AMENDMENT TO
INTERCONNECTION AGREEMENT BETWEEN
BELLSOUTH TELECOMMUNICATIONS, INC.
AND
LECSTAR TELECOM, INC.
DATED APRIL 14, 2000

This Agreement (the "Amendment") is made and entered into between BellSouth Telecommunications, Inc. ("BellSouth") a Georgia corporation, and LecStar Telecom, Inc. ("LecStar"), a Georgia corporation.

WHEREAS, the Parties desire to amend that certain Interconnection Agreement between BellSouth and LecStar dated April 14, 2000 (the "Interconnection Agreement") in order to incorporate LATA-wide local calling language.

WHEREAS, the Parties desire to amend the Interconnection Agreement in order to incorporate rates established by the Florida Public Service Commission ("PSC") in Docket Number 990649-TP and to incorporate changes in language.

NOW THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, BellSouth and LecStar hereby convenant and agree as follows:

1. The following language is hereby incorporated to provide LATA-wide local calling enhancements in all states:

3.1.3.1 Unbundled Local Switching, together with Common Transport and, if necessary, Tandem Switching, provides to LecStar local subscribers local calling and the ability to presubscribe to a primary carrier for intraLATA toll service and a primary carrier for interLATA toll service.

3.1.3.2 Provided that LecStar purchases unbundled local switching from BellSouth and uses the BellSouth CIC for its end users' LPIC or if a BellSouth local end user selects BellSouth as its LPIC, then the Parties will consider as local any calls originated by a LecStar local end user, or originated by a BellSouth local end user and terminated to a LecStar local end user, where such calls originate and terminate in the same LATA, except for those calls originated and terminated through switched access arrangements (i.e., calls that are transported by a party other than BellSouth). For such calls, BellSouth will charge LecStar the UNE elements for the BellSouth facilities utilized. Neither Party shall bill the other originating or terminating switched

access charges for such calls. Intercarrier compensation for local calls between BellSouth and LecStar shall be as described in BellSouth's UNE Local Call Flows set forth on BellSouth's web site.

3.1.3.3 Where LecStar purchases unbundled local switching from BellSouth but does not use the BellSouth CIC for its end users' LPIC, BellSouth will consider as local those direct dialed telephone calls that originate from an LecStar end user and terminate within the basic local calling area or within the extended local calling areas and that are dialed using 7 or 10 digits as defined and specified in Section A3 of BellSouth's General Subscriber Services Tariffs. For such local calls, BellSouth will charge LecStar the UNE elements for the BellSouth facilities utilized. Intercarrier compensation for local calls between BellSouth and LecStar shall be as described in BellSouth's UNE Local Call Flows set forth on BellSouth's web site.

3.1.3.4 For any calls that originate and terminate through switched access arrangements (i.e., calls that are transported by a party other than BellSouth), BellSouth shall bill LecStar the UNE elements for the BellSouth facilities utilized. Each Party may bill the toll provider originating or terminating switched access charges, as appropriate.

3.1.3.5 Reverse billed toll calls, such as intraLATA 800 calls, calling card calls and third party billed calls, where BellSouth is the carrier shall also be considered as local calls and LecStar shall not bill BellSouth originating or terminating switched access for such calls.

3.1.3.6 BellSouth shall assess retroactive charges for UNE transport and switching associated with using the BellSouth LPIC if a CLEC has been able to previously select BellSouth as the end user LPIC prior to the option allowing the selection of a BellSouth provided LATA-wide local calling area being offered.

2. The Interconnection Agreement is hereby amended to replace in their entirety all rate elements and rates for Florida in Attachments 1, 2, 3, 5, and 7 as attached hereto as Exhibit 1 and by reference made a part of this Amendment.

3. The Interconnection Agreement is hereby amended to modify or add language in Attachment 2 for Florida and is attached hereto as Exhibit 2 and by reference made a part of this Amendment.

4. The Parties agree that all of the other provisions of the Interconnection Agreement, dated November 30, 2000, shall remain in full force and effect.

5. The Parties further agree that either or both of the Parties is authorized to submit this Amendment to the appropriate regulatory body having jurisdiction over the subject matter of this Amendment, for approval subject to Section 252(e) of the federal Telecommunications Act of 1996.

This Amendment is made effective upon the date that it is signed by both Parties.

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be executed by their respective duly authorized representatives on the data indicated below.

