

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
January 9, 2001**

The regular meeting of the Board of Water Works was held on January 9, 2001 in the Board Room of the Louisville Water Company, 550 S. Third Street, Louisville, Kentucky, convening at 1:00 p.m.

Board Members Present:

Mr. Stephen C. Gault
Mr. Jack Segell
Ms. Wendy Welsh
Mr. Owen Hammons
Mr. Phillip Bond

Board Members Absent:

The Hon. David L. Armstrong, Mayor
Mr. Stewart Conner

Others Present:

Mr. John Huber, President
Mr. Robert Miller, V. P. – Treasurer
Mr. Gregory Heitzman, V. P. – Chief Engineer
Ms. Laura Douglas, V. P. General Counsel & Secretary
Ms. Karla Teasley
Mr. Steve Hubbs
Ms. Jane Driskell
Mr. Matt Neunier, Mendel Scott
Ms. Barbara Crow
Mr. Tim Ball, JWAHMB
Mr. Scott Potter
Mr. Bret Russell
Mr. Jim Smith
Mr. Jack Wang
Mr. Ralph McCord
Mr. Roy Flynn, Gresham Smith
Mr. Joe Eigel, Gresham Smith
Mr. Don McKay
Ms. Ellen Mackin
Ms. Rhonda Brown

Mr. Huber called the meeting to order and announced that Mr. Conner is out of the hospital and doing well.

Project No.	Project Name	Total Project Cost	Net LWC Cost
Developer Installed Refunding Main Extension Projects			
00-067	Summit at Louisville	\$197,965.00	
00-099	Park Duvalle Phase 3 A Section 1B	\$ 54,540.00	
00-110	Spring Meadow Patio Homes Section 3	\$ 21,975.00	
00-111	Center of Bluegrass	\$ 38,700.00	
Surcharge/LWC Tapping Fee Water Main Extension Contracts			
99-214	Concord Hill Road	\$ 24,800.00	
Customer/LWC Tapping Fee Water Main Extension Projects			
01-201	Cartledge Avenue	\$ 22,105.00	
Metropolitan Sewer District Relocation Projects			
01-473	Beulah Church Road Drainage Improvement	\$ 16,200.00	
01-474	Oregon Avenue Drainage Improvement Project	\$ 25,550.00	
01-1409M	Penway/Linwood Avenue Drainage Improvement	\$ 3,700.00	
Kentucky Transportation Cabinet			
01-479	Ninth Street Extension	\$198,000.00	
AWARDS OF CONTRACTS LESS THAN \$50,000			
00-59	Meter Keys	\$ 27,818.00	
CERT. OF EMER.	Zorn Pump #3 Discharge Valve RPM, INC.	\$ 33,711.00	
CERT. OF EMER.	Allmond Av. Garage Heaters ACCO INC.	\$ 20,985.00	

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations).

Consent agenda approved.

Administrative Report

Mr. Huber reported that the average CSI for 2000 was 807. This meets one of the corporate goals.

Financial Report

Mr. Miller reported that complete financial information for December 2000 was not yet available. Total sale of water, \$83,857,644 is \$2,049,844 or 2.5% more than budgeted and \$443,318 or 0.5% less than the same period in 1999. Projected total operating revenue of \$88,323,133 is \$3,278,833 or 3.9% more than budgeted and \$604,593 or 0.7% more than 1999. The winter snow and low temperature during December 2000 resulted in an additional \$390,000 in operations cost. However, this amount is within the \$500,000 that was budgeted. Audited financials will be presented at the February Board meeting.

Operations and Engineering Report

Mr. Heitzman presented the Operations and Engineering Report to the Board.

Water Production and Pumpage – Water pumpage for December 2000 was 119.2 MGD, an increase of 4 percent over December 1999 pumpage. The 2000 daily pumping average was 126.8 MGD. This rate was 6 percent less than the record pumpage rate of 134.1 MGD in 1999, but 10 percent above the five-year average of 114.9 MGD.

Distribution Operations – The colder air and colder water temperatures in December increased main break activity in the Distribution System. There were 191 main breaks repaired in December, compared to 118 in December 1999. This brings total main breaks for 2000 to 717 breaks, down from the record number of breaks of 959 recorded in 1999. This is the ninth worst year for main breaks recorded since 1963. A winter operations summary is provided as a separate report.

Developer Extensions and Service Installations – Through December 2000 a total of 39.9 miles of developer extension contracts were executed compared to 44.9 miles in 1999. Through December 2000, a total of 4,312 services were installed compared to 4,354 in 1999. Of these 4,312 services in 2000, 512 were irrigation retrofits, bringing the adjusted new services to 3,800. The Company's service area experienced a record year for new development in 1999, and the corresponding 11 percent decline in water main extensions and 13 percent decline in new services indicates a slowdown in development

Transmission Main Leak – On December 29, a joint leak was discovered on the 60-inch reinforced concrete main in Hazelwood at Arline. This main was installed in 1930 with leaded joints that often leak with sudden change in temperature or change in soil moisture. The Company executed an emergency contract with Hall Contracting to excavate the pipe and weld the joint over the New Year holiday weekend. The main was taken out of service to stop the leakage and facilitate the repair. Since placing the main back in service additional leaks have been discovered, and Miller Pipeline has been brought in under emergency contract to install up to 20 internal joint seals inside the 60-inch main. Total repair of the 60-inch main is estimated at \$65,000.

Litigation Report

After proper motion and second, the Board adjourned into closed session for the purpose of discussing litigation and acquisition of property. The Board reconvened into open session without taking any action.

Special Issues

MRRP – 2001 Main Replacement and Rehabilitation

Mr. Greg Heitzman and Mr. Bret Russell presented an update to the Board on the 2001 Main Replacement and Rehabilitation Program.

The 2001 Capital Budget includes funding in the amount of \$10,000,000 for main replacement and rehabilitation. Of these funds, \$4,370,000 is reserved for replacement, \$5,130,000 is designated for rehabilitation work and \$500,000 for lead service line renewals. This one-year program includes replacement of 10.5 miles, rehabilitation of 25.2 miles of water main, renewal of approximately 723 lead service lines from main to the property connection and replacement of approximately 285 fire hydrants. This one-year program also includes 9.1 miles of alternate replacement projects totaling \$4,447,000 and 18.8 miles of other areas of capital construction program, the alternate projects would be advanced into the 2001 program. Cost allocation is summarized as follows

	<u>2001</u>	<u>2001</u>
	<u>Primary</u>	<u>Alternate</u>
Replacement	\$4,370,000	\$4,447,000
Rehabilitation	\$5,130,000	\$3,807,000
Service Line Renewal	\$ 500,000	
Grid Connection		\$ 250,000
Total MRRP	<u>\$10,000,000</u>	<u>\$8,504,000</u>

After proper motion and second, the Board authorized staff to proceed with engineering design and advertisement for bid, specified that all bids exceeding \$50,000 will be returned to the Board for authorization to proceed with construction and that savings be used for the proposed alternate projects as outlined in the MRRP manual.

Renewal of 2000 Clean and Cement Mortar Line Contract

Approval of 2001 Clean and Cement Mortar Line Program

Mr. Heitzman reported that in December 1999 the Louisville Water Company entered into a contract with Southern Pipeline Construction Company for cleaning and cement mortar lining of cast iron water mains in the LWC distribution system during 2000. The contract provides for an annual extension of the agreement provided certain performance measurements are satisfied. The performance criteria include customer survey results, turn-around time for temporary bypass lines, Contractor Performance Evaluation, and monthly production rates. Exhibit A, attached to this letter, provides an explanation of the measurement criteria and the performance results for 2000.

Based on the original agreement, annual adjustments to the contract unit prices will be based on the percent change in the Consumer Price Index.

Based on the estimated footage for the project areas and the adjusted contract unit prices, a contract cost and a total cost have been calculated for each proposed area. The estimated contract cost for the primary areas is \$3,847,500.

After proper motion and second, the Board authorized staff to award a one year renewal of the Clean and Line contract with Southern Pipeline Construction Company for the 2001 Annual Clean and Line project scope, at an estimated contract cost of \$3,847,500. Further, staff

recommends the use of this contract for additional Clean and Line work identified as Alternate Projects under the 2001 Annual Main Replacement and Rehabilitation program.

00-56/Ductile Iron Pipe and Fittings

Mr. Heitzman reported that on December 20, 2000, bids were opened to award a one-year contract, renewable for up to four (4) additional years at the sole discretion of the Louisville Water Company, for ductile iron pipe and fittings. Pipe and fittings are used in the installation and maintenance of our distribution and transmission systems.

A total of six bids were submitted with the lowest, most responsive bids as follows:

US Pipe & Foundry	Pipe and Standard Fittings	\$1,884,839.57
Hughes Supply	Non-Standard Fittings	\$ 188,267.13
Griffin Pipe	Non-Standard Fittings	\$ 4,311.00

TOTAL **\$2,077,417.70**

After proper motion and second, the Board authorized staff to award a one-year contract, renewable for up to four (4) additional years, for an estimated amount of **\$2,077,418** to the bidders listed above. Based on estimated quantities, this bid represents a 19.8% decrease in unit prices from the previous bid. All renewals will utilize the Producers Price Index as a cost adjustment factor.

RFP#1 – Bullitt County Extension Program – KT District #1/ RFP#2 – Bullitt County Extension Program – KT District #2

Mr. Heitzman reported that staff issued two Request-for-Proposals (RFP) for professional engineering services for the Bullitt County Extension Program. The scope of work includes 51.1 miles of main in the former Kentucky Turnpike Water District No. 1 (KTWD No.1) service area and 64.2 miles in the former Kentucky Turnpike Water District No. 2 (KTWD No.2) service area. The 115.3 miles of water main are identified in the merger agreement between Louisville Water Company (LWC) and the KTWD and must be completed by 2010.

Five qualified consulting firms submitted proposals on December 6, 2000. The selection process included an evaluation using the following criteria: qualifications and experience (50%); disadvantaged business utilization (15%); interview responses (10%); and cost (25%). The results of the evaluation for RFP#1 and #2 are provided in Table 1 and Table 2, respectively.

From the evaluation, Quest Engineers, Inc. has the highest score for the RFP#1 scope of work and Central Associated Engineers, Inc. has the highest score for the RFP#2 scope of work. It is noted that the detailed cost proposal from Gresham Smith and Partners was submitted on December 6, 2000. This supplemental information is considered non-responsive and was not opened or considered in the cost evaluation.

After proper motion and second, the Board authorized the Chief Engineer to award two professional service contracts for the design of BCEP water facilities to Quest Engineers, Inc. for RFP#1 and to Central Associated Engineers, Inc. for RFP#2. These contracts are hourly rate contracts with a not-to-exceed price of \$894,610.00 for the RFP #1 scope of work and \$734,780.90 for RFP #2 scope of work. The hourly unit prices will be reviewed and adjusted annually using the CPI as a guideline for adjustments.

Project No. 00-80/Rotary Pump Control Valves

Mr. Heitzman reported that on December 6, 2000, bids were opened to award a contract for three 20" and one 24" rotary pump control valves for pump check service complete with hydraulic operators.

A total of two bids were received, with the lowest, most responsive bid from **GA Industries** for **\$154,621**.

After proper motion and second, the Board authorized staff to award a contract to **GA Industries** for an amount of **\$154,621**.

Project No. 00-84/Flowable Backfill

Mr. Miller reported that on December 13, 2000, bids were opened to award a three-year contract for flowable backfill. Flowable backfill is a compaction material which will fill all voids and is easily excavated.

A total of two bids were submitted with the lowest, most responsive bid from **Preston Highway Metered Concrete** for an estimated total of **\$710,250**.

After proper motion and second, the Board authorized staff to award a three-year contract totaling an estimated **\$710,250** to **Preston Highway Metered Concrete**. This bid represents a .009% increase in unit prices from the previous bid, three years ago.

Project No. 00-85/Seed and Sod Turf Repairs

Mr. Miller reported that on December 13, 2000, bids were opened to award a three-year contract for turf repairs. This contract includes providing seed, sod and fill materials as well as performing turf repairs at various work site locations.

A total of five bids were submitted with the lowest, most responsive bid from **Bluegrass Lawnscape** for an estimated three-year total of **\$102,412**.

After proper motion and second, the Board authorized staff to award a three-year contract totaling an estimated **\$102,412** to **Bluegrass Lawnscape**. This bid represents a 36% decrease in unit prices from the previous bid (three years ago).

Project No. 00-512 Seventh Street Main Replacement

Mr. Heitzman reported that bids were received and opened Wednesday, December 20, 2000 to install 2,650 linear feet of 12-inch water main along Seventh Street Road, and 310 linear feet of 6-inch in Leroy Avenue. Included with the project are the installation/renewal of 3 fire hydrants and the transfer, renewal, or relocation of 28 customer services. The project includes two bores beneath Seventh Street Road.

Award of this project was based an evaluation of bids submitted with consideration for bid price, completion time, and the utilization of MBE/WBE subcontractors.

A total of six bids were received and opened from pre-qualified contractors. T&C Contracting, Inc submitted the lowest responsive bid in the amount of **\$220,874** resulting in a total project cost of **\$303,474**. A tabulation of the bids is attached and the project financial summary is provided as follows:

	<u>Budget Estimate of Record</u>	<u>Budget After Bids</u>
Contract Cost	\$ 210,000	\$ 220,874
Total Project Cost	\$ 292,600	\$ 303,474

After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$220,874 to T&C Contracting, Inc to install the water facilities associated with this project.

Communications

Emerging Contaminants in Drinking Water

Jack Wang and Steve Hubbs led a discussion regarding emerging contaminants. With the advancement in analytical technologies, more and more contaminants are discovered in drinking water sources. Recent examples include the discovery of MTBE, perchlorate and some pharmaceutically active chemicals in source waters. Some of the contaminants may pose health risks to human beings, and thus have raised consumers' concerns.

Contaminants in drinking water can be classified into two categories: microbial contaminants and chemical contaminants including radioactive materials. Many of the contaminants have been identified and regulated by the USEPA. However, more and more contaminants are being discovered in drinking water sources as the analytical technology advances.

Emerging Microbial Contaminants

The concern for emerging microbial contaminants in drinking water is infectious diseases caused by these contaminants.

Emerging Viruses

Emerging Viruses in drinking water include *Enteroviruses*, *Calicivirus* and *Norwalk virus*, and *Hepatitis viruses*. Human enteroviruses cause a variety of clinical illnesses ranging from paralytic poliomyelitis, heart infection, and diabetes to common cold.

Conventional water treatment processes (physical removal and chlorine disinfection) are very effective in removing/inactivating *Enteroviruses* and *Hepatitis* viruses. However, little is known about removing/inactivating *Calicivirus*.

Cryptosporidium

Most microbes are susceptible to chlorine as a disinfectant and filtration for mechanical removal. Cryptosporidium, however, has proven resistant to chlorination and capable of passing through filtration when filters are not operated optimally. An outbreak of Cryptosporidium in Milwaukee is credited with making hundreds of thousands sick and killing over 100 with weakened immune systems.

Other Emerging Protozoa

Other emerging protozoa include *Cyclospora*, *Microsporidia*, and *Toxoplasma*. Evidence strongly suggests that cyclospora is transmitted by water. The illness associated with cyclospora is characterized by watery diarrhea, abdominal cramping, and low fever for several weeks. The role of microsporidia in waterborne disease is yet to be determined. Toxoplasma is a frequent opportunistic infection in AIDS patients.

Emerging Chemical Contaminants

The major concern for emerging chemical contaminants is the health risks associated with long-term, low dose exposure to these contaminants. The health risks include cancer development and endocrine system disruption such as birth defects.

Cancer-causing Contaminants

The newly discovered contaminants include MTBE, perchlorate, and NDMA. MTBE is a gasoline additive. It is water-soluble and has caused many groundwater contamination incidents

due to the leakage of underground storage tanks. Perchlorate contamination is associated with rocket fuel. NDMA is a compound that can be produced during the water treatment processes. Studies have shown that all of the three contaminants could cause cancers.

The risk of MTBE and perchlorate contamination in LWC water is very low as MTBE is mostly associated with groundwater contamination and perchlorate is associated with rocket launching activities.

It is unknown at this time if LWC water contains NDMA. The water quality laboratory currently is not capable of monitoring this compound. To develop in-house monitoring capacity, a major equipment upgrade is needed. Currently, we plan to use outside research laboratories to conduct assessment monitoring for this compound. Further treatment actions may be needed if the monitoring results indicate that the NDMA level in our water is above 20 parts per trillion.

Water Treatment Options

As most of the emerging microbial contaminants may be resistant to chlorine disinfection, improvement in disinfection facility is needed in addition to increasing physical removal by optimizing filtration process or implementing riverbank filtration. Studies have shown that UV disinfection may be the future of primary disinfection.

For emerging chemical contaminants, physical-chemical or biological treatment will be needed. Currently, information on treatment effectiveness for removing endocrine disruptors and PhAcS from water has been limited. More research is needed in this field.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Johnson Farm Road: Johnson Road to End

Mr. Heitzman reported that an Apportionment Warrant public hearing was held for Johnson Farm Road: Johnson Road to End. The public hearing was held in response to receipt of a majority petition for this private road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

The private road Apportionment Warrant project is summarized as follows:

Johnson Farm Road: Johnson Road to End

- Public Hearing – December 9, 1999 – Eastwood Fire Protection District, Station #1
- 3,100 lineal feet of 6-inch water main
- \$75,000 estimated cost
- 10 eligible properties
- 9 affirmative petitioners
- 90% of eligible properties
- \$7,500 not-to-exceed “equal share” per property cost

After proper motion and second, the Board adopted a motion referring this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

Rebuild South Coagulation Mixers at the Crescent Hill Filter Plant

Mr. Jim Smith reported that on August 8, 2000 the Board of Water Works authorized the Chief Engineer to execute an emergency contract with Vesco Engineering for design and construction services to repair coagulation mixing unit number 5 at the Crescent Hill Filter Plant. At that time, it was noted that only one of the four south coagulation mixing units was fully operational - one had completely failed and was out of service, and the remaining two, had partially failed and were in limited service. As a consequence, it was recommended to the Board that an emergency change order be executed with Vesco if another coagulation mixing unit failed and repair was necessary to maintain a reliable treatment capacity of 180 MGD at the Crescent Hill Filter Plant to meet peak summer production demands. Effective coagulation mixing is essential for producing a safe, high quality drinking water that meets regulatory requirements for turbidity removal and disinfection.

In order to meet 180 MGD capacity requirements for peak, summer production demands, an additional coagulation mixing unit needs to be repaired by June, 2001.

Preliminary estimates provided by Vesco to repair one of the remaining partially failed mixing units are \$218,445. The remaining two south coagulation mixing units will be rebuilt by our standard advertise-design-bid-construct procurement process.

After proper motion and second, the Board authorized staff to execute an emergency change order with Vesco Engineering to repair coagulation mixing unit number 8 at the Crescent Hill Filter Plant by June 1, 2001 in an amount, not exceed \$220,000.

Project No. 00-74 Rest Cottage Lane Tapping Fee Extension Service to 117 to 123 Rest Cottage Lane

Mr. Heitzman led a discussion regarding this project. Approval is requested for a Tapping Fee main extension that will extend the existing 8-inch water main approximately 1330 l.f. to serve five (5) unserved properties along this private roadway in Oldham County. Of the existing five property owners, one has an existing home, one property owner is currently building a single family home (Cecil) and another is planning to build a home (Murphy). The other two lots are vacant. The estimated cost of the extension is \$39,000 or an equal share of \$7,800. The final tapping fee will be adjusted to actual cost. The two property owners that are building homes have signed a petition requesting this extension. They have jointly signed a petition to split the cost of a third assessment thereby satisfying a 3 of 5 majority petition (60%).

After proper motion and second, the Board authorized staff to proceed with this tapping fee water main extension. The fourth assessment collected by the Company will be returned to the original two property owners.

New Business

Healthcare, Dental, Disability and Life Insurance Plans

Don McKay and Ellen Mackin reported on the Benefits Team's work and proposal. The total cost for LWC employee benefits during calendar year 2001 will increase by 15.6%. (Last year (2000) LWC's costs escalated by 4%.)

After proper motion and second, the Board authorized staff to award the following contracts for healthcare services:

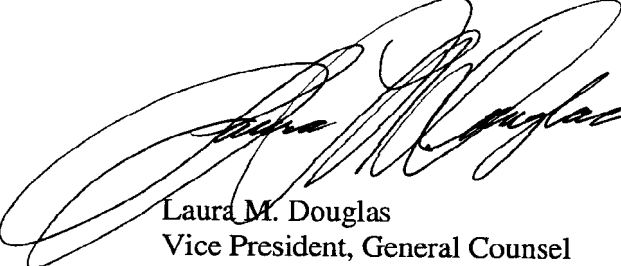

- 1) **Humana** in the amount of \$2,150,919;
- 2) **Delta Dental** in the amount of \$202,032;
- 3) Disability Insurance in the amount of \$83,476 with **CIGNA**;
- 4) Life insurance in the amount of \$154,883 with **Monumental Life**.

The meeting adjourned at 2:45 P.M.

CERTIFICATION

This is to certify that the following *Johnson Farm Road: Johnson Road to End*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on January 9, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style with large loops and flourishes.

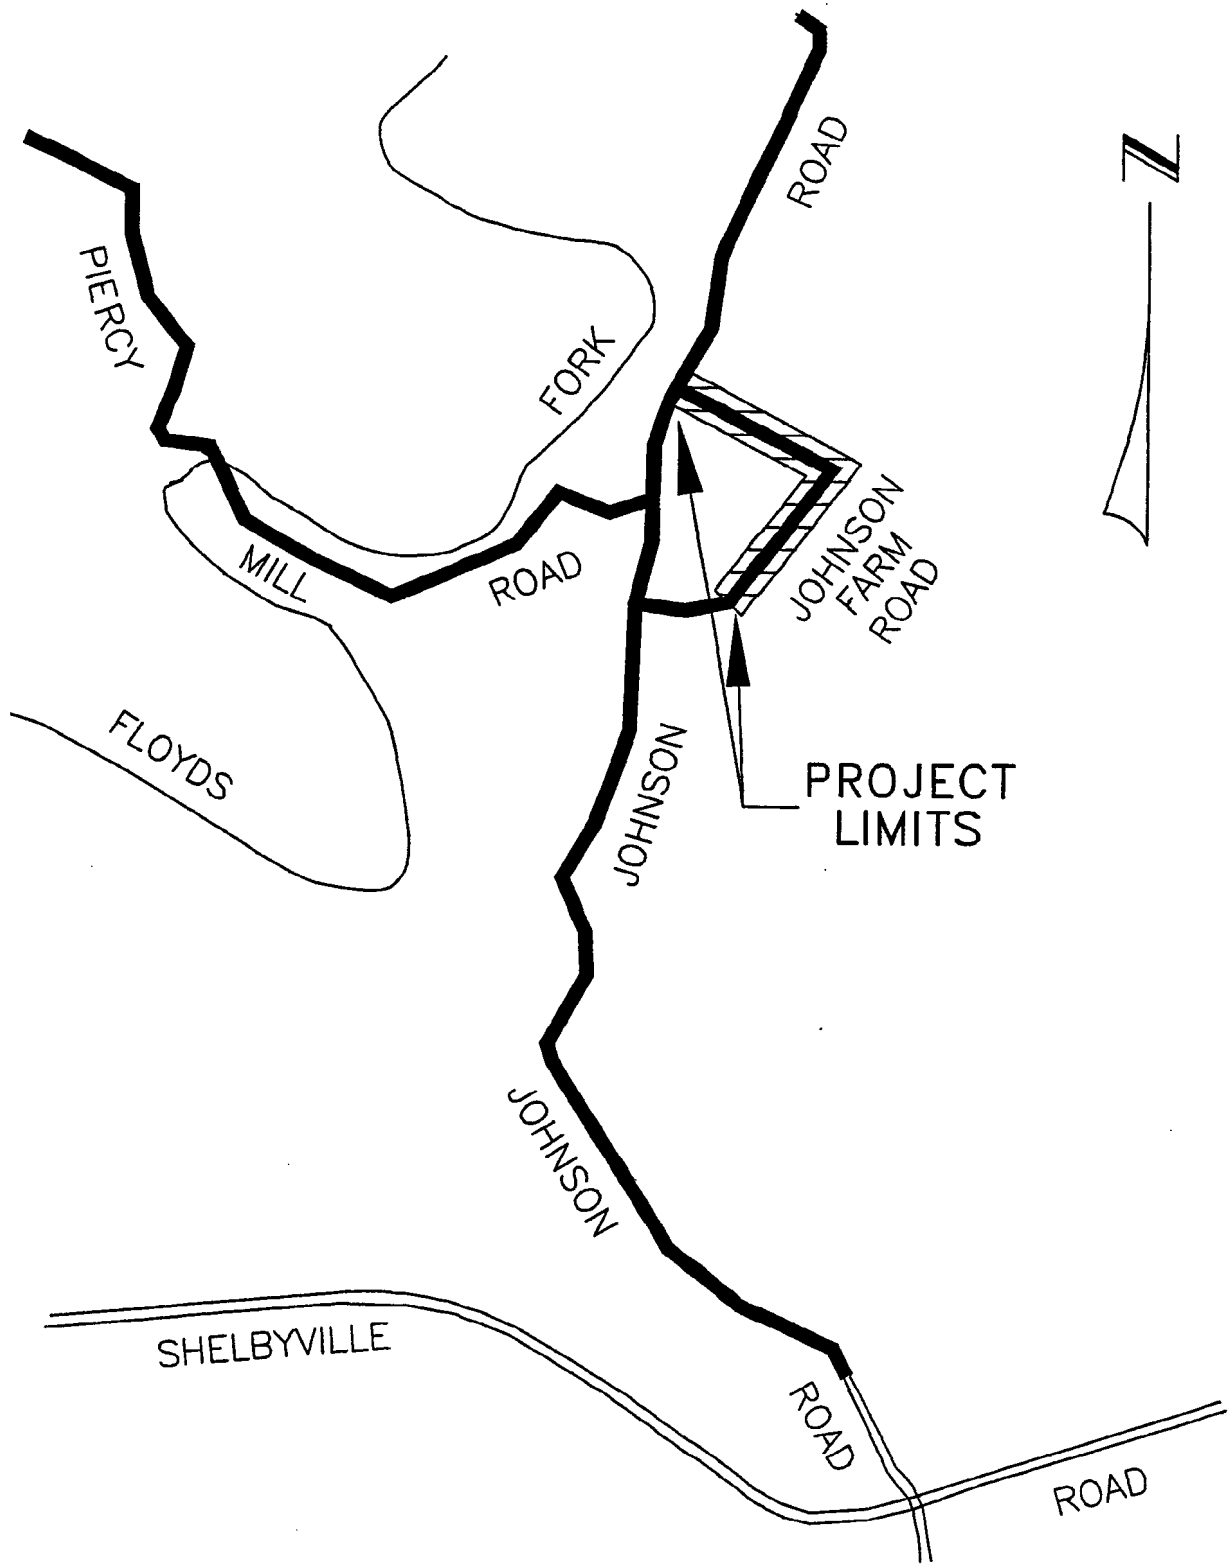

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
January 9, 2001

**Board of Water Works
Resolution**

January 9, 2000

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Johnson Farm Road: Johnson Road to End**, a private way in Jefferson County, and acting thereon convened a public hearing on November 9, 1999, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Johnson Farm Road: Johnson Road to End**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Johnson Farm Road: Johnson Road to End**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA

FILE NAME: JOHNSON FARM RD.

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 99.265, the Louisville Water Company will hold a public hearing for the property owners along Johnson Road to Johnson Road (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Johnson Farm Road.

This public hearing will be held on Thursday, December 9, 1999 at 6:00 pm at the Eastwood Fire Protection District, Station #1, 16010 Shelbyville Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
February 13, 2001**

The regular meeting of the Board of Water Works was held on February 13, 2001 in the Board Room of the Louisville Water Company, 550 S. Third Street, Louisville, Kentucky, convening at 1:00 p.m.

Board Members Present:

Mr. Stephen C. Gault
Mr. Jack Segell
Ms. Wendy Welsh
Mr. Owen Hammons
Mr. Phillip Bond

Board Members Absent:

The Hon. David L. Armstrong, Mayor
Mr. Stewart Conner

Others Present:

Mr. John Huber, President
Mr. Robert Miller, V. P. – Treasurer
Mr. Gregory Heitzman, V. P. – Chief Engineer
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Jerry Anderson, CH2MHill
Mr. Rick Delaney, Morgan Keegan
Ms. Karla Teasley
Ms. Kay Ball
Mr. James Wehrle
Mr. Steve Hubbs
Ms. Jane Driskell
Ms. Amber Halloran
Mr. Spencer Harper
Ms. Barbara Crow

Mr. Huber called the meeting to order. He introduced Mr. James Wehrle, the new Vice President of Human Resources and Organizational Development. Mr. Huber also introduced Mr. Rick Delaney of Morgan Keegan. Mr. Huber and Mr. Segell also stated that Mr. Conner continues to do well.

Project No.	Project Name	Total Project Cost	Net LWC Cost
Developer Installed Refunding Main Extension Projects			
01-001	Woods of Landis Lakes Section 1	\$ 28,940.00	
01-004	Pleasure Ridge Point Section 2	\$ 63,730.00	
Surcharge Water Main Extension Projects			
01-200	Acme Way	\$ 10,210.00

Item D: Authorization for design and bid of projects (estimated to cost less than \$200,000)

Project No.	Project Name	Total Project Cost	Net LWC Cost
01-729	Allmond Avenue Radiant Heat System	\$ 95,000.00	

Item E: Bid tabulations (award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid.).

Project No.	Project Name	Total Project Cost	Net WC Cost
Item F: Award of contracts less than \$50,000			
Project No.	Project Name	Total Project Cost	Net WC Cost
00-76	Employee Assistance Program-Comp. Neg. 3 years, VALUE OPTIONS	\$ 40,500.00	
01-03	Water Bill Forms – 2 years	\$ 37,832.00	
01-06	Cisco Maintenance Update CS BUSINESS SYSTEMS (CMBE)	\$ 17,680.00	

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations).

Consent agenda approved.

Administrative Report

Mr. Huber reported that currently LWC is evaluating consulting engineers to assist with the facilities plan. The Board will receive more information on this matter in March.

Financial Report

Mr. Miller presented the Treasurer's report. Total operating revenue of \$88,098,700 is \$3,054,300 or 3.59% more than budgeted and \$380,200 or 0.43% more than the same period in 1999. We sold 5.28% less water in 2000 than the same period in 1999. Water delivered to the mains was 5.45% less than 1999. Net income of \$28,799.00 (line 26) is \$2,957,200 or 11.44% more than budgeted and \$164,700 or 0.57% less than 1999. Mr. Miller stated that the year's dividend is projected at \$28,800.00.

Operations and Engineering Report

Production and Water Quality – Due to the cold winter period in January and associated main break activity, the water pumpage was up by 5 percent over January 2000. In response to higher occurrence of positive coliform samples collected in 2000, staff has modified the water distribution sampling program and increased the water sample size from 245 to 453 samples collected per month. These additional samples will improve our ability to monitor distribution water quality. The revised sample plan was approved by the Kentucky Division of Water.

Distribution System – Through January, 158 main breaks have been repaired, compared to 109 in January 2000. From December 1, 2000 through January 31, 2001 a total of 349 breaks were repaired. The weather has moderated over the last several weeks, and main break rates have reduced to less than 3 breaks per day. Finished water temperature has also risen from a low of 33 degrees on January 2 to 37 degrees on January 31. With the warming weather trends, distribution crews will be completing emergency break repair restoration and moving to normal preventative maintenance work in the coming weeks.

Call Center – Call volumes continued at high levels in January due to customer inquiries on estimated bills and winter-related emergencies, such as water main breaks. The abandonment rate was 25.6 percent for the month. Fifteen percent of the bills were estimated during January, due to the impact of winter ice and snow conditions on meter reading operations.

Cardinal Hill Transmission Main Repair - Over the course of the last month, staff has initiated repair on four leaks on critical 60-inch transmission mains. An emergency material order was placed with Miller Pipeline Corporation to begin fabrication of "Weko" internal joint seals. Southern Pipeline Construction has been retained under our annual contingency contract to make these two repairs. This internal joint repair will begin upon fabrication of replacement gears for an inoperable gate valve necessary to isolate the main. Consequently, all repair activities are

awaiting the return of that valve to service.

Mr. Heitzman also reported that on 2/12/01, a leak in a primary transmission line required LWC to shut down the B. E. Payne plant. One large industrial customer supplied through the Payne plant was notified.

Kentucky Infrastructure Authority (KIA) – The KIA has received \$50 million in funding from the state to provide water service to unserved and underserved areas throughout Kentucky. The service area of the Louisville Water Company in Jefferson, Oldham, and Bullitt Counties fall under the KIPDA Regional Council. KIPDA is currently soliciting projects from water providers in the area for consideration of funding by the KIA and other funding agencies. Staff is compiling the remaining unserved areas of Jefferson, Oldham and Bullitt Counties for submittal to KIPDA. The Bullitt County Extension Program has the greatest potential to qualify for grant and low interest loan funding from KIA, the Community Development Block Grant (HUD) program, and the Economic Development Agency (EDA).

Mr. Huber indicated that the Litigation Report would be held until after presentation of the Special Issues Item IV. The Board proceeded to a consideration of Item III, the Audit Committee report.

Audit Committee Meeting

Mr. Bond presented the Audit Committee report for the January meeting. Mr. Bond reported that the committee met with Don Whitehouse, the internal auditor. The committee reviewed the 2001 Audit Plan and an ethics questionnaire distributed to all staff. The committee reviewed the Annual Physical Inventory Report and the Fuel Transportation Audit. Mr. Bond also reported on GASB-34, which requires the company to present new financial information including the following information, where applicable:

1. Management Discussion and Analysis (MD&A)
2. Statement of Net Assets or Balance Sheet
3. Statement of Revenue, Expenses and Changes in Fund Net Assets;
4. Statement of Cash Flows (Direct Method);
5. Notes to the Financial Statements, and
6. Required Supplemental Information (RSI) other than MD&A

Implementation is required by December 31, 2003. Mr. Bond also gave a summary of the February 11, 2001 audit committee meeting. He discussed the qualified opinion given by Crowe Chizek of the E-CIS. Notwithstanding, the qualified opinion of the E-CIS system, there will be no adverse impact on LWC's financial systems.

Special Issues

Series 1992 Bond Refinancing

Mr. Miller introduced Mr. Spencer Harper, special bond counsel, and Mr. Rick Delaney, Financial Adviser, Morgan Keegan. Mr. Miller stated that Louisville Water Company issued the Series 1992 Bonds in August 1992 in the amount of \$74,835,000 for the purpose of a current refunding of the Series 1986A and 1986B Bonds and the Kentucky Retirement Systems past service liability note to provide a small amount of new funding. Since that time, as a result of principal included in the bond service payments, the outstanding amount for the Series 1992 Bonds has been reduced to \$60,245,000.

The Series 1992 Bonds reached their first call date on November 15, 2000 at 102. Since that time, interest rates have fallen to a point at which it is appropriate to consider refinancing the bonds to achieve significant debt service savings. Staff has evaluated a refunding analysis that indicates that the most advantageous point in time to refinance the bonds would be at the May 15th interest payment date. An analysis performed in mid-January indicated a potential gross debt service savings of \$5.1 million and a present value savings of \$3.8 million.

After proper motion and second, the Board voted to select Morgan Keegan as Financial Advisor for the 1992 Bond Refinancing, retain Spencer Harper of Harper, Ferguson and Davis as Bond Counsel, National City Bank as Trustee, Hawkins, Delafield and Wood as Underwriter's Counsel and adopt a Board resolution authorizing the refinancing.

2001 System Development Charge

Mr. Miller reported that Louisville Water Company adopted a System Development Charge in 1992 to be applied to all services connecting to mains installed after January 1, 1992. The System Development Charge (SDC) is based on capital expenditures for existing and planned growth-related transmission, booster pumping and storage facilities. Collections are designated to finance growth-related expansion to the system. This charge was set at \$700, based on studies contracted with CH2M Hill and later reviewed by Thomson Environment Network, Inc. Each year, the model is updated by staff, following preparation of the Capital Expenditures Program, in an effort to review the adequacy of the SDC. After proper motion and second, the Board voted that the System Development charge remain unchanged at \$700.00 for 2001.

Litigation Report

After proper motion and second, the Board voted to go into closed session for the purpose of discussing litigation and acquisition of property. The Board reconvened into open session without taking any action.

Bid Tabulations

99-54/Resilient Seat Gate Valves – PPI Renewal

Mr. Miller reported that on February 15, 2000, the Board of Water Works approved the recommendation to award a contract for resilient seat gate valves to U.S. Pipe and Foundry. This contract contained a provision that allowed it to be renewed over a four-year period at the sole discretion of the Louisville Water Company. All renewals would utilize the Producers Price Index, Commodity Code 3491-1/Gate, Global and Check Valves, as a cost adjustment factor. Resilient seat gate valves are used for installations, repairs and maintenance within our Distribution and Transmission systems.

After proper motion and second, the Board voted to renew the contract for the purchase of resilient seat gate valves with **U.S. Pipe and Foundry** for an estimated amount of **\$1,057,465**. This renewal represents a 2% increase in unit prices from the previous year.

98-60-Locating Services (Joint Utility Negotiation) – CPI Renewal

Mr. Miller reported that on January 19, 1999, the Board of Water Works approved the recommendation to award a contract for locating services to STS, Inc. This contract contained a provision that allowed it to be renewed over a three-year period at the sole discretion of the

Louisville Water Company. All renewals would utilize the Consumers Price Index as a cost ceiling for any price adjustments to the original bid unit prices.

After proper motion and second, the Board voted to renew the contract with **STS, Inc.** for an estimated amount of **\$350,079**. Based on the Consumer Price Index, this contract represents a 3.4% increase in unit prices from last year's unit prices.

01-02/Fleet Vehicles

Mr. Miller reported that on January 31, 2001, bids were opened to award a contract for fleet vehicles used by LWC crews. A total of fourteen (14) bids were submitted with the lowest, most responsive bids listed below:

7	Medium Duty Trucks	Uebelhor & Sons	\$261,793.00
2	Intermediate Passenger Cars	Countryside Ford	\$ 30,796.00
1	1 ½ Ton Cab and Chassis	Pearce Motors	\$ 27,569.00
2	Rubber Tire Backhoe/loader	Americon	<u>\$ 91,088.00</u>
		Total Costs	\$411,246.00

After proper motion and second, the Board voted to award contracts totaling **\$411,246** to the bidders listed above.

Communications

Old Business

Issuance of Apportionment Warrants per KRS 96.265

Derbyshire Estates: Winding View Trail, Rolling Hills Trail, Running Brook Trail, Persimmon Wood Trail and Deer Crossing Trail

Mr. Heitzman reported that a public hearing was held February 25, 1999 for the extension of water service throughout the Derbyshire Estates Subdivision: Winding View Trail, Running Brook Trail, Persimmon Wood Trail, Rolling Hills Trail, Wildflower Trail and Deer Crossing Trail. The Board of Water Works adopted a resolution for Derbyshire Estates on March 16, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 13, Series 1999 on April 27, 1999 (a copy of which is attached) for the Derbyshire Estates project. The construction contract was awarded to Reynolds, Inc. in December, 1999.

After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 65 benefited properties throughout the Derbyshire Estates Subdivision: Winding View Trail, Rolling Hills Trail, Running Brook Trail, Persimmon Wood Trail and Deer Crossing Trail in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265

HWY 148, Old Clark Station Road & Eastwood-Fisherville Road – Phase 1 (98-711-A): along HWY 148 from Eastwood-Fisherville Road to the County Line and along Old Clark Station Road from HWY 148 to the County Line

Mr. Heitzman reported that a public hearing was held February 11, 1999 for the extension of water service along HWY 148 from the Eastwood Fire Station #2 to the County Line, Old Clark

Station Road from HWY 148 to the County Line and Eastwood-Fisherville Road from HWY 148 to the Eastwood Cut-off. The Board of Water Works adopted a resolution for HWY 148, Old Clark Station Road & Eastwood-Fisherville Road on March 16, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 10, Series 1999 on April 27, 1999 (a copy of which is attached) for the HWY 148, Old Clark Station Road & Eastwood-Fisherville Road project.

After proper motion and second, the Board voted to issue Apportionment Warrants and liens against 40 benefited properties on this portion of the project extension along HWY 148 from Eastwood-Fisherville Road to the County Line and along Old Clark Station Road from HWY 148 to the County Line in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265
HWY 148, Old Clark Station Road & Eastwood-Fisherville Road – Phase 2 (98-711-B): along Eastwood-Fisherville Road from Fisherville Woods Drive to Eastwood Cut-off

Mr. Heitzman reported that a public hearing was held February 11, 1999 for the extension of water service along HWY 148 from the Eastwood Fire Station #2 to the County Line, Old Clark Station Road from HWY 148 to the County Line and Eastwood-Fisherville Road from HWY 148 to the Eastwood Cut-off. The Board of Water Works adopted a resolution for HWY 148, Old Clark Station Road and Eastwood-Fisherville Road on March 16, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 10, Series 1999 on April 27, 1999 (a copy of which is attached) for the HWY 148, Old Clark Station Road & Eastwood-Fisherville Road project.

After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 51 benefited properties along along Eastwood-Fisherville Road from Fisherville Woods Drive to Eastwood cut-off in accordance with KRS. 96.265, as described.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Brush Run Road: Echo Trail to Dawson Hill Road Dawson Hill Road: Brush Run Road to Back Run Road

Mr. Heitzman reported that an Apportionment Warrant public hearing was held for Brush Run Road: Echo Trail to Dawson Hill Road and Dawson Hill Road: Brush Run Road to Back Run Road. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

Questions were asked about the location of the water main and how the preservation of trees and landscaping were handled with the water line installation. Staff responded that the proposed location of the water main would be generally in private easements and that contractors would work with the property owners to preserve the landscaping and trees. One property owners was in favor of the project, but opposed the methods used to petition and assess property owners for the water line. Nine attending property owners advised they were in favor of extension of water

service along Brush Run Road: Echo Trail to Dawson Hill Road and Dawson Hill Road: Brush Run Road to Back Run Road as proposed at the hearing. No attending property owners were opposed to the extension of water service

After proper motion and second, the Board voted to authorize the referral of the project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

99-603: Install Aiken Road Booster Pump Station

Mr. Heitzman reported that a contract was awarded by the November 2000 Board to Southern Pipeline for \$76,096 to install a prefabricated booster pump station on Aiken Road in eastern Jefferson County. During installation extra costs have been incurred for pump station storage expenses and additional rock removal.

Installation of the large pump station in the desired location required a total of 333 cubic yards of rock to be excavated. This amount exceeds the bid volume of 100 cubic yards, which was the estimated amount based upon rock soundings which had been performed in the vicinity.

After proper motion and second, the Board voted to authorize the Chief Engineer to increase the value of contract F057 with Southern Pipeline 19 percent, from \$76,096 to \$90,317.

New Business

Mr. Huber removed the following items from the agenda:

1 -Request for Approval of Information Technology Standard Equipment Projects:

- Project 01-547: Procurement of Desktop Workstations for Technical Architecture
- Project 00-472: Laptop/Handheld Computers for Emergency Turners and Process Analyst use.
- Project 00-475: Microsoft Office Site License Upgrade

2 – 2001 Facilities Capital Improvement Program

Subject: Project 00-337: I-65 Transmission Main Extension Project

Mr. Heitzman reported that proposed under the 2001 Capital Improvement Program is a project install a 12" water main on Highway 480, Preston Highway, and Coopers Run Road in Bullitt County as part of the I-65 Transmission Main System.

This project involves the installation of approximately 7,830 feet of 12" PVC, 8 fire hydrants and the installation of a domestic and fire service to the proposed Bullitt County Detention Center that is now under construction. The project also includes reconnection of an estimated 10 services along Coopers Run Road from an existing undersized 2" galvanized water main to the new 12-inch water main. The preliminary estimate of the materials, labor and engineering for this project is \$410,000.

After proper motion and second, the Board authorized staff to proceed with final design and advertise for bid the Highway 480, Preston Highway and Coopers Run Road project as a tapping fee main project where each customer would be assessed a \$5450 tapping fee which would be waived to Bullitt City Government, based upon a \$100,00 project contribution by Bullitt County government for water service to a new detention center which will be located in the project area.

Meter Reading Automated Routing Software

Mr. Huber and Mr. Miller reported that on July 2000, LWC transitioned to a new ECIS Orcom billing system. The new system improved our ability to provide timely information and enhanced our ability to offer new service applications.

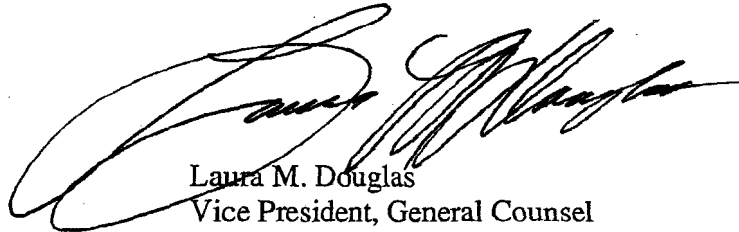

The new system required LWC to review current business practices and work procedures. Our billing system has been significantly impacted. The time between meter readings and billing has been reduced from 7-8 days to 2 days. As a result of this work change, it is critical that daily meter reading assignments are completed. Accounts within the system which are not completed by second day are estimated. After proper motion and second, the Board voted to ratify awarding a contract to "Route Smart" in the amount of \$76,500.

The meeting adjourned at 2:45 P.M.

CERTIFICATION

This is to certify that the following Derbyshire Estates: *Winding View Trail, Running Brook Trail, Persimmon Wood Trail, Rolling Hills Trail, Wildflower Trail and Deer Crossing Trail*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on February 13, 2001, a quorum being present.

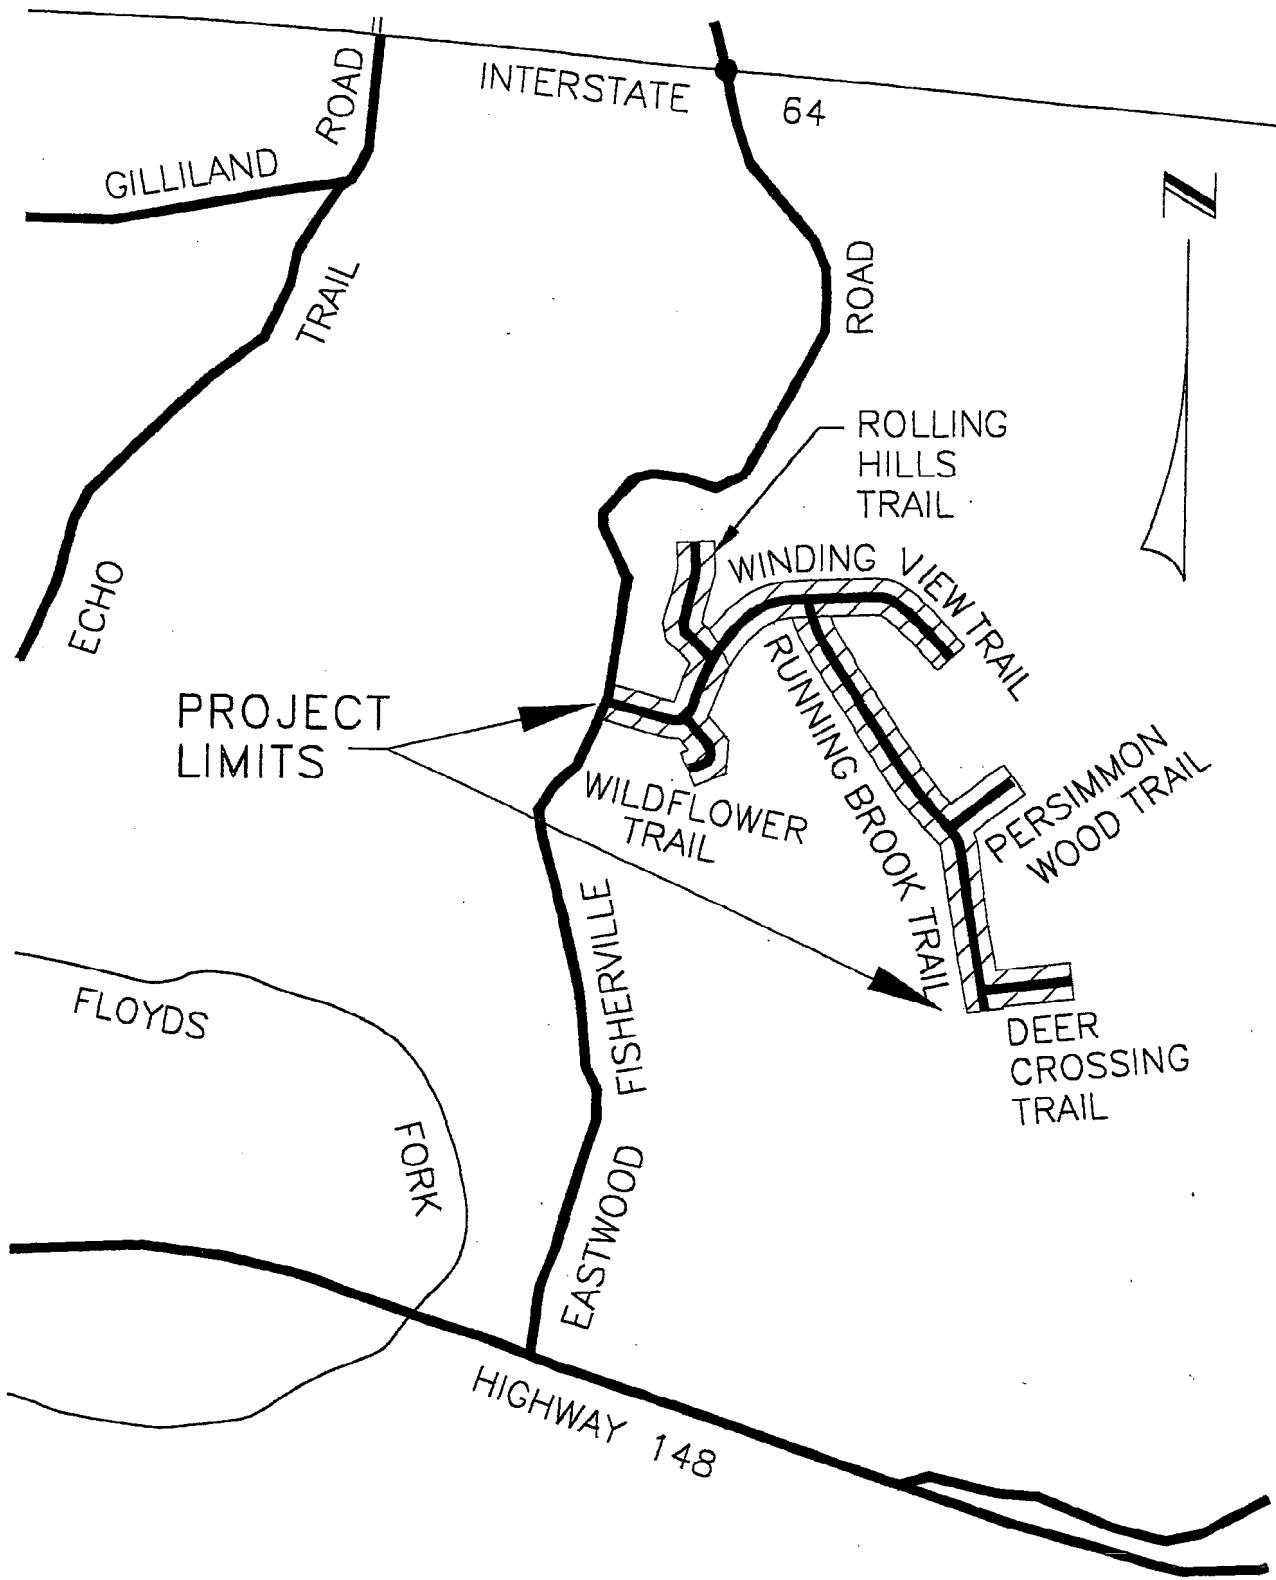

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
February 13, 2001

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Derbyshire Estates: Winding View Trail, Running Brook Trail, Persimmon Wood Trail, Rolling Hills Trail, Wildflower Trail and Deer Crossing Trail** main extension project authorized by Ordinance No. 13, Series 1999 of the Jefferson Fiscal Court, adopted on April 27, 1999 such warrants to be against 65 benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following *HWY 148, Old Clark Station Road & Eastwood-Fisherville Road – Phase 1: along HWY 148 from Eastwood-Fisherville Road to the County Line and along Old Clark Station Road from HWY 148 to the County Line* is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on February 13, 2001, a quorum being present.

