RE: Petition for Arbitration of an Interconnection Agreement
Between BellSouth Telecommunications, Inc. and US LEC of
Tennessee, Inc. Pursuant to the Telecommunications Act of
1996

Dear Mr. Dorman:

Enclosed for filing in the above-captioned case are the original
and five (5) copies of the Petition of BellSouth Telecommunications,
Inc. for Section 252(b) Arbitration.

Sincerely,

Creighton E. Mershon, Sr.

Creighton E. Mershon, Sr.

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

Petition for Arbitration of an Interconnection)	
Agreement Between BellSouth Telecommunications,)	CASE NO.
Inc. and US LEC of Tennessee, Inc. Pursuant to the)	
Telecommunications Act of 1996)	

**PETITION OF BELL SOUTH TELECOMMUNICATIONS, INC.
FOR SECTION 252(b) ARBITRATION**

Pursuant to Section 252(b) of the Telecommunications Act of 1996 ("1996 Act"), BellSouth Telecommunications, Inc. ("BellSouth") files this Petition for Arbitration ("Petition") seeking resolution of certain issues arising between US LEC of Tennessee, Inc. ("US LEC") and BellSouth in the negotiation of an Interconnection Agreement. BellSouth states as follows:

A. STATEMENT OF FACTS

1. BellSouth is a corporation organized and existing under the laws of the State of Georgia, maintaining its principal place of business at 675 West Peachtree Street, N.E., Atlanta, Georgia 30375. BellSouth is an incumbent local exchange carrier ("ILEC") as defined by 47 U.S.C. § 251(h).

2. On information and belief, US LEC is a corporation organized and existing under the laws of the State of North Carolina, maintaining its principal place of business in Charlotte, North Carolina. Upon information and belief, US LEC is certificated by the Kentucky Public Service Commission ("Commission") to provide Competitive Local Exchange Carrier ("CLEC")

services. Additionally, upon information and belief, and pursuant to the aforementioned certificate, US LEC provides telecommunications services to customers in the state of Kentucky.

3. Pursuant to the provisions of Section 251(c) the 1996 Act, BellSouth is required to offer (through negotiation or otherwise) interconnection between BellSouth's network and the facilities and equipment of any requesting telecommunications carrier. *See* 47 U.S.C. § 251(c)(2). The terms of interconnection must comply with the provisions of Sections 251(b) and (c) of the 1996 Act.

4. Under the provisions of Section 252(d) of the 1996 Act, BellSouth must provide interconnection and network elements at rates that are cost-based and nondiscriminatory. The rates BellSouth charges may include a reasonable profit. *See* 47 U.S.C. § 252(d)(1).

5. Effective January 1, 2000, BellSouth and US LEC, through the adoption provisions of Section 252(i) of the 1996 Act, entered into an interconnection agreement (the "BellSouth/US LEC Interconnection Agreement"), which was subsequently approved by the Commission. The BellSouth/US LEC Interconnection Agreement expired on August 20, 2000. The parties have agreed to continue service pursuant to its terms until such time as a new Interconnection Agreement is in effect. The new Interconnection Agreement resulting from this arbitration proceeding will be retroactive to August 20, 2000.

6. In anticipation of the expiration of the BellSouth/US LEC Interconnection Agreement and pursuant to the terms of that agreement, BellSouth provided to US LEC a written request for negotiation of a new interconnection agreement on March 22, 2000. A copy of the letter is attached hereto as Exhibit "A". Although US LEC never responded to the March 22 letter, BellSouth included in that letter a copy of BellSouth's Standard Interconnection Agreement for US LEC's review.

7. Since US LEC never responded to BellSouth's request for negotiations, BellSouth assumes that the same issues are applicable to this arbitration that were raised in the previous arbitration, KPSC Docket No. 2000-045.

B. JURISDICTION AND TIMING

8. Pursuant to Section 252(b)(1) of the 1996 Act, which allows either party to the negotiation to request arbitration, this Commission is empowered to arbitrate unresolved arbitrable issues regarding US LEC's interconnection with BellSouth's network. BellSouth's Petition is filed with the Commission between the 135th and 160th day from the date that the negotiations were deemed to have commenced. This Commission must resolve each issue set forth in this Petition not later than nine (9) months after the date on which US LEC received the request for negotiation from BellSouth, which is on or before December 22, 2000.

C. STANDARD OF REVIEW

9. The Federal Communications Commission ("FCC") established the appropriate standard for arbitration under Sections 251 and 252 of the 1996 Act in its First Report and Order, *Implementation of the Local Competition provisions of the Telecommunications Act of 1996*, CC Docket No. 96-98 ("First Report and Order"). Pursuant to the FCC's First Report and Order, this Commission must ensure that resolution of issues in an arbitration satisfy Section 251 of the 1996 Act, including regulations promulgated by the FCC.

D. ISSUES FOR ARBITRATION

10. Pursuant to Section 252(b)(2) of the 1996 Act, the unresolved issues between US LEC and BellSouth are set forth below. While every issue raised in this Arbitration Petition may not be appropriate for arbitration under Sections 251 and 252 of the 1996 Act, BellSouth

endeavored to raise every issue that was not resolved in the negotiation process. The resolved issues are reflected in the attached Interconnection Agreement (Exhibit "B").

ISSUE 1: Under the provisions of Sections 251 and 252 of the 1996 Act, is BellSouth required to include US LEC's logo on the cover of BellSouth's White Page and Yellow Page directories?

Affected Agreement Provisions: General Terms and Conditions, Section 5.1

BellSouth's Position: Neither the 1996 Act nor state law requires BellSouth to place a CLEC's logo on the cover of BellSouth's White Page and Yellow Page directories. Section 251(b)(3) of the 1996 Act only requires BellSouth to permit CLECs to have nondiscriminatory access to directory listings. Thus, this issue is not appropriate for a Section 252 arbitration proceeding. As BellSouth provides nondiscriminatory access to directory listings to US LEC, BellSouth has satisfied its obligations under Section 251 of the 1996 Act.

The FCC interpreted Section 251(b)(3) to mean that a CLEC's customers "should be able to access each LEC's directory assistance service and obtain a directory listing on a nondiscriminatory basis, notwithstanding: (1) the identity of a requesting customer's local telephone service provider; or (2) the identity of the telephone service provider for a customer whose directory listing is requested." Second Report and Order and Memorandum Opinion and Order, *In the Matter of Implementation of the Local Competition Provisions of the Telecommunications Act of 1996*, CC Docket No. 96-98, (Rel. August 8, 1996), at ¶¶ 130, 133. Further, the FCC determined that "the term 'directory listing' as used in section 251(b)(3) is synonymous with the definition of 'subscriber list information' in section 222(f)(3)." *Id.*, at ¶ 137. Subscriber list information is defined in Section 222(f)(3) of the 1996 Act as:

[A]ny information -- (A) identifying the listed names of subscribers of a carrier and such subscribers' telephone numbers, addresses, or primary advertising classifications (as such classifications are assigned at the time of the establishment of such service), or any combination of such listed names, numbers, addresses, or classifications; and (B) that the carrier or an affiliate has published, caused to be published, or accepted for publication in any directory format.

Finally, the Commission, during the AT&T Arbitration proceeding¹, addressed this exact issue. The Commission ruled:

AT&T argues its logo should be displayed on BellSouth's telephone directories as BellSouth's logo is displayed. However, this dispute is no longer at issue, since the Commission has already addressed it. By Order dated November 21, 1996, BellSouth Advertising Publishing Corporation ("BAPCO") was denied

¹ Order, *In the Matter of: The Interconnection Agreement Negotiations Between AT&T Communications of the South Central States, Inc. and BellSouth Telecommunications, Inc.* Pursuant to 47 U.S.C., Docket No. 96-482, at p. 16-17.

intervention in this proceeding. In that Order, the Commission noted that AT&T and other ALECs that have directory publication needs must negotiate and contract directly with BAPCO. Accordingly, the Commission determined it would not address issues involving BAPCO in this proceeding.

Nowhere in the 1996 Act, FCC Orders, or Orders of this Commission is BellSouth even arguably required to place a CLEC logo on the cover of BellSouth's White Page and Yellow Page directories. Thus, BellSouth proposes that the Interconnection Agreement contain the following language concerning directory listings:

- 5.1 Listings. BellSouth or its agent will include US LEC residential and business customer listings in the appropriate White Pages (residential and business) directories. Directory listings will make no distinction between US LEC and BellSouth subscribers.

US LEC's Position: The 1996 Act requires BellSouth to include US LEC's logo on BellSouth's White Page and Yellow Page directories. US LEC proposes the following language:

- 5.1 Listings. BellSouth or its agent will include US LEC residential and business customer listings in the appropriate White Pages (residential and business), and where applicable, alphabetical yellow pages directories. Directory listings will make no distinction between US LEC and BellSouth subscribers. BellSouth shall include US LEC's logo on the cover of the White Pages and Yellow Pages and in any applicable customer guides in the same manner, position, and size as its own.

ISSUE 2: Under the provisions of Sections 251 and 252 of the 1996 Act, is BellSouth required to provide US LEC's subscriber listing information ("SLI") to third party publishers? If so, under what terms?

Affected Agreement Provisions: General Terms and Conditions, Section 5.6

BellSouth's Position: Sections 251 and 252 of the 1996 Act do not require BellSouth to provide US LEC's SLI to third party publishers. Thus, this issue is not appropriate for arbitration. The obligation to provide SLI arises under Section 222(e) of the 1996 Act, which requires all telecommunications carriers providing telephone exchange service, including US LEC, to provide SLI for its end-user customers for directory publishing. However, certain telecommunications carriers, such as US LEC, have requested that BellSouth provide such carrier's SLI to third party publishers through systems designed by BellSouth for that purpose. The terms and conditions under which BellSouth voluntarily provides this service should be negotiated between the parties outside of a Section 252 arbitration. BellSouth does not object, however, to including those negotiated terms and conditions in the Interconnection Agreement, and proposes the following language:

6.1 Listing Information Confidentiality. BellSouth will accord US LEC's directory listing information the same level of confidentiality that BellSouth accords its own directory listing information, and BellSouth shall limit access to US LEC's customer proprietary confidential directory information to those employees of BellSouth and its agents who are involved in the preparation of listings and directories. If BellSouth makes its directory listing information available to any third party, BellSouth will also make available US LEC's directory listing information with no distinction between BellSouth and US LEC subscribers. BellSouth shall not use the directory listing information provided to it by US LEC for any purpose, including marketing, other than directory publishing or directory assistance.

5.6.1 Release of US LEC Directory Listings to Independent Publishers

5.6.1.1 US LEC agrees to provide to BellSouth, and BellSouth agrees to accept, US LEC Subscriber Listing Information (SLI) relating to US LEC customers in the geographic area(s) covered by this Agreement. US LEC authorizes BellSouth to release all such US LEC SLI provided to BellSouth by US LEC to qualifying third parties pursuant to BellSouth's General Subscriber Services Tariff, Section A38.2, as the same may be amended from time to time. Such US LEC SLI shall be intermingled with BellSouth's own customer listings and shall not be differentiated from the BellSouth listings or from the listings of any other CLEC that has authorized a similar release of subscriber listing information. BellSouth will use good faith efforts to obtain state commission approval of necessary modifications to Section A38.2 of its tariff to provide for release of third party directory listings, including modifications regarding listings to be released pursuant to such tariff and BellSouth's liability thereunder. BellSouth's obligation pursuant to this Section shall not arise in any particular state until the commission of such state has approved modifications to such tariff.

5.6.1.2 No compensation shall be paid to US LEC for BellSouth's receipt of US LEC SLI, or for the subsequent release to third parties of such SLI. US LEC agrees to reimburse BellSouth for any costs associated with the initial development of system changes required to make available the US LEC SLI in accordance with this Section. In addition, to the extent BellSouth incurs costs on an ongoing basis to administer the release of US LEC's SLI, US LEC shall pay to BellSouth its proportionate share of the reasonable costs associated therewith.

5.6.1.3 BellSouth shall not be liable for the content or accuracy of any SLI provided by US LEC under this Agreement. US LEC shall indemnify, hold harmless and defend BellSouth and its agents from and against any damages, losses, liabilities, demands, claims, suits, judgements, costs and expenses (including but not limited to reasonable attorneys fees and expenses) arising from BellSouth's tariff obligations or otherwise and resulting from or arising out of any third party's claim of inaccurate US LEC listings or use of the SLI pursuant to this Agreement. BellSouth shall forward to US LEC any complaints received by BellSouth relating to the accuracy or quality of US LEC's listings. The date for the initial release of US LEC's listings and subsequent updates shall be negotiated by the Parties.

US LEC's Position: US LEC contends that Sections 251 and 252 of the 1996 Act obligate BellSouth to provide US LEC's SLI to third party publishers. US LEC proposes the following language:

5.6 Listing Information Confidentiality. BellSouth will accord US LEC's directory listing information the same level of confidentiality that BellSouth accords its own directory listing information, and BellSouth shall limit access to US LEC's customer proprietary confidential directory information to those BellSouth employees who are involved in the preparation of listings. If BellSouth makes its directory listing information available to any third party, BellSouth will also make available US LEC's directory listing information with no distinction between BellSouth and US LEC subscribers, and US LEC hereby authorizes BellSouth or its agent to release its information for this purpose. BellSouth will pay US LEC a proportionate share of any revenues BellSouth receives for providing subscriber lists that include US LEC listings to third parties. BellSouth shall not use the directory listing information provided to it by US LEC for any purpose, including marketing, other than directory publishing or directory assistance.

ISSUE 3: Do the provisions of the 1996 Act limit BellSouth's ability to designate a Point of Interface to send traffic to US LEC?

Affected Agreement Provisions: Attachment 3, Section 1.7.2

BellSouth's Position: No. Under FCC Rule 51.305, BellSouth is required to provide interconnection at any technically feasible point within the incumbent LEC's network. Further, the FCC encouraged parties to identify additional points of technically feasible interconnection through negotiation and arbitration. See First Report and Order, at ¶ 212. Certainly, neither the Act nor FCC rules limit an incumbent LEC to one point of interface within the LATA or mandates that such points of interface are limited in the manner proposed by US LEC. BellSouth

should be allowed to construct and maintain its network in the most efficient manner possible taking into account the interconnection needs of all CLECs, not just US LEC. To accomplish the objectives of the 1996 Act and the FCC Rules and Orders, BellSouth proposes the following language:

- 1.7.2 BellSouth may designate a Point of Interface in each BellSouth flat rated local calling area.

US LEC's Position: The 1996 Act places limits on BellSouth's ability to designate points of interconnection within the local calling area. US LEC proposes the following language:

- 1.7.2 BellSouth may designate a Point of Interface in each BellSouth flat rated local calling area. However, BellSouth shall not designate more than one Point of Interface in the same LATA unless it has sufficient traffic terminating to US LEC at each Point of Interface to utilize at least 75% of the interconnection facility's capacity. If BellSouth designates more than one Point of Interface in a LATA, it shall provide overflow trunking arrangements within its network to re-route traffic to a different Point of Interface in the event of trunk blockage or facility outage.

ISSUE 4: What is the appropriate definition of "serving wire center" for purposes of defining transport of the parties' respective traffic.

Affected Agreement Provisions: Attachment 3, Section 1.8.4

BellSouth's Position: The term "serving wire center" should be defined in the interconnection agreement consistent with the definition found in FCC Tariff No. 1, which is "the wire center from which the customer designated premises would normally obtain dial tone from the Telephone Company." Consistent with that definition, BellSouth proposes the following language:

- 1.8.4 For the purposes of this Attachment, Serving Wire Center is defined as the wire center owned by one Party from which the other Party would normally obtain dial tone for its Point of Presence.

US LEC's Position: BellSouth is unaware of the basis for US LEC's proposed definition. Notwithstanding, US LEC proposes the following:

- 1.8.4 For the purposes of this Attachment, Serving Wire Center is defined as the V&H coordinates within which the originating Party's Point of Presence is located.

ISSUE 5: Having established the POI, is each party obligated to provide the facilities necessary to transport traffic from that POI to end users on its network?

Affected Agreement Provisions: Attachment 3, Section 1.8.6

BellSouth's Position:

BellSouth cannot agree to US LEC's proposed language.

US LEC's Position: US LEC should not be required to provide facilities to BellSouth's point of interconnection to exchange local traffic originated by BellSouth. US LEC proposes the following language:

- 1.8.6 US LEC is not required to provision facilities to locations not on its network to provide transport service to BellSouth.

ISSUE 6: What are the appropriate rates to be paid by the parties for the transport and termination of local traffic?

Affected Agreement Provisions: Attachment 3, Section 1.9.3

BellSouth's Position: The appropriate rates for reciprocal compensation are the elemental rates for end office switching, tandem switching and common transport. Under no circumstances should an CLEC be entitled to an elemental rate for a function that the CLEC's network does not perform. The individual elemental rates in the interconnection agreement should be those established previously by the Commission. BellSouth proposes the following language:

- 1.9.3 The Parties agree that compensation for the BellSouth transport and/or termination of US LEC's local and intraLATA toll traffic will be billed on a statewide basis at the applicable rates specified in Exhibit A to this Attachment for local traffic and at the BellSouth intrastate switched access tariff rates for intraLATA toll traffic.

US LEC's Position: US LEC contends that it is entitled to a composite reciprocal compensation rate for local traffic. Further, the Commission should adopt the rates proposed by US LEC. US LEC proposes the following language:

- 6.1.6 The Parties agree that compensation for the BellSouth transport and/or termination of US LEC's local and intraLATA toll traffic will be billed on a statewide basis at the applicable rates specified in Section 6 to this Attachment for local traffic and at the BellSouth intrastate switched access tariff rates for intraLATA toll traffic.

ISSUE 7: What is the appropriate definition of local traffic for purposes of the parties' reciprocal compensation obligations under Section 251(b)(5) of the 1996 Act?

Affected Agreement Provisions: Attachment 3, Sections 6.1 – 6.4

BellSouth's Position: The term "local traffic" should be defined in the Interconnection Agreement to apply to traffic that originates and terminates within a local calling area. BellSouth's proposed definition is consistent with Section 251(b)(5) of the 1996 Act, which requires local exchange carriers "to establish reciprocal compensation arrangements for the transport and termination of telecommunications." The FCC clarified the provisions of Section 251(b)(5), ruling that "section 251(b)(5) reciprocal compensation obligations should apply only to traffic that originates and terminates within a local area." *First Report and Order*, at ¶ 1034.

As the Commission is well aware, the issue of reciprocal compensation for Internet traffic traversing Internet Service Providers ("ISPs") continues to surface in Section 252 Arbitration proceedings. Thus, BellSouth submits that the definition of "local traffic" should expressly exclude ISP traffic as well as other types of interstate traffic such as IP telephony traffic. The exclusion of such traffic from the reciprocal compensation requirements of Section 251(b)(5) is consistent with FCC rulings on this issue:

As noted, section 251(b)(5) of the Act and our rules promulgated pursuant to that provision concern inter-carrier compensation for interconnected *local* telecommunications traffic. We conclude in this Declaratory Ruling, however, that ISP-bound traffic is non-local interstate traffic. Thus, the reciprocal compensation requirements of section 251(b)(5) of the Act and Section 51, Subpart H (Reciprocal Compensation for Transport and Termination of Local Telecommunications Traffic) of the Commission's rules do not govern inter-carrier compensation for this traffic.

Declaratory Ruling in CC Docket No. 96-98 and Notice of Proposed Rulemaking in CC Docket No. 99-68, *In the Matter of Implementation of the Local Competition Provisions in the Telecommunications Act of 1996*, CC Docket No. 96-98; *In the Matter of Inter-Carrier Compensation for ISP-Bound Traffic*, CC Docket No. 99-68, (Rel. February 26, 1999), at FN 87. ("FCC Declaratory Ruling")

There is absolutely no doubt that the traffic in question is interstate traffic over which the FCC has jurisdiction. *FCC Declaratory Ruling*, at ¶¶ 1, 16. In order to stop the proliferation of Section 252 arbitrations wherein the CLECs attempt to obtain reciprocal compensation to which they are clearly not entitled, the Commission should adopt a definition of "local traffic" that specifically excludes ISP-bound traffic and IP telephony traffic. BellSouth proposes the following:

6.1 Compensation for Call Transport and Termination for Local

- 6.1.1 Local Traffic is defined as any telephone call that originates in one exchange and terminates in either the same exchange, or other local calling area as defined by the originating Party that has its own switch for its own

local exchange service end users associated with the originating exchange. If a Party utilizes unbundled switching, the local calling area shall be as defined in BellSouth's General Subscriber Services Tariff. As clarification of this definition and for reciprocal compensation, Local Traffic does not include traffic that originates from or is directed to or through an enhanced service provider or information service provider. Additionally, IP Telephony traffic will be considered switched access traffic. As further clarification, Local Traffic does not include:

(i) Traffic that is at issue in North Carolina Docket P-561, Sub 10 or any similar network affiliated with US LEC where any arrangement exists to compensate the originator of such traffic; or

(ii) Traffic that consists of minutes of use from any end-user customer that relies upon a call placed by that end-user customer or on the end-user customer's behalf to establish or maintain a network connection, if: (a) the minutes of use to be billed are primarily associated with traffic of a type not routinely and ordinarily recognized by a reasonable person to constitute traffic as a result of a telephone call (i.e. voice or data traffic); (b) the end-user customer does not control the destination of the call; and (c) the minutes of use do not serve a legitimate purpose that is unrelated to the receipt of reciprocal compensation or any other benefit that may be derived solely from establishing or maintaining the network connection.

6.1.2 The Parties shall provide for the mutual and reciprocal recovery of the costs for the elemental functions performed in transporting and terminating local traffic on each other's network. The Parties agree that charges for transport and termination of calls on its respective networks are as set forth in Exhibit A to this Attachment.

6.1.3 For the purposes of this Attachment, Common (Shared) Transport is defined as the transport of one Party's traffic by the other Party over the other Party's common (shared) facilities between the other Party's tandem switch and end office switch and/or between the other Party's tandem switches.

6.1.4 For the purposes of this Attachment, Tandem Switching is defined as the function that establishes a communications path between two switching offices through a third switching office (the Tandem switch).

6.1.5 For the purposes of this Attachment, End Office Switching is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.

- 6.1.6 If US LEC utilizes a switch outside the LATA and BellSouth chooses to purchase dedicated or common (shared) transport from US LEC for transport and termination of BellSouth originated traffic, BellSouth will pay US LEC no more than the airline miles between the V & H coordinates of the Point of Interface within the LATA where US LEC receives the BellSouth-originated traffic and the V & H coordinates of the BellSouth Exchange Rate Center Area that the US LEC terminating NPA/NXX is associated in the same LATA. For these situations, BellSouth will compensate US LEC at either dedicated or common (shared) transport rates specified in Exhibit A and based upon the functions provided by US LEC as defined in this Attachment.
- 6.1.7 Neither Party shall represent access services traffic (e.g. Internet Protocol (IP) Telephony, FGA, FGB, etc.) as Local Traffic for purposes of payment of reciprocal compensation.
- 6.2 Unidentifiable traffic. US LEC shall utilize its NPA/NXXs in such a way and will provide the necessary information so that BellSouth shall be able to distinguish Local from IntraLATA Toll traffic for BellSouth originated traffic. US LEC end users' assigned NPA/NXX line numbers shall be physically located in the BellSouth rate center with which the NPA/NXX has been associated. Whenever BellSouth delivers traffic to US LEC for termination on the US LEC's network, if BellSouth cannot determine, because of the manner in which US LEC has utilized its NXX codes whether the traffic is local or toll, BellSouth will charge the applicable rates for originating intrastate network access service as reflected in BellSouth's Intrastate Access Service Tariff. BellSouth will make appropriate billing adjustments if US LEC can provide sufficient information for BellSouth to determine whether said traffic is local or toll.

US LEC's Position: The definition of "local traffic" should include interstate traffic such as ISP-bound traffic and IP telephony traffic. US LEC proposes the following:

- 6.1 Local Traffic is defined as any telephone call that originates in one exchange and terminates in either the same exchange, or within the caller's local calling area as defined by the originating Party that has its own switch for its own local exchange service end users associated with the originating exchange, including any optional local calling areas available to callers in the originating exchange. If a Party utilizes unbundled switching, the local calling area shall be as defined in BellSouth's General Subscriber Services Tariff. For purposes of this Attachment, Local Traffic does not include Dial-Up Internet Traffic as defined below.
- 6.1.1 Dial-Up Internet Traffic is defined as a call delivered from or to an Internet Service Provider, where the Internet Service Provider subscribes

to local exchange access lines and where the calling and called local exchange access lines are within the same exchange or within the caller's local calling area as defined in paragraph 6.1 above.

- 6.1.2 The points of origination and termination for purposes of the definitions in this section shall be determined by the Rate Centers associated with the originating and terminating NPA-NXX codes, respectively; except in the case of traffic that is subject to access charges under applicable FCC or Commission rulings (e.g., Feature Group A or B, and 800 Traffic).
- 6.1.3 Each Party will associate each of its NPA/NXXs with a single Rate Center as specified in NECA Tariff FCC No. 4, for the purpose of determining points of origination and termination under this Section 6, and shall use its NPA/NXXs in such a way and will provide the necessary information so that the originating Party can distinguish Local and Dial-Up Internet Traffic from IntraLATA Toll traffic for its originating customers. This paragraph shall not prevent a Party from assigning line numbers for Foreign Exchange or like services.
- 6.2 The Parties shall compensate each other for transporting and terminating Local Traffic on each other's network on a mutual, reciprocal, and symmetrical basis as set forth in this Section 6.2.
 - 6.2.1 For Local Traffic terminated by BellSouth, US LEC shall pay BellSouth the charges for call transport and termination set forth in Exhibit A to this Attachment 3.
 - 6.2.1.4 In states that have established a composite rate structure for reciprocal compensation (Florida, Louisiana, and South Carolina), US LEC shall pay BellSouth the applicable composite rate or rates as set forth in Exhibit A to this Attachment 3, in lieu of the elemental rates described above.
 - 6.2.2 For Local Traffic originated by BellSouth and terminated via a Point of Interconnection at a US LEC switch, the compensation rate per minute of use shall initially be the Tandem Local Interconnection rate shown on Exhibit A (hereinafter, the "Tandem Rate") . This rate is the sum of the End Office Switching, Tandem Switching, Common (Shared) Transport Facilities Termination, and Common (Shared) Transport per mile (multiplied by 25 miles) rate elements. The US LEC rate shall be recalculated once each year on each anniversary of the Effective Date (the "Rate Determination Date"). The initial Rate Determination Date shall be the first anniversary of the Effective Date. The methodology for recalculating the rates is as follows:

Total Minutes = Total minutes of use of Local Traffic delivered by US LEC to BellSouth for the most recent billed month.

Total Compensation = The total call transport and termination charges billed by BellSouth to US LEC pursuant to Section 6.2.1 for Local Traffic delivered by US LEC to BellSouth for the most recent billed month.

Compensation Rate = Total Compensation ÷ Total Minutes

- 6.2.2.1 In states that have established a composite rate structure for reciprocal compensation (Florida, Louisiana, and South Carolina), BellSouth shall pay US LEC the applicable composite rate or rates as set forth in Exhibit A to this Attachment 3, in lieu of the rates described above. In Florida and Louisiana, the Tandem Local Interconnection rate shall be the applicable composite rate for US LEC.
- 6.2.2.2 If the rates in Exhibit A to this Attachment 3 are modified during the term of this Agreement as a result of an order of the FCC, the Commission, or a court of competent jurisdiction, or an intervening change in the applicable law, then the rate charged by US LEC under this Section 6.2.2 shall be adjusted as follows: the effective date of the change in BellSouth's rates shall be the Rate Determination Date; but BellSouth's charges to US LEC for the most recent billed month shall be recomputed as if the new rates had been in effect at that time.
- 6.3 The Parties acknowledge that they have been unable to agree on an appropriate mechanism for inter-carrier compensation in the case of Dial-Up Internet Traffic. As an interim measure pending a ruling by the FCC, the originating Party shall pay the terminating Party inter-carrier compensation for Dial-Up Internet Traffic at the same rate applicable to Local Traffic under Section 6.2, above. These payments shall be subject to later true-up based upon any final decision of the FCC establishing rules governing inter-carrier compensation for Dial-Up Internet Traffic; or, to the extent such FCC rules allow the Commission to determine such compensation, then based on a final decision of the Commission.
- 6.3.1 Interconnection with Enhanced Service Providers (ESPs)/Information Service Providers (ISPs). ESP/ISP traffic shall be treated as Local Traffic to the extent that the facilities used by the ESP or ISP are local in nature. If the facilities used by the ESP or ISP are interstate in nature, but the ESP or ISP subscribes to local exchange service, then traffic to or from these providers shall be treated as Dial-Up Internet Traffic.
- 6.4 The Parties shall route Local, Dial-Up Internet and IntraLATA Toll Traffic to each other for transport and termination as provided in this Attachment. The originating Party shall be responsible for recording and measuring all

usage in accordance with this paragraph, subject to the provisions of Section 6.5.

ISSUE 8: Should each party be required to assign its NPA/NXX such that the originating party can determine whether reciprocal compensation or access is due for any particular call?

Affected Agreement Provisions: Attachment 3, Sections 6.2 (BellSouth); Attachment 3, Section 6.1.3 (US LEC)

BellSouth's Position: US LEC should use its NPA/NXXs in such a way that BellSouth can distinguish intraLATA toll and interLATA toll traffic from other types of traffic. If US LEC were to assign its NPA/NXXs to customers both inside and outside the BellSouth local calling area where the NPA/NXX is homed, BellSouth would not be able to identify when access charges should properly apply. BellSouth proposes the following language:

6.2 Unidentifiable traffic. US LEC shall utilize its NPA/NXXs in such a way and will provide the necessary information so that BellSouth shall be able to distinguish Local from IntraLATA Toll traffic for BellSouth originated traffic. US LEC end users' assigned NPA/NXX line numbers shall be physically located in the BellSouth rate center with which the NPA/NXX has been associated. Whenever BellSouth delivers traffic to US LEC for termination on the US LEC's network, if BellSouth cannot determine, because of the manner in which US LEC has utilized its NXX codes whether the traffic is local or toll, BellSouth will charge the applicable rates for originating intrastate network access service as reflected in BellSouth's Intrastate Access Service Tariff. BellSouth will make appropriate billing adjustments if US LEC can provide sufficient information for BellSouth to determine whether said traffic is local or toll.

US LEC's Position: US LEC believes that the following will allow the parties to distinguish local from intraLATA toll traffic. As ISP-bound traffic is local, there is no need to distinguish ISP-bound traffic from other types of local traffic.

6.1.3 Each Party will associate each of its NPA/NXXs with a single Rate Center as specified in NECA Tariff FCC No. 4, for the purpose of determining points of origination and termination under this Section 6, and shall use its NPA/NXXs in such a way and will provide the necessary information so that the originating Party can distinguish Local and Dial-Up Internet Traffic from IntraLATA Toll traffic for its originating customers. This paragraph shall not prevent a Party from assigning line numbers for Foreign Exchange or like services.

ISSUE 9: Should the parties be obligated to exchange data that would enable each party to properly calculate a Percent Local Usage ("PLU")?

Affected Agreement Provisions: Attachment 3, Sections 6.4 (BellSouth); Attachment 3, Section 6.5 (US LEC)

BellSouth's Position: Yes. PLU is a factor that represents the percentage of originating traffic that is local for purpose of applying reciprocal compensation and switched access charges. Both BellSouth and US LEC calculate the PLU for traffic originated by their respective customers because the originating party has the necessary information to determine the nature of the traffic. The originating party, however, does not have the necessary information to identify ISP-bound traffic. Only the terminating party has this information. Therefore, the terminating party must provide the originating party with the necessary information to properly exclude ISP-bound traffic from the calculation of the PLU. Thus, in order to calculate the PLU to properly reflect only local traffic, the Commission should require the terminating party to provide the originating party with sufficient information to identify and separate ISP-bound traffic.

- 6.4 Percent Local Usage. Each Party will report to the other a Percentage Local Usage ("PLU"). The application of the PLU will determine the amount of local minutes to be billed to the other Party. For purposes of developing the PLU, each Party shall consider every local call and every long distance call, excluding intermediary traffic. Effective on the first of January, April, July and October of each year, each Party shall provide a positive report updating the PLU. Detailed requirements associated with PLU reporting shall be as set forth in BellSouth's Standard Percent Local Use Reporting Platform for Interconnection Purchasers, as it is amended from time to time during this Agreement. Notwithstanding the foregoing, where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate local usage compensation to be paid.

US LEC's Position: ISP-bound traffic should be considered "local traffic" for computing the PLU.

- 6.5 Percent Local Usage. Each Party will report to the other a Percentage Local Usage ("PLU"). The originating Party shall determine and report the PLU as if Dial-up Internet Traffic were local usage. The terminating Party shall be responsible for determining and reporting on its bills the portion of the local minutes as determined by the PLU that is actually by the PLU that is actually Dial-up Internet Traffic. For purposes of developing the PLU, each Party shall consider every local call and every long distance call, excluding intermediary traffic. Effective on the first of January, April, July and October of each year, each Party shall provide a positive report updating the PLU. Detailed requirements associated with PLU reporting shall be as set forth in BellSouth's Standard Percent Local

Use Reporting Platform for Interconnection Purchasers, as it is amended from time to time during this Agreement. Notwithstanding the foregoing, where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate local usage compensation to be paid.

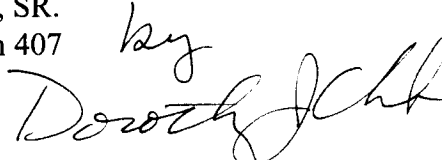

E. CONCLUSION

WHEREFORE, BellSouth respectfully requests that the Commission dismiss those issues not arbitrable under the Act, arbitrate the remaining issues set forth in this Petition, and enter an Order directing that BellSouth's positions on the issues raised herein be incorporated into the Interconnection Agreement between US LEC and BellSouth. Further BellSouth requests such other, more general or specific relief as is just and proper under the circumstances

Respectfully submitted this 29th day of August 2000.

***Re: Request that US LEC engage in negotiations with BellSouth
Telecommunications, Inc., pursuant to Section 251 (c) (1) of the
Telecommunications Act of 1996***

Dear Ms. Montano:

On January 1, 2000, BellSouth Telecommunications, Inc., ("BellSouth") and US LEC of Tennessee, Inc. ("US LEC") entered into an agreement to adopt the terms and conditions of the MCI Interconnection Agreement ("Agreement") for the state of Kentucky. The expiration date for that Agreement will be August 20, 2000. BellSouth is hereby requesting that US LEC commence good faith negotiations with BellSouth to enter into a new agreement in compliance with Section 251 (c) (1) of the Communications Act of 1934, as amended ("Act").

In an effort to initiate the negotiation process, a copy of the BellSouth Standard Interconnection Agreement is enclosed for your review. Once you have had an opportunity to review the proposed agreement, please contact me with questions. If necessary, we will begin scheduling meetings between the companies to address issues raised during your review. For purposes of calculating the negotiations window, the date of the letter shall be used as the commencement date for renegotiations.

BellSouth looks forward to working with US LEC in reaching a mutually agreeable Interconnection Agreement. Should you have questions regarding this letter, or questions relative to BellSouth's Standard Interconnection Agreement, please do not hesitate to call me.

Sincerely,

Ida Bourne
Manager-Interconnection Services

General Terms and Conditions

AGREEMENT

THIS AGREEMENT is made by and between BellSouth Telecommunications, Inc., ("BellSouth"), a Georgia corporation, and US LEC of Alabama, Inc, US LEC of Florida Inc., US LEC of Georgia Inc., US LEC of North Carolina Inc., US LEC of South Carolina Inc., and US LEC of Tennessee Inc., each Delaware corporations (collectively "US LEC"), and shall be deemed effective as of _____. This agreement may refer to either BellSouth or US LEC or both as a "Party" or "Parties. "

WITNESSETH

WHEREAS, BellSouth is a local exchange telecommunications company authorized to provide telecommunications services in the states of Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee; and

WHEREAS, US LEC is a competitive local exchange telecommunications company ("CLEC") authorized to provide telecommunications services in the states of Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee; and

WHEREAS, the Parties wish to resell BellSouth's telecommunications services and/or interconnect their facilities, purchase network elements and other services, and exchange traffic pursuant to sections 251 and 252 of the Telecommunications Act of 1996 ("the Act").

NOW THEREFORE, in consideration of the mutual agreements contained herein, BellSouth and US LEC agree as follows:

1. Purpose

The Parties agree that the rates, terms and conditions contained within this Agreement, including all Attachments, are intended to conform with each Parties' obligations under sections 251 and 252 of the Act. The resale, access and interconnection obligations contained herein are designed to enable US LEC to provide competing telephone exchange service to residential and business subscribers within the territory of BellSouth.

2. Term of Agreement

2.1 The term of this Agreement shall be three years, beginning on the Effective Date of this Agreement, and will automatically renew for successive one year periods, unless either party wishes to renegotiate the agreement, either in whole or in part, pursuant to Section 2.2 and 2.3 below.

2.2 The Parties agree that by no later than two hundred and seventy (270) days prior to the expiration of this Agreement, they shall commence negotiations with regard to the terms, conditions and prices of resale and/or local interconnection to be effective beginning on the expiration date of this Agreement ("Subsequent Agreement"). The Parties further agree that any such Subsequent Agreement shall be for a term of no less than two (2) years unless the Parties agree otherwise.

5.8 If, within one hundred and thirty five (135) to one hundred and sixty (160) days of commencing the negotiation referred to in Section 2.2, above, the Parties are unable to satisfactorily negotiate new resale and/or local interconnection terms, conditions and prices, either Party may petition the Commission to establish appropriate local interconnection and/or resale arrangements pursuant to 47 U.S.C. 252. The Parties agree that, in such event, they shall encourage the Commission to issue its order regarding the appropriate local interconnection and/or resale arrangements no later than the expiration date of this Agreement. The Parties further agree that in the event the Commission does not issue its order prior to the expiration date of this Agreement, or if the Parties continue beyond the expiration date of this Agreement to negotiate the local interconnection and/or resale arrangements without Commission intervention, the terms, conditions and prices ultimately ordered by the Commission, or negotiated by the Parties, will be effective retroactive to the day following the expiration date of this Agreement. Until the Subsequent Agreement becomes effective, the Parties shall continue to exchange traffic pursuant to the terms, conditions, and compensation arrangements of this Agreement.

2.4 Continuous Service

The Parties are currently providing various services and facilities to each other under the terms of a prior Interconnection Agreement with an effective date of November 1, 1998. Unless expressly provided to the contrary herein, all such existing services and facilities shall continue to be provided without interruption under the terms and conditions of this Agreement, and neither Party shall be required to submit a service order

or other request, or pay any installation charge, with respect to such continuing services and facilities.

3. Ordering Procedures

- 3.1 Each Party agrees that their respective Operating Company Numbers (OCN) will be used for the purposes of ordering and provisioning under this Agreement, including identifying local facilities and minutes of use over such facilities. For informational purposes, and where such information has not already been provided, US LEC shall provide BellSouth, if applicable, its Carrier Identification Code (CIC), Exchange Carrier Code (EC), and Access Customer Name and Address (ACNA) code as applicable prior to placing its first order.
- 3.2 Detailed procedures for ordering and provisioning BellSouth services are set forth in BellSouth's Local Interconnection and Facility Based Ordering Guide and Resale Ordering Guide, as appropriate.
- 3.3 BellSouth has developed, and will provide, electronic systems for accessing data needed to place orders including valid address, available services and features, available telephone numbers, due date estimation on pre-order and calculation on firm order, and customer service records where applicable. Where not already being provided, BellSouth will use its best efforts to ensure that all these electronic interfaces will be implemented on a reasonably timely basis. Charges for Operational Support Systems (OSS) shall be as set forth in this agreement in Exhibit A of Attachments 1, 3 and 5 and Exhibit C to Attachment 2, as applicable. BellSouth will provide US LEC access to its OSS on a level that is at least at Parity with, that which it provides BellSouth, any BellSouth subsidiary or affiliate, or any other CLEC.

4. Parity

When US LEC purchases, pursuant to Attachment 1 of this Agreement, telecommunications services from BellSouth for the purposes of resale to end users, BellSouth shall provide said services so that the services are equal in quality, subject to the same conditions, and provided within the same provisioning time intervals that BellSouth provides to its affiliates, subsidiaries and end users. To the extent technically feasible, the quality of a Network Element, as well as the quality of the access to such Network Element provided by BellSouth to US LEC shall be at least equal in quality to that which BellSouth provides to itself. The quality of the

interconnection between the networks of BellSouth and the network of US LEC shall be at a level that is equal to that which BellSouth provides itself, a subsidiary, an Affiliate, or any other party. The interconnection facilities shall be designed to meet the same technical criteria and service standards that are used within BellSouth's network and shall extend to a consideration of service quality as perceived by end users and service quality as perceived by US LEC.

5. Directory Listings

BellSouth shall provide US LEC and their customers access to directory listings under the following terms:

BELLSOUTH PROPOSAL TO 5.1:

- 5.1 Listings. BellSouth or its agent will include US LEC residential and business customer listings in the appropriate White Pages (residential and business), and where applicable, alphabetical yellow pages directories. Directory listings will make no distinction between US LEC and BellSouth subscribers.

US LEC PROPOSAL TO 5.1:

- 5.1 Listings. BellSouth or its agent will include US LEC residential and business customer listings in the appropriate White Pages (residential and business), and where applicable, alphabetical yellow pages directories. Directory listings will make no distinction between US LEC and BellSouth subscribers. BellSouth shall include US LEC's logo on the cover of the White Pages and Yellow Pages and in any applicable customer guides in the same manner, position, and size as its own.

- 5.2 Rates. Subscriber primary listing information in the White Pages and alphabetical yellow pages shall be provided at no charge to US LEC or its subscribers provided that US LEC provides subscriber listing information to BellSouth at no charge.

- 5.3 Procedures for Submitting US LEC Subscriber Information. BellSouth will provide to US LEC a magnetic tape or computer disk containing the proper format for submitting subscriber listings. US LEC will be required to provide BellSouth with directory listings and daily updates to those listings, including new, changed, and deleted listings, in an industry-

accepted format. These procedures are detailed in BellSouth's Local Interconnection and Facility Based Ordering Guide.

- 5.4 Unlisted Subscribers. US LEC will be required to provide to BellSouth the names, addresses and telephone numbers of all US LEC customers that wish to be omitted from directories but included in the directory assistance database.
- 5.5 Inclusion of US LEC Customers in Directory Assistance Database. BellSouth will include and maintain US LEC subscriber listings in BellSouth's directory assistance databases at no charge. BellSouth and US LEC will formulate appropriate procedures regarding lead time, timeliness, format and content of listing information, and correction of listing errors and omissions, where such procedures do not already exist, which procedures will be at least at parity with BellSouth's own procedures. BellSouth shall immediately notify US LEC of any directory listing or directory assistance errors or omissions relating to a US LEC customer.

BELLSOUTH PROPOSAL TO 5.6:

- 5.6 Listing Information Confidentiality. BellSouth will accord US LEC's directory listing information the same level of confidentiality that BellSouth accords its own directory listing information, and BellSouth shall limit access to US LEC's customer proprietary confidential directory information to those BellSouth employees who are involved in the preparation of listings. If BellSouth makes its directory listing information available to any third party, BellSouth will also make available US LEC's directory listing information with no distinction between BellSouth and US LEC subscribers. BellSouth shall not use the directory listing information provided to it by US LEC for any purpose, including marketing, other than directory publishing or directory assistance.
- 5.6.1.1 US LEC agrees to provide to BellSouth, and BellSouth agrees to accept, US LEC Subscriber Listing Information (SLI) relating to US LEC customers in the geographic area(s) covered by this Agreement. US LEC authorizes BellSouth to release all such US LEC SLI provided to BellSouth by US LEC to qualifying third parties pursuant to BellSouth's General Subscriber Services Tariff, Section A38.2, as the same may be amended from time to time. Such US LEC SLI shall be intermingled with BellSouth's own customer listings and shall not be differentiated from the BellSouth listings or from the listings of any other CLEC that has authorized a similar release of subscriber listing information. BellSouth

will use good faith efforts to obtain state commission approval of necessary modifications to Section A38.2 of its tariff to provide for release of third party directory listings, including modifications regarding listings to be released pursuant to such tariff and BellSouth's liability thereunder. BellSouth's obligation pursuant to this Section shall not arise in any particular state until the commission of such state has approved modifications to such tariff.

5.6.1.2 No compensation shall be paid to US LEC for BellSouth's receipt of US LEC SLI, or for the subsequent release to third parties of such SLI. US LEC agrees to reimburse BellSouth for any costs associated with the initial development of system changes required to make available the US LEC SLI in accordance with this Section. In addition, to the extent BellSouth incurs costs on an ongoing basis to administer the release of US LEC's SLI, US LEC shall pay to BellSouth its proportionate share of the reasonable costs associated therewith.

5.6.1.3 BellSouth shall not be liable for the content or accuracy of any SLI provided by US LEC under this Agreement. US LEC shall indemnify, hold harmless and defend BellSouth from and against any damages, losses, liabilities, demands, claims, suits, judgements, costs and expenses (including but not limited to reasonable attorneys fees and expenses) arising from BellSouth's tariff obligations or otherwise and resulting from or arising out of any third party's claim of inaccurate US LEC listings or use of the SLI pursuant to this Agreement. BellSouth shall forward to US LEC any complaints received by BellSouth relating to the accuracy or quality of US LEC's listings. The date for the initial release of US LEC's listings and subsequent updates shall be negotiated by the Parties.

US LEC PROPOSAL TO 5.6:

5.6 Listing Information Confidentiality. BellSouth will accord US LEC's directory listing information the same level of confidentiality that BellSouth accords its own directory listing information, and BellSouth shall limit access to US LEC's customer proprietary confidential directory information to those BellSouth employees who are involved in the preparation of listings. If BellSouth makes its directory listing information available to any third party, BellSouth will also make available US LEC's directory listing information with no distinction between BellSouth and US LEC subscribers, and US LEC hereby authorizes BellSouth or its agent to release its information for this purpose. BellSouth will pay US LEC a proportionate share of any revenues BellSouth receives for providing subscriber lists that include US LEC listings to third parties. BellSouth shall not use the directory listing information provided to it by US LEC for

any purpose, including marketing, other than directory publishing or directory assistance.

- 5.7 Optional Listings. Additional listings and optional listings will be offered by BellSouth at tariffed rates as set forth in the General Subscriber Services Tariff.
- 5.8 Delivery. BellSouth or its agent shall deliver White Pages and Yellow Pages directories to US LEC subscribers at no charge, and in the same manner, timeliness and quantities as it provides to its own customers.
- 5.9 To the extent that BellSouth contracts with a third party to perform the duties described in this Section 5, BellSouth shall cause third party, as its agent, to perform such duties.
- 5.10 BellSouth shall correct errors or omissions in the listing of US LEC customers in its directories and/or directory assistance databases no less promptly than it corrects similar errors or omissions for its own end users. BellSouth's liability to US LEC for errors and omissions in directory listings shall be limited to the same extent as BellSouth's liability to its end users for such errors and omissions, as provided in the applicable General Subscriber Services Tariff.

6. True-up

This section applies only to North Carolina and Tennessee.

In North Carolina and Tennessee, the prices set forth in this Agreement for Network Elements and Other Services and Local Interconnection shall be interim prices, and will be modified in accordance with subsequent permanent rate decisions adopted by the respective state Commission.

- 6.1 Both Parties will abide by the permanent rate decisions adopted in North Carolina and Tennessee. In the event that either Commission orders a true-up in such proceedings, then the Parties shall implement the true-up by comparing the actual volumes and demand for each item, together with interim prices for each item, with the final prices determined for each item. Each Party shall keep its own records upon which the true-up can be based, and any final payment from one Party to the other shall be in an amount agreed upon by the Parties based on such records. In the event of any disagreement as between the records or the Parties regarding the

amount of such true-up, the Parties agree that the body having jurisdiction over the matter shall be called upon to resolve such differences.

- 6.2 The Parties may continue to negotiate toward final prices, but in the event that no such agreement is reached within nine (9) months, either Party may petition the Commission to resolve such disputes and to determine final prices for each item.

7. Operational Support Systems (OSS) Rates

The parties agree that Electronic Interface (EI) costs and manual work done by the LCSC will be recovered on a "per LSR" basis, with an individual LSR identified by its Purchase Order Number (PON). US LEC will be assessed either the manual or mechanized charge for most accepted LSRs submitted to BellSouth. Manually submitted UNE LSRs will not incur the manual LSR charge in states that have a separate UNE manual additive. US LEC will be charged the manual rate for most LSRs submitted by mail, courier, fax, etc. US LEC will be charged the mechanized rate for LSRs submitted over any of the mechanized systems (e.g. LENS, EDI, EDI-PC, and TAG).

- 7.1 Bill a single mechanized EI charge for each resale LSR delivered over an electronic interface. This charge recovers the development and expense costs associated with the EIs that are allocated to resale LSR volumes, as well as the manual processing associated with mechanized requests that "fall out" in the LCSC for manual handling.
- 7.2 Bill the same mechanized CLEC EI charge for each UNE LSR delivered over an electronic interface.
- 7.3 Bill a single manual LSR charge for each resale LSR delivered manually that reflects the costs associated with the manual processing of those LSRs in the LCSC.
- 7.4 Bill the same manual LSR charge for each manually submitted UNE LSR in those states that do not have a per element UNE non-recurring manual additive.
- 7.5 Establish a transitional plan to bill the mechanized LSR charge for manual LSRs for CLECs who submit a significant proportion of their total LSR volume on a mechanized basis. This volume threshold will increase each year and be eliminated in 2002. This arrangement may be superseded by BellSouth with an LSR-specific process that would apply the mechanized

LSR rate to only those manual LSRs which cannot be submitted over a mechanized system.

- 7.5.1 The regional average pricing plan establishes averaged prices that are the same regardless of:
- CLEC EI system used
 - Action being requested on the LSR (order, change, deny, restore, cancel, disconnect, etc.)
 - Number of supplements or clarifications received
 - Number of service orders result from the LSR
- 7.5.2 Some CLECs presently provide lists of customers to be denied and restored, rather than individual LSRs. However, since each location on the list must have a separate PON, they will be billed as separate manual LSRs.
- 7.5.3 A CLEC will be charged for an accepted LSR that is later canceled by the CLEC.
- 7.5.4 At the present time, five states (AL, GA, LA, MS, SC) have a manual NRC additive per element for UNEs. This manual additive supersedes the manual LSR charge for manual UNE LSRs. Until the other four states adopt this methodology, BellSouth proposes that the manual LSR charge apply for manual UNE LSRs in those states.

UNEs

OPERATIONAL SUPPORT SYSTEMS	AL, GA, LA, MS, SC	FL, KY, NC, TN
OSS Order charge, per LSR received from the CLEC by one of the OSS interactive interfaces/USOC	\$3.50/SOMECH	\$3.50/SOMECH
Incremental charge per LSR received from the CLEC by means other than one of the OSS interactive interfaces/USOC	See applicable rate element	\$19.99/SOMAN

In addition to OSS charges, applicable service order and related charges apply per the tariff.

- 7.5.5 The Parties agree that US LEC will incur the mechanized rate for all LSRs, both mechanized and manual, if the percentage of mechanized LSRs to total LSRs exceeds the threshold percentages shown below:

<u>Year</u>	<u>Ratio: Mechanized/Total LSRs</u>
1999	70%
2000	80%
2001	90%

The threshold plan will be discontinued in 2002.

- 7.5.6 BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

8. Bona Fide Request/New Business Request Process for Further Unbundling

- 8.1 If US LEC is a facilities based provider or a facilities based and resale provider, this section shall apply. BellSouth shall, upon request of US LEC, provide to US LEC access to its network elements at any technically feasible point for the provision of US LEC's telecommunications service where such access is necessary and failure to provide access would impair the ability of US LEC to provide services that it seeks to offer. Any request by US LEC for access to a network element, interconnection option, or for the provisioning of any service or product that is not already available shall be treated as a network element Bona Fide Request/New Business Request, and shall be submitted to BellSouth pursuant to the Bona Fide Request/New Business Request process set forth following.
- 8.2 Bona Fide Request/New Business Requests are to be used when US LEC makes a request of BellSouth to provide a new or modified network element, interconnection option, or other service option pursuant to the Telecommunications Act of 1996; or to provide a new or custom capability or function to meet US LEC's business needs, referred to as a Business Opportunity Request (BOR). The BFR process is intended to facilitate the

two way exchange of information between the requesting Party and BellSouth, necessary for accurate processing of requests in a consistent and timely fashion.

- 8.3 A Bona Fide Request/New Business Request shall be submitted in writing by US LEC and shall contain information required to perform a preliminary analysis of the requested BFR item. Such information will include, but not be limited to, a technical description of each BFR item and reasonable estimates of the number or volume requested, the location(s) of each BFR item, and the date(s) each BFR item is desired. Such a request also shall include US LEC's designation of the request as being (i) pursuant to the Telecommunications Act of 1996 or (ii) pursuant to the needs of the business. The request shall be sent to US LEC's Account Executive. If BellSouth believes that the information provided by US LEC is not reasonably sufficient it shall contact US LEC as soon as possible, but not to exceed ten (10) business days, and request additional specific information. A BFR with insufficient information shall not commence the timeframe set forth in subsection 8.5.
- 8.4 US LEC may cancel a BFR at any time, but shall pay BellSouth's reasonable and demonstrable costs of processing and/or implementing the BFR up to the date of cancellation; except US LEC shall not be charged for preliminary analysis if costs do not exceed one hundred dollars (\$100).
- 8.5 Within twenty (20) business days after its receipt of a Bona Fide Request, BellSouth shall provide to US LEC a preliminary analysis of the BFR item. The preliminary analysis shall respond in one of the following ways:
- (a) confirm that BellSouth can offer the BFR item and identify the date (which will be no more than ninety (90) days after the date of the preliminary analysis) when BellSouth will deliver a firm price proposal, including service description, pricing and an estimated schedule for availability ("BFR Price Proposal");
 - (b) provide a detailed explanation that such BFR item is not technically feasible and/or that the BFR item does not qualify as one that is required to be provided under the Act;
- 8.6 Within ten (10) business days after receiving BellSouth's preliminary analysis, US LEC shall, in the case where testing is required, (i) negotiate a mutually agreeable, reasonably expeditious schedule for testing, (ii) a mutually agreeable date (no more than ninety (90) days after the testing has shown the BFR item is technically feasible) when BellSouth will

deliver a BFR Price Proposal, and (iii) a mutually agreeable arrangement for sharing the testing costs.

- 8.7 In handling a BFR, BellSouth shall, to the extent possible, utilize information from previously developed BFRs in order to shorten its response times.
- 8.8 Within ten (10) business days after receiving BellSouth's preliminary analysis, US LEC shall:
- (a) accept BellSouth's date to deliver a BFR Price Proposal;
 - (b) negotiate as expeditiously as possible a different date for BellSouth to deliver a BFR Price Proposal; or
 - (c) cancel the Bona Fide Request.
- 8.9 Any BFR item requested pursuant to the Act shall be priced in accordance with Section 252(d)(1) of the Act and any applicable FCC or Commission rules, regulations, or orders. The price for each BFR item shall include the reasonable and demonstrable costs incurred by BellSouth in responding to the BFR, to the extent that BellSouth has not previously been reimbursed for such costs.
- 8.10 Within ninety (90) days after its receipt of the BFR Price Proposal, US LEC must either place an order for such BFR item pursuant to the BFR Price Proposal or, if it believes such BFR Price Proposal is inconsistent with the requirements of the Act, seek arbitration by the Commission, including the use of any available expedited procedures. If, within ninety (90) days after its receipt of the BFR Price Proposal, US LEC fails to confirm an order for such BFR item or seek arbitration by the Commission, BellSouth may treat the BFR as canceled by US LEC.

9. Liability and Indemnification

- 9.1 BellSouth Liability. BellSouth shall take financial responsibility for its own actions in causing, or its lack of action in preventing, unbillable or uncollectible US LEC revenues.
- 9.2 Liability for Acts or Omissions of Third Parties. Neither BellSouth nor US LEC shall be liable for any act or omission of another telecommunications company providing a portion of the services provided under this Agreement.

