Miles

Prepared October 8, 2026

Basemap: Esri "World Imagery" map service

EDR

Date: October 12, 2026

Subject: South Fork Solar
Distances to Residential Neighborhoods, Residences, Schools, and Public and Private Parks

Residences within 2 miles of Project components are shown in Table 1. Data for residential structures was obtained from the Kentucky 911 Site Structure Address Points and verified with orthographic imagery and Google Street View in a desktop review.

Table 2 shows residential neighborhoods within 2 miles of Project components. Residential neighborhoods were identified as contiguous areas of at least 5 acres and containing at least one residential structure per acre.

Parks within 2 miles of Project components are shown in Table 3. Data for public parks was obtained from Kentucky's Area Development District and the Kentucky Infrastructure Authority.

Missing values in the tables indicate that the residence is more than 2 miles away from the specific Project component. There are no known schools or private parks within 2 miles of the Project.

Table 1. Residences within 2 Miles of Project Components

	Distance from Project Component (Feet)					
Address	PV Panel Area	Fence	Gen-tie	Inverter	Project Area	Project Substation
