Exhibit A

March 30, 2026

Mr. Brent Wigginton, General Manager
Daviess County Water District
3400 Bittel Road
Owensboro, KY 42301

Re: Wholesale Water Rate Calculations

Dear Brent:

OMU has prepared the required rate calculations for the fiscal year 2026-2027, as per the terms of the OMU - Daviess County Water District contracts. A copy of the calculations is enclosed, as well as a copy of the fiscal year 2024-2025 true-up calculations.

Based on these calculations, the rate charged to the Southeast Division will increase to a rate of $3.05 per thousand gallons and the rate charged to the West Division will remain at the rate of $3.16 per thousand gallons for the fiscal year beginning June 1, 2026.

The ultimate per unit cost to Southeast and West Divisions is dependent upon annual water usage and the costs contractually allocated to your district. Future year calculations may result in fluctuations in the rate per thousand gallons. The formal calculation will continue to be prepared annually.

Please contact me with any questions, or if you need further information.

Sincerely,

Tim Lyons
General Manager