9.3 Limitation of Liability

9.3.1 Each Party's liability to the other for any loss, cost, claim, injury or liability or expense, including reasonable attorney's fees relating to or arising out of any negligent act or omission in its performance of this Agreement whether in contract or in tort, shall be limited to a credit for the actual cost of the services or functions not performed or improperly performed. This limitation on liability shall not apply where another provision of this Agreement imposes a different standard of liability, or under the following circumstances: 1) where the loss, cost, claim, injury, liability or expense is related to or arises out of the gross negligence or willful misconduct of the Party seeking to rely on the limitation; and 2) to the liability of a Party under any of the provisions of this Agreement pursuant to which it is required to indemnify the other Party.

9.3.2 Limitations in Tariffs. A Party may, in its sole discretion, provide in its tariffs and contracts with its Customers and third parties that relate to any service, product or function provided or contemplated under this Agreement, that to the maximum extent permitted by Applicable Law, such Party shall not be liable to Customer or third party for (i) any Loss relating to or arising out of this Agreement, whether in contract, tort or otherwise, that exceeds the amount such Party would have charged that applicable person for the service, product or function that gave rise to such Loss and (ii) Consequential Damages. To the extent that a Party elects not to place in its tariffs or contracts such limitations of liability, and the other Party incurs a Loss as a result thereof, such Party shall indemnify and reimburse the other Party for that portion of the Loss that would have been limited had the first Party included in its tariffs and contracts the limitations of liability that such other Party included in its own tariffs at the time of such Loss. Any such tariff term or condition shall not contradict or modify the obligations of the Parties to each other under this Agreement, and in the event of such conflict between this Agreement and any such tariff provision, this Agreement shall control.

9.3.3 Neither BellSouth nor US LEC shall be liable for damages to the other's terminal location, POI or other Party's customers' premises resulting from the furnishing of a service, including, but not limited to, the installation and removal of equipment or associated wiring, except to the extent caused by a Party's negligence or willful misconduct or by a Party's failure to properly ground a local loop after disconnection.

9.3.4 Except as otherwise provided in this section, under no circumstance shall a Party be responsible or liable for indirect, incidental, or consequential damages, including, but not limited to, economic loss or lost business or profits, damages arising from the use or performance of equipment or software, or the loss of use of software or equipment, or accessories attached thereto, delay, error, or loss of data. Notwithstanding the foregoing, the limitation described in this section shall not apply to such consequential damages arising from the intentional, wrongful act of either Party. In connection with this limitation of liability, each Party recognizes that the other Party may, from time to time, provide advice, make recommendations, or supply other analyses related to the Services, or facilities described in this Agreement, and, while each Party shall use diligent efforts in this regard, the Parties acknowledge and agree that this limitation of liability shall apply to provision of such advice, recommendations, and analyses.

9.4 Indemnification for Certain Claims. The Party providing service hereunder, their affiliates and their parent company, shall be indemnified, defended and held harmless by the Party receiving services hereunder against any claim, loss or damage arising from the receiving Party's use of the services pertaining to claims for libel, slander, invasion of privacy or copyright infringement arising from the content of the receiving Party's own communications.

9.5 No liability for Certain Inaccurate Data. Except in the cases of gross negligence or willful misconduct, or except as otherwise provided herein, neither BellSouth nor US LEC assumes any liability for the accuracy of data provided by one Party to the other and each Party agrees to indemnify and hold harmless the other for any claim, action, cause of action, damage, or injury that might result from the supply of inaccurate data in conjunction with the provision of any service provided pursuant to this Agreement.

9.7 Disclaimer. EXCEPT AS SPECIFICALLY PROVIDED TO THE CONTRARY IN THIS AGREEMENT, NEITHER PARTY MAKES ANY REPRESENTATIONS OR WARRANTIES TO THE OTHER PARTY CONCERNING THE SPECIFIC QUALITY OF ANY SERVICES, OR FACILITIES PROVIDED UNDER THIS AGREEMENT. THE PARTIES DISCLAIM, WITHOUT LIMITATION, ANY WARRANTY OR GUARANTEE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

10. Intellectual Property Rights and Indemnification

- 10.1 No License. No patent, copyright, trademark or other proprietary right is licensed, granted or otherwise transferred by this Agreement. Both Parties are strictly prohibited from any use, including but not limited to in sales, in marketing or advertising of telecommunications services, of the name, any service mark or any trademark of the other Party.
- 10.2 Ownership of Intellectual Property. Any intellectual property which originates from or is developed by a Party shall remain in the exclusive ownership of that Party. Except for a limited license to use patents or copyrights to the extent necessary for the Parties to use any facilities or equipment (including software) or to receive any service solely as provided under this Agreement, no license in patent, copyright, trademark or trade secret, or other proprietary or intellectual property right now or hereafter owned, controlled or licensable by a Party, is granted to the other Party or shall be implied or arise by estoppel. It is the responsibility of each Party to ensure at no additional cost to the other Party that it has obtained any necessary licenses in relation to intellectual property of third Parties used in its network that may be required to enable the other Party to use any facilities or equipment (including software), to receive any service, or to perform its respective obligations under this Agreement.
- 10.3 Indemnification. The Party providing a service pursuant to this Agreement will defend the Party receiving such service or data provided as a result of such service against claims of infringement arising solely from the use by the receiving Party of such service and will indemnify the receiving Party for any damages awarded based solely on such claims in accordance with Section 9 of this Agreement.
- 10.4 Claim of Infringement. In the event that use of any facilities or equipment (including software), becomes, or in reasonable judgment of the Party who owns the affected network is likely to become, the subject of a claim, action, suit, or proceeding based on intellectual property infringement, then said Party shall promptly and at its sole expense, but subject to the limitations of liability set forth below:
- 10.4.1 modify or replace the applicable facilities or equipment (including software) while maintaining form and function, or
- 10.4.2 obtain a license sufficient to allow such use to continue.
- 10.4.3 In the event 10.4.1 or 10.4.2 are commercially unreasonable, then said Party may, terminate, upon reasonable notice, this contract with respect to use of, or services provided through use of, the affected facilities or

equipment (including software), but solely to the extent required to avoid the infringement claim.

10.5 Exception to Obligations. Neither Party's obligations under this Section shall apply to the extent the infringement is caused by: (i) modification of the facilities or equipment (including software) by the indemnitee; (ii) use by the indemnitee of the facilities or equipment (including software) in combination with equipment or facilities (including software) not provided or authorized by the indemnitor provided the facilities or equipment (including software) would not be infringing if used alone; (iii) conformance to specifications of the indemnitee which would necessarily result in infringement; or (iv) continued use by the indemnitee of the affected facilities or equipment (including software) after being placed on notice to discontinue use as set forth herein.

10.6 Exclusive Remedy. The foregoing shall constitute the Parties' sole and exclusive remedies and obligations with respect to a third party claim of intellectual property infringement arising out of the conduct of business under this Agreement.

11. Treatment of Proprietary and Confidential Information

11.1 Confidential Information. It may be necessary for BellSouth and US LEC to provide each other with certain confidential information, including trade secret information, including but not limited to, technical and business plans, technical information, proposals, specifications, drawings, procedures, customer account data, call detail records and like information (hereinafter collectively referred to as "Information"). All Information shall be in writing or other tangible form and clearly marked with a confidential, private or proprietary legend and that the Information will be returned to the owner within a reasonable time. The Information shall not be copied or reproduced in any form. BellSouth and US LEC shall protect the Information received from distribution, disclosure or dissemination to anyone except employees, consultants, and attorneys of BellSouth and US LEC with a need to know such Information and which employees, consultants, and attorneys agree to be bound by the terms of this Section. BellSouth and US LEC will use the same standard of care to protect Information received as they would use to protect their own confidential and proprietary Information.

11.2 Exception to Obligation. Notwithstanding the foregoing, there will be no obligation on BellSouth or US LEC to protect any portion of the Information that is: (1) made publicly available by the owner of the

Information or lawfully disclosed by a Party other than BellSouth or US LEC; (2) lawfully obtained from any source other than the owner of the Information; (3) previously known to the receiving Party without an obligation to keep it confidential; or (4) required by law, or made to a court or governmental agency for the purpose of enforcing its rights under this Agreement. In the case of (4) the receiving Party shall provide sufficient notice to the providing Party so that the providing Party may request of the court or governmental agency an appropriate protective order to protect the confidentiality of the information. The receiving Party shall cooperate with the providing Party's efforts to seek the Protective Order.

- 11.3 The obligation hereunder shall expire three (3) years after termination with respect to any information that does not constitute a trade secret of CPNI.

12. Assignments

Any assignment by either Party to any non-affiliated entity of any right, obligation or duty, or of any other interest hereunder, in whole or in part, without the prior written consent of the other Party shall be void. A Party may assign this Agreement or any right, obligation, duty or other interest hereunder to an Affiliate of the Party without the consent of the other Party. All obligations and duties of any Party under this Agreement shall be binding on all successors in interest and assigns of such Party, including successors or assigns resulting from the sale of BellSouth's local exchange facilities in whole or in part to the extent required by section 251 (h) of the Act. No assignment or delegation hereof shall relieve the assignor of its obligations under this Agreement in the event that the assignee fails to perform such obligations.

13. Resolution of Disputes

Except as otherwise stated in this Agreement, the Parties agree that if any dispute arises as to the interpretation of any provision of this Agreement or as to the proper implementation of this Agreement, either Party may petition the Commission for a resolution of the dispute. However, each Party reserves any rights it may have to seek judicial review of any ruling made by the Commission concerning this Agreement. This is not exclusive of any other remedy permitted under law.

14. Taxes

14.1 Definition. For purposes of this Section, the terms "taxes" and "fees" shall include but not limited to federal, state or local sales, use, excise, gross receipts or other taxes or tax-like fees of whatever nature and however designated (including tariff surcharges and any fees, charges or other payments, contractual or otherwise, for the use of public streets or rights of way, whether designated as franchise fees or otherwise) imposed, or sought to be imposed, on or with respect to the services furnished hereunder or measured by the charges or payments therefore, excluding any taxes levied on income or real or personal property.

14.2 Taxes and Fees Imposed Directly On Either Seller or Purchaser.

14.2.1 Taxes and fees imposed on the providing Party, which are not permitted or required to be passed on by the providing Party to its customer, shall be borne and paid by the providing Party.

14.2.2 Taxes and fees imposed on the purchasing Party, which are not required to be collected and/or remitted by the providing Party, shall be borne and paid by the purchasing Party.

14.3 Taxes and Fees Imposed on Purchaser But Collected and Remitted By Seller.

14.3.1 Taxes and fees imposed on the purchasing Party shall be borne by the purchasing Party, even if the obligation to collect and/or remit such taxes or fees is placed on the providing Party.

14.3.2 To the extent permitted by applicable law, any such taxes and/or fees shall be shown as separate items on applicable billing documents between the Parties. Notwithstanding the foregoing, the purchasing Party shall remain liable for any such taxes and fees regardless of whether they are actually billed by the providing Party at the time that the respective service is billed.

14.3.3 If the purchasing Party determines that in its opinion any such taxes or fees are not payable, the providing Party shall not bill such taxes or fees to the purchasing Party if the purchasing Party provides written certification, reasonably satisfactory to the providing Party, stating that it is exempt or otherwise not subject to the tax or fee, setting forth the basis therefor, and satisfying any other requirements under applicable law. If any authority seeks to collect any such tax or fee that the purchasing Party has determined and certified not to be payable, or any such tax or fee that was not billed by the providing Party, the purchasing Party may contest the same in good faith, at its own expense. In any such contest,

the purchasing Party shall promptly furnish the providing Party with copies of all filings in any proceeding, protest, or legal challenge, all rulings issued in connection therewith, and all correspondence between the purchasing Party and the taxing authority.

- 14.3.4 In the event that all or any portion of an amount sought to be collected must be paid in order to contest the imposition of any such tax or fee, or to avoid the existence of a lien on the assets of the providing Party during the pendency of such contest, the purchasing Party shall be responsible for such payment and shall be entitled to the benefit of any refund or recovery.
- 14.3.5 If it is ultimately determined that any additional amount of such a tax or fee is due to the imposing authority, the purchasing Party shall pay such additional amount, including any interest and penalties thereon.
- 14.3.6 Notwithstanding any provision to the contrary, the purchasing Party shall protect, indemnify and hold harmless (and defend at the purchasing Party's expense) the providing Party from and against any such tax or fee, interest or penalties thereon, or other charges or payable expenses (including reasonable attorney fees) with respect thereto, which are incurred by the providing Party in connection with any claim for or contest of any such tax or fee.
- 14.3.7 Each Party shall notify the other Party in writing of any assessment, proposed assessment or other claim for any additional amount of such a tax or fee by a taxing authority; such notice to be provided, if possible, at least ten (10) days prior to the date by which a response, protest or other appeal must be filed, but in no event later than thirty (30) days after receipt of such assessment, proposed assessment or claim.
- 14.4 Taxes and Fees Imposed on Seller but Passed On To Purchaser.
- 14.4.1 Taxes and fees imposed on the providing Party, which are required or expressly permitted by statutes or tariff to be passed on by the providing Party to its customer, shall be borne by the purchasing Party.
- 14.4.2 To the extent permitted by applicable law, any such taxes and/or fees shall be shown as separate items on applicable billing documents between the Parties. Each Party will use its best efforts to ensure that any such taxes or fees are billed or presented in a timely manner. Notwithstanding the foregoing, the purchasing Party shall remain liable for any such taxes and fees regardless of whether they are actually billed by the providing Party at the time that the respective service is billed.

- 14.4.3 If the purchasing Party disagrees with the providing Party's determination as to the application or basis for any such tax or fee, the Parties shall consult with respect to the imposition and billing of such tax or fee and with respect to the imposition and billing of such tax or fee and with respect to whether to contest the imposition of such tax or fee.. Notwithstanding the foregoing, the providing Party shall retain responsibility for determining whether and to what extent any such taxes or fees are applicable, and the purchasing Party shall abide by such determination and pay such taxes or fees to the providing Party. The providing Party shall further retain responsibility for determining whether and how to contest the imposition of such taxes and fees; provided, however, that the Parties agree to consult in good faith as to such contest and that any such contest undertaken at the request of the purchasing Party shall be at the purchasing Party's expense. In the event that such contest must be pursued in the name of the providing Party, the providing Party shall permit the purchasing Party to pursue the contest in the name of the providing Party and the providing Party shall have the opportunity to participate fully in the preparation of such contest.
- 14.4.4 If, after consultation in accordance with the preceding paragraph, the purchasing Party does not agree with the providing Party's final determination as to the application or basis of a particular tax or fee, and if the providing Party, after receipt of a written request by the purchasing Party to contest the imposition of such tax or fee with the imposing authority, fails or refuses to pursue such contest or to allow such contest by the purchasing Party, the purchasing Party may seek any appropriate remedies in law or equity. Seeking said remedy shall not relieve the purchasing Party from liability for any tax or fee billed by the providing Party pursuant to this subsection during the pendency of such dispute period. In the event that the purchasing Party prevails, it shall be entitled to a refund in accordance with the final decisions therein. Notwithstanding the foregoing, if at any time prior to a final decision regarding said dispute, the providing Party initiates a contest with the imposing authority with respect to any of the issues involved in the dispute shall be dismissed as to such common issues and the final decision rendered in the contest with the imposing authority shall control as to such issues.
- 14.4.5 In the event that all or any portion of an amount sought to be collected must be paid in order to contest the imposition of any such tax or fee, or to avoid the existence of a lien on the assets of the providing Party during the pendency of such contest, the purchasing Party shall be responsible for such payment and shall be entitled to the benefit of any refund or recovery.

- 14.4.6 If it is ultimately determined that any additional amount of such a tax or fee is due to the imposing authority, the purchasing Party shall pay such additional amount, including any interest and penalties thereon.
- 14.4.7 Notwithstanding any provision to the contrary, the purchasing Party shall protect indemnify and hold harmless (and defend at the purchasing Party's expense) the providing Party from and against any such tax or fee, interest or penalties thereon, or other reasonable charges or payable expenses (including reasonable attorney fees) with respect thereto, which are incurred by the providing Party in connection with any claim for or contest of any such tax or fee.
- 14.4.8 Each Party shall notify the other Party in writing of any assessment, proposed assessment or other claim for any additional amount of such a tax or fee by a taxing authority; such notice to be provided, if possible, at least ten (10) days prior to the date by which a response, protest or other appeal must be filed, but in no event later than thirty (30) days after receipt of such assessment, proposed assessment or claim.
- 14.5 Mutual Cooperation. In any contest of a tax or fee by one Party, the other Party shall cooperate fully by providing records, testimony and such additional information or assistance as may reasonably be necessary to pursue the contest. Further, the other Party shall be reimbursed for any reasonable and necessary out-of-pocket copying and travel expenses incurred in assisting in such contest.

15. Force Majeure

In the event performance of this Agreement, or any obligation hereunder, is either directly or indirectly prevented, restricted, or interfered with by reason of fire, flood, earthquake or like acts of God, wars, revolution, civil commotion, explosion, acts of public enemy, embargo, acts of the government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing, or boycotts, or any other circumstances beyond the reasonable control and without the fault or negligence of the Party affected, the Party affected, upon giving prompt notice to the other Party, shall be excused from such performance on a day-to-day basis to the extent of such prevention, restriction, or interference (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis until the delay, restriction or interference has ceased); provided however, that the Party so affected shall use diligent efforts to avoid or remove such causes of

non-performance and both Parties shall proceed whenever such causes are removed or cease.

16. Year 2000 Readiness Disclosure

Each Party warrants that it has implemented a program the goal of which is to ensure that all software, hardware and related materials (collectively called "Systems") delivered, directly interconnected with it or supplied in the furtherance of the terms and conditions specified in this Agreement: (i) will record, store, process and display calendar dates falling on or after January 1, 2000, in the same manner, and with the same functionality as such software records, stores, processes and calendar dates falling on or before December 31, 1999; and (ii) shall include without limitation date data century recognition, calculations that accommodate same century and multicentury formulas and date values, and date data interface values that reflect the century.

17. Modification of Agreement

- 17.1 BellSouth shall make available upon written request, pursuant to 47 USC § 252(i), FCC rules and regulations and any court decisions construing 252(l), to US LEC any interconnection, service, or network element provided under any other agreement filed and approved pursuant to 47 USC § 252. The adopted interconnection, service, or network element and agreement shall apply to the same states as such other agreement and for the identical term of such other agreement.
- 17.2 If either Party changes its name or makes changes to its company structure or identity due to a merger, acquisition, transfer or any other reason, it is the responsibility of that Party to notify the other of said change and request that an amendment to this Agreement, if necessary, be executed to reflect said change.
- 17.3 No modification, amendment, supplement to, or waiver of the Agreement or any of its provisions shall be effective and binding upon the Parties unless it is made in writing and duly signed by the Parties.
- 17.4 Execution of this Agreement by either Party does not confirm or imply that the executing Party agrees with any decision(s) issued pursuant to the Telecommunications Act of 1996 and the consequences of those decisions on specific language in this Agreement. Neither Party waives its rights to appeal or otherwise challenge any such decision(s) and each Party

reserves all of its rights to pursue any and all legal and/or equitable remedies, including appeals of any such decision(s).

17.5 In the event that any final and effective legislative, regulatory, judicial or other legal action materially affects any material terms of this Agreement, or the ability of US LEC or BellSouth to perform any material terms of this Agreement, US LEC or BellSouth may, on thirty (30) days' written notice require that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the Dispute shall be referred to the Dispute Resolution procedure set forth in Section 13.

17.6 If any provision of this Agreement, or the application of such provision to either Party or circumstance, shall be held invalid, the remainder of the Agreement, or the application of any such provision to the Parties or circumstances other than those to which it is held invalid, shall not be affected thereby, provided that the Parties shall attempt to reformulate such invalid provision to give effect to such portions thereof as may be valid without defeating the intent of such provision.

18. **Waivers**

A failure or delay of either Party to enforce any of the provisions hereof, to exercise any option which is herein provided, or to require performance of any of the provisions hereof shall in no way be construed to be a waiver of such provisions or options, and each Party, notwithstanding such failure, shall have the right thereafter to insist upon the specific performance of any and all of the provisions of this Agreement.

19. **Governing Law**

This Agreement shall be governed by, and construed and enforced in accordance with, the laws of the State in which the service is being provided, without regard to its conflict of laws principles.

20. **Arm's Length Negotiations**

This Agreement was executed after arbitration pursuant to Section 252 of the Communications Act of 1934. Those portions of the Agreement that were not subject to Arbitration were voluntarily negotiated at arms' length

by the undersigned Parties. With respect to the issues determined by arbitration, each Party is executing this Agreement in compliance with the arbitration decision of the Commission. A Party's execution and performance of this Agreement does not constitute an admission that the terms imposed by arbitration are lawful or reasonable, or that the Party would accept such terms voluntarily; and each party reserves its rights to seek appeal, reconsideration, or other administrative or judicial relief with respect to the arbitrated terms.

21. Notices

- 21.1 Every notice, consent, approval, or other communications required or contemplated by this Agreement shall be in writing and shall be delivered in person or given by postage prepaid mail, certified mail return receipt requested, an overnight delivery service providing proof of delivery, or facsimile addressed to:

BellSouth Telecommunications, Inc.

CLEC Account Team for US LEC
9th Floor
600 North 19th Street
Birmingham, Alabama 35203

and

General Attorney - COU
Suite 4300
675 W. Peachtree St.
Atlanta, GA 30375

US LEC

Executive Vice President and General Counsel
US LEC Corp.
Transamerica Square
401 North Tryon Street, Suite 1000
Charlotte, NC 28202

or at such other address as the intended recipient previously shall have designated by written notice to the other Party.

21.2 Where specifically required, notices shall be by certified or registered mail. Unless otherwise provided in this Agreement, notice by mail shall be effective on the date it is officially recorded as delivered by return receipt or equivalent, and in the absence of such record of delivery, it shall be presumed to have been delivered the fifth day, or next business day after the fifth day, after it was deposited in the mails.

21.3 BellSouth shall provide US LEC 45-day advance notice via Internet posting of retail price changes and of changes to the terms and conditions of services available for resale. To the extent that revisions occur between the time BellSouth notifies US LEC of changes under this Agreement and the time the changes are scheduled to be implemented, BellSouth will immediately notify US LEC of such revisions consistent with its internal notification process. US LEC may not hold BellSouth responsible for any cost incurred as a result of such revisions, unless such costs are incurred as a result of BellSouth's intentional misconduct. US LEC may not utilize any notice given under this subsection concerning a service to market resold offerings of that service in advance of the applicable tariff effective date.

22. Rule of Construction

No rule of construction requiring interpretation against the drafting Party hereof shall apply in the interpretation of this Agreement.

23. Headings of No Force or Effect

The headings of Articles and Sections of this Agreement are for convenience of reference only, and shall in no way define, modify or restrict the meaning or interpretation of the terms or provisions of this Agreement.

24. Multiple Counterparts

This Agreement may be executed multiple counterparts, each of which shall be deemed an original, but all of which shall together constitute but one and the same document.

25. Implementation of Agreement

Where the Parties have already established a course of dealing, the Parties will continue to operate under the procedures developed pursuant to such course of dealing under this Agreement, unless inconsistent with the terms of this Agreement. As soon as practicable after, execution of this Agreement, the parties will adopt a schedule for the implementation of the Agreement, where they do not already have a prior course of dealing. The schedule shall state with specificity time frames for submission of including but not limited to, network design, interconnection points, collocation arrangement requests, pre-sales testing and full operational time frames for the business and residential markets. An implementation template to be used for the implementation schedule is contained in Attachment 10 of this Agreement.

26. Filing of Agreement

Upon execution of this Agreement it shall be filed with the appropriate state regulatory agency pursuant to the requirements of Section 252 of the Act. If the regulatory agency imposes any filing or public interest notice fees regarding the filing or approval of the Agreement, said costs shall be borne by US LEC.

27. Entire Agreement

This Agreement and its Attachments, incorporated herein by this reference, sets forth the entire understanding and supersedes prior agreements between the Parties relating to the subject matter contained herein and merges all prior discussions between them. Notwithstanding the foregoing, any implementation processes and practices adopted by the Parties during the term of their previous agreements shall be carried forward to the term of this Agreement unless otherwise changed by this Agreement or as otherwise mutually agreed to by the Parties. Neither Party shall be bound by any definition, condition, provision, representation, warranty, covenant or promise other than as expressly stated in this Agreement or as is contemporaneously or subsequently set forth in writing and executed by a duly authorized officer or representative of the Party to be bound thereby.

This agreement may include attachments with provisions for the following services:

Network Elements and Other Services
Local Interconnection

Resale
Collocation

The following services are included as options for purchase by US LEC.
US LEC shall elect said services by written request to its Account
Manager if applicable:

Optional Daily Usage File (ODUF)
Enhanced Optional Daily Usage File (EODUF)
Access Daily Usage File (ADUF)
Line Information Database (LIDB) Storage
Centralized Message Distribution Service (CMDS)
Calling Name (CNAM)

IN WITNESS WHEREOF, the Parties have executed this Agreement the day and year
above first written.

Definitions

Affiliate is defined as a person that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with, another person. For purposes of this paragraph, the term "own" means to own an equity interest (or equivalent thereof) of more than 10 percent.

Centralized Message Distribution System is the Telcordia (formerly BellCore) administered national system, based in Kansas City, Missouri, used to exchange Exchange Message Interface (EMI) formatted data among host companies.

Commission is defined as the appropriate regulatory agency in each of BellSouth's nine state region, Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee.

Daily Usage File is the compilation of messages or copies of messages in standard Exchange Message Interface (EMI) format exchanged from BellSouth to a CLEC.

Environmental Hazard means (1) a release, discharge, leak, spill or disposal (collectively referred to hereafter as "release") of HAZARDOUS MATERIALS has occurred on premises or property that is related to the performance of this Agreement and that such affected material or media is demonstrated through applicable or appropriate testing method to require remediation or removal as determined by all laws, ordinances, statutes, codes, rules, regulations, orders and decrees of the United States, the state, county, city or any other political subdivision in which the release has occurred, and any other political subdivision in which the release has occurred, and any other political subdivision, agency, or instrumentality exercising jurisdiction over the release, including any applicable federal and state case law and common law interpreting any of the foregoing or (2) any event involving, or exposure to, HAZARDOUS MATERIALS which poses risks to human health, safety or the environment (including, without limitation, indoor or outdoor environment(s) and is regulated under any applicable laws or regulations as described in (1).

Exchange Message Interface is the nationally administered standard format for the exchange of data among the Exchange Carriers within the telecommunications industry.

FCC means the Federal Communications Commission.

Hazardous Materials means any hazardous or toxic substance, material or waste listed in the United States Department of Transportation HAZARDOUS MATERIALS Table at 49 CFR 172.101; and hazardous substance listed by the Environmental Protection Agency (EPA) under the Comprehensive Environmental, Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. §§ 9601, et. seq., as amended,

and found at 40 CFR Part 302; any hazardous waste listed under the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. §§ 6901, et. seq., as amended, and found at 40 CFR Part 261; any toxic substance regulated by the Toxic Substances Control Act, 15 U.S.C. §§ 2601, et. seq., as amended; any insecticide, fungicide, or rodenticide regulated by the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. §§ 136, et. seq., as amended; and the following specified substances or materials, that may or may not be regulated by the above: (1) asbestos or asbestos-containing materials; (2) petroleum or petroleum-based or derived products or by-product; (3) polychlorinated biphenyl's (PCBs); and (4) radon."

Information Service means the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available information via telecommunications, and includes electronic publishing, but does not include any use of any such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service.

Intercompany Settlements (ICS) is the revenue associated with charges billed by a company other than the company in whose service area such charges were incurred. ICS on a national level includes third number and credit card calls and is administered by Telcordia (formerly BellCore)'s Calling Card and Third Number Settlement System (CATS). Included is traffic that originates in one Regional Bell Operating Company's (RBOC) territory and bills in another RBOC's territory.

Intermediary function is defined as the delivery of traffic from US LEC; a CLEC other than US LEC or another telecommunications carrier through the network of BellSouth or US LEC to an end user of US LEC; a CLEC other than US LEC or another telecommunications carrier.

Local Interconnection is defined as 1) the delivery of local traffic to be terminated on each Party's local network so that end users of either Party have the ability to reach end users of the other Party without the use of any access code or substantial delay in the processing of the call; 2) the LEC network features, functions, and capabilities set forth in this Agreement; and 3) Service Provider Number Portability sometimes referred to as temporary telephone number portability to be implemented pursuant to the terms of this Agreement.

Local Traffic is defined as set forth in Attachment 3 to this Agreement.

Message Distribution is routing determination and subsequent delivery of message data from one company to another. Also included is the interface function with CMDS, where appropriate.

Multiple Exchange Carrier Access Billing ("MECAB") means the document prepared by the Billing Committee of the Ordering and Billing Forum ("OBF"), which

functions under the auspices of the Carrier Liaison Committee of the Alliance for Telecommunications Industry Solutions ("ATIS") and by Telcordia (formerly BellCore) as Special Report SR-BDS-000983, Containing the recommended guidelines for the billing of Exchange Service access provided by two or more LECs and/or CLECs or by one LEC in two or more states within a single LATA.

Network Element is defined to mean a facility or equipment used in the provision of a telecommunications service. Such term may include, but is not limited to, features, functions, and capabilities that are provided by means of such facility or equipment, including but not limited to, subscriber numbers, databases, signaling systems, and information sufficient for billing and collection or used in the transmission, routing, or other provision of a telecommunications service. BellSouth currently offers access to the Network Elements, unbundled loops; network interface device; sub-loop elements; local switching; transport; tandem switching; operator systems; signaling; access to call-related databases; dark fiber as set forth in Attachment 2 of this Agreement.

Non-Intercompany Settlement System (NICS) is the Telcordia (formerly BellCore) system that calculates non-intercompany settlements amounts due from one company to another within the same RBOC region. It includes credit card, third number and collect messages.

Percent of Interstate Usage (PIU) is defined as a factor to be applied to terminating access services minutes of use to obtain those minutes that should be rated as interstate access services minutes of use. The numerator includes all interstate "non-intermediary" minutes of use, including interstate minutes of use that are forwarded due to service provider number portability less any interstate minutes of use for Terminating Party Pays services, such as 800 Services. The denominator includes all "non-intermediary", local, interstate, intrastate, toll and access minutes of use adjusted for service provider number portability less all minutes attributable to terminating Party pays services.

Percent Local Usage (PLU) is defined as a factor to be applied to intrastate terminating minutes of use. The numerator shall include all "non-intermediary" local minutes of use adjusted for those minutes of use that only apply local due to Service Provider Number Portability. The denominator is the total intrastate minutes of use including local, intrastate toll, and access, adjusted for Service Provider Number Portability less intrastate terminating Party pays minutes of use.

Point of Presence (POP) is as set forth in Attachment 3 to this Agreement.

Point of Interface is as set forth in Attachment 3 to this Agreement.

Point of Interconnection is as defined in Attachment 3 to this Agreement.

Revenue Accounting Office (RAO) Status Company is a local exchange company/alternate local exchange company that has been assigned a unique RAO code. Message data exchanged among RAO status companies is grouped (i.e. packed) according to From/To/Bill RAO combinations.

Service Control Points ("SCPs") are defined as databases that store information and have the ability to manipulate data required to offer particular services.

Signal Transfer Points ("STPs") are signaling message switches that interconnect Signaling Links to route signaling messages between switches and databases. STPs enable the exchange of Signaling System 7 ("SS7") messages between switching elements, database elements and STPs. STPs provide access to various BellSouth and third party network elements such as local switching and databases.

Signaling links are dedicated transmission paths carrying signaling messages between carrier switches and signaling networks. Signal Link Transport is a set of two or four dedicated 56 kbps transmission paths between US LEC designated Signaling Points of Interconnection that provide a diverse transmission path and cross connect to a BellSouth Signal Transfer Point.

Telecommunications means the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received.

Telecommunications Service means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.

Telecommunications Act of 1996 ("Act") means United States Public Law 104-104 effective February 8, 1996. The Act amended the Communications Act of 1934 (47, U.S.C. Section 1 et. seq.).

RESALE

1 Discount Rates

The rates pursuant by which US LEC is to purchase services from BellSouth for resale shall be at a discount rate off of the retail rate for the telecommunications service. The discount rates shall be as set forth in Exhibit A, attached hereto and incorporated herein by this reference. Such discount shall reflect the costs avoided by BellSouth when selling a service for wholesale purposes.

2 Definition of Terms

- 2.1 CUSTOMER OF RECORD means the entity responsible for placing application for service; requesting additions, rearrangements, maintenance or discontinuance of service; payment in full of charges incurred such as non-recurring, monthly recurring, toll, directory assistance, etc.
- 2.2 DEPOSIT means assurance provided by a customer in the form of cash, surety bond or bank letter of credit to be held by BellSouth.
- 2.3 END USER means the ultimate user of the telecommunications services.
- 2.4 END USER CUSTOMER LOCATION means the physical location of the premises where an end user makes use of the telecommunications services.
- 2.5 NEW SERVICES means functions, features or capabilities that are not currently offered by BellSouth. This includes packaging of existing services or combining a new function, feature or capability with an existing service.
- 2.6 OTHER/COMPETITIVE LOCAL EXCHANGE COMPANY (OLEC/CLEC) means a telephone company certificated by the public service commissions of BellSouth's franchised area to provide local exchange service within BellSouth's franchised area.
- 2.7 RESALE means an activity wherein a certificated CLEC, such as US LEC subscribes to the telecommunications services of BellSouth and then reoffers those telecommunications services to the public (with or without "adding value").
- 2.8 RESALE SERVICE AREA means the area, as defined in a public service commission approved certificate of operation, within which a CLEC, such as US LEC, may offer resold local exchange telecommunications service.

3 General Provisions

All of the negotiated rates, terms and conditions set forth in this Attachment pertain to the resale of BellSouth's retail telecommunications services and other services specified in this Attachment.

- 3.1 BellSouth will offer US LEC for resale at the discounts set forth in Exhibit A to this Attachment any telecommunications service that BellSouth provides at retail to customers who are not telecommunications carriers pursuant to this Attachment. US LEC may resell the tariffed local exchange and toll telecommunications service of BellSouth contained in the General Subscriber

Service Tariff and Private Line Service Tariff subject to the terms and conditions specifically set forth herein.

- 3.2 BellSouth shall make available telecommunications services for resale at the rates set forth in Exhibit A to this agreement and subject to the exclusions and limitations set forth in Exhibit B to this agreement. BellSouth does not however waive its rights to appeal or otherwise challenge any decision regarding resale that resulted in the discount rates contained in Exhibit A or the exclusions and limitations contained in Exhibit B. BellSouth reserves the right to pursue any and all legal and/or equitable remedies, including appeals of any decisions. If such appeals or challenges result in changes in the discount rates or exclusions and limitations, the parties agree that appropriate modifications to this Agreement will be made promptly to make its terms consistent with the outcome of the appeal.
- 3.3 US LEC may purchase resale services from BellSouth for their own use in operating their business. The resale discount will apply to those services under the following conditions:
- 3.3.1 US LEC must resell services to other end users.
- 3.3.2 US LEC must order services through resale interfaces, i. e., the Local Carrier Service Center (LCSC) and/or appropriate Resale Account Teams pursuant to Section 3 of the General Terms and Conditions.
- 3.3.3 US LEC cannot be an alternative local exchange telecommunications company for the single purpose of selling to themselves.
- 3.4 The provision of services by BellSouth to US LEC does not constitute a joint undertaking for the furnishing of any service.
- 3.5 US LEC will be the customer of record for all services purchased from BellSouth. Except as specified herein, BellSouth will take orders from, bill and expect payment from US LEC for all services.
- 3.6 US LEC will be BellSouth's single point of contact for all services purchased pursuant to this Agreement. BellSouth shall have no contact with the end user except to the extent provided for herein.
- 3.7 BellSouth will continue to bill the end user for any services that the end user specifies it wishes to receive directly from BellSouth.
- 3.8 BellSouth maintains the right to serve directly any end user within the service area of US LEC. BellSouth will continue to directly market its own telecommunications products and services and in doing so may establish independent relationships with end users of US LEC.
- 3.9 Neither Party shall interfere with the right of any person or entity to obtain service directly from the other Party.
- 3.10 Current telephone numbers may normally be retained by the end user. However, telephone numbers are the property of BellSouth and are assigned to the service furnished. US LEC has no property right to the telephone number or any other call number designation associated with services furnished by BellSouth, and no right to the continuance of service through any particular central office. BellSouth reserves the right to change such numbers, or the central office

designation associated with such numbers, or both, whenever BellSouth deems it necessary to do so in the conduct of its business.

- 3.11 For the purpose of the resale of BellSouth's telecommunications services by US LEC, BellSouth will provide US LEC with an on line access to telephone numbers for reservation on a first come first serve basis. Such reservations of telephone numbers, on a pre-ordering basis shall be for a period of nine (9) days. US LEC acknowledges that there may be instances where there is a shortage of telephone numbers in a particular Common Language Location Identifier Code (CLLIC) and in such instances BellSouth may request that US LEC cancel its reservations of numbers. US LEC shall comply with such request.

Further, upon US LEC's request, and for the purpose of the resale of BellSouth's telecommunications services by US LEC, BellSouth will reserve up to 100 telephone numbers per CLLIC, for US LEC's sole use. Such telephone number reservations shall be valid for ninety (90) days from the reservation date. US LEC acknowledges that there may be instances where there is a shortage of telephone numbers in a particular CLLIC and in such instances BellSouth shall use its best efforts to reserve for a ninety (90) day period a sufficient quantity of US LEC's reasonable need in that particular CLLIC.

- 3.12 BellSouth may provide any service or facility for which a charge is not established herein, as long as it is offered on the same terms to US LEC.
- 3.13 Service is furnished subject to the condition that it will not be used for any unlawful purpose.
- 3.14 Service will be discontinued if any law enforcement agency advises that the service being used is in violation of the law.
- 3.15 BellSouth can refuse service when it has grounds to believe that service will be used in violation of the law.
- 3.16 BellSouth accepts no responsibility to any person for any unlawful act committed by US LEC or its end users as part of providing service to US LEC for purposes of resale or otherwise.
- 3.17 BellSouth will cooperate fully with law enforcement agencies with subpoenas and court orders for assistance with BellSouth's customers. Law enforcement agency subpoenas and court orders regarding end users of US LEC will be directed to US LEC. BellSouth will bill US LEC for implementing any requests by law enforcement agencies regarding US LEC end users.
- 3.18 The characteristics and methods of operation of any circuits, facilities or equipment provided by any person or entity other than BellSouth shall not:
- 3.18.1 Interfere with or impair service over any facilities of BellSouth, its affiliates, or its connecting and concurring carriers involved in its service;
 - 3.18.2 Cause damage to BellSouth's plant;
 - 3.18.3 Impair the privacy of any communications; or
 - 3.18.4 Create hazards to any BellSouth employees or the public.

- 3.19 US LEC assumes the responsibility of notifying BellSouth regarding less than standard operations with respect to services provided by US LEC.
- 3.20 Facilities and/or equipment utilized by BellSouth to provide service to US LEC remain the property of BellSouth.
- 3.21 White page directory listings will be provided in accordance with regulations set forth in Section A6 of the General Subscriber Services Tariff and will be available for resale.
- 3.22 BellSouth provides electronic access to customer record information. Access is provided through the Local Exchange Navigation System (LENS) and the Telecommunications Access Gateway (TAG). Customer Record Information includes but is not limited to, customer specific information in CRIS and RSAG. US LEC agrees not to view, copy, or otherwise obtain access to the customer record information of any customer without that customer's permission, and further agrees that US LEC will obtain access to customer record information only in strict compliance with applicable laws, rules, or regulations of the State in which the service is provided.
- 3.22 Where available to BellSouth's end users, BellSouth shall provide the following telecommunications services at a discount to allow for voice mail services;
- Station Message Desk Interface - Enhanced ("SMDI-E")
 - Station Message Desk Interface ("SMDI") Message Waiting Indicator ("MWI") stutter dialtone and message waiting light feature capabilities
 - Call Forward on Busy/Don't Answer ("CF-B/DA")
 - Call Forward on Busy ("CF/B")
 - Call Forward Don't Answer ("CF/DA")
- Further, BellSouth messaging services set forth in BellSouth's Messaging Service Information Package shall be made available for resale without the wholesale discount.
- 3.23 BellSouth's Inside Wire Maintenance Service Plans may be made available for resale at rates, terms and conditions as set forth by BellSouth and without the wholesale discount.
- 3.24 All costs incurred by BellSouth for providing services requested by US LEC that are not covered in the BellSouth tariffs shall be recovered from the US LEC(s) who utilize those services.
- 3.25 Recovery of charges associated with implementing Number Portability through a monthly charges assessed to end users has been authorized by the FCC. This end user line charge will be billed to US LECs of BellSouth's telecommunications services and will be as filed in FCC No. 1. This charge will not be discounted.

4 BellSouth's Provision of Services to US LEC

- 4.1 US LEC agrees that its resale of BellSouth services shall be as follows:
- 4.1.1 The resale of telecommunications services shall be limited to users and uses conforming to the class of service restrictions.

- 4.1.2 Hotel and Hospital PBX services are the only telecommunications services available for resale to Hotel/Motel and Hospital end users, respectively. Similarly, Access Line Service for Customer Provided Coin Telephones is the only local service available for resale to Independent Payphone Provider (IPP) customers. Shared Tenant Service customers can only be sold those local exchange access services available in BellSouth's A23 Shared Tenant Service Tariff in the states of Florida, Georgia, North Carolina and South Carolina, and in A27 in the states of Alabama, Kentucky, Louisiana, Mississippi and Tennessee.
- 4.1.3 BellSouth reserves the right to periodically audit services purchased by US LEC to establish authenticity of use. Such audit shall not occur more than once in a calendar year. US LEC shall make any and all records and data available to BellSouth or BellSouth's auditors on a reasonable basis. BellSouth shall bear the cost of said audit.
- 4.2 Resold services can only be used in the same manner as specified in BellSouth's Tariffs. Resold services are subject to the same terms and conditions as are specified for such services when furnished to an individual end user of BellSouth in the appropriate section of BellSouth's Tariffs. Specific tariff features, e.g. a usage allowance per month, shall not be aggregated across multiple resold services.
- 4.3 US LEC may resell services only within the specific resale service area as defined in its certificate.
- 4.4 Telephone numbers transmitted via any resold service feature are intended solely for the use of the end user of the feature. Resale of this information is prohibited.

5 Maintenance of Services

- 5.1 US LEC will adopt and adhere to the standards contained in the applicable CLEC Work Center Operational Understanding Agreement regarding maintenance and installation of service.
- 5.2 Services resold under BellSouth's Tariffs and facilities and equipment provided by BellSouth shall be maintained by BellSouth.
- 5.3 US LEC or its end users may not rearrange, move, disconnect, remove or attempt to repair any facilities owned by BellSouth, other than by connection or disconnection to any interface means used, except with the written consent of BellSouth.
- 5.4 US LEC accepts responsibility to notify BellSouth of situations that arise that may result in a service problem.
- 5.5 US LEC will be BellSouth's single point of contact for all repair calls on behalf of US LEC's end users. The parties agree to provide one another with toll-free contact numbers for such purposes.
- 5.6 US LEC will contact the appropriate repair centers in accordance with procedures established by BellSouth.
- 5.7 For all repair requests, US LEC accepts responsibility for adhering to BellSouth's prescreening guidelines prior to referring the trouble to BellSouth.

- 5.8 BellSouth will bill US LEC for handling troubles that are found not to be in BellSouth's network pursuant to its standard time and material charges. The standard time and material charges will be no more than what BellSouth charges to its retail customers for the same services.
- 5.9 BellSouth reserves the right to contact US LEC's customers, if deemed necessary, for maintenance purposes.

6 Establishment of Service

- 6.1 After receiving certification as a local exchange company from the appropriate regulatory agency, US LEC will provide the appropriate Company service center the necessary documentation to enable BellSouth to establish a master account for US LEC. Such documentation shall include the Application for Master Account, proof of authority to provide telecommunications services, an Operating Company Number ("OCN") assigned by the National Exchange Carriers Association ("NECA") and a tax exemption certificate, if applicable. When necessary deposit requirements are met, BellSouth will begin taking orders for the resale of service.
- 6.2 Service orders will be in a standard format designated by BellSouth.
- 6.3 When notification is received from US LEC that a current customer of BellSouth will subscribe to US LEC's service, standard service order intervals for the appropriate class of service will apply.
- 6.4 BellSouth will not require end user confirmation prior to establishing service for US LEC's end user customer. US LEC must, however, be able to demonstrate end user authorization upon request.
- 6.5 US LEC will be the single point of contact with BellSouth for all subsequent ordering activity resulting in additions or changes to resold services except that BellSouth will accept a request directly from the end user for conversion of the end user's service from US LEC to BellSouth or will accept a request from another CLEC for conversion of the end user's service from US LEC to the other LEC. BellSouth will notify US LEC that such a request has been processed.
- 6.6 If BellSouth determines that an unauthorized change in local service to US LEC has occurred, BellSouth will reestablish service with the appropriate local service provider and will assess US LEC as the CLEC initiating the unauthorized change, the unauthorized change charge described in F.C.C. Tariff No. 1, Section 13 or applicable state tariff. Appropriate nonrecurring charges, as set forth in Section A4. of the General Subscriber Service Tariff, will also be assessed to US LEC. These charges can be adjusted if US LEC provides satisfactory proof of authorization.
- 6.7 In order to safeguard its interest, BellSouth reserves the right to secure the account with a suitable form of security deposit, unless satisfactory credit has already been established.
 - 6.7.1 Such security deposit shall take the form of an irrevocable Letter of Credit or other forms of security acceptable to BellSouth. Any such security deposit may be held during the continuance of the service as security for the payment of any and all amounts accruing for the service.
 - 6.7.2 If a security deposit is required, such security deposit shall be made prior to the inauguration of service.
 - 6.7.3 Such security deposit may not exceed two months' estimated billing.

- 6.7.4 The fact that a security deposit has been made in no way relieves US LEC from complying with BellSouth's regulations as to advance payments and the prompt payment of bills on presentation nor does it constitute a waiver or modification of the regular practices of BellSouth providing for the discontinuance of service for non-payment of any sums due BellSouth.
- 6.7.5 BellSouth reserves the right to increase the security deposit requirements when, in its sole judgment, circumstances so warrant and/or gross monthly billing has increased beyond the level initially used to determine the security deposit.
- 6.7.6 In the event that US LEC defaults on its account, service to US LEC will be terminated and any security deposits held will be applied to its account.
- 6.7.7 Interest on a security deposit shall accrue and be paid in accordance with the terms in the appropriate BellSouth tariff.

7 Payment And Billing Arrangements

- 7.1 Prior to submitting orders to BellSouth for local service, a master account must be established for US LEC. The US LEC is required to provide the following before a master account is established: proof of PSC/PUC certification, the Application for Master Account, an Operating Company Number ("OCN") assigned by the National Exchange Carriers Association ("NECA") and a tax exemption certificate, if applicable.
- 7.2 BellSouth shall bill US LEC on a current basis all applicable charges and credits.
- 7.3 Payment of all charges will be the responsibility of US LEC. US LEC shall make payment to BellSouth for all services billed. BellSouth is not responsible for payments not received by US LEC from US LEC's customer. BellSouth will not become involved in billing disputes that may arise between US LEC and its customer. Payments made to BellSouth as payment on account will be credited to an accounts receivable master account and not to an end user's account.
- 7.4 BellSouth will render bills each month on established bill days for each of US LEC's accounts.
- 7.5 BellSouth will bill US LEC, in advance charges for all services to be provided during the ensuing billing period except charges associated with service usage, which charges will be billed in arrears. Charges will be calculated on an individual end user account level, including, if applicable, any charge for usage or usage allowances. BellSouth will also bill all charges including but not limited to 911 and E911 charges, telecommunications relay charges, and franchise fees, to US LEC.
- 7.6 The payment will be due by the next bill date (i.e., same date in the following month as the bill date) and is payable in immediately available funds. Payment is considered to have been made when received by BellSouth.
 - 7.6.1 If the payment due date falls on a Sunday or on a Holiday which is observed on a Monday, the payment due date shall be the first non-Holiday day following such Sunday or Holiday. If the payment due date falls on a Saturday or on a Holiday which is observed on Tuesday, Wednesday, Thursday, or Friday, the payment due date shall be the last non-Holiday day preceding such Saturday or Holiday. If payment is not received

by the payment due date, a late payment penalty, as set forth in section 7.8 following, shall apply.

7.6.2 If US LEC requests multiple billing media or additional copies of bills, BellSouth will provide these at an appropriate charge to US LEC.

7.6.3 Billing Disputes

7.6.3.1 Each Party agrees to notify the other Party upon the discovery of a billing dispute. In the event of a billing dispute, the Parties will endeavor to resolve the dispute within sixty (60) calendar days of the Bill Date on which such disputed charges appear. Resolution of the dispute is expected to occur at the first level of management resulting in a recommendation for settlement of the dispute and closure of a specific billing period. If the issues are not resolved within the allotted time frame, the following resolution procedure will begin:

7.6.3.2 If the dispute is not resolved within sixty (60) days of the Bill Date, the dispute will be escalated to the second level of management for each of the respective Parties for resolution. If the dispute is not resolved within ninety (90) days of the Bill Date, the dispute will be escalated to the third level of management for each of the respective Parties for resolution

7.6.3.3 If the dispute is not resolved within one hundred and twenty (120) days of the Bill Date, the dispute will be escalated to the fourth level of management for each of the respective Parties for resolution.

7.6.3.4 If a Party disputes a charge and does not pay such charge by the payment due date, such charges shall be subject to late payment charges as set forth in the Late Payment Charges provision of this Attachment. If a Party disputes charges and the dispute is resolved in favor of such Party, the other Party shall credit the bill of the disputing Party for the amount of the disputed charges along with any late payment charges assessed no later than the second Bill Date after the resolution of the dispute. Accordingly, if a Party disputes charges and the dispute is resolved in favor of the other Party, the disputing Party shall pay the other Party the amount of the disputed charges and any associated late payment charges assessed no later than the second bill payment due date after the resolution of the dispute. BellSouth shall only assess interest on previously assessed late payment charges in a state where it has authority pursuant to its tariffs.

7.7 Upon proof of tax exempt certification from US LEC, the total amount billed to US LEC will not include any taxes due from the end user to reflect the tax exempt certification and local tax laws. US LEC will be solely responsible for the computation, tracking, reporting, and payment of taxes applicable to US LEC's end user.

7.8 If any portion of the payment is received by BellSouth after the payment due date as set forth preceding, or if any portion of the payment is received by BellSouth in funds that are not immediately available to BellSouth, then a late payment penalty shall be due to BellSouth. The late payment penalty shall be the portion of the payment not received by the payment due date times a late factor and will be applied on a per bill basis. The late factor shall be as set forth in Section A2 of the General Subscriber Services Tariff and Section B2 of the Private Line Service Tariff.

- 7.9 Any switched access charges associated with interexchange carrier access to the resold local exchange lines will be billed by, and due to, BellSouth. No additional charges are to be assessed to US LEC
- 7.10 BellSouth will not perform billing and collection services for US LEC as a result of the execution of this Agreement. All requests for billing services should be referred to the appropriate entity or operational group within BellSouth.
- 7.11 Pursuant to 47 CFR Section 51.617, BellSouth will bill US LEC end user common line charges identical to the end user common line charges BellSouth bills its end users.
- 7.12 In general, BellSouth will not become involved in disputes between US LEC and US LEC's end user customers over resold services. If a dispute does arise that cannot be settled without the involvement of BellSouth, US LEC shall contact the designated Service Center for resolution. BellSouth will make every effort to assist in the resolution of the dispute and will work with US LEC to resolve the matter in as timely a manner as possible. US LEC may be required to submit documentation to substantiate the claim.

8 Discontinuance of Service

- 8.1 The procedures for discontinuing service to an end user are as follows:
 - 8.1.1 Where possible, BellSouth will deny service to US LEC's end user on behalf of, and at the request of, US LEC. Upon restoration of the end user's service, restoral charges will apply and will be the responsibility of US LEC.
 - 8.1.2 At the request of US LEC, BellSouth will disconnect a US LEC end user customer.
 - 8.1.3 All requests by US LEC for denial or disconnection of an end user for nonpayment must be in writing.
 - 8.1.4 US LEC will be made solely responsible for notifying the end user of the proposed disconnection of the service.
 - 8.1.5 BellSouth will continue to process calls made to the Annoyance Call Center and will advise US LEC when it is determined that annoyance calls are originated from one of their end user's locations. BellSouth shall be indemnified, defended and held harmless by US LEC and/or the end user against any claim, loss or damage arising from providing this information to US LEC. It is the responsibility of US LEC to take the corrective action necessary with its customers who make annoying calls. Failure to do so will result in BellSouth's disconnecting the end user's service.
 - 8.1.6 BellSouth may disconnect and reuse facilities when the facility is in a denied state and BellSouth has received an order to establish new service or transfer of service from a customer or a customer's CLEC at the same address served by the denied facility.
- 8.2 The procedures for discontinuing service to US LEC are as follows:
 - 8.2.1 BellSouth reserves the right to suspend or terminate service for nonpayment or in the event of prohibited, unlawful or improper use of the facilities or service, abuse of the

facilities, or any other violation or noncompliance by US LEC of the rules and regulations of BellSouth's Tariffs.

- 8.2.2 If payment of account is not received by the bill day in the month after the original bill day, BellSouth may provide written notice to US LEC, that additional applications for service will be refused and that any pending orders for service will not be completed if payment is not received by the fifteenth day following the date of the notice. In addition BellSouth may, at the same time, give thirty days notice to the person designated by US LEC to receive notices of noncompliance, and discontinue the provision of existing services to US LEC at any time thereafter.
- 8.2.3 In the case of such discontinuance, all billed charges, as well as applicable termination charges, shall become due.
- 8.2.4 If BellSouth does not discontinue the provision of the services involved on the date specified in the thirty days notice and US LEC's noncompliance continues, nothing contained herein shall preclude BellSouth's right to discontinue the provision of the services to US LEC without further notice.
- 8.2.5 If payment is not received or arrangements made for payment by the date given in the written notification, US LEC's services will be discontinued. Upon discontinuance of service on a US LEC's account, service to US LEC's end users will be denied. BellSouth will also reestablish service at the request of the end user or US LEC upon payment of the appropriate connection fee and subject to BellSouth's normal application procedures. US LEC is solely responsible for notifying the end user of the proposed disconnection of the service.
- 8.2.6 If within fifteen days after an end user's service has been denied no contact has been made in reference to restoring service, the end user's service will be disconnected.

APPLICABLE DISCOUNTS

The telecommunications services available for purchase by US LEC for the purposes of resale to US LEC end users shall be available at the following discount off of the retail rate.

DISCOUNT*			
STATE	RESIDENCE	BUSINESS	CSAs***
ALABAMA	16.3%	16.3%	
FLORIDA	21.83%	16.81%	
GEORGIA	20.3%	17.3%	
KENTUCKY	16.79%	15.54%	
LOUISIANA	20.72%	20.72%	9.05%
MISSISSIPPI	15.75%	15.75%	
NORTH CAROLINA	21.5%	17.6%	
SOUTH CAROLINA	14.8%	14.8%	8.98%
TENNESSEE**	16%	16%	

- When a CLEC provides Resale service in a cross boundary area (areas that are part of the local serving area of another state's exchange) the rates, regulations and discounts for the tariffing state will apply. Billing will be from the serving state.
- ** In Tennessee, if CLEC provides its own operator services and directory services, the discount shall be 21.56%. CLEC must provide written notification to BellSouth within 30 days prior to providing its own operator services and directory services to qualify for the higher discount rate of 21.56%.
- *** Unless noted in this column, the discount for Business will be the applicable discount rate for CSAs.