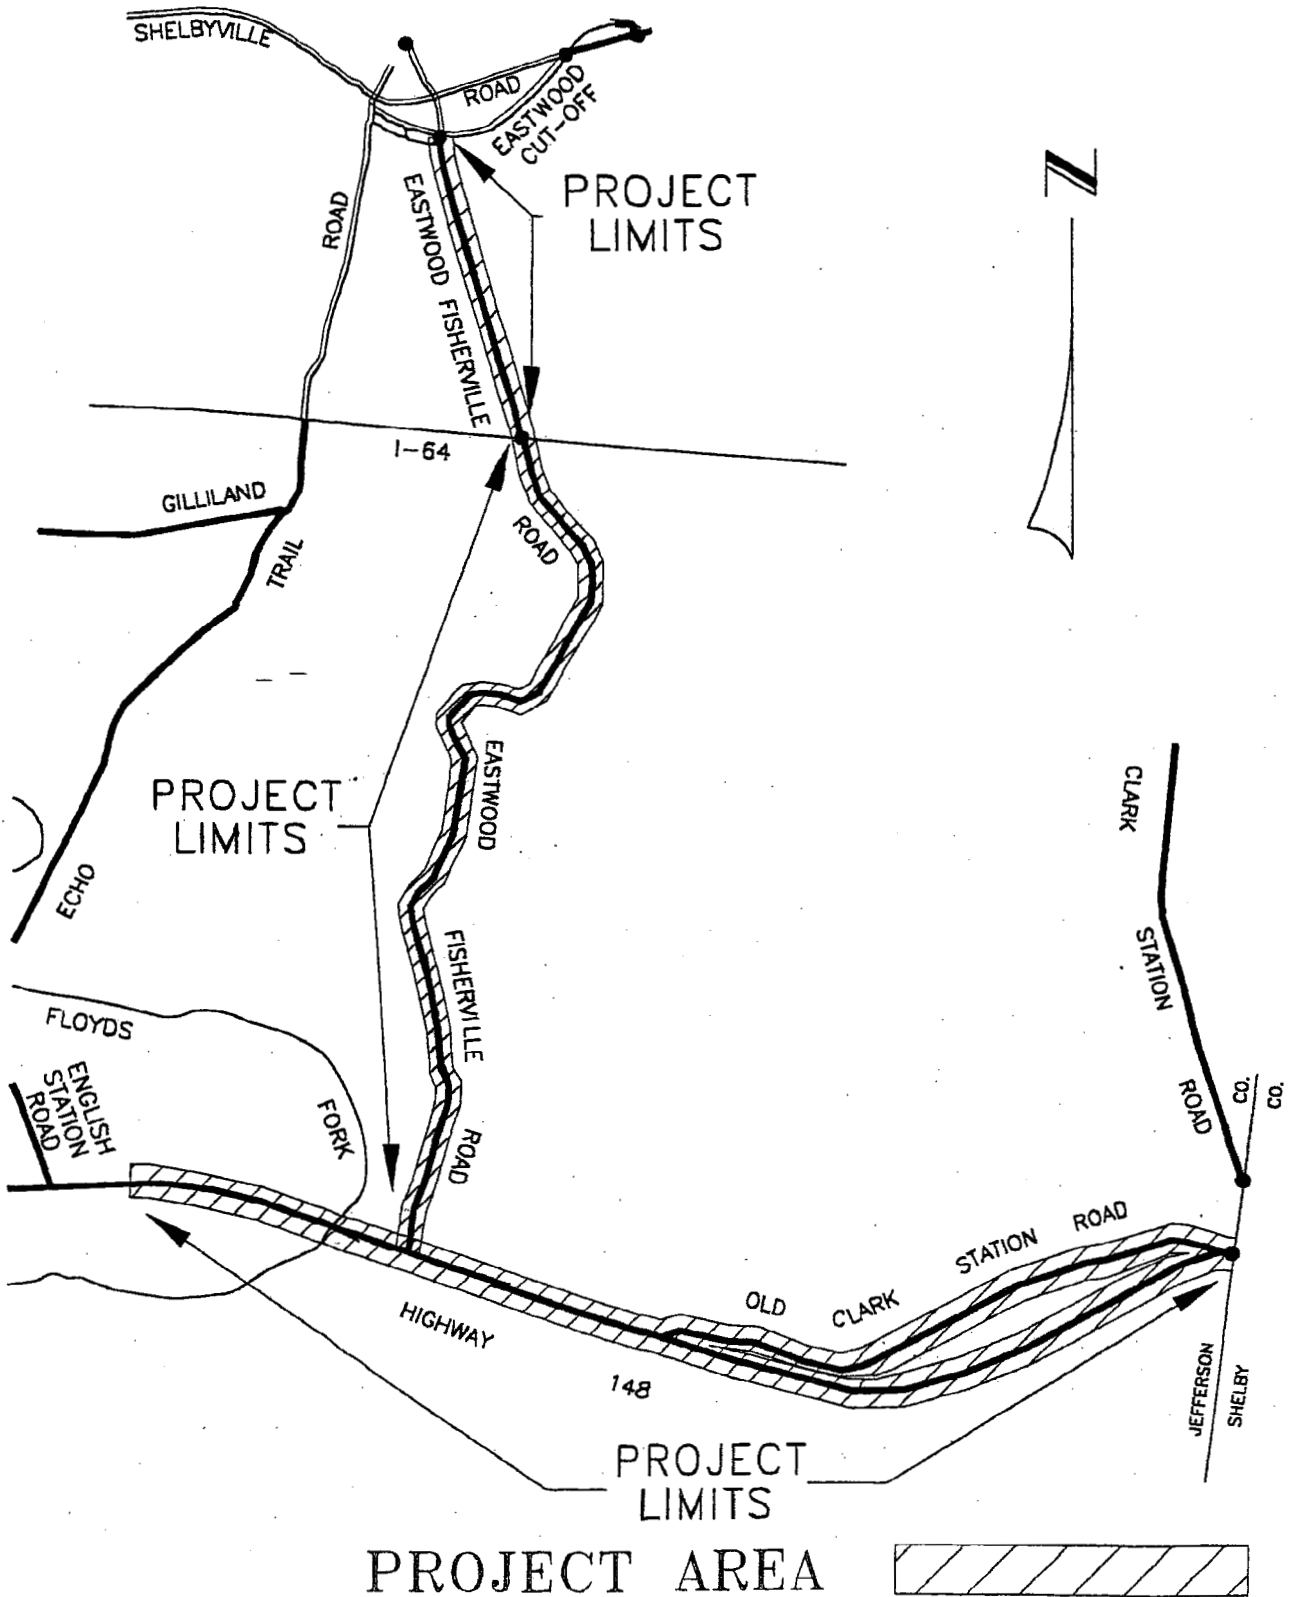

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
February 13, 2001

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **HWY 148, Old Clark Station Road & Eastwood-Fisherville Road -- Phase 1: along HWY 148 from Eastwood-Fisherville Road to the County Line and along Old Clark Station Road from HWY 148 to the County Line** main extension project authorized by Ordinance No. 10, Series 1999 of the Jefferson Fiscal Court, adopted on April 27, 1999 such warrants to be against 40 benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following: *HWY 148, Old Clark Station & Eastwood-Fisherville Road – Phase 2: along Eastwood-Fisherville Road from Fisherville Woods Drive to Eastwood Cut-off* is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on February 13, 2001, a quorum being present.

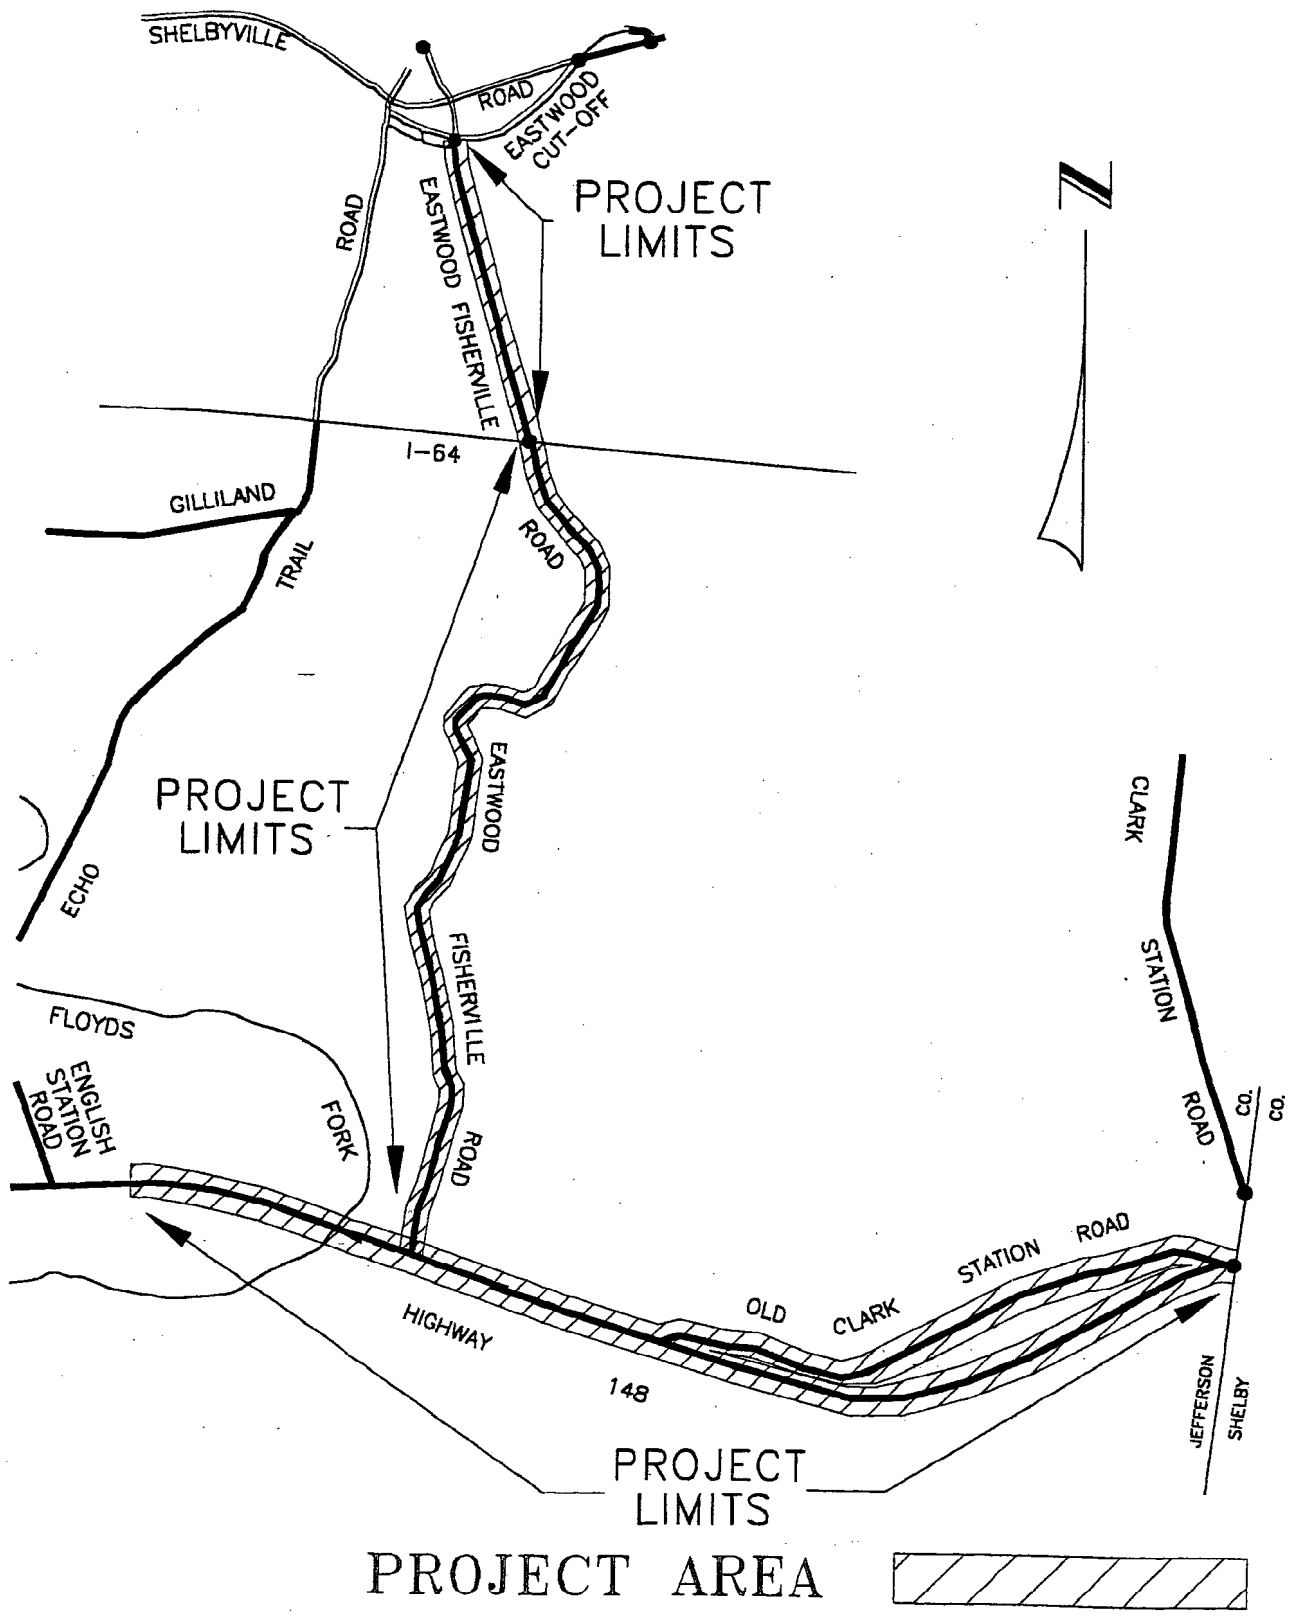

Signed,

A handwritten signature in black ink, appearing to read 'Laura M. Douglas', written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
February 13, 2001

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **HWY 148, Old Clark Station & Eastwood-Fisherville Road – Phase 2: along Eastwood-Fisherville Road from Fisherville Woods Drive to Eastwood Cut-off** main extension project authorized by Ordinance No. 10, Series 1999 of the Jefferson Fiscal Court, adopted on April 27, 1999 such warrants to be against 51 benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following: *Brush Run Road: Echo Trail to Dawson Hill Road Dawson Hill Road: Brush Run Road to Back Run Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on February 13, 2001, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
February 13, 2001

**Board of Water Works
Resolution**

February 13, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Brush Run Road: Echo Trail to Dawson Hill Road**, a public way in Jefferson County, and acting thereon convened a public hearing on January 25, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Brush Run Road: Echo Trail to Dawson Hill Road**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Brush Run Road: Echo Trail to Dawson Hill Road**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

**Board of Water Works
Resolution**

February 13, 2001

ADVERTISED IN THE COURIER JOURNAL

MONDAY JANUARY 15, 2001

END OF SECTION A

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Brush Run Road, Echo Trail to Dawson Hill Road and Dawson Hill Road, Brush Run Road to Back Run Road (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Brush Run Road, Echo Trail to Dawson Hill Road and Dawson Hill Road, Brush Run Road to Back Run Road.

This public hearing will be held on Thursday, January 25, 2001 at 6:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Rouff Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

Monday, January 15, 2001

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
March 13, 2001**

The regular meeting of the Board of Water Works was held on March 13, 2001 in the Board Room of the Louisville Water Company, 550 S. Third Street, Louisville, Kentucky, convening at 1:00 p.m.

Board Members Present:

Mr. Stephen C. Gault
Mr. Jack Segell
Mr. Stewart Conner
Ms. Wendy Welsh
Mr. Owen Hammons
Mr. Phillip Bond

Board Members Absent:

The Hon. David L. Armstrong,
Mayor

Others Present:

Mr. John Huber, President
Mr. Robert Miller, V. P. – Treasurer
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. James Brammell
Ms. Barbara Crow
Ms. Kay Ball
Mr. Steve Hubbs
Mr. Larry Lenahan
Mr. Robert Lowndes, P.E., Black & Veatch
Mr. Frank Appelfeller, P.E., Black & Veatch
Ms. Vickie L. Singleton, E.I.T., Black & Veatch
Ms. Karla Teasley
Mr. Vince Guenthner
Mr. Ralph McCord

Mr. Huber called the meeting to order. Mr. Huber announced that Jim Brammell would sit in for Greg Heitzman, who is out of town at an infrastructure conference. Mr. Huber also introduced Mr. Robert Lowndes, Mr. Frank Appelfeller and Ms. Vickie Singleton from Black & Veatch.

Project No.	Project Name	Total Project Cost
00-76	Employee Assistance Program-Comp. Neg. 3 years, VALUE OPTIONS	\$ 40,500.00
01-03	Water Bill Forms - 2 years	\$ 37,832.00
01-06	Cisco Maintenance Update CS BUSINESS SYSTEMS (CMBE)	\$ 17,680.00

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations).

Administrative Report

Mr. Huber reported that Steve Hubbs worked successfully to gain credits for utilities meeting the goals of the Partnership for Safe Drinking Water and using riverbank infiltration. Mr. Huber also reported on a meeting he had with Reverend Louis Coleman which went well. Mr. Huber reported that Don Whitehouse, the Internal Auditor, is leaving LWC to take a position elsewhere. Finally, Mr. Huber reported that companies marketing home treatment devices are planning an aggressive marketing campaign.

Financial Report

Mr. Miller gave the February financial report.

Income and Expense Summary

Total operating revenue of \$14,277,000 (line 7) is \$331,300 or 2.38 % more than budgeted and \$372,800 or 2.68% more than the same period in 2000. We sold 0.36% more water in 2001 than the same period in 2000. Water delivered to the mains was 0.24% less than 2000. However, net operating income of \$4,914,100 (line 20) is \$187,700 or 3.68% less than budgeted. Total non-operating income of \$967,800 (line 24) is \$119,500 or 14.10% more than budgeted. Total non-operating expense of \$1,266,200 (line 25) is \$300 or .03% more than budgeted. Net income of \$4,615,700 (line 26) is \$68,500 or 1.46% less than budgeted and \$759,800 or 14.13% less than 2000.

Operations and Engineering Report

Riverbank Infiltration Evaluated Bid

Staff is finalizing the plans and specifications with consultants Jordan, Jones and Goulding for the bid of the Riverbank Infiltration (RBI) tunnel project. This phase of the work is estimated at \$12 million and presents an opportunity to encourage minority and women business enterprise (M/WBE) participation as subcontractors on this larger construction project. The Company initiated an evaluated bid pilot project in late 1999 to encourage participation by M/WBE firms on pipeline and plant construction projects. To date, 12 projects have been bid under the evaluated bid process, providing \$653,500 in minority business participation and \$160,500 in women business participation.

Crescent Hill Reservoir Rehabilitation

Staff has received the preliminary design report from AB&H Engineers regarding the structural stability of the south basin drain structure. The consultant confirmed the evaluation by staff that the existing junction box was not designed for thrust restraint and the junction box needs additional foundation support for stability. At present, we are evaluating the value of designing a drain structure to tie into recent Metropolitan Sewer District drainage improvements east of the Reservoir in the Claremont neighborhood. Construction will begin this summer with completion

in the spring of 2002. A final site restoration phase will be bid in late fall for spring 2002 restoration of the reservoir area.

CALL CENTER

No. of calls received	24,520
No. of calls abandoned	1,524
Abandonment rate	6.22%

BILLING

Percent of accounts billed on time	100.00%
Percent of bills estimated	1.33%
Percent of bills that were accurate	99.64%

Litigation Report

After proper motion and second, the Board adjourned to go into closed session to discuss acquisition of property. The Board reconvened into open session without taking any action.

Report of Committees

Compensation Committee Report

Mr. Conner gave the report for the Compensation Committee. He indicated that the committee met on March 9, 2001. The Committee authorized a payout of \$250.32 for all LWC employees as the Corporate Performance Award. The committee authorized a payout of 3% for the Executive Incentive Plan Award. The Compensation Committee also received and endorsed the 2001 goals for the Executive Incentive Plan Goals, Corporate Award and Shared President/Vice Presidents' Goals. Beginning in 2001, the Executive Incentive Plan Award will be extended to the Business Systems Owners. They have the potential to earn 7.5% of salary. After proper motion and second, the Board voted to approve the Compensation Committee report.

Special Issues

Declaration of Dividend to City of Louisville

Robert Miller reported that Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville/Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City.

The annual audit has been completed. Net income of \$29,117,501 requires a total 2000 dividend to the City of \$12,876,681. This will result in an additional amount of \$100,256 to be added to the regular quarterly 2001 dividend payments.

After proper motion and second, the Board adopted a Resolution authorizing payment of the 2001 first quarter dividend in the amount of \$13,026,750.00

Bid Tabulations

97-403-C Install 16-Inch Ductile Iron Water Main in Billtown Road between Shady Acres Lane and Shaffer Lane

Mr. Brammell and Mr. Huber reported on project 97-403 C. Bids were received on Wednesday, February 21, 2001, to install 9,253+/- lineal feet of 16-inch ductile iron water main. Five bids were received from qualified contracting firms. After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$449,250 to C-Squared Inc. to install water facilities associated with this project.

01-500 Beechmont Area Main Replacement Project

Mr. Brammell and Mr. Huber reported on project 01-500. Bids were received and opened Wednesday, February 7, 2001 to install 23,920 linear feet of 6, 8 and 12-inch water main in the Beechmont Area. Included with the project are the installation/renewal of 39 fire hydrants and the transfer or renewal of 553 customer services. A total of five bids were received and opened from pre-qualified contractors. MAC Construction and excavating submitted the lowest responsive bid in the amount of **\$1,458,000** resulting in a total project cost of **\$1,936,800**. After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$1,458,000 to MAC Construction and Excavating to install the water facilities associated with this project.

Facilities Plan Professional Services Contract Consultant Selection Recommendation

Mr. Huber and Mr. McCord reported on the Facilities Plan Professional Services Contract Consultant Selection Recommendation. Staff issued a Request-for-Proposal (RFP) for professional engineering services for the preparation of the 2001-2020 Facilities Plan, to perform the 2001 Annual Inspection, and to perform other engineering services that from time to time may be needed by the company. The purpose of this project is to provide the Louisville Water Company (LWC) an objective review of functional areas, operations and existing facilities as well as develop recommendations for its twenty-year capital improvement plan.

Five firms were selected from Statement of Qualifications on file with LWC. The five firms invited to submit a proposal were: Black & Veatch Corporation; Camp Dresser & McKee, Inc.; CH2M Hill Inc.; Malcolm Pirnie, Inc.; and O'Brien & Gere Engineers, Inc. The RFP Evaluation Sub-Team Team of the Facilities Plan Technical Review Committee was comprised of representatives from Supplying, Producing & Delivering Water, Supplying Business Resources, Serving Customers, and Managing Infrastructure Core Business Systems. A qualifications based selection process was used to reach a team consensus evaluation of each firm. After evaluating the technical & expertise capabilities and conducting the firm interview, the Evaluation Sub-Team scored these criteria. Those firms which met or exceeded an average score of 3 out of 5 for these two criteria (70% of the evaluation) had their cost proposals opened.

After proper motion and second, the Board authorized the Chief Engineer to award the facilities plan professional services contract to Black and Veatch Corporation.

00-479(A): Base Mapping for Automated Mapping/Facilities Management(AM/FM)

Mr. Huber and Mr. McCord presented project 00-479 (A). Staff has initiated work on the Automated Mapping/Facilities Management System (AM/FM) project that was approved by the Board of Water Works in September, 2000. The first phase of this project is the acquisition of base mapping for the LWC service area that extends into Oldham and Bullitt Counties, and is not covered by the Louisville and Jefferson County Information Consortium (LOJIC). LWC is

currently exploring a cost sharing opportunity with the Jefferson County Metropolitan Sewer District (MSD) for base mapping in Oldham County. Cost sharing for Bullitt County base mapping will be pursued as business opportunities arise.

LWC requested and evaluated five proposals for the Bullitt County base mapping effort. Based on both cost and a qualifications-based evaluation, staff recommends award of this contract to Analytical Surveys, Inc. for \$596,978.

After proper motion and second, the Board voted to authorize staff to award the Bullitt County Base Mapping contract to Analytical Surveys, Inc., in the amount of \$596,978.

00-88/Brass Valves and Fittings

Mr. Huber and Mr. Miller reported on project 00-88. On January 31, 2001, bids were opened to award a two-year contract for brass valves and fittings. These valves and fittings are used in service installations, renewals and repairs within the Company's distribution system. A total of six bids were submitted with the lowest, most responsive bids as follows:

WaterWorks Supplies	\$192,589
A.Y. McDonald	\$136,985
Wemhoener	\$ 23,350
Viking Environmental	\$ 15,200
Cambridge Brass	\$ 4,515
Hughes Supply	\$ 616
TOTAL	\$373,305-one year
	\$746,610-two years

After proper motion and second, the Board authorized staff to award a two-year contract totaling an estimated **\$746,610** to the bidders listed above. This bid represents a 5% increase in unit prices from the previous bid.

01-05/Copper Tubing

Mr. Miller reported on project 01-05 . On February 14, 2001, bids were opened to award a contract for a six-month supply of copper tubing. Copper tubing is used throughout the distribution system in the installation, renewal and repair of domestic service lines.

After proper motion and second, the Board ratified staff's purchase of a six-month supply of copper tubing totaling **\$121,148** from **Mutual Manufacturing Company**. This bid represents a 1.2% increase in unit prices from the previous bid.

Kentucky Fleet Vehicle Contract for the Purchase of Fleet Vehicles

Mr. Miller reported on Kentucky Fleet Vehicle Contract for the Purchase of Fleet Vehicles. On January 26, 2001, LWC staff consulted the State Purchasing Contract to determine whether certain vehicles for which the State Procurement Office had solicited and received bids, met LWC needs for vehicles. Because the State Procurement Office had already complied with statutory purchasing requirements, LWC can proceed with purchase of those vehicles listed on the State contract with no additional bid process required. LWC staff has determined that the following vehicles from the State contract meet LWC needs.

<u>Recommended Contract Vendors</u>	<u>Description/Quantity</u>	<u>Total</u>
Countryside Ford Lawrenceburg, KY	(7) Ford F-150½ ton extended cabs 4WD Base Price = \$18,077 (#53 on State list)	\$154,049
Man-O-War Ford Lexington, KY	(6) Ford F-150½ ton regular cab 2WD @ \$15,437 each	\$92,622
	(2) Ford F-250¾ ton cab and chassis Base Price = \$20,130	\$50,554
<u>Recommended Contract Vendors</u>	<u>Description/Quantity</u>	<u>Total</u>
Man-O-War Ford Lexington, KY	(2) Ford F-350 1 ton cab and chassis Base Price = \$17,991 (#52 on State list)	\$45,212
H.A. Jones Versailles, KY	(1) Dodge Durango 4WD Base Price = \$23,152	\$28,062
TOTAL AWARD		\$370,499

After proper motion and second, the Board authorized staff to proceed with purchase of these vehicles from the State bid list totaling **\$370,499.00** to the vendors above.

99-04/Precast Meter Vaults-2000 PPI Renewal

Mr. Miller reported on Project 99-04/Precast Meter Vaults-2000 PPI Renewal. On March 15, 1999, the Board of Water Works approved the recommendation to award a contract for precast meter vaults to Thorn-Orwick, Inc. Staff has reviewed the Producer Price Index and based on favorable market conditions, determined it would be in the best interest of the Company to exercise our right to renew the contract.

After proper motion and second, the Board authorized staff to renew the contract with **Thorn-Orwick, Inc.** for an estimated amount of **\$63,465**.

Award of Contract for Project 01-735: New Services for Enhancing Customer Satisfaction

Mr. Miller reported on project 01-735. The 2001 – 2003 Information Technology Plan compliments the Company’s mission, vision, and goals by providing strategies to meet the

challenges and achieve the objectives set forth in the LWC Strategic Plan by using Information Technology as a strategic enabler to leverage technology investments.

The strategies outlined in the IT Plan support our efforts to operate as a competitive utility by providing exceptional customer service, control cost through Systems Based Management principles, and increase revenue through expanded water sales.

The additional capabilities will provide for enhanced services to meet the growing expectations of customers, provide a higher level of customer satisfaction, and provide better service facility information to our field service personnel.

After proper motion and second, the Board authorized staff to award a sole source contract to Orcom Solutions in the amount of \$100,000 to provide professional services for enhancements and additional functionality to the E-CIS applications as determined to meet increasing customer expectations and satisfaction.

Communications

Status Report for Water System Revenue Refunding Bonds, Series 2001

Mr. Miller gave a Status Report for Water System Revenue Refunding Bonds, Series 2001. The proposed transaction to refinance the Series 1992 Water System Revenue Bonds through the issuance of the Series 2001 Water System Revenue Refunding Bonds as a current refunding is nearing completion. The Preliminary Official Statement and Official Terms and Conditions of Bond Sale were distributed by Thomson Prospectus over the Internet on Wednesday March 6th. The bond sale will occur on Thursday, March 15, 2001 at 10:30 AM. The bids will be taken electronically through *PARITY*.

The Financial Advisor, Morgan Keegan, has prepared a preliminary estimate of the savings that may be attainable through this refinancing transaction. The estimated gross savings as of March 5th is \$4,755,979, with net present value savings of \$3,690,336.

If the bid results are favorable, staff will recommend an official award by the Board of Water Works at 12:00 noon on the sale date, subject to approval by the Louisville/Jefferson County Revenue Commission. The Revenue Commission is holding a special meeting for this purpose at 2:00 PM later that same day.

2001 General Assembly Update

Mr. Guenthner gave a 2001 General Assembly Update. During the first annual legislative session the Government Affairs Department monitored each bill that was introduced and tracked 24 pieces of legislation. Of the 24, only 2 bills that have any impact/interest to the Louisville Water Company passed.

SB 2: Environmental Clean up of Brownfields. Establishes a process to promote voluntary cleanup and redevelopment of properties suspected of environmental contamination such as abandoned industrial property.

HB 278 CERS Retirement: The bill, as originally introduced, allowed anyone who was killed as a result of their employment with the state to have their retirement benefits match hazardous duty benefits. This bill has been named the "Fred Capps Memorial Act" after the Commonwealth Attorney who was murdered defending his wife and children from a man he was prosecuting.

The bill was amended by a House Floor Amendment to base retirement compensation on an employee's "high-three" years of pay instead of "high-five". It only applies to employees who

retire between August 1, 2001 and January 1, 2009 whose total service credit is at least 27 and whose age and years of service total at least 75.

Issues to look for during the 2002 General Assembly

Retirement: It is projected that the current unfunded liability for health coverage for retirees is \$2.8 billion. \$1.1 billion of this relates to CERS. During this past session a proposal was offered that would have limited the health coverage of **future** employees by placing a \$200 monthly cap on health benefits.

Because of the controversy of this measure it was not approved but the Retirement Board was asked to look at various options for dealing with the liability and presenting the information during the interim committee process.

Cardinal Hill Area Transmission Repairs

Mr. Brammell and Mr. Huber reported on the Cardinal Hill Area Transmission Repairs. Since the New Years week-end two months ago, LWC staff and contractors have been continuously engaged in the repair of a series of joint leaks on critical 60-inch, 1930's-vintage, concrete transmission main. This particular main constitutes the primary supply line from the Crescent Hill Treatment Plant to the Cardinal Hill Reservoir. In addition, with elements of this key transmission main out of service for repairs, staff took the opportunity to completely rehabilitate the segment of 60-inch main from Palatka Road to the Cardinal Hill Reservoir.

In the past two months staff has managed the repair of five transmission main joint leaks on the 60-inch transmission main which runs from Third Street and Winkler Avenue south to Cardinal Hill Reservoir.

The locations of the five joint leaks were as follows: 1) Hazelwood Court at Arling Court.; 2) Manslick Road at Stephan Lane.; 3) in Iroquois Park Road; and 4) and 5) Both on Cardinal Hill Road south of Palatka Road.

Estimated expenses for the recent work are as follows:

	<u>O&M</u>	<u>Capital</u>
Hazelwood @ Arling	\$45,800	\$28,800
Manslick @ Stephan; Iroquois Park	75,600	-0-
Cardinal Hill Road	-0-	276,524
TOTAL	\$121,400	\$305,324

When this work was performed, staff used the annual contingency contract to perform the repairs.

Drought Summary Status of Operational and Capital Improvements

Mr. Brammell gave a Drought Summary Status of Operational and Capital Improvements. At the April 2000 meeting, the Board received a briefing on operational and capital improvements that were being initiated as a result of the 1999 drought.

The following is an update on those capital improvements.

Taste and Odor Detection A Taste and Odor team has been formalized that routinely monitors the river and process waters for odors. This team has successfully identified small MIB incidents in the past year, in time to allow effective treatment. Analytical capacity has been increased to allow more rapid analysis of samples.

PAC Feed Systems The Powdered Activated Carbon feed systems have been hardened, with temporary feed lines hard-plumbed in for increased reliability. Staff is researching more reliable feed-pumps for emergency feed systems (air pumps were used in 1999), and a project has been defined to upgrade the PAC feed system at CHFP.

Expansion of Capacity at BEPWTP A series of projects have been identified to increase the reliability and capacity of the BEPWTP finished water pumping station to 60 MG. These projects are being grouped for design and bidding, and are targeted for completion in 2003, resulting in an additional power feed, new switch-gear, a pumping unit, and discharge piping. These projects will be coordinated with the long-term capacity expansion at the BEPWTP to 120 MGD over the next 20 years.

Booster Pumping Stations The following pumping stations will strengthen supply to the elevated service area.

- **Westport Road Transfer Station**
- **Highway 22 Booster Pumping Station**
- **Aiken Road Booster Pumping Station**
- **Billtown Road Booster Pumping Station**
- **Chamberlain Lane Booster Pumping Station**
- **Highway 480 Booster Pumping Station**

Transmission Main Projects Transmission mains are being constructed to support growth in water demand in eastern Jefferson, Oldham and Bullitt Counties:

- **Aiken and Avoca Road Mains**
- **Billtown Road 16-inch**
- **Bardstown to Billtown Road 30-inch**
- **Lagrange Road 24-inch Transmission**
- **Cross-County 24-inch Transmission**
- **Frankfort Avenue 48-inch**
- **Marquette 30-inch**
- **I-Transmission System**

Storage Tanks Several storage tanks are at various stages of development to better serve the elevated service area. They are:

- **Billtown 1 MG elevated tank**
- **Hillcrest 1.0 MG storage**
- **Highway 329/Oldham County 0.5 MG storage**

These capital improvements will significantly mitigate drought effects such as those experienced in 1999. While all improvements will not be completed by the peak summer period of 2001, projects will be brought on-line as they are completed to assist improve quality and service.

CommonStream Water eMarket Participation

Mr. Huber and Ms. Teasley reported on CommonStream Water eMarket Participation. Louisville Water Company recently provided a letter to a new company called CommonStream, indicating its interest in participating in a water industry eMarket that is being launched later this year. The new eMarket is the result of significant development work by a consortium of public

water utilities including Washington Suburban Sanitary Commission, Massachusetts Water Resources Authority, Fairfax County Water Authority, Metropolitan Water District of Southern California, Louisville Water Company and several other water and wastewater utilities.

The purpose of CommonStream is to provide an electronic marketplace for buyers and sellers of products and services in the water and wastewater markets. Its technology is based on the Commerce One platform, which is the same technology used by the leading eMarkets in the electric, petrochemical, automotive and paper industries. One of the key initial benefits of the eMarket is to obtain procurement savings through cooperative purchasing in joint bids with other customers.

CommonStream will also be an electronic community for the industry, providing a forum for collaboration on product standardization, bulletin boards on major issues, an employment exchange, and links to other key industry sites.

Louisville Water expects to become a Charter member in CommonStream shortly. For a fee of \$20,000 it will have representation on the buyer's advisory board and will be entitled to discounts of up to \$50,000 on purchases made through the eMarket. Although we have indicated our interest in participating in the eMarket, our participation is totally voluntary and at our discretion when it is in our best interest to do so. CommonStream also plans to assist utilities' local and MBD vendors to expand their market reach and lower barriers to participation.

Board members requested further clarification before LWC goes further into this deal. Board members also asked General Counsel to make sure that LWC does not take on any additional liability by virtue of its participation.

Summary Report of 2000 Strategic Plan Achievement

Mr. Huber then reported on the 2000 Strategic Plan Implementation. The company met its chlorine goal and met Phase IV requirements of the Partnership for Safe Drinking Water by June 2000. LWC also exceeded its return on equity target by achieving 10.65% return on equity. We achieved our revenue targets for 2000, and we achieved our water sales target. We achieved Level 2 in CSI serviced customer goal. We implemented our diversity plan in order to achieve our diversity goals. LWC achieved its goals for vehicular accidents and lost work days due to injuries.

Old Business

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Williams Road: Dry Ridge Road to County Line

Mr. Brammell reported that an Apportionment Warrant public hearing was held for Williams Road: Dry Ridge Road to County Line. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

All eligible property owners were in attendance of the public hearing. All attending property owners advised they were in favor of extension of water service along Williams Road: Dry Ridge Road to County Line as proposed at the hearing. The public road Apportionment Warrant project is summarized as follows:

After proper motion and second, the LWC Board voted to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

Amendment of Apportionment Warrants per KRS 96.265 Taylorsville Road: Hwy 155 to 15903 Taylorsville Road

Mr. Brammell reported on Amendment of Apportionment Warrants per KRS 96.265 Taylorsville Road: Hwy 155 to 15903 Taylorsville Road. A public hearing was held March 4, 1999 for the extension of water service along Taylorsville Road: Hwy 148 to Hwy 155 which includes Taylorsville Road: Hwy 155 to 15903 Taylorsville Road. With the completion of this public water main extension the Board of Water Works was required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. Apportionment Warrants were issued on this project against forty-one (41) benefited properties in accordance with KRS 96.265. Since that time, staff was notified that one (1) parcel had been omitted from the initial assessment. After proper motion and second, the Board voted to adopt a resolution amending resolution for the issuance of Apportionment Warrant and lien against one (1) additional benefited property along Taylorsville Road: Hwy 155 to 15903 Taylorsville Road in accordance with KRS. 96.265, as described.

RESOLUTION AMENDING PREVIOUS APPORTIONMENT WARRANT RESOLUTION

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on March 13, 2001, directing the issuance of Apportionment Warrants against properties located on Taylorsville Road: Hwy 155 to 15903 Taylorsville Road, to add the following property listed in the name of Michael G and Linda L Thompson:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assesment</u>
AW46506019	Michael G & Linda L Thompson	17210 Taylorsville Road Deed Book <u>5718</u> , Pg. <u>717</u> Tax Block <u>0054</u> , Lot <u>0039</u>	\$5,450

It appearing that such property should have been included in the November 14, 2000 assessment.

Project No. 99-556 and Project No. 99-640 Clark Station Road and Hobbs Lane Water Main Extension 8 Inch and 12 Inch Water Mains From US 60 (Shelbyville Road) to I-64 Petition for Easement Condemnation

Mr. Brammell reported that plans and specifications have been prepared to install 8 inch and 12 inch main along Clark Station Road and Hobbs Lane, from US 60 (Shelbyville Road) to I-64. This project is part of the County Wide Expansion Program and will provide the opportunity for water service connections to 50 properties along the route. The route includes the need to obtain water easements along these roads for the purpose of installing the 8 inch and 12 inch distribution water main.

Staff has been involved in negotiations with the owners of 22 properties along these routes without having reached an acceptable settlement on one tract (one owner).

After proper motion and second, the Board adopt the attached resolution which authorizes staff to proceed with a Petition for Condemnation to obtain the referenced easements for the purpose of installing a water main along Clark Station Road and Hobbs Lane.

Project 99-598 Ky Hwy 146 at Westport/Reamers Roads, Water Facilities Relocations and Transmission Improvements

Mr. Brammell reported on KY Hwy 146 at Westport/Reamers roads, Water Facilities Relocations and Transmission Improvements. As mentioned in the October 12, 1999 letter to the Board of Water Works, a relatively small amount of water facilities relocations has been necessitated by the Kentucky Transportation Cabinet's (KTC) proposed roadway improvement to the New LaGrange Road/Westport Road/Reamers Road intersection area. Both the water facilities relocation work and the transmission improvement work have been included as part of the KTC's roadway contract; the transmission work will "clear" the limits of the road-way work. Last month, the KTC opened bids. Matsuda, Inc. (a certified MBE, and prequalified by the LWC in the large iron pipe category) was the apparent low bidder for the roadway project, which included the LWC-related work; their bid price entries for LWC-related work totaled \$240,570. Each of the other five firms that submitted a bid had a higher LWC-related bid total, ranging from \$244,720 to \$352,101.

After proper motion and second, the Board voted to authorize the Chief Engineer to execute the Agreement with the KTC, thus allowing its roadway contractor to construct both the water facilities needing relocation and the transmission improvement water facilities.

New Business

Proposed Water Fill Station Along Highway 44

Mr. Brammell reported on a proposed water fill station along highway 44. The southwestern portion of Jefferson County near the Jefferson Memorial Forest is the last remaining unserved area of Jefferson County. As the County-wide Water Extension Program proceeds, the property owners in this area will have access to water mains over the next several years. In response to customer and elected official's requests, the Louisville Water Company has been evaluating locations for a water fill station to serve this part of Jefferson County, until potable water becomes available.

After evaluating several different locations in the area, a parcel along Highway 44 owned by Jefferson County Government has been selected. The Louisville Water Company is partnering with Jefferson County to lease a 3 acre portion of this 100 acre site. The Company desires to enter into a 20 year lease agreement for a nominal fee, in exchange for entrance improvements to the shared driveway.

After proper motion and second, the Board voted to authorize staff to proceed with finalizing a 20 year lease agreement with Jefferson County Government, filing a site plan for the water fill site with the Bullitt County Planning and Zoning Commission, and designing and bidding the project as described above.

01-454: B. E. Payne Water Treatment Plant Roof Replacement Program

01-455: Crescent Hill Water Treatment Plant Roof Replacement Program

Mr. Brammell reported on 01-454: B. E. Payne Water Treatment Plant Roof Replacement Program and 01-455: Crescent Hill Water Treatment Plant Roof Replacement Program. Proposed under the 2001 Capital Improvement Program are two Built-up Roof Replacement Annual Program projects to replace roofs at the Production Facilities.

These two projects will address replacement of aging flat roofs at each facility with modified bitumen roofs. The CHWTP roofs are of varying age and condition, last addressed 20-25 years ago following the 1974 tornado event. The BEPWTP facilities were all constructed at essentially the same time frame (mid-1970's), thus all roofs are concurrently reaching their anticipated life.

After proper motion and second, the Board authorized staff to proceed with engineering design and advertisement for bid for the subject projects. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Requests for Design Authorization – Cardinal Hill Transmission Improvements

Mr. Brammell and Mr. Huber reported on Requests for Design Authorization – Cardinal Hill Transmission Improvements. Transmission main problems over the past two months have illustrated the vulnerability of the system to problems which arise with the primary feed to the Cardinal Hill Reservoir being out of service. These recent transmission main leaks, and their associated repairs, have forced the company to operate at undesirable levels of risk. In light of these recent experiences, staff has considered alternatives to mitigate future problems of this nature, and recommends the following two capital projects for authorization.

Cardinal Hill Secondary Supply – The scope of this project is to provide a secondary supply to Cardinal Hill Reservoir. If constructed, this redundant feed would allow maintenance on the primary feed to occur a significantly lower risk. The conceptual cost estimate for this work is approximately \$7 million, although alternatives exist with the alignment that could lower the cost. Authorization is being sought in this letter to retain a consultant to perform the route analysis and selection, prepare the detailed project cost estimate and to complete the project design. Funds in the amount of \$300,000 are requested to advance this work to the 2001 budget, with remaining funding for construction to be requested in the 2002-2004 capital budgets.

Cardinal Hill Primary Supply Rehabilitation – Concurrent with the above project, staff also recommends that rehabilitation of the existing 1930's-vintage concrete transmission main be designed and constructed on a planned basis over the next 3 years. This rehabilitation would primarily consist of sealing the remaining unsealed joints of this vintage pipe, as the joints have historically been the source of problems. Total costs for this project are estimated at \$1.8 million. Authorization is being sought in this letter to retain a consultant to perform the project design and to prepare a detailed project cost estimate.

After proper motion and second, the Board voted to authorize staff to solicit proposals from, and to negotiate with, consultants to design the two above-described projects. Funding for these projects will come from anticipated savings in the 2001 capital budget or by deferral of lower priority projects to 2002. Recommendations for award of the professional services contracts will be returned to the Board for approval.

Award of Contract for Bid No: 00-82 for Integrated Voice Response (IVR) and Computer Telephony Integration (CTI) System

Mr. Miller reported on the Award of Contract for Bid No: 00-82 for Integrated Voice Response (IVR) and Computer Telephony Integration (CTI) System. The 2001 – 2003 Information Technology Plan compliments the Company's mission, vision, and goals by providing strategies to meet the challenges and achieve the objectives set forth in the LWC Strategic Plan by using Information Technology as a strategic enabler to leverage technology investments.

The IT Plan identifies several Information Supply Systems to enhance customer service and satisfaction by leveraging our investment in the newly implemented Customer Information System. Integrated Voice Response and Computer Telephony Integration was one of the key projects identified in the IT plan to meet the customer service and satisfaction objectives of the Company.

The Board of Water Works authorized staff to proceed with the design and bid of the IVR/CTI project in November 2000 with a budget of \$250,000. Proposals were received from Nortel Networks, RCG, Bellsouth, Centurion, and Frank Solutions in December 2000. Nortel Networks was removed from further consideration since they did not meet the specifications outlined in the proposal. After proper motion and second, the Board voted to authorize staff to award a contract to Frank Solutions, Inc. in the amount of \$157,268 for hardware, software, and implementation services and a contract to Bellsouth in the amount of \$73,294 for necessary Meridian phone system upgrade to support the IVR/CTI solution.

Request for Approval for Final Design and Bid of Information Technology Standard Hardware and Software Projects:

Mr. Miller reported on Project 01-547: Procurement of Desktop Workstations for Technical Architecture and Project 00-475: Microsoft Office Site License Upgrade.

The 2001 – 2003 Information Technology Strategic Plan outlines the technology investments the Company needs to make to maintain the IT Architectures and enable us to meet key business objectives of the Company's Strategic Plan and associated program plans.

▪ Project 01-547: Procurement of Desktop Workstations for Technical Architecture:

The 1993 – 1997 Information Technology Strategic Plan established the four Information Technology Architectures and outlined the Migration Plan to move the LWC from a closed, proprietary, central computing platform to a distributed, open systems technical architecture based on defined Information Technology industry standards.

This project provides funding in the amount of \$60,000 for desktop computers, printers, equipment, and other peripherals to replace and upgrade non-standard, outdated units and provide for procurement of new equipment for new hires and changing business needs.

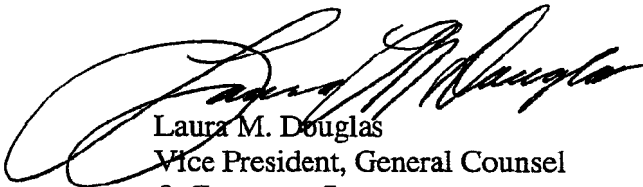

After proper motion and second, the Board voted to authorize staff to execute an agreement with Microsoft to purchase desktop computer equipment and purchase a Microsoft Office license upgrade.

The meeting adjourned at 3:15 p.m.

CERTIFICATION

This is to certify that the following, *Williams Road: Dry Ridge Road to County Line*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on March 13, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

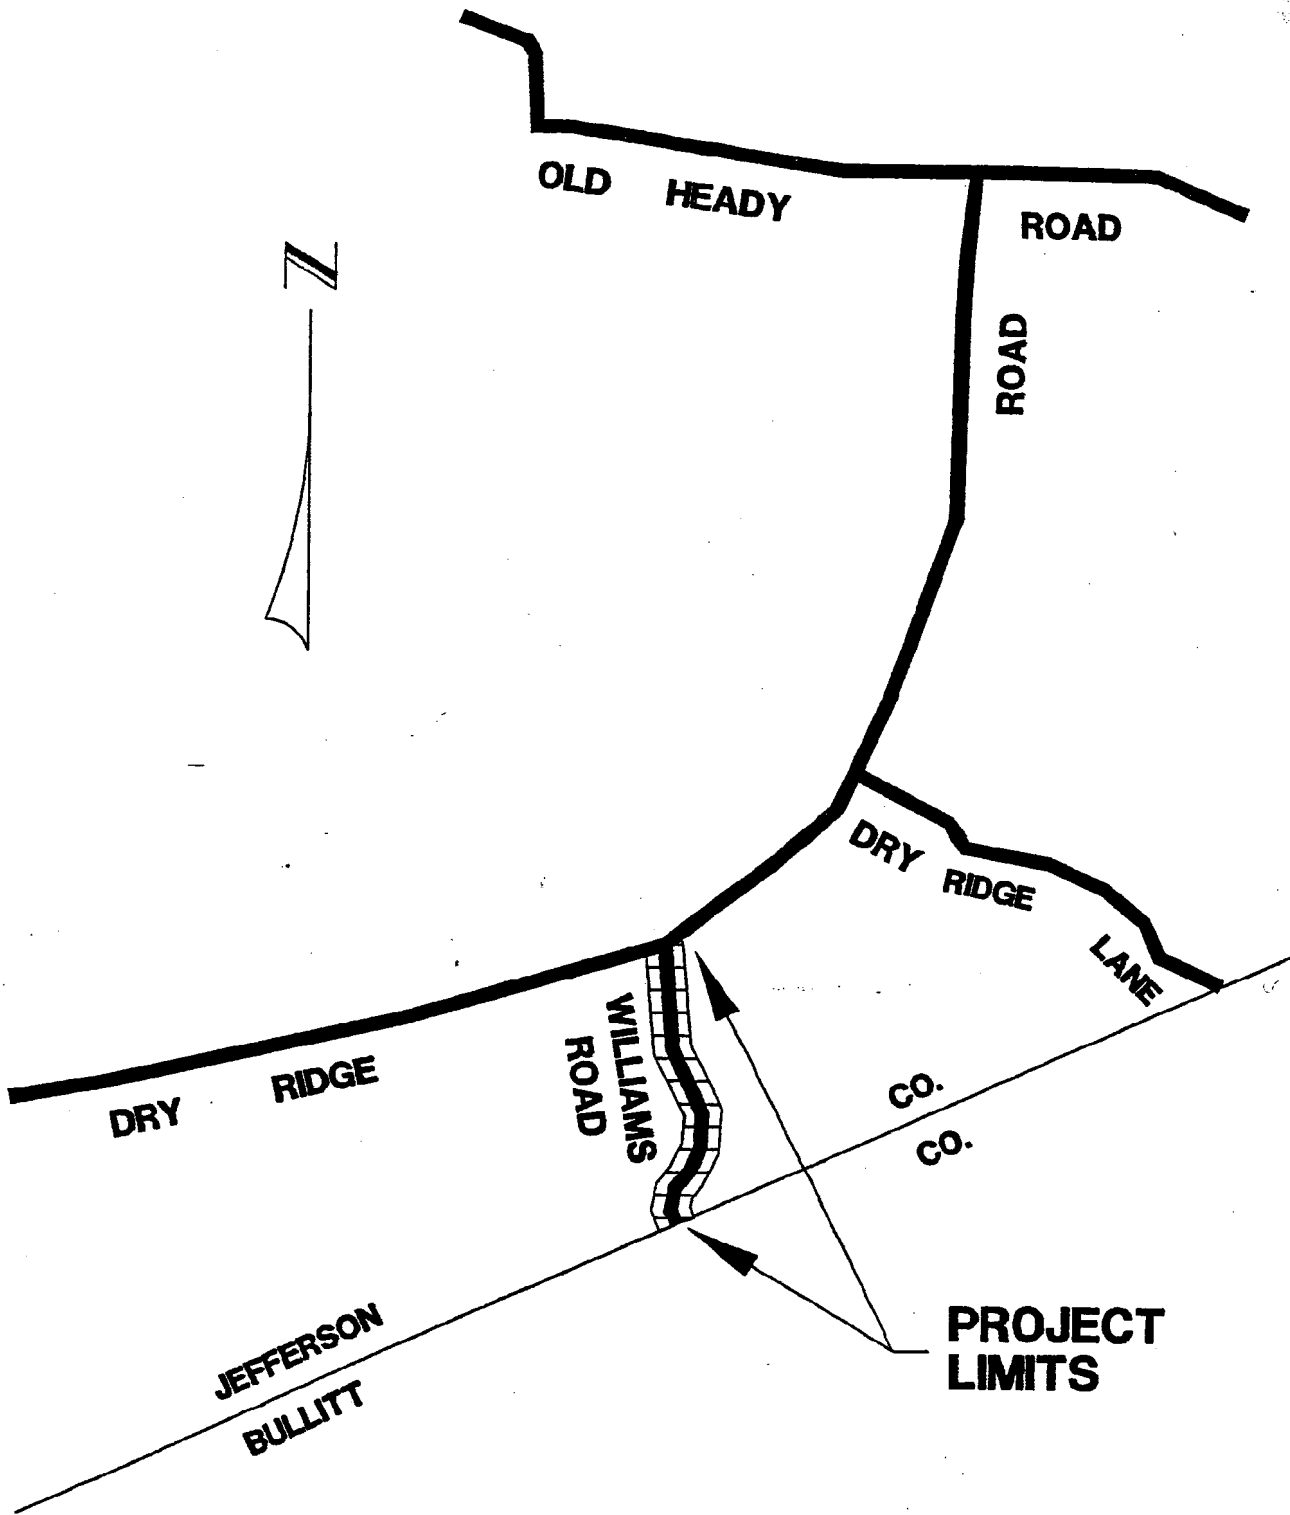

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
March 13, 2001

**Board of Water Works
Resolution**

March 13, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Williams Road: Dry Ridge Road to County Line**, a public way in Jefferson County, and acting thereon convened a public hearing on February 22, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Williams Road: Dry Ridge Road to County Line**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Williams Road: Dry Ridge Road to County Line**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA

FILE NAME: WILLIAMS

**ADVERTISED IN THE COURIER JOURNAL
SUNDAY, FEBRUARY 11, 2001**

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.285, the Louisville Water Company will hold a public hearing for the property owners along Williams Road: Dry Ridge Road to County Line (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Dry Ridge Road: Dry Ridge Road to County Line.

This public hearing will be held on Thursday, February 22, 2001 at 8:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Routt Road.

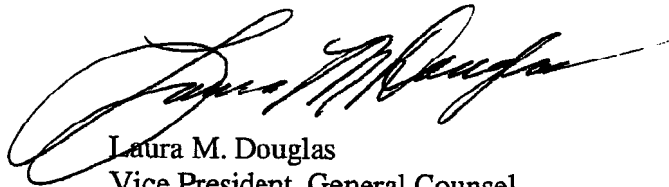

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

The map shows a section of Williams Road running north-south. At the top, it is labeled 'OLD ROAD' and 'ROAD'. A north arrow is located on the left side. A scale bar is at the bottom left. A legend at the bottom right indicates 'PROJECT LIMITS' with a dashed line and 'PROJECT AREA' with a hatched pattern. The project area is shown as a hatched region along Williams Road from Dry Ridge Road to County Line.

CERTIFICATION

This is to certify that the following, *Amendment of Apportionment Warrants per KRS 96.265 Taylorsville Road: Hwy 155 to 15903 Taylorsville Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on March 13, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read 'Laura M. Douglas', written in a cursive style with a long horizontal flourish extending to the right.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
March 13, 2001

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on March 13, 2001, directing the issuance of Apportionment Warrants against properties located on Taylorsville Road: Hwy 155 to 15903 Taylorsville Road, to add the following property listed in the name of Michael G and Linda L Thompson:

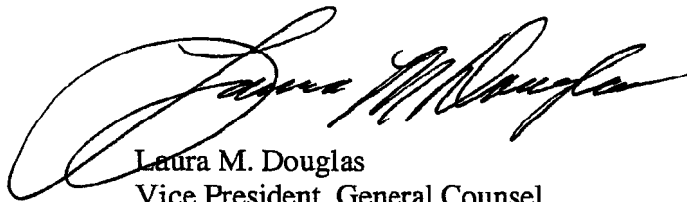

<u>Account</u>	<u>Name</u>	<u>Location</u>	
<u>Assesment</u> AW46506019	Michael G & Linda L Thompson	17210 Taylorsville Road Deed Book <u>5718</u> , Pg. <u>717</u> Tax Block <u>0054</u> , Lot <u>0039</u>	\$5,450

it appearing that such property should have been included in the November 14, 2000 assessment.

CERTIFICATION

This is to certify that the following, *Clark Station Road and Hobbs Lane Water Main Extension 8 Inch and 12 Inch Water Mains from US 60 (Shelbyville Road) to I-64, Petition for Easement Condemnation*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on March 13, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
March 13, 2001

RESOLUTION OF BOARD OF WATER WORKS

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain an easement across property having frontage on Clark Station Road and US 60 (Shelbyville Road) in Jefferson County, Kentucky, for the purpose of locating and maintaining one or more distribution mains therein, such easement to be located as described in Exhibits attached thereto and at the site and width indicated on the plat attached thereto, made a part hereof by reference, it being the Board of Water Works' determination that such easement is needed from:

Albert L. Gutterman

18112 Shelbyville Road

Block 0034 Lot 0044

and any of all other lawful owners of such properties, the need for such easement being to assist the Louisville Water Company in fulfilling the public purpose of providing purified water to the residents of the City of Louisville and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts have failed, to bring a condemnation action against the owners of such land.

