RE: Case 2026-00211

North McLean County Water District

Remediation of Deficiencies in ARF Application

Dear Ms. Bridwell,

Enclosed for filing reference case is North McLean County Water District's explanation of the interest expense, explanation of amortization schedule, and Current and Proposed Rate Tables. The original Alternative Rate Filing Application was filed September 23, 2026. The filing was rejected due to deficiencies identified in your letter dated October 2, 2026. North McLean County Water District has addressed the issue as follows:

- 807 KAR 5:076 Section 4(1)(a): A completed Attachment CPR (Current and Proposed Rates) is attached. The current and proposed rates form does not include the rates for the next 8,000 gallons, next 30,000 gallons, and over 40,000 gallons. **ATTACHED 1 Attachment CPR (Current and Proposed Rates)**
- 807 KAR 5:076 Section (4)(1)(f): Detailed Analysis of Applicant's customers' bills showing revenues from present and proposed rates from each customer class (Attachment BA-DB or Attachment BA-FR is attached to ARF Form 1); Mathematical errors in the Existing Billing Analysis for the Industrial and Commercial customer classes. Revenues from this existing billing analysis do not match the Metered Water Sales from the SAO and there is no adjustment that rectify this. If guidance is needed, please feel free to reach out. **ATTACHED 2 Attachment BA-DB**
- 807 KAR 5:076 Section 5(4)(c): Does notice of proposed rate adjustment meet regulatory requirements; The amount of the change requested in both dollar amounts and percentage change for each customer classification to which the proposed rates apply. The percentage changes are incorrect in the notice. **ATTACHED 3 Customer Notice**

The district respectfully requests that these measures be considered as sufficient to remediate the deficiencies in the ARF application.

Sincerely,

Tiffany Sallee
