NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.																
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOME C rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOME C rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BST.

<b>UNBUNDLED PORT LOOP COMBINATIONS - MARKET RATES</b>																	
Market Rates shall apply where BellSouth is not required to provide unbundled local switching or switch ports per FCC and/or Commission rules.																	
This includes:																	
Unbundled port/loop combinations that are Currently Combined or Not Currently Combined in Zone 1 of the Top 8 MSAs in BellSouth's region for end users with 4 or more DSO equivalent lines.																	
The Top 8 MSAs in BellSouth's region are: FL (Orlando, Ft. Lauderdale, Miami); GA (Atlanta); LA (New Orleans); NC (Greensboro-Winston Salem-Highpoint/Charlotte-Gastonia-Rock Hill); TN (Nashville).																	
BST currently is developing the billing capability to mechanically bill the recurring and NRC Market Rates in this section except for NRC charges for not currently combined in FL. In the interim where BST cannot bill Market Rates, BST shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.																	
The Market Rate for unbundled ports includes all available features in all states.																	
End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC: URECU).																	
For Not Currently Combined scenarios the NRC charges are listed in the First & Add'l NRC columns for each Port USOC. For Currently Combined scenarios, the NRC charges are listed in the NRC - Currently Combined section. Add'l NRCs may apply also & are categorized accordingly.

<b>OPERATIONAL SUPPORT SYSTEMS</b>															
NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.															
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOME C rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOME C rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth.

BellSouth currently is developing the billing capability to mechanically bill the recurring and NRC Market Rates in this section. In the interim where BellSouth cannot bill Market Rates, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.																	
The Market Rate for unbundled ports includes all available features in all states.																	
End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC: URECU).																	
For Not Currently Combined scenarios the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section. Additional NRCs may apply also and are categorized accordingly.

<b>OPERATIONAL SUPPORT SYSTEMS</b>																	
NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.																	
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOMEC rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOMEC rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth.

<b>OPERATIONAL SUPPORT SYSTEMS</b>															
NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.															
NOTE: (2) Any element that can be ordered electronically will be billed according to the SOME C rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOME C rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth.															
	Manual Service Order Charge, per LSR, Disconnect Only (SC)				SOMAN						1.97				
	Electronic OSS Charge, per LSR, submitted via BST's OSS interactive interfaces (Regional)				SOME C	3.50									
<b>UNE SERVICE DATE ADVANCEMENT CHARGE</b>															
NOTE: The Expedite charge will be maintained commensurate with BellSouth's FCC No.1 Tariff, Section 5 as applicable.

In addition, this Agreement sets forth the terms and conditions for SBCT's provision of billing number information to BellSouth for inclusion in BellSouth's LIDB. SBCT understands that BellSouth provides access to information in its LIDB to various telecommunications service providers pursuant to applicable tariffs and agrees that information stored at the request of SBCT, pursuant to this Agreement, shall be available to those telecommunications service providers. The terms and conditions contained herein shall hereby be made a part of this Agreement upon notice to SBCT's account team and/or Local Contract Manager to activate this LIDB Storage Agreement. The General Terms and Conditions of the Agreement shall govern this LIDB Storage Agreement. The terms and conditions contained in the attached Addendum are hereby made a part of this LIDB Storage Agreement as if fully incorporated herein.
- B. BellSouth will provide responses to on-line, call-by-call queries to billing number information for the following purposes:
1. Billed Number Screening. BellSouth is authorized to use the billing number information to determine whether SBCT has identified the billing number as one that should not be billed for collect or third number calls.
  2. Calling Card Validation. BellSouth is authorized to validate a 14-digit Calling Card number where the first 10 digits are a line number or special billing number assigned by BellSouth, and where the last four digits (PIN) are a security code assigned by BellSouth.

- B. Billing and Collection Customers. BellSouth currently has in effect numerous billing and collection agreements with various interexchange carriers and billing clearing houses and as such these billing and collection customers (B&C Customers) query BellSouth's LIDB to determine whether to accept various billing options from End Users. Until such time as BellSouth implements in its LIDB and its supporting systems the means to differentiate SBCT's data from BellSouth's data, the following shall apply:
- (1) BellSouth will identify SBCT end user originated long distance charges and will return those charges to the interexchange carrier as not covered by the existing B&C agreement. SBCT is responsible for entering into the appropriate agreement with interexchange carriers for handling of long distance charges by their end users.
  - (2) BellSouth shall have no obligation to become involved in any disputes between SBCT and B&C Customers. BellSouth will not issue adjustments for charges billed on behalf of any B&C Customer to SBCT. ## Exhibit D

- 7.1.2 Rated Incollects (originated in BellSouth and from other companies) can also be on ODUF. Rated Incollects will be intermingled with BellSouth recorded rated and unrated usage. Rated Incollects will not be packed separately.
- 7.1.3 BellSouth will perform duplicate record checks on records processed to ODUF. Any duplicate messages detected will be deleted and not sent to SBCT.
- 7.1.4 In the event that SBCT detects a duplicate on ODUF they receive from BellSouth, SBCT will drop the duplicate message and will not return the duplicate to BellSouth.