RESOLUTION OF BOARD OF WATER WORKS

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain an easement across property having frontage on Clark Station Road and US 60 (Shelbyville Road) in Jefferson County, Kentucky, for the purpose of locating and maintaining one or more distribution mains therein, such easement to be located as described in Exhibits attached hereto and at the site and width indicated on the plat attached thereto, made a part hereof by reference, it being the Board of Water Works' determination that such easement is needed from:

Albert L. Gutterman

18112 Shelbyville Road

Block 0034 Lot 0044

and any or all other lawful owners of such properties, the need for such easement being to assist the Louisville Water Company in fulfilling the public purpose of providing purified water to the residents of the City of Louisville and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts have failed, to bring a condemnation action against the owners of such land.

Property of Albert L. Gutterman
Deed Book 6841 Page 304 (Q.C.)
Deed Book 5647 Page 687

Louisville Water Company Permanent Easement:

Being an easement 30 feet in width beginning at a point on the westerly Right-of-Way of Clark Station Road (30 feet Right-of-Way) and at the southeasterly corner of Trustees of St. Luke Baptist Church, recorded in Deed Book 331 Page 335 in the office of the County Clerk of Jefferson County, Kentucky; thence South $15^{\circ}43'00''$ West 25.55 feet along the westerly Right-of-Way of Clark Station Road; thence South $04^{\circ}39'00''$ East 296.85 feet along the westerly Right-of-Way of Clark Station Road to the northeasterly corner of Todd M. Scheuning and Cheryl E. Jones, recorded in Deed Book 7061 Page 666 in the Office of the aforesaid County Clerk's office; thence South $84^{\circ}28'00''$ West 30.00 feet along the aforesaid Scheuning – Jones property line; thence North $04^{\circ}39'00''$ West 302.70 feet; thence North $15^{\circ}43'00''$ East 51.10 feet to the southwesterly property line of the aforesaid Trustees of St. Luke Baptist Church property; thence South $40^{\circ}23'00''$ East 36.14 feet along the southwesterly property line of the aforesaid Trustees of St. Luke Baptist Church property to the point of beginning.

Louisville Water Company Temporary Construction Easement:

Being an easement 20 feet in width and adjacent to the westerly side of the above described 30 feet Louisville Water Company Permanent Easement beginning at a point North $40^{\circ}23'00''$ West 36.14 feet from the westerly Right-of-Way of Clark Station Road (30 feet Right-of-Way) and the southeasterly corner of Trustees of St. Luke Baptist Church, recorded in Deed Book 331 Page 335 in the office of the County Clerk of Jefferson County, Kentucky; thence South $15^{\circ}43'00''$ West 51.10 feet; thence South $04^{\circ}39'00''$ East 302.70 feet to the northerly property line of Todd M. Scheuning and Cheryl E. Jones, recorded in Deed Book 7061 Page 666 in the Office of the aforesaid County Clerk's office; thence South $84^{\circ}28'00''$ West 20.00 feet along the aforesaid Scheuning – Jones property line; thence North $04^{\circ}39'00''$ West 306.60 feet; thence North $15^{\circ}43'00''$ East 68.13 feet to the southwesterly property line of the aforesaid Trustees of St. Luke Baptist Church property; thence South $40^{\circ}23'00''$ East 24.10 feet along the southwesterly property line of the aforesaid Trustees of St. Luke Baptist Church property to the point of beginning.

THIS PLAT DOES NOT REPRESENT A BOUNDARY SURVEY AND THE MONUMENTED CORNERS SHOWN HEREON ARE NOT VERIFIED. THE MONUMENTS SHOWN ARE TO BE USED AS REFERENCE TIES FOR THE EASEMENT ONLY. THIS EASEMENT WAS NOT PREPARED TO THE STANDARDS OF PRACTICE AS DEFINED BY 201 KAR 18:150. THIS PLAT MEETS OR EXCEEDS THE MINIMUM STANDARDS OF THE LOUISVILLE WATER COMPANY. THE REFERENCE MERIDIAN USED ON THIS EASEMENT PLAT TO DETERMINE THE DIRECTION OF THE EASEMENT LINES WAS BASED ON THE EASTERLY PROPERTY LINE OF ALBERT L. GUTTERMAN PER D.B. 6841 PG. 304.

I HEREBY CERTIFY THAT THIS EASEMENT PLAT WAS MADE UNDER MY SUPERVISION AND IS CORRECT TO THE BEST OF MY KNOWLEDGE AND BELIEF.

**SPECIAL MEETING OF THE BOARD
OF WATER WORKS**

March 15, 2001

Board Members Present

Mr. Jack Segell
Mr. Stephen Gault
Mr. Stewart Conner

Board Members Absent

Mayor Dave Armstrong
Mr. Phillip Bond
Mr. Owen Hammons
Ms. Wendy Welsh

Others Present

Mr. John Huber, President
Mr. Robert Miller, VP, Treasurer
Ms. Laura Douglas, VP, General Counsel and Secretary
Mr. Larry Lenahan
Mr. Spencer Harper, Harper Ferguson and Davis
Ms. Amber Halloran
Mr. Rick Delaney, Morgan Keegan

On March 15, 2001, Mr. Miller reported that the Board of Water Works received the following bids for its Water System Refunding Revenue Bonds, Series 2001:

<u>Bidder Name</u>	<u>*TIC</u>
Merrill Lynch & Co.	4.319885
Morgan Keegan & Company, Inc.	4.338362
Lehman Brothers	4.343469
ABN AMRO Financial Services, Inc.	4.353447
Banc One Capital Markets, Inc.	4.388875
William R. Hough & Co.	4.421432
Bear, Stearns & Co., Inc.	4.426192

*True interest cost

The above bids were received electronically through the PARITY system.

Mr. Delaney indicated that the best bid was received from Merrill Lynch. The final size of the transaction was \$60,300,000. The total interest was \$21,811,462.04. The gross savings was \$5,461,679.02.

Based upon the authority delegated to the President and Vice President, Treasurer, pursuant to Section 802 of that Supplemental Resolution of the Board of Water Works of the City of Louisville, Kentucky Acting as the Governing Body of the Louisville Water Company Authorizing the Issuance of Not to Exceed \$64,750,000 Principal Amount of

SPECIAL MEETING OF THE BOARD OF WATER WORKS MARCH 15, 2001

Louisville Water Company Water Systems Refunding Revenue Bonds, Series 2001, adopted by the Board of Water Works at its February 13, 2001 meeting, The President and Vice President accepted Merrill Lynch & Company's bid as the best bid.

The meeting adjourned at 12:50 p.m.

**BOARD OF WATER WORKS
ANNUAL MEETING
APRIL 10, 2001**

The Annual Meeting of the Board of Water Works was called to order at 12:00 noon by John L. Huber.

Mr. Huber then relinquished the chair to Ms. Douglas, General Counsel, for the purpose of receiving nominations for the office of President.

A motion was made by Ms. Welsh to place in nomination the name of Mr. John L. Huber for the ensuing year. Mr. Hammons seconded the motion. The BOWW then unanimously voted to appoint Mr. Huber as President for the ensuing year. Mr. Huber resumed the chair.

The President then asked for nominations for the office of Vice President, to be filled by election of one of the Board members. The Chairman reminded the Board that the Vice President elected from the Board membership serves in the office without salary.

The motion was made by Mr. Conner and seconded by Mr. Segell to place in nomination the name of Mr. Phillip D. Bond for the office of Vice President for the ensuing year. Mr. Bond was then elected Vice President of the BOWW for the ensuing year.

The President asked for nominations for the position of Vice President-Chief Engineer. Mr. Hammons made a motion seconded by Ms. Welsh to nominate Mr. Gregory Heitzman to that position for the ensuing year. The Board so voted.

The President then asked for nominations for the office of Vice President-Treasurer. Mr. Hammons made a motion seconded by Ms. Welsh to nominate Mr. Robert K. Miller for that position for the ensuing year. The Board so voted.

The President asked for nominations for the office of Corporate Secretary. Mr. Conner made a motion seconded by Ms. Welsh to nominate Ms. Laura M. Douglas for that position for the ensuing year. The Board so voted.

The President requested nominations for Auditor, and Ms. Welsh nominated the firm of Crowe, Chizek and Company LLP for that position and moves that progress payments be made for work completed, to be applied against usual and customary fees for accounting services rendered in this area, not to exceed \$26,000. Mr. Hammons seconded the motion, and the Board so voted.

The President requested nominations for the Compensation Committee, consisting of three Board members. Mr. Segell nominated Mr. Stewart E. Conner, Chairperson, Mr. Phillip Bond, and Ms. Wendy C. Welsh for the ensuing year. Mr. Gault seconded the motion. The Board so voted.

The President requested nominations for the Public Information and Customer Satisfaction Committee, consisting of three Board members. Ms. Welsh nominated Mr. Jack H. Segell, Chairperson, Mr. Stewart E. Conner, and Mr. Stephen C. Gault for the ensuing year. Mr. Hammons seconded the motion. The Board so voted.

There being no further business, The Annual Meeting adjourned at 12:45 p.m.

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
April 10, 2001**

Board Members Present

Mr. Owen Hammons
Ms. Wendy Welsh
Mr. Stephen C. Gault
Mr. Stewart Conner
Mr. Jack Segell

Board Members Absent

Mr. Phillip Bond
The Hon. David L. Armstrong, Mayor

Others Present

Mr. John Huber
Mr. Robert Miller, V. P. Treasurer
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Gregory Heitzman, V. P. Chief Engineer
Ms. Karla Teasley
Mr. Vince Guenther
Ms. Barbara Crowe
Mr. Jim Wehrle

The Board Meeting convened at 12:45 p.m.

At Mr. Segell's request, Mr. Huber indicated that staff would do quarterly updates on the water e-market.

Item D: Authorization for design and bid of projects (estimated to cost less than \$200,000)

Project No.	Project Name	Total Project Cost
01-405	Standby Generator at PRP Booster Pump Station and Bell Joint Clamps – 2001 PPI Renewal	\$100,000.00

Item E: Bid tabulations (award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid.).

Project No.	Project Name	Total Project Cost
00-599	Peaceful Valley Booster Pump Station	\$ 54,214.00
01-08	Steel Encasing Pipe	\$ 81,098.00

Item F: Award of contracts less than \$50,000

Project No.	Project Name	Total Project Cost
00-74	Rest Cottage Lane Tapping Fee Main C.J. HUGHES CONSTRUCTION CO.	\$ 22,500.00
98-C01-B	Carpet Cleaning Services – Renewal CARPET TECHNOLOGIES, INC.	\$ 22,259.00
01-LW01B	Lawn Maintenance of LWC Grounds GTK LAWN & LANDSCAPING	\$ 11,440.00
01-04	Engineering Large Format Plan Copier REJECT ALL BIDS	-----
01-10	Copper Wire WATERWORKS SUPPLIES, INC.	\$ 8,424.00
PROF. SVC.	Firewall Penetration & Vulnerability Audit JEFFERSON WELLS INTERNATIONAL	\$ 13,200.00
PROF. SVC.	Proposal for Engineering Services QUINTEC SERVICES, INC. (CWBE)	\$ 49,300.00
SOLE SOURCE	Renewal of Software License and Maintenance ENVIRONMENTAL SYSTEMS RESEARCH	\$ 10,893.00
SOLE SOURCE	Additional Storage on AS400/720 ORCOM SOLUTIONS	\$ 10,440.00

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations).

Administrative Report

Mr. Huber stated that this week Mr. Heitzman and Mr. Miller would celebrate their ten year anniversaries as Board Officers. He also reported that Mr. Miller just completed a peer review of Mass. Water Authority. Mr. Huber reported good feedback and compliments of Mr. Miller’s work as peer review team leader.

Financial Report

Mr. Miller gave the March financial report.

Income and Expense Summary

Total operating revenue of \$20,815,100 is \$409,600 or 2.01% more than budgeted and \$552,200 or 2.73% more than the same period in 2000. We sold .67% more water in 2001 than the same period in 2000. Operating deductions of \$14,660,600 (line 19) are \$997,500 or 7.3-% more than budgeted and \$1,008,900 or 11.92% more than 2000. Net operating income of \$6,154,500 (line 20) is \$587,800 or 8.72% less than budgeted. Net income of \$5,868,200 (line 26) is \$253,500 or 4.14% less than budgeted and \$800,100 or 12.00% less than 2000.

Draft Procurement Policy

Mr. Huber indicated that the Commonwealth of Kentucky has revised upwards the dollar amount of expenditures which require bids. In addition, our procurement policy has been in place for 18-20 years. Mr. Segell asked that we review the City's procurement policy and make sure our proposed policy is consistent with the City's policy. Mr. Huber indicated that staff would do so. Mr. Miller stated that the key changes to the draft Procurement Policy, other than format issues, are:

- Increased level for obtaining three quotes from \$5,000 to \$10,000.
- Increased level for public advertisement and bidding from \$10,000 to \$20,000 (consistent with recently changed state law).
- Increased level for President contract approval from \$50,000 to \$100,000.
- Recognition of existing practices for Competitive Negotiations.
- Minimum criteria established for price as a consideration of competitive negotiation and professional services proposals at a twenty-five percent weighting.

Upon consideration of feedback from the Board of Water Works, the Executive Leadership Team will be finalizing this policy in the next few weeks. The policy will be brought back to the Board for additional review after ELT action.

Water Rate Implementation Issue

Mr. Huber indicated that The Customer Information System implemented in July 2000 included a water rate change methodology that prorates the effect of a rate increase by applying it only for consumption for the days after the rate increase took effect. While this methodology is considered an industry best-practice, it represents a change from the existing Service Rules and Regulations that was not considered when the water rates for 2001 were developed. In past years, water rate changes took effect on statements mailed on or after January 1st.

As a result, water billings for January and February are approximately \$245,000 lower than anticipated.

Mr. Miller indicated that staff has considered several different scenarios for resolving this revenue shortfall and has determined that the most appropriate next step to balance customer and owner interests is to reduce discretionary spending by a like amount for 2001. The category identified for the expense reduction is Retirement of Assets.

The impact of this reduced expense will offset the amount of the reduced revenues.

After proper motion and second, the Board voted to revise its December 12, 2000 Resolution authorizing a 3.5% raise in the water rates for all bills issued on or after January 1, 2001 by directing LWC's staff to prorate said increase for the first billing period in 2001 only, based upon the date of issuance of the water bill.

2000 Dividend Computation Correction

Mr. Miller stated that at the March 2001 meeting of the Board of Water Works, the total dividend for 2000 was declared at \$12,876,681. Upon subsequent review, it was determined that one of the deduction items in the dividend calculation formula was entered incorrectly.

The interest earned on the Construction and Acquisition Fund is not eligible for inclusion in the dividend calculation and was entered as \$1,066,366, when the actual amount was \$1,006,336. As a result of this correction, the actual amount of the total dividend for 2000 should be \$12,912,681, an increase of \$36,000 (sixty percent of the \$60,000 difference).

After proper motion and second, the Board voted to declare the 2000 annual dividend to be increased from \$12,876,681 to \$12,912,681 and that the difference of \$36,000 be added in quarterly installments to the remaining regular 2001 dividend payments.

Operating and Engineering Report

Mr. Heitzman reported that on Friday, April 6th, MSD issued a NON and Stop Work Order for violation of the Erosion and Sedimentation Control Ordinance.

KT2 Data Conversion Summary

Louisville Water Company staff successfully completed the data conversion to add KT2 account and billing information to Orcom's E-CIS on March 17, 2001. Staff converted 2,523 active accounts totaling \$8,835.14. Many of the accounts were paid or between meter reading cycles. The first Louisville Water Company meter readings will be loaded into E-CIS for billing on March 30 with the first billing scheduled for the week of April 2, 2001.

Bullitt County Advisory Board Meeting

The Bullitt County Advisory Board quarterly meeting was held on Thursday, March 29.

The Advisory Board was updated on the operational transition for Division # 2. Advisory Board members recommend the LWC staff evaluate an improved method of communicating with customers during emergency water outages. The Advisory Board also recommended the Company look at the staffing levels of the Bullitt County office considering the volume of customer payments, customer inquiries, and applications for new meters made at this office. Staff will evaluate these recommendations for improvements in operations of the KT District.

Finally, staff discussed the meter connection fees associated with Division # 1 and # 2. Staff advised the Advisory Board that LWC will honor all existing main extension contracts in Bullitt County.

The Advisory Board also recommended the Company keep the \$150 connection fee for all main extensions identified in the Bullitt County Extension Program, with revenues deposited into the Bullitt County Reserve. Staff recommended this additional fee be dropped in order to reduce administrative costs and to establish a consistent fee schedule for main extensions in Division # 1 and Division #2. Staff advised this issue would be reviewed by the Company's attorneys and senior management prior to making a final decision on the collection of the \$150 fee. If the fee is dropped, staff will come back to the Board.

Litigation Report

Ms. Douglas presented a litigation report in open session. All of the items upon which she reported were a matter of public record. She reported on the first quarter expenditures for legal fees, the status of oral arguments on the Cason & Phelps Case, the status of Kaviar v. LWC and the water e-market.

After proper motion and second, the Board adjourned into closed session for the purpose of discussing acquisition of property and personnel items. The Board reconvened into open session without taking any action.

Salary Action:

After proper motion and second, the Board voted to establish the following wages for the period April 1, 2001 to the date of the 2002 Annual Meeting for the named senior level employees:

John Huber	\$167,000
Greg Heitzman	\$120,645
Karla Teasley	\$117,000
Laura Douglas	\$114,941
Bob Miller	\$115,169
Steve Hubbs	\$ 98,017
Jim Wehrle	\$107,375

Report of Committees

Audit Committee Report

Ms. Welsh gave the report for the Audit Committee. Ms. Welsh reported that LWC received an unqualified opinion. Crowe Chizek reported that all interaction with LWC went well. Ms. Welsh stated that she is pleased and impressed with the internal audit function and the report feedback.

Special Issues

Evaluated Bid Pilot Program Report

Mr. Heitzman reported that in November 1999, the Evaluated Bid Pilot Program was approved to be used in the Infrastructure Core Business System. The purpose of this letter is to report the results, and request approval for the expanded use of the pilot in 2001.

In 2000, twelve (12) projects with a combined contract value of \$4.6 million were bid under the pilot program, representing 18.5% of the total contract value opened for bid in 2000. The bidders were evaluated on price (85% weighting), project duration (5%), minority owned business (MBE) utilization (7%), and woman-owned business (WBE) utilization (3%). Nine of the 12 bidders committed to spend \$734,382 with minority businesses and \$164,030 with woman businesses.

To date, \$408,456 has been paid toward the MBE commitment, and \$111,964 has been paid toward the WBE commitment as shown in the attached summary table.

The LWC Minority Business Development Team has monitored the pilot program, conducted a focus group meeting with staff, surveyed external contractors and met with MSD regarding their best practices. The team developed the following recommendations for expanding the pilot in 2001:

- ◆ Clearly define the vision of the minority business development program
- ◆ Establish procedures for the Evaluated Bid Program, from the Pilot Program,
- ◆ that will document, communicate, promote, implement and track evaluated bidding in the future
- ◆ Begin use of the pilot in other Core Business Systems
- ◆ Use the Evaluated Bid Pilot for 30% of the projects opened for bid in the Infrastructure Core Business System
- ◆ Identify adequate resources to administer the Evaluated Bid Program

After proper motion and second, the Board voted to use existing administrative resources in 2001 to continue the pilot, but evaluate additional resource needs for the 2002 budget and expand the pilot program in 2001 as described above.

Bid Tabulations

99-418 Control Systems Upgrade

Mr. Heitzman reported that the Control System upgrade encompasses the system architecture, hardware, and software for operation of the water treatment plants, pumping stations, booster pumping stations, and storage facilities. The existing system is 10-15 years old and is operated with components of limited availability, dated software, and is virtually at full capacity.

Bids were received on Wednesday March 14, 2001 to install 66 programmable logic controllers and 10 operator workstations that make up the SCADA System.

After proper motion and second, the Board voted to award a contract in the amount of \$685,000.00 to the Link Electric Company for the Control Systems Update Project.

99-600 C Install 16-Inch Ductile Iron Water Main in Aiken Road between Bush Farm Road and 12 inch main west of Beckley Station Road

Mr. Heitzman reported that bids were received on Wednesday, March 28, 2001, to install 2,984 +/- lineal feet of 16-inch ductile iron water main. This work will provide a transmission connection between the Aiken Road corridor and the 60" transmission main in English Station Road near Old Henry Road.

Five bids were received from qualified contracting firms. The most responsive bid, based on the evaluated criteria, was Southern Pipeline Construction Company, scoring 98.85 points of possible 100 points.

After proper motion and second the Board voted to authorize the Chief Engineer to award a contract in the amount of \$168,843.00 to Southern Pipeline Construction Company to install water facilities associated with this project.

00-337 I-65 Transmission Main System Hwy 61 Extension-Coopers Run to KY Hwy. 480

Mr. Heitzman reported that bids were received and opened Wednesday, March 28, 2001 to furnish and install 2,827 feet of 16-inch Ductile Iron Pipe and 5,039 feet of 12-inch PVC Pipe in the public right-of-way beginning on the east side of Coopers Run Road Road approximately 600 feet north of the center line of Hwy. 61, and extending north to an existing 12-inch PVC water main on the south side of Hwy.480 just west of I-65

A total of 6 bids were received and opened from pre-qualified contractors. Tom Brown Construction Company submitted the lowest responsive bid in the amount of \$294,348 resulting in a total project cost of \$364,348.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$ 294,348 to Tom Brown Construction Company to install the water facilities associated with this project.

01-13/Courier Service and Mail Management

Mr. Miller reported that on March 28, 2001, bids were opened to award a contract for a one (1) year term, renewable for up to four (4) additional one year terms. Yearly renewals will be based on the Consumer Price Index. (CPI)

After proper motion and second, the Board authorized staff to award a courier service and mail management contract totaling \$51,760.00 from **Blue Grass Mail Service**.

01-16/Fleet Equipment

Mr. Miller reported that on March 28, 2001 bids were opened to purchase fleet equipment.

Bodies and equipment for fleet vehicles

A total of twelve bids were submitted with the lowest, most responsive bids summarized below:

<u>Bidders</u>	<u>Description/Quantity</u>	<u>Total Amount</u>
Fontaine Equipment	26,000 GVW Cab and Chassis (7)	\$111,993.00
	1 ½ Ton Cab and Chassis (1)	\$ 5,865.00
Brandeis Equipment	Skid Mounted Air Compressor (7)	\$ 71,400.00
Manning Equipment	¾ Ton Cab & Chassis (2)	\$ 9,678.00
	Split-shaft PTO Air Compressor (1)	\$ 15,732.00
Levee Lift	4,000 lb. HD Lift Truck (1)	\$ 17,820.00
Edinger & Son	Stake Truck Body: 1 Ton Cab & Chassis (2)	\$ 6,720.00
		\$239,208.00

After proper motion and second, the Board authorized staff to award to the suppliers listed above for a total amount of **\$239,208.00**

01-17/Road and Tire Service

Mr. Miller reported that on March 28th, 2001, bids were opened to award a two-year contract for Road and Tire Service for fleet vehicles.

Two bids were submitted with the lowest, most responsive bid from **Raben Tire Company**, for an estimated total of **\$323,722.80**.

After proper motion and second, the Board authorized staff to award a contract for road and tire service for a total amount of **\$323,722.80** from **Raben Tire Company**.

00-66/Small & Large Meter Vault Frames and Lids

This item was deferred at Mr. Huber’s request.

Communications

County-wide Water Extension Program Dry Ridge Lane: Dry Ridge Road east 1,700 feet

Mr. Heitzman reported that an Apportionment Warrant public hearing was held on February 22, 2001 for the property owners along Dry Ridge Lane from Dry Ridge Road east 1,700 feet. This public hearing was held in response to receipt of a majority petition for the project. The meeting was structured to provide a brief background of the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

Following the formal presentations, an opportunity was provided for residents to ask questions and state their position with respect to their project. None of the attending property owners agreed to proceed with the project at the cost presented. However, the residents expressed interest in a public road dedication through Jefferson County Public Works. A public road dedication would result in a subsidized Apportionment Warrant “equal share” cost per property of \$5450.

As a result of the public hearing, the Louisville Water Company staff agreed to allow additional time for the property owners to complete the application for public road dedication through

Jefferson County Public Works. Jefferson County staff has confirmed that the property owners have initiated the process of public road dedication.

Series 2001 Refunding Bond Issue Results

Mr. Miller reported that the \$60,300,000 Water System Refunding Revenue Bond Issue, Series 2001 dated March 1, 2001 was successfully closed on March 29, 2001.

The aggregate savings totaled \$5,461,679.02 and present value savings (after consideration of all costs of issuance and discounted by the bond interest rate) totaled \$3,910,658.17. This will reduce revenue requirements by approximately \$400,000 each year through 2014.

The principal payment for the 2001 bonds will be \$2,240,000, reduced from \$2,890,000 contemplated for the 2000 bonds. This will result in an increased dividend payment of \$390,000 for 2001.

Old Business

Issuance of Apportionment Warrants per KRS 96.265

Floydsview Place: Echo Trail to end of roadway

Mr. Heitzman reported that a public hearing was held December 9, 1999 for the extension of water service along Floydsview Place: Echo Trail to end of roadway. The Board of Water Works adopted a resolution for Floydsview Place: Echo Trail to end of roadway on March 14, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 9, Series 2000 on April 11, 2000 (a copy of which is attached) for the Floydsview Place: Echo Trail to end of roadway project. The construction contract was awarded to Tom Brown Construction in April, 2000.

After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 2 benefited properties along Floydsview Place: Echo Trail to end of roadway in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265 Ridge Wood Farms:

Crooked Lane, Morris Place, Jolynn Wolf Way, Higgins View Lane, and Higgins Run Way

Mr. Heitzman reported that a public hearing was held April 15, 1999 for the extension of water service along Ridge Wood Farms: Crooked Lane, Morris Place, Jolynn Wolf Way, Higgins View Lane, and Higgins Run Way. The Board of Water Works adopted a resolution for Ridge Wood Farms: Crooked Lane, Morris Place, Jolynn Wolf Way, Higgins View Lane, and Higgins Run Way on May 11, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 20, Series 1999 on July 13, 1999 (a copy of which is attached) for the Ridge Wood Farms: Crooked Lane, Morris Place, Jolynn Wolf Way, Higgins View Lane, and Higgins Run Way project. The construction contract was awarded to WHF, Inc. in November, 1999.

After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 43 benefited properties along Ridge Wood Farms: Crooked Lane, Morris Place, Jolynn Wolf Way, Higgins View Lane, and Higgins Run Way in accordance with KRS. 96.265, as described.

99-LW01-Q – Lawn Maintenance of Louisville Water Company Grounds

Mr. Heitzman reported that on May 19, 1999, the Company entered into a contract in the amount of \$123,599.00 with BladeCutters Lawn & Landscape, Inc. for lawn maintenance services at the following Louisville Water Company locations: B. E. Payne Plant; Crescent Hill Water Treatment Plant; Nineteen (19) elevated Pressure System Sites; and Seventeen (17) City Pressure System Sites. The initial contract period was May 24, 1999 through November 30, 1999, with provisions for renewing the contract for up to two (2) additional years with satisfactory performance. The contract was renewed during contract year April, 1, 2000 through November 30, 2000 for a total cost of \$129,209.

Based on the contractor's satisfactory performance as documented in the Contractor's Performance Evaluation, and the favorable price cited above, staff recommends the contract with BladeCutters be renewed for one year for the period April 1, 2001 through November 30, 2001. The annual lawn maintenance contract will be re-bid in 2001.

After proper motion and second, the Board voted to authorize staff to renew the contract with BladeCutters Lawn & Landscape for the not-to-exceed amount of \$132,433.

99-16/Pipe Repair Couplings, Stainless Steel Sleeves and Bell Joint Clamps - 2001 PPI Renewal

Mr. Heitzman reported that on May 11, 1999, the Board of Water Works approved the recommendation to award a contract for pipe repair couplings, stainless steel sleeves and bell joint clamps to Hughes Supply, Viking Environmental Supply, Smith-Blair and WaterWorks Supplies, Inc. This contract contained a provision that allowed it to be renewed over a four-year period at the sole discretion of the Company. All renewals would use the Producer Price Index to determine any adjustments to the original bid unit prices.

After proper motion and second, the Board voted to authorize staff to renew the contracts with the suppliers listed above for an estimated amount of **\$147,811**. Based on the Producers Price Index, this contract represents a .1% increase for the pipe repair couplings and bell joint clamps and a 1.5% increase for the stainless steel repair sleeves from last year's unit costs. An updated bid tabulation is attached for your review.

New Business

Resolution to Adopt 401(k) Plan

Mr. Wehrle reported that Louisville Water Company currently offers its employees the option to participate in a 457 deferred compensation program through ICMA Retirement Corporation.

The Kentucky Public Employees' Deferred Compensation Authority is authorized under Kentucky Revised Statutes (18A.230-18A.275) to provide administration of tax sheltered supplemental retirement plans for state, public school, university employees and employees of local political subdivisions that have elected to participate.

The addition of the 401(k) plan as a retirement option will allow employees:

More flexibility in accessing their accounts – including loans, withdrawals, and rollovers.

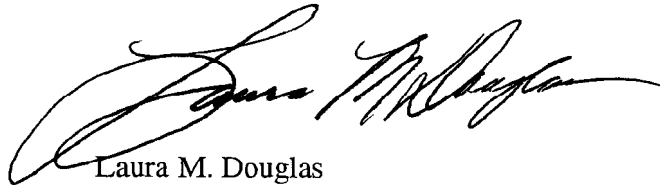

- The option to purchase (with pre-tax dollars) their "5 years" with CERS since the Kentucky Public Employees' Deferred Compensation Authority is a state agency.
- To contribute more dollars annually toward retirement (\$10,500 annual maximum versus \$8,500 afforded under the 457).

After proper motion and second, the Board voted to authorize staff to establish 401(k) Plan II of the KY Deferred Compensation Authority. The meeting adjourned at 3:20 p.m.

CERTIFICATION

This is to certify that the following *Floydsview Place: Echo Trail to end of roadway* is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on April 10, 2001 a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is fluid and cursive, with a long horizontal flourish extending to the right.

ORDINANCE NO. 20
Series 1999

ORDINANCE

Jefferson Fiscal Court

An Ordinance Relating To:

AN ORDINANCE RELATING TO THE AUTHORIZATION FOR THE EXTENSION OF WATER SERVICE TO REAL PROPERTY ALONG MORRIS PLACE: CROOKED LANE WEST 350 FEET, CROOKED LANE: HWY 155 SOUTHWEST 4,500 FEET, JOLYNN WOLF WAY: CROOKED LANE WEST 1,200 FEET, HIGGINS VIEW LANE: CROOKED LANE SOUTHEAST 1,650 FEET, AND HIGGINS RUN WAY: HIGGINS VIEW LANE NORTH 1,000 FEET IN CONFORMITY WITH KRS 96.265.

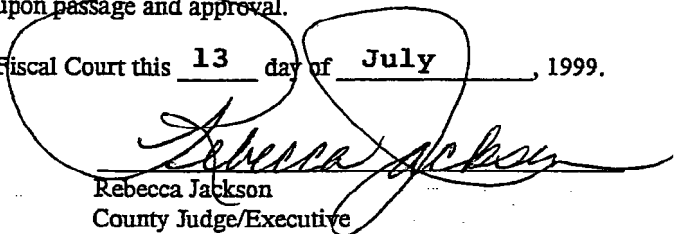

INTRODUCED 6-22-99 BY COUNTY/JUDGE EXECUTIVE REBECCA JACKSON
FIRST READING 6-22-99
SECOND READING 7-13-99
ADOPTED 7-13-99 BY UNANIMOUS VOTE

Section 4. The costs assessed against the benefited property owners for the extension of water service, as evidenced by the apportionment warrants issued in conformity with Sections 2 and 3 of this Ordinance, shall be exclusive of the Louisville Water Company's property service connection charge which shall be fixed by regulation of the Board of Water Works of the City of Louisville based on its experience of costs for such work and in conformity with KRS 96.265 (4). No property owner shall be required to connect to the water line extension but such failure to connect to the water line extension shall not exempt such property owner from its proportionate share of the costs as provided in Sections 2 and 3 of this Ordinance.

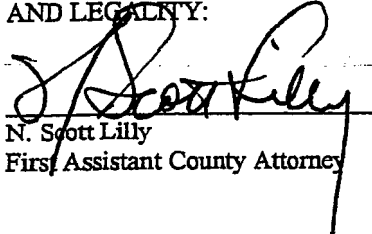

Section 5. To the extent not otherwise stated, this Ordinance and the construction of the water line extension referenced herein is subject in all respects to KRS 96.265 and shall be construed and interpreted in conformity with said statute.

Section 6. This Ordinance takes effect upon passage and approval.

APPROVED AND ADOPTED by the Fiscal Court this 13 day of July, 1999.

Rebecca Jackson
County Judge/Executive

**APPROVED AS TO FORM
AND LEGALITY:**

N. Scott Lilly
First Assistant County Attorney

Mary Bolton
Fiscal Court Clerk

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
May 8, 2001**

Board Members Present

Ms. Wendy Welsh
Mr. Stephen C. Gault
Mr. Stewart Conner
Mr. Jack Segell

Board Members Absent

Mr. Owen Hammons
Mr. Phillip Bond
The Hon. David L. Armstrong, Mayor

Others Present

Mr. John Huber
Mr. Robert Miller, V. P. Treasurer
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Gregory Heitzman, V. P. Chief Engineer
Ms. Karla Teasley
Mr. Steve Hubbs
Mr. Kevin Grant
Ms. Jane Driskell
Ms. Kay Ball
Ms. Barbara Crow

The Board Meeting convened at 12:40 p.m.

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings.
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations)

Project No.	Project Name	Total Project Cost
Developer Installed Refunding Main Extension Projects		
	Bay Tree Section 4 (Project No. 00-105)	\$ 58,410.00

Administrative Report

Mr. Huber stated that this was National Drinking Water week. Ms. Crow indicated that special features would be on WHAS and WAVE. The bottling line will be dedicated on Friday, May 11, 2001. In addition, special activities are planned for The Louisville Zoo.

Financial Report

Mr. Miller gave the financial results through April 2001.

Income and Expense Summary

1) Total operating revenue of \$28,172,800 is \$1,039,300 or 3.83% more than budgeted and \$1,214,500 or 4.51% more than the same period in 2000. We sold 2.58% less water in 2001 than the same period in 2000. Water delivered to the mains was .02% more than 2000.

2) Operation and maintenance expense of \$12,390,300 is \$282,000 or 2.33% more than budgeted and \$919,200 or 8.01% more than 2000.

3) Total non-operating income of \$1,717,400 (line 24) is \$8,700 or 0.51% less than budgeted. Total non-operating expense of \$2,204,900 (line 25) is \$326,300 or 12.89% less than budgeted.

4) Net income of \$8,107,900 (line 26) is \$467,100 or 6.11% more than budgeted and \$894,300 or 9.93% less than 2000.

Mr. Miller indicated that 61.6% of the 2000 Board proceeds, we must spend 1005 by September of 2002. The 2001 Refunding Bonds mature on May 1, 2001. The interest savings on these bonds will be \$951, 000 by year end.

Mr. Miller then distributed a hand out which focused on financial results and the cost reduction plan. The cost reduction plan outlines what the Executive Leadership Team will do to make sure the company meets the budget by the end of the year. The cost reduction plan includes reducing labor costs, reducing consultant and contractor usage, reducing travel expenses, increase focus on capital projects and reduced discretionary spending.

Operating and Engineering Report

Mr. Heitzman presented the Operations and Engineering Report.

Knob Creek Main Extension

In 2000, the Kentucky Turnpike Water District entered into a construction contract with North Star Utility to construct 29,200 feet of 12-inch and 8-inch water main along Knob Creek Road in Bullitt County. To date, approximately 24,800 feet have been installed, and 7,500 feet are in service to Barrellton Hill Road. Through the course of construction, the contractor has not properly restored the property and a large portion of the water main will not pass the water pressure tests. Further, a mechanics lien was filed against the project and several claims were submitted by material suppliers. North Star has not performed work at the site since March 24 and has removed equipment from the site. On April 19, the Company placed the bonding company on notice of our plan to terminate the contract. A meeting was held on April 30 with North Star and Amwest Surety Insurance Company. Amwest and the contractor will be providing a response by May 4, and the Company will make a final decision on contract termination the week of May 7.

Waterford Road Main Extension

On December 12, 2000, the Company awarded a \$82,550 contract to D&G Plumbing and Excavating for construction of 1,530 feet of 6-inch water main in Waterford Road. This project is part of the Jefferson County Extension Program. The contract was signed and a notice to proceed granted on March 6, 2001. In late April, Diane Hillard of D & G contacted Louisville Water Company and advised they could not complete the contract. Staff has placed D & G on notice that the contract will be terminated. This scope of the project will be modified and the project re-bid in the coming weeks.

Bradbee Road NOV

On April 5, Metropolitan Sewer District (MSD) issued the Company a Stop Work Order and a Notice of Violation of the Jefferson County Erosion Prevention and Sediment Control Ordinance. Upon notice to the Company, staff immediately instructed S & S Associates to stop work and begin construction site restoration and establish appropriate erosion protection and sediment control along the streams. MSD inspected the site on Friday, April 6, and lifted the Stop Work Order. There will be no fine to Louisville Water Company. The Company has sent engineers, inspectors, and supervisors to MSD erosion training to understand the impact of the new ordinance and associated BMP's.

Underground Storage Tank NOV

On April 6, the Kentucky Division of Waste Management issued a Notice of Violation to LWC for failure to submit required monitoring documentation on an abandon underground storage fuel tank located at Middletown Distribution Center. This monitoring information has now been submitted.

Mercury Spill

On Friday, April 6, engineers conducted performance testing on hydrants to determine hydraulic flow capacity and pressure loss. The flow measurement methods include the use of a mercury filled manometer to measure pressure differential. During the flow test, the hydrant was inadvertently shut off, resulting in a purging of approximately 1.0 pounds of mercury from the manometer into the hydrant test pit and onto the storage yard surface. The mercury did not enter the public water supply. Staff is evaluating alternative methods to eliminate the long-standing practice of measuring pressure differential with a mercury manometer.

B.E. Payne Plant Expansion

Staff has identified \$15 million of capital construction to expand the B.E. Payne Plant capacity to 60 MGD firm capacity and to improve reliability of the Payne Plant. Limitations on in-house engineering resources will require this work to be outsourced to engineering consultants. Staff is preparing a Request for Proposal (RFP) to solicit proposals from five engineering firms to perform the design and construction administration. The RFP will be issued in May and evaluated during June. A professional service contract will be presented to the Board at the July meeting for approval.

Litigation Report

After proper motion and second, the Board adjourned into closed session for the purpose of discussing litigation and acquisition of property. The Board then resumed its open session meeting without taking any action in closed session.

Report of Committees

Special Issues

Bid Tabulations

99-24/Detector Check Valves & Swing Check Valves - Second PPI Renewal

Mr. Miller reported that on July 13, 1999, the Board of Water Works approved the recommendation to award a contract for detector check valves and swing check valves to Mueller Co. and Harco. This contract contained a provision that allowed it to be renewed over a three-year period at the sole discretion of the Company.

Staff has reviewed the Producer Price Index and based on favorable market conditions, determined it would be in the best interest of the Company to exercise our right to renew the contract. This is the last PPI renewal on this contract.

After proper motion and second, the Board authorized staff to renew the contract with **Mueller Co.** for an estimated amount of **\$116,110** and with **Harco** for an estimated amount of **\$13,188**. Based on the Producers Price Index, the contract represents a 1.6% increase from last year's unit costs.

Pilot Automated Meter Reading System in the KT2 District

Mr. Grant reported on the proposed Automated Meter Reading System Pilot for the former KT2 District. Louisville Water Company currently reads water meters manually. The reader must lift the vault cover, visually read and key in the reading into a hand-held processor. LWC reading process is labor intensive and expensive.

Technology has improved, and recently products have been developed, allowing water meters located in pits to be read via Automated Meter Reading. The following objectives will be accomplished in the KT2 AMR Pilot:

- Improve LWC's knowledge of AMR Technologies and economic benefits.
- Identify, with added value service, AMR Technology brings to operations.
- Validate if RF AMR can work in a Pit environment
- Evaluate and analyze AMR and contract labor, as a competitive alternative, in metering operations.
- Evaluate and analyze RF AMR as a newly developed and expanded workforce competency
- Evaluate RF AMR as a cost effective business strategy to maintain/reduce cost in the process of producing water billings as we strive to achieve our strategic objective of expanding water sales.

The revised project cost is estimated at \$500,000.00. The cash flow analysis indicates that the project will pay for itself in seven years, considering a 5% rate of return present value factor. The cash flow analysis also indicates that the project will save LWC \$750,000.00 over twenty years.

After proper motion and second, the Board voted to authorize staff to proceed with design and advertisement for bid of the KT2 Automated Meter Reading Pilot. Any significant change in project scope or budget, identified during design, will be presented to the Board for review and re-authorization to proceed.

01-11/Cold Water Meters – Competitive Negotiation

Mr. Miller reported that on April 25, 2001, proposals were opened to award a one-year contract, renewable for up to four additional years, for cold water meters.

LWC is now specifying lead-free absolute encoder register meters, which allows for reading meters remotely.

The evaluation criteria for this competitive negotiation was: adherence to technical specifications (mandatory), price (30%), ANSI/NSF certification (20%), ISO 9000 certification (15%), sample evaluation (15%), years of manufacturing/designing encoder type register meters (15%), and service history (5%).

A total of two proposals were received, with the lowest, most responsive proposal from **Schlumberger Resource Management** for an estimated amount of **\$1,255,351**.

After proper motion and second, the Board authorized staff to award a one-year contract, renewable for up to four additional years, to **Schlumberger Resource Management** for an estimated amount of **\$1,255,351**.

01-14/Spoils Recycling

Mr. Miller reported that on April 4, 2001, bids were opened to award a two-year contract for recycling of excavated street materials. This contract is for recycling excavated street materials that may include dirt, sand, stone, backfill, gravel, etc.

A total of three bids were submitted with the lowest, most responsive bids from **Mother Earth Recycling** for an estimated total of **\$229,844**.

After proper motion and second, the Board voted to authorize staff to award a two-year contract totaling an estimated **\$229,844** to **Mother Earth Recycling**.

00-15/PVC Pipe –First PPI Renewal

Mr. Miller reported that on May 16, 2000, the Board of Water Works approved the recommendation to award a contract for PVC pipe to Uponor ETI. This contract contained a provision that allowed it to be renewed over a three-year period at the sole discretion of the Company.

Staff has reviewed the Producer Price Index and based on favorable market conditions, determined it would be in the best interest of the Company to exercise our right to renew the contract.

After proper motion and second, the Board voted to authorize staff to renew the contract with **Uponor ETI** for an estimated amount of **\$1,566,530.00**. This renewal is utilizing the Producers Price Index as a cost adjustment factor.

00-66/Small & Large Meter Vault Frames and Lids

Mr. Miller reported that on February 28, 2001, proposals were opened to award a one-year contract, renewable for up to four additional years, for meter vault frames and lids.

This was procured through competitive negotiation. The Louisville Water Company Materials Specification Team evaluated all proposals and samples. Bids were evaluated based on the following criteria:

Adherence to technical specifications	45%
Quality Assurance	5%
Delivery Schedule	15%

Adherence to Bid Requirements	5%
Price	30%

A total of eight proposals were submitted with the lowest, most responsive proposals from **Bingham & Taylor** for an estimated **\$175,671** and from **General Foundries** for an estimated **\$30,125**.

After proper motion and second, the Board voted to authorize staff to award one-year contracts, renewable for up to four additional years, for an estimated annual total amount of **\$205,796** to **Bingham & Taylor** and **General Foundries**.

01-511 Cannons Lane Main Replacement Project

Mr. Heitzman reported that bids were received and opened Wednesday, April 25, 2001 to install 900 linear feet of 8-inch water main along Cannons Lane between Richard Avenue and Lexington Road. Included with the project are the renewal of 1 fire hydrant and the transfer or renewal of 25 customer services.

A total of six bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$67,433 resulting in a total project cost of \$91,073.

The bid is 14% over the Project Manager’s Estimate. The resulting total unit cost for this project is \$101.19/LF.

After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$67,433 to Southern Pipeline Construction Company to install the water facilities associated with this project.

Communications

Old Business

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Old Heady Road: Routt Road to county boundary

Mr. Heitzman reported that an Apportionment Warrant public hearing was held for Old Heady Road: Routt Road to county boundary. The public hearing was held in response to receipt of a majority petition for this project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains are extended using Apportionment Warrants as prescribed in KRS 96.265. Mr. Bob Miller attended as officer of the company.

An alternate method of extending a water main from the City of Taylorsville to serve five properties from the County boundary towards Dry Ridge Road was suggested. Staff committed to researching this possibility.

After reviewing the water supply proposals from both Louisville Water and Taylorsville, the five property owners unanimously requested water service from Louisville Water Company.

The Apportionment Warrant project is summarized as follows:

- Public Hearing – February 17, 2000 at the Fern Creek Fire Protection District, Station #3
- 12,360 lineal feet of 8-inch water main
- \$594,000 estimated cost

- 39 eligible properties
- 22 affirmative petitioners
- 56% of eligible properties

After proper motion and second, the Board authorized the Chief Engineer to refer the project to Jefferson County Fiscal Court. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to construct the project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Back Run Road: Broad Run Road to Dawson Hill Road

Mr. Miller reported that an Apportionment Warrant public hearing was held for Back Run Road: Broad Run Road to Dawson Hill Road. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

Questions were asked about where the water line was going to be laid and how the Louisville Water Company went about acquiring easements. Staff explained in detail and went over procedures that pertained to this project. From commitments at the public informational meeting, 13 attending property owners advised they were in favor of extension of water service along Back Run Road: Broad Run Road to Dawson Hill Road as proposed at the hearing. The public road Apportionment Warrant project is summarized as follows:

Back Run Road: Broad Run Road to Dawson Hill Road

- Public Hearing – April 5, 2001 – Fern Creek Fire Protection District, Station #3
- 7,808 lineal feet of 12-inch water main
- \$518,000 estimated cost
- 33 eligible properties
- 19 affirmative petitioners
- 58% of eligible properties
- \$5,450 “fair share” per property cost

After proper motion and second, the Board authorized referral of this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

Project 00-549 Crittenden Drive 20” at I-65 Overpass Change Action

Mr. Heitzman reported that on November 17, 2000, the Company entered into a contract in the amount of \$137,700 with MAC Construction and Excavating for the replacement of a 480-foot segment of “deep” 1923-installed 20-inch iron main that has been de-activated since December 1999.

Construction began January 16, 2001 and was completed and placed in service January 31, 2001. During the completion of the project removal of approximately 120 feet of the existing 20-inch main was anticipated to properly install the replacement pipe. Based on billing and inspector records a total of 363 feet was removed. A total extra cost of \$45,980 was incurred, utilizing contract unit prices, to remove 242 feet of existing 20-inch, above that already called for in the plans and specifications.

After proper motion and second, the Board authorized the Chief Engineer to extend the contract with Mac Construction and Excavating to \$183,048.00.

Project 98-660 Ninth Street 48” Transmission Main Change Action

Mr. Heitzman reported that on October 26, 2000, the Company entered into a contract in the amount of \$1,735,000 with Reynolds, Inc. for the replacement of a 1400-foot segment of 48” transmission main in order to accommodate construction of the Ninth Street Extension. Reimbursement of 100% of costs is expected from the Kentucky Transportation Cabinet (KTC). Excavation of the pipeline trench in the intersection of 7th Street and Dumesnil Street was quite extensive to allow a change in direction of the 48” main and avoidance of multiple utilities. KTC was consulted and agreed with utilizing flowable backfill material to virtually eliminate settlement in the intersection. An extra cost of \$14,580 is expected.

As construction began it was discovered that LG&E had installed a new pole very near the end of a planned casing pipe. In order to protect LG&E’s facility the casing was extended. An extra cost of \$3,700 is expected.

The cumulative change exceeds the contract amount by \$98,320 (5.7%).

After proper motion and second, the Board authorized the Chief Engineer to extend the contract with Reynolds, Inc. to \$1,833,320.00.

Project 00-334: I-65 Transmission Main Extension Project Change Action

Mr. Heitzman reported that in June 2000, prior to merger, the Kentucky Turnpike Water District awarded a contracted to Tom Brown Construction Company in the amount of \$556,250.90. The contract amount was later increased, by the District, to \$589,642.45. This amount was presented to the Board of Water Works on December 12, 2000.

Later, at the request of LWC staff, additional work was added to the construction contract. The scope of the changes and their costs are summarized as follows:

◆ Brush and tree removal from easement	\$ 6,400.00
◆ Furnish and install 8” gate valve	\$ 1,250.00
◆ Furnish and install 310 feet of 16” DI water main, valves and fittings and remove an existing pump station	\$43,286.01
<hr/>	
Total cost of change action	\$50,936.01

After proper motion and second, the Board authorized the Chief Engineer to increase the value of the subject contract with Tom Brown Construction Company 8.6 percent from \$589,642.45 to \$640,578.46.

New Business

Bullitt County Water Improvement Program – Construction of Gospel Kingdom Elevated Storage Tank

Mr. Heitzman reported that proposed under the 2001 Capital Budget are funds for construction of storage tanks, booster pump stations, and water main improvements required to support system growth in Bullitt County.

The proposed facility will consist of a 250,000-gallon multi-leg elevated storage tank within a pressure zone at 1030 feet, located on Highway 44 in northwestern Bullitt County, including associated valving, telemetry, landscaping, access, drainage facilities, etc.

The budget for the proposed project is \$450,000. The source of funding for this project is the Bullitt County Water Reserve.

After proper motion and second, the Board authorized staff to proceed with engineering design and advertisement for bid for the subject project. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Project 01-733: Concrete Apron Renovation at Allmond Avenue Distribution Center

Mr. Heitzman reported that proposed under the 2001 Capital Budget is a project to affect renovation of the concrete aprons comprising driving lanes and vehicle, equipment, and materials storage areas at the Allmond Avenue Distribution Center.

The Allmond Distribution Center has been in service since 1967. Many concrete joints are deteriorated and several sections of pavement have spalled and subsided as a result of normal wear and tear of the heavily used facility.

The project will be executed in two phases in 2001 and 2002. The budget for this project is \$300,000, appropriated \$150,000 in 2001 and \$150,000 in 2002.

After proper motion and second, the Board authorized staff to proceed with engineering design and advertisement for bid for the subject project. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Procurement of Professional Services for Project 00-479

Automated Mapping/Facilities Management (AM/FM) System

Mr. Heitzman reported that as a component of the Automated Mapping Facilities Management (AM/FM) Project the Louisville Water Company is requesting Environmental Systems Research Institute, Inc. (ESRI) provide professional consulting and support services related to the development of an AM/FM System in a GIS environment. Recent changes and improvements in the ESRI GIS software require LWC to work closely with ESRI in order to assure successful and effective implementation of the AM/FM system development.

The primary objectives of this phase of the AM/FM project work are:

- 1) to refine and finalize the LWC GIS data model structure prior to requesting proposals from vendors for data collection/conversion.
- 2) to establish quality assurance and quality control (QA/QC) standards which will effectively verify and validate the data collection/conversion deliverables.
- 3) to maximize the performance of the ESRI Spatial Database Engine (SDE) software architecture on the LWC system utilizing LWC's Oracle database.

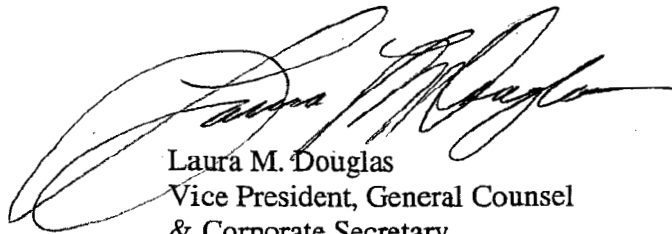

All services requested and proposed are covered under the State of Kentucky Master Purchase Agreement (#99P4182). After proper motion and second, the Board voted to authorize the Chief Engineer to enter into contract with ESRI to perform the above services, in an amount not to exceed \$110,380.

The meeting adjourned at 2:45 p.m.