OPERATIONAL SUPPORT SYSTEMS (OSS) RATES

The parties agree that Electronic Interface (EI) costs and manual work done by the LCSC will be recovered on a "per LSR" basis, with an individual LSR identified by its Purchase Order Number (PON). The CLEC will be assessed either the manual or mechanized charge for most accepted LSRs submitted to BellSouth. Manually submitted UNE LSRs will not incur the manual LSR charge in states that have a separate UNE manual additive. CLECs will be charged the manual rate for most LSRs submitted by mail, courier, fax, etc. CLECs will be charged the mechanized rate for LSRs submitted over any of the mechanized systems (e.g. LENS, EDI, EDI-PC, and TAG).

- A. Bill a single mechanized CLEC EI charge for each resale LSR delivered over an electronic interface. This charge recovers the development and expense costs associated with the CLEC EIs that are allocated to resale LSR volumes, as well as the manual processing associated with mechanized requests that "fall out" in the LCSC for manual handling.
- B. Bill the same mechanized CLEC EI charge for each UNE LSR delivered over an electronic interface.
- C. Bill a single manual LSR charge for each resale LSR delivered manually that reflects the costs associated with the manual processing of those LSRs in the LCSC.
- D. Bill the same manual LSR charge for each manually submitted UNE LSR in those states that do not have a per element UNE non-recurring manual additive.
- E. Establish a transitional plan to bill the mechanized LSR charge for manual LSRs for CLECs who submit a significant proportion of their total LSR volume on a mechanized basis. This volume threshold will increase each year and be eliminated in 2002. This arrangement may be superseded by BellSouth with an LSR-specific process that would apply the mechanized LSR rate to only those manual LSRs which cannot be submitted over a mechanized system.

The regional average pricing plan establishes averaged prices that are the same regardless of:

- CLEC EI system used
- Action being requested on the LSR (order, change, deny, restore, cancel, disconnect, etc.)
- Number of supplements or clarifications received
- Number of service orders result from the LSR

Some CLECs presently provide lists of customers to be denied and restored, rather than individual LSRs. However, since each location on the list must have a separate PON, they will be billed as separate manual LSRs.

A CLEC will be charged for an accepted LSR that is later canceled by the CLEC.

At the present time, five states (AL, GA, LA, MS, SC) have a manual NRC additive per element for UNEs. This manual additive supercedes the manual LSR charge for manual UNE LSRs. Until the other four states adopt this methodology, BellSouth proposes that the manual LSR charge apply for manual UNE LSRs in those states.

EXHIBIT A
Page 3

RESALE

OPERATIONAL SUPPORT SYSTEMS (OSS) RATES	<u>Electronic</u> Per LSR received from the CLEC by one of the OSS interactive interfaces	<u>Manual</u> Per LSR received from the CLEC by means other than one of the OSS interactive interfaces
OSS Order Charge	\$3.50	\$19.99
USOC	SOMECS	SOMAN

In addition to the OSS charges, applicable discounted service order and related discounted charges apply per the tariff.

The Parties agree that US LEC will incur the mechanized rate for all LSRs, both mechanized and manual, if the percentage of mechanized LSRs to total LSRs exceeds the threshold percentages shown below:

<u>Year</u>	<u>Ratio: Mechanized/Total LSRs</u>
1999	70%
2000	80%
2001	90%

The threshold plan will be discontinued in 2002.

BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

Applicable Notes:

- 1 **Grandfathered services** can be resold only to existing subscribers of the grandfathered service.
- 2 Where available for resale, **promotions** will be made available only to end users who would have qualified for the promotion had it been provided by BellSouth directly.
- 3 In Tennessee, long-term **promotions** (offered for more than ninety (90) days) may be obtained at one of the following rates:
 - (a) the stated tariff rate, less the wholesale discount;
 - (b) the promotional rate (the promotional rate offered by BellSouth will not be discounted further by the wholesale discount rate)

EXHIBIT B
Page 2 of 2

4. Lifeline/Link Up services may be offered only to those subscribers who meet the criteria that BellSouth currently applies to subscribers of these services.
- 5 Some of BellSouth's local exchange and toll telecommunications services are not available in certain central offices and areas.
- 6 AdWatchSM Service is tariffed as BellSouth[®] AIN Virtual Number Call Detail Service.
- 7 Exclusions for N11/911/E911 are also applicable to equipment associated with the service. In South Carolina, CSAs are available for resale at the CSA specific resale discount of 8.98%. The state specific resale discount rate applies to Special Assemblies
- 8 In South Carolina, CSAs are available for resale at the CSA specific resale discount of 8.98%. The state specific resale discount rate applies to Special Assemblies.

ACCESS TO NETWORK ELEMENTS AND OTHER SERVICES

1 Introduction

- 1.1 Network Element is defined to mean a facility or equipment used in the provision of a telecommunications service. Such term may include, but is not limited to, features, functions, and capabilities that are provided by means of such facility or equipment, including but not limited to, subscriber numbers, databases, signaling systems, and information sufficient for billing and collection or used in the transmission, routing, or other provision of a telecommunications service. BellSouth offers access to Network Elements as set forth in this Attachment.
- 1.2 BellSouth shall provide to US LEC nondiscriminatory access to its Network Elements for the provision of US LEC's telecommunications service at any technically feasible point, on rates, terms and conditions that are just, reasonable and nondiscriminatory. If no rate is identified in this Agreement, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the Parties upon request by either Party.
- 1.3 US LEC may purchase Network Elements from BellSouth for the purpose of combining such network elements in any manner US LEC chooses to provide telecommunication services to its intended users, including recreating existing BellSouth services. With the exception of the sub-loop elements which are located outside of the central office, BellSouth shall deliver the Network Elements purchased by US LEC for combining to the designated US LEC collocation space. The Network Elements shall be provided as set forth in this Attachment.
- 1.4 BellSouth will provide the following combined Network Elements for purchase by US LEC. The rate of the following combined Network Elements is the sum of the individual element prices as set forth in this Attachment. Order Coordination as defined in Section 2 of Attachment 2 of this Agreement is available for each of these combinations:
- SL2 loop and cross connect
 - Port and cross connect
 - Port and cross connect and common transport
 - Port and vertical features
 - SL2 Loop with loop concentration

- Port and common transport
- SL2 Loop and LNP
- BellSouth shall also provide any other combinations under the same terms, conditions and manner in which provided to other CLECs, or is required to provide under effective FCC or Commission rules or orders of general applicability.

- 1.5 BellSouth shall comply with the requirements as set forth in the technical references within Attachment 2 to the extent that they are consistent with the greater of BellSouth's actual performance or applicable industry standards.
- 1.6 The Parties intend that BellSouth shall offer, pursuant to this Attachment 2, all Network Elements that incumbent LEC's are required to unbundle under currently effective FCC and Commission rules and orders. In the event that any final and effective legislative, regulatory, judicial or other legal action changes these unbundling requirements, or modifies or redefines the "Network Elements" in a manner which materially affects the terms of this Attachment or the Network Elements and/or prices set forth herein, either Party may, on thirty (30) days written notice, require renegotiation of such terms, and the Parties shall renegotiate in good faith such new terms in accordance with such legislative, regulatory, judicial or other legal action. In the event such new terms are not renegotiated within ninety (90) days after the notice for renegotiation, either party may petition the Commission for resolution of the dispute between the Parties. The preceding provisions in this paragraph do not apply to any Other Services that BellSouth has chosen to offer but which are not subject to mandatory unbundling requirements. Each Party reserves the right to seek judicial review of any Commission ruling concerning this Attachment.
- 1.7 US LEC will adopt and adhere to the standards contained in the applicable CLEC Work Center Operational Understanding Agreement regarding maintenance and installation of service.

2 Unbundled Loops, Integrated Digital Loop Carriers, Network Interface Device, Unbundled Loop Concentration (ULC) System, and Sub Loops

The negotiated rates, terms and conditions set forth in this Section pertain to the provision of unbundled loops.

2.1 Unbundled Loops

2.1.1 Definition

2.1.1.1 The loop is the physical medium or functional path on which a subscriber's traffic is carried from the MDF or similar terminating device in a central office up to the termination at the NID at the customer's premise. Each unbundled loop will be provisioned with a NID.

2.1.1.2 The provisioning of service to US LEC will require cross-office cabling and cross-connections within the central office to connect the loop to a local switch or to other transmission equipment in collocation space. These cross-connects are a separate element and are not considered a part of the loop.

2.1.2 BellSouth Order Coordination referenced in Attachment 2 includes two types: "Order Coordination" and "Order Coordination - Time Specific."

2.1.3 "Order Coordination" refers to standard BellSouth service order coordination involving SL2 voice loops and all digital loops. Order coordination for physical conversions will be scheduled at a mutually agreed upon time during normal working hours on the committed due date and US LEC will be advised of this time. Order Coordination will be provided to US LEC on a level that is at least at Parity to that which BellSouth provides itself or any subsidiary or Affiliate, or any other CLEC.

2.1.4 "Order Coordination – Time Specific" refers to service order coordination in which US LEC requests a specific time for a service order conversion to take place. Loops on a single service order of 14 or more loops will be provisioned on a project basis. This is a chargeable option for any coordinated order and is billed in addition to the OC charge. US LEC may specify a time between 9:00 a.m. and 4:00 p.m. Monday through Friday. If US LEC specifies a time outside this window, or selects a time or quantity of loops that requires BellSouth technicians to work outside

normal work hours, overtime charges will apply in addition to the OC and OC-TS charges.

- 2.1.5 Where facilities are available, BellSouth will install unbundled loops in a manner that is at least at Parity with the installation provided any BellSouth subsidiary or affiliate, or any other CLEC. Currently, BellSouth installs loops within a 5-7 business days interval. For orders of 14 or more unbundled loops, the installation will be handled on a project basis and the intervals will be set by the BellSouth project manager for that order. BellSouth will adhere to the installation intervals set out in this subsection, however, if as a result of changes to the Interval Guide, installation intervals are changed, US LEC may take advantage of such change in intervals as reflected in that document. Some unbundled loops require a Service Inquiry (SI) to determine if facilities are available prior to issuing the order. The interval for the SI process is separate from the installation interval. For expedited requests by US LEC, expedite charges will apply for intervals less than 5 days. The charges outlined in BST's FCC #1 Tariff, Section 5.1.1, will apply. If US LEC cancels an order for UNE services, any costs incurred by BellSouth in conjunction with the provisioning of that order will be recovered in accordance with FCC #1 Tariff, Section 5.4."
- 2.1.6 If US LEC modifies an order after being sent a Firm Order Confirmation (FOC) from BellSouth, US LEC will reimburse BellSouth the reasonable costs directly attributable to such modification provided that such cost will not exceed an amount equal to the nonrecurring charges associated with the order.
- 2.1.7 BellSouth will offer Unbundled Voice Loops (UVL) in two different service levels - Service Level One (SL1) and Service Level Two (SL2). SL1 loops will be non-designed, will not have test points, and will not come with any Order Coordination (OC) or engineering information/circuit make-up data. Upon issuance of an order in the service order system, SL1 loops will be activated on the due date in the same manner and time frames that BellSouth normally activates POTS-type loops for its customers. SL2 loops shall have test points, will be designed with a Design Layout Record provided to US LEC, and will be provided with Order Coordination. The OC feature will allow US LEC to coordinate the installation of the loop with the disconnect of an existing customer's service and/or number portability service. In these cases, BellSouth will perform the order conversion with standard order coordination at its discretion during normal work hours. BellSouth will notify US LEC of the completion of the order within a time

frame at Parity with that with which it notifies its end users and other CLECs.

- 2.1.8 BellSouth will also offer Unbundled Digital Loops (UDL), including ADSL and HDSL compatible loops. They will be designed to meet the specifications of the loop type being ordered, will be provisioned with test points (where appropriate), and will come standard with Order Coordination and a Design Layout Record (DLR).
- 2.1.9 As a chargeable option on all unbundled loops except UVL-SL1, BellSouth will offer Order Coordination - Time Specific (OC-TS). This will allow US LEC the ability to specify the time that the coordinated conversion takes place.
- 2.1.10 US LEC will perform pre-screening and sectionalization of trouble reports before handing trouble reports off to BellSouth. BellSouth and US LEC will perform joint testing and isolation of troubles where mutually agreed. Once the trouble has been isolated to BellSouth, US LEC will issue a trouble report to BellSouth.
- 2.1.11 If US LEC reports a trouble on SL1 loops and no trouble actually exists, BellSouth will charge US LEC for any dispatching and testing (both inside and outside the CO) required by BellSouth in order to confirm the loop's working status.
- 2.1.12 If US LEC reports a trouble on SL2 loops and no trouble actually exists, BellSouth will charge US LEC for any dispatching and testing, (outside the CO) required by BellSouth in order to confirm the loop's working status.
- 2.1.13 Technical Requirements
 - 2.1.13.1 To the extent available as an unbundled element within BST's Network at a particular location, BellSouth will offer loops capable of supporting telecommunications services such as: POTS, Centrex, basic rate ISDN, analog PBX, voice grade private line, ADSL, HDSL, DS1, digital data (up to 64 kb/s), digital PBXs, primary rate ISDN, xDSL, and Nx 64 kb/s. If a requested loop type is not available, then US LEC can use the Special Construction process to request that BellSouth place facilities or otherwise modify facilities in order to meet US LEC's request.
 - 2.1.13.2 The loop will support the transmission, signaling, performance and interface requirements of the services described in 2.3.1 above. It is recognized that the requirements of different services are different, and that a number of types or grades of loops are required to support these

services. Services provided over the loop by US LEC will be consistent with industry standards and BST's TR73600.

- 2.1.13.3 In instances where the unbundled copper loop ("UCL"), ADSL, or HDSL capable loops are not available to a particular customer's location, US LEC may require access to a copper twisted pair loop unfettered by any intervening equipment (e.g., filters, load coils, range extenders, etc.).
- 2.1.13.4 At US LEC's request, BellSouth will modify an existing spare copper loop by removing intervening equipment so that US LEC can use the loop for a variety of services by attaching appropriate terminal equipment at the ends. BellSouth's Special Construction Process will be used to determine the costs and feasibility of these activities.
- 2.1.13.5 US LEC will determine the type of service that will be provided over the loop.
- 2.1.13.6 If US LEC utilizes the Special Construction Process to construct and purchase a specific loop type, BellSouth will construct the loop type ordered and will maintain such loop to the characteristics and specifications of the loop type ordered. In such cases, Special Construction charges, as well as recurring and nonrecurring charges for the loop type ordered, will apply. This loop will become a UCL loop for records purposes. However, the loop parameters of the UCL offering will not be met.
- 2.1.13.7 When US LEC requests this modification, they must place an order for a UCL so that BellSouth can track and inventory the newly modified loops for electrical continuity and balance to tip and ring. In the event that US LEC encounters troubles on such modified loops, BellSouth will restore the loop only to maintain the technical characteristics of (1) electrical (DC) continuity, (2) balance between tip and ring, and (3) resistance in loops up to 18 kft. in length.
- 2.1.13.8 In addition, US LEC recognizes there may be instances where a loop modified in this manner may be subjected to normal network configuration changes that may cause the circuit characteristics to be changed and may create an outage of the service that US LEC has placed on the loop. If this occurs, BellSouth will work cooperatively with US LEC to restore the circuit to its previous modified status as quickly as possible.
- 2.1.13.9 The loop shall be provided to US LEC in accordance with the following Technical References:

- 2.1.13.9.1 BellSouth's TR73600, Unbundled Local Loop Technical Specification
- 2.1.13.9.2 Telcordia (formerly BellCore) TR-NWT-000057, Functional Criteria for Digital Loop Carrier Systems, Issue 2, January 1993.
- 2.1.13.9.3 Telcordia (formerly BellCore) TR-NWT-000393, Generic Requirements for ISDN Basic Access Digital Subscriber Lines.
- 2.1.13.9.4 ANSI T1.102 - 1993, American National Standard for Telecommunications - Digital Hierarchy - Electrical Interfaces.
- 2.1.13.9.5 ANSI T1.403 - 1989, American National Standard for Telecommunications - Carrier to Customer Installation, DS1 Metallic Interface Specification.

2.2 Integrated Digital Loop Carriers

Where BellSouth uses Integrated Digital Loop Carrier (IDLC) systems to provide the local loop and BellSouth has a suitable alternate facility available, BellSouth will permit US LEC to order a contiguous unbundled local loop. To the extent it is technically feasible, these arrangements will provide US LEC with the capability to serve end users at a level that is at Parity with the level of service BellSouth provides its customers. If no alternate facility is available, BellSouth will utilize its Special Construction (SC) process to determine the additional costs required to provision the loop facilities. US LEC will then have the option of paying the one-time SC rates to place the loop facilities or US LEC may chose some other method of providing service to the end-user (e.g., Resale, private facilities, etc.).

2.3 Network Interface Device

2.3.1 Definition

- 2.3.1.1 The Network Interface Device (NID) is a single-line termination device or that portion of a multiple-line termination device required to terminate a single line or circuit at the end user customer's premises. The fundamental function of the NID is to establish the official network demarcation point between a carrier and its end-user customer. The NID features two independent chambers or divisions which separate the service provider's network from the customer's inside wiring. Each chamber or division contains the appropriate connection points or posts to which the service provider, and the end-user customer each make their connections. The NID provides a protective ground connection, and is capable of terminating cables such as twisted pair cable.

2.3.2 Technical Requirements

- 2.3.2.1 The Network Interface Device shall provide a clean, accessible point of connection for the inside wiring and for the Distribution Media and shall maintain a connection to ground that meets the requirements set forth below.
- 2.3.2.2 The NID shall be capable of transferring electrical analog or digital signals between the customer's inside wiring and the Distribution Media.
- 2.3.2.3 All NID posts or connecting points shall be in place, secure, usable and free of any rust or corrosion. The protective ground connection shall exist and be properly installed. The ground wire will also be free of rust or corrosion and have continuity relative to ground.
- 2.3.2.4 The NID shall be capable of withstanding all normal local environmental variations.
- 2.3.2.5 Where feasible, the NID shall be physically accessible to US LEC designated personnel. In cases where entrance to the customer premises is required to give access to the NID, US LEC shall obtain entrance permission directly from the customer.
- 2.3.2.6 BellSouth shall offer the NID as a stand-alone component. Additionally, US LEC may connect its loop to any spare capacity on the BellSouth NID. Where necessary to comply with an effective Commission order, BellSouth will allow US LEC to disconnect the BellSouth loop from the BellSouth NID in order to connect US LEC's loop to the BellSouth NID. In these cases, US LEC accepts all liability associated with this process and it is US LEC's responsibility to make sure the disconnected BellSouth loop is properly grounded.

2.3.3 Interface Requirements

- 2.3.3.1 The NID shall be equal to or better than all of the requirements for NIDs set forth in the following technical references:
- 2.3.3.1.1 Telcordia (formerly BellCore) Technical Advisory TA-TSY-000120 "Customer Premises or Network Ground Wire";
- 2.3.3.1.2 Telcordia (formerly BellCore) Generic Requirement GR-49-CORE "Generic Requirements for Outdoor Telephone Network Interface Devices";

2.3.3.1.3 Telcordia (formerly BellCore) Technical Requirement TR-NWT-00239
"Indoor Telephone Network Interfaces";

2.3.3.1.4 Telcordia (formerly BellCore) Technical Requirement TR-NWT-000937
"Generic Requirements for Outdoor and Indoor Building Entrance"

2.4 Unbundled Loop Concentration (ULC) System

2.4.1 BellSouth will provide to US LEC unbundled loop concentration (ULC). Loop concentration systems in the central office concentrate the signals transmitted over local loops onto a digital loop carrier system. The concentration device is placed inside a BellSouth central office. BellSouth will offer ULC with a TR008 interface or a TR303 interface.

2.4.2 ULC will be offered in two sizes. System A will allow up to 96 BellSouth loops to be concentrated onto multiple DS1s. The high speed connection from the concentrator will be at the electrical DS1 level and may connect to US LEC at US LEC's collocation site. System B will allow up to 192 BellSouth loops to be concentrated onto multiple DS1s. System A may be upgraded to a System B. A minimum of two DS1s is required for each system (i.e., System A requires two DS1s and System B would require an additional two DS1s or four in total). All DS1 interfaces will terminate to US LEC's collocation space. ULC service is offered with or without concentration and with or without protection. A Line Interface element will be required for each unbundled loop that is terminated onto the ULC system. Rates for ULC are as set forth in this Attachment.

2.5 Sub-loop Elements

2.5.1 Where facilities permit, BellSouth shall offer access to its Unbundled Sub-Loop (USL), Unbundled Sub-Loop Concentration (USLC) System and Unbundled Network Terminating Wire (UNTW) elements. For those states that have not established rates for these elements the Parties shall negotiate mutually agreeable rates. In the event that the Parties cannot agree on rates either Party can petition the appropriate state commission.

2.5.2 Unbundled Sub-Loop (USL)

2.5.2.1 Definition

2.5.2.1.1 Unbundled Sub-Loop provides connectivity between the NID component of the unbundled sub-loop and the terminal block on the customer-side of a Feeder Distribution Interface (FDI). This termination and cross-connect field may be in the form of an outside plant distribution closure or remote

terminal. Riser Cable that extends from BellSouth's point-of-entry into a building (e.g., equipment closet, terminal room, etc.) to the NID on a particular floor or office space in a multi-tenant building is also classified as a USL. Unbundled Sub-Loops will be provisioned as 2-wire or 4-wire circuits and will include a NID at US LEC's option.

- 2.5.2.1.2 The Unbundled Sub-Loop will be copper twisted pair. If US LEC requires a copper twisted pair Unbundled Sub-Loop in instances where the Unbundled Sub-Loop for services that BellSouth offers is other than a copper facility, BellSouth will provide that media if those facilities exist. If there are no copper facilities available, BellSouth will use its Special Construction process to determine if facilities can be provided to US LEC.

2.5.2.2 Requirements for All Unbundled Sub-Loops

- 2.5.2.2.1 Unbundled Sub-Loops shall be capable of carrying all signaling messages or tones needed to provide telecommunications services.

Unbundled Sub-Loops shall support functions associated with provisioning, maintenance and testing of the Unbundled Sub-Loop. In these scenarios, US LEC would be required to place a cross-box, remote terminal (RT), or other similar device and deliver a cable to the BellSouth remote terminal or cross-box. This cable would be connected, by a BST technician, to a cross-connect panel within the BellSouth RT/cross-box. US LEC's cable pairs can then be connected to BST's USL within the BST cross-box by the BST technician.

2.5.2.3 Interface Requirements

- 2.5.2.3.1 Unbundled Sub-Loop shall be equal to or better than each of the applicable interface requirements set forth in the following technical references:

- 2.5.2.3.2 Telcordia (formerly BellCore) TR-NWT-000049, "Generic Requirements for Outdoor Telephone Network Interface Devices," Issued December 1, 1994;

2.5.3 Unbundled Sub-Loop Concentration System (USLC)

- 2.5.3.1 Pursuant to Section 6.1, BellSouth will provide US LEC with the ability to concentrate its sub-loops onto multiple DS1s back to the BellSouth Central Office. The DS1s will then be terminated into US LEC's collocation space. TR-008 and TR303 interface standards are available.

- 2.5.3.2 USLC, using the Lucent Series 5 equipment, will be offered in two different systems. System A will allow up to 96 of US LEC's sub-loops to be concentrated onto multiple DS1s. System B will allow an additional 96 of US LEC's sub-loops to be concentrated onto multiple DS1s. One System A may be supplemented with one System B and they both must be physically located in a single Series 5 dual channel bank. A minimum of two DS1s is required for each system (i.e., System A requires two DS1s and System B would require an additional two DS1s or four in total). The DS1 level facility that connects the RT site with the serving wire center is known as a Feeder Interface. All DS1 Feeder Interfaces will terminate to US LEC's collocation space within the SWC that serves the RT where US LEC's sub-loops are connected. USLC service is offered with or without concentration and with or without a protection DS1.
- 2.5.3.3 In these scenarios US LEC would be required to place a cross-box, remote terminal (RT), or other similar device and deliver a cable to the BellSouth remote terminal. This cable would be connected, by a BellSouth technician, to a cross-connect panel within the BellSouth RT/cross-box and would allow US LEC's sub-loops to then be placed on the ULSC and transported to their collocation space at a DS1 level.
- 2.5.4 Unbundled Network Terminating Wire (UNTW)
- 2.5.4.1 BellSouth agrees to offer its Unbundled Network Terminating Wire (UNTW) to US LEC pursuant to the following terms and conditions at rates as set forth in this Attachment.
- 2.5.5 Definition
- UNTW is twisted copper wire that extends from BellSouth's point-of-entry into a multi-dwelling unit (MDU) complex or multi-tenant unit (MTU) complex to the point of demarcation at the end-users location. The UNTW will not include a Network Interface Device (NID).
- 2.5.6 Requirements
- 2.5.6.1 BellSouth will retain the first pair of NTW going into each end user premises. BellSouth will offer spare pairs that are available to an end-users premises to US LEC. Available spare pairs are defined as pairs that are not being utilized by BellSouth or by a third party to provide an end-user with working service at the time of US LEC's request for UNTW. If no spare pairs are available and the end-user is no longer using BellSouth's local service, BellSouth will relinquish the first pair to US LEC.

If after BellSouth has relinquished the first pair to US LEC and the end-user decides to change local service providers to BellSouth, US LEC will relinquish the first pair back to BellSouth.

- 2.5.6.2 Notwithstanding the foregoing, should BellSouth subsequently require the use of additional pair(s) to provide for the activation of additional lines in an end-users premises in response to a request from such end-user, US LEC agrees to surrender their spare pair(s) upon request by BellSouth.
- 2.5.6.3 If an end-user of US LEC desires to receive local exchange service from a service provider who is not a party to this Agreement, and such third party service provider needs access to the BellSouth UNTW to provide local exchange service to the end user, then US LEC agrees to surrender the requisite number of its inactive spare pair(s) if no other spare pair is available and upon request by BellSouth.
- 2.5.6.4 If US LEC has placed NTW at a location and an end-user desires to receive local exchange service from BellSouth and BellSouth needs access to US LEC's NTW to provide local exchange service to the end-user, then US LEC agrees to surrender the requisite number of its spare pair(s) upon request by BellSouth.
- 2.5.6.5 In new construction, where possible, both parties may at their option and with the property owner's agreement install their own NTW. In existing construction, BellSouth shall not be required to install new or additional NTW beyond existing NTW to provision the services of the CLEC.
- 2.5.7 Technical Requirements
- 2.5.7.1 In these scenarios, BellSouth will connect the requested UNTW pairs to a cross-connect panel designed for access to BellSouth's NTW. US LEC will be required to place a cross-box, terminal, or other similar device and deliver a cable to this cross-connect panel. US LEC will then connect their cable to the cross-connect panel to access the requested UNTW pairs.
- 2.6 Dark Fiber
- 2.6.1 BellSouth agrees to offer access to Dark Fiber pursuant to the terms and conditions following and at the rates set forth in this Attachment. In Georgia, BellSouth is not required to construct the fiber if it is not available. In Kentucky, if BellSouth has plans to use the fiber in a three year planning period, there is no requirement to provide it. In all other states, BellSouth is not required to place the fibers if there are no fibers

available. The parties agree that Dark Fiber will be used in the provisioning of local service or for other uses permitted under applicable law.

- 2.6.1.1 Dark Fiber is unused strands of optical fiber. It may be strands of optical fiber existing in aerial or underground structure. No line terminating elements terminated to such strands to operationalize its transmission capabilities will be available. No regeneration or optical amplification will be included with this element. All strands of Dark Fiber shall be provisioned with connectors installed at each end.

2.6.2 Requirements

- 2.6.2.1 BellSouth shall make available Dark Fiber where it exists in BellSouth's network and where, as a result of future building or deployment, it becomes available. BellSouth shall offer all Dark Fiber to US LEC pursuant to the prices set forth in this Attachment.
- 2.6.2.2 US LEC may test the quality of the Dark Fiber to confirm its usability and performance specifications.
- 2.6.2.3 BellSouth shall use its best efforts to provide to US LEC information regarding the location, availability and performance of Dark Fiber within ten (10) business days for a records based answer and twenty (20) business days for a field based answer, after receiving a request from US LEC ("Request"). Within such time period, BellSouth shall send written confirmation of availability of the Dark Fiber ("Confirmation").
- 2.6.2.4 BellSouth shall use its best efforts to make Dark Fiber available to US LEC within thirty (30) business days after it receives written confirmation from US LEC that the Dark Fiber previously deemed available by BellSouth is wanted for use by US LEC. This includes identification of appropriate connection points (e.g., Light Guide Interconnection (LGX) or splice points) to enable US LEC to connect or splice US LEC provided transmission media (e.g., optical fiber) or equipment to the Dark Fiber.

2.7 Rates

The prices that US LEC shall pay to BellSouth for Network Elements and Other Services are set forth in Exhibit B to this Attachment.

2.8 Operational Support Systems (OSS) Rates

The parties agree that Electronic Interface (EI) costs and manual work done by the LCSC will be recovered on a "per LSR" basis, with an individual LSR identified by its Purchase Order Number (PON). US LEC will be assessed either the manual or mechanized charge for most accepted LSRs submitted to BellSouth. Manually submitted UNE LSRs will not incur the manual LSR charge in states that have a separate UNE manual additive. US LEC will be charged the manual rate for most LSRs submitted by mail, courier, fax, etc. US LEC will be charged the mechanized rate for LSRs submitted over any of the mechanized systems (e.g. LENS, EDI, EDI-PC, and TAG).

- 2.8.1 Bill a single mechanized EI charge for each resale LSR delivered over an electronic interface. This charge recovers the development and expense costs associated with the EIs that are allocated to resale LSR volumes, as well as the manual processing associated with mechanized requests that "fall out" in the LCSC for manual handling.

2.8.2 Cancellation OSS Charge

Bill the same mechanized CLEC EI charge for each UNE LSR delivered over an electronic interface.

2.8.3 Network Elements and Other Services Manual Additive

The Commissions in Alabama, Georgia, Louisiana, Mississippi and South Carolina have ordered incremental manual non-recurring charges 9NRC) for Network Elements and Other Services ordered by means other than one of the interactive interfaces. These ordered Network Elements and Other Services manual additive NRCs will apply in these states, rather than the charge per LSR.

- 2.8.4 Establish a transitional plan to bill the mechanized LSR charge for manual LSRs for CLECs who submit a significant proportion of their total LSR volume on a mechanized basis. This volume threshold will increase each year and be eliminated in 2002. This arrangement may be superseded by BellSouth with an LSR-specific process that would apply the mechanized LSR rate to only those manual LSRs which cannot be submitted over a mechanized system.

- 2.8.4.1 The regional average pricing plan establishes averaged prices that are the same regardless of:

- CLEC EI system used

- Action being requested on the LSR (order, change, deny, restore, cancel, disconnect, etc.)
- Number of supplements or clarifications received
- Number of service orders result from the LSR

2.8.5 Denial/Restoral OSS Charge

In the event US LEC provides a list of customers to be denied and restored, rather than individual LSRs, each location on the list will require a separate PON and, therefore will be billed as one LSR per location.

2.8.6 US LEC will be charged for an accepted LSR that is later canceled by US LEC.

NOTE: Supplements or clarifications to a previously billed LSR will not incur another OSS charge.

2.8.7 At the present time, five states (AL, GA, LA, MS, SC) have a manual NRC additive per element for UNEs. This manual additive supersedes the manual LSR charge for manual UNE LSRs. Until the other four states adopt this methodology, BellSouth proposes that the manual LSR charge apply for manual UNE LSRs in those states.

OPERATIONAL SUPPORT SYSTEMS	AL, GA, LA, MS, SC	FL, KY, NC, TN
OSS Order charge, per LSR received from the CLEC by one of the OSS interactive interfaces/USOC	\$3.50/SOMECH	\$3.50/SOMECH
Incremental charge per LSR received from the CLEC by means other than one of the OSS interactive interfaces/USOC	See applicable rate element	\$19.99/SOMAN

In addition to OSS charges, applicable service order and related charges apply per the tariff.

2.8.8 Threshold Billing Plan

The Parties agree that US LEC will incur the mechanized rate for all LSRs, both mechanized and manual, if the percentage of mechanized LSRs to total LSRs meets or exceeds the threshold percentages shown below:

<u>Year</u>	<u>Ratio: Mechanized/Total LSRs</u>
1999	70%
2000	80%
2001	90%

The threshold plan will be discontinued in 2002.

- 2.8.8.1 BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

3 **Switching**

The negotiated rates, terms and conditions set forth in this Section pertain to the provision of local switching.

3.1 Local Switching

3.1.1 Definition

3.1.1.1 Local Switching is the Network Element that provides the functionality required to connect the appropriate originating lines or trunks wired to the Main Distributing Frame (MDF) or Digital Cross Connect (DSX) panel to a desired terminating line or trunk. Such functionality shall include access to all of the features, functions, and capabilities that the underlying BellSouth switch that is providing such Local Switching function is then capable of providing, including but not limited to: line signaling and signaling software, digit reception, dialed number translations, call screening, routing, recording, call supervision, dial tone, switching, telephone number provisioning, announcements, calling features and capabilities (including call processing), CENTREX, Automatic Call Distributor (ACD), Carrier pre-subscription (e.g. long distance carrier, intraLATA toll), Carrier Identification Code (CIC) portability capabilities, testing and other operational features inherent to the switch and switch software. It also provides access to transport, signaling (ISDN User Part (ISUP)) and Transaction Capabilities Application Part (TCAP), and platforms such as adjuncts, Public Safety Systems (911), operator services, Directory Assistance Services and Advanced Intelligent Network (AIN). Remote Switching Module functionality is included in the Local Switching function. The switching capabilities used will be based on the line side features they support. Local Switching will also be capable of routing local, intraLATA, interLATA, and calls to international customer's preferred carrier; call features (e.g., call forwarding) and CENTREX capabilities. Local Switching, including the ability to route to US LEC's transport facilities, dedicated facilities and systems, shall be unbundled from all other Network Elements, i.e., Operator Systems, Shared Transport, and Dedicated Transport. BellSouth and US LEC shall continue to work with the appropriate industry groups to develop a long-term solution for selective routing.

3.1.1.2 A featureless port is one that has a line port, switching functionality, and an interoffice port. A featured port is a port that includes all features then capable or a number of then capable features specifically requested by US LEC. Any features that are not currently then capable but are

technically feasible through the switch can be requested through the BFR process.

- 3.1.1.3 BellSouth will provide to US LEC selective routing of calls to a requested directory assistance services platform or operator services platform. US LEC customers may use the same dialing arrangements as BellSouth customers, but obtain a US LEC branded service. Rates for selective routing are as set forth in Exhibit B to this Attachment 2.

- 3.1.2 Technical Requirements

- 3.1.2.1 The requirements set forth in this Section apply to Local Switching, but not to the Data Switching function of Local Switching.
- 3.1.2.2 Local Switching shall be equal to or better than the requirements for Local Switching set forth in Telcordia's (formerly BellCore) Local Switching Systems General Requirements (FR-NWT-000064).
- 3.1.2.3 When applicable, BellSouth shall route calls to the appropriate trunk or lines for call origination or termination.
- 3.1.2.4 Subject to Section 12, BellSouth shall route calls on a per line or per screening class basis to (1) BellSouth platforms providing Network Elements or additional requirements (2) Operator Services platforms, (3) Directory Assistance platforms, and (4) Repair Centers. Any other routing requests by US LEC will be made pursuant to the Bona Fide Request Process of Attachment 9.
- 3.1.2.5 BellSouth shall provide unbranded recorded announcements and call progress tones to alert callers of call progress and disposition.
- 3.1.2.6 BellSouth shall activate service for a US LEC customer or network interconnection on any of the Local Switching interfaces. This includes provisioning changes to change a customer from BellSouth's services to US LEC's services without loss of switch feature functionality as defined in this Agreement.
- 3.1.2.7 BellSouth shall perform routine testing (e.g., Mechanized Loop Tests (MLT) and test calls such as 105, 107 and 108 type calls) and fault isolation on a mutually agreed upon schedule.
- 3.1.2.8 BellSouth shall repair and restore any equipment or any other maintainable component that may adversely impact Local Switching.

- 3.1.2.9 BellSouth shall control congestion points such as those caused by radio station call-ins, and network routing abnormalities. All traffic shall be restricted in a non discriminatory manner.
- 3.1.2.10 BellSouth shall perform manual call trace and permit customer originated call trace.
- 3.1.2.11 Special Services provided by BellSouth will include the following:
 - 3.1.2.11.1 Telephone Service Prioritization;
 - 3.1.2.11.2 Related services for handicapped;
 - 3.1.2.11.3 Soft dial tone where required by law; and
 - 3.1.2.11.4 Any other service required by law.
- 3.1.2.12 BellSouth shall provide Switching Service Point (SSP) capabilities and signaling software to interconnect the signaling links destined to the Signaling Transfer Point Switch (STP). These capabilities shall adhere to Telcordia (formerly BellCore) specifications - TCAP (GR-1432-CORE), ISUP (GR-905-CORE), Call Management (GR-1429-CORE), Switched Fractional DS1 (GR-1357-CORE), Toll Free Service (GR-1428-CORE), Calling Name (GR-1597-CORE), Line Information Database (GR-954-CORE), and Advanced Intelligent Network (GR-2863-CORE).
- 3.1.2.13 BellSouth shall provide interfaces to adjuncts through Telcordia (formerly BellCore) standard interfaces. These adjuncts can include, but are not limited to, the Service Circuit Node and Automatic Call Distributors.
- 3.1.2.14 BellSouth shall provide performance data regarding a customer line, traffic characteristics or other measurable elements to US LEC, upon a reasonable request from US LEC. CLEC will pay BellSouth for all costs incurred to provide such performance data through the Business Opportunity Request process.
- 3.1.2.15 BellSouth shall offer Local Switching that provides feature offerings at Parity to those provided by BellSouth to itself or any subsidiary or Affiliate or any other CLEC. Such feature offerings shall include but are not limited to:
 - 3.1.2.15.1 Basic and primary rate ISDN;
 - 3.1.2.15.2 Residential features;

- 3.1.2.15.3 Customer Local Area Signaling Services (CLASS/LASS);
- 3.1.2.15.4 CENTREX (including equivalent administrative capabilities, such as customer accessible reconfiguration and detailed message recording); and
- 3.1.2.15.5 Advanced intelligent network triggers supporting US LEC and BellSouth service applications.
- 3.1.3 BellSouth shall offer to US LEC all AIN triggers in connection with its SMS/SCE offering which are supported by BellSouth for offering AIN-based services. Triggers that are currently available are:
 - 3.1.3.1 Off-Hook Immediate
 - 3.1.3.2 Off-Hook Delay
 - 3.1.3.3 Termination Attempt
 - 3.1.3.4 6/10 Public Office Dialing Plan
 - 3.1.3.5 Feature Code Dialing
 - 3.1.3.6 Customer Dialing Plan
- 3.1.4 When the following triggers are supported by BellSouth, BellSouth will make these triggers available to US LEC:
 - 3.1.4.1 Private EAMF Trunk
 - 3.1.4.2 Shared Interoffice Trunk (EAMF, SS7)
 - 3.1.4.3 N11
 - 3.1.4.4 Automatic Route Selection
- 3.1.5 Where capacity exists, BellSouth shall assign each US LEC customer line the class of service designated by US LEC (e.g., using line class codes or other switch specific provisioning methods), and shall route directory assistance calls from US LEC customers to US LEC directory assistance operators at US LEC's option.
- 3.1.6 Where capacity exists, BellSouth shall assign each US LEC customer line the class of services designated by US LEC (e.g., using line class codes or other switch specific provisioning methods) and shall route operator

calls from US LEC customers to US LEC operators at US LEC's option. For example, BellSouth may translate 0- and 0+ intraLATA traffic, and route the call through appropriate trunks to an US LEC Operator Services Position System (OSPS). Calls from Local Switching must pass the ANI-II digits unchanged.

- 3.1.7 Local Switching shall be offered in accordance with the requirements of the following technical references:
 - 3.1.7.1 Telcordia (formerly BellCore) GR-1298-CORE, AIN Switching System Generic Requirements, as implemented in BellSouth's switching equipment;
 - 3.1.7.2 Telcordia (formerly BellCore) GR-1299-CORE, AIN Switch-Service Control Point (SCP)/Adjunct Interface Generic Requirements;
 - 3.1.7.3 Telcordia (formerly BellCore) TR-NWT-001284, AIN 0.1 Switching System Generic Requirements;
 - 3.1.7.4 Telcordia (formerly BellCore) SR-NWT-002247, AIN Release 1 Update.
- 3.1.8 Interface Requirements
 - 3.1.8.1 BellSouth shall provide the following interfaces to loops:
 - 3.1.8.2 Standard Tip/Ring interface including loopstart or groundstart, on-hook signaling (e.g., for calling number, calling name and message waiting lamp);
 - 3.1.8.3 Coin phone signaling;
 - 3.1.8.4 Basic Rate Interface ISDN adhering to appropriate Telcordia (formerly BellCore) Technical Requirements;
 - 3.1.8.5 Two-wire analog interface to PBX;
 - 3.1.8.6 Four-wire analog interface to PBX;
 - 3.1.8.7 Four-wire DS1 interface to PBX or customer provided equipment (e.g. computers and voice response systems);
 - 3.1.8.8 Primary Rate ISDN to PBX adhering to ANSI standards Q.931, Q.932 and appropriate Telcordia (formerly BellCore) Technical Requirements;

- 3.1.8.9 Switched Fractional DS1 with capabilities to configure Nx64 channels (where N = 1 to 24); and
- 3.1.8.10 Loops adhering to Telcordia (formerly BellCore) TR-NWT-08 and TR-NWT-303 specifications to interconnect Digital Loop Carriers.
- 3.1.8.11 BellSouth shall provide access to the following but not limited to:
- 3.1.8.12 SS7 Signaling Network or Multi-Frequency trunking if requested by US LEC;
- 3.1.8.13 Interface to US LEC operator services systems or Operator Services through appropriate trunk interconnections for the system; and
- 3.1.8.14 Interface to US LEC directory assistance services through the US LEC switched network or to Directory Assistance Services through the appropriate trunk interconnections for the system; and 950 access or other US LEC required access to interexchange carriers as requested through appropriate trunk interfaces.

3.2 Tandem Switching

3.2.1 Definition

Tandem Switching is the function that establishes a communications path between two switching offices through a third switching office (the Tandem switch).

3.2.2 Technical Requirements

- 3.2.2.1 Tandem Switching shall have the same capabilities or equivalent capabilities as those described in Bell Communications Research TR-TSY-000540 Issue 2R2, Tandem Supplement, 6/1/90. The requirements for Tandem Switching include, but are not limited to the following:
 - 3.2.2.1.1 Tandem Switching shall provide signaling to establish a tandem connection;
 - 3.2.2.1.2 Tandem Switching will provide screening as jointly agreed to by US LEC and BellSouth;
 - 3.2.2.1.3 Tandem Switching shall provide Advanced Intelligent Network triggers supporting AIN features where such routing is not available from the

originating end office switch, to the extent such Tandem switch has such capability;

- 3.2.2.1.4 Tandem Switching shall provide access to Toll Free number portability database as designated by US LEC;
- 3.2.2.1.5 Tandem Switching shall provide all trunk interconnections discussed under the "Network Interconnection" section (e.g., SS7, MF, DTMF, DialPulse, PRI-ISDN, DID, and CAMA-ANI (if appropriate for 911));
- 3.2.2.1.6 Tandem Switching shall provide connectivity to PSAPs where 911 solutions are deployed and the tandem is used for 911; and
- 3.2.2.1.7 Where appropriate, Tandem Switching shall provide connectivity to transit traffic to and from other carriers.
- 3.2.2.2 Tandem Switching shall accept connections (including the necessary signaling and trunking interconnections) between end offices, other tandems, IXCs, ICOs, CAPs and CLEC switches.
- 3.2.2.3 Tandem Switching shall provide local tandeming functionality between two end offices including two offices belonging to different CLEC's (e.g., between a CLEC end office and the end office of another CLEC).
- 3.2.2.4 Tandem Switching shall preserve CLASS/LASS features and Caller ID as traffic is processed.
- 3.2.2.5 Tandem Switching shall record billable events and send them to the area billing centers designated by US LEC. Tandem Switching will provide recording of all billable events as jointly agreed to by US LEC and BellSouth.
- 3.2.2.6 Upon a reasonable request from US LEC, BellSouth shall perform routine testing and fault isolation on the underlying switch that is providing Tandem Switching and all its interconnections. The results and reports of the testing shall be made immediately available to US LEC.
- 3.2.2.7 BellSouth shall maintain US LEC's trunks and interconnections associated with Tandem Switching at least at Parity to its own trunks and interconnections.
- 3.2.2.8 BellSouth shall control congestion points and network abnormalities. All traffic will be restricted in a non discriminatory manner.

- 3.2.2.9 Selective Call Routing through the use of line class codes is not available through the use of tandem switching. Selective Call Routing through the use of line class codes is an end office capability only. Detailed primary and overflow routing plans for all interfaces available within BellSouth switching network shall be mutually agreed to by US LEC and BellSouth.
- 3.2.2.10 Tandem Switching shall process originating toll-free traffic received from US LEC local switch.
- 3.2.2.11 In support of AIN triggers and features, Tandem Switching shall provide SSP capabilities when these capabilities are not available from the Local Switching Network Element, to the extent such Tandem Switch has such capability.
- 3.2.3 Interface Requirements
- 3.2.3.1 Tandem Switching shall provide interconnection to the E911 PSAP where the underlying Tandem is acting as the E911 Tandem.
- 3.2.3.2 Tandem Switching shall interconnect, with direct trunks, to all carriers with which BellSouth interconnects.
- 3.2.3.3 BellSouth shall provide all signaling necessary to provide Tandem Switching with no loss of feature functionality.
- 3.2.3.4 Tandem Switching shall interconnect with US LEC's switch, using two-way trunks, for traffic that is transiting via BellSouth network to interLATA or intraLATA carriers. At US LEC's request, Tandem Switching shall record and keep records of traffic for billing.
- 3.2.3.5 Tandem Switching shall provide an alternate final routing pattern for US LEC traffic overflowing from direct end office high usage trunk groups.
- 3.2.4 Tandem Switching shall meet or exceed (i.e., be more favorable to US LEC) each of the requirements for Tandem Switching set forth in the following technical references:
 - 3.2.4.1 Bell Communications Research TR-TSY-000540 Issue 2R2, Tandem Supplement, 6/1/90;
 - 3.2.4.2 GR-905-CORE covering CCSNIS;

- 3.2.4.3 GR-1429-CORE for call management features; and
GR-2863-CORE and Telcordia (formerly BellCore) GR-2902-CORE
covering CCS AIN interconnection

3.3 Rates

The prices that US LEC shall pay to BellSouth for Network Elements and Other Services are set forth in Exhibit B to this Attachment.

3.4 Operational Support Systems (OSS) Rates

The parties agree that Electronic Interface (EI) costs and manual work done by the LCSC will be recovered on a "per LSR" basis, with an individual LSR identified by its Purchase Order Number (PON). US LEC will be assessed either the manual or mechanized charge for most accepted LSRs submitted to BellSouth. Manually submitted UNE LSRs will not incur the manual LSR charge in states that have a separate UNE manual additive. US LEC will be charged the manual rate for most LSRs submitted by mail, courier, fax, etc. US LEC will be charged the mechanized rate for LSRs submitted over any of the mechanized systems (e.g. LENS, EDI, EDI-PC, and TAG).

- 3.4.1 Bill a single mechanized EI charge for each resale LSR delivered over an electronic interface. This charge recovers the development and expense costs associated with the EIs that are allocated to resale LSR volumes, as well as the manual processing associated with mechanized requests that "fall out" in the LCSC for manual handling.

3.4.2 Cancellation OSS Charge

Bill the same mechanized CLEC EI charge for each UNE LSR delivered over an electronic interface.

3.4.3 Network Elements and Other Services Manual Additive

The Commissions in Alabama, Georgia, Louisiana, Mississippi and South Carolina have ordered incremental manual non-recurring charges (NRC) for Network Elements and Other Services ordered by means other than one of the interactive interfaces. These ordered Network Elements and Other Services manual additive NRCs will apply in these states, rather than the charge per LSR.

3.4.4 Establish a transitional plan to bill the mechanized LSR charge for manual LSRs for CLECs who submit a significant proportion of their total LSR volume on a mechanized basis. This volume threshold will increase each year and be eliminated in 2002. This arrangement may be superseded by BellSouth with an LSR-specific process that would apply the mechanized LSR rate to only those manual LSRs which cannot be submitted over a mechanized system.

3.4.4.1 The regional average pricing plan establishes averaged prices that are the same regardless of:

- CLEC EI system used
- Action being requested on the LSR (order, change, deny, restore, cancel, disconnect, etc.)
- Number of supplements or clarifications received
- Number of service orders result from the LSR

3.4.5 Denial/Restoral OSS Charge

In the event US LEC provides a list of customers to be denied and restored, rather than individual LSRs, each location on the list will require a separate PON and, therefore will be billed as one LSR per location.

3.4.6 US LEC will be charged for an accepted LSR that is later canceled by the US LEC.

NOTE: Supplements or clarifications to a previously billed LSR will not incur another OSS charge.

3.4.7 At the present time, five states (AL, GA, LA, MS, SC) have a manual NRC additive per element for UNEs. This manual additive supersedes the manual LSR charge for manual UNE LSRs. Until the other four states adopt this methodology, BellSouth proposes that the manual LSR charge apply for manual UNE LSRs in those states.

OPERATIONAL SUPPORT SYSTEMS	AL, GA, LA, MS, SC	FL, KY, NC, TN
OSS Order charge, per LSR received from the CLEC by one of the OSS interactive interfaces/USOC	\$3.50/SOMECH	\$3.50/SOMECH

Incremental charge per LSR received from the CLEC by means other than one of the OSS interactive interfaces/USOC	See applicable rate element	\$19.99/SOMAN
--	-----------------------------	---------------

In addition to OSS charges, applicable service order and related charges apply per the tariff.

3.4.8 Threshold Billing Plan

The Parties agree that US LEC will incur the mechanized rate for all LSRs, both mechanized and manual, if the percentage of mechanized LSRs to total LSRs meets or exceeds the threshold percentages shown below:

<u>Year</u>	<u>Ratio: Mechanized/Total LSRs</u>
2002	70%
2003	80%
2004	90%

The threshold plan will be discontinued in 2002.

- 3.4.8.1 BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

4 Transport and Dark Fiber

The negotiated rates, terms and conditions set forth in this Section pertain to the provision of unbundled transport and dark fiber.

4.1 Transport

4.1.1 Definition of Common (Shared) Transport

Common (Shared) Transport is an interoffice transmission path between two BellSouth end-offices, a BellSouth end-office and a local tandem, or between two local tandems. Where BellSouth Network Elements are connected by intra-office wiring, such wiring is provided as a part of the Network Elements and is not Common (Shared) Transport. Common (Shared) Transport consists of BellSouth inter-office transport facilities and is unbundled from local switching.

4.1.2 Technical Requirements of Common (Shared) Transport

4.1.2.1 Common (Shared) Transport provided on DS1 or VT1.5 circuits, shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for Central Office to Central Office ("CO to CO") connections in the appropriate industry standards.

4.1.2.2 Common (Shared) Transport provided on DS3 circuits, STS-1 circuits, and higher transmission bit rate circuits, shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for CO to CO connections in the appropriate industry standards.

4.1.2.3 BellSouth shall be responsible for the engineering, provisioning, and maintenance of the underlying equipment and facilities that are used to provide Common (Shared) Transport.

4.1.2.4 At a minimum, Common (Shared) Transport shall meet all of the requirements set forth in the following technical references (as applicable for the transport technology being used):

4.1.2.4.1 ANSI T1.101-1994, American National Standard for Telecommunications - Synchronization Interface Standard Performance and Availability;

4.1.2.4.2 ANSI T1.102-1993, American National Standard for Telecommunications - Digital Hierarchy - Electrical Interfaces;

- 4.1.2.4.3 ANSI T1.102.01-199x, American National Standard for Telecommunications - Digital Hierarchy - VT1.5;
- 4.1.2.4.4 ANSI T1.105-1995, American National Standard for Telecommunications - Synchronous Optical Network (SONET) - Basic Description including Multiplex Structure, Rates and Formats;

4.2 Dedicated Transport

4.2.1 Definitions

- 4.2.1.1 Dedicated Transport is defined as BellSouth transmission facilities dedicated to a particular customer or carrier that provide telecommunications between wire centers owned by BellSouth or requesting telecommunications carriers, or between switches owned by BellSouth or requesting telecommunications carriers.

4.2.1.2 Unbundled Local Channel

The Unbundled Local Channel is the dedicated transmission path between US LEC's Point of Presence and the BellSouth Serving Wire Center.

4.2.1.3 Unbundled Interoffice Channel

The Unbundled Interoffice Channel is the dedicated transmission path that provides telecommunications between two BellSouth offices.

- 4.2.2 BellSouth shall offer Dedicated Transport in each of the following ways:

- 4.2.3 As capacity on a shared facility.

- 4.2.4 As a circuit (e.g., DS0, DS1 or DS3) dedicated to US LEC.

- 4.2.5 When Dedicated Transport is provided as a system it shall include:

- 4.2.5.1 Transmission equipment such as multiplexers, line terminating equipment, amplifiers, and regenerators;

- 4.2.5.2 Inter-office transmission facilities such as optical fiber, copper twisted pair, and coaxial cable.

- 4.2.6 Rates for Dedicated Transport are listed in this Attachment. For those states that do not contain rates in this Attachment the rates in the applicable State Access Tariff will apply as interim rates. When final rates

are developed, these interim rates will be subject to true-up and the Parties will amend the Agreement to reflect the new rates.

4.2.7 Technical Requirements

This Section sets forth technical requirements for all Dedicated Transport.

- 4.2.7.1 When BellSouth provides Dedicated Transport as a circuit or a system, the entire designated transmission circuit or system (e.g., DS0, DS1, DS3) shall be dedicated to US LEC designated traffic.
- 4.2.7.2 BellSouth shall offer Dedicated Transport in all technologies that become available including, but not limited to, DS1 and DS3 transport systems, SONET (or SDH) Bi-directional Line Switched Rings, SONET (or SDH) Unidirectional Path Switched Rings, and SONET (or SDH) point-to-point transport systems (including linear add-drop systems), at all available transmission bit rates. While SONET Ring facilities are not available in every application, they are typically available in the major metropolitan areas.
- 4.2.7.3 For DS1 or VT1.5 circuits, Dedicated Transport shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for Customer Interface to Central Office ("CI to CO") connections in the appropriate industry standards.
- 4.2.7.4 Where applicable, for DS3 circuits, Dedicated Transport shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for CI to CO connections in the appropriate industry standards.
- 4.2.7.5 BellSouth shall offer the following interface transmission rates for Dedicated Transport:
 - 4.2.7.6 DS0 Equivalent;
 - 4.2.7.7 DS1 (Extended SuperFrame - ESF, D4, and unframed applications shall be provided);
 - 4.2.7.8 DS3 where applicable (C-bit Parity, M13, and unframed applications shall be provided);
 - 4.2.7.9 SDH Standard interface rates in accordance with International Telecommunications Union (ITU) Recommendation G.707 and

Plesiochronous Digital Hierarchy (PDH) rates per ITU Recommendation G.704.