Signed:

ENHANCED EXTENDED LINK (EELs)																	
	NOTE: New EELs available in State of Georgia, density zone 1 of following SMAs: Orlando, FL; Miami, FL; Ft. Lauderdale, FLI; Nashville, TN; New Orleans, LA;																
	NOTE: Charlotte-Gastonia-Rockhill, NC; Greensboro-Winston Salem-High Point, NC. Use all rates below except Switch As Is Charge.																
	NOTE: In all states, EEL network elements shown below also apply to currently combined facilities which are converted to UNE rates. A Switch As Is Charge applies to currently combined facilities converted to UNEs.(Non-recurring rates do not apply.)																
	NOTE: In Georgia, the EEL network elements apply to ordinarily combined network elements per the GA PSC order.(No Switch As Is Charge.)

	STS1 Interoffice or Local Loop used in a COMBINATION - "Switch As Is" Conversion Charge			UNCSX	UNCCC		8 1	8 1	8 1	8 1		10 73			1 65		
	NOTE: Local Channel - Dedicated Transport - minimum billing period - Below DS3=one month, DS3 and above=four months																
OPERATIONAL SUPPORT SYSTEMS																	
	NOTE: (1) Electronic Service Order: CLEC-1 should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions																
	NOTE: (1) Continued: The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge																
	NOTE: (1) Concluded: CLEC-1 may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC-1 may elect the regional electronic service ordering charge																
	NOTE: (2) Manual Service Order charge: disconnect, in the state of Florida, to be billed on a per LSR basis																
	Electronic OSS Charge, per LSR, submitted via BST's OSS interactive interfaces (Regional)				SOMEC		3 5										
	The "Zone" shown in the sections for stand-alone loops or loops as part of a combination refers to Geographically Deaveraged UNE Zones To view Geographically Deaveraged UNE Zone Designations by Central Office, refer to Internet Website http://www interconnection bellsouth com/become_a_clec/html/interconnection htm																
UNBUNDLED LOCAL EXCHANGE SWITCHING(PORTS)																	
	Exchange Ports																
	NOTE: Although the Port Rate includes all available features in GA & TN, the desired features will need to be ordered using retail USOCs

UNBUNDLED PORT LOOP COMBINATIONS - MARKET RATES																
	Market Rates shall apply where BellSouth is not required to provide unbundled local switching or switch ports per FCC and/or State Commission rules															
	These scenarios include:															
	1. Unbundled port/loop combinations that are Not Currently Combined in all of the BellSouth states except as noted for Georgia and Tennessee															
	2. Unbundled port/loop combinations that are Currently Combined or Not Currently Combined in Zone 1 of the Top 8 MSAS in BellSouth's region for end users with 4 or more DS0 equivalent lines															
	The Top 8 MSAs in BellSouth's region are: FL (Orlando, Ft. Lauderdale, Miami); GA (Atlanta); LA (New Orleans); NC (Greensboro-Winston Salem-Highpoint/Charlotte-Gastonia-Rock Hill); TN (Nashville)															
	BellSouth currently is developing the billing capability to mechanically bill the recurring and non-recurring Market Rates in this section. In the interim, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference.															
	The Market Rate for unbundled ports includes all available features in all states.															
	End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC URECU)															
	For Not Currently Combined scenarios where Market Rates apply, the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section. Additional NRCs may apply also and are categorized accordingly.

EXHIBIT 2

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

Modify or add Sections as follows to provide for additional Order Coordination options for loops:

2.1.5 "Order Coordination" (OC) allows BellSouth and LecStar to coordinate the installation of the SL2 Loops, Unbundled Digital Loops (UDL) and other Loops where OC may be purchased as an option, to LecStar's facilities to limit end user service outage. OC is available when the Loop is provisioned over an existing circuit that is currently providing service to the end user. OC for physical conversions will be scheduled at BellSouth's discretion during normal working hours on the committed due date. OC shall be provided in accordance with the chart set forth below.