CERTIFICATION

This is to certify that the following Old Heady Road: Routt Road to county boundary is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on May 8, 2001 a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

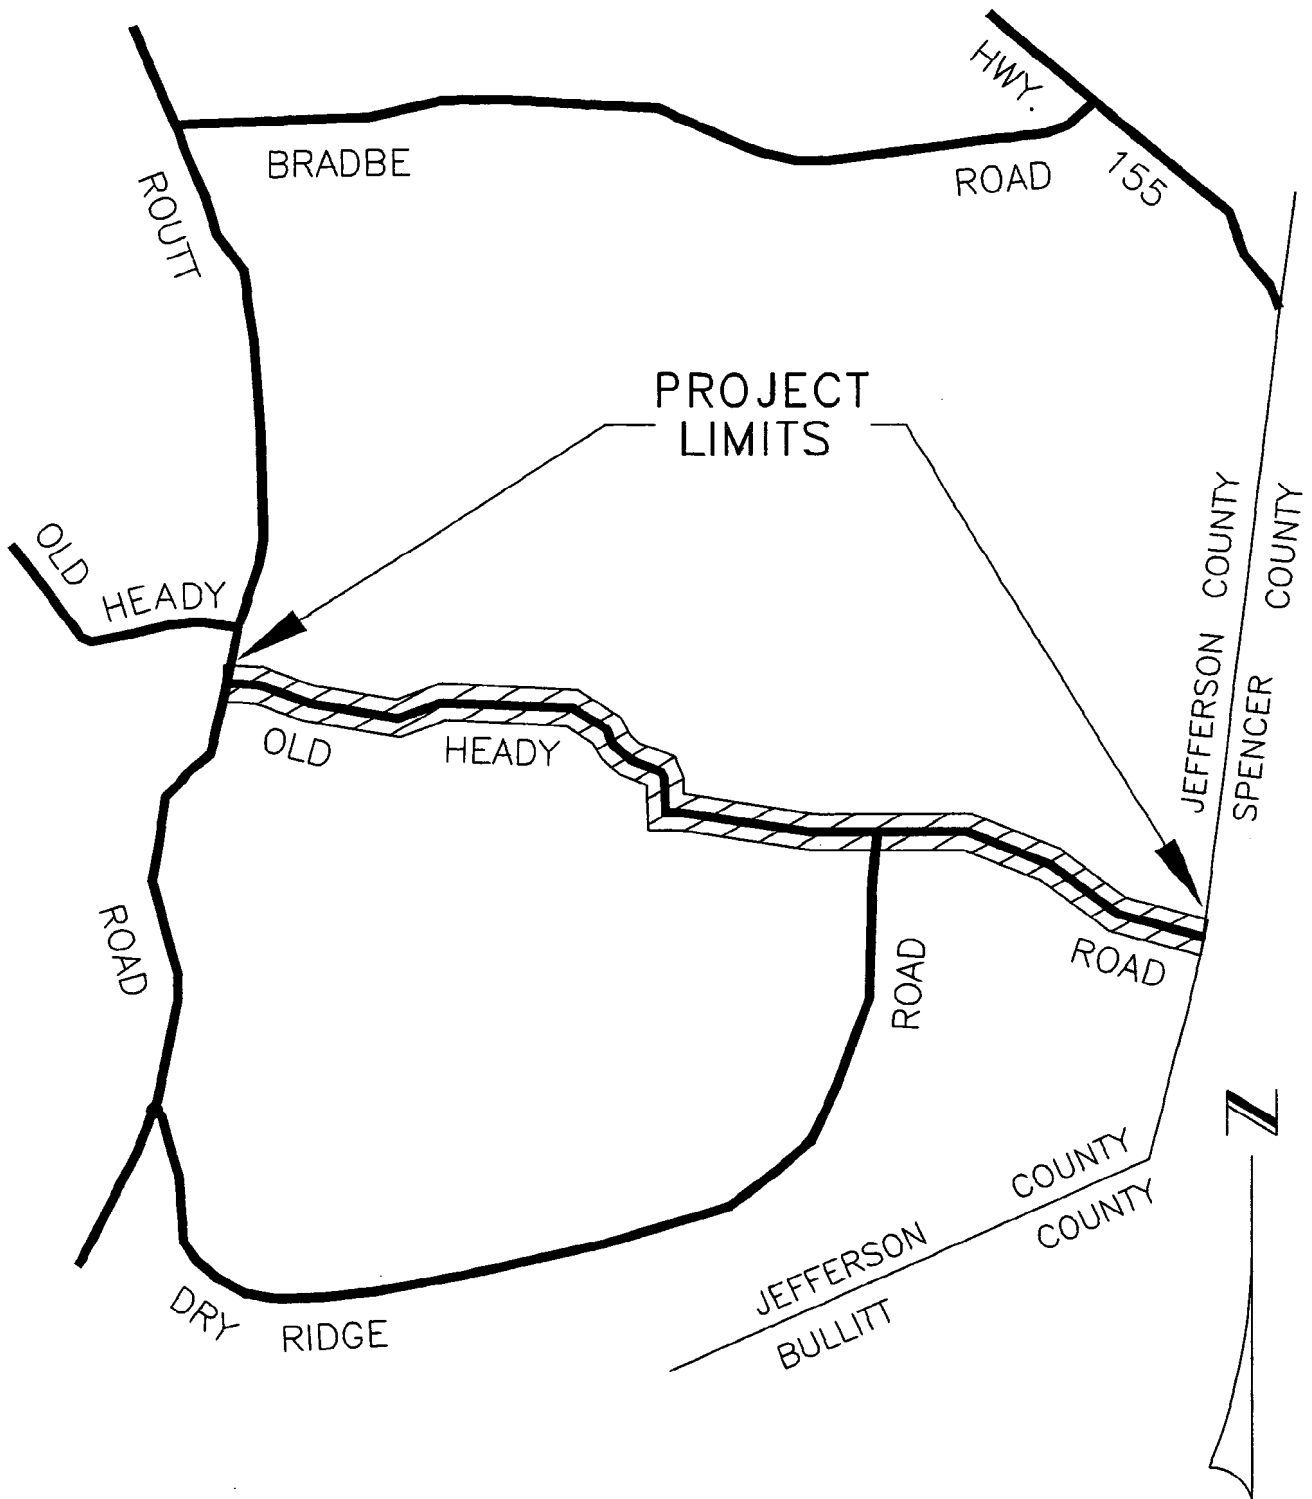

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
April 10, 2001

**Board of Water Works
Resolution**

May 1, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Old Heady Road: Routt Road to county boundary**, a public way in Jefferson County, and acting thereon convened a public hearing on February 17, 2000, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Treasurer of the Company has recommended the extension of such water along **Old Heady Road: Routt Road to county boundary**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Old Heady Road: Routt Road to county boundary**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

ADVERTISED IN THE COURIER JOURNAL
SUNDAY, MARCH 25, 2001

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 98.265, the Louisville Water Company will hold a public hearing for the property owners along Back Run Road: Broad Run Road to Dawson Hill Road (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Back Run Road: Broad Run Road to Dawson Hill Road.

This public hearing will be held on Thursday, April 5, 2001 at 6:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Routt Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 568-3600.

The map shows a network of roads. A thick line indicates the 'PROJECT LIMITS' along Back Run Road from Broad Run Road to Dawson Hill Road. A hatched area below the map is labeled 'PROJECT AREA'. A legend at the bottom of the map shows a hatched box next to the text 'PROJECT AREA'.

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
June 12, 2001**

Board Members Present

Mr. Stephen Gault
Mr. Stewart Conner
Mr. Jack Segell
Mr. Phillip Bond

Board Members Absent

Mr. Owen Hammons
Ms. Wendy Welsh
The Hon. David L. Armstrong, Mayor

Others Present

Mr. John Huber
Mr. Robert Miller, V. P. Treasurer
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Gregory Heitzman, V. P. Chief Engineer
Ms. Karla Teasley
Mr. James Wehrle
Mr. Steve Hubbs
Ms. Kay Ball
Ms. Jane Driskell
Mr. Frank A. Appelfeller, P.E.

The Board Meeting convened at 12:30 p.m.

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings.
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations)

Project No.	Project Name	Total Project Cost

Administrative Report

Mr. Huber reported that he has had several successful meetings with elected officials in Indiana regarding the Aqua Source Transaction. In addition, he has had a successful meeting with the Courier Journal Editorial Board. LWC is now engaged in due diligence. LWC is now meeting weekly with the Reuse Authority. Additional meetings with Southern Indiana elected officials are planned. Mr. Huber indicated that by the August Board meeting, he will be able to do a definitive briefing on how negotiations with Aqua Source are going.

Financial Report

Income and Expense Summary

Mr. Miller reported that:

- 1) Total operating revenue of \$35,530,600 is \$1,722,900 or 5.10% more than budgeted and \$2,048,900 or 6.12% more than the same period in 2000. We sold 1.20% less water in 2001 than the same period in 2000. The percent unaccounted for water was 17.66% through June.
- 2) Operating deductions of \$25,181,700 are \$1,753,900 or 7.49% more than budgeted and \$3,282,900 or 14.99% more than 2000.

Key Breakout Items are:

Water and Fire Service Provided in Lieu of Taxes	\$711,700
Depreciation	\$172,800
Operation and Maintenance Expenses	\$950,900
Legal Expenses	\$ 50,000

- 3) Net operating income of \$10,348,900 is \$30,900 or 0.30% less than budgeted.
- 4) Total non-operating income of \$2,380,400 is \$265,700 or 12.57% more than budgeted. Total non-operating expense of \$2,754,500 is \$410,100 less than budgeted.
- 5) Net income of \$9,974,800 is \$644,800 or 6.91% more than budgeted and \$801,000 or 7.43% less than 2000.

Mr. Miller also reported that the Louisville Water Company issued the Series 2001 Refunding Revenue Bonds in March in order to obtain a significant economic gain, similar to bond refunding transactions that occurred in 1978, 1987 and 1992. The economic gain is reflected on the Income Statement for each year that debt service savings are achieved through lower interest expenses. *The accounting entries for the Series 2001 Refunding Revenue Bonds were recorded in May, reflecting an economic gain from present value savings of \$3,910,658 and an extraordinary accounting loss of \$1,987,837.* This is consistent with the extraordinary accounting losses for 1978 (\$2,531,754), 1987 (\$7,916,411) and 1992 (\$2,506,329). Please note that Extraordinary Items do not affect the computation of the dividend. The dividend for the year is projected at \$12,875,600.

Operating and Engineering Report

Mr. Heitzman presented the Operations and Engineering Report.

Operations and Engineering Report for May 201

Water Pumpage

Mr. Heitzmann reported that pumpage for the month of May set a record with an average day delivery of 138.1 MGD. The five-year average for May is 119.2 MGD.

Ohio River Algae Bloom

From May 4 to May 19, an algae bloom occurred in the river. Algae blooms often contribute to musty taste and odor complaints from customers. The algae blooms also decrease filter

performance by clogging the filters and increasing headloss. Taste and odor levels were greater than 3.0 on the Threshold Odor Number scale. As a precautionary measure, powdered activated carbon was supplied to the reservoir at a 50-pound per million gallon rate.

Kentucky Division of Water Warning Letter

On May 23, the Division of Water issued a Warning Letter to Louisville Water Company for a release of chlorinated water into a stream that supports aquatic life. The chlorine and ammonia levels (less than 2 parts per million) contributed to a fish kill in the stream. The warning is in lieu of a Notice of Violation from the state. Staff is preparing a response to the incident and corrective action for submittal to the Division of Water.

Jefferson County Water Supply Management Council

The Jefferson County Water Supply Management Council met on May 31 to update the Jefferson County Water Supply Plan. The Plan was amended to include the remaining unserved roadways of Jefferson County. This will allow these remaining projects of the County Water Extension Program to be eligible for KIA 2020 Water Service grants from the state. The Council also changed the name of the Council to the Jefferson County Water Management and Planning Council, as required by Senate Bill 409, and appointed Greg Heitzman to be the Council Representative on the KIPDA Regional Water Council.

Middletown Landfill

The Middletown Landfill is currently used by Louisville Water Company crews to dispose of excess dirt from pipeline projects, service installations, and emergency repair activities. From a State perspective, it has been determined that the landfill is classified under the provisions of 401 KAR 47:080 as a "permit-by-rule" site, which allows for on-site disposal of certain classifications of waste without the owner having to make application to the State.

Considering the Jefferson County Ordinance on Erosion Prevention and Sedimentation Control, it has been determined that work will be required on the part of the Company to ensure compliance.

Litigation Report

After proper motion and second, the Board adjourned into closed session for the purpose of discussing litigation and a personnel matter. The Board reconvened into open session without taking any actions.

Report of Committees

Special Issues

Bid Tabulations

00-460/HVAC Improvements for Allmond Distribution Center Meter Shop

Mr. Heitzman reported that bids were received Wednesday, May 16 to install five (5) packaged rooftop HVAC units, including associated ductwork, controls, and electrical system at the Allmond Meter Shop. These units will complete replacement of the HVAC system in the north building of the facility, allowing the present hot water heat and multi-zone air handling systems to be retired. Replacement of these building service systems is recommended in Annual Inspection Reports prepared by CH2M Hill. Five bids were received for this project, ranging \$124,884-\$188,500. After proper motion and second, the Board voted to authorize the Chief

Engineer to award a contract in the amount of \$124,884 to ACCO, Inc. for HVAC Improvements for Allmond Meter Shop.

01-729/Radiant Heat System for Allmond Distribution Center Vehicle Garage

Mr. Heitzman reported that bids were received Wednesday, May 23 to install a natural gas-fired radiant heat system in the Allmond Avenue Garage. This system will replace aging forced-air unit heaters that have experienced continuous failures the past several winters. Five bids were received for this project, ranging \$69,505-\$83,702. The low bid is 27% below the engineer's estimate. After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$69,505 to Ohio Valley Mechanical, Inc. for Allmond Garage Radiant Heat System.

01-720/Southwest Jefferson County Fill Station

Mr. Heitzman reported that bids were received Wednesday, May 23 to install a water fill station on Highway 44 on property leased from Jefferson County government. One bid was received for this project, \$71,891. This bid exceeds the engineer's estimate of \$53,500. In comparison to the Fisherville Fill Station, which totaled approximately \$65,000 to construct, site clearing, earthwork, and roadway area are significantly greater. Based on revenue generated from the Fisherville Station, it is anticipated sales at the Highway 44 location could total up to \$27,000 per annum. After proper second and motion, the Board authorized the Chief Engineer to award a contract in the amount of \$71,891 to Southern Pipeline Construction Co. (CWBE) for Southwest Jefferson County Fill Station.

00-338/Martin Hill Road – KY 44 – Fort Knox Water Main Extension

Mr. Heitzman reported that bids were received Wednesday, May 23, 2001 to install approximately 30,439 lineal feet of 4-inch to 8-inch water main along Highway 44 west, Highway 1417, Downs Lane, East Martin Place, Martin Place, Mt. Eden Road, Mt. Elmira Road, and Hillview Road in Bullitt County. This project will provide water service to the Ft. Knox training facility in southwestern Bullitt County. Seven (7) bids were received from qualified contracting firms. **James Parsons Construction Company** submitted the responsive bid in the amount of \$680,698. After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$680,698 to **James Parsons Construction Company** to install water facilities associated with this project.

01-503/Churchill Downs Area - Main Replacement Project

Mr. Heitzman reported that bids were received and opened Wednesday, May 30, 2001 to install 10,240 linear feet of 6-inch water main in the Churchill Downs Area of south-central Louisville. Included with the project are the renewal or transfer of 19 fire hydrant and 363 customer services. Selection of the Contractor was based upon an evaluation of the bids submitted. A total of 7 bids (6 Base Bids and 1 Alternate) were received and opened from pre-qualified contractors. Tom Brown Construction Company submitted the lowest responsive bid in the amount of \$568,100 resulting in a total project cost of \$792,300. After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$568,100 to Tom Brown Construction Company to install the water facilities associated with this project.

Communications

Transmission Expansion Program; Request for Proposal for Consultant Services

Mr. Heitzman reported that the 2001 Capital Improvement Program identifies transmission projects having a total value of nearly \$40 million to be constructed over the next five years. In assessing the overall transmission needs of the Louisville Water Company system, it has been determined that approximately \$30 million of transmission projects must be out-sourced. This equates to approximately \$3.6 million in consultant design contracts.

Toward this end, staff has prepared a Request for Proposal for Engineering Services (RFP) and will solicit proposals from five consultants within the next 30 days. The five firms are: PDR Engineers; CSA North America; CH2M Hill; PEH Engineers; and Gresham Smith and Partners.

The intent of the RFP is to solicit qualifications, experience and hourly rates for the consultant's key job classifications. LWC staff will then perform a qualifications-based selection based upon the consultant's submittals.

After identifying the firms to be retained, staff will from time to time prepare project-specific scopes of work for the transmission projects to be out-sourced. Each scope of service will be negotiated with one of the selected firms based upon the hourly rates which were previously submitted by that respective firm.

By leveraging the consultant community as described above, staff expects to significantly improve project cycle time and to be much more responsive in completing the necessary back-bone transmission projects required to meet growing system demands.

Cedar Grove Tank and Property Purchase

Mr. Huber added a Communication item concerning the Cedar Grove Tank and Property Purchase.

At the December 2000 Board of Water Works meeting staff recommended, and the Board approved, the purchase of the Cedar Grove Business Park storage tank, property and water mains from the Salt River Development Corporation (Flynn Brothers) for a not-to-exceed price of \$910,000. This purchase was made with the understanding that the final price would be adjusted for fire service fees collected by Salt River Development and final cost adjustments for site improvements. The project budget was established at \$1,212,000.

The original June 15, 2000 lease agreement between KTWD and Salt River Development Corporation provided for an option for the District to purchase the tank and for the Louisville Water Company to purchase the tank if we acquire the assets of KTWD. The Bullitt County Advisory Board has recommended that LWC continue the lease agreement, allowing the cost of the tank to be recovered from future development in the area needing fire protection at \$1,000 per acre fire service fee. They recommend that the funding from Louisville Water Company to purchase the tank could then be used for other improvements in Bullitt County, allowing water rates to be equalized sooner.

Staff has reviewed the lease agreement, met with area developers, and considered the advantages of a continued lease agreement. Although the continued lease is an option, staff recommends that the Company proceed to purchase the tank as recommended and approve by the Board on December 12, 2000. This will allow LWC full management control of the tank and eliminate future fire service fees being assessed in the area by the developer. The purchase agreement is being finalized for execution and closing within 30 days. The tank purchase will be funded from Louisville Water Company's \$5.0 million commitment for the I-65 Transmission system, storage, and pumping as identified in the merger agreement with Kentucky Turnpike Water District.

Old Business

Request for Change Action/Lipps Lane – Main Replacement Project-LWC Project 00-507

Mr. Heitzman reported that on September 14, 2000, the Company entered into a contract in the amount of \$139,220.00 with C-Squared, Inc. for the supply and construction of 3,240 LF of 8-inch HDPE pipe along Lipps Lane and Bates Lane in southern Jefferson County. C-Squared, Inc. started work on this project October 17, 2000. During the completion of this project several

items of work were revised or added to the project at the request and approval of the Project Manager. The cumulative change exceeds the contract amount by \$15,345.00 (11%). Current policies require contract changes that increase the contract amount by more than \$50,000 or 10% to be approved by the Board of Water Works. After proper motion and second, the Board authorized the Chief Engineer to increase the contract amount with C-Squared, Inc. from \$139,220.00 to \$154,565 and to close-out the project.

Request for Change Action/Main Street – Main Replacement Project-LWC Project 00-509

Mr. Heitzman reported that on July 5, 2000, the Company entered into a contract in the amount of \$486,000 with MAC Construction and Excavating, Inc. for the construction of new water mains in Main Street between 1st Street and 6th Street. Included with the project were the transfer or renewal of 14 fire hydrants and 42 customer services. Work on 3rd Street (Main to Washington) and on 4th Street (near the Galt House) was deleted from the contract with MAC Construction and assigned to the Capital Construction crew. The work on 3rd Street has been completed. The work on 4th Street will be completed later this year. Several other items of work were revised. The cumulative change exceeds the contract amount by \$67,716.87 (13.9%). After proper motion and second, the Board authorized the Chief Engineer to increase the contract amount with MAC Construction and Excavating, Inc. from \$486,000.00 to \$553,716.87 and to close-out the project.

Change Action/Upper River Road Water Main Extension-LWC Project No. 96-729

Mr. Heitzman reported that on June 19, 1998, the Louisville Water Company entered into a contract (D884) in the amount of \$87,420.00 with C Square, Inc. for the installation of a 4,900 linear foot 12-inch water main extension along a segment of Upper River Road. Per the Louisville Water Company instruction, the construction was not implemented until easement acquisition was finalized on September 2000. Since the contract was awarded 27 months ago, C Square requested for a readjustment to the original contractual amount (\$87,420) and LWC agreed to a negotiated 5% (\$4,371) increase to the original contracted amount. The cumulative change exceeds the contract amount by \$11,977.00 (13.7%). After proper motion and second, the Board authorized the Chief Engineer to extend the contract with C Square to \$99,397.00.

Amendment of Previous Apportionment Warrant Resolution per KRS 96.265-13100 Rehl Road

Mr. Heitzman reported that the Board approved a resolution for the issuance of Apportionment Warrants for 12405 Rehl Road to 13010 Rehl Road at its July 13, 1999 meeting. At that time, the water main had not been installed in the section fronting 13100 Rehl Road because the needed easement had not been obtained. The Louisville Water Company obtained the easement on this property in July 2000. With the completion of this public water main extension at 13100 Rehl Road, the Board of Water Works is required to issue an Apportionment Warrant against the property assessed in accordance with KRS 96.265. After proper motion and second, the Board voted to amend the July 13, 1999 Resolution as shown on the attached amending resolution for the issuance of an Apportionment Warrant and lien against the benefited property at 13100 Rehl Road in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265-Project 97-572 Dixie Beach Road: Dixie Highway west to end of Private Roadway

Mr. Heitzman reported that an Apportionment Warrant public hearing was held October 30, 1997 for the extension of water service along Dixie Beach Road: Dixie Highway west to end of

Private Roadway. To satisfy the property owner's request for a water main extension project and given the unusual property configurations and ownership patterns along this private roadway, the Louisville Water Company utilized the Apportionment Warrant method of extension identified in KRS 96.265(Section 11), which allows a water extension project by private agreement with superior lien rights. The Board of Water Works adopted a resolution for Dixie Beach Road: Dixie Highway west to end of Private Roadway on July 14, 1998. Due to the unusual property configurations and ownership patterns along this private roadway, the properties that are being assessed are only those properties with houses in which the property owner signed the petition. With the completion of this private water main extension, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. After proper motion and second, the Board voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 10 benefited properties along Dixie Beach Road: Dixie Highway west to end of Private Roadway in accordance with KRS. 96.265(11), as described.

New Business

Declaration of Dividend to City of Louisville

Mr. Huber reported that section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Commissioners of the Sinking Fund an annual dividend on the Louisville Water Company stock owned by the City. The dividend is to be paid in quarterly installments, such payments to be based on estimated annual net income and as nearly equal in amount as possible. The budgeted net income of \$27,582,900 for 2001 requires payment of an annual dividend of \$12,107,000 in quarterly installments of \$3,026,750. The quarterly dividend payment must be increased by \$25,064 to reflect one quarter of the \$100,256 dividend underpayment in 2000. After proper motion and second, the Board voted to adopt a resolution declaring the second quarterly 2001 dividend in the amount of \$3,026,750. This resolution provides for a total quarterly payment of \$3,051,814.

University of Louisville Center for Infrastructure Research

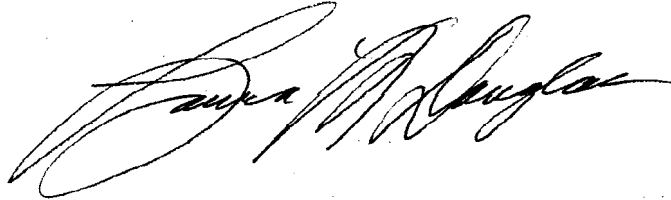

Mr. Huber and Mr. Heitzman reported that urban infrastructure renewal is a growing concern in major metropolitan areas of the United States. Many of the utility infrastructure systems are over 100 years in age, many built prior to the Civil War. In a recent report prepared by the Water Infrastructure Network (WIN), the funding gap for renewing America's water and wastewater systems is \$1.0 billion. A critical component to cost effective infrastructure renewal is the appropriate investment in research and development. In response to this need, Louisville Water Company and the Louisville and Jefferson County Metropolitan Sewer District have been working with the Civil Engineering Department at the University of Louisville's Speed Scientific School to develop a Center for Infrastructure Research (CIR). The Center for Infrastructure Research will be positioned to perform research on aging infrastructure systems in the urban environment and will begin to address the \$1.0 billion water and wastewater needs in the United States. As a major partner, Louisville Water Company and the Metropolitan Sewer District will contribute \$50,000 each for five years, for a total \$250,000 commitment to fund the Center. After proper motion and second, the Board agreed to participate as a major partner in the University of Louisville Center for Infrastructure Research. The \$50,000 membership fee is included in the 2001 Operations budget. The Company would sign an agreement to participate for five years, for a total commitment of \$250,000.

The meeting adjourned at 2:30 p.m.

CERTIFICATION

This is to certify that the following: Rehl Road, 12405 Rehl Road to 13010 Rehl Road to include the property listed in the name of C. Patrick & Janice McGraw, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on June 12, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is fluid and cursive, with a large initial "L" and "D".

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
June 12, 2001

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on July 13, 1999, directing the issuance of Apportionment Warrants against properties located on Rehl Road: 12405 Rehl Road to 13010 Rehl Road to include the following property listed in the name of C. Patrick & Janice McGraw:

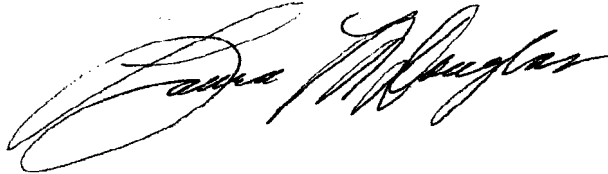

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assessment</u>
AW# 46509019	C. Patrick & Janice McGraw	13100 Rehl Road	\$5,450

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
July 10, 2001**

Board Members Present

Mr. Stewart Conner
Mr. Jack Segell
Mr. Owen Hammons
Mr. Phillip Bond
Ms. Wendy Welsh

Board Members Absent

The Hon. David L. Armstrong, Mayor
Mr. Stephen Gault

Others Present

Mr. John Huber, President
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Robert Miller, V. P. Treasurer
Mr. Gregory Heitzman, V. P. Chief Engineer
Mr. Frank A. Appelfeller, P.E.
Ms. Kay Ball
Mr. Steve Hubbs
Ms. Karla Teasley
Ms. Jane Driskell
Ms. Julie Lampkin, Mindel Scott & Associates

The Board Meeting convened at 12:30 p.m.

A motion was made to approve the consent agenda:

- Approve minutes of previous meetings.
- Approve claims paid during the previous month.
- Approve petitions and applications for water main extensions (when in full compliance with Service Rules and Regulations).

Project No.	Project Name	Total Project Cost

Administrative Report

Mr. Huber gave an oral administrative report. He indicated that the company had instituted a reorganization. Mr. Huber and Mr. Wehrle described the reorganization for the Board. Steve Hubbs has stated his desire to retire in the next few years, so we hope to take full advantage of his expertise while we have the opportunity. Accordingly, Steve has agreed to move into a newly-created position as VP, New Technology. This will allow his operational responsibilities to be assumed by others, who will still have him available for consultation, while he continues his work on the RBI Program and other advanced water treatment technologies. Steve Hubbs' reassignment leaves ten operational systems to be divided between Greg Heitzman and Karla Teasley. This is to be done in a manner intended to give each of them some new areas of career development. When combined with BSO rotation, all of this is to be achieved on January 1, 2002 as follows:

Greg Heitzman's New Core Business System

Lab: Jack Wang (no change at this time)
Plant: Scott Potter
Facilities: Jim Asseff
Distribution Operations: Jim Brammell
Infrastructure Services: Ed Chestnut

Karla Teasley's New Core Business System

Infrastructure Planning: Jim Smith

Distribution Extension: Ralph McCord

Distribution Design & Construction: Steve Cooper (no change at this time)

Customer & Public Info: Susan Camp

Accounting/Billing/Collecting/Service: Kevin Grant (no change at this time)

Mr. Huber also commented about an article in the *Courier Journal* regarding the investment of water utilities into their infrastructure. He indicated that a response article describing LWC's significant investment in infrastructure had been prepared. Mr. Huber also announced that Ms. Rhonda Plunkett has accepted the position of Director of Diversity.

Financial Report

Income and Expense Summary

Mr. Miller gave the financial report. He reported that the owner of Diversified Sheet Metal is his brother-in-law. Page 25 of the claims indicates that the company was paid \$185 for performing work on the exhaust fan at Almond Avenue. Mr. Miller stated that he did not participate in the award of the contract to Diversified Sheet Metal. Mr. Miller reported that:

- 1) Total operating revenue of \$43,815,200 is \$2,427,500 or 5.87% more than budgeted and \$2,333,800 or 5.63% more than the same period in 2000. We sold 2.82% less water in 2001 than the same period in 2000. Water delivered to the mains was 0.42% less than 2000.
- 2) Operation and maintenance expense of \$19,418,300 is \$872,000 or 4.70% more than budgeted and \$1,548,100 or 8.66% more than 2000.
- 3) Operating deductions of \$30,317,400 are \$1,824,000 or 6.40% more than budgeted and \$3,347,600 or 12.41% more than 2000.
- 4) Net operating income of \$13,497,800 is \$603,400 or 4.68% more than budgeted.
- 5) Total non-operating income of \$2,702,700 is \$150,600 or 5.90% more than budgeted. Total non-operating expense of \$3,319,200 is \$477,800 or 12.59% less than budgeted.
- 6) Net income of \$12,881,200 is \$1,232,000 or 10.58% more than budgeted and \$702,700 or 5.17% less than 2000.

Operating and Engineering Report

Mr. Heitzman presented the Operations and Engineering Report.

Production

Pumping for the month of June averaged 139 MGD compared to a five-year average of 136.4 MGD. Year to date pumping is nearly the same as pumping for 2000, and approximately 2 percent above the five-year average.

Water Quality

392 distribution water samples for June yielded 14 positive total coliforms, representing 3.6 percent of the distribution system samples. The maximum level permitted by the Kentucky Division of Water is 5 percent of distribution samples. The warmer source water temperature of 80 degrees contributes to bacterial regrowth in the distribution system, increasing the number of positive sample results. A system wide flushing program has been initiated to address this annual occurrence with the objective to reduce the number of positive sample results. To date, 240 miles of the distribution system has been flushed.

Customer Service and Billing

The call center received 30,383 calls with an abandonment rate of 5.72 percent. Additional staffing in this area has reduced the abandonment rate below the high levels experienced in the second half of 2000. The goal is to reduce this level to fewer than 2 percent. 100 percent of the water bills were processed on time, with an accuracy rate of 99.9 percent.

Distribution Center

Work units accomplished for the year total 13,245 with a backlog of 994, well below the system 2000-year average of 1297. No significant main break activity occurred during the month.

City of Newport Water System

The City of Newport has issued a Request for Proposals to purchase the water system. Staff is monitoring this closely by participating in the RFP process, including site visits and system evaluation.

Bullitt County Advisory Board

The Advisory Board met on June 27 for the second quarter meeting. Financial results were presented along with a summary of the capital projects under design or construction. A meeting summary is provided under communications.

Litigation Report

After proper motion and second, the Board voted to go into closed session for the purpose of discussion litigation and acquisition of property. The Board reconvened into open session without taking any action.

Special Issues

2001 – 2003 Information Technology Strategic Plan Status

Tony Gregory gave the IT Strategic Plan update. The key Information Technology strategies for 2001 – 2003 include:

- Sustain investment in the four Information Technology Architectures:
 1. Information Supply Systems
 2. Technical
 3. Data
 4. Organizational
- Continue re-engineering and replacement of legacy Information Supply Systems to meet changing business and information needs.
- Invest in technologies to provide information to employees, customers, suppliers, and business partners quickly and efficiently, leveraging investment in existing Data and Technical Architectures.
- Design and deploy data marts for decision support and process based management information.
- Invest in continuous training to maintain appropriate skill base and competencies for providing quality products and services to meet the strategic business objectives of the LWC Strategic Plan and associated program plans.

Staff has made significant progress in implementing several of the strategies outlined in the plan within existing budgets and timeframes.

New Business

Mr. Huber and Mr. Heitzman reported on Projects 01-203, 01-204, and 01-205 for CWEP Engineering Service.

Project No. 01-203 Broad Run Road (Back Run Road to Markwell), Markwell Road, and Stout Road/Project No. 01-204 Broad Run Road (7901 Broad Run Road to Fairmount Rd.)/Project No. 01-205 Top Hill Road, Mitchell Hill Road, Goff Lane, Snawder Lane, Easement (Bearcamp Road to Snawder Lane), Easement (Forest Manor House to Mitchell Hill Road), and Bearcamp

This RFP will take the CWEP program through 2003. The evaluation process has been completed for the award of engineering design of approximately 11.8 miles of 6-inch and 8-inch water main in CWEP Area Three. Five (5) qualified consulting firms submitted proposals for RFP One and RFP Two. A cross-functional team evaluated all proposals. The three components included in the evaluation process, Technical Proposal, Interview, and Cost Proposal, were each given 30%, 40%, and 30% weightings, respectively, to produce the total ratings and rankings shown in the attached Table One. Firms invited to participate were: Quest, Mindel-Scott, Khafre, PEH and O'Brien & Gerl. From the evaluations, Quest Engineers Inc. had the highest rating for both RFP projects. Mindel, Scott & Associates, Inc. scored the same rating as Quest Engineers Inc. on RFP One. Based on the one RFP per consultant criteria, Mindel, Scott & Associates, Inc. is recommended to be awarded RFP One in the amount of \$153,981.82 and Quest Engineers Inc. is recommended to be awarded RFP Two in the amount of \$256,750.00. After proper motion and second, the Board voted to authorize the chief Engineer to award two Professional Services. Contracts in the amount of \$153,981.82 to Mindel, Scott & Associates, Inc. for RFP One, and \$256,750.00 to Quest Engineers Inc. for RFP Two for professional engineering services to design CWEP water facilities.

Bid Tabulations

01-509/Maylawn Avenue - Main Replacement Project

Mr. Heitzman reported that bids were received and opened Wednesday, June 20, 2001 to install 890 linear feet of 8-inch water main in Maylawn Avenue between Bradley Avenue and Ellsworth Avenue. Included with the project are the renewal or transfer of 3 fire hydrant and 36 customer services. An alternate bid was accepted to supply and install HDPE pipe. Bids were compared on total project cost since the Alternate Bid included supply of pipe materials. A total of 8 bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$51,600 (Alternate Bid) resulting in a total project cost of \$63,940. The resulting total unit cost for this project is \$71.84/LF. After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$51,600 to Southern Pipeline Construction Company to install the water facilities associated with this project.

99-550/Hidden Creek Lane Water Main Extension Project

Mr. Heitzman reported that bids were received Wednesday, June 20, 2001, to install approximately 3,215 lineal feet of six-inch water main on Hidden Creek Lane from Thixton Lane south 3,215 feet. A total of four bids were received from qualified contracting firms. The low responsive base bid in the amount of \$212,432.00 was submitted by Debbie Sutherland Excavating. This amount, which is 48% greater than the Project Manger's estimate, is due to additional rock removal, road repairs, and erosion control, all exasperated by the extreme field conditions. After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$212,432.00 to Debbie Sutherland Excavating to install water facilities associated with this project.

00-306/Waterford Road Water Main Extension

Mr. Heitzman reported that bids were received Wednesday, June 13, 2001, to install approximately 1,530 lineal feet of 6-inch water main on Waterford Road. This project is identified in the County-Wide Water Extension Program in Extension Area 3. On March 6, 2001, D&G Plumbing & Excavating was awarded the contract for a bid contract amount of \$82,550.00. In late April D&G Plumbing & Excavating advised they could not complete the contract. The BOWW was notified on May 8th and the project was rebid. A total of five bids were received from qualified contracting firms. The low responsive base bid in the amount of \$80,000.00 was submitted by Debbie Sutherland Excavating, Inc. After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$80,000 to Debbie Sutherland Excavating, Inc. to install water facilities associated with this project.

98-673/LaGrange Road 24" Transmission Main and Chamberlain Lane Booster Pump Station.

Mr. Heitzman reported that bids were received and opened Wednesday, June 27, 2001 to furnish and install 510 linear feet of 24-inch Prestressed Concrete Cylinder Pipe and 7,240 linear feet of Ductile Iron Pipe in Chamberlain Lane and Old LaGrange Road. A total of six (6) bids were received and opened from pre-qualified contractors. Peters Contracting submitted the best-evaluated bid having a score of 93.09; the amount of the bid was \$1,251,850 resulting in a total project cost of \$1,551,850. The best-evaluated bid is almost 13% under the Project Manager's Estimate. After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$1,251,850 to Peters Contracting to install the water facilities associated with the project.

01-25/Security Service

Mr. Miller reported that on June 13, 2001, bids were opened to award a three-year contract for security service. This contract is for security related services for the Corporate Headquarters. A total of ten bids were submitted with the lowest, most responsive bid from Jefferson Special Police for an estimated three-year total of \$207,900. After proper motion and second the Board voted to authorize staff to award a three-year contract totaling an estimated \$207,900 to Jefferson Special Police. This bid represents a 10% decrease in unit prices from the previous bid three years ago.

Communications

Bullitt County Advisory Board Meeting Summary

Mr. Heitzman reported that the Bullitt County Advisory Board meeting was held on June 27. A financial summary was provided for the first quarter 2001 activities. The Bullitt County Reserve ended 2000 with a balance of \$2,450,338. A capital project summary was provided to the Advisory Board. Through June 15, \$7.4 million of projects are under design or construction. The Advisory Board was advised of the decision to purchase the Cedar Grove Business Park storage tank and property from the developer (SRDC-Flynn Brothers) with funding provided by LWC's \$5.0 million commitment to build the I-65 Transmission System. Several Advisory Board members voiced their disagreement with our decision to purchase the tank. The Advisory Board was advised of the Company's decision to drop the practice of collecting a \$150 tapping fee from all new customers in KT#1. This practice was reviewed by LWC legal counsel, which concluded this fee should be discontinued since the fee was not established in the District's 1995 tariff approved by the Kentucky Public Service Commission. All fees collected since the merger on September 29, 2000, (approximately \$7,500), will be refunded to customers. The Advisory Board was updated on negotiations with North Nelson Water District for a new wholesale water rate. North Nelson desires the standard LWC wholesale rate of \$1.35 per 1000 gallons, while the Advisory Board recommends a higher wholesale water rate that protects the revenue stream into the Bullitt County Reserve. LWC staff will develop some rate alternatives for the Advisory Board to review, prior to submittal to the North Nelson Water District. The Advisory Board was briefed on a request by Mr. Pat Burke to serve Dreams End Lane and Serene Meadows development along Highway 480. These projects were a subject of a PSC Order in case # 97-323 between Burke Realty and the Kentucky Turnpike Water District. Staff will review the facts of the PSC's final order and determine the course of action necessary to allow Burke to get water to the subject properties.

Old Business

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Scotts Gap Road: End of existing water main to County Line

Mr. Heitzman reported that an Apportionment Warrant public hearing was held for Scotts Gap Road: End of existing water main to County Line. The public hearing was held in response to receipt of a majority petition for this public road project. Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project. This project meets guidelines and recommendations outlined in the Task Force Report and Implementation Plan for County-wide Extension of Water Service. After proper motion and second, the Board voted to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265/Top Hill Road: Snawder Lane to Mitchell Hill Road/Goff Lane: Top Hill Road south 3,000 feet (end of public portion)/Snawder Lane: Top Hill Road south 1,600 feet (end of public portion)/Mitchell Hill Road: From Top Hill Road south 1,100 feet

Mr. Heitzman reported that an Apportionment Warrant public hearing was held for Top Hill Road: Snawder Lane to Mitchell Hill Road, Goff Lane: Top Hill Road south 3,000 feet (end of public portion), Snawder Lane: Top Hill Road south 1,600 feet (end of public portion) and Mitchell Hill Road: From Top Hill Road south 1,100 feet. The public hearing was held in response to receipt of a majority petition for this public road project. Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project. This project meets guidelines and recommendations outlined in the Task Force Report and Implementation Plan for County-wide Extension of Water Service. After proper motion and second, the Board voted to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

Issuance of Apportionment Warrants per KRS 96.265(11)/Upper River Road: Between River Edge Road and Woodside Road/Water Service/LWC Project No. 96-729

Mr. Heitzman reported that the Board of Water Works adopted a resolution for Upper River Road: between River Edge Road and Woodside Road on June 5, 1996 recommending the water service and fire protection extension upon agreement by a 2/3 majority of the residents participation. A public hearing was held August 22, 1996 for the extension of water service and fire protection service along Upper River Road: between River Edge Road and Woodside Road. Subsequently, a 2/3 majority was obtained from the property owners along this route agreeing to pay \$5,450 for water protection service (4 of 5 eligible properties). The construction contract was awarded to C Square in June 1998. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265(11). In accordance with the recommendation cost of the water service, the equal assessment method for each participating petitioner is \$5,450. After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against five (5) benefited properties along Upper River Road: between River Edge Road and Woodside Road in accordance with KRS. 96.265(11), as described.

Issuance of Apportionment Warrants per KRS 96.265(11)/Upper River Road: Between River Edge Road and Woodside Road/Fire Protection Service/LWC Project No. 96-729

The Board of Water Works adopted a resolution for Upper River Road: between River Edge Road and Woodside Road on June 5, 1996 recommending the water service and fire protection extension upon agreement by a 2/3 majority of the residents participation. A public hearing was held August 22, 1996 for the extension of water service and fire protection service along Upper River Road: between River Edge Road and Woodside Road. Subsequently, a 2/3 majority was obtained from the property owners along this route agreeing to pay \$3,000 for fire protection service. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265(11). After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against six (6) benefited properties along Upper River Road: between River Edge Road and Woodside Road in accordance with KRS.

96.265(11), as described. Note that per KRS 96.265(11) only those property owners actually signing the petition will be assessed the \$3,000. Those not signing who later want water will be charged the tapping fee of \$5450.

Project 94-792B, Phase I; Westport Road / I-264 Interchange Mains (Phase I) Change Action

Mr. Huber and Mr. Heitzman reported that on September 29, 2000, the Company entered into a contract in the amount of \$1,170,000 with MAC Construction & Excavating, Inc. to construct the first of two Phases of the Westport Road / I-264 interchange transmission main relocations. Subsequent to the award of this contract the Jefferson County Public Works and the KTC have changed their position with respect to allowing the water main to be installed in Washburn Avenue. As such, the KTC directed the LWC to re-design the layout of the 48-inch discharge main, so as to install it one block to the east of Washburn Avenue, along Fountain Avenue, and to extend it significantly beyond the boundaries of the KTC's interchange roadway project and into the boundaries of the KTC's Washburn Avenue-to-Lyndon Lane roadway project. At the direction of the LWC, MAC has submitted a cost proposal for the entire Phase I project, which includes the re-designed pipeline layout of the 48-inch discharge main. MAC's proposal is in the amount of \$1,574,348.24 which compares favorably with LWC's revised estimate of \$1,629,073. The entire change amount is expected to be reimbursed by the KTC. After proper motion and second, the Board authorized the Chief Engineer to extend the contract with MAC Construction & Excavating, Inc. to \$1,574,348.24 upon receipt of approval from the KTC.

New Business

Paint Crescent Hill Smokestack

Mr. Heitzman reported that the Crescent Hill smokestack, retired from service with retirement of the boilers many years ago, presently serves to support the Company radio repeater antenna, and cellular communications equipment under several lease agreements, generating approximately \$54,000 per annum. Due to corrosion of the surface, it is desired to paint the stack to extend the useful life of the facility and improve the aesthetic quality. The stack was placed into service with construction of the Crescent Hill Boiler House in the early 1900's. The date of last painting is unknown. The scope of work proposes to remove loose coatings and rust only, followed by top coating the resultant spot bare iron and remaining adherent coatings. The estimated project budget to accomplish this work is \$55,000, with a contract estimate of \$45,000. After proper motion and second the Board authorized the Chief Engineer to allocate \$55,000 in unbudgeted capital funds for Painting of the Crescent Hill Smokestack. Contract award recommendation, if in excess of \$50,000, will be presented to the Board at a future meeting.

Bullitt County Water Improvement Program – I-65 Transmission Main System – Hwy. 61 Extension, Project 01-304.

Mr. Heitzman reported that under the 2001 Capital Budget are funds for construction the I-65 Transmission Main System which is required to support system growth in Bullitt County. The proposed project will consist of installation of approximately 11,678 linear feet of 16-inch ductile iron water main along Highway 61 from Highway 245 to Highway 3219 and from Highway 480 to Highway 1494. After proper motion and second, the Board voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project. The results of the bids will be presented to the Board with recommendation for contract award.

Fire Hydrants & Extension Kits – 4th and Final Renewal

Mr. Miller reported that On July 15, 1997, the Board of Water Works approved the recommendation to award a contract for fire hydrants to US Pipe. This contract contained a provision that allowed it to be renewed over a five year period at the sole discretion of the Company. All renewals would use the Producers Price Index to determine any adjustments to the original bid unit prices. Staff has reviewed the Producer Price Index and based on favorable market conditions, determined it would be in the best interest of the Company to exercise our right to renew the contract. After proper motion and second, the Board authorized staff to renew the contract with US Pipe and Foundry for an estimated amount of \$574,466. Based on the Producers Price Index, this contract represents a .1% increase over last year's unit costs.

Capital project 00-418, BEPWTP Expansion and Reliability Improvements

Mr. Heitzman reported that A request for proposal for engineering design and construction services for capital project 00-418, BEPWTP Expansion and Reliability Improvements, was issued May 9, 2001. Proposals were solicited from the following five firms: Arcadis, Black and Veatch, Camp, Dresser and McKee, CH2MHill, and Jordan, Jones and Goulding. The project scope was designed to meet the objective of increasing the capacity of B.E. Payne Water Treatment Plant (BEPWTP) to a firm, reliable 60 MGD in order to service the growth in water sales in the elevated service area. Proposals were received June 6, 2001 from the firms noted above and interviews were conducted the week of June 11, 2001. Consultant evaluations were based on the following criteria:

1. Technical proposal (60%)
2. Interview (20%)
3. MBE/WBE/HBE Utilization (5%)
4. Cost Proposal (15%)

Results of the evaluations indicate Camp, Dresser and McKee had the highest total, combined score resulting from the evaluation process. After proper motion and second, the Board voted to authorize staff to award a Professional Service Contract to Camp Dresser, and McKee for providing engineering design and construction services at a "not to exceed" cost of \$903,229.

The meeting adjourned at 2:45 p.m.

**Board of Water Works
Resolution**

July 10, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Scotts Gap Road: End of existing water main to County Line**, a public way in Jefferson County, and acting thereon convened a public hearing on May 24, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Treasurer of the Company has recommended the extension of such water along **Scotts Gap Road: End of existing water main to County Line**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Scotts Gap Road: End of existing water main to County Line**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA

FILE NAME: SCOTTS GAP RD.

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Scotts Gap Road: End of Existing water main to County Line (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Scotts Gap Road: End of Existing water main to County Line.

This public hearing will be held on Thursday, May 24, 2001 at 6:00 p.m. at the Fairdale Fire Protection District, Station #1, 10015 Mitchell Hill Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

**Board of Water Works
Resolution**

July 10, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Top Hill Road: Snawder Lane to Mitchell Hill Road, Goff Lane: Top Hill Road south 3,000 feet (end of public portion), Snawder Lane: Top Hill Road south 1,600 feet (end of public portion) and Mitchell Hill Road: From Top Hill Road south 1,100 feet** a public way in Jefferson County, and acting thereon convened a public hearing on June 7, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Top Hill Road: Snawder Lane to Mitchell Hill road, Goff Lane: Top Hill Road south 3,000 feet (end of public portion), Snawder Lane: Top Hill Road south 1,600 feet (end of public portion) and Mitchell Hill Road: From Top Hill Road south 1,100 feet** as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Top Hill Road: Snawder Lane to Mitchell Hill Road, Goff Lane: Top Hill Road south 3,000 feet (end of public portion), Snawder Lane: Top Hill Road south 1,600 feet (end of public portion) and Mitchell Hill Road: From Top Hill Road south 1,100 feet** and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Top Hill Road: Snawder Lane to Mitchell Hill Road, Goff Lane: Top Hill Road south 2,000 feet (end of public portion), Snawder Lane: Top Hill Road south 1,200 feet (end of public portion) and Mitchell Hill Road: From Top Hill Road South 1,100 feet (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Top Hill Road: Snawder Lane to Mitchell Hill Road, Goff Lane: Top Hill Road south 2,000 feet (end of public portion), Snawder Lane: Top Hill Road south 1,200 feet (end of public portion) and Mitchell Hill Road: From Top Hill Road south 1,100 feet.

This public hearing will be held on Thursday, June 7, 2001 at 6:00 p.m. at the Fairdale Fire Protection District, Station #1, 10015 Mitchell Hill Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265(11) of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Upper River Road: between River Edge road and Woodside Road** main extension project for fire protection service such warrants to be against be against six (6) benefited properties identified by present ownership and official records set forth on Exhibit A, attached. Each apportionment warrant to be in the principal sum of \$3,000 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months. The President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Mr. Huber asked the Board to remove one item from the consent agenda. The Stonestreet Road & Valley Station Road Intersection Improvement Project will be handled as item C under New Business.

PRESIDENT'S REPORT

Mr. Huber reported that the hot weather did not produce any adverse events for LWC employees working outside. Mr. Huber reported that the women's tapping team won 2nd place nationally. Mr. Huber also stated that the men's and women's team will be going to the state competition. Mr. Huber and Mr. Wehrle introduced Ms. Rhonda Plunkett, the new Diversity Director.

FINANCIAL REPORT

Mr. Miller gave the Income and Expense Summary report as of July, 2001.

- 1) Total operating revenue of \$52,319,300 is \$2,799,800 or 5.65% more than budgeted and \$1,694,000 or 3.35% more than the same period in 2000. We sold 5.15% less water in 2001 than the same period in 2000. Water delivered to the mains was 0.30% less than 2000.
- 2) Operation and maintenance expense of \$22,744,400 is \$708,100 or 3.21% more than budgeted and \$1,690,100 or 8.03% more than 2000.
- 3) Total non-operating income of \$3,068,200 is \$106,700 or 3.60% more than budgeted.

CAPITAL PROJECTS SUMMARY - The capital program as shown on the Capital Projects Summary reflects net expenditures of \$22,065,066 against a budget of \$79,484,167 including noncompleted previous year projects carried forward.

CONSTRUCTION FUND EXPENDITURES - The construction fund from the Series 2000 bond issue was established in September 2000 in the amount of \$78,500,000. Through July 2001 Louisville Water Company has spent \$53,347,288 for 68%.

Mr. Miller reported that as the result of two claims, the company will operate at \$2000,000 over budget for 2001.

OPERATING AND ENGINEERING REPORT

Mr. Heitzman presented the Operations and Engineering Report for July 2001.

WATER QUALITY - The high levels of positive samples during the summer warm water season continued in July. 503 water samples were collected in July, with 14 positive samples and 5 positive re-check samples. One sample was positive for E Coli and a boil water advisory was issued for the area. Subsequent sampling indicated no contamination of the distribution system. New challenges have developed based upon the surface water temperature of the Ohio and low demand.

PARKING GARAGE LEASE WITH PNC – PNC has contacted the Company and requested a modification to the parking garage lease. PNC currently leases 60 day spaces and 40 night spaces from LWC for an annual lease fee of \$51,000. The 5 year lease was originally signed November 26, 1996, and expires October 31, 2001. The original lease allowed three additional 5-year extension terms for a total of 20 years. PNC desires to renew the lease for one year. Staff has negotiated a annual fee of \$67,477 which is \$16,447 or 32 percent higher than the current annual lease fee. This premium is justified due to early termination where LWC will need to find another tenant for the unused parking spaces.

Mr. Heitzman reported that the Route Smart meter reading results will go to customers for the first time in October. This meter reading process is intended to read meters more efficiently.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session in order to discuss litigation, acquisition of property and a personnel item. The Board reconvened into open session without taking any action.

COMMITTEE REPORTS

AUDIT COMMITTEE – Mr. Bond gave the report from the Audit Committee, which was held on July 10, 2001 at 10:45 A.M. The minutes from that Committee meeting are recorded on page 83 of the August 2001 Board book. Mr. Segell suggested that the code of conduct and ethics questionnaire be completed by employees each year. Mr. Huber indicated that he will talk to Roger LeMaster, the Internal Auditor, so that he can make a recommendation regarding questionnaire completion frequency.

COMPENSATION COMMITTEE – Mr. Conner reported on the Compensation Committee meeting that was held on August 14, 2001 at 11:15 A.M. Mr. Conner reported on the proposed 2002 Performance Matrix. He indicated that the Compensation Committee is comfortable with moving forward and adopting the 2002 Performance Matrix as presented in the Committee Meeting. (See the minutes of the August 14, 2001 Compensation Committee behind these minutes in the September, 2001 Board Book). Staff was asked to come back with additional detail for the 2003 Performance Matrix. A matrix for this period was not approved.

SPECIAL ISSUES

STRATEGIC PLAN 2001 MID-YEAR RESULTS – Mr. Miller reported that the Louisville Water Company identifies specific measurable goals for four key constituent areas in the 2001-2005 Strategic Plan:

Customer Satisfaction	Customer Satisfaction Index Overall Customer Satisfaction Index Serviced Accounts Water Rate Changes
Financial Results	Return on Equity Operations and Maintenance Cost per Customer Water Sales Quantity Water Revenue
Employee Quality of Worklife	Human Resources Effectiveness Index Employee Safety Preventable Vehicular Accidents Diversity
Product Quality	Distribution Water Quality <ul style="list-style-type: none"> • Coliform Bacteria • Chlorine Residual • Turbidity

We are pleased to report mid-year results that indicate that the majority of these measurements are on target to achieve their 2001 goals. The increases in Customer Satisfaction are particularly noteworthy. 2 of the 14 measurements will not be taken until later this year. And, the measurement for Operations and Maintenance Cost per Customer is not on target at this time. Specific results include:

Measure	Goal	Result
1. Customer Satisfaction Measures	Increase overall CSI to 875 by 2004.	Mid-year 2001 average = 834.5 . On target
2. Financial Measures	Earn a ROE at a target level of 1% less than the 5-year moving average ROE for the benchmark group of investor-owned utilities. 2001 Target YTD = \$11,649,227.	Net income through June exceeds target \$1,232,999. On target.
	Control increases in O&M cost per metered customer to be no higher than \$160 per customer by 2004. 2001 Target O&M cost per customer: Level 1=\$155.40, Level 2=\$153.85.	Mid-year 2001 O&M cost per customer \$156.29 (12 month moving average at Ji 2001). Not on target.
	Increase water sales to 40 billion gallons by 2004. 2001 Target water sales at 39 billion gallons. 2001 Mid-year target water sales at 17.8 billion gallons.	Mid-year 2001 sales = 18.5 billion gallons. On Target.
	Increase revenue to \$89 million by 2004(in 2004 dollars). 2001 Target operating revenue YTD = \$39,795,900.	Operating revenue YTD = \$41,451,300. On Target.
3. Employee Quality of Worklife Measures	Improve employee perception component of Human Resources Effectiveness Index to 636	Survey to be conducted annually beginning the fall of 2001.

by 2004.

Reduce lost time injury frequency rate to 4.0 by 2004.

Lost time injury frequency rate for mid-y 2001 = 2.9. Actual number of lost time inju for mid-year 2001 = 6.
On target.

Reduce rate of preventable vehicular accidents to 1.0 by 2004.

Actual number of vehicular accidents = 14 Y1
On Target.
Preventable vehicular accident rate Mid-y 2001 = 1.0.

4. Product Quality

Meet annual LWC goals for distribution water quality regarding coliform bacteria, chlorine residual, and turbidity.

- No Coliform Bacteria in 99.0% of samples and no monthly coliform mel violation. ➤ 2001 Mid-year result = 99.4% and monthly coliform mel violation.
On target.
- Chlorine > 0.5 ntu in 99.0% of samples. ➤ 2001 Mid-year results = 99.9%.
On target.
- Turbidity < 0.5 ntu in 99.0% of samples ➤ 2001 Mid-year results = 99.2%
On Target.

BID TABULATIONS

01-07/STONE, SOIL & DELIVERY - Mr. Miller reported that bids were opened to award a two-year contract for stone, soil and delivery. These materials are used as backfill at various LWC job sites. This was an evaluated bid using price, delivery and utilization of M/W/HBE subcontractors as criterion. A total of seven bids were submitted with the lowest, most responsive bids submitted by Earth First and Louisville Topsoil. Staff disqualified KY Transfer Line for failure to submit proposal and acceptance sheet and disqualified Sellersburg Stone for not bidding all stone line items as required in the specifications. After proper motion and second, the Board authorized staff to award a two-year contract, for an estimated \$471,779 to Earth First for stone and a two-year contract estimated at \$8,300 to Louisville Topsoil for soil.

01-30/CONTINGENCY CONTRACT FOR DISTRIBUTION SYSTEM REPAIRS - Mr. Miller reported that the Louisville Water Company solicited bids to perform emergency repairs to the distribution system. This is a contingency contract to be executed by the President, if and when emergency repairs are necessary for the distribution system. Six (6) bids were opened on Wednesday, July 10, 2001. Bids were submitted by: Hall Contracting, James Parsons Construction Company, Miller Pipeline Corporation, Southern Pipeline Construction Company, T & C Contracting, and Tom Brown Construction. This contract shall be in effect for one (1) year, from October 19, 2001 to October 18, 2002, and shall be renewable for one (1) additional year at the sole discretion of the Louisville Water Company. After proper motion and second, the Board voted to authorize the President to award contracts, if and when necessary for emergency repairs to the distribution system. The basis of the award depends upon the Contractor's unit price bid, work history, and availability to perform the specified work at the time of emergency.