- 4.2.7.10 When Dedicated Transport is provided as a system, BellSouth shall design the system according to our network infrastructure to allow for the termination points specified by US LEC.
- 4.2.7.11 At a minimum, Dedicated Transport shall meet each of the requirements set forth in the following technical references:
- 4.2.7.12 ANSI T1.231-1993 -American National Standard for Telecommunications - Digital Hierarchy - Layer 1 In-Service Digital Transmission performance monitoring.
- 4.2.7.13 ANSI T1.102-1993, American National Standard for Telecommunications - Digital Hierarchy - Electrical Interfaces;
- 4.2.7.14 ANSI T1.106-1988, American National Standard for Telecommunications - Digital Hierarchy - Optical Interface Specifications (Single Mode);
- 4.2.7.15 ANSI T1.107-1988, American National Standard for Telecommunications - Digital Hierarchy - Formats Specifications;
- 4.2.7.16 ANSI T1.107a-1990 - American National Standard for Telecommunications - Digital Hierarchy - Supplement to Formats Specifications (DS3 Format Applications);
- 4.2.7.16 ANSI T1.107b-1991 - American National Standard for Telecommunications - Digital Hierarchy - Supplement to Formats Specifications;
- 4.2.7.17 Telcordia (formerly BellCore) FR-440 and TR-NWT-000499, Transport Systems Generic Requirements (TSGR): Common Requirements;
- 4.2.7.18 Telcordia (formerly BellCore) GR-820-CORE, Generic Transmission Surveillance: DS1 & DS3 Performance;
- 4.2.7.19 Telcordia (formerly BellCore) TR-NWT 000507, Transmission, Section 7, Issue 5 (Telcordia (formerly BellCore), December 1993). (A module of LSSGR, FR-NWT-000064.);
- 4.2.7.20 Telcordia (formerly BellCore) TR-INS-000342, High-Capacity Digital Special Access Service-Transmission Parameter Limits and Interface Combinations, Issue 1 February 1991;

4.2.7.21 Telcordia (formerly BellCore) ST-TEC 000052, Telecommunications Transmission Engineering Textbook, Volume 2: Facilities, Third Edition, Issue I May 1989;

4.2.7.22 Telcordia (formerly BellCore) ST-TEC-000051, Telecommunications Transmission Engineering Textbook Volume 1: Principles, Third Edition. Issue 1 August 1987;

4.3 DARK FIBER

4.3.1 BellSouth agrees to offer access to Dark Fiber pursuant to the terms and conditions following and at the rates set forth in this Attachment. In Georgia, BellSouth is not required to construct the fiber if it is not available. In Kentucky, if BellSouth has plans to use the fiber in a three year planning period, there is no requirement to provide it. In all other states, BellSouth is not required to place the fibers if there are no fibers available. The Parties agree that Dark Fiber will be used in the provisioning of local service or for other uses permitted under applicable law.

4.3.1.1 Dark Fiber is unused strands of optical fiber. It may be strands of optical fiber existing in aerial or underground structure. No line terminating elements terminated to such strands to operationalize its transmission capabilities will be available. No regeneration or optical amplification will be included with this element. All strands of Dark Fiber shall be provisioned with connectors installed at each end.

4.3.2 Requirements

4.3.2.1 BellSouth shall make available Dark Fiber where it exists in BellSouth's network and where, as a result of future building or deployment, it becomes available. BellSouth shall offer all Dark Fiber to US LEC pursuant to the prices set forth in this Attachment.

4.3.2.2 US LEC may test the quality of the Dark Fiber to confirm its usability and performance specifications.

4.3.2.3 BellSouth shall use its best efforts to provide to US LEC information regarding the location, availability and performance of Dark Fiber within ten (10) business days for a records based answer and twenty (20) business days for a field based answer, after receiving a request from US LEC ("Request"). Within such time period, BellSouth shall send written confirmation of availability of the Dark Fiber ("Confirmation").

- 4.3.2.4 BellSouth shall use its best efforts to make Dark Fiber available to US LEC within thirty (30) business days after it receives written confirmation from US LEC that the Dark Fiber previously deemed available by BellSouth is wanted for use by US LEC. This includes identification of appropriate connection points (e.g., Light Guide Interconnection (LGX) or splice points) to enable US LEC to connect or splice US LEC provided transmission media (e.g., optical fiber) or equipment to the Dark Fiber.

4.4 Rates

The prices that US LEC shall pay to BellSouth for Network Elements and Other Services are set forth in Exhibit B to this Attachment.

4.5 Operational Support Systems (OSS) Rates

The parties agree that Electronic Interface (EI) costs and manual work done by the LCSC will be recovered on a "per LSR" basis, with an individual LSR identified by its Purchase Order Number (PON). US LEC will be assessed either the manual or mechanized charge for most accepted LSRs submitted to BellSouth. Manually submitted UNE LSRs will not incur the manual LSR charge in states that have a separate UNE manual additive. US LEC will be charged the manual rate for most LSRs submitted by mail, courier, fax, etc. US LEC will be charged the mechanized rate for LSRs submitted over any of the mechanized systems (e.g. LENS, EDI, EDI-PC, and TAG).

- 4.5.1 Bill a single mechanized EI charge for each resale LSR delivered over an electronic interface. This charge recovers the development and expense costs associated with the EIs that are allocated to resale LSR volumes, as well as the manual processing associated with mechanized requests that "fall out" in the LCSC for manual handling.

4.5.2 Cancellation OSS Charge

Bill the same mechanized CLEC EI charge for each UNE LSR delivered over an electronic interface.

4.5.3 Network Elements and Other Services Manual Additive

The Commissions in Alabama, Georgia, Louisiana, Mississippi and South Carolina have ordered incremental manual non-recurring charges (NRC) for Network Elements and Other Services ordered by means other than one of the interactive interfaces. These ordered Network Elements and

Other Services manual additive NRCs will apply in these states, rather than the charge per LSR.

4.5.4 Establish a transitional plan to bill the mechanized LSR charge for manual LSRs for CLECs who submit a significant proportion of their total LSR volume on a mechanized basis. This volume threshold will increase each year and be eliminated in 2002. This arrangement may be superseded by BellSouth with an LSR-specific process that would apply the mechanized LSR rate to only those manual LSRs which cannot be submitted over a mechanized system.

4.5.4.1 The regional average pricing plan establishes averaged prices that are the same regardless of:

- CLEC EI system used
- Action being requested on the LSR (order, change, deny, restore, cancel, disconnect, etc.)
- Number of supplements or clarifications received
- Number of service orders result from the LSR

4.5.5 Denial/Restoral OSS Charge

In the event US LEC provides a list of customers to be denied and restored, rather than individual LSRs, each location on the list will require a separate PON and, therefore will be billed as one LSR per location.

4.5.6 US LEC will be charged for an accepted LSR that is later canceled by the US LEC.

NOTE: Supplements or clarifications to a previously billed LSR will not incur another OSS charge.

4.5.7 At the present time, five states (AL, GA, LA, MS, SC) have a manual NRC additive per element for UNEs. This manual additive supersedes the manual LSR charge for manual UNE LSRs. Until the other four states adopt this methodology, BellSouth proposes that the manual LSR charge apply for manual UNE LSRs in those states.

OPERATIONAL SUPPORT SYSTEMS	AL, GA, LA, MS, SC	FL, KY, NC, TN
OSS Order charge, per LSR received from the CLEC by one of the OSS interactive interfaces/USOC	\$3.50/SOMEK	\$3.50/SOMEK
Incremental charge per LSR received from the CLEC by means other than one of the OSS interactive interfaces/USOC	See applicable rate element	\$19.99/SOMAN

In addition to OSS charges, applicable service order and related charges apply per the tariff.

4.5.8 Threshold Billing Plan

The Parties agree that US LEC will incur the mechanized rate for all LSRs, both mechanized and manual, if the percentage of mechanized LSRs to total LSRs meets or exceeds the threshold percentages shown below:

<u>Year</u>	<u>Ratio: Mechanized/Total LSRs</u>
2005	70%
2006	80%
2007	90%

The threshold plan will be discontinued in 2002.

- 4.5.8.1 BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

5 Line Information Database (LIDB)

BellSouth will store in its LIDB only records relating to service in the BellSouth region. The LIDB Storage Agreement is included in this Attachment.

5.1 Definition

The Line Information Database (LIDB) is a transaction-oriented database accessible through Common Channel Signaling (CCS) networks. It contains records associated with customer Line Numbers and Special Billing Numbers. LIDB accepts queries from other Network Elements and provides appropriate responses. The query originator need not be the owner of LIDB data. LIDB queries include functions such as screening billed numbers that provides the ability to accept Collect or Third Number Billing calls and validation of Telephone Line Number based non-proprietary calling cards. The interface for the LIDB functionality is the interface between BellSouth CCS network and other CCS networks. LIDB also interfaces to administrative systems.

5.2 Technical Requirements

BellSouth will offer to US LEC any additional capabilities that are developed for LIDB during the life of this Agreement.

- 5.2.1 BellSouth shall process US LEC's Customer records in LIDB at least at Parity with BellSouth customer records, with respect to other LIDB functions. BellSouth shall indicate to US LEC what additional functions (if any) are performed by LIDB in the BellSouth network.
- 5.2.2 Within two (2) weeks after a request by US LEC, BellSouth shall provide US LEC with a list of the customer data items which US LEC would have to provide in order to support each required LIDB function. The list shall indicate which data items are essential to LIDB function, and which are required only to support certain services. For each data item, the list shall show the data formats, the acceptable values of the data item and the meaning of those values.
- 5.2.3 BellSouth shall provide LIDB systems for which operating deficiencies that would result in calls being blocked, shall not exceed 30 minutes per year.
- 5.2.4 BellSouth shall provide LIDB systems for which the LIDB function shall be in overload no more than 12 hours per year.

- 5.2.4 All additions, updates and deletions of US LEC data to the LIDB shall be solely at the direction of US LEC. Such direction from US LEC will not be required where the addition, update or deletion is necessary to perform standard fraud control measures (e.g., calling card auto-deactivation).
- 5.2.7 BellSouth shall provide priority updates to LIDB for US LEC data upon US LEC's request (e.g., to support fraud detection), via password-protected telephone card, facsimile, or electronic mail within one hour of notice from the established BellSouth contact.
- 5.2.8 BellSouth shall provide LIDB systems such that no more than 0.01% of US LEC customer records will be missing from LIDB, as measured by US LEC audits. BellSouth will audit US LEC records in LIDB against DBAS to identify record mismatches and provide this data to a designated US LEC contact person to resolve the status of the records and BellSouth will update system appropriately. BellSouth will refer record of mis-matches to US LEC within one business day of audit. Once reconciled records are received back from US LEC, BellSouth will update LIDB the same business day if less than 500 records are received before 1:00PM Central Time. If more than 500 records are received, BellSouth will contact US LEC to negotiate a time frame for the updates, not to exceed three business days.
- 5.2.9 BellSouth shall perform backup and recovery of all of US LEC's data in LIDB including sending to LIDB all changes made since the date of the most recent backup copy, in at least the same time frame BellSouth performs backup and recovery of BellSouth data in LIDB for itself. Currently, BellSouth performs backups of the LIDB for itself on a weekly basis and when a new software release is scheduled, a backup is performed prior to loading the new release.
- 5.2.10 BellSouth shall provide US LEC with LIDB reports of data which are missing or contain errors, as well as any misroute errors, within a reasonable time period, but not to exceed three (3) days if at all possible.
- 5.2.11 BellSouth shall prevent any access to or use of US LEC data in LIDB by BellSouth personnel that are outside of established administrative and fraud control personnel, or by any other party that is not authorized by US LEC in writing.
- 5.2.12 BellSouth shall provide US LEC performance of the LIDB Data Screening function, which allows a LIDB to completely or partially deny specific query originators access to LIDB data owned by specific data owners, for

Customer Data that is part of an NPA-NXX or RAO-0/1XX wholly or partially owned by US LEC at least at parity with BellSouth Customer Data. BellSouth shall obtain from US LEC the screening information associated with LIDB Data Screening of US LEC data in accordance with this requirement. BellSouth currently does not have LIDB Data Screening capabilities. When such capability is available, BellSouth shall offer it to US LEC under the Bona Fide Request process set forth in the General Terms and Conditions of this Agreement until it becomes available as a product offering and then at US LEC's request.

5.2.13 BellSouth shall accept queries to LIDB associated with US LEC customer records, and shall return responses in accordance with industry standards.

5.2.14 BellSouth shall provide mean processing time at the LIDB within 0.50 seconds under normal conditions as defined in industry standards.

5.2.15 BellSouth shall provide processing time at the LIDB within 1 second for 99% of all messages under normal conditions as defined in industry standards.

5.3 Interface Requirements

BellSouth shall offer LIDB in accordance with the requirements of this subsection.

5.3.1 The interface to LIDB shall be in accordance with the technical references contained within.

5.3.2 The CCS interface to LIDB shall be the standard interface described herein.

5.3.3 The LIDB Data Base interpretation of the ANSI-TCAP messages shall comply with the technical reference herein. Global Title Translation shall be maintained in the signaling network in order to support signaling network routing to the LIDB.

5.4 Line Information Database Storage Agreement

The Parties will negotiate in good faith the terms and conditions for a Line Information Database (LIDB) agreement upon request by US LEC. Either Party may seek resolution of any unresolved LIDB terms and conditions for such agreement pursuant to the terms and conditions set forth in

Section 13, Resolution of Dispute, of the General Terms and Conditions to this Agreement.

5.5

Rates

The prices that US LEC shall pay to BellSouth for Network Elements and Other Services contained in this Section 5 are as set forth in Exhibit B to this Attachment 2.

6 Signaling

The negotiated rates, terms and conditions set forth in this Section pertain to the provision of Signaling Transport Services.

- 6.1 BellSouth agrees to offer access to unbundled signaling and access to BellSouth's signaling databases subject to compatibility testing and at the rates set forth in this Attachment. BellSouth may provide mediated access to BellSouth signaling systems and databases. Available signaling elements include signaling links, signal transfer points and service control points. Signaling functionality will be available with both A-link and B-link connectivity.

6.2 Signal Link Transport

6.2.1 Definition of Signaling Link Transport

Signaling Link Transport is a set of two or four dedicated 56 Kbps. transmission paths between CLEC-designated Signaling Points of Interconnection (SPOI) that provides appropriate physical diversity.

6.2.2 Technical Requirements

- 6.2.2.1 Signaling Link Transport shall consist of full duplex mode 56 kbps transmission paths.
- 6.2.2.2 Of the various options available, Signaling Link Transport shall perform in the following two ways:
- 6.2.2.2.1 As an "A-link" which is a connection between a switch or SCP and a home Signaling Transfer Point Switch (STP) pair; and
- 6.2.2.2.2 As a "B-link" which is a connection between two STP pairs in different company networks (e.g., between two STP pairs for two Competitive Local Exchange Carriers (CLECs)).
- 6.2.2.3 Signaling Link Transport shall consist of two or more signaling link layers as follows:
- 6.2.2.3.1 An A-link layer shall consist of two links.
- 6.2.2.3.2 A B-link layer shall consist of four links.
- 6.2.2.2.4 A signaling link layer shall satisfy a performance objective such that:

6.2.2.4.1 There shall be no more than two minutes down time per year for an A-link layer; and

6.2.2.4.2 There shall be negligible (less than 2 seconds) down time per year for a B-link layer.

6.2.2.5 A signaling link layer shall satisfy interoffice and intraoffice diversity of facilities and equipment, such that:

6.2.2.5.1 No single failure of facilities or equipment causes the failure of both links in an A-link layer (i.e., the links should be provided on a minimum of two separate physical paths end-to-end); and

6.2.2.5.2 No two concurrent failures of facilities or equipment shall cause the failure of all four links in a B-link layer (i.e., the links should be provided on a minimum of three separate physical paths end-to-end).

6.2.3 Interface Requirements

6.2.3.1 There shall be a DS1 (1.544 Mbps) interface at the US LEC-designated SPOIs. Each 56 kbps transmission path shall appear as a DS0 channel within the DS1 interface.

6.3 Signaling Transfer Points (STPs)

6.3.1 Definition - Signaling Transfer Points is a signaling network function that includes all of the capabilities provided by the signaling transfer point switches (STPs) and their associated signaling links which enable the exchange of SS7 messages among and between switching elements, database elements and signaling transfer point switches

6.3.2 Technical Requirements

6.3.2.1 STPs shall provide access to Network Elements connected to BellSouth SS7 network. These include:

6.3.2.1.1 BellSouth Local Switching or Tandem Switching;

6.3.2.1.2 BellSouth Service Control Points/DataBases;

6.3.2.1.3 Third-party local or tandem switching;

6.3.2.1.4 Third-party-provided STPs.

- 6.3.2.2 The connectivity provided by STPs shall fully support the functions of all other Network Elements connected to BellSouth SS7 network. This explicitly includes the use of BellSouth SS7 network to convey messages which neither originate nor terminate at a signaling end point directly connected to BellSouth SS7 network (*i.e.*, transient messages). When BellSouth SS7 network is used to convey transient messages, there shall be no alteration of the Integrated Services Digital Network User Part (ISDNUP) or Transaction Capabilities Application Part (TCAP) user data that constitutes the content of the message.
- 6.3.2.3 If a BellSouth tandem switch routes calling traffic, based on dialed or translated digits, on SS7 trunks between an US LEC local switch and third party local switch, BellSouth SS7 network shall convey the TCAP messages that are necessary to provide Call Management features (Automatic Callback, Automatic Recall, and Screening List Editing) between US LEC local STPs and the STPs that provide connectivity with the third party local switch, even if the third party local switch is not directly connected to BellSouth STPs.
- 6.3.2.4 STPs shall provide all functions of the MTP as defined in Telcordia (formerly BellCore) ANSI Interconnection Requirements. This includes:
- 6.3.2.4.1 Signaling Data Link functions, as defined in Telcordia (formerly BellCore) ANSI Interconnection Requirements,
- 6.3.2.4.2 Signaling Link functions, as defined in Telcordia (formerly BellCore) ANSI Interconnection Requirements, and
- 6.3.2.4.3 Signaling Network Management functions, as defined in Telcordia (formerly BellCore) ANSI Interconnection Requirements.
- 6.3.2.5 STPs shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service, as defined in Telcordia (formerly BellCore) ANSI Interconnection Requirements. In particular, this includes Global Title Translation (GTT) and SCCP Management procedures, as specified in T1.112.4. In cases where the destination signaling point is a US LEC or third party local or tandem switching system directly connected to BellSouth SS7 network, BellSouth shall perform final GTT of messages to the destination and SCCP Subsystem Management of the destination. In all other cases, BellSouth shall perform intermediate GTT of messages to a gateway pair of STPs in an SS7 network connected with BellSouth SS7 network, and shall not perform SCCP Subsystem Management of the destination. If BellSouth performs final GTT to a US LEC database, then

US LEC agrees to provide BellSouth with the Destination Point Code for the US LEC database.

- 6.3.2.6 STPs shall provide on a non-discriminatory basis all functions of the OMAP commonly provided by STPs, as specified in the reference in Section 12.4.5 of this Attachment. All OMAP functions will be on a "where available" basis and can include:
 - 6.3.2.6.1 MTP Routing Verification Test (MRVT) and
 - 6.3.2.6.2 SCCP Routing Verification Test (SRVT).
- 6.3.2.7 In cases where the destination signaling point is a BellSouth local or tandem switching system or database, or is a US LEC or third party local or tandem switching system directly connected to the BellSouth SS7 network, STPs shall perform MRVT and SRVT to the destination signaling point. In all other cases, STPs shall perform MRVT and SRVT to a gateway pair of STPs in an SS7 network connected with the BellSouth SS7 network. This requirement shall be superseded by the specifications for Internetwork MRVT and SRVT if and when these become approved ANSI standards and available capabilities of BellSouth STPs, and if mutually agreed upon by US LEC and BellSouth.
- 6.3.2.8 STPs shall be on parity with BellSouth.
- 6.3.2.9 SS7 Advanced Intelligent Network (AIN) Access
 - 6.3.2.9.1 When technically feasible and upon request by US LEC, SS7 Access shall be made available in association with unbundled switching. SS7 AIN Access is the provisioning of AIN 0.1 triggers in an equipped BellSouth local switch and interconnection of the BellSouth SS7 network with the US LEC SS7 network to exchange TCAP queries and responses with a US LEC SCP.
 - 6.3.2.9.2 SS7 AIN Access shall provide US LEC SCP access to BellSouth local switch in association with unbundled switching via interconnection of BellSouth SS7 and US LEC SS7 Networks. BellSouth shall offer SS7 access through its STPs. If BellSouth requires a mediation device on any part of its network specific to this form of access, BellSouth must route its messages in the same manner. The interconnection arrangement shall result in the BellSouth local switch recognizing the US LEC SCP as at least at Parity with BellSouth's SCP's in terms of interfaces, performance and capabilities.

6.3.3 Interface Requirements

- 6.3.3.1 BellSouth shall provide the following STPs options to connect US LEC or US LEC-designated local switching systems or STPs to BellSouth SS7 network:
- 6.3.3.1.1 An A-link interface from US LEC local switching systems; and,
- 6.3.3.1.2 A B-link interface from US LEC local STPs.
- 6.3.3.2 Each type of interface shall be provided by one or more sets (layers) of signaling links.
- 6.3.3.3 The Signaling Point of Interconnection (SPOI) for each link shall be located at a cross-connect element, such as a DSX-1, in the Central Office (CO) where BellSouth STP is located. There shall be a DS1 or higher rate transport interface at each of the SPOIs. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface. BellSouth shall offer higher rate DS1 signaling for interconnecting US LEC local switching systems or STPs with BellSouth STPs as soon as these become approved ANSI standards and available capabilities of BellSouth STPs. BellSouth and US LEC will work jointly to establish mutually acceptable SPOIs.
- 6.3.3.4 BellSouth CO shall provide intraoffice diversity between the SPOIs and BellSouth STPs, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP. BellSouth and US LEC will work jointly to establish mutually acceptable SPOIs.
- 6.3.3.5 BellSouth shall provide MTP and SCCP protocol interfaces that shall conform to all sections relevant to the MTP or SCCP in the following specifications:
- 6.3.3.5.1 Telcordia (formerly BellCore) GR-905-CORE, Common Channel Signaling Network Interface Specification (CCSNIS) Supporting Network Interconnection, Message Transfer Part (MTP), and Integrated Services Digital Network User Part (ISDNUP);
- 6.3.3.5.2 Telcordia (formerly BellCore) GR-1432-CORE, CCS Network Interface Specification (CCSNIS) Supporting Signaling Connection Control Part (SCCP) and Transaction Capabilities Application Part (TCAP).
- 6.3.3.6 Message Screening

- 6.3.3.6.1 BellSouth shall set message screening parameters so as to accept valid messages from US LEC local or tandem switching systems destined to any signaling point within BellSouth's SS7 network where the US LEC switching system has a legitimate signaling relation.
- 6.3.3.6.2 BellSouth shall set message screening parameters so as to pass valid messages from US LEC local or tandem switching systems destined to any signaling point or network accessed through BellSouth's SS7 network where the US LEC switching system has a legitimate signaling relation.
- 6.3.3.6.3 BellSouth shall set message screening parameters so as to accept and pass/send valid messages destined to and from US LEC from any signaling point or network interconnected through BellSouth's SS7 network where the US LEC SCP has a legitimate signaling relation.
- 6.3.4 STPs shall be equal to or better than all of the requirements for STPs set forth in the following technical references:
 - 6.3.4.1 ANSI T1.111-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Message Transfer Part (MTP);
 - 6.3.4.2 ANSI T1.111A-1994 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Message Transfer Part (MTP) Supplement;
 - 6.3.4.3 ANSI T1.112-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Signaling Connection Control Part (SCCP);
 - 6.3.4.4 ANSI T1.115-1990 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Monitoring and Measurements for Networks;
 - 6.3.4.5 ANSI T1.116-1990 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Operations, Maintenance and Administration Part (OMAP);
 - 6.3.4.6 ANSI T1.118-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Intermediate Signaling Network Identification (ISNI);
 - 6.3.4.7 Telcordia (formerly BellCore) GR-905-CORE, Common Channel Signaling Network Interface Specification (CCSNIS) Supporting Network

Interconnection, Message Transfer Part (MTP), and Integrated Services Digital Network User Part (ISDNUP); and

- 6.3.4.8 Telcordia (formerly BellCore) GR-1432-CORE, CCS Network Interface Specification (CCSNIS) Supporting Signaling Connection Control Part (SCCP) and Transaction Capabilities Application Part (TCAP).

6.4 Service Control Points/DataBases

6.4.1 Definition

- 6.4.1.1 Databases are the Network Elements that provide the functionality for storage of, access to, and manipulation of information required to offer a particular service and/or capability. Databases include, but are not limited to: Local Number Portability, LIDB, Toll Free Number Database, Automatic Location Identification/Data Management System, Calling Name Database, access to Service Creation Environment and Service Management System (SCE/SMS) application databases and Directory Assistance.

- 6.4.1.2 A Service Control Point (SCP) is a specific type of Database functionality deployed in a Signaling System 7 (SS7) network that executes service application logic in response to SS7 queries sent to it by a switching system also connected to the SS7 network. Service Management Systems provide operational interfaces to allow for provisioning, administration and maintenance of subscriber data and service application data stored in SCPs.

6.4.2 Technical Requirements for SCPs/Databases

Requirements for SCPs/Databases within this section address storage of information, access to information (e.g. signaling protocols, response times), and administration of information (e.g., provisioning, administration, and maintenance). All SCPs/Databases shall be provided to US LEC in accordance with the following requirements.

- 6.4.2.1 BellSouth shall provide physical access to SCPs through the SS7 network and protocols with TCAP as the application layer protocol.
- 6.4.2.2 BellSouth shall provide physical interconnection to databases via industry standard interfaces and protocols (e.g. SS7, ISDN and X.25).
- 6.4.2.3 The reliability of interconnection options shall be consistent with requirements for diversity and survivability.

6.4.2.4 Database Availability

Call processing databases shall have a maximum unscheduled availability of 30 minutes per year. Unavailability due to software and hardware upgrades shall be scheduled during minimal usage periods and only be undertaken upon proper notification to providers which might be impacted. Any downtime associated with the provision of call processing related databases will impact all service providers, including BellSouth, equally.

6.4.2.5 The operational interface provided by BellSouth shall complete Database transactions (i.e., add, modify, delete) for US LEC customer records stored in BellSouth databases within 3 days, or sooner where BellSouth provisions its own customer records within a shorter interval.

6.4.3 Local Number Portability Database

6.4.3.1 Definition

The Permanent Number Portability (PNP) database supplies routing numbers for calls involving numbers that have been ported from one local service provider to another. PNP is currently being worked in industry forums. The results of these forums will dictate the industry direction of PNP. BellSouth agrees to provide access to the PNP database at rates, terms and conditions as set forth in BellSouth's tariffs and in accordance with an effective FCC or Commission directive.

6.5 SS7 Network Interconnection

6.5.1 Definition

SS7 Network Interconnection is the interconnection of US LEC local Signaling Transfer Point Switches (STP) and US LEC local or tandem switching systems with BellSouth STPs. This interconnection provides connectivity that enables the exchange of SS7 messages among BellSouth switching systems and databases (DBs), US LEC local or tandem switching systems, and other third-party switching systems directly connected to the BellSouth SS7 network.

6.5.2 Technical Requirements

6.5.2.1 SS7 Network Interconnection shall provide connectivity to all components of the BellSouth SS7 network. These include:

6.5.2.1.1 BellSouth local or tandem switching systems;

6.5.2.1.2 BellSouth DBs; and

6.5.2.1.3 Other third-party local or tandem switching systems.

6.5.2.2 The connectivity provided by SS7 Network Interconnection shall fully support the functions of BellSouth switching systems and DBs and US LEC or other third-party switching systems with A-link access to the BellSouth SS7 network.

If traffic is routed based on dialed or translated digits between an US LEC local switching system and a BellSouth or other third-party local switching system, either directly or via a BellSouth tandem switching system, then it is a requirement that the BellSouth SS7 network convey via SS7 Network Interconnection the TCAP messages that are necessary to provide Call Management services (Automatic Callback, Automatic Recall, and Screening List Editing) between the US LEC local STPs and BellSouth or other third-party local switch.

6.5.2.3 When the capability to route messages based on Intermediate Signaling Network Identifier (ISNI) is generally available on BellSouth STPs, the BellSouth SS7 Network shall also convey TCAP messages using SS7 Network Interconnection in similar circumstances where the BellSouth switch routes traffic based on a Carrier Identification Code (CIC).

6.5.2.4 SS7 Network Interconnection shall provide all functions of the MTP as specified in ANSI T1.111. This includes:

6.5.2.4.1 Signaling Data Link functions, as specified in ANSI T1.111.2;

6.5.2.4.2 Signaling Link functions, as specified in ANSI T1.111.3; and

6.5.2.4.3 Signaling Network Management functions, as specified in ANSI T1.111.4.

6.5.2.5 SS7 Network Interconnection shall provide all functions of the SCCP necessary for Class 0 (basic connectionless) service, as specified in ANSI T1.112. In particular, this includes Global Title Translation (GTT) and SCCP Management procedures, as specified in T1.112.4. Where the destination signaling point is a BellSouth switching system or DB, or is another third-party local or tandem switching system directly connected to the BellSouth SS7 network, SS7 Network Interconnection shall include final GTT of messages to the destination and SCCP Subsystem Management of the destination. Where the destination signaling point is an US LEC local or tandem switching system, SS7 Network Interconnection shall include intermediate GTT of messages to a gateway

pair of US LEC local STPs, and shall not include SCCP Subsystem Management of the destination.

- 6.5.2.6 SS7 Network Interconnection shall provide all functions of the Integrated Services Digital Network User Part (ISDNUP), as specified in ANSI T1.113.
- 6.5.2.7 SS7 Network Interconnection shall provide all functions of the TCAP, as specified in ANSI T1.114.
- 6.5.2.8 If and when Internetwork MTP Routing Verification Test (MRVT) and SCCP Routing Verification Test (SRVT) become approved ANSI standards and available capabilities of BellSouth STPs, SS7 Network Interconnection shall provide these functions of the OMAP.
- 6.5.2.9 SS7 Network Interconnection shall be equal to or better than the following performance requirements:
 - 6.5.2.9.1 MTP Performance, as specified in ANSI T1.111.6;
 - 6.5.2.9.2 SCCP Performance, as specified in ANSI T1.112.5; and
 - 6.5.2.9.3 ISDNUP Performance, as specified in ANSI T1.113.5.
- 6.5.1.3 Interface Requirements
 - 6.5.3.1 BellSouth shall offer the following SS7 Network Interconnection options to connect US LEC or US LEC-designated local or tandem switching systems or STPs to the BellSouth SS7 network:
 - 6.5.3.1.1 A-link interface from US LEC local or tandem switching systems; and
 - 6.5.3.1.2 B-link interface from US LEC STPs.
 - 6.5.3.2 The Signaling Point of Interconnection (SPOI) for each link shall be located at a cross-connect element, such as a DSX-1, in the Central Office (CO) where the BellSouth STP is located. There shall be a DS1 or higher rate transport interface at each of the SPOIs. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface. BellSouth shall offer higher rate DS1 signaling links for interconnecting US LEC local switching systems or STPs with BellSouth STPs as soon as these become approved ANSI standards and available capabilities of BellSouth STPs. BellSouth and US LEC will work jointly to establish mutually acceptable SPOI.

- 6.5.3.3 BellSouth CO shall provide intraoffice diversity between the SPOIs and the BellSouth STP, so that no single failure of intraoffice facilities or equipment shall cause the failure of both B-links in a layer connecting to a BellSouth STP. BellSouth and US LEC will work jointly to establish mutually acceptable SPOI.
- 6.5.3.4 The protocol interface requirements for SS7 Network Interconnection include the MTP, ISDNUP, SCCP, and TCAP. These protocol interfaces shall conform to the following specifications:
 - 6.5.3.4.1 Telcordia (formerly BellCore) GR-905-CORE, Common Channel Signaling Network Interface Specification (CCSNIS) Supporting Network Interconnection, Message Transfer Part (MTP), and Integrated Services Digital Network User Part (ISDNUP);
 - 6.5.3.4.2 Telcordia (formerly BellCore) GR-1428-CORE, CCS Network Interface Specification (CCSNIS) Supporting Toll Free Service;
 - 6.5.3.4.3 Telcordia (formerly BellCore) GR-1429-CORE, CCS Network Interface Specification (CCSNIS) Supporting Call Management Services; and
 - 6.5.3.4.4 Telcordia (formerly BellCore) GR-1432-CORE, CCS Network Interface Specification (CCSNIS) Supporting Signaling Connection Control Part (SCCP) and Transaction Capabilities Application Part (TCAP).
- 6.5.3.5 BellSouth shall set message screening parameters to block accept messages from US LEC local or tandem switching systems destined to any signaling point in the BellSouth SS7 network with which the US LEC switching system has a legitimate signaling relation.
- 6.5.4 SS7 Network Interconnection shall be equal to or better than all of the requirements for SS7 Network Interconnection set forth in the following technical references:
 - 6.5.4.1 ANSI T1.110-1992 American National Standard Telecommunications - Signaling System Number 7 (SS7) - General Information;
 - 6.5.4.2 ANSI T1.111-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Message Transfer Part (MTP);
 - 6.5.4.3 ANSI T1.111A-1994 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Message Transfer Part (MTP) Supplement;

- 6.5.4.4 ANSI T1.112-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Signaling Connection Control Part (SCCP);
- 6.5.4.5 ANSI T1.113-1995 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Integrated Services Digital Network (ISDN) User Part;
- 6.5.4.6 ANSI T1.114-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Transaction Capabilities Application Part (TCAP);
- 6.5.4.7 ANSI T1.115-1990 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Monitoring and Measurements for Networks;
- 6.5.4.8 ANSI T1.116-1990 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Operations, Maintenance and Administration Part (OMAP);
- 6.5.4.9 ANSI T1.118-1992 American National Standard for Telecommunications - Signaling System Number 7 (SS7) - Intermediate Signaling Network Identification (ISNI);
- 6.5.4.10 Telcordia (formerly BellCore) GR-905-CORE, Common Channel Signaling Network Interface Specification (CCSNIS) Supporting Network Interconnection, Message Transfer Part (MTP), and Integrated Services Digital Network User Part (ISDNUP);
- 6.5.4.11 Telcordia (formerly BellCore) GR-954-CORE, CCS Network Interface Specification (CCSNIS) Supporting Line Information Database (LIDB) Service;
- 6.5.4.12 Telcordia (formerly BellCore) GR-1428-CORE, CCS Network Interface Specification (CCSNIS) Supporting Toll Free Service;
- 6.5.4.13 Telcordia (formerly BellCore) GR-1429-CORE, CCS Network Interface Specification (CCSNIS) Supporting Call Management Services; and,
- 6.5.4.14 Telcordia (formerly BellCore) GR-1432-CORE, CCS Network Interface Specification (CCSNIS) Supporting Signaling Connection Control Part (SCCP) and Transaction Capabilities Application Part (TCAP).

6.6 Rates

The prices that US LEC shall pay to BellSouth for Signaling and database services set forth in this Section 6 are as set forth in Exhibit B to this Attachment.

7 Operator Call Processing, Inward Operator Services and Directory Assistance Services

7.1 Operator Systems

Definition

Operator Systems is the Network Element that provides operator and automated call handling and billing, special services, customer telephone listings and optional call completion services. The Operator Systems, Network Element provides two types of functions: Operator Service functions and Directory Assistance Service functions, each of which are described in detail below.

7.2 Operator Service

7.2.1 Definition

Operator Service provides: (1) operator handling for call completion (for example, collect, third number billing, and manual credit card calls), (2) operator or automated assistance for billing after the customer has dialed the called number (for example, credit card calls); and (3) special services including but not limited to Busy Line Verification and Emergency Line Interrupt (ELI), Emergency Agency Call, Operator-assisted Directory Assistance, and Rate Quotes.

7.2.2 Requirements

7.2.2.1 When US LEC requests BellSouth to provide Operator Services, the following requirements apply:

7.2.2.1.1 BellSouth shall complete 0+ and 0- dialed local calls.

7.2.2.1.2 BellSouth shall complete 0+ intraLATA toll calls.

7.2.2.1.3 BellSouth shall complete calls that are billed to US LEC customer's calling card that can be validated by BellSouth.

7.2.2.1.4 BellSouth shall complete person-to-person calls.

7.2.2.1.5 BellSouth shall complete collect calls.

7.2.2.1.6 BellSouth shall provide the capability for callers to bill to a third party and complete such calls.

- 7.2.2.1.7 BellSouth shall complete station-to-station calls.
- 7.2.2.1.8 BellSouth shall process emergency calls.
- 7.2.2.1.9 BellSouth shall process Busy Line Verify and Emergency Line Interrupt requests.
- 7.2.2.1.10 BellSouth shall process emergency call trace, as they do for their Customers prior to the Effective Date. Call must originate from a 911 provider.
- 7.2.2.1.11 BellSouth shall process operator-assisted directory assistance calls.
- 7.2.2.2 BellSouth shall adhere to equal access requirements, providing US LEC local customers the same IXC access as provided to BellSouth customers.
- 7.2.2.3 BellSouth shall exercise at least the same level of fraud control in providing Operator Service to US LEC that BellSouth provides for its own operator service.
- 7.2.2.4 BellSouth shall perform Billed Number Screening when handling Collect, Person-to-Person, and Billed-to-Third-Party calls.
- 7.2.2.5 BellSouth shall direct customer account and other similar inquiries to the customer service center designated by US LEC.
- 7.2.2.6 BellSouth shall provide a feed of customer call records in "EMI" format to US LEC in accordance with CLECODUF standards specified in Attachment 7.

7.2.3 Interface Requirements

With respect to Operator Services for calls that originate on local switching capability provided by or on behalf of US LEC, the interface requirements shall conform to the then current established system interface specifications for the platform used to provide Operator Service and the interface shall conform to industry standards.

7.3 Directory Assistance Service

7.3.1 Definition

Directory Assistance Service provides local customer telephone number listings with the option to complete the call at the callers direction separate and distinct from local switching.

7.3.2 Requirements

7.3.2.1 Directory Assistance Service shall provide up to two listing requests per call. If available and if requested by US LEC's customer, BellSouth shall provide caller-optional directory assistance call completion service at rates contained in this Attachment to one of the provided listings, equal to that which BellSouth provides its customers. If not available, US LEC may request such requirement pursuant to the Bona Fide Request Process as set forth in the General Terms and Conditions.

7.3.3 Directory Assistance Service Updates

7.3.3.1 BellSouth shall update customer listings changes daily. These changes include:

7.3.3.2 New customer connections: BellSouth will provide service to US LEC that is equal to the service it provides to itself and its customers;

7.3.3.3 Customer disconnections: BellSouth will provide service to US LEC that is equal to the service it provides to itself and its customers; and

7.3.3.4 Customer address changes: BellSouth will provide service to US LEC that is equal to the service it provides to itself and its customers;

7.3.3.5 These updates shall also be provided for non-listed and non-published numbers for use in emergencies.

7.4 Branding for Operator Call Processing and Directory Assistance

7.4.1 The BellSouth Operator Systems Branding Feature provides a definable announcement to US LEC end users using Directory Assistance (DA)/Operator Call Processing (OCP) prior to placing them in queue or connecting them to an available operator or automated operator system. This feature allows US LEC to have its calls custom branded with US LEC name on whose behalf BellSouth is providing Directory Assistance and/or Operator Call Processing. Rates for Custom Branding, Operator Call Process and Directory Assistance are set forth in this Attachment.

7.4.2 BellSouth offers four service levels of branding to US LEC when ordering Directory Assistance and/or Operator Call Processing:

- 7.4.2.1 Service Level 1 - BellSouth Branding
 - 7.4.2.2 Service Level 2 - Unbranded
 - 7.4.2.3 Service Level 3 - Custom Branding
 - 7.4.2.4 Service Level 4 - Self Branding (applicable only to US LEC for Resale or use with an Unbundled Port when routing to an operator service provider other than BellSouth).
 - 7.4.3 For Resellers and Use with an Unbundled Port
 - 7.4.3.1 BellSouth Branding is the Default Service Level.
 - 7.4.3.2 Unbranding, Custom Branding, and Self Branding require US LEC to order selective routing for each originating BellSouth end office identified by US LEC. Rates for Selective Routing are set forth in this Attachment.
 - 7.4.3.3 Customer Branding and Self Branding require US LEC to order dedicated trunking from each BellSouth end office identified by US LEC, to either the BellSouth Traffic Operator Position System (TOPS) or US LEC Operator Service Provider. Rates for trunks are set forth in applicable BellSouth tariffs.
 - 7.4.3.4 Unbranding - Unbranded Directory Assistance and/or Operator Call Processing calls ride common trunk groups provisioned by BellSouth from those end offices identified by US LEC to the BellSouth TOPS. These calls are routed to "No Announcement."
 - 7.4.4 For Facilities Based Carriers
 - 7.4.4.1 All Service Levels require US LEC to order dedicated trunking from their end office(s) point of interface to the BellSouth TOPS Switches. Rates for trunks are set forth in applicable BellSouth tariffs.
 - 7.4.4.2 Customized Branding includes charges for the recording of the branding announcement and the loading of the audio units in each TOPS Switch, IVS and NAV equipment for which US LEC requires service
- Directory Assistance customized branding uses:
- the recording of the name;
 - the front-end loading of the Digital Recorded Announcement Machine (DRAM) in each TOPS switch.

Operator Call Processing customized branding uses:

- the recording of the name;
- the front-end loading of the DRAM in the TOPS Switch;
- the back-end loading in the audio units in the Automated Alternate Billing System (AABS) in the Interactive Voice Subsystem (IVS);
- the 0- automation loading for the audio units in the Enhanced Billing and Access Service (EBAS) in the Network Applications Vehicle (NAV).

7.4.4.3 BellSouth will provide to US LEC purchasing unbundled local BellSouth switching and reselling BellSouth local exchange service, selective routing of calls to a requested directory assistance services platform or operator services platform. US LEC customers may use the same dialing arrangements as BellSouth customers, but obtain a US LEC branded service.

7.5 Directory Assistance Database Service (DADS)

7.5.1 BellSouth shall make its Directory Assistance Database Service (DADS) available solely for the expressed purpose of providing Directory Assistance type services to US LEC end users. The term "end user" denotes any entity which obtains Directory Assistance type services for its own use from a DADS customer. Directory Assistance type service is defined as Voice Directory Assistance (DA Operator assisted and Electronic Directory Assistance (Data System assisted)). US LEC agrees that DADS will not be used for any purpose which violates federal or state laws, statutes, regulatory orders or tariffs. Except for the permitted users, US LEC agrees not to disclose DADS to others and shall provide due care in providing for the security and confidentiality of DADS. Further, US LEC authorizes the inclusion of US LEC Subscriber listings in the BellSouth Directory Assistance products.

7.5.2 BellSouth shall provide US LEC initially with daily updates which reflect all listing change activity occurring since US LEC's most recent update via magnetic tape, and subsequently using electronic connectivity such as Network Data Mover to be developed mutually by US LEC and BellSouth. US LEC agrees to assume the costs associated with CONNECT: Direct™ connectivity, which will vary depending upon volume and mileage.

7.5.3 BellSouth will require approximately one month after receiving an order to prepare the Base File. BellSouth will provide daily updates which will reflect all listing change activity occurring since US LEC's most recent

update. BellSouth shall provide updates to US LEC on a Business, Residence, or combined Business and Residence basis. US LEC agrees that the updates shall be used solely to keep the information current. Delivery of Daily Updates will commence the day after US LEC receives the Base File.

- 7.5.4 BellSouth is authorized to include US LEC Subscriber List Information in its Directory Assistance Database Service (DADS) and its Directory Publishers Database Service (DPDS). Any other use by BellSouth of US LEC Subscriber List Information is not authorized and with the exception of a request for DADS or DPDS, BellSouth shall refer any request for such information to US LEC.
- 7.5.5 Rates for DADS are as set forth in this Attachment.
- 7.6 Direct Access to Directory Assistance Service
 - 7.6.1 Direct Access to Directory Assistance Service (DADAS) will provide US LEC's directory assistance operators with the ability to search all available BellSouth's subscriber listings using the Directory Assistance search format. Subscription to DADAS will allow US LEC to utilize its own switch, operator workstations and optional audio subsystems.
 - 7.6.2 BellSouth will provide DADAS from its DA location. US LEC will access the DADAS system via a telephone company provided point of availability. US LEC has the responsibility of providing the physical links required to connect to the point of availability. These facilities may be purchased from the telephone company as rates and charges billed separately from the charges associated with this offering.
 - 7.6.3 A specified interface to each US LEC subsystem will be provided by BellSouth. Interconnection between the US LEC system and a specified BellSouth location will be pursuant to the use of US LEC owned or US LEC leased facilities and shall be appropriate sized based upon the volume of queries being generated by US LEC.
 - 7.6.4 The specifications for the three interfaces necessary for interconnection are available in the following documents:
 - 7.6.4.1 DADAS to Subscriber Operator Position System—Northern Telecom Document CSI-2300-07; Universal Gateway/ Position Message Interface Format Specification

- 7.6.4.2 DADAS to Subscriber Switch—Northern Telecom Document Q210-1 Version A107; NTDMS/CCIDAS System Application Protocol; and AT&T Document 250-900-535 Operator Services Position System Listing Service and Application Call Processing Data Link Interface Specification
- 7.6.4.3 DADAS to Audio Subsystem (Optional)—Directory One Call Control to Audio Response Unit system interface specifications are available through Northern Telecom as a licensed access protocol—Northern Telecom Document 355-004424 and Gateway/Interactive Voice subsystem Protocol Specification
- 7.6.5 Rates for DADAS are as set forth in this Attachment.
- 7.7 Automatic Location Identification/Data Management System (ALI/DMS)

The ALI/DMS Database contains customer information (including name, address, telephone information, and sometimes special information from the local service provider or customer) used to determine to which Public Safety Answering Point (PSAP) to route the call. The ALI/DMS database is used to provide more routing flexibility for E911 calls than Basic 911. BellSouth shall provide the Emergency Services Database in accordance with the following:

 - 7.7.1 Technical Requirements
 - 7.7.1.1 BellSouth shall offer US LEC a data link to the ALI/DMS database or permit US LEC to provide its own data link to the ALI/DMS database. BellSouth shall provide error reports from the ALI/DMS database to US LEC immediately after US LEC inputs information into the ALI/DMS database. Alternately, US LEC may utilize BellSouth, to enter customer information into the data base on a demand basis, and validate customer information on a demand basis.
 - 7.7.1.2 The ALI/DMS database shall contain the following customer information:
 - 7.7.1.2.1 Name;
 - 7.7.1.2.2 Address;
 - 7.7.1.2.3 Telephone number; and
 - 7.7.1.2.4 Other information as appropriate (e.g., whether a customer is blind or deaf or has another disability).

- 7.7.1.2.5 BellSouth will release the Master Street Address Guide to US LEC. Each Party will be responsible for ensuring that their respective systems are in compliance with any applicable 9-1-1 protocols.
- 7.7.1.3 When BellSouth is responsible for administering the ALI/DMS database in its entirety, ported number NXXs entries for the ported numbers should be maintained unless US LEC requests otherwise and shall be updated if US LEC requests, provided US LEC supplies BellSouth with the updates.
- 7.7.1.4 When Remote Call Forwarding (RCF) is used to provide number portability to the local customer and a remark or other appropriate field information is available in the database, the shadow or "forwarded-to" number and an indication that the number is ported shall be added to the customer record.
- 7.7.1.5 If BellSouth is responsible for configuring PSAP features (for cases when the PSAP or BellSouth supports an ISDN interface) it shall ensure that CLASS Automatic Recall (Call Return) is not used to call back to the ported number. Although BellSouth currently does not have ISDN interface, BellSouth agrees to comply with this requirement once ISDN interfaces are in place.
- 7.7.2 Interface Requirements
- The interface between the E911 Switch or Tandem and the ALI/DMS database for US LEC customers shall meet industry standards.
- 7.8 Directory Assistance Database
- BellSouth shall make its directory assistance database available to US LEC in order to allow US LEC to provide its customers with the same directory assistance telecommunications services BellSouth provides to BellSouth customers. BellSouth shall provide US LEC with an initial feed via magnetic tape and daily update initially via magnetic tape and subsequently via an electronic gateway to be developed mutually by US LEC and BellSouth of customer address and number changes. Directory Assistance Services must provide both the ported and US LEC telephone numbers to the extent available in BellSouth's database assigned to a customer. Privacy indicators must be properly identified to assure the non-published numbers are accurately identified.
- 7.9 Calling Name (CNAM) Database Service

The agreement for Calling Name (CNAM) with standard pricing is included as Exhibit A to this Attachment. US LEC must provide to its account manager a written request with a requested activation date to activate this service. If US LEC is interested in requesting CNAM with volume and term pricing, US LEC must contact its account manager to request a separate CNAM volume and term agreement.

- 7.10 SCPs/Databases shall be equal to or better than all of the requirements for SCPs/Databases set forth in the following technical references:
 - 7.10.1 GR-246-CORE, Bell Communications Research Specification of Signaling System Number 7, ISSUE 1 (Telcordia (formerly BellCore), December 199);
 - 7.10.2 GR-1432-CORE, CCS Network Interface Specification (CCSNIS) Supporting Signaling Connection Control Part (SCCP) and Transaction Capabilities Application Part (TCAP). (Telcordia (formerly BellCore), March 1994);
 - 7.10.3 GR-954-CORE, CCS Network Interface Specification (CCSNIS) Supporting Line Information Database (LIDB) Service 6, Issue 1, Rev. 1 (Telcordia (formerly BellCore), October 1995);
 - 7.10.4 GR-1149-CORE, OSSGR Section 10: System Interfaces, Issue 1 (Telcordia (formerly BellCore), October 1995) (Replaces TR-NWT-001149);
 - 7.10.5 Telcordia (formerly BellCore) GR-1158-CORE, OSSGR Section 22.3: Line Information Database 6, Issue (Telcordia (formerly BellCore), October 1995);
 - 7.10.6 Telcordia (formerly BellCore) GR-1428-CORE, CCS Network Interface Specification (CCSNIS) Supporting Toll Free Service (Telcordia (formerly BellCore), May 1995); and
 - 7.10.7 BOC Notes on BellSouth Networks, SR-TSV-002275, ISSUE 2, (Telcordia (formerly BellCore), April 1994).
- 7.11 Service Creation Environment and Service Management System (SCE/SMS) Advanced Intelligent Network (AIN) Access.
 - 7.11.1 BellSouth's Service Creation Environment and Service Management System (SCE/SMS) Advanced Intelligent Network (AIN) Access shall provide US LEC the capability that will allow US LEC and other third

parties to create service applications in a BellSouth Service Creation Environment and deploy those applications in a BellSouth SMS to a BellSouth SCP. The third party service applications interact with AIN triggers provisioned on a BellSouth SSP.

- 7.11.2 BellSouth's SCE/SMS AIN Access shall provide access to SCE hardware, software, testing and technical support (e.g., help desk, system administrator) resources available to US LEC. Scheduling procedures shall provide US LEC equivalent priority to these resources
- 7.11.3 BellSouth SCP shall partition and protect US LEC service logic and data from unauthorized access, execution or other types of compromise.
- 7.11.4 When US LEC selects SCE/SMS AIN Access, BellSouth shall provide training, documentation, and technical support to enable US LEC to use BellSouth's SCE/SMS AIN Access to create and administer applications. Training, documentation, and technical support will address use of SCE and SMS access and administrative functions, but will not include support for the creation of a specific service application.
- 7.11.5 When US LEC selects SCE/SMS AIN Access, BellSouth shall provide for a secure, controlled access environment in association with its internal use of AIN components. US LEC access will be provided via remote data connection (e.g., dial-in, ISDN).
- 7.11.6 When US LEC selects SCE/SMS AIN Access, BellSouth shall allow US LEC to download data forms and/or tables to BellSouth SCP via BellSouth SMS without intervention from BellSouth (e.g., service customization and customer subscription).

7.12 Rates

The prices that US LEC shall pay to BellSouth for Network Elements and Other Services set forth in this Section 7 are as set forth in Exhibit B to this Attachment.

8 800 Access Ten Digit Screening Services

The negotiated rates, terms and conditions set forth in this Section pertain to the provisions of 800 Access Ten Digit Screening Services.

8.1 Toll Free Number Database

The Toll Free Number Database is a SCP that provides functionality necessary for toll free (e.g., 800 and 888) number services by providing routing information and additional so-called vertical features during call set-up in response to queries from SSPs. BellSouth shall provide the Toll Free Number Database in accordance with the following:

8.2 Technical Requirements

8.2.1 BellSouth shall make BellSouth Toll Free Number Database available for US LEC to query with a toll-free number and originating information.

8.2.2 The Toll Free Number Database shall return carrier identification and, where applicable, the queried toll free number, translated numbers and instructions as it would in response to a query from a BellSouth switch.

8.2.3 The SCP shall also provide, at US LEC's option, such additional feature as described in SR-TSV-002275 (BOC Notes on BellSouth Networks, SR-TSV-002275, Issue 2, (Telcordia (formerly BellCore), April 1994)) as are available to BellSouth. These may include but are not limited to:

8.2.3.1 Network Management;

8.2.3.2 Customer Sample Collection; and

8.2.3.3 Service Maintenance

8.3 Rates

The prices that US LEC shall pay to BellSouth for Network Elements and Other Services set forth in this Section 8 are as set forth in Exhibit B to this Attachment.

9 Basic 911 and E911

The negotiated rates, terms and conditions set forth in this Section pertain to the provision of Basic 911 and E911.

If US LEC orders Network Elements, then US LEC is also responsible for providing E911 to its end users. BellSouth agrees to offer access to the 911/E911 network pursuant to the following terms and conditions set forth in this Attachment.

9.1 Definition

Basic 911 and E911 is an additional requirement that provides a caller access to the applicable emergency service bureau by dialing a 3-digit universal telephone number (911).

9.2 Requirements

9.2.1 Basic 911 Service Provisioning. For Basic 911 service, BellSouth will provide to US LEC a list consisting of each municipality that subscribes to Basic 911 service. The list will also provide, if known, the E911 conversion date for each municipality and, for network routing purposes, a ten-digit directory number representing the appropriate emergency answering position for each municipality subscribing to 911. US LEC will be required to arrange to accept 911 calls from its end users in municipalities that subscribe to Basic 911 service and translate the 911 call to the appropriate 10-digit directory number as stated on the list provided by BellSouth. US LEC will be required to route that call to BellSouth at the appropriate tandem or end office. When a municipality converts to E911 service, US LEC will be required to discontinue the Basic 911 procedures and begin using E911 procedures.

9.2.2 E911 Service Provisioning. For E911 service, US LEC will be required to install a minimum of two dedicated trunks originating from the US LEC serving wire center and terminating to the appropriate E911 tandem. The dedicated trunks shall be, at a minimum, DS-0 level trunks configured either as a 2-wire analog interface or as part of a digital (1.544 Mb/s) interface. Either configuration shall use CAMA-type signaling with multifrequency ("MF") pulsing that will deliver automatic number identification ("ANI") with the voice portion of the call. If the user interface is digital, MF pulses, as well as other AC signals, shall be encoded per the u-255 Law convention. US LEC will be required to provide BellSouth daily updates to the E911 database. US LEC will be required to forward 911

calls to the appropriate E911 tandem, along with ANI, based upon the current E911 end office to tandem homing arrangement as provided by BellSouth. If the E911 tandem trunks are not available, US LEC will be required to route the call to a designated 7-digit local number residing in the appropriate Public Service Answering Point ("PSAP"). This call will be transported over BellSouth's interoffice network and will not carry the ANI of the calling party. US LEC shall be responsible for providing BellSouth with complete and accurate data for submission to the 911/E911 database for the purpose of providing 911/E911 to its end users.

9.2.3 Rates. Charges for 911/E911 service are borne by the municipality purchasing the service. BellSouth will impose no charge on US LEC beyond applicable charges for BellSouth trunking arrangements.

9.2.4 Basic 911 and E911 functions provided to US LEC shall be at least at parity with the support and services that BellSouth provides to its customers for such similar functionality.

Detailed Practices and Procedures. The detailed practices and procedures contained in the E911 Local Exchange Carrier Guide For Facility-Based Providers as amended from time to time during the term of this Agreement will determine the appropriate practices and procedures for BellSouth and US LEC to follow in providing 911/E911 services.

