are not permitted to invest outside of the asset class (e.g., fixed income, equity, alternatives) or strategy for which they have been appointed. Investment management agreements and recurring performance and attribution analysis are used as tools to ensure investment managers invest solely within the investment strategy they have been provided. Futures and options may be used to adjust portfolio duration to align with a plan's targeted investment policy.

In order to minimize asset volatility relative to the liabilities, a portion of plan assets is allocated to long duration fixed income investments that are exposed to interest rate risk. Increases in interest rates generally will result in a decline in the value of fixed income assets while reducing the present value of the liabilities. Conversely, rate decreases will increase fixed income assets, partially offsetting the related increase in the liabilities. Within equities, risk is mitigated by constructing a portfolio that is broadly diversified by geography, market capitalization, manager mandate size, investment style and process. For the Bargained Retiree Voluntary Employees' Beneficiary Association ("Bargained VEBA") trust, its asset structure is designed to meet the cash flows of the liabilities. This design reduces the plan's exposure to changes in interest rates.

Actual allocations to each asset class vary from target allocations due to periodic investment strategy updates, market value fluctuations, the length of time it takes to fully implement investment allocations, and the timing of benefit payments and contributions. The asset allocation is rebalanced on a quarterly basis, if necessary.

Pension Plan Assets

The investment policy guideline of the pension plan is focused on diversification, improving returns and reducing the volatility of the funded status over a long-term horizon. None of the Company's securities are included in pension plan assets.

The Company uses fair value for all classes of assets in the calculation of market-related value of plan assets. As of December 31, 2024, the fair values and asset allocations of the pension plan assets include the American Water Pension Plan and the American Water Pension Plan for Certain Inactive Participants.

Presented in the tables below are the fair values and asset allocations of the pension plan assets as of December 31, 2024 and 2023, respectively, by asset category:

Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3) (a)	Net Asset Value as a Practical Expedient	Percentage of Plan Assets as of December 31, 2024
Cash	$ 40	$ 40	$ —	$ —	$ —	3%
Equity securities:						
U.S. large cap	155	29	—	—	126	11%
U.S. small cap	34	34	—	—	—	2%
International	258	—	—	—	258	19%

Guarantee annuity contracts	32	—	—	32	—	2%
Total	$ 1,431	$ 287	$ 564	$ 32	$ 548	100%

(a) There were no material changes during the period for the fair value measurements using significant unobservable inputs (Level 3) for the years ended December 31, 2024 and 2023, respectively.

The Company's 2025 target pension plan asset allocation is 37% equity securities and 63% fixed income securities. The Company's 2024 target pension plan asset allocation was 37% equity securities and 63% fixed income securities.

Other Postretirement Benefit Plan Assets

The investment policy guidelines of the postretirement plans focus on the appropriate strategy given the funded status of the plans. None of the Company's securities are included in other postretirement benefit plan assets. The Company's postretirement benefit plans have different levels of funded status and the assets are held under various trusts. The investments and risk mitigation strategies for the plans are tailored specifically for each trust. In setting new strategic asset mixes, consideration is given to the likelihood that the selected asset allocation will effectively fund the projected plan liabilities and meet the risk tolerance criteria of the Company. The Company periodically updates the long-term, strategic asset allocations for these plans through asset liability studies and uses various analytics to determine the optimal asset allocation. Considerations include plan liability characteristics, liquidity needs, funding requirements, expected rates of return and the distribution of returns. The American Water Retiree Welfare Plan ("Retiree Welfare Plan") is funded by the Bargained VEBA trust, the Non-Bargained Retiree Voluntary Employees' Beneficiary Association ("Non-Bargained VEBA") trust, the Voluntary Employees' Beneficiary Association ("Active VEBA") trust, and the American Water Life Insurance Voluntary Employees' Beneficiary Association Trust.

Presented in the tables below are the fair values and asset allocations of the postretirement benefit plan assets as of December 31, 2024 and 2023, respectively, by asset category:

Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Net Asset Value as a Practical Expedient	Percentage of Plan Assets as of December 31, 2024
Bargained VEBA:						
Cash	$ 4	$ 4	$ —	$ —	$ —	4%

Total	$ 258	$ 91	$ 167	$ —	$ —	100%

The Company's 2025 target postretirement benefit plan asset allocation for the Bargained VEBA and Active VEBA is 100% fixed income securities and for the Non-bargained VEBA is 60% equity securities and 40% fixed income securities. The Company's 2024 target postretirement benefit plan asset allocation for the Bargained VEBA and Active VEBA was 100% fixed income securities and for the Non-bargained VEBA was 60% equity securities and 40% fixed income securities.

Valuation Techniques Used to Determine Fair Value

Cash—Cash and investments with maturities of three months or less when purchased, including certain short-term fixed-income securities, are considered cash and are included in the recurring fair value measurements hierarchy as Level 1.

Equity securities —For equity securities, the trustees obtain prices from pricing services, whose prices are obtained from direct feeds from market exchanges, that the Company is able to independently corroborate. Certain equity securities are valued based on quoted prices in active markets and categorized as Level 1. Other equities, such as certain U.S. large cap and international securities held in the pension plan, are invested in commingled funds and/or limited partnerships. These funds are valued to reflect the plan fund's interest in the fund based on the reported year-end NAV. Since NAV is not directly observable or not available on a nationally recognized securities exchange for the commingled funds and/or limited partnerships, they are not included in the

fair value hierarchy as they are measured at fair value using the NAV per share (or its equivalent) practical expedient. These investments can typically be redeemed monthly or more frequently, with 30 or less days of notice and without further restrictions.

Fixed-income securities—Certain U.S. Treasury securities and government bonds have been categorized as Level 1 because they trade in highly-liquid and transparent markets and their prices can be corroborated. The fair values of corporate bonds, mortgage backed securities, and certain government bonds are based on prices that reflect observable market information, such as actual trade information of similar securities. These securities are categorized as Level 2 because the valuations are calculated using models which utilize actively traded market data that the Company can corroborate. Exchange-traded future and option positions are reported in accordance with changes in variation margins that are settled daily. Exchange-traded futures and options, for which market quotations are readily available, are valued at the last reported sale price or official closing price on the primary market or exchange on which they are traded and are classified as Level 1. Other U.S. Treasury securities are invested in commingled funds that may implement their investment strategies in a variety of ways which may include direct and/or indirect investment in securities and other instruments or assets (e.g., futures and swaps) or investment in units of other commingled funds. These funds are valued to reflect the plan fund's interest in the fund based on the reported year-end NAV. Since NAV is not directly observable or not available on a nationally recognized securities exchange for the commingled funds, they are not included in the fair value hierarchy as they are measured at fair value using the NAV per share (or its equivalent) practical expedient. These investments can typically be redeemed daily, with no prior notice and without further restrictions.

Real estate fund—Real estate funds are an investment vehicle in the form of a limited partnership primarily focused in real estate investments and are not included in the fair value hierarchy as they are measured at fair value using the NAV per share (or its equivalent) practical expedient. These investments can typically be redeemed quarterly, with 90 or less days of notice, subject to available cash.

REITs—REITs are invested in commingled funds primarily focused in publicly traded shares of real estate investment trusts. Commingled funds are valued to reflect the plan fund's interest in the fund based on the reported year-end NAV. REITs are not included in the fair value hierarchy as they are measured at fair value using the NAV per share (or its equivalent) practical expedient. These investments can typically be redeemed daily, with no prior notice and without further restrictions.

Guaranteed annuity contracts—Guaranteed annuity contracts are categorized as Level 3 because the investments are not publicly quoted. Since these market values are determined by the provider, they are not highly observable and have been categorized as Level 3.

Benefit Obligations, Plan Assets and Funded Status

Presented in the table below is a rollforward of the changes in the benefit obligation and plan assets for the two most recent years, for all plans combined:

	Pension Benefits		Other Benefits	
	2024	2023	2024	2023
Change in benefit obligation:				
Benefit obligation as of January 1,	$ 1,622	$ 1,578	$ 247	$ 255
Service cost	17	17	2	2
Interest cost	83	85	12	14
Plan participants' contributions	—	—	3	3
Actuarial loss (gain)	(55)	67	(18)	(4)
Settlements	(2)	(3)	—	—
Gross benefits paid	(105)	(118)	(22)	(24)
Federal subsidy	—	—	1	1
Other adjustments	—	(4)	—	—
Benefit obligation as of December 31,	$ 1,560	$ 1,622	$ 225	$ 247
Change in plan assets:				
Fair value of plan assets as of January 1,	$ 1,431	$ 1,413	$ 258	$ 254
Actual return on plan assets	19	93	11	22
Employer contributions	49	46	3	3
Plan participants' contributions	—	—	3	3
Settlements	(2)	(3)	—	—
Benefits paid	(105)	(118)	(22)	(24)
Fair value of plan assets as of December 31,	$ 1,392	$ 1,431	$ 253	$ 258
Funded value as of December 31,	$ (168)	$ (191)	$ 28	$ 11
Amounts recognized on the balance sheet:				
Noncurrent asset	$ 51	$ 73	$ 29	$ 12
Current liability	(2)	(2)	—	—
Noncurrent liability	(217)	(262)	(1)	(1)
Net amount recognized	$ (168)	$ (191)	$ 28	$ 11

Presented in the table below are the components of accumulated other comprehensive income and regulatory assets that have not been recognized as components of periodic benefit costs as of December 31:

	Pension Benefits		Other Benefits	
	2024	2023	2024	2023
Net actuarial loss	$ 337	$ 340	$ 13	$ 30
Prior service credit	(5)	(8)	(84)	(115)
Net amount recognized	$ 332	$ 332	$ (71)	$ (85)
Regulatory assets (liabilities)	$ 304	$ 300	$ (71)	$ (85)
Accumulated other comprehensive income	28	32	—	—
Total	$ 332	$ 332	$ (71)	$ (85)

Presented in the tables below are the aggregate projected benefit obligation, accumulated benefit obligation and aggregate fair value of plan assets for pension plans with a projected obligation in excess of plan assets as of December 31:

	Projected Benefit Obligation Exceeds the Fair Value of Plans' Assets	
	2024	2023
Projected benefit obligation	$ 916	$ 952
Fair value of plan assets	697	688

	Accumulated Benefit Obligation Exceeds the Fair Value of Plans' Assets	
	2024	2023
Accumulated benefit obligation	$ 852	$ 875
Fair value of plan assets	697	688

The accumulated postretirement plan assets exceed benefit obligations for the Company's other postretirement benefit plans, except for the Northern Illinois Retiree Welfare Plan, of which the accumulated postretirement benefit obligation is inconsequential for all periods presented.

Contributions

The PPA requires that defined benefit plans contribute to 100% of the current liability funding target over seven years. Defined benefit plans with a funding status of less than 80% of the current liability are defined as being "at risk" and additional funding requirements and benefit restrictions may apply. The Company's qualified defined benefit plan is currently funded above the at-risk threshold, and therefore the Company expects that the plans will not be subject to the "at risk" funding requirements of the PPA. The Company is proactively monitoring the plan's funded status and projected contributions under the law to appropriately manage the potential impact on cash requirements.

Minimum funding requirements for the qualified defined benefit pension plan are determined by government regulations and not by accounting pronouncements. The Company plans to contribute amounts at least equal to or greater than the minimum required contributions or the normal cost in 2025 to the qualified pension plans. Contributions may be in the form of cash contributions as well as available prefunding balances.

Presented in the table below is information about the expected cash flows for the pension and postretirement benefit plans:

	Pension Benefits	Other Benefits
2025 expected employer contributions:		
To plan trusts	$ 44	$ —
To plan participants	2	—

Estimated Future Benefit Payments

Presented in the table below are the net benefits expected to be paid from the plan assets or the Company's assets:

	Pension Benefits	Other Benefits	
	Expected Benefit Payments	Expected Benefit Payments	Expected Federal Subsidy Payments
2025	$ 121	$ 22	$ 1
2026	122	22	1
2027	124	22	1
2028	124	21	1
2029	125	20	1
2030-2034	612	90	2

Because the above amounts are net benefits, plan participants' contributions have been excluded from the expected benefits.

Assumptions

Accounting for pensions and other postretirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover and medical costs. Each assumption is reviewed annually. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other postretirement benefit expense that the Company recognizes.

Presented in the table below are the significant assumptions related to the pension and other postretirement benefit plans:

	Pension Benefits			Other Benefits		
	2024	2023	2022	2024	2023	2022
Weighted average assumptions used to determine December 31 benefit obligations:						
Discount rate	5.70%	5.18%	5.58%	5.69%	5.22%	5.60%
Rate of compensation increase	3.51%	3.51%	3.51%	N/A	N/A	N/A
Medical trend	N/A	N/A	N/A	graded from 6.50% in 2025 to 5.00% in 2031+	graded from 6.75% in 2024 to 5.00% in 2031+	graded from 7.00% in 2023 to 5.00% in 2031+
Weighted average assumptions used to determine net periodic cost:						
Discount rate	5.18%	5.58%	2.94%	5.22%	5.60%	2.90%
Expected return on plan assets	6.73%	6.79%	6.50%	5.00%	5.00%	3.60%
Rate of compensation increase	3.51%	3.51%	3.51%	N/A	N/A	N/A
Medical trend	N/A	N/A	N/A	graded from 6.75% in 2024 to 5.00% in 2031+	graded from 7.00% in 2023 to 5.00% in 2031+	graded from 6.00% in 2022 to 5.00% in 2026+

NOTE: "N/A" in the table above means assumption is not applicable.

The discount rate assumption was determined for the pension and postretirement benefit plans independently. The Company uses an approach that approximates the process of settlement of obligations tailored to the plans' expected cash flows by matching the plans' cash flows to the coupons and expected maturity values of individually selected bonds. Historically, for each plan, the discount rate was developed at the level equivalent rate that would produce the same present value as that using spot rates aligned with the projected benefit payments.

The expected long-term rate of return on plan assets is based on historical and projected rates of return, prior to administrative and investment management fees, for current and planned asset classes in the plans' investment portfolios. Assumed projected rates of return for each of the plans' projected asset classes were selected after analyzing historical experience and future expectations of the returns and volatility of the various asset classes. Based on the target asset allocation for each asset class, the overall expected rate of return for the portfolio was developed, adjusted for historical and expected experience of active portfolio management results compared to the benchmark returns. The Company's pension expense increases as the expected return on assets decreases. The Company used a weighted average expected return on plan assets of 6.73% to estimate its 2024 pension benefit costs, and an expected blended return based on weighted assets of 5.00% to estimate its 2024 other postretirement benefit costs.

For the years ended December 31, 2024, 2023 and 2022, the Company's mortality assumption utilized the Pri-2012 base mortality table with the MP-2021 mortality improvement scale.

Components of Net Periodic Benefit Cost

Presented in the table below are the components of net periodic benefit costs for the years ended December 31:

	2024	2023	2022
Components of net periodic pension benefit cost (credit):			
Service cost	$ 17	$ 17	$ 30
Interest cost	83	85	64
Expected return on plan assets	(94)	(94)	(122)
Amortization of prior service (credit) cost	(3)	(3)	(3)
Amortization of actuarial loss	22	13	21
Settlements	1	1	—
Net periodic pension benefit cost (credit)	$ 26	$ 19	$ (10)
Other changes in plan assets and benefit obligations recognized in other comprehensive income:			
Current year actuarial (gain) loss	$ (1)	$ 3	$ (14)
Amortization of actuarial loss	—	(4)	(3)
Total recognized in other comprehensive income	(1)	(1)	(17)
Total recognized in net periodic benefit cost (credit) and other comprehensive income	$ 25	$ 18	$ (27)
Components of net periodic other postretirement benefit (credit) cost:			
Service cost	$ 2	$ 2	$ 3
Interest cost	12	14	10
Expected return on plan assets	(12)	(12)	(19)
Amortization of prior service credit	(31)	(31)	(31)
Amortization of actuarial loss	—	2	—
Net periodic other postretirement benefit (credit) cost	$(29)	$(25)	$ (37)

Savings Plans for Employees

The Company maintains 401(k) savings plans that allow employees to save for retirement on a tax-deferred basis. Employees can make contributions that are invested at their direction in one or more funds. The Company makes matching contributions based on a percentage of an employee's contribution, subject to certain limitations. Due to the Company's discontinuing new entrants into the defined benefit pension plan, on January 1, 2006, the Company began providing an additional 5.25% of base pay defined contribution benefit for union employees hired on or after January 1, 2001 and non-union employees hired on or after January 1, 2006. The Company's 401(k) savings plan expenses totaled $15 million, $14 million and $13 million for 2024, 2023 and 2022, respectively. Additionally, the Company's 5.25% of base pay defined contribution benefit expenses totaled $18 million, $17 million and $16 million for 2024, 2023 and 2022, respectively. All of the Company's contributions are invested in one or more funds at the direction of the employees.

Note 16: Commitments and Contingencies

Commitments have been made in connection with certain construction programs. The estimated capital expenditures required under legal and binding contractual obligations amounted to $1.1 billion as of December 31, 2024.

The Company's regulated subsidiaries maintain agreements with other water purveyors for the purchase of water to supplement their water supply. Presented in the table below are the future annual commitments related to minimum quantities of purchased water having non-cancelable contracts:

	Amount
2025	$ 81
2026	70
2027	63
2028	64
2029	64
Thereafter	859

The Company enters into agreements for the provision of services to water and wastewater facilities for the U.S. military, municipalities and other customers. See Note 4—Revenue Recognition for additional information regarding the Company's performance obligations.

Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. As of December 31, 2024, the Company has accrued approximately $16 million of probable loss contingencies and has estimated that the maximum amount of loss associated with reasonably possible loss contingencies arising out of such legal actions, which can be reasonably estimated, is $9 million. For certain legal actions, the Company is unable to estimate possible losses. The Company believes that damages or settlements, if any, recovered by plaintiffs in such legal actions, other than as described in this Note 16—Commitments and Contingencies, will not have a material adverse effect on the Company.

Dunbar, West Virginia Class Action Litigation

On the evening of June 23, 2015, a 36-inch pre-stressed concrete transmission water main, installed in the early 1970s, failed. The water main is part of the West Relay pumping station located in the City of Dunbar, West Virginia and owned by the Company's West Virginia subsidiary ("WVAWC"). The failure of the main caused water outages and low pressure for up to approximately 25,000 WVAWC customers. In the early morning hours of June 25, 2015, crews completed a repair, but that same day, the repair developed a leak. On June 26, 2015, a second repair was completed, and service was restored that day to approximately 80% of the impacted

customers, and to the remaining approximately 20% by the next morning. The second repair showed signs of leaking, but the water main was usable until June 29, 2015, to allow tanks to refill. The system was reconfigured to maintain service to all but approximately 3,000 customers while a final repair was being completed safely on June 30, 2015. Water service was fully restored by July 1, 2015, to all customers affected by this event.

On June 2, 2017, a complaint captioned *Jeffries, et al. v. West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of residents and business owners who lost water service or pressure as a result of the Dunbar main break. The complaint alleges breach of contract by WVAWC for failure to supply water, violation of West Virginia law regarding the sufficiency of WVAWC's facilities and negligence by WVAWC in the design, maintenance and operation of the water system. The *Jeffries* plaintiffs seek unspecified alleged damages on behalf of the class for lost profits, annoyance and inconvenience, and loss of use, as well as punitive damages for willful, reckless and wanton behavior in not addressing the risk of pipe failure and a large outage.

In February 2020, the *Jeffries* plaintiffs filed a motion seeking class certification on the issues of breach of contract and negligence, and to determine the applicability of punitive damages and a multiplier for those damages if imposed. In July 2020, the Circuit Court entered an order granting the *Jeffries* plaintiffs' motion for certification of a class regarding certain liability issues but denying certification of a class to determine a punitive damages multiplier. Trial in this matter had been scheduled for January 2025.

On January 17, 2025, before trial commenced, the parties notified the Circuit Court that an agreement in principle to settle this litigation was reached among the parties. Under the terms of the agreement in principle and any subsequent proposed settlement agreement, WVAWC has not admitted, and will not admit, any fault or liability for any of the allegations made by the *Jeffries* plaintiffs. The proposed maximum pre-tax amount of the settlement is approximately $18 million, of which the Company currently estimates that approximately $5 million would be contributed by the Company and WVAWC, and the remainder would be contributed by certain of the Company's general liability insurance carriers. The actual total amount to be paid to claimants through this settlement will depend upon the claims submitted and approved through a claims process to be negotiated by the parties and approved by the Circuit Court. The parties will next negotiate and enter into a proposed settlement agreement based on the terms of the agreement in principle, and the proposed settlement agreement will be subject to preliminary and final approvals by the Circuit Court.

The final amount of the Company's and WVAWC's contributions to the settlement remains subject to uncertainty; however, the Company does not currently anticipate that Company's maximum liability for the settlement will materially exceed $5 million. As a result, the Company has recorded a charge to earnings, net of insurance receivables, of $5.0 million ($3.9 million after-tax) in the fourth quarter of 2024. The Company intends to fund its and WVAWC's contributions to the settlement through existing sources of liquidity, although no contribution by the Company or WVAWC will be required unless and until a proposed settlement agreement has been entered into and finally approved by the Circuit Court.

Chattanooga, Tennessee Class Action Litigation

On September 12, 2019, the Company's Tennessee subsidiary ("TAWC"), experienced a leak in a 36-inch water transmission main, which caused service fluctuations or interruptions to TAWC customers and the issuance of a boil water notice. TAWC repaired the main by early morning on September 14, 2019, and restored full water service by the afternoon of September 15, 2019, with the boil water notice lifted for all customers on September 16, 2019.

On September 17, 2019, a complaint captioned *Bruce, et al. v. American Water Works Company, Inc., et al.* was filed in the Circuit Court of Hamilton County, Tennessee against TAWC, the Company and American Water Works Service Company, Inc. ("Service Company" and, together with TAWC and the Company, collectively, the "Tennessee-American Water Defendants"), on behalf of a proposed class of individuals or entities who lost

water service or suffered monetary losses as a result of the Chattanooga incident (the "Tennessee Plaintiffs"). The complaint alleged breach of contract and negligence against the Tennessee-American Water Defendants, as well as an equitable remedy of piercing the corporate veil. In the complaint as originally filed, the Tennessee Plaintiffs were seeking an award of unspecified alleged damages for wage losses, business and economic losses, out-of-pocket expenses, loss of use and enjoyment of property and annoyance and inconvenience, as well as punitive damages, attorneys' fees and pre- and post-judgment interest.

In September 2020, the court dismissed all of the Tennessee Plaintiffs' claims in their complaint, except for the breach of contract claims against TAWC, which remain pending. In October 2020, TAWC answered the complaint, and the parties have been engaging in discovery. In January 2023, after hearing oral argument, the court issued an oral ruling denying the Tennessee Plaintiffs' motion for class certification. In February 2023, the Tennessee Plaintiffs sought reconsideration of the ruling by the court, and any final ruling is appealable to the Tennessee Court of Appeals, as allowed under Tennessee law. In September 2023, the court upheld its prior ruling but gave the Tennessee Plaintiffs the option to file an amended class definition. In October 2023, the Tennessee Plaintiffs filed an amended class definition seeking certification of a business customer-only class. On June 14, 2024, the court issued its written order denying the Tennessee Plaintiffs' amended class and incorporating its denial of certification of the original residential class. On June 21, 2024, the Tennessee Plaintiffs appealed both of the court's orders denying class certification. This appeal remains pending.

The Company and TAWC believe that TAWC has valid, meritorious defenses to the claims raised in this class action complaint. TAWC will continue to vigorously defend itself against these allegations. Given the current stage of this proceeding, the Company cannot currently determine the likelihood of a loss, if any, or estimate the amount of any loss or a range of loss related to this proceeding.

Mountaineer Gas Company Main Break

During the afternoon of November 10, 2023, WVAWC was informed that an 8-inch ductile iron water main owned by WVAWC, located on the West Side of Charleston, West Virginia and originally installed in approximately 1989, experienced a leak. In the early morning hours of November 11, 2023, WVAWC crews successfully completed a repair to the water main. A precautionary boil water advisory was issued the same day to approximately 300 WVAWC customers and ultimately lifted on November 12, 2023.

On November 10, 2023, a break was reported in a low-pressure natural gas main located near the affected WVAWC water main, and an inflow of water into the natural gas main and associated delivery pipelines occurred. The natural gas main and pipelines are owned by Mountaineer Gas Company, a regulated natural gas distribution company serving over 220,000 customers in West Virginia ("Mountaineer Gas"). The resulting inflow of water into the natural gas main and related pipelines resulted in a loss of natural gas service to approximately 1,500 Mountaineer Gas customers, as well as water entering customer service lines and certain natural gas appliances owned or used by some of the affected Mountaineer Gas customers. Mountaineer Gas reported that restoration of natural gas service to all affected gas mains occurred on November 24, 2023. The timing, order and causation of both the WVAWC water main break and Mountaineer Gas's main break are currently unknown and under investigation.

To date, a total of four pending lawsuits have been filed against Mountaineer Gas and WVAWC purportedly on behalf of customers in Charleston, West Virginia related to these incidents. On November 14, 2023, a complaint captioned *Ruffin et al. v. Mountaineer Gas Company and West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of Mountaineer Gas residential and business customers and other households and businesses supplied with natural gas in Kanawha County, which lost natural gas service on November 10, 2023, as a result of these events. The complaint alleges, among other things, breach of contract by Mountaineer Gas, trespass by WVAWC, nuisance by WVAWC, violation of statutory obligations by Mountaineer Gas and WVAWC, and negligence by Mountaineer Gas and WVAWC. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for loss of use of natural gas, annoyance, inconvenience and lost profits, as well as punitive damages.

On November 15, 2023, a complaint captioned *Toliver et al. v. West Virginia-American Water Company and Mountaineer Gas Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of all natural persons or entities who are citizens of the State of West Virginia and who are customers of WVAWC and/or Mountaineer Gas in the affected areas. The complaint alleges against Mountaineer Gas and WVAWC, among other things, negligence, nuisance, trespass and strict liability, as well as breach of contract against Mountaineer Gas. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for property damage, loss of use and enjoyment of property, annoyance and inconvenience and business losses, as well as punitive damages.

On November 16, 2023, a complaint captioned *Dodson et al. v. West Virginia American Water and Mountaineer Gas Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of all West Virginia citizens living between Pennsylvania Avenue south of Washington Street, and Iowa Street, who are customers of Mountaineer Gas. The complaint alleges against Mountaineer Gas and WVAWC, among other things, negligence, nuisance, trespass, statutory code violations and unfair or deceptive business practices. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for property loss and damage, loss of use and enjoyment of property, mental and emotional distress, and aggravation and inconvenience, as well as punitive damages.

On January 4, 2024, a fourth complaint, captioned *Thomas v. West Virginia-American Water Company and Mountaineer Gas Company*, was filed in West Virginia Circuit Court in Kanawha County asserting similar allegations as those included in the *Ruffin*, *Toliver* and *Dodson* lawsuits, with the addition of counts alleging unjust enrichment and violations of the West Virginia Human Rights Act and the West Virginia Consumer Credit and Protection Act.

On November 17, 2023, the *Ruffin* plaintiff filed a motion to consolidate the class action lawsuits before a single judge in Kanawha County Circuit Court. On June 14, 2024, the judge in the *Ruffin* case partially granted the motion by transferring all of the four class action lawsuits to her court but deferring as premature consolidation of the cases.

On December 5, 2023, a complaint captioned *Mountaineer Gas Company v. West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County seeking damages under theories of trespass, negligence and implied indemnity. The damages being sought related to the incident include, among other things, repair and response costs incurred by Mountaineer Gas and attorneys' fees and expenses incurred by Mountaineer Gas. On December 14, 2023, Mountaineer Gas filed a motion with the Supreme Court of West Virginia to transfer this case to the West Virginia Business Court. On December 29, 2023, WVAWC filed a joinder in the motion to transfer the case. WVAWC has also filed a partial motion to dismiss this lawsuit. On March 6, 2024, the motion to transfer this complaint to the West Virginia Business Court was granted and trial and resolution judges were assigned. Mountaineer Gas voluntarily dismissed its implied indemnity count against WVAWC, rendering moot WVAWC's partial motion to dismiss, and on May 31, 2024, WVAWC answered the complaint. The Business Court has set a trial date of October 7, 2025, for this matter.

On December 20, 2023, Mountaineer Gas filed answers to each of the first three class action lawsuits, which included cross-claims against WVAWC alleging that Mountaineer Gas is without fault for the claims and damages alleged in the lawsuits and WVAWC should be required to indemnify Mountaineer Gas for any damages and for attorneys' fees and expenses incurred by Mountaineer Gas in the lawsuits. WVAWC has filed a partial motion to dismiss certain claims in the *Ruffin, Toliver, Dodson* and *Thomas* lawsuits and a motion to dismiss the cross-claims asserted against WVAWC therein by Mountaineer Gas. Mountaineer Gas subsequently voluntarily dismissed its cross-claims. On January 30, 2024, a motion was filed with the West Virginia Supreme Court on behalf of the *Toliver* plaintiff to refer the four class action complaints and the *Mountaineer Gas* complaint to the West Virginia Mass Litigation Panel. On February 7, 2024, WVAWC filed a motion joining in that referral request. On February 19, 2024, Mountaineer Gas filed a motion opposing the referral of the four class action complaints and the *Mountaineer Gas* complaint to the West Virginia Mass Litigation Panel. On

May 31, 2024, the West Virginia Supreme Court denied the motion seeking referral. The Kanawha County Circuit Court has set a trial date of February 2, 2026, for the class action complaints.

On December 6, 2023, WVAWC initiated a process whereby Mountaineer Gas customers could file claims with WVAWC and seek payment from WVAWC of up to $2,000 in damages per affected household for the inconvenience arising from a loss of use of their appliances and documented out-of-pocket expenses as a result of the natural gas outage. In light of the diminishing number of new claims that had been filed, the claims process was concluded on March 8, 2024. As of December 31, 2024, a total of 594 Mountaineer Gas customers completed this claims process, and each of those customers has been paid by WVAWC an average of approximately $1,500. In return, these customers were required to execute a partial release of liability in favor of WVAWC.

On November 16, 2023, the WVPSC issued an order initiating a general investigation into both the water main break and natural gas outages occurring in this incident to determine the cause or causes thereof, as well as breaks and outages generally throughout the systems of WVAWC and Mountaineer Gas and the utility practices of both utilities. Following a series of disagreements among the parties regarding the scope of discovery, the WVPSC closed the general investigation into both utilities and ordered a separate general investigation for each utility. The WVPSC focused the two general investigations away from the cause of the events and instead on the maintenance practices of each utility during and after the main breaks. On January 29, 2024, the Consumer Advocate Division of the WVPSC filed a motion to intervene in the WVAWC general investigation.

On April 24, 2024, the staff issued a final joint memorandum in the Mountaineer Gas general investigation stating its view that Mountaineer Gas responded appropriately, reasonably and according to Mountaineer Gas's written procedures. The staff is making no recommendations for improvements to Mountaineer Gas and is recommending that the Mountaineer Gas general investigation be closed. On July 24, 2024, the staff issued a final joint memorandum in the WVAWC general investigation finding no indication of systematic failure by WVAWC and concluding WVAWC's maintenance and operating procedures were adequate to ensure safe and reliable service, subject to the implementation by WVAWC of three recommended operational improvements. Both general investigations remain pending.

The Company and WVAWC believe that the causes of action and other claims asserted against WVAWC in the class action complaints and the lawsuit filed by Mountaineer Gas are without merit and that WVAWC has valid, meritorious defenses to such claims. WVAWC continues to defend itself vigorously in these litigation proceedings.

Given the current stage of these proceedings and the general investigation, the Company and WVAWC are currently unable to predict the outcome of any of the proceedings described above, and the Company cannot currently determine the likelihood of a loss, if any, or estimate the amount of any loss or a range of loss related to this proceeding.

Alternative Water Supply in Lieu of Carmel River Diversions

Compliance with Orders to Reduce Carmel River Diversions—Monterey Peninsula Water Supply Project

Under a 2009 order (the "2009 Order") of the State Water Resources Control Board (the "SWRCB"), the Company's California subsidiary ("Cal Am") is required to decrease significantly its yearly diversions of water from the Carmel River according to a set reduction schedule. In 2016, the SWRCB issued an order (the "2016 Order," and, together with the 2009 Order, the "Orders") approving a deadline of December 31, 2021, for Cal Am's compliance with these prior orders.

Cal Am is currently involved in developing the Monterey Peninsula Water Supply Project (the "Water Supply Project"), which includes the construction of a desalination plant, to be owned by Cal Am, and the

construction of wells that would supply water to the desalination plant. In addition, the Water Supply Project also includes Cal Am's purchase of water from a groundwater replenishment project (the "GWR Project") between Monterey One Water and the Monterey Peninsula Water Management District (the "MPWMD"), as well as an expanded aquifer storage and recovery program. The Water Supply Project is intended, among other things, to fulfill Cal Am's obligations under the Orders.

Cal Am's ability to move forward on the Water Supply Project is and has been subject to administrative review by the CPUC and other government agencies, obtaining necessary permits, and intervention from other parties. In 2016, the CPUC unanimously approved a final decision to authorize Cal Am to enter into a water purchase agreement for the GWR Project and to construct a pipeline and pump station facilities and recover up to $50 million in associated incurred costs, plus AFUDC, subject to meeting certain criteria.

In 2018, the CPUC unanimously approved another final decision finding that the Water Supply Project meets the CPUC's requirements for a certificate of public convenience and necessity and an additional procedural phase was not necessary to consider alternative projects. The CPUC's 2018 decision concludes that the Water Supply Project is the best project to address estimated future water demands in Monterey, and, in addition to the cost recovery approved in its 2016 decision, adopts Cal Am's cost estimates for the Water Supply Project, which amounted to an aggregate of $279 million plus AFUDC at a rate representative of Cal Am's actual financing costs. The 2018 final decision specifies the procedures for recovery of all of Cal Am's prudently incurred costs associated with the Water Supply Project upon its completion, subject to the frameworks included in the final decision related to cost caps, operation and maintenance costs, financing, ratemaking and contingency matters. The reasonableness of the Water Supply Project costs will be reviewed by the CPUC when Cal Am seeks cost recovery for the Water Supply Project. Cal Am is also required to implement mitigation measures to avoid, minimize or offset significant environmental impacts from the construction and operation of the Water Supply Project and comply with a mitigation monitoring and reporting program, a reimbursement agreement for CPUC costs associated with that program, and reporting requirements on plant operations following placement of the Water Supply Project in service. Cal Am has incurred $281 million in aggregate costs as of December 31, 2024, related to the Water Supply Project, which includes $88 million in AFUDC.

In September 2021, Cal Am, Monterey One Water and the MPWMD reached an agreement on Cal Am's purchase of additional water from an expansion to the GWR Project. On December 5, 2022, the CPUC issued a final decision that authorized Cal Am to enter into the amended water purchase agreement, and specifically to increase pumping capacity and reliability of groundwater extraction from the Seaside Groundwater Basin. The final decision sets the cost cap for the proposed facilities at approximately $62 million. Cal Am may seek recovery of amounts above the cost cap in a subsequent rate filing or general rate case. Additionally, the final decision authorizes AFUDC at Cal Am's actual weighted average cost of debt for most of the facilities. On December 30, 2022, Cal Am filed with the CPUC an application for rehearing of the CPUC's December 5, 2022, final decision, and on March 30, 2023, the CPUC issued a decision denying Cal Am's application for rehearing, but adopting its proposed AFUDC for already incurred and future costs. The decision also provided Cal Am the opportunity to serve supplemental testimony to increase its cost cap for certain of the Water Supply Project's extraction wells. The amended water purchase agreement and a memorandum of understanding to negotiate certain milestones related to the expansion of the GWR Project have been signed by the relevant parties. Further hearings were scheduled in a Phase 2 to this CPUC proceeding to focus on updated supply and demand estimates for the Water Supply Project, and Phase 2 testimony was completed in September 2022. On October 23, 2023, a status conference was held to determine procedural steps to conclude the proceeding. Further evidentiary hearings were held in March 2024. This matter remains pending.

While Cal Am believes that its expenditures to date have been prudent and necessary to comply with the Orders, as well as relevant final decisions of the CPUC related thereto, Cal Am cannot currently predict its ability to recover all of its costs and expenses associated with the Water Supply Project and there can be no assurance that Cal Am will be able to recover all of such costs and expenses in excess of the $112 million in aggregate construction costs, plus applicable AFUDC, previously approved by the CPUC in its 2016 and December 2022 final decisions, as amended by its March 30, 2023 rehearing decision.

Coastal Development Permit Application

In 2018, Cal Am submitted a coastal development permit application (the "Marina Application") to the City of Marina (the "City") for those project components of the Water Supply Project located within the City's coastal zone. Members of the City's Planning Commission, as well as City councilpersons, have publicly expressed opposition to the Water Supply Project. In May 2019, the City issued a notice of final local action based upon the denial by the Planning Commission of the Marina Application. Thereafter, Cal Am appealed this decision to the Coastal Commission, as permitted under the City's code and the California Coastal Act. At the same time, Cal Am submitted an application (the "Original Jurisdiction Application") to the Coastal Commission for a coastal development permit for those project components located within the Coastal Commission's original jurisdiction. After Coastal Commission staff issued reports recommending denial of the Original Jurisdiction Application, noting potential impacts on environmentally sensitive habitat areas and wetlands and possible disproportionate impacts to communities of concern, in September 2020, Cal Am withdrew the Original Jurisdiction Application in order to address the staff's environmental justice concerns. In November 2020, Cal Am refiled the Original Jurisdiction Application.

In October 2022, Cal Am announced a phasing plan for the proposed desalination plant component of the Water Supply Project. The desalination plant and slant wells originally approved by the CPUC would produce up to 6.4 million gallons of desalinated water per day. Under the phased approach, the facilities would initially be constructed to produce up to 4.8 million gallons per day of desalinated water, enough to meet anticipated demand through about 2030, and would limit the number of slant wells initially constructed. As demand increases in the future, desalination facilities would be expanded to meet the additional demand. The phased approach seeks to meet near-term demand by allowing for additional supply as it becomes needed, while also providing an opportunity for regional future public participation and was developed by Cal Am based on feedback received from the community.

In November 2022, the Coastal Commission approved the Marina Application and the Original Jurisdiction Application with respect to the phased development of the proposed desalination plant, subject to compliance with a number of conditions, all of which Cal Am expects to satisfy. In December 2022, the City, Marina Coast Water District ("MCWD"), MCWD's groundwater sustainability agency, and the MPWMD jointly filed a petition for writ of mandate in Monterey County Superior Court against the Coastal Commission, alleging that the Coastal Commission violated the California Coastal Act and the California Environmental Quality Act in issuing a coastal development permit to Cal Am for construction of slant wells for the Water Supply Project. Cal Am is named as a real party in interest. On April 24, 2024, the court granted defendants' motion for judgment on the pleadings and dismissed one of MCWD's causes of action in the petition. A trial commenced on December 9, 2024, and further proceedings continued in January 2025. This matter remains pending.

Following the issuance of the coastal development permit, Cal Am continues to work constructively with all appropriate agencies to provide necessary information in connection with obtaining the remaining required permits for the Water Supply Project. However, there can be no assurance that the Water Supply Project in its current configuration will be completed on a timely basis, if ever. For the year ended December 31, 2024, Cal Am has complied with the diversion limitations contained in the 2016 Order. Continued compliance with the diversion limitations in 2025 and future years may be impacted by a number of factors, including without limitation potential recurrence of drought conditions in California and the exhaustion of water supply reserves, and will require successful development of alternate water supply sources sufficient to meet customer demand. The Orders remain in effect until Cal Am certifies to the SWRCB, and the SWRCB concurs, that Cal Am has obtained a permanent supply of water to substitute for past unauthorized Carmel River diversions. While the Company cannot currently predict the likelihood or result of any adverse outcome associated with these matters, further attempts to comply with the Orders may result in material additional costs and obligations to Cal Am, including fines and penalties against Cal Am in the event of noncompliance with the Orders.

Cal Am's Action for Damages Following Termination of Regional Desalination Project ("RDP")

In 2010, the CPUC had approved the RDP, which was a precursor to the current Water Supply Project and called for the construction of a desalination facility in the City of Marina. The RDP was to be implemented through a Water Purchase Agreement and ancillary agreements (collectively, the "Agreements") among MCWD, Cal Am and the Monterey County Water Resources Agency ("MCWRA"). In 2011, due to a conflict of interest concerning a former member of MCWRA's Board of Directors, MCWRA stated that the Agreements were void, and, as a result, Cal Am terminated the Agreements. In ensuing litigation filed by Cal Am in 2012 to resolve the termination of the RDP, the court in 2015 entered a final judgment agreeing with Cal Am's position that four of the five Agreements are void, and one, the credit line agreement, is not void. As a result of this litigation, Cal Am was permitted to institute further proceedings, discussed below, to determine the amount of damages that may be awarded to Cal Am as a result of the failure of the RDP.

In 2015, Cal Am and MCWRA filed a complaint in San Francisco County Superior Court against MCWD and RMC Water and Environment, a private engineering consulting firm ("RMC"), seeking to recover compensatory, consequential and incidental damages associated with the failure of the RDP, as well as punitive and treble damages, statutory penalties and attorneys' fees. In 2019, MCWD was granted a motion for summary judgment related to the tort claims in the complaint. A settlement as to the non-tort claims was finalized and entered into in March 2020. As part of this settlement, Cal Am's and MCWRA's right to appeal the dismissal of their tort claims against MCWD were expressly reserved, and, in July 2020, Cal Am filed its appeal. In December 2022, the trial court's decision was reversed on appeal with instructions to vacate its prior orders granting MCWD's motions for summary judgment and to enter new orders denying the motions. In February 2023, MCWD filed a petition for review of the appellate decision with the California Supreme Court, which was denied in March 2023. On June 27, 2024, MCWD filed a motion for judgment on the pleadings. Following a hearing, on December 5, 2024, the court granted MCWD's motion without leave to amend, dismissing all of Cal Am's remaining tort claims. Final judgment was entered on January 7, 2025. Cal Am intends to file a notice of appeal of the trial court's decision.

Proposed Acquisition of Monterey System Assets — Potential Condemnation

Local Agency Formation Commission Litigation

The water system assets of Cal Am located in Monterey, California (the "Monterey system assets") are the subject of a condemnation action by the MPWMD stemming from a November 2018 public ballot initiative. In 2019, the MPWMD issued a preliminary valuation and cost of service analysis report, finding in part that (1) an estimate of the Monterey system assets' total value plus adjustments would be approximately $513 million, (2) the cost of service modeling results indicate significant annual reductions in revenue requirements and projected monthly water bills, and (3) the acquisition of the Monterey system assets by the MPWMD would be economically feasible. In 2020, the MPWMD certified a final environmental impact report, analyzing the environmental impacts of the MPWMD's project to (1) acquire the Monterey system assets through the power of eminent domain, if necessary, and (2) expand its geographic boundaries to include all parts of this system.

In February 2021, the MPWMD filed an application with the Local Agency Formation Commission of Monterey County ("LAFCO") seeking approval to become a retail water provider and annex approximately 58 parcels of land into the MPWMD's boundaries. In June 2021, LAFCO's commissioners voted to require a third-party independent financial study as to the feasibility of an acquisition by the MPWMD of the Monterey system assets. In December 2021, LAFCO's commissioners denied the MPWMD's application to become a retail water provider, determining that the MPWMD does not have the authority to proceed with a condemnation of the Monterey system assets. In April 2022, the MPWMD filed a lawsuit against LAFCO challenging its decision to deny the MPWMD's application seeking approval to become a retail water provider. In June 2022, the court granted, with conditions, a motion by Cal Am to intervene in the MPWMD's lawsuit against LAFCO. In December 2022, the court sustained in part, and denied in part, demurrers that had been filed by LAFCO seeking to dismiss the MPWMD's lawsuit.

On December 11, 2023, the Monterey County Superior Court issued a writ of mandate directing LAFCO to vacate and set aside its original denial of the MPWMD's application to serve as a retail water provider (in conjunction with its effort to acquire the Monterey system assets) and, if requested, to re-hear the application in compliance with all applicable law. The court held that LAFCO incorrectly applied two statutory standards and noted a lack of sufficient evidence to support certain of LAFCO's factual findings. As a result, the LAFCO denial has been nullified and LAFCO will be required to hold another hearing on the MPWMD's application. On February 8, 2024, and February 9, 2024, respectively, Cal Am and LAFCO each filed a notice of appeal with the California Court of Appeal regarding the Monterey County Superior Court's decision to issue the writ of mandate. The MPWMD filed a notice of cross-appeal on February 15, 2024. Cal Am is evaluating potential additional actions to seek to uphold LAFCO's denial of the MPWMD's application, including filing other challenges and/or making suitable presentations at a subsequent LAFCO rehearing.