## 7.2 ODUF Physical File Characteristics

- 7.2.1 ODUF will be distributed to SBCT via CONNECT:Direct or Secure File Transfer Protocol (FTP) or another mutually agreed medium. The ODUF feed will be a variable block format. The data on the ODUF feed will be in a non-compacted EMI format (175 byte format plus modules). It will be created on a daily basis Monday through Friday except holidays. Details such as dataset name and delivery schedule will be addressed during negotiations of the distribution medium. There will be a maximum of one dataset per workday per OCN.
- 7.2.2 Data circuits (private line or dial-up) will be required between BellSouth and SBCT for the purpose of data transmission when utilizing CONNECT:Direct. Where a dedicated line is required, SBCT will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. SBCT will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit data will be negotiated on an individual case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by BellSouth and the associated charges assessed to SBCT. Additionally, all message toll charges associated with the use of the dial circuit by SBCT will be the responsibility of SBCT. Associated equipment on the BellSouth end, including a modem, will be negotiated on an individual case basis between the Parties. All equipment, including modems and software, that is required on SBCT's end for the purpose of data transmission will be the responsibility of SBCT.
- 7.2.3 If SBCT utilizes Secure FTP for data file transmission, purchase of the Secure FTP software will be the responsibility of SBCT.

## 7.3 ODUF Packing Specifications

- 7.3.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.
- 7.3.2 The OCN, From RAO, and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to SBCT which BellSouth RAO is sending the message. BellSouth and SBCT will use the invoice sequencing to control data

exchange. BellSouth will be notified of sequence failures identified by SBCT and resend the data as appropriate.

The data will be packed using ATIS EMI records.

- 7.4 ODUF Pack Rejection. SBCT will notify BellSouth within one business day of rejected packs (via the mutually agreed medium). Packs could be rejected because of pack sequencing discrepancies or a critical edit failure on the Pack Header or Pack Trailer records (i.e. out-of-balance condition on grand totals, invalid data populated). Standard ATIS EMI Error Codes will be used. SBCT will not be required to return the actual rejected data to BellSouth. Rejected packs will be corrected and retransmitted to SBCT by BellSouth.
- 7.5 ODUF Control Data. SBCT will send one confirmation record per pack that is received from BellSouth. This confirmation record will indicate SBCT received the pack and the acceptance or rejection of the pack. Pack Status Code(s) will be populated using standard ATIS EMI error codes for packs that were rejected by SBCT for reasons stated in the above section.
- 7.6 ODUF Testing. Upon request from SBCT, BellSouth shall send test files to SBCT for ODUF. The Parties agree to review and discuss the file's content and/or format. For testing of usage results, BellSouth shall request that SBCT set up a production (live) file. The live test may consist of SBCT's employees making test calls for the types of services SBCT requests on ODUF. These test calls are logged by SBCT, and the logs are provided to BellSouth. These logs will be used to verify the files. Testing will be completed within 30 calendar days from the date on which the initial test file was sent.

**Enhanced Optional Daily Usage File**

1. Upon written request from SBCT, BellSouth will provide the Enhanced Optional Daily Usage File (EODUF) service to SBCT pursuant to the terms and conditions set forth in this section. EODUF will only be sent to existing ODUF subscribers who request the EODUF option.
2. SBCT shall furnish all relevant information required by BellSouth for the provision of EODUF.
3. EODUF will provide usage data for local calls originating from resold Flat Rate Business and Residential Lines.
4. Charges for delivery of EODUF will appear on SBCT's monthly bills. EODUF charges are billed at the EODUF rates that are in effect at the end of the previous month. The charges are as set forth in Exhibit C to this Attachment.
5. All messages will be in the standard Alliance for Telecommunications Industry Solutions (ATIS) EMI record format.
6. Messages that error in the billing system of SBCT will be the responsibility of SBCT. If, however, SBCT should encounter significant volumes of errored messages that prevent processing by SBCT within its systems, BellSouth will work with SBCT to determine the source of the errors and the appropriate resolution.
7. The following specifications shall apply to the EODUF feed.
  - 7.1 Usage To Be Transmitted
    - 7.1.1 The following messages recorded by BellSouth will be transmitted to SBCT:  
  
Customer usage data for flat rated local call originating from SBCT's End User lines (1FB or 1FR). The EODUF record for flat rate messages will include:
      - Date of Call
      - From Number
      - To Number
      - Connect Time
      - Conversation Time
      - Method of Recording
      - From RAO
      - Rate Class
      - Message Type
      - Billing Indicators
      - Bill to Number

7.1.2 BellSouth will perform duplicate record checks on EODUF records processed to ODUF. Any duplicate messages detected will be deleted and not sent to SBCT.

7.1.3 In the event that SBCT detects a duplicate on EODUF they receive from BellSouth, SBCT will drop the duplicate message (SBCT will not return the duplicate to BellSouth).

## 7.2 Physical File Characteristics

7.2.1 The EODUF feed will be distributed to SBCT via Connect: Direct, Secure File Transfer Protocol (FTP) or another mutually agreed medium. The EODUF messages will be intermingled among SBCT's ODUF messages. EODUF will be a variable block format. The data on EODUF will be in a non-compacted EMI format (175 byte format plus modules). It will be created on a daily basis Monday through Friday except holiday.

7.2.2 Data circuits (private line or dial-up) may be required between BellSouth and SBCT for the purpose of data transmission as set forth in Section 7.2.2 of Exhibit D above.

7.2.3 If SBCT utilizes Secure FTP for data file transmission, purchase of the Secure FTP software will be the responsibility of SBCT.

## 7.3 Packing Specifications

7.3.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.

7.3.2 The OCN, From (RAO), and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to SBCT which BellSouth RAO is sending the message. BellSouth and SBCT will use the invoice sequencing to control data exchange. BellSouth will be notified of sequence failures identified by SBCT and resend the data as appropriate.

The data will be packed using ATIS EMI Records.