9.3 It shall be the responsibility of US LEC to determine the correct BellSouth service switching point that performs the routing of 911 traffic for areas that US LEC offers service in order to implement 911 interconnection message trunks. US LEC shall establish message trunks to the BellSouth service switching point that performs routing of 911 traffic for the purpose of delivering the 911 traffic to BellSouth for call completion. BellSouth shall deliver 911 traffic originating in the US LEC network to the appropriate BellSouth PSAP serving the locality in which the traffic originated provided that US LEC has delivered the traffic to the proper BellSouth service switching point serving the PSAP and provided that BellSouth is the authorized 911 service provider in that municipality. The delivery of 911 traffic, originating in the US LEC network, to the proper PSAP, where BellSouth is the 911 host company, shall not be limited to Central Office Codes that US LEC administers but shall include any telephone number within any Central Office Code ported into the US LEC network from another service provider using the industry established Local Number Portability procedures and provided that BellSouth is the authorized 911 service provider for the governmental agency(ies).

10 True-Up

This section applies only to North Carolina and Tennessee.

- 10.1 The interim prices for Network Elements and Other Services and Local Interconnection shall be subject to true-up according to the following procedures:
- 10.2 The interim prices shall be trued-up, either up or down, based on final prices determined either by further agreement between the Parties, or by a final order (including any appeals) of the Commission which final order meets the criteria of (3) below. The Parties shall implement the true-up by comparing the actual volumes and demand for each item, together with interim prices for each item, with the final prices determined for each item. Each Party shall keep its own records upon which the true-up can be based, and any final payment from one Party to the other shall be in an amount agreed upon by the Parties based on such records. In the event of any disagreement as between the records or the Parties regarding the amount of such true-up, the Parties agree that the body having jurisdiction over the matter shall be called upon to resolve such differences, or the Parties may mutually agree to submit the matter to the Dispute Resolution process in accordance with the provisions of Section 16 of the General Terms and Conditions and Attachment 1 of the Agreement.
- 10.3 The Parties may continue to negotiate toward final prices, but in the event that no such Agreement is reached within nine (9) months, either Party may petition the Commission to resolve such disputes and to determine final prices for each item. Alternatively, upon mutual agreement, the Parties may submit the matter to the Dispute Resolution Process set forth in Section 16 of the General Terms and Conditions and Attachment 1 of the Agreement, so long as they file the resulting Agreement with the Commission as a "negotiated Agreement" under Section 252(e) of the Act.
- 10.4 A final order of this Commission that forms the basis of a true-up shall be the final order as to prices based on appropriate cost studies, or potentially may be a final order in any other Commission proceeding which meets the following criteria:
- (a) BellSouth and CLEC-1 are entitled to be a full Party to the proceeding,

- (b) It shall apply the provisions of the federal Telecommunications Act of 1996, including but not limited to Section 252(d)(1) (which contains pricing standards) and all then-effective implementing rules and regulations; and,
- (c) It shall include as an issue the geographic deaveraging of network element and other services prices, which deaveraged prices, if any are required by said final order, shall form the basis of any true-up.

EXHIBIT A

CALLING NAME DELIVERY (CNAM) DATABASE SERVICES

1.00 DEFINITIONS

For the purpose of this Attachment, the following terms shall be defined as:

CALLING NAME DELIVERY DATABASE SERVICE (CNAM) - The ability to associate a name with the calling party number, allowing the end user subscriber (to which a call is being terminated) to view the calling party's name before the call is answered. This service also provides US LECUS LEC the opportunity to load and store its subscriber names in the BellSouth CNAM SCPs.

CALLING PARTY NUMBER (CPN) - The number of the calling party that is delivered to the terminating switch using common channel signaling system 7 (CCS7) technology, and that is contained in the Initial Address Message (IAM) portion of the CCS7 call setup.

COMMON CHANNEL SIGNALING SYSTEM 7 (CCS7) - A network signaling technology in which all signaling information between two or more nodes is transmitted over high-speed data links, rather than over voice circuits.

SERVICE CONTROL POINTs (SCPs) - The real-time data base systems that contain the names to be provided in response to queries received from CNAM SSPs.

SERVICE MANAGEMENT SYSTEM (SMS) - The main operations support system of CNAM DATABASE SERVICE. CNAM records are loaded into the SMS, which in turn downloads into the CNAM SCP.

SERVICE SWITCHING POINTs (SSPs) - Features of computerized switches in the telephone network that determine that a terminating line has subscribed to CNAM service, and then communicate with CNAM SCPs in order to provide the name associated with the calling party number.

SUBSYSTEM NUMBER (SSN) - The address used in the Signaling Connection Control Part (SCCP) layer of the SS7 protocol to designate an application at an end signaling point. A SSN for CNAM at the end office designates the CNAM application within the end office. BellSouth uses the CNAM SSN of 232.

2.0 ATTACHMENT

- 2.01 This Attachment contains the terms and conditions where BellSouth will provide to US LEC access to the BellSouth CNAM SCP for query or record storage purposes.
- 2.02 US LEC shall submit to BellSouth a notice of its intent to access and utilize BellSouth CNAM Database Services pursuant to the terms and conditions of this Attachment. Said notice shall be in writing, no less than 60 days prior to US LEC's access to BellSouth's CNAM Database Services and shall be addressed to US LEC's Account Manager. The notice shall be substantially in the form of Exhibit A attached hereto and incorporated herein by this reference.

3.00 PHYSICAL CONNECTION AND COMPENSATION

- 3.01 BellSouth's provision of CNAM Database Services to US LEC requires interconnection from US LEC to BellSouth CNAM Service Control Points (SCPs). Such interconnections shall be established pursuant to Attachment 3 of this Agreement. The appropriate charge for access to and use of the BellSouth CNAM Database service shall be as set forth in Attachment 11.
- 3.02 In order to formulate a CNAM query to be sent to the BellSouth CNAM SCP, US LEC shall provide its own CNAM SSP. US LEC's US LECCNAM SSPs must be compliant with TR-NWT-001188, "CLASS Calling Name Delivery Generic Requirements".
- 3.03 If US LEC elects to access the BellSouth CNAM SCP via a third party CCS7 transport provider, the third party CCS7 provider shall interconnect with the BellSouth CCS7 network according to BellSouth's Common Channel Signaling Interconnection Guidelines and Telcordia's (formerly BellCore) CCS Network Interface Specification document, TR-TSV-000905. In addition, the third party provider shall establish CCS7 interconnection at the BellSouth Local Signal Transfer Points (LSTPs) serving the BellSouth CNAM SCPs that US LEC desires to query.

4.00 CNAM RECORD INITIAL LOAD AND UPDATES

- 4.01 The mechanism to be used by US LEC for initial CNAM record load and/or updates shall be determined by mutual agreement. The initial load and all updates shall be provided by US LEC in the BellSouth specified format and shall contain records for every working telephone number that can originate phone calls. It is the responsibility of US LEC to provide accurate information to BellSouth on a current basis.
- 4.02 Updates to the SMS shall occur no less than once a week, reflect service order activity affecting either name or telephone number, and involve only record additions, deletions or changes.
- 4.03 US LEC CNAM records provided for storage in the BellSouth CNAM SCP shall be available, on a SCP query basis only, to all parties querying the BellSouth CNAM SCP. Further, CNAM service shall be provided by each party consistent with state and/or federal regulation.

NOTES:
If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the parties upon request by either party

- 1 In states where a specific NRC for customer transfer, feature additions and changes is not stated, the applicable NRC from the appropriate tariff applies.
- 2 Transmission/usage charges associated with POTS circuit switched usage will also apply to circuit switched voice and/or circuit switched data transmission by B-Channels associated with 2-wire ISDN ports.
- 3 Access to B Channel or D Channel Packet capabilities will be available only through BFRNew Business Request Process. Rates for the packet capabilities will be determined via the Bona Fide Request/New Business Request Process.
- 4 This rate element is for those states which have a specific rate for User Profile per B Channel.
- 5 When CLEC buys the switch at the unbundled element rate it will receive vertical services at no additional charge, but when it buys combinations of elements to produce a BellSouth retail service, and thus comes under the resale pricing provisions, it must also pay the wholesale rate for vertical services, if those services are in the retail tariff on the effective date of the agreement. Vertical services which are not in the retail tariff but which can be provided by the switch will be available at no additional charges. (NC)
- 6 This rate element is for use in those states with a different rate for additional minutes of use.
- 7 BellSouth and CLEC shall negotiate rates for this offering. If agreement is not reached within sixty (60) days of the Effective Date, either party may petition the Florida PSC to settle the disputed charge or charges. (FL)
- 8 This rate element is for those states who separate rates for 800 calls with 800 No. Delivery vs. POTS No. Delivery and calls with Optional Complex Features vs. w/o Optional Complex Features.
- 9 This charge is only applicable where signaling usage measurement or billing capability does not exist.
- 10 Prices for AIN to be determined upon development of mediation device. (TN)

Network Interconnection for: Call Transport and Termination

BellSouth shall provide US LEC interconnection with BellSouth's network for the transmission and routing of telephone exchange service (local) and exchange access (intraLATA toll and switched access) on the following terms:

1. Network Interconnection

The negotiated rates, terms and conditions set forth in this Attachment pertain to the provision of network interconnection.

- 1.1 Interconnection is available to both Parties through: (1) delivery of a Party's facilities to a collocation arrangement or Fiber Meet arrangement as defined in this Agreement; or (2) interconnection via purchase of facilities from the other Party. Interconnection may be provided by the Parties at any other technically feasible point. Requests to BellSouth for interconnection at other points may be made through the Bona Fide Request/New Business Request process set out in General Terms and Conditions.
- 1.2 US LEC must establish, at a minimum, a single Point of Presence, Interface, and Interconnection with BellSouth within the LATA for the delivery of US LEC's originated local, intraLATA toll and transit traffic. If US LEC chooses to interconnect at a single Point of Interconnection within a LATA, the interconnection must be at a BellSouth Access Tandem. Furthermore, US LEC must establish Points of Interconnection at all BellSouth access and local tandems where US LEC NXXs are "homed." A "Homing" arrangement is defined by a "Final" Trunk Group between the BellSouth Tandem and US LEC End Office switch. A "Final" Trunk Group is the last choice telecommunications path between the Tandem and End Office switch. It is US LEC's responsibility to determine and to enter its own NPA/NXX access and/or local tandem "homing" arrangements into the national Local Exchange Routing Guide (LERG).
- 1.2.1 In order for US LEC to home its NPA/NXX(s) on a BellSouth Tandem, US LEC's NPA/NXX(s) must be assigned to an Exchange Rate Center Area served by that BellSouth Tandem and as specified by BellSouth. The specified association between BellSouth Tandems and Exchange Rate Center Areas is defined in the *BellSouth Call Transport & Termination Service For Facility Based CLECs* section of the *Facility Based CLEC*

Activation Requirements Customer Guide as it is revised from time to time.

- 1.3 A **Point of Presence (POP)** is the physical location (a structure where the environmental, power, air conditioning, etc. specifications for a Party's terminating equipment can be met) at which a Party establishes itself for obtaining access to the other Party's network. The POP is the physical location within which the Point of Interfaces occur.
- 1.4 A **Point of Interface** is the physical telecommunications interface between BellSouth and US LEC's interconnection functions. It establishes the technical interface and point of operational responsibility. The primary function of the Point of Interface is to serve as the terminus for the interconnection service. The Point of Interface has the following main characteristics:
1. It is a cross-connect point to allow connection, disconnection, transfer or restoration of service.
 2. It is a point where BellSouth and US LEC can verify and maintain specific performance objectives.
 3. It is specified according to the interface offered in the tariff or local interconnection agreement (for example: for DS1 service the FCC # 1 tariff specifies that the interface meets the technical specifications detailed in Generic Requirements GR-342-CORE, Issue 1, December 1995.)
 4. The Parties provide their own equipment (CPE) to interface with the DS0, DS1, DS3, STS1 and/or OCn circuits on the customer premises.
- 1.5 A **Point of Interconnection** is the point at which the originating Party delivers its originated traffic to the terminating Party's first point of switching on the terminating Party's common (shared) network for call transport and termination. Points of Interconnection are available at either Access Tandems, Local Tandems, or End Offices as described in this Agreement. US LEC's requested Point of Interconnection will also be used for the receipt and delivery of transit traffic at BellSouth Access and Local Tandems. Points of Interconnection established at the BellSouth Local Tandem apply only to US LEC-originated local and local originating and terminating transit traffic.

- 1.6 US LEC, at its option, shall establish Points of Presence and Points of Interface for the delivery of its originated local and intraLATA toll traffic to BellSouth. The Point of Interface may not necessarily be established at the Point of Interconnection. US LEC is responsible for either providing or purchasing facilities to connect the US LEC designated Point of Interface.
- 1.7 BellSouth, at its option, shall designate the Points of Presence and Points of Interface for the delivery of its originated local and intraLATA toll traffic to US LEC for call transport and termination by US LEC. The Point of Interface may not necessarily be established at the Point of Interconnection. BellSouth is responsible for either providing or purchasing facilities to connect to the BellSouth designated Point of Interface.
- 1.7.1 If BellSouth requests space for placement of BellSouth owned facilities of equipment within a US LEC office, BellSouth will establish a collocation arrangement with US LEC pursuant to a negotiated collocation agreement or as otherwise mutually agreed.

DISAGREE – 1.7.2:

BELLSOUTH'S PROPOSAL TO 1.7.2:

- 1.7.2 BellSouth may designate a Point of Interface in each BellSouth flat rated local calling area.

US LEC'S PROPOSAL TO 1.7.2

- 1.7.2 BellSouth may designate a Point of Interface in each BellSouth flat rated local calling area. However, BellSouth shall not designate more than one Point of Interface in the same LATA unless it has sufficient traffic terminating to US LEC at each Point of Interface to utilize at least 75% of the interconnection facility's capacity. If BellSouth designates more than one Point of Interface in a LATA, it shall provide overflow trunking arrangements within its network to re-route traffic to a different Point of Interface in the event of trunk blockage or facility outage.

- 1.8 Interconnection via Purchase of Facilities

The originating Party is responsible for delivering its originating traffic to its designated Point of Interface, over facilities it designates, at its own expense. If the Point of Interface is not collocated with the Point of Interconnection, then the terminating Party shall provide and the originating Party may purchase dedicated transport between the Point of Interface and the Point of Interconnection pursuant to this section 1.8.

- 1.8.1 The originating Party may purchase Local Channel facilities from the terminating Party from the originating Party's specified Point of Interface to the serving wire center. The Parties agree that charges for such Local Channel facilities are as set forth in Exhibit A to this Attachment. If a nonrecurring or recurring rate is not identified in Exhibit A for a Local Channel, the rate shall be as set forth in the appropriate BellSouth intrastate or interstate tariff for switched access services.
- 1.8.2 Additionally, the originating Party may purchase Dedicated Interoffice Transport facilities from the serving wire center to the Point of Interconnection. The Parties agree that charges for such Dedicated Interoffice Transport facilities are as set forth in Exhibit A to this Attachment. If a nonrecurring or recurring rate is not identified in Exhibit A for Dedicated Interoffice Transport, the rate shall be as set forth in the appropriate BellSouth intrastate or interstate tariff for switched access services.
- 1.8.3 For the purposes of this Attachment, Local Channel is defined as a switch transport facility between a Party's Point of Presence and its designated serving wire center.

DISAGREE – 1.8.4:

BELLSOUTH'S PROPOSAL TO 1.8.4:

- 1.8.4 For the purposes of this Attachment, Serving Wire Center is defined as the wire center owned by one Party from which the other Party would normally obtain dial tone for its Point of Presence.

US LEC's PROPOSAL TO 1.8.4:

- 1.8.4 For the purposes of this Attachment, Serving Wire Center is defined as the V&H coordinates within which the originating Party's Point of Presence is located.

- 1.8.5 For the purposes of this Attachment, Dedicated Interoffice Transport is defined as a switch transport facility between a Party's designated serving wire center and the first point of switching on the other Party's common (shared) network.

DISAGREE – 1.8.6

BELLSOUTH'S PROPOSAL TO 1.8.6:

BellSouth does not agree to the addition of this provision.

US LEC PROPOSAL TO 1.8.6

- 1.8.6 US LEC is not required to provision facilities to locations not on its network to provide transport service to BellSouth.

- 1.9 BellSouth **Multiple Tandem Access (MTA)** provides for LATA wide BellSouth transport and termination of US LEC-originated intraLATA toll and local traffic, that is transported by BellSouth, by establishing a Point of Interconnection at a BellSouth access tandem with routing through multiple BellSouth access tandems as required. However, US LEC must still establish Points of Interconnection at each BellSouth access tandem where US LEC NXXs are "homed." If US LEC does not have NXXs homed at all BellSouth access tandems within the LATA, US LEC can order MTA in each BellSouth access tandem within the LATA where it does have a Point of Interconnection and BellSouth will terminate traffic to end users served through BellSouth access tandems where US LEC does not have a Point of Interconnection. MTA shall be provisioned in accordance with BellSouth's Ordering Guidelines.

- 1.9.1 MTA does not include switched access traffic that transits the BellSouth network to an Interexchange Carrier (IXC). Switched Access traffic will be delivered to and by IXCs based on US LEC's NXX Access Tandem homing arrangement as specified by US LEC in the national Local Exchange Routing Guide (LERG).

- 1.9.2 For US LEC-originated local and intraLATA toll traffic that BellSouth transports but is destined for termination by a third Party network (transit traffic), BellSouth MTA is required if multiple BellSouth access tandems are necessary to deliver the call to the third Party network.

DISAGREE-- 1.9.3

BELLSOUTH PROPOSAL TO 1.9.3:

- 1.9.3 The Parties agree that compensation for the BellSouth transport and/or termination of US LEC's local and intraLATA toll traffic will be billed on a statewide basis at the applicable rates specified in Exhibit A to this Attachment for local traffic and at the BellSouth intrastate switched access tariff rates for intraLATA toll traffic.

US LEC PROPOSAL TO 1.9.3:

- 1.9.3 The Parties agree that compensation for the BellSouth transport and/or termination of US LEC's local and intraLATA toll traffic will be billed on a statewide basis at the applicable rates specified in Section 6 to this Attachment for local traffic and at the BellSouth intrastate switched access tariff rates for intraLATA toll traffic.

- 1.9.4 To the extent US LEC does not purchase MTA in a calling area that has multiple access tandems serving the calling area as defined by BellSouth, US LEC must establish Points of Interconnection to every access tandem in the calling area in order to serve the entire calling area. To the extent US LEC does not purchase MTA and provides intraLATA toll service to its customers, it may be necessary for it to establish a Point of Interconnection to additional BellSouth access tandems that serve end offices outside the local calling area. To the extent US LEC routes its traffic in such a way that utilizes BellSouth's MTA service without properly ordering MTA service, US LEC agrees to pay BellSouth the associated transport and termination charges.

1.10 Local Tandem Interconnection.

- 1.10.1 This interconnection arrangement allows US LEC to establish a Point of Interconnection at BellSouth local tandems for: (1) the delivery of US LEC-originated local traffic transported and terminated by BellSouth to BellSouth end offices within the local calling area as defined in BellSouth's

GSST, section A3 served by those BellSouth local tandems, and (2) for local transit traffic transported by BellSouth for third party network providers who have also established Points of Interconnection at those BellSouth local tandems.

- 1.10.2 If US LEC orders Local Tandem interconnection, then when a specified local calling area is served by more than one BellSouth local tandem, US LEC must designate a "home" local tandem for each of its assigned NPA/NXXs and establish trunk connections to such local tandems. Additionally, US LEC may choose to establish a Point of Interconnection at the BellSouth local tandems where it has no codes homing but is not required to do so. US LEC may deliver local traffic to a "home" BellSouth local tandem that is destined for other BellSouth or third party network provider end offices subtending other BellSouth local tandems in the same local calling area where US LEC does not choose to establish a Point of Interconnection. It is US LEC's responsibility to enter its own NPA/NXX local tandem homing arrangements into the Local Exchange Routing Guide (LERG) either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to US LEC's codes. Likewise, US LEC shall obtain its routing information from the LERG.
- 1.10.3 Notwithstanding establishing Points of Interconnection to BellSouth's local tandems, US LEC must also establish Points of Interconnection to BellSouth access tandems within the LATA on which US LEC has NPA/NXX's homed for the delivery of Interexchange Carrier Switched Access (SWA) and toll traffic, and traffic to Type 2A CMRS connections located at the access tandems. BellSouth cannot switch SWA traffic through more than one BellSouth access tandem. SWA, Type 2A CMRS or toll traffic routed to the local tandem in error will not be backhauled to the BellSouth access tandem for completion. (Type 2A CMRS interconnection is defined in BellSouth's A35 General Subscriber Services Tariff.)
- 1.10.4 BellSouth's provisioning of local tandem interconnection assumes that US LEC has executed the necessary local interconnection agreements with the other third party network providers subtending those local tandems as required by the Act.
- 1.11 Fiber Meet
- 1.11.1 "Fiber-Meet" is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface (as

opposed to an electrical interface) at which one Party's facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends (i.e. Point Of Interface).

- 1.11.2 If US LEC elects to interconnect with BellSouth pursuant to a Fiber Meet, US LEC and BellSouth shall jointly engineer and operate a Synchronous Optical Network ("SONET") transmission system by which they shall interconnect their transmission and routing of local traffic via a Local Channel facility at either the DS0, DS1, or DS3 level. The Parties shall work jointly to determine the specific transmission system. However, US LEC's SONET transmission must be compatible with BellSouth's equipment in the BellSouth Interconnection Wire Center. The same vendor's equipment and software version must be used, and the Data Communications Channel (DCC) must be turned off.
- 1.11.3 BellSouth shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the BellSouth Interconnection Wire Center ("BIWC").
- 1.11.4 US LEC shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the US LEC Interconnection Wire Center ("US LEC Wire Center").
- 1.11.5 BellSouth shall designate a Point of Interface outside the BIWC as a Fiber Meet point, and shall make all necessary preparations to receive, and to allow and enable US LEC to deliver, fiber optic facilities into the Point of Interface with sufficient spare length to reach the fusion splice point at the Point of Interface. BellSouth shall, wholly at its own expense, procure, install, and maintain the fusion splicing point in the Point of Interface. A Common Language Location Identification ("CLLI") code will be established for each Point of Interface. The code established must be a building type code. All orders shall originate from the Point of Interface (i.e., Point of Interface to US LEC, Point of Interface to BellSouth).
- 1.11.6 US LEC shall deliver and maintain such strands wholly at its own expense. Upon verbal request by US LEC, BellSouth shall allow US LEC access to the Fiber Meet entry point for maintenance purposes as promptly as possible.
- 1.11.7 The Parties shall jointly coordinate and undertake maintenance of the SONET transmission system. Each Party shall be responsible for maintaining the components of their own SONET transmission system.

- 1.11.8 Each Party will be responsible for (i) providing its own transport facilities to the Fiber Meet, and (ii) the cost to build-out its facilities to such Fiber Meet.
- 1.11.9 Neither Party shall charge the other for its portion of the Fiber Meet facility used exclusively for non-transit local traffic (i.e. the Local Channel). Charges incurred for other services including dedicated transport facilities to the Point of Interconnection if applicable will apply. Charges for Switched and Special Access Services shall be billed in accordance with the applicable Access Service tariff (i.e. the BellSouth Interstate or Intrastate Access Services Tariff).

2 Interconnection Trunking and Routing

2.1 Trunk Groups

BellSouth and US LEC shall establish interconnecting trunk groups between networks pursuant to the *BellSouth Call Transport & Termination Service For Facility Based CLECs section of the Facility Based CLEC Activation Requirements Customer Guide* as it is revised from time to time.

- 2.2 Any US LEC interconnection request that deviates from the standard trunking arrangements as described in the *BellSouth Call Transport & Termination Service for Facility Based CLECs section of the Facility Based CLEC Activation Requirements Customer Guide* that affects traffic delivered to US LEC from a BellSouth switch that requires special BellSouth switch translations and other network modifications will require submission of a Bona Fide Request/New Business Request via the Bona Fide Request/New Business Request Process set forth in the General Terms and Conditions.

- 2.2.1 Nothing in this Agreement is intended to require US LEC to reconfigure the existing trunk group arrangements in the Charlotte LATA as shown in Exhibit B hereto, or similar arrangements in other LATAs as existing on the Effective Date. This paragraph does not apply to the establishment of the points of interface.

- 2.3 All terms and conditions, as well as charges, both non-recurring and recurring, associated with interconnecting trunk groups between BellSouth and US LEC not addressed in Exhibit A shall be billed reciprocally as set forth in Section E.6 of the appropriate BellSouth intrastate or interstate access tariff.

- 2.4 Where mutually agreeable to establish two-way trunking that carries the Parties' local and intraLATA toll traffic, excluding transit traffic, the Parties shall be compensated for the nonrecurring and recurring charges for trunks and DS1 facilities at 50% of the applicable contractual or tariff rates for the services provided by each Party. US LEC shall be responsible for ordering and paying for any two-way trunks carrying transit traffic.
- 2.5 The Parties shall utilize direct end office trunking under the following conditions:
- (1) Tandem Exhaust - If a tandem through which the Parties are interconnected is unable to, or is forecasted to be unable to support additional traffic loads for any period of time, the Parties will mutually agree on a plan including local tandem interconnection and/or end office trunking that will alleviate the tandem capacity shortage and ensure completion of traffic between US LEC and BellSouth's subscribers.
- (2) Traffic Volume - To the extent either Party has the capability to measure the amount of traffic between a US LEC switching center and a BellSouth end office, either Party may install and retain direct end office trunking sufficient to handle actual or reasonably forecasted traffic volumes, whichever is greater, between a US LEC switching center and a BellSouth end office where the traffic exceeds or is forecasted to exceed a single DS1 of local traffic per month. Either Party may install additional capacity between such points when overflow traffic between US LEC's switching center and BellSouth's end office exceeds or is forecasted to exceed a single DS1 of local traffic per month. In the case of one way trunking, additional trunking may be installed by the Party whose trunking has achieved the preceding usage threshold.
- 2.5.1 Mutual Agreement - The Parties may install direct end office trunking upon mutual agreement in the absence of the conditions (1) or (2) above and agreement will not unreasonably be withheld.
- 2.6 Switched Access traffic will be delivered to and by IXCs based on US LEC's NXX Access Tandem homing arrangement as specified by US LEC in the national Local Exchange Routing Guide (LERG).
- 2.7 All trunk groups will be provisioned as Signaling System 7 (SS7) capable where technically feasible.

3**Network Design and Management for Interconnection**

- 3.1 Network Management and Changes. Both parties will work cooperatively with each other to install and maintain the most effective and reliable interconnected telecommunications networks, including but not limited to, the exchange of toll-free maintenance contact numbers and escalation procedures. Both parties agree to provide public notice of changes in the information necessary for the transmission and routing of services using its local exchange facilities or networks, as well as of any other changes that would affect the interoperability of those facilities and networks.
- 3.2 Interconnection Technical Standards. The interconnection of all networks will be based upon accepted industry/national guidelines for transmission standards and traffic blocking criteria. Interconnecting facilities shall conform, at a minimum, to the telecommunications industry standard of DS-1 pursuant to BellCore Standard No. TR-NWT-00499. Signal transfer point, Signaling System 7 ("SS7") connectivity is required at each interconnection point. Each Party will provide the other out-of-band signaling using Common Channel Signaling Access Capability where technically and economically feasible, in accordance with the technical specifications set forth in the BellSouth Guidelines to Technical Publication, TR-TSV-000905. Facilities of each Party shall provide the necessary on-hook, off-hook answer and disconnect supervision and shall hand off calling number ID (Calling Party Number) when technically feasible.
- 3.3 Quality of Interconnection. The quality of the interconnection between the networks of BellSouth and the network of US LEC shall be at a level that is equal to that which BellSouth provides itself, a subsidiary, an Affiliate, or any other party. The interconnection facilities shall be designed to meet the same technical criteria and service standards that are used within BellSouth's network and shall extend to a consideration of service quality as perceived by end users and service quality as perceived by US LEC.
- 3.4 Network Management Controls. Both Parties will work cooperatively with each other to apply sound network management principles by invoking appropriate network management controls, e.g., call gapping, to alleviate or prevent network congestion.
- 3.5 Common Channel Signaling. Both Parties will provide LEC-to-LEC Common Channel Signaling ("CCS") to each other, where available, in conjunction with all traffic in order to enable full interoperability of CLASS features and functions except for call return. All CCS signaling parameters will be provided, including automatic number identification ("ANI"), originating line information ("OLI") calling company category, charge number, etc. All privacy indicators will be honored, and each Party

will cooperate with each other on the exchange of Transactional Capabilities Application Part ("TCAP") messages to facilitate full interoperability of CCS-based features between the respective networks.

- 3.6 Forecasting Requirements. The Parties shall exchange technical descriptions and forecasts of their interconnection and traffic requirements in sufficient detail necessary to establish the interconnections required to assure traffic completion to and from all customers in their respective designated service areas. In order for BellSouth to provide as accurate reciprocal trunking forecasts as possible to US LEC, US LEC must timely inform BellSouth of any known trunking requirements. If US LEC refuses to provide such information, BellSouth shall provide reciprocal trunking forecasts based only on existing trunk group growth and BellSouth's annual estimated percentage of BellSouth subscriber line growth.
- 3.6.1 Both parties shall meet every six months or at otherwise mutually agreeable intervals for the purpose of exchanging non-binding forecast of its traffic and volume requirements for the interconnection and network elements provided under this Agreement, in the form and in such detail as agreed by the Parties. Section 3.6.3 contains guidelines regarding trunk forecasts, the forecast meetings and meeting intervals, that the Parties can use to form the basis of their agreement. The Parties agree that each forecast provided under this Section 3.6.2 shall be deemed "Confidential Information" under Section 11 of the General Terms and Conditions – Part A of this Agreement.
- 3.6.2 The trunk forecast should include trunk requirements for all of the interconnecting trunk groups for the current year plus the next two future years. The forecast meeting between the two companies may be a face-to-face meeting, video conference or audio conference. It may be held regionally or geographically. Ideally, these forecast meetings should be held at least semi-annually, or more often if the forecast is no longer usable. Updates to a forecast or portions thereof should be made whenever the Party providing the forecast deems that the latest trunk requirements exceed the original quantities by 24 trunks or 10%, whichever is greater. Either Party should notify the other Party if they have measurements indicating that a trunk group is exceeding its designed call carrying capacity and is impacting other trunk groups in the network. Also, either Party should notify the other Party if they know of situations in which the traffic load is expected to increase significantly and thus affect the interconnecting trunk requirements as well as the trunk requirements within the other Party's network. The Parties agree that the forecast information provided under this Section shall be deemed

"Confidential Information" under Section 11 of the General Terms and Conditions of this Agreement.

3.6.4 For a non-binding trunk forecast, agreement between the two Parties on the trunk quantities and the timeframe of those trunks does not imply any liability for failure to perform if the trunks are not available for use at the required time.

3.7 Signaling Call Information. BellSouth and US LEC will send and receive 10 digits for local traffic. Additionally, BellSouth and US LEC will exchange the proper call information, i.e. originated call company number and destination call company number, CIC, and OZZ, including all proper translations for routing between networks and any information necessary for billing.

4. Parity in Ordering and Provisioning

BellSouth shall provide interconnection ordering and provisioning services to US LEC that are equal to the ordering and provisioning services BellSouth provides to itself. Detailed procedures for ordering and provisioning BellSouth interconnection services are set forth in the Local Interconnection and Facility Based Ordering Guide.

5. Local Dialing Parity

Each Party shall permit telephone exchange service customers within a local calling area to dial the same number of digits to make a local telephone call notwithstanding the identity of the customer's or the called party's telecommunications service provider.

6. Interconnection Compensation

DISAGREE (6.1 – 6.4):

BELLSOUTH PROPOSAL (numbered 6.1 – 6.2):

6.1 Compensation for Call Transport and Termination for Local

6.1.1 Local Traffic is defined as any telephone call that originates in one exchange and terminates in either the same exchange, or other local

calling area as defined by the originating Party that has its own switch for its own local exchange service end users associated with the originating exchange. If a Party utilizes unbundled switching, the local calling area shall be as defined in BellSouth's General Subscriber Services Tariff. As clarification of this definition and for reciprocal compensation, Local Traffic does not include traffic that originates from or is directed to or through an enhanced service provider or information service provider. Additionally, IP Telephony traffic will be considered switched access traffic. As further clarification, Local Traffic does not include:

(i) Traffic that is at issue in North Carolina Docket P-561, Sub 10 or any similar network affiliated with US LEC where any arrangement exists to compensate the originator of such traffic; or

(ii) Traffic that consists of minutes of use from any end-user customer that relies upon a call placed by that end-user customer or on the end-user customer's behalf to establish or maintain a network connection, if:
(a) the minutes of use to be billed are primarily associated with traffic of a type not routinely and ordinarily recognized by a reasonable person to constitute traffic as a result of a telephone call (i.e. voice or data traffic);
(b) the end-user customer does not control the destination of the call; and
(c) the minutes of use do not serve a legitimate purpose that is unrelated to the receipt of reciprocal compensation or any other benefit that may be derived solely from establishing or maintaining the network connection.

- 6.1.2 The Parties shall provide for the mutual and reciprocal recovery of the costs for the elemental functions performed in transporting and terminating local traffic on each other's network. The Parties agree that charges for transport and termination of calls on its respective networks are as set forth in Exhibit A to this Attachment.
- 6.1.3 For the purposes of this Attachment, Common (Shared) Transport is defined as the transport of one Party's traffic by the other Party over the other Party's common (shared) facilities between the other Party's tandem switch and end office switch and/or between the other Party's tandem switches.
- 6.1.4 For the purposes of this Attachment, Tandem Switching is defined as the function that establishes a communications path between two switching offices through a third switching office (the Tandem switch).
- 6.1.5 For the purposes of this Attachment, End Office Switching is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.

- 6.1.6 If US LEC utilizes a switch outside the LATA and BellSouth chooses to purchase dedicated or common (shared) transport from US LEC for transport and termination of BellSouth originated traffic, BellSouth will pay US LEC no more than the airline miles between the V & H coordinates of the Point of Interface within the LATA where US LEC receives the BellSouth-originated traffic and the V & H coordinates of the BellSouth Exchange Rate Center Area that the US LEC terminating NPA/NXX is associated in the same LATA. For these situations, BellSouth will compensate US LEC at either dedicated or common (shared) transport rates specified in Exhibit A and based upon the functions provided by US LEC as defined in this Attachment.
- 6.1.7 Neither Party shall represent access services traffic (e.g. Internet Protocol (IP) Telephony, FGA, FGB, etc.) as Local Traffic for purposes of payment of reciprocal compensation.
- 6.2 Unidentifiable traffic. US LEC shall utilize its NPA/NXXs in such a way and will provide the necessary information so that BellSouth shall be able to distinguish Local from IntraLATA Toll traffic for BellSouth originated traffic. US LEC end users' assigned NPA/NXX line numbers shall be physically located in the BellSouth rate center with which the NPA/NXX has been associated. Whenever BellSouth delivers traffic to US LEC for termination on the US LEC's network, if BellSouth cannot determine, because of the manner in which US LEC has utilized its NXX codes whether the traffic is local or toll, BellSouth will charge the applicable rates for originating intrastate network access service as reflected in BellSouth's Intrastate Access Service Tariff. BellSouth will make appropriate billing adjustments if US LEC can provide sufficient information for BellSouth to determine whether said traffic is local or toll.

US LEC's PROPOSAL (numbered 6.1 – 6.4):

- 6.1 Local Traffic is defined as any telephone call that originates in one exchange and terminates in either the same exchange, or within the caller's local calling area as defined by the originating Party that has its own switch for its own local exchange service end users associated with the originating exchange, including any optional local calling areas available to callers in the originating exchange. If a Party utilizes unbundled switching, the local calling area shall be as defined in BellSouth's General Subscriber Services Tariff. For purposes of this

Attachment, Local Traffic does not include Dial-Up Internet Traffic as defined below.

- 6.1.1 Dial-Up Internet Traffic is defined as a call delivered from or to an Internet Service Provider, where the Internet Service Provider subscribes to local exchange access lines and where the calling and called local exchange access lines are within the same exchange or within the caller's local calling area as defined in paragraph 6.1 above.
- 6.1.2 The points of origination and termination for purposes of the definitions in this section shall be determined by the Rate Centers associated with the originating and terminating NPA-NXX codes, respectively; except in the case of traffic that is subject to access charges under applicable FCC or Commission rulings (e.g., Feature Group A or B, and 800 Traffic).
- 6.1.3 Each Party will associate each of its NPA/NXXs with a single Rate Center as specified in NECA Tariff FCC No. 4, for the purpose of determining points of origination and termination under this Section 6, and shall use its NPA/NXXs in such a way and will provide the necessary information so that the originating Party can distinguish Local and Dial-Up Internet Traffic from IntraLATA Toll traffic for its originating customers. This paragraph shall not prevent a Party from assigning line numbers for Foreign Exchange or like services.
- 6.2 The Parties shall compensate each other for transporting and terminating Local Traffic on each other's network on a mutual, reciprocal, and symmetrical basis as set forth in this Section 6.2.
 - 6.2.1 For Local Traffic terminated by BellSouth, US LEC shall pay BellSouth the charges for call transport and termination set forth in Exhibit A to this Attachment 3.
 - 6.2.1.1 For the purposes of this Section 6.2.1, Common (Shared) Transport is defined as the transport of one Party's traffic by the other Party over the other Party's common (shared) facilities between the other Party's tandem switch and end office switch and/or between the other Party's tandem switches.
 - 6.2.1.2 For the purpose of this Section 6.2.1, Tandem Switching is defined as the function that establishes a communications path between two switching offices through a third switching office (the Tandem) switch).
 - 6.2.1.3 For the purposes of this Section 6.2.1, End Office Switching is defined as the function that establishes a communications path between the trunk side and the line side of the End Office switch.

- 6.2.1.4 In states that have established a composite rate structure for reciprocal compensation (Florida, Louisiana, and South Carolina), US LEC shall pay BellSouth the applicable composite rate or rates as set forth in Exhibit A to this Attachment 3, in lieu of the elemental rates described above.
- 6.2.2 For Local Traffic originated by BellSouth and terminated via a Point of Interconnection at a US LEC switch, the compensation rate per minute of use shall initially be the Tandem Local Interconnection rate shown on Exhibit A (hereinafter, the "Tandem Rate"). This rate is the sum of the End Office Switching, Tandem Switching, Common (Shared) Transport Facilities Termination, and Common (Shared) Transport per mile (multiplied by 25 miles) rate elements. The US LEC rate shall be recalculated once each year on each anniversary of the Effective Date (the "Rate Determination Date"). The initial Rate Determination Date shall be the first anniversary of the Effective Date. The methodology for recalculating the rates is as follows:
- Total Minutes = Total minutes of use of Local Traffic delivered by US LEC to BellSouth for the most recent billed month.
- Total Compensation = The total call transport and termination charges billed by BellSouth to US LEC pursuant to Section 6.2.1 for Local Traffic delivered by US LEC to BellSouth for the most recent billed month.
- Compensation Rate = Total Compensation ÷ Total Minutes
- 6.2.2.1 In states that have established a composite rate structure for reciprocal compensation (Florida, Louisiana, and South Carolina), BellSouth shall pay US LEC the applicable composite rate or rates as set forth in Exhibit A to this Attachment 3, in lieu of the rates described above. In Florida and Louisiana, the Tandem Local Interconnection rate shall be the applicable composite rate for US LEC.
- 6.2.2.2 If the rates in Exhibit A to this Attachment 3 are modified during the term of this Agreement as a result of an order of the FCC, the Commission, or a court of competent jurisdiction, or an intervening change in the applicable law, then the rate charged by US LEC under this Section 6.2.2 shall be adjusted as follows: the effective date of the change in BellSouth's rates shall be the Rate Determination Date; but BellSouth's charges to US LEC for the most recent billed month shall be recomputed as if the new rates had been in effect at that time.
- 6.3 The Parties acknowledge that they have been unable to agree on an appropriate mechanism for inter-carrier compensation in the case of Dial-

Up Internet Traffic. As an interim measure pending a ruling by the FCC, the originating Party shall pay the terminating Party inter-carrier compensation for Dial-Up Internet Traffic at the same rate applicable to Local Traffic under Section 6.2, above. These payments shall be subject to later true-up based upon any final decision of the FCC establishing rules governing inter-carrier compensation for Dial-Up Internet Traffic; or, to the extent such FCC rules allow the Commission to determine such compensation, then based on a final decision of the Commission.

6.3.1 Interconnection with Enhanced Service Providers (ESPs)/Information Service Providers (ISPs). ESP/ISP traffic shall be treated as Local Traffic to the extent that the facilities used by the ESP or ISP are local in nature. If the facilities used by the ESP or ISP are interstate in nature, but the ESP or ISP subscribes to local exchange service, then traffic to or from these providers shall be treated as Dial-Up Internet Traffic.

6.4 The Parties shall route Local, Dial-Up Internet and IntraLATA Toll Traffic to each other for transport and termination as provided in this Attachment. The originating Party shall be responsible for recording and measuring all usage in accordance with this paragraph, subject to the provisions of Section 6.5.

6.3 Neither Party shall represent switched access traffic as Local Traffic for purposes of payment of reciprocal compensation.

DISAGREE – 6.4:

BELLSOUTH PROPOSAL TO 6.4:

6.4 Percent Local Usage. Each Party will report to the other a Percentage Local Usage ("PLU"). The application of the PLU will determine the amount of local minutes to be billed to the other Party. For purposes of developing the PLU, each Party shall consider every local call and every long distance call, excluding intermediary traffic. Effective on the first of January, April, July and October of each year, each Party shall provide a positive report updating the PLU. Detailed requirements associated with PLU reporting shall be as set forth in BellSouth's Standard Percent Local Use Reporting Platform for Interconnection Purchasers, as it is amended from time to time during this Agreement. Notwithstanding the foregoing,

where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate local usage compensation to be paid.

US LEC PROPOSAL TO 6.4 (proposal numbered to follow US LEC proposal in 6.1

- 6.4):

6.45

Percent Local Usage. Each Party will report to the other a Percentage Local Usage ("PLU"). The originating Party shall determine and report the PLU as if Dial-up Internet Traffic were local usage. The terminating Party shall be responsible for determining and reporting on its bills the portion of the local minutes as determined by the PLU that is actually by the PLU that is actually Dial-up Internet Traffic. For purposes of developing the PLU, each Party shall consider every local call and every long distance call, excluding intermediary traffic. Effective on the first of January, April, July and October of each year, each Party shall provide a positive report updating the PLU. Detailed requirements associated with PLU reporting shall be as set forth in BellSouth's Standard Percent Local Use Reporting Platform for Interconnection Purchasers, as it is amended from time to time during this Agreement. Notwithstanding the foregoing, where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate local usage compensation to be paid.

6.5

Percentage Interstate Usage. For combined interstate and intrastate traffic terminated by BellSouth over US LEC switched access facilities, US LEC will be required to provide a projected Percentage Interstate Usage ("PIU") to BellSouth. All jurisdictional report requirements, rules and regulations for Interexchange Carriers specified in BellSouth's Intrastate Access Services Tariff will apply to US LEC. After interstate and intrastate traffic percentages have been determined by use of PIU procedures, the PLU factor will be used for application and billing of local interconnection. Notwithstanding the foregoing, where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate local usage compensation to be paid. Nothing herein shall be deemed to permit US LEC to terminate switched access traffic to BellSouth over any facilities other than switched access facilities.

- 6.6 Audits. On thirty (30) days written notice, each Party must provide the other the ability and opportunity to conduct an annual audit to ensure the proper billing of traffic. BellSouth and US LEC shall retain records of call detail for a minimum of nine months from which a PLU and/or PIU can be ascertained. The audit shall be accomplished during normal business hours at an office designated by the Party being audited. Audit requests shall not be submitted more frequently than one (1) time per calendar year. Audits shall be performed by a mutually acceptable independent audit paid for by the Party requesting the audit. The PLU and/or PIU shall be adjusted based upon the audit results and shall apply to the usage for the quarter the audit was completed, to the usage for the quarter prior to the completion of the audit, and to the usage for the two quarters following the completion of the audit. If, as a result of an audit, either Party is found to have overstated the PLU and/or PIU by twenty percentage points (20%) or more, that Party shall reimburse the auditing Party for the cost of the audit.

6.7 True-up

This section applies only to North Carolina and Tennessee.

- 6.7.1 The interim prices for Local Interconnection Call Transport and Termination provided for in this Attachment 3 shall be subject to true-up according to the following procedures.
- 6.7.2 The interim prices shall be trued-up, either up or down, based on final prices determined either by further agreement between the Parties, or by a final order (including any appeals) of the Commission which final order meets the criteria of (3) below. The Parties shall implement the true-up by comparing the actual volumes and demand for each item, together with interim prices for each item, with the final prices determined for each item. Each Party shall keep its own records upon which the true-up can be based, and any final payment from one Party to the other shall be in an amount agreed upon by the Parties based on such records. In the event of any disagreement as between the records or the Parties regarding the amount of such true-up, the Parties agree that the body having jurisdiction over the matter shall be called upon to resolve such differences, or the Parties may mutually agree to submit the matter to the Dispute Resolution process in accordance with the provisions of Section 12 of the General Terms and Conditions and Attachment 1 of the Agreement.
- 6.7.3 The Parties may continue to negotiate toward final prices, but in the event that no such agreement is reached within nine (9) months, either Party may petition the Commission to resolve such disputes and to determine

final prices for each item. Alternatively, upon mutual agreement, the Parties may submit the matter to the Dispute Resolution Process set forth in the General Terms and Conditions of the Agreement, so long as they file the resulting Agreement with the Commission as a "negotiated agreement" under Section 252(e) of the Act.

6.7.4 A final order of this Commission that forms the basis of a true-up shall be the final order as to prices based on appropriate cost studies, or potentially may be a final order in any other Commission proceeding which meets the following criteria:

- (a) BellSouth and US LEC are entitled to be a full Party to the proceeding;
- (b) It shall apply the provisions of the federal Telecommunications Act of 1996, including but not limited to Section 252(d)(1) (which contains pricing standards) and all then-effective implementing rules and regulations; and,
- (c) It shall include as an issue the geographic deaveraging of unbundled element prices, which deaveraged prices, if any are required by said final order, shall form the basis of any true-up.

6.8 Compensation for intraLATA toll traffic

Compensation of intraLATA toll traffic between BellSouth and networks shall occur as follows:

6.8.1 IntraLATA Toll Traffic. IntraLATA toll traffic is traffic that is not Local or switched access per this Agreement

6.8.2 Compensation for intraLATA toll traffic. For terminating its intraLATA toll traffic on the other company's network, the originating Party will pay the terminating Party BellSouth's current intrastate or interstate, whichever is appropriate, terminating switched access tariff rate, inclusive of the Interconnection Charge and the Carrier Common Line rate elements of the switched access rate. See BellSouth's Intrastate or Interstate Access Services Tariff. The appropriate charges will be determined by the routing of the call. If US LEC is the BellSouth end user's presubscribed interexchange carrier or if the BellSouth end user uses US LEC as an interexchange carrier on a 101XXXX basis, BellSouth will charge US LEC the appropriate BellSouth tariff charges for originating switched access services.

- 6.8.3 Compensation for 800 Traffic. Each Party shall compensate the other pursuant to the appropriate originating switched access charges, including the database query charge, for the origination of 800 traffic terminated to the other Party.
- 6.8.4 Records for 800 Billing. Each Party will provide to the other the appropriate records necessary for billing intraLATA 800 customers. The records provided will be in a standard EMR format for a fee of \$0.013 per record.
- 6.8.5 800 Access Screening. Should US LEC require 800 Access Ten Digit Screening Service from BellSouth, it shall either have signaling transfer points connecting directly to BellSouth's local signaling transfer point, another SCP or SS7 interconnection option mutually agreed upon by the Parties for service control point database query information. US LEC shall utilize SS7 signaling links, ports and usage as set forth in Attachment 2. US LEC will not utilize switched access FGD service. 800 Access Ten Digit Screening Service is an originating service that is provided via 800 Switched Access Service trunk groups from BellSouth's SS7 equipped end office or access tandem providing an IXC identification function and delivery of a call to the IXC based on the dialed ten digit number. The terms and conditions for this service are set out in BellSouth's Intrastate Access Services Tariff as amended.
- 6.9 Mutual Provision of Switched Access Service.
- 6.9.1 Switched Access. Switched Access and any associated services are as defined in the BellSouth Access Tariff subject to any future rulings of the FCC or the Commission that require changes to such definition.
- 6.9.2 When BellSouth and US LEC provide an access service connection between an interexchange carrier ("IXC") and each other, each Party will provide its own access services to the IXC on a multi-bill, multi-tariff meet-point basis. Each Party will bill its own access services rates to the IXC with the exception of the interconnection charge. The interconnection charge will be billed by the Party providing the end office function. BellSouth will use the Multiple Exchange Carrier Access Billing system to establish meet point billing for all applicable traffic. Thirty (30)-day billing periods will be employed for these arrangements. The recording Party agrees to provide to the initial billing company, at no charge, the switched access detailed usage data within no more than sixty (60) days after the recording date. The initial billing company will provide the switched access summary usage data to all subsequent billing companies within 10 days of rendering the initial bill to the IXC. Each company will notify the

other when it is not feasible to meet these requirements so that the customers may be notified for any necessary revenue accrual associated with the significantly delayed recording or billing. As business requirements change data reporting requirements may be modified as necessary.

- 6.9.3 In the event that either Party fails to provide switched access detailed usage data to the other Party within 90 days after the recording data and the receiving Party is unable to bill and/or collect access revenues due to the sending Party's failure to provide such data within said time period, then the Party failing to send the data as specified herein shall be liable to the other Party in an amount equal to the unbillable or uncollectible revenues. Each company will provide complete documentation to the other to substantiate any claim of unbillable access revenues. A negotiated settlement will be agreed upon between the companies.
- 6.9.4 Each company will retain for a minimum period of sixty (60) business days, access message detail sufficient to recreate any data which is lost or damaged by their company or any third party involved in processing or transporting data.
- 6.9.5 Each company agrees to recreate the lost or damaged data within forty-eight (48) hours of notification by the other or by an authorized third party handling the data.
- 6.9.6 Each company also agrees to process the recreated data within forty-eight (48) hours of receipt at its data processing center.
- 6.9.7 All claims should be filed with the other company within 120 days of the receipt of the date of the unbillable usage.
- 6.9.8 The Initial Billing Company shall keep records of its billing activities relating to jointly-provided Intrastate and Interstate access services in sufficient detail to permit the Subsequent Billing Company to, by formal or informal review or audit, to verify the accuracy and reasonableness of the jointly-provided access billing data provided by the Initial billing Company. Each company agrees to cooperate in such formal or informal reviews or audits and further agrees to jointly review the findings of such reviews or audits in order to resolve any differences concerning the findings thereof.
- 6.10 Transit Traffic Service. Each Party will provide tandem switching and transport services for the others transit traffic. Transit traffic is traffic originating on one Party's network that is switched and transported by the other Party and delivered to a third party's network. Nothing herein shall be deemed to permit US LEC to terminate switched access traffic to

BellSouth over any facilities other than switched access facilities. Rates for local transit traffic shall be the applicable call transport and termination charges as set forth in Exhibit A to this Attachment. Rates for intraLATA toll and Switched Access transit traffic shall be the applicable call transport and termination charges as set forth in BellSouth Interstate and Intrastate Switched Access tariffs. Billing associated with all transit traffic shall be pursuant to MECAB procedures. Wireless Type 1 traffic shall be treated as Local, not Transit, Traffic from a routing and billing perspective. Wireless Type 2A traffic shall be treated as Local, not Transit Traffic from a routing perspective until BellSouth and the Wireless carrier have the capability to properly meet-point-bill in accordance with MECAB.

- 6.10.1 The delivery of traffic that transits the BellSouth network and is transported to another carrier's network is excluded from any BellSouth billing guarantees and will be delivered at the rates stipulated in this agreement to a terminating carrier. BellSouth agrees to deliver this traffic to the terminating carrier; provided, however, that US LEC is solely responsible for negotiating and executing any appropriate contractual agreements with the terminating carrier for the receipt of this traffic through the BellSouth network. BellSouth will not be liable for any compensation to the terminating carrier or to US LEC. Further, US LEC agrees to compensate BellSouth for the applicable charges as set forth in Exhibit A to this Attachment for the delivery of transit traffic to a connecting carrier on behalf of US LEC. Additionally, the Parties agree that any billing to a third party or other telecommunications carrier under this section shall be pursuant to MECAB procedures.

7. Frame Relay Service

In addition to the Local Interconnection services set forth above, BellSouth will offer a network to network Interconnection arrangement between BellSouth's and US LEC's frame relay switches as set forth below.

- 7.1 The following provisions will apply only to Frame Relay Service and Exchange Access Frame Relay Service, where traffic is being exchanged between US LEC and BellSouth Frame Relay Switches in the same LATA.
- 7.2 The Parties agree to establish two-way Frame Relay facilities between their respective Frame Relay Switches to the mutually agreed upon Frame Relay Service point(s) of interconnection ("POI(s)") within the

LATA. All POIs shall be within the Frame Relay Network Serving Areas as defined in Section A40 of the BellSouth's General Subscriber Service Tariff.

- 7.3 Upon the request of either Party, such interconnection will be established where BellSouth and US LEC have Frame Relay Switches in the same LATA. Where there are multiple Frame Relay switches in one central office, an interconnection with any one of the switches will be considered an interconnection with all of the switches at that central office for purposes of routing packet traffic.
- 7.3.1 The Parties agree to provision local and IntraLATA Frame Relay Service and Exchange Access Frame Relay Service (both intrastate and interstate) over Frame Relay interconnection facilities between the respective Frame Relay switches and the POIs.
- 7.3.2 The Parties agree to assess each other reciprocal charges for the facilities that each provides to the other according to the Percent Local Circuit Use Factor (PLCU), determined as follows:
 - 7.3.2.1 If the data packets originate and terminate in locations in the same BellSouth Frame Relay service area, the traffic is considered local. Frame Relay framed packet data is transported within Virtual Circuits (VC). For the purposes of this Agreement, if all the data packets transported within a VC remain within the BellSouth Frame Relay service area, the traffic on that VC is local ("Local VC").
 - 7.3.2.2 If the originating and terminating locations of the two way packet data traffic are not in the same BellSouth Frame Relay service area, the traffic on that VC is interLATA ("InterLATA VC").
 - 7.3.2.3 The PLCU is determined by dividing the total number of Local VCs, by the total number of VCs on each Frame Relay facility. To facilitate implementation, US LEC may determine its PLCU in aggregate, by dividing the total number of Local VCs in a given BellSouth Frame Relay service area by the total number of VCs in that BellSouth Frame Relay service area. The Parties agree to renegotiate the method for determining PLCU, at BellSouth's request, and within ninety (90) days, if BellSouth notifies US LEC that it has found that this method does not adequately represent the PLCU.
 - 7.3.2.4 If there are no VCs on a facility when it is billed, the PLCU will be zero.
- 7.4 BellSouth will provide the circuit between the Parties' respective Frame Relay Switches. The Parties will be compensated as follows: BellSouth

will invoice, and US LEC will pay, the total non-recurring and recurring charges for the circuit based upon the rates set forth in BellSouth's Interstate Access Tariff, FCC No. 1. US LEC will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed charges for the circuit by one-half of US LEC's PLCU.