MPWMD Condemnation Action

Separate from the proceedings related to the MPWMD's application with LAFCO, by letter dated October 3, 2022, the MPWMD notified Cal Am of a decision to appraise the Monterey system assets and requested access to a number of Cal Am's properties and documents to assist the MPWMD with such an appraisal. Cal Am responded by letter on October 24, 2022, denying the request for access, stating that the MPWMD does not have the right to appraise Cal Am's system without LAFCO approval to become a retail water provider. On April 28, 2023, Cal Am rejected an offer by the MPWMD to purchase the Monterey system assets for $448.8 million. Over the written and oral objections of Cal Am, at a hearing held on October 10, 2023, the MPWMD adopted a resolution of necessity to authorize it to file an eminent domain lawsuit with respect to the Monterey system assets. On December 15, 2023, the MPWMD filed a lawsuit against Cal Am in Monterey County Superior Court seeking to condemn the Monterey system assets. On February 26, 2024, Cal Am filed a motion requesting the Monterey County Superior Court dismiss the MPWMD's lawsuit seeking to condemn Cal Am's Monterey system assets. Cal Am's motion asserted that the MPWMD lacks legal authorization from both the California legislature and LAFCO to become a retail water provider and the lawsuit improperly seeks to effect a taking of property outside the boundaries of the MPWMD's territory. Hearings on the motion were held on May 3, 2024, and August 23, 2024. On November 14, 2024, the court issued a final ruling denying Cal Am's motion to dismiss. Cal Am filed its answer to the complaint on December 13, 2024. This matter remains pending.

While the Company cannot currently predict the outcome of the MPWMD's eminent domain lawsuit, the Company believes that, given existing legal authorities and its other defenses, Cal Am should be able to defend itself successfully against this lawsuit.

Note 17: Earnings per Common Share

Presented in the table below is a reconciliation of the numerator and denominator for the basic and diluted earnings per share ("EPS") calculations for the years ended December 31:

	2024	2023	2022
Numerator:			
Net income attributable to common shareholders	$ 1,051	$ 944	$ 820
Denominator:			
Weighted average common shares outstanding—Basic	195	193	182
Effect of dilutive common stock equivalents	—	—	—
Weighted average common shares outstanding—Diluted	195	193	182

The effect of dilutive common stock equivalents is related to outstanding stock options, RSUs and PSUs granted under the Company's 2007 Plan and outstanding RSUs and PSUs granted under the Company's 2017 Omnibus Plan, as well as estimated shares to be purchased under the ESPP. Less than one million share-based

awards were excluded from the computation of diluted EPS for the years ended December 31, 2024, 2023 and 2022, because their effect would have been anti-dilutive under the treasury stock method.

The if-converted method is applied to the Notes issued in June 2023 for computing diluted EPS. For all periods presented, there was no dilution resulting from the Notes. See Note 11—Long-Term Debt for additional information relating to the Notes.

Note 18: Fair Value of Financial Information

Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported on the Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Secured seller promissory note from the sale of the Homeowner Services Group—The carrying amount reported on the Consolidated Balance Sheets for the secured seller promissory note, included as part of the consideration from the sale of HOS is $795 million and $720 million as of December 31, 2024 and 2023, respectively. This amount represents the principal amount owed under the secured promissory seller note, for which the Company expects to receive full payment. The accounting fair value measurement of the secured seller promissory note approximated $793 million and $704 million as of December 31, 2024 and 2023, respectively. The accounting fair value measurement is an estimate that is reflective of changes in benchmark interest rates. The secured seller promissory note is classified as Level 3 within the fair value hierarchy. On February 2, 2024, the secured seller promissory note from the sale of HOS was amended to increase the principal amount from $720 million to $795 million, in full satisfaction of a $75 million contingent cash payment, see Note 5—Acquisitions and Divestitures for additional information. As of December 31, 2023, the contingent cash payment was accounted for as a receivable, as the conditions had been satisfied, and its carrying amount, which approximated fair value, was included as a long-term asset in Other on the Consolidated Balance Sheets.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted prices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs.

Presented in the tables below are the carrying amounts, including fair value adjustments previously recognized in acquisition purchase accounting, and the fair values of the Company's financial instruments:

	As of December 31, 2024				
	Carrying Amount	At Fair Value			
		Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 3	$ —	$ —	$ 3	$ 3
Long-term debt	13,155	10,165	1,050	658	11,873

	As of December 31, 2023				
	Carrying Amount	At Fair Value			
		Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 3	$ —	$ —	$ 3	$ 3
Long-term debt	12,190	9,575	1,044	757	11,376

Fair Value Measurements

To increase consistency and comparability in fair value measurements, GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

Level 1—Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date. Financial assets and liabilities utilizing Level 1 inputs include active exchange-traded equity securities, exchange-based derivatives, mutual funds and money market funds.

Level 2—Inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data. Financial assets and liabilities utilizing Level 2 inputs include fixed income securities, non-exchange-based derivatives, commingled investment funds not subject to purchase and sale restrictions and fair-value hedges.

Level 3—Unobservable inputs, such as internally-developed pricing models for the asset or liability due to little or no market activity for the asset or liability. Financial assets and liabilities utilizing Level 3 inputs include infrequently-traded non-exchange-based derivatives and commingled investment funds subject to purchase and sale restrictions.

Recurring Fair Value Measurements

Presented in the tables below are assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy:

	As of December 31, 2024			
	Level 1	**Level 2**	**Level 3**	**Total**
Assets:				
Restricted funds	$ 44	$ —	$ —	$ 44
Rabbi trust investments	29	—	—	29
Deposits	6	—	—	6
Other investments:				
Money market and other	21	—	—	21
Fixed-income securities	88	6	—	94
Mark-to-market derivative asset	—	24	—	24
Total assets	188	30	—	218
Liabilities:				
Deferred compensation obligations	34	—	—	34
Total liabilities	34	—	—	34
Total assets	$ 154	$ 30	$ —	$ 184

	As of December 31, 2023			
	Level 1	Level 2	Level 3	Total
Assets:				
Restricted funds	$ 34	$ —	$ —	$ 34
Rabbi trust investments	22	—	—	22
Deposits	8	—	—	8
Other investments:				
Money market and other	26	—	—	26
Fixed-income securities	140	6	—	146
Total assets	230	6	—	236
Liabilities:				
Deferred compensation obligations	27	—	—	27
Mark-to-market derivative liability	—	8	—	8
Total liabilities	27	8	—	35
Total assets (liabilities)	$ 203	$ (2)	$ —	$ 201

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operation, maintenance and repair projects.

Rabbi trust investments—The Company's rabbi trust investments consist of equity and index funds from which supplemental executive retirement plan benefits and deferred compensation obligations can be paid. The Company includes these assets in other long-term assets on the Consolidated Balance Sheets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets on the Consolidated Balance Sheets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities on the Consolidated Balance Sheets. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on quoted prices for identical assets in active markets.

Mark-to-market derivative assets and liabilities—The Company employs derivative financial instruments in the form of treasury lock agreements, classified as cash flow hedges, in order to fix the interest cost on existing or forecasted debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Other investments—The Company maintains the Active VEBA trust for purposes of paying active union employee medical benefits. The investments in the Active VEBA trust primarily consist of money market funds and available-for-sale fixed-income securities.

The money market and other investments have original maturities of three months or less when purchased. The fair value measurement of the money market and other investments is based on quoted prices for identical assets in active markets and therefore included in the recurring fair value measurements hierarchy as Level 1.

The available-for-sale fixed income securities are primarily investments in U.S. Treasury securities and government bonds. The majority of U.S. Treasury securities and government bonds have been categorized as

Level 1 because they trade in highly-liquid and transparent markets. Certain U.S. Treasury securities are based on prices that reflect observable market information, such as actual trade information of similar securities, and are therefore categorized as Level 2, because the valuations are calculated using models which utilize actively traded market data that the Company can corroborate.

The Company includes other investments measured and recorded at fair value on the Consolidated Balance Sheets of $71 million and $62 million in other current assets, as of December 31, 2024 and 2023, respectively, and $44 million and $111 million in other long-term assets, as of December 31, 2024 and 2023, respectively. Unrealized holding gains and losses on available-for-sale securities are excluded from earnings and reported in other comprehensive income until realized.

The following tables summarize the unrealized positions for available-for-sale fixed income securities:

	As of December 31, 2024			
	Amortized Cost Basis	Gross unrealized gains	Gross unrealized losses	Fair Value
Available-for-sale fixed-income securities	$ 94	$ 2	$ 2	$ 94

	As of December 31, 2023			
	Amortized Cost Basis	Gross unrealized gains	Gross unrealized losses	Fair Value
Available-for-sale fixed-income securities	$ 143	$ 6	$ 3	$ 146

The fair value of the Company's available-for-sale fixed income securities, summarized by contractual maturities, as of December 31, 2024, is as follows:

	Amount
Other investments—Available-for-sale fixed-income securities	
Less than one year	$ 57
1 year—5 years	25
5 years—10 years	5
Greater than 10 years	7
Total	$ 94

Note 19: Leases

The Company has operating and finance leases involving real property, including facilities, utility assets, vehicles, and equipment. Certain operating leases have renewal options ranging from one year to 60 years. The exercise of lease renewal options is at the Company's sole discretion. Renewal options that the Company was reasonably certain to exercise are included in the Company's ROU assets. Certain operating leases contain the option to purchase the leased property. The operating leases for real property, vehicles and equipment will expire over the next 40 years, five years, and five years, respectively.

The Company participates in a number of arrangements with various public entities ("Partners") in West Virginia. Under these arrangements, the Company transferred a portion of its utility plant to the Partners in exchange for an equal principal amount of Industrial Development Bonds ("IDBs") issued by the Partners under the Industrial Development and Commercial Development Bond Act. The Company leased back the utility plant under agreements for a period of 30 to 40 years. The Company has recorded these agreements as finance leases in property, plant and equipment, as ownership of the assets will revert back to the Company at the end of the lease term. The carrying value of the finance lease assets was $143 million and $144 million as of December 31,

2024 and 2023, respectively. The Company determined that the finance lease obligations and the investments in IDBs meet the conditions for offsetting, and as such, are reported net on the Consolidated Balance Sheets and excluded from the lease disclosure presented below.

The Company also enters into O&M agreements with the Partners. The Company pays an annual fee for use of the Partners' assets in performing under the O&M agreements. The O&M agreements are recorded as operating leases, and future annual use fees of $4 million in 2025 through 2029, and $37 million thereafter, are included in operating lease ROU assets and operating lease liabilities on the Consolidated Balance Sheets.

Rental expenses under operating leases were $12 million, $11 million and $12 million for the years ended December 31, 2024, 2023 and 2022, respectively.

For the year ended December 31, 2024, cash paid for amounts in lease liabilities, which includes operating cash flows from operating leases, was $11 million. For the year ended December 31, 2024, ROU assets obtained in exchange for new operating lease liabilities was $11 million.

As of December 31, 2024, the weighted-average remaining lease term of the operating leases was 18 years, and the weighted-average discount rate of the operating leases was 5%.

The future maturities of lease liabilities at December 31, 2024, were $11 million in 2025, $10 million in 2026, $10 million in 2027, $8 million in 2028, $7 million in 2029 and $86 million thereafter. At December 31, 2024, imputed interest was $47 million.

Note 20: Segment Information

The Company's operating segments are comprised of its businesses which generate revenue, incur expense and have separate financial information which is regularly used by the chief operating decision maker to make operating decisions, assess performance and allocate resources. The Company operates its businesses primarily through one reportable segment, the Regulated Businesses segment. The Regulated Businesses segment is the largest component of the Company's business and includes subsidiaries that provide water and wastewater services to customers in 14 states.

The Company also operates other businesses, primarily MSG, which provide water and wastewater services to the U.S. government on military installations, as well as municipalities. These other businesses do not meet the criteria of a reportable segment in accordance with GAAP, and are collectively presented throughout this Annual Report on Form 10-K within "Other," which is consistent with how management assesses the results of these businesses.

The accounting policies of the segments are the same as those described in Note 2—Significant Accounting Policies. The Regulated Businesses segment includes intercompany costs that are allocated by Service Company and intercompany interest that is charged by AWCC, both of which are eliminated to reconcile to the Consolidated Statements of Operations. Inter-segment revenues include the sale of water from a regulated subsidiary to subsidiaries within Other, leased office space, and furniture and equipment provided by subsidiaries within Other to regulated subsidiaries. Other also includes corporate costs that are not allocated to the Company's Regulated Businesses, interest income related to the secured seller promissory note from the sale of HOS, income from assets not associated with the Regulated Businesses, eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment. The adjustments related to the acquisitions are reported in Other as they are excluded from segment performance measures evaluated by management.

The Company's chief operating decision maker is the Chief Executive Officer. The chief operating decision maker uses segment net income or loss to evaluate profit generated from segment assets when making decisions

about allocating resources. The chief operating decision maker also uses segment net income to monitor budget versus actual results to assess the performance of the segment.

Presented in the tables below is summarized segment information as of and for the years ended December 31:

	2024		
	Regulated Businesses	Other	Consolidated
Operating revenues	$ 4,296	$ 388	$ 4,684
Less:			
Operation and maintenance (a)	1,517	341	1,858
Other segment items (b)	241	9	250
Depreciation and amortization	772	16	788
Interest expense	416	107	523
Interest income	(17)	(77)	(94)
Provision for income taxes	302	6	308
Net income (loss) attributable to common shareholders	$ 1,065	$ (14)	$ 1,051
Total assets	$ 29,941	$ 2,889	$ 32,830
Capital expenditures	$ 2,838	$ 18	$ 2,856

(a) Significant segment expense.
(b) Other segment items included in segment net income includes General taxes, Non-operating benefit costs, net, and Other income (expense), net, primarily Allowance for other funds used during construction.

	2023		
	Regulated Businesses	Other	Consolidated
Operating revenues	$ 3,920	$ 314	$ 4,234
Less:			
Operation and maintenance (a)	1,441	279	1,720
Other segment items (b)	220	7	227
Depreciation and amortization	693	11	704
Interest expense	364	96	460
Interest income	(28)	(45)	(73)
Provision for (benefit from) income taxes	259	(7)	252
Net income (loss) attributable to common shareholders	$ 971	$ (27)	$ 944
Total assets	$ 27,480	$ 2,818	$ 30,298
Capital expenditures	$ 2,551	$ 24	$ 2,575

(a) Significant segment expense.
(b) Other segment items included in segment net income includes General taxes, Other operating expenses, Non-operating benefit costs, net, and Other income (expense), net, primarily Allowance for other funds used during construction.

	2022		
	Regulated Businesses	Other	Consolidated
Operating revenues	$ 3,505	$ 287	$ 3,792
Less:			
Operation and maintenance (a)	1,345	244	1,589
Other segment items (b)	173	11	184
Depreciation and amortization	633	16	649
Interest expense	314	119	433
Interest income	(2)	(50)	(52)
Gain on sale of businesses	—	(19)	(19)
Provision for income taxes	188	—	188
Net income (loss) attributable to common shareholders	$ 854	$ (34)	$ 820
Total assets	$ 25,038	$ 2,749	$ 27,787
Capital expenditures	$ 2,284	$ 13	$ 2,297

(a) Significant segment expense.

(b) Other segment items included in segment net income includes General taxes, Non-operating benefit costs, net, and Other income (expense), net, primarily Allowance for other funds used during construction.

Note 21: Unaudited Quarterly Data

Presented in the tables below are supplemental, unaudited, consolidated, quarterly financial data for each of the four quarters in the years ended December 31, 2024 and 2023, respectively. The operating results for any quarter are not indicative of results that may be expected for a full year or any future periods.

	2024			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Operating revenues	$1,011	$1,149	$1,323	$1,201
Operating income	326	449	543	400
Net income attributable to common shareholders	185	277	350	239
Basic earnings per share:				
Net income attributable to common shareholders	$ 0.95	$ 1.42	$ 1.80	$ 1.22
Diluted earnings per share:				
Net income attributable to common shareholders	0.95	1.42	1.80	1.22

	2023			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Operating revenues	$ 938	$1,097	$1,167	$1,032
Operating income	295	432	478	299
Net income attributable to common shareholders	170	280	323	171
Basic earnings per share: (a)				
Net income attributable to common shareholders	$0.91	$ 1.44	$ 1.66	$ 0.88
Diluted earnings per share: (a)				
Net income attributable to common shareholders	0.91	1.44	1.66	0.88

(a) Amounts may not sum due to rounding.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as such term is defined in Rule 13a-15(e) and Rule 15d-15(e) under the Exchange Act as of the end of the period covered by this report.

Based on that evaluation, the Company's Chief Executive Officer and its Chief Financial Officer have concluded that, as of December 31, 2024, the Company's disclosure controls and procedures were effective at a reasonable level of assurance. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objective.

Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. The Company's internal control over financial reporting is a process designed by or under the supervision of the Company's Chief Executive Officer and its Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect its transactions and dispositions of its assets, (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with GAAP, and that the Company's receipts and expenditures are being made only in accordance with authorizations of its management and its directors, and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of its assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management, including the Company's Chief Executive Officer and its Chief Financial Officer, assessed the effectiveness of its internal control over financial reporting, as of December 31, 2024, using the criteria described in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on the Company's evaluation under the framework in *Internal Control—Integrated Framework (2013)*, its management concluded that its internal control over financial reporting was effective as of December 31, 2024.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2024, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report appearing in Item 8—Financial Statements and Supplementary Data of this Annual Report on Form 10-K.

Changes in Internal Control over Financial Reporting

The Company concluded that there have been no changes in internal control over financial reporting that occurred during its last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

Chief Executive Officer Succession

On February 19, 2025, reflecting the Company's existing and ongoing executive development and succession planning activities by management and the Board of Directors, Ms. Hardwick, the Company's Chief Executive Officer and a director, notified Karl F. Kurz, Board Chair, of her decision to retire as the Company's Chief Executive Officer and principal executive officer, effective as of the conclusion of the Company's 2025 Annual Meeting of Shareholders (the "2025 Annual Meeting"). In her notice, Ms. Hardwick also indicated her decision not to stand for re-election to the Board of Directors at the 2025 Annual Meeting. On February 19, 2025, the Board of Directors accepted Ms. Hardwick's notice and, upon the recommendation of the Nominating Committee, determined that she would not stand for re-election to the Board of Directors at the 2025 Annual Meeting. Ms. Hardwick's decision not to stand for re-election to the Board of Directors was not as a result of any disagreement with the Company or the Board of Directors on any matter relating to the Company's operations, policies or practices.

On February 19, 2025, to provide for the orderly succession of Ms. Hardwick's roles, the Board of Directors designated Mr. Griffith, the Company's President, to serve as the Company's President and Chief Executive Officer and as principal executive officer, effective as of the conclusion of the 2025 Annual Meeting, to hold office until the Company's 2026 Annual Meeting of Shareholders (the "2026 Annual Meeting") and until his successor has been elected and qualified, or until his earlier death, resignation or removal. Upon the recommendation of the Nominating Committee, the Board of Directors also nominated Mr. Griffith for election to the Board of Directors at the 2025 Annual Meeting, and he will be included among the director nominees of the Board of Directors to be named in the Company's 2025 Proxy Statement. If elected to the Board of Directors by the shareholders of the Company, Mr. Griffith would serve until the Company's 2026 Annual Meeting and until his successor has been elected and qualified, or until his earlier death, resignation or removal, and would not serve on any committee of the Board of Directors. See Item 1—Business—Information About Our Executive Officers, for more information about Mr. Griffith's business experience.

Other than existing compensatory arrangements between Mr. Griffith and the Company as described in the Company's 2024 Proxy Statement, in connection with his succession: (i) there are no arrangements or understandings between Mr. Griffith and any other person pursuant to which Mr. Griffith was designated or nominated to serve in his new roles, (ii) no material plan, contract or arrangement has been entered into with Mr. Griffith, and no such plan, contract or arrangement with Mr. Griffith has been materially amended, and (iii) no grant of any award to Mr. Griffith or modification of an existing award has been made. Mr. Griffith does not have any family relationship with any director or other executive officer of the Company, or any person nominated or chosen by the Company to become a director or executive officer, and does not have any direct or indirect material interest in any transaction in which the Company is or is to be a participant and which would require reporting under Item 404(a) of Regulation S-K.

In connection with Ms. Hardwick's retirement, the ED&CC recommended, based on the advice of its independent compensation consultant, and the independent members of the Board of Directors approved, in

addition to Ms. Hardwick's customary executive compensation for 2025 (which was consistent with her executive compensation for 2024), a discretionary cash payment to Ms. Hardwick of $800,000, less all applicable withholdings and deductions, in recognition of her outstanding service and performance in the role as Chief Executive Officer.

Board of Directors Committee Changes

As part of its annual 2025 committee review process and to appropriately distribute director responsibilities, on February 19, 2025, the Board of Directors, upon the recommendation of the Nominating Committee, appointed director Stuart M. McGuigan to serve on the ED&CC and the SETO Committee, and determined that director Patricia L. Kampling will no longer serve on the SETO Committee, each of which actions took effect immediately.

Adoption or Termination of Rule 10b5-1 Plans and Non-Rule 10b5-1 Trading Arrangements

During the three months ended December 31, 2024, none of the Company's directors or "officers" (as such term is defined in Rule 16a-1(f) promulgated under the Exchange Act) adopted or terminated (i) any contract, instruction or written plan for the purchase or sale of the Company's securities, intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) promulgated under the Exchange Act or (ii) any "non-Rule 10b5-1 trading arrangement" (as defined in Item 408(c) of Regulation S-K).

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item and not set forth below or in Item 1—Business—Information About Our Executive Officers of this Annual Report on Form 10-K, is incorporated by reference from the Company's Proxy Statement for the 2025 Annual Meeting of Shareholders, to be filed with the SEC within 120 days following the end of the fiscal year covered by this report, under the captions entitled "Board of Directors and Corporate Governance" and "Proposal 1—Election of Directors."

The Company has adopted a Code of Ethics, which applies to directors, officers and employees. The full text of the Code of Ethics is publicly available on the Company's website at *https://amwater.com*. The Company intends to post on its website any amendments to the Code of Ethics and any waivers of such provisions granted to certain principal officers.

The Company maintains an Insider Trading and Prohibited Transactions Policy and a Personal Securities Trading and Preclearance Practice thereunder, which govern the purchase, sale and other disposition of the Company's securities by the Company's directors, officers and employees, and their immediate family members, among other covered persons (which does not include the Company). The Company believes the policy and practice are reasonably designed to promote and enforce compliance by such covered persons with applicable insider trading laws, rules and regulations, and the listing standards of the NYSE related thereto. A copy of each has been filed as Exhibit 19.1 and Exhibit 19.2, respectively, to this Annual Report on Form 10-K, and the full text of the Insider Trading and Prohibited Transactions Policy is publicly available on the Company's website at *https://amwater.com*.

ITEM 11. EXECUTIVE COMPENSATION

Information required by this item is incorporated by reference in the Company's Proxy Statement for the 2025 Annual Meeting of Shareholders, under the captions entitled "Board of Directors and Corporate Governance—Board Role in Risk Oversight—Executive Development and Compensation Committee Role," "Proposal 1—Election of Directors—Director Compensation Table," "Compensation Discussion and Analysis," "Executive Compensation" (excluding the subsection "Pay Versus Performance"), "Compensation Committee Interlocks and Insider Participation" and "Compensation Committee Report" (with the latter report being furnished, and not filed, in this Annual Report on Form 10-K).

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by this item setting forth the security ownership of certain beneficial owners and management is incorporated by reference in the Company's Proxy Statement for the 2025 Annual Meeting of Shareholders, under the captions entitled "Certain Beneficial Ownership Matters—Security Ownership of Management," "Certain Beneficial Ownership Matters—Security Ownership of Certain Beneficial Owners" and "Equity Compensation Plan Information."

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by this item is incorporated by reference in the Company's Proxy Statement for the 2025 Annual Meeting of Shareholders, under the caption entitled "Board of Directors and Corporate Governance—Board Review of Related Person Transactions" and "Proposal 1—Election of Directors—Director Independence."

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information required by this item is incorporated by reference in the Company's Proxy Statement for the 2025 Annual Meeting of Shareholders, under the caption entitled "Proposal 3—Ratification of Appointment of Independent Registered Public Accounting Firm—Fees Paid to Independent Registered Public Accounting Firm" and "Proposal 3—Ratification of Appointment of Independent Registered Public Accounting Firm—Pre-Approval of Services Provided by Independent Registered Public Accounting Firm."

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents have been filed as a part of this Annual Report on Form 10-K:

1. The financial statements listed in the "Index to Consolidated Financial Statements" contained in Item 8—Financial Statements and Supplementary Data of this Form 10-K are hereby incorporated by reference in response to this Item 15(a).

2. Financial statement schedules have been omitted since they are either not required or are not applicable as the information is otherwise included in the financial statements or notes thereto.

3. Exhibits. The list of documents contained in "Exhibit Index" is provided in response to this Item 15(a). The warranties, representations and covenants contained in any of the agreements included or incorporated by reference herein or which appear as exhibits hereto should not be relied upon by buyers, sellers or holders of the Company's or its subsidiaries' securities and are not intended as warranties, representations or covenants to any individual or entity except as specifically set forth in such agreement.

The responses to Items 15(b) and (c) of Form 10-K are included above in response to Item 15(a).

ITEM 16. FORM 10-K SUMMARY

None.

EXHIBIT INDEX

Exhibit Number	Exhibit Description

Certain schedules and exhibits to this agreement have been omitted as permitted by rules or regulations of the SEC. The Company will furnish the omitted schedules and exhibits to the SEC upon request.

* Denotes a management contract or compensatory plan or arrangement.

Instruments defining the rights of holders of certain issues of long-term debt of the Company and certain of its consolidated subsidiaries have not been filed as exhibits to this report because the authorized principal amount of any one of such issues does not exceed 10% of the Company's consolidated total assets. The Company agrees to furnish a copy of each such instrument to the SEC upon request.

The Membership Interest Purchase Agreement filed as Exhibit 2.1 and the Secured Seller Note Agreement and related amendments thereto filed as Exhibit 10.20.1, Exhibit 10.20.2 and Exhibit 10.20.3 to this Annual Report on Form 10-K, have been included to provide investors and security holders with information regarding the terms of the respective agreements. The filing of these agreements is not intended to provide any other factual information about the parties thereto, or any of their respective subsidiaries or affiliates. The representations, warranties and covenants contained in the respective agreements (i) were made by the parties thereto only for purposes of that respective agreement and as of specific dates; (ii) were made solely for the benefit of the parties to the respective agreement; (iii) may be subject to limitations agreed upon by the contracting parties, including being qualified by confidential disclosures exchanged between the parties in connection with the execution of the respective agreement (such disclosures include information that has been included in public disclosures, as well as additional non-public information); (iv) may have been made for the purposes of allocating contractual risk between the parties to the respective agreements instead of establishing these matters as facts; and (v) may be subject to standards of materiality applicable to the contracting parties to the respective agreements that differ from those applicable to investors.

Investors should not rely on the representations, warranties and covenants or any descriptions thereof as characterizations of the actual state of facts or condition of the parties to the respective agreements thereto, or any of their respective subsidiaries or affiliates. Additionally, the representations, warranties, covenants, conditions and other terms of the respective agreements may be subject to subsequent waiver or modification. Moreover, information concerning the subject matter of the representations, warranties and covenants may change after the date of the respective agreement, which subsequent information may or may not be fully reflected in the Company's public disclosures. The respective agreements should not be read alone, but should instead be read in conjunction with the other information regarding the Company that is or will be contained in, or incorporated by reference into, the reports and other documents that are filed by the Company with the SEC.

SIGNATURES

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, M. Susan Hardwick, certify that:

1. I have reviewed this annual report on Form 10-K of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

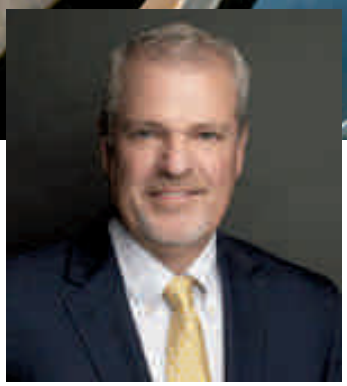
AMERICAN WATER

WE KEEP LIFE FLOWING®

2025 Annual Report



TO OUR SHAREHOLDERS,

As Board Chair of American Water, I am pleased to report that American Water has once again successfully executed on its strategic plan through disciplined operations, prudent capital deployment and effective regulatory execution. American Water's 2025 financial and operational performance demonstrates that it is advancing strategically and is well-positioned for future growth.

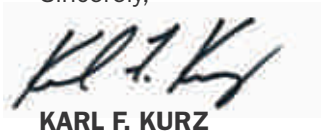
For the year ended December 31, 2025, adjusted earnings per share (EPS) growth and dividend growth exceeded 8 percent, which aligns with the long-term compounded annual growth target of 7-9 percent for both.

Reflecting this strong and consistent performance, the Board authorized another dividend increase in 2025—the 17th consecutive annual increase. Over the last five years, dividends have grown at a compounded annual rate of 8.6 percent.

Additionally, your votes rang loud and clear at the Special Shareholders Meeting on February 10, 2026, where you overwhelmingly approved American Water's merger-related proposals. We are grateful for your support and confidence, as your endorsement paves the way for American Water's successful future and its ability to deliver greater value in the long-term to our shareholders, customers and communities.

These positive outcomes illustrate the commitment and adherence to company values and sound execution of our business strategy by our dedicated employees. The American Water Board of Directors would like to thank you, our shareholders, for your continued trust and support. Please plan to join us for the virtual Annual Meeting of Shareholders at 10:00 a.m. Eastern Time, on Wednesday, May 13, 2026.

Sincerely,



KARL F. KURZ
Board Chair

DEAR SHAREHOLDERS,

American Water delivered strong financial and operational performance in 2025, reflecting the dedication of our team and a keen focus on our customers and communities in which we serve. I am pleased to report that we achieved these results across many financial and operational metrics, including in the areas of safety, water quality and earnings growth. Our steadfast commitment to serving our customers and supporting our communities is evident as we continue to deliver safe, clean, reliable and affordable water and wastewater services to approximately 14 million people across the United States.

In 2025, we invested $3.2 billion in capital for our customers. Through acquisitions and organic growth, we added nearly 40,000 customer connections to our regulated operations, and on average we kept residential water bills well under 1 percent of median household income across our footprint.

Looking forward, we plan to invest between $46 billion and $48 billion over the next decade in projects to better serve our customers, including infrastructure renewal, water quality, resiliency, technology, and water and wastewater system acquisitions. These investments aim to strengthen our systems, support sustainable growth, and help ensure that we continue to set the industry standard for reliability and service. Our focus on infrastructure is not just about pipes and plants — it is about building the foundation for healthy communities and economic prosperity across our service territories for generations to come.

Central to our growth strategy is the pursuit of opportunities that create lasting value. In 2025, we made significant progress through the announcement of meaningful water and wastewater system acquisition agreements, including the Nexus Water Group acquisition announced in May 2025 for nearly 47,000 customers. Our acquisition platform, which is key driver of our customer growth, continuously strengthens American Water's position as the leading regulated water and wastewater utility in the United States.

Your overwhelming approval in February 2026 of the share issuance for our proposed merger with Essential Utilities underscores your confidence in our long-term growth strategy. This combination would bring together two industry leaders, resulting in a company that will serve 4.7 million water and wastewater connections across 17 states and on 18 military installations, with a combined water and wastewater rate base

of over $29 billion. The merger will increase our scale and geographic diversity, positioning us for continued investment in critical infrastructure and sustainable growth. American Water anticipates finalizing the merger by the first quarter of 2027.

In closing, American Water continues to operate at the highest standards. Operational, capital and regulatory execution remains the foundation of our strategy, and our teams across the country remain focused on delivering superior service every day.

The future of American Water is bright. In 2026, we will integrate new systems with care, invest in our people and communities, and pursue innovative solutions to meet the nation's water and wastewater challenges with reliability, affordability and resilience.

Thank you for your unwavering support throughout 2025. I look forward to our achievements in 2026 as we shape a prosperous future for American Water and its stakeholders.

Sincerely,

JOHN C. GRIFFITH
President and Chief Executive Officer

Stock Market
Common stock of American Water Works Company, Inc. is traded on the New York Stock Exchange (NYSE) under the symbol AWK.

Annual Meeting
The 2026 annual meeting of shareholders is scheduled for 10:00 a.m. ET on Wednesday, May 13, 2026, to be held virtually (and not at a physical location). All holders of our outstanding common stock at the close of business on March 17, 2026, are entitled to notice of, and to vote at, the meeting. Notice of the meeting and proxy materials will be distributed to shareholders and accessible to the public on our Investor Relations page at https://ir.amwater.com. Management encourages all investors to have their votes counted at the annual meeting.

Executive Certifications
American Water has included as exhibits to its 2025 Annual Report on Form 10-K filed with the Securities and Exchange Commission certifications of the chief executive officer and chief financial officer of the company regarding the company's public disclosures contained therein. The company also provides annually to the NYSE a certificate of the CEO certifying that, among other things, it is not aware of any violation by the company of NYSE corporate listing standards.

Dividends
Dividends paid on the company's common stock in 2025 were:

March 4, 2025	$0.7650
June 3, 2025	$0.8275
September 3, 2025	$0.8275
December 2, 2025	$0.8275

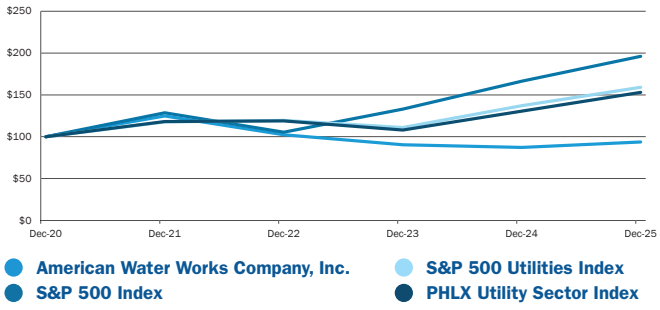
Stock Performance Graph
This year, the stock performance graph reflects the Company's decision to replace the PHLX Utility Sector Index with the Standard & Poor's 500 Utilities Index as its peer industry index. The Company believes the Standard & Poor's 500 Utilities Index provides a more representative comparison between the Company and its peer industry, and thus this index reflects better alignment with how institutional investors identify the Company's peers. Beginning next year, the stock performance graph will no longer include the PHLX Utility Sector Index.

The graph below compares the cumulative total return on American Water's common stock with the cumulative total return of the Standard & Poor's 500 Index, Standard & Poor's 500 Utilities Index and the PHLX Utility Sector Index from December 31, 2020, through December 31, 2025. The comparison assumes $100 was invested on December 31, 2020, and that dividends were reinvested.

The Company has successfully executed on its financial and operating plans the last several years, including meeting or exceeding its EPS guidance and its dividend growth target. The Company believes that its relative TSR performance in 2025 and for the five years ended in 2025 was diminished due to the combination of rising interest rates and the shifting of investments from water utilities to other investment options that have data center-driven growth expectations, including electric and gas utilities.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN*

Among American Water Works Company, Inc., the S&P 500 Index, the S&P 500 Utilities Index, and the PHLX Utility Sector Index



*$100 invested in each security on 12/31/2020, assumes reinvestment of dividends. Fiscal year ending December 31.

AMERICAN WATER WORKS COMPANY, INC.

(Exact name of registrant as specified in its charter)

Delaware	**51-0063696**
(State or other jurisdiction of incorporation or organization)	**(I.R.S. Employer Identification No.)**

1 Water Street, Camden, NJ 08102-1658
(Address of principal executive offices) (Zip Code)

(856) 955-4001
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol	Name of each exchange on which registered
Common stock, par value $0.01 per share	**AWK**	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒	Accelerated filer ☐
Non-accelerated filer ☐	Smaller reporting company ☐
	Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter. Common Stock, $0.01 par value—$23,779,400,000 as of June 30, 2025 (solely for purposes of calculating this aggregate market value, American Water has defined its affiliates to include (i) those persons who were, as of June 30, 2025, its executive officers, directors or known beneficial owners of more than 10% of its common stock, and (ii) such other persons who were deemed, as of June 30, 2025, to be controlled by, or under common control with, American Water or any such persons in clause (i) above).

Indicate the number of shares outstanding of each of the registrant's classes of common stock as of the latest practicable date: Common Stock, $0.01 par value per share—195,208,666 shares as of February 9, 2026.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the American Water Works Company, Inc. definitive proxy statement for the 2026 Annual Meeting of Shareholders to be filed with the Securities and Exchange Commission within 120 days after December 31, 2025 are incorporated by reference into Part III of this report.

FORWARD-LOOKING STATEMENTS

Statements included in Item 1—Business, Item 1A—Risk Factors, and Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations, and in other sections of this Annual Report on Form 10-K, or incorporated by reference therein, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the Private Securities Litigation Reform Act of 1995. In some cases, these forward-looking statements can be identified by words with prospective meanings such as "intend," "plan," "estimate," "believe," "anticipate," "expect," "predict," "project," "propose," "assume," "forecast," "likely," "uncertain," "outlook," "future," "pending," "goal," "objective," "potential," "continue," "seek to," "may," "can," "should," "will" and "could" or the negative of such terms or other variations or similar expressions. Forward-looking statements may relate to, among other things: the Company's future financial performance, liquidity and cash flows; the timing and amount of rate and revenue adjustments, including through general rate case filings, filings for infrastructure surcharges and other governmental agency authorizations and proceedings, and filings to address regulatory lag; the Company's ability to execute its current and long-term business, operational, capital expenditures and growth plans and strategies; the timing and outcome of pending or future acquisition activity (including, without limitation, the merger agreement with Essential Utilities, Inc. ("Essential") and the proposed acquisition of systems owned indirectly by Nexus Water Group, Inc.), and the ability to achieve organic customer growth; the ability of the Company's California subsidiary to obtain adequate alternative water supplies in lieu of diversions from the Carmel River; the amount, allocation and timing of projected capital expenditures and related funding requirements; the Company's ability to repay or refinance debt; the future impacts of increased or increasing financing costs, inflation and interest rates; the Company's ability to finance current and projected operations, capital expenditure needs and growth initiatives by accessing the debt and equity capital markets and sources of short-term liquidity; the future settlement or settlements of the Forward Sale Agreements described herein, adjustments to the forward sale price thereunder, and the amount of and the intended use of net proceeds from any such future settlement or settlements; the outcome and impact on the Company of governmental and regulatory investigations, class action lawsuits, and other litigation and legal proceedings, and related potential fines, penalties and other sanctions; the ability to meet or exceed the Company's stated environmental and sustainability goals, including its greenhouse gas ("GHG") emission reduction, water delivery efficiency and water system resiliency goals; the ability to complete, and the timing and efficacy of, the design, development, implementation and improvement of technology and other strategic initiatives; the Company's ability to comply with new and changing environmental regulations; the ability to capitalize on existing or future utility privatization opportunities; trends in the water and wastewater industries in which the Company operates, including macro trends with respect to the Company's efforts and projects related to customer, technology and work efficiency and execution; regulatory, legislative, tax policy or legal developments; and impacts that future significant tax legislation, and the imposition, utilization or change in various economic tariffs (or any attempt or effort to do so), may have on the Company and on its business, results of operations, cash flows and liquidity.

Forward-looking statements are predictions based on the Company's current expectations and assumptions regarding future events. They are not guarantees or assurances of any outcomes, financial results, levels of activity, performance or achievements, and readers are cautioned not to place undue reliance upon them. These forward-looking statements are subject to a number of estimates, assumptions, known and unknown risks, uncertainties and other factors. The Company's actual results may vary materially from those discussed in the forward-looking statements included herein as a result of the factors discussed under Item 1A—Risk Factors, and the following important factors:

- the decisions of governmental and regulatory bodies, including decisions to raise or lower customer rates;
- the timeliness and outcome of regulatory commissions' and other authorities' actions concerning rates, capital structure, authorized return on equity, capital investment, system acquisitions and dispositions, taxes, permitting, water supply and management, and other decisions;

- changes in customer demand for, and patterns of use of, water and energy, such as may result from conservation efforts, or otherwise;
- limitations on the availability of the Company's water supplies or sources of water, or restrictions on its use thereof, resulting from allocation rights, governmental or regulatory requirements and restrictions, drought, overuse or other factors;
- a loss of one or more large industrial or commercial customers due to adverse economic conditions, or other factors;
- present and future proposed changes in laws, governmental regulations and policies, including with respect to the environment (such as, for example, potential improvements to existing Federal regulations with respect to lead and copper service lines and galvanized steel pipe), health and safety, data and consumer privacy, security and protection, water quality and water quality accountability, contaminants of emerging concern (including without limitation per- and polyfluoroalkyl substances (collectively, "PFAS")), public utility and tax regulations and policies, and impacts resulting from U.S., state and local elections and changes in federal, state and local executive administrations;
- the Company's ability to collect, distribute, use, secure and store consumer data in compliance with current or future governmental laws, regulations and policies with respect to data and consumer privacy, security and protection;
- weather conditions and events, climate variability patterns, and natural disasters, including drought or abnormally high rainfall, prolonged and abnormal ice or freezing conditions, strong winds, coastal and intercoastal flooding, pandemics and epidemics, earthquakes, landslides, hurricanes, tornadoes, wildfires, electrical storms, sinkholes and solar flares;
- the outcome of litigation and similar governmental and regulatory proceedings, investigations or actions;
- the risks associated with the Company's aging infrastructure, and its ability to appropriately improve the resiliency of or maintain, update, redesign and/or replace, current or future infrastructure and systems, including its technology and other assets, and manage the expansion of its businesses;
- exposure or infiltration of the Company's technology and critical infrastructure systems, including the disclosure of sensitive, personal or confidential information contained therein, through physical or cyber attacks or other means, and impacts from required or voluntary public and other disclosures, as well as civil class action and other litigation or legal, regulatory or administrative proceedings, related thereto;
- the Company's ability to obtain permits and other approvals for projects and construction, update, redesign and/or replacement of various water and wastewater facilities;
- changes in the Company's capital requirements;
- the Company's ability to control operating expenses and to achieve operating efficiencies, and the Company's ability to create, maintain and promote initiatives and programs that support the affordability of the Company's regulated utility services;
- the intentional or unintentional actions of a third party, including contamination of the Company's water supplies or the water provided to its customers;
- the Company's ability to obtain and have delivered adequate and cost-effective supplies of pipe, equipment (including personal protective equipment), chemicals, power and other fuel, water and other raw materials, and to address or mitigate supply chain constraints that may result in delays or shortages in, as well as increased costs of, supplies, products and materials that are critical to or used in the Company's business operations;

- the Company's ability to successfully meet its operational growth projections, either individually or in the aggregate, and capitalize on growth opportunities, including, among other things, with respect to:
    - acquiring, closing and successfully integrating regulated operations, including without limitation the Company's ability to (i) obtain all required regulatory and other consents and approvals for such acquisitions, (ii) prevail in litigation or other challenges related to such acquisitions, and (iii) recover in rates the fair value of assets of the acquired regulated operations;
    - the Company's Military Services Group ("MSG") entering into new military installation contracts, price redeterminations, and other agreements and contracts, with the U.S. government; and
    - realizing anticipated benefits and synergies from new acquisitions;
- in addition to the foregoing, various risks and other uncertainties associated with the Company's merger agreement with Essential and the related proposed merger, including:
    - a fixed exchange ratio that will not adjust or account for fluctuations in the Company's or Essential's stock price;
    - limitations on the parties' ability to pursue alternatives to the proposed merger;
    - an event, change or other circumstance that could give rise to the termination of the merger agreement;
    - a delay in the timing to consummate the proposed merger;
    - each party's ability to obtain required governmental and regulatory approvals required for the proposed merger (and/or that such approvals may result in the imposition of burdensome or commercially undesirable conditions, including required dispositions, that could adversely affect the combined company or the expected benefits of the proposed merger);
    - financial impacts of the proposed merger on the Company and the combined company's earnings, earnings per share, financial condition, results of operations, cash flows and share price, and any related accounting impacts;
    - any impact of the proposed merger on the Company's and the combined company's ability to declare and pay quarterly dividends on its common stock;
    - the risk of litigation related to the proposed merger;
    - changes in the parties' key management and personnel;
    - the amount and nature of incurred transaction costs associated with the proposed merger; and
    - reduced ownership and voting interests for the Company's and Essential's shareholders upon completion of the proposed merger;
- in addition to the foregoing, various risks and other uncertainties associated with the agreement to acquire certain water and wastewater systems from a subsidiary of Nexus Water Group, Inc., including:
    - the final amount of the rate base to be acquired, and the amount of post-closing adjustments to the purchase price, if any, as contemplated by the acquisition agreement;
    - the various impacts and effects of (i) compliance, or attempted compliance, with the terms and conditions of the acquisition agreement, and/or (ii) the completion of, or actions taken by the Company to complete, the acquisition, on the Company's operations, strategy, guidance, expectations and plans with respect to its Regulated Businesses (considered individually or together as a whole), its current or future capital expenditures, its current and future debt and equity capital needs, dividends, earnings (including earnings per share), growth, future regulatory outcomes, expectations with respect to rate base growth, and other financial and operational goals, plans, estimates and projections; and

- any requirement by the Company to pay a termination fee in the event the closing does not occur;

- risks and uncertainties following the completion of the sale of the Company's Homeowner Services Group ("HOS"), including the ability of the Company to redeploy successfully and timely the net proceeds of this transaction into the Company's Regulated Businesses;
- risks and uncertainties associated with contracting with the U.S. government, including ongoing compliance with applicable government procurement, security and cybersecurity regulations;
- cost overruns relating to improvements in or the expansion of the Company's operations;
- the Company's ability to successfully develop and implement new technologies and to protect related intellectual property;
- the Company's ability to maintain safe work sites;
- the Company's exposure to liabilities related to environmental laws and regulations, including those enacted or adopted and under consideration, and the substances related thereto, including without limitation copper, lead and galvanized steel, PFAS and other contaminants of emerging concern, and similar matters resulting from, among other things, water and wastewater service provided to customers;
- the ability of energy providers, state governments and other third parties to achieve or fulfill their GHG emission reduction goals, including without limitation through stated renewable portfolio standards and carbon transition plans;
- with respect to any of the Forward Sale Agreements, as described herein: (i) the inability of the forward purchasers (or their affiliates) to perform their obligations thereunder, (ii) the timing and method of any settlement thereof, (iii) the amount and intended use of proceeds that may be received by the Company from any such settlement, and (iv) the timing and amount of any common stock dilution resulting therefrom;
- changes in general economic, political, business and financial market conditions;
- access to sufficient debt and/or equity capital on satisfactory terms and as needed to support operations and capital expenditures;
- fluctuations in inflation or interest rates, and the Company's ability to address or mitigate the impacts thereof;
- the ability to comply with affirmative or negative covenants in the current or future indebtedness of the Company or any of its subsidiaries, or the issuance of new or modified credit ratings or outlooks by credit rating agencies with respect to the Company or any of its subsidiaries (or any current or future indebtedness thereof), which could increase financing costs or funding requirements and affect the Company's or its subsidiaries' ability to issue, repay or redeem debt, pay dividends or make distributions;
- fluctuations in the value of, or assumptions and estimates related to, its benefit plan assets and liabilities, including with respect to its pension and other post-retirement benefit plans, that could increase expenses and plan funding requirements;
- changes in federal or state general, income and other tax laws, and the imposition, utilization or change in economic tariffs (or any attempt or effort to do so), including (i) future significant tax legislation or regulations (including without limitation impacts related to the Corporate Alternative Minimum Tax ("CAMT")), and (ii) the availability of, or the Company's compliance with, the terms of applicable tax credits and tax abatement programs;
- migration of customers into or out of the Company's service territories and changes in water and energy consumption resulting therefrom;

- the use by municipalities of the power of eminent domain or other authority to condemn the systems of one or more of the Company's utility subsidiaries, including without limitation litigation and other proceedings with respect to the water system assets of the Company's California subsidiary ("Cal Am") located in Monterey, California (the "Monterey system assets"), or the assertion by private landowners of similar rights against such utility subsidiaries;
- any difficulty or inability to obtain insurance for the Company, its inability to obtain insurance at acceptable rates and on acceptable terms and conditions, or its inability to obtain reimbursement under existing or future insurance programs and coverages for any losses sustained;
- the incurrence of impairment charges, changes in fair value and other adjustments related to the Company's goodwill or the value of its other assets;
- labor actions, including work stoppages and strikes;
- the Company's ability to retain and attract highly qualified and skilled employees and talent;
- civil disturbances or unrest, or terrorist threats or acts, or public apprehension about future disturbances, unrest, or terrorist threats or acts; and
- the impact of new, and changes to existing, accounting standards.