2.1.5.1 "Order Coordination – Time Specific" (OC-TS) allows LecStar to order a specific time for OC to take place. BellSouth will make every effort to accommodate LecStar's specific conversion time request. However, BellSouth reserves the right to negotiate with LecStar a conversion time based on load and appointment control when necessary. This OC-TS is a chargeable option for all Loops except Unbundled Copper Loops (UCL) and Universal Digital Channel (UDC), and is billed in addition to the OC charge. LecStar may specify a time between 9:00 a.m. and 4:00 p.m. (location time) Monday through Friday (excluding holidays). If LecStar specifies a time outside this window, or selects a time or quantity of Loops that requires BellSouth technicians to work outside normal work hours, overtime charges will apply in addition to the OC and OC-TS charges. Overtime charges will be applied based on the amount of overtime worked and in accordance with the rates established in the E Access Tariff, Section E13.2, for each state. The OC-TS charges for an order due on the same day at the same location will be applied on a per Local Service Request (LSR) basis.

	Order Coordination (OC)	**Order Coordination – Time Specific (OC-TS)**	**Test Points**	**DLR**	**Charge for Dispatch and Testing if No Trouble Found**
SL-1	Chargeable Option	Chargeable Option	Not available	Chargeable Option – ordered as Engineering Information Document	Charged for Dispatch inside and outside Central Office

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

UCL-ND	Chargeable Option	Not Available	Not Available	Chargeable Option – ordered as Engineering Information Document	Charged for Dispatch inside and outside Central Office
SL-2	Included	Chargeable Option	Included	Included	Charged for Dispatch outside Central Office
Unbundled Digital Loop	Included	Chargeable Option (except on Universal Digital Channel)	Included (where appropriate)	Included	Charged for Dispatch outside Central Office
Unbundled Copper Loop	Chargeable in accordance with Section 2	Not available	Included	Included	Charged for Dispatch outside Central Office
For UVL-SL1 and UCLs, LecStar must order and will be billed for both OC and OC-TS if requesting OC-TS.					

2.1.10 Unbundled Voice Loop - SL1 (UVL-SL1) loops are 2-wire loop start circuits, will be non-designed, and will not have remote access test points. OC will be offered as a chargeable option on SLI loops when reuse of existing facilities has been requested by LecStar. LecStar may also order OC-TS when a specified conversion time is requested. OC-TS is a chargeable option for any coordinated order and is billed in addition to the OC charge. An Engineering Information (EI) document can be ordered as chargeable option. The EI document provides loop make up information which is similar to the information normally provided in a Design Layout Record. Upon issuance of a non-coordinated order in the service order system, SL1 loops will be activated on the due date in the same manner and time frames that BellSouth normally activates POTS-type loops for its end users.

2.1.11 Unbundled Voice Loop – SL2 (UVL-SL2) loops may be 2-wire or 4-wire circuits, shall have remote access test points, and will be designed with a Design Layout Record provided to LecStar. SL2 circuits can be provisioned with loop start, ground start or reverse battery signaling. OC is provided as a standard feature on SL2 loops. The OC feature will allow LecStar to coordinate the installation of the loop with the disconnect of an existing customer's service and/or number portability service. In these cases, BellSouth will perform the order conversion with standard order coordination at its discretion during normal work hours.

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

2.1.13 As a chargeable option on all loops except UCL and UDC (Universal Digital Channel) (also known as IDSL-compatible Loop), BellSouth will offer Order Coordination – Time Specific (OC-TS). This will allow LecStar the ability to specify the time that the coordinated conversion takes place. The OC-TS charge for orders due on the same day at the same location will be aplied on a per Local Service Request (LSR) basis. In the event that multiple LSRs are worked on the same day, at the same location, only one OC-TS charge will apply per day.

Add Section 2.10, Loop Make-up:

2.10 **Loop Make-up (LMU)**

2.10.1 Description of Service

2.10.1.1 BellSouth shall make available to LecStar (LMU) information so that LecStar can make an independent judgment about whether the Loop is capable of supporting the advanced services equipment LecStar intends to install and the services LecStar wishes to provide.

2.10.1.1 BellSouth will provide LecStar LMU information consisting of the composition of the loop material (copper/fiber); the existence, location and type of equipment on the Loop, including but not limited to digital loop carrier or other remote concentration devices, feeder/distribution interfaces, bridged taps, load coils, pair-gain devices; the loop length; the wire gauge and electrical parameters.

2.10.1.2 BellSouth's LMU information is provided to LecStar as it exists either in BellSouth's databases or in its hard copy facility records. BellSouth does not guarantee accuracy or reliability of the LMU information provided.