- 7.5 The Parties agree to compensate each other for Frame Relay network-to-network interface (NNI) ports based upon the NNI rates set forth in BellSouth's Interstate Access Tariff, FCC No. 1. Compensation for each pair of NNI ports will be calculated as follows: BellSouth will invoice, and US LEC will pay, the total non-recurring and recurring charges for the NNI port. US LEC will then invoice, and BellSouth will pay, an amount calculated by multiplying the BellSouth billed non-recurring and recurring charges for the NNI port by US LEC's PLCU.
- 7.6 Each Party agrees that there will be no charges to the other Party for its own subscriber's Permanent Virtual Circuit (PVC) rate elements for the local PVC segment from its Frame Relay switch to its own subscriber's premises. PVC rate elements include the Data Link Connection Identifier (DLCI) and Committed Information Rate (CIR).
- 7.6.1 For the PVC segment between the US LEC and BellSouth Frame Relay switches, compensation for the PVC charges for both Parties is based upon the rates in BellSouth's Interstate Access Tariff, FCC No. 1. Compensation for PVC rate elements will be calculated as follows:
- 7.6.1.1 If US LEC orders a VC connection between a BellSouth subscriber's PVC segment and a PVC segment from the BellSouth Frame Relay switch to the US LEC Frame Relay switch, BellSouth will invoice, and US LEC will pay, the total non-recurring and recurring PVC charges for the PVC segment between the BellSouth and US LEC Frame Relay switches. If the VC is a Local VC, US LEC will then invoice and BellSouth will pay, the total nonrecurring and recurring PVC charges billed for that segment. If the VC is not local, no compensation will be paid to US LEC for the PVC segment.
- 7.6.1.2 If one Party (for the purposes of this paragraph the "First Party") orders a Local VC connection between the other Party's (for the purposes of this paragraph the "Second Party") subscriber's PVC segment and a PVC segment from the Second Party Frame Relay switch to the First Party Frame Relay switch, the First Party will invoice, and the Second Party will pay, the total non-recurring and recurring PVC and CIR charges for the PVC segment between the Frame Relay switches. If the VC is a Local VC, the Second Party will then invoice and the First Party will pay the total

non-recurring and recurring PVC and CIR charges billed for that segment. If the VC is not local, no compensation will be paid to the Second Party for the PVC segment.

- 7.6.1.3 The Parties agree to compensate each other reciprocally and symmetrically for requests to change a PVC segment or PVC service order record, according to the Feature Change charge as set forth in the BellSouth access tariff BellSouth Tariff FCC No. 1.
- 7.6.1.4 If either Party requests a change to a Local VC, the other Party will invoice and be paid a Feature Change charge for each affected PVC segment.
- 7.6.2 The Parties agree to limit the sum of the CIR for the VCs on a DS1 NNI port to not more than three times the port speed, or not more than six times the port speed on a DS3 NNI port.
- 7.6.3 Except as expressly provided herein, this Agreement does not address or alter in any way either Party's provision of Exchange Access Frame Relay Service or interLATA Frame Relay Service. All charges by each Party to the other for carriage of Exchange Access Frame Relay Service or interLATA Frame Relay Service are included in the BellSouth access tariff BellSouth Tariff FCC No, 1.
- 7.7 US LEC will identify and report quarterly to BellSouth the PLCU of the Frame Relay facilities it uses, per section 10.3.2.3 above.
- 7.8 Either Party may request a review or audit of the various service components, consistent with the provisions of section E2 of the BellSouth State Access Services tariffs or Section 2 of the BellSouth FCC No.1 Tariff.
- 7.9 If during the term of this Agreement, BellSouth obtains authority to provide interLATA Frame Relay in any State, the Parties agree to renegotiate this arrangement for the exchange of Frame Relay Service Traffic within one hundred eighty (180) days of the date BellSouth receives interLATA authority. In the event the Parties fail to renegotiate this Section 10 within the one hundred eighty day period, they will submit this matter to the FCC or Commission(s) for resolution, as appropriate.

8. Operational Support Systems (OSS) Rates

BellSouth has developed and made available the following mechanized systems by which US LEC may submit LSRs electronically.

LENS	Local Exchange Navigation System
EDI	Electronic Data Interface
EDI-PC	Electronic Data Interface – Personal Computer
TAG	Telecommunications Access Gateway

LSRs submitted by means of one of these interactive interfaces will incur an OSS electronic ordering charge as specified in the table below. An individual LSR will be identified for billing purposes by its Purchase Order Number (PON). LSRs submitted by means other than one of these interactive interfaces (mail, fax, courier, etc.) will incur a manual order charge as specified in the table below:

OPERATIONAL SUPPORT SYSTEMS	AL, GA, LA, MS, SC	FL, KY, NC, TN
OSS LSR charge, per LSR received from the CLEC by one of the OSS interactive interfaces	\$3.50 SOMECH	\$3.50 SOMECH
Incremental charge per LSR received from the CLEC by means other than one of the OSS interactive interfaces	See applicable rate element	\$19.99 SOMAN

Note: In addition to the OSS charges, applicable discounted service order and related discounted charges apply per the tariff.

8.1 Denial/Restoral OSS Charge

In the event US LEC provides a list of customers to be denied and restored, rather than an LSR, each location on the list will require a separate PON and, therefore will be billed as one LSR per location.

8.2 Cancellation OSS Charge

US LEC will incur an OSS charge for an accepted LSR that is later canceled by US LEC.

Note: Supplements or clarifications to a previously billed LSR will not incur another OSS charge.

8.3 Network Elements and Other Services Manual Additive

The Commissions in Alabama, Georgia, Louisiana, Mississippi and South Carolina have ordered incremental manual non-recurring charges (NRC) for Network Elements and Other Services ordered by means other than one of the interactive interfaces. These ordered Network Elements and Other Services manual additive NRCs will apply in these states, rather than the charge per LSR.

8.4

Threshold Billing Plan

The Parties agree that US LEC will incur the mechanized rate for all LSRs, both mechanized and manual, if the percentage of mechanized LSRs to total LSRs **meets or exceeds** the threshold percentages shown below:

Year	Ratio: Mechanized/Total LSRs
1999	70%
2000	80%
2001	90%

The threshold plan will be discontinued in 2002.

BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

BELLSOUTHUS LEC RATES
LOCAL INTERCONNECTION

DISAGREED: US LEC PROPOSED RATES (HIGHLIGHTED):
(Tandem Local Interconnection)
(Composite Reciprocal Compensation-SC)

RATES BY STATE										
DESCRIPTION	USOC	AL	FL	GA	KY	LA	MS	NC	SC	TN
LOCAL INTERCONNECTION (CALL TRANSPORT AND TERMINATION)

 US LEC of North Carolina Inc.
 Charlotte Trunking Diagram

Attachment 4

Physical Collocation

BELLSOUTH PHYSICAL COLLOCATION

1. SCOPE OF ATTACHMENT

The negotiated rates, terms and conditions set forth in this Attachment pertain to the provisioning of collocation space.

1.1 Scope of Attachment. BellSouth shall provide to US LEC, on rates, terms and conditions that are just, reasonable and nondiscriminatory, for physical collocation of any type of equipment that is used or useful for interconnection or access to unbundled network elements. This Attachment shall only apply when US LEC is occupying the collocation space as a sole occupant or as a Host pursuant to Section 4.

1.2 Right to occupy. Subject to Section 4 of this Attachment, BellSouth shall provide to US LEC a right to occupy that certain area designated by BellSouth within a BellSouth central office premises, of a size which is specified by US LEC and agreed to by BellSouth (hereinafter "Collocation Space"). Notwithstanding the foregoing, BellSouth shall consider in its designation for cageless collocation any unused space within the BellSouth central office premises, or any request by US LEC for any caged or cageless specific space within a BellSouth central office premises and will accommodate such request if reasonably available. The size specified by US LEC may contemplate a request for space sufficient to accommodate US LEC's growth within a two year period unless otherwise agreed to by the Parties.

1.2.1 Space Reclamation. In the event of space exhaust within a central office premises, US LEC may be required to release space to BellSouth to be allocated to other physical collocation applicants when a minimum of fifty percent of the total amount of space in US LEC's collocation arrangement is not being utilized within the first year of operation, or 100% of the total amount of space by the end of the second year of operation. US LEC will first have the option of subleasing any amount of space not being utilized pursuant to this sub-Section in lieu of releasing space to BellSouth.

1.3 Use of Space. US LEC shall use the Collocation Space for the purposes of installing, maintaining and operating US LEC's equipment (to include testing and monitoring equipment) used or useful primarily to interconnect with BellSouth services and facilities, including access to unbundled network elements, for the provision of telecommunications services. Pursuant to Section 5 following, US LEC may at its option, place US LEC-owned fiber entrance facilities to the Collocation Space. In addition to, and not in lieu of, interconnection to BellSouth services and facilities, US LEC may connect to other interconnectors within the designated BellSouth Central Office (including to its other virtual or physical collocated arrangements) through co-carrier cross connect facilities designated by US LEC pursuant to section 5.6 following. The Collocation Space may be used for no other purposes except as specifically described herein or authorized in writing by BellSouth.

1.4 Rates and charges. The rates and charges are as set forth in Exhibit A and shall be applied pursuant to Section 7.7 of this Attachment.

2. SPACE NOTIFICATION

2.1 Availability of Space. Upon submission of an application pursuant to Section 6, BellSouth provide US LEC physical collocation, pursuant to the terms of this Attachment, at any BellSouth central office premises, unless BellSouth has determined, such determination will be subject to review by the applicable state Commission, that there is no space available due to space limitations or due to technical infeasibility. BellSouth will respond to an application within ten (10) business days as to whether space is available or not available within a BellSouth central office premises.

2.2 Reporting. Upon request from US LEC, BellSouth will provide a written report specifying the amount of collocation space available at the central office premises requested, the number of collocators present at the central office premises, any modifications in the use of the space since the last report or the central office premises requested and the measures BellSouth is taking to make additional space available for collocation arrangements.

2.2.1 The request from US LEC must be written and must include the central office premises and Common Language Location Identification (CLLI) code of the central office premises. Such information regarding central office premises and CLLI code is located in the National Exchange Carriers Association (NECA) Tariff FCC No. 4.

2.2.2 BellSouth will respond to a request for a particular Central Office location within ten (10) business days of receipt of such request. BellSouth will make best efforts to respond in ten (10) business days to such a request when the request includes up to and including five (5) Central Office locations within the same state. The response time for requests of more than five (5) shall be negotiated between the Parties. If BellSouth cannot meet the ten business day response time for the second through fifth requests, BellSouth will all notify US LEC and inform US LEC of the time frame under which it can respond, which shall be as soon as reasonably possible.

2.3 Denial of Application. After notifying US LEC that BellSouth has no available space in the requested Central Office ("Denial of Application"), BellSouth will allow US LEC, upon request, to tour the entire Central Office within ten (10) business days of such Denial of Application. In order to schedule said tour within ten (10) business days, the request for a tour of the Central Office must be received by BellSouth within five (5) business days of the Denial of Application. BellSouth will provide virtual collocation pursuant to Section 6.9 if physical collocation is not practical for technical reasons or due to space limitations.

2.4 Filing of Petition for Waiver. Upon Denial of Application BellSouth will timely file a petition with the Commission pursuant to 47 U.S.C. § 251(c)(6).

2.5 Waiting List. On a first come first served basis, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the central office premises is out of space, have submitted a Letter of Intent to collocate. BellSouth will notify the telecommunications carriers on the waiting list when space becomes available according to how much space becomes available and the position of telecommunications carrier on said waiting list. Upon request BellSouth will advise US LEC as to its position on the list.

2.6 Public Notification. BellSouth will maintain on its Interconnection Services website a notification document that will indicate all central office premises that are without available space. BellSouth shall update such document within ten (10) business days of the Denial of Application date. BellSouth will also post a document on its Interconnection Services website that contains a general notice where space has become available in a Central Office previously on the space exhaust list. BellSouth shall allocate said available space pursuant to the waiting list referenced in Section 2.5.

2.7 State Agency Procedures. Notwithstanding the foregoing, should any state regulatory agency impose a procedure different than procedures set forth in this section, that procedure shall supersede the requirements set forth herein.

2. COLLOCATION OPTIONS

3.1 Cageless. Except where local building code does not allow cageless collocation, BellSouth shall provide US LEC collocation of US LEC's equipment and facilities without requiring the construction of a cage or similar structure and without requiring the creation of a separate entrance to the Collocation Space. BellSouth shall provide US LEC direct access to its equipment and facilities but may require US LEC to use a central entrance to the BellSouth Central Office. BellSouth shall make cageless collocation available in single bay increments pursuant to Section 7. BellSouth shall provide cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, (e.g. special cable racking, isolated ground plane), US LEC must provide the equipment layout, including spatial dimensions for such equipment pursuant to generic requirements contained in BellCore (Telcordia) GR-63-Core and shall be responsible for constructing all special technical requirements associated with such equipment pursuant to Section 6.5 following. To the extent local building codes affecting collocation are modified, repealed, or the code authority agrees not to enforce said codes then BellSouth shall provide ubiquitous cageless collocation.

3.2 Cages and Adjacent Arrangement Enclosures. BellSouth shall authorize the enclosure of US LEC's equipment and facilities at US LEC's option or if required by local building code (to the extent modified in Section 3.1). US LEC must arrange with a BellSouth certified contractor to construct a collocation arrangement enclosure in accordance with BellSouth's guidelines and specifications and at its sole expense. BellSouth will provide guidelines and specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's standard enclosure specification, US LEC and US LEC's BellSouth certified contractor must comply with local building code requirements (to the extent modified in Section 3.1). US LEC's BellSouth certified contractor shall be responsible for filing and receiving any and all necessary permits and/or licenses for such construction. The Certified Vendor shall bill US LEC directly for all work performed for US LEC pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges imposed by the Certified Vendor. US LEC must provide the local BellSouth building contact with two Access Keys used to enter the locked enclosure. Except in case of emergency, BellSouth will not access US LEC's locked enclosure prior to notifying US LEC.

3.2.1 BellSouth has the right to review US LEC's plans and specifications prior to allowing construction to start. BellSouth has the right to inspect the enclosure after construction to make sure it is designed and constructed according to BellSouth's guidelines and specifications and to require US LEC to remove or correct at US LEC's cost any structure that does not meet these standards.

3.3 Shared (Subleased) Caged Collocation. US LEC may allow other telecommunications carriers to share US LEC's caged collocation arrangement pursuant to terms and conditions agreed to by US LEC ("Host") and other telecommunications carriers ("Guests") and pursuant to this section with the following exceptions: (1) where local building code does not allow Shared (Subleased) Caged Collocation (to the extent modified in Section 3.1) and (2) where the BellSouth central office premises is located within a leased space and BellSouth is prohibited by said lease from offering such an option. To the extent the lease is modified, or the Lessor agrees not to enforce said lease provision, then BellSouth shall authorize shared caged collocation. The terms and conditions of the agreement between the Host and its Guests shall be written and a copy

provided to the BellSouth contact specified in Section 15 at the submission of the first Application for a Guest. Further, said agreement shall incorporate by reference the rates, terms, and conditions of this Attachment between BellSouth and US LEC.

3.3.1 US LEC shall be the sole interface and responsible party to BellSouth for the purpose of submitting applications for initial and additional equipment placements of Guest; for assessment of rates and charges contained within this Attachment; and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest, its employees and agents. The Host will be responsible for the payment of any applicable fees associated with the placement of Guests equipment within the Collocation Space. Notwithstanding the foregoing, Guest may arrange directly with BellSouth for the provision of the interconnecting facilities between BellSouth and Guest and for the provisions of the services and access to unbundled network elements.

3.3.2 US LEC shall indemnify and hold harmless BellSouth from any and all claims, actions, - causes of action, of whatever kind or nature arising out of the presence of US LEC's Guests in the Collocation Space, with the exception of claims arising out of or relating to services or facilities provided directly by BellSouth to the Guest, or by the Guest to BellSouth.

3.4 Adjacent Collocation. BellSouth will provide adjacent collocation arrangements ("Adjacent Arrangement") where space within the Central Office is legitimately exhausted, subject to technical feasibility, where the Adjacent Arrangement does not interfere with access to existing or planned structures or facilities on the Central Office property and where permitted by zoning and other applicable state and local regulations. The Adjacent Arrangement shall be constructed or procured by US LEC and in conformance with BellSouth's design and construction specifications. Further, US LEC shall construct, procure, maintain and operate said Adjacent Arrangement(s) pursuant to all of the terms and conditions set forth in this Attachment. Rates shall be negotiated at the time of the request for Adjacent Collocation.

3.4.1 Should US LEC elect such option, US LEC must arrange with a BellSouth certified contractor to construct an Adjacent Arrangement structure in accordance with BellSouth's guidelines and specifications. BellSouth will provide guidelines and specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's standard specification, US LEC and US LEC's contractor must comply with local building code requirements. US LEC's contractor shall be responsible for filing and receiving any and all necessary zoning, permits and/or licenses for such construction. US LEC's BellSouth Certified Vendor shall bill US LEC directly for all work performed for US LEC pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges imposed by the Certified Vendor. US LEC must provide the local BellSouth building contact with two cards, keys or other access device used to enter the locked enclosure. Except in cases of emergency, BellSouth shall not access US LEC's locked enclosure prior to notifying US LEC.

3.4.2 BellSouth maintains the right to review US LEC's plans and specifications prior to construction of an Adjacent Arrangement(s). BellSouth may inspect the Adjacent Arrangement(s) following construction and prior to commencement, as defined in Section 4.1 following, to ensure the design and construction comply with BellSouth's guidelines and specifications. BellSouth may require US LEC, at US LEC's sole cost, to correct any deviations from BellSouth's guidelines and specifications found during such inspection(s), up to and including removal of the Adjacent Arrangement, within five (5) business days of BellSouth's inspection, unless the Parties mutually agree to an alternative time frame.

3.4.3 US LEC shall provide a concrete pad, the structure housing the arrangement, HVAC, lighting, and all facilities that connect the structure (i.e. racking, conduits, etc.) to the BellSouth point of

interconnection. At US LEC's option, BellSouth shall provide an AC power source and access to physical collocation services and facilities subject to the same nondiscriminatory requirements as applicable to any other physical collocation arrangement.

3.4.4 BellSouth shall allow Shared (Subleased) Caged Collocation within an Adjacent Arrangement pursuant to the terms and conditions set forth in Section 3.3 proceeding.

4. OCCUPANCY

4.1 Commencement Date. The "Commencement Date" shall be the day US LEC's equipment becomes operational as described in Article 4.2, following.

4.2 Occupancy. BellSouth will notify US LEC in writing that the Collocation Space is ready for occupancy within three (3) business days of the time that such space becomes ready for occupancy. US LEC must place operational telecommunications equipment in the Collocation Space and connect with BellSouth's network within one hundred eighty (180) days after receipt of such notice. US LEC must notify BellSouth in writing that collocation equipment installation is complete and is operational with BellSouth's network. BellSouth may, at its option, not process orders for interconnected service until receipt of such notice. US LEC may request an extension beyond one hundred (180) days upon a demonstration that it has made a good faith effort to complete installation by the prescribed date or circumstances beyond its reasonable control prevented US LEC from completing installation by the prescribed date. BellSouth shall not unreasonably withhold its consent to such extension and shall consent to any extension required because of BellSouth's actions or inactions. Termination of US LEC's rights to the Collocation Space pursuant to this paragraph shall not operate to release US LEC from its obligation to reimburse BellSouth for all costs reasonably incurred by BellSouth in preparing the Collocation Space, but rather such obligation shall survive this Attachment. To the extent BellSouth places a subsequent collocator in the Collocation Space, BellSouth shall reimburse US LEC an amortized amount of the costs incurred by BellSouth in preparing the Collocation Space based upon the amount of time the Collocation Space was unoccupied pursuant to this paragraph until its occupancy by the subsequent collocator. However, if US LEC subsequently renews its request and the same Collocation Space remains available, BellSouth shall not impose any additional charges for preparation of the same space a second time with the exception of the applicable Application Fee, provided that the request is identical to the original request and that no additional network infrastructure (e.g. power, cable racking) or mechanical changes are required. For purposes of this paragraph, US LEC's telecommunications equipment will be deemed operational when cross-connected to BellSouth's network for the purpose of service provision.

4.3 Termination. Except where otherwise agreed to by the Parties, US LEC may terminate occupancy in a particular Collocation Space upon thirty (30) days prior written notice to BellSouth. Upon termination of such occupancy, US LEC at its expense shall remove its equipment and other property from the Collocation Space. US LEC shall have thirty (30) days from the termination date to complete such removal, including the removal of all equipment and facilities of US LEC's Guests; provided, however, that US LEC shall continue payment of monthly fees to BellSouth until such date as US LEC has fully vacated the Collocation Space. Should US LEC fail to vacate the Collocation Space within thirty (30) days from the termination date, BellSouth shall have the right to remove the equipment and other property of US LEC at US LEC's expense and with no liability for damage or injury to US LEC's property unless caused by the gross negligence or intentional misconduct of BellSouth. Upon expiration of this Attachment, US LEC shall surrender the Collocation Space to BellSouth in the same condition as when first occupied by the US LEC except for ordinary wear and tear. US LEC shall be responsible for the cost of removing any enclosure, together with all support

structures (e.g., racking, conduits), of an Adjacent Collocation arrangement at the termination of occupancy and restoring the grounds to their original condition except for ordinary wear and tear.

5. USE OF COLLOCATION SPACE

5.1 Equipment Type. BellSouth will provide US LEC collocation for any type of equipment used or useful for interconnection to BellSouth's network or for access to unbundled network elements in the provision of telecommunications services included but not limited to advanced telecommunications services. Such equipment used or useful for interconnection and access to unbundled network elements includes, but is not limited to transmission equipment including, but not limited to, optical terminating equipment and multiplexers, and digital subscriber line access multiplexers, routers, asynchronous transfer mode multiplexers, and remote switching modules. Nothing in this section requires BellSouth to permit collocation of equipment used solely to provide enhanced services; provided, however, that BellSouth may not place any limitations on the ability of requesting carriers to use all the features, functions, and capabilities of equipment collocated pursuant to this section.

5.1.1 Such equipment must at a minimum meet the following BellCore (Telcordia) Network Equipment Building Systems (NEBS) General Equipment Requirements: Criteria Level 1 requirements as outlined in the BellCore (Telcordia) Special Report SR-3580, Issue 1; equipment design spatial requirements per GR-63-CORE, Section 2; thermal heat dissipation per GR-063-CORE, Section 4, Criteria 77-79; acoustic noise per GR-063-CORE, Section 4, Criterion 128, and National Electric Code standards.

5.1.2 Neither Party shall use the Collocation Space for marketing purposes nor shall it place any identifying signs or markings in the area surrounding the Collocation Space or on the grounds of the central office premises, except as set forth in 5.1.3.

5.1.3 US LEC shall place a plaque or other identification affixed to US LEC's equipment to identify US LEC's equipment, including a list of emergency contacts with telephone numbers.

5.2 Entrance Facilities. US LEC may elect to place US LEC-owned or US LEC-leased fiber entrance facilities into the Collocation Space. BellSouth will reasonably designate the point of interconnection in close proximity to the Central Office building housing the Collocation Space, such as an entrance manhole or a cable vault which are physically accessible by both parties. US LEC will provide and place fiber cable at the point of interconnection of sufficient length to be pulled through conduit and into the splice location. US LEC will provide and install a sufficient length of fire retardant riser cable, to which the entrance cable will be spliced, which will extend from the splice location to the US LEC's equipment in the Collocation Space. In the event US LEC utilizes a non-metallic, riser-type entrance facility, a splice will not be required. US LEC must contact BellSouth for instructions prior to placing the entrance facility cable in the manhole and BellSouth shall respond in a reasonable and timely manner. US LEC is responsible for maintenance of the entrance facilities. At US LEC's option BellSouth will accommodate where technically feasible a microwave entrance facility pursuant to separately negotiated terms and conditions.

5.2.1 Dual Entrance. BellSouth will provide at least two interconnection points at each central office premises where there are at least two such interconnection points available and where capacity exists. Upon receipt of a request for physical collocation under this Attachment, BellSouth shall provide US LEC with information regarding BellSouth's capacity to accommodate dual entrance facilities. If conduit in the serving manhole(s) is available and is not reserved for another acceptable purpose for utilization within 12 months of the receipt of an application for collocation, BellSouth will make the requested conduit space available for

installing a second entrance facility to US LEC's arrangement. The location of the serving manhole(s) will be determined at the reasonable discretion of BellSouth. Where dual entrance is not available due to lack of capacity, BellSouth will so state in the Application Response.

5.2.2 Shared Use. US LEC may utilize spare capacity on an existing Interconnector entrance facility for the purpose of providing an entrance facility to another US LEC collocation arrangement within the same BellSouth Central Office. US LEC must arrange with BellSouth for BellSouth to splice the utilized entrance facility capacity to US LEC-provided riser cable.

5.2 Splicing in the Entrance Manhole. Should US LEC request a splice to occur in the entrance manhole(s), BellSouth may grant such a request, provided that BellSouth will not unreasonably withhold approval of requests to make such a splice. When the request for a splice is granted to US LEC by BellSouth, the Parties will work cooperatively on the request. US LEC shall ensure its employees or agents entering and/or performing work in the entrance manhole(s) are trained and comply with BellSouth procedures and OSHA requirements regarding access to manholes and that BellSouth personnel are notified and present for all entrances and work performed in the entrance manhole(s). Manhole covers shall be properly closed and secured at the conclusion of entry and/or work. Advance notification to BellSouth shall occur at a minimum of 48 hours prior to desired entry for normal work activities and at a minimum of 2 hours prior to desired entry in an out of service condition. Pursuant to this sub-Section, in the event either Party fails to be present at the agreed upon time and fails to notify the other Party of its cancellation a minimum of eight (8) hours in advance of its cancellation of the agreed upon time, except in the case of an emergency (e.g., a significant out of service condition), The offending Party shall reimburse the other its reasonable and demonstrable costs associated with the offending Parties' failure to meet the appointment time.

5.4 Demarcation Point. BellSouth will reasonably designate the point(s) of interconnection between US LEC's equipment and/or network and BellSouth's network. Each party will be responsible for maintenance and operation of all equipment/facilities on its side of the demarcation point. For 2-wire and 4-wire connections to BellSouth's network, the demarcation point shall be a common block on the BellSouth designated conventional distributing frame. US LEC shall be responsible for providing, and US LEC's BellSouth Certified Vendor shall be responsible for installing and properly labelling/stenciling, the common block, and necessary cabling pursuant to Section 6.4. For all other terminations BellSouth shall designate a demarcation point on a per arrangement basis. US LEC or its agent must perform all required maintenance to equipment/facilities on its side of the demarcation point, pursuant to subsection 5.5, following, and may self-provision cross-connects that may be required within the collocation space to activate service requests. At US LEC's option, a Point of Termination (POT) bay or frame may be placed in the Collocation Space.

5.5 US LEC's Equipment and Facilities. US LEC, or if required by this Attachment, US LEC's BellSouth certified vendor, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring, maintenance and repair of the equipment and facilities. Such equipment and facilities may include but are not limited to cable(s); equipment; and point of termination connections.

5.6 Co-Carrier Cross-connect. In addition to, and not in lieu of, obtaining interconnection with, or access to, BellSouth telecommunications services, unbundled network elements, and facilities, US LEC may directly connect to other Interconnectors within the designated BellSouth Central Office (including to its other virtual or physical collocated arrangements) through facilities owned by US LEC or through BellSouth facilities designated by US LEC, at US LEC's option. Such connections to other carriers may be made using either optical or electrical facilities. US LEC may deploy such optical or electrical connections directly between its own facilities and the facilities of other Interconnector(s) without being routed through BellSouth equipment.

5.6.1 If US LEC requests a co-Carrier cross-connect after the initial installation, USLEC must submit an application with a Subsequent Application Fee. US LEC must use a Certified Vendor to place the co-Carrier cross connect, except in cases where the US LEC equipment and the equipment of the other Interconnector are located within the same collocation area or are within contiguous collocation spaces. In cases where US LEC's equipment and the equipment of the other Interconnector are located in the same collocation area or are in contiguous collocation spaces, US LEC will have the option to deploy the co-Carrier cross connects between the sets of equipment. Where cable support structure exists for such connection there will be a recurring charge per linear foot of support structure used. When cable support structures do not exist and must be constructed a non-recurring charge for the individual case will be assessed.

5.7 Easement Space. From time to time BellSouth may require access to the Collocation Space. BellSouth retains the right to access such space for the purpose of making BellSouth equipment and building modifications (e.g., running, altering or removing racking, ducts, electrical wiring, HVAC, and cables). BellSouth will give reasonable notice to US LEC when access to the Collocation Space is required. US LEC may elect to be present whenever BellSouth performs work in the Collocation Space. The Parties agree that US LEC will not bear any of the expense associated with this work.

5.8 Access. Pursuant to Section 11, US LEC shall have access to the Collocation Space twenty-four (24) hours a day, seven (7) days a week. US LEC agrees to provide the name, social security number, and date of birth of each employee, contractor, or agents provided with Access Keys or cards ("Access Keys") prior to the issuance of said Access Keys. Access Keys shall not be duplicated under any circumstances. US LEC agrees to be responsible for all Access Keys and for the return of all said Access Keys in the possession of US LEC employees, contractors, Guests, or agents after termination of the employment relationship, contractual obligation with US LEC or upon the termination of this Attachment or the termination of occupancy of an individual collocation arrangement.

5.8.1 Lost or Stolen Access Keys. US LEC shall notify BellSouth in writing immediately in the case of lost or stolen Access Keys. US LEC will pay BellSouth \$250.00 per Access Key(s) lost or stolen. Should it become necessary for BellSouth to re-key buildings as a result of a lost Access Key(s) or for failure to return an Access Key(s), US LEC shall pay for all reasonable costs associated with the re-keying.

5.9 Interference or Impairment. Notwithstanding any other provisions of this Attachment, equipment and facilities placed in the Collocation Space shall not interfere with or impair service provided by BellSouth or by any other Interconnector located in the Central Office; shall not endanger or damage the facilities of BellSouth or of any other Interconnector, the Collocation Space, or the Central Office; shall not compromise the privacy of any communications carried in, from, or through the Central Office; and shall not create an unreasonable risk of injury or death to any individual or to the public. In the instance where interference or impairment of BellSouth's or any other interconnector's equipment or facilities may result from the operation of US LEC's equipment or facilities, US LEC shall immediately seek to determine whether its equipment or facilities is operating outside of the technical specifications and operating parameters established by the manufacturer of said equipment or facilities. Except as provided in subsection 5.9.3, if any equipment or facilities of US LEC violate the provisions of this section, BellSouth shall give written notice of such alleged violation and the need to correct the condition.

5.9.1 US LEC will commence curative measures within 24 hours of US LEC's actual receipt of written notice. The condition shall be corrected within 48 hours or if the condition cannot be corrected within said 48 hour period, US LEC will exercise reasonable diligence to complete such measures as soon as possible.

5.9.2 After receipt of the notice set forth in 5.9, BellSouth and US LEC will consult immediately and, if necessary, to inspect the arrangement. If it is agreed that US LEC's arrangement is not in violation of section 5.9, US LEC shall have no other obligation under this section as to the notice received by US LEC.

5.9.3 If US LEC fails to comply with section 5.9 or if the alleged violation is of a character that poses an immediate and substantial threat of damage to property, injury or death to any person, then and only in that event BellSouth may take such action as it deems appropriate to correct the violation, including without limitation the interruption of electrical power to US LEC's equipment. BellSouth will endeavor, but is not required to provide notice to US LEC prior to taking such action and shall have no liability to US LEC for any damages arising from such action, except to the extent that such action by BellSouth constitutes gross negligence or willful misconduct.

5.9.4 If any services provided by BellSouth to US LEC are interrupted during the impairment or interference period or the access to unbundled network elements to US LEC is interrupted during the impairment or interference period, upon the correction of the interference or impairment, such services and access shall be restored.

5.9.5 In the instance where interference or impairment of US LEC's equipment or facilities may result from the operation of BellSouth equipment or facilities, BellSouth shall immediately seek to determine whether its equipment or facilities is operating outside of the technical specifications and operating parameters established by the manufacturer of said equipment or facilities. If so, BellSouth shall, within 24 hours of such determination, commence curative measures to bring the equipment or facilities back into conformance with the appropriate technical specification and the operating parameters established by the manufacturer. The condition shall be corrected within 48 hours of such determination or if the condition cannot be corrected within said 48 hour period, BellSouth will exercise reasonable diligence to complete such measures as soon as possible.

5.10 Personalty and its Removal. Subject to requirements of this Attachment, US LEC may place or install in or on the Collocation Space such facilities and equipment, including storage for and spare equipment, as it deems desirable for the conduct of business; Provided that such equipment is telecommunications equipment, does not violate floor loading requirements, imposes or could impose or contains or could contain Environmental Hazards. Personal property, facilities and equipment placed by US LEC in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain their status as personalty and may be removed by US LEC at any time. Any damage caused to the Collocation Space by US LEC's employees, agents or representatives during the removal of such property shall be promptly repaired by US LEC at its expense.

5.11 Alterations. In no case shall US LEC or any person acting on behalf of US LEC make any rearrangement, modification, improvement, addition, repair, or other alteration to the Collocation Space or the BellSouth Central Office without the written consent of BellSouth, which consent shall not be unreasonably withheld, provided however, that no such written consent shall be required for minor modifications or additions to the Collocation Space (e.g. the addition of a desk, chair, frame lighting, spare plug-ins, free standing storage cabinets). The cost of any such specialized alterations shall be paid by US LEC.

5.12 Janitorial Service. US LEC shall be responsible for the general upkeep and cleaning of its own Caged Collocation Space and shall arrange directly with a BellSouth certified contractor for janitorial services. BellSouth shall provide a list of such contractors on a site-specific basis upon request.

ORDERING AND PREPARATION OF COLLOCATION SPACE

6.1 Application for Space. US LEC shall submit an application document when US LEC or US LEC's Guest(s), as defined in Section 3.3, desires to request or modify the use of the Collocation Space.

6.1.1 Initial Application. For US LEC or US LEC's Guest(s) initial equipment placement, US LEC shall submit to BellSouth a complete and accurate Application and Inquiry document (Bona Fide Application), together with payment of the Application Fee as stated in Exhibit A. The Bona Fide Application shall contain a reasonably detailed description and schematic drawing of the equipment to be placed in US LEC's Collocation Space(s) and an estimate of the amount of square footage required.

6.1.2 Subsequent Application Fee. In the event US LEC or US LEC's Guest(s) desire to modify the use of the Collocation Space, US LEC shall complete an Application document detailing all information regarding the modification to the Collocation Space together with payment of the minimum Subsequent Application Fee as stated in Exhibit A. Said minimum Subsequent Application Fee shall be considered a partial payment of the applicable Subsequent Application Fee which shall be calculated as set forth below. BellSouth shall reasonably determine what modifications, if any, to the Central Office premises are required to accommodate the change requested by US LEC in the Application. Such necessary modifications to the Central Office premises may include but are not limited to, floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, and equipment additions. The fee paid by US LEC for its request to modify the use of the Collocation Space shall be dependent upon the modification requested. Where the subsequent application does not require provisioning or construction work by BellSouth, no Subsequent Application Fee will be required and the pre-paid fee shall be refunded to US LEC. The fee for an application where the modification requested has limited effect (e.g., does not require capital expenditure by BellSouth) shall be the Subsequent Application Fee as set forth in Exhibit A. All other modifications shall require a Subsequent Application Fee assessed at the applicable application fee. In the event such modifications require the assessment of a full Application Fee as set forth in Exhibit A, the outstanding balance shall be due by US LEC within 30 calendar days following US LEC's receipt of a bill or invoice from BellSouth.

6.2 Application Response. In addition to the notice of space availability pursuant to Section 2.1, BellSouth will respond within three (3) business days of receipt of an Application whether the Application is Bona Fide, and if it is not Bona Fide, the items necessary to cause the Application to become Bona Fide. Under no circumstances will a US LEC collocation Application be delayed or rejected for clerical errors. When space has been determined to be available, BellSouth will provide a comprehensive written response within thirty (30) business days of receipt of a complete application. When multiple applications are submitted within a fifteen business day window, BellSouth will respond to the applications as soon as possible, but no later than the following: within thirty (30) business days for applications 1-5; within thirty-six (36) business days for applications 6-10; within forty-two (42) business days for applications 11-15. Response intervals for multiple applications submitted within the same timeframe for the same state in excess of 15 must be negotiated. All negotiations shall consider the total volume from all requests from telecommunications companies for collocation. The Application Response will detail whether the amount of space requested is available or if the amount of space requested is not available, the amount of space that is available. The response will also include the configuration of the space.

6.3 Bona Fide Firm Order. US LEC shall indicate its intent to proceed with equipment installation in a BellSouth Central Office by submitting a Bona Fide Firm Order to BellSouth. A Bona Fide Firm Order requires US LEC to complete the Application/Inquiry process described in Subsection 6.1, preceding, and submit the Expanded Interconnection Bona Fide Firm Order document (BSTEI-1P-F) indicating acceptance of the written application response provided by BellSouth ("Bona Fide Firm Order") and all appropriate fees. The

Bona Fide Firm Order must be received by BellSouth no later than thirty (30) calendar days after BellSouth's response to US LEC's Application/Inquiry. If US LEC makes changes to its application in light of BellSouth's written Application Response, BellSouth will be required to re-evaluate and respond to the change(s). In this event, BellSouth's provisioning interval will not start until the re-evaluation and response to the change(s) is complete and the Bona Fide Firm Order is received by BellSouth and all appropriate fees and duties have been executed. If BellSouth needs to reevaluate US LEC's application as a result of changes requested by US LEC to US LEC's original application, then BellSouth will charge US LEC a fee based upon the additional engineering hours required to do the reassessment. Major changes such as requesting additional space or adding additional equipment may require US LEC to resubmit the application with an application fee.

6.3.1 BellSouth will establish a firm order date, per request, based upon the date BellSouth is in receipt of a Bona Fide Firm Order. BellSouth will acknowledge the receipt of US LEC's Bona Fide Firm Order within five (5) business days of receipt indicating that the Bona Fide Firm Order has been received. A BellSouth response to a Bona Fide Firm Order will include a Firm Order Confirmation containing the firm order date.

6.3.2 BellSouth will permit one accompanied site visit to US LEC's designated collocation arrangement location after receipt of the Bona Fide Firm Order without charge to US LEC. After completion of BellSouth's security training requirements set forth in Section 11, US LEC will have 24 hour, 7 day a week access to its Collocation Arrangement location without charge to US LEC.

6.3.3 Space preparation for the Collocation Space will not begin until BellSouth receives the Bona Fide Firm Order and all applicable fees.

6.3.4 US LEC must submit to BellSouth the completed Access Control Request Form (RF-2906-A) for all employees or agents requiring access to the BellSouth Central Office a minimum of 30 calendar days prior to the date US LEC desires access to the Collocation Space.

6.4 Construction and Provisioning Interval. BellSouth will negotiate construction and provisioning intervals per request on an individual case basis. Such construction and provisioning intervals will be at least at Parity with the construction and provisioning intervals offered to any other CLEC in the same central office with the same or comparable arrangement specifications. Excluding the time interval required to secure the appropriate government licenses and permits, BellSouth will use best efforts to complete construction for collocation arrangements under ordinary conditions as soon as possible and within a maximum of 90 business days from receipt of a complete and accurate Bona Fide Firm Order. Ordinary conditions are defined as space available with only minor changes to support systems required, such as but not limited to, HVAC, cabling and the power plant(s). Excluding the time interval required to secure the appropriate government licenses and permits, BellSouth will use best efforts to complete construction of all other collocation space ("extraordinary conditions") within 130 business days of the receipt of a complete and accurate Bona Fide Firm Order. Extraordinary conditions are defined to include but are not limited to major BellSouth equipment rearrangement or addition; power plant addition or upgrade; major mechanical addition or upgrade; major upgrade for ADA compliance; environmental hazard or hazardous materials abatement.

6.4.1 Joint Planning Meeting. Unless otherwise agreed to by the Parties, a joint planning meeting or other method of joint planning between BellSouth and US LEC will commence within a maximum of 15 business days from BellSouth's receipt of a Bona Fide Firm Order and the payment of agreed upon fees. At such meeting, the Parties will agree to the preliminary design of the Collocation Space and the equipment configuration requirements as reflected in the Application and affirmed in the Bona Fide Firm Order. The

BellSouth unbundled network elements, US LEC may purchase 2-wire and 4-wire Cross-Connects as set forth in Exhibit A, and US LEC may place within its Virtual Collocation arrangements the telecommunications equipment set forth in Section 5.1. In the event physical collocation space was previously not possible due to technical reasons or space limitations, and that physical collocation space has subsequently become available, US LEC may transition its virtual collocation arrangements to physical collocation arrangements and pay the appropriate non-recurring fees for physical collocation and for the rearrangement or reconfiguration of services terminated in the virtual collocation arrangement. In the event that BellSouth knows when additional space for physical collocation may become available at the location requested by US LEC, such information will be provided to US LEC in BellSouth's written denial of physical collocation. To the extent that (i) physical collocation space becomes available to US LEC within 180 days of BellSouth's written denial of US LEC's request for physical collocation, and (ii) US LEC was not informed in the written denial that physical collocation space would become available within such 180 days, then US LEC may transition its virtual collocation arrangement to a physical collocation arrangement and will receive a credit for any nonrecurring charges previously paid for such virtual collocation credit for any US LEC must arrange with a BellSouth certified vendor for the relocation of equipment from its virtual collocation space to its physical collocation space and will bear the cost of such relocation.

6.10 Cancellation. If, at anytime, US LEC cancels its order for the Collocation Space(s), US LEC will reimburse BellSouth for any expenses incurred up to the date that written notice of the cancellation is received. In no event will the level of reimbursement under this paragraph exceed the maximum amount US LEC would have otherwise paid for work undertaken by BellSouth if no cancellation of the order had occurred.

6.11 Licenses. US LEC, at its own expense, will be solely responsible for obtaining from governmental authorities, and any other appropriate agency, entity, or person, all rights, privileges, and licenses necessary or required to operate as a provider of telecommunications services to the public or to occupy the Collocation Space.

7. RATES AND CHARGES

7.1 Non-recurring Fees. In addition to the Application Fee referenced in Section 6, preceding, US LEC shall remit payment of a Cable Installation Fee and one-half (1/2) of the estimated Space Preparation Fee, as applicable, coincident with submission of a Bona Fide Firm Order. The outstanding balance of the actual Space Preparation Fee shall be due thirty (30) calendar days following BellSouth's completion of the space preparation to US LEC's satisfaction pursuant to the signed Space Acceptance Form by US LEC indicating that the completed space has been prepared to the Parties' agreed upon specifications.

7.2 Documentation. BellSouth shall provide documentation to establish the actual Space Preparation Fee. The Space Preparation Fee will be pro rated as prescribed in Section 6, preceding.

7.3 Cable Installation. Cable Installation Fee(s) are assessed per entrance fiber placed. If US LEC does not place a US LEC owned fiber entrance facility there shall be no Cable Installation Fee assessed.

7.4 Floor Space. The floor space charge includes reasonable charges for lighting, heat, air conditioning, ventilation and other allocated expenses associated with maintenance of the Central Office but does not include amperage necessary to power US LEC's equipment. When the Collocation Space is enclosed, US LEC shall pay floor space charges based upon the number of square feet so enclosed. When the Collocation Space is not enclosed, US LEC shall pay floor space charges based upon the following floor space calculation: [(depth of the equipment lineup in which the rack is placed) + (0.5 x maintenance aisle

pth) + (0.5 x wiring aisle depth)] X (width of rack and spacers). For purposes of this calculation, the depth of the equipment lineup shall consider the footprint of equipment racks plus any equipment overhang. BellSouth will assign unenclosed Collocation Space in conventional equipment rack lineups where feasible. In the event US LEC's collocated equipment requires special cable racking, isolated grounding or other treatment which prevents placement within conventional equipment rack lineups, US LEC shall be required to request an amount of floor space sufficient to accommodate the total equipment arrangement. Floor space charges are due beginning with the date on which BellSouth releases the Collocation Space for occupancy or on the date US LEC first occupies the Collocation Space, whichever is sooner.

7.5 Power. BellSouth shall make power, including back-up power, available to US LEC on a level and manner that is at least at parity to the level and manner which BellSouth provides itself, its subsidiaries, affiliates, or any other CLEC. BellSouth shall supply -48 Volt (-48V) DC power for US LEC's Collocation Space within the central office premises and shall make available AC power at US LEC's option for Adjacent Arrangement collocation.

7.5.1 Charges for -48V DC power will be assessed per ampere per month based upon the certified vendor engineered and installed power feed fused ampere capacity. Rates include redundant feeder fuse positions (A&B) and cable rack to US LEC's equipment or space enclosure. When obtaining power from a BellSouth Battery Distribution Fuse Bay, fuses and power cables (A&B) must be engineered (sized), furnished and installed by US LEC's certified vendor. When obtaining power from a BellSouth Power Board, power cables (A&B) must be engineered (sized), furnished and installed by US LEC's certified power vendor. US LEC's certified vendor must also provide a copy of the engineering power specification prior to the Commencement Date. In the event BellSouth shall be required to construct additional DC power plant or upgrade the existing DC power plant in a Central Office as a result of US LEC's request to collocate in that Central Office ("Power Plant Construction"), US LEC shall pay its pro-rata share of costs associated with the Power Plant Construction. The determination of whether Power Plant Construction is necessary shall be within BellSouth's sole, but reasonable, discretion. BellSouth shall comply with all BellCore (Telcordia) and ANSI Standards regarding power cabling, including BellCore (Telcordia) Network Equipment Building System (NEBS) Standard GR-63-CORE. BellSouth will notify US LEC of the need for the Power Plant Construction and will estimate the costs associated with the Power Plant Construction if BellSouth were to perform the Power Plant Construction. The costs of power plant construction shall be pro-rated and shared among all who benefit from that construction. US LEC shall pay BellSouth one-half of its prorata share of the estimated Power Plant Construction costs prior to commencement of the work. US LEC shall pay BellSouth the balance due (actual cost less one-half of the estimated cost) within thirty (30) days of completion of the Power Plant Construction. US LEC has the option to perform the Power Plant Construction itself; provided, however, that such work shall be performed by a BellSouth certified contractor and such contractor shall comply with BellSouth's guidelines and specifications. Where the Power Plant Construction results in construction of a new power plant room, upon termination of this Attachment US LEC shall have the right to remove its equipment from the power plant room, but shall otherwise leave the room intact. Where the Power Plant Construction results in an upgrade to BellSouth's existing power plant, upon termination of this Attachment, such upgrades shall become the property of BellSouth.

7.5.2 Charges for AC power will be assessed per breaker ampere per month based upon the certified vendor engineered and installed power feed fused ampere capacity. Rates include the provision of commercial and standby AC power. When obtaining power from a BellSouth Distribution Fuse Bay, Power Board or Service Panel, fuses and power cables must be engineered (sized), furnished and installed by US LEC's certified vendor. US LEC's certified vendor must also provide a copy of the engineering power specification prior to the Commencement Date. Charges for AC power shall be assessed pursuant to the rates specified in Exhibit A. AC power voltage and phase ratings shall be determined on a per location basis.

7.6 Security Escort. A security escort will be required whenever US LEC or its approved agent desires access to the entrance manhole or must have access to the Central Office Premises after the one accompanied site visit allowed pursuant to subsection 6.2.2 prior to completing BellSouth's Security Training requirements and/or prior to Space Acceptance. Rates for a security escort are assessed in one-half (1/2) hour increments according to the schedule appended hereto as Exhibit A..

7.7 Rate "True-Up." The Parties agree that the prices reflected as interim herein shall be "trued-up" (up or down) pursuant to Section ___ of the General Terms and Conditions as if said section were incorporated herein. All rates and charges pertaining to physical collocation shall be modified consistent with the State Commission's effective Order if a state Commission establishes different rates than those final rates set forth in Exhibit A through a generic proceeding addressing physical collocation rates that is initiated after the execution of this Agreement.

7.8 Other. If no rate is identified in the contract, the rate for the specific service or function will be negotiated by the parties upon request by either party.

8. INSURANCE

8.1 US LEC shall, at its sole cost and expense, procure, maintain, and keep in force insurance as specified in this Article VI and underwritten by insurance companies licensed to do business in the states applicable under this Attachment and having a BEST Insurance Rating of B ++ X (B ++ ten).

8.2 US LEC shall maintain the following specific coverage:

8.2.1 Commercial General Liability coverage in the amount of ten million dollars (\$10,000,000.00) or a combination of Commercial General Liability and Excess/Umbrella coverage totaling not less than ten million dollars (\$10,000,000.00). BellSouth shall be named as an ADDITIONAL INSURED on ALL applicable policies as specified herein.

8.2.2 Statutory Workers Compensation coverage and Employers Liability coverage in the amount of one hundred thousand dollars (\$100,000.00) each accident, one hundred thousand dollars (\$100,000.00) each employee by disease, and five hundred thousand dollars (\$500,000.00) policy limit by disease.

8.2.3 BellSouth shall maintain the same or greater limits of coverage that are required of US LEC.

8.3 The limits set forth in Subsection 6.2 above may be increased by BellSouth from time to time during the term of this Attachment upon thirty (30) days notice to US LEC to at least such minimum limits as shall then be customary with respect to comparable occupancy of BellSouth structures. If BellSouth exercises this provision it shall also increase its coverage accordingly.

8.4 All policies purchased by US LEC shall be deemed to be primary and not contributing to or in excess of any similar coverage purchased by BellSouth. All insurance must be in effect on or before the date equipment is delivered to BellSouth's Central Office and shall remain in effect for the term of this Attachment or until all US LEC's property has been removed from BellSouth's Central Office, whichever period is longer. If

employee training requirements. In no event shall BellSouth unreasonably restrict US LEC's access to US LEC equipment.

11.2 Only BellSouth employees, BellSouth certified vendors and authorized employees, authorized Guests, pursuant to Section 3.3, preceding, or authorized agents of US LEC will be permitted in the BellSouth Central Office. US LEC shall provide its employees and agents with picture identification which must be worn and visible at all times while in the Collocation Space or other areas in or around the Central Office. The photo Identification card shall bear, at a minimum, the employee's name and photo, and the US LEC name. BellSouth reserves the right to remove from its premises any employee of US LEC not possessing identification issued by US LEC. US LEC shall hold BellSouth harmless for any damages resulting from such removal of its personnel from BellSouth premises. US LEC shall be solely responsible for ensuring that any Guest of US LEC is in compliance with all subsections of this Section 11.

11.2.1 US LEC will be required, at its own expense, to conduct a statewide investigation of criminal history records for each US LEC employee being considered for work on the BellSouth Central Office, for the states/counties where the US LEC employee has worked and lived for the past five years. Where state law does not permit statewide collection or reporting, an investigation of the applicable counties is acceptable.

11.2.2 Each party will be required to administer to their personnel assigned to the BellSouth Central Office security training either provided by BellSouth, or meeting criteria defined by BellSouth.

11.2.3 US LEC shall not assign to the BellSouth Central Office any personnel with records of felony criminal convictions. US LEC shall not assign to the BellSouth Central Office any personnel with records of misdemeanor convictions, without advising BellSouth of the nature and gravity of the offense(s). BellSouth reserves the right to refuse building access to any US LEC personnel who have been identified to have misdemeanor criminal convictions.

11.2.4 For each US LEC employee requiring access to a BellSouth Central Office pursuant to this agreement, US LEC shall furnish BellSouth, prior to an employee gaining such access, a notarized affidavit certifying that the aforementioned background check and security training were completed. The affidavit will contain a statement certifying no felony convictions were found and certifying that the security training was completed by the employee. If the employee's criminal history includes misdemeanor convictions, US LEC will disclose the nature of the convictions to BellSouth at that time.

11.2.5 At BellSouth's request, US LEC shall promptly remove from the BellSouth's premises any employee of US LEC BellSouth does not wish to grant access to its premises pursuant to any investigation conducted by BellSouth.

11.3 Notification to BellSouth. Both Parties reserve the right to bill the other for all costs associated with investigations involving its employees, agents, or contractors if it can be reasonably established that the other Party's employees, agents, or contractors are responsible for the alleged act. Either Party shall bill the other for property which is stolen or damaged where an investigation determines the culpability of such other Party's employees, agents, or contractors. Both Parties shall notify the other in writing immediately in the event that the it discovers one of its employees already working on the BellSouth premises is a possible security risk.

11.4 Use of One Party's Supplies by the other Party. Unauthorized use of any one Party's supplies by an employee of the other Party, whether or not used routinely to provide telephone service (e.g. plug-in cards,) will be considered theft and will be handled accordingly. Costs associated with such unauthorized use

property may be charged to the unauthorized using Party of such property as may be all associated investigative costs.

11.5 Use of Official Lines by US LEC Employees. Except for local calls necessary in the performance of their work, US LEC employees shall not use the telephones on BellSouth Central Office. Charges for unauthorized telephone calls made by a US LEC's employees may be charged to US LEC as may be all associated investigative costs. At BellSouth's request, US LEC shall promptly and permanently remove from BellSouth's premises any employee of US LEC found to be in violation of this rule.

11.6 Accountability. Full compliance with the Security requirements of this section shall in no way limit the accountability of any either Party for the improper actions of its employees.

12. DESTRUCTION OF COLLOCATION SPACE

12.1 In the event a Collocation Space is wholly or partially damaged by fire, windstorm, tornado, flood or by similar causes to such an extent as to be rendered wholly unsuitable for US LEC's use hereunder, then either Party may elect within ten (10) days after such damage, to terminate this Agreement with respect to the Collocation Space at issue, and if either Party shall so elect, by giving the other written notice of termination, both Parties shall stand released of and from further liability under the terms hereof. However, such termination shall not impair US LEC's right to request collocation subsequently at the same or any replacement Premises. If the Collocation Space shall suffer only minor damage and shall not be rendered wholly unsuitable for US LEC's use, or is damaged and the option to terminate is not exercised by either Party, BellSouth covenants and agrees to proceed promptly without expense to US LEC, except for improvements not the property of BellSouth, to repair the damage. BellSouth will make such repairs on a non-discriminatory basis. BellSouth shall have a reasonable time within which to rebuild or make any repairs, and such rebuilding and repairing shall be subject to delays caused by storms, shortages of labor and materials, government regulations, strikes, walkouts, and causes beyond the control of BellSouth, which causes shall not be construed as limiting factors, but as exemplary only. US LEC may, at its own expense, accelerate the rebuild of its collocated space and equipment provided however that a certified vendor is used and the necessary space preparation has been completed. Rebuild of equipment must be performed by a BellSouth Certified Vendor. If US LEC's acceleration of the project increases the cost of the project, then those additional charges will be incurred by US LEC. Where allowed and where practical, US LEC may erect a temporary facility while BellSouth rebuilds or makes repairs. In all cases where the Collocation Space shall be rebuilt or repaired, US LEC shall be entitled to an equitable abatement of rent and other charges, depending upon the unsuitability of the Collocation Space for US LEC's use, until such Collocation Space is fully repaired and restored and US LEC's equipment installed therein (but in no event later than thirty (30) days after the Collocation Space is fully repaired and restored). Where US LEC has placed an Adjacent Arrangement pursuant to section 3.4, US LEC shall have the sole responsibility to repair or replace said Adjacent Arrangement provided herein. Pursuant to this section, BellSouth will restore the associated services to the Adjacent Arrangement.

13. EMINENT DOMAIN

13.1 If the whole of a Collocation Space or Adjacent Arrangement shall be taken by any public authority under the power of eminent domain, then this Agreement shall terminate with respect to such Collocation Space or Adjacent arrangement as of the day possession shall be taken by such public authority and rent and other charges for the Collocation Space or Adjacent Arrangement shall be paid up to that day with proportionate refund by BellSouth of such rent and charges as may have been paid in advance for a period subsequent to the date of the taking. If any part of the Collocation Space or Adjacent Arrangement shall be

When under eminent domain, BellSouth and US LEC shall each have the right to terminate this Agreement with respect to the Collocation Space or Adjacent arrangement and declare the same null and void, by written notice of such intention to the other Party within ten (10) days after such taking.

14. NONEXCLUSIVITY

12.1 US LEC understands that its rights under this Attachment are not exclusive and that BellSouth may enter into similar agreements with other parties. Assignment of space pursuant to all such agreements shall be determined by space availability and made on a first come, first served basis.

**EXHIBIT A: BELL SOUTH/US LEC RATES – ALABAMA
PHYSICAL COLLOCATION**

Rates marked with an asterisk (*) are interim and are subject to true-up pursuant to Section 7.7 of this Attachment.

USOC	Rate Element Description	Unit	Recurring Rate (RC)	Non-Recurring Rate (NRC)
PE1BA	Application Fee	Per Request	NA	\$7,124.00 Disconnect Charge \$1.73

EXHIBIT A: BELL SOUTH/US LEC RATES - ALABAMA
PHYSICAL COLLOCATION (cont.)

Note(s):

N/A refers to rate elements which do not have a negotiated rate.