These forward-looking statements are qualified by, and should be read together with, the risks and uncertainties set forth above and the risk factors included in Item 1A—Risk Factors and other statements contained in this Annual Report on Form 10-K, and readers should refer to such risks, uncertainties and risk factors in evaluating such forward-looking statements. Any forward-looking statements the Company makes shall speak only as of the date this Annual Report on Form 10-K was filed with the U.S. Securities and Exchange Commission ("SEC"). Except as required by the federal securities laws, the Company does not have any obligation, and it specifically disclaims any undertaking or intention, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or otherwise. New factors emerge from time to time, and it is not possible for the Company to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on the Company's businesses, either viewed independently or together, or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

PART I

ITEM 1. BUSINESS

The Company

With a history dating back to 1886, American Water is the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. A holding company originally incorporated in Delaware in 1936, the Company employs approximately 7,000 professionals who provide drinking water, wastewater and other related services to approximately 14 million people in 24 states. The Company conducts the majority of its business through regulated utilities that provide water and wastewater services, collectively presented as one reportable segment, referred to as the "Regulated Businesses." The Company also operates other businesses that provide water and wastewater services to the U.S. government on military installations, as well as municipalities. Individually, these other businesses do not meet the criteria of a reportable segment in accordance with generally accepted accounting principles in the United States ("GAAP"), and are collectively presented throughout this Annual Report on Form 10-K within "Other," which is consistent with how management assesses the results of these businesses.

On October 26, 2025, parent company entered into an Agreement and Plan of Merger (the "Essential Merger Agreement") with Essential to combine the two companies in a stock-for-stock transaction. The Essential Merger Agreement provides that, upon the completion of the proposed merger, Essential's shareholders will receive 0.305 shares of parent company common stock in exchange for each share of Essential common stock eligible for exchange in the merger. Upon completion of the proposed merger, Essential will be a wholly owned subsidiary of parent company, and parent company will retain its existing name and remain headquartered in Camden, New Jersey. The completion of the proposed merger is subject to certain customary conditions. The Company currently estimates that the closing of the proposed merger will occur by the end of the first quarter of 2027. See Note 5—Mergers, Acquisitions and Divestitures—Agreement and Plan of Merger with Essential Utilities, Inc., in the Notes to Consolidated Financial Statements for additional information.

Throughout this Annual Report on Form 10-K, unless the context otherwise requires, references to "we," "us," "our," the "Company," and "American Water" mean American Water Works Company, Inc. and its subsidiaries as of the date hereof, taken together as a whole. References to "parent company" mean American Water Works Company, Inc., without its subsidiaries.

Regulated Businesses

The Company's primary business involves the ownership of utilities that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers. The Company's utilities operate in 14 states in the United States, with 3.6 million active customers in its water and wastewater networks. Services provided by the Company's utilities are subject to regulation by multiple state utility commissions or other entities engaged in utility regulation, collectively referred to as public utility commissions ("PUCs"). Federal, state and local governments also regulate environmental, health and safety, and water quality and water accountability matters. The Company reports the results of the services provided by its utilities in the Regulated Businesses segment. Operating revenues for the Regulated Businesses were $4,723 million for 2025, $4,296 million for 2024 and $3,920 million for 2023, accounting for 92%, 92% and 93%, respectively, of the Company's total operating revenues for the same periods.

Presented in the table below is a geographic summary of the Regulated Businesses' operating revenues and the number of customers the Company serves, by type of service, for and as of the year ended December 31, 2025:

	Operating Revenues (in millions)					Number of Customers (in thousands)			
	Water	Wastewater	Other (a)	Total	% of Total	Water	Wastewater	Total	% of Total
Pennsylvania	$ 931	$ 195	$ 14	$ 1,140	24.1%	697	117	814	22.8%
New Jersey	1,024	67	14	1,105	23.4%	680	70	750	21.0%
Missouri	548	23	4	575	12.2%	486	24	510	14.3%
Illinois	435	95	18	548	11.6%	299	77	376	10.5%
California	364	5	1	370	7.8%	193	3	196	5.5%
Total—Top Five States (b)	3,302	385	51	3,738	79.1%	2,355	291	2,646	74.1%
Other (c)	931	37	17	985	20.9%	887	39	926	25.9%
Total Regulated Businesses	$ 4,233	$ 422	$ 68	$ 4,723	100.0%	3,242	330	3,572	100.0%

(a) Includes other operating revenues consisting primarily of alternative revenue programs, miscellaneous utility charges, fees and rents. Customers associated with other operating revenues are not applicable.

(b) The Company's "Top Five States" are determined based upon operating revenues.

(c) Includes the Company's utility operations in the following states: Georgia, Hawaii, Indiana, Iowa, Kentucky, Maryland, Tennessee, Virginia and West Virginia and other revenue attributable collectively to the Regulated Businesses.

Customers

The Company's Regulated Businesses have a large and geographically diverse customer base. A customer is defined as a person, business, municipality or any other entity that purchases the Company's water or wastewater services as of the last business day of a reporting period. One single customer may purchase the Company's services for use by multiple individuals or businesses. Examples of these customers are homes, apartment complexes, businesses and governmental entities.

The vast majority of the Company's regulated water customers are metered, which allows the Company to measure and bill for its customers' water usage, typically on a monthly basis. The Company employs a variety of methods of customer meter reading to monitor consumption. These methods range from meters with mechanical registers where consumption is manually recorded by meter readers, to meters with electronic registers capable of transmitting consumption data to proximity devices or via radio frequency to mobile or fixed network data collectors. The Company's wastewater customers are billed either a flat rate or based upon their water consumption.

Residential customers make up a substantial portion of the Company's customer base in all of the states in which it operates. The Company also serves (i) commercial customers, such as food and beverage providers, commercial property developers and proprietors, and energy suppliers, (ii) fire service customers, where the Company supplies water through its distribution systems to public fire hydrants for firefighting purposes and to private fire customers for use in fire suppression systems in office buildings and other facilities, (iii) industrial customers, such as large-scale manufacturers, mining and production operations, (iv) public authorities, such as government buildings and other public sector facilities, including schools and universities, and (v) other utilities and community water and wastewater systems in the form of bulk contracts for the supply of water or the treatment of wastewater for their own customers.

Presented in the table below is a breakout of the Company's Regulated Businesses' operating revenue by class of customer, for the years ended December 31, 2025, 2024 and 2023:

	2025		2024		2023	
(In millions)	Revenue	Percentage of Revenue	Revenue	Percentage of Revenue	Revenue	Percentage of Revenue
Water Services:						
Residential	$ 2,557	54%	$ 2,349	55%	$ 2,143	55%
Commercial	981	21%	885	21%	798	20%
Fire service	189	4%	164	4%	158	4%
Industrial	195	4%	184	4%	167	4%
Public and other water (a)	311	7%	291	7%	274	7%
Wastewater	422	9%	363	8%	327	8%
Other (b)	68	1%	60	1%	53	2%
Total	$ 4,723	100%	$ 4,296	100%	$ 3,920	100%

(a) Includes water revenues from public authorities and other utilities and community water systems under bulk contracts.
(b) Includes other operating revenues consisting primarily of alternative revenue programs, miscellaneous utility charges, fees and rents.

Presented in the table below is the number of water and wastewater customers the Company's Regulated Businesses served by class of customer as of December 31, 2025, 2024 and 2023, which represents approximately 13 million people served as of December 31, 2025:

	2025		2024		2023	
(In thousands)	Water	Wastewater	Water	Wastewater	Water	Wastewater
Residential	2,942	307	2,920	307	2,893	279
Commercial	224	21	222	21	221	18
Fire service	55	—	53	—	52	—
Industrial	4	—	4	—	4	—
Public and other (a)	17	2	18	1	18	1
Total	3,242	330	3,217	329	3,188	298

(a) Includes public authorities and other utilities and community water and wastewater systems under bulk contracts. Bulk contracts, which are accounted for as a single customer in the table above, generally result in service to multiple customers.

Customer growth in the Company's Regulated Businesses is primarily from (i) adding new customers to its customer base through acquisitions of water and/or wastewater utility systems, (ii) population growth in its authorized service areas, and (iii) sale of water to other water utilities and community water systems.

Water Supply and Wastewater Services

The Company's Regulated Businesses generally own the physical assets used to store, pump, treat and deliver water to its customers and collect, treat, transport and recycle wastewater. Typically, the Company does not own the water. The water the Company treats and delivers is held in public trust and is allocated to the Company through contracts, permits and allocation rights granted by federal and state or multi-state agencies or through the ownership of water rights pursuant to local law. The Company is dependent on defined sources of water supply and obtains its water supply from surface water sources such as reservoirs, lakes, rivers and streams; from groundwater sources, such as wells and aquifers; and water purchased from third-party water suppliers. The level of water treatment the Company applies varies significantly depending upon the quality of the water source and any state requirements that are more restrictive than federal water quality standards. Surface water sources typically require significant treatment, while groundwater sources often require chemical treatment only.

Presented in the table below are the percentages of water supply by source type for the Company's Top Five States individually and the Regulated Businesses collectively for the year ended December 31, 2025:

	Surface Water	Ground Water	Purchased Water
Pennsylvania	91%	7%	2%
New Jersey	74%	22%	4%
Missouri	83%	16%	1%
Illinois	50%	38%	12%
California	—%	65%	35%
Regulated Businesses	70%	23%	7%

The Company's ability to meet the existing and future water demands of its customers depends on an adequate water supply. Drought, governmental restrictions, overuse of sources of water, the protection of threatened species or habitats, contamination or other factors may limit the availability of ground and surface water. The Company employs a variety of measures in an effort to obtain adequate sources of water supply, both in the short-term and over the long-term. The geographic diversity of the Company's service areas may mitigate some of the economic effects on the water supply associated with weather extremes the Company might encounter in any particular service territory. For example, in any given summer, some areas may experience drier than average weather, which may reduce the amount of source water available, while other areas the Company serves may experience wetter than average weather.

The Company evaluates quality, quantity, growth needs and alternate sources of water supply as well as transmission and distribution capacity to provide water service to its customers. Water supply is seasonal in nature and weather conditions can have a pronounced effect on supply. To support the maintenance of adequate water supplies, the Company uses long-term planning processes and maintains contingency plans to minimize the potential impact on service caused by climate variability and a wide range of weather fluctuations. The Company reviews current climate science and global models related to temperature, precipitation and sea level rise on an ongoing basis. Where actionable forecasts are available, the Company will use this information in its comprehensive planning studies and asset management plans. These studies and plans, which are used by the Company to develop its asset management and system reliability strategies, assess the climate risk and resiliency of the Company's water and wastewater systems over short-, medium- and long-term time horizons, and include evaluations of the availability of water supplies and system capacity against a number of different factors, projections and estimates.

In connection with supply planning for most surface or groundwater sources, the Company employs models to determine safe yields under different rainfall and drought conditions. Surface and ground water levels are routinely monitored in an effort to predict and mitigate supply capacity deficits through demand management and additional supply development. In California, where the state has previously experienced multi-year droughts, the Company utilizes multiple water supply options including numerous ground water wells in multiple aquifers as well as various long-term purchase water agreements with regional water suppliers to optimize supplies while seeking resiliency during dry years. An example of the Company's use of long-term planning intended to ensure an adequate water supply is Cal Am's development and support of the Monterey Peninsula Water Supply Project (the "Water Supply Project") in California. The Water Supply Project includes the construction of a desalination plant, to be owned by Cal Am, and the construction of wells that would supply water to the desalination plant. In addition, the Water Supply Project also includes Cal Am's purchase of water from a groundwater replenishment project (the "GWR Project") between Monterey One Water (formerly known as the Monterey Regional Water Pollution Control Agency) and the Monterey Peninsula Water Management District (the "MPWMD"), as well as an expanded aquifer storage and recovery program. The Water Supply Project is intended, among other things, to fulfill obligations of Cal Am to eliminate unauthorized diversions from the Carmel River as required under orders of the California State Water Resources Control Board (the "SWRCB"). For more information, see Item 3—Legal Proceedings—Alternative Water Supply in Lieu of Carmel River Diversions and Note 16—Commitments and Contingencies—Contingencies—Alternative Water Supply in Lieu of Carmel River Diversions, in the Notes to the Consolidated Financial Statements.

Wastewater services involve the collection of wastewater from customers' premises through sewer lines. The wastewater is then transported through a sewer network to a treatment facility, where it is treated to meet required regulatory standards for wastewater before being returned to the environment. The solid waste by-product of the treatment process is disposed of or recycled in accordance with applicable standards and regulations.

Capital Investment

The Company plans to invest between $46 billion and $48 billion over the next 10 years for capital improvements, including acquisitions, to its Regulated Businesses' water and wastewater infrastructure, largely for pipe replacement and upgrading aging water and wastewater treatment facilities. The Company is proactively improving its pipe renewal rate from what was a 250-year replacement cycle in 2009 to a less than a 150-year replacement cycle on average over the last five years. The specific replacement rate varies by year depending on other high priority capital needs, but the Company anticipates it will reach better than a 100-year replacement rate within the next decade, which is generally viewed in the industry as a minimum benchmark for a long-term sustainable replacement rate. In addition, from 2026 to 2030, the Company's capital investment in treatment plants, storage tanks and other key, above-ground facilities is expected to increase, further seeking to address infrastructure renewal, resiliency, water quality, operational efficiency, technology and innovation, and emerging regulatory compliance needs. The Company continues to invest significantly in resiliency projects to address the impacts of climate and weather variability by hardening its assets.

Regulation and Rate Making

The operations of the Company's Regulated Businesses are generally subject to regulation by PUCs in the states in which they operate, with the primary responsibility of the PUCs being the promotion of the overall public interest by balancing the interest of customers and utility investors. Specific authority might differ from state to state, but in most states, PUCs review and approve rates charged to customers, accounting treatments, long-term financing applications and cost of capital, operation and maintenance ("O&M") expenses, capital expenditures, taxes, affiliated transactions and relationships, reorganizations, mergers and acquisitions, and dispositions, along with imposing certain penalties or granting certain incentives. Regulatory policies vary from state to state and can change over time. These policies will affect the timing, as well as the extent, of recovery of expenses and the realized return on invested capital.

Periodic changes in customer rates generally occur through the filing of a rate case by the utility with the PUC. The timing of rate case filings is typically determined by either periodic requirements in the regulatory jurisdiction or by the utility's need to increase its revenue requirement to recover capital investment costs, changes in operating revenues, operating costs or other market conditions. The Company attempts to minimize "regulatory lag," which is the time between the occurrence of an event that triggers a change in the utility's revenue requirement and the recognition in rates of that change.

The Company's Regulated Businesses support regulatory practices at the PUCs and state legislatures that mitigate the adverse impact of regulatory lag. Presented in the table below are examples of approved regulatory practices:

Regulatory Practices	Description	States Allowed
Infrastructure replacement surcharge mechanisms	Allows rates to change periodically, outside a general rate case proceeding, to reflect recovery of capital investments made to replace infrastructure necessary to sustain safe and reliable services for the Company's customers. These mechanisms typically involve periodic filings and reviews to ensure transparency.	IA, IL, IN, MO, NJ, PA, TN, VA, WV

Regulatory Practices	Description	States Allowed
Future test year	A "test year" is a period used for setting rates, and a future test year describes the first 12 months that new rates are proposed to be effective. The use of a future test year allows current or projected revenues, expenses and capital investments to be collected on a more timely basis.	CA, HI, IA, IL, IN, KY, MO, PA, TN, VA
Hybrid test year	A historical test year sets rates using data from a 12-month period that ends prior to a general rate case filing. A hybrid test year allows an update to historical data for "known and measurable" changes that occur subsequent to the historical test year.	MD, NJ, WV
Utility plant recovery mechanisms	Allows recovery of the full return on utility plant costs during the construction period, instead of capitalizing an allowance for funds used during construction ("AFUDC"). In addition, some states allow the utility to seek pre-approval of certain capital projects and associated costs. In this pre-approval process, the PUC may assess the prudency of such projects.	CA, IL, PA, TN, VA
Expense mechanisms	Allows changes in certain operating expenses, which may fluctuate based on conditions beyond the utility's control, to be recovered outside of a general rate case proceeding or deferred until the next general rate case proceeding.	CA, HI, IL, IN, MD, MO, NJ, PA, TN, VA
Revenue stability mechanisms	Adjusts rates periodically to ensure that a utility recovers the revenues authorized in its general rate case, regardless of sales volume, including recognition of declining sales resulting from reduced consumption, while providing an incentive for customers to use water more efficiently. In California, the ratemaking tool provides partial revenue recovery with a focus on promotion of conservation signals in the pricing structure.	CA, IL
Consolidated utility tariffs	Use of a unified rate structure for water systems owned and operated by a single utility, which may or may not be physically interconnected. The consolidated utility tariff pricing structure may be used fully or partially in a state, and is generally used to moderate the price impact of periodic fluctuations in local costs, while lowering administrative costs for customers. Pennsylvania and West Virginia also permit a blending of water and wastewater revenue requirements.	CA, IA, IL, IN, KY, MO, NJ, PA, VA, WV
Deferred accounting	A regulator's willingness to defer recognition of financial impacts when setting rates for utilities.	All

The Company pursues enhancements to these regulatory practices to facilitate efficient recovery of its costs and capital investments and to continue to provide safe, clean, reliable and affordable services to its customers. The ability to seek regulatory treatment using the regulatory practices described above does not guarantee that the PUCs will accept the Company's proposal in the context of a particular rate case, and these regulatory practices may reduce, but not eliminate, regulatory lag associated with traditional rate making processes. It is also the Company's strategy to expand the use of these mechanisms in areas where they may not currently apply and enhance certain mechanisms where they already exist.

Acquisitions and Strategic Growth

The U.S. water and wastewater industries include investor-owned systems as well as municipal systems that are owned and operated by local governments or governmental subdivisions. According to the U.S. Environmental Protection Agency ("EPA"), as of 2025, approximately 84% of the water market is served by municipal systems and, as of 2022, approximately 98% of the country's wastewater systems are government owned. The EPA also estimates, as of 2025, that there are over 50,000 community water systems and, as of 2022, over 16,000 community wastewater systems in the United States, with approximately 81% of the community water systems serving a population of approximately 3,000 or less.

A fundamental aspect of the Company's growth strategy is to pursue acquisitions of water and/or wastewater systems in geographic proximity to areas where the Company operates its Regulated Businesses, see Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations for additional information. The Company leverages its collective size and scale to achieve operational efficiencies, prioritize capital investments and utilize employee knowledge to manage acquired systems. Operational efficiencies and investment needs allow the Company to be successful in integrating and managing the systems acquired with its regulated service areas. The Company's Regulated Businesses current customer mix of 91% water and 9% wastewater also presents strategic opportunities for wastewater growth and consolidation, allowing the Company to add wastewater customers where it already serves water customers. The Company intends to continue to expand its regulated footprint geographically by acquiring water and wastewater systems in its existing markets and, if appropriate, pursuing acquisition opportunities in certain domestic markets where the Company does not currently operate its Regulated Businesses. Before entering new regulatory jurisdictions (states), the Company will evaluate the regulatory, legislative and business climates for the opportunity to achieve an appropriate rate of return on its investment while maintaining its high standards of services to customers. The Company will also evaluate whether there is a line of sight to grow to sufficient scale in a new regulated market so that it can attain efficiencies and promote customer affordability after entering a new domestic market. Increasingly stringent environmental, health and safety, cybersecurity and water quality and water accountability regulations, the amount of infrastructure in need of significant capital investment, financial challenges and industry legislation are several elements, among others, that may drive more municipalities to consider selling their water and wastewater assets.

Industry Legislation

American Water continues to advocate for constructive policies at the federal level that align with the Company's strategic priorities and would be beneficial to its customers. These include bi-partisan, bi-cameral legislation to establish a permanent, nationwide, low income water assistance program, given the expiration of the previous program in 2023; establishing liability exemptions under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA") for certain entities, notably passive receivers of hazardous substances, specifically related to PFAS (such as water and wastewater utilities); and granting investor-owned wastewater utilities the opportunity to access state revolving loan funds. Additional constructive legislative efforts include H.R. 2872, which would allow utilities to deduct repair costs from their adjusted financial statement income calculation for CAMT, and H.R. 2594, legislation to establish a Water Risk and Resilience Organization to develop cybersecurity requirements for water systems. Efforts to advance these legislative priorities will continue in 2026.

The Company's regulated subsidiaries in New Jersey, Indiana and Missouri have versions of water quality or safety accountability acts that require operational or safety and security standards for water and wastewater utilities serving a certain number of customers. In New Jersey, the law imposes requirements in areas such as asset management, water quality reporting, remediation of notices of violation, hydrant and valve maintenance and cybersecurity. In Indiana, the law requires water and wastewater utilities to conduct rate analyses, develop capital asset management plans and conduct cybersecurity and water loss audits. In Missouri, the act requires water and wastewater utilities to create cybersecurity, valve inspection and hydrant inspection programs.

The Company's regulated subsidiaries in California, Illinois, Indiana, Iowa, Kentucky, Maryland, Missouri, New Jersey, Pennsylvania, Tennessee, Virginia and West Virginia have access to utility valuation legislation and regulation for private sector investment in public sector water and wastewater systems. The Company supports full optionality for municipalities, including state legislation that enables the consolidation of the largely fragmented water and wastewater industries through third-party fair market valuations of purchased property. Fair market value assessment of water and wastewater systems is an alternative to the traditional depreciated original cost method of valuation, and allows the Company to offer municipalities a purchase price for their system assets that is reflective of the assets' fair market value, while providing the Company with increased opportunity to recover the purchase price over the life of the purchased system assets, subject to PUC approval.

Consolidated utility tariffs use a unified rate structure for systems owned and operated by a single utility, which may or may not be physically interconnected. Consolidated tariff pricing moderates the impact of periodic fluctuations in local costs and promotes a more universal water infrastructure investment in a jurisdiction. As a result, consolidated tariffs can make it easier to incorporate new systems into an existing utility, support economies of scale for even the smallest of systems and prioritize capital needs across the jurisdiction. Overall, the Company believes that consolidated tariffs bring cost-effective, high-quality services to a larger number of customers. Ten of the Company's regulated jurisdictions currently have some form of consolidated tariff pricing, including California, Illinois, Indiana, Iowa, Kentucky, Missouri, New Jersey, Pennsylvania, Virginia and West Virginia.

Seasonality

Customer demand for the Company's water service is affected by weather and tends to vary with temperature and amount and frequency of rainfall. Customer demand is generally greater during the warmer months, primarily due to increased outdoor water use, including irrigation systems. As such, the Company typically expects its operating revenues to be the highest in the third quarter of each year. Weather that is warmer and/or drier than average generally increases operating revenues, whereas, weather that is cooler and/or wetter than average generally suppresses customer water demand and can reduce water operating revenues. Two of the Company's jurisdictions, California and Illinois, have adopted revenue stability mechanisms which permit the Company to collect a portion or all of state PUC-authorized revenue for a given period that is not tied to the volume of water sold during that period, thereby lessening the impact of weather variability. See —Regulation and Rate Making for additional information regarding revenue stability mechanisms.

Affordability

As a water utility, the Company's water must be safe, clean, reliable and affordable. Through increased efficiency, conservation and affordability support programs and utility tariffs, on average across the enterprise, the Company achieves average residential bills that are at or below 1% of median household income. Succeeding in water affordability positively affects the health and safety of the Company's customers and contributes to the economic prosperity of the communities in which it operates.

The Company continues to advocate for federal and state customer affordability support and monitors the number of customers enrolled in its assistance programs to make sure that it is effectively responding to customer needs. In addition, the Company advocates for low income rate discount programs and rate design reform measures in state rate proceedings that will improve the affordability of service specifically for lower income customers.

Competition

The Company's Regulated Businesses generally do not face direct competition in their existing markets because (i) the Company operates in those markets pursuant to franchises, charters, certificates of public

convenience and necessity or similar authorizations (collectively, "CPCNs") issued by state PUCs or other authorities, and (ii) the high cost of constructing a new water and wastewater system in an existing market creates a significant barrier to market entry. However, the Company's Regulated Businesses face competition from governmental agencies, other investor-owned utilities, large industrial customers with the ability to provide their own water supply/treatment process and strategic buyers that are entering new markets and/or making strategic acquisitions. When pursuing acquisitions, the Company's largest investor-owned competitors, based on a comparison of operating revenues and population served, include Essential, American States Water Company and California Water Service Group. From time to time, the Company also faces competition from infrastructure funds, multi-utility companies and others, such as Algonquin Power and Utilities Corp. and Nexus Water Group.

Condemnation and Eminent Domain

All or portions of the Regulated Businesses' utility assets could be acquired by state, municipal or other government entities through one or more of the following methods: (i) eminent domain (also known as condemnation); (ii) the right of purchase given or reserved by a municipality or political subdivision when the original CPCN was granted; and (iii) the right of purchase given or reserved under the law of the state in which the utility subsidiary was incorporated or from which it received its CPCN. The acquisition consideration related to such a proceeding initiated by a local government may be determined consistent with applicable eminent domain law, or may be negotiated or fixed by appraisers as prescribed by the law of the state or the jurisdiction of the particular CPCN.

As such, the Regulated Businesses are periodically subject to condemnation proceedings in the ordinary course of business. For example, the Monterey system assets of Cal Am are the subject of a condemnation lawsuit filed by the MPWMD stemming from a November 2018 public ballot initiative. For more information on this matter, see Item 3—Legal Proceedings—Proposed Acquisition of Monterey System Assets — Potential Condemnation.

Furthermore, the law in certain jurisdictions in which the Regulated Businesses operate provides for eminent domain rights allowing private property owners to file a lawsuit to seek just compensation against a public utility, if a public utility's infrastructure has been determined to be a substantial cause of damage to that property. In these actions, the plaintiff would not have to prove that the public utility acted negligently. In California, for example, lawsuits have been filed in connection with large-scale natural events such as wildfires. Some of these lawsuits have included allegations that infrastructure of certain utilities triggered the natural event that resulted in damage to the property. In some cases, the PUC has allowed certain costs or losses incurred by the utility to be recovered from customers in rates, but in other cases such recovery in rates has been disallowed. Also, the utility may have obtained insurance that could respond to some or all of such losses, although the utility would be at risk for any losses not ultimately subject to rate or insurance recovery or losses that exceed the limits of such insurance.

Other

Other primarily includes the MSG business, which enters into long-term contracts with the U.S. government to provide water and wastewater services on military installations. Other also includes a contract with a municipal customer to operate and manage water and wastewater facilities and provide other related services. Other also includes corporate costs that are not allocated to the Company's Regulated Businesses, interest income related to the secured seller promissory note from the sale of HOS, income from assets not associated with the Regulated Businesses, eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment. The businesses included within Other are not subject to regulation by state PUCs and the services provided generally do not require significant capital investment by the Company. Operating revenues for Other were $417 million for 2025, $388 million for 2024 and $314 million for 2023, accounting for 8%, 8% and 7%, respectively, of the Company's total operating revenues for the same periods.

Military Services Group

MSG operates on 18 military installations under 50-year contracts with the U.S. government as part of its Utilities Privatization Program. The scope of these contracts generally includes the operation and maintenance of the installation's water and wastewater systems and a capital program focused on asset replacement and, in certain instances, systems expansion. The replacement of assets assumed when a contract is awarded to MSG is completed either through a discrete set of projects executed in the first five years of the contract or through the long-term recapitalization program performed over the life of the contract. Traditionally, both of these programs are funded from the contract fee. At times, new assets are required to support the installation's mission, and the construction of these assets is funded by the U.S. government as separate modifications or amendments to the contract. The capital for these assets historically has not been funded through the Company's debt or equity issuances; rather, the Company has used limited working capital for short-term needs under these contracts. The U.S. Army has a requirement that a bidder must offer financing in its proposal for these new capital projects under existing contracts, but the U.S. Army's implementation of this requirement on existing contracts has limited the need for such financing. However, recent U.S. Army, Air Force, and Navy Utilities Privatization solicitations have included requirements for the successful bidder to finance discrete initial capital projects over either a five- or ten-year period after project completion. Four of MSG's current contracts require such capital project financing, which the Company is currently addressing through internal sources of liquidity.

The contract price for three of MSG's contracts with the U.S. government is subject to redetermination two years after commencement of operations, and every three years thereafter. Price redetermination is a contract mechanism to periodically adjust the service fee in the next period, to reflect changes in contract obligations and anticipated market conditions. The remaining 15 contracts with the U.S. government are subject to annual price adjustments under a mechanism called "Economic Price Adjustment." All 18 contracts could be terminated, in whole or in part, prior to the end of the 50-year term for convenience of the U.S. government, or as a result of default or non-performance by the MSG subsidiary performing the contract. In either event, pursuant to termination provisions applicable to all of these contracts, MSG would be entitled to recover allowable costs that it may have incurred under the contract, plus the contract profit margin on incurred costs. MSG's backlog of revenue associated with its contracts with the U.S. government is approximately $7.4 billion, with an average remaining contract term of 37 years.

Competition

MSG faces competition primarily from American States Water Company.

Environmental, Health and Safety, Water Quality and Other Regulation

The Company's water and wastewater operations, including the services provided by its Regulated Businesses and MSG, are subject to extensive federal, state and local laws and regulations governing the protection of the environment, health and safety, the provision of water and wastewater services, particularly with respect to the quality of water the Company delivers to its customers, and the manner in which it collects, treats, discharges, recycles and disposes of wastewater. In the United States, these regulations are developed under federal legislation including the Safe Drinking Water Act, the Reduction of Lead in Drinking Water Act and the Clean Water Act, and under a variety of applicable state laws. Environmental, health and safety, and water quality regulations are complex and may vary from state to state in those instances where a state has adopted a standard that is more stringent than the federal standard. The Company is also subject to various federal, state, and local laws and regulations governing the storage of hazardous materials, the management and disposal of hazardous and solid wastes, discharges to air and water, the cleanup of contaminated sites, dam safety and other matters relating to the protection of the environment and health and safety. PUCs also set conditions and standards for the water and wastewater services the Company delivers.

The Company maintains an environmental program that includes responsible business practices focused on compliance with environmental laws and regulations and the effective use of natural resources, recognizing that

drinking water standards and wastewater requirements have generally, over time, increased in number and become increasingly more stringent. As newer or stricter standards are introduced, the Company's capital and operating costs needed to comply with them will likely increase. The Company incurs substantial costs associated with compliance with the environmental, health and safety, and water quality standards to which its operations are subject and the Company invests in technology solutions for enhanced detection and monitoring of water quality issues. The Company estimates that it will make capital expenditures of approximately $4.1 billion over the next five years, and approximately $788 million in 2026, to address water quality issues; most of which are focused on compliance with environmental laws and regulations. The Company believes that its operations are materially in compliance with, and in many cases surpass, minimum standards required by applicable environmental laws and regulations.

The Company's operations also involve the use, storage and disposal of hazardous substances and wastes. For example, the Company's water and wastewater treatment facilities store and use a variety of chemicals, including, for example, gaseous chlorine, that generate waste and require proper handling and disposal under applicable environmental requirements. The Company also could incur remedial costs in connection with any contamination relating to its operations or facilities or its off-site disposal of waste. CERCLA authorizes the EPA, and comparable state laws authorize state environmental authorities, to issue orders and bring enforcement actions to compel responsible parties to investigate and take remedial actions at any site that is determined to present an actual or potential threat to human health or the environment because of an actual or threatened release of one or more hazardous substances. Parties that generated or transported hazardous substances to such sites, as well as current and former owners and operators of such sites, may be deemed liable, without regard to fault, under CERCLA or comparable state laws. Although the Company is not aware of any material cleanup or decontamination obligations, the discovery of contamination or the imposition of such obligations in the future could result in additional costs to the Company. The Company's facilities and operations are also subject to requirements under the U.S. Occupational Safety and Health Act and inspections thereunder.

Safe Drinking Water Act

The Safe Drinking Water Act and related regulations establish national standards for drinking water quality. The EPA has issued rules governing the levels of numerous, naturally occurring and manufactured chemical and microbial contaminants and radionuclides allowable in drinking water, and continues to propose new rules. These rules also prescribe testing requirements for detecting regulated contaminants, the treatment systems that may be used for removing those contaminants, and other requirements. To date, the EPA has set standards for over 90 contaminants and water quality indicators for drinking water, and there is a process in place to make a regulatory determination on at least five additional compounds every five years.

The process of developing new drinking water standards is long and complex, but the Company actively participates with the EPA and other water industry groups by sharing research and water quality operational knowledge. See Item 1—Business—Research and Development—Contaminants of Emerging Concern for additional information.

The Company is within the EPA's time frame for compliance with standards and rules developed under the regulation of the Safe Drinking Water Act, which includes sample collection, data analysis, and, in some instances engineering planning and implementation of treatment enhancements. Further, the EPA is actively considering development of a new regulation for perchlorate and updates to the current microbial and disinfection byproduct regulations. The Company does not anticipate that any such regulations, if enacted, will require implementation in 2026. The Company is tracking state level regulations that require implementation in 2026 and supporting state operations in its compliance efforts.

Although it is difficult to project the ultimate costs of complying with the above or other pending or future requirements, the Company expects current cost requirements under the Safe Drinking Water Act and other similar laws to be recoverable through the regulatory process and therefore compliance costs are not expected to

have a material impact on its operations or financial condition. In addition, capital expenditures and operating costs to comply with environmental mandates have been traditionally recognized by PUCs as appropriate for inclusion in establishing rates. As a result, the Company expects to recover the operating and capital costs resulting from these pending or future requirements.

Reduction of Potential Lead Exposure in Drinking Water

Over the last 40 years, there have been numerous federal regulations aimed at reducing the potential exposure of lead from plumbing materials into drinking water. Regulations have addressed both piping system materials and water quality. In 1986, the Safe Drinking Water Act was amended to prohibit the installation of pipe, solder and flux in public water systems and premise plumbing systems that was not lead-free. In 1991, the EPA published the Lead and Copper Rule, as amended ("LCR"), to reduce the corrosivity of water and control lead and copper in drinking water. In 2011, the Reduction of Lead in Drinking Water Act was enacted, further limiting the use and introduction into commerce of lead pipes, plumbing fittings for fixtures, solder and flux. Since that time, the EPA has issued several minor revisions (2000, 2004 and 2007) and two major revisions (2021 and 2024) to the LCR.

While these measures have made an impact in reducing potential lead exposure in drinking water in the United States and educating water consumers, the 2021 Lead and Copper Rule Revisions ("LCRR") and 2024 Lead and Copper Rule Improvements ("LCRI") rules further advance public health protections by addressing the legacy lead service lines as well as lead plumbing materials, primarily in building plumbing, that still remain in many communities. The 2021 and 2024 revisions are discussed below.

On January 15, 2021, the EPA published the final LCRR with a revised final compliance date of October 16, 2024. The LCRR is designed to better identify high levels of lead, improve the reliability of lead tap sampling results, strengthen corrosion control treatment requirements, expand consumer awareness and improve risk communication. On October 30, 2024, the EPA published the LCRI with a "Compliance Date" of November 1, 2027. The LCRI focus includes requirements related to (i) replacing all lead and certain galvanized service lines under a utility's control by October 30, 2037, 10 years after the Compliance Date; (ii) identifying the materials of all service lines of unknown material; (iii) improving tap sampling; (iv) reducing the lead action level; and (v) strengthening protections to reduce exposure to lead. The LCRI also deferred the compliance date of certain requirements of the LCRR to allow for compliance with both new rules. The Company estimates an investment of approximately $1.5 billion of capital expenditures between 2026 and 2030 related to complying with the LCRI. The Company will continue to invest thereafter in order to fully comply with the LCRI by 2037.

The Infrastructure Investment and Jobs Act was signed into law in November 2021 and provides for up to $15 billion for lead service line replacement through drinking water state revolving funds. The Company continues to evaluate its service territories and has applied for funding for those areas that meet applicable requirements. With regard to future acquisitions, the Company will work with those communities as part of the acquisition process to set lead service line ("LSL") removal goals appropriate for those systems. The prioritization of LSL removal is dependent on several factors, including the Company's planned water main and service line renewal projects, adjacent projects by municipalities or other utilities, LCRI compliance monitoring results, and cooperation with its customers with respect to replacing the customer-owned portion of the LSL as necessary. In certain cases, these and other factors may result in a shorter or longer time frame for replacement. Because replacing the external LSL in its entirety is advised by several water industry organizations including the U.S. National Drinking Water Advisory Council, the Lead Service Line Replacement Collaborative, and the American Water Works Association, the Company's preferred approach is to replace the entire external LSL if lead is found on either the Company or customer portion of the service line; full LSL replacement is also consistent with the LCRR and final LCRI. The Lead Service Line Replacement Collaborative is a diverse group of public health, water utility, environmental, labor, consumer and housing organizations from across the country working together to encourage communities to accelerate the full replacement of LSLs through collaborative efforts at the local level.

As part of its ongoing water main replacement and service line renewal projects, and in accordance with applicable state regulations and anticipation of updated federal regulation, the Company has been replacing LSLs for many years in accordance with current scientific guidance. Also, the Company utilizes appropriate corrosion control techniques as necessary to comply with current water quality regulatory requirements.

National Primary Drinking Water Regulations

On April 10, 2024, the EPA announced a final National Primary Drinking Water Regulation ("NPDWR") for six PFAS, including perfluorooctanoic acid ("PFOA"), perfluorooctane sulfonic acid ("PFOS"), perfluorononanoic acid ("PFNA"), hexafluoropropylene oxide dimer acid ("HFPO-DA", commonly known as "GenX Chemicals"), perfluorohexane sulfonic acid ("PFHxS"), and perfluorobutane sulfonic acid ("PFBS"). The NPDWR for PFAS establishes legally enforceable levels, called Maximum Contaminant Levels ("MCLs"), for PFAS in drinking water. Utilities will be required to complete their initial monitoring for PFAS by 2027, followed by ongoing compliance monitoring. Although the EPA has indicated its intent to extend the compliance deadline to 2031, under the current rule utilities will be required to comply with the new MCLs by April 2029, implementing solutions to reduce PFAS levels where needed. Beginning in April 2029, utilities that exceed any of the PFAS MCLs will be required to provide notification to the public of the violation.

The Company currently estimates an investment of approximately $2 billion of capital expenditures to install additional treatment facilities in order to comply with the NPDWR for PFAS as proposed. Additionally, the Company estimates that it will incur annual operating expenses of up to approximately $50 million related to testing and treatment, with the majority of the operating expenses beginning near the April 2029 compliance deadline. The actual level of capital investment and expenses may differ from these estimates and will be dependent upon market dynamics upon implementation of solutions to comply with the NPDWR for PFAS.

The Company has entered into a nine-year exclusive contract with a third-party vendor to supply granular activated carbon, equipment and reactivation services to more than 50 of the Company's treatment sites across 10 states through 2033. The equipment and services provided through the contract will aid the Company in treating drinking water to assist in complying with the NPDWR for PFAS.

The Company supports sound policies and compliance with the NPDWR for PFAS by all water utilities, while protecting customers and communities from the costly burden of monitoring and mitigating PFAS contamination in water systems. The Company continues to advocate for policies that hold polluters accountable and is participating in the multi-district litigation and other lawsuits filed against certain PFAS manufacturers seeking damages and reimbursement of costs incurred and continuing to be incurred to address contamination of public water supply systems by PFAS. For more information on the PFAS multi-district litigation, see Item 3—Legal Proceedings—PFAS Multi-District Litigation.

On April 19, 2024, the EPA issued a final rule to designate PFOA and PFOS as hazardous substances under CERCLA. The Company, along with a coalition of other water and wastewater organizations, continues to actively advocate for and support bipartisan legislation that would provide PFAS liability protections under CERCLA for water and wastewater systems, as passive receivers of PFAS, and to hold polluters, and not the public or customers, accountable for PFAS-related liability.