01-35 / COPPER TUBING - Mr. Miller reported that on August 1, 2001, bids were opened to award a contract for a six-month supply of copper tubing. Copper tubing is used throughout the distribution system in the installation, renewal and repair of domestic service lines. A total of eight bids were submitted with the lowest, most responsive bid from Plumbers Supply Co. for a total of \$117,126. After proper motion and second, the Board voted to ratify staff's purchase of a six-month supply of copper tubing totaling \$117,126 from Plumbers Supply Co.

01-508/ LIBERTY STREET - MAIN REPLACEMENT PROJECT - Mr. Heitzman reported that bids were received and opened Wednesday, July 18 to install approximately 490 linear feet of 8 and 12-inch ductile iron water main using traditional trenching techniques and to supply and install 1,610 linear feet of 12-inch HDPE water main using static main-bursting techniques in Liberty Street and Brook Street in the Central Business District of Louisville. A total of 4 bids were received and opened from pre-qualified contractors. Portland Utilities Construction Company submitted the lowest responsive bid in the amount of \$197,950 resulting in a total project cost of \$249,450. The bid is 4% over the Project Manager's Estimate. After proper motion and second, the Board authorized the Chief Engineer to award a contract in the amount of \$197,950 to Portland Utilities Construction Company to install the water facilities associated with this project.

BULLITT COUNTY WATER IMPROVEMENT PROGRAM/ PROJECT 01-531: MARTIN HILL ELEVATED WATER STORAGE TANK - Mr. Heitzman reported that bids for the subject water tank were received Wednesday, June 27. The single bid submitted, in the amount of \$546,800, exceeded the engineer's estimate of \$370,000. Review of the engineer's estimate in consideration of a presently high-demand tank market and based on unit steel costs required to construct the facility (instead of capacity-unit basis) determined a revised construction estimate of \$480,000. Upon determining re-bidding offered limited opportunity to improve competition, discussions were held with Caldwell Tanks to review construction items offering cost savings, plus consideration was given to relocating Evergreen elevated water tank. Caldwell proposed an alternative exterior coating system which reduces painting cost by \$42,900, revising the bid price to \$503,900 (coatings life would be reduced from 20 to 18 years). After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$503,900 to Caldwell Tanks, Inc. for construction of Martin Hill Elevated Water Tank, and to increase the total project budget from \$450,000 to \$583,900.

COMMUNICATIONS

2002 ANNUAL BUDGET AND RETURN ON EQUITY TARGET – Mr. Miller reported that Louisville Water Company staff has begun the development of the Preliminary 2002 Annual Budget. During the course of this work, eight key issues have been identified for consideration as the budget is prepared.

Preliminary 2002 Annual Budget Issues

- Chemical usage to produce higher quality finished water
- Contingency fully funded by elimination of vacancy credit
- Business development resources to increase sales
- Customer education resources to improve customer satisfaction
- Compensation scale adjustment to market scale for recruitment and retention
- Facilities management resources to optimize asset lives
- Leadership Institute for manager development
- Address continued underestimate of budget resources

This communication is provided for information only. No action is requested at this time.

2002 Return on Equity Target

Louisville Water Company has established a return on equity target in the Annual Budget to provide the sole stockholder, the City of Louisville, with a reasonable return on invested capital. This target is set at one percent less than the five year moving average returns for a benchmark group of eight investor-owned utilities. The return on equity target recommended to be included in the 2002 Annual Budget has been computed as 9.02%, down from the current year target of 9.13%.

COMPUTER SECURITY AND VIRUS PROTECTION – Mr. Miller reported that computer networks and the Internet have revolutionized how companies utilize computers and information systems to conduct their daily business. However, a higher degree of risk in ensuring information security has emerged as a result of tapping into global communication networks to gain the efficiencies and benefits provided by these systems that presents several challenges to Information Technology managers and staff. Louisville Water Company has developed processes to manage the risk of our computer systems being attacked via the Internet or other public communication networks. The Code Red Worm is an Internet Worm that affects Windows XP/NT/2000 computer systems that are running Internet web server services. Desktop computers and computers with Microsoft Windows 98/95/ME operating systems are not at high risk, since the worm only attacks machines running Internet services generally installed only on servers. The worm uses a popular port (80), which is the standard port for web browsers and web servers. This allows the worm to spread quickly and avoid many firewalls or security scanners since port 80 is generally allowed. Once the worm has infected a computer, it compromises system security, which could allow for an attacker to gain complete control of the victim system. LWC staff have subscribed to a number of information security forums and associations and generally receive timely information regarding such computer viruses, security issues, and steps to minimize risks to the company via local affiliates with the National Infrastructure Protection Center (NIPC). LWC currently maintains eleven Microsoft Windows NT based servers of which eight are vulnerable to the Code Red Worm since they are running web based services for multiple business applications. Microsoft has developed security patches to protect against the worm and staff has installed them on the eight servers at risk. Staff will continue to monitor LWC computer systems and take appropriate actions to protect these valuable resources.

OLD BUSINESS

ACCEPTANCE OF WATER EXTENSION PROJECT AND REFERRAL TO JEFFERSON COUNTY FISCAL COURT PURSUANT TO KRS 96.265/STOUT ROAD: BROAD RUN ROAD TO NORTH 7,800 FEET - Mr. Heitzman reported that An Apportionment Warrant public hearing was held for Stout Road: Broad Run Road to North 7,800 feet. The public hearing was held in response to receipt of a majority petition for this public road project. Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project. From commitments at the public informational meeting, 13 attending property owners advised they were in favor of extension of water service along Stout Road: Broad Run Road to North 7,800 feet as proposed at the hearing. After proper motion and second, the Board determined that the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265 and refers this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

WATER EXTENSION PROJECT PURSUANT TO KRS 96.265/WOLF RUN ROAD: KEYS FERRY ROAD SOUTH 1,700 FEET - Mr. Heitaman reported that an Apportionment Warrant public hearing was held on May 24, 2001 for Wolf Run Road: Keys Ferry Road south 1,700 feet. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265. Questions were asked on how much it would be to run the water lines to the houses, and how much it would cost the property owners at an unsubsidized rate. Staff explained in detail their procedures and the cost amounts pertaining to their questions. At the conclusion of the public hearing, five (5) attending property owners advised they were not in favor of extension of water service along Wolf Run Road: Keys Ferry Road south 1,700 feet as proposed at the hearing. The Vice President – Chief Engineer, recommends the Board of Water Works take no action on this project at this time. The project will be placed on hold until a majority of the property owners desire to proceed with the project. The extension cost will be reevaluated at that time and presented to the property owners for making their decision. No motion was made and no vote was taken by the Board on this matter.

WATER EXTENSION PROJECT PURSUANT TO KRS 96.265/FARMERS WAY (PRIVATE ROADWAY): FAIRMOUNT ROAD TO THE END OF THE ROAD - Mr. Heitzman reported that an Apportionment Warrant public hearing was held on July 13, 2000 for Farmers Way: Fairmount Road to the end of the road. The public hearing was held in response to receipt of a 100% majority petition (3 of 3 properties) for this private road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265. Questions were asked on the costs of the road and what would be done with the trees that ran alongside the road. Questions were also asked on how costs would vary if their road went from private to public. Staff explained in detail and answered all questions accordingly. At the conclusion of the public hearing, the three (3) attending property owners advised they were not in favor of extension of water service along Farmers Way: Fairmount Road to the end of the road as proposed at the hearing. This project does not meet guidelines and recommendations outlined in the Task Force Report and Implementation Plan for County-wide Extension of Water Service. The Vice President - Chief Engineer, recommends the Board of Water Works take no action on this project at this time. The project will be placed on hold until a majority of the property owners desire to proceed with the extension. The extension cost will be reevaluated at that time and presented to the property owners for making their decision. No motion was made and no vote was taken by the Board on this item.

AMENDMENT OF APPORTIONMENT WARRANTS PER KRS 96.265/TAYLORSVILLE ROAD: HWY 155 TO 15903

TAYLORSVILLE ROAD - Mr. Heitzman reported that a public hearing was held March 4, 1999 for the extension of water service along Taylorsville Road: Hwy 148 to Hwy 155 which includes Taylorsville Road: Hwy 155 to 15903 Taylorsville Road. The Board of Water Works adopted a resolution for Taylorsville Road: Hwy 148 to Hwy 155 on March 16, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 14, Series 1999 on April 27, 1999 (a copy of which is attached) for the Taylorsville Road: Hwy 148 to Hwy 155 project. The construction contract was awarded to Reynolds, Inc. in March, 2000. Apportionment Warrants were issued on this project against forty-one (41) benefited properties in accordance with KRS 96.265. Since that time, staff was notified that three (3) parcels had been omitted from the initial assessment. After proper motion and second, the Board voted to adopt an amending resolution for the issuance of Apportionment Warrant and liens against three (3) additional benefited properties along Taylorsville Road: Hwy 155 to 15903 Taylorsville Road in accordance with KRS. 96.265, as described.

PROFESSIONAL SERVICE CONTRACT FOR CONSTRUCTION INSPECTION AND TECHNICIAN SERVICES - Mr. Heitzman reported that a professional service contract with Quest Engineers, Inc. to provide Construction Inspection and Technician Services for the Constructing Capital Improvements Processes was approved by the July 2000 Board. This approval authorized staff to supplement existing LWC in-house inspection forces with Quest Engineers consultant personnel to provide quality assurance and insure adherence to LWC Standard Specifications for work permitted by its pre-approved contractor workforce. After proper motion and second, the Board voted to renew the existing professional service contract with Quest Engineers a second year for the not-to-exceed amount of \$455,058 for Construction Inspection and Technician Services.

TRANSMISSION EXPANSION PROGRAM; EVALUATION OF CONSULTANT PROPOSALS - Mr. Heitzman reported that the 2001 Capital Improvement Program identifies transmission projects having a total value of nearly \$40 million to be constructed over the next five years. By leveraging the consultant community, staff expects to significantly improve project cycle time and to be much more responsive in completing the transmission improvements necessary for the growing Louisville Water Company system. Communication was made to the Board in June 2001 with regard to solicitation of proposals from qualified consultants. Qualifications and unit prices were requested from the consultants to be used as the basis for project specific negotiations. Consultants were evaluated based on predetermined criteria. That criteria included: technical expertise- 50%, references- 10%, interview presentation- 10%, minority and woman owned business utilization- 10%, and project team cost - 20%. The four firms identified for possible use in transmission design were: CHWM Hill, Gresham Smith and Partners, PDR Engineers, Inc., and PEH Engineers, Inc. As projects are identified for possible outsourcing, independent estimates will be developed prior to requesting a cost proposal from the above-mentioned firms. Contracts will be negotiated, based on the unit prices presented in their proposals. Utilization of this method of procurement will be for 1 year, renewable up to 4 additional years for a total of 5 years. After proper motion and second, the Board voted to allow staff to utilize this method of procurement and to proceed with project specific negotiations, as needed, with the consultants identified above. Any contract that exceeds \$50,000 will be submitted to the Board of Water Works for approval.

NEW BUSINESS

PROJECT 98-794C, KNOB CREEK ROAD – BULLITT COUNTY - Mr. Heitzman reported that in 1999, the Kentucky Turnpike Water District asked the Louisville Water Company to design and manage the installation of a water main along Knob Creek Road (Highway 1526/2672) in Bullitt County – KT District #1. Construction contract bids were received by KTWD in February of 2000. The successful bidder was Northstar Utilities with a bid of \$239,700. At the time of merger between KTWD and LWC in the fall of 2000, a revised estimate for construction contract labor was \$265,639. This resulted in a total project estimate of \$811,739. Pursuant to the terms of the contract, a Notice of Termination was issued by LWC. The staff proceeded with plans for the LWC Capital Crews to complete the clean-up and complete the unfinished installation of pipe as designed. The total cost to LWC is \$289,728. Of the \$265,639 construction contract, \$186,000 was paid to the contractor. After proper motion and second, the Board voted to authorize staff to increase the project budget to \$1,021,828. These funds will come from the Bullitt County Reserve.

HURSTBOURNE PARKWAY WATER FACILITIES RELOCATION PROJECT/LWC PROJECT No. 98-668 - Mr. Heitzman reported that water facility relocations are necessary to accommodate the Kentucky Transportation Cabinet's (KTC) project entitled "Hurstbourne Parkway" in Jefferson County. KTC is proposing to extend Hurstbourne Parkway from Bardstown Road to Fern Valley Road. Additional roadway improvements are proposed for portions of Fegenbush Lane, Poplar Level Road, and Fern Valley Road. Existing water facilities within the limits of the project shall be relocated and subsequently extended. The total project cost is estimated to be \$2,175,800, of which engineering/supervision is estimated at \$75,000, materials are estimated at \$615,300, and contract labor is estimated at \$1,485,500. Betterment in the amount of \$846,400 shall be paid to KTC when the project is complete. After proper motion and second, the Board authorized staff to design the distribution water facility relocations and to enter into an agreement with KTC for the construction of the distribution water facility relocations as described above.

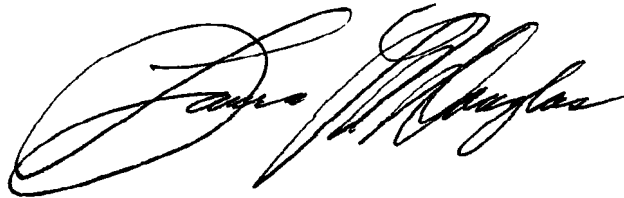

STONESTREET ROAD & VALLEY STATION ROAD INTERSECTION IMPROVEMENTS – SECTION 1/WATER FACILITIES RELOCATION PROJECT/LWC PROJECT No. 01-534 - Mr. Heitzman reported that water facility relocations are necessary to accommodate Jefferson County Public Works' "Stonestreet Road & Valley Station Road Intersection Improvements – Section 1" project in Jefferson County. LWC is utilizing this opportunity with the County to deliver more water to the south side of the Gene Snyder Freeway and to improve fire flow for an elementary school in the area. The total project cost is estimated to be \$167,000, of which engineering/supervision is estimated at \$9,000, materials are estimated at \$18,000, and contract labor is estimated at \$140,000. Betterment in the amount of \$113,000, approximately 68% of the total project costs, shall be paid to Jefferson County Public Works by LWC when the project is completed. After proper motion and second, the Board voted to authorize staff to enter into an agreement with Jefferson County Public Works for the construction of the distribution water facility relocations described above.

The meeting was adjourned at 3:10 p.m.

CERTIFICATION

This is to certify that the following: Stout Road: Broad Run Road to North 7,800 feet, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on August 14, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is fluid and cursive, with a large initial "L" and "D".

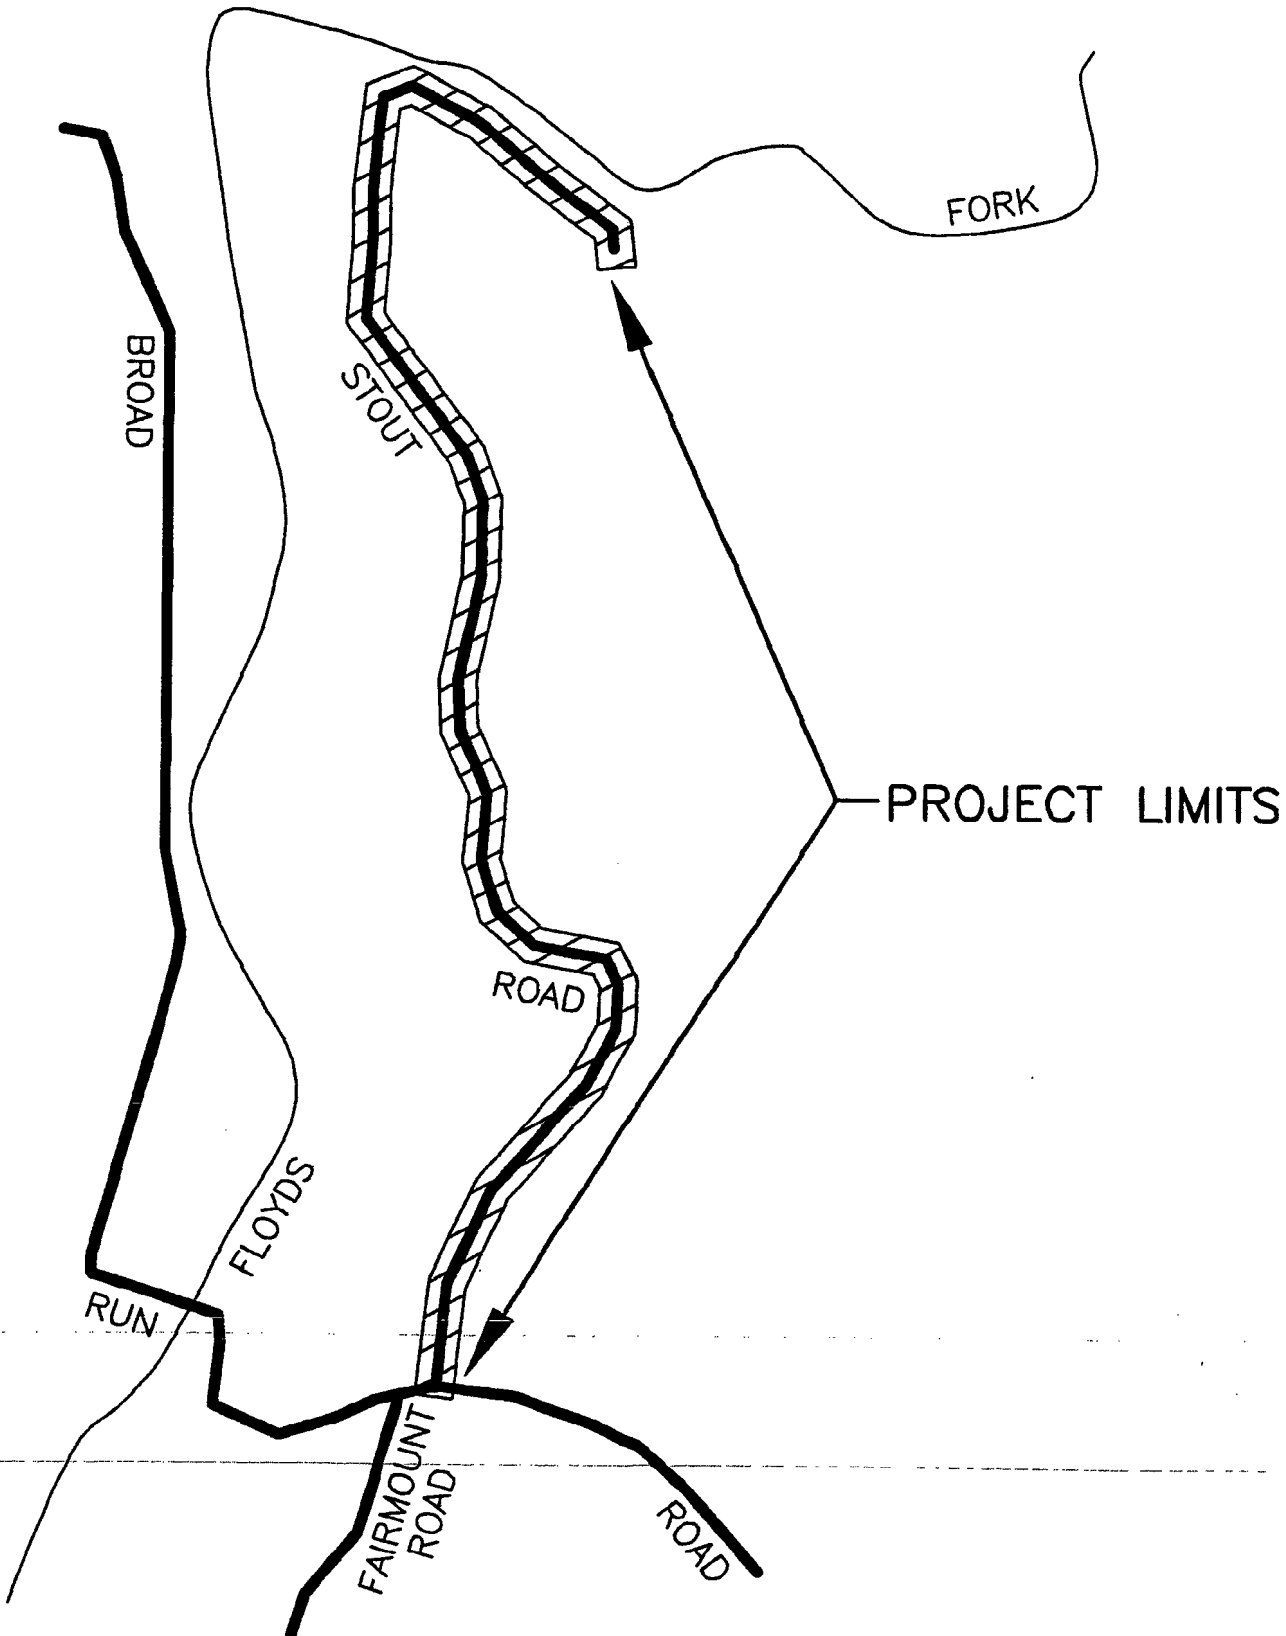

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary
August 14, 2001

**Board of Water Works
Resolution**

August 14, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Stout Road: Broad Run Road to North 7,800**, a public way in Jefferson County, and acting thereon convened a public hearing on July 12, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Stout Road: Broad Run Road to North 7,800 feet**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Stout Road: Broad Run Road to North 7,800 feet**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA

FILE NAME: STOUT RD.

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Stout Road: Broad Run Road to North 7,800 feet (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Stout Road: Broad Run Road to North 7,800 feet.

This public hearing will be held on Thursday, July 12, 2001 at 7:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Routh Road.

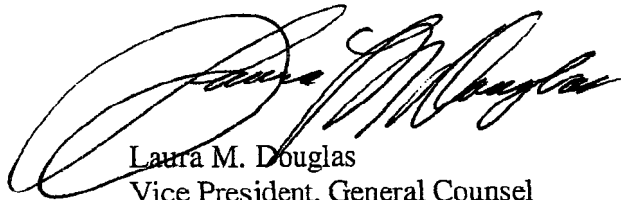

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

CERTIFICATION

This is to certify that the following *Taylorsville Road: Hwy 155 to 15903 Taylorsville Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on August 14, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on March 13, 2001, directing the issuance of Apportionment Warrants against properties located on Taylorsville Road: Hwy 155 to 15903 Taylorsville Road, to add the following properties listed in the names of William & Lisa Allgeier; Chris & Barbara Tharp, John P & Angela M Tucker and James & Julia Bradley:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assesment</u>
AW46511019	William & Lisa Allgeier Chris & Barbara Tharp	15897 Taylorsville Road Deed Book <u>7193</u> , Pg. <u>697</u> Tax Block <u>0049</u> , Lot <u>0003</u>	\$5,450
AW46512019	John P & Angela M Tucker	15899 Taylorsville Road Deed Book <u>7235</u> , Pg. <u>839</u> Tax Block <u>0049</u> , Lot <u>0059</u>	\$5,450
AW46510019	James & Julia Bradley	15901 Taylorsville Road Deed Book <u>5328</u> , Pg. <u>880</u> Tax Block <u>0049</u> , Lot <u>0060</u>	\$5,450

it appearing that such property should have been included in the November 14, 2000 assessment.

LWC 0788

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
September 11, 2001**

Board Members Present

Mr. Phillip Bond
Mr. Jack Segell
Mr. Stephen Gault

Board Members Absent

The Hon. David L. Armstrong, Mayor
Mr. Stewart Conner
Ms. Wendy Welsh
Mr. Owen Hammons

Others Present

Mr. John Huber, President
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Robert Miller, V. P. Treasurer
Mr. Gregory Heitzman, V. P. Chief Engineer
Mr. Frank A. Appelfeller, P.E.
Ms. Kay Ball
Mr. Steve Hubbs
Mr. Brent Russell
Mr. Larry Lenahan

The Board Meeting convened at 12:30 p.m.

Mr. Huber noted that a quorum was not present for the meeting. Per the advice of counsel, Mr. Huber proceeded with the meeting with the intention of seeking a ratification of all action taken at the October 9, 2001 Board Meeting.

Approval of the consent agenda was recommended.

- Minutes of previous meetings.
- Claims paid during the previous month.
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$50,000

Item A: Minutes of Regular Meeting Held **August 14, 2001**
Request: Approve Minutes

Item B: Claims Paid During **August 2001**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

<u>Developer Installed Refunding Projects</u>	<u>Total Project Cost</u>	<u>Net Cost To LWC</u>
Woods of St. Andrews (Project No. 00-097)	\$25,400.00	
Cooper Farms Section 6 (Project No. 00-100)	\$60,785.00	
Wolf Trace Section 3 (Project No. 01-026)	\$100,180.00	
Chieftain Ridge Section 1 (Project No. 01-040)	\$35,760.00	
Memory Place (Project No. 01-049)	\$8,695.00	
Hardwood Forest Subdivision Section 2 (Project No. 01-050)	\$52,395.00	\$11,075.00
Austinwood Place (Project No. 01-062)	\$4,930.00	

<u>Tapping Fee Main Extension Projects</u>	<u>Total Project Cost</u>
East Burnett Avenue (Project No. 01-038)	\$12,300.00
Estelle Court (Project No. 01-063)	\$12,700.00
Leeland Farm Lane (Project No. 01-211)	\$26,970.00

<u>Apportionment Warrant KRS 96.265 Petition</u>	<u>Total Project Cost</u>
Bearcamp Road: End of Extension Water Main to County Line	\$299,200.00

<u>Metropolitan Sewer District Relocation Projects</u>	<u>Total Project Cost</u>	<u>Net Cost To LWC</u>
Woodbark Lane Drainage Improvement Project – Birchwood Wastewater Treatment Plant Elimination Project (Project No. 01-550)	\$15,600.00	
Melody Lane/Cardinal Hill Pump Station Removal and Collector Project (Project No. 01-1409M)	\$15,500.00	\$15,500.00

Item D: Authorization for design and bid of projects (estimated to cost less than \$200,000)

Item E: Bid tabulations (award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid).

Item F: Award of contracts less than \$50,000

Capital Program

<u>Project No.</u>	<u>Project Name</u>

<u>Sole Source</u>	<u>GIS Technician Training ESRI</u>	
<u>Sole Source</u>	<u>Quanti-tray and colilert media for Total Coliform testing IDEXX DISTRIBUTION CORP.</u>	\$49,500.00

ADMINISTRATIVE REPORT

Mr. Huber stated that he would make his comments as individual agenda items were presented. He would not make a separate administrative report.

FINANCIAL REPORT

Mr. Miller gave the Financial Report.

1. Total operating revenue of \$60,988,300 is \$3,289,100 or 5.70% more than budgeted and \$3,083,800 or 5.33% more than the same period in 2000. We sold 2.32% less water in 2001 than the same period in 2000. Water delivered to the mains was 0.20% more than 2000.
2. Operation and maintenance expense of \$25,824,600 is \$626,300 or 2.49% more than budgeted and \$1,363,800 or 5.58% more than 2000.
3. Operating deductions of \$40,866,100 are \$2,130,300 or 5.50% more than budgeted and \$3,884,800 or 10.50% more than 2000.
4. Net operating income of \$20,122,200 is \$1,158,700 or 6.11% more than budgeted.
5. Total non-operating income of \$3,626,600 is \$229,900 or 6.77% more than budgeted.
6. Net income of \$19,248,200 is \$1,951,300 or 11.28% more than budgeted and \$334,700 or 1.71% less than 2000.

The capital program reflects net expenditures of \$23,798,132 against a budget of \$79,484,167 including non-completed previous year projects carried forward.

OPERATIONS AND ENGINEERING REPORT

Mr. Heitzman gave the Operations and Engineering report for August, 2001.

Production

Production for the month averaged 145.4 MGD, slightly less than the August five-year average of 148.7 MGD. Pumpage for the year is 1.2 percent above the five-year average. Although metered consumption is down, the flushing program has contributed to slightly higher pumping levels.

Water Quality

Twelve of the 558 total water quality samples taken during August tested positive for coliform. This 2.1 % rate of positive samples is less than the regulatory target of 5%. There were no positive recheck samples for the month. The southwest service area of the distribution system experienced low chlorine residuals during the month. Lower system demand in the City system contributed to lower chlorine levels in Cardinal Hill Reservoir.

Call Center

The new Customer Information system has been on line for one complete year (since August 2000) and the benefits of the system are beginning to show. The abandonment rate has dropped to a level of 4.36% for August, compared to a 17.4% rate in August 2000.

Distribution Maintenance

August was a typical summer month for repair activity. Mr. Heitzman stated that discretionary O & M work was being placed on hold in order to address budget concerns.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation, acquisition of property and a personnel matter. The Board reconvened into open session without taking any action.

2002-2006 STRATEGIC PLAN

Mr. Miller reported on the update of the 2002-2006 Strategic Plan

The 2002-2006 Strategic Plan has been drafted and is submitted to the Board of Water Works for its approval. This planning document represents an update of the 2001-2005 Strategic Plan and will be used as the basis for the Preliminary 2002 Annual Budget upon approval by the Board. Following is a summary of changes to key items:

Vision, Mission and Values. The vision, mission and values were unchanged.

Assumptions. Three assumptions were added: *No additional borrowing will be needed to fund the capital plan during the next five years; Continuing as an employer of choice will require an appreciation for cultural diversity and an employee base which mirrors the diversity in our community; and Metro government ownership will not change the structure or organization of LWC.*

Strengths, Weaknesses, Opportunities and Threats. The strengths were unchanged. Five weaknesses were removed due to accomplishments during the past year, and six weaknesses were added: *Difficulty in optimizing TQO Principles; Legacy information systems do not support systems-based management structure; Difficulty in recruiting technical and professional personnel; Lack of management training and career development; Gaps in timely execution of the Capital Plan; and, Overspending Operations and Maintenance Budget.* Two opportunities were added: *Full implementation of TQO; and Develop and expand new competencies in the workforce.* No threats were materially changed.

Constituent Goals and Objectives. A water quality goal was added: *Operate the distribution system consistent with the distribution water quality requirements of best management practices within the industry.* The remaining constituent goals and objectives were not materially changed.

Strategy I: Invest in treatment and delivery systems and technologies that deliver a quality of water service proven to assure public health, meet customer expectations, and exceed regulatory standards. This strategy was not materially changed.

Strategy II: Operate the systems and culture of the Company as that of a competitive organization; an organization that centers on the customer's needs and expectation for quality product, service, and value and demonstrates leadership in a competitive marketplace. A new substrategy was added: *Improve Economies of Scale and Benchmarking.*

Strategy III: Increase water revenue by selling more water. This strategy was unchanged.

Strategy IV: Achieve and maintain a high quality of work life as defined in the Next Level Plan II. This is a new strategy, developed to emphasize the importance of employee contributions to the success of Louisville Water Company.

Strategy V: Enhance Customer Satisfaction and achieve best in class customer service by sufficiently resourcing and implementing the Enhancing Customer Satisfaction and Customer Confidence Program Plan. This is also a new strategy, developed to emphasize the importance of customer satisfaction to the success of Louisville Water Company.

Mr. Huber indicated that the Strategic Plan would not be updated again until 2003. A consultant will be used.

The Board indicated through an expression of consensus that they agreed with the updated plan.

BID TABULATIONS

Mr. Heitzman reported on several projects/bids:

99-414B Modifications and Liner Installation for South Basin of Crescent Hill Reservoir -- Bids were received Wednesday, August 22 for rehabilitation of the Crescent Hill Reservoir South Basin. This work will include installation of a flexible membrane liner and stabilization of the basin embankment and concrete drainage structures. The scope of this work was modified after approval by the Board on October 10, 2000 to re-bid the project.

Seven responsive bids were received for this project, ranging \$1,337,000 - \$1,787,830. Bids for this project were evaluated by comparison against established criteria of the base bid, project completion time, MBE participation, and WBE participation (see attachment).

Board members present recommended that the Chief Engineer award a contract in the amount of **\$1,337,000** to **Arnold, Dugan and Meyers Inc.** for Modifications and Liner Installation for South Basin of Crescent Hill Reservoir. This project will begin this fall, since winter weather may require a delay in construction during winter months.

01-502 Chestnut Street Area – Main Replacement Project -- Bids were received and opened Wednesday, August 8, 2001 to install approximately 3,490 linear feet of 8 and 12-inch water main in the Chestnut Street area. A total of 7 bids (4 base and 3 alternate bids) were received from 4 pre-qualified contractors.

Selection of the Contractor was based upon an evaluation of the bids submitted, with weight given to bid amount (85%), completion time (5%), MBE utilization (7%), and WBE utilization (3%). A tabulation of the bids is attached and the project financial summary is provided as follows:

	<u>Budget Estimate of Record</u>	<u>Budget After Bids</u>
Contract Cost	\$239,000	\$282,224.60
Total Project Cost	\$342,000	\$385,224.60

Board members present recommended that the Chief Engineer award a contract in the amount of **\$282,224.60** for the alternate bid to **M&A Construction** to install the water facilities associated with this project.

LWC Contingency Contract No. L-01 Transmission System Emergency Repairs and/or Capital Improvements – Annually the Company solicits bids to perform emergency repairs to the transmission system. Beginning this year with L-01, the annual document will also provide for capital improvement work. This contract can be executed upon authorization by the President, when emergency repair work and/or capital improvement work exceeds the capacity and/or capability of the LWC crews. Five bids were received and opened on Wednesday, August 15. Four local firms submitted a bid for transmission main repair/capital work.

Board members present recommended that the President award contracts, if and when needed, for emergency repair work and/or capital improvement work to the transmission system. The basis of award would be: the Contractor's unit price bid entries, the Contractor's work history, and the Contractor's availability to perform the specified work at the time of the emergency/improvement. Work estimated to exceed the President's authorization level (currently \$50,000) will be presented to the Board for approval.

Mr. Miller and Mr. Hubbs reported on:

01-33 Treatment Chemical Bids -- Bids were received on Wednesday, August 1, 2001 for the annual supply of water treatment chemicals to the Crescent Hill Filter Plant (CHFP) and BE Payne Water Treatment Plant (BEPWTP). Staff recommends contracts be awarded to the best-evaluated bidders identified in the bid process. A recommendation for a contracts supplier of organic polymers cannot be made at this time as evaluation testing, utilizing a new extensive protocol, has yet to be completed.

Based upon annual usage levels anticipated, the recommended contracts for treatment chemicals total \$1,397,295. This amount represents a 7.9% (\$120,183) decrease in costs compared to current contract prices.

Board members present recommended that staff purchase the following chemicals from the bidders indicated:

<u>Chemical Name</u>	<u>Recommended Bidder</u>	<u>2002 Price</u>	<u>2001 Price</u>
Ammonia	HVC, Inc.	\$ 355.00	\$ 335.00
Copper Sulfate	HVC, Inc.*	\$1,118.00	\$1,118.00
Fluoride	Solvay Fluorides	\$ 131.00	\$ 124.00
Liquid Alum	General Chemical*	\$ 150.00	\$ 125.00
Chlorine - Rail Car (CHFP)	HVC, Inc.	\$ 107.00	\$ 239.00
Chlorine - Cylinders (BEPWTP)	HVC, Inc.	\$ 170.00	\$ 280.00
Ferric Chloride	Eaglebrook, Inc	\$ 196.50	\$ 207.00
Lime	Dravo	\$ 72.80	\$ 68.90
Poly Aluminum Chloride	Westwood Chemical Corp.	\$ 460.00	\$ -
Organic Polymers	Under Evaluation	\$ -	\$ 290.00
Potassium Permanganate	Sweetwater Technologies	\$2,664.00	\$2,442.00
Activated Carbon	Acticarb	\$ 604.64	\$ 702.74
Activated Carbon - T&O	Norit Americas, Inc.	\$ 860.00	\$ 900.00
Soda Ash, CHFP	Brenntag Mid-South, Inc.	\$ 165.50	\$ 153.50
Sodium Hydroxide	HVC, Inc.*	\$ 417.08	\$ 225.00
Hydrated Lime	Mississippi Lime*	\$ 100.64	\$ -

Mr. Miller reported on several bids:

01-34 Office Supplies -- On August 29, 2001, bids were opened to award a three-year contract for office supplies. These are supplies that are used company-wide at LWC. A total of four bids were submitted with the lowest, most responsive bid from Corporate Express for a total of \$81,332.01.

Corporate Express is the largest business-to-business supplier in the office products industry with over \$2 million per day in Internet and various forms of EDI transactions.

Board members present recommended that staff award a contract for the purchase of office supplies in the amount of **\$81,332.01** to **Corporate Express**.

01-41/Microsoft Office Site Licenses -- LWC purchased a site license of Microsoft's industry leading desktop office software, MS Office, in 1998. The site license allowed the Company to standardize on a single platform for general office use and meet Year 2000 compliance for our desktop software.

The Microsoft Office desktop software is generally updated on an 18-24 month cycle to take advantage of new and enhanced technology. Staff has identified the need to stay on the current release of our desktop software and the IT Strategic Plan and capital budget have identified this item for update in the 2001 budget year. This project provides funding in the amount of \$60,000 for upgrading our standard desktop software suite to the current, supported version.

On August 29, 2001 bids were opened to purchase Microsoft Office Site Licenses. These licenses allow LWC to own and operate certain software programs as contained in the bid. A total of 12 bids were submitted with the lowest, most responsive bid from Insight Inc. for a total of \$59,062.00.

Board members present recommended that staff purchase Microsoft Office Site Licenses from **Insight Inc.** for a total of **\$59,062.**

COMMUNICATIONS

Mr. Miller discussed 2002 Annual Budget Issues with the Board. This report was presented for information purposes only.

During the course of development of the Preliminary 2002 Annual Budget, the Executive Leadership Team has reviewed the history of performance against the Operations and Maintenance budget. Louisville Water Company has overspent its Operations and Maintenance budget each year since 1994. Following is a summary of findings on the nature of the overspending.

Historical O&M Budget vs. Actual Expenses When financial performance is reviewed on a year-by-year basis, it appears that there have been operations-related issues (such as winter emergency costs, chemical costs for taste and odor problems, claims expense costs) that can explain all or part of the variance. However, when the financial performance as reviewed as a trend over time, it appears that there is a consistent pattern of variance since that time

Water Rates vs. Consumer Price Index A key element of the Strategic Plan is to keep water rate increases at or below the change in the Consumer Price Index. During that same time of overspending the Operations and Maintenance budget, water rates have tracked the CPI closely with the exceptions of 1997 and 1998 when the CPI was less than two percent.

Cost Control vs. Enhanced Organizational Capabilities Louisville Water Company has successfully completed many cost reduction initiatives. These cost reductions have not resulted in budget reductions. Instead, these savings have been reallocated to create new capabilities towards customer and stockholder satisfaction.

Depreciation vs. Infrastructure Replacement Reserve The Infrastructure Replacement Reserve was initiated at Louisville Water in 1993 to provide an additional funding mechanism for supporting the Main Replacement and Rehabilitation Program. This funding concept has been benchmarked by utilities throughout the country. The initial funding was \$600,000 in 1993. The largest incremental increase occurred in 1994, when the Infrastructure Replacement Reserve was increased by \$1,650,000 to a total of \$2,250,000.) During that same year, the Operations and Maintenance budget was increased by only \$57,600.

Funding of 2002 Annual Budget The Executive Leadership Team is currently evaluating the funding requirements for the Preliminary 2002 Operations and Maintenance budget, as well as how the funding requirements will be met. The key issues on evaluating these funding requirements are: providing adequate support for implementation of the strategic plan; capturing cost reductions wherever possible;

keeping water rate changes at or below the CPI; and appropriate adjustments to the Infrastructure Replacement Reserve.

It appears that the underfunding of the Operations and Maintenance budget may date back to 1994 when the preponderance of the water rate increase was used to fund the Infrastructure Replacement Reserve. Since that time; the annual spending has exceeded the budget by approximately \$700,000 to \$750,000 each year. The Executive Leadership Team is contemplating a shift of a like amount of funding from the Infrastructure Replacement Reserve to the Operations and Maintenance Budget in order to provide adequate funding for a more realistic budget.

OLD BUSINESS

Mr. Heitzman reported on several items:

Amendment to Issuance of Apportionment Warrants per KRS 96.265 Project 97-574 Thomas Grove Road: Private Roadway off Oak Grove Road – A request for a water main extension was received in 1997 from the three property owners along a private roadway off Oak Grove Road known as Thomas Grove Road. Due to the unusual property configurations and ownership patterns, and the request of the property owners, application of KRS 96.265(11) was utilized. On January 13, 1998 the Board authorized proceeding with the above project and established a 'not-to-exceed' equal share assessment of \$11,000 per property.

The project was completed by D&G Plumbing and Excavating and on December 14, 1999 the Board of Water Works issued the Apportionment Warrants against the properties assessed in accordance with KRS 96.265 in the amount of \$11,000. The total project cost was \$41,046.56.

After the Apportionment Warrants were issued, the property owners questioned the 'not-to-exceed' cost. An evaluation of the total costs charged to the project revealed three areas where adjustments can be justified. These include material charges for 200 psi pressure class PVC; incorrect contractor and LWC labor charges; and expenses associated with easement plat preparation for a future grid tie to Heritage Estates subdivision.

Board members present recommended that the Apportionment Warrants issued by the Board of Water Works on December 14, 1999 be revised to the amount of \$10,094.93.

Bullitt County Advisory Board – August 31, 2001 Meeting Summary -- The quarterly meeting of the Bullitt County Advisory Board was held on August 31, 2001 at the Bullitt County office. The Advisory Board members attending the meeting were Mr. Larry Hatfield, Mr. George Miller, and Mr. Dan Thibodeaux. Mr. Hatfield was recently appointed by Judge Kenneth Rigdon to serve on the Advisory Board beginning July 1, 2001. The following are key discussion items at the meeting:

- The second quarter financial report was provided to the Advisory Board members. Total income for the second quarter was \$424,664.46, while total expense for the quarter was \$132,331.21. As of June 30, 2001, the Bullitt County Reserve bank balance was \$2,777,895.72. Total debt of the Bullitt County Reserve is \$4,441,880.

- A Capital Project summary was reported, including \$7.5 million under design or construction.
- A summary of the Bullitt County Information meetings on county-wide water service was discussed. Two public information meetings have been held, with attendance of over 500.
- An update on the applications for both Community Development Block Grants and KIA 2020 Water Service Grants was provided. These grants may reduce the connection fee below \$5,450, based on project costs and constraints placed by the funding agency.
- The Board was advised of the vehicle disposition policy, with proceeds from the sale of any vehicles, equipment, or land owned by the District to be deposited into the Bullitt County Reserve.
- A proposal to provide additional water to North Nelson Water District was discussed. North Nelson has requested the LWC wholesale rate of \$1.35 per 1,000 gallons, while the current billing rate is \$1.75 per 1,000 gallons. The Advisory Board desires to protect the existing cash flow from North Nelson into the Bullitt County Reserve.
- An update on the Public Service Commission (PSC) Case 97-323-Burke Realty was provided. Mr. Burke has requested some variations to the requirements of the PSC ruling, specifically related to water service to Dreams End Lane and Serene Meadows. The Advisory Board recommended LWC follow the rulings of the PSC in this matter. Mr. Heitzman summarized the PSC ruling and will meet with Mr. Burke regarding these requirements.

The Advisory Board agreed to establish a regular meeting schedule for the fourth Thursday of the month following the end of the quarter. The next meeting is scheduled for Thursday, October 25, 2001.

The report was advisory only; no Board action was requested.

Project 00-337, I-65 Transmission Main System, Bullitt County; Highway 61 – Coopers Run to Highway 480 – On April 25, 2001, a contract was awarded to Tom Brown Construction Co. in the amount of \$294,348 for the above project. Since then, two change actions have been added to this project. The second has resulted in the total cost of these changes to exceed 10% of the original contract.

Board members present recommended that the Chief Engineer increase the contract amount for Project 00-337 by \$30,204.00 for a new contract amount of \$324,552.00. These funds will come from the \$5.0 million committed to the I-65 Transmission Main System in the KT Merger Agreement and a \$100,000 Community Development grant issued to Bullitt County to supply water to the new County Corrections Facility.

NEW BUSINESS

Mr. Miller reported on: **Declaration of Dividend to the City of Louisville** -- Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the

Commissioners of the Sinking Fund an annual dividend on the Louisville Water Company stock owned by the City.

Board members present recommended that a third quarter 2001 dividend in the amount of \$3,026,750 be given to the owner and a resolution so stating be adopted.

Apple Patch Community, Inc. Property, Tank – Mr. Heitzman requested approval to purchase property for the future construction of a new elevated storage tank on Hwy. 329 in Oldham County, KY. Construction of the tank will improve the system pressure and flow in the 940 pressure zone serving Oldham County.

Staff has been involved in negotiations with a number of property owners along Hwy. 329 in an attempt to locate a parcel that meets both the size and elevation requirements.

An offer was made to purchase a 1.42 (+/-) acre tract and necessary easements located in Oldham County, KY for the sum of \$68,760. In addition, the chief engineer authorized \$5,000 reimbursement for engineering costs associated with the redesign of their retention basin to accommodate storage overflow volume. The offer of purchase requires:

1. a clear title examination and/or survey to determine there are no restrictions, easements, or regulations that will inhibit the intended use
2. an environmental audit to determine the property is free of hazardous or toxic substances
3. a geo-technical survey and core drillings to determine the property is suitable for the purchaser's intended use
4. an appraisal to confirm the property value
5. a survey and mapping of the property to confirm there are no encroachments
6. approval of the purchase by the LWC BOWW

Board members present recommended that staff purchase land and easements owned by Apple Patch Community Inc. for the purpose of constructing an elevated storage tank on Hwy. 329 in Oldham County, KY and that engineering fees incurred by the property owner for design of the retention basin be approved.

Mr. Heitzman reported on: **Gilmore Lane Water Facilities Relocation Project LWC Project 01-555 –** Water facility relocations are necessary to accommodate Jefferson County Public Work's "Gilmore Lane Road Improvements" project in Jefferson County. Approximately 1,370 l.f. of 8" DIWM shall be relocated on Gilmore Land and about 128 l.f. of 6" DIWM on adjoining streets. Also, three (3) fire hydrants shall be relocated along with 83 5/8"-3/4" domestic services and four (4) larger services. Staff intends to joint bid this project with the County. A sketch of the project is attached for reference purposes.

The total project cost is estimated to be \$220,000, of which engineering/supervision is estimated at \$11,000, materials are estimated at \$31,000, and contract labor is estimated at \$178,000. This project is being federally funded therefore LWC shall be fully reimbursed for all water facility relocation costs. The net cost to the LWC shall be \$0.

Board members present recommended that staff design the Gilmore Lane distribution water facility relocations and enter into an agreement with Jefferson County Public Works for the construction of the distribution water facility relocations as described above.

Mr. Heitzman and Mr. Appelfeller reported on: **2001 Annual Inspection** -- In May of 2001, the Board of Water Works authorized engineering consultants Black & Veatch to perform the 2001 Annual Inspection Report on the Adequacy and Condition of the Water Works System. Professional services provided by the consultant included an inspection and review of the water works system as required by the Water System Revenue Bond Resolution, Series 1992, Article IV, Section 612.

Board members present recommended that the 2001 Annual Inspection Report be accepted and filed with the Board Trustees. The 2001 Annual Inspection Report, furnished by Black and Veatch, has been included in its entirety with the Board Secretary's original minutes.

Mr. Miller reported on: **Property & Casualty Insurance** -- The Louisville Water Co. policies for excess utility liability, excess workers' compensation, blanket property and crime insurance will expire September 30. Because of rate guarantees negotiated in the past two years, we will review our excess liability and excess workers' compensation policies with the incumbent carriers. The actual premiums may show slight increases due to an increase in our payroll upon which the premiums are based.

Board members present recommended that staff renew LWC's excess liability policy with AIG at an estimated annual premium of \$160,000. This policy provides \$35 million in coverage in excess over our \$500,000 self-insured retention.

The property insurance market has hardened dramatically with 30% - 40% premium increases being the norm for even highly-protected risks. Our broker is continuing to negotiate with several insurance carriers at this time including the incumbent, Allianz, with whom we are in the final year of a rate guarantee. Allianz currently provides policy limits of \$154 million at an annual premium of \$57,828.

Board members present recommended that staff accept the best combination of coverage and price up to an estimated annual premium of \$75,000. The matter, when acted on, will be brought back to the Board for ratification.

The annual premiums for our excess workers' compensation and crime insurance policies are below values requiring Board approval. We intend to renew the workers' compensation coverage at an annual premium of approximately \$15,000 and the crime insurance coverage at an annual premium of approximately \$1,700.

The meeting was adjourned at 3:15 p.m.

Contractor Bid - The lump sum base bid amount presented in the Bidders Proposal for this project.

Completion Time - The completion days as presented in the bidders proposal.

Certified MBE Utilization % - The percent of the lump sum base bid designated as subcontractor(s) with Certified Minority Business Enterprises. (Maximum 15% used in calculation)

Certified WBE Utilization % - The percent of the lump sum base bid designated as subcontractor(s) with Certified Women Business Enterprises. (Maximum 5% used in calculation)

**RESOLUTION TO DECLARE THIRD QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 13, 2001 to adjust the 2000 annual dividend by \$100,256 from \$12,776,425 to \$12,876,681, the difference to be added in equal quarterly installments to the quarterly 2001 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2001 Louisville Water Company budget contemplates the 2001 annual dividend to be \$12,107,000 it would be in order at this time to declare a regular second quarter dividend of \$3,026,750.

RESOLVED, the regular third quarter 2001 dividend of \$3,026,750 is hereby declared.

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,051,814 to the Louisville and Jefferson County Revenue Commission on September 28, 2001, this being the second quarterly dividend for 2001 plus one quarter of the dividend adjustment for 2000, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
October 9, 2001**

Board Members Present

Mr. Phillip Bond
Mr. Jack Segell
Mr. Stephen Gault
Ms. Wendy Welsh
Mr. Stewart Connor

Board Members Absent

The Hon. David L. Armstrong, Mayor
Mr. Owen Hammons

Others Present

Mr. John Huber, President
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Robert Miller, V. P. Treasurer
Mr. Gregory Heitzman, V. P. Chief Engineer
Mr. Frank A. Appelfeller, P.E.
Ms. Karla Teasley
Mr. Steve Hubbs
Mr. Jim Wehrle
Ms. Jane Driskell, Deputy Mayor
Mr. Don McKay

The Board Meeting convened at 12:30 p.m.

Mr. Huber opened the meeting by asking for a motion to ratify all action taken by Board members present at the September 11, 2001 meeting. After proper motion and second, the Board agreed to ratify all action taken on September 11, 2001 by the Board members present.

Approval of the consent agenda was recommended.

- Minutes of previous meetings.
- Claims paid during the previous month.
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$50,000

Item A: Minutes of Regular Meeting Held **September 11, 2001**
Request: Approve Minutes

Item B: Claims Paid During **September, 2001**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

ADMINISTRATIVE REPORT

Mr. Huber reported that Scott Potter has left LWC to direct water and wastewater services for Nashville.

FINANCIAL REPORT

Mr. Miller reported on the Income and Expense Summary for the month of September.

- 1) Total operating revenue of \$69,883,800 is \$3,539,400 or 5.34% more than budgeted and \$3,704,300 or 5.60% more than the same period in 2000. We sold 1.61% less water in 2001 than the same period in 2000. Water delivered to the mains was 0.31% more than 2000.
- 2) Operation and maintenance expense of \$28,853,000 is \$485,600 or 1.71% more than budgeted and \$1,815,700 or 6.72% more than 2000.
- 3) Net operating income of \$24,039,500 is \$1,428,300 or 6.32% more than budgeted.
- 4) Net income of \$23,052,500 is \$2,269,800 or 10.92% more than budgeted and \$396,200 or 1.69% less than 2000.

OPERATIONS AND ENGINEERING REPORT

Mr. Heitzman gave the Operations and Engineering Report for September 2001.

Production and Water Quality

Production for September averaged 131.8 MGD, significantly lower than the five-year September average of 143.3 MGD. September 1998 and 1999 were dry periods with high demands on the system compared to the wet months of September 2000 and 2001. During September, 425 distribution water quality samples were analyzed. Ten samples tested positive for coliform and two recheck samples tested positive for coliform. Subsequent water sampling in the area indicated no contamination of the system and a boil water advisory was not issued.

Distribution System

Main breaks were up slightly during the month of September with 66 main breaks repaired compared to 27 in September 2000.

Call Center

The call abandonment rate for September was 5.03 percent compared to 24.5 percent in September 2000. This reduction is attributed to full staffing in the call center and one year of experience with the new Customer Information System. The (IVR) System went on line Monday, September 24, 2001. In the first week of implementation, the IVR processed an overall average of 16 percent (973) of completed incoming calls (6,180). The call abandonment rate for the week was 3.1 percent.

Customer Satisfaction Index

The third quarter total Customer Satisfaction Index (CSI) score reflected an increase of two points to 845, or 0.24 percent. The third quarter score for Service Accounts decreased nine points to 785, or 1.13 percent. The 2001, average (838) total CSI score is 13 points above the Level II Executive/BSO Incentive

Award Goal of 825. The 2001 average (779) Service Accounts score is nine points above the Level III Corporate Performance Award Goal of 770.

System Security

In light of terrorist attacks on the World Trade Center, Risk Management is performing a system-wide risk assessment of all Louisville Water Company facilities. The President has issued Emergency Response Level I, which places all employees on alert and provides additional levels of security at production facilities and critical remote storage and pumping facilities. Daily water samples are being tested to assure water quality. Distribution system chlorine levels have been raised as a precautionary measure. The Company has engaged additional security guards to monitor key facilities. Public access has been restricted to production facilities and reservoirs. Plant tours have been suspended until further notice. We are working closely with the Emergency Management Agency to coordinate local efforts to prevent, monitor, and detect any unusual activities in the community.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation and a personnel matter. The Board reconvened into open session without taking any action.

SPECIAL ISSUES

Preliminary 2002 annual Budget-File with Trustees and the City of Louisville

Mr. Miller presented the Preliminary 2002 Annual Budget to the Board.

- The Preliminary 2002 Annual Budget was developed consistent with the financial plans presented during the preparation for the Series 2000 and 2001 Bond Issues.
- Staff recommends a rate increase of 3.75% effective January 1, 2001. Over the past twelve months, the Consumer Price Index has increased 2.7%. Over the next ten years, increases in revenue requirements are held at the anticipated long-term rate of inflation at 3.0%.
- Operations and maintenance expenses of \$41,780,700 are up \$2,713,200 or 6.9% from the 2001 Budget. The main drivers of the increase in operations and maintenance expenses for 2002 are:
 - Distribution Operations and Maintenance increased by \$326,000 to address previous under budgeting and by an additional \$135,000 for work added in Kentucky Turnpike area.
 - Vacancy Credit eliminated requiring \$315,000 for full funding of contingency.
 - Fuel costs have increased by \$160,000.
 - Compensation Performance Matrix increased by \$140,000.
 - General Liability claims increased by \$125,000.
 - Leadership Institute implementation added \$99,000.
 - Telephone customer service staffing added \$121,000.
 - Human Resources/Organization Effectiveness increased by \$105,600 for improved support for compliance issues and quality initiatives.
 - Meter reading and billing expenses increased by \$184,500.
- Depreciation and amortization expense of \$15,871,000 is up \$2,570,200 or 19.3% from the 2001 Budget.
- Infrastructure Replacement Reserve funding of \$2,650,000 is lower than 2001 Budget by \$350,000.