2.10.1.3 LecStar may choose to use equipment that it deems will enable it to provide a certain type and level of service over a particular BellSouth Loop. The determination shall be made solely by LecStar and BellSouth shall not be liable in any way for the performance of the advanced data services provisioned over said Loop. The specific Loop type (ADSL, HDSL, or otherwise) ordered on the LSR must match the LMU of the loop requested taking into consideration any requisite line conditioning. The LMU data is provided for informational purposes only and does not guarantee LecStar's ability to provide advanced data services over the ordered loop type. Further, if LecStar orders loops that are not

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

intended to support advanced services (such as UV-SL1, UV-SL2, or ISDN compatible loops) and that are not inventoried as advanced services loops, the LMU information for such loops is subject to change at any time due to modifications and/or upgrades to BellSouth's network. LecStar is fully responsible for any of its service configurations that may differ from BellSouth's technical standard for the loop type ordered.

2.10.2 **Submitting Loop Makeup Service Inquiries**

2.10.2.1 LecStar may obtain LMU information by submitting a LMU Service Inquiry (LMUSI) mechanically or manually. Mechanized LMUSIs should be submitted through BellSouth's Operational Support Systems interfaces. After obtaining the Loop from the mechanized LMUSI process, if LecStar needs further loop information in order to determine loop service capability, LecStar may initiate a separate Manual Service Inquiry for a separate nonrecurring charge as set forth in the rate exhibit for Attachment 2.

2.10.2.2 Manual LMUSIs shall be submitted by electronic mail to BellSouth's Complex Resale Support Group (CRSG)/Account Team utilizing the Preordering Loop Makeup Service Inquiry form. The service interval for the return of a Loop Makeup Manual Service Inquiry is seven business days. Manual LMUSIs are not subject to expedite requests. This service interval is distinct from the interval applied to the subsequent service order.

2.10.3 **Loop Reservations**

2.10.3.1 For a Mechanized LMUSI, <customer_name>> may reserve up to ten Loop facilities. For a Manual LMUSI, LecStar may reserve up to three Loop facilities.

2.10.3.2 LecStar may reserve facilities for up to four (4) calendar days for each facility requested on a LMUSI from the time the LMU information is returned to LecStar. During and prior to LecStar placing an LSR, the reserved facilities are rendered unavailable to other customers, including BellSouth. If LecStar does not submit an LSR for a UNE service on a reserved facility within the four-day reservation timeframe, the reservation of that spare facility will become invalid and the facility will be released.

2.10.3.3 Charges for preordering LMUSI are separate from any charges associated with ordering other services from BellSouth.

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

2.10.4 **Ordering of Other UNE Services**

2.10.4.1 All LSRs issued for reserved facilities shall reference the facility reservation number as provided by BellSouth. LecStar will not be billed any additional LMU charges for the loop ordered on such LSR. If, however, LecStar does not reserve facilities upon an initial LMUSI, LecStar will be required to submit and pay for an additional LMUSI upon ordering.

2.10.4.2 Where LecStar has reserved multiple Loop facilities on a single reservation, LecStar may not specify which facility shall be provisioned when submitting the LSR. For those occasions, BellSouth will assign to LecStar, subject to availability, a facility that meets the BellSouth technical standards of the BellSouth type Loop as ordered by LecStar. If the ordered Loop type is not available, LecStar may utilize the Unbundled Loop Modification process or the Special Construction process, as applicable, to obtain the Loop type ordered.

Add Section 2.11, High Frequency Spectrum

2.11 **High Frequency Spectrum Network Element**

2.11.1 General

2.11.1.1 BellSouth shall provide LecStar access to the high frequency portion of the local loop as an unbundled network element only where BellSouth is the voice service provider to the end user ("High Frequency Spectrum") at the rates set forth in this Attachment.

2.11.1.2 High Frequency Spectrum is defined as the frequency range above the voiceband on a copper loop facility carrying analog circuit-switched voiceband transmissions. Access to the High Frequency Spectrum is intended to allow LecStar the ability to provide Digital Subscriber Line ("xDSL") data services to the end user for which BellSouth provides voice services. The High Frequency Spectrum shall be available for any version of xDSL complying with Spectrum Management Class 5 of ANSI T1.417, *American National Standard for Telecommunications, Spectrum Management for Loop Transmission Systems*. BellSouth will continue to have access to the low frequency portion of the loop spectrum (from 300 Hertz to at least 3000 Hertz, and potentially up to 3400 Hertz, depending on equipment and facilities) for the purposes of providing voice service. LecStar shall only use xDSL technology that is within the PSD mask for Spectrum Management Class 5 as found in the above-mentioned document.