Clean Water Act

The Clean Water Act and related state laws regulate discharges from drinking water and wastewater treatment facilities into lakes, rivers, streams and groundwater. In addition to requirements applicable to the Company's wastewater collection systems, its operations require discharge permits under the National Pollutant Discharge Elimination System ("NPDES") permit program established under the Clean Water Act, which must be renewed every five years. Pursuant to the NPDES permit program, the EPA and implementing states set discharge limits for wastewater effluents and overflows from wastewater collection systems. Discharges that fail

to comply with the limits specified under NPDES permits can lead to the imposition of fines and penalties, and persistent non-compliance could lead to significant fines and penalties and other compliance costs. In addition, the difficulty of obtaining and complying with NPDES permits, and renewing expiring permits, may impose time and cost burdens on the Company's operations. From time to time, discharge violations occur at the Company's facilities, some of which result in fines. The Company does not expect any such violations or fines to have a material impact on its results of operations or financial condition. The EPA has identified wastewater discharge permitting and permits for the application of biosolids, or sewage sludge, containing PFAS as areas of focus in its PFAS Strategic Roadmap. Individual states may also take action in these areas. As indicated previously, capital expenditures and operating costs to comply with environmental mandates have been traditionally recognized by PUCs as appropriate for inclusion in establishing rates. As a result, the Company expects to recover the operating and capital costs resulting from any new requirements in these areas.

Research and Development

The Company's Research and Development Program

The Company maintains an industry-leading research and development ("R&D") program that is designed to enhance its services, support its compliance activities, improve service quality and operational effectiveness, and provide environmental leadership. For more than four decades from its inception, American Water's R&D program has evolved into an industry-leading effort and has achieved numerous advancements in the science of drinking water, wastewater, and desalination. Through laboratory and industry resources and the team's expertise, efforts are focused on contaminants of emerging concern, including but not limited to PFAS, Legionella, cyanotoxin-forming algal blooms, a variety of pathogens (for example, Cryptosporidium, Giardia, viruses, and various bacteria), microbial indicators and disinfection byproducts. The Company's R&D personnel are located at the Company's corporate headquarters and at two laboratory testing facilities in New Jersey and Illinois, the latter housing its quality control and testing laboratory, which supports the Company's R&D activities through testing and analysis.

The Company continues to leverage its expertise and collaborates with the EPA and state agencies to help establish effective environmental, health and safety, and water quality standards and regulations. This relationship includes sharing of the Company's research, such as its treatment and distribution system optimization research and its national water quality monitoring data. The Company's engagement with the EPA provides it with early insight into emerging regulatory issues and initiatives, thereby allowing the Company to anticipate and to accommodate its future compliance requirements. The Company also frequently engages with the American Water Works Association, other state environmental agencies, universities, research labs and national and international water research foundations. The Company believes that continued R&D activities are critical for providing safe, clean, reliable and affordable services, as well as maintaining its leadership position in the industry, which provides the Company with a competitive advantage as it seeks business and operational growth.

Contaminants of Emerging Concern

Contaminants of emerging concern include numerous chemicals such as PFAS, pharmaceuticals, personal care products, pesticides, herbicides, antibiotic resistant bacteria, antibiotic resistant genes, endocrine disrupting compounds, microplastics and industrial chemicals, as well as certain naturally occurring microbes, such as bacteria, viruses and parasites, which may be detected in drinking water supplies, for which the risk to the public's health is not fully understood and/or has not been assessed. Technological advances have only recently made it possible to detect many of these contaminants at trace levels. The ability to detect contaminants at trace levels contributes to setting improved water quality goals.

The Chemical Abstract Service Registry contains over 290 million registered chemicals, with an estimated 1,500 species of disease-causing microbes that can affect humans. The Company is continually investigating new

substances and contaminants, employing a team of scientists, engineers and public health professionals to identify threats to its water supply, to act on emerging regulations and new health advisories, and to evaluate the benefits of alternative or advanced treatment technologies. The Company utilizes water quality testing equipment and implements new and emerging technologies to help detect potential water supply contamination issues. Examples of the Company's efforts include:

- characterizing factors that contribute to the formation of potentially carcinogenic disinfection by-products to define best practices for their mitigation;
- advancing the science on holistic management strategies to improve distribution system water quality further;
- using its research findings to communicate information to its customers regarding potential actions to limit occurrences of Legionella in their buildings; in this regard, the Centers for Disease Control and Prevention statistics indicate that water-associated disease from Legionella is on the rise, with exposure typically associated with customer-owned plumbing systems in large buildings;
- defining a framework to support management or possible future regulation of opportunistic pathogens;
- developing expanded monitoring methods for short-chain and fluorinated replacement PFAS;
- systematically investigating PFAS removal from a variety of water matrices using established and emerging treatment technologies;
- leading a PFAS risk communication strategy for the water sector and sharing utility perspectives with external stakeholders through regional, national and international conferences;
- using innovative technologies (e.g., satellite imagery) for early detection and response to algal blooms to manage public health impacts and prevent taste and odor events before cyanotoxins get into the water treatment plant;
- monitoring of taste and odor issues that impact customer satisfaction using expanded analytical methods to detect compounds, and evaluating and recommending treatment practices;
- implementing water source assessment tools, including sensors and data analytics, to evaluate and track chemical storage and aid in the identification of source water contamination events;
- developing methodology and advanced measurement techniques for contaminants of emerging concern to investigate transport, occurrence and treatment; and
- implementing activated carbon, biofiltration and ion exchange treatment to seek to control contaminants of emerging concern.

Service Company

American Water Works Service Company, Inc. ("Service Company") is a wholly owned subsidiary of the Company that provides support and operational services to the Company and its affiliates. These services are predominantly provided to the Company's Regulated Businesses under contracts that have been approved by PUCs, where necessary, and are also provided to MSG as requested or as otherwise needed. Services provided by Service Company may include accounting and finance, administration, business development, communications, compliance, education and training, engineering, environmental, health and safety, human resources, information systems, internal audit, investor relations, legal and governance, operations, procurement, R&D, rates and regulatory support, physical security, cybersecurity, risk management and insurance, treasury, and water quality. For additional information concerning the Company's cybersecurity program, see Item 1C—Cybersecurity. Service Company also provides customer support to the Company's Regulated Businesses, which includes call handling, billing, a major accounts program and other related services. Services are provided by Service Company at cost, enabling the Company's operating subsidiaries to fulfill their responsibilities in a cost-effective manner, while providing them access to in-depth, functional expertise.

Sustainability

The Company considers sustainability principles, such as environmental leadership and corporate governance, fundamental to its corporate strategy and values. The Company has developed a cross-functional approach that supports and drives its sustainability strategy, principles and reporting.

The Company focuses its sustainability efforts in three primary areas: financial, operational and cultural:

- The Company seeks to achieve financial sustainability through its disciplined approach to capital investment and regulatory execution, which supports efforts to grow its business and drive shareholder value while addressing water and wastewater challenges in the United States. The Company's capital investment program is financed with cash flows from operating activities and through a combination of debt and equity capital issuances structured to maintain a healthy balance sheet over the long-term. The Company's approach to balance sheet management is centered on maintaining investment-grade metrics, substantial liquidity provided by highly-rated financial institutions and interest rate management on new debt issuances through its hedging program.
- Operational sustainability means focusing on operating performance and the day-to-day management of water and wastewater systems that provide safe, clean, reliable and affordable service. The Company focuses on the quality of execution and the need to operate its systems safely, efficiently and in compliance with all environmental requirements, for the benefit of its customers. The Company believes this approach to operational sustainability is aligned with the values of its regulators and policymakers.
- Cultural sustainability is reflected in the Company's commitment to support a high performing workforce, while seeking to attract and retain employees who share its purpose and values and understand the needs of the communities in which it serves. The Company demonstrates this commitment to its employees through its values. The Company also believes that investing time, energy and resources in its workforce helps to generate new ideas, continuously improve operations and provide high quality, reliable service for its customers and communities.

Demonstrated Leadership

The Company's values and actions support recognition for demonstrating leadership in areas related to trust, responsibility and sustainability, as well as for positive contributions to its employees and to the communities and customers the Company serves. Among others, these recognitions include the following:

- ranked on *Newsweek's* Worlds's Most Trustworthy Companies 2025 list;
- recognized on *Newsweek's* America's Most Responsible Companies 2025 and 2026 lists; and
- named on *Forbes* America's Best Employers for Company Culture 2025.

Oversight

Management Oversight

The Company has adopted a cross-functional approach for developing and implementing its sustainability strategy, principles and reporting that involves the direct involvement and participation by a number of its business units, including without limitation, its executive leadership team, as well as environmental, health and safety, human resources, legal, finance, accounting and investor relations. In addition, the Company has developed a steering committee that reports to the Chief Operating Officer and is led by the Director of Sustainability. The committee is designed to foster sustainability governance, strategic planning, performance management and increased visibility of key goals and metrics disclosed through various channels.

Board of Directors Oversight

The Board of Directors oversees the Company's strategy and performance related to sustainability through its four standing committees:

- The Safety, Environmental, Technology and Operations Committee (the "SETO Committee") has oversight with respect to, among other things: water quality and emerging contaminants; operational matters and functions; environmental and climate-related matters; and physical security and cybersecurity.
- The Audit, Finance and Risk Committee has oversight and/or responsibility with respect to, among other things: the Company's risk assessment and enterprise risk management; the Company's financial statements and accounting; the Company's independent auditor; internal audit and controls; management of financial risk exposures and related financial activities, including, for example, the Company's capital structure and capital expenditures, financial condition and financing requirements, dividend payment policy, and pension and benefit plan investment performance; and ethics and compliance matters.
- The Executive Development and Compensation Committee ("ED&CC") oversees, among other things: the Company's human capital management; culture and related engagement with employees; and executive development, succession and compensation.
- The Nominating/Corporate Governance Committee (the "Nominating Committee") has oversight and/or responsibility with respect to, among other things: corporate governance; establishment, composition and leadership of the committees of the Board of Directors; director nominations, succession and independence; the Company's political contribution policy and related political contribution and lobbying disclosures, and director education and evaluations.

Reporting, Disclosures and Transparency

Information on the performance and management of the Company's key sustainability metrics can be found on the Company's Investor Relations website at *https://ir.amwater.com/sustainability*. The Company also discloses on its website its Political Contribution Policy, and, on an annual basis, information related to political contributions, certain payments to tax-exempt organizations and trade associations (including Section 501(c)(4) organizations), and lobbying expenditures, all of which are reviewed annually and recommended by the Nominating Committee for approval by the Board of Directors.

Human Capital Resources

Overview

American Water is committed to supporting a high performing workforce. The Company seeks to attract and retain employees who share its purpose and values and understand the needs of the communities they serve. The Company demonstrates this commitment to its employees through its values of safety first; trust, dignity and respect; one team; environmental leadership; and high performance. American Water believes that investing time, energy and resources in its workforce generates new ideas, continuous improvement and high-quality and reliable service for its customers and communities.

Safety First

Safety is a core value at American Water and a critical component of its operational focus. The Company's goal is to achieve zero incidents, injuries and fatalities for its employees and contractors.

American Water believes all employees and contractors deserve to return home from work in the same, or better, condition than when they arrived. The Company's commitment to employee health and safety includes

physical safety, emotional safety and overall well-being. To support its commitment to safety, the Company's employees completed approximately 188,000 hours of safety training, including physical security and cybersecurity, in 2025. Additionally, the Company focuses on proactive safety programs through collaboration with employees at all levels of the organization. Employees are empowered to demonstrate safety leadership by utilizing a number of safety procedures embedded in the Company's culture, such as the use of (i) daily and pre-meeting safety messages, (ii) "Stop Work Authority" (the power to stop working immediately and mitigate a hazard whenever an employee believes a situation is unsafe) and (iii) pre-job briefings to proactively identify hazards that may be encountered. Notwithstanding the Company's commitment to a hazard free workplace, even when employees implement all appropriate and effective safety measures and precautions, accidents, injuries and even fatalities can and do occur. In January 2025, an employee of the Company was fatally injured after being struck by a train. Following the Company's thorough review of the incident, the ED&CC, SETO Committee and the Board of Directors determined the incident to be non-preventable. The Company's review concluded that applicable safety protocols were in place and functioning as intended at the time of the incident. For 2025, the Company had an Occupational Safety and Health Administration Recordable Incident Rate ("ORIR") of 0.36 (not including the non-preventable fatality). For 2025, the Company had a Days Away Restricted or Transferred ("DART") rate of 0.19, compared to the Company's 2025 target DART rate of 0.39. For 2025, to reinforce its focus on the reduction and prevention of serious injuries and incidents, the Company began to track its serious injuries or incidents using the Serious Injury Incidence Rate ("SIIR"), which measures the number of such incidents per 100 employees. The target SIIR for 2025 was 0.04 and the Company recorded no such incidents for 2025.

Talent Attraction, Retention and Development

The Company's talent and retention strategy is aimed at building and maintaining a high performing and engaged workforce across all levels of the business. The Company's performance depends on a highly skilled workforce with the requisite experience in areas including engineering, regulatory, water quality, finance and operations, in order to deliver safe, clean, reliable and affordable water and wastewater services to customers. The Company leverages various recruiting channels and partnerships as well as its employer brand to access a broad pool of talent and to hire what the Company believes are the most qualified candidates. In 2025, the Company filled approximately 1,439 positions, 66% of which with external candidates and 34% with internal candidates.

The Company has created and implemented programs aimed at developing and retaining talent. The Company collaborates with business leaders to identify the essential behaviors and competencies needed for safe and high-performing operations, as well as to achieve its short and long-term business goals. Through the Company's workforce planning process, the Company evaluates key positions across the organization, identifies potential talent risks, and develops action plans to mitigate those risks. Additionally, the Company has created and implemented programs aimed at attracting, motivating, developing and retaining talent. These programs promote a culture of learning where employees are encouraged to continuously enhance their skills and knowledge through on-the-job experiences, social learning and formal learning opportunities.

Developing talent to provide a pathway to executive leadership is a critical priority for the Company. Employee succession plans support the Company's business continuity plans and goals, through the identification and development of current and future leaders, and promote employee retention, as well as the Company's employee culture and talent development priorities.

In addition to succession planning for executive and senior leadership roles, during 2025, the Company conducted local and enterprise-wide talent reviews, identifying top and emerging talent with a focus on strengths, gaps and development needs against the critical skills needed for certain roles. Through these talent review processes, business leaders identified a pool of high-potential employees to allow the Company to support their career goals and aspirations, and to promote more effective employee experience and talent retention efforts. The Company also utilizes annual six-month mentoring programs designed to accelerate emerging leaders' abilities to demonstrate leadership capabilities and relationships, with the guidance of an experienced executive mentor.

Total Rewards

In order to attract, retain and motivate a skilled and high-performing workforce, American Water provides a comprehensive and highly competitive Total Rewards program, including base pay, Annual Performance Plan ("APP") for all employees, Long-Term Performance Plan compensation for certain strategic positions, and a wide range of benefits consisting of, among others, medical, prescription, dental, vision, life and disability insurance coverage, a retirement savings plan, an employee stock purchase plan, educational assistance, paid time off through holidays and vacation and sick time. The Company's Total Rewards offerings also include a health and wellness program, paid family leave, fertility and family building benefits and a menu of additional voluntary benefits.

All the Company's employees, including those who are union-represented, participate in the APP to promote the alignment of performance-based compensation with the achievement of the Company's short-term performance goals. In addition, the Company regularly reviews its success in achieving fair compensation practices, whereby pay decisions would be based on the responsibilities, talents and skills of its employees.

All employees who average 30 hours or more per week are eligible for full-time benefits. Approximately 88% of all benefit eligible employees are enrolled in the Company's healthcare benefits. Full-time employees pay approximately 16% of the total premium cost of medical, dental and vision coverage.

Trust, Dignity and Respect

In 2025, the Company continued its focus on its Catalyst for Change framework in support of its values of trust, dignity and respect. The pillar areas of commitment, consistency, clarity, courage and conviction, allow employees to work collectively to build the desired culture. At all levels, the Company strives to understand, value and provide opportunities to each employee, and to foster an environment where all employees are celebrated regardless of their background or life experiences. To achieve the desired state, all leaders are expected to model behaviors consistent with the Catalyst for Change framework.

The Company believes that employees are at their best when they can bring their authentic selves to work every day. This belief is the central component of the Company's "Beautifully Different" philosophy, which recognizes, embraces and celebrates the uniqueness of its employees. The Company also believes that having employees with different ideas, viewpoints, experiences and backgrounds improves its ability to serve its customers. To this end, the Company is committed to attracting and retaining a workforce that understands the needs of the communities in which it serves.

Employee Experience

The Company's weCARE employee value proposition focuses on employee experience as an influencer of an employee's opinions and emotional response about the Company as an employer. weCARE is composed of five elements — deeper connections, personal growth, shared purpose, flexibility and well-being. weCARE represents the Company's commitment to valuing its employees and building a safe, healthy and inclusive culture where employees know their value and are appreciated for their talents and commitment to supporting the Company's success. The Company is also committed to improving the employee experience by listening to employees through focus group discussions and employee surveys, among other tools.

Workforce Data

As of December 31, 2025, the Company had approximately 7,000 employees. For 2025, the Company's annualized employee turnover rate, which the Company defines as the ratio of the number of separated employees to the 12-month average headcount during 2025, was 11.1%, up from 10.5% in 2024.

As of December 31, 2025, approximately 44% of the Company's workforce was represented under 74 collective bargaining agreements with 14 different unions. In 2025, the Company renegotiated 28 collective bargaining agreements that were set to expire during the year. During 2026, 26 of the Company's collective bargaining agreements will expire in accordance with their terms and the Company expects to be able to negotiate these agreements during the year. In addition, the Company's national benefits agreement, which expires on July 31, 2028, covers approximately 3,000 of the Company's union-represented employees and their families and provides them with healthcare and other benefits. The Company also collaborates with unions on topics such as safety, customer, technology and employee benefits in forums such as the Joint Healthcare Committee, National Safety Council, Tools Committee and local Labor-Management Committees.

Board Oversight

The ED&CC establishes and reviews the Company's overall compensation philosophy and oversees the compensation and benefits plans and programs for its executive officers. The ED&CC also oversees the process of planning for executive officer succession. The ED&CC's charter requires that it oversee the Company's human capital management, culture and related engagement activities, as well as having responsibility for reviewing and assessing, at least annually, the Company's organizational and leadership development plans and programs, and its programs designed to identify, attract and retain high-potential employees.

Information About Our Executive Officers

Presented in the table below are the name, age, offices held and business experience for each of the Company's executive officers, as of February 18, 2026:

Name	Age	Office and Experience
John C. Griffith	59	**President and Chief Executive Officer.** Mr. Griffith has served as Chief Executive Officer and principal executive officer of the Company since May 14, 2025 and as President since August 2024. He joined the Company in May 2022 and served as its Executive Vice President and Chief Financial Officer until August 2024. Prior to joining the Company, since 2014, Mr. Griffith served as Managing Director, Mergers and Acquisitions, for Bank of America Securities. Prior to joining Bank of America Securities, from 2008 to 2014, Mr. Griffith served as Chief Executive Officer of HighWave Energy, a renewable fuels start-up company, and from 1995 to 2008, he served in various capacities of increasing responsibility with Merrill Lynch & Co.
David M. Bowler	47	**Executive Vice President and Chief Financial Officer.** Mr. Bowler has served as the Company's Executive Vice President and Chief Financial Officer since August 2024, and as Senior Vice President, Deputy Chief Financial Officer and Treasurer from October 2022 to August 2024. Mr. Bowler joined the Company in May 2020 as its Senior Vice President of Corporate Tax, Accounting Technology and Regulatory Services, and served as Senior Vice President of Planning, Regulatory and Financial Services from July 2021 to November 2022. Prior to joining the Company, Mr. Bowler served as Director of Finance and Accounting Integration at CenterPoint Energy, Inc. from February 2019 to April 2020, and in a number of roles of increasing responsibility, most recently as Vice President, Controller and Assistant Treasurer at Vectren Corporation (which was sold to CenterPoint Energy on February 1, 2019) from January 2007 to February 2019. Mr. Bowler is a Certified Public Accountant.

Name	Age	Office and Experience
Maureen Duffy	56	**Executive Vice President, Communications and External Affairs.** Ms. Duffy has served as the Company's Executive Vice President, Communications and External Affairs since October 2024 and has had over 26 years of employment with the Company. Ms. Duffy served as the Company's Senior Vice President, Communications and External Affairs from January 2020 through October 2024, as Vice President, Corporate Communications and Federal Affairs from May 2017 through December 2019, and as Vice President, Corporate Communications and External Affairs from September 2011 to May 2017. She also has held various positions with the Company's New Jersey subsidiary, including Government Affairs/Media Specialist, Communications Manager and Director of Corporate Communications. Prior to joining American Water, Ms. Duffy reported and produced news for WNJN/WNET-TV.
Stacy A. Mitchell	50	**Executive Vice President and General Counsel.** Ms. Mitchell has served as the Company's Executive Vice President and General Counsel since June 2024. Prior to that, she served as the Company's Senior Vice President and Deputy General Counsel beginning in February 2023. She joined the Company in August 2019 as Vice President and Chief Regulatory Counsel. Prior to joining the Company, Ms. Mitchell served as the Vice President of Rates and Regulatory Affairs at South Jersey Industries, Inc. and its gas utility subsidiary. Prior to that time, she practiced litigation, regulatory and environmental law in private practice for 15 years.
Cheryl Norton	61	**Executive Vice President and Chief Operating Officer.** Ms. Norton has 37 years of employment with the Company serving in various roles, including operational leadership, environmental stewardship, laboratory management, and research. She has been serving as the Company's Executive Vice President and Chief Operating Officer since March 2021 and served as its Senior Vice President, Chief Environmental Officer from March 2020 to March 2021. She was also the Company's Senior Vice President, Eastern Division and President of its New Jersey subsidiary from March 2019 to March 2021. Prior to that, Ms. Norton served as President of the Company's Missouri subsidiary from November 2015 to March 2019, and President of its Kentucky subsidiary from January 2011 until November 2015. In addition, Ms. Norton also serves as a member of the Board of Directors of the Water Research Foundation and as a member of the Board of Trustees of The Cooper Health System.
Lori A. Sutton	52	**Executive Vice President, Chief Human Resources Officer.** Ms. Sutton was appointed as Executive Vice President, Chief Human Resources Officer, effective October 1, 2025 and served as Senior Vice President, Chief Human Resources Officer from April 1, 2025 to September 30, 2025. Ms. Sutton joined the Company in February 2023 as its Chief Inclusion, Diversity and Equity Officer, and also served as the Company's Vice President of Talent Acquisition from April 2024 to November 2024, and its Senior Vice President of Talent Management from December 2024 to March 2025. Prior to joining the Company, Ms. Sutton served from September 2021 to February 2023 as Global Head of Inclusion, Diversity and Culture at Alcoa, Inc. Before that, she worked in similar roles at Berry Global Group, Inc., from September 2019 to September 2021. She is a member of the Board of Directors of Liberty Federal Credit Union in Evansville, Indiana.

Each executive officer is elected annually by the Board of Directors and serves until their respective successor has been elected and qualified or their earlier death, resignation or removal.

Available Information

The Company maintains a website at *https://amwater.com,* an Investor Relations website at *https://ir.amwater.com* and a Sustainability website at *https://ir.amwater.com/sustainability*. Information contained on the Company's websites, including its Sustainability Report and other reports or documents, shall not be deemed incorporated into, or to be a part of, this report, and any website references included herein are not intended to be made through active hyperlinks. The Company recognizes its websites as key channels of distribution to reach public investors and as a means of disclosing information to comply with SEC Regulation FD.

The Company is subject to the reporting requirements of the Exchange Act. The Company files or furnishes annual, quarterly and current reports, proxy statements and other information with the SEC. Readers may obtain a copy of the Company's annual reports on Form 10-K, its quarterly reports on Form 10-Q or its current reports on Form 8-K, or any amendments to them, that are filed with or furnished to the SEC, free of charge, from the Company's Investor Relations website, *https://ir.amwater.com,* as soon as reasonably practicable after the Company files or furnishes the information to the SEC.

The Corporate Governance Guidelines and the charters for each of the standing committees of the Board of Directors, together with the American Water Code of Ethics and additional information regarding the Company's corporate governance, are available on the Company's Investor Relations website, and will be made available, without charge, in print to any shareholder who requests such documents from the Company's Investor Relations Department in writing by mail at American Water Works Company, Inc., 1 Water Street, Camden, NJ, 08102.

ITEM 1A. RISK FACTORS

We operate in a market and regulatory environment that involves significant risks, many of which are beyond our control. In addition to the other information included or incorporated by reference in this Annual Report on Form 10-K, the following material factors should be considered in evaluating our business and future prospects. Any of the following risks, either alone or taken together, could materially and adversely affect our business, financial position, results of operations, cash flows and liquidity.

Risk Factors Summary

The following summary is intended to enhance the readability and accessibility of our risk factor disclosures. We encourage you to carefully review the full risk factors discussed below in their entirety for additional information. A number of the factors that could materially and adversely affect our business, financial condition or results of operations include:

Risks Related to Our Industry and Business Operations

- Our Regulated Businesses are subject to regulation by PUCs and other regulatory agencies, which affects our business, financial condition, results of operations and cash flows, and may be subject to fines, penalties and other sanctions for an inability to meet these regulatory requirements.
- Our operations and the water we supply are subject to environmental, water quality and health and safety laws and regulations, including contaminants of emerging concern, compliance with which could impact our operating costs and capital expenditures, and violations of which could subject us to costs, damage to our reputation or regulatory action, and contamination events may lead to service limitations, reduced usage or litigation.
- Limitations or restrictions on water supplies may adversely affect our access to sources of water, our ability to supply water to customers and, together with climate variability, severe weather, natural disasters and seasonality, may cause service disruptions, reduced demand or increased costs.
- The current regulatory rate setting process may result in a significant delay, also known as “regulatory lag,” from the time that we invest in infrastructure improvements, incur increased operating expenses, incur increased cost of capital or experience declining water usage, to the time at which we can seek to address these events in general rate cases. Our inability to mitigate or minimize regulatory lag could adversely affect our business.
- Changes in laws and regulations can significantly and materially affect our business, financial condition, results of operations, cash flows and liquidity.
- Regulatory and environmental risks associated with the collection, treatment and disposal of wastewater may impose significant costs and liabilities, and aging infrastructure may require increased capital and O&M spending.
- Our Regulated Businesses require significant capital expenditures and may suffer if we fail to secure appropriate funding or experience increases in short- and long-term interest rates or delays in completing major capital expenditure projects.
- Aging infrastructure may lead to service disruptions, property damage and increased capital expenditures and O&M expenses and other costs, all of which could negatively impact our financial results.
- Contamination of water supplies or our water service provided to our customers could result in service limitations and interruptions and exposure to substances not typically found in potable water supplies, and could subject us and our subsidiaries to reductions in usage and other responsive obligations, government enforcement actions, damage to our reputation and private litigation.

- We are subject to adverse publicity and reputational risks, which make us vulnerable to negative customer perception and could lead to increased regulatory oversight or sanctions.
- The failure of, or the requirement to repair, upgrade or dismantle, any of our dams may adversely affect our financial condition, results of operations, cash flows and liquidity.
- Any failure of our network of water and wastewater pipes, water mains and water reservoirs could result in losses and damages that may affect our financial condition and reputation.
- An important part of our growth strategy is the acquisition of water and wastewater systems, which involves risks, including competition for acquisition opportunities from other regulated utilities, governmental entities and other buyers, which may hinder or limit our ability to grow our business.
- We face technology, cybersecurity and data privacy risks, including failures, cyber attacks, unauthorized access and evolving privacy requirements, any of which may result in operational disruption, regulatory actions or reputational harm.
- An inability to successfully develop and implement new technologies poses substantial risks to our business and operational excellence strategies, which could have a material adverse effect on our business and financial results.
- Our inability to efficiently upgrade and improve our operational and technology systems, or implement new systems, could result in higher than expected costs or otherwise adversely impact our internal controls environment, operations and profitability.
- Disruptions in our supply chain related to goods, such as pipe, chemicals, power and other fuel, equipment, water and other raw materials and services, could adversely impact our operations and our ability to serve our customers, as well as our financial results.

Financial, Economic and Market-Related Risks

- Our indebtedness could adversely affect our business and limit our ability to plan for or respond to changes in our business, and we may be unable to generate sufficient cash flows to satisfy our liquidity needs.
- Our inability to access the debt or equity capital or financial markets or other events could affect our ability to meet our long-term commitments or liquidity needs at reasonable cost, which could adversely affect our financial condition and results of operations.
- Our forward sale agreements may adversely affect our results of operations or financial condition, the share price of our common stock and our liquidity, and may potentially cause shareholder dilution.
- The conditional exchange feature of the 3.625% Exchangeable Senior Notes due 2026 (the "Exchangeable Notes"), if triggered, may adversely affect our liquidity and financial condition and may dilute the ownership interest of our shareholders or may otherwise depress the price of parent company's common stock.
- Parent company may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds.
- We have a significant amount of goodwill and other assets measured and recorded at fair value on a recurring basis, and we may be required to record impairments or changes in fair value to these assets, which may negatively affect our financial condition and results of operations.

Risks Related to the Proposed Merger with Essential

- The proposed merger is subject to various closing conditions, including the receipt of consents and approvals from various governmental and regulatory entities and third parties, and a failure to obtain all

such consents or approvals or to satisfy such other closing conditions could prevent or delay the completion of the proposed merger or impose conditions that could have a material adverse effect on us or the combined company.

- The proposed merger may cause suppliers, strategic partners, certain customers or others to delay or defer decisions regarding our business, and may adversely affect our ability to effectively manage our business.
- The Essential Merger Agreement contains provisions that limit our ability to pursue certain alternatives to the proposed merger, which could discourage a potential acquirer from making an alternative transaction proposal and, in certain circumstances, could require us to pay Essential a significant termination fee.
- If completed, the proposed merger may not achieve its anticipated results, and we may be unable to integrate Essential's operations and/or operate the combined company in the manner expected.
- The proposed merger may not be accretive to our earnings and may adversely affect our earnings per share, which may negatively affect the market price of our common stock.
- If the proposed merger is completed, we may be required to record goodwill or we may acquire other assets measured and recorded at fair value, and, thereafter, we may be required to record impairments to the goodwill or changes to the fair value of the other assets, either of which may negatively affect our financial condition and results of operations.

Additional Risks Related to Our Business

- Parent company provides performance guarantees with respect to certain of the obligations of our Other businesses (primarily MSG), including financial guarantees or deposits, which may adversely affect parent company if the guarantees are successfully enforced.

Risks Related to Our Industry and Business Operations

Our Regulated Businesses are subject to extensive regulation by PUCs and other regulatory agencies, which significantly affects our business, financial condition, results of operations and cash flows. Our Regulated Businesses also may be subject to fines, penalties and other sanctions for an inability to meet these regulatory requirements.

Our Regulated Businesses provide water and wastewater services to our customers through subsidiaries that are subject to regulation by PUCs. This regulation affects the rates we charge our customers and has a significant impact on our business and operations. Generally, PUCs authorize us to charge rates that they determine are sufficient to recover our prudently incurred operating expenses, including, but not limited to, operating and maintenance costs, depreciation, financing costs and taxes, and provide us with the opportunity to earn an appropriate rate of return on invested capital.

Our ability to successfully implement our business plan and strategy depends on the rates authorized by the various PUCs. We periodically file rate increase applications with PUCs. The ensuing administrative process may be lengthy and costly. Our rate increase requests may or may not be approved, or may be partially approved, and any approval may not occur in a timely manner. Moreover, a PUC may not approve a rate request in an amount that is sufficient to:

- recover our cost of operations, including: purchased water; chemicals; and fuel, power and other commodities used in our operations;
- recover our operational labor and labor-related expenses, including without limitation costs and expenses associated with our pension and other post-employment benefits;

- enable us to recover our investment; and
- provide us with an opportunity to earn an appropriate rate of return on our investment.

Approval by the PUCs is also required in connection with other aspects of our Regulated Businesses, which are required to have numerous permits, approvals and CPCNs from the PUCs that regulate their businesses and authorize acquisitions, dispositions, debt and/or equity financing, and, in certain cases, affiliated transactions. Some PUCs are empowered to impose financial penalties, fines and other sanctions for non-compliance with applicable rules and regulations. Although we believe that each utility subsidiary has obtained or sought renewal of the material permits, approvals and certificates necessary for its existing operations, we are unable to predict the impact that future regulatory activities may have on our business.

In any of these cases, our business, financial condition, results of operations, cash flows and liquidity may be adversely affected. Even if the rates approved are sufficient, we face the risk that we will not achieve the rates of return on equity permitted by PUCs. This could occur if certain conditions exist, including, but not limited to, (i) water usage is less than the level anticipated in establishing rates, (ii) customers increase their conservation efforts, (iii) we experience unusual or emergent situations, events or conditions, (iv) we experience a significant increase in customers without recovery of the operating and other costs associated with serving them, or a decrease in customers that causes a decrease in operating revenue, or (v) our investments or expenses prove to be higher than the levels estimated in establishing rates. It may be difficult to predict the outcome or impact of these events on us or the actions that may be taken by the PUCs or other governmental authorities in response thereto.

Our operations and the quality of water we supply and wastewater we treat are subject to extensive and increasingly stringent environmental, water quality and health and safety laws and regulations, including with respect to contaminants of emerging concern, compliance with which could impact both our operating costs and capital expenditures, and violations of which could subject us to substantial liabilities and costs, as well as damage to our reputation.

Our water and wastewater operations are subject to extensive federal, state and local laws and regulations. These requirements include, among others, CERCLA, the Clean Water Act, the Safe Drinking Water Act, the LCR (as amended), and each of their implementing rules and regulations, as well as other federal and state requirements. For example, PUCs and environmental regulators set conditions and standards for the water and wastewater services we deliver. We are also required to obtain various environmental permits from regulatory agencies for our operations. If the water or wastewater services we provide to our customers do not comply with regulatory standards, or otherwise violate environmental laws, regulations or permits, or other health and safety and water quality regulations, we could incur substantial fines, penalties or other sanctions or costs, as well as damage to our reputation, as a result of governmental proceedings and private litigation. In the most serious cases, regulators could reduce requested rate increases or force us to discontinue operations and sell our operating assets to another utility or to a municipality. Given the nature of our business which, in part, involves providing water service for human consumption, any potential non-compliance with, or violation of, environmental, water quality and health and safety laws or regulations would likely pose a more significant risk to us than to a company not similarly involved in the water and wastewater industry. In addition, CERCLA authorizes the EPA to issue orders and bring enforcement actions to compel responsible parties to investigate and take remedial actions with respect to actual or threatened releases of hazardous substances, and can impose joint and several liability, without regard to fault, on responsible parties for the costs thereof. In addition, in April 2024, the EPA issued a final rule designating PFOA and PFOS as hazardous substances under CERCLA. While the EPA has stated that it will focus on holding responsible under CERCLA entities that significantly contributed to the release of PFAS into the environment, it is not yet known whether or to what extent liability protection will be afforded to passive receivers of PFAS, including water and wastewater utilities. In September 2025, the EPA reaffirmed this enforcement approach, explaining that, while it intends to focus CERCLA enforcement activities on entities that significantly contributed to PFAS releases and generally does not plan to pursue actions against passive receivers, its enforcement discretion does not alter CERCLA’s underlying liability framework or restrict

private party claims, and therefore the extent to which we may be subject to future CERCLA liability for PFAS-related claims remains uncertain. Furthermore, both federal and state laws and regulations have been enacted or proposed that seek to reduce or limit GHG emissions and/or require or would require additional reporting, monitoring and disclosure of, among other things, GHG emissions and related financial risks, and these regulations may become more pervasive or stringent in light of changing governmental agendas and priorities, although the exact nature and timing of these changes is uncertain.

We incur substantial operating and capital costs on an ongoing basis to comply with environmental, water quality and health and safety laws and regulations. These laws and regulations and their enforcement have become more stringent over time, and new or stricter requirements, such as the final EPA drinking water regulations for PFAS, the LCRR and the recently promulgated LCRI, are expected to increase our costs. For example, the designation of PFOA and PFOS as hazardous substances under CERCLA may impact our approach to how we dispose of material related to treatment at impacted systems and may increase our costs as a result. Although we may seek to recover ongoing compliance costs in our Regulated Businesses through customer rates, and certain jurisdictions in which our Regulated Businesses operate have passed laws authorizing recovery of such costs, there can be no guarantee that the various other regulatory PUCs or similar regulatory bodies that govern our Regulated Businesses would approve rate increases that would enable us to recover such costs in whole or in part or that such costs will not materially and adversely affect our financial condition, results of operations, cash flows and liquidity. We may also incur liabilities if, under environmental laws and regulations, we are required to investigate and clean up environmental contamination, including potential releases of certain hazardous chemicals, which are used in our treatment processes, or at off-site locations where we have disposed of residual waste or caused an adverse environmental impact. The discovery of previously unknown conditions, or the imposition of cleanup obligations in the future, including those obligations related to the disposal of PFAS residuals and other waste, could result in significant costs and could adversely affect our financial condition, results of operations, cash flows and liquidity. Such remediation costs may not be covered by insurance and may make it difficult for us to secure insurance at acceptable rates in the future.

Attention is being given to contaminants of emerging concern, including, without limitation, chemicals and other substances that currently do not have any regulatory standard in drinking water or wastewater or have been recently created or discovered (including by means of scientific achievements in the analysis and detection of trace amounts of substances). We rely upon governmental agencies to set appropriate regulatory standards to protect the public from these and other contaminants, and our role is to provide service that meets these standards, if any. In some of our states, PUCs may disapprove of cost recovery, in whole or in part, for implementation of treatment infrastructure for a contaminant in the absence of a regulatory standard. Furthermore, given the rapid pace at which these contaminants are being identified, created and/or discovered, we may not be able to detect and/or mitigate all such substances in our drinking water system or supplies, which could have a material adverse impact on our financial condition, results of operations and reputation. In addition, we believe these contaminants will continue to form the basis for additional or increased federal or state regulatory initiatives and requirements in the future, which could significantly increase the cost of our operations.

Limitations on availability of water supplies or restrictions on our use of water supplies because of government regulation or action may adversely affect our access to sources of water, our ability to supply water to customers or the demand for our water services.

Our ability to meet the existing and future demand of our customers depends on the availability of an adequate supply of water. As a general rule, sources of public water supply, including rivers, lakes, streams, groundwater aquifers and recycled water sources, are held in the public trust and are not generally owned by private interests. As a result, we typically do not own the source water that we use in our operations, and the availability of our water supply is established through allocation rights (determined by legislation or court decisions) and passing-flow requirements set by governmental entities or by entering into water purchase agreements. These requirements, which can change from time to time, and vary by state or region, may adversely impact our water supply. Supply issues, such as drought, overuse of sources of water, the protection of threatened

species or habitats, contamination or other factors may limit the availability of ground and surface water. If we are unable to secure available or alternative sources of water, our business, financial condition, results of operations and cash flows could be adversely affected.

For example, in our Monterey County, California operations, we are seeking to augment our sources of water supply, principally to comply with the cease and desist orders issued by the SWRCB in July 1995 and October 2009 (the "1995 Order," the "2009 Order" and, as amended in July 2016, the "2016 Order" and, collectively, the "Orders") that require Cal Am to significantly decrease its diversions from the Carmel River. See Item 3—Legal Proceedings—Alternative Water Supply in Lieu of Carmel River Diversions, which includes additional information regarding this matter. While the Company cannot currently predict the likelihood or result of any adverse outcome associated with these matters, further attempts to comply with the Orders may result in material additional costs or obligations, including fines and penalties against Cal Am in the event of noncompliance with the Orders, which could have a material adverse effect upon us and our business, results of operations and cash flows.

Service disruptions caused by severe weather conditions, climate variability patterns or natural or other disasters may disrupt our operations or reduce the demand for our water and wastewater services, which could adversely affect our financial condition, results of operations, cash flows and liquidity.

Service interruptions due to severe weather, climate variability patterns and natural or other events are possible across all our businesses. These include, among other things, storms, ice or freezing conditions, high rainfall and wind conditions, hurricanes, tornadoes, earthquakes, landslides, drought, wildfires, coastal and intercoastal floods or high water conditions, including those in or near designated flood plains, pandemics and epidemics, electrical storms, sinkholes, solar flares and chemical spills or other contamination causing temporary unavailability of our source water supplies. Weather and other natural events such as these may affect the condition or operability of our facilities, limiting or preventing us from delivering water or wastewater services to our customers, or requiring us to make substantial capital expenditures to repair any damage. Utility tariffs in place or cost recovery proceedings with respect to our Regulated Businesses may not provide reimbursement to us, in whole or in part, for any of these impacts.

Government restrictions on water use may also result in decreased use of water and wastewater services, even if our water supplies are sufficient to serve our customers, which may adversely affect our financial condition, results of operations and cash flows. Seasonal and other drought conditions that may impact our water services are possible across all of our service areas. Governmental restrictions imposed in response to a drought may apply to all systems within a region independent of the supply adequacy of any individual system. Responses may range from voluntary to mandatory water use restrictions, rationing restrictions, water conservation regulations, and requirements to minimize water system leaks. While expenses incurred in implementing water conservation and rationing plans may generally be recoverable provided the relevant PUC determines they were reasonable and prudent, we cannot be certain that any such expenses incurred will, in fact, be fully recovered. Moreover, reductions in water consumption, including those resulting from installation of equipment or changed consumer behavior, may persist even after a drought has ended and restrictions are lifted, which could adversely affect our business, financial condition, results of operations and cash flows.

Climate variability may cause increased weather volatility and may impact water usage and related revenue or require additional expenditures, all of which may not be fully recoverable in rates or otherwise.

The issue of climate variability is receiving attention nationally and worldwide. There is consensus among climate scientists that there will be worsening of weather volatility in the future associated with climate variability. Many climate variability predictions present several potential challenges to water and wastewater utilities, including us, such as:

- increased frequency and duration of droughts;

- increased precipitation and flooding;
- increased frequency and severity of storms and other weather events;
- challenges associated with changes in temperature or increases in ocean levels;
- potential degradation of water quality;
- decreases in available water supply and changes in water usage patterns;
- increases in the number, length and severity of disruptions in service;
- increased costs to repair damaged facilities; or
- increased costs to reduce risks associated with the increasing frequency and severity of natural events, including to improve the resiliency and reliability of our water and wastewater treatment and conveyance facilities and systems.

Because of the uncertainty of weather volatility related to climate variability, we cannot predict the potential impact on our business, financial condition, results of operations, cash flows and liquidity. Although some or all potential expenditures and costs associated with the impact of climate variability and related laws and regulations on our Regulated Businesses could be recovered through rates, infrastructure replacement surcharges or other regulatory mechanisms, there can be no assurance that PUCs would authorize rate increases to enable us to recover such expenditures and costs, in whole or in part.

The current regulatory rate setting process may result in a significant delay, also known as "regulatory lag," from the time that we invest in infrastructure improvements, incur increased operating expenses as a result of inflation or other factors, incur increased cost of capital, including as a result of increasing short- and long-term interest rates, or experience declining water usage, to the time at which we can seek to address these events in general rate cases; our inability to mitigate or minimize regulatory lag or the impacts thereof could adversely affect our business.

There is typically a delay, known as "regulatory lag," between the time our Regulated Businesses make a capital investment or incur an operating expense increase, including as a result of inflation or other factors, and the time when those costs are reflected in rates. In addition, billings permitted by PUCs typically are, to a considerable extent, based on the volume of water used in addition to a minimum base rate. Thus, we may experience regulatory lag between the time our revenues are affected by declining usage and the time we are able to adjust the rate per gallon of usage to address declining usage. Our inability to mitigate or reduce regulatory lag or the impacts thereof could have an adverse effect on our financial condition, results of operations, cash flows and liquidity.

We endeavor to mitigate or reduce regulatory lag by pursuing constructive regulatory practices and certain regulatory mechanisms. See Item 1—Business—Regulated Businesses—Regulation and Rate Making for a discussion of these practices and mechanisms. While these practices and mechanisms may serve to mitigate or reduce regulatory lag in certain of our regulated jurisdictions, we continue to seek approval of regulatory practices and mechanisms to mitigate or reduce regulatory lag in other jurisdictions that have not approved them. Furthermore, PUCs may fail to adopt new surcharges or those permitted by applicable law, and existing practices and mechanisms may not continue in their current form, or at all, and we may be unable or become ineligible to continue to utilize them in the future. Although we intend to continue to seek regulatory PUC approval of practices or mechanisms to mitigate or reduce regulatory lag, our efforts may not be successful in whole or in part, and even to the extent successful, our business, financial condition, results of operations, cash flows and liquidity may be materially and adversely affected by regulatory lag.

Changes in laws and regulations can significantly and materially affect our business, financial condition, results of operations, cash flows and liquidity.