- (1) **Subsequent Application Fee:** BellSouth requires the submission of an Application Fee for modifications to an existing arrangement. However, when the modifications do not require BellSouth to expend capital, BellSouth will assess the Subsequent Application Fee in lieu of the Application Fee. Proposed modifications that could result in assessment of a Subsequent Application Fee would cause BellSouth to analyze the following but are not limited to: floor loading changes, changes to HVAC requirements, power requirement changes which may result in a power plant upgrade, environmental or safety requirements, or equipment relocation. Should the Subsequent Application Fee not be included as part of this Attachment, US LEC will be assessed the full Application Fee for all subsequent activity for completed arrangements.
- (2) **Space Preparation Fee:** The Space Preparation Fee is a one-time fee, assessed per arrangement, per location. It recovers the costs associated with the shared physical collocation area within a Central Office, which include survey, engineering, design and modification costs for network, building and support systems. In the event US LEC opts for non-enclosed space, the space preparation fee will be assessed based on the total floor space dedicated to US LEC as prescribed in Section 7 of the Collocation Attachment.
- (3) **Space Enclosure:** For cages requested prior to June 1, 1999, the Space Enclosure Construction Fee is a monthly recurring fee, assessed per enclosure, per location with a one-hundred (100) square foot minimum enclosure. It recovers costs associated with providing an optional equipment arrangement enclosure, which include architectural and engineering fees, materials, and installation costs. The cost for additional square feet is applicable only when ordered with the first 100 square feet and must be requested in fifty (50) square foot increments. US LEC may, at its option, arrange with a BellSouth certified contractor to construct the space enclosure in accordance with BellSouth's guidelines and specifications. In this event, the contractor shall directly bill US LEC for the space enclosure, and this fee shall not be applicable.
- (4) **Cross Connects:** The charges for cross connects are for orders placed electronically. Cross connect elements may also be ordered manually for which there is an additional charge per element.

		Disconnect Charges
	First / Additional	First / Additional
2-wire	\$34.03 / \$32.67	\$14.48 / \$13.11
4-wire	\$34.28 / \$32.85	\$14.55 / \$13.12
DS-1	\$64.08 / \$44.98	\$14.58 / \$13.23
DS-3	\$61.07 / \$43.08	\$16.66 / \$13.49

- (5) **Co-Carrier Cross-Connect:** As stated in Section 1.2 of the Collocation Attachment, US LEC may connect to other CLECs within the designated Central Office in addition to, and not in lieu of, interconnection to BellSouth services and facilities. Where BellSouth must construct a cable rack structure to house the co-Carrier cross connection, construction charges will be applied on an individual case basis. BellSouth shall provide an estimate of these charges in the Application Response. Where an existing cable rack structure is in place and has sufficient capacity to accommodate the co-Carrier cross connection requested, the recurring charges as stated in this Exhibit A shall apply.
- (6) **Additional Engineering Fee:** BellSouth's additional engineering, and other labor costs associated with handling US LEC-requested modifications to requests in progress or augmentations to existing arrangements shall be recovered as Additional Engineering charges, under provisions in BellSouth's F.C.C. Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, US LEC agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

- (1) **Subsequent Application Fee:** BellSouth requires the submission of an Application Fee for modifications to an existing arrangement. However, when the modifications do not require BellSouth to expend capital, BellSouth will assess the Subsequent Application Fee in lieu of the Application Fee. Proposed modifications that could result in assessment of a Subsequent Application Fee would cause BellSouth to analyze the following but are not limited to: floor loading changes, changes to HVAC requirements, power requirement changes which may result in a power plant upgrade, environmental or safety requirements, or equipment relocation. Should the Subsequent Application Fee not be included as part of this Attachment, US LEC will be assessed the full Application Fee for all subsequent activity for completed arrangements.
- (2) **Space Preparation Fee:** The Space Preparation Fee is a one-time fee, assessed per arrangement, per location. It recovers costs associated with the shared physical collocation area within a Central Office, which include survey, engineering, design and modification costs for network, building and support systems. BellSouth will pro rate the total shared space preparation costs among the collocators at each location based on the amount of square footage occupied by each collocator. This charge may vary depending on the location and type of arrangement requested.
- (3) **Space Enclosure Fee:** For cages requested prior to June 1, 1999, the Space Enclosure Construction Fee is a monthly recurring fee, assessed per enclosure, per location with a one-hundred (100) square foot minimum enclosure. It recovers costs associated with providing an optional equipment arrangement enclosure, which include architectural and engineering fees, materials, and installation costs. The cost for additional square feet is applicable only when ordered with the first 100 square feet and must be requested in fifty (50) square foot increments. US LEC may, at its option, arrange with a BellSouth certified contractor to construct the space enclosure in accordance with BellSouth's guidelines and specifications. In this event, the contractor shall directly bill US LEC for the space enclosure, and this fee shall not be applicable.
- (4) **Cross Connects:** Rates shown are the equivalent per cross connect rates based on the Florida PSC Ordered rates as follows:

Cross Connects	Per Cross Connect	RC	NRC
2-wire	Per 100 X-Connects	\$5.24	\$1,157.00
4-wire	Per 100 X-Connects	\$5.24	\$1,157.00
DS-1/DCS	Per 28 X-Connects	\$226.39	\$1,950.00
DS-1/DSX	Per 28 X-Connects	\$11.51	\$1,950.00
DS-3/DCS	Per Cross Connect	\$56.97	\$ 528.00
DS-3/DSX	Per Cross Connect	\$10.06	\$528.00
Optical Cross Connects	Per Cross Connect	\$6.46	\$2,431.00

EXHIBIT A: BELLSOUTH/US LEC RATES - FLORIDA
PHYSICAL COLLOCATION (cont.)

- (5) **Co-Carrier Cross-Connect.** As stated in Section 5 of the Collocation Attachment, US LEC may connect to other CLECs within the designated Central Office in addition to, and not in lieu of, interconnection to BellSouth services and facilities. Where BellSouth must construct a cable rack structure to house the direct connection, construction charges will be applied on an individual case basis. BellSouth shall provide an estimate of these charges in the Application Response. Where an existing cable rack structure is in place and has sufficient capacity to accommodate the direct connection requested, the recurring charges as stated in this Exhibit A shall apply.
- (6) **POT Bays:** BellSouth's Florida specific rates were established in the Florida Public Service Commission Docket No. 960833. The Commission did not set permanent rates for POT Bays, given the assumption by the parties to the Proceeding that they will always provide their own POT Bays. It will be necessary for US LEC to provide its own POT Bays per BellSouth specifications and provide the necessary information from which BellSouth can inventory.
- (7) **Additional Engineering Fee:** BellSouth's additional engineering, and other labor costs associated with handling US LEC-requested modifications to requests in progress or augmentations to existing arrangements shall be recovered as Additional Engineering charges, under provisions in BellSouth's F.C.C. Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, US LEC agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

EXHIBIT A: BELL SOUTH/US LEC RATES - GEORGIA
PHYSICAL COLLOCATION (cont.)

Note(s)

N/A refers to rate elements which do not have a negotiated rate.

- (1) **Subsequent Application Fee:** BellSouth requires the submission of an Application Fee for modifications to an existing arrangement. However, when the modifications do not require BellSouth to expend capital, BellSouth will assess the Subsequent Application Fee in lieu of the Application Fee. Proposed modifications that could result in assessment of a Subsequent Application Fee would cause BellSouth to analyze the following but are not limited to: floor loading changes, changes to HVAC requirements, power requirement changes which may result in a power plant upgrade, environmental or safety requirements, or equipment relocation. Should the Subsequent Application Fee not be included as part of this Attachment, US LEC will be assessed the full Application Fee for all subsequent activity for completed arrangements.
- (2) **Space Preparation Fee:** The Space Preparation Fee is a one-time fee, assessed per arrangement, per location. It recovers a portion of costs associated with the shared physical collocation area within a Central Office, which include survey, engineering, design and modification costs for network, building and support systems. This is a set fee of \$100 per square foot as established by the Georgia Public Service Commission Order in Docket No. 7061-U. In the event US LEC opts for non-enclosed space, the space preparation fee will be assessed based on the total floor space dedicated to US LEC as prescribed in Section 7 of the Collocation Attachment.
- (3) **Space Enclosure Fee:** For cages requested prior to June 1, 1999, the Space Enclosure Construction Fee is a one-time fee, assessed per enclosure, per location with a one-hundred (100) square foot minimum enclosure. It recovers costs associated with providing an optional equipment arrangement enclosure, which include architectural and engineering fees, materials, and installation costs. The cost for additional square feet is applicable only when ordered with the first 100 square feet and must be requested in fifty (50) square foot increments. US LEC may, at its option, arrange with a BellSouth certified contractor to construct the space enclosure in accordance with BellSouth's guidelines and specifications. In this event, the contractor shall directly bill US LEC for the space enclosure, and this fee shall not be applicable.
- (4) **Co-Carrier Cross-Connect.** As stated in Section 5 of the Collocation Attachment, US LEC may connect to other CLECs within the designated Central Office in addition to, and not in lieu of, interconnection to BellSouth services and facilities. Where BellSouth must construct a cable rack structure to house the co-Carrier cross connection, construction charges will be applied on an individual case basis. BellSouth shall provide an estimate of these charges in the Application Response. Where an existing cable rack structure is in place and has sufficient capacity to accommodate the co-Carrier cross-connection requested, the recurring charges as stated in this Exhibit A shall apply.
- (5) **Additional Engineering Fee:** BellSouth's additional engineering, and other labor costs associated with handling US LEC-requested modifications to requests in progress or augmentations to existing arrangements shall be recovered as Additional Engineering charges, under provisions in BellSouth's F.C.C. Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, US LEC agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

(5) **Co-Carrier Cross-Connect.** As stated in Section 5 of the Collocation Attachment, US LEC may connect to other CLECs within the designated Central Office in addition to, and not in lieu of, interconnection to BellSouth services and facilities. Where BellSouth must construct a cable rack structure to house the co-Carrier cross-connection, construction charges will be applied on an individual case basis. BellSouth shall provide an estimate of these charges in the Application Response. Where an existing cable rack structure is in place and has sufficient capacity to accommodate the co-Carrier cross-connection requested, the recurring charges as stated in this Exhibit A shall apply.

(6) **Additional Engineering Fee:** BellSouth's additional engineering, and other labor costs associated with handling US LEC-requested modifications to requests in progress or augmentations for existing arrangements shall be recovered as Additional Engineering charges, under provisions in BellSouth's F.C.C. Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, US LEC agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

EXHIBIT A: BELLSOUTH/US LEC RATES – NORTH CAROLINA*
PHYSICAL COLLOCATION

*Rates are interim and subject to true-up.

USOC	Rate Element Description	Unit	Recurring Rate (RC)	Non-Recurring Rate (NRC)
PE1BA	Application Fee	Per Request	NA	\$3,850.00
PE1CA	Subsequent Application Fee (Note 1)	Per Request	NA	\$1,600.00 Minimum
PE1BB	Space Preparation Fee (Note 2)			
	Mechanical / HVAC	Per ton (one ton minimum)		\$2,100.00
	Ground Bar	Per Connection		\$720.00
	Project Management	Per arrangement		\$1,675.00
	Cable Racking/Fiber Duct	Per arrangement, per square foot		ICB
	Frame / Aisle lighting	Per arrangement, per square foot		ICB

AEH	Additional Engineering Fee (Note 5)	Per request, First half hour/Add'l Half hour		First /Add'l Basic Time - \$31.00/\$22.00 Overtime - \$37.00/\$26.00

Note(s):

N/A refers to rate elements which do not have a negotiated rate.

- (1) **Subsequent Application Fee:** BellSouth requires the submission of an Application Fee for modifications to an existing arrangement. However, when the modifications do not require BellSouth to expend capital, BellSouth will assess the Subsequent Application Fee in lieu of the Application Fee. Proposed modifications that could result in assessment of a Subsequent Application Fee would cause BellSouth to analyze the following but are not limited to: floor loading changes, changes to HVAC requirements, power requirement changes which may result in a power plant upgrade, environmental or safety requirements, or equipment relocation. Should the Subsequent Application Fee not be included as part of this Attachment, US LEC will be assessed the full Application Fee for all subsequent activity for completed arrangements.
- (2) **Space Preparation Fee:** The Space Preparation Fee is a one-time fee, assessed per arrangement, per location. It recovers the costs associated with the shared physical collocation area within a Central Office, which include survey, engineering, design and modification costs for network, building and support systems. In the event US LEC opts for non-enclosed space, the space preparation fee will be assessed based on the total floor space dedicated to US LEC as prescribed in Section 7 of the Collocation Attachment.
- (3) **Space Enclosure Fee:** For cages requested prior to June 1, 1999, the Space Enclosure Construction Fee is a monthly recurring fee, assessed per enclosure, per location with a one-hundred (100) square foot minimum enclosure. It recovers costs associated with providing an optional equipment arrangement enclosure, which include architectural and engineering fees, materials, and installation costs. The cost for additional square feet is applicable only when ordered with the first 100 square feet and must be requested in fifty (50) square foot increments. US LEC may, at its option, arrange with a BellSouth certified contractor to construct the space enclosure in accordance with BellSouth's guidelines and specifications. In this event, the contractor shall directly bill US LEC for the space enclosure, and this fee shall not be applicable.
- (4) **Co-Carrier Cross-Connect.** As stated in Section 5 of the Collocation Attachment, US LEC may connect to other CLECs within the designated Central Office in addition to, and not in lieu of, interconnection to BellSouth services and facilities. Where BellSouth must construct a cable rack structure to house the co-Carrier cross-connection, construction charges will be applied on an individual case basis. BellSouth shall provide an estimate of these charges in the Application Response. Where an existing cable rack structure is in place and has sufficient capacity to accommodate the co-Carrier cross-connection requested, the recurring charges as stated in this Exhibit A shall apply.
- (5) **Additional Engineering Fee:** BellSouth's additional engineering, and other labor costs associated with handling US LEC-requested modifications to requests in progress or augmentations for existing arrangements shall be recovered as Additional Engineering charges, under provisions in BellSouth's F.C.C. Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, US LEC agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, US LEC agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

ENVIRONMENTAL AND SAFETY PRINCIPLES

The following principles provide basic guidance on environmental and safety issues when applying for and establishing Physical Collocation arrangements.

1. GENERAL PRINCIPLES

1.1 Compliance with Applicable Law. BellSouth and US LEC agree to comply with applicable federal, state, and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (USEPA) regulations issued under the Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act (SARA), the Toxic Substances Control Act (TSCA), and OSHA regulations issued under the Occupational Safety and Health Act of 1970, as amended and NFPA and National Electrical Codes (NEC) and the NESC ("Applicable Laws"). Each party shall notify the other if compliance inspections are conducted by regulatory agencies and/or citations are issued that relate to any aspect of this agreement.

1.2 Notice. BellSouth and US LEC shall provide notice to the other, including Material Safety Data sheets (MSDSs), of known and recognized physical hazards or Hazardous Chemicals existing on site or brought on site. Each party is required to provide specific notice for known potential Imminent Danger conditions. US LEC should contact 1-800-743-6737 for BellSouth MSDS sheets.

1.3 Practices/Procedures. BellSouth may make available additional environmental control procedures for US LEC to follow when working at a BellSouth Premises (See Section 2, below). These practices/procedures will represent the regular work practices required to be followed by the employees and contractors of BellSouth for environmental protection. US LEC will require its contractors, agents and others accessing the BellSouth Premises to comply with these practices. Section 2 lists the Environmental categories where BST practices should be followed by CLEC when operating in the BellSouth Premises.

1.4 Environmental and Safety Inspections. BellSouth reserves the right to inspect the US LEC space with proper notification. BellSouth reserves the right to stop any US LEC work operation that imposes Imminent Danger to the environment, employees or other persons in the area or Facility.

1.5 Hazardous Materials Brought On Site. Any hazardous materials brought into, used, stored or abandoned at the BellSouth Premises by US LEC are owned by US LEC. US LEC will indemnify BellSouth for claims, lawsuits or damages to persons or property caused by these materials. Without prior written BellSouth approval, no substantial new safety or environmental hazards can be created by US LEC or different hazardous materials used by US LEC at BellSouth Facility. US LEC must demonstrate adequate emergency response capabilities for its materials used or remaining at the BellSouth Facility.

1.6 Spills and Releases. When contamination is discovered at a BellSouth Premises, the party discovering the condition must notify BellSouth. All Spills or Releases of regulated materials will immediately be reported by US LEC to BellSouth.

1.7 Coordinated Environmental Plans and Permits. BellSouth and US LEC will coordinate plans, permits or information required to be submitted to government agencies, such as emergency response plans, spill prevention control and countermeasures (SPCC) plans and community reporting. If fees are associated with filing, BellSouth and US LEC will develop a cost sharing procedure. If BellSouth's permit or EPA identification number must be used, US LEC must comply with all of BellSouth's permit conditions and environmental processes, including environmental "best management practices (BMP)" (see Section 2, below) and/or selection of BST disposition vendors and disposal sites.

1.8 Environmental and Safety Indemnification. BellSouth and US LEC shall indemnify, defend and hold harmless the other party from and against any claims (including, without limitation, third-party claims for personal injury or death or real or personal property damage), judgments, damages, (including direct and indirect damages, and punitive damages), penalties, fines, forfeitures, costs, liabilities, interest and losses arising in connection with the violation or alleged violation of any Applicable Law or contractual obligation or the presence or alleged presence of contamination arising out of the acts or omissions of the indemnifying party, its agents, contractors, or employees concerning its operations at the Facility.

4. CATEGORIES FOR CONSIDERATION OF ENVIRONMENTAL ISSUES

When performing functions that fall under the following Environmental categories on BellSouth's Premises, US LEC agrees to comply with the applicable sections of the current issue of BellSouth's Environmental and Safety Methods and Procedures (M&Ps), incorporated herein by this reference. US LEC further agrees to cooperate with BellSouth to ensure that US LEC's employees, agents, and/or subcontractors are knowledgeable of and satisfy those provisions of BellSouth's Environmental M&Ps which apply to the specific Environmental function being performed by US LEC, its employees, agents and/or subcontractors.

The most current version of reference documentation must be requested from BellSouth.

2. Categories for Consideration of Environmental Issues (cont.)

ENVIRONMENTAL CATEGORIES	ENVIRONMENTAL ISSUES	ADDRESSED BY THE FOLLOWING DOCUMENTATION

3. DEFINITIONS

Generator. Under RCRA, the person whose act produces a Hazardous Waste, as defined in 40 CFR 261, or whose act first causes a Hazardous Waste to become subject to regulation. The Generator is legally responsible for the proper management and disposal of Hazardous Wastes in accordance with regulations.

Hazardous Chemical. As defined in the U.S. Occupational Safety and Health (OSHA) hazard communication standard (29 CFR 1910.1200), any chemical which is a health hazard or physical hazard.

Hazardous Waste. As defined in section 1004 of RCRA.

Imminent Danger. Any conditions or practices at a facility which are such that a danger exists which could reasonably be expected to cause immediate death or serious harm to people or immediate significant damage to the environment or natural resources.

Spill or Release. As defined in Section 101 of CERCLA.

EXHIBIT A -- SERVICE PROVIDER NUMBER PORTABILITY RATES.....	Exhibit A

ACCESS TO NUMBERS and NUMBER PORTABILITY

1. Non-Discriminatory Access to Telephone Numbers

All the negotiated rates, terms and conditions set forth in this Attachment pertain to the provisioning of local number portability.

1.1 During the term of this Agreement, US LEC shall contact the North American Numbering Plan Administrator for the assignment of numbering resources. In order to be assigned a Central Office Code, US LEC will be required to complete the Central Office Code (NXX) Assignment Request and Confirmation Form (Code Request Form) in accordance with Industry Numbering Committee's Central Office Code (NXX) Assignment Guidelines (INC 95-0407-008).

1.2 For the purposes of the resale of BellSouth's telecommunications services by US LEC, BellSouth will provide US LEC with on line access to telephone numbers for reservation on a first come first served basis. Such reservations of telephone numbers, on a pre-ordering basis shall be for a period of nine (9) days. US LEC acknowledges that there may be instances where there is a shortage of telephone numbers in a particular CLLIC and in such instances BellSouth may request that US LEC cancel its reservations of numbers. US LEC shall comply with such request.

1.3 Further, upon US LEC request and for the purposes of the resale of BellSouth's telecommunications services by US LEC, BellSouth will reserve up to 100 telephone numbers per Common Language Location Identifier Code (CLLIC), for US LEC's sole use. Such telephone number reservations shall be transmitted to US LEC via electronic file transfer. Such reservations shall be valid for ninety (90) days from the reservation date. US LEC acknowledges that there may be instances where there is a shortage of telephone numbers in a particular CLLIC and in such instances BellSouth shall use its best efforts to reserve for a ninety (90) day period a sufficient quantity for US LEC's reasonable need in that particular CLLIC.

2. Number Portability Permanent Solution

2.1 The Parties acknowledge that permanent number portability has been deployed in some, but not all, of BellSouth's operating territory. Both Parties will continue to implement local number portability as developed and approved by the Commission, the FCC and industry forums. Consistent with the requirements to move to Permanent Number

Portability, Interim Service Provider Number Portability will be available until such permanent solution is implemented in an end office.

- 2.2 End User Line Charge. Recovery of charges associated with implementing Number Portability through a monthly charge associated to end users has been authorized by the FCC. This end user line charge will be as filed in FCC No. 1 and will be billed to US LEC only where US LEC is a subscriber to unbundled local switching or is a reseller of BellSouth telecommunications services. This charge will not be discounted.

3. Service Provider Number Portability

- 3.1 Definition. In those areas where permanent number portability is not yet available, BellSouth shall provide Service Provider Number Portability ("SPNP"). SPNP is an interim service arrangement whereby an end user who switches subscription of his local exchange service from BellSouth to a CLEC, or vice versa, is permitted to retain the use of his existing assigned telephone number, provided that the end user remains at the same location for his local exchange service or changes locations and service providers but stays within the same rate center of his existing number.
- 3.2 Methods of Providing Number Portability. SPNP is available through either remote call forwarding or direct inward dialing trunks, at the election of US LEC. Remote call forwarding (SPNP-RCF) is an existing switch-based BellSouth service that redirects calls within the telephone network. Direct inward dialing trunks (SPNP-DID) allow calls to be routed over a dedicated facility to the US LEC switch that serves the subscriber. SPNP-DID Service requires ordering consecutive telephone numbers in blocks of twenty. To order non-consecutive telephone numbers or telephone numbers in less than blocks of twenty, the NBR process must be used. SS7 Signaling is required for the provision of either of these services. Except in those states where US LEC has previously been provided nonconsecutive SPNP-DID numbering via BellSouth NBR process, US LEC may submit a single NBR for nonconsecutive SPNP-DID numbering for the remaining states where it desires said service. Until such time that US LEC has transitioned to LNP as set forth in Section 6 to this Attachment, BellSouth will not disconnect any non-consecutive SPNP-DID numbers that US LEC has requested via BellSouth's Bona Fide Request Process as of the effective date of this Agreement.
- 3.3 Signaling Requirements. SS7 Signaling is required for the provision of SPNP services. SPNP-DID is available from BellSouth on a per DS0, DS1, or DS3 basis. Where SPNP-DID is technically feasible and is

provided on a DS1 or a DS3 basis, the applicable channelization rates are those specified in Section E6 in BellSouth's Intrastate Access Tariffs, incorporated herein by this reference. SPNP is available only for basic local exchange service.

4. SPNP Implementation

Interim SPNP is available through remote call forwarding and direct inward dialing, under the following terms:

- 4.1 SPNP is available where US LEC or BellSouth is currently providing, or will begin providing concurrent with provision of SPNP, basic local exchange service to the affected end user. SPNP for a particular telephone number is available only from the central office originally providing local exchange service to the end user. SPNP for a particular assigned telephone number will be disconnected when any end user, Commission, BellSouth, or CLEC initiated activity (e.g., a change in exchange boundaries) would normally result in a telephone number change had the end user retained his initial local exchange service. Provided however, that the foregoing provision shall not be construed to preclude an end user from moving and retaining the same telephone number when moving within the same rate center.
- 4.2 SPNP-RCF, as contemplated by this Agreement, is a telecommunications service whereby a call dialed to an SPNP-RCF equipped telephone number is automatically forwarded to an assigned seven- or ten- digit telephone number within the local calling area as defined in this Agreement. The forwarded-to number shall be specified by the CLEC or BellSouth, as appropriate. The forwarding company will provide identification of the originating telephone number, via SS7 signaling, to the receiving Party. Identification of the originating telephone number to the SPNP-RCF end user cannot be guaranteed, however. SPNP-RCF provides a call path for the forwarding of simultaneous calls to the receiving Party's specified forwarded-to number. The specific number of call paths and the charge for additional call paths provided with SPNP-RCF are as set forth in Exhibit A to this Attachment 5.
- 4.3 SPNP-DID service, as contemplated by this Statement, provides trunk side access to end office switches for direct inward dialing to the other company's premises equipment from the telecommunications network to lines associated with the other company's switching equipment and must be provided on all trunks in a group arranged for inward service. A SPNP-DID trunk termination charge, provided with SS7 Signaling only, applies for each trunk voice grade equivalent. In addition, direct facilities are

required from the end office where a ported number resides to the end office serving the ported end user customer. The rates for a switched local channel and switched dedicated transport apply as contained in BellSouth's Intrastate Access Services tariff, as said tariff is amended from time to time. Transport mileage will be calculated as the airline distance between the end office where the number is ported and the Point of Interface ("POI") using the V&H coordinate method. SPNP-DID must be established with a minimum configuration of two channels and one unassigned telephone number per switch, per arrangement for control purposes. Transport facilities arranged for SPNP-DID may not be mixed with any other type of trunk group, with no outgoing calls placed over said facilities. SPNP-DID will be provided only where such facilities are available and where the switching equipment of the ordering company is properly equipped. Where SPNP-DID service is required from more than one wire center or from separate trunk groups within the same wire center, such service provided from each wire center or each trunk group within the same wire center shall be considered a separate service. Interface group arrangements provided for terminating the switched transport at the Party's terminal location are as set forth in of BellSouth's Intrastate Access Services Tariff, § E6.1.3.A as amended from time to time.

- 4.4 The calling Party shall be responsible for payment of the applicable charges for sent-paid calls to the SPNP number. For collect, third-Party, or other operator-assisted non-sent paid calls to the ported telephone number, BellSouth or the CLEC shall be responsible for the payment of charges under the same terms and conditions for which the end user would have been liable for those charges. Either Party may request that the other block collect and third company non-sent paid calls to the SPNP-assigned telephone number. If a Party does not request blocking, the other Party will provide itemized local usage data for the billing of non-sent paid calls on the monthly bill of usage charges provided at the individual end user account level. The detail will include itemization of all billable usage. Each Party shall have the option of receiving this usage data on a daily basis via a data file transfer arrangement. This arrangement will utilize the existing industry uniform standard, known as EMR standards, for exchange of billing data. Files of usage data will be created daily for the optional service. Usage originated and recorded in the sending BellSouth RAO will be provided in unrated or rated format. CLEC usage originated elsewhere and delivered via CMDS to the sending BellSouth RAO shall be provided in rated format.
- 4.5 The Party providing new local services to the end user shall be responsible for obtaining authorization from such end user for the handling of the disconnection of the end user's service, the provision of

new local service and the provision of SPNP services. Each company shall be responsible for coordinating the provision of service with the other to assure that its switch is capable of accepting SPNP ported traffic. Each company shall be responsible for providing equipment and facilities that are compatible with the other's service parameters, interfaces, equipment and facilities and shall be required to provide sufficient terminating facilities and services at the terminating end of an SPNP call to adequately handle all traffic to that location and shall be solely responsible to ensure that its facilities, equipment and services do not interfere with or impair any facility, equipment, or service of the other company or any of its end users. In the event that either company determines in its reasonable judgment that the other company will likely impair or is impairing, or interfering with any equipment, facility or service or any of its end users, that company may either refuse to provide SPNP service or may terminate SPNP service to the other Party after providing appropriate notice.

- 4.6 Each company shall be responsible for providing intercept announcement service, at Parity with which it provides its own customers, for any telephone numbers subscribed to SPNP services for which it is not presently providing local exchange service or terminating to an end user. Where either company chooses to disconnect or terminate any SPNP service, that company shall be responsible for designating the preferred standard type of announcement to be provided.
- 4.7 Each company shall be the other company's single point of contact for all repair calls on behalf of each company's end user. Each company reserves the right to contact the other company's customers if deemed necessary for maintenance purposes, but in no event shall such contact result in the marketing to or solicitation of such customer in any way.
- 4.8 Neither company shall be responsible for adverse effects on any service, facility or equipment from the use of SPNP services, provided that such adverse effects are not the result of one Party's gross negligence and willful misconduct. End-to-end transmission characteristics may vary depending on the distance and routing necessary to complete calls over SPNP facilities and the fact that another carrier is involved in the provisioning of service. Therefore, end-to-end transmission characteristics cannot be specified by either company for such calls. Neither company shall be responsible to the other if any necessary change in protection criteria or in any of the facilities, operation, or procedures of either renders any facilities provided by the other company obsolete or renders necessary modification of the other company's equipment.

- 4.9 For terminating IXC traffic ported to either company which requires use of either company's tandem switching, the tandem provider will bill the IXC tandem switching, the interconnection charge, and a portion of the transport, and the other company will bill the IXC local switching, the carrier common line and a portion of the transport. If the tandem provider is unable to provide the necessary access records to permit the other company to bill the IXC directly for terminating access to ported numbers, then the tandem provider will bill the IXC full terminating switched access charges at the tandem provider's rate and will compensate the other company at the tandem company's tariff rates via a process used by BellSouth to estimate the amount of ported switched access revenues due the other company. If an intraLATA toll call is delivered, the delivering company will pay terminating access rates to the other company. This subsection does not apply in cases where SPNP-DID is utilized for number portability.

5. Rates

Both Parties will charge rates for service provider number portability as set out in Exhibit A to this Attachment. If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the Parties upon request by either Party.

6. Transition to Permanent Number Portability

Once a long-term database method of providing Local Number Portability (LNP) is implemented in an end office pursuant to FCC or Commission orders, rules or regulations, with advance written notice, both Parties must withdraw its Interim Number Portability (INP) offerings. The transition from existing INP arrangements to LNP arrangement shall occur within one hundred twenty (120) days of time from the date LNP is implemented in the end office serving the telephone number. Where the Parties are unable to transition existing customers from an INP arrangement to an LNP arrangement, the Parties will continue under the existing INP arrangement until such time as LNP can be implemented. BellSouth will use best efforts to process the disconnect order within an hour of receiving the NPAC broadcast message signifying that the number has been ported. Neither Party shall charge the other Party for conversion from INP to LNP. The Parties shall comply with any INP/LNP transition processes established by the FCC and State commissions and appropriate industry number portability work groups.

Notwithstanding the foregoing, the Parties acknowledge that the FCC has determined that once LNP has been deployed pursuant to the FCC's orders, rules and regulations, all local exchange carriers (LECs) have the duty to provide LNP.

- 6.1 BellSouth shall complete all calls to US LEC ported telephone numbers that have been delivered to the BellSouth network in the same LATA by another service provider. BellSouth shall perform the necessary database look-ups in order to properly route these calls to the US LEC terminating office in cases where the N-1 carrier has not performed this function. This shall include calls originating in the networks of another CLEC, Independent Company, or other telecommunications service provider. The call completion activities shall be performed by BellSouth regardless of the location of the call transition into the BellSouth network, as long as the terminating US LEC office, or POI, is in the same LATA. BellSouth shall bill the service provider of the network that originated the call for the costs of performing the database loop-up.

7. True-up

This section applies only to North Carolina and Tennessee.

- 7.1 The interim prices for Network Elements and Other Services and Local Interconnection shall be subject to true-up according to the following procedures:
- 7.2 The interim prices shall be trued-up, either up or down, based on final prices determined either by further agreement between the Parties, or by a final order (including any appeals) of the Commission which final order meets the criteria of (3) below. The Parties shall implement the true-up by comparing the actual volumes and demand for each item, together with interim prices for each item, with the final prices determined for each item. Each Party shall keep its own records upon which the true-up can be based, and any final payment from one Party to the other shall be in an amount agreed upon by the Parties based on such records. In the event of any disagreement as between the records or the Parties regarding the amount of such true-up, the Parties agree that the body having jurisdiction over the matter shall be called upon to resolve such differences, or the Parties may mutually agree to submit the matter to the Dispute Resolution process in accordance with the provisions in the General Terms and Conditions and Attachment 1 of this Agreement.

7.3 The Parties may continue to negotiate toward final prices, but in the event that no such agreement is reached within nine (9) months, either Party may petition the Commission to resolve such disputes and to determine final prices for each item. Alternatively, upon mutual agreement, the Parties may submit the matter to the Dispute Resolution Process set forth in the General Terms and Conditions and Attachment 1 of the Agreement, so long as they file the resulting Agreement with the Commission as a "negotiated Agreement" under Section 252(e) of the Act.

7.4 A final order of this Commission that forms the basis of a true-up shall be the final order as to prices based on appropriate cost studies, or potentially may be a final order in any other Commission proceeding which meets the following criteria:

- (a) BellSouth and CLEC is entitled to be a full Party to the proceeding;
- (b) It shall apply the provisions of the federal Telecommunications Act of 1996, including but not limited to Section 252(d)(1) (which contains pricing standards) and all then-effective implementing rules and regulations; and,
- (c) It shall include as an issue the geographic deaveraging of network element prices, which deaveraged prices, if any are required by said final order, shall form the basis of any true-up.

8. Operational Support System (OSS) Rates

BellSouth has developed and made available the following mechanized systems by which CLEC-1 may submit LSRs electronically.

LENS	Local Exchange Navigation System
EDI	Electronic Data Interface
EDI-PC	Electronic Data Interface – Personal Computer
TAG	Telecommunications Access Gateway

LSRs submitted by means of one of these interactive interfaces will incur an OSS electronic ordering charge as specified in the table below. An individual LSR will be identified for billing purposes by its Purchase Order Number (PON). LSRs submitted by means other than one of these interactive interfaces (mail, fax, courier, etc.) will incur a manual order charge as specified in the table below:

2001 90%

The threshold plan will be discontinued in 2002.

BellSouth will track the total LSR volume for each CLEC for each quarter. At the end of that time period, a Percent Electronic LSR calculation will be made for that quarter based on the LSR data tracked in the LCSC. If this percentage exceeds the threshold volume, all of that CLECs' future manual LSRs will be billed at the mechanized LSR rate. To allow time for obtaining and analyzing the data and updating the billing system, this billing change will take place on the first day of the second month following the end of the quarter (e.g. May 1 for 1Q, Aug 1 for 2Q, etc.). There will be no adjustments to the amount billed for previously billed LSRs.

NOTES:

If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the parties upon request by either party

1. Until the FCC issues its order implementing a cost recovery mechanism for permanent number portability, the Company will track its costs of providing interim SPNP with sufficient detail to verify the costs. This will facilitate the Florida PSC's consideration of the recovery of these costs in Docket 950737-TP. (FL)
2. BellSouth and CLEC will each bear their own costs of providing remote call forwarding as an interim number portability option. (KY)

Attachment 6

Ordering and Provisioning

TABLE OF CONTENTS

1. QUALITY OF ORDERING AND PROVISIONING	3
2. ACCESS TO OPERATIONAL SUPPORT SYSTEMS	4
3. MISCELLANEOUS ORDERING AND PROVISIONING GUIDELINES	5

ORDERING AND PROVISIONING

1. Quality of Ordering and Provisioning

All the negotiated terms and conditions set forth in this Attachment pertain to ordering and provisioning.

- 1.1 BellSouth shall provide ordering and provisioning services to US LEC that are at Parity with the ordering and provisioning services BellSouth provides to itself or any subsidiary or affiliate, or any other CLEC, wherever possible. Detailed guidelines for ordering and provisioning are set forth in BellSouth's Local Interconnection and Facility Based Ordering Guide and Resale Ordering Guide, as appropriate, and as they are amended from time to time during this Agreement. All of the ordering and provisioning obligations set forth in this Attachment 6 shall be governed by this section.

- 1.2 BellSouth will perform provisioning service during the following normal hours of operation (the times listed below apply to the time zone in which the provisioning or installation service is being provided):

Monday - Friday - 8:00AM - 5:00PM (excluding holidays)
(Resale/UNE non coordinated,
coordinated orders and order
coordinated - Time Specific)

Saturday - 8:00 AM - 5:00 PM (excluding holidays)
(Resale/UNE non coordinated
orders)

Times are either Eastern or Central time based on the location of the work being performed.

US LEC may request provisioning and installation services outside of the normal hours of operation as specified above. Any such requests will be subject to applicable overtime charges as set forth in the applicable BellSouth's tariffs.

2. Access to Operational Support Systems

- 2.1 BellSouth shall provide US LEC access to several operations support systems. Access to these support systems is available through a variety of means, including electronic interfaces. BellSouth also provides the

option of placing orders manually (e.g., via facsimile) through the Local Carrier Service Center. The operations support systems available are:

- 2.2 Pre-Ordering. BellSouth provides electronic access to the following pre-ordering functions: service address validation, telephone number selection, service and feature availability, due date information, and upon Commission approval of confidentiality protections, to customer record information. Access is provided through the Local Exchange Navigation System (LENS) and the Telecommunications Access Gateway (TAG). Customer record information includes any and all customer specific information, including but not limited to, customer specific information in CRIS and RSAG. US LEC agrees not to view, copy, or otherwise obtain access to the customer record information of any customer without that customer's permission and further agrees that US LEC will obtain access to customer record information only in strict compliance with applicable laws, rules, or regulations of the State in which the service is provided.
- 2.3 Service Ordering and Provisioning. BellSouth provides electronic options for the exchange of ordering and provisioning information. BellSouth provides an Electronic Data Interchange (EDI) arrangement for resale requests and certain unbundled network elements. As an alternative to the EDI arrangement, BellSouth also provides through LENS and TAG an ordering and provisioning capability that is integrated with the LENS and TAG pre-ordering capability.
- 2.4 Service Trouble Reporting and Repair. Service trouble reporting and repair allows US LEC to report and monitor service troubles and obtain repair services. BellSouth shall offer US LEC service trouble reporting in a non-discriminatory manner that provides US LEC the equivalent ability to report and monitor service troubles that BellSouth provides to itself or any BellSouth subsidiary or affiliate. BellSouth shall also provide US LEC an estimated time to repair, an appointment time or a commitment time, as appropriate, on trouble reports, which will be at Parity to the service BellSouth provides itself or any BellSouth subsidiary or affiliate. BellSouth provides two options for electronic trouble reporting. For exchange services, BellSouth offers US LEC access to the Trouble Analysis Facilitation Interface (TAFI). For individually designed services, BellSouth provides electronic trouble reporting through an electronic communications gateway. If US LEC request BellSouth to repair a trouble after normal working hours and the trouble exists in US LEC's network or CPE, US LEC will be billed the appropriate overtime charges associated with this request pursuant to applicable BellSouth tariffs. If the trouble exists in BellSouth's network, however, no overtime will be assessed.

- 2.5 Migration of US LEC to New BellSouth Software Releases. BellSouth will issue new software releases for its electronic interfaces as needed to improve operations and meet standards and regulatory requirements. When a new release is implemented, BellSouth will continue to support both the new release (N) and the prior release (N-1). When BellSouth makes the next release (N+1), BellSouth will eliminate support for the (N-1) release and support the two newest releases (N and N+1). Thus, BellSouth will always support the two most current releases. BellSouth will issue documents to US LEC within thirty (30) days notice to allow US LEC to make the necessary changes to their systems and operations to migrate to the newest release in a timely fashion.
- 2.5.1 Currently, there are no charges assessed to the CLEC for software upgrades for the OSS system to operate. However, if /or when BellSouth provides a "Robust TAG GUI" product that provides the CLEC man-machine interface, BellSouth will charge for such upgrades.
- 2.6 Charge for use of Operational Support Systems shall be as set forth in applicable Attachments to this Agreement.

3. Miscellaneous Ordering and Provisioning Guidelines

- 3.1 Firm Order Confirmation: BellSouth will provide US LEC with a Firm Order Confirmation ("FOC") within the time frame set forth in BellSouth's Interval Guide. The FOC shall set forth a customer/requested due date, which is consistent with the time frames identified in BellSouth's Interval Guide.
- 3.2 Pending Orders. To ensure the most efficient use of facilities and resources, orders placed in the hold or pending status by US LEC will be held for a maximum of thirty (30) days from the date the order is placed on hold. After such time, if US LEC wishes to reinstate an order, US LEC may be required to submit a new service order.
- 3.3 Single Point of Contact. US LEC will be the single point of contact with BellSouth for ordering activity for unbundled network elements used by US LEC to provide services to its end users, except that BellSouth may accept an order directly from another CLEC, or BellSouth, acting with authorization of the affected end user. US LEC and BellSouth shall each execute a blanket letter of authorization with respect to customer orders. The Parties shall each be entitled to adopt their own internal processes for verification of customer authorization for orders, provided, however, that such processes shall comply with applicable state and federal law including, until superseded, the FCC guidelines and orders applicable to

Presubscribed Interexchange Carrier (PIC) changes including Un-PIC. Pursuant to such an order, BellSouth may disconnect any unbundled network element associated with the service to be disconnected and being used by US LEC to provide service to that end user and reuse such unbundled network elements or facilities to enable such other LEC to provide service to the end user.

- 3.4 Use of Facilities. When a customer of a CLEC elects to discontinue service and transfer service to another local exchange carrier, including BellSouth, BellSouth shall have the right to reuse the facilities provided to CLEC by BellSouth for retail or resale service, unbundled loop and/or unbundled port for that customer. In addition, BellSouth may disconnect and reuse facilities when the facility is in a denied state and BellSouth has received an order to establish new service or transfer of service from a customer or a customer's CLEC at the same address served by the denied facility.
 - 3.4.1 Upon receipt of a service order, BellSouth will do the following:
 - 3.4.1.1 Process disconnect and reconnect orders to provision the service which shall be due dated using current interval guidelines attached hereto, as amended from time to time during the term of this Agreement.
 - 3.4.1.2 Reuse the serving facility for the retail, resale service, or unbundled network element at the same location.
 - 3.4.1.3 Notify US LEC within five (5) business days of the disconnect order being completed.
- 3.5 Contact Numbers. The parties agree to provide one another with toll-free contact numbers for the purpose of ordering, provisioning and maintenance of services.
- 3.6 Subscription Functions. In cases where BellSouth performs subscription functions for an inter-exchange carrier (i.e. PIC and LPIC changes via Customer Account Record Exchange (CARE)), BellSouth will provide the affected inter-exchange carriers with the Operating Company Number (OCN) of the local provider for the purpose of obtaining end user billing account and other end user information required under subscription requirements.
- 3.7 Cancellation Charges. If US LEC cancels an order for UNE services, any costs incurred by BellSouth in conjunction with the provisioning of that order will be recovered in accordance with FCC No. 1 Tariff, Section 5.4.

BILLING AND BILLING ACCURACY CERTIFICATION

1. Payment and Billing Arrangements

All negotiated rates, terms and conditions set forth in this Attachment pertain to billing and billing accuracy certifications.

1.1 Billing. Currently, BellSouth provides billing through the Carrier Access Billing System (CABS) and through the Customer Records Information System (CRIS) depending on the particular service(s) that US LEC requests. BellSouth will bill and record in accordance with this agreement those charges US LEC incurs as a result of US LEC purchasing from BellSouth Network Elements, Combinations, and Local Services, as set forth in this agreement. BellSouth will format all bills in CBOS Standard or CLUB/EDI format, depending on the type of service ordered. For those services where standards have not yet been developed, BellSouth's billing format will change as necessary when standards are finalized by the industry forum.

1.1.1 If US LEC requests multiple billing media or additional copies of bills, BellSouth will provide these at a reasonable cost.

1.2 Master Account. In states where a Master Account has not already been established, after receiving certification as a local exchange company from the appropriate regulatory agency, US LEC will provide BellSouth the necessary documentation to enable BellSouth to establish a master account for resold services. Such documentation shall include the Application for Master Account, proof of authority to provide telecommunications services, an Operating Company Number ("OCN") assigned by the National Exchange Carriers Association ("NECA") and a tax exemption certificate, if applicable. If applicable, BellSouth will notify US LEC, on a timely basis, after its receipt of documentation from US LEC whether any additional information is required.

1.3 Payment Responsibility. Subject to Section 3 of this Attachment, each Party will be responsible for payment of all charges for services rendered their respective company by the other Party. The Parties shall make payment to one another for all such services billed. Neither Party will be responsible for payments not received by the other's customers and will not become involved in billing disputes that may arise between the other

Party and its customer. Payments made by one Party to the other Party as payment on account will be credited to an accounts receivable master account and not to an end user's account.

- 1.4 Payment Due. The payment for services will be due by the next bill date (i.e., same date in the following month as the bill date) and is payable in immediately available funds. Payment is considered to have been made when received.

If the payment due date falls on a Sunday or on a Holiday which is observed on a Monday, the payment due date shall be the first non-Holiday day following such Sunday or Holiday. If the payment due date falls on a Saturday or on a Holiday which is observed on Tuesday, Wednesday, Thursday, or Friday, the payment due date shall be the last non-Holiday day preceding such Saturday or Holiday. If payment is not received by the payment due date, a late payment penalty, as set forth in Section 1.7, below, shall apply.

- 1.5 Tax Exemption. Upon proof of tax exempt certification from either Party, the total amount billed to US LEC will not include those taxes or fees for which the billed Party is exempt. Each Party will be solely responsible for the computation, tracking, reporting and payment of all taxes and like fees associated with the services provided to their respective end users.

- 1.6 Miscellaneous. As the customer of record for resold services, US LEC will be responsible for, and remit to BellSouth, all charges applicable to its resold services for emergency services (E911 and 911) and Telecommunications Relay Service (TRS) as well as any other charges of a similar nature.

- 1.7 Late Payment. If any portion of the payment for services is received by the billing Party after the payment due date as set forth preceding, or if any portion of the payment is received by the billing Party in funds that are not immediately available to the billing Party, then a late payment penalty shall be due to the billing Party. The late payment penalty shall be the portion of the payment not received by the payment due date times a late factor and will be applied on a per bill basis. The late factor shall be as set forth in Section A2 of the General Subscriber Service Tariff, Section B2 of the Private Line Service Tariff or Section E2 of the Intrastate Access Tariff, whichever the billing Party reasonably determines is appropriate.

- 1.8 Access Charges for Resellers. Any switched access charges associated with interexchange carrier access to the resold local exchange lines will be billed by, and due to, BellSouth. No additional charges are to be assessed to US LEC.

- 1.9 End User Common Line Charge for Resellers. Pursuant to 47 CFR Section 51.617, BellSouth will bill US LEC end user common line charges identical to the end user common line charges BellSouth bills its end users.
- 1.10 Discontinuing Service to US LEC. The procedures for discontinuing service to US LEC are as follows:
- 1.10.1 BellSouth reserves the right to suspend or terminate service for nonpayment, subject to the procedures below; provided, however, that in no event shall BellSouth have any right to suspend or terminate service in the case that US LEC has an outstanding bona fide dispute.
- 1.10.2 In the event that BellSouth believes that its services or facilities are being used for a prohibited, unlawful or improper use, or any other substantial violation or noncompliance by US LEC of the rules and regulations contained in BellSouth's tariffs, and US LEC disputes this belief, BellSouth may petition the appropriate Commission for such a determination and shall have the right to pursue whatever equitable relief it deems appropriate. Both Parties will abide by the Commission's determination with respect to the use of such services or facilities. In the event that the Commission determines that US LEC's use of BellSouth's services or facilities is improper, and US LEC does not alter its use to be in compliance within 30 days of such determination, or in the event that such use cannot reasonably be altered to be in compliance within 30 days, as soon as practicable thereafter, provided that US LEC initiates steps to be in compliance within 30 days, BellSouth may suspend or terminate service with respect to the services or facilities affected.
- 1.10.3 If payment of account is not received by the bill day in the month after the original bill day, and US LEC does not have a bona fide dispute for such payment, BellSouth may provide written notice to US LEC that additional applications for service will be refused and that any pending orders for service will not be completed if payment is not received by the fifteenth day following the date of the notice. In addition, BellSouth may, at the same time, give thirty (30) days notice to US LEC at the billing address that the provision of existing services to US LEC may be discontinued at any time thereafter. US LEC shall have the right to pursue whatever equitable relief it deems appropriate. In the event that a bona fide dispute has been initiated by US LEC, the Parties will meet and negotiate in good faith to resolve the disputed charges. In the event that the Parties are unable to resolve the disputed charges, either Party may petition the applicable Commission for relief.

- 1.10.4 In the case of discontinuance, all billed charges, as well as applicable termination charges shall become due.
- 1.10.5 If BellSouth does not discontinue the provision of the services involved on the date specified in the thirty (30) days notice and US LEC's noncompliance continues, BellSouth does not waive any rights under this Section, and still reserves the right to suspend or terminate service pursuant to the procedures specified in this Section.
- 1.10.6 If, pursuant to 1.10.5 of this Attachment 7, BellSouth discontinues the provision of services to US LEC for nonpayment, service to US LEC's end users will be terminated pursuant to any applicable state public service commission rules and regulations. However, BellSouth will reestablish service at the request of the end user or US LEC for BellSouth to reestablish service upon payment of the appropriate connection fee and subject to BellSouth's normal application procedures. US LEC is solely responsible for notifying the end user of the proposed service disconnection. If within fifteen days after an end user's service has been denied and no arrangements to reestablish service have been made consistent with this subsection have been made, the end user's service will be disconnected.
- 1.11 Deposit Policy. Both Parties acknowledge that US LEC and BellSouth have, prior to the effective date of this Agreement, had a substantial course of dealing, and as such, unless, US LEC's credit worthiness falls below the credit worthiness that has been established prior to the effective date of this Agreement during the term of this Agreement when purchasing services from BellSouth, US LEC will not be required to complete the BellSouth Credit Profile and provide information regarding credit worthiness, as such procedures have already been undertaken by US LEC to BellSouth's satisfaction. US LEC acknowledges that a credit analysis and security deposit is typically required by BellSouth to initiate service, and such requirement is being waived solely due to the Parties prior course of dealing and the fact that these requirements have been satisfied previously. Had US LEC not had the course of dealing, or If, US LEC's credit worthiness changes substantially through the Term of this Agreement, the following would apply. Based on the results of the credit analysis, the Company reserves the right to secure the account with a suitable form of security deposit. Such security deposit shall take the form of cash, an Irrevocable Letter of Credit (BellSouth form), Surety Bond (BellSouth form) or in its sole discretion some other form of security. Any such security deposit shall in no way release the customer from his obligation to make complete and timely payments of his bill. Such security shall be required prior to the inauguration of service. If, in the sole opinion of the Company, circumstances so warrant and/or gross

monthly billing has increased beyond the level initially used to determine the level of security, the Company reserves the right to request additional security and/or file a Uniform Commercial Code (UCC1) security interest in US LEC's "accounts receivables and proceeds." Interest on a security deposit, if provided in cash, shall accrue and be paid in accordance with the terms in the appropriate BellSouth tariff.

- 1.12 Rates. Rates for Optional Daily Usage File (ODUF), Enhanced Optional Daily Usage File (EODUF), Access Daily Usage File (ADUF), and Centralized Message Distribution Service (CMDS) are set out in Exhibit A to this Attachment. If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the parties upon request by either party.

2. Billing and Billing Accuracy Certification

- 2.1 Upon request, BellSouth and US LEC may agree upon a billing quality assurance program for all billing elements covered in this Agreement that will eliminate the need for post-billing reconciliation. Appropriate terms for access to any BellSouth documents, systems, records, and procedures for the recording and billing of charges will be part of that program.
- 2.2 As part of the billing quality assurance program, BellSouth and US LEC will develop standards, measurements, and performance requirements for a local billing measurements process. On a regular basis BellSouth will provide US LEC with mutually agreed upon performance measurement data that substantiates the accuracy, reliability, and integrity of the billing process for local billing. In return, US LEC will pay all bills received from BellSouth in full by the payment due date.
- 2.3 Local billing discrepancies will be addressed in an orderly manner via a mutually agreed upon billing exemption process.
- 2.3.1 Each party agrees to notify the other Party upon identifying a billing discrepancy. The Parties shall endeavor to resolve any billing discrepancy within sixty (60) calendar days of the notification date. A mutually agreed upon escalation process will be established for resolving local billing discrepancies as part of the billing quality assurance program.
- 2.3.2 Closure of a specific billing period will occur by joint agreement of the Parties whereby the Parties agree that such billing period is closed to any further analysis and financial transactions except those resulting from regulatory mandates. Closure will take place within a mutually agreed upon time interval from the Bill Date. The month being closed represents

those charges that were billed or should have been billed by the designated Bill Date.

3. Billing Disputes

- 3.1 Where the parties have not agreed upon a billing quality assurance program, billing disputes shall be handled pursuant to the terms of this section.
 - 3.1.1 Each Party agrees to notify the other Party in writing upon the discovery of a billing dispute. In the event of a billing dispute, the Parties will endeavor to resolve the dispute within sixty (60) calendar days of the Bill Date on which such disputed charges appear.
- 3.2 If a Party disputes a charge and does not pay such charge by the payment due date, or if a payment or any portion of a payment is received by either Party after the payment due date, or if a payment or any portion of a payment is received in funds which are not immediately available to the other Party, then a late payment penalty shall be assessed. For bills rendered by either Party for payment, the late payment charge shall be calculated for both Parties based on the portion of the payment not received by the payment due date times the late factor as set forth in the following BellSouth tariffs: for services purchased from the General Subscribers Services Tariff for purposes of resale, Section A2 of the General Subscriber Services Tariff; for services purchased from the Private Line Tariff for purposes of resale, Section B2 of the Private Line Service Tariff; and for unbundled network elements and local interconnection charges, Section E2 of the Access Service Tariff. The Parties shall only assess interest on previously assessed late payment charges in a state where it has the authority pursuant to its tariffs. If the disputed charge is later found to be invalid, the disputing Party will be credited the disputed amount and any late payment charge assessed.

4. RAO Hosting

- 4.1 RAO Hosting, Credit Card and Third Number Settlement System (CATS) and Non-Intercompany Settlement System (NICS) services provided to US LEC by BellSouth will be in accordance with the methods and practices regularly adopted and applied by BellSouth to its own operations

- 4.11 All messages and related data exchanged between BellSouth and US LEC will be formatted in accordance with accepted industry standards for EMI formatted records and packed between appropriate EMI header and trailer records, also in accordance with accepted industry standards.
- 4.12 US LEC will ensure that the recorded message detail necessary to recreate files provided to BellSouth will be maintained for back-up purposes for a period of three (3) calendar months beyond the related message dates.
- 4.13 Should it become necessary for either Party to send data to the other more than sixty (60) days past the message date(s), that Party will notify the other in advance of the transmission of the data. If there will be impacts outside the BellSouth region, each will work with its connecting contractor to notify all affected Parties.
- 4.14 In the event that data to be exchanged between the two Parties should become lost or destroyed, both Parties will work together to determine the source of the problem. Once the cause of the problem has been jointly determined and the responsible Party (BellSouth or US LEC) identified and agreed to, the company responsible for creating the data (BellSouth or US LEC) will make every effort to have the affected data restored and retransmitted. If the data cannot be retrieved, the responsible Party will be liable to the other Party for any resulting lost revenue. Lost revenue may be a combination of revenues that could not be billed to the end users and associated access revenues. Both Parties will work together to estimate the revenue amount based upon historical data through a method mutually agreed upon. The resulting estimated revenue loss will be paid by the responsible Party to the other Party within three (3) calendar months of the date of problem resolution, or as mutually agreed upon by the Parties.
- 4.15 Should an error be detected by the EMI format edits performed by BellSouth on data received from US LEC, the entire pack containing the affected data will not be processed by BellSouth. BellSouth will notify US LEC of the error condition through the data processor system, which notification under ordinary conditions, occurs immediately. US LEC will correct the error(s) and will resend the entire pack to BellSouth for processing. In the event that an out-of-sequence condition occurs on subsequent packs, US LEC will resend these packs to BellSouth after the pack containing the error has been successfully reprocessed by BellSouth.