- 2002 Return on Equity Target established at 9.02%, slightly decreased from the previous level of 9.13%. Budgeted dividend of \$12,255,500 is up \$148,500 from 2001 Budget as a result of increased equity.
- 2002 Capital Budget of \$74,218,807 is up \$8,212,705 or 12.4% from the previous budget.
- The key programs in the 2002 Capital Budget are:
 - Riverbank Infiltration Program
 - Main Replacement and Rehabilitation Program
 - Jefferson County Water Extension Program
 - Transmission Improvements
 - Distribution System Improvements
 - Information Technology Improvements

Recommendations

- Recommended rate increase is 3.75%. Over ten year planning horizon, increases in revenue requirements are held at anticipated rate of inflation of 3%.
- Staff requests permission to file the Preliminary 2002 Annual Budget with the Trustees and the City.
- Full review of the Preliminary Annual Budget by the Board of Water Works will be scheduled later in October or November.

Mr. Segell suggested that part of the budget narrative be devoted to how LWC is planning to control costs. He believes it is important to have a cost containment plan. Mr. Huber responded by stating that there is a LWC team addressing this issue.

Mr. Huber asked the board whether it would be willing to meet in special session in October or November in order to address the Budget, RBI, INNAP and Goshen. Board members expressed their preference for holding a special meeting in late October to address these issues. The Board Secretary will work with Mr. Huber and contact Board members in order to select a meeting date.

After proper motion and second, the Board voted to file the Preliminary 2002 Budget with the Trustees and with the City.

BID TABULATIONS

Mr. Heitzman discussed:

01-454 B. E. Payne Water Treatment Plant River Pump Station Roof Replacement

Bids were received Wednesday, September 19 to replace the roof on the B. E. Payne WTP River Pump Station. This project represents the first replacement of the 26-year old roof which is failing in many areas, potentially permitting moisture intrusion on the electrical and mechanical systems.

Three bids were received for this project ranging 7.8%, \$112,684-\$121,500. The low bid exceeds the engineer's estimate by 25%. Comparison of the estimate and bid determined the square footage of masonry wall restoration and linear footage of masonry joint restoration were underestimated by 50%, plus the amount of asbestos abatement was also underestimated. The competitiveness of the three bids indicates the fair market value of the work.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$112,684 to Highland Roofing Company, Inc. for B. E. Payne WTP River Pump Station Roof Replacement.

97-403B Installation of Shady Acres Lane Booster Pump Station

Bids were received Wednesday, September 19 for installation of a pre-fabricated underground booster pump station on Shady Acres Lane. This pump station, in conjunction with recently-completed water tank construction and transmission main installation will serve a new 900-foot pressure zone in southeastern Jefferson County, improving system pressure and flow to this area.

Five bids were received for this project ranging 13%, \$147,268-\$166,580. The project budget is recommended to increase to \$338,668 for increased costs for engineering, easement acquisition, and power supply to the site.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$147,268 to Southern Pipeline Construction Company for Installation of Shady Acres Booster Pump Station, and to increase the project budget to \$338,668.

Mr. Miller discussed:

01-42 Butterfly Valves

On September 19, 2001, bids were opened to award a contract for one 24", two 36" and two 48" butterfly valves. These valves will be used for the Westport Road/I-264 Interchange Transmission Main Project (Phase II).

A total of three bids were received, with the lowest, most responsive bid from Hughes Supply for an amount of \$56,803.

After proper motion and second, the Board voted to authorize staff to award a contract to Hughes Supply for \$56,803.

01-34 Office Supplies

On August 29, 2001, bids were opened to award a three-year contract for Office Supplies. These supplies are used company-wide. A total of four bids were submitted with the lowest, most responsive bid from Boise Cascade Office Products for a total of \$89,679.57.

Due to an error, this is being re-presented to the Board of Water Works to award to Boise Cascade Office Products. Staff has disqualified Corporate Express for failure to use the LWC Price and Delivery form and omitting their signed Proposal & Acceptance sheet.

After proper motion and second, the Board voted to authorize staff to award a contract for the purchase of Office Supplies in the amount of \$89,679.57 to Boise Cascade Office Products. This reflects a less than 0.1% decrease from the project estimate.

COMMUNICATIONS

Mr. Heitzman presented:

Oldham County Advisory Board – September 25, 2001 Meeting Summary

The Oldham County Advisory Board met at Louisville Water Company on September 25, 2001 to review progress on the Oldham County Water System Improvements and the Oldham County Extension Program.

A mid-year financial summary was provided to the Advisory Board members. Through June 30, 2001, the Oldham County Reserve had a bank balance of \$343,248.76. From July 1 through September 21, 2001 the Oldham County Reserve had interest income of \$4,977.15 and expenses of \$89,275.00, leaving a balance of \$258,950.91. Projects under design or construction total an estimated \$180,000, leaving an estimated \$79,000 available for new project considerations. Since the Oldham County Water District merger in 1996, Louisville Water Company has completed capital construction projects totaling \$1,271,370.52 funded from the Oldham County Reserve.

A Capital project summary was provided of all Oldham County projects funded by the Reserve.

Staff advised of Louisville Water Company projects to enhance water supply in Oldham County. These include the construction of a new storage tank at the Applepatch development on Highway 329 at Interstate 71 and the extension of a 12-inch water main to the tank. These projects are funded from the Louisville Water Company System Development Reserve.

Staff updated the Advisory Board on a draft Memorandum of Understanding with Oldham County Public Works regarding future water facility relocations and also advised of the pending acquisition of Goshen Utilities from Aquasource. The next meeting will be scheduled in six months, for March 2002.

No Board action is requested at this time.

Mr. Miller presented a report regarding:

Computer Security and Virus/Worm Protection- NIMDA Update

Computer networks and the Internet have revolutionized how companies utilize computers and information systems to conduct their daily business.

Louisville Water Company has developed operating procedures to manage the risk of our computer systems being attacked via the Internet or other public communication networks by the introduction of malicious computer viruses or worms, the most recent being the NIMDA Worm. These include the use of network firewalls, virus protection software, strong password standards, and information backup and recovery processes.

The worm was introduced in the Company via the Internet and affected several desktops and servers. Staff was notified of the impending worm and updated virus protection software on the Company's firewall and servers, however, the initial version of the software patch did not fully prevent infection by the worm.

Staff has cleaned all servers and firewalls infected and has installed specific virus protection software updates to prevent re-infection.

The worm infection did not significantly impact critical business operations, however, six desktop machines were significantly impacted, requiring staff to pull the machines from production for several days to clean them of the worm and other viruses and re-install company software. IT staff has made a "sweep" of desktop machines to clean them of the worm and install virus protection software updates to prevent future infection.

No board action is requested at this time.

OLD BUSINESS

Mr. Heitzman discussed:

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Brush Run Road: Dawson Hill Road to Routt Road

An Apportionment Warrant public hearing was held for Brush Run Road: Dawson Hill Road to Routt Road. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

Questions were asked about water pressure, the apportionment warrant process, and the payment options. Staff explained in detail and went over their procedures as it pertained to this project. From commitments at the public informational meeting, 20 attending property owners advised they were in favor of extension of water service along Brush Run Road: Dawson Hill Road to Routt Road as proposed at the hearing.

After proper motion and second, the Board voted to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Broad Run Road: Existing Water Main to Stout Road

An Apportionment Warrant public hearing was held for Broad Run Road: Existing Water Main to Stout Road. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

Questions were asked about joint trenching and design of the project. Staff explained in detail and went over their procedures as it pertained to this project. From commitments at the public informational meeting, 8 attending property owners advised they were in favor of extension of water service along Broad Run Road.

After proper motion and second, the Board voted to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Mr. Miller discussed:

99-414B Increase in Scope and Cost for Modifications and Liner Installation for South Basin of Crescent Hill Reservoir

On February 1, 1999, the Company entered into a contract in the amount of \$198,291 with Fuller, Mossbarger, Scott & May Engineers, Inc. (FMSM) for design and construction phase monitoring of sediment removal and liner installation for the South Basin of the Crescent Hill Reservoir.

The liner installation project was originally bid in June, 2000. At its October, 2000 meeting, the Board approved re-bidding this project to incorporate additional stabilization of the embankment and concrete drainage structures. The revised project was re-bid in August, 2001 and an award for the construction contract was approved by the Board in September, 2001.

As requested, FMSM has prepared a list of engineering services performed to date, services currently ongoing, and additional services to be provided during the construction phase.

After proper motion and second, the Board voted to authorize the Chief Engineer to increase the not-to-exceed amount for the contract with Fuller, Mossbarger, Scott & May Engineers, Inc. for Engineering Services for the Liner Installation Project for the South Basin of the Crescent Hill Reservoir 31 percent, from \$198,291 to \$259,791.

Project 20-J01-B General Office Cleaning & Housekeeping Services at Louisville Water Company

On December 1, 2000, the Company entered into contract with National Janitorial & Building Services Corporation and Adams Cleaning, Inc. for janitorial services. The initial contract period for both companies began 12/1/2000, with provision to renew the contracts up to two additional years. Per the provisions of the contracts, both are proposed to be renewed for 2001.

National Janitorial provides janitorial services at Allmond Avenue Distribution Center, B. E. Payne Plant, Middletown Distribution Center, Crescent Hill Water Treatment Plant, Zorn Pumping Station, and Kentucky Turnpike District Office. Adams Cleaning provides janitorial services at the Corporate Headquarters only.

Based on the contractors' satisfactory performance evaluations and quality inspections, staff recommends that the contracts with National Janitorial and Adams Cleaning, Inc. be renewed for the period December 1, 2001 through November 30, 2002.

After proper motion and second, the Board voted to authorize the Chief Engineer to renew two contracts for janitorial services at Louisville Water Company. One contract would be awarded to National Janitorial & Building Services Corporation for the not-to-exceed amount of \$142,683. The second contract would be awarded to Adams Cleaning, Inc. (CMBE) for the not-to-exceed amount of \$66,499.

98-52 System Improvement Projects under 200 sq. feet

98-53 Operations & Maintenance Projects over 200 sq. feet

98-54 Operations & Maintenance Projects under 200 sq. feet

98-55 System Improvement Projects over 200 sq. feet

98-56 Finished Concrete Paved Surfaces

On October 13, 1998, the Board of Water Works authorized renewal of five contracts for paving to the Stoll Construction and Paving Company. These contracts contained provisions that allowed renewals over a

five-year period at the sole discretion of the Louisville Water Company. Rather than renew these contracts for a full year, the Louisville Water Company has decided to extend the current contract for six (6) months to see us through the upcoming winter season, and thereafter to re-bid the contract; Stoll Paving has agreed to this proposed six-month extension.

It is likely that the new bid will be at the prevailing hourly wage.

After proper motion and second, the Board voted to authorize staff to extend the above listed contracts through the next six months.

NEW BUSINESS

Mr. Heitzman reported on:

North Lakeview Drive 16" Transmission Main Project No. 01-316

A project is proposed to install 6,000 +/- feet of 16" water main in North Lakeview Drive between a 16" main in National Turnpike and a 12" main at Blue Lick Road. The project also includes installation of a 3" boosted pressure main to increase pressures along Lakeview Drive for elevations above 550 feet and transfer 20 services from an undersized 2" water main. The original budget of \$330,000 was allocated for 5,500 feet of 12" main.

The project will improve system pressures on North Lakeview and improve flow availability in the North Bullitt County area.

The project budget and scope has been revised to reflect current system needs. The original budget of \$330,000 plus \$102,000 for system upgrades will be funded through the Bullitt County Reserve fund. After proper motion and second, the Board voted to authorize funding in the amount of \$642,000 from the 2001 capital budget and for staff to proceed with engineering design and advertisement for bid for this project.

New Cut Road Water Facilities Relocation and Extension Project LWC Project No. 99-463

LWC Project 99-463 entails relocating LWC distribution water facilities on New Cut Road and adjoining roads in order to accommodate the Kentucky Transportation Cabinet (KTC), Department of Highway's "New Cut Road" construction project (KTC Item 5-248.00).

The project consists of relocating approximately 245 l.f. of 30" DIWM, 5,875 l.f. of 12" DIWM, 865 l.f. of 8" DIWM and 148 l.f. of 12" HDPE. Betterment for this project primarily consists of installing 4,690 l.f. of 24" DIWM and 820 l.f. of 8" DIWM. Staff intends to joint bid this project with KTC.

The total project cost is estimated to be \$1,709,200, of which engineering/supervision is estimated at \$98,700, materials are estimated at \$586,600, and contract labor is estimated at \$1,023,900.

After proper motion and second, the Board voted to authorize staff to design the distribution water facility relocations and to enter into an agreement with KTC for the construction of the distribution water facility relocations as described above.

Project 00-479(B): Automated Mapping/Facilities Management (AM/FM) System Data Collection/Conversion

LWC initiated work on the Automated Mapping/Facilities Management System (AM/FM) project (#00-479) in March of this year. The primary component of the AM/FM project involves the migration of LWC pipeline and service facility data into a Geographic Information Systems (GIS). This phase of the project will employ Global Positioning System (GPS) technology to locate visible LWC water features within one meter of actual location.

A total of five proposals were submitted from qualified firms for the data collection/conversion and application development. LWC conducted a team-based evaluation of the proposals and conducted interviews with two of the proposing firms, GRW Engineers, Inc. and Woolpert LLP. After the preliminary evaluation, fee proposals were opened and scored. Upon review of the complete evaluation criteria, LWC determined GRW Engineers to have the proposal offering the best overall value to LWC.

In an attempt to maximize the efficiency of the data collection/conversion process, staff has negotiated a revised fee proposal with GRW to GPS field survey only large meters throughout the LWC system (20,700 points) and all meters in Bullitt County (10,583 points). All remaining meters will be positioned using location codes found in the LWC service history file. The negotiated fee of \$2,761,300 represents a \$186,000 increase in total project cost while providing LWC with the desired accuracy for critical portions of the distribution system. This will bring the revised project budget to \$4,373,165.

After proper motion and second, the Board voted to authorize staff to award the data collection/conversion and applications development contract to GRW Engineers Inc., in the amount of \$2,761,300, and establish the project budget at \$4,373,165.

Bullitt County Water Improvement Program – Installation of Martin Hill Road Booster Pump Station

Proposed under the 2001 Capital Budget are funds for construction of storage tanks, booster pump stations, and water main improvements required to support system growth in Bullitt County.

The proposed facility, in conjunction with the new Martin Hill elevated storage tank and new transmission mains (each presently under construction), will serve a new 1030-foot pressure zone in northwestern Bullitt County.

The budget for the proposed project is \$315,000. The source of funding for this project is the Bullitt County Water Reserve.

After proper motion and second, the Board voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Consulting Engineering Services – National Turnpike LWC Project 00-495

A cost proposal was requested, from PEH Engineers Inc., for engineering services for 16" and 12" mains in National Turnpike and South Park Roads. The main will extend from the existing 16" main in National Turnpike near Fairdale Road, south to Lakeview Drive in northern Bullitt County.

The cost proposal is based on unit prices as submitted in consulting proposals which was communicated to the Board in the August 2001 meeting.

PEH Engineers submitted a cost proposal in the amount of \$198,034.56, which is \$5,205 less than the independent estimate of \$203, 239.54.

After proper motion and second, the Board voted to authorize staff to enter into an engineering service contract with PEH Engineers in the amount of \$198,034.56 and advertise for bid for Project 00-495 National Turnpike 16" transmission main.

Mr. Miller reported on:

Property Insurance Renewal Premium Increase

At the September 11, 2001 meeting of the Board of Water Works, staff was authorized to renew the property insurance up to a new premium of \$75,000. When final pricing negotiations were complete, the premium was established at \$76,030 with our current policy limits intact at \$150,000,000.

After proper motion and second, the Board voted to ratify staff's renewal of our property insurance through Allianz for the period of October 1, 2001 through September 30, 2002 at a premium of \$76,030.

Mr. Heitzman reported on:

Bullitt County Water Improvement Program—Bullitt County Extension Program

Mt. Elmira Road Extension, Project 01-308

Proposed under the Bullitt County Extension Program are several backbone mains required to support system growth. This correspondence presents a proposed project to construct a portion of this system, and requests authorization for engineering design and advertisement for bid.

The proposed project will consist of installation of approximately 15,725 linear feet of 8-inch PVC water main along Mt. Elmira Road from Highway 44 north to the existing water main just south of Brooks Hill Road. The project will supply to the Gospel Kingdom/Fort Knox area as well as supply service and fire protection to Mt. Elmira Road.

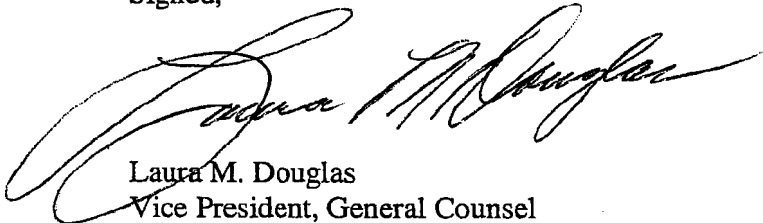

After proper motion and second, the Board voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project. The results of the bids will be presented to the Board with recommendation for contract award.

The Meeting was adjourned at 3:10 P.M.

CERTIFICATION

This is to certify that the following *Brush Run Road: Dawson Hill Road to Routt Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on October 9, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is fluid and cursive, with a large initial "L" and "D".

Mr. Steve Hubbs, Vice President
Mr. Jim Wehrle, Vice President
Ms. Mary-James Young, Corporate Attorney
Mr. Ralph McCord
Mr. Richard Royse
Ms. Kay Ball
Mr. Larry Lenahan
Mr. Frank Appelfeller

The Board Meeting convened at 12:30 p.m.

Mr. Huber noted that a quorum was present for the meeting.

Presentation of the 2002 Preliminary Annual Budget for Approval

Mr. Miller reported on the 2002 Preliminary Annual Budget and presented the 2002 Budget Resolution

Upon motion of Ms. Welsh and second by Mr. Bond, the Board voted unanimously to adopt the 2002 Budget Resolution.

Mr. Huber stated that he and Mr. Wehrle would meet with the BOWW Compensation Committee for further discussion of the compensation matrix element of the proposed budget, with the outcome of that discussion to be either the Committee's approval of the business case for approval of the matrix or the replacement in the Infrastructure Replacement Reserve of those funds formerly designated for the matrix.

Acquisition of Property

Upon motion of Mr. Hammons and second by Ms. Welsh, the Board voted unanimously to go into closed session for the purpose of considering acquisition of property.

The Board resumed open session deliberation without taking any action in closed session.

Upon motion of Mr. Segell and second by Mr. Hammons, the Board voted unanimously to adjourn the meeting.

The meeting was adjourned at 3:10 p.m.

ADMINISTRATIVE REPORT

Mr. Huber gave an oral administrative report.

He asked the Board to ratify Management's agreement with Local 1683 to extend the contract for three more years. The extension will create a 2% increase in wages for the first year and a 1½ % increase for each six-month period thereafter. All other terms and conditions remain unchanged. After proper motion and second, the Board voted to ratify Management's agreement with Local 1683 to extend the collective bargaining agreement for three more years with an annual 2% increase for the first year and a 1½ % increase for each six-month period thereafter. The contract will now expire on February 1, 2006.

Mr. Huber also stated that ORSANCO has installed a river monitor in the Louisville area. This monitor is the first of its kind.

FINANCIAL REPORT

Mr. Miller presented the Income and Expense Summary through October 2001.

- 1) Total operating revenue of \$77,720,800 is \$3,015,400 or 4.04% more than budgeted and \$4,038,000 or 5.48% more than the same period in 2000. We sold 1.66% less water in 2001 than the same period in 2000. Water delivered to the mains was 0.29% more than 2000.
- 2) Operation and maintenance expense of \$31,727,700 is \$593,700 or 1.87% more than budgeted and \$2,087,900 or 6.91% more than 2000.
- 3) Operating deductions of \$51,139,000 are \$2,225,600 or 4.55% more than budgeted and \$4,949,700 or 10.72% more than 2000.
- 4) Net operating income of \$26,581,900 is \$789,800 or 3.06% more than budgeted.
- 5) Total non-operating income of \$4,686,500 is \$404,300 or 9.44% more than budgeted.
- 6) Net income of \$25,646,500 is \$1,903,700 or 8.02% more than budgeted and \$259,300 or 1.00% less than 2000. 1.1% of this amount is from non-operating income.

Security Costs

Staff is tracking costs related to the increased security at LWC pumping stations, treatment plants, water storage facilities, and office buildings. Invoices recorded in October totaled \$53,642; the year-to-date amount is \$167,294.

Government Accounting Standards Board Statement 34

Staff is finalizing the reporting formats for the Balance Sheet and Income Statement for compliance with GASB Statement 34. The existing financial reporting system requires fairly minimal changes in order to provide the reports in the new format as well as the current format.

Staff has also collaborated with the Kentucky Infrastructure Authority, the Kentucky Department for Local Government, and the Kentucky Public Service Commission to draft a uniform process for Kentucky water utilities to assist in compliance on this matter.

2001 Year-End Closing

In the past, the financial statements were produced in mid to late February; with the newly developed method, the statements are expected to be ready in time for review at the January 15, 2002 board meeting.

OPERATIONS AND ENGINEERING REPORT

Mr. Heitzman presented the Operations and Engineering Report for October 2001.

Production and Water Quality

Distribution Water Quality improved during the month of October. Three positive coliform tests results were received with all recheck samples testing negative for coliform. Flushing crews continue to work in Southwest Jefferson County and Bullitt County to restore distribution chlorine levels above 0.5 ppm.

System Security

The Board has authorized an additional \$750,000 for security in the 2002 Operations Budget, including improvements for monitoring, detection, and ready response in the event of a breach in security. Initially, investments in monitoring will be man-power based. Over the next several months, technology driven security systems and practices will be implemented. The Company also retained Black and Veatch for a security assessment of our critical facilities. Recommendations from this assessment will be considered for implementation at critical operating facilities.

Customer Service and Billing

The Call Center received 27,312 calls during the month, with an abandonment rate of 3.4 percent. Adequate staffing, training on the new E-CIS system, and implementation of the new IVR system has contributed to the significant reduction from the 13.2 percent abandonment rate in October 2001.

Distribution Center

The Winter Emergency Plan has been rolled out to all employees. The backlog of work activity is 1,162 work units, and positions the Company well heading into the winter season. Total breaks in 2001 are 542, compared to 446 in 2000. The additional 96 breaks were experienced during January and February 2001.

Landscaping Award

The Beautification League of Louisville and Jefferson has once again awarded Louisville Water Company second place in the Class II – 11 to 15 Acre Category for outstanding grounds maintenance at our Crescent Hill facility on Frankfort Avenue. Mr. O'Dell Henderson, Process Owner of Buildings, Facilities, and

Grounds, accepted the award at the League's annual presentation ceremony on October 17, 2001. Mr. Henderson and his staff are to be commended for their efforts.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation, acquisitions of property, and a personnel matter. The Board reconvened into open session without taking any action in closed session.

SPECIAL ISSUES

Mr. Huber and Ms. Douglas reported:

Rescheduling January, 2002 BOWW Meeting

Section 1.2 of the Board of Water Works Bylaws provides that all monthly meetings of the Board must be held on the second Tuesday of the month, unless 1) the second Tuesday falls on a legal holiday, or 2) the President determines that a quorum will not be present on that date. Staff within Supplying Business Resources have requested that the January 2002 Board meeting be held on the third Tuesday rather than the required second Tuesday in order to provide sufficient time to close the fiscal year 2001 books and present complete 2001 financial performance data to the Board at its January 2002 meeting.

After proper motion and second, the Board voted to suspend the rules and authorize the Board Secretary to schedule the January 2002 Board Meeting for January 15, 2002.

Board Officer Designation—Vice President, Serving Customers and Business Development

As part of his plan to reorganize Core Business Systems and rotate Business System Owners, the President has identified a need for an additional Board Officer. The Vice President of Serving Customers and Business Development will now attend and preside over apportionment warrant public hearings and will make recommendations to the BOWW regarding the feasible and beneficial nature of such apportionment warrant projects. Traditionally, the LWC representative presiding over such hearings has been a Board member or Board officer.

After proper motion and second, the Board voted to suspend the rules, establish the Board officer position of Vice President, Serving Customers and Business Development at the November 13, 2001 meeting, adopt the attached Bylaw amendment evincing such action, and name Karla Olson Teasley to fill such position until the April 9, 2002 Board Annual Meeting where her re-appointment will be reviewed along with that of all other Board officers.

BID TABULATIONS

Mr. Huber and Mr. Miller reported on:

01-39 Service Saddles for Tapping PVC Pipe

On October 3, 2001, bids were opened to award a two-year contract for service saddles. A total of five bids were submitted with the lowest, most responsive bids from Mueller Company for an estimated two-year total of \$218,579 and Wemhoener Waterworks for an estimated two-year total of \$13,691.

After proper motion and second, the Board voted to award a two-year contract totaling an estimated \$218,579 to Mueller Company and an estimated \$13,691 to Wemhoener Waterworks.

Mr. Miller reported on:

01-40 Vehicular Wash Chemical Supplies and Maintenance

On October 3, 2001, bids were opened to award a two-year contract for vehicular wash chemical supplies and maintenance for the large vehicular wash equipment at Allmond Avenue. A total of four bids were received, with the lowest, most responsive bid from Air To Ground Services for an estimated two-year amount of \$68,440.

After proper motion and second, the board voted to award a two-year contract to Air To Ground Services for an estimated amount of \$68,440.

01-47 Contingency Contract for Heavy Equipment Rental

On October 31, 2001, bids were opened to award a three-year contingency contract for heavy equipment rental. This contract is for rental of heavy equipment on an as-needed basis to supplement operations. A total of six bids were received. The most responsive bidders were Sunbelt Rentals, United Rentals, Americon - The Cat Rental Store, and Vermeer Sales and Service.

After proper motion and second, the Board voted to award a three-year contract, totaling an estimated \$102,000, to Sunbelt Rentals, United Rentals, Americon – The Cat Rental Store, and Vermeer Sales and Service. This bid represents an approximate 1.23% decrease from the previous contract pricing of similar equipment. The contracts will be awarded if and when needed.

98-63 Tapping Sleeves (3rd PPI Renewal)

On December 8, 1998, the Board of Water Works approved the recommendation to award contracts for tapping sleeves to Harco, Viking Environmental and Mueller Co. These contracts contained a provision that allowed them to be renewed over a four (4) year period at the sole discretion of the Company. All renewals would use the Producer Price Index to determine any adjustments to the original bid unit prices.

After proper motion and second, the board voted to renew the Tapping Sleeves contracts for the 3rd PPI Renewal, totaling \$110,478, to Harco, Inc., Viking Environmental, and Mueller Co.

Mr. Heitzman reported on:

00-302 Brush Run Rd., Dawson Hill Rd., Back Run Rd., Broad Run Rd., and Fairmount Road Water Main Extension

Bids were received Wednesday, October 25, 2001, to install approximately 34,260 lineal feet of 12-inch water main on Brush Run Road, Dawson Hill Road, Back Run Road, and Broad Run Road for the base bid, and approximately 5,130 lineal feet of 12-inch water main on Fairmount Road for the alternate bid. A total of five bids were received from qualified contracting firms. The low responsive base bid in the amount of \$599,120.00 and low responsive alternate bid in the amount of \$65,560.00 were both submitted by James Parson Construction Company, Inc. (JPCC). The low bid (Base + Alternate) is less than the engineer's estimate by \$609,320 or 47.8 %. JPCC submitted a unit price for 3" HDPE service sleeve of \$600 per linear feet compared to a unit price range of \$15 to \$42 per linear feet for other bidders.

After proper motion and second, the Board voted to award a contract for the Base Bid in the amount of \$599,120 to James Parson Construction Company, Inc.

01-206 Williams Road Water Main Extension Project

Bids were received Wednesday, October 31, 2001, to install approximately 1,120 lineal feet of 8-inch water main on Williams Road from Dry Ridge Rd to the Bullitt County Line. This project is identified in the County-Wide Water Extension Program in Extension Area 3. Apportionment Warrants will be issued to five properties fronting the water main. A total of five bids were received from qualified contracting firms. The low responsive base bid in the amount of \$15,342.00 was submitted by Tom Brown Construction, Inc.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$15,342.00 to Tom Brown Construction, Inc. to install water facilities associated with this project.

01-304 I-65 Transmission System, Highway 61 Extension

Bids were received Wednesday, October 17, 2001 to furnish and install approximately 11,735 lineal feet of 16-inch water main along Highway 61 from Highway 480 to Highway 1494, and from Highway 3219 to Highway 245 in Bullitt County. This project will provide additional water capacity along the I-65 corridor to Lebanon Junction. Eight (8) bids were received from qualified contracting firms. Tom Brown Construction Company submitted the responsive bid in the amount of \$518,000.

After proper motion and second, the Board voted to award a contract in the amount of \$518,000 to Tom Brown Construction Company to install water facilities associated with this project.

01-308 Mount Elmira Road Backbone Tapping Fee Extension

Bids were received and opened Wednesday, October 31, 2001 to furnish and install 15,725 linear feet of 8-inch water line along Mt. Elmira Road between Highway 44 and Brooks Hill Road. A total of eight (8) bids were received and opened from pre-qualified contractors. The apparent low bidder, Three T Construction Co., submitted a bid amount exceeding their prequalification limit. In accordance with LWC guidelines for bid informalities / irregularities, the bidder is to be disqualified. Tom Brown Construction submitted the lowest responsive bid in the amount of \$281,377.20 resulting in a total project cost of \$395,637. The bid is 40% under the Project Manager's Estimate.

After proper motion and second, the Board voted to award a contract in the amount of \$281,377.20 to Tom Brown Construction to install the Tapping Fee water main extension. The standard \$5,450 tapping fee for service connection will be applied to this project.

01-501 Brownsboro Road—Main Replacement Project

Bids were received and opened Wednesday, October 31, 2001 to install 3,155 linear feet of 8 and 12-inch water line along Brownsboro Road between Herr Lane and Greenlawn Road. A total of 4 bids (base and alternate) were received and opened from three pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$152,800 resulting in a total project cost of \$246,200. The bid is 32% under the Project Manager's Estimate.

After proper motion and second, the board voted to authorize the Chief Engineer to award a contract in the amount of \$152,800 to Southern Pipeline to install the water facilities associated with this project.

- 02-296 Installation of Water Services ¾" & 1"**
- 02-298A Installation of Fire Hydrants**
- 02-298B Installation of Water Services 1 ½" & 2"**
- 02-298C Installation of Water Services 4" & Larger**
- 02-299A Installation of Fire Services**
- 02-447 Renewal of Water Services ¾" & 1"**
- 02-1405A Discontinue of Small Water Services**

Annually, the Company solicits bids to perform various service installations. An invitation to bid was advertised for 3 year renewable service contracts. Five prequalified contractors picked up the contract document books. Bids were opened on Wednesday, October 17th. Five contractors submitted unit price bids for the various contracts.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a unit price contract to Tom Brown Construction for ¾" & 1" services, Fire Hydrants, Fire Services and 1 ½" & 2" services, DSE for 4" & Larger Services and ¾" & 1" Renewals and Miller Pipeline for Discontinues.

COMMUNICATIONS

Ms. Douglas presented:

Consolidated Local Government—Proposed Amendment of LWC Governing Statute

The General Counsel and Government Affairs Officer have under taken an extensive review of LWC's governing statutes, KRS Chapter 96, to determine how such statutes have been impacted by the enactment of KRS 67C.101 et seq, the local government consolidation statutes. As a result of such review, it has been determined that several minor revisions should be made in Chapter 96 in order to clarify such issues as ownership of the Company and LWC Board appointment post consolidation. In all instances, the proposed modifications have been made in a manner consistent with both the requirements of Kentucky law and current LWC practices.

That is, specific Board of Water Works action is not requested at this time. It is anticipated that, at the request of Mayor Armstrong, the General Counsel and Government Affairs Officer will make a presentation to the Subcommittee on Finance, part of the work group the Mayor has established to review consolidated government issues.

Mr. Miller reported on the:

Revised Purchasing Policy

The Board of Water Works approved a resolution on November 2, 2001 to adopt the 2002 Annual Budget. As part of that resolution, the Board delegated to the President of Louisville Water Company, among other things, *"the authority to proceed to completion for those Projects in the 2002 Capital Budget (and Prior year Capital Budgets) with an estimated cost of \$100,000 or less"*. The Board also resolved that *"all contract expenditures greater than \$100,000 must be submitted for approval to the Board of Water Works prior to award and execution of the contract"*. Since that time, staff has evaluated the LWC Purchasing Policy that provides the basis for initiation, evaluation, and execution of purchasing transactions. Following are the Purchasing Authorization Levels included in the recently updated Purchasing Policy:

- Level I – Authorized Employee Level**
- for transactions valued at between \$0 to \$2,500

Level II – Process Owner Approval

--for transactions valued at \$2,500 to \$5,000

Level III – Purchasing Manager Quote Approval

--for transactions valued at \$5,001 to \$10,000 each after first submitting quotes from three vendors to Purchasing Manager, with at least one such quote being obtained from an M/W/HBE vendor

Level IV – Bids and Awards Committee Quote Approval

--for transactions valued at \$10,001 to \$20,000 each after first submitting quotes from three vendors to Bids and Awards Committee, with at least one such quote being obtained from an M/W/HBE vendor

Level V – President Approval

--for transactions valued at \$20,001 to \$100,000 each after: Involvement of the Purchasing Manager, advertised bid; review by the Bids and Awards Committee and signature by the President, in that order

Level VI – Board of Water Works Approval

--for transactions valued over \$100,000 each after: Involvement of the Purchasing Manager, advertised bid; review by the Bids and Awards Committee; signature by the President and approval of the Board of Water Works, in that order

In addition, annual renewal of multi-year contracts based on the Producer Price Index or the Consumer Price Index must be reviewed and approved by the Bids and Awards Committee and the appropriate subsequent approvals. The President must authorize a sole source procurement for contracts anticipated to be \$20,000 or higher at the beginning of the procurement process.

Mr. Anthony Gregory presented the:

2001 – 2003 Information Technology Strategic Plan Status

The Information Technology Strategic Plan provides strategies to meet the challenges and achieve the objectives set forth in the LWC Strategic Plan by using Information Technology as a strategic enabler to leverage technology investments. The key Information Technology strategies for 2001 – 2003 include:

- Sustain investment in the four Information Technology Architectures:
 1. Information Supply Systems
 2. Technical
 3. Data
 4. Organizational
- Continue re-engineering and replacement of legacy Information Supply Systems to meet changing business and information needs.
- Invest in technologies to provide information to employees, customers, suppliers, and business partners quickly and efficiently, leveraging investment in existing Data and Technical Architectures.
- Design and deploy data marts for decision support and process based management information.
- Invest in continuous training to maintain appropriate skill base and competencies for providing quality products and services to meet the strategic business objectives of the LWC Strategic Plan and associated program plans.

Staff has made significant progress in implementing several of the strategies outlined in the plan within existing budgets and timeframes.

OLD BUSINESS

Mr. Heitzman reported on:

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Bearcamp Road: End of Existing Water Main to County Line

An Apportionment Warrant public hearing was held for Bearcamp Road: End of existing water main to county line. The public hearing was held in response to receipt of a majority petition for this public road project. Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project. Questions were asked about financial assistance and the length of time required to complete the project. Twelve of thirteen attending property owners advised they were in favor of extension of water service along Bearcamp Road: End of existing water main to county line as proposed at the hearing. One property owner stated opposition to the water main extension and stated that his property is assessed at \$5000, and was concerned that the Louisville Water Company is going to take his property from him.

After proper motion and second, the Board voted to recognize the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265 and refer this project to the Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Broad Run Road: Fairmount Road to Back Run Road

An Apportionment Warrant public hearing was held for Broad Run Road: Fairmount Road to Back Run Road. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265. From commitments at the public informational meeting, 4 of the 4 attending property owners advised they were in favor of extension of water service along Broad Run Road: Fairmount Road to Back Run Road as proposed at the hearing.

After proper motion and second, the Board voted to recognize the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265 and refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design, and advertisement for bid on this project.

Amendment of Apportionment Warrant Register

Upper River Road: Between River Edge Road and Woodside Road

Apportionment Warrant # AW46513019, 4410 Upper River Road (Tax Block 10 Lot 115)

Apportionment Warrant # AW46517019, 4502 Upper River Road (Tax Block 11 Lot 23)

Addition of Patrick and Alice K. Lancaster (Tax Block 1516 Lot 30)

The Board approved a resolution for the issuance of Apportionment Warrants for Upper River Road: Between River Edge Road and Woodside Road at it's July 10, 2001 meeting in accordance with KRS 96.265. In response to a phone conversation initiated by Mr. T. Ballard Morton of 4502 Upper River Road, a review of the project file identified that Mr. Morton did not sign the petition for water service. In reviewing the file it was also revealed that Mr. Arch Stallard, 4410 Upper River Road, had not signed the petition for water service. Should either of these properties request water service from this main in

the future a Tapping Fee of \$5450.00 will be charged. It was also revealed that Mr. Patrick Lancaster, 4620 Upper River Road, did sign the petition and was omitted from the register. It should be noted that Mr. Lancaster has paid his fee of \$5450.00 in full.

After proper motion and second, the Board voted to adopt the Amended Resolution (Exhibit C) and the amendment of the Apportionment Warrant Register of July 10, 2001 to reflect Exhibit D; thereby, voiding Apportionment Warrant # AW46513019, 4410 Upper River Road (Tax Block 10 Lot 115) and Apportionment Warrant # AW46517019, 4502 Upper River Road (Tax Block 11 Lot 23), and adding to the Apportionment Warrant register Mr. Patrick and Mrs. Alice K. Lancaster, 4620 Upper River Road (Tax Block 1516 Lot 30) in accordance with KRS. 96.265.

Issuance of Apportionment Warrants per KRS 96.265

Private Road off South Pope Lick Road

A request was received from the property owners along a private roadway off S. Pope Lick Road. Due to the unusual property configurations and ownership patterns, and the request of the property owners, application of KRS 96.265(11) was utilized. At the Board of Water Works meeting on August 11, 1998, the Board agreed to allow these property owners to participate in a Private Petition/Agreement. The notice to proceed was given in March 2000 and construction was completed by May 2000. The contract for this method of extension provides lien rights and financing similar to the Apportionment Warrant process.

As outlined in the Private Petition/Agreement, the cost of the extension will be by the equal assessment method based upon actual costs incurred, not to exceed \$5750.00 per property based on four properties. Since the time of petition the Property Valuation Administrator has made corrections to their property lines to reveal that there are only three eligible properties from which to collect an assessment (Exhibit B).

Furthermore, at the time of petition, lots 139, 140, and 146 were owned by Rosemary and William Hutchinson, Sr. and were assessed with the Rehl Road project. Subsequently the property was divided and ownership has changed to reflect Exhibit C, creating two land locked parcels lots 139 and 140. The original Rehl Road assessment stays with lot 146 and the remainder of the project cost may be collected from said land locked parcels that would pay a tapping fee equal to the assessment value. A final cost of \$5,750 has been determined for each lot or tract abutting this extension and currently not served.

After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 3 properties along Private Road off S. Pope Lick Road in accordance with KRS. 96.265, as described.

Ms. Kay Ball reported on the:

Project 0-1830 Evaluation of the INAAP Wellfield

On May 9, 2001 staff was granted authorization to initiate a contract with Jordan, Jones & Goulding, Inc. (JJ&G) in the amount of \$50,000 to perform due-diligence of the collector wellfield on the Indiana Army Ammunition Plant (INAAP). Due to the complexity and potential costs of evaluating the INAAP, the project has been conducted in a phased approach eliminating unnecessary expenditures. To date existing information has been collected pertaining to the history of the operations at the plant, the environmental assessments completed by the U.S. Army, the physical conditions of the facilities, and the hydrogeologic capacity of the wellfield.

Currently, the second phase of due-diligence is underway which includes the interpretation and hydraulic modeling of the collected data, an assessment of the environmental conditions and additional water quality data collection. These costs are estimated to be an additional \$47,900 for a revised contract of \$97,900 to JJ&G.

After proper motion and second the board voted to approve the revised contract with Jordan, Jones & Goulding, Inc in the amount of \$97,900 for the due-diligence of the INAAP water facility. It is anticipated that staff will return at the end of the year with the final recommendation.

Mr. Miller reported on:

Project 00-559 Pure Tap Bottling Facility

Louisville Water Company (LWC) opened its Pure Tap Bottling Facility in the spring of 2001 to accommodate and expand our production of 8-ounce filled bottles. The bottles are provided, free of charge, to civic and charitable groups in our community. In May 2000 the Board of Water Works approved a capital budget of \$196,500. The project was completed in May of 2001 at a cost of \$230,176 – a difference of \$33,676 (17%). The Board is advised of the revised budget of \$230,176 for project 00-559, the Pure Tap Bottling facility.

No Board action is requested at this time.

NEW BUSINESS

Mr. Heitzman reported on:

Billtown Road 12" Secondary – Transmission Main Project No. 01-484

A project is proposed to install 4,000 +/- feet of 12-inch water main in Billtown Road between Ruckriegle Parkway and St. Rene Road. The project will improve fire flow availability and improve system pressures in the Jeffersontown area. This project is included in the 2002 budget for \$340,000. Design work is to be accomplished by Louisville Water Company staff.

After proper motion and second, the Board voted to finalize the design and advertise for bid Project No. 01-484, Billtown Road 12" Secondary – Transmission Main.

Chamberlain Lane 12" Grid-Tie Secondary – Transmission Main Project No. 01-552

A project is proposed to install 915 +/- feet of 12-inch water main in Chamberlain Lane south of Westport Road. The project will tie an existing 12" main, connected solely to the 60" main (860 Pressure plane), with a 12" main served from the 940 pressure plane. The connection to the 860 pressure plane system will be maintained as a backup connection. The connection to the 940 pressure plane system will improve reliability, supply and improve system pressures in the project area, which currently includes Ford truck plant, an office complex and mini-warehouses.

After proper motion and second, the Board voted to fund the Chamberlain Lane 12" Grid-Tie Secondary – Transmission Main, Project No. 01-552 from available 2001 capital funds and proceed with engineering design and advertisement for bid of this project.

National Turnpike Water Facilities Relocation Project LWC Project No. 99-663

LWC Project 99-663 entails relocating LWC distribution water facilities on National Turnpike and adjoining roads in order to accommodate the Kentucky Transportation Cabinet (KTC), Department of Highway's "National Turnpike" construction project (KTC Item 5-93.00). Existing water facilities shall be relocated from Outer Loop to Southside Drive/Old Third Street. The facilities shall be upsized from 12" to 16" in order to provide additional fire hydrant support to the area.

The project consists of installing approximately 11,500 l.f. of 16" DIWM, about 360 l.f. of 12" DIWM, 880 l.f. of 8" DIWM and 2,200 l.f. of 6" DIWM. Staff intends to joint bid this project with KTC. Contract labor shall be paid directly to the contractor by KTC. The total project cost is estimated to be \$1,941,000, of which engineering is estimated at \$100,000, materials are estimated at \$586,000, and contract labor is estimated at \$1,255,000. KTC shall be responsible for 87% of the total relocation project costs, or \$1,680,920, while LWC shall be responsible for 13%, or \$260,080, to upsize this water main from 12" to 16".

After proper motion and second, the Board voted to finalize the design of the distribution facility relocations and to enter into an agreement with KTC for the construction of the distribution facility relocations as described above.

**Bullitt County Water Improvement Program – Bullitt County Extension Program
KT #2 Community Development Block Grant Application**

Proposed under the Bullitt County Extension Program is the extension of water mains to existing unserved residents of Bullitt County. The Community Development Block Grant (CDBG) program is a Federal grant program that is administered by the State to assist communities in constructing infrastructure improvements affecting low to moderate income areas.

Total Estimated Project Cost	\$3,672,000
CDBG Grant	<u>(\$1,000,000)</u>
Net Cost to Bullitt County Reserve	\$2,672,000

The Bullitt County Extension Program Workgroup has reviewed the selected routes and has agreed that CDBG funding should be pursued. The source funding for any portions of this project not covered by the proposed CDBG grant is the Bullitt County Reserve.

After proper motion and second, the Board voted to proceed with the preparation of an application for CDBG funding for the subject project, with the balance of funding for the project from the Bullitt County Reserve and customer connection fees.

**Bullitt County Water Improvement Program – Bullitt county Extension Program
2/3 Majority Petition Mains**

Proposed under the Bullitt County Extension Program are four (4) non-backbone mains for which we have received a 2/3 majority petition. The proposed Tapping Fee projects will provide fire protection and water service to previously unserved areas. Descriptions are as follows:

<u>Project #</u>	<u>Description</u>	<u>Footage & Size</u>	<u>Est. Project Cost</u>	<u>Petitions Received / Total Customers</u>
01-317	Cow Branch Rd.	5,600 ft, 8-inch	\$210,000.00	11 / 14
01-318	Cupio Ln. / Cupio Lodge	6,600 ft, 8-inch	\$241,500.00	12 / 18
01-324	Weavers Run	16,500 ft, 8-inch	\$490,000.00	34 / 50
01-325	Pumpkin Road	15,400 ft, 8-inch	\$539,000.00	17 / 20

These projects will serve a total of 102 previously unserved customers. The source funding for these projects is the Bullitt County Reserve.

After proper motion and second, the Board voted to proceed with engineering design and advertisement for bid for the subject projects. The results of the bids will be presented to the Board with recommendation for contract award.

Fairmont Road Tapping Fee Extension, Broad Run Road to Floyds Fork Creek

The Company has received a 40 percent petition (2 of 5 property owners) requesting water service for Fairmont Road from Broad Run Road to Floyds Fork Creek. The scope of this project includes 4,100 feet of 12-inch water main estimated at \$340,900. This section of water main is a critical link in the 12-inch backbone supply from Highway 155 to Bardstown Road. This 4,100-foot section represents 6 percent of the 62,000-foot backbone length.

Staff has reviewed the petitions received, and has determined the remaining three property owners are unlikely to sign the petition. Two of the properties are owned by Future Fund and one property is owned by Philip Bohr. Staff recommends a Tapping Fee water main extension that will expedite the installation for service by summer 2002. The Tapping Fee is proposed to be established at \$5,450 and will only apply to those property owners applying for water service. The Tapping Fee alternative has been used on several occasions with the County-wide Water Extension Program, where unusual property configurations or circumstances exist that prevent the majority petition method to work.

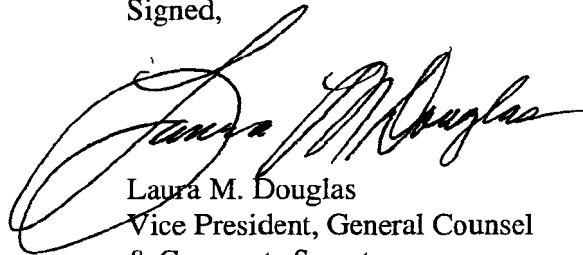

After proper motion and second, the Board voted to proceed with the Fairmont Road 12-inch water main from Broad Run Road to Floyds Fork Creek as a Louisville Water Company Tapping Fee Water Main and establish the Tapping Fee at \$5,450. The Board also voted to award the alternate bid of \$65,560 for Project No. 00-302 to James Parson Construction Company.

The Meeting was adjourned at 3:45 P.M.

CERTIFICATION

This is to certify that the following *Designation of a New Corporate Officer Position*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on November 13, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style. The signature is positioned above the printed name and title.

Laura M. Douglas

& Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265(11) of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Private Road off S. Pope Lick Road** main extension project authorized by Private Petition/Agreement such warrants to be against 3 benefited properties identified by present ownership and official records set forth on Exhibit A and B, attached, each apportionment warrant to be in the principal sum of \$5750.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Cost difference could be collected if a contiguous lot is sold off or if lots subdivide.

**MINUTES OF REGULAR MEETING
BOARD OF WATER WORKS
December 11, 2001**

Board Members Present

Mr. Phillip Bond
Mr. Jack Segell
Mr. Stephen Gault
Ms. Wendy Welsh

Board Members Absent

The Hon. David L. Armstrong, Mayor
Mr. Owen Hammons
Mr. Stewart Connor

Others Present

Mr. John L. Huber, President
Ms. Laura Douglas, V. P. General Counsel & Secretary
Mr. Robert Miller, V. P. Treasurer
Mr. Gregory Heitzman, V. P. Chief Engineer
Ms. Karla Teasley, V.P. Serving Customers & Business Development
Mr. Frank A. Appelfeller
Ms. Jane Driskell
Ms. Kay Ball
Mr. Steve Hubbs
Mr. Anthony Gregory
Ms. Amber Halloran

The Board Meeting was called to order at 12:30 p.m.

Approval of the consent agenda was recommended.

- Minutes of previous meetings.
- Claims paid during the previous month.
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$50,000

Item A: Minutes of Regular Meeting Held **November 13, 2001**
Request: Approve Minutes

Item B: Claims Paid During **November, 2001**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

Developer Installed Refunding Projects

Glen Oaks Subdivision Section 11A (Project No. 00-109)
Prologis Park Phase 1 (Project No. 01-067)

Total Project Cost

Fairlawn Road Drainage Improvement Project (Project No. 01-672)	\$16,645.00	\$16,645.00

Item D: Authorization for design and bid of projects (*estimated to cost less than \$200,000*)

Item E: Bid tabulations (*award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid*).

Item F: Award of contracts less than \$50,000

Capital Program

Project No.	Project Name	Total Project Cost
01-206	Williams Road Water Main Extension Project	\$15,342.00

Procurement by Certificate of Emergency

Project No.	Project Name	Total Project Cost
Certificate of Emergency	Municipal Water System Guard Service	\$15,000.00
Certificate of Emergency	Security Assessment Services	\$33,349.00

Procurement of Professional Services

Project No.	Project Name	Total Project Cost
Professional Service	Arbitrage Rebate Calculation for Series 1992 Bonds	\$6,500.00
Professional Service	Development and Implementation of the Quality Opportunity Index Survey Tool	\$16,429.00
Professional Service	Survey Research and Statistical Analysis	\$17,700.00
Professional Service	CSI Development, Refinement, and Quarterly Reporting	\$14,000.00

Administrative Report

Mr. Huber gave an oral administrative report.

He reported that Rev. Louis Coleman has been picketing outside LWC's main office to encourage customers to refrain from paying their sewer bill. Rev. Coleman has expressed concern regarding the Zimp

process at MSD and MSD's practice of hauling waste from its small plants to Morris Forman. He has no operations issues with LWC.

Financial Report

Mr. Miller reported on the:

Income and Expense Summary for November 2001

- 1) Total operating revenue of \$85,623,600 is \$3,313,100 or 4.03% more than budgeted and \$4,569,500 or 5.64% more than the same period in 2000.
- 2) Operation and maintenance expense of \$35,510,500 is \$705,400 or 2.03% more than budgeted and \$2,373,800 or 7.16% more than 2000.
- 3) Net operating income of \$29,330,400 is \$767,400 or 2.69% more than budgeted.
- 4) Net income of \$28,329,400 is \$2,039,400 or 7.76% more than budgeted and \$119,000 or 0.42% less than 2000.

Operations and Engineering Report

Mr. Heitzman gave the Operations and Engineering Report for November 2001. Ms. Teasley gave additional emphasis to the Call Center data.

Water Quality and Production

During the month of November, 418 water samples were collected with 5 samples testing positive for coliform. All recheck samples were negative for total coliform.

Water Quality Reporting Notice of Violation

On November 5, 2001 the Company received a Notice of Violation (NOV) from the Division of Water for failing to report an adequate number of bacteriological recheck samples on September 22, 2001. The violation has been investigated by staff, and the Company agrees that the recheck sample results were not properly analyzed within the time period required by State Division of Water protocol. The NOV was reported in the November 10, 2001 edition of the Courier Journal.

Distribution

Main break repairs totaled 53 during November and the backlog of work activity is 1,186 work units. All priority work is being completed on a timely basis.

Call Center

Call Center activity of 23,765 in November was down compared to November 2000. This can be attributed to the new Interactive Voice Response system, as well as the mild weather. Abandonment rate is below the 5 percent target at 4.6 percent of calls received, compared to an abandonment rate in November 2000 of 24.8 percent. One hundred percent of accounts were billed on time, and bad debt for the month was \$27,527, or 0.37 percent of sales.

Minority Business Development Award

The Company received the \$1 Million Club Award from the Kentuckiana Minority Supplier Development Council for achieving purchases over \$1.0 million in 2000. This award is given annually to local and regional companies who spend more than \$1.0 million with the minority businesses.

Litigation Report

After proper motion and second, the Board adjourned into closed session for the purpose of discussing litigation, acquisitions of property, and a personnel matter. The Board reconvened into open session without taking any action.

Special Issues

Mr. Miller reported on the:

2002 Water Rate Schedule

At the November 13th meeting of the Board of Water Works, the 2002 Annual Budget was adopted with a provision for an overall 4.25% water rate increase. The proposed rate schedule was developed in accordance with a cost of service study based upon the methods suggested in American Water Works Association Manual M1, Water Rates.

After proper motion and second, the Board adopted the following 2002 Water Rate Schedule:

WATER RATES

**LOUISVILLE WATER COMPANY
LOUISVILLE, KENTUCKY**

BOARD OF WATER WORKS RULES AND REGULATIONS

6.00 RATES

6.01 For the purpose of classifying revenues, and to provide for different classes of rates, there shall be established seven (7) classes of customers and three (3) areas of service.

The classes of customers shall be identified as:

- Residential
- Commercial
- Industrial
- Fire Service
- Fire Hydrants
- Municipal
- Wholesale

The areas of service shall be identified as:

- Retail Service Area
- Kentucky Turnpike #1 Area
- Kentucky Turnpike #2 Area

6.02 The rate charge for metered water service shall be comprised of three components except for municipal customers as defined in KRS 96.270 who shall be served as

provided therein at no cost to the customer and publicly owned fire hydrants:

- (1.) A service charge based on the size of the meter through which the customer receives such service, and
- (2.) A commodity charge based on the amount of water consumed, and
- (3.) An elevated service area surcharge, if applicable, in Rule 6.02.03.