The impact of any future revisions or changes in interpretations of existing regulations or the adoption of new laws and regulations applicable to our Regulated Businesses is uncertain. Changes in laws or regulations, the imposition of additional laws and regulations, changes in enforcement practices of regulators, government policies or court decisions can materially affect our operations, results of operations and cash flows. Certain of the individuals who serve as regulators are elected or political appointees. Therefore, elections which result in a change of political administration or new appointments may also result in changes of the individuals who serve as regulators and changes in the policies of the regulatory agencies that they serve. New laws or regulations, new interpretations of existing laws or regulations, changes in agency policy, including those made in response to shifts in public opinion, or conditions imposed during the regulatory hearing process could have the following consequences, among others:

- making it more difficult for us to increase our rates and, as a consequence, to recover our costs or earn our expected rates of return;
- changing the determination of the costs, or the amount of costs, that would be considered recoverable in rate cases and other regulatory proceedings;
- restricting our ability to terminate our services to customers who owe us money for services previously provided or limiting our bill collection efforts;
- requiring us to provide water or wastewater services at reduced rates to certain customers;
- limiting or restricting our ability to acquire water or wastewater systems, purchase or dispose of assets, or issue long-term debt or equity, or making it less cost-effective for us to do so;
- negatively impacting, among other things: (i) tax rates or positions or the deductibility of expenses under federal or state tax laws, (ii) the availability or amount of, or our ability to comply with the terms and conditions of, tax credits or tax abatement benefits, (iii) the amount of taxes owed or paid, including as a result of the CAMT provisions, (iv) the timing of tax effects on rates, or (v) the ability to utilize our net operating loss carryforwards;
- increasing the associated costs of, and/or of difficulty complying with, environmental, health, safety, consumer privacy, water quality, and water quality accountability laws and regulations to which our operations are subject;
- changing or placing additional limitations on change in control requirements relating to any concentration of ownership of our common stock;
- making it easier for governmental entities to convert our assets to public ownership via condemnation, eminent domain or other similar process, or for governmental agencies or private plaintiffs to assert liability against us for damages under these or similar processes;
- increasing the costs and/or difficulty of complying with proposed changes to federal contracting regulations and contractor affirmative action audits;
- placing limitations, prohibitions or other requirements with respect to the sharing of information and participation in transactions by or between a regulated subsidiary and us or our other affiliates, including Service Company and any of our other subsidiaries;
- restricting or prohibiting our extraction of water from rivers, streams, reservoirs or aquifers; and
- revoking or altering the terms of a CPCN issued to us by a PUC or other governmental authority.

Regulatory and environmental risks associated with the collection, treatment and disposal of wastewater may impose significant costs and liabilities.

The wastewater collection, treatment and disposal operations of our subsidiaries are subject to substantial regulation and involve environmental risks. If collection, treatment or disposal systems fail, overflow, or do not

operate properly, untreated or inadequately treated wastewater or other contaminants could spill onto nearby properties or into nearby streams and rivers, causing damage to persons or property, injury to aquatic life and economic damages. This risk is most acute during periods of substantial rainfall or flooding, which are the main causes of sanitary sewer overflow and system failure. Liabilities resulting from such events could adversely and materially affect our business, financial condition, results of operations and cash flows. Some of our wastewater systems have commercial and industrial customers that are subject to specific limitations on the type, character and concentration of the wastewater they are permitted to discharge into our systems. The failure by these commercial and industrial customers to comply with their respective discharge requirements could, in turn, negatively impact our operations, damage our facilities or cause us to exceed applicable discharge limitations and requirements. Liabilities resulting from such exceedance events could adversely and materially affect our business, financial condition, results of operations and cash flows.

A loss of one or more large industrial or commercial customers could have a material adverse impact upon the results of operations of one or more of our Regulated Businesses.

Adverse economic conditions may cause our customers, particularly industrial and large commercial customers, to curtail operations. A curtailment of operations by such a customer typically results in reduced water usage by that customer. In more severe circumstances, the decline in usage could be permanent. Any decrease in demand resulting from difficult economic conditions affecting these customers could adversely affect our business, financial condition, results of operations and cash flows. Utility tariffs in place with respect to our Regulated Businesses may not reimburse us, in whole or in part, for any of these impacts.

Our Regulated Businesses require significant capital expenditures and may suffer if we fail to secure appropriate funding to make investments, experience increases in short- and long-term interest rates or if we experience delays in completing major capital expenditure projects.

The water and wastewater utility business is capital intensive. We invest significant amounts of capital to add, replace and maintain property, plant and equipment, and to improve aging infrastructure. In 2025, we invested $3.2 billion in net Company-funded capital improvements. The level of capital expenditures necessary to maintain the integrity of our systems will continue into the future and, we believe, will increase. If we are not able to obtain sufficient financing through current or future sources of liquidity, we may be unable to maintain our existing property, plant and equipment, fund our capital investment strategies or expand our rate base to enable us to meet our growth targets. Even with adequate financial resources to make required capital expenditures, we face the additional risk that we will not complete our major capital projects on time, as a result of supply chain interruptions, construction delays, permitting delays, labor shortages or other disruptions, environmental restrictions, legal and regulatory challenges, or other obstacles. Each of these outcomes could adversely affect our business, financial condition, results of operations and cash flows.

Aging infrastructure may lead to service disruptions, property damage and increased capital expenditures and O&M expenses and other costs, all of which could negatively impact our financial results.

We have risks associated with aging infrastructure, including water and sewer mains, pumping stations and water and wastewater treatment facilities. Additionally, we may have limited information regarding buried and newly-acquired assets, which could challenge our ability to conduct efficient asset management and maintenance practices. Assets that have aged beyond their expected useful lives may experience a higher rate of failure. Failure of aging infrastructure could result in increased capital expenditures and O&M expenses and other costs. In addition, failure of aging infrastructure may result in property damage, and in safety, environmental and public health impacts. To the extent that any increased costs or expenditures are not fully recovered in rates, our results of operations, liquidity and cash flows could be negatively impacted.

Seasonality could adversely affect the volume of water sold and our revenues.

The volume of water we sell during the warmer months, typically in the summer, is generally greater than during other months, due primarily to increased water usage for irrigation systems, swimming pools, cooling

systems and other applications. Throughout the year, and particularly during typically warmer months, the volume of water sold tends to vary with temperature, rainfall levels and rainfall frequency. In the event that temperatures during the typically warmer months are cooler than normal, or if there is more rainfall than normal, the amount of water we sell may decrease and adversely affect our revenues. Two of our regulated jurisdictions currently have a revenue stability mechanism that permit us to recover a portion or all of our authorized revenues in a general rate case, regardless of volumetric consumption. These mechanisms are designed to recognize declining sales resulting from reduced consumption, while providing an incentive for customers to use water more efficiently. In those jurisdictions that have not adopted a revenue stability mechanism, our operating results could continue to be affected by seasonality.

Contamination of water supplies or our water service provided to our customers could result in service limitations and interruptions and exposure to substances not typically found in potable water supplies, and could subject us and our subsidiaries to reductions in usage and other responsive obligations, government enforcement actions, damage to our reputation and private litigation.

The water supplies that flow into our treatment plants or are delivered through our distribution system, or the water service that is provided to our customers, may be subject to contamination, including, among other types, contamination from naturally-occurring compounds, chemicals in groundwater systems, pollution resulting from manufactured sources (such as perchlorate, PFAS, methyl tertiary butyl ether, 1,4-dioxane, lead and other materials, or chemical spills or other incidents that result in contaminants entering the water source), and contamination resulting from new and emerging contaminants as well as cyber attacks, possible terrorist attacks or other similar incidents directed at our operations or industries upstream from our water treatment plants. If one of our water supplies or the water service provided to our customers is contaminated, depending on the nature of the contamination, we may have to take responsive actions that could include, among other things (1) limiting use of the water supply under a “Do Not Use” protective order that enables continuation of basic sanitation and essential fire protection, or (2) interrupting the use of that water supply or water service, in whole or in part, potentially impacting basic sanitation and fire protection needs. If service is disrupted, our financial condition, results of operations, cash flows, liquidity and reputation may be adversely affected. In addition, we may incur significant costs in order to treat the contaminated source through the expansion of our current treatment facilities or the development of new sources of supply or new treatment methods. We may be unable to recover costs associated with treating or decontaminating water supplies through insurance, customer rates, utility tariffs or contract terms, and any recovery of these costs that we are able to obtain through regulatory proceedings or otherwise may not occur in a timely manner. Moreover, we could be subject to claims for damages arising from government enforcement actions or toxic tort or other lawsuits, including class action lawsuits brought by affected parties, arising out of an interruption of service or human exposure to hazardous substances in our drinking water and water supplies. See Item 3—Legal Proceedings for information on certain pending lawsuits and other proceedings related to interruptions of water service.

Since we are engaged in the business of providing water service to our customers, contamination of the water supply, or the water service provided to our customers, could result in substantial injury or damage to our customers, employees or others and we could be exposed to substantial claims and litigation. Such claims could relate to, among other things, personal injury, loss of life, business interruption and expenses related thereto, property damage, pollution, and environmental damage and may be brought by our customers or third parties. Litigation and regulatory proceedings are subject to inherent uncertainties and unfavorable rulings can and do occur. We may not be protected from these claims or negative impacts of these claims in whole or in part by utility tariffs or other contract terms. Negative impacts to our reputation may occur even if we are not liable for any contamination or other environmental damage or the consequences arising out of human exposure to contamination or hazardous substances within the water supply or distributed finished drinking water. In addition, insurance coverage may not cover all or a portion of these losses and are subject to deductibles and other limitations. Pending or future claims against us could have a material adverse impact on our business, financial condition, results of operations and cash flows.

We are subject to adverse publicity and reputational risks, which make us vulnerable to negative customer perception and could lead to increased regulatory oversight or sanctions.

Our business and operations have a large direct and indirect customer base and, as a result, we are exposed to public criticism regarding, among other things, the reliability of water service, wastewater and related or ancillary services, the quality of water provided, and the amount, timeliness, content, accuracy and format of bills that are provided for such services. Adverse publicity and negative consumer sentiment arising out of our operations may render legislatures and other governing bodies, PUCs and other regulatory authorities, and government officials less likely to view us in a favorable light, and may cause us to be susceptible to less favorable legislative, regulatory and economic outcomes, as well as increased regulatory investigations or other oversight and more stringent regulatory or economic requirements. Unfavorable regulatory and economic outcomes may include negative investigative conclusions and/or findings, the enactment of more stringent laws and regulations governing our operations and less favorable economic terms in our long-term contracts related to MSG, as well as fines, penalties or other sanctions or requirements. The imposition of any of the foregoing could have a material negative impact on us and our long-term growth, financial condition, results of operations and cash flows.

The failure of, or the requirement to repair, upgrade or dismantle, any of our dams may adversely affect our financial condition, results of operations, cash flows and liquidity.

The properties of our Regulated Businesses segment include 75 dams, the majority of which are earthen dams. The failure of any of these dams could result in personal injury and property damage, including without limitation downstream property damage, for which we may be liable. The failure of a dam would also adversely affect our ability to supply water in sufficient quantities to our customers and could adversely affect our financial condition and results of operations. Any losses or liabilities incurred due to a failure of one of our dams might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance at acceptable rates in the future.

We also are required from time to time to decommission, repair or upgrade the dams that we own. The cost of such repairs or upgrades can be and has been material. The federal and state agencies that regulate our operations may adopt rules and regulations requiring us to dismantle our dams, which also could entail material costs. Although in most cases the PUC has permitted recovery of expenses and capital investment related to dam rehabilitation, we might not be able to recover costs of repairs, upgrades or dismantling through rates in the future. The inability to recover these costs or delayed recovery of the costs as a result of regulatory lag can affect our financial condition, results of operations, cash flows and liquidity.

Any failure of our network of water and wastewater pipes, water mains and water reservoirs could result in losses and damages that may affect our financial condition and reputation.

Our operating subsidiaries distribute water and collect wastewater through an extensive network of pipes, water and wastewater collection mains and storage systems located across the United States. A failure of major pipes, mains or reservoirs could result in injuries, property and other damage for which we may be liable. The failure of major pipes, mains and reservoirs may also result in the need to shut down some facilities or parts of our network in order to conduct repairs. Such failures and shutdowns may limit our ability to supply water in sufficient quantities to our customers and to meet the water and wastewater delivery requirements prescribed by government regulators, including PUCs with jurisdiction over our operations, and adversely affect our financial condition, results of operations, cash flows, liquidity and reputation. Any business interruption or other losses might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance at acceptable rates in the future. Moreover, to the extent such business interruptions or other losses are not covered by insurance, they may not be recovered through rate adjustments.

An important part of our growth strategy is the acquisition of water and wastewater systems, which involves risks, including competition for acquisition opportunities from other regulated utilities, governmental entities and other buyers, which may hinder or limit our ability to grow our business.

An important element of our growth strategy is the acquisition and optimization of water and wastewater systems to broaden our current, and move into new, service areas. We may not be able to acquire other systems or businesses if we cannot identify suitable acquisition opportunities or reach mutually agreeable terms with acquisition candidates, and whether or not any particular acquisition is successfully completed, these activities are expensive and time consuming and are subject to the availability of capital and personnel resources to complete such acquisitions.

As consolidation activity increases in the water and wastewater industries and competition from other regulated utilities, governmental entities and other strategic and financial buyers continues to increase, the prices for suitable acquisition candidates may increase and our ability to expand through acquisitions may otherwise be limited.

Some states in which we operate allow the respective public utility commissions to use fair market value to set ratemaking rate base instead of the traditional depreciated original cost of water or wastewater assets for certain qualifying acquisitions. Depending on the state, there are varying rules and circumstances in which fair value is determined. Some states' regulations allow ratemaking rate base to equal the lower of the average of the appraisals or the purchase price, subject to regulatory approval. There may be situations where we may pay more than the ultimate fair value of the utility assets as set by the regulatory commission, despite the fair value legislation suggesting its full recovery. In June 2024, the Pennsylvania Public Utility Commission updated existing procedures and guidelines designed to increase public involvement and ensure greater consistency in the process for reviewing and evaluating the acquisition and valuation of municipal-owned or authority-owned water and wastewater systems in Pennsylvania. This includes requirements for public notice and meetings, requires a rate impact notice, and provides other measures to improve the fair market value process when investor-owned utilities acquire water and wastewater utilities in Pennsylvania. In these situations, goodwill may be recognized to the extent there is an excess purchase price over the fair value of net tangible and identifiable intangible assets acquired through a business acquisition. Our financial condition and results of operations could be harmed by an inability to earn a return on, and recover our purchase price as a component of rate base.

The negotiation and execution of potential acquisitions as well as the integration of acquired systems or businesses with our existing operations could require us to incur significant costs and cause diversion of our management's time and resources. Future acquisitions by us could result in, among other things:

- unanticipated capital expenditures;
- unanticipated acquisition-related expenses;
- incurrence or assumption of debt, contingent liabilities and environmental liabilities and obligations, including liabilities that were unknown or undisclosed at the time of acquisition;
- failure to sufficiently utilize or apply new or existing fair market value legislation or recover acquisition adjustments or premiums due to unfavorable decisions or interpretations by PUCs, courts and other governmental authorities;
- failure to maintain effective internal control over financial reporting;
- recording goodwill and other intangible assets at values that ultimately may be subject to impairment charges;
- fluctuations in quarterly and/or annual results;
- failure to realize anticipated or perceived benefits and synergies, such as desired return on equity or profitability, cost savings and revenue enhancements; and

- difficulties in integrating or assimilating acquired systems' operations, personnel, benefits, services and systems and water quality, cybersecurity and infrastructure protection measures.

Some or all of these items could have a material adverse effect on our business. In addition, state laws on acquisition treatment or PUC interpretation thereof may affect our ability to recover costs associated with our investments in newly-acquired water and wastewater systems and any difficulties we encounter in the negotiation, execution or integration process could have a material adverse impact on our results of operations, reduce our net income and profitability or adversely affect our internal control over financial reporting.

Our Regulated Businesses are subject to condemnation and other proceedings through eminent domain or other similar authorized process, which could materially and adversely affect their results of operations and financial condition.

Municipalities and other government subdivisions have historically been involved in the provision of water and wastewater services in the United States, and organized efforts may arise from time to time in one or more of the service areas in which our Regulated Businesses operate to convert our assets to public ownership and operation through exercise of the governmental power of eminent domain, or another similar authorized process. A municipality, other government subdivision or a citizen group may seek to acquire our assets through eminent domain or such other process, either directly or indirectly as a result of a citizen petition. For example, in December 2023, the MPWMD filed eminent domain litigation against Cal Am in Monterey County Superior Court with respect to the Monterey system assets and the case is pending. See Item 3—Legal Proceedings—Proposed Acquisition of Monterey System Assets — Potential Condemnation for additional information regarding this matter.

Furthermore, the law in certain jurisdictions in which our Regulated Businesses operate provides for eminent domain rights allowing private property owners to file a lawsuit to seek just compensation against a public utility, if the public utility's infrastructure has been determined to be a substantial cause of damage to that property. In these actions, the plaintiff would not have to prove that the public utility acted negligently. In California, lawsuits have been filed in connection with large-scale natural events such as wildfires. Some of these lawsuits have included allegations that infrastructure of certain utilities triggered the natural event that resulted in damage to the property. In some cases, the PUC has disallowed recovery in rates of losses incurred by these utilities as a result of such lawsuits.

Contesting an exercise of condemnation, eminent domain or other similar process, or responding to a citizen petition, may result in costly legal proceedings and may divert the attention of management. Moreover, our efforts to resist the condemnation, eminent domain or other process may not be successful, which may require us to sell the operations at issue in a condemnation proceeding or to pay a private property owner compensation for the property damage suffered. If a municipality or other government subdivision succeeds in acquiring the assets of one or more of our Regulated Businesses through eminent domain or other process, there is a risk that we will not receive adequate compensation for the business, that we will not be able to keep the compensation, or that we will not be able to divest the business without incurring significant charges. Any of these outcomes may have a material adverse effect on our business, results of operations, financial condition, cash flows and liquidity.

We have been, and may in the future be, subject to physical and cyber attacks.

As owners and operators of critical infrastructure, we face a heightened risk of physical attack and cyber attacks from internal or external sources, including nation-state cyber actors. Our water and wastewater systems have been, and may in the future be, vulnerable to disability or failures as a result of physical or cyber attacks, acts of war or terrorism, vandalism and other causes. Our operational and information technology systems are also vulnerable to unauthorized external or internal access, due to hacking, viruses, social engineering attacks, acts of violence, war or terrorism, and other causes. Unauthorized access to confidential information located or stored on these systems could negatively and materially impact our reputation, customers, employees, suppliers

and other third parties. Such unauthorized access could be caused through, among other causes, failure to follow established policies and procedures on the part of our employees, agents, vendors, suppliers, contractors or other third parties. Further, third parties, including vendors, suppliers and contractors, who perform certain services for us or administer and maintain our networks and sensitive information, have been, and may in the future be, targets of cyber attacks and unauthorized access to their operational or information technology systems, and any cyber incident affecting our third-party business partners could significantly disrupt our operations.

While we believe that we have appropriate security measures and safeguards to protect our operational and information technology systems, the cybersecurity incident that we experienced in October 2024 demonstrated that those protections alone may not prevent a cyber attack, and we cannot guarantee that such protections will be completely successful in preventing or mitigating a future cyber attack. Future cybersecurity events could cause our operations to be disrupted, property to be damaged, and customer and other confidential information to be lost or stolen; we could experience substantial loss of revenues, response costs and other financial loss; we would likely suffer a loss or redirection of management time, attention and resources from our regular business operations; we may be subject to increased regulatory requirements; our ability to comply with environmental standards and to continue to provide reliable service to our customers may be impacted; we would likely experience litigation and other claims against us; and we may suffer damage to our reputation, any of which could have a negative impact on our business, financial condition, results of operations and cash flows. Applicable laws and regulations or contracts may require us to report cybersecurity events or breaches of securely maintained confidential data, which may cause us to incur costs related to legal claims or proceedings and regulatory fines or penalties. These types of events, and their resulting impacts, either to our facilities or assets, those of third parties, or the industry in general, may also cause us to incur additional security and insurance related costs. In addition, in the ordinary course of business, we collect and retain sensitive information, including personally identifiable information, about our customers and employees. In many cases, we outsource administration of certain functions to vendors that have been and will continue to be targets of cyber attacks. Any theft, loss or fraudulent use of customer, employee or proprietary data as a result of a cyber attack on us or a vendor, supplier, contractor or other third-party business partner could also subject us to significant litigation, liability and costs, as well as adversely impact our reputation with customers and regulators, among others.

We have obtained insurance to provide coverage for a portion of the losses and damages that may result from a physical attack, cyber attack or a security breach, but such insurance is subject to a number of exclusions and may not cover the total loss or damage caused by an attack or a breach. However, adequate insurance may not be available at rates that we believe are reasonable, and the costs of responding to and recovering from a physical attack, cyber attack or security breach incident may not, in whole or in part, be covered by insurance or recoverable in rates. See —Risks Related to our Industry and Business Operations—We may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured, below for more information.

Our business is subject to complex and evolving federal, state and local laws and regulations regarding consumer privacy and the protection or transfer of data relating to individuals, which could result in, among other things, public disclosure of incidents, private or governmental claims or litigation against us, changes to our business practices, monetary penalties, reputational harm and increased cost of operations.

Laws and regulations are changing and increasing rapidly with respect to data and consumer privacy, security and protection. We are subject to an increasing number of complex and continually evolving data and consumer privacy, security and protection laws and regulations administered by various federal, state and local governments. New laws and regulations may require us to disclose incidents to authorities, regulators and/or the public, when we otherwise may not have been required to disclose such incidents under previous laws and regulations, and such disclosures could negatively and materially impact our reputation, customers, employees, suppliers and other third parties. Federal and state governments have also adopted or are proposing other limitations on, or requirements regarding, the collection, distribution, use, security and storage of personally

identifiable information. In addition, the Federal Trade Commission and state attorneys general are applying federal and state consumer protection laws to impose standards on the collection, use and dissemination of data. Moreover, we expect that current laws, regulations and industry standards concerning privacy, data protection and information security in the United States will continue to evolve and increase, and we cannot determine the impact that compliance with such future laws, regulations or standards will have on us or on our business. Any failure or perceived failure by us to comply with current or future federal, state, or local data or consumer privacy or security laws, regulations, policies, guidance, industry standards, or legal obligations, or any incident resulting in unauthorized access to, or the acquisition, release, or transfer of, personally identifiable information or other data relating to our customers, employees and others, may result in private or governmental enforcement actions, litigation or other claims, as well as damages, fines, penalties and/or adverse disclosures, perception or publicity about us and our businesses. These events could also require us to change our business practices, and the events (including any actions we may take to respond to or following such events) or such changes may result in significant diversions of resources, distract management and divert the focus and attention of our security and technical personnel from other critical activities. Any of the foregoing consequences could have a material adverse effect on our business, reputation, financial condition, results of operations, cash flows and liquidity.

We may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured. We also rely on a limited number of mutual insurance companies for a significant portion of our insurance coverage and any disruption in these markets or changes in the terms offered by these companies could materially increase our costs or limit our ability to obtain adequate insurance.

We maintain insurance coverage, some of which may be self-insured, as part of our overall legal and risk management strategy to minimize potential liabilities arising from our operations. Our insurance programs have varying coverage limits, exclusions and maximums, and insurance companies may seek to deny claims we might make. Generally, our insurance policies cover property damage, worker's compensation, employer's liability, general liability, cybersecurity, terrorism risks and automobile liability. Each policy includes deductibles or self-insured retentions and policy limits for covered claims. As a result, we may sustain losses that exceed or that are excluded from our insurance coverage, or for which we are self-insured and must therefore utilize our own financial resources to cover such losses.

In addition, we maintain a substantial portion of our liability and property insurance coverage through a small number of mutual insurance companies that specialize in providing coverage to the utility industry. These mutual insurers provide us with competitive terms, conditions, and self-insured retentions that may not be available in the broader commercial insurance market. If one or more of these mutual insurers were to experience significant financial distress, experience a dilution in their credit ratings, decide to withdraw from the utility sector, or otherwise restrict insurance terms and conditions, we could face a substantial increase in our insurance premiums or a reduction in the scope of available coverage, or the inability to obtain coverage at all.

Although in the past we have been generally able to obtain insurance coverage related to our business, there can be no assurance that we can continue to be able to secure all necessary or appropriate insurance in the future on an economically reasonable basis or at all. For example, catastrophic events can result in decreased coverage limits, more limited coverage, increased premium costs, a reduction in the number of insurance carriers willing or able to provide us with coverage, or increased deductibles or self-insured retention requirements. Any or all of the foregoing circumstances described above could result in us experiencing losses that are uninsured or underinsured, or result in us being unable to continue to maintain appropriate or reasonable insurance coverage for our business, which could have a material adverse effect on our business, results of operations, financial condition, cash flows and liquidity.

We rely on technology to facilitate the management of our business as well as our customer and supplier relationships, and a failure or disruption of implemented technology could materially and adversely affect our business.

Technology is an integral part of our business and operations, and any failure or disruption of the technology or related systems we implement, including as a result of a cyber incident, could significantly limit our ability to manage and operate our business effectively and efficiently, which, in turn, could cause our business and competitive position to suffer and adversely affect our results of operations. We use technology systems to, among other things, obtain meter readings, bill customers, process orders, provide customer service, and manage certain plant operations and construction projects, including systems to support environmental compliance, provide for the safety of the water distributed to customers, create and manage our financial records and other operational data, track assets, remotely monitor our plants and facilities, and manage human resources, supply chain, inventory, and accounts receivable collections. In addition, we have invested resources to develop and adopt new technologies, including cloud-based systems, which rely on the security of our infrastructure, including hardware and other components provided by third parties, to support the reliability of our services and protect our data. While any failures that we have experienced have not to date had a material adverse effect on our operations, there can be no assurance that efforts to address performance failures or other issues we may experience with implemented technology will be successful in the future and that these or future failures of water meters or other technological issues will not have a material adverse effect on us.

Although we do not believe that the technology we have implemented or may in the future implement is at a materially greater risk of failure than that used by other similar organizations, our technology and operations that use or rely on technology, including cloud-based systems, remain vulnerable to damage or interruption from, among other things: failure or interruption of the technology or its related systems; loss or failure of power, internet, telecommunications or data network systems; and operator error or improper operation by, the negligent or improper supervision of, or the intentional acts of, employees, contractors and other third parties. Any or all of these events could have a material adverse impact on our business, results of operations, financial condition and cash flows.

An inability to successfully develop and implement new technologies poses substantial risks to our business and operational excellence strategies, which could have a material adverse effect on our business and financial results.

A significant part of our long-term strategic plan focuses on safety, operational excellence, cost and expense efficiency (including O&M expense efficiency), water quality and affordability, asset and capital management and the customer experience. For example, we have made and plan to continue to make significant investments in developing, deploying, integrating, enhancing and maintaining customer-facing technologies, applications to support field service and customer service operations, water source monitoring technologies, meter data management and analytics, and intelligent automation technologies. There can be no assurance that we will be successful in designing, developing, deploying, integrating or maintaining these new technologies. Because these efforts can be long-term in nature, these new technologies may be more costly or time-consuming than expected to design, develop, integrate and complete and may not ultimately deliver the expected or desired benefits upon completion. While we have and will continue to seek to recover costs and earn a return on capital expenditures with respect to the costs and expenses of development and deployment of these new technologies in our Regulated Businesses, there can be no assurance that we will be able to do so in every instance or at all, and our inability to do so may adversely affect our ability to achieve intended cost and expense, including O&M expense, efficiencies or other key performance results and, ultimately, could materially and adversely impact our business, financial condition, results of operations and cash flows.

Our inability to efficiently upgrade and improve our operational and technology systems, or implement new systems, could result in higher than expected costs or otherwise adversely impact our internal controls environment, operations and profitability.

Upgrades and improvements to computer systems and networks, or the implementation of new systems, may require substantial amounts of management's time and financial resources to complete, and may also result in system or network defects or operational errors due to multiple factors, including employees' ability to effectively use the new or upgraded system. We have implemented, and will continue to implement, technology to improve our business processes and customer interactions (including, without limitation, in connection with the installation or upgrade of our enterprise resource planning systems, and to support our cybersecurity program), and have installed new, and upgraded existing, technology systems. Any technical or other difficulties in upgrading and improving existing or implementing new technology systems may increase costs beyond those anticipated and have an adverse or disruptive effect on our operations and reporting processes, including our internal control over financial reporting. We may also experience difficulties integrating current systems with new or upgraded systems, which may impact our ability to serve our customers effectively or efficiently. Although we make efforts to minimize any adverse impact on our controls, business and operations, we cannot assure that all such impacts have been or will be mitigated, and any such impacts could harm our business (individually or collectively) and have a material adverse effect on our results of operations, financial condition and cash flows.

Disruptions in our supply chain related to goods, such as pipe, chemicals, power and other fuel, equipment, water and other raw materials, and services, could adversely impact our operations and our ability to serve our customers, as well as our financial results.

Our ability to serve our customers and operate our business in compliance with regulatory requirements is dependent upon purchasing or securing necessary goods and services from our suppliers and vendors. These items include but are not limited to contracted services, chemicals, pipe, valves, hydrants, fittings, equipment (including personal protective equipment), water, and power and other fuel. Examples of supply chain disruptions include reduced quantities of goods available in the marketplace, delays in manufacturing or shipping goods, labor shortages at our suppliers or vendors, natural or other disasters and operational impacts to some of our suppliers or vendors. Disruptions in our supply chain related to goods and services have occurred and we anticipate will continue to occur into the foreseeable future.

Supply chain disruptions may cause us to be unable to purchase or otherwise obtain needed goods or services at a reasonable price or at all, and may significantly increase the price of goods and services we may obtain from suppliers and vendors. This, in turn, may adversely impact our operations and our ability to serve our customers in compliance with regulatory requirements, as well as our associated results of operations, cash flows and financial condition. While we attempt to plan for and have contingencies in place to address supply chain disruptions, our mitigation efforts may not be successful or may have further negative impacts on us.

Our business has inherently dangerous work sites. If we fail to maintain safe work sites, we may experience workforce or customer injuries or loss of life, and be exposed to financial losses, including penalties and other liabilities.

Safety is a core value at American Water. Our safety performance and progress to our ultimate desired goal of zero injuries are critical to our ability to carry out our operations effectively and to serve our customers, and thereby, to support our reputation. We maintain health and safety practices to protect our employees, customers, contractors, vendors and the public.

At our business sites, including construction and maintenance sites, our employees, contractors and others are often in close proximity to large mechanical operating equipment, moving vehicles, pressurized water, electric and gas utility lines, below grade trenches and vaults, electrical and pneumatic hazards, fall from height hazards, suspended loads, hazardous chemicals and other regulated materials. On many sites, we are responsible

for safety and, accordingly, must implement important safety procedures and practices above governmental regulatory requirements. As an essential business that provides water and wastewater services, we are focused on the health and safety of our employees, contractors, vendors, customers and others who work at or visit our worksites. If the procedures we implement are ineffective or are not followed by our employees, contractors or others, or we fail to implement procedures, our employees, contractors and others may experience illness, or minor, serious or fatal injuries. Even when employees implement all appropriate and effective safety measures and precautions, accidents, injuries and even fatalities can and do occur. See Item 1—Business—Human Capital Resources—Safety First. Unsafe work sites have the potential to increase employee turnover, expose us to litigation and raise our operating costs. Any of the foregoing could result in financial losses, which could have a material adverse impact on our business, financial condition, results of operations and cash flows.

In addition, our operations can involve the delivery, handling, storage, use and disposal of hazardous chemicals, which, if improperly delivered, handled, stored, used or disposed of, or if the location and identification of these chemicals are not reported accurately or timely, serious injury, death, environmental damage or property damage could result, and we could be subjected to fines, penalties or other liabilities. We are also subject to various environmental, transportation and occupational health and safety regulations. Although we maintain functional employee groups whose primary purpose is to implement effective environmental health and safety work procedures and practices throughout our organization, including construction sites and operating facilities, the failure to comply with these regulations or procedures could subject us to liability.

Work stoppages and other labor relations matters could adversely affect our results of operations and the ability to serve our customers.

As of December 31, 2025, approximately 44% of our workforce was represented by unions, and we had 74 collective bargaining agreements in place with 14 different unions representing our unionized employees. These collective bargaining agreements, 26 of which are scheduled to expire during 2026, are subject to periodic renewal and renegotiation. We may not be able to successfully renew or renegotiate these labor contracts, or enter into new agreements, on terms that are acceptable to us. Any negotiations or dispute resolution processes undertaken in connection with our labor contracts could be delayed or affected by labor actions or work stoppages and by external political, economic and social factors. Labor actions, work stoppages or the threat of work stoppages, and our failure to obtain favorable labor contract terms during renegotiations, may disrupt our operations, negatively impact the ability to serve our customers, and result in higher labor costs, which could adversely affect our reputation, financial condition, results of operations, cash flows and liquidity. While we have developed contingency plans to be implemented as necessary if a work stoppage or strike does occur, a strike or work stoppage may have a material adverse impact on our financial position, results of operations and cash flows.

Financial, Economic and Market-Related Risks

Our indebtedness could adversely affect our business and limit our ability to plan for or respond to changes in our business, and we may be unable to generate sufficient cash flows to satisfy our liquidity needs.

As of December 31, 2025, our aggregate long-term and short-term debt balance (including preferred stock with mandatory redemption requirements) was $15.8 billion, and our working capital (defined as current assets less current liabilities) was in a deficit position. Our indebtedness could have important consequences, including:

- limiting our ability to obtain additional financing to fund future working capital requirements or capital expenditures;
- exposing us to interest rate risk with respect to the portion of our indebtedness that bears interest at variable rates;
- limiting our ability to pay dividends on our common stock or make payments in connection with our other obligations;

- impairing our access to the capital markets for debt and equity;
- requiring that an increasing portion of our cash flows from operations be dedicated to the payment of the principal and interest on our debt, thereby reducing funds available for future operations, dividends on our common stock or capital expenditures;
- limiting our ability to take advantage of significant business opportunities, such as acquisition opportunities, and to react to changes in market or industry conditions; and
- placing us at a competitive disadvantage compared to those of our competitors that have less debt.

During 2025, we utilized existing sources of liquidity, such as our current cash balances, cash flows from operations and borrowings under our commercial paper program, to meet our short-term liquidity requirements. We believe that existing sources of liquidity will be sufficient to meet our cash requirements for the foreseeable future. In order to meet our capital expenditure and other operational needs, however, we may be required to borrow additional funds under the revolving credit facility. In the event of a sustained market deterioration, we may need to obtain additional sources of liquidity, which would require us to evaluate available alternatives and take appropriate actions. Moreover, additional borrowings may be required to repay or refinance outstanding indebtedness. Debt maturities and sinking fund payments in 2026, 2027 and 2028 will be $1,479 million, $646 million and $869 million, respectively. We can provide no assurance that we will be able to access the debt or equity capital markets on favorable terms, if at all, to repay or refinance this debt. Moreover, as new debt is added to our current debt levels, the related risks we now face could intensify, limiting our ability to repay or refinance existing debt on favorable terms.

Given our usage of long-term debt as a key component of our capital and investment strategy, one of the principal market risks to which the Company is exposed is changes in interest rates. We have in the past entered into, and in the future may enter into, financial derivative instruments, including without limitation, interest rate swaps, forward starting swaps and U.S. Treasury lock agreements. See Item 7A—Quantitative and Qualitative Disclosures About Market Risk. However, these efforts may not be effective to fully mitigate interest rate risk, and may expose us to other risks and uncertainties, including quarterly “mark to market” valuation risk associated with these instruments, that could negatively and materially affect our financial condition, results of operations and cash flows.

Our ability to pay our expenses and satisfy our debt service obligations depends in significant part on our future performance, which will be affected by the financial, business, economic, competitive, legislative (including tax initiatives and reforms, and other similar legislation or regulation), regulatory and other risk factors described in this section, many of which are beyond our control. If we do not have sufficient cash flows to pay the principal and interest on our outstanding debt, we may be required to refinance all or part of our existing debt, reduce capital investments, sell assets, borrow additional funds or sell additional equity. In addition, if our business does not generate sufficient cash flows from operations, or if we are unable to incur indebtedness sufficient to enable us to fund our liquidity needs, we may be unable to plan for or respond to changes in our business, which could cause our financial condition, operating results and prospects to be affected materially and adversely.

Our inability to access the debt or equity capital or financial markets or other events could affect our ability to meet our long-term commitments or liquidity needs at reasonable cost, which could adversely affect our financial condition and results of operations.

In addition to cash from operations, during 2025, we relied on a $2.75 billion revolving credit facility, a $2.60 billion commercial paper program, and the debt capital markets, to satisfy our liquidity needs. Historically, we have regularly used our commercial paper program rather than the revolving credit facility as a principal source of short-term borrowing due to the generally more attractive rates we generally could obtain in the commercial paper market. As of December 31, 2025, there were no outstanding borrowings under the revolving credit facility, $1,590 million of commercial paper outstanding and $84 million in outstanding letters of credit.

There can be no assurance that we will be able to continue to access this commercial paper program or revolving credit facility, when, as and if desired, or that the amount of capital available thereunder will be sufficient to meet all of our liquidity needs at a reasonable, or any, cost.

Our ability to comply with covenants in our revolving credit facility and our other consolidated indebtedness is subject to various risks and uncertainties, including events beyond our control. For example, under the terms of the revolving credit facility, our consolidated debt cannot exceed 70% of our consolidated capitalization, as determined under the terms of the facility. If our equity were to decline or debt were to increase to a level that causes us to exceed this limit, lenders under the facility would be entitled to refuse any further extension of credit and to declare all of the outstanding debt thereunder immediately due and payable. Events that could cause a reduction in equity include, without limitation, a significant write-down of our goodwill. To avoid such a default, a waiver or renegotiation of this covenant would be required, which would likely increase funding costs and could result in additional covenants that would restrict our operational and financing flexibility. Even if we are able to comply with this or other covenants, the limitations on our operational and financial flexibility could harm our business by, among other things, limiting our ability to incur indebtedness or reduce equity in connection with financings or other corporate opportunities that we may believe would be in our best interests or the interests of our shareholders to complete.

In order to meet our future capital expenditure needs, we currently plan over the next five years to issue a combination of short-term and long-term debt, as well as additional equity. Disruptions in the debt or equity capital markets or changes in our credit ratings or other events could limit our ability to access capital on terms favorable to us or at all. While the lending banks that participate in the revolving credit facility have to date honored their commitments under those facilities, disruptions in the credit markets, changes in our credit ratings, or deterioration of the banking industry's financial condition could discourage or prevent lenders from meeting their existing lending commitments, extending the terms of such commitments, or agreeing to new commitments. In such a case, we may not be able to access the commercial paper, debt or equity capital markets, or other sources of potential liquidity, in the future on terms acceptable to us or at all. Furthermore, our inability to maintain, renew or replace commitments under our revolving credit facility could materially increase our cost of capital and adversely affect our financial condition, results of operations and liquidity. Short- or long-term disruptions or volatility in the debt or equity capital and credit markets as a result of economic, legislative, political or other uncertainties, including as a result of changes in U.S. tax and other laws, reduced financing alternatives, or failures of significant financial institutions could adversely affect our access to the capital necessary to provide adequate liquidity for our business. Significant volatility or disruptions in the debt or equity capital or credit markets, or financial institution failures, could require us to take measures to conserve cash until the market stabilizes or until alternative financing can be arranged. Such measures could include delaying or deferring capital expenditures, reducing or suspending dividend payments, and reducing other discretionary expenditures. Finally, even absent significant volatility or disruptions in the capital markets, there can be no assurance that we will be able to access markets to obtain capital or financing when necessary or desirable and on terms that are reasonable or acceptable to us. The occurrence of any of these circumstances could expose us to increased interest or other expense, require us to institute cash or liquidity conservation measures or otherwise adversely and materially affect our business, financial condition, results of operations, cash flows and liquidity, which may limit or impair our ability to achieve our strategic, business and operational goals and objectives.

Settlement provisions contained in our forward sale agreements subject us to risks if certain events occur, which could have an effect on our results of operations and liquidity, and could cause the price of our common stock to decline.

In August 2025, we entered into forward sale agreements with each of Wells Fargo National Bank, National Association, JPMorgan Chase Bank, National Association, and Mizuho Markets Americas LLC, each as forward purchasers, relating to an aggregate of 8,098,592 shares of our common stock. Each forward purchaser will have the right to accelerate the forward sale agreement to which it is a party and require us to physically settle such forward sale agreement on a date specified by such forward purchaser if:

- in the good faith, commercially reasonable judgment of such forward purchaser, it or its affiliate is unable to borrow a number of shares of our common stock equal to the number of shares to be delivered by us upon physical settlement of such forward sale agreement or it or its affiliate is unable to borrow such number of shares at a rate equal to or less than an agreed maximum stock loan rate;
- we declare any dividend or distribution on shares of our common stock payable in (i) cash in excess of a specified amount (other than an extraordinary dividend), (ii) securities of another company, or (iii) any other type of securities (other than our common stock), rights, warrants or other assets for payment (cash or other consideration) at less than the prevailing market price, as reasonably determined by such forward purchaser;
- certain ownership thresholds applicable to such forward purchaser are exceeded;
- an event is announced that, if consummated, would result in an extraordinary event (as defined in the forward sale agreements), as well as certain events such as a delisting of our common stock (each as more fully described in the forward sale agreements); or
- certain other events of default or termination events occur, including, among other things, any material misrepresentation made by us in connection with our entry into a forward sale agreement, our bankruptcy (except as described below) or certain changes in law (each as more fully described in the forward sale agreements).

A forward purchaser's decision to exercise its right to accelerate a forward sale agreement to which it is a party (or, in certain cases, the portion thereof that it determines is affected by the relevant event) will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the physical settlement provisions of that particular forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and return on equity, and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency related to us, each forward sale agreement will automatically terminate without further liability of either party. Following any such termination, we would not issue any shares of our common stock or receive any proceeds pursuant to the forward sale agreements.

Each forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion on or prior to December 31, 2026. Each forward sale agreement will be physically settled by delivery of shares of our common stock, unless we elect to cash settle or net share settle such forward sale agreement. Upon physical settlement or, if we so elect, net share settlement of a particular forward sale agreement, delivery of shares of our common stock in connection with such physical settlement or (to the extent we are obligated to deliver shares of our common stock) net share settlement will result in dilution to our earnings per share and return on equity, and may adversely affect the market price of our common stock. If we elect cash settlement or net share settlement with respect to all or a portion of the shares of our common stock underlying a particular forward sale agreement, we expect that the relevant forward purchaser (or an affiliate thereof) will purchase a number of shares of our common stock necessary to satisfy its or its affiliate's obligation to return the shares of our common stock borrowed from third parties in connection with the related sales of shares of our common stock under that forward sale agreement and, upon net share settlement, its obligation to deliver shares to us, if applicable. If the market value of shares of our common stock during the relevant valuation period under the particular forward sale agreement is above the applicable forward sale price, in the case of cash settlement, we would be obligated to pay the relevant forward purchaser under that particular forward sale agreement an amount in cash equal to the difference multiplied by the number of shares of our common stock underlying that particular forward sale agreement subject to cash settlement or, in the case of net share settlement, we would be obligated to deliver to the relevant forward purchaser a number of shares of our common stock having a value equal to the difference multiplied by the number of shares of our common stock underlying that particular forward sale agreement subject to net share settlement. Thus, we could be responsible for a potentially substantial cash payment or share delivery obligation.

In addition, the purchase of shares of our common stock in connection with the relevant forward purchaser or its affiliate unwinding its hedge positions could cause the market price of our common stock to increase over such time (or prevent a decrease over such time), thereby increasing the amount of cash we would owe to the relevant forward purchaser (or decreasing the amount of cash that the relevant forward purchaser would owe us) upon a cash settlement of the relevant forward sale agreement or increasing the number of shares of our common stock we would be obligated to deliver to the relevant forward purchaser (or decreasing the number of shares of our common stock that the relevant forward purchaser would be obligated to deliver to us) upon net share settlement of the relevant forward sale agreement. We will not be able to control the manner in which the forward purchasers unwind their hedge positions.

The forward sale price that we expect to receive upon physical settlement of the forward sale agreements is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of such forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day.

In certain bankruptcy or insolvency events, the forward sale agreements will automatically terminate, and we would not receive the expected proceeds from the forward sales of our common stock.