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

2.11.1.3 Access to the High Frequency Spectrum requires an unconditioned, 2-wire copper Loop. An unloaded Loop is a copper Loop with no load coils, low-pass filters, range extenders, DAMLs, or similar devices and minimal bridged taps consistent with ANSI T1.413 and T1.601. BellSouth will provide Loop conditioning to LecStar in accordance with the Unbundled Loop Modification process set forth in Section 2.2 of this Attachment. BellSouth is not required to condition a Loop for access to the High Frequency spectrum if conditioning of that Loop significantly degrades BellSouth's voice service. If LecStar requests that BellSouth condition a Loop longer than 18,000 ft. and such conditioning significantly degrades the voice services on the Loop, LecStar shall pay for the Loop to be restored to its original state.

2.11.2 **Provisioning of High Frequency Spectrum and Splitter Space**

2.11.2.1 BellSouth will provide LecStar with access to the High Frequency Spectrum as follows:

2.11.2.2 To order High Frequency Spectrum on a particular Loop, LecStar must have a Digital Subscriber Line Access Multiplexer (DSLAM) collocated in the central office that serves the end-user of such Loop. LecStar may order splitters in a central office once it has installed its DSLAM in that central office. BellSouth will install splitters within forty-two (42) calendar days of LecStar's submission of such order to the BellSouth Complex Resale Support Group; provided, however, that in the event BellSouth did not have reasonable notice that a particular central office was to have a splitter installed therein, the forty-two (42) day interval shall not apply. Collocation itself or an application for collocation will serve as reasonable notice.

2.11.2.3 Once a splitter is installed on behalf of LecStar in a central office in which LecStar is located, LecStar shall be entitled to order the High Frequency Spectrum on lines served out of that central office. BellSouth will bill and LecStar shall pay the electronic or manual ordering charges as applicable when LecStar orders High Frequency Spectrum for end-user service.

2.11.2.4 BellSouth will select, purchase, install, and maintain a central office POTS splitter and provide LecStar access to data ports on the splitter. The splitter will route the High Frequency Spectrum on the circuit to LecStar's xDSL equipment in LecStar's collocation space. At least 30 days before making a change in splitter suppliers, BellSouth will provide LecStar with a carrier notification letter, informing LecStar of change. LecStar shall purchase ports on the splitter in increments of 24 ports.

2.11.2.5 BellSouth will install the splitter in (i) a common area close to LecStar's collocation area, if possible; or (ii) in a BellSouth relay rack as close to LecStar's DS0 termination point as possible. LecStar shall have access to the

Applicable to FL

splitter for test purposes, regardless of where the splitter is placed in the BellSouth premises. For purposes of this section, a common area is defined as an area in the central office in which both Parties have access to a common test access point. A Termination Point is defined as the point of termination for LecStar on the toll main distributing frame in the central office and is not the demarcation point set forth in Attachment 4 of this Agreement. BellSouth will cross-connect the splitter data ports to a specified LecStar DS0 at such time that a LecStar end user's service is established.

2.11.2.6 The High Frequency Spectrum shall only be available on Loops on which BellSouth is also providing, and continues to provide, analog voice service directly to the end user. In the event the end-user terminates its BellSouth provided voice service for any reason, or in the event BellSouth disconnects the end user's voice service pursuant to its tariffs or applicable law, and LecStar desires to continue providing xDSL service on such Loop, LecStar shall be required to purchase a full stand-alone Loop unbundled network element. To the extent commercially practicable, BellSouth shall give LecStar notice in a reasonable time prior to disconnect, which notice shall give LecStar an adequate opportunity to notify BellSouth of its intent to purchase such Loop. In those cases in which BellSouth no longer provides voice service to the end user and LecStar purchases the full stand-alone Loop, LecStar may elect the type of loop it will purchase. LecStar will pay the appropriate recurring and non-recurring rates for such Loop as set forth in Exhibit B to this Attachment. In the event LecStar purchases a voice grade Loop, LecStar acknowledges that such Loop may not remain xDSL compatible.

2.11.2.7 Only one competitive local exchange carrier shall be permitted access to the High Frequency Spectrum of any particular loop.