6.02.01 Service Charge

The service charge for classes of customers taking metered service and situated within the Retail Service Area shall be charged in accordance with the following schedule:

<u>Meter Size</u>	<u>Service Charge</u> <u>Monthly Bill</u>	
5/8" x 3/4"	\$	4.25
1"	\$	10.63
1 1/2"	\$	21.25
2"	\$	34.00
3"	\$	74.38
4"	\$	127.50
6"	\$	297.50
8"	\$	531.25
10"	\$	807.50
12"	\$	1,232.50
16"	\$	2,443.75

The service charge for customer classes situated within the Kentucky Turnpike #1 area shall be charged in accordance with the following schedule:

<u>Meter Size</u>				
5/8" x 3/4"	\$	6.00	+	4.25 = 10.25
1"	\$	24.00	+	10.63 = 34.63
1 1/2"	\$	54.00	+	21.25 = 75.25
2"	\$	96.00	+	34.00 = 130.00
3"	\$	216.00	+	74.38 = 290.38
4"	\$	384.00	+	127.50 = 511.50
6"	\$	864.00	+	297.50 = 1,161.50

6.02.2 Commodity Charge

The commodity charge for monthly usage for customers within the Retail Service Area and the Kentucky Turnpike #1 area shall be computed in accordance with the following schedule:

Thousand Gallons Per
Month

First	3	at \$1.57 Per 1,000 Gallons
Next	3	at \$1.72 Per 1,000 Gallons
Next	194	at \$1.96 Per 1,000 Gallons
Next	1,300	at \$1.83 Per 1,000 Gallons
Next	3,500	at \$1.64 Per 1,000 Gallons
Next	5,000	at \$1.25 Per 1,000 Gallons
All Over	10,000	at \$1.16 Per 1,000 Gallons

The commodity charge for monthly usage within the Kentucky Turnpike #2 area shall be computed in accordance with the following schedule:

Thousand Gallons Per
Month

5/8 inch and ¾ inch connection		
First	2	\$15.67 Monthly Minimum
Next	3	at \$4.75 per 1,000 gallons
Next	5	at \$4.27 per 1,000 gallons
Next	15	at \$4.04 per 1,000 gallons
Next	25	at \$3.55 per 1,000 gallons
1 inch connection		
First	5	\$29.92 Monthly Minimum
Next	5	at \$4.27 per 1,000 gallons
Next	15	at \$4.04 per 1,000 gallons
Next	25	at \$3.55 per 1,000 gallons
1 ½ inch to 4 inch connection		
First	10	\$51.27 Monthly Minimum
Next	15	at \$4.04 per 1,000 gallons
Next	25	at \$3.55 per 1,000 gallons
Bernheim Forest		\$100.00 per month
City of Shepherdsville		\$1.40 per 1,000 gallons
City of Lebanon Junction		\$1.40 per 1,000 gallons
North Nelson Water District		
Up to	4,000	\$7,880.00
Excess of	4,000	at \$1.75 per 1,000 gallons

6.02.03 Elevated Service Area Surcharge

All customers shall pay a surcharge of \$0.19 per thousand gallons if water must be delivered at a higher elevation than the general pressure plane served by the Crescent Hill / Cardinal Hill System.

6.03 Wholesale Customers

Wholesale customers which purchase water for resale wherever situated shall be charged: \$1.16 per thousand gallons for all water purchased, the elevated service area surcharge specified in Rule 6.02.3, if applicable, and the service charge specified in Rule 6.02.1.

6.04 Fire Service Charges

The charge for fire service, where water may be taken for fire protection only, shall be in accordance with the following schedule. This charge will also be applicable to such fire hydrants as may be provided by private agencies.

<u>Size</u>	<u>Monthly Charge</u>
4"	\$ 11.75
6"	\$ 24.00
8"	\$ 46.50
10"	\$ 91.75
12"	\$ 184.00

6.05 At the Company's option, bills may be rendered monthly or bimonthly.

6.06 In the event that payment for any charge is not made within twenty (20) days from the billing date, the net amount of the bill shall be increased by 5% and the gross amount thus determined must be paid.

6.07 Where water is used without proper authorization, the estimated quantity of unmetered water used shall be paid for at the rate of \$10.00 per thousand gallons.

6.08 Water taken from a Louisville Water Company public fill station shall be paid for at the rate of \$2.50 per thousand gallons plus such deposits as may be established from time to time.

Upon adoption, these rates shall become effective for water service on and after January 1, 2002.

Mr. Heitzman reported on the:

2002 Service Installation and Temporary Meter Fees (Service Rule 1.04)

In compliance with Service Rule 1.04 new customers are charged the cost of installation of the water service pipe and meter vault. This charge is a flat fee or deposit approximating the anticipated cost of the installation. While average service installation costs increased for ¾-inch domestic services, installation costs for 6-inch and 8-inch fire services and ¾-inch retrofit irrigation services decreased. The increase in installation costs for ¾-inch domestic services is attributed primarily to two factors. First, the number of service installations in a rock environment increased significantly, 52%, in 2001 as compared to the number in 2000. The second major factor contributing to the increase in costs is an increase of 11% in the number of ¾-inch service installations in 2001 as compared to the number installed in 2000.

After proper motion and second, the Board voted that the installation fees for 6-inch and 8-inch fire services, and ¾-inch retrofit irrigation services be decreased in 2002, and that the remaining fees in effect during 2001 remain the same for 2002, as outlined in the following schedule:

PROPOSED 2002 SERVICE INSTALLATION, TEMPORARY METER, FIRE FLOW TEST FEES

SERVICE INSTALLATION

<u>SIZE</u>	<u>TYPE</u>	<u>EXISTING 2001 FEE</u>	<u>PREVIOUS 3 YR. AVG.</u>	<u>PROPOSED 2002 FEE</u>

Certified Fire Flow Test	\$250.00	\$250.00

Mr. Gregory and Mr. Miller presented a request for:

Authorization for Final Design and Proposal for Project 01-489: Financial Decision Support and Executive Support System

One of LWC's primary business tasks is to manage and report the financial performance of the Company. The use of appropriate Information Supply Systems for financial management and processing allow:

- The business to recognize and respond quickly to changes in business environment.
- Detailed activity based cost information sharing at all levels of the organization to support process and system performance measurement analysis.
- Empowered employees to make decisions by providing them with the right information, in the right format, at the right time.
- Significant changes in work processes for cost control, increased productivity, effectiveness, customer satisfaction, and to reduce the cost of poor quality.

The existing financial computer systems and applications have been in place since the early 1970's and have adequately served the company over its life. The system is reaching the end of its useful life and is becoming unsustainable. The 2001-2003 Information Technology Strategic Plan outlines several strategies to upgrade and replace our core computer systems with integrated, industry standard software packages, of which the existing financial systems and applications are a part. Management and staff recommend investing capital budget dollars in the re-engineering of our financial business processes and replacement of the existing set of computer programs and applications with such a package.

After proper motion and second, the Board voted to authorize final design and solicitation of proposals for Project 01-489: Financial Decision Support and Executive Support System at an estimated cost of \$3,850,000.

Mr. Miller reported on the:

Declaration of Dividend to City of Louisville

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Commissioners of the Sinking Fund an annual dividend on the Louisville Water Company stock owned by the City. The dividend is to be paid in quarterly installments, such payments to be based on estimated annual net income and as nearly equal in amount as possible. The projected

dividend for 2001 based on the latest estimated annual net income before extraordinary items of \$28,692,430 is \$12,599,250.

After proper motion and second, the Board adopted a resolution to declare the fourth quarterly 2001 dividend in the amount of \$3,519,000. This resolution provides for a total quarterly payment of \$3,544,064.

Bid Tabulations

Mr. Miller reported on:

00-56 Ductile Iron Pipe and Fittings

On December 13, 2000, bids were opened to award a one-year contract, renewable for up to four (4) additional years at the sole discretion of the Louisville Water Company, for ductile iron pipe and fittings. This is the 1st Producers Price Index renewal.

U.S. Pipe and Foundry	Pipe & Std. Fittings	\$1,866,171.90
Hughes Supply Co.	Non-Std. Fittings	\$ 174,098.27
Griffin Pipe Co.	Non-Std. Fittings	\$ 3,465.21
	TOTAL	\$2,043,735.38

After proper motion and second, the board voted to award a one-year PPI renewal totaling an estimated amount of \$2,043,735.38 to U.S. Pipe and Foundry, Hughes Supply Co., and Griffin Pipe Co. This PPI renewal represents a 5% increase as dictated by the Bureau of Labor Statistics, but, based on the last 12 months usage, it reflects a 1.6% decrease over last years estimated expenditures.

01-48 Restraint Joint Clamps

On November 21, 2001, bids were opened to award a two-year contract for restraint joint clamps. These clamps are used in the installation of water mains for restraint of fittings and appurtenances. A total of 3 bids were submitted with the lowest, most responsive bids from Hughes Supply Company for an estimated two-year total of \$386,030.00

After proper motion and second, the Board voted to award a two-year contract totaling an estimated \$386,030.00 to Hughes Supply Company. This bid represents an approximate 2% increase in unit prices from the previous bid.

Mr. Heitzman reported on:

01-203 & 01-204 Broad Run Road and Stout Road Water Main Ext.

Bids were received Wednesday, November 21, 2001, to install 24,245 lineal feet of 12-inch, 8-inch, 6-inch, and 4-inch Ductile Iron and PVC water main and to supply and install 280 lineal feet of 2-inch HDPE water main along Broad Run Road from the top of the hill on Broad Run Road to Stout Road, Stout Road from Broad Run Road to end, and Broad Run Road from Back Run road to the Jefferson County/Bullitt County line. A total of six (6) bids were received from qualified contracting firms.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$754,930.00 to Southern Pipeline Construction Co. to install water facilities associated with this project.

01-205 Top Hill Road Area Water Main Extension Project

Bids were received Wednesday, November 28, 2001, to install 25,557 lineal feet of 8, 6 and 4-inch water main along Top Hill Rd, Mitchell Hill Rd, Goff Ln and Snawder Ln. This project is identified in the County-Wide Water Extension Program in Extension Area Three. A total of eight bids were received from qualified contracting firms. The low responsive base bid in the amount of \$621,378.00 was submitted by Flynn Brothers Contracting, Inc. The low bid is lower than the Engineer's Estimate by \$264,729.00 or 43%.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$621,378.00 to Flynn Brothers Contracting, Inc.

01-504 Forest Drive - Main Replacement Project

Bids were received and opened Wednesday, November 7, 2001 to supply and install 2,710 linear feet of 8-inch HDPE water line along Forest Drive between Preston Highway and Forest Drive (north). Included with the project are the installation/renewal of 5 fire hydrants and 29 customer services. A total of 5 bids were received and opened from pre-qualified contractors. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$149,685 resulting in a total project cost of \$170,785. This bid was evaluated based on cost, time of completion, and MBE/WBE subcontractor utilization. The bid is 25% under the Project Manager's Estimate.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$149,685 to MAC Construction to supply and install the water facilities associated with this project.

01-519 Lead Service Renewals (Dixie/Algonquin Area)

Bids were received and opened Wednesday, November 14, 2001 to renew a total of 192 lead services in the Dixie/Algonquin Area of western Louisville. Work will include service renewals on Lee Street, Bolling Avenue, and Cypress Street. A total of 4 bids were received and opened from pre-qualified contractors. Tom Brown Construction submitted the lowest responsive bid in the amount of \$147,200 resulting in a total project cost of \$183,680. The bid is 8.5% under the Project Manager's Estimate.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$147,200 to Tom Brown Construction to renew the lead services associated with this project.

02-672 Billtown 12-Inch

Bids were received Wednesday, November 28, 2001, to Furnish and Install approximately 4000 lineal feet of 12-inch water main on the west side of Billtown Road between St. Rene Road and Ruckriegle Parkway. A total of two bids were received from qualified contracting firms. The low responsive base bid in the amount of \$338,400 was submitted by C Squared Inc. The low bid is above the engineer's estimate by \$116,400 or 52%. Non-bidders identified supply of material, rock removal, being too busy for such a tough project as reasons they did not submit bids.

After proper motion and second, the board voted to authorize the Chief Engineer to award a contract in the amount of \$338,400 to C Squared Inc. to install water facilities associated with this project.

99-641 Old Taylorsville Road Water Main Ext.

Bids were received Wednesday, November 7, 2001, to install 5,215 feet of 8-inch, 6-inch, and 4-inch Ductile Iron water main along Old Taylorsville Road between Taylorsville Lake Road (Hwy. 155) and Hwy.

148. This project is identified in the County-Wide Extension Program in Extension Area 3. A total of six (6) bids were received from qualified contracting firms. The bids were evaluated based on price, MBE/WBE subcontractor utilization, and completion time. The contractor receiving the highest rating was Tom Brown Construction Co. Their bid amount was \$57,910. This bid was 58% less than the engineer's estimate.

After proper motion and second, the Board voted to authorize the Chief Engineer to award a contract in the amount of \$57,910.00 to Tom Brown Construction Co. to install water facilities associated with this project.

Communications

Mr. Heitzman and Mr. Huber gave a brief report concerning:

LWC involvement with AWWA Research Foundation—Cost and Benefit Analysis

The annual subscription amount for water utilities is based on their annual water production, and the current subscription fee for LWC is \$72,678 annually. Although the subscription is relatively expensive, the return of such investment is significant. Staff strongly recommends that LWC continue its involvement in the AWWA Research Foundation projects.

Table 1 - LWC's Direct Participation in the Research Foundation

Old Business

Mr. Heitzman reported on:

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Broad Run Road: Back Run Road to County Line

An Apportionment Warrant public hearing was held for Broad Run Road: Back Run Road to County Line. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

From commitments at the public informational meeting, the majority of attending property owners advised they were in favor of extension of water service for Broad Run Road: Back Run Road to County Line as proposed at the hearing. The public road Apportionment Warrant project is summarized as follows:

Broad Run Road: Back Run Road to County Line

- Public Hearing – July 12, 2001 – Fern Creek Fire Protection District, Station #3
- 8,800 lineal feet of 8-inch water main
- \$570,000 estimated cost
- 36 eligible properties
- 21 affirmative petitioners

- 58% of eligible properties
- \$5,450 "fair share" per property cost

After proper motion and second, the Board voted to identify the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265 and refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Issuance of Apportionment Warrants per KRS 96.265 Bradbe Road: Routt Road to Hwy 155

A public hearing was held September 30, 1999 for the extension of water service along Bradbe Road: Routt Road to Hwy 155. The Board of Water Works adopted a resolution for Bradbe Road: Routt Road to Hwy 155 on November 9, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 43, Series 1999 on December 16, 1999 for the Bradbe Road: Routt Road to Hwy 155 project. The construction contract was awarded to S&S and Associates, Inc. in December 2000 and the water main was placed in service on July 2, 2001.

After proper motion and second, the Board voted to issue Apportionment Warrants and liens against 18 benefited properties along Bradbe Road: Routt Road to Hwy 155 in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265 Routt Road: Existing Water Main to Old Heady Road (North)

A public hearing was held June 3, 1999 for the extension of water service along Routt Road: Existing Water Main to Old Heady Road (North). The Board of Water Works adopted a resolution for Routt Road: Existing Water Main to Old Heady Road (North) on July 13, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 26, Series 1999 on August 10, 1999 (a copy of which is attached) for the Routt Road: Existing Water Main to Old Heady Road (North) project. The construction contract was awarded to Reynolds, Inc. in December 2000 and the water main was placed in service on November 7, 2001.

After motion by Mr. Bond with great enthusiasm and second by Ms. Welsh, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 32 benefited properties along Routt Road: Existing Water Main to Old Heady Road (North) in accordance with KRS. 96.265, as described.

New Business

Mr. Heitzman reported on:

Project 01-703: Oldham County Highway 329 Elevated Water Tank

Proposed under the 2001 Capital Budget are funds for construction of a new storage facility required to support system growth in Oldham County. The proposed facility will consist of a 500,000-gallon waterspheroid elevated steel storage tank operating within an enlarged 940 pressure zone, located on Highway 329 adjacent to the Apple Patch Community Development. The budget for the proposed project is \$975,000. The sources of funding for this project are bonds and the system development charge.

After proper motion and second, the board voted to authorize engineering design and advertisement for bid for the subject project. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Consulting Engineering Services – KY Highway 1020 – LWC Project 01-745A

In August 2001 the Transmission Program presented the results of a RFP for Transmission Program Consulting Proposals to the Board of Water Works. These proposals are to be used on projects identified for outsourcing to consultants. Four firms have been selected and approved by the Board for solicitation of cost proposals. A Cost proposal was requested, from PEH Engineers, Inc. (PEH), for engineering and contract administration services for the design of a 16" main between North Lakeview Drive and Brooks Hill Road, in Northern Bullitt County. PEH Engineers submitted a cost proposal in the amount of \$94,483.25, which is \$6,556.79 more than the independent estimate of \$87,926. This cost difference is due to anticipated easement acquisition. This cost proposal is judged to be fair and reasonable.

After proper motion and second, the Board voted to authorize an engineering service contract with PEH Engineers in the amount of \$94,483.25 and advertise for bid Project 01-745A KY Highway 1020 16" transmission main.

Mr. Miller reported on:

Retiree Medical Insurance

Louisville Water Company provides medical insurance to former employees who retired prior to conversion of our retirement program to CERS in 1990 and to their eligible dependents. Of the 100 policies remaining, 99 are covered by Medicare plans for which retirees pay a portion of the premium. The continuing diminution of the size of the group presents some marketing challenges each year.

Currently 20 of our retirees are covered under a Humana HMO Medicare plan that provides needed coverage against escalating prescription drug costs. In September, Humana announced that it would be discontinuing this plan in our area effective January 1, 2002 citing the federal government's inadequate reimbursement to cover these Medicare enrollees. The loss of this plan would effectively remove prescription drug coverage for our retirees. To fill this gap, LWC considered many potential policies including group and individual HMO plans. LWC recommends placing coverage for a Medicare HMO plan through Anthem.

After proper motion and second, the board approved the contract for Anthem Blue Cross/Blue Shield in the amount of \$110,000.

Mr. Heitzman reported on:

Rock Saw Purchase for Service Line Installations

In 1996, the Company initiated a partnership with Union Local 1683 to pilot installation of new service lines with in-house construction crews. The program, now in its fifth year, has been successful saving over \$2.4 million in costs compared to competitively bid contract pricing. The Middletown Natural Work Team of 18 employees (15 Union and 3 staff) has accomplished this success through a combination of self-direction, empowerment, and the use of quality tools and techniques.

Over 4,500 services are expected to be installed in 2002. Louisville Water Company crews will install 85 percent, while contractors will install 15 percent. The overall costs for installation of small services have increased in 2001. Two factors have attributed to the rise in costs. The first is the quantity, or percentage, of work shifted to contractors, due to these capacity limitations and second, the increased number of rock installations in the service area. The Middletown Team has evaluated various alternatives to decrease costs, including evaluating new technology, equipment, work processes, and job reporting locations. The most immediate cost savings can be achieved through purchase of a rock saw to install small services in solid rock.

After proper motion and second, the Board voted to establish a project budget of \$75,000 for purchase of a rock saw, and proceed to advertise, bid, and award the equipment purchase.

The meeting adjourned at 2:45 p.m.

The next meeting will be on January 15, 2002, the third Tuesday of the month.

**RESOLUTION TO DECLARE FOURTH QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 13, 2001 to adjust the 2000 annual dividend by \$100,256 from \$12,776,325 to \$12,876,681, the difference to be added in equal quarterly installments to the quarterly 2001 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the Louisville Water Company estimated annual net income before extraordinary items for 2001 is \$28,692,430 and the projected annual dividend computed in the manner specified in the 1992 Bond Resolution is \$12,599,250 and considering dividends declared earlier this year, it would be in order at this time to declare a regular fourth quarter dividend of \$3,519,000,

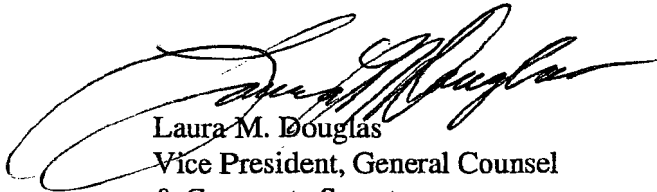

RESOLVED, the regular fourth quarter 2001 dividend of \$3,519,000 is hereby declared, and further,

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,544,064 to the Louisville and Jefferson County Revenue Commission on December 30, 2001, this being the fourth quarterly dividend for 2001 plus one quarter of the dividend adjustment for 2000, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

CERTIFICATION

This is to certify that the following *Broad Run Road: Back Run Road to County Line*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on December 11, 2001, a quorum being present.

Signed,

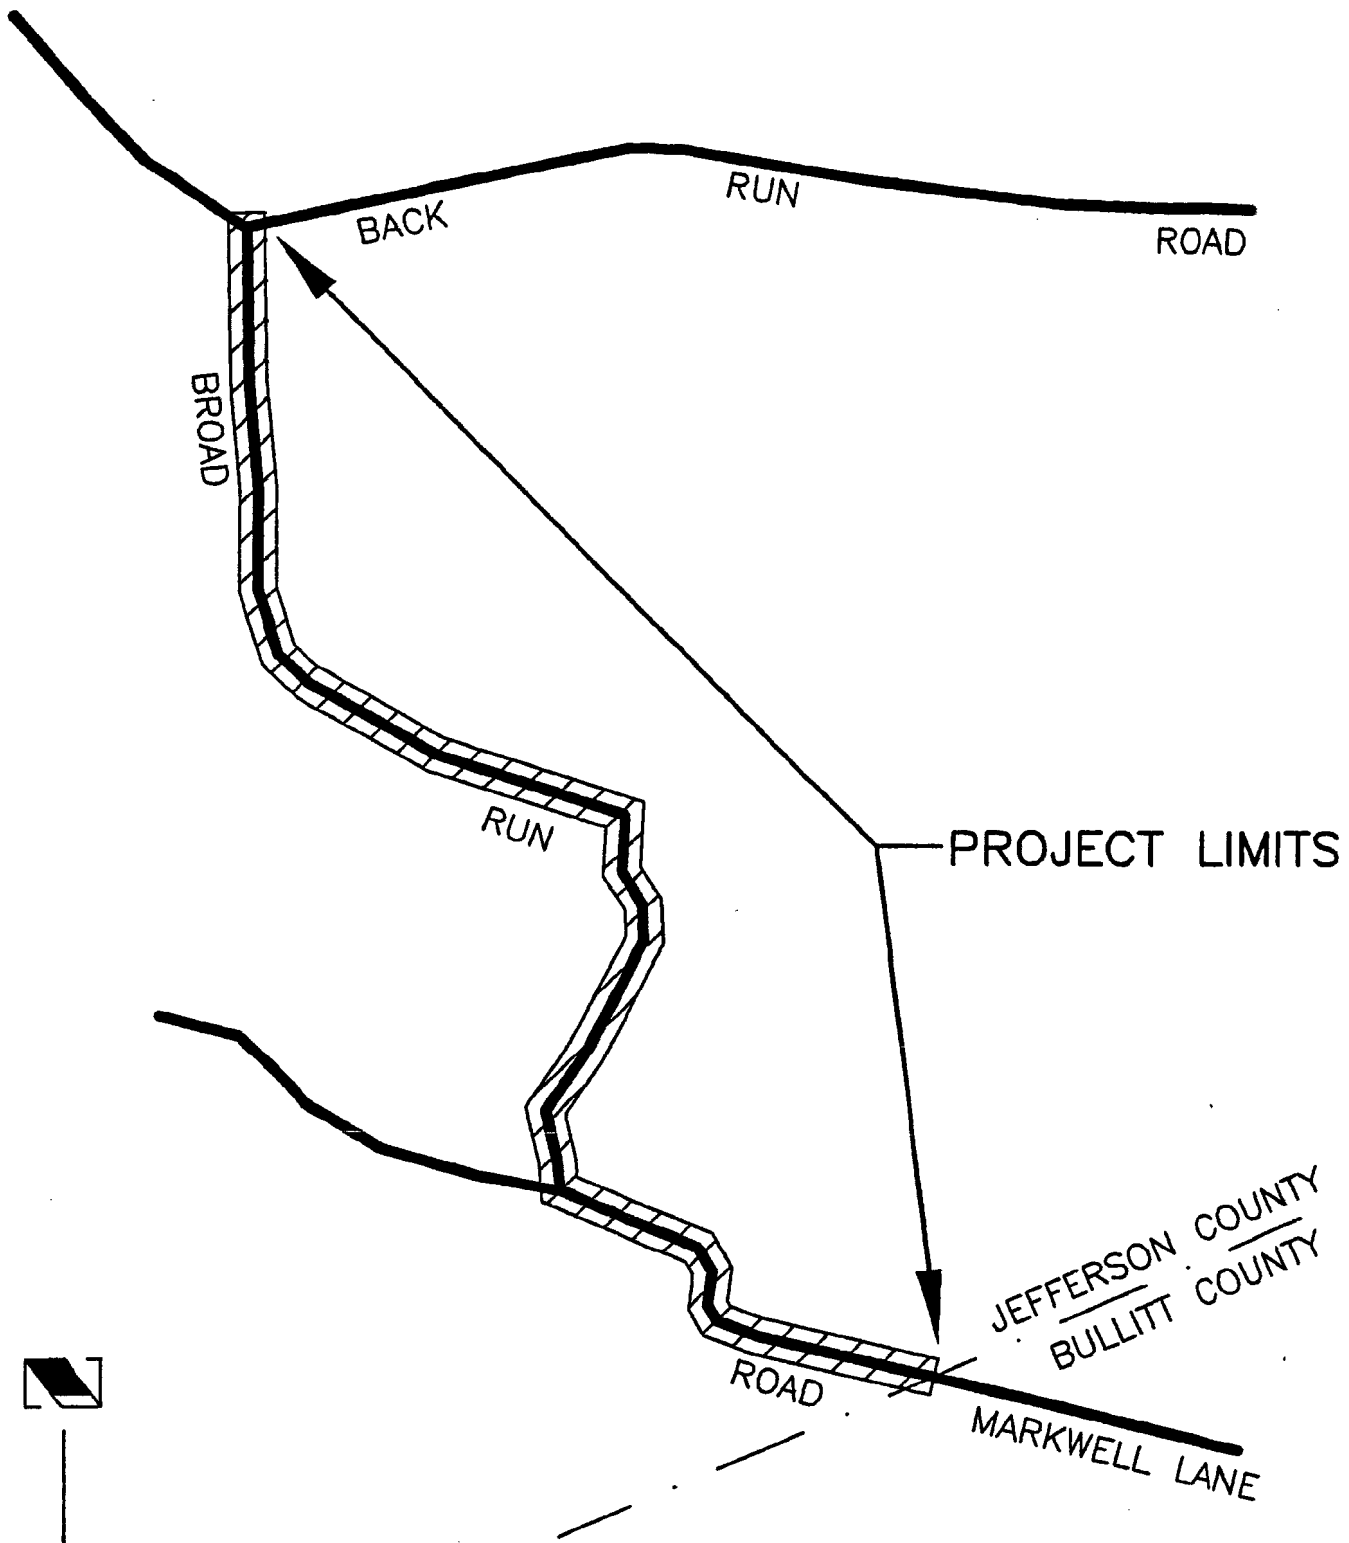

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

**Board of Water Works
Resolution**

December 11, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Broad Run Road: Back Run Road to County Line**, a public way in Jefferson County, and acting thereon convened a public hearing on April 5, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Broad Run Road: Back Run Road to County Line**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Broad Run Road: Back Run Road to County Line**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

**ADVERTISEMENT FOR
PUBLIC HEARING**

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Broad Run Road: Back Run Road to County Line (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Broad Run Road: Back Run Road to County Line.

This public hearing will be held on Thursday, July 12, 2001 at 6:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Routt Road.

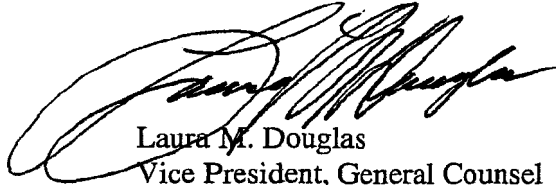

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

CERTIFICATION

This is to certify that the following *Bradbe Road: Routt Road to HWY 155*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on December 11, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Bradbe Road: Routt Road to Hwy 155** main extension project authorized by Ordinance No. 43, Series 1999 of the Jefferson Fiscal Court, adopted on December 16, 1999 such warrants to be against eighteen (18) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following *Routt Road: Existing Water Main to Old Heady Road (North)*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on December 11, 2001, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Routt Road: Existing Water Main to Old Heady Road (North)** main extension project authorized by Ordinance No. 26, Series 1999 of the Jefferson Fiscal Court, adopted on August 10, 1999 such warrants to be against 32 benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

RELEASE OF LIEN

RUN DATE 12/04/01
 RUN TIME 14:46:27

**Minutes of Regular Meeting
Board of Water Works
January 15, 2002**

Board Members Present

Mr. Phillip Bond
Ms. Wendy Welsh
Mr. Owen Hammons
Mr. Jack Segell
Mr. Stewart Connor
Mr. Stephen Gault

Board Members Absent

The Honorable David L. Armstrong, Mayor

Others Present

Mr. John Huber
Ms. Laura Douglas
Mr. Robert Miller
Mr. Gregory Heitzman
Mr. Jim Wehrle
Mr. Steve Hubbs
Ms. Kay Ball
Ms. Amber Halloran
Mr. Vince Guenther
Ms. Barbara Crow
Mr. Larry Lenahan
Ms. Ellen Mackin
Mr. Don McKay
Mr. Bret Russell

The meeting was called to order at 12:30 P.M.

Mr. Huber began the meeting by stating that Item E under New Business would be moved to Special Issues as Item B. Mr. Huber also indicated that we would be presenting 2001 closing statements today. This was the earliest they have ever been available.

CONSENT AGENDA

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$50,000

Item A: Minutes of Regular Meeting Held **December 11, 2001**
Request: Approve Minutes

Item B: Claims Paid During **December, 2001**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

Developer Installed Refunding Main Extension Projects	Total Project Cost	Net Cost To LWC
Pine Valley Estates Section 2 (Project No. 01-029)	\$47,585.00	
The Estates of Innisbrook (Project No. 01-055)	\$37,600.00	\$6,400.00
Indian Falls Phase 2 Section 5 (Project No. 01-056)	\$51,295.00	\$4,750.00

Sole Source	Orcom AS/400 Software Subscription	\$42,031.00
Procurement of Professional Services		Total Project Cost
Project No.	Project Name	
Professional Service	Contract Renewal for Engineering/Project Management Services	\$49,300.00

The consent agenda was approved.

REPORT OF OFFICERS

Administrative Report

Mr. Huber indicated that all of the items upon which he had comments would be discussed elsewhere in the Agenda.

Financial Report

Mr. Miller gave the Income and Expense Summary. He also distributed copies of the 2002 Annual Budget to each Board member.

Income and Expense Summary

- 1) Total operating revenue of \$92,769,200 is \$3,004,400 or 3.35% more than budgeted and \$4,513,900 or 5.11% more than the same period in 2000. We sold 0.99% less water in 2001 than the same period in 2000. Water delivered to the mains was 0.22 less than 2000. Water sales were particularly low in December, due to the accelerated billing of some accounts in November and the impact of the economic slowdown in this region.
- 2) Operation and maintenance expense of \$40,046,900 is \$979,400 or 2.51% more than budgeted and \$2,269,000 or 6.01% more than 2000.
- 3) Operating deductions of \$62,823,400 are \$3,046,700 or 5.14% more than budgeted and \$5,610,900 or 9.81% more than 2000.
- 4) Net operating income of \$29,945,800 is \$42,200 or 0.14% less than budgeted.
- 5) Net income of \$28,834,300 is \$1,251,300 or 4.54% more than budgeted and \$283,500 or 0.97% less than 2000. The key drivers for this variance are the additional interest earned on the investment of bond proceeds and savings on interest expenses from refinancing bonds. Considering the dividends already declared in 2001, and assuming to additional journal entries, the additional dividend to be paid in 2002 is \$49,834.

Capital Projects Summary

The capital program as shown on the Capital Projects Summary reflects net expenditures of \$41,429,479 against a budget of \$79,484,167 including noncompleted previous year projects carried forward. Gross disbursements were \$48,458,615; however, \$7,029,136 was received as reimbursements. Projects committed aggregate \$66,656,367 or 83.86% of budget. Projects in progress or completed to year-end total \$44,322,522 or 56.75% of budget.

GASB 34

The financial statements are now also available in GASB 34 compliant format. Staff will be presenting this new format to the Board of Water Works beginning with the January 2002 financial reports. Management intends to adopt GASB 34 effective with financial statements for the year ending December 31, 2002.

Year-End Processing

The unaudited financial statements for December were available on January 11, 2002. This represents a significant reduction in cycle time from previous years, due to process improvements implemented by the Financial Resources System led by Amber Halloran and the Information Technology System led by Tony Gregory. The outside auditors will begin their work on February 11, 2002, about one week earlier than previous years.

Spend Down of Bond Proceeds

The spend down of the Series 2000 Bonds Construction and Acquisition Fund is on target to be complete by August 2002.

Mr. Huber congratulated Amber Halloran and her staff for the effort they made to successfully close the books five weeks earlier than the company had ever done.

Operations and Engineering Report

Mr. Heitzman gave the Operations and Engineering Report.

Water Quality and Production

Water quality for the month has stabilized, with only three positive coliforms in December. All recheck samples were negative. For the year, Water Quality Goals for Turbidity and Bacti were achieved for the first time since establishing the 99 percent goal. However, goals for chlorine residual and bacteriological samples in the distribution system were not met, falling slightly below the 99.0 percent target, at 98 percent and 98.7 percent respectively. This was attributed to the lower water demands this summer and expansion of our retail service territory into Bullitt County.

Production

December pumpage of 111.6 MGD was down from the average December pumpage of 114.5 MGD, likely attributed to the slight downturn in the economy and the mild weather resulting in fewer main breaks. Pumpage for the year averaged 126.9 MGD, slightly less than the five-year average.

Distribution Center

The Winter Plan is now fully operational. Main breaks for the month totaled 77, compared to 191 in December 2000.

Customer Service

The Call Center volume continues to be lower as a result of the IVR system, and abandonment rates for the month were at 3.2 percent, compared to 30.6 percent in December 2000. The 2001 average abandonment rate was 6.2 percent compared to 11.3 percent in 2000. The investment in technology, training, and staffing in the Call Center has achieved stabilization in this area.

Kentucky Infrastructure Grants

The Kentucky Infrastructure Authority has given preliminary approval for seven water main extension projects in Jefferson and Bullitt County. The projects are: Bearcamp Road; Bearcamp Road-County Boundary; Big Cedar Creek Road; Foley Road; Ironwood Trail; Millers Lane; and Yorkshire Boulevard. These grants, totaling \$590,850, are part of the Governor's program to extend water throughout the state of Kentucky by 2020.

Litigation Report

After proper motion and second, the Board adjourned into closed session for the purpose of discussing litigation, acquisition of property, and a personnel item. The Board reconvened into open session without taking any action in closed session.

REPORT OF COMMITTEES

Compensation Committee

After proper motion and second, the Board voted to adopt the proposed 2002 Performance Matrix and the new Performance Appraisal Process as described by Jim Wehrle at the January 9, 2002 Compensation Committee Meeting. In addition, the Board also voted to fund the \$140,000.00 cost of implementing the new Compensation Matrix as part of the 2002 Budget.

Audit Committee

The Audit Committee report was given by Mr. Bond. He reviewed the Minutes of the Committee Meeting for the Board. No action items were included in the Committee report.

SPECIAL ISSUES

Employee Health, Dental, Disability, and Life Insurance Plans

Ms. Mackin and Mr. McKay reported on the Employee Health, Dental, Disability, and Life Insurance Plans. After proper motion and second, the Board authorized staff to contract with 1) Humana, in the amount of \$2,652,000.00 in order to provide health benefits 2) Delta Dental, in the amount of \$223,000.00 for dental benefits 3) Monumental Life in the amount of \$160,000.00 for life insurance.

Employees will now pay a \$10.00 copay. There will be no formulary. The features of the plan will be communicated carefully to employees. Mr. Huber indicated that LWC Staff would give an Insurance Presentation at the August Board Meeting. This will lay the groundwork for 2003 insurance procurement activity.

2002-2003 Main Replacement and Rehabilitation Program

Mr. Heitzman and Mr. Russell presented information on the 2002-2003 Main Replacement and Rehabilitation Program. The 2002-2003 Capital Budget includes annual funding in the amount of \$10,000,000 for main replacement and rehabilitation and \$500,000 for lead service renewals. The 2002 Main Replacement and Rehabilitation Program (MRRP) includes replacement of 11.1 miles of water main, rehabilitation of 25.5 miles of water main, renewal of approximately 625 lead service lines from main to the property connection, and replacement of approximately 287 fire hydrants. The 2003 program includes replacement of 10.4 miles of water main, rehabilitation of 18.5 miles of water main, renewal of approximately 875 lead service lines, and replacement of approximately 200 fire hydrants. This two-year

program also includes 9.3 miles of alternate replacement projects totaling \$4,330,000. Cost allocation is summarized as follows:

	<u>2002 Primary</u>	<u>2003 Primary</u>	<u>2002-2003 Alternate</u>
Replacement	\$5,055,000	\$5,520,000	\$4,330,000
Rehabilitation	\$4,710,000	\$4,480,000	
Service Line Renewal	\$ 500,000	\$ 500,000	\$ 500,000
Grid Connection	\$ 235,000		\$ 55,000
Total MRRP	<u>\$10,500,000</u>	<u>\$10,50,000</u>	<u>\$5,885,000</u>

MRRP candidates were selected through the use of the Company's Facility Management System, records research, the MRRP Database, the Pipe Evaluation Model (PEM), and staff and executive management reviews using the objectives outlined in the Main Replacement and Rehabilitation Study that was presented to the Board in November 1992.

After proper motion and second, the board authorized Staff to proceed with engineering design and advertisement for bid. Individual bids exceeding \$100,000 will be returned to the Board for authorization to proceed with construction. (The specific projects to be bid are those contained in the booklet distributed to the Board entitled 2002-2003 Main Replacement and Rehabilitation Program, dated January 15, 2002.)

BID TABULATIONS

Mr. Miller Presented:

00-52 Fleet Vehicles

On December 19, 2001, bids were opened to award a one-year contract for the purchase of fleet vehicles. These vehicles are used to perform maintenance and repair on the infrastructure in the field. A total of sixteen bids were submitted with the lowest, most responsive bids from:

Countryside Ford – Items 1, 2, 3 and 10 (Ford Products)	\$290,384.00
Holt Equipment Co. – Item 11 (John Deere)	\$218,000.00
Uebelhor & Sons – Item 8 (Chevrolet C Series)	\$152,976.00
Peterson Truck Center – Items 6 and 7 (GMC C Series)	\$119,211.00
<u>Pearce Motors – Item 4 (Ford Product)</u>	<u>\$ 48,943.10</u>
Byerly Ford – Item 5 (Ford Escape)	<u>\$ 20,129.00</u>
Total for Awards	\$849,643.10

After proper motion and second, the Board authorized Staff to award a one-year contract totaling an estimated \$849,643.10 to the above cited vendors.

01-50 16.9 Oz. Water Bottles

On December 19, 2001, bids were opened to award a one-year contract for LWC Pure Tap, 16.9 oz. water bottles. These bottles are used to promote the Pure Tap Program and LWC water.

After proper motion and second, the Board authorized staff to award a one-year contract totaling an estimated \$165,000.00 to Presence, Inc.

Mr. Heitzman presented:

01-521 Lead Service Renewals (Burwell Avenue)

Bids were received and opened Wednesday, December 12, 2001 to renew a total of 59 lead services along Burwell Avenue between 25th Street and Dixie Highway in the Dixie/Algonquin Area of Louisville. A total of 8 bids were received and opened from pre-qualified contractors. Southern Pipeline submitted the lowest responsive bid in the amount of \$50,373 resulting in a total project cost of \$61,073.

After proper motion and second, the Board authorized Staff to award a contract in the amount of \$50,373 to Southern Pipeline to renew the lead services associated with this project.

01-522 Lead Service Renewals (Dumesnil Street)

Bids were received and opened Wednesday, December 19, 2001 to renew a total of 82 lead services along Dumesnil Street between 26th Street and Dixie Highway in west Louisville. The mains in this area were previously cleaned and cement-lined. This work will complete the renovation of the water distribution system in this area. A total of 6 bids were received and opened from pre-qualified contractors. Tom Brown Construction submitted the lowest responsive bid in the amount of \$82,900 resulting in a total project cost of \$100,060.

After proper motion and second, the Board authorized staff to award a contract in the amount of \$82,900 to Tom Brown Construction to renew the lead services associated with this project.

99-512 Watterson Trail—Main Replacement Project

Bids were received and opened Wednesday, December 5, 2001 to install 3,890 linear feet of 4, 6, 8 and 12-inch water main along Watterson Trail in the Jeffersontown in eastern Jefferson County. Included with the project are the renewal or transfer of 7 fire hydrant and 53 customer services. A total of 5 bids were received and opened from pre-qualified contractors. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$270,350 resulting in a total project cost of \$394,350.

After proper motion and second, the Board authorized Staff to award a contract in the amount of \$270,350 to MAC Construction and Excavating to install the water facilities associated with this project.

COMMUNICATIONS

Mr. Heitzman presented the:

Bullitt County Advisory Board—December 18, 2001 Meeting Summary

The quarterly meeting of the Bullitt County Advisory Board was held December 18, 2001 at 3396 Burkland Boulevard. Mr. Dan Thibodeaux, member of the Advisory Board, attended. Mr. George Miller and Mr. Larry Hatfield were unable to attend. The following key issues were discussed at the meeting:

- The third quarter financial report was provided to the Advisory Board members. Total income for the quarter was \$271,826.73, while total expense for the quarter was \$955,352.17.
- A summary on Capital Projects was reported, including a project status for the I-65 Transmission System, the Bullitt County Extension Program, and Distribution System Improvements. Mr. Thibodeaux expressed concern over the Bullitt County Reserve funding of a 16-inch water main extension project along Lakeview Drive that supports growth into Bullitt County and may not provide a sufficient revenue

stream from new customers. Staff agreed to review the funding source for this project, with potential funding from the Bullitt County System Development Reserve. This item will be discussed at the next meeting.

- The Advisory Board was briefed on the recent preliminary award of \$441,250 in grants from the Kentucky Infrastructure Authority (KIA). Mr. Thibodeaux recommended applying the grant money directly to the Bullitt County Reserve, which will ultimately reduce the water rates in Bullitt County. Staff indicated the grants received are conditional, and that an application process to KIA would follow, identifying any restrictions on the fund allocation. The final allocation of the grant funds will be submitted to the Advisory Board for input in 2002.

The next meeting of the Advisory Board is tentatively scheduled for January 24, 2002.

Legislative Update

Mr. Guenther gave an update concerning federal funding for water utilities and draft bills currently under consideration in Frankfort.

Congress

There are four key pieces of legislation related to terrorism and security currently being considered in Congress:

- HR 3338 – Appropriations for the Department of Defense: Both the Senate and the House have passed appropriations legislation to allow EPA to pay for vulnerability assessments for drinking water systems. The bill provides \$90 million to assess and improve building security at EPA laboratory sites as well as perform drinking water vulnerability assessments. President Bush signed the bill into law on January 10, 2002.
- HR 3178 – Water Infrastructure Security and Research Development Act: The bill allocates \$60 million over 5 years for research and development. EPA shall establish a program of research and development activities to achieve improvements in technologies and related processes for the security of water supply systems. This bill passed the House on December 18, 2001. The Senate version S.1593 only allocates \$12 million and has passed out of committee only.
- HR 3448 – Public Health Security and Bioterrorism Response Act of 2001: The bill relates primarily to protection of the nation's food and drug supplies, federal agency responses to terrorism and the regulation of biotoxins and other agents but there is a provision related to water systems. As currently written the bill requires water systems to conduct vulnerability assessments and revise emergency response plans (ERPs). Compliance would be achieved by certifying to EPA that the assessment and the ERP have been completed. This bill has passed the House. The Senate took up HR 3448 but the Senate version does not mandate vulnerability assessments. The two versions of the bioterrorism bill must go to a House-Senate conference committee to work out the differences.
- S. 1608 – Water Security Grants: The last day of Senate business included the passage of S. 1608, which authorizes \$50 million in grants for basic security measures at drinking water and wastewater facilities. The bill directs EPA to make grants for security measures such as fencing around reservoirs,

intrusion prevention and alert systems, closed circuit television monitoring, entranceway reinforcement and education and training for water system personnel. There is no companion bill in the House.

After the September 11 attack Infrastructure Funding Measures definitely took a back seat to terrorism and vulnerability assessments. New bills are anticipated once Congress reconvenes but there are no specifics at this time.

2002 KY General Assembly

The assembly currently has bills under revision, which touch on the following subjects:

- Merger Legislation
- Fire Service Fees
- Budget
- Terrorism
- Retirement Legislation
- Open Records Request
- Smart Growth

Following are two draft bills that are being considered by the Kentucky Infrastructure Authority and the Public Service Commission. These bills have not been introduced yet but we have received copies of the bill drafts.

- **Public Water Systems Defined Service Territory:** The draft bill defines Public Water Systems to include all utilities, including municipals. The bill would divide the state into geographical areas with defined water service boundaries. Maps would be submitted to the Kentucky Infrastructure Authority (KIA) for certification.

The purpose of the territories is to define the service territory for every utility and make sure that every area of the state has a defined territory so that it is clear what entity is responsible for providing service to this area. Public Water Systems could appeal to the PSC to change the boundaries.

- **Water Transmission Lines:** Allows the PSC to regulate the distribution and use of water transmission lines. The intent of the bill is to take care of many of the “no-growth” advocates who have expressed concern over transmission main spurring development. Only applies to jurisdictional utilities.

OLD BUSINESS

Mr. Miller presented:

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Mitchell Hill Road: From County Line to North 2,950 Feet

An Apportionment Warrant public hearing was held for Mitchell Hill Road: From county line to North 2,950 feet. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265. The public road Apportionment Warrant project is summarized as follows:

Mitchell Hill Road: From county line to North 2,950 feet

- Public Hearing – December 6, 2001 – Fairdale Fire Protection District, Station #1
- 2,950 lineal feet of 8-inch water main
- \$189,000 estimated cost
- 7 eligible properties
- 5 affirmative petitioners
- 71% of eligible properties
- \$5450 “fair share” per property cost
- Attending Officer: Robert K. Miller, Vice-President, Treasurer

After proper motion and second, the board determined that the proposed extension of water service was feasible and beneficial in accordance with KRS 96.265 and referred this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court

Pursuant to KRS 96.265 Lonesome Hollow Road: Joyner Hill Road to Dead End; Joyner Hill Road: Lonesome Hollow Road to East 1,600 Feet; Tidwell Road: Lonesome Hollow Road to East 700 Feet

An Apportionment Warrant public hearing was held for Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to East 1,600 feet; Tidwell Road: Lonesome Hollow Road to East 700 feet. The public road Apportionment Warrant project is summarized as follows:

Lonesome Hollow Road: Joyner Hill Road to Dead End; Joyner Hill Road: Lonesome Hollow Road to East 1,600 Feet; Tidwell Road: Lonesome Hollow Road to East 700 Feet

- Public Hearing – November 29, 2001 – Fairdale Fire Protection District, Station #1
- 6,400 lineal feet of 8-inch water main
- \$372,000 estimated cost
- 33 eligible properties
- 20 affirmative petitioners
- 61% of eligible properties
- \$5450 “fair share” per property cost
- Attending Officer: Robert K. Miller, Vice-President, Treasurer

After proper motion and second, the board determined that the proposed extension of water service was feasible and beneficial in accordance with KRS 96.265 and referred this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Mr. Heitzman presented the:

Issuance of Apportionment Warrants per KRS 96.265 Thurman Road: Echo Trail to Routt Road

A public hearing was held December 2, 1999 for the extension of water service along Thurman Road: Echo Trail to Routt Road. The Board of Water Works adopted a resolution Thurman Road: Echo Trail to Routt Road on January 11, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 3, Series 2000 on February 8, 2000 for the Thurman Road: Echo Trail to Routt Road. The construction

contract was awarded to Reynolds in December 2000. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board adopted a resolution for the issuance of Apportionment Warrants and liens against 25 benefited properties along Thurman Road: Echo Trail to Routt Road in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265 Old Heady Road: Routt Road to County Boundary; Dry Ridge Road: Routt Road to Old Heady Road

Public hearings were held February 17, 2000 and March 9, 2000 for the extension of water service along Old Heady Road: Routt Road to County Boundary and Dry Ridge Road: Routt Road to Old Heady Road, respectively. The Board of Water Works adopted resolutions Old Heady Road: Routt Road to County Boundary and Dry Ridge Road: Routt Road to Old Heady Road on May 8, 2001 and April 11, 2000, respectively, recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board adopted a resolution for the issuance of Apportionment Warrants and liens against 124 benefited properties along Old Heady Road: Routt Road to County Boundary and Dry Ridge Road: Routt Road to Old Heady Road in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265 Hobbs Lane: Clark Station Road to End of Roadway

A public hearing was held October 7, 1999 for the extension of water service along Hobbs Lane: Clark Station Road to End of Roadway. The Board of Water Works adopted a resolution Hobbs Lane: Clark Station Road to End of Roadway on November 9, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board adopted a resolution for the issuance of Apportionment Warrants and liens against 19 benefited properties along Hobbs Lane: Clark Station Road to End of Roadway in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265 Clark Station Road: Shelbyville Road to I-64

A public hearing was held March 25, 1999 for the extension of water service along Clark Station Road: Shelbyville Road to I-64. The Board of Water Works adopted a resolution Clark Station Road: Shelbyville Road to I-64 on April 13, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board adopted a resolution for the issuance of Apportionment Warrants and liens against 49 benefited properties along Clark Station Road: Shelbyville Road to I-64 in accordance with KRS. 96.265, as described.

**Issuance of Apportionment Warrants per KRS 96.265
Routt Road: Old Heady Road to the County Line**

A public hearing was held July 29, 1999 for the extension of water service along Routt Road: Old Heady Road to the County Line. The Board of Water Works adopted a resolution Routt Road: Old Heady Road to the County Line on September 14, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board adopted a resolution for the issuance of Apportionment Warrants and liens against 48 benefited properties along Routt Road: Old Heady Road to the County Line in accordance with KRS. 96.265, as described.

NEW BUSINESS

Mr. Heitzman presented:

Consulting Engineering Services—Kentucky/Glenmary/Oak 48”—LWC Project 01-744

In August 2001 the Transmission Program presented the results of a RFP for Transmission Program Consulting Proposals to the Board of Water Works. These proposals are to be used on projects identified for outsourcing to consultants. Four firms have been selected and approved by the Board for solicitation of cost proposals. A cost proposal was requested, from CH2M Hill Engineers (CH2M Hill), for preliminary engineering services for the route / method selection of an equivalent 60" main between the Grinstead Drive 60" main and the Brook Street 48" main. The four firms that submitted the Transmission Program Consulting Proposals will be considered for the development of final design submittals. CH2M Hill submitted a cost proposal in the amount of \$65,300, which is \$2,738 more than the independent estimate of \$62,562. Design and construction of this main will improve flow availability to center of the City pressure zone and also provide improved reliability to Cardinal Hill Reservoir.

After proper motion and second, the Board authorized staff to enter into an engineering service contract with CH2M Hill Engineers in the amount of \$65,300 for Preliminary Engineering Services.

**Bullitt County Water Improvement Program—Bullitt County Extension Program
Project 02-300, Pine Creek Subdivision Extension Project**

Proposed under the Bullitt County Extension Program is a project for the Pine Creek Subdivision mains for which we have received a 2/3-majority petition. This correspondence presents a proposed project to construct a portion of this program, and requests authorization for engineering design and advertisement for bid. Out of 19 residents along these routes, we have 15 "Letters of Intent" for 79% participation.

After proper motion and second, the Board authorized staff to proceed with engineering design and advertisement for bid for the subject projects. The results of the bids will be presented to the Board with recommendation for contract award.

**Bullitt County Water Improvement Program—Bullitt County Extension Program
Project 02-301, Country Manor Estates Extension Project**

Proposed under the Bullitt County Extension Program is a project for the Country Manor Estates mains for which we have received a 2/3-majority petition. This correspondence presents a proposed project to construct a portion of this program, and requests authorization for engineering design and advertisement for bid. Out of 55 residents along these routes, we have 37 "Letters of Intent" for 67% participation.

After proper motion and second, the Board authorized staff to proceed with engineering design and advertisement for bid for the subject projects. The results of the bids will be presented to the Board with recommendation for contract award.

**Bullitt County Water Improvement Program—Bullitt County Extension Program
Katherine Station Road, Project No. 01-327**

Katherine Station Road is identified in the Bullitt County Extension Program. Though a two-thirds majority interest has not been received, the Kentucky Division of Waste Management (DWM) has approached the Louisville Water Company about extending potable water service to this area due to the presence of a Superfund site. The DWM presented a cost sharing proposal with the Louisville Water Company for extension of a water main on Katherine Station Road.

It is proposed that the Louisville Water Company provide design review and construction inspection oversight to insure that the main is installed to Louisville Water Company standards. It is also proposed that the Louisville Water Company provide fire hydrants to be installed by the DWM's contractor. Materials for the water main installation will be purchased from Louisville Water Company's warehouse stock. The proposed project will consist of the installation of approximately 4,400 linear feet of 8-inch Ductile Iron pipe and 500 linear feet of 8-inch HDPE water main, for the Pond Creek crossing, along Katherine Station Road beginning at Dixie Highway and extending due east.

The total estimated project cost is \$332,086 of which DWM is to pay \$317,086 for materials and construction and the Louisville Water Company would pay \$15,000 for engineering, funded by the Bullitt County Reserve. Since the DWM is intending to make potable water available for purchase to the existing residents along the route, staff recommends that the \$5,450 tapping fee be waived for the existing residents only as the DWM is paying for 95.5% of the total project cost, including the water meter installation fees. Future taps will be subject to a \$5,450 tapping fee and meter installation fees. Any tapping fee collected will be deposited into the Bullitt County Reserve Account.

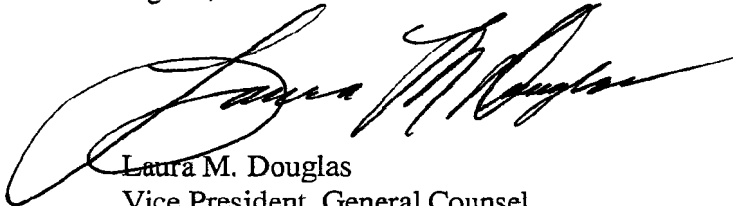

After proper motion and second, the Board authorized staff to proceed with engineering design and construction inspection oversight and provision of fire hydrants for the subject project and to allow the \$5,450 tapping fee to be waived for service taps to existing residences along this water main in consideration of the amount paid by the Kentucky Division of Waste Management (i.e. 95.5% of the total project cost).

The Meeting was Adjourned at 3:25 P.M.

CERTIFICATION

This is to certify that the following *Mitchell Hill Road: From County Line to North 2,950 Feet*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on January 15, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is fluid and cursive, with a large initial "L" and "M".