If we institute or consent to, or an appropriate regulatory or other authority institutes against us, a proceeding seeking a judgment in bankruptcy or insolvency or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights or if we or such authority presents a petition for our winding up or liquidation or we consent to such a petition, each forward sale agreement will automatically terminate. If a forward sale agreement so terminates, we would not be obligated to deliver to the relevant forward purchaser any shares of our common stock not previously delivered (or for which physical settlement has not been elected), and the relevant forward purchaser would be discharged from its obligation to pay the forward sale price per share in respect of any shares of our common stock not previously settled (or for which physical settlement has not been elected). Therefore, to the extent there are any shares of our common stock with respect to which we have not elected to physically settle under a forward sale agreement at the time of the institution of or consent to any such bankruptcy or insolvency proceedings or any such petition, we would not receive the forward sale price per share in respect of those shares of our common stock.

Our shareholders may experience dilution as a result of the issuance of shares upon physical or net share settlement of the forward sale agreements, which may impact our earnings per share and the book value and fair value of our common stock.

Our issuance of common stock pursuant to a forward sale agreement upon physical settlement or net share settlement thereof will have a dilutive effect on our earnings per share. Any additional future issuances of our common stock will reduce the percentage of our common stock owned by investors who do not participate in future issuances. Shareholders will not be entitled to vote on our issuance of additional common stock. In addition, our shareholders may experience dilution in both the book value and fair value of their shares.

The conditional exchange feature of the Exchangeable Notes, if triggered, may adversely affect our liquidity and financial condition and may dilute the ownership interest of our shareholders or may otherwise depress the price of parent company's common stock.

In June 2023, American Water Capital Corp., our wholly owned finance subsidiary ("AWCC"), issued $1,035 million aggregate principal amount of Notes. See Note 11—Long-Term Debt in the Notes to the Consolidated Financial Statements for a description of the Exchangeable Notes. In the event the conditional exchange feature of the Exchangeable Notes is triggered and one or more holders elect to exchange their Exchangeable Notes, AWCC would be required to settle any exchanged principal through the payment of cash,

which could adversely affect our liquidity. If AWCC elects to settle the portion, if any, of an exchange obligation in excess of the aggregate principal amount of the Exchangeable Notes being exchanged in shares of parent company common stock or a combination of cash and shares of such common stock, any sales in the public market of the common stock deliverable upon such exchange could adversely affect prevailing market prices of parent company common stock. In addition, the existence of the Exchangeable Notes may encourage short selling by market participants because the exchange of the Exchangeable Notes could be used to satisfy short positions, and any anticipated exchange of the Exchangeable Notes for shares of such common stock could depress the price of such common stock.

Parent company may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds.

Parent company is a holding company and, as such, it has no substantive operations of its own. Substantially all of our consolidated assets are held by subsidiaries. Parent company's ability to meet its financial obligations and to pay dividends on its common stock is primarily dependent on the net income and cash flows of its subsidiaries and their ability to pay upstream dividends or repay indebtedness to parent company. Prior to paying dividends to parent company, our regulated subsidiaries must comply with applicable regulatory restrictions and financial obligations, including, for example, debt service and preferred and preference stock dividends, as well as applicable corporate, tax and other laws and regulations and agreements, and our covenants and other agreements. Our subsidiaries are separate legal entities and have no obligation to pay or upstream dividends to parent company. A failure or inability of any of these subsidiaries to pay such dividends or repay intercompany obligations could have a material adverse impact on our liquidity and parent company's ability to pay dividends on its common stock and meet its other obligations.

We have a significant amount of goodwill and other assets measured and recorded at fair value on a recurring basis, and we may be required to record impairments or changes in fair value to these assets, which may negatively affect our financial condition and results of operations.

Our assets as of December 31, 2025, included $1.2 billion of goodwill and $254 million of total assets measured and recorded at fair value on a recurring basis. The goodwill is primarily associated with the acquisition of American Water by an affiliate of our previous owner in 2003. Goodwill represents the excess of the purchase price the purchaser paid over the fair value of the net tangible and other intangible assets acquired. Goodwill is recorded at fair value on the date of an acquisition and is reviewed annually or more frequently if changes in circumstances indicate the carrying value may not be recoverable. As required by the applicable accounting rules, in the past, we have taken significant non-cash charges to operating results for impairments to goodwill or other intangible assets, and have recorded changes in fair value of financial instruments and other assets. We may be required to recognize in the future an impairment of goodwill or a change in fair value of financial instruments or certain other assets due to market conditions, other factors related to our performance or the performance of an acquired business, or other circumstances that may impact the fair value of a financial instrument or the other asset. See Note 18—Fair Value of Financial Information in the Notes to the Consolidated Financial Statements for information on the fair value of financial and other assets. These market conditions could include a decline over a period of time of our stock price, a decline over a period of time in valuation multiples of comparable water utilities, market price performance of our common stock that compares unfavorably to our peer companies, decreases in control premiums, or other circumstances. A decline in the results forecasted in our business plan due to events such as changes in rate case results, capital investment budgets or interest rates, could also result in an impairment charge. Recognition of impairments of goodwill and any changes in fair value of other assets would result in a charge to income in the period in which the impairment or change occurred, which may negatively affect our financial condition, results of operations and total capitalization. The effects of any such impairment or change could be material and could make it more difficult to maintain our credit ratings, secure financing on attractive terms, maintain compliance with debt covenants and meet the expectations of our regulators.

Market volatility and other conditions may impact the value of benefit plan assets and liabilities, as well as assumptions related to the benefit plans, which may require us to provide significant additional funding.

The performance of the capital markets affects the values of the assets that are held in trust to satisfy significant future obligations under our pension and postretirement benefit plans. The value of these assets is subject to market fluctuations and volatility, which may cause investment returns to fall below our projected return rates. A decline in the market value of our pension and postretirement benefit plan assets as of the measurement date or a change in the projection of the future return on plan assets can increase the funding requirements under our pension and postretirement benefit plans. Additionally, our pension and postretirement benefit plan liabilities are sensitive to changes in interest rates. Interest rates have experienced volatility and are subject to potential further adjustments based on the actions of the U.S. Federal Reserve, and others. If interest rates are lower at the current measurement date than the prior measurement date, our liabilities would increase, potentially increasing benefit expense and funding requirements. Further, changes in assumptions, such as increases in life expectancy assumptions and increasing trends in health care costs may also increase our funding requirements. Future increases in pension and other postretirement costs as a result of reduced plan assets may not be fully recoverable in rates, in which case our results of operations and financial position could be negatively affected. In addition, market factors can affect assumptions we use in determining funding requirements with respect to our pension and postretirement plans. For example, a relatively modest change in our assumptions regarding discount rates can materially affect our calculation of funding requirements. To the extent that the discount rate used in our assumptions is reduced, our benefit obligations could be materially increased, which could adversely affect our financial position, results of operations and cash flows.

Risks Related to the Proposed Merger with Essential

The market price of shares of parent company's or Essential's common stock will fluctuate and the exchange ratio will not be adjusted to reflect such fluctuations, and as a result, the consideration at the date of the closing of the proposed Essential merger may vary significantly from the date the Essential Merger Agreement was executed.

Upon completion of the proposed Essential merger, each outstanding share of Essential common stock will be converted into the right to receive 0.305 shares of parent company common stock. The number of shares of parent company common stock to be issued pursuant to the Essential Merger Agreement for each share of Essential common stock will not change to reflect changes in the market price of parent company common stock or Essential's common stock. Because we may not complete the proposed Essential merger until a significant period of time has passed after the determination of the exchange ratio, the market value of parent company common stock issued in connection with the Essential merger and the Essential common stock surrendered in connection with the Essential merger may be higher or lower than the value of the shares at the time the exchange ratio was fixed. Stock price changes may result from market assessment of the likelihood that the proposed Essential merger will be completed, changes in our or Essential's business, operations or prospects prior to or following the proposed Essential merger, litigation or regulatory considerations, reactions from the financial markets or analysts, general business, market, industry or economic conditions, and other factors both within and beyond our control, including the risks, uncertainties and other factors described in this Annual Report on Form 10-K and in our other SEC filings. We may not terminate the Essential Merger Agreement solely because of changes in the market price of either company's common stock.

The proposed Essential merger is subject to various closing conditions, including the receipt of consents and approvals from various governmental and regulatory entities and third parties, and a failure to obtain all such consents or approvals or to satisfy such other closing conditions could prevent or delay the completion of the proposed Essential merger or impose conditions that could have a material adverse effect on us or the combined company.

We anticipate that, subject to the receipt of all required regulatory and other consents and approvals and the satisfaction or waiver of all other closing conditions, the Essential merger will be completed in the first quarter of

2027. Among other closing conditions, completion of the proposed Essential merger is conditioned upon the receipt of such required consents, orders and approvals from various governmental and regulatory entities and other third parties, including PUCs in certain states in which either or both companies operate, including without limitation the Pennsylvania Public Utility Commission. The proposed merger is also subject to review under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, and the expiration or earlier termination of the waiting period (and any extension of the waiting period) applicable to the proposed merger is a condition to closing the proposed merger.

We cannot provide any assurance that all of the required consents, orders and approvals will be obtained or that these consents, orders or approvals will not be conditioned on terms, conditions or restrictions that would be detrimental to the combined company after the completion of the Essential merger, including requiring one or both companies to dispose of certain assets. The Essential Merger Agreement allows, subject to certain conditions, limitations and exclusions, each party to terminate the Essential Merger Agreement (and generally without the payment of a termination fee to the non-terminating party) if the final terms of any of the required regulatory consents, orders or approvals would result in or require an undertaking of efforts or the taking of action that would reasonably be expected to have, individually or in the aggregate, a "burdensome effect" (as defined in the Essential Merger Agreement). Any substantial delay in obtaining satisfactory consents, orders or approvals, or the imposition of any requirements, terms or conditions in connection with a party's obtaining such consents, orders or approvals, could be on terms that we or Essential do not believe to be reasonable or could cause a material reduction in the expected benefits of the proposed merger and/or an impairment or deterioration in our or Essential's relationships with their respective applicable PUCs. If any such delays or conditions are significant enough, one or both parties may decide to abandon the proposed Essential merger and terminate the Essential Merger Agreement, subject to its terms. If the proposed merger is not completed, our ongoing businesses may be adversely affected, including, as follows:

- having to pay certain significant costs relating to the proposed merger without receiving the benefits of the proposed merger, including, in certain circumstances, a payment by us to Essential of a termination fee of $835 million in the case of a termination fee payable by us to Essential;
- diversion of management's attention from day-to-day operations;
- not pursuing other strategic transactions that we may have otherwise considered had we not entered into the Essential Merger Agreement with Essential;
- we will have been subject to certain restrictions on the conduct of our ongoing businesses, which may have prevented us from making certain acquisitions or dispositions or pursuing certain business opportunities while the proposed merger was pending; and
- the price of parent company's common stock may decline to reflect assumptions by the market as to whether the proposed merger will be completed.

The proposed Essential merger may cause suppliers, strategic partners, certain customers or others to delay or defer decisions regarding our business, and may adversely affect our ability to effectively manage our business.

The proposed Essential merger will be completed only if stated conditions are satisfied, including the receipt of the requisite regulatory and other approvals, among other conditions. Many of the conditions are outside the parties' control, and both parties also have certain rights to terminate the Essential Merger Agreement. Accordingly, there may be uncertainty regarding the completion of the proposed merger. This uncertainty, or any disagreement with the decision to enter into the Essential Merger Agreement, may cause our suppliers, vendors, strategic partners, certain customers or others that deal with us to delay or defer entering into contracts or make other decisions concerning us, or to seek to change or cancel existing business relationships. Any delay or deferral of those decisions or changes in existing agreements or relationships could have a material adverse effect on us and our financial condition and results of operations.

The Essential Merger Agreement contains provisions that limit our ability to pursue certain alternatives to the proposed Essential merger, which could discourage a potential acquirer from making an alternative transaction proposal and, in certain circumstances, could require us to pay to the other party a significant termination fee.

Under the Essential Merger Agreement, we and Essential are each restricted, subject to limited exceptions, from entering into certain alternative transactions in lieu of the proposed Essential merger, including, among other things, soliciting, initiating, knowingly encouraging or knowingly facilitating the making of a proposal that is or would reasonably be expected to lead to a competing acquisition proposal from any person. Each of our Board of Directors and Essential's board of directors is limited in its ability to change its recommendation with respect to the proposed merger and related proposals. We and/or Essential may terminate the Essential Merger Agreement and enter into an agreement with respect to a superior proposal only if specified conditions have been satisfied, including compliance with the non-solicitation provisions of the Essential Merger Agreement. These provisions could discourage a third party that may have an interest in acquiring all or a significant part of us or Essential from considering or proposing such an acquisition, even if such third party were prepared to pay consideration with a higher per share cash or market value than the consideration proposed to be received or realized in the proposed merger, or the competing transaction might result in a potential acquirer proposing to pay a lower price than it would otherwise have proposed to pay because of the added expense of the termination fee that may become payable in certain circumstances. Under the Essential Merger Agreement, in the event the Essential Merger Agreement is terminated to accept a superior proposal, or under certain other circumstances, we would be required to pay a termination fee of $835 million to Essential in the case of a termination of the Essential Merger Agreement by us, and Essential would be required to pay a termination fee of $370 million to us in the case of a termination of the Essential Merger Agreement by Essential.

We may be the target of securities class action and derivative lawsuits which could result in substantial costs and may delay or prevent the proposed Essential merger from being completed.

Securities class action lawsuits, derivative lawsuits, and lawsuits seeking to enjoin the proposed Essential merger are often brought against companies that have entered into a merger agreement. Even if these lawsuits are without merit, defending against these claims can result in substantial costs to the parties to the Essential Merger Agreement and divert management time and resources. Additionally, if a plaintiff is successful in obtaining an injunction prohibiting the completion of a merger, that injunction may delay or prevent such merger from being completed.

If completed, the proposed Essential merger may not achieve its anticipated results, and we may be unable to integrate Essential's operations and/or operate the combined company in the manner expected.

We entered into the Essential Merger Agreement with the expectation that the proposed Essential merger will result in various benefits, including, among other things, increased efficiencies of scale and size, increased geographic diversity, greater long-term growth opportunities for employees of the combined company, and other operating efficiencies. Achieving the anticipated benefits of the proposed merger is subject to a number of uncertainties, including whether our and Essential's businesses can be integrated in an efficient, effective and timely manner.

We could have difficulty integrating the acquired assets, personnel and operations with our own. We anticipate that the integration of the two companies may ultimately be complex, and we expect to devote significant time and resources to this integration process. Risks and uncertainties that could impact us negatively include:

- unforeseen or significant difficulties in integrating the two companies and their assets, operations, cultures and employees;
- the potential disruption of the ongoing businesses and distraction of our and Essential's management;

- changes in our business focus and/or management;
- risks related to owning, operating, maintaining and successfully managing Essential's natural gas distribution business, including any increased risks and liabilities associated with the operation of that business;
- difficulties in establishing and/or maintaining uniform standards, systems, controls, procedures and policies, including accounting and financial reporting, across both of the integrated companies, or merging or linking disparate ones;
- the potential impairment of relationships with employees and partners as a result of any integration of new management personnel;
- the potential inability to manage an increased number of locations and employees; and
- the effect of any government regulations which relate to Essential's business, including with respect to jurisdictions in which our Regulated Businesses currently do not operate.

It is possible that the integration process could take longer than anticipated and could result in the loss of valuable employees, the disruption of each company's ongoing businesses, processes and systems or inconsistencies in standards, controls, procedures, practices, policies and compensation arrangements, any of which could adversely affect the combined company's ability to achieve the anticipated benefits of the proposed Essential merger as and when expected. The combined company may have difficulty addressing possible differences in corporate cultures and management philosophies, and the various management and corporate governance constructs provided for in the Essential Merger Agreement to govern the combined company, including with respect to the board of directors of the combined company, may not operate successfully as intended or desired. Failure to achieve these anticipated benefits could result in increased costs or decreases in the amount of expected revenues and otherwise adversely affect the combined company's future business, financial condition, operating results and prospects.

The proposed Essential merger may not be accretive to our earnings and may adversely affect our earnings per share, which may negatively affect the market price of our common stock.

We currently anticipate that the proposed Essential merger will be accretive to our earnings per share in 2028, the first full year following the completion of the proposed merger. This expectation is based on preliminary estimates that are subject to change. We also could encounter additional transaction and integration-related costs, may fail to realize all of the benefits anticipated in the proposed merger or be subject to other factors that affect our preliminary estimates. Any of these factors could cause a decrease in our earnings per share or decrease or delay the expected accretive effect of the proposed merger and contribute to a decrease in the market price of our common stock.

The combined company's financial condition, results of operations and cash flows could be adversely affected by unknown or unexpected events, conditions or actions that occur prior to the closing of the proposed Essential merger.

The combined company's assets, liabilities, business, financial condition, cash flows, and operating results, as well as its business strategies and prospects, could be adversely affected before or after the closing of the proposed Essential merger as a result of previously unknown events or conditions occurring or existing before closing. Adverse changes in our or Essential's business or operations could occur or arise as a result of actions by us or Essential, or as a result of legal or regulatory developments (including, without limitation, the emergence or unfavorable resolution of pre-acquisition loss contingencies, deteriorating general business, market, industry or economic conditions), and other factors both within and beyond the control of us or Essential. A significant decline in the value of Essential's assets that we would acquire in the proposed merger or a significant increase in Essential's liabilities to be assumed could adversely affect the combined company's future business, financial condition, cash flows, operating results and prospects.

If the proposed Essential merger is completed, we may be required to record goodwill or we may acquire other assets measured and recorded at fair value, and, thereafter, we may be required to record impairments to the goodwill or changes to the fair value of the other assets, either of which may negatively affect our financial condition and results of operations.

In accordance with applicable accounting standards in the United States related to business combinations, we believe that the proposed Essential merger will be accounted for as an acquisition of Essential's common stock by parent company and will follow the acquisition method of accounting for business combinations, including with respect to goodwill. We may be required to recognize in the future an impairment of goodwill or a change in fair value of financial instruments or certain other assets due to, for example, market conditions, other factors related to our performance or the performance of Essential's business, or other circumstances that may impact the fair value of a financial instrument or the other asset. See Note 18—Fair Value of Financial Information, in the Notes to the Consolidated Financial Statements for information on the fair value of financial and other assets. Market conditions could include a decline over a period of time of our stock price, a decline over a period of time in valuation multiples of comparable water and wastewater utilities, market price performance of our common stock that compares unfavorably to our peer companies, or other circumstances. Recognition of impairments of goodwill and any changes in fair value of other assets would result in a charge to our income in the period in which the impairment or change occurred, which may negatively affect our financial condition, results of operations and total capitalization. The effects of any such impairment or change could be material and could make it more difficult to maintain our credit ratings, secure financing on attractive terms, maintain compliance with debt covenants and meet the expectations of our regulators.

We cannot assure that we will be able to continue paying quarterly dividends at the current rate, or to propose and/or maintain future quarterly dividend increases as planned.

Our shareholders have no contractual or other legal right to dividends that have not been declared. We currently expect that we will continue to pay dividends in an amount consistent with our dividend strategy and policy in effect prior to the announcement of the proposed merger, and that we will continue to propose future increases in our quarterly dividend rate consistent with our announced dividend growth strategy. However, there is no assurance that our shareholders will continue to receive payments of such dividends while the proposed Essential merger is pending or the combined company will pay such dividends following completion of the proposed merger, for a number of reasons that include, for example:

- a lack of cash to pay such dividends, due to changes in our cash requirements, capital spending plans, financing agreements, cash flow or financial position;
- our Board of Directors may decide not to declare and pay quarterly dividends in accordance with historical practice or our stated dividend strategy, or at all;
- the amount of quarterly dividends that we may pay to shareholders is subject to restriction under Delaware law and compliance with our stated dividend payment policy and strategy; and
- we may fail to receive upstream dividend payments from our subsidiaries in the same amount that we have historically, and the ability of our subsidiaries to do so is subject to various risks and uncertainties described herein and in Note 9—Shareholders' Equity—Dividends and Distributions in the Notes to Consolidated Financial Statements.

We may incur substantial and/or unexpected transaction fees and merger-related costs in connection with the proposed Essential merger.

We expect to incur substantial non-recurring expenses associated with completing the proposed Essential merger, as well as expenses related to combining the operations of the two companies. For the year ended December 31, 2025, we incurred $13 million of merger-related costs. We estimate $150 million of merger-related costs will be incurred by the Company and by Essential prior to the closing of the proposed merger. The

combined company may also incur additional unanticipated costs in or associated with the integration of the companies' businesses. Although we expect that the elimination of certain duplicative costs, as well as the realization of other efficiencies related to the integration of the two businesses, will offset some or all of the incremental transaction and merger-related costs over time, the combined company may not achieve this net benefit in the near term, or at all.

Current shareholders will have reduced ownership and voting interests after the proposed Essential merger.

Parent company has reserved for issuance shares of its common stock to be issued in the proposed Essential merger (including shares of parent company common stock issuable pursuant to the proposed treatment of Essential stock options and other equity-based awards in the proposed merger). As of December 31, 2025, parent company shareholders and Essential's shareholders would own an estimated 69% and 31% of the outstanding shares of parent company common stock, respectively, on a fully diluted basis immediately following the consummation of the proposed merger. If the proposed merger occurs, each holder of parent company common stock will remain a shareholder of parent company but with a percentage ownership of the combined company that will be smaller than the shareholder's percentage of ownership immediately prior to the proposed merger. As a result of this reduced ownership percentage, parent company shareholders will have less voting power in the combined company than they now have with respect to parent company.

Members of our management and our Board of Directors have interests in the proposed Essential merger that may be different from, or in addition to, those of other shareholders.

Members of our management and our Board of Directors have interests in the proposed Essential merger that may be different from, or in addition to, their interests as our shareholders. These interests include that the 10 members of our Board of Directors as of immediately prior to the effective time will remain on our Board of Directors immediately following the completion of the merger, Karl F. Kurz, the Board Chair with respect to our Board of Directors (or the individual serving in such position immediately prior to the effective time) will continue to serve in such position, Mr. Griffith, as President and Chief Executive Officer of American Water (or the individual serving in such position immediately prior to the effective time), will continue to serve in such position, and the individuals serving in executive vice president and senior executive positions of parent company who report to the President and Chief Executive Officer of parent company immediately prior to the effective time, will continue in such positions until the earlier of such individual's resignation or removal.

Completion of the Essential merger may trigger change in control or other provisions in certain agreements to which we or Essential or their respective subsidiaries are a party, which may have an adverse impact on the combined company's business and results of operations.

The completion of the Essential merger may trigger change in control or other provisions in certain agreements to which we or Essential or their respective subsidiaries are a party. If we and Essential are unable to negotiate waivers of those provisions or otherwise amend the terms of such agreements, the counterparties may exercise their rights and remedies under the agreements, potentially terminating the agreements or seeking monetary damages. Even if we and Essential are able to negotiate waivers or amend the terms of such agreements, the counterparties may require a fee for such waivers or amendments or renegotiate the agreements on terms less favorable to us, Essential, or the combined company. Any of the foregoing or similar developments may have an adverse impact on the combined company's business, results of operations, financial condition, and cash flows.

The future results and market value of the combined company may be adversely impacted if the combined company does not effectively manage its expanded operations following the completion of the merger or the combined company fails to successfully execute its business strategy and objectives.

Following the completion of the Essential merger, the size of the combined company's business will be significantly larger than the current size of either our or Essential's respective businesses. The combined

company's ability to successfully manage this expanded business will depend, in part, upon management's ability to design and implement operational, managerial, financial and strategic initiatives that address not only the integration of two independent standalone companies, but also the increased scale and scope of the combined business with its associated increased costs and complexity.

In addition, the success of the Essential merger will depend, in part, on the ability of the combined company to successfully execute its business strategy. If the combined company is not able to achieve its business strategy on a timely basis, or otherwise fails to perform in accordance with the expectations of the parties, the anticipated benefits of the merger may not be realized fully or at all, and the merger may materially adversely affect the results of operations, financial condition and prospects of the combined company, and, consequently, the market value of the combined company's common stock.

The proposed Essential merger will combine companies that are affected by developments in the water and wastewater utility industries and, additionally, with respect to Essential, the natural gas industry, including changes in regulation. Any failure to adapt to changing regulatory environments after the completion of the merger could adversely affect the stability of the combined company's earnings.

Because we and Essential, and each of their respective subsidiaries, are significantly regulated in the United States, the two companies have been and will continue to be affected by U.S. federal, state and local legislative, political and regulatory developments. After the merger is completed, the combined company and/or its subsidiaries will be subject to extensive regulation in the states in which the combined company will operate. The costs and burdens associated with complying with these regulations may have an adverse effect on the combined company. Moreover, potential legislative, political or regulatory changes, or other similar changes, may create greater risks to the stability of the combined company's revenue, income and earnings generally.

Additional Risks Related to Other Businesses

Parent company provides performance guarantees with respect to certain of the obligations of our Other businesses (primarily MSG), including financial guarantees or deposits, which may adversely affect parent company if the guarantees are successfully enforced.

Under the terms of certain agreements under which our Other businesses, primarily MSG, provide water and wastewater services to municipalities and federal governmental entities, parent company provides guarantees of specified performance obligations, including financial guarantees or deposits. In the event these obligations are not performed, the entity holding the guarantees may seek to enforce the performance commitments against parent company or proceed against the deposit. In that event, our financial condition, results of operations, cash flows and liquidity could be adversely affected. At December 31, 2025, we had remaining performance commitments, as measured by remaining contract revenue, and primarily related to MSG's contracts, totaling approximately $7.9 billion, of which $1.1 billion are guaranteed by parent company and the remainder is guaranteed by certain wholly owned subsidiaries of parent company. The aggregate amount of remaining performance commitments is likely to increase as the number of military installations served by MSG increases. The presence of these commitments may adversely affect our financial condition and make it more difficult for us to secure financing on attractive terms.

MSG's operations are subject to various risks associated with doing business with the U.S. government.

MSG enters into contracts with the U.S. government for the operation and maintenance of water and wastewater systems, which contracts may be terminated, in whole or in part, prior to the end of the 50-year term for convenience of the U.S. government or as a result of default or non-performance by the subsidiary performing the contract. In addition, the contract price for each of these military contracts is typically subject to either an annual economic price adjustment, or a price redetermination two years after commencement of operations and every three years thereafter. Any early contract termination or unfavorable annual economic price adjustment or

price redetermination could adversely affect our financial condition, results of operations and cash flows. Moreover, entering into contracts with the U.S. government subjects us to a number of operational and compliance risks, including dependence on the level of government spending and compliance with and changes in governmental procurement and security (including cybersecurity) regulations. We are subject to potential government investigations of our business practices and compliance with government procurement, security and cybersecurity regulations, which are complex, and compliance with these regulations can be expensive and burdensome. If we were charged with wrongdoing as a result of an investigation, we could be suspended or debarred from bidding on or receiving awards of new contracts with the U.S. government or our existing contracts could be terminated, which could have a material adverse effect on our results of operations and cash flows.

General Risk Factors

New accounting standards or changes to existing accounting standards could materially impact how we report our results of operations, cash flows and financial condition.

Our consolidated financial statements are prepared in accordance with GAAP. The SEC, the Financial Accounting Standards Board and other authoritative bodies or governmental entities may issue new pronouncements or new interpretations of existing accounting standards that may require us to change our accounting policies or critical accounting estimates. These changes are beyond our control, can be difficult to predict and could materially impact how we report our results of operations, cash flows and financial condition. We could be required to apply a new or revised standard retroactively, which could also adversely affect our previously reported results of operations, cash flows and financial condition.

Undetected errors in internal controls and information reporting could result in the disallowance of cost recovery and noncompliant disclosure.

Our internal controls, accounting policies and practices and internal information systems are designed to enable us to capture and process transactions and information in a timely and accurate manner in compliance with GAAP, requirements of applicable tax laws and regulations, federal securities laws and regulations and other laws and regulations applicable to us. We have also implemented corporate governance, internal control and accounting policies and procedures designed to comply with the requirements of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") and relevant SEC rules, as well as other applicable regulations. Management is also responsible for establishing and maintaining internal control over financial reporting and disclosure controls and procedures and is required to assess annually the effectiveness of these controls. While we believe these controls, policies, practices and systems are adequate to verify data integrity, unanticipated or unauthorized actions of employees or temporary lapses in internal controls due to shortfalls in oversight or resource constraints could lead to undetected errors that could result in the disallowance of cost recovery and non-compliant disclosure and reporting. The consequences of these events could have a negative impact on our results of operations, cash flows and financial condition and could also harm our reputation, increase financing costs or adversely affect our ability to access the capital markets.

Our continued success is dependent upon our ability to attract, hire and retain highly qualified and skilled employees.

The success of our business is dependent upon our ability to attract, hire and retain highly qualified and skilled employees understanding the needs of the communities in which we serve, including engineers and licensed operators, and water quality, regulatory and management professionals, with desired knowledge, experience and expertise. We may face challenges implementing our human capital management, recruitment and employee succession plans to attract and retain employees based on a number of factors, including, among others, market conditions, retirements, geography, and the proposed business combination with Essential. If we are unable to meet these human capital resource challenges, our business, financial condition, results of operations and cash flows may be materially and adversely impacted.

Our business may be adversely affected by the intentional or other misconduct of our employees and contractors.

Our Code of Ethics requires employees, members of our Board of Directors and contractors to make decisions ethically and in compliance with applicable law and regulatory requirements, and our Code of Ethics and its underlying policies, practices and procedures. Our Insider Trading and Prohibited Transactions Policy also requires employees, members of our Board of Directors and contractors to comply with applicable insider trading requirements and to not engage in specified types of financial transactions (such as hedging, pledging, margin and "short sale" transactions) with respect to our common stock. All employees are required to complete training on and review the Code of Ethics and the Insider Trading Policy on an annual basis, and violations of the Code of Ethics and the Insider Trading Policy could result in disciplinary actions up to, and including, termination. Despite these efforts to prevent misconduct, it is possible for employees or contractors to engage in intentional or other misconduct and violate laws and regulations through, among other things, theft, fraud, misappropriation, bribery, corruption and engaging in unlawful insider trading, conflicts of interest or related person transactions, or otherwise committing serious breaches of our Code of Ethics, our Insider Trading Policy, and our other policies, practices and procedures. Intentional or other misconduct by employees or contractors could result in substantial liability, higher costs, increased regulatory scrutiny and significant reputational harm, any of which could have a material adverse effect on our financial condition, results of operations and cash flows.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

The Company's Cybersecurity Program

The Company's cybersecurity program is an integral part of the long-term sustainability and effectiveness of the Company's operational and technology environment. To protect the integrity of its data and operational and technology systems, the Company employs a "Zero Trust" strategy that uses multiple security measures. This strategy aligns with the National Institute of Standards and Technology Cyber Security Framework and provides preventative, detective, and responsive measures to identify and manage risks. The Company periodically reviews and modifies the implementation of its cybersecurity strategy based on threat trends, program maturity, the results of assessments, and the advice of third-party security consultants.

The Company's cybersecurity program includes the following areas of focus:

- Technology that includes, among other things, encryption, threat management, monitoring, investigation support and backups for physical devices, such as mobile phones and computers, connected to the Company network;
- Identity and access management controls that include, among other things, multi-factor authentication and safeguards associated with granting elevated privileges;
- Proactive cybersecurity processes, including vulnerability scanning, penetration testing and periodic program assessments by outside security consultants and assessors;
- Reactive cybersecurity processes that are regularly evaluated using various incident response and disaster recovery exercises;
- Employee cyber risk awareness and training, including regular simulation exercises with employees, that covers cybersecurity threats and actions to prevent and report attacks; and
- Third-party risk management and security standards, including due diligence, continuous monitoring, cyber risk scoring and contractual obligations, and periodic review of third-party control environments to align the Company's risk exposure with its business requirements and risk tolerances.

Third-Party Relationships

The Company utilizes partners and third-party service providers to help deliver safe and reliable water and wastewater services across its regulated operations and has implemented a third-party risk management program to understand the cybersecurity risks to the Company that may arise out of these third-party relationships. The Company categorizes third-party relationships by risk level, which is determined primarily by the service provided by the third-party and its level of access to the Company's data. Each category has specific cybersecurity controls, data privacy and documentation requirements, which are outlined in the agreement between the Company and the third-party service provider. In addition, the Company evaluates the online security footprint for its service providers at the time of agreement, and on a regular basis, thereafter, depending on the provider's risk level. The Company reviews its agreements with third-party service providers periodically related to terms and conditions governing cybersecurity controls and data privacy. The Company also monitors, as appropriate, risks relating to potential compromises of sensitive Company information through third parties and reevaluates these risks periodically. In addition, the Company obtains annual attestation reports related to data security and privacy from certain third-party providers to further support compliance with industry-standard cybersecurity protocols.

Cybersecurity Risks

Cybersecurity threats are constantly evolving and have and will continue to become more frequent and sophisticated. Although the Company has implemented measures that it believes are reasonable to safeguard its operational and information technology systems and has sought to establish a culture of continuous monitoring and improvement, the evolving and increasingly complex nature of cybersecurity attacks and vulnerabilities means that these protections may not always be effective. To date, the Company has determined that it has not experienced a cybersecurity incident that has resulted in a material impact to the Company's financial condition, results of operations, cash flows, or business strategy. For additional information concerning cybersecurity-related risks, see Item 1A—Risk Factors—Risks Related to Our Industry and Business Operations—We have been, and may in the future be, subject to physical and cyber attacks, *and* —We may sustain losses that exceed or are excluded from our insurance coverage or for which we are self-insured.

Cybersecurity Risk Management and Strategy

The Company has established an enterprise-wide cybersecurity program designed to prevent disruption to critical information systems, minimize the loss or manipulation of sensitive information, and to timely identify, escalate and promptly remediate and recover from cybersecurity incidents and facilitate compliance with regulatory and disclosure requirements. To oversee cybersecurity risk management, the Company employs a dedicated unit, led by the Company's Chief Information Security Officer ("CISO"), to implement cybersecurity controls, assess and report on cybersecurity risks and consult with the Company's internal Enterprise Risk Management Committee, a decision-making body which supports and oversees the identification, assessment, prioritization, and mitigation strategies for enterprise-level risks, including cybersecurity risks. The CISO has over 25 years of work experience in the information technology, physical security and cybersecurity fields, including previously serving as the Company's Chief Security Officer, and holds the Certified Information Systems Security Professionals from the International Information Systems Security Certification Consortium. The CISO serves on several working groups within the Water Information Sharing & Analysis Center and across the water industry. The CISO reports directly to the Company's Chief Technology and Information Officer, who is responsible for the Company's information technology program.

The Company's cybersecurity unit conducts annual and ongoing cybersecurity awareness training and education for the Company's employees. In 2025, 100% of the Company's active workforce completed mandatory cybersecurity training. By equipping employees with knowledge and skills, the Company strives to cultivate and maintain a cybersecurity-conscious culture within its workforce.

The Company's cybersecurity risk assessment process involves considering risks associated with the nature of its business, receiving and processing inputs from internal and external stakeholders, monitoring industry

trends and risks and engaging external advisors, to assist in aligning the Company's cybersecurity processes with industry best practices. Risk assessments are conducted quarterly and annually to evaluate the effectiveness of the Company's existing security controls and serve as the basis for additional safeguards, security controls and measures. Operational and technical security controls are deployed and integrated as safeguards against unauthorized access to the Company's information systems. These controls are aimed at (i) assuring the continuity of business processes that are dependent upon automation, (ii) maintaining the integrity of the Company's data, (iii) supporting regulatory and legislative compliance requirements, and (iv) maintaining safe and reliable service to the Company's customers.

The Company has also implemented a vulnerability assessment program that is reviewed at least annually and more frequently, depending on changes to the risk environment. This process serves as a guiding enterprise-wide framework to outline the scope and procedures of the Company's cybersecurity risk management processes. By prioritizing vulnerability management and continuously evaluating the Company's internal and external environments for vulnerabilities, the Company aims to implement preventative measures to protect its information assets and technology-based infrastructure from cybersecurity threats. This approach helps to reduce the Company's exposure to material cybersecurity threat risks.

Incident Response

The Company utilizes an established internal framework based on industry standards and designed to assess promptly the severity and materiality of cybersecurity incidents based on predefined quantitative and qualitative criteria and to determine the appropriate level of response. Incidents are escalated to the relevant management teams based on their severity and materiality for prompt response and mitigation. The Company maintains a crisis response team comprised of individuals from various functional units, including without limitation Information Technology, Legal, Finance, Enterprise Risk Management, Operations and Communications, to respond to cybersecurity and physical security incidents, environmental incidents and health and safety emergencies, among others.

When a cybersecurity incident occurs, the Company establishes a cross-functional incident response team to respond to the specific cybersecurity incident. The incident response team consists of a subset of members from the standing crisis response team, including personnel with the most relevant experience related to the specific incident. This collaborative approach is intended to enable the Company to leverage expertise throughout the business to address cybersecurity events and to evaluate the potential financial, legal, operational and reputational implications of an incident, or series of related incidents. In considering the materiality of an event, related attacks, whether in terms of quantity or impact, are reviewed individually and in the aggregate to determine whether they may have a significant impact on the Company's financial condition, results of operations or business strategy, either quantitatively or qualitatively.

Cybersecurity Governance

The Board of Directors is responsible for oversight of the Company's cybersecurity program and the Company's responses to cybersecurity risk. The Board of Directors has delegated to its SETO Committee responsibility for the oversight and review of technology policy, strategy and governance, and cybersecurity issues that could impact the Company's operational performance or risk profile. The SETO Committee meets at least quarterly and receives reports related to cybersecurity threats, trends and risks, and related mitigation activities. In addition, the SETO Committee and the Board of Directors receive reports of periodic external assessments and internal testing of the effectiveness of the Company's cybersecurity program. The SETO Committee coordinates with the Audit, Finance and Risk Committee, as appropriate, on matters related to cybersecurity risk. The Audit, Finance and Risk Committee is responsible for, among other things, overseeing the adequacy and effectiveness of the Company's system of internal controls and the Company's risk assessment and management strategy, including with respect to cybersecurity risks.

ITEM 2. PROPERTIES

The Company's properties consist primarily of (i) water and wastewater treatment plants, (ii) mains and pipes used for transmission, distribution and collection of water and wastewater, (iii) wells and other sources of water supply, such as reservoirs, (iv) water and wastewater pumping stations, (v) meters and fire hydrants, (vi) general structures, including buildings, dams and treated water storage facilities, (vii) land and easements, (viii) vehicles, (ix) software rights, and (x) other equipment and facilities, the majority of which are used directly in the operation of its systems. Substantially all of the Company's properties are owned by its subsidiaries, with a large percentage subject to liens of its mortgage bonds. A wholly owned subsidiary of parent company owns the Company's corporate headquarters, located in Camden, New Jersey, and the Company and its operating subsidiaries lease office space from certain of the Company's wholly owned subsidiaries. These properties are utilized by the Company's directors, officers and staff in the conduct of the business.

The properties of the Company's Regulated Businesses consist mainly of approximately:

- 80 surface water treatment plants;
- 520 groundwater treatment plants;
- 170 wastewater treatment plants;
- 55,000 miles of transmission, distribution and collection mains and pipes;
- 1,200 groundwater wells;
- 1,800 water and wastewater pumping stations;
- 1,100 treated water storage facilities; and
- 75 dams.

The Company has ongoing infrastructure renewal programs in all states in which its Regulated Businesses operate. These programs consist of both the rehabilitation of existing mains and equipment, and the replacement of mains and equipment that have been damaged or have reached, or are near, the end of their useful service lives. The properties within Other consist mainly of office furniture and IT equipment. Approximately 49% of all properties that the Company owns are located in New Jersey and Pennsylvania.

The Company maintains property insurance against loss or damage to its properties by fire or other perils, subject to certain exceptions. For insured losses, the Company is self-insured to the extent that any losses are within the policy deductible or exceed the amount of insurance maintained.

The Company believes that its properties are generally maintained in good operating condition and in accordance with current standards of good water and wastewater industry practice.

ITEM 3. LEGAL PROCEEDINGS

Set forth below is information related to the Company's material pending legal proceedings as of February 18, 2026, other than ordinary routine litigation incidental to the business, required to be disclosed in this Annual Report on Form 10-K. The information below should be read together with Note 16—Commitments and Contingencies in the Notes to the Consolidated Financial Statements. In accordance with the SEC's disclosure rules, the Company has elected to disclose environmental proceedings involving the Company and a governmental authority if the amount of potential monetary sanctions, exclusive of interest and costs, that the Company reasonably believes will result from such proceeding is $1 million or more**.**

Alternative Water Supply in Lieu of Carmel River Diversions

Compliance with SWRCB Orders to Reduce Carmel River Diversions

Under the 2009 Order, Cal Am is required to decrease significantly its yearly diversions of water from the Carmel River according to a set reduction schedule. See Item 1—Business—Regulated Businesses—Water

Supply and Wastewater Services and Item 1A—Risk Factors. The 2009 Order responded to claims that Cal Am had not sufficiently implemented actions to terminate its unpermitted diversions of water from the Carmel River as required by the 1995 Order issued by the SWRCB. In July 2016, at the request of Cal Am and several Monterey County government agencies, the SWRCB issued the 2016 Order approving a deadline of December 31, 2021, for Cal Am's compliance with the 2009 Order.

The 2009 Order includes a condition prohibiting Cal Am from diverting water from the Carmel River for new service connections or for any increased use of water at existing service addresses resulting from a change in zoning or use. In 2011, the California Public Utilities Commission (the "CPUC") issued a decision directing modifications in Cal Am's utility tariffs to recognize the moratorium mandated by the 2009 Order, and directing Cal Am to seek written guidance from the SWRCB with respect to any unresolved issues of interpretation or implementation of this condition. In 2012, the Deputy Director of the SWRCB sent a letter to Cal Am providing an interpretation as to the calculation of a baseline to determine increases in use of water at existing service addresses. In March 2018, the MPWMD adopted a resolution directing Cal Am to interpret the baseline in a manner that conflicts with the SWRCB's written interpretation. In May 2018, Cal Am notified the MPWMD and the SWRCB that it intends to seek declaratory relief concerning the conflicting regulatory interpretations under the 2009 Order. In an attempt to resolve these conflicting interpretations prior to seeking judicial intervention, Cal Am has met with the MPWMD and the SWRCB several times. The SWRCB agreed to circulate revisions to its 2012 interpretive letter, which would be subject to a public comment period. Any failure to follow the MPWMD's resolution or the SWRCB's written interpretation, despite these conflicting interpretations, could potentially result in fines, penalties and other actions against Cal Am.

During the fourth quarter of 2025, the MPWMD filed an application with the SWRCB seeking to modify the 2009 Order and the 2016 Order to rescind a condition included therein that prohibits (i) new service connections and (ii) increased water use at existing service connections resulting from a change in zoning or use, throughout Cal Am's Monterey service territory. The MPWMD's stated rationale for seeking to rescind this condition is a lack of threatened violation for the foreseeable future given a sufficient water supply to serve demand, and the current prohibitions restrict local housing construction needed to meet state affordable housing mandates. On December 19, 2025, Cal Am filed a response, requesting that the SWRCB deny the application or hold it in abeyance to permit Cal Am to meet with appropriate stakeholders and to develop a proposal for relief from the prohibitions.

Following issuance by the California Coastal Commission (the "Coastal Commission") in November 2022, of a coastal development permit, as described below, Cal Am continues to work constructively with all appropriate agencies to obtain the remaining required permits for the Water Supply Project. However, there can be no assurance that the Water Supply Project in its current configuration will be completed on a timely basis, if ever. For the year ended December 31, 2025, Cal Am has complied with the diversion limitations contained in the 2016 Order. Continued compliance with the diversion limitations in 2026 and future years may be impacted by a number of factors, including without limitation potential recurrence of drought conditions in California and the reduction or exhaustion of water supply reserves, and will require successful development of alternate water supply sources sufficient to meet customer demand. The 2009 Order and the 2016 Order remain in effect until Cal Am certifies to the SWRCB, and the SWRCB concurs, that Cal Am has obtained a permanent supply of water to substitute for past unauthorized Carmel River diversions. While the Company cannot currently predict the likelihood or result of any adverse outcome associated with these matters, further attempts to comply with the 2009 Order and the 2016 Order in the future may result in material additional costs and obligations to Cal Am, including fines and penalties against Cal Am in the event of noncompliance with the 2009 Order and the 2016 Order.

Monterey Peninsula Water Supply Project

CPUC Final Approval of Water Supply Project

Cal Am's ability to move forward on the Water Supply Project is and has been subject to extensive administrative review by the CPUC and other government agencies, obtaining necessary permits, and

intervention from other parties. In 2016, the CPUC unanimously approved a final decision to authorize Cal Am to enter into a water purchase agreement for the GWR Project and to construct a pipeline and pump station facilities and recover up to $50 million in associated incurred costs plus AFUDC, subject to meeting certain criteria.