2.11.3 **Ordering**

2.11.3.1 BellSouth will provide LecStar the Local Service Request ("LSR") format to be used when ordering the High Frequency Spectrum.

2.11.3.2 BellSouth will return a manual Firm Order Confirmation ("FOC") in no more than two (2) business days after receipt of a valid, error free manual LSR. When LecStar submits an electronic LSR for High Frequency Spectrum, BellSouth will return a FOC in four (4) hours ninety-five percent (95%) of the time, or, for orders that do not flow-through, in two (2) business days. BellSouth will provide LecStar with access to the High Frequency Spectrum at the following target intervals:

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
Modifications to Language in Attachment 2 of Interconnection Agreement
Applicable to FL

2.11.3.3 For 1-5 lines at the same address within three (3) business days from BellSouth's issuance of a FOC; 6-10 lines at same address within 5 business days from BellSouth's issuance of a FOC; and more than 10 lines at the same address is to be negotiated.

2.11.3.4 BellSouth will provide to LecStar BellSouth's Loop Qualification System that BellSouth uses to qualify loops for its own ADSL offering.

2.11.3.5 BellSouth will provide LecStar access to Preordering Loop Makeup (LMU), in accordance with the terms of this Agreement. BellSouth shall bill and LecStar shall pay the rates for such services, as described in Exhibit C.

2.11.3.6 BellSouth shall test the data portion of the loop to ensure the continuity of the wiring for LecStar's data.

2.11.4. **Maintenance and Repair**

2.11.4.1 LecStar shall have access for repair and maintenance purposes, to any loop for which it has access to the High Frequency Spectrum. LecStar may access the loop at the point where the combined voice and data signal exits the central office splitter.

2.11.4.2 BellSouth will be responsible for repairing voice services and the physical line between the network interface device at the customer's premises and the Termination Point. LecStar will be responsible for repairing data services. Each Party will be responsible for maintaining its own equipment.

2.11.4.3 LecStar shall inform its end users to direct data problems to LecStar, unless both voice and data services are impaired, in which event the end users should call BellSouth.

2.11.4.4 Once a Party has isolated a trouble to the other Party's portion of the loop, the Party isolating the trouble shall notify the end user that the trouble is on the other Party's portion of the Loop.

2.11.4.5 In the event LecStar's deployment of xDSL on the High Frequency Spectrum significantly degrades the performance of other advanced services or of BellSouth's voice service on the same loop, BellSouth shall notify LecStar and allow twenty-four (24) hours to cure the trouble. If LecStar fails to resolve the trouble, BellSouth may discontinue LecStar's access to the High Frequency Spectrum on such loop.

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.

2.11.5 **Line Splitting.**

2.11.5.1 BellSouth will work cooperatively with CLECs to develop rates, methods and procedures to operationalize a process whereby two CLECs, one being a provider of voice services (a "Voice CLEC") and the other being a provider of data services (a "Data CLEC") may provide services over the same loop. The loop and port over which the services are provided cannot be a loop and port combination (i.e., UNE-P), but must be individual, stand alone network elements. The Voice CLEC or the Data CLEC shall be responsible for connecting the loop and port to a CLEC-owned splitter. BellSouth shall not own or maintain the splitter used for this purpose. When such rates, methods and procedures have been developed and operationalized, then at the request of LecStar, the Parties shall amend this Agreement to incorporate the same.

Modify Section 4.3, Enhanced Extended Link (EELs):

4.3 Enhanced Extended Link (EELs)

4.3.1 DS1 Interoffice Channel + DS1 Channelization + 2-wire VG Local Loop

4.3.2 DS1 Interoffice Channel + DS1 Channelization + 4-wire VG Local Loop

4.3.3 DS1 Interoffice Channel + DS1 Channelization + 2-wire ISDN Local Loop

4.3.4 DS1 Interoffice Channel + DS1 Channelization + 4-wire 56 kbps Local Loop

4.3.5 DS1 Interoffice Channel + DS1 Channelization + 4-wire 64 kbps Local Loop

4.3.6 DS1 Interoffice Channel + DS1 Local Loop

4.3.7 DS3 Interoffice Channel + DS3 Local Loop

4.3.8 STS-1 Interoffice Channel + STS-1 Local Loop

4.3.9 DS3 Interoffice Channel + DS3 Channelization + DS1 Local Loop

LecStar Telecom, Inc. and BellSouth Telecommunications, Inc.