- 4.16 In association with message distribution service, BellSouth will provide US LEC with associated intercompany settlements reports (CATS and NICS) as appropriate.
- 4.17 In no case shall either Party be liable to the other for any direct or consequential damages incurred as a result of the obligations set out in this agreement.
- 4.18 RAO Compensation
- 4.18.1 Rates for message distribution service provided by BellSouth for US LEC are as set forth in Exhibit A to this Attachment.
- 4.18.2 Rates for data transmission associated with message distribution service are as set forth in Exhibit A to this Attachment.
- 4.18.3 Data circuits (private line or dial-up) will be required between BellSouth and US LEC for the purpose of data transmission. Where a dedicated line is required, US LEC will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. US LEC will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by BellSouth and the associated charges assessed to US LEC. Additionally, all message toll charges associated with the use of the dial circuit by US LEC will be the responsibility of US LEC. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by case basis between the Parties.
- 4.18.4 All equipment, including modems and software that is required on the US LEC end for the purpose of data transmission will be the responsibility of US LEC.
- 4.19 Intercompany Settlements Messages
- 4.19.1 This Section addresses the settlement of revenues associated with traffic originated from or billed by US LEC as a facilities based provider of local exchange telecommunications services outside the BellSouth region. Only traffic that originates in one Bell operating territory and bills in another Bell operating territory is included. Traffic that originates and bills within the same Bell operating territory will be settled on a local basis between US LEC and the involved company(ies), unless that company is participating in NICS.

- 4.19.2 Both traffic that originates outside the BellSouth region by US LEC and is billed within the BellSouth region, and traffic that originates within the BellSouth region and is billed outside the BellSouth region by US LEC, is covered by this Agreement (CATS). Also covered is traffic that either is originated by or billed by US LEC, involves a company other than US LEC, qualifies for inclusion in the CATS settlement, and is not originated or billed within the BellSouth region (NICS).
- 4.19.3 Once US LEC is operating within the BellSouth territory, revenues associated with calls originated and billed within the BellSouth region will be settled via Telecordia Technologies, its successor or assign, NICS system.
- 4.19.4 BellSouth will receive the monthly NICS reports from Telecordia Technologies, its successor or assign, on behalf of US LEC. BellSouth will distribute copies of these reports to US LEC on a monthly basis.
- 4.19.5 BellSouth will receive the monthly Credit Card and Third Number Settlement System (CATS) reports from Telecordia Technologies, its successor or assign, on behalf of US LEC. BellSouth will distribute copies of these reports to US LEC on a monthly basis.
- 4.19.6 BellSouth will collect the revenue earned by US LEC from the Bell operating company in whose territory the messages are billed (CATS), less a per message billing and collection fee of five cents (\$0.05), on behalf of US LEC. BellSouth will remit the revenue billed by US LEC to the Bell operating company in whose territory the messages originated, less a per message billing and collection fee of five cents (\$0.05), on behalf of US LEC. These two amounts will be netted together by BellSouth and the resulting charge or credit issued to US LEC via a monthly Carrier Access Billing System (CABS) miscellaneous bill.
- 4.19.7 BellSouth will collect the revenue earned by US LEC within the BellSouth territory from another CLEC also within the BellSouth territory (NICS) where the messages are billed, less a per message billing and collection fee of five cents (\$0.05), on behalf of US LEC. BellSouth will remit the revenue billed by US LEC within the BellSouth region to the CLEC also within the BellSouth region, where the messages originated, less a per message billing and collection fee of five cents (\$0.05). These two amounts will be netted together by BellSouth and the resulting charge or credit issued to US LEC via a monthly Carrier Access Billing System (CABS) miscellaneous bill.

BellSouth and US LEC agree that monthly netted amounts of less than fifty dollars (\$50.00) will not be settled.

5. Optional Daily Usage File

- 5.1 Upon written request from US LEC, BellSouth will provide the Optional Daily Usage File (ODUF) service to US LEC pursuant to the terms and conditions set forth in this section.
- 5.2 US LEC shall furnish all relevant information required by BellSouth for the provision of the Optional Daily Usage File.
- 5.3 The Optional Daily Usage Feed will contain billable messages that were carried over the BellSouth Network and processed in the BellSouth Billing System, but billed to a US LEC customer.

Charges for delivery of the Optional Daily Usage File will appear on US LECs' monthly bills. The charges are as set forth in Exhibit A to this Attachment.

- 5.4 The Optional Daily Usage Feed will contain both rated and unrated messages. All messages will be in the standard Alliance for Telecommunications Industry Solutions (ATIS) EMI record format.
- 5.5 Messages that error in the billing system of US LEC will be the responsibility of US LEC. If, however, US LEC should encounter significant volumes of errored messages that prevent processing by US LEC within its systems, BellSouth will work with US LEC to determine the source of the errors and the appropriate resolution.
- 5.6 The following specifications shall apply to the Optional Daily Usage Feed.
- 5.6.1 USAGE TO BE TRANSMITTED
- 5.6.1.1 The following messages recorded by BellSouth will be transmitted to US LEC:

- message recording for per use/per activation type services (examples: Three Way Calling, Verify, Interrupt, Call Return, ETC.)
- measured billable Local
- Directory Assistance messages
- intraLATA Toll
- WATS & 800 Service

- N11
- Information Service Provider Messages
- Operator Services Messages
- Operator Services Message Attempted Calls (UNE only)
- Credit/Cancel Records
- Usage for Voice Mail Message Service

5.6.1.2 Rated Incollects (originated in BellSouth and from other companies) can also be on Optional Daily Usage File. Rated Incollects will be intermingled with BellSouth recorded rated and unrated usage. Rated Incollects will not be packed separately.

5.6.1.3 BellSouth will perform duplicate record checks on records processed to Optional Daily Usage File. Any duplicate messages detected will be deleted and not sent to US LEC.

5.6.1.4 In the event that US LEC detects a duplicate on Optional Daily Usage File they receive from BellSouth, US LEC will drop the duplicate message (US LEC will not return the duplicate to BellSouth).

5.6.2 PHYSICAL FILE CHARACTERISTICS

5.6.2.1 The Optional Daily Usage File will be distributed to US LEC via an agreed medium with CONNECT:Direct being the preferred transport method. The Daily Usage Feed will be a variable block format (2476) with an LRECL of 2472. The data on the Daily Usage Feed will be in a non-compacted EMI format (175 byte format plus modules). It will be created on a daily basis (Monday through Friday except holidays). Details such as dataset name and delivery schedule will be addressed during negotiations of the distribution medium. There will be a maximum of one dataset per workday per OCN.

5.6.2.2 Data circuits (private line or dial-up) may be required between BellSouth and US LEC for the purpose of data transmission. Where a dedicated line is required, US LEC will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. US LEC will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by BellSouth and

the associated charges assessed to US LEC. Additionally, all message toll charges associated with the use of the dial circuit by US LEC will be the responsibility of US LEC. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by case basis between the parties. All equipment, including modems and software, that is required on US LEC end for the purpose of data transmission will be the responsibility of US LEC.

5.6.3 PACKING SPECIFICATIONS

5.6.3.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.

5.6.3.2 The OCN, From RAO, and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to US LEC which BellSouth RAO that is sending the message. BellSouth and US LEC will use the invoice sequencing to control data exchange. BellSouth will be notified of sequence failures identified by US LEC and resend the data as appropriate.

The data will be packed using ATIS EMI records.

5.6.4 PACK REJECTION

5.6.4.1 US LEC will notify BellSouth within one business day of rejected packs (via the mutually agreed medium). Packs could be rejected because of pack sequencing discrepancies or a critical edit failure on the Pack Header or Pack Trailer records (i.e. out-of-balance condition on grand totals, invalid data populated). Standard ATIS EMI Error Codes will be used. US LEC will not be required to return the actual rejected data to BellSouth. Rejected packs will be corrected and retransmitted to US LEC by BellSouth.

5.6.5 CONTROL DATA

US LEC will send one confirmation record per pack that is received from BellSouth. This confirmation record will indicate US LEC received the pack and the acceptance or rejection of the pack. Pack Status Code(s) will be populated using standard ATIS EMI error codes for packs that were rejected by US LEC for reasons stated in the above section.

5.6.6 TESTING

- 5.6.6.1 Upon request from US LEC, BellSouth shall send test files to US LEC for the Optional Daily Usage File. The parties agree to review and discuss the file's content and/or format. For testing of usage results, BellSouth shall request that US LEC set up a production (LIVE) file. The live test may consist of US LEC's employees making test calls for the types of services US LEC requests on the Optional Daily Usage File. These test calls are logged by US LEC, and the logs are provided to BellSouth. These logs will be used to verify the files. Testing will be completed within 30 calendar days from the date on which the initial test file was sent.

6. **Access Daily Usage File**

- 6.1 Upon written request from US LEC, BellSouth will provide the Access Daily Usage File (ODUF) service to US LEC pursuant to the terms and conditions set forth in this section.
- 6.2 US LEC shall furnish all relevant information required by BellSouth for the provision of the Access Daily Usage File.
- 6.3 The Access Daily Usage Feed will contain access messages associated with an unbundled port that US LEC has purchased from BellSouth
- 6.4 Charges for delivery of the Access Daily Usage File will appear on US LECs' monthly bills. The charges are as set forth in Exhibit A to this Attachment. All messages will be in the standard Alliance for Telecommunications Industry Solutions (ATIS) EMI record format.
- 6.5 Messages that error in the billing system of US LEC will be the responsibility of US LEC. If, however, US LEC should encounter significant volumes of errored messages that prevent processing by US LEC within its systems, BellSouth will work with US LEC to determine the source of the errors and the appropriate resolution.
- 6.6 USAGE TO BE TRANSMITTED
- 6.6.1 The following messages recorded by BellSouth will be transmitted to US LEC:

Interstate and intrastate access records associated with an unbundled port.

Undetermined jurisdiction access records associated with an unbundled port.

- 6.6.2 When US LEC purchases Unbundled Network Element (UNE) ports from BellSouth and calls are made using these ports, BellSouth will handle the calls as follows:

Originating from UNE and carried by Interexchange Carrier:

BellSouth will bill UNE element to CLEC and send access record to the CLEC via ADUF

Originating from UNE and carried by BellSouth (US LEC is BellSouth's toll customer):

BellSouth will bill resale toll rates to US LEC and send toll record for the end user toll billing purposes via ODUF (Optional Daily Usage File). Access record will be sent to US LEC via ADUF.

Terminating on UNE and carried by Interexchange Carrier:

BellSouth will bill UNE element to US LEC and send access record to US LEC.

Terminating on UNE and carried by BellSouth:

BellSouth will bill UNE element to US LEC and send access record to US LEC.

- 6.6.3 BellSouth will perform duplicate record checks on records processed to the Access Daily Usage File. Any duplicate messages detected will be dropped and not sent to US LEC.

- 6.6.4 In the event that US LEC detects a duplicate on the Access Daily Usage File they receive from BellSouth, US LEC will drop the duplicate message (US LEC will not return the duplicate to BellSouth.)

6.6.5 PHYSICAL FILE CHARACTERISTICS

- 6.6.5.1 The Access Daily Usage File will be distributed to US LEC via an agreed medium with CONNECT:Direct being the preferred transport method. The Daily Usage Feed will be a fixed block format (2476) with an LRECL of 2472. The data on the Daily Usage Feed will be in a non-compacted EMI format (210 byte format plus modules). It will be created on a daily

basis (Monday through Friday except holidays). Details such as dataset name and delivery schedule will be addressed during negotiations of the distribution medium. There will be a maximum of one dataset per workday per OCN.

- 6.6.5.2 Data circuits (private line or dial-up) may be required between BellSouth and US LEC for the purpose of data transmission. Where a dedicated line is required, US LEC will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. US LEC will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by BellSouth and the associated charges assessed to US LEC. Additionally, all message toll charges associated with the use of the dial circuit by US LEC will be the responsibility of US LEC. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by case basis between the parties. All equipment, including modems and software, that is required on US LEC end for the purpose of data transmission will be the responsibility of US LEC.

6.6.6 PACKING SPECIFICATIONS

- 6.6.6.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.

- 6.6.6.2 The OCN, From RAO, and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to US LEC which BellSouth RAO that is sending the message. BellSouth and US LEC will use the invoice sequencing to control data exchange. BellSouth will be notified of sequence failures identified by US LEC and resend the data as appropriate.

The data will be packed using ATIS EMI records.

6.6.7 PACK REJECTION

- 6.6.7.1 US LEC will notify BellSouth within one business day of rejected packs (via the mutually agreed medium). Packs could be rejected because of pack sequencing discrepancies or a critical edit failure on the Pack Header or Pack Trailer records (i.e. out-of-balance condition on grand totals, invalid data populated). Standard ATIS EMI Error Codes will be used. US LEC will not be required to return the actual rejected data to

BellSouth. Rejected packs will be corrected and retransmitted to US LEC by BellSouth.

6.6.8 CONTROL DATA

US LEC will send one confirmation record per pack that is received from BellSouth. This confirmation record will indicate US LEC received the pack and the acceptance or rejection of the pack. Pack Status Code(s) will be populated using standard ATIS EMI error codes for packs that were rejected by US LEC for reasons stated in the above section.

6.6.9 TESTING

6.6.9.1 Upon request from US LEC, BellSouth shall send test files to US LEC for the Access Daily Usage File. Testing shall consist of actual calls made from live accounts. A call log shall be supplied along with test request information. The parties agree to review and discuss the file's content and/or format.

7. Enhanced Optional Daily Usage File

7.1 Upon written request from US LEC, BellSouth will provide the Enhanced Optional Daily Usage File (EODUF) service to US LEC pursuant to the terms and conditions set forth in this section. EODUF will only be sent to existing ODUF subscribers who request the EODUF option.

7.2 US LEC shall furnish all relevant information required by BellSouth for the provision of the Enhanced Optional Daily Usage File.

7.3 The Enhanced Optional Daily Usage File (EODUF) will provide usage data for local calls originating from resold Flat Rate Business and Residential Lines.

Charges for delivery of the Enhanced Optional Daily Usage File will appear on US LECs' monthly bills. The charges are as set forth in Exhibit A to this Attachment.

7.4 All messages will be in the standard Alliance for Telecommunications Industry Solutions (ATIS) EMI record format.

7.5 Messages that error in the billing system of US LEC will be the responsibility of US LEC. If, however, US LEC should encounter significant volumes of errored messages that prevent processing by US LEC within its systems, BellSouth will work with US LEC to determine the source of the errors and the appropriate resolution.

7.6 The following specifications shall apply to the Optional Daily Usage Feed.

7.6.1 USAGE TO BE TRANSMITTED

7.6.1.1 The following messages recorded by BellSouth will be transmitted to US LEC:

Customer usage data for flat rated local call originating from CLEC end user lines (1FB or 1FR). The EODUF record for flat rate messages will include:

- Date of Call
- From Number
- To Number
- Connect Time
- Conversation Time
- Method of Recording
- From RAO
- Rate Class
- Message Type
- Billing Indicators
- Bill to Number

7.6.1.2 BellSouth will perform duplicate record checks on EODUF records processed to Optional Daily Usage File. Any duplicate messages detected will be deleted and not sent to US LEC.

7.6.1.3 In the event that US LEC detects a duplicate on Enhanced Optional Daily Usage File they receive from BellSouth, US LEC will drop the duplicate message (US LEC will not return the duplicate to BellSouth).

7.6.2 PHYSICAL FILE CHARACTERISTICS

7.6.2.1 The Enhanced Optional Daily Usage Feed will be distributed to US LEC over their existing Optional Daily Usage File (ODUF) feed. The EODUF messages will be intermingled among US LEC's Optional Daily Usage File (ODUF) messages. The EODUF will be a variable block format (2476) with an LRECL of 2472. The data on the EODUF will be in a non-compacted EMI format (175 byte format plus modules). It will be created on a daily basis (Monday through Friday except holidays).

7.6.2.2 Data circuits (private line or dial-up) may be required between BellSouth and US LEC for the purpose of data transmission. Where a dedicated line is required, US LEC will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. US LEC will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by BellSouth and the associated charges assessed to US LEC. Additionally, all message toll charges associated with the use of the dial circuit by US LEC will be the responsibility of US LEC. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by case basis between the parties. All equipment, including modems and software that is required on US LEC end for the purpose of data transmission will be the responsibility of US LEC.

7.6.3 PACKING SPECIFICATIONS

7.6.3.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.

7.6.3.2 The Operating Company Number (OCN), From Revenue Accounting Office (RAO), and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to US LEC which BellSouth RAO that is sending the message. BellSouth and US LEC will use the invoice sequencing to control data exchange. BellSouth will be notified of sequence failures identified by US LEC and resend the data as appropriate.

The data will be packed using ATIS EMI records.

Attachment 8

Rights-of-Way, Conduits and Pole Attachments

Attachment 8

Rights-of-Way, Conduits and Pole Attachments

Pursuant to terms and conditions negotiated between US LEC and BellSouth's Competitive Structure Provisioning Center and pursuant to 47 U.S.C. § 224, BellSouth will provide nondiscriminatory access to poles, ducts, conduit, and rights-of-way owned or controlled by BellSouth.

The Parties acknowledge that, with the exception of the general obligation above, the Parties have not entered into a comprehensive agreement governing access to rights-of-way, conduits and pole attachments. BellSouth acknowledges that US LEC may, at any time during the term of this Agreement, request that BellSouth negotiate in good faith an amendment to this Agreement to establish comprehensive terms for access to rights-of-way, conduits and pole attachments. BellSouth further agrees that, at any time during the term of this Agreement, upon request by US LEC, BellSouth will, pursuant to section 252 (i), provide US LEC with access to poles, ducts and conduits.

Attachment 9

Performance Measurements

The Performance Measurements set forth in this Attachment are subject to and will be updated in accordance with subsequent applicable FCC and/or Commission decisions. BellSouth acknowledges and agrees that US LEC's agreement with the Performance Measurements set forth in this Attachment does not mean that US LEC endorses these Performance Measurements. With respect to each of the Performance Measurements in this Attachment, and all other services and facilities provided by BellSouth to US LEC, BellSouth will provide US LEC a level of performance that is at least at Parity to that which BellSouth provides itself or any BellSouth subsidiary or affiliate or any other CLEC.

PRE-ORDERING AND ORDERING OSS

Function:	Average Response Interval for Pre-Ordering and Ordering Legacy Information & OSS Interface Availability
Measurement Overview:	As an initial step of establishing service, the customer service agent must establish such basic facts as availability of desired features, likely service delivery intervals, the telephone number to be assigned, product and feature availability, and the validity of the street address. Typically, this type of information is gathered from the supporting OSS's while the customer (or potential customer) is on the telephone with the customer service agent. This information may be gathered via stand-alone pre-order inquiries or as part of the ordering function. Pre-ordering/ordering activities are the first contact that a customer may have with a CLEC. This measure is designed to monitor the time required for the CLEC interface systems to obtain from legacy systems the pre-ordering/ordering information necessary to establish and modify service. This measurement also captures the availability percentages for the BST systems that the CLEC uses during pre-ordering and ordering. Comparison to BST results allow conclusions as to whether an equal opportunity exists for the CLEC to deliver a comparable customer experience.
Measurement Methodology:	<p>1. Average OSS Response Interval = $\text{Sum}[(\text{Date \& Time of Legacy Response}) - (\text{Date \& Time of Request to Legacy})]/(\text{Number of Legacy Requests During the Reporting Period})$</p> <p>The response interval for retrieving pre-order/order information from a given legacy is determined by summing the response times for all requests (contracts) submitted to the legacy during the reporting period and then dividing by the total number of legacy requests for the reporting period. The response interval starts when the client application (LENS for CLECs; RNS for BST) submits a request to the legacy system and ends when the appropriate response is returned to the client application. The number of legacy accesses during the reporting period that take less than 2.3 seconds and the number that take more than 6 seconds are also captured.</p> <p>Definition: Average response time for accessing legacy data associated with appointment scheduling, service & feature availability, address verification, request for Telephone Numbers (TNs), and Customer Service Records (CSRs).</p> <p>2. OSS Interface Availability = $(\text{Actual Availability})/(\text{Scheduled Availability}) \times 100$</p> <p>Definition: Percent of time OSS interface is actually available compared to scheduled availability. Availability percentages for CLEC interface systems and for all legacy systems accessed by them are captured.</p>

ORDERING

Function:	Ordering
Measurement Overview:	When a customer calls their service provider, they expect to get information promptly regarding the progress on their order(s). Likewise, when changes must be made, such as to the expected delivery date, customers expect that they will be immediately notified so that they may modify their own plans. The order status measurements monitor, when compared to applicable BST results, that the CLEC has timely access to order progress information so that the customer may be updated or notified when changes and rescheduling are necessary.
Measurement Methodology:	<p>1. Percent Flow-through Service Requests = $\Sigma (\text{Total Number of valid Service Requests that flow-through to the BST OSS}) / (\text{Total Number of valid Service Requests delivered to BST OSS}) \times 100$.</p> <p>Definition: <u>Percent Flow-through Service Requests</u> measures the percentage of orders submitted electronically that utilize BSTs' OSS without manual (human) intervention.</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Mechanized tracking for flow-through service requests and manual SOER error audit reports (3/31/98). Mechanized tracking for SOER errors and flow-through (4/30/98). • BST mechanized order tracking. <p>2. Percent Rejected Service Requests = $\Sigma (\text{Total Number of Rejected Service Requests}) / (\text{Total Number of Service Requests Received}) \times 100$.</p> <p>Definition: <u>Percent Rejected Service Requests</u> is the percent of total orders received rejected due to error or omissions.</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Manual tracking for non flow-through service requests • Mechanized tracking for flow-through service requests • BST retail report not applicable. <p>3. Reject Interval = $\Sigma [(\text{Date and Time of Service Request Rejection}) - (\text{Date and Time of Service Request Receipt})] / (\text{Number of Service Requests Rejected in Reporting Period})$. Requests are provided based on four (4) hour increments within a 24 hour period, along with the percent greater than 24 hours.</p> <p>Definition: <u>Reject Interval</u> is the average reject time from receipt of service order request to distribution of rejection.</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Non-Mechanized Results are based on actual data from all orders. • Mechanized Results are based on actual data for all orders from the OSS. • BST retail report not applicable.

ORDERING

Measurement Methodology:	<p>4. Firm Order Confirmation Timeliness = $\Sigma [(\text{Date and Time of Firm Order Confirmation}) - (\text{Date and Time of Service Request Receipt})] / (\text{Number of Service Requests Confirmed in Reporting Period})$</p> <p>Definition: <u>Interval for Return of a Firm Order Confirmation (FOC Interval)</u> is the average response time from receipt of valid service order request to distribution of order confirmation. Results are provided based on four (4) hour increments within a 24 hour period, along with the percent greater than 24 hours.</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Non-Mechanized Results are based on actual data from all orders. • Mechanized Results are based on actual data for all orders from the OSS. • BST retail report not applicable. <p>5. Speed of Answer in Ordering Center = $\Sigma (\text{Total time in seconds to reach LCSC}) / (\text{Total \# of Calls})$ in Reporting Period.</p> <p>Definition: Measures the average time to reach a BST representative. This can be an important measure of adequacy in a manual environment or even in a mechanized environment where CLEC service representatives have a need to speak with their BST peers.</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Mechanized tracking through LCSC Automatic Call Distributor. • Mechanized tracking through BST retail center support systems.

PROVISIONING

Function:	Average Completion Interval and Order Completion Interval Distribution
Measurement Overview:	<p>The “average completion interval” measure monitors the time required by BST to deliver integrated and operable service components requested by the CLEC, regardless of whether resale services or unbundled network elements are employed. When the service delivery interval of BST is measured for comparable services, then conclusions can be drawn regarding whether or not CLECs have a reasonable opportunity to compete for customers. The “order completion interval distribution” measure monitors the reliability of BST commitments with respect to committed due dates to assure that CLECs can reliably quote expected due dates to their retail customer. In addition, when monitored over time, the “average completion interval” and “percent completed on time” may prove useful in detecting developing capacity issues.</p>
Measurement Methodology:	<p>1. Average Completion Interval = $\Sigma [(\text{Completion Date \& Time}) - (\text{Order Issue Date \& Time})] / (\text{Count of Orders Completed in Reporting Period})$</p> <p>2. Order Completion Interval Distribution = $\Sigma (\text{Service Orders Completed in “X” days}) / (\text{Total Service Orders Completed in Reporting Period}) \times 100$</p> <p>The actual completion interval is determined for each order processed during the reporting period. The completion interval is the elapsed time from BST issues a FOC or SOC's date time stamp receipt of a order from the CLEC to BST's actual order completion date. Elapsed time for each order is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the associated total number of orders completed within the reporting period.</p> <p>The distribution of completed orders is determined by first counting, for each specified reporting dimension, the total numbers of orders completed within the reporting interval and the interval between the issue date of each order and the completion date. For each reporting dimension, the resulting count of orders completed for each specified time period following the issue date is divided by the total number of orders completed with the resulting fraction expressed as a percentage. D&F orders are excluded from this measurement. BellSouth does not have established intervals for these orders. The customer chooses their disconnect date including 0 day disconnect.</p> <p>Definition: Average time from issue date of service order to actual order completion date.</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Mechanized metric from ordering system.

PROVISIONING

Reporting Dimensions:	Excluded Situations:
<ul style="list-style-type: none"> • CLEC Specific • CLEC Aggregate • BST Aggregate • State, Region and further geographic dissagregation as required by State Commission Order. • ISDN Orders included in Non Design - GA Only • Dispatch/No Dispatch categories are not applicable to trunks. • Product Reporting Levels <ul style="list-style-type: none"> • Interconnection Trunks • Resale – Residence • Resale – Business • Resale – Design • UNE Design • UNE Non Design 	<ul style="list-style-type: none"> • Canceled Service Orders • Order Activities of BST or the CLEC associated with internal or administrative use of local services (R Orders, Test Orders, etc.) • D & F orders
Data Retained Relating to CLEC Experience:	Data Retained Relating to BST Performance:
<ul style="list-style-type: none"> • Report Month • CLEC Order Number • Order Submission Date • Order Submission Time • Order Completion Date • Order Completion Time • Service Type • Activity Type • State, Region and further geographic dissagregation as required by State Commission Order 	<ul style="list-style-type: none"> • Report Month • Average Order Completion Interval • Order Completion by Interval • Service Type • Activity Type • State, Region and further geographic dissagregation as required by State Commission Order

PROVISIONING

Function:	Held Order Interval Distribution and Mean Interval
Measurement Overview:	When delays occur in completing CLEC orders, the average period that CLEC orders are held for BST reasons, pending a delayed completion, should be no worse for the CLEC when compared to BST delayed orders.
Measurement Methodology:	<p>1. Mean Held Order Interval = Σ (Reporting Period Close Date – Committed Order Due Date) / (Number of Orders Pending and Past The Committed Due Date) for all orders pending and past the committed due date.</p> <p>This metric is computed at the close of each report period. The held order interval is established by first identifying all orders, at the close of the reporting interval, that both have not been reported as “completed” via a valid completion notice and have passed the currently “committed completion date” for the order. <i>Held orders due to end-user reasons are included and identified in this report.</i> For each such order the number of calendar days between the committed completion date and the close of the reporting period is established and represents the held order interval for that particular order. The held order interval is accumulated by the standard groupings, unless otherwise noted, and the reason for the order being held, if identified. The total number of days accumulated in a category is then divided by the number of held orders within the same category to produce the mean held order interval.</p> <p>2. Held Order Distribution Intervals</p> <p>(# of Orders Held for ≥ 90 days) / (Total # of Orders Pending But Not Completed) X 100.</p> <p>(# of Orders Held for ≥ 15 days) / (Total # of Orders Pending But Not Completed) X 100.</p> <p>This “percentage orders held” measure is complementary to the held order interval but is designed to reflect orders continuing in a “non-completed” state for an extended period of time. Computation of this metric utilizes a subset of the data accumulated for the “held order interval” measure. All orders, for which the “held order interval” equals or exceeds 90 or 15 days, are counted, unless otherwise noted as an exclusion. The total number of pending and past due orders are counted (as was done for the held order interval) and divided into the count of orders held past 90 or 15 days.</p> <p>Definition: Average time orders continue in a “non-complete” state for an extended period of time.</p> <p>Methodology:</p> <ul style="list-style-type: none"> Mechanized metric from ordering system.

PROVISIONING

PROVISIONING

Function:	Installation Timeliness, Quality & Accuracy
Measurement Overview:	The “percent missed installation appointments” measure monitors the reliability of BST commitments with respect to committed due dates to assure that CLECs can reliably quote expected due dates to their retail customer as compared to BST. Percent Provisioning Troubles within 30 days of Installation measures the quality and accuracy of installation activities.
Measurement Methodology:	<p>4. Percent Missed Installation Appointments = Σ (Number of Orders missed in Reporting Period) / (Number of Orders Completed in Reporting Period) X 100</p> <p>Percent Missed Installation Appointments is the percentage of total orders processed for which BST is unable to complete the service orders on the committed due dates. <i>Missed Appointments caused by end-user reasons will be included and reported separately.</i></p> <p>Definition: Percent of orders where completions are not done by due date. See “Exclude Situations” for orders not included in this measurement</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Mechanized metric from ordering system <p>5. % Provisioning Troubles within 30 days of Service Order Activity = Σ (Trouble reports on all completed orders \leq 30 days following service order(s) completion) / (All Service Orders in a calendar month) X 100</p> <p>Definition: Measures the quality and accuracy of completed orders</p> <p>Methodology:</p> <ul style="list-style-type: none"> • Mechanized metric from ordering and maintenance systems.

PROVISIONING

Function:	Coordinated Customer Conversions
Measurement Overview:	This category measures the average time it takes BST to disconnect an unbundled loop from the BST switch and cross connect it to a CLEC's equipment. This measurement only applies to service orders with and without LNP, with and without INP and where the CLEC has requested BST to provide a coordinated cut-over.
Measurement Methodology:	6. Average Coordinated Customer Conversion Interval = $ \Sigma [(Completion\ Date\ and\ Time\ for\ Cross\ Connection\ of\ an\ Unbundled\ Loop) - Disconnection\ Date\ and\ Time\ of\ an\ Unbundled\ Loop)] / Total\ Number\ of\ Unbundled\ Loop\ Orders\ for\ the\ reporting\ period.$

Reporting Dimensions:	Excluded Situations:

PROVISIONING

Function:	Average Completion Notice Interval
Measurement Overview:	The receipt of a completion notice by the CLEC from BST informs the carrier that their formal relationship with a customer has begun. This is useful to the CLEC in that it lets them know that they can begin with activities such as billing the customer for service.
Measurement Methodology:	<p>7. Average Completion Notice Interval = $\Sigma[(\text{Date \& Time of Notice of Completion}) - (\text{Date \& Time of Work Completion})] / (\text{Number of Orders Completed in Reporting Period})$</p> <p>Definition: The Completion Notice Interval is the elapsed time between the BST reported completion of work and the issuance of a valid completion notice to the CLEC. There is no equivalent BST Retail Measurement.</p>

MAINTENANCE & REPAIR

Function:	OSS Response Interval
Measurement Overview:	This measure is designed to monitor the time required for the CLEC interface system to obtain from BST's legacy systems the information required to handle maintenance and repair functions. This measure also addresses the availability of the OSS interface for repair and maintenance.
Measurement Methodology:	<p>1. OSS Interface Availability = (Actual Availability)/(Scheduled Availability) X 100</p> <p>Definition: This measure shows the percentage of time the OSS interface is actually available compared to scheduled availability. Availability percentages for the CLEC and BST interface systems and for legacy systems accessed by them are captured.</p> <p>Methodology: Mechanized reports from OSSs.</p> <p>2. OSS Response Interval = Access Times in Increments of Less Than or Equal to 4 Seconds, Greater Than 4 Seconds but Less Than or Equal to 10 Seconds, Less Than or Equal to 10 Seconds, Greater Than 10 Seconds, or Greater Than 30 Seconds.</p> <p>Definition: Response intervals are determined by subtracting the time a request is submitted from the time the response is received. Percentages of requests falling into the categories listed above are reported, along with the actual number of requests falling into those categories. This measure provides a method to compare BST and CLEC response times for accessing the legacy data needed for maintenance & repair functions.</p> <p>Methodology: Mechanized reports from OSSs.</p>

Function:	Average Answer Time - Repair Centers
Measurement Overview:	This measure monitors that BST's handling of support center calls from CLECs are comparable with support center calls by BST's retail customers.
Measurement Methodology:	<p>1. Average Answer Time for BST's Repair Centers = (Total time in seconds for BST's Repair Centers response) / (Total number of calls) by reporting period</p> <p>Definition: This measure demonstrates an average response time for the CLEC to contact a BST representative</p> <p>Methodology: Mechanized report from Repair Centers Automatic Call Distributors.</p>

MAINTENANCE & REPAIR

Function:	Missed Repair Appointments
Measurement Overview:	When the data for this measure is collected for BST and a CLEC it can be used to compare the percentage of accurate estimates of the time required to complete service repairs for BST and the CLEC.
Measurement Methodology:	<p>2. Percentage of Missed Repair Appointments = (Count of Customer Troubles Not Resolved by the Quoted Resolution Time and Date) / (Count of Customer Trouble Tickets Closed) X 100.</p> <p>Definition: Percent of trouble reports not cleared by date and time committed. Note: Appointment intervals vary with force availability in the POTS environment. Specials and Trunk intervals are standard interval appointments of no greater than 24 hours.</p> <p>Methodology: Mechanized metric from maintenance database(s).</p>

Reporting Dimensions:	Excluded Situations:
<ul style="list-style-type: none"> • CLEC Specific • CLEC Aggregate • BST Aggregate • State, Region and further geographic dissagregation as required by State Commission Order • Product Reporting Levels <ul style="list-style-type: none"> • Interconnection Trunks • Resale – Residence • Resale – Business • Resale – Design • UNE Design • UNE Non Design 	<ul style="list-style-type: none"> • Trouble tickets canceled at the CLEC request • BST trouble reports associated with internal or administrative service • CPE Troubles

MAINTENANCE & REPAIR

Function:	Customer Trouble Report Rate
Measurement Overview:	This measure can be used to establish the frequency (rate) of customer trouble reports and employed to compare CLEC with BST results.
Measurement Methodology:	<p>1. Customer Trouble Report Rate = (Count of Initial and Repeated Trouble Reports in the Current Period) / (Number of Service Access Lines in Service at End of the Report Period) X 100. Note: Local Interconnection Trunks are reported only as total troubles.</p> <p>The Customer Trouble Report Rate is computed by accumulating the number of maintenance initial and repeated trouble reports during the reporting period. The resulting number of trouble reports are divided by the total number of "service access lines" existing for CLECs and BST respectively at the end of the report period.</p> <p>Definition: Initial and repeated customer direct or referred troubles reported within a calendar month (Where cause is not in carrier equipment) per 100 lines/circuits in service.</p> <p>Methodology: Mechanized metric for trouble reports and lines in service.</p>

Reporting Dimensions:	Excluded Situations:

MAINTENANCE & REPAIR

Function:	Quality of Repair & Time to Restore
Measurement Overview:	This measure, when collected for both the CLEC and BST and compared, monitors that CLEC maintenance requests are cleared comparably to BST maintenance requests.
Measurement Methodology:	<p>3. Maintenance Average Duration = (Total Duration Time from the Receipt to the Clearing of Trouble Reports) / (Total Closed Troubles) in reporting period</p> <p>4. Percent Repeat Troubles within 30 Days = (Total Repeated Trouble Reports within 30 Days) / (Total Closed Troubles) in reporting period X 100</p> <p>5. Out of Service (OOS) > 24 Hours = (Total Troubles OOS > 24 Hours) / (Total OOS Troubles) X 100</p> <p>Definition: For Out of Service Troubles (no dial tone, cannot be called or cannot call out): the percentage of troubles cleared in excess of 24 hours.</p> <p>For Percent Repeat Trouble Reports within 30 Days: Trouble reports on the same line/circuit as a previous trouble report within the last 30 calendar days as a percent of total troubles reported.</p> <p>For Average Duration: Average time from the receipt of a trouble until the trouble is cleared.</p> <p>Methodology: Mechanized metric from maintenance database(s).</p>

Reporting Dimensions:	Excluded Situations:

BILLING

Function:	Invoice Accuracy & Timeliness
Measurement Overview:	The accuracy of billing invoices delivered by BST to the CLEC must provide CLECs with the opportunity to deliver bills at least as accurate as those delivered by BST. This measurement compares CLEC to BST results.
Measurement Methodology:	<p>1. Invoice Accuracy = $[(\text{Total Billed Revenues during current month}) - (\text{Total Adjustment Revenues during current month})] / \text{Total Billed Revenues during current month}] \times 100$</p> <p>This measure provides the percentage accuracy of the billing invoices for a CLEC by dividing the difference between the total billed revenue and total adjustment revenues by the total billed revenues during the current month.</p> <p>2. Mean Time to Deliver Invoices = $\sum [(\text{Invoice Transmission Date}) - (\text{Date of Scheduled Bill Close})] / (\text{Count of Invoices Transmitted in Reporting Period})$</p> <p>This measure provides the mean interval for billing invoices. CRIS-based invoices should be released for delivery within six (6) workdays, and CABS-based invoices should be released for delivery within eight (8) calendar days.</p> <p>Objective: Measures the percentage of accuracy and mean interval for timeliness of billing records delivered to CLECs in an agreed upon format.</p>

Reporting Dimensions:	Excluded Situations:

BILLING

Function:	Usage Data Delivery Accuracy, Timeliness & Completeness
Measurement Overview:	The accuracy of usage records delivered by BST to the CLEC must provide CLECs with the opportunity to deliver bills at least as accurate as those delivered by BST. This measurement compares CLEC to BST results.
Measurement Methodology:	<p>1. Usage Data Delivery Accuracy = (Total number of usage data packs sent during current month) - (Total number of usage data packs requiring retransmission during current month) / Total number of usage data packs sent during current month</p> <p>This measurement captures the percentage of recorded usage and recorded usage data packets transmitted error free and in an agreed upon format to the appropriate CLEC, as well as a comparison against BST Data Packet Transmission.</p> <p>2. Usage Data Delivery Completeness = (Total number of Recorded usage records delivered during the current month that are within thirty (30) days of the message(usage record) create date) / (Total number of Recorded usage records delivered during the current month)</p> <p>This measurement provides percentage of recorded usage data (BellSouth recorded and usage recorded by other carriers) processed and transmitted to the CLEC within thirty (30) days of the message (usage record) create date. A comparison is also provided showing completeness of BST messages processed and transmitted via CMDS.</p> <p>3. Usage Data Delivery Timeliness = (Total number of usage records sent within six(6) calendar days from initial recording/receipt) / (Total number of usage records sent)</p> <p>This measurement provides percentage of recorded usage data (BellSouth recorded and usage recorded by other carriers) delivered to the appropriate CLEC within six (6) calendar days from initial recording. A comparison is also provided showing timeliness of BST messages processed and transmitted via CMDS.</p> <p>Objective: The purpose of these measurements is to demonstrate the level of quality and timeliness of processing and transmission of both types of usage data (BellSouth recorded and usage recorded by other carriers) to the appropriate CLEC.</p> <p>Methodology: The usage data will be mechanically transmitted or mailed to the CLEC data processing center once daily. Method of delivery is at the option of the CLEC. Timeliness and completeness measures are reported on the same report.</p>

OPERATOR SERVICES: TOLL ASSISTANCE AND DIRECTORY ASSISTANCE (Toll, DA)

Function:	Speed to Answer Performance
Measurement Overview:	The speed of answer delivered to CLEC retail customers, when BST provides Operator Services with Toll Assisted Calls or Directory Assistance on behalf of the CLEC, must be substantially the same as the speed of answer that BST delivers to its own retail customers, for equivalent local services. The same facilities and operators are used to handle BST and CLEC customer calls as well as inbound call queues that will not differentiate between BST & CLEC service.
Measurement Methodology:	<p>1. Average Speed to Answer (Toll) = $\Sigma (\text{Total Call Waiting Seconds}) / (\text{Total Calls Served})$</p> <p>2. Percent Answered within "X" Seconds (Toll) = Derived by converting the Average Speed to Answer (Toll) using BellCore Statistical Answer Conversion Tables, to arrive at a percent of calls answered in less than thirty seconds.</p> <p>3. Average Speed to Answer (DA) = $\Sigma (\text{Total Call Waiting Seconds}) / (\text{Total Calls Served})$</p> <p>4. Percent Answered within "X" Seconds (DA) = Derived by converting the Average Speed to Answer (DA) using BellCore Statistical Answer Conversion Tables, to arrive at a percent of calls answered in less than twenty seconds.</p> <p>Definition: Measurement of the average time in seconds calls wait before answer by a Toll or DA operator and the percent of Toll or DA calls that are answered in less than a predetermined time frame.</p> <p>Methodology: The Average Speed to Answer for Toll and DA is provided today from monthly system measurement reports, taken from the centralized call routing switches. The "Total Call Waiting Seconds" is a sub-component of this measure, which BellSouth systems calculate by monitoring the total number of calls in queue throughout the day multiplied by the time (in seconds) between monitoring events. The "Total Calls Served" is the other sub-component of this measure, which BellSouth systems record as the total number of calls handled by Operator Services Toll or DA centers.</p> <p>The Percent Answered within thirty and twenty seconds measurement for Toll and DA is derived by using the BellCore Statistical Answer Conversion Tables, to convert the Average Speed to Answer measure into a percent of calls answered within thirty/twenty seconds. The BellCore Conversion Tables are specific to the defined parameters of work time, # of operators, max queue size and call abandonment rates.</p> <p>Current BellSouth call center switch technology and business operations do not provide mechanized measurements differentiating between human versus machine call answer processing methods.</p>

E911

Function:	Timeliness and Accuracy
Measurement Overview:	<ul style="list-style-type: none"> • BellSouth's goal is to maintain 100% accuracy in the E911 database for all its CLEC resale and BST retail customers by correctly processing all batch orders for E911 database updates. Each batch order contains any number of E911 data base record updates. BST uses Network Data Mover (NDM) to transmit both CLEC resale and BST retail E911 updates to SCC (third party E911 database vendor) once per day for the entire region. No processing distinctions are made between CLEC records and BST records. SCC's goal is to process these batch order updates within 24 hours. • CLECs ordering unbundled switching and facilities-based CLEC E911 providers are responsible for the accuracy of their data that is input into the E911 database. Facilities-based CLEC record updates are transmitted by the CLEC directly to SCC without any BST involvement and are not included in the monthly SQM reports. • When CLEC resale or BST retail records experience errors in SCC's system, the errors are handled by either BST or SCC and processed within 24 hours. • BellSouth in conjunction with SCC provides accuracy, timeliness and mean interval measurements for both CLEC resale and BST retail customers.
Measurement Methodology:	<p>1. E911 Timeliness = [(Number of Batch Orders Processed Within 24 Hours) / (Total Number of Batch Orders Submitted)] X 100</p> <p>Definition: Measures the percentage of batch orders for E911 database updates processed within a 24-hour period. Based upon completed service order activity within the 24 hour period, one batch order per end office is transmitted daily by BST to SCC.</p> <p>Methodology: Mechanized metric from SCC's E911 database.</p> <p>2. E911 Accuracy = [(Number of Individual Record Updates Processed with Errors) / (Total Number of Individual Record Updates)] X 100</p> <p>Definition: Measures the percentage of individual E911 record updates processed by SCC with no initial errors.</p> <p>Methodology: Mechanized metric from SCC's E911 database.</p> <p>3. E911 Mean Interval = Sum [(Date and Time of Batch Order Completion) - (Date and Time of Batch Order Submission)] / (Number of Batch Orders Completed in Reporting Period)</p> <p>Definition: Measures the mean interval processing of E911 batch orders.</p> <p>Methodology: Mechanized metric from SCC's E911 database.</p>

TRUNK GROUP PERFORMANCE

Function:	Interconnection Trunk Performance
Measurement Overview:	In order to ensure quality service to the CLECs as well as protect the integrity of the BST network, BST collects traffic performance data on the trunk groups interconnected with the CLECs as well as all other trunk groups in the BST network.
Measurement Methodology:	<p>1. Trunk Group Service Summary: Contains the service performance results of all final trunk groups (both BST administered trunk groups and CLEC administered trunk groups) between Point of Termination (POT) and BST tandems or end offices, by region, by CLEC, CLEC Aggregate, and BST aggregate.</p> <p>Specifically measures the total number of trunk groups, number of trunk groups measured, and the number of trunk groups which exceed the blocking threshold during their busy hours.</p> <p>2. Trunk Group Service Detail: Provides a detailed list of all final trunk groups between POTs and BST end offices or tandems (A-end and Z-end for BST Local trunks) including the actual blocking performance when blocking exceeds the measured blocking threshold. The blocking performance includes the observed blocking number for a particular Trunk Group Serial Number (TGSN).</p> <p>Blocking thresholds for all trunk groups are 3%, except BST CTTG, which is 2%.</p> <p>Measured Blocking = $[(\text{Total number of Blocked Calls}) / (\text{Total number of Attempted Calls})] \times 100$</p>

HR	Time of day when the maximum observed blocking was recorded.	Numeric
TKS	Total number of trunks in service in a trunk group	Numeric
VAL DAYS	Total number of valid days of measurement	Numeric
NBR RPTS	Number of consecutive monthly reports for which the trunk group exceeded the measured blocking threshold	Numeric(2)
RMKS	Cause of blocking and/or release plan	AlphaNum

Collocation

Function:	Response Interval, Provisioning Interval and Timeliness for Providing Collocation Space to a CLEC in a BellSouth Central Office.
Measurement Overview:	Collocation is the placement of customer-owned equipment in BellSouth Central Offices for interconnecting to BellSouth's tariffed services and unbundled network elements. BellSouth offers both Virtual and Physical Collocation and will report its performance on these offerings separately. The milestones in the process for which measurements will be provided are: the average time to respond to a request after we have the complete application; the average time between receiving the bona fide firm order until the space is made available to the CLEC; and the percentage of due dates on firm orders missed.
Measurement Methodology:	<p>1. Average Response Time = Σ (Request Response Date & Time) - (Request Submission Date & Time) / Count of Responses Returned in Reporting Period.</p> <p>Definition: Measures the average time from the receipt of a complete and accurate Collocation Request (including receipt of Application Fees) to the date BellSouth responds in writing.</p> <p>Methodology: Manual</p> <p>2. Average Arrangement Time = Σ (Date & Time Collocation Arrangement is Complete) - (Date & Time Order for Collocation Arrangement submitted) / Total Numbers of Collocation Arrangements Completed during Reporting Period.</p> <p>Definition: Measures the Average Time from the receipt of complete and accurate Firm Order (including Fees) to date BellSouth completes the Collocation Arrangement [Called "BellSouth complete date". Assumes space and construction complete and network infrastructure complete.]</p> <p>Methodology: Manual</p> <p>3. % of Due Dates Missed = (Number of Orders not completed w/i ILEC committed Due Date during reporting period) / (Number of Orders completed in reporting period) X 100.</p> <p>Definition: Measures the percent of Collocation space request, including construction and network infrastructure, that are not complete on the due date.</p> <p>Methodology: Manual</p>

Appendix B: Glossary of Acronyms and Terms

A	ACD	Automatic Call Distributor - A service that provides status monitoring of agents in a call center and routes high volume incoming telephone calls to available agents while collecting management information on both callers and attendants.
	AGGREGATE	Sum total of all items in like category, e.g. CLEC aggregate equals the sum total of all CLECs' data for a given reporting level.
	ASR	Access Service Request - A request for access service terminating delivery of carrier traffic into a Local Exchange Carrier's network.
	ATLAS	Application for Telephone Number Load Administration System - The BellSouth Operations System used to administer the pool of available telephone numbers and to reserve selected numbers from the pool for use on pending service requests/service orders.
	ATLASTN	ATLAS software contract for Telephone Number
B	BILLING	The process and functions by which billing data is collected and by which account information is processed in order to render accurate and timely billing.
	BOCRIS	Business Office Customer Record Information System - A front-end presentation manager used by BellSouth organizations to access the CRIS database.
	BRC	Business Repair Center - The BellSouth Business Systems trouble receipt center which serves large business and CLEC customers.
	BST	BellSouth Telecommunications, Inc.
C	CKTID	A unique identifier for elements combined in a service configuration
	CLEC	Competitive Local Exchange Carrier
	CMDS	Centralized Message Distribution System - BellCore administered national system used to transfer specially formatted messages among companies.
	COFFI	Central Office Feature File Interface - A BellSouth Operations System database which maintains Universal Service Order Code (USOC) information based on current tariffs.
	COFIUSOC	COFFI software contract for feature/service information
	CRIS	Customer Record Information System - The BellSouth proprietary corporate database and billing system for non-access customers and services.
	CRSACCTS	CRIS software contract for CSR information
	CSR	Customer Service Record
D	CTTG	Common Transport Trunk Group - Final trunk groups between BST & Independent end offices and the BST access tandems.
	DESIGN	Design Service is defined as any Special or Plain Old Telephone Service Order which requires BellSouth Design Engineering Activities
	DISPOSITION & CAUSE	Types of trouble conditions, e.g. No Trouble Found, Central Office Equipment, Customer Premises Equipment, etc.
	DLETH	Display Lengthy Trouble History - A history report that gives all activity on a line record for trouble reports in LMOS
	DLR	Detail Line Record - All the basic information maintained on a line record in LMOS, e.g. name, address, facilities, features etc.
	DOE	Direct Order Entry System - An internal BellSouth service order entry system used by BellSouth Service Representatives to input business service orders in BellSouth format.
	DSAP	DOE (Direct Order Entry) Support Application - The BellSouth Operations System which assists a Service Representative or similar carrier agent in negotiating service provisioning commitments for non-designed services and UNEs.
	DSAPDDI	DSAP software contract for schedule information

Appendix B: Glossary of Acronyms and Terms

E	E911	Provides callers access to the applicable emergency services bureau by dialing a 3-digit universal telephone number.
	EDI	Electronic Data Interchange - The computer-to-computer exchange of inter and/or intra company business documents in a public standard format.
F	FLOW-THROUGH	In the context of this document, orders that are processed mechanically without human intervention.
	FOC	Firm Order Confirmation - A notification returned to the CLEC confirming that the LSR has been received and accepted, including the specified commitment date.
G		
H	HAL	"Hands Off" Assignment Logic - Front end access and error resolution logic used in interfacing BellSouth Operations Systems such as ATLAS, BOCRIS, LMOS, PSIMS, RSAG and SOCS.
	HALCRIS	HAL software contract for CSR information
I	ISDN	Integrated Services Digital Network
K		
L	LCSC	Local Carrier Service Center - The BellSouth center which is dedicated to handling CLEC LSRs, ASRs, and Preordering transactions along with associated expedite requests and escalations.
	LEGACY SYSTEM	Term used to refer to BellSouth Operations Support Systems (see OSS)
	LENS	Local Exchange Negotiation System - The BellSouth LAN/web server/OS application developed to provide both preordering and ordering electronic interface functions for CLECs.
	LEO	Local Exchange Ordering - A BellSouth system which accepts the output of EDI, applies edit and formatting checks, and reformats the Local Service Requests in BellSouth Service Order format.
	LESOG	Local Exchange Service Order Generator - A BellSouth system which accepts the service order output of LEO and enters the Service Order into the Service Order Control System using terminal emulation technology.
	LMOS	Loop Maintenance Operations System - A BellSouth Operations System which stores the assignment and selected account information for use by downstream OSS and BellSouth personnel during provisioning and maintenance activities.
	LMOS HOST	LMOS host computer
	LMOSupd	LMOS updates
	LNP	Local Number Portability - In the context of this document, the capability for a subscriber to retain his current telephone number as he transfers to a different local service provider.
	LOOPS	Transmission paths from the central office to the customer premises.
	LSR	Local Service Request - A request for local resale service or unbundled network elements from a CLEC.
M	MAINTENANCE & REPAIR	The process and function by which trouble reports are passed to BellSouth and by which the related service problems are resolved.
	MARCH	A BellSouth Operations System which accepts service orders, interprets the coding contained in the service order image, and constructs the specific switching system Recent Change command messages for input into end office switches.
N	NC	"No Circuits" - All circuits busy announcement

Appendix B: Glossary of Acronyms and Terms

O	OASIS	Obtain Availability Services Information System - A BellSouth front-end processor which acts as an interface between COFFI and RNS. This system takes the USOCs in COFFI and translates them to English for display in RNS.
	OASISBSN OASISCAR OASISLPC OASISMTN OASISNET OASISOCP ORDERING	OASIS software contract for feature/service OASIS software contract for feature/service OASIS software contract for feature/service OASIS software contract for feature/service OASIS software contract for feature/service OASIS software contract for feature/service The process and functions by which resale services or unbundled network elements are ordered from BellSouth as well as the process by which an LSR or ASR is placed with BellSouth.
	OSPCM	Outside Plant Contract Management System - Provides Scheduling Information.
	OSS	Operations Support System - A support system or database which is used to mechanize the flow or performance of work. The term is used to refer to the overall system consisting of hardware complex, computer operating system(s), and application which is used to provide the support functions.
	OUT OF SERVICE	Customer has no dial tone and cannot call out.
P	POTS	Plain Old Telephone Service
	PREDICTOR	The BellSouth Operations system which is used to administer proactive maintenance and rehabilitation activities on outside plant facilities, provide access to selected work groups (e.g. RRC & BRC) to Mechanized Loop Testing and switching system I/O ports, and provide certain information regarding the attributes and capabilities of outside plant facilities.
	PREORDERING	The process and functions by which vital information is obtained, verified, or validated prior to placing a service request.
	PROVISIONING	The process and functions by which necessary work is performed to activate a service requested via an LSR or ASR and to initiate the proper billing and accounting functions.
	PSIMS	Product/Service Inventory Management System - A BellSouth database Operations System which contains availability information on switching system features and capabilities and on BellSouth service availability. This database is used to verify the availability of a feature or service in an NXX prior to making a commitment to the customer.
	PSIMSORB	PSIMS software contract for feature/service
Q		
R	RNS	Regional Negotiation System - An internal BellSouth service order entry system used by BellSouth Consumer Services to input service orders in BellSouth format.
	RRC	Residence Repair Center - The BellSouth Consumer Services trouble receipt center which serves residential customers.
	RSAG	Regional Street Address Guide - The BellSouth database which contains street addresses validated to be accurate with state and local governments.
	RSAGADDR RSAGTN	RSAG software contract for address search RSAG software contract for telephone number search

Appendix B: Glossary of Acronyms and Terms

S	SOCS	Service Order Control System - The BellSouth Operations System which routes service order images among BellSouth drop points and BellSouth Operations Systems during the service provisioning process. Service Order Interface Record - any change effecting activity to a customer account by service order that impacts 911/E911.
	SOIR	
T	TAFI	Trouble Analysis Facilitation Interface - The BellSouth Operations System which supports trouble receipt center personnel in taking and handling customer trouble reports. Telephone Number
	TN	
U	UNE	Unbundled Network Element
V		
W	WTN	A unique identifier for elements combined in a service configuration

Appendix C

BELLSOUTH'S AUDIT POLICY:

BellSouth currently provides many CLECs with audit rights as a part of their individual interconnection agreements. However, it is not reasonable for BellSouth to undergo an audit for every CLEC with which it has a contract. As of November 20, 1998, that would equate to over 600 audits per year and that number is continually growing. BellSouth is in the process of developing a proposed set of reasonable controls associated with individual CLEC audits. In addition, BellSouth will conduct a comprehensive audit of the aggregate level reports for both BellSouth and the CLECs for each of the next five (5) years, to be conducted by an independent third-party. The results of that audit will be made available to all the parties subject to proper safeguards to protect proprietary information. This aggregate level audit includes the following specifications:

1. the cost be borne 50% by BellSouth and 50% by the CLECs
2. the independent third party auditor shall be selected with input from both BellSouth and the CLECs
3. the scope of the audit shall be jointly determined by BellSouth and the CLECs.

BellSouth reserves the right to make changes to this audit policy as growth and changes in the industry dictate.