In 2018, the CPUC unanimously approved another final decision finding that the Water Supply Project meets the CPUC's requirements for a CPCN and an additional procedural phase was not necessary to consider alternative projects. The CPUC's 2018 decision concludes that the Water Supply Project is the best project to address estimated future water demands in Monterey, and, in addition to the cost recovery approved in its 2016 decision, adopts Cal Am's cost estimates for the Water Supply Project, which amounted to an aggregate of $279 million plus AFUDC at a rate representative of Cal Am's actual financing costs. The 2018 final decision specifies the procedures for recovery of all of Cal Am's prudently incurred costs associated with the Water Supply Project upon its completion, subject to the frameworks included in the final decision related to cost caps, O&M costs, financing, ratemaking and contingency matters. The reasonableness of the Water Supply Project costs will be reviewed by the CPUC when Cal Am seeks cost recovery for the Water Supply Project. Cal Am is also required to implement mitigation measures to avoid, minimize or offset significant environmental impacts from the construction and operation of the Water Supply Project and comply with a mitigation monitoring and reporting program, a reimbursement agreement for CPUC costs associated with that program, and reporting requirements on plant operations following placement of the Water Supply Project in service. Cal Am has incurred $324 million in aggregate costs as of December 31, 2025, related to the Water Supply Project, which includes $107 million in AFUDC.

In September 2021, Cal Am, Monterey One Water and the MPWMD reached an agreement on Cal Am's purchase of additional water from an expansion to the GWR Project. On December 5, 2022, the CPUC issued a final decision that authorized Cal Am to enter into the amended water purchase agreement, and specifically to increase pumping capacity and reliability of groundwater extraction from the Seaside Groundwater Basin. The final decision sets the cost cap for the proposed facilities at approximately $62 million. Cal Am may seek recovery of amounts above the cost cap in a subsequent rate filing or general rate case. Additionally, the final decision authorizes AFUDC at Cal Am's actual weighted average cost of debt for most of the facilities.

On December 30, 2022, Cal Am filed with the CPUC an application for rehearing of the CPUC's December 5, 2022 final decision, and in March 2023, the CPUC issued a decision denying Cal Am's application for rehearing but adopting its proposed AFUDC for already incurred and future costs. The decision also provided Cal Am the opportunity to serve supplemental testimony to increase its cost cap for certain of the Water Supply Project's extraction wells. On May 21, 2025, the CPUC issued a decision authorizing an increase to the cost cap of $11 million for the specified extraction wells.

The amended water purchase agreement and a memorandum of understanding to negotiate certain milestones related to the expansion of the GWR Project have been signed by the relevant parties. Further hearings were scheduled in a Phase 2 to this CPUC proceeding to focus on updated supply and demand estimates for the Water Supply Project. On August 14, 2025, the CPUC approved a final decision, which was updated on October 9, 2025, finding that, as to the supply and demand estimates for the Water Supply Project, projected demand will outstrip supply by approximately 2,500 acre-feet per year as of 2050. On September 17, 2025, the City of Marina (the "City"), the Marina Coast Water District ("MCWD") and the MPWMD filed applications for rehearing of the final decision. On September 22, 2025, these parties also filed a motion to stay the final decision. The CPUC has not yet ruled on these motions.

While Cal Am believes that its expenditures to date have been prudent and necessary to comply with the 2009 Order and the 2016 Order, as well as relevant final decisions of the CPUC related thereto, Cal Am cannot currently predict its ability to recover all of its costs and expenses associated with the Water Supply Project and there can be no assurance that Cal Am will be able to recover all of such costs and expenses in accordance with the CPUC's prior decisions. See Note 16—Commitments and Contingencies in the Notes to the Consolidated

Financial Statements for further discussion. Subject to the impacts, outcomes or resolution of applicable litigation and other proceedings, construction of the desalination plant for the Water Supply Project is expected to begin in 2026, and the desalination plant is currently anticipated to be in service by the end of 2029.

Coastal Development Permit Application

In 2018, Cal Am submitted a coastal development permit application (the "Marina Application") to the City for those project components of the Water Supply Project located within the City's coastal zone. Members of the City's Planning Commission, as well as City councilpersons, have publicly expressed opposition to the Water Supply Project. In May 2019, the City issued a notice of final local action based upon the denial by the Planning Commission of the Marina Application. Thereafter, Cal Am appealed this decision to the Coastal Commission, as permitted under the City's code and the California Coastal Act. At the same time, Cal Am submitted an application (the "Original Jurisdiction Application") to the Coastal Commission for a coastal development permit for those project components located within the Coastal Commission's original jurisdiction. After Coastal Commission staff issued reports recommending denial of the Original Jurisdiction Application, noting potential impacts on environmentally sensitive habitat areas and wetlands and possible disproportionate impacts to communities of concern, in September 2020, Cal Am withdrew the Original Jurisdiction Application in order to address the staff's environmental justice concerns. In November 2020, Cal Am refiled the Original Jurisdiction Application.

In October 2022, Cal Am announced a phasing plan for the proposed desalination plant component of the Water Supply Project. The desalination plant and slant wells originally approved by the CPUC would produce up to 6.4 million gallons of desalinated water per day. Under the phased approach, the facilities would initially be constructed to produce up to 4.8 million gallons per day of desalinated water, enough to meet anticipated demand through about 2030, and would limit the number of slant wells initially constructed. As demand increases in the future, desalination facilities would be expanded to meet the additional demand. The phased approach seeks to meet near-term demand by allowing for additional supply as it becomes needed, while also providing an opportunity for regional future public participation and was developed by Cal Am based on feedback received from the community.

In November 2022, the Coastal Commission approved the Marina Application and the Original Jurisdiction Application with respect to the phased development of the proposed desalination plant, subject to compliance with a number of conditions, all of which Cal Am expects to satisfy. Cal Am continues to seek the remaining permits necessary to construct the Water Supply Project.

In December 2022, the City, MCWD, MCWD's groundwater sustainability agency ("GSA"), and the MPWMD jointly filed a petition for writ of mandate in Monterey County Superior Court against the Coastal Commission, alleging that the Coastal Commission violated the California Coastal Act and the California Environmental Quality Act in issuing a coastal development permit to Cal Am for construction of slant wells for the Water Supply Project. Cal Am is named as a real party in interest. In April 2024, the court granted defendants' motion for judgment on the pleadings and dismissed one of MCWD's causes of action in its petition. After trial and subsequent proceedings ending in the first quarter of 2025, on May 12, 2025, the court entered its final decision denying the petition in full. On July 24, 2025, a notice of appeal was filed. This matter remains pending.

Proposed Zoning Changes at CEMEX, Inc. Site for Slant Wells

In August 2018, the City circulated a public review draft of proposed amendments to its local coastal program and zoning ordinance, and placed the matter for consideration on the Planning Commission's agenda for its September 2018 meeting. The proposed amendments would change zoning at a site owned by CEMEX, Inc. ("CEMEX") to open space and restrict future uses, including with respect to Cal Am's planned use of the site for the slant wells for the Water Supply Project. Any change to the City's local coastal program must ultimately be

approved by the Coastal Commission. Cal Am, CEMEX and the Coastal Commission each submitted letters opposing the proposed amendments. At its November 2018 meeting, the Planning Commission adopted a resolution recommending that the Marina City Council consider approving the amendments.

In December 2018, the Marina City Council considered the proposed amendments. Cal Am, CEMEX and the Coastal Commission again submitted letters opposing the proposed changes, but the City Council unanimously adopted a resolution amending its local coastal plan and a draft amendment to its zoning ordinance. Changes to the ordinance require a second reading before becoming final, which occurred at the City's December 2018 meeting. The changes to the local coastal plan would need to be submitted to the Coastal Commission for approval; however, the Coastal Commission's November 2022 approval of Cal Am's coastal development permit application has rendered moot the impact of these proposed local coastal program and zoning changes on the issuance of the coastal development permit.

Test Slant Well Permitting

A preliminary step to building the Water Supply Project desalination plant is the construction and operation of a test slant well to confirm the suitability of the property on which intake wells will be located to draw water from under Monterey Bay. In November 2014, the Coastal Commission approved coastal development permits for the test slant well, enabling Cal Am to construct and operate the test slant well. Effective February 28, 2018, test slant well pumping ceased, except for minimal maintenance pumping activities, in accordance with Cal Am's coastal development permits. Because Cal Am may use the test slant well as one of the slant wells for the Water Supply Project, Cal Am sought and obtained from the Coastal Commission permit amendments to allow the test slant well to remain in place and be maintained until February 28, 2027. A required lease obtained from the California State Lands Commission, as amended, expires on December 16, 2027.

Water Supply Project Land Acquisition and Slant Well Site Use

In July 2017, the Coastal Commission adopted a consent agreement and cease and desist order requiring sand mining operations on the property owned by CEMEX on which intake wells for the Water Supply Project will be located, to cease by the end of 2020 and the property to be sold to either a non-profit or governmental entity. The consent agreement strictly limits future use of the property but preserves Cal Am's existing property rights and allows uses consistent with existing easements and other rights of record. A permanent easement granted by CEMEX to Cal Am was recorded in June 2018 to allow Cal Am access to the property and to construct, operate and maintain the Water Supply Project intake wells. In November 2019, the City notified CEMEX that, based on this permanent easement and Cal Am's proposed use of the site for the intake wells, CEMEX has breached or will soon breach a prior 1996 annexation agreement (to which Cal Am was not a party). The City states that it intends to seek declaratory relief from CEMEX and Cal Am ordering that Cal Am's extraction is limited to 500 acre-feet per year of groundwater, that Cal Am cannot export extracted water out of the basin, and that the permanent easement granted by CEMEX to Cal Am is void. CEMEX has denied the City's claims and requested indemnification from Cal Am under the terms of the permanent easement. Cal Am and CEMEX believe that there is no valid limitation under the annexation agreement on Cal Am's right to pump brackish groundwater and seawater at the site for desalination and use by Cal Am's customers.

In May 2020, the City filed a lawsuit in Monterey County Superior Court, naming Cal Am and CEMEX as defendants, and Monterey County Water Resources Agency ("MCWRA") and MCWD as real parties in interest. The lawsuit, as amended, alleges a claim for breach of contract against CEMEX and seeks declaratory relief to void the permanent easement and prohibiting extraction of water by Cal Am's slant wells at the CEMEX site in excess of 500 acre-feet per year and the export of such water outside the groundwater basin. In November 2020, Cal Am, CEMEX and MCWRA filed demurrers, which were overruled by the court at a hearing held in February 2021.

In August 2020, MCWD filed a cross-complaint in the May 2020 lawsuit against Cal Am, CEMEX and MCWRA, alleging claims for specific performance of certain provisions of the 1996 annexation agreement related to the property owned by CEMEX on which intake wells for the Water Supply Project will be located, as

well as claims of water rights, nuisance and unreasonable water use, and seeking additional declaratory relief. Following various rulings on demurrers filed by Cal Am, CEMEX and MCWRA, in February 2021, the court sustained, without leave to amend, the demurrer to MCWD's nuisance claim and overruled the remainder of the demurrers. In October 2021, the court granted a motion filed by Cal Am related to MCWD's cross-complaint, which motion requested a referral of certain issues related to MCWD's water rights and unreasonable use claims to the SWRCB for its expert advisory opinion. The SWRCB held hearings in 2022 and 2023, on the referred issues before its administrative hearing officer. On June 25, 2025, the SWRCB administrative hearing officer transmitted a final report of an advisory opinion to the SWRCB's board for approval, as well as to the parties and the Monterey County Superior Court. The final report analyzes potential impacts to the groundwater basin and groundwater users based on predictive modeling presented by the parties' experts, and concludes, among other things, that the slant well pumping is not expected to materially impact MCWD's water rights, or its ability to draw water from its wells. The report also finds that although some harm to the groundwater basin may occur in the form of increased seawater intrusion and lowering of groundwater levels, any such harm should be balanced against the benefits of the project, and could be avoided or remedied by a physical solution. Trial commenced on November 12, 2025, and is expected to continue into the first quarter of 2026.

Regional Water Quality Control Board Approval of NPDES Permit Amendment

A requirement of the desalination plant that is a key component of the Water Supply Project is the discharge of brine through Monterey One Water's outfall. As a condition to Cal Am's coastal development permit, an amendment of a NPDES permit must be obtained by Monterey One Water as the outfall owner from the Regional Water Quality Control Board (the "RWQCB"). The RWQCB must also determine that the proposed brine discharge complies with the desalination facility requirements under the California Ocean Plan. Working in cooperation with Monterey One Water staff and consultants, Cal Am prepared an application for submission to the RWQCB, which application and submission were approved by Monterey One Water's board in September 2024. Following submission of the application to amend the relevant NPDES permit to the RWQCB, Cal Am's and Monterey One Water's consultants developed a less environmentally impactful alternative that reduces the number of outfall modifications required to accommodate brine discharge. The alternatives analysis was approved by Monterey One Water's board on June 30, 2025, and was submitted to the RWQCB on July 1, 2025.

Cal Am's Action for Damages Following Termination of Regional Desalination Project ("RDP")

In 2010, the CPUC had approved the RDP, which was a precursor to the current Water Supply Project and called for the construction of a desalination facility in the City of Marina. The RDP was to be implemented through a Water Purchase Agreement and ancillary agreements (collectively, the "Agreements") among MCWD, Cal Am and MCWRA. In 2011, due to a conflict of interest concerning a former member of MCWRA's Board of Directors, MCWRA stated that the Agreements were void, and, as a result, Cal Am terminated the Agreements. In ensuing litigation filed by Cal Am in 2012 to resolve the termination of the RDP, the court in 2015 entered a final judgment agreeing with Cal Am's position that four of the five Agreements are void, and one, the credit line agreement, is not void. As a result of this litigation, Cal Am was permitted to institute further proceedings, discussed below, to determine the amount of damages that may be awarded to Cal Am as a result of the failure of the RDP.

In 2015, Cal Am and MCWRA filed a complaint in San Francisco County Superior Court against MCWD and RMC Water and Environment, a private engineering consulting firm ("RMC"), seeking to recover compensatory, consequential and incidental damages associated with the failure of the RDP, as well as punitive and treble damages, statutory penalties and attorneys' fees. In 2019, MCWD was granted a motion for summary judgment related to the tort claims in the complaint. A settlement as to the non-tort claims was finalized and entered into in March 2020, in which MCWD and RMC paid Cal Am an aggregate of $5.2 million to resolve Cal Am's contract claims against MCWD and all claims against RMC relating to the RDP. Under this agreement, Cal Am's and MCWRA's right to appeal the dismissal of their tort claims against MCWD were expressly reserved.

In July 2020, Cal Am appealed the grant of summary judgment on MCWD's tort claims, and in December 2022, the trial court's decision was reversed on appeal with instructions to vacate its prior orders granting MCWD's motions for summary judgment and to enter new orders denying the motions. In February 2023, MCWD filed a petition for review of the appellate decision with the California Supreme Court, which was denied in March 2023. In June 2024, MCWD filed a motion for judgment on the pleadings. In December 2024, the court granted MCWD's motion without leave to amend, dismissing all of Cal Am's remaining claims. On February 27, 2025, Cal Am and MCWRA each filed a Notice of Appeal of the trial court's decision. This matter remains pending.

Proposed Acquisition of Monterey System Assets — Potential Condemnation

Local Agency Formation Commission Litigation

In November 2018, voters in Monterey, California passed "Measure J," which decided that the MPWMD should conduct a feasibility study concerning the potential purchase of Cal Am's Monterey system assets, and, if feasible, to proceed with a purchase of those assets without an additional public vote. This service territory represents approximately 40,000 customers. In 2019, the MPWMD issued a preliminary valuation and cost of service analysis report, finding in part that (i) an estimate of the Monterey system assets' total value plus adjustments would be approximately $513 million, (ii) the cost of service modeling results indicate significant annual reductions in revenue requirements and projected monthly water bills, and (iii) the acquisition of the Monterey system assets by the MPWMD would be economically feasible. In 2020, the MPWMD certified a final environmental impact report, analyzing the environmental impacts of the MPWMD's project to (i) acquire the Monterey system assets through the power of eminent domain, if necessary, and (ii) expand its geographic boundaries to include all parts of this system.

In February 2021, the MPWMD filed an application with the Local Agency Formation Commission of Monterey County ("LAFCO") seeking approval to become a retail water provider and annex approximately 58 parcels of land into the MPWMD's boundaries. In June 2021, LAFCO's commissioners voted to require a third-party independent financial study as to the feasibility of an acquisition by the MPWMD of the Monterey system assets. In December 2021, LAFCO's commissioners denied the MPWMD's application to become a retail water provider, determining that the MPWMD does not have the authority to proceed with a condemnation of the Monterey system assets. In April 2022, the MPWMD filed a lawsuit against LAFCO challenging its decision to deny the MPWMD's application seeking approval to become a retail water provider. In June 2022, the court granted, with conditions, a motion by Cal Am to intervene in the MPWMD's lawsuit against LAFCO. In December 2022, the court sustained in part, and denied in part, demurrers that had been filed by LAFCO seeking to dismiss the MPWMD's lawsuit.

In December 2023, the Monterey County Superior Court issued a writ of mandate directing LAFCO to vacate and set aside its original denial of the MPWMD's application to serve as a retail water provider (in conjunction with its effort to acquire the Monterey system assets) and, if requested, to re-hear the application in compliance with all applicable law. The court held that LAFCO incorrectly applied two statutory standards and noted a lack of sufficient evidence to support certain of LAFCO's factual findings. As a result, the LAFCO denial has been nullified and LAFCO will be required to hold another hearing on the MPWMD's application. In February 2024, each of Cal Am and LAFCO filed a notice of appeal with the California Court of Appeal regarding the Monterey County Superior Court's decision to issue the writ of mandate, and the MPDMD filed a notice of cross-appeal. This matter remains pending.

MPWMD Condemnation Action

Separate from the proceedings related to the MPWMD's application with LAFCO, the MPWMD notified Cal Am in October 2022 of a decision to appraise the Monterey system assets and requested access to a number of Cal Am's properties and documents to assist the MPWMD with such an appraisal. Cal Am responded shortly thereafter, denying the request for access, and stating that the MPWMD does not have the right to appraise Cal

Am's system without LAFCO approval to become a retail water provider. In April 2023, Cal Am rejected an offer by the MPWMD to purchase the Monterey system assets for $448.8 million. Over the written and oral objections of Cal Am, at a hearing held in October 2023, the MPWMD adopted a resolution of necessity to authorize it to file an eminent domain lawsuit with respect to the Monterey system assets.

In December 2023, the MPWMD filed a lawsuit against Cal Am in Monterey County Superior Court seeking to condemn the Monterey system assets. In February 2024, Cal Am filed a motion requesting the Monterey County Superior Court dismiss the MPWMD's eminent domain lawsuit seeking to condemn Cal Am's Monterey system assets. Cal Am's motion asserted that the MPWMD lacks legal authorization from both the California legislature and LAFCO to become a retail water provider and the lawsuit improperly seeks to effect a taking of property outside the boundaries of the MPWMD's territory. In November 2024, the court issued a ruling denying Cal Am's motion to dismiss, and Cal Am filed its answer to the complaint in December 2024. On August 20, 2025, Cal Am filed a motion for summary judgment as to the MPWMD's condemnation action, alleging that without LAFCO approval, the MPWMD does not have legal authority to pursue eminent domain. On the same date, the MPWMD filed a motion for summary adjudication of the same issue, arguing that LAFCO approval is not required to proceed with its condemnation action. By orders dated December 29, 2025, the court denied both motions. This lawsuit remains pending.

While the Company cannot currently predict the outcome of this lawsuit, the Company believes that, given existing legal authorities and its other defenses, Cal Am should be able to defend itself successfully against the MPWMD's eminent domain lawsuit.

Dunbar, West Virginia Class Action Litigation

On the evening of June 23, 2015, a 36-inch pre-stressed concrete transmission water main, installed in the early 1970s, failed. The water main is part of the West Relay pumping station located in the City of Dunbar, West Virginia and owned by West Virginia-American Water Company, the Company's West Virginia subsidiary ("WVAWC"). Water service was fully restored by July 1, 2015, to all customers affected by this event.

On June 2, 2017, a complaint captioned *Jeffries, et al. v. West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of residents and business owners who lost water service or pressure as a result of the Dunbar main break. The complaint alleged breach of contract by WVAWC for failure to supply water, violation of West Virginia law regarding the sufficiency of WVAWC's facilities and negligence by WVAWC in the design, maintenance and operation of the water system. In July 2020, the Circuit Court entered an order granting the *Jeffries* plaintiffs' motion for certification of a class regarding certain liability issues but denying certification of a class to determine a punitive damages multiplier.

Trial in this matter had been scheduled, but before trial commenced, the parties notified the Circuit Court that an agreement in principle to settle this litigation was reached. On May 2, 2025, the parties jointly filed with the Circuit Court a proposed class action settlement agreement (the "Dunbar Settlement") with respect to the certified liability claims. On September 12, 2025, the Circuit Court issued an order granting final approval of the Dunbar Settlement. Under the terms of the approved Dunbar Settlement, WVAWC has not admitted, and will not admit, any fault or liability for any of the allegations made by the *Jeffries* plaintiffs. The maximum pre-tax amount of the Dunbar Settlement is approximately $18 million, of which the final amount of the Company's and WVAWC's contributions to the Dunbar Settlement is approximately $5 million (which have been funded through existing sources of liquidity), and the remainder has been contributed by certain of the Company's general liability insurance carriers. The Company previously recorded in the fourth quarter of 2024 a charge to earnings, net of insurance receivables, of $5 million ($4 million after-tax), with respect to the Dunbar Settlement. The actual total amount to be paid to claimants through the Dunbar Settlement will depend upon the claims approved through the claims process, but the Company does not currently anticipate that its maximum liability for the settlement will materially exceed $5 million. The deadline for claims submissions was August 25, 2025, and the settlement administrator is evaluating claim submissions to identify compensable claims.

Chattanooga, Tennessee Class Action Litigation

On September 12, 2019, Tennessee-American Water Company, the Company's Tennessee subsidiary ("TAWC"), experienced a leak in a 36-inch water transmission main, which caused service fluctuations or interruptions to TAWC customers and the issuance of a boil water notice. TAWC repaired the main by early morning on September 14, 2019, and restored full water service by the afternoon of September 15, 2019, with the boil water notice lifted for all customers on September 16, 2019.

On September 17, 2019, a complaint captioned *Bruce, et al. v. American Water Works Company, Inc., et al.* was filed in the Circuit Court of Hamilton County, Tennessee against TAWC, the Company and Service Company (collectively, the "Tennessee-American Water Defendants"), on behalf of a proposed class of individuals or entities who lost water service or suffered monetary losses as a result of the Chattanooga incident (the "Tennessee Plaintiffs"). The complaint alleged breach of contract and negligence against the Tennessee-American Water Defendants, as well as an equitable remedy of piercing the corporate veil. In the complaint as originally filed, the Tennessee Plaintiffs were seeking an award of unspecified alleged damages for wage losses, business and economic losses, out-of-pocket expenses, loss of use and enjoyment of property and annoyance and inconvenience, as well as punitive damages, attorneys' fees and pre- and post-judgment interest. In September 2020, the court dismissed all of the Tennessee Plaintiffs' claims in their complaint, except for the breach of contract claims against TAWC.

In January 2023, after hearing oral argument, the court issued an oral ruling denying the Tennessee Plaintiffs' motion for class certification. In February 2023, the Tennessee Plaintiffs sought reconsideration of the ruling by the court, and any final ruling is appealable to the Tennessee Court of Appeals, as allowed under Tennessee law. In September 2023, the court upheld its prior ruling but gave the Tennessee Plaintiffs the option to file an amended class definition. In October 2023, the Tennessee Plaintiffs filed an amended class definition seeking certification of a business customer-only class. On June 14, 2024, the court issued its written order denying the Tennessee Plaintiffs' amended class and incorporating its denial of certification of the original residential class. On June 21, 2024, the Tennessee Plaintiffs appealed both of the court's orders denying class certification. On December 4, 2025, the Court of Appeals of Tennessee denied the Tennessee Plaintiffs' appeal, and on January 30, 2026, the Tennessee Plaintiffs filed an appeal with the Supreme Court of Tennessee. This matter remains pending.

The Company and TAWC believe that TAWC has valid, meritorious defenses to the claims raised in this class action complaint, and TAWC will continue to vigorously defend itself against these allegations.

Mountaineer Gas Company Main Break

During the afternoon of November 10, 2023, WVAWC was informed that an 8-inch ductile iron water main owned by WVAWC, located on the West Side of Charleston, West Virginia and originally installed in approximately 1989, experienced a leak. In the early morning hours of November 11, 2023, WVAWC crews successfully completed a repair to the water main. A precautionary boil water advisory was issued the same day to approximately 300 WVAWC customers and ultimately lifted on November 12, 2023.

On November 10, 2023, a break was reported in a low-pressure natural gas main located near the affected WVAWC water main, and an inflow of water into the natural gas main and associated delivery pipelines occurred. The natural gas main and pipelines are owned by Mountaineer Gas Company, a regulated natural gas distribution company serving over 220,000 customers in West Virginia ("Mountaineer Gas"). The resulting inflow of water into the natural gas main and related pipelines resulted in a loss of natural gas service to approximately 1,500 Mountaineer Gas customers, as well as water entering customer service lines and certain natural gas appliances owned or used by some of the affected Mountaineer Gas customers. Mountaineer Gas reported that restoration of natural gas service to all affected gas mains occurred on November 24, 2023. The timing, order and causation of both the WVAWC water main break and Mountaineer Gas's main break are currently unknown and under investigation.

To date, a total of four pending lawsuits have been filed against Mountaineer Gas and WVAWC purportedly on behalf of customers in Charleston, West Virginia related to these incidents. On November 14, 2023, a complaint captioned *Ruffin et al. v. Mountaineer Gas Company and West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of Mountaineer Gas residential and business customers and other households and businesses supplied with natural gas in Kanawha County, which lost natural gas service on November 10, 2023, as a result of these events. The complaint alleges, among other things, breach of contract by Mountaineer Gas, trespass by WVAWC, nuisance by WVAWC, violation of statutory obligations by Mountaineer Gas and WVAWC, and negligence by Mountaineer Gas and WVAWC. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for loss of use of natural gas, annoyance, inconvenience and lost profits, as well as punitive damages.

On November 15, 2023, a complaint captioned *Toliver et al. v. West Virginia-American Water Company and Mountaineer Gas Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of all natural persons or entities who are citizens of the State of West Virginia and who are customers of WVAWC and/or Mountaineer Gas in the affected areas. The complaint alleges against Mountaineer Gas and WVAWC, among other things, negligence, nuisance, trespass and strict liability, as well as breach of contract against Mountaineer Gas. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for property damage, loss of use and enjoyment of property, annoyance and inconvenience and business losses, as well as punitive damages.

On November 16, 2023, a complaint captioned *Dodson et al. v. West Virginia American Water and Mountaineer Gas Company* was filed in West Virginia Circuit Court in Kanawha County on behalf of an alleged class of all West Virginia citizens living between Pennsylvania Avenue south of Washington Street, and Iowa Street, who are customers of Mountaineer Gas. The complaint alleges against Mountaineer Gas and WVAWC, among other things, negligence, nuisance, trespass, statutory code violations and unfair or deceptive business practices. The complaint seeks class-wide damages against Mountaineer Gas and WVAWC for property loss and damage, loss of use and enjoyment of property, mental and emotional distress, and aggravation and inconvenience, as well as punitive damages.

On January 4, 2024, a fourth complaint, captioned *Thomas v. West Virginia-American Water Company and Mountaineer Gas Company*, was filed in West Virginia Circuit Court in Kanawha County asserting similar allegations as those included in the *Ruffin*, *Toliver* and *Dodson* lawsuits, with the addition of counts alleging unjust enrichment and violations of the West Virginia Human Rights Act and the West Virginia Consumer Credit and Protection Act.

On November 17, 2023, the *Ruffin* plaintiff filed a motion to consolidate the class action lawsuits before a single judge in Kanawha County Circuit Court. On June 14, 2024, the judge in the *Ruffin* case partially granted the motion by transferring all of the four class action lawsuits to her court but deferring as premature consolidation of the cases.

On December 5, 2023, a complaint captioned *Mountaineer Gas Company v. West Virginia-American Water Company* was filed in West Virginia Circuit Court in Kanawha County seeking damages under theories of trespass, negligence and implied indemnity. The damages being sought related to the incident include, among other things, repair and response costs incurred by Mountaineer Gas and attorneys' fees and expenses incurred by Mountaineer Gas. On March 6, 2024, the motion to transfer this complaint to the West Virginia Business Court was granted and trial and resolution judges were assigned. The Business Court has set a trial date of August 10, 2026 for this matter.

On December 20, 2023, Mountaineer Gas filed answers to each of the first three class action lawsuits, which included cross-claims against WVAWC alleging that Mountaineer Gas is without fault for the claims and damages alleged in the lawsuits and WVAWC should be required to indemnify Mountaineer Gas for any damages and for attorneys' fees and expenses incurred by Mountaineer Gas in the lawsuits. WVAWC has filed a

partial motion to dismiss certain claims in the *Ruffin, Toliver, Dodson* and *Thomas* lawsuits and a motion to dismiss the cross-claims asserted against WVAWC therein by Mountaineer Gas. Mountaineer Gas subsequently voluntarily dismissed its cross-claims. On November 14, 2025, the Plaintiffs in the *Ruffin* and *Toliver* lawsuits jointly filed a motion for class certification. On December 22, 2025, the Kanawha County Circuit Court entered a joint order setting a schedule for class certification with a hearing on the motion to be held on March 17, 2026. The Court also ordered mediation and continued the previously set February 2, 2026 trial date.

On December 6, 2023, WVAWC initiated a process whereby Mountaineer Gas customers could file claims with WVAWC and seek payment from WVAWC of up to $2,000 in damages per affected household for the inconvenience arising from a loss of use of their appliances and documented out-of-pocket expenses as a result of the natural gas outage. In light of the diminishing number of new claims that had been filed, the claims process was concluded on March 8, 2024. As of December 31, 2024, a total of 594 Mountaineer Gas customers completed this claims process and each of those customers has been paid by WVAWC an average of approximately $1,500. In return, these customers were required to execute a partial release of liability in favor of WVAWC.

On November 16, 2023, the Public Service Commission of West Virginia (the "WVPSC") issued an order initiating a general investigation into both the water main break and natural gas outages occurring in this incident to determine the cause or causes thereof, as well as breaks and outages generally throughout the systems of WVAWC and Mountaineer Gas and the utility practices of both utilities. Following a series of disagreements among the parties regarding the scope of discovery, the WVPSC closed the general investigation into both utilities and ordered a separate general investigation for each utility. The WVPSC focused the two general investigations away from the cause of the events and instead on the maintenance practices of each utility during and after the main breaks. On January 29, 2024, the Consumer Advocate Division of the WVPSC filed a motion to intervene in the WVAWC general investigation.

On April 24, 2024, the staff issued a final joint memorandum in the Mountaineer Gas general investigation stating its view that Mountaineer Gas responded appropriately, reasonably and according to Mountaineer Gas's written procedures. The staff is making no recommendations for improvements to Mountaineer Gas and is recommending that the Mountaineer Gas general investigation be closed. On July 24, 2024, the staff issued a final joint memorandum in the WVAWC general investigation finding no indication of systematic failure by WVAWC and concluding WVAWC's maintenance and operating procedures were adequate to ensure safe and reliable service, subject to the implementation by WVAWC of three recommended operational improvements. Both general investigations remain pending.

The Company and WVAWC believe that the causes of action and other claims asserted against WVAWC in the class action complaints and the lawsuit filed by Mountaineer Gas are without merit and that WVAWC has valid, meritorious defenses to such claims. WVAWC continues to defend itself vigorously in these litigation proceedings. Given the current stage of these proceedings and the general investigation, the Company and WVAWC are currently unable to predict the outcome of any of the proceedings described above.

PFAS Multi-District Litigation

Several of the Company's utility subsidiaries are parties to a multi-district litigation (the "MDL") lawsuit, which commenced on December 7, 2018, in U.S. District Court for the District of South Carolina, against manufacturers of certain PFAS for damages, contribution and reimbursement of costs incurred and continuing to be incurred to address the presence of such PFAS in public water supply systems owned and operated by these utility subsidiaries and throughout their service areas. Settlements with several defendants in the MDL proceeding have received final approval by the MDL court.

As of December 31, 2025, the Company has received settlement payments from defendants 3M Company and DuPont de Nemours, Inc. totaling $159 million, net of legal fees and administrative costs and exclusive of interest. The Company intends to seek regulatory approval from its respective PUCs to apply the net proceeds for

the benefit of customers, where permissible. Regulatory approvals have been obtained with respect to seven of the Company's utility subsidiaries that are parties to the MDL, and two regulatory applications have been denied. Most of the funds received by the Company are being held in a law firm escrow account and are awaiting distribution to the Company's utility subsidiaries that are parties to the MDL after approval or denial is received from the applicable PUCs. As of December 31, 2025, approximately $47 million of the escrowed funds, including escrow interest, has been transferred from the law firm escrow account for distribution to utility subsidiaries that have received approval. The Company anticipates that, during 2026, it may receive one or more additional settlement payments from the defendants in the MDL.

During 2025, the Company was made aware of a number of substantially similar personal injury short-form complaints that had been filed in the MDL naming, in addition to various other water providers and manufacturers, certain Company utility subsidiaries as defendants. The Company believes that the claims that had been asserted are without merit and the relevant utility subsidiaries have valid, meritorious defenses to the claims. In October 2025, all MDL personal injury complaints that the Company had been made aware of were dismissed by the plaintiffs without prejudice.

General

Periodically, the Company is involved in other proceedings or litigation arising in the ordinary course of business. Other than those proceedings described in this Item 3—Legal Proceedings, the Company does not believe that the ultimate resolution of these matters will materially affect its financial position or results of operations. However, litigation and other proceedings are subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. It is possible that some litigation and other proceedings could be decided unfavorably to the Company, and that any such unfavorable decisions could have a material adverse effect on its business, financial condition, results of operations and cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Since April 23, 2008, the Company's common stock has traded on the New York Stock Exchange ("NYSE") under the symbol "AWK." As of February 9, 2026, there were 195,208,666 shares of common stock outstanding held by approximately 1,773 record holders. Holders of the Company's common stock are entitled to receive dividends when they are declared by its Board of Directors. See Note 9—Shareholders' Equity in the Notes to Consolidated Financial Statements for additional information regarding the Company's dividends.

In February 2015, the Board of Directors authorized an anti-dilutive stock repurchase program to mitigate the dilutive effect of shares issued through the Company's dividend reinvestment, employee stock purchase and executive compensation activities. The program allows the Company to purchase up to 10 million shares of its outstanding common stock over an unrestricted period of time in the open market or through privately negotiated transactions. The program is conducted in accordance with Rule 10b-18 of the Exchange Act, and, to facilitate these repurchases, the Company enters into Rule 10b5-1 stock repurchase plans with a third-party broker, which allow the Company to repurchase shares of its common stock at times when it otherwise might be prevented from doing so under insider trading laws or because of self-imposed trading blackout periods. Subject to applicable regulations, the Company may elect to amend or cancel the program or the stock repurchase parameters at its discretion to manage dilution.

From April 1, 2015, the date repurchases under the anti-dilutive stock repurchase program commenced, through December 31, 2025, the Company repurchased an aggregate of 4,860,000 shares of its common stock under the program, leaving an aggregate of 5,140,000 shares available for repurchase under this program. There were no repurchases of common stock in 2025.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with the Consolidated Financial Statements and the Notes thereto included elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about the Company's business, operations and financial performance. The cautionary statements made in this Annual Report on Form 10-K should be read as applying to all related forward-looking statements whenever they appear in this Annual Report on Form 10-K. The Company's actual results may differ materially from those currently anticipated and expressed in such forward-looking statements as a result of a number of factors, including those that are discussed under "Forward-Looking Statements," Item 1A—Risk Factors and elsewhere in this Annual Report on Form 10-K. The Company has a disclosure committee consisting of members of senior management and other key employees involved in the preparation of the Company's SEC reports. The disclosure committee is actively involved in the review and discussion of the Company's SEC filings. For a discussion and analysis of the Company's financial statements for fiscal 2024 compared to fiscal 2023, please refer to Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, filed with the SEC on February 19, 2025.

Overview

American Water is the largest and most geographically diverse, publicly-traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. The Company employs approximately 7,000 professionals who provide drinking water, wastewater and other related services to approximately 14 million people in 24 states. The Company's primary business involves the ownership of utilities that provide water and wastewater services to residential, commercial, industrial, public authority, fire service and sale for resale customers, collectively presented as the "Regulated Businesses." The Company's utilities operate in 14 states in the United States, with 3.6 million active customers with services provided by its water and wastewater networks. Services provided by the Company's utilities are subject to regulation by PUCs. The Company also operates other businesses not subject to economic regulation by state PUCs that provide water and wastewater services to the U.S. government on military installations, as well as municipalities, collectively presented throughout this Annual Report on Form 10-K within "Other." See Item 1—Business for additional information.

Financial Results

The following table provides the Company's diluted earnings per share (GAAP) and adjusted diluted earnings per share (a non-GAAP measure):

	For the Years Ended December 31,		
	2025	2024	2023
Diluted earnings per share (GAAP):			
Net income attributable to shareholders	$ 5.69	$ 5.39	$ 4.90
Non-GAAP adjustments:			
Estimated impact of favorable weather	—	(0.16)	(0.17)
Income tax impact	—	0.04	0.04
Net non-GAAP adjustment	—	(0.12)	(0.13)
Incremental interest income from amended HOS seller note	(0.13)	(0.12)	—
Income tax impact	0.03	0.03	—
Net non-GAAP adjustment	(0.10)	(0.09)	—
Transaction costs associated with the pending merger with Essential	0.07	—	—
Income tax impact	(0.02)	—	—

	For the Years Ended December 31,		
	2025	2024	2023
Net non-GAAP adjustment	0.05	—	—
Total net adjustments	(0.05)	(0.21)	(0.13)
Adjusted diluted earnings per share (non-GAAP)	$ 5.64	$ 5.18	$ 4.77

For the year ended December 31, 2025, diluted earnings per share (GAAP) was $5.69, an increase of $0.30 per diluted share compared to the prior year, which includes the net adjustments presented in the table above and discussed in greater detail in the "Adjustments to GAAP" section below. Excluding the net adjustments presented in the table above, adjusted diluted earnings per share (non-GAAP) was $5.64 for the year ended December 31, 2025, an increase of $0.46 per diluted share compared to the prior year. These results were driven primarily by the implementation of new rates in the Regulated Businesses from capital and acquisition investments. Results also reflect increased production and employee-related costs, increased depreciation and higher financing costs used to fund the current capital investment plan.

For the year ended December 31, 2024, diluted earnings per share (GAAP) was $5.39, an increase of $0.49 per diluted share compared to the prior year, which includes the net adjustments presented in the table above and discussed in greater detail in the "Adjustments to GAAP" section below. Excluding the net adjustments presented in the table above, adjusted diluted earnings per share (non-GAAP) was $5.18 for the year ended December 31, 2024, an increase of $0.41 per diluted share compared to the prior year. These results were driven primarily by the implementation of new rates in the Regulated Businesses from capital and acquisition investments. Results also reflect increased production and employee-related costs, increased depreciation and higher financing costs used to fund the current capital investment plan.

Adjustments to GAAP

Adjusted diluted earnings per share represents a non-GAAP financial measure and, as shown in the table above, is calculated as GAAP diluted earnings per share, excluding the impact of one or more of the following events: (i) estimated impact of weather; (ii) incremental interest income from the February 2, 2024 amendment to the HOS secured seller promissory note, which increased the aggregate principal amount from $720 million to $795 million and increased the interest rate from 7.00% per year to 10.00% per year; and (iii) transaction costs incurred during 2025 associated with the proposed merger with Essential. The most directly comparable GAAP measure for adjusted diluted earnings per share is the reported diluted earnings per share (GAAP) and is reconciled in the table above.

The Company believes that this non-GAAP measure provides investors with useful information by excluding certain matters that may not be indicative of its ongoing operating results (or, in the case of weather, that is outside the Company's operational control and is subject to significant period-to-period variability), and that providing this non-GAAP measure will allow investors to better understand the businesses' operating performance and facilitate a meaningful year-to-year comparison of the Company's results of operations and without the estimated impact of weather. Although management uses this non-GAAP financial measure internally to evaluate its results of operations, the Company does not intend results reflected by this non-GAAP measure to represent results as defined by GAAP, and the reader should not consider them as indicators of performance. This non-GAAP financial measure is derived from the Company's consolidated financial information but is not presented in the financial statements prepared in accordance with GAAP. This measure should be considered in addition to, and not as a substitute for, measures of financial performance prepared in accordance with GAAP. In addition, this non-GAAP financial measure as defined and used above, may not be comparable to similarly titled non-GAAP measures used by other companies, and, accordingly, may have significant limitations on its use.

Growth Through Capital Investment in Infrastructure and Regulated Acquisitions

The Company continues to grow its businesses, with the substantial majority of its growth to be achieved in the Regulated Businesses through (i) continued capital investment in the Company's infrastructure to provide safe, clean, reliable and affordable water and wastewater services to its customers, (ii) regulated acquisitions to expand the Company's services to new customers and (iii) organic growth in existing systems. In 2025, the Company invested $3.2 billion, in the Regulated Businesses, as discussed below:

- $3.2 billion capital investment in the Regulated Businesses, for infrastructure improvements and replacements; and
- $83 million to fund acquisitions in the Regulated Businesses, which added approximately 20,900 customers during 2025. This includes the Company's acquisitions effective May 28, 2025, and October 27, 2025, of all the outstanding capital stock of Audubon Water Company and Appalachian Utilities Inc., respectively, for aggregate consideration of $11 million, in the form of shares of parent company common stock.
- Approximately 18,900 new customers were added through organic growth in existing systems.

The Company expects to invest between $19 billion to $20 billion over the next five years, and between $46 billion to $48 billion over the next 10 years, including $3.7 billion in 2026. The Company's expected future investments include:

- capital investment for infrastructure improvements and replacements in the Regulated Businesses of between $17 billion to $17.5 billion over the next five years, and between $42 billion to $43 billion over the next 10 years; and
- growth from acquisitions in the Regulated Businesses to expand the Company's water and wastewater customer base of between $2 billion to $2.5 billion over the next five years, and between $4 billion to $5 billion over the next 10 years.

The Company estimates the expected capital investment for infrastructure improvements in its Regulated Businesses over the next ten years will be allocated to the following purposes: infrastructure renewal 70%; resiliency 10%; water quality, including capital expenditures related to PFAS 8%; operational efficiency, technology and innovation 5%; system expansion 4%; other 3%.

Excluding the Essential Merger Agreement, as of December 31, 2025, the Company had entered into 20 agreements with a total aggregate purchase price of $582 million for pending acquisitions in the Regulated Businesses to add approximately 104,300 additional customers.

Agreement and Plan of Merger with Essential

On October 26, 2025, parent company entered into the Essential Merger Agreement to combine the two companies in a stock-for-stock transaction. The Essential Merger Agreement provides that, upon the completion of the proposed merger, Essential's shareholders will receive 0.305 shares of parent company common stock in exchange for each share of Essential common stock eligible for exchange in the merger. Upon completion of the proposed merger, Essential will be a wholly owned subsidiary of parent company, which will retain its existing name and remain headquartered in Camden, New Jersey. The Company will continue to maintain substantial operations in Pennsylvania, including Essential's offices in Bryn Mawr and Pittsburgh, Pennsylvania.

Completion of the proposed merger is subject to certain customary conditions, including, among others, the receipt of required approvals from all applicable PUCs on such terms and conditions that would not, individually or in the aggregate, result in a Burdensome Effect (as defined in the Essential Merger Agreement), and the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976. There can be no guarantee that all of the closing conditions and approvals will be satisfied, and the

failure to complete the proposed merger on a timely basis or at all may adversely affect the Company's financial condition and results of operations. The Company currently estimates that the closing of the proposed merger will occur by the end of the first quarter of 2027. For the year ended December 31, 2025, $13 million of merger-related costs were included in Operation and maintenance expense in the Consolidated Statements of Operations. Including the costs incurred for the year ended December 31, 2025, the Company estimates a total of $150 million of merger-related costs will be incurred by the Company and by Essential prior to the closing of the proposed merger.

Purchase and Sale Agreement with Nexus Regulated Utilities, LLC

On May 19, 2025, the Company entered into a Purchase and Sale Agreement (the "Purchase Agreement") with Nexus Regulated Utilities, LLC ("Seller"), a subsidiary of Nexus Water Group, Inc., a privately-held water and wastewater utility. Seller directly owns all of the issued and outstanding equity interests in specified entities (collectively, the "Acquired Entities") that own regulated water and wastewater system assets located in Illinois, Indiana, Kentucky, Maryland, New Jersey, Pennsylvania, Tennessee and Virginia. Under the terms of the Purchase Agreement, the Company has agreed to acquire from Seller all of Seller's equity interests in each of the Acquired Entities on a cash-free and debt-free basis. The aggregate purchase price to be paid by the Company will be approximately $315 million in cash, subject to adjustment at closing based on the calculations and criteria provided in the Purchase Agreement. Aggregate rate base that would be acquired at closing is estimated to be approximately $200 million, subject to final determination by the respective PUCs. Based on current connection counts, the Company would add nearly 47,000 customer connections in total to its Regulated Businesses in the eight states above. The Company intends to fund the payment of the final purchase price through its cash flow from operations and its existing sources of liquidity. Closing is subject to certain customary and other conditions, including, among others, the receipt of all required regulatory approvals. The Company currently anticipates that the closing will occur by or before August 2026.

Other Matters

PFAS Multi-District Litigation

Several of the Company's utility subsidiaries are parties to an MDL lawsuit, which commenced on December 7, 2018, in U.S. District Court for the District of South Carolina, against manufacturers of certain PFAS for damages, contribution and reimbursement of costs incurred and continuing to be incurred to address the presence of such PFAS in public water supply systems owned and operated by these utility subsidiaries and throughout their service areas. Settlements with several defendants in the MDL proceeding have received final approval by the MDL court.

As of December 31, 2025, the Company has received settlement payments from defendants 3M Company and DuPont de Nemours, Inc. totaling $159 million, net of legal fees and administrative costs and exclusive of interest. The Company intends to seek regulatory approval from its respective PUCs to apply the net proceeds for the benefit of customers, where permissible. Regulatory approvals have been obtained with respect to seven of the Company's utility subsidiaries that are parties to the MDL, and two regulatory applications have been denied. Most of the funds received by the Company are being held in a law firm escrow account and are awaiting distribution to the Company's utility subsidiaries that are parties to the MDL after approval or denial is received from the applicable PUCs. As of December 31, 2025, the funds held in a law firm escrow account totaled $114 million and have been recorded on the Company's Consolidated Balance Sheet within other current assets. A corresponding amount has been recorded as a regulatory liability. As of December 31, 2025, approximately $47 million of the escrowed funds, including escrow interest, has been transferred from the law firm escrow account for distribution to utility subsidiaries that have received approval. The Company anticipates that, during 2026, it may receive one or more additional settlement payments from the defendants in the MDL.

The Company has also become aware of a number of substantially similar personal injury short-form complaints that had been filed in the MDL naming, in addition to various other water providers and

manufacturers, certain Company utility subsidiaries as defendants. The Company believes that the claims asserted are without merit and the relevant utility subsidiaries have valid, meritorious defenses to the claims. In October 2025, all MDL personal injury complaints that the Company had been made aware of were dismissed by the plaintiffs without prejudice.

Environmental, Health and Safety, and Water Quality Regulation

On April 10, 2024, the EPA announced a final NPDWR for six PFAS including PFOA, PFOS, PFNA, HFPO-DA, PFHxS, and PFBS. The NPDWR for PFAS establishes MCLs, for PFAS in drinking water. Utilities will be required to complete their initial monitoring for PFAS by 2027, followed by ongoing compliance monitoring. Although the EPA has indicated their intent to extend the compliance deadline to 2031, under the current rule, utilities will be required to comply with the new MCLs by April 2029, implementing solutions to reduce PFAS levels where needed. Beginning in April 2029, utilities that exceed any of the PFAS MCLs will be required to provide notification to the public of the violation.

The Company currently estimates an investment of approximately $2 billion of capital expenditures to install additional treatment facilities in order to comply with the NPDWR for PFAS as proposed. Additionally, the Company estimates that it will incur annual operating expenses of up to approximately $50 million related to testing and treatment, with the majority of the operating expenses beginning near the April 2029 compliance deadline. The actual level of capital investment and expenses may differ from these estimates and will be dependent upon market dynamics upon implementation of solutions to comply with the NPDWR for PFAS.

On October 30, 2024, the EPA published the LCRI with a “Compliance Date” of November 1, 2027. The LCRI focus includes requirements related to (i) replacing all lead and certain galvanized service lines under a utilities control by October 30, 2037, 10 years from the Compliance Date; (ii) identifying the materials of all service lines of unknown material; (iii) improving tap sampling; (iv) lowering the lead action level; and (v) strengthening protections to reduce exposure. The Company estimates an investment of approximately $1.5 billion of capital expenditures between 2026 and 2030 related to complying with the LCRI. The Company will continue to invest thereafter in order to fully comply with the LCRI by 2037.

Regulatory Matters

General Rate Cases

The table below summarizes the annualized incremental revenues, assuming a constant sales volume and customer count, resulting from general rate case authorizations that became effective during 2025. The amounts include reductions for the amortization of the excess accumulated deferred income taxes (“EADIT”) that are generally offset in income tax expense.

(In millions)	**Effective Date**	**Amount**
General rate cases by state:		
Kentucky	December 16, 2025	$ 18
Hawaii	August 1, 2025	1
Iowa	August 1, 2025 (a)	13
Missouri	May 28, 2025	63
Indiana, Step Increase	May 14, 2025	17
Virginia	February 24, 2025 (b)	15
Tennessee	January 21, 2025	1
Illinois	January 1, 2025	105
California, Step Increase	January 1, 2025	17
Total general rate case authorizations		$ 250

(a) Interim rates of $5 million were effective May 11, 2024. The Iowa Utilities Commission issued its final order on May 21, 2025.

(b) Interim rates were effective May 1, 2024, and the difference between interim and final approved rates were subject to refund. The Virginia State Corporation Commission issued its final order on February 24, 2025.

The table below summarizes the annualized incremental revenues, assuming a constant sales volume and customer count, resulting from general rate case authorizations that became effective on or after January 1, 2026. The amounts include reductions for the amortization of EADIT that are generally offset in income tax expense.

(In millions)	Effective Date	Amount
General rate cases by state:		
California, Attrition Increase	January 1, 2026	$ 14
Total general rate case authorizations		$ 14

On December 16, 2025, the Kentucky Public Service Commission issued a final order approving the adjustment of base rates requested in a general rate case originally filed on May 16, 2025, by the Company's Kentucky subsidiary. The final order approved an $18 million annualized increase in water system revenues, excluding infrastructure surcharges of $10 million, based on an authorized return on equity of 9.70%, authorized rate base of $667 million and a capital structure with a common equity component of 52.26% and a non-equity component of 47.74%. The final order also terminated the Kentucky subsidiary's Qualified Infrastructure Program ("QIP") rider and included the costs and investments of the QIP in approved base rates. The requested annualized revenue increase was driven primarily by approximately $212 million of capital investments completed and planned by the Kentucky subsidiary from February 2025 through December 2026. The new rates were effective as of December 16, 2025.

On July 24, 2025, the Hawaii Public Utilities Commission issued a final order adopting the settlement agreement filed by the Company's Hawaii subsidiary on April 25, 2025, with respect to its general rate case filed on August 2, 2024. The final order approves an annualized increase of approximately $1 million in wastewater revenue, which is based on a return on equity of 9.75% and a capital structure with an equity component of 52.11% and a debt component of 47.89%. New rates were effective August 1, 2025.

On May 21, 2025, the Iowa Utilities Commission issued a final order approving the adjustment of base rates requested in a general rate case originally filed on May 1, 2024, by the Company's Iowa subsidiary. The general rate case order approved a $13 million annualized increase in water and wastewater system revenues, excluding infrastructure surcharges of $1 million, based on an authorized return on equity of 9.60%, authorized rate base of $262 million, and a capital structure with a common equity component of 52.57% and a long-term debt component of 47.43%. The requested annualized revenue increase was driven primarily by over $157 million of capital investments made and expected to be made by the Iowa subsidiary through March 2026. Interim rates of $5 million were effective May 11, 2024, with the remaining increase in annualized water and wastewater system revenues of $8 million effective on August 1, 2025.

On May 14, 2025, the Company's Indiana subsidiary's third step increase of $17 million in annualized water and wastewater system revenues became effective. The Indiana subsidiary filed the general rate case on March 31, 2023, and on February 14, 2024, the Indiana Utility Regulatory Commission (the "IURC") issued an order that approved a $65 million annualized increase in water and wastewater system revenues, excluding previously recovered infrastructure surcharges. The annualized revenue increase included three step increases, with $25 million of the increase included in rates in February 2024, $23 million in May 2024, and $17 million in May 2025.

On May 7, 2025, the Missouri Public Service Commission (the "MoPSC") issued an order approving without modification the stipulation and agreement (the "Stipulation") with respect to a general rate case filed on July 1, 2024, by the Company's Missouri subsidiary. The Stipulation was entered into on March 17, 2025, with parties including the staff of the MoPSC and the Office of the Public Counsel. The general rate case order approves a $63 million annualized increase in water and wastewater revenues, excluding $63 million in infrastructure surcharges. The requested annualized revenue increase was driven primarily by $1.1 billion of capital investments completed by the Missouri subsidiary from January 2023 through May 2025. For purposes of

the general rate case, the Missouri subsidiary's view of its rate base is $3.2 billion, and its view as to its return on equity and common equity ratio (each of which has been determined based on the order but was not disclosed therein) is 9.75% and 50.00%, respectively. The new rates were effective May 28, 2025.

On February 24, 2025, the Virginia State Corporation Commission (the "SCC") issued an order approving the September 19, 2024 joint "black box" settlement of the general rate case filed by the Company's Virginia subsidiary. The general rate case order approves the stipulated $15 million annualized increase in water and wastewater revenues. Interim water and wastewater rates became effective May 1, 2024, with the difference between interim and final approved rates subject to refund. The requested annualized revenue increase was driven primarily by more than $110 million of incremental capital investments made between May 2023 and April 2025. For purposes of the general rate case, the Virginia subsidiary's view of its rate base is $369 million. The general rate case order also approved, solely for purposes of the Virginia subsidiary's future filings requiring a stated cost of capital and/or capital structure (including its annual information and water and wastewater infrastructure surcharge filings), a return on equity of 9.70% and a capital structure consisting of an equity component of 45.67% and a debt and other component of 54.33%, which also represents the Virginia subsidiary's view of its return on equity and capital structure in this general rate case.

On January 21, 2025, the Tennessee Public Utility Commission (the "TPUC") approved a motion authorizing an adjustment of water base rates requested in a rate case filed on May 1, 2024, by the Company's Tennessee subsidiary. The TPUC approved an increase of $1 million in annualized revenues, excluding previously recovered infrastructure surcharges of $18 million, based on an authorized return on equity of 9.70%, authorized rate base of approximately $300 million, a common equity ratio of 44.19% and a debt ratio of 55.81%. This adjustment took effect on January 21, 2025, and is driven primarily by approximately $173 million in capital investments completed and planned by the Tennessee subsidiary through December 2025.

On January 14, 2025, the CPUC granted the Company's California subsidiary's request for a one-year extension of its cost of capital filing to May 1, 2026, to set its authorized cost of capital beginning January 1, 2027, and maintain its current authorized cost of capital through 2026. On November 10, 2025, the California subsidiary submitted a request to further delay by one-year its cost of capital filing and maintain the authorized cost of capital through 2027. On November 18, 2025, the CPUC granted the request for a one-year extension of the cost of capital filing to May 1, 2027, to set its authorized cost of capital beginning January 1, 2028.

On December 5, 2024, the Illinois Commerce Commission (the "ICC") issued a final order approving the adjustment of base rates requested in a rate case originally filed on January 25, 2024, by the Company's Illinois subsidiary. The general rate case order approved an increase of $105 million in annualized water and wastewater system revenues, excluding previously recovered infrastructure surcharges of $5 million, based on an authorized return on equity of 9.84%, authorized rate base of $2.2 billion, and a capital structure with an equity component of 49.00% and a debt component of 51.00%. The increase was effective January 1, 2025, and is driven primarily by approximately $557 million in capital investments completed and planned by the Illinois subsidiary from January 2024 through December 2025.

On December 5, 2024, the CPUC approved a final decision adopting the terms of a partial settlement agreement filed on November 17, 2023, in the Company's California subsidiary's general rate case originally filed on July 1, 2022. Incorporating the then currently effective return on equity of 10.20%, the decision provides incremental annualized water and wastewater revenues of $21 million in the 2024 test year, and an estimated $16 million in the 2025 escalation year and $16 million in the 2026 attrition year. The 2024 rates were implemented retroactively to January 1, 2024. In addition, the CPUC denied the California subsidiary's proposed Water Resources Sustainability Plan decoupling mechanism but approved continuation of its currently effective Annual Consumption Adjustment Mechanism. On December 12, 2024, the California subsidiary filed an application for rehearing of the CPUC's denial of the proposed Water Resources Sustainability Plan decoupling mechanism, and on May 23, 2025, the CPUC issued its decision denying the application for rehearing. On September 19, 2025, the California subsidiary filed a petition to modify the CPUC order received on

December 5, 2024, for its general rate case originally filed on July 1, 2022. The request seeks clarification from the CPUC on the method used to calculate the Conservation Adjustment for Rate Tier Designs ("CART"), specifically for the California subsidiary's Monterey service area. The CART is a ratemaking mechanism that allows the Company to recover, in subsequent periods, a portion of the impact on operating revenues as a result of implementing customer rates structured to promote conservation usage. On October 20, 2025, the California Public Advocate submitted a response opposing the California subsidiary's request and stating the request should instead be addressed in the California subsidiary's pending base rate case. On October 30, 2025, the California subsidiary filed a reply to the California Public Advocate's response which underscored the need for clarity on the CART calculation. The California subsidiary expects resolution of the petition to modify later in 2026.

Pending General Rate Case Filings

On January 27, 2026, the Company's Illinois subsidiary filed a request with the ICC to adjust its water and wastewater rates. The filing seeks a two-step rate increase in aggregate annualized incremental revenue, based on a proposed return on equity of 10.75%, of (i) approximately $119 million effective January 1, 2027, based on a future test year through December 31, 2027 and a capital structure with an equity component of 52.42% and a debt component of 47.58%, and (ii) approximately $15 million effective January 1, 2028, based on a future test year to include end-of-period rate base and a capital structure with an equity component of 52.74% and a debt component of 47.26%, in each case, exclusive of infrastructure surcharges. The request is driven primarily by approximately $577 million in capital investments made and to be made by the Illinois subsidiary from January 2026 through December 2027. The request must be approved by the ICC.

On January 16, 2026, the Company's New Jersey subsidiary filed a request with the New Jersey Board of Public Utilities (the "NJBPU") to adjust its water and wastewater rates. The request seeks aggregate annualized incremental revenues of approximately $146 million and is based on a proposed return on equity of 10.75% and a capital structure with an equity component of 55.18% and a debt component of 44.82%. The requested annualized incremental revenue is driven primarily by more than $1.4 billion of capital investments completed and planned by the New Jersey subsidiary through December 2026. The filing is subject to the approval of the NJBPU.

On November 14, 2025, the Company's Pennsylvania subsidiary filed a request with the Pennsylvania Public Utility Commission (the "PaPUC") to adjust its water and wastewater rates. The request seeks aggregate annualized incremental revenue of approximately $169 million, excluding projected infrastructure surcharges of approximately $19 million. The request is based on a proposed return on equity of 10.95% and a capital structure with an equity component of 55.33%. The requested annualized incremental revenue is driven primarily by an estimated $1.2 billion of capital investments completed or planned to be completed from June 2025 through mid-2027. The rate request is subject to approval by the PaPUC, and new rates would be expected to take effect in August 2026.

On November 3, 2025, the Company's Virginia subsidiary filed a request with the SCC to adjust its water and wastewater rates. The request seeks aggregate annualized incremental revenues of approximately $22 million and is based on a proposed return on equity of 10.75% and a capital structure with an equity component of 51.79%. The requested annualized incremental revenue is driven primarily by more than $115 million of capital investments completed and planned by the Virginia subsidiary from May 2025 through April 2027. The filing is subject to the approval of the SCC. Interim rates will be effective May 2, 2026, with the difference between interim and final approved rates subject to refund to customers.

On August 1, 2025, the Company's Maryland subsidiary filed a general rate case requesting approximately $3 million in annualized incremental revenues, which is based on a proposed return on equity of 10.64% and a capital structure with an equity component of 52.32%. The requested annualized incremental revenue is driven primarily by approximately $22 million of capital investments completed by the Maryland subsidiary from February 2019 through April 2025. The filing must be approved by the Public Service Commission of Maryland, and if approved, it is anticipated that new rates would take effect in March 2026.

On July 1, 2025, the Company's California subsidiary filed an application with the CPUC to set new water and wastewater rates in each of its service areas for 2027 through 2029. On October 13, 2025, the California subsidiary filed its 100 day update for the same proceeding and updated the request to $62 million compared to authorized 2025 revenue, and a total increase in revenue over the 2027 to 2029 period of $110 million. Subsequent to the filing of the update, the California subsidiary adjusted its authorized rates effective January 1, 2026, which revised its net increase proposed for the test year 2027 to $51 million above 2026 expected revenues. The requested annualized incremental revenue is driven primarily by approximately $750 million of capital investments completed and planned by the California subsidiary through 2025 to 2028. If approved by the CPUC, the new rates would take effect on January 1, 2027. The application also requests approval of a Fixed Cost Recovery Account, which is intended to be a full decoupling mechanism that would allow the California subsidiary to recover authorized fixed costs, regardless of sales volume, while also providing incentives, via progressive conservation-oriented rate design, for customers to use water more efficiently.

On May 5, 2025, the Company's West Virginia subsidiary filed a general rate case requesting approximately $48 million in aggregate annualized incremental revenues, excluding infrastructure surcharges of $13 million, which would include two step increases, with $33 million to be included in rates in March 2026, and $15 million to be included in rates in March 2027. The request is based on a proposed return on equity of 10.75% and a capital structure with an equity component of 50.80% and 50.97%, respectively, for each of the two steps. The requested annualized incremental revenue is driven primarily by more than $300 million of capital investments completed and planned by the West Virginia subsidiary from March 2024 through February 2027. The request is subject to approval by the Public Service Commission of West Virginia, and the general rate case is expected to be completed by the end of February 2026.

Infrastructure Surcharges

A number of states have authorized the use of regulatory mechanisms that permit rates to be adjusted outside of a general rate case for certain costs and investments, such as infrastructure surcharge mechanisms that permit recovery of capital investments to replace aging infrastructure. Presented in the table below are annualized incremental revenues, assuming a constant sales volume and customer count, resulting from infrastructure surcharge authorizations that became effective during 2025:

(In millions)	Effective Date	Amount
Infrastructure surcharges by state:		
New Jersey	November 29, 2025	$ 26
Pennsylvania	October 1, 2025	5
New Jersey	May 30, 2025	15
Missouri	February 7, 2025	17
Kentucky	January 1, 2025	2
West Virginia	January 1, 2025	4
Total infrastructure surcharge authorizations		$ 69

Presented in the table below are annualized incremental revenues, assuming a constant sales volume and customer count, resulting from infrastructure surcharge authorizations that became effective on or after January 1, 2026:

(In millions)	Effective Date	Amount
Infrastructure surcharge filings by state:		
Pennsylvania	January 1, 2026	$ 11
Illinois	January 1, 2026	5
Total infrastructure surcharge filings		$ 16

Pending Infrastructure Surcharge Filings

On January 20, 2026, the Company's Indiana subsidiary filed an infrastructure surcharge proceeding requesting $15 million in additional annualized revenues.

On September 3, 2025, the Company's Missouri subsidiary filed an infrastructure surcharge proceeding requesting $13 million in additional annualized revenues.

On June 30, 2025, the Company's West Virginia subsidiary filed an infrastructure surcharge proceeding requesting $3 million in additional annualized revenues.

Other Regulatory Matters

The PaPUC, as part of its July 22, 2024 approval of the general rate case filed by the Company's Pennsylvania subsidiary on November 8, 2023, initiated an investigation into certain reported water service and water quality issues in the Pennsylvania subsidiary's Northeastern service territory, which reports had been provided during public input hearings convened in the general rate case. The PaPUC concluded the investigation and issued a Root Cause Analysis Report on August 5, 2025, which found no systemic issues affecting the Pennsylvania subsidiary's water service in the Northeastern service territory and expressed satisfaction with the Pennsylvania subsidiary's efforts to manage water service matters. The PaPUC committed to continued monitoring of the Pennsylvania subsidiary's service over the next three years.

Consolidated Results of Operations

Presented in the table below are the Company's consolidated results of operations:

	For the Years Ended December 31,		
(In millions)	**2025**	**2024**	**2023**
Operating revenues	$ 5,140	$ 4,684	$ 4,234
Operating expenses:			
Operation and maintenance	2,019	1,858	1,720
Depreciation and amortization	894	788	704

Interest Income	90	94	73
Non-operating benefit costs, net	16	28	32
Other, net	52	42	47
Total other income (expense)	(457)	(359)	(308)
Income before income taxes	1,422	1,359	1,196
Provision for income taxes	311	308	252
Net income attributable to common shareholders	$ 1,111	$ 1,051	$ 944

Segment Results of Operations

The Company's operating segments are comprised of its businesses which generate revenue, incur expense and have separate financial information which is regularly used by the chief operating decision maker to make

operating decisions, assess performance and allocate resources. The Company operates its business primarily through one reportable segment, the Regulated Businesses segment. Other primarily includes MSG, which does not meet the criteria of a reportable segment in accordance with GAAP. Other also includes corporate costs that are not allocated to the Company's Regulated Businesses, interest income related to the secured seller promissory note from the sale of HOS, income from assets not associated with the Regulated Businesses, eliminations of inter-segment transactions and fair value adjustments related to acquisitions that have not been allocated to the Regulated Businesses segment. This presentation is consistent with how management assesses the results of these businesses. For a discussion and analysis of the Company's financial statements for fiscal 2024 compared to fiscal 2023, please refer to Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, filed with the SEC on February 19, 2025.

Regulated Businesses Segment

Presented in the table below is financial information for the Regulated Businesses:

	For the Years Ended December 31,		
(In millions)	**2025**	**2024**	**2023**
Operating revenues	$ 4,723	$ 4,296	$ 3,920
Operation and maintenance	1,642	1,517	1,441
Depreciation and amortization	883	772	693
General taxes	325	301	288
Other operating (income) expense	—	—	(1)
Other income (expense)	(415)	(339)	(269)
Provision for income taxes	321	302	259
Net income attributable to common shareholders	$ 1,137	$ 1,065	$ 971

Operating Revenues

Presented in the tables below is information regarding the main components of the Regulated Businesses' operating revenues:

	For the Years Ended December 31,		
(In millions)	**2025**	**2024**	**2023**
Water services:			
Residential	$ 2,557	$ 2,349	$ 2,143
Commercial	981	885	798
Fire service	189	164	158
Industrial	195	184	167
Public and other	311	291	274
Total water services	4,233	3,873	3,540
Wastewater services:			
Residential	287	245	228
Commercial	86	70	62
Industrial	10	12	8
Public and other	39	36	29
Total wastewater services	422	363	327
Other (a)	68	60	53
Total operating revenues	$ 4,723	$ 4,296	$ 3,920

(a) Includes other operating revenues consisting primarily of alternative revenue programs, miscellaneous utility charges, fees and rents.

(Gallons in millions)	For the Years Ended December 31, 2025	2024	2023
Billed water services volumes:			
Residential	161,270	163,583	160,921
Commercial	80,864	80,385	78,404
Industrial	36,703	37,217	36,404
Fire service, public and other	54,405	54,700	54,236
Total billed water services volumes	333,242	335,885	329,965

In 2025, as compared to 2024, operating revenues increased $427 million, primarily due to a $406 million increase from authorized rate increases, including infrastructure surcharges, principally to recover infrastructure investment in various states. In addition, operating revenues increased $49 million from water and wastewater acquisitions, as well as organic growth in existing systems. These increases were partially offset by an estimated $36 million decrease in 2025, due to warmer, drier weather compared to normal in 2024.

Operation and Maintenance

Presented in the table below is information regarding the main components of the Regulated Businesses' operating and maintenance expense:

(In millions)	For the Years Ended December 31, 2025	2024	2023
Employee-related costs	$ 582	$ 543	$ 513
Production costs	483	458	438
Operating supplies and services	306	274	255
Maintenance materials and supplies	104	97	102
Customer billing and accounting	92	72	65
Other	75	73	68
Total operation and maintenance expense	$ 1,642	$ 1,517	$ 1,441

Employee-Related Costs

(In millions)	For the Years Ended December 31, 2025	2024	2023
Salaries and wages	$ 468	$ 434	$ 413
Group insurance	73	69	60
Pensions	5	7	9
Other benefits	36	33	31
Total employee-related costs	$ 582	$ 543	$ 513

In 2025, as compared to 2024, employee-related costs increased $39 million primarily due to an increase in salaries and wages due to higher employee headcount to support growth of the business and merit increases, which was partially offset by higher capitalized labor and overhead rates.

Production Costs

(In millions)	For the Years Ended December 31, 2025	2024	2023
Purchased water	$ 189	$ 180	$ 161
Purchased power	130	112	108
Chemicals	106	107	105
Waste disposal	58	59	64
Total production costs	$ 483	$ 458	$ 438

In 2025, as compared to 2024, production costs increased $25 million primarily from higher purchased power costs and higher purchased water costs and usage.

Operating Supplies and Services

In 2025, as compared to 2024, operating supplies and services increased $32 million primarily from higher technology related costs, higher contracted services and increased maintenance and service costs on buildings.

Customer Billing and Accounting

In 2025, as compared to 2024, customer billing and accounting increased $20 million primarily due to an increase in customer uncollectible expense.

Depreciation and Amortization

In 2025, as compared to 2024, depreciation and amortization increased $111 million primarily due to additional utility plant placed in service from capital infrastructure investments and higher depreciation rates from recent rate case orders.

General Taxes

In 2025, as compared to 2024, general taxes increased $24 million primarily due to New Jersey Gross Receipts Tax, incremental property taxes and higher capital stock taxes.

Other Income (Expense)

In 2025, as compared to 2024, other expenses increased $76 million primarily due to higher interest expense from the issuance of incremental long-term debt. Other expenses also increased due to higher net periodic pension costs. These increases were partially offset by an increase in AFUDC in 2025.

Provision for Income Taxes

In 2025, as compared to 2024, the Regulated Businesses' provision for income taxes increased $19 million. The Regulated Businesses' effective income tax rate was 22.0% and 22.1% for the years ended December 31, 2025 and 2024, respectively.

Other

Presented in the table below is information for Other:

(In millions)	For the Years Ended December 31, 2025	2024	2023
Operating revenues	$ 417	$ 388	$ 314
Operation and maintenance	377	341	279
Depreciation and amortization	11	16	11
General taxes	23	19	19
Interest expense	(141)	(107)	(96)
Interest income	85	77	45
Other income	14	10	12
Provision for (benefit from) income taxes	(10)	6	(7)
Net loss attributable to common shareholders	$ (26)	$ (14)	$ (27)

Operating Revenues

In 2025, as compared to 2024, operating revenues increased $29 million from an increase in capital projects to provide water and wastewater services to military installations and municipal customers.

Operation and Maintenance

Presented in the table below is information regarding the main components of Other's operating and maintenance expense:

(In millions)	For the Years Ended December 31, 2025	2024	2023
Operating supplies and services	$ 234	$ 195	$ 150
Maintenance materials and supplies	22	27	29
Employee-related costs	105	101	85
Production costs	11	10	9
Other	5	8	6
Total operation and maintenance expense	$ 377	$ 341	$ 279

Operating Supplies and Services

In 2025, as compared to 2024, operating supplies and services increased $39 million primarily due to increased costs associated with projects to provide water and wastewater services to military installations and municipal customers and $13 million of merger-related costs from the Essential Merger Agreement.

Interest Expense

In 2025, as compared to 2024, interest expense increased $34 million primarily due to higher average commercial paper borrowings.

Tax Matters

On July 4, 2025, the One Big Beautiful Bill Act (the "OBBB") was signed into law. The OBBB includes several corporate tax-related provisions. Key changes include the permanent extension of certain provisions from the Tax Cuts and Jobs Act of 2017, such as 100% bonus depreciation and Section 163(j) interest limitation

exception for regulated utilities, as well as the immediate expensing of domestic research and development costs, and the introduction of a new charitable contribution floor for corporations. The OBBB has not had a material impact on the Company's Consolidated Financial Statements. The Company will continue to monitor the implementation and any related guidance.

Legislative Updates

During 2025, the Company's regulatory jurisdictions enacted the following legislation that has been approved and/or is effective as of February 18, 2026:

- California passed Senate Bill 219, which amends the Climate Corporate Data Accountability Act and the Climate-Related Financial Risk Act, to allow the California Air Resources Board until July 1, 2025, to issue implementing regulations, including reporting requirements for Scope 3 emissions. Legislation was signed by the Governor on September 27, 2024, and became effective January 1, 2025.
- Virginia passed Senate Bill 850, which would permit a water or wastewater utility to petition the SCC for the approval of an eligible infrastructure replacement and enhancement plan and accompanying recovery mechanism that allows for recovery of eligible infrastructure costs outside of a base rate case. Legislation was signed by the Governor on March 24, 2025, and became effective on July 1, 2025.
- Indiana passed Senate Bill 426, which changes the timing of recovery to allow for deferred depreciation from in-service date and post in-service carrying costs and authorizes the IURC to approve mechanisms to allow utilities to invest in and earn on acquired utility assets. The language also provides critical protections from lawsuits when utilities are meeting applicable water quality standards. Legislation was signed by the Governor on April 3, 2025, and became effective on July 1, 2025.
- Missouri passed Senate Bill 4, which provides that beginning July 1, 2026, water, sewer, and gas utilities may request the use of a future test year in a general rate case. This statute provides that at the end of the future test year, utilities must reconcile rate base and certain expenses, including annualized depreciation expense, income tax expense, payroll expense, employee benefits except for pensions and other post-retirement benefits, and rate case expenses, within 45 days to the MoPSC. Legislation was signed by the Governor on April 9, 2025, and became effective on August 28, 2025.

Liquidity and Capital Resources

The Company uses its capital resources, including cash, primarily to (i) fund operating and capital requirements, (ii) pay interest and meet debt maturities, (iii) pay dividends, (iv) fund acquisitions, (v) fund pension and postretirement benefit obligations, and (vi) to pay federal income taxes. The Company invests a significant amount of cash on regulated capital projects where it expects to earn a long-term return on investment. Additionally, the Company operates in rate regulated environments in which the amount of new investment recovery may be limited, and where such recovery generally takes place over an extended period of time, and certain capital recovery is also subject to regulatory lag. See Item 1—Business—Regulated Businesses—Regulation and Rate Making for additional information. The Company expects to fund future maturities of long-term debt through a combination of external debt and, to the extent available, cash flows from operations. Since the Company expects its capital investments over the next few years to be greater than its cash flows from operating activities, the Company currently plans to fund the excess of its capital investments over its cash flows from operating activities for the next five years through a combination of long-term debt and equity issuances, in addition to the remaining proceeds from the sale of HOS, all of which were received as of February 13, 2026. See Note 5—Mergers, Acquisitions and Divestitures—Secured Seller Promissory Note from the Sale of Homeowner Services Group, in the Notes to Consolidated Financial Statements for additional information. If necessary, the Company may delay certain capital investments or other funding requirements or pursue financing from other sources to preserve liquidity. In this event, the Company believes it can rely upon cash flows from operations to meet its obligations and fund its minimum required capital investments for an extended period of time.

The Company regularly evaluates and monitors its cash requirements for capital investments, acquisitions, operations, commitments, debt maturities, interest and dividends. The Company's business is capital intensive, with a majority of this capital funded by cash flows from operations. The Company also obtains funds from external sources, primarily in the debt markets and through short-term commercial paper borrowings, and may also access the equity capital markets as needed or desired to support capital funding requirements. In order to meet short-term liquidity needs, AWCC issues commercial paper that is supported by its revolving credit facility. The Company's access to external financing on reasonable terms may depend on, as appropriate, any or all of the following: current business conditions, including that of the utility and water utility industry in general; conditions in the debt or equity capital markets; the Company's credit ratings; and conditions in the national and international economic and geopolitical arenas. Disruptions in the credit markets may discourage lenders from extending the terms of such commitments or agreeing to new commitments. Market disruptions may also limit the Company's ability to issue debt and equity securities in the capital markets.

If these unfavorable business, market, financial and other conditions deteriorate to the extent that the Company is no longer able to access the commercial paper and/or capital markets on reasonable terms, AWCC has access to an unsecured revolving credit facility. The Company's revolving credit facility provides $2.75 billion in aggregate total commitments from a diversified group of financial institutions. AWCC's revolving credit facility is used principally to support its commercial paper program, to provide additional liquidity support, and to provide a sub-limit for the issuance of up to $150 million in letters of credit. The maximum aggregate principal amount of short-term borrowings authorized for issuance under AWCC's commercial paper program is $2.60 billion. The termination date of the credit agreement with respect to AWCC's revolving credit facility is October 26, 2029. Subject to satisfying certain conditions, the credit agreement permits AWCC to increase the maximum commitment by up to an aggregate of $500 million. As of December 31, 2025, AWCC had no outstanding borrowings and $84 million of outstanding letters of credit under its revolving credit facility, with $1.1 billion available to fulfill its short-term liquidity needs and to issue letters of credit.

The Company believes that its ability to access the debt and equity capital markets, the revolving credit facility and cash flows from operations will generate sufficient cash to fund the Company's short-term requirements. The Company believes it has sufficient liquidity and the ability to manage its expenditures, should there be a disruption of the capital and credit markets. However, there can be no assurance that the lenders will be able to meet existing commitments to AWCC under the revolving credit facility, or that AWCC will be able to access the commercial paper or loan markets in the future on acceptable terms or at all.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the warmer months. The Company's future cash flows from operating activities will be affected by, among other things: customers' ability to pay for service in a timely manner, economic utility regulation, inflation, compliance with environmental, health and safety standards, production costs, maintenance costs, customer growth, declining customer usage of water, employee-related costs, including pension funding, weather and seasonality, taxes and overall economic conditions. The Company's current liabilities may exceed current assets mainly from debt maturities due within one year and the use of short-term debt as a funding source, primarily to meet scheduled maturities of long-term debt, fund acquisitions and construction projects, as well as cash needs, which can fluctuate significantly due to the seasonality of the business and other factors. The Company addresses cash timing differences primarily through its short-term liquidity funding mechanisms.

Presented in the table below is a summary of the major items affecting the Company's cash flows from operating activities:

	For the Years Ended December 31,		
(In millions)	**2025**	**2024**	**2023**
Net income	$ 1,111	$ 1,051	$ 944
Add (less):			
Depreciation and amortization	894	788	704
Deferred income taxes and amortization of investment tax credits	135	156	208
Other non-cash activities (a)	19	62	(9)
Changes in assets and liabilities (b)	(51)	40	76
Pension and non-pension postretirement benefit contributions	(49)	(52)	(49)
Net cash provided by operating activities	$ 2,059	$ 2,045	$ 1,874

(a) Includes provision for losses on accounts receivable, pension and non-pension postretirement benefits and other non-cash, net.
(b) Changes in assets and liabilities include changes to receivables and unbilled revenues, income tax receivable, accounts payable and accrued liabilities, accrued taxes and other assets and liabilities, net.

In 2025, cash flows provided by operating activities increased $14 million, primarily due to an increase in net income and depreciation, partially offset by the payment of CAMT liability, utilization of income tax receivables in the prior year and higher customer receivables and unbilled revenues in the current period.

The Company expects to make pension contributions to the plan trusts of $44 million in 2026. Actual amounts contributed could change materially from this estimate as a result of changes in assumptions and actual investment returns, among other factors.

Cash Flows from Investing Activities

Presented in the table below is a summary of the major items affecting the Company's cash flows from investing activities:

	For the Years Ended December 31,		
(In millions)	**2025**	**2024**	**2023**
Capital expenditures	$ (3,126)	$ (2,856)	$ (2,575)
Acquisitions, net of cash acquired	(71)	(417)	(81)
Removal costs from property, plant and equipment retirements, net	(175)	(152)	(159)
Purchases of available-for-sale fixed-income securities	(46)	(135)	—
Proceeds from sales and maturities of available-for-sale fixed-income securities	109	181	—
Net cash used in investing activities	$ (3,309)	$ (3,379)	$ (2,815)

In 2025, cash flows used in investing activities decreased $70 million primarily as a result of decreased payments for acquisitions, partially offset by increased payments for capital expenditures in 2025. The Company continues to invest across all infrastructure categories, mainly replacement and renewal of transmission and distribution and services, meter and fire hydrants infrastructure in the Company's Regulated Businesses, as discussed below.

The Company's infrastructure investment plan consists of both infrastructure renewal programs, where the Company replaces mains, services, meters, hydrants and valves, as needed, and major capital investment projects, where the Company constructs new water and wastewater treatment and delivery facilities to meet new customer growth, and meet new or updated environmental and water quality regulations. The Company's

projected capital expenditures and other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

Presented in the table below is a summary of the Company's capital expenditures by category:

(In millions)	For the Years Ended December 31, 2025	2024	2023
Transmission and distribution	$ 1,023	$ 882	$ 922
Treatment and pumping	438	305	322
Services, meter and fire hydrants	833	805	652
General structure and equipment	416	425	333
Sources of supply	121	163	88
Wastewater	295	276	258
Total capital expenditures	$ 3,126	$ 2,856	$ 2,575

In 2025, the Company's capital expenditures increased $270 million due to an increase across most infrastructure categories.

The Company also grows its business through acquisitions of water and wastewater systems. These acquisitions are generally located in geographic proximity to the Company's existing Regulated Businesses and support continued geographical diversification and growth of its operations. Generally, acquisitions are funded initially with short-term debt, and later refinanced with long-term financing. During 2025, the Company paid $71 million to fund acquisitions, including deposits for pending acquisitions. The Company closed on 18 acquisitions of various regulated water and wastewater systems during 2025, which added approximately 20,900 water and wastewater customers.

As previously noted, over the next five years the Company expects to invest between $19 billion to $20 billion, with $17 billion to $17.5 billion for infrastructure improvements in the Regulated Businesses, and the Company expects to invest between $46 billion to $48 billion over the next 10 years. In 2026, the Company expects to invest $3.7 billion, consisting of infrastructure improvements and acquisitions in the Regulated Businesses.

Cash Flows from Financing Activities

Presented in the table below is a summary of the major items affecting the Company's cash flows from financing activities:

(In millions)	For the Years Ended December 31, 2025	2024	2023
Proceeds from long-term debt, net of discount	$ 1,781	$ 1,437	$ 1,264
Repayments of long-term debt	(664)	(475)	(282)
Net proceeds from common stock financing	—	—	1,688
Net short-term borrowings (repayments) with maturities less than three months	709	700	(996)
Debt issuance costs	(17)	(14)	(16)
Dividends paid	(633)	(585)	(532)
Other financing activities, net (a)	73	47	62
Net cash provided by financing activities	$ 1,249	$ 1,110	$ 1,188

(a) Includes proceeds from issuances of common stock under various employee stock plans and the Company's dividend reinvestment and direct stock purchase plan, net of taxes paid, and advances and contributions in aid of construction, net of refunds.

In 2025, cash flows provided by financing activities increased $139 million, primarily due to higher issuances of long-term debt and higher short-term commercial paper borrowings in the current year. These increases were partially offset by higher repayments of long-term debt and dividend payments in the current year.

The Company's financing activities are primarily focused on funding regulated infrastructure expenditures, regulated acquisitions and payment of dividends. These activities included the issuance of long-term and short-term debt, primarily through AWCC and equity issuances from parent company. Based on the needs of the Regulated Businesses and the Company, AWCC may borrow funds or issue its debt in the capital markets and then, through intercompany loans, provide those borrowings to the Regulated Businesses and parent company. The Regulated Businesses and parent company are obligated to pay their portion of the respective principal and interest to AWCC, in the amount necessary to enable AWCC to meet its debt service obligations. Parent company's borrowings are not a source of capital for the Regulated Businesses, therefore, parent company is not able to recover the interest charges on its debt through regulated water and wastewater rates. As of December 31, 2025, AWCC has made long-term fixed rate loans and short-term loans to the Regulated Businesses amounting to $10.7 billion. Additionally, as of December 31, 2025, AWCC has made long-term fixed rate loans and short-term loans to parent company amounting to $4.0 billion.

In August 2025, the Company entered into separate forward sale agreements (the "Forward Sale Agreements") with several forward purchasers relating to an aggregate of 8,098,592 shares of the Company's common stock at an initial forward price of $139.657 per share, which is equal to the price to public per share less an underwriting discount. Each Forward Sale Agreement will be physically settled unless the Company elects to settle such Forward Sale Agreement in cash or to net share settle such Forward Sale Agreement (which the Company has the right to do, subject to certain conditions, other than in the limited circumstances set forth in the Forward Sale Agreements). The Forward Sale Agreements provide for settlement on a settlement date or dates to be specified at the Company's discretion on or prior to December 31, 2026. To the extent the Forward Sale Agreements are physically settled, the Company will issue common stock to the forward purchasers and receive cash proceeds based on the applicable forward sale price on the settlement date as defined in the Forward Sale Agreements.

As of December 31, 2025, the Company did not receive any proceeds from the sale of its common stock connected to the Forward Sale Agreements. The Company estimates that it will receive total net proceeds of approximately $1,131 million, before deducting estimated offering expenses, subject to the price adjustment and other provisions of the Forward Sale Agreements, in the event of full physical settlement of all of the Forward Sale Agreements. The Company intends to use any net cash proceeds that it may receive upon a settlement of the Forward Sale Agreements for general corporate purposes. The Forward Sale Agreements will be classified as equity transactions because they are indexed to the Company's common stock and physical settlement is within the Company's control.

On August 8, 2025, AWCC completed the sale of $900 million aggregate principal amount of its 5.700% Senior Notes due 2055. At the closing of this offering, AWCC received, after deduction of underwriting discounts and before deduction of offering expenses, net proceeds of approximately $887 million. AWCC used the net proceeds of the offering (i) to lend funds to American Water and the Regulated Businesses; (ii) to repay commercial paper obligations of AWCC; and (iii) for general corporate purposes.

On February 27, 2025, AWCC completed the sale of $800 million aggregate principal amount of its 5.250% Senior Notes due 2035. At the closing of this offering, AWCC received, after deduction of underwriting discounts and before deduction of offering expenses, net proceeds of approximately $792 million. AWCC used the net proceeds of the offering (i) to lend funds to American Water and the Regulated Businesses; (ii) to repay at maturity AWCC's 3.400% Senior Notes due 2025; (iii) to repay commercial paper obligations of AWCC; and (iv) for general corporate purposes.

On June 29, 2023, AWCC issued $1,035 million aggregate principal amount of the Notes. AWCC received net proceeds of approximately $1,022 million, after deduction of underwriting discounts and commissions but before deduction of offering expenses payable by AWCC. See Note 11—Long-Term Debt in the Notes to Consolidated Financial Statements for additional information.

One of the principal market risks to which the Company is exposed is changes in interest rates. In order to manage the exposure, the Company follows risk management policies and procedures, including the use of derivative contracts such as treasury lock agreements. The Company also reduces exposure to interest rates by managing commercial paper and debt maturities. The Company (through AWCC) does not enter into derivative contracts for speculative purposes and does not use leveraged instruments. The derivative contracts entered into are for periods consistent with the related underlying exposures. The Company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. The Company minimizes the counterparty credit risk on these transactions by dealing only with leading, creditworthy financial institutions, having long-term credit ratings of “A-” or better.

As of December 31, 2025, the Company had entered into six treasury lock agreements, with a term of 10 years or 30 years and an aggregate notional amount totaling $200 million, to reduce interest rate exposure on expected future debt issuances. These treasury lock agreements terminate in June 2026 and September 2026 and have an average fixed interest rate of 4.47%. In February 2026, the Company entered into four treasury lock agreements, with a term of 10 years or 30 years and an aggregate notional amount totaling $150 million, to reduce interest rate exposure on expected future debt issuances. These treasury lock agreements terminate in June 2026 and September 2026 and have an average fixed interest rate of 4.62%. The Company designated these treasury lock agreements as cash flow hedges, with their fair value recorded in accumulated other comprehensive gain or loss.