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

**Board of Water Works
Resolution**

January 15, 2002

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Mitchell Hill Road: From county line to North 2,950 feet**, a public way in Jefferson County, and acting thereon convened a public hearing on December 6, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Treasurer of the Company has recommended the extension of such water along **Mitchell Hill Road: From county line to North 2,950 feet**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Mitchell Hill Road: From county line to North 2,950 feet**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

**Board of Water Works
Resolution**

January 15, 2002

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to East 1,600 feet; Tidwell Road: Lonesome Hollow Road to East 700 feet**, a public way in Jefferson County, and acting thereon convened a public hearing on November 29, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Treasurer of the Company has recommended the extension of such water along **Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to East 1,600 feet; Tidwell Road: Lonesome Hollow Road to East 700 feet**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to East 1,600 feet; Tidwell Road: Lonesome Hollow Road to East 700 feet**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA 

FILE NAME: LONESOME HOLLOW, TIDWELL, JOYNER HILL

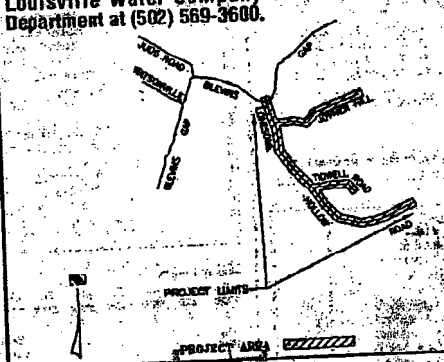

Published in Sunday Edition
November 25, 2001

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Lonesome Hollow Road: From Devils Gap Road to dead end, Joyner Hill Road: Lonesome Hollow Road east 1,600 feet and Tidwell Road: Lonesome Hollow Road east 700 feet (as shown on the map below) to propose the extension of the public water supply system to the property owners along this portion of Lonesome Hollow Road, Joyner Hill Road and Tidwell Road.

This public hearing will be held on Thursday, November 29, 2001 at 6:00 p.m. at the Fairdale Fire Protection District, Station #1, 10015 Mitchell Hill Road.

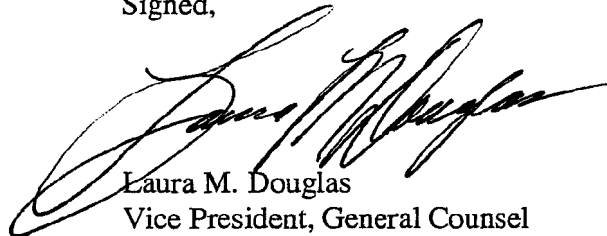

Further information can be obtained by calling Louisville Water Company Customer Service Department at (502) 569-3600.

CERTIFICATION

This is to certify that the following *Thurman Road: Echo Trail to Routt Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on January 15, 2002, a quorum being present.

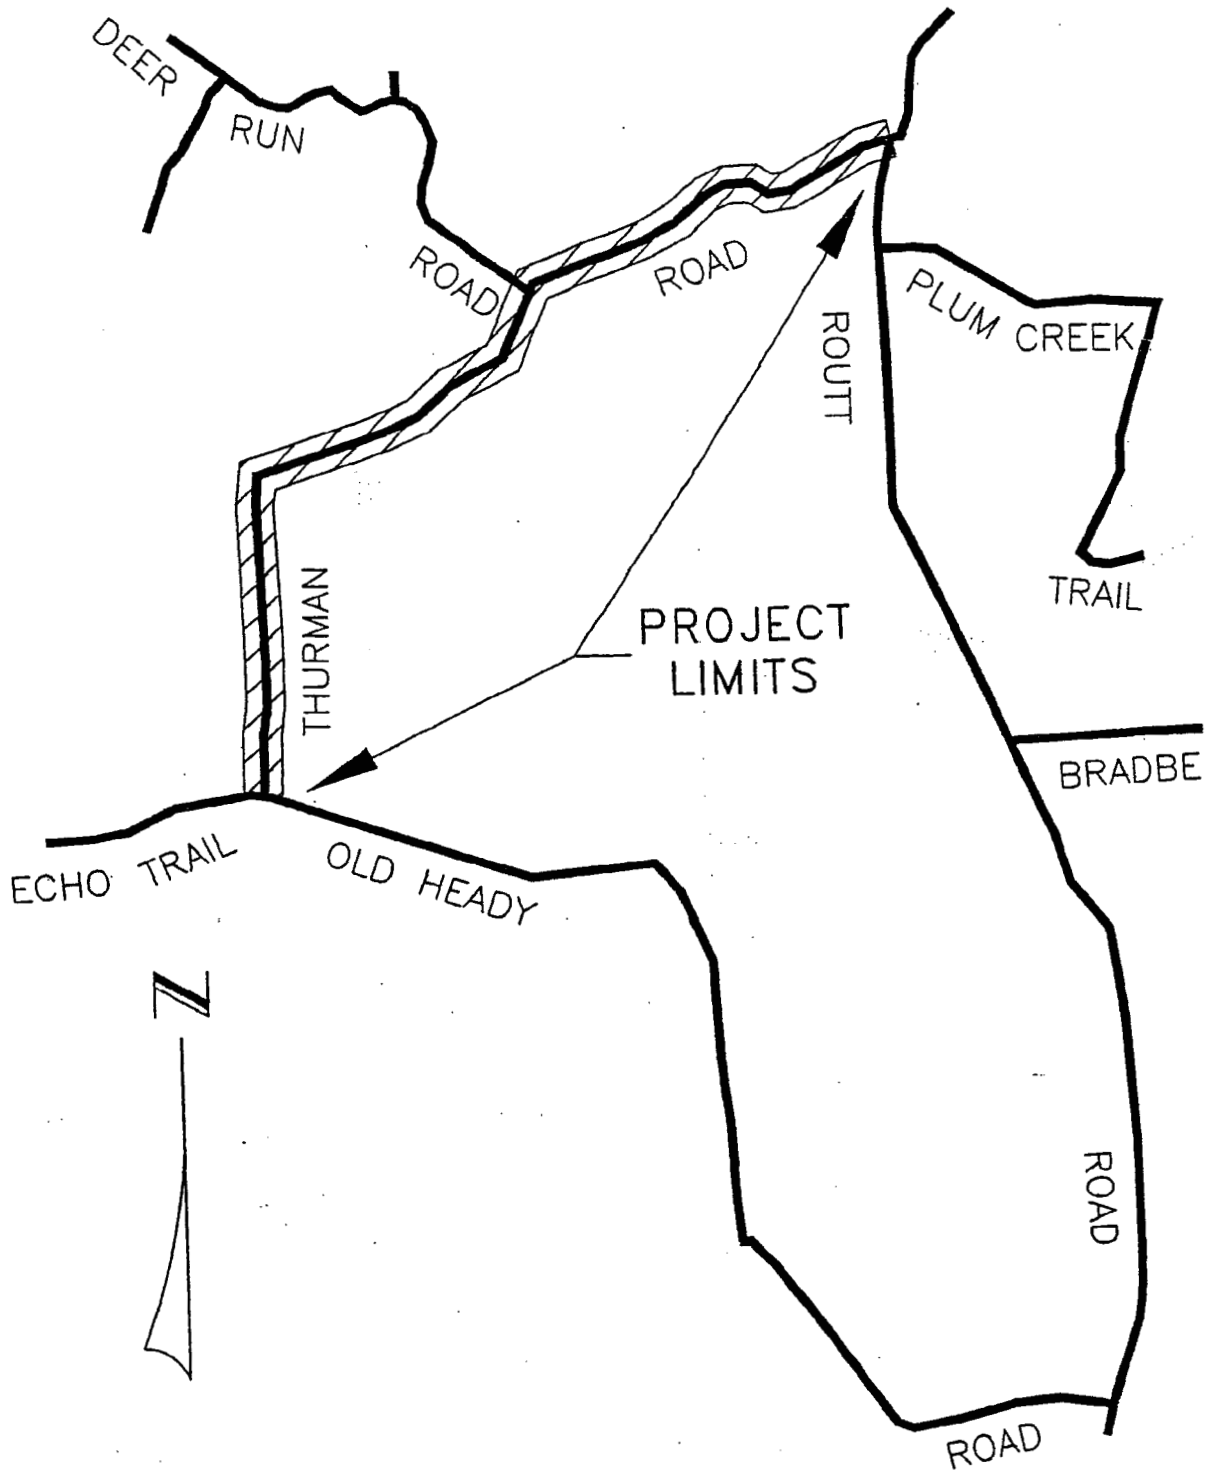

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Thurman Road: Echo Trail to Routt Road** main extension project authorized by Ordinance No. 3, Series 2000 of the Jefferson Fiscal Court, adopted on February 8, 2000 such warrants to be against twenty five (25) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following *Hobbs Lane: Clark Station Road to End of Roadway*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on January 15, 2002, a quorum being present.

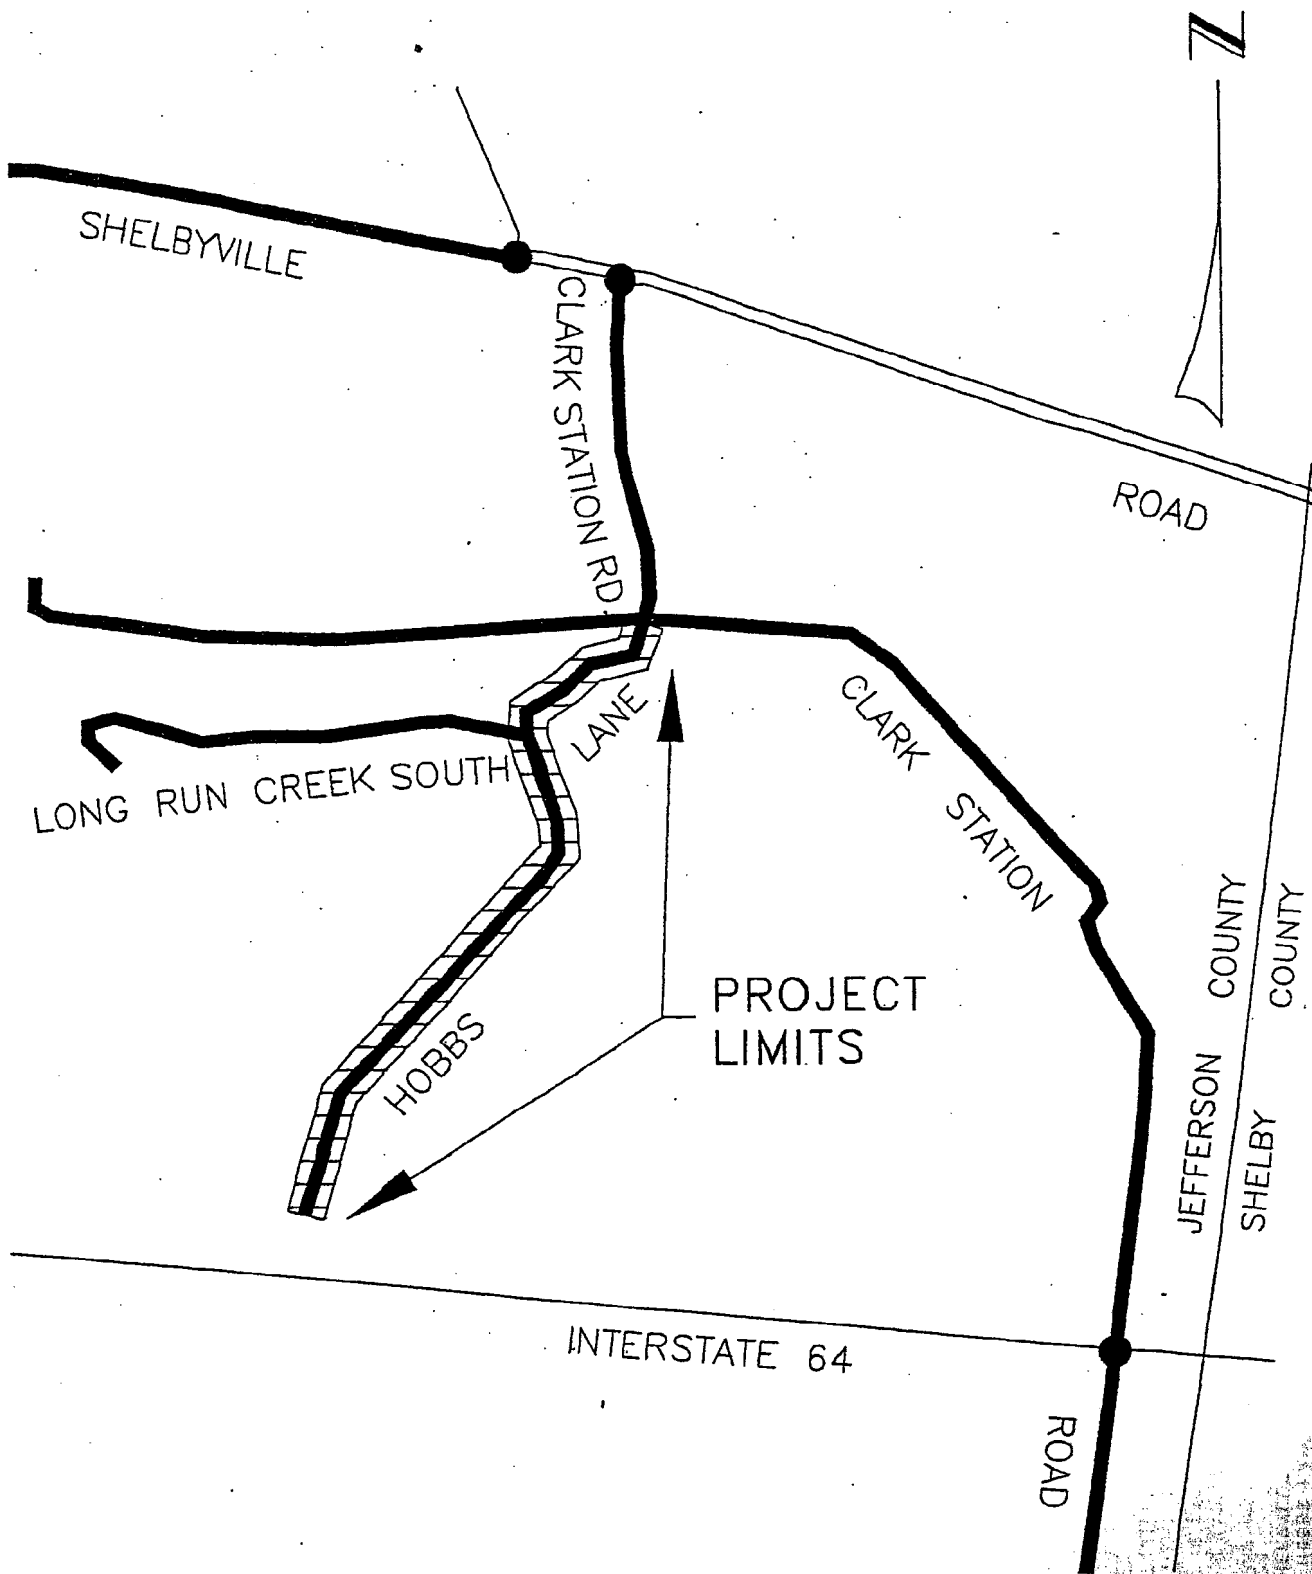

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Hobbs Lane: Clark Station Road to End of Roadway** main extension project authorized by Ordinance No. 44, Series 1999 of the Jefferson Fiscal Court, adopted on December 16, 1999 such warrants to be against nineteen (19) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following *Clark Station Road: Shelbyville Road to I-64*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on January 15, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
& Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Clark Station Road: Shelbyville Road to I-64** main extension project authorized by Ordinance No. 15, Series 1999 of the Jefferson Fiscal Court, adopted on May 11, 1999 such warrants to be against forty nine (49) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**Minutes of Regular Meeting
Board of Water Works
February 12, 2002**

Board Members Present

Mr. Owen Hammons
Mr. Jack Segell
Mr. Stewart Conner
Mr. Stephen Gault

Board Members Absent

Mr. Phillip Bond
Ms. Wendy Welsh
The Honorable David L. Armstrong, Mayor

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel & Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Gregory Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. James Wehrle, Vice President, Assuring Human Resources & Organizational Effectiveness
Mr. Steve Hubbs, Vice President, Supplying, Purifying & Delivering Water
Mr. Anthony Gregory
Mr. Larry Lenahan
Ms. Kay Ball

Mr. Huber called the meeting to order at 12:35 P.M.

CONSENT AGENDA

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$100,000

Item A: Minutes of Regular Meeting Held **January 15, 2002**
Request: Approve Minutes

Item B: Claims Paid During **January, 2002**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

Developer Installed Refunding Main Extension Projects	Total Project Cost	Net Cost To LWC
Timberbend Section 3 (Project No. 99-008)	\$27,390.00	
Southgate VII & Southpoint Water Main Extension (Project No. 01-072)	\$130,520.00	\$19,600.00
Water Glen (Project No. 01-107)	\$24,010.00	

Surcharge/Tapping Fee Water Main Extension Projects 1033 South 7 th Street Rear (Project No. 01-216)	Total Project Cost \$11,800.00	
Metropolitan Sewer District Relocation Projects Oak Hills—Phase IV Assessment and Collector (LWC Project No. 02-406)	Total Project Cost \$6,400.00	Net Cost To LWC
Decker Road Assessment (LWC Project No. 02-410)	\$9,000.00	\$9,000.00
Developer Relocation Projects Dillard's Jefferson Mall Expansion (LWC Project No. 02-405)	Total Project Cost \$114,500.00	Net Cost To LWC
Wal-mart Supercenter (LWC Project No. 01-553)	\$64,700.00	

Item D: Authorization for design and bid of projects (*estimated to cost less than \$200,000*)

Item E: Bid tabulations (*award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid*).

Item F: Award of contracts less than \$100,000.00

Capital Programs

Project No.	Project Name	Total Project Cost
01-039	Campisano Drive, 12" Water Main Extension Project	\$30,000.00
01-071	Rose Island Road—12" Water Main Extension Project	\$55,723.00

Procurement of Goods and Services

Project No.	Project Name	Total Project Cost
01-670	Global Positioning System (GPS) and Accessories	\$45,220.00
01-37	Safety Barricades/Lights/Cones/Caution Tape	\$18,650.00
	Plain Barricades/Lights/Bulbs & Photo Cells	\$17,779.00
	Traffic Cones	\$1,000.00
	Caution Tape	\$200.00
	Bulbs Only	
01-56	Cardinal Hill Reservoir Tank Cleaning	\$33,325.00

Procurement of Sole Source Materials and Services

Project No.	Project Name	Total Project Cost
Sole Source	Intelligent System Control Modules	\$29,796.00
99-402	Riverbank Infiltration: Phase II	\$41,650.00

The Consent Agenda was approved. Mr. Gault abstained from voting on the Consent Agenda.

REPORT OF OFFICERS

Administrative Report

Mr. Huber reported that there is new monitoring technology (real time/on line) installed at the Payne Plant to assist with River Monitoring. Mr. Huber also stated that Mr. Jack Wilson, head of the Division of Water at the State, has retired. LWC is finishing up its MRRP in 2002 and 2003. With less than 50 miles of pipe to do, LWC is looking closely at the street cutting associated with the end of the program. We are interested on cooperative efforts with Aldermen and residents regarding street re-paving associated with work on the remaining residential streets. Our aim is to minimize customer inconvenience.

Financial Report (Under Separate Cover)

Mr. Miller reported on the Income and Expense Summary for January 2002.

Income and Expense Summary

- 1) Total operating revenue of \$6,691,400 is \$698,100 or 9.45% less than budgeted and \$613,000 or 8.39% less than the same period in 2001. We sold 9.33% less water in 2002 than the same period in 2001. Water delivered to the mains was 2.65% less than 2001.
- 2) Operation and maintenance expense of \$2,801,600 is \$158,100 or 5.34% less than budgeted and \$274,200 or 8.91% less than 2001.
- 3) Net operating income of \$1,904,900 is \$633,500 or 24.96% less than budgeted.
- 4) Total non-operating income of \$270,100 is \$8,800 or 3.37% more than budgeted. Total non-operating expense of \$568,500 is \$9,800 or 1.69% less than budgeted.
- 5) Net income of \$1,606,500 is \$614,800 or 27.68% less than budgeted and \$862,400 or 34.93% less than 2001.

Meter Route Changes

Meter reading route improvements are in process to improve the efficiency of the meter reading process. During January and February, the number of days usage on water bills will vary from the typical standard of 58 to 62 days. As a result, the water consumption and revenue recorded during January was significantly lower than normal, while water consumption and revenue recorded during February is expected to be higher, bringing the year-to-date total consumption and revenue through February to a more normal amount. Also, as a result of these changes, there will be higher month-to-month swings in revenue due to the concentration of accounts in one month that are charged an elevated service area surcharge.

2001 Year-End Audit

Crowe Chizek commenced their audit of the year-end 2001 financial statements on February 11, 2002 and anticipates their completion by February 22. LWC significantly improved the preparation work in advance of this earlier-than-usual audit date. Also, staff has completed the preparation for adoption of GASB 34 for the year ending December 31, 2002. Although not required, staff intends to add a Management Discussion and Analysis section to the 2001 Annual Report.

Banking and Lockbox Contracts

LWC currently uses Republic Bank for banking services and uses Fifth Third Bank for lockbox services. Staff is evaluating the performance of each firm for these services for consideration of how the bid should be structured in the future; that is, to determine if these services should be rebundled into one contract as was done in the past.

Timing of the January Financial Results

The financial statements delivered to the Board of Water Works on this date represent the first occasion when actual financial results for January were available in time for consideration at the February Board meeting.

Operations Report

Mr. Heitzman presented the Operations Report for January 2002.

Production and Water Quality

January pumpage averaged 117.6 mgd, slightly higher than the 5-year average for January. A total of 370 water samples were evaluated for the month, with no samples detecting coliform bacteria. No boil water advisories were issued for the month.

Distribution Center

During January 104 main breaks were repaired, compared to 158 in January 2001. The mild winter weather conditions have allowed operations to focus on routine maintenance and reduce the backlog of work orders to 835.

Minority Business Development

During 2001, the Company spent \$1.69 million with certified Minority Business Enterprises (MBE). This is an 18 percent increase in spending compared to the \$1.43 million in 2000. The Evaluated Bid Program Pilot was a measured success in 2001 with 17 projects bid under the program. A total of \$1.3 million of MBE spending and a total of \$217,500 of WBE spending were committed by Louisville Water Company contractors and their subcontractors with the Evaluated Bid Program. This is a 78% increase and a 71% increase respectively, over the \$735,000 MBE commitment and the \$127,500 WBE commitment in 2000, the year the pilot was initiated.

Serving Customers Report

Ms. Teasley gave the Serving Customers Report for January 2002.

Customer Service

The January 2002 abandonment rate was 9.27%, significantly higher than the December rate of 3.18%. This increase is primarily due to higher call volume associated with the RouteSmart project to revise meter reading routes, as well as the rate increase implemented January 1st.

Billing and Bad Debt

Bad debt for the month of January was unusually high, \$93,055, due primarily to bankruptcies. Total bankruptcies for the month were \$60,305, including two large companies – Carbide/Graphite (\$51,778) and Dairy Mart (\$7,158). The number of estimated bills was also up for the month, (7%) due to the RouteSmart implementation.

Bullitt County Advisory Board - Lakeview 16" Main Extension Project Funding

One of the key issues discussed at the January meeting was an old business item relating to the funding by the Bullitt County Water Reserve of a 16-inch water main extension project along Lakeview Drive that supports growth in Bullitt County. During the January meeting, staff presented an approach for funding the project from the Bullitt County System Development Reserve. The use of this funding source would relieve any impact to the Bullitt County Water Reserve. The Advisory Board reached consensus that the Bullitt

County System Development Reserve was an appropriate funding source for the project. LWC staff agreed to fund the project from the Bullitt County System Development Reserve. This matter will be brought before the BOWW for review and action in the near future.

Duty Exchange Program

Anticipating the implementation of Automatic Meter Reading (AMR) in the near future, LWC has discontinued the small duty exchange program. The duty exchange program systematically exchanged 15,000 meters a year, exchanging the entire system over a 20-year period. The decision to implement AMR requires the exchange of all small meters, older than five years in the system. Allowing the system to age has little risk since the system is statistically sample-tested every two years. Allowing the system to age has little risk and will improve the return on investment of AMR.

Litigation Report

After proper motion and second, the Board voted to adjourn to closed session for the purpose of discussing litigation, acquisition of property and a personnel item. Ms. Douglas gave an oral litigation report in closed session. The Board reconvened into open session without taking any action.

REPORT OF COMMITTEES

Public Information and Customer Satisfaction Committee

Ms. Teasley gave the report for the Customer Satisfaction and Public Information Committee meeting held on February 1, 2002.

The Minutes from that meeting can be found on page 155 of the February 12, 2002 Board Book. Ms. Teasley distributed the Customer Satisfaction Index Charts. (Attached) This material showed that at the end of 2001, the CSI score was 840. The Served Customer annual average for the year was 780. Ms. Teasley also distributed a Benchmarking Comparison Chart.

SPECIAL ISSUES

BID TABULATIONS

01-54 Telecommunications System Upgrade, Maintenance, and Support

Proposals were recently received for several items relating to the Company's telecommunications and wide area computer networks from two qualified bidders, E&H Integrated Systems and BellSouth. The scope of the proposal includes upgrades to existing equipment at Crescent Hill and Allmond Ave, installation of a carrier remote system at the Bullitt County office to bring the location into the existing telecommunications network, a two year contract for maintenance and support services on all telephone hardware, software, and equipment and data and voice network services. BellSouth received 99 percentage points and E&H received 76 percentage points. The total cost proposed by BellSouth in the amount of \$390,856.73 is below the project estimate of \$425,000 and is at or below current budget levels.

After proper motion and second, the Board voted to award a contract to BellSouth in the amount of \$390,856.73 for the proposed equipment and support services.

COMMUNICATIONS

Human Resources Effectiveness Index

Mr. Wehrle reported on the HREI Results for 2001.

The HREI survey evaluates several factors, including employee perceptions, safety, productivity, external customer service, diversity, and attendance. This past year, in 2001, LWC surpassed the old record of 777 with an exceptional all-time high score of 799! The key HROE measure is the Employee Perception component of the HREI. This includes factors for quality of work life, diversity, communications, empowerment, trust, teamwork, and leadership. In 2001 LWC surpassed the old Employee Perception record of 583 with an extraordinary all-time high score of 628!!! Every employee is to be complimented on the fact that all this was achieved in such a positive manner.

In the future, the company will be developing its own diversity videos for use in training sessions.

OLD BUSINESS

Ms. Teasley reported the following:

Issuance of Apportionment Warrants per KRS 96.265

Old Heady Road: Thurman Road to Routt Road

A public hearing was held January 27, 2000 for the extension of water service along Old Heady Road: Thurman Road to Routt Road. The Board of Water Works adopted a resolution for Old Heady Road: Thurman Road to Routt Road on February 15, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 7, Series 2000 on March 28, 2000 for the Old Heady Road: Thurman Road to Routt Road. The construction contract was awarded to Reynolds, Inc. in December 2000.

After proper motion and second, the Board adopted a Resolution authorizing the issuance of Apportionment Warrants and liens against 32 benefited properties along Old Heady Road: Thurman Road to Routt Road in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265

Seatonville Road: Existing Water Main to Echo Trail

A public hearing was held November 18, 1999 for the extension of water service along Seatonville Road: Existing Water Main to Echo Trail. The Board of Water Works adopted a resolution for Seatonville Road: Existing Water Main to Echo Trail on December 14, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 5, Series 2000 on February 8, 2000 for Seatonville Road: Existing Water Main to Echo Trail. The construction contract was awarded to Reynolds, Inc. in December 2000.

After proper motion and second, the Board voted to adopt a Resolution issuing Apportionment Warrants and liens against 6 benefited properties along Seatonville Road: Existing Water Main to Echo Trail in accordance with KRS. 96.265, as described.

Amendment of Apportionment Warrant Register

Old Heady Road: Routt Road to County Boundary; Dry Ridge Road: Routt Road to Old Heady Road

The Board approved a resolution for the issuance of Apportionment Warrants for Old Heady Road: Routt Road to County Boundary and Dry Ridge Road: Routt Road to Old Heady Road at its January 15, 2002 meeting in accordance with KRS 96.265. It was determined that Ms. Mundt's property, listed on the Warrant Register, does have frontage on the Old Heady Road: Routt Road to County Boundary water main extension and was not included in the original scope due to incorrect Property Valuation Administrator information. Secondly, the Apportionment Warrant Register approved at the January 15, 2002 Board of Water Works meeting information contained incorrect ownership information for property located at 7903 Old Heady Road (Tax Block 60 Lots 46 and 82). Said property transferred ownership between the final verification of ownership information and the issuance of Apportionment Warrants on January 15, 2002.

After proper motion and second, the Board voted to adopt the Amended Resolution and the amendment of the Apportionment Warrant Register of January 15, 2002, thereby, adding Tax Block 60 Lot 114 (Julie Mundt property) to the apportionment warrant register and correcting the ownership and deed information for Tax Block 60 Lots 46 and 82 in accordance with KRS. 96.265.

Bullitt County Water Improvement Program—Bullitt County Extension Program

Additions to Project 02-300, Pine Creek Subdivision Extension Project

This project was originally presented to the BOWW on January 15, 2002 and approved for engineering design and advertisement for bid in the total project amount of \$184,125. Additional Letters of Intent received have made it possible to add three (3) routes to the already approved project. This correspondence presents these additional routes to the previously approved project 02-300, Pine Creek Subdivision, and requests authorization to expand the scope of this project to include these new routes to leverage economies of scale for project engineering. Out of 49 residents along these routes, we have 36 "Letters of Intent" for 74% participation. The revised total cost of the project is \$503,360. Total capital contributions are estimated at \$201,200.

After proper motion and second, the Board authorized staff to expand the scope of Project 02-300, Pine Creek Subdivision Extension Project, to include the three new routes for an updated total project amount of \$503,360. The results of the bids will be presented to the Board with recommendation for contract award.

Mr. Heitzman reported on the following:

B.E. Payne Water Treatment Plant Improvements LWC Project No. 00-418

Proposed under the 2001 to 2004 Capital Budget are funds for improvements to the B. E. Payne Water Treatment Plant. Staff requests an increase in capital funding for the project and requests authorization to complete the conceptual plan, engineering design and advertisement for bid. The electrical improvements include new 4160 V switch gear and motor control centers, new main transformers, filter control improvements, new switch gear building and separate underground LG&E main feed. Hydraulic improvements include two new 7-10 mgd high lift pumps, extension of the high lift pump building, tie-in to the 36-inch ductile iron line, feed to the 820 pp, stabilization of the 60-inch steel header and installation of hydroneumatic surge tanks on the 60-inch and 36-inch transmission lines. Water quality improvements include filter media replacement, filter underdrain replacement with installation of air scour equipment, filter box improvements, two new backwash pumps and backwash control valve, installation of filter-to-waste piping, and rebuilding existing backwash valves. The approved budget for the project is \$15,125,000. Staff requests a budget increase to \$20,500,000.

After proper motion and second, the Board voted to authorize staff to finalize the conceptual design, proceed with engineering design and advertisement for bid for the subject project. Following bidding the construction contract will be presented to the Board for review and authorization to proceed.

Mr. Heitzman asked the Board to consider an increase in contract funding for contract F-517, LWC Project No. 00-418. This engineering work is related to Project No. 00-418:

B. E. Payne Water Treatment Plant Improvements

Camp, Dresser, and McKee Contract F-517 LWC Project No. 00-418

Camp, Dresser and McKee (CDM) was approved by the Board of Water works at the July 10, 2001 Board meeting to provide design and construction oversight for the B.E. Payne Water Treatment Plant Improvement Project. Preliminary engineering conducted for the project has identified several areas that have been recommended be included in the project, which were outside the original CDM contract scope.

The scope increase includes additional or expanded work in several areas. Additional hydraulic/surge analyses is required to incorporate the proposed extension to the 36-inch transmission main. Preliminary engineering has indicated that the design of additional surge protection is required. The 60-inch plant header will require the design of stabilization and corrosion protection measures. Filter-to-waste facilities will be included in the filter improvement design as well as back wash valve renovation. The PRV vault at US-42 will be retrofitted with reliability improvements. Additional design and investigation work is required for the location of the switch gear building.

After proper motion and second, the Board authorized an increase in contract F-517 of \$126,653 for a total contract amount of \$1,029,882. This amount is 5.6% of the proposed/revised construction estimate and 5.0% of the construction estimate with proposed alternates. The construction cost estimate includes approximately \$1,500,000 in additional construction work outside the original scope. The revised total CDM contract remains over \$150,000 less than the second consultant in the original selection.

NEW BUSINESS

Request Authorization for Final Design and for Procurement and Installation of a Storage Area Network to Support the Information Technology Technical and Data Architectures

Mr. Gregory stated that the Information Technology Strategic Plan provides strategies to meet the challenges and achieve the objectives set forth in the LWC Strategic Plan by using Information Technology as a strategic enabler to leverage technology investments.

One of the Information Technology Systems primary business tasks is to store and manage the Company's data and information in a secure environment to ensure data integrity and the data is accessible for business reporting and analysis. The Technical and Data Architectures have been established to manage this task. The Technical and Data Architectures have evolved since 1994 from a closed, proprietary centralized architecture to Opens Systems architectures and standards, which included the purchase of the Data General corporate servers and Oracle Relational Database Management System. The re-engineering and replacement of our core Information Supply Systems have led to distribution of data processing and storage management to application servers connected to our network. In addition, the Data General platform is nearing the end of its useful life and plans have been made for replacement with more current technology.

To meet these challenges, staff recommends reallocating the existing budget funds in the amount of \$700,000 for the replacement of the Data General systems and allocate additional funding in the amount of \$360,000 to provide the project funding necessary to procure a Storage Area Network that will aggregate data storage management, provide for data security and controlled access to information, and provide for scalable storage to meet our system replacement and expanding data storage and information management needs.

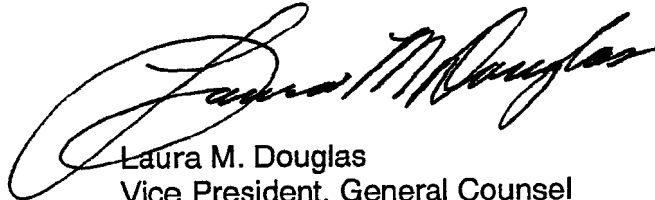

After proper motion and second, the Board voted to authorize final design and bid for the project at an estimated cost of \$1,060,000.

The meeting adjourned at 2:37 P.M.

CERTIFICATION

This is to certify that the following *Old Heady Road: Thurman Road to Routt Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on February 12, 2002, a quorum being present.

Signed,

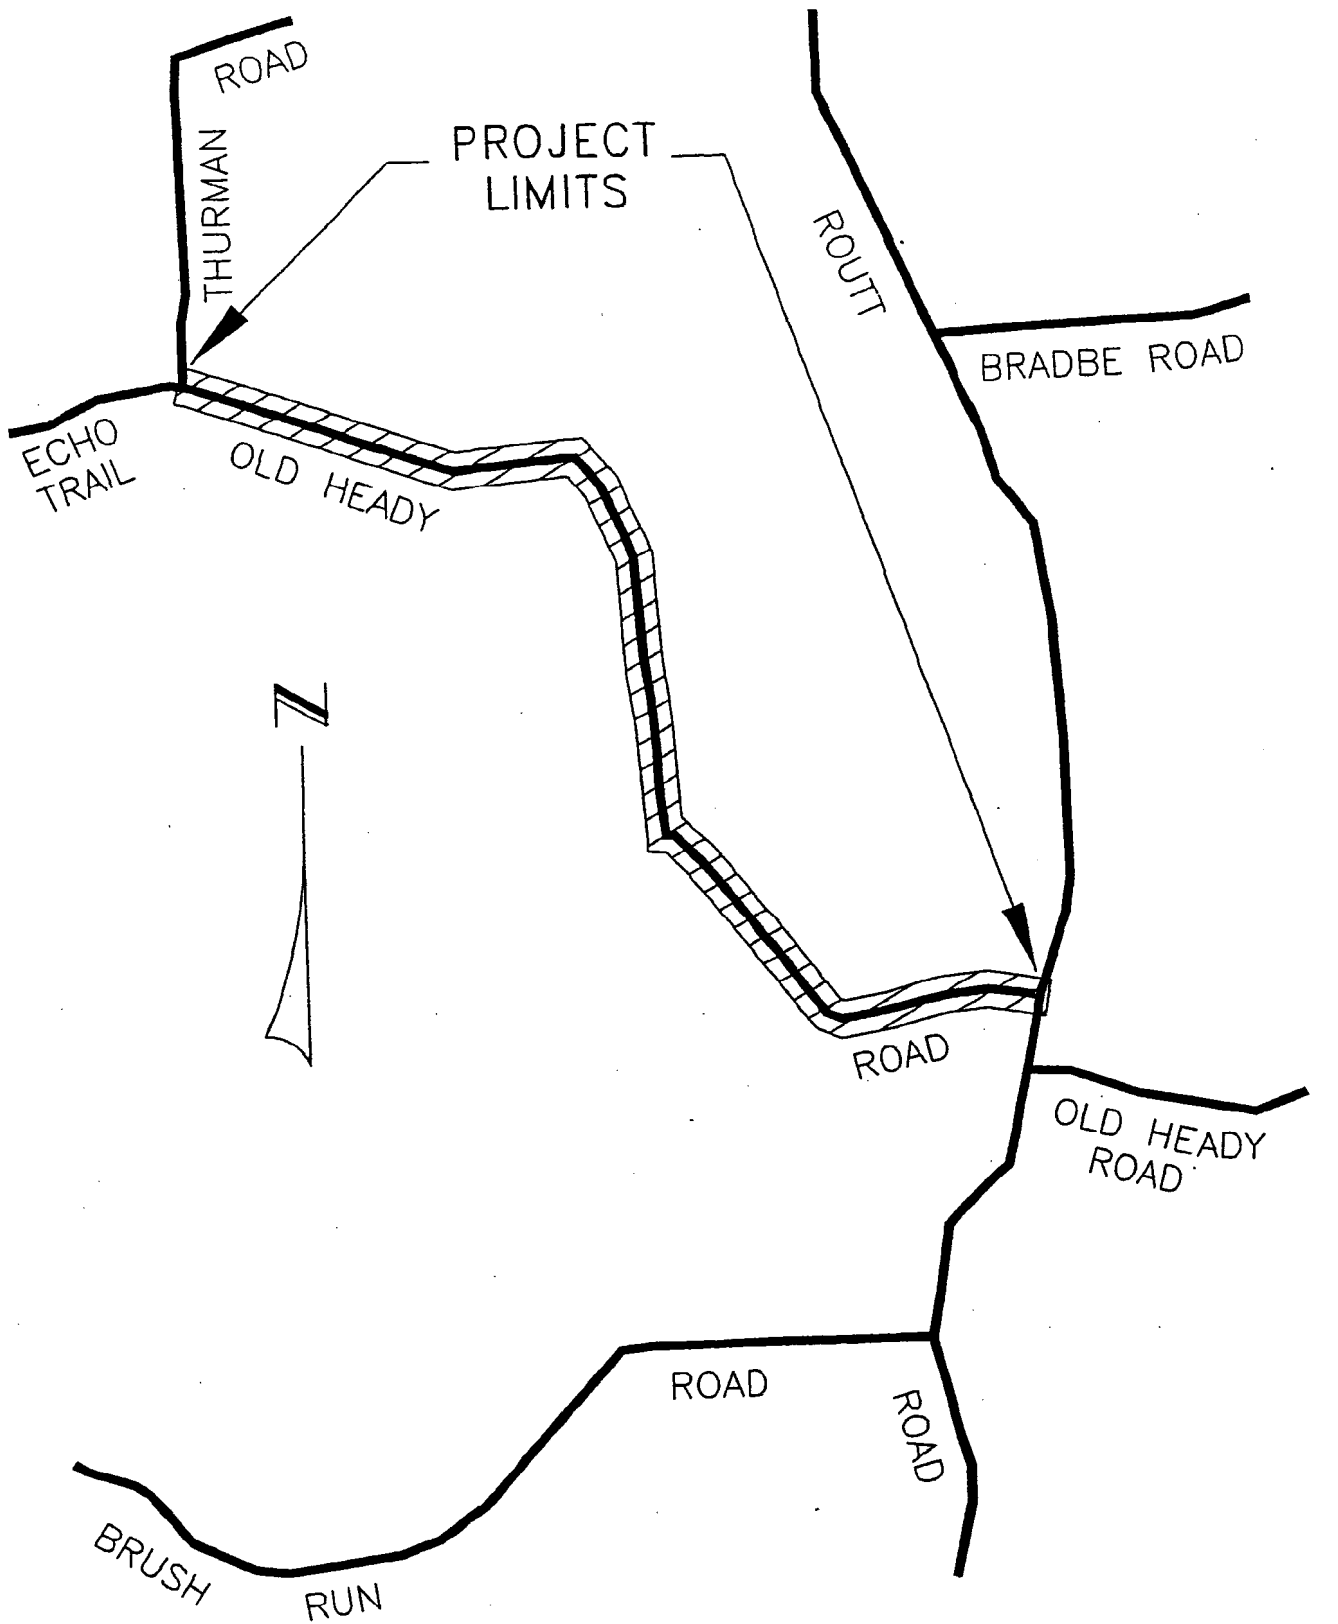

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is written in a cursive style with a large, looping initial "L".

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

February 12, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Old Heady Road: Thurman Road to Routt Road** main extension project authorized by Ordinance No. 7, Series 2000 of the Jefferson Fiscal Court, adopted on March 28, 2000 such warrants to be against thirty two (32) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Seatonville Road: Existing Water Main to Echo Trail** main extension project authorized by Ordinance No. 5, Series 2000 of the Jefferson Fiscal Court, adopted on February 8, 2000 such warrants to be against six (6) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

FILE NAME: SEATONVILLE

CERTIFICATION

This is to certify that the following *Old Heady Road: Routt Road to County Boundary and Dry Ridge Road: Routt Road to Old Heady Road*, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville on February 12, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

AMENDED APPORTIONMENT WARRANT RESOLUTION

RESOLVED, the Board of Water Works, pursuant to Section 96.265(11) of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Old Heady Road: Routt Road to County Boundary and Dry Ridge Road: Routt Road to Old Heady Road** main extension project authorized by Private Petition/Agreement such warrants to be against one hundred twenty five (125) benefited properties identified by present ownership and official records set forth on Exhibit D, attached, each apportionment warrant to be in the principal sum of \$5450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**Minutes of Regular Meeting
Board of Water Works
March 12, 2002**

Board Members Present

Mr. Stewart Conner
Mr. Jack Segell
Mr. Phillip Bond
Ms. Wendy Welsh
Mr. Stephen Gault

Board Members Absent

Mr. Owen Hammons
The Honorable David L. Armstrong, Mayor

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel & Secretary
Mr. Gregory Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. James Wehrle, Vice President, Assuring Human Resources & Organizational Effectiveness
Mr. Steve Hubbs, Vice President, New Technology
Ms. Kay Ball
Ms. Jane Driskell

Mr. Huber called the meeting to order at 12:40 P.M.

CONSENT AGENDA

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$100,000

Item A: Minutes of Regular Meeting Held **February 12, 2002**
Request: Approve Minutes

Item B: Claims Paid During **February**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

Developer Installed Refunding Projects	Total Project Cost	Net Cost To LWC
Jefferson Trace Section 4 (Project No. 00-091)	\$42,085.00	
The Meadows at the Polo Fields Sec. 1 (Project No. 01-060)	\$102,215.00	\$22,350.00
The Gardens of Valley View (Project No. 01-076)	\$65,760.00	

Village of White Oaks (Project No. 01-077)	\$13,340.00	
St. Andrews Landing (Project No. 01-080)	\$64,505.00	
Summerfield Subdivision (Project No. 01-081)	\$88,730.00	
Academy Ridge at Landis Lakes Sec. 2 Ph.1 (Project No. 01-112)	\$8,665.00	
Billtown Farms Section 1C (Project No. 02-001)	\$79,870.00	\$7,800.00
Southern Farms Section 1 (Project No. 02-006)	\$76,965.00	
Bullitt County Main Extension Projects	Total Project Cost	
Ashby Lane (Project No. 02-307)	\$16,500.00	
Huber Station Road (Project No. 01-311)	\$50,000.00	
Pine Creek Court (Project No. 02-300)	\$15,000.00	
Lory Lane (Project No. 02-303)	\$20,000.00	
Livers Lane (Project No. 02-304)	\$70,000.00	
Walls Hollow Road (Project No. 02-305)	\$180,000.00	
Kentucky Transportation Cabinet Relocation Project	Total Project Cost	
Independence School Road Project (Project No. 02-1409D)	\$1,800.00	
Developer Relocation Projects	Total Project Cost	
Custom Quality Services (Project No. 01-1409D)	\$7,000.00	
Landis Lakes Meter Relocation (Project No. 02-408)	\$700.00	

Item D: Authorization for design and bid of projects (*estimated to cost less than \$200,000*)

Item E: Bid tabulations (*award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid*).

Item F: Award of contracts less than \$100,000.00

Capital Program	Total Project Cost
Modifications & Liner Installation: Reservoir (South Basin) (Project No. 99-414b)	\$28,500.00
Transylvania Beach Drainage Improvements (Project No. 99-438)	\$37,401.00
Radio Dispatch Recording Equipment (Project No. 20)	\$26,500.00
Procurement of Goods and Services	Total Project Cost
Sun Drafting—GIS Server Upgrade (Project No. 02-03)	\$33,697.00

Rubber Tire Rock Saw/Trencher (Project No. 02-04)	\$48,563.00
Cisco Maintenance Update (Project No. 02-05)	\$20,930.00
Vehicle Bodies (Project No. 02-07)	\$63,055.00 \$13,120.00
Procurement of Sole Source Materials and Services	Total Project Cost
TIP Software License Renewal (Sole Source)	\$35,280.00
Procurement by Emergency Certificate	Total Project Cost
Replacement of the Hillcrest 480 Volt Transformer (Certificate of Emergency)	\$37,000.00

Mr. Huber pointed out that on pages 38 and 39, Staff has included petitions and applications from Bullitt County. These will also appear on the Consent Agenda in the future.

The Consent Agenda was approved.

REPORT OF OFFICERS

Administrative Report

Mr. Huber gave an oral Administrative Report. He stated that LWC has now signed a purchase agreement with AquaSource for the purchase of Goshen Utilities. The agreement was signed on March 11, 2002. Mr. Huber asked for a motion to ratify his signature of the purchase agreement.

After proper motion and second, the Board voted to do so.

Financial Report

Mr. Miller gave the Income and Expense Summary for February 2002.

Income and Expense Summary

- 1) Total operating revenue of \$14,639,600 is \$201,200 or 1.36% less than budgeted and \$362,600 or 2.54% more than the same period in 2001. We sold 3.35% less water in 2002 than the same period in 2001.
- 2) Operation and maintenance expense of \$6,244,300 is \$210,400 or 3.26% less than budgeted and \$137,300 or 2.25% more than 2001.
- 3) Operating deductions of \$10,179,300 are \$65,300 or 0.64% less than budgeted and \$816,400 or 8.72% more than 2001.
- 4) Net operating income of \$4,460,300 is \$135,900 or 2.96% less than budgeted.
- 5) Total non-operating income of \$489,700 is \$139,500 or 22.17% less than budgeted. Total non-operating expense of \$1,117,900 is \$7,700 or 0.70% more than budgeted.
- 6) Net income of \$3,832,100 is \$283,200 or 6.88% less than budgeted and \$783,600 or 16.98% less than 2001.

Mr. Miller reported that the Executive Leadership Team has reviewed the financials and made a decision to reduce cost by \$1,000,000 this year.

Operations Report

Mr. Heitzman gave the Operations Report for February 2002.

Water Quality

The Company exceeded the water quality goals for the month for turbidity, chlorine, and bacteria with all samples above the 99 percent target. This was a challenge for the staff due to several operation constraints during the month, including rehabilitation of the Crescent Hill Reservoir south basin and cleaning of the Cardinal Hill Reservoir.

Cardinal Hill Reservoir Cleaning

A \$33,000 contract has been awarded to AST Services for cleaning the Cardinal Hill Reservoir. The reservoir has not been cleaned in over 12 years. Upon draining of the reservoir, an extensive amount of magnesium oxide was discovered on the interior concrete walls and there was calcium sediment build up on the reservoir floor. Internal exposed metal surfaces were severely corroded. The amount of material to be removed and delays associated with leaking valves and reservoir access will require a contract change order with AST. The revised contract amount will be below \$100,000 and will be approved by the President.

Palatka Road 30-inch Main

On February 12, a utility contractor damaged the 30-inch transmission main on Palatka Road near the Cardinal Hill Reservoir while boring under the roadway. Louisville Water Company crews quickly responded and repaired the damaged main within eight hours by installing a steel repair band. Typically this type of repair would be out-sourced under an emergency contract. Staff will submit repair costs to the contractor for reimbursement.

Serving Customers Report

Ms. Teasley gave the Serving Customers Report for February 2002.

Customer Service

The February 2002 abandonment rate was 9.61%, about the same as the January 2002 rate. The Call Center continued to experience somewhat higher than normal call volume associated with the RouteSmart project as well as higher estimated bills delivered in January. Call abandonment was again impacted by staff shortages due to illness.

Billing and RouteSmart

The number of estimated bills returned to a normal level of 1.32% in February. This was primarily due to re-routing of meter routes, which allowed readers to complete most routes.

Bad Debt

Bad debt for the month of February was below budget (\$25,708). The year to date number is still significantly above budget due to the sizable bankruptcies that were written off in January.

Litigation Report

After proper motion and second, the Board voted to go into closed session for the purpose of discussing litigation, acquisition of property, and a personnel matter.

Ms. Douglas provided a litigation report in closed session. The Board reconvened into open session without taking any action.

Renewal of 2000 Clean and Cement Mortar Line Contract

Approval of 2002 Clean and Cement Mortar Line Program

After proper motion and second, the Board authorized a one year renewal of the 2000 Clean and Line Contract for performance of the 2002 Clean and Line Program at an estimated cost of \$4,067,231. This represents no increase (i.e. no escalation) in cost for 2002 over 2001 costs.

REPORT OF COMMITTEES

Compensation Committee

Mr. Connor discussed the Compensation Committee meeting with the Board.

After proper motion and second, the Board voted to accept the committee's recommendation that the following 2002 Performance Goals be adopted:

2002 Incentive Plan Goals

Light Switch

2002 Net Income must exceed \$27,950,800 (budget \$27,350,800 plus \$600,000) in order to qualify for incentive plan goals payout.

- I. Return on Equity
VP Weighting - 2 Percent of the eligible 10 Percent
BSO Weighting - 1.5 Percent of the eligible 7.5 Percent

2002 net operating income exceed the budget. (2002 net operating income budget: \$30,047,500)

Level 1

Net operating income exceeds the budget by more than \$600,000

Level 2

Net operating income exceeds the budget by more than \$1,200,000.

- II. Customer Satisfaction
VP Weighting - 2 Percent of 10 Percent Maximum
BSO Weighting – 1.5 Percent of 7.5 Percent Maximum

Meet and exceed customer needs and expectations, including providing appropriate information on product quality and services.

Level 1

Overall Customer Satisfaction Index annual average is 835 or more.

Level 2

Overall Customer Satisfaction Index annual average is 845 or more.

III. Water Quality

VP Weighting - 2 Percent Overall with 5 goals at .4 Each of 10 Percent Maximum.

BSO Weighting - 1.5 Percent Overall with 5 goals at .3 Each of 7.5 Percent Maximum.

Reduce microbial risk, especially for cryptosporidium and gardia. Become fully compliant with the EPA Partnership for Safe Drinking Water. Note: The baseline to achieve any part of this objective is no MCL violations in 2002.

A. Combined filter effluent turbidity (BEP/CHWTP) for the period Jan. 1 – Dec. 31, 2002 less than or equal to 0.10 ntu, 95% of the time (based on on-line turbidity measurements taken each month). Achieving this goal provides 0.5 log credit for cryptosporidium removal.

B. Individual filter effluent turbidity (BEP/CHWTP) for the period Jan. 1 – Dec. 31, 2002 less than or equal to 0.15 ntu, 95% of the time (based on on-line turbidity measures taken each month). Achieving this goal provides 1.0 log credit for cryptosporidium removal.

C. Distribution system turbidity less than 0.5 ntu in 99% of samples.

D. Distribution system chlorine greater than 0.5 ppm in 99% of samples.

E. No distribution system coliform bacteria in 99% of samples.

IV. Productivity

VP Weighting - 2 Percent of 10 Percent Maximum

BSO Weighting – 1.5 Percent of 7.5 Percent Maximum

Perform work more productively.

Level 1

Operations and maintenance cost per metered customer is \$165.46 or less (excluding fire hydrants). (At budget with no adjustments. 2002 Budgeted O&M expense: \$42,530,600. 2002 Budgeted metered customers 257,049)

Level 2

O&M cost per metered customer is \$163.80 or less (excluding fire hydrants). (1% below budget with no adjustments).

- V. Human and Organizational Systems
 - VP Weighting - 2 Percent of 10 Percent Maximum
 - BSO Weighting – 1.5 Percent of 7.5 Percent Maximum

Provide an environment which values quality of work life and employee contribution and well being.

Level 1 – VP Weighting ½ Percent Each / BSO Weighting .375 Percent Each

- A. The number of Preventable Vehicular Accidents less than or equal to 28.
- B. The number of Lost Time Injuries less than or equal to 18.

Level 2 – VP Weighting 1 Percent / BSO Weighting .75 Percent

Employee Perception Index is 628 or higher.

Proposed 2002 Corporate Performance Award

2002 President/Vice President Shared Goals

OBJECTIVE	Weight	Rating Level	Measure
A Implement 2002 Capital Improvement Program of \$92.8 million (\$74.2 million plus 2001 carryover of \$18.6 million) Note: Measure should be calculated using the revised budget	4%	5	90% committed under contract, 80% expended
		4	85% committed under contract, 75% expended
		3	80% committed under contract, 70% expended
		2	75% committed under contract, 65% expended
		1	70% committed under contract, 60% expended
B. Increase 2002 revenue through increased water sales.	4%	5	105% of budget (\$96.5 million in revenue on sales of 41.4 billion gallons)
		4	103% of budget (\$94.7 million in revenue from sales of 40.6 billion gallons)
		3	at budget (\$91.9 million in revenue from sales of 39.4 billion gallons)
		2	97% of budget (\$89.2 million in revenue from sales of 38.2 billion gallons)
		1	95% of budget (\$87.3 million in revenue from 37.4 billion gallons)

OBJECTIVE	Weight	Rating Level	Measure
C. Proceed with development of Advanced Treatment Technology, defining the final critical design elements for RBF and establishing public acceptance for the project.	4%	5	Leakance research completed. BOWW authorization to move forward with final design of RBI option for Phase II. Easement program initiated
		4	Subsurface investigations and Project Definition Complete. PI program implemented
		3	BOWW approval to move forward with Project Definition for Phase II RBI @ BEP. Leakance research underway by July 2002
		2	BOWW approval to move forward with Phase II. Evaluation of construction options complete.
		1	Decision made for KY/IN Option and evaluating alternative RBI method @ BEP and Zorn
D. Increase operational performance through certification and operational improvements.	4%	5	8 system certification audits completed by 7/31/02 and 9 systems recertified (ELT approval) by 8/30/02 and demonstrate 14 measurable operational improvements.
		4	7 system certification audits complete by 7/31/02 and 8 systems recertified (ELT approval) by 8/30/02 and demonstrate 12 measurable operational improvements.
		3	6 system certification audits completed by 7/31/02 and 7 systems recertified by 8/30/02 and demonstrate 10 measurable operational improvements.
		2	5 system certification audits complete by 7/31/02 and 6 systems recertified (ELT approval) by 8/30/02 and demonstrate 8 measurable operational improvements.
		1	4 or fewer system certifications complete by 7/31/02 and less than 5 systems recertified (ELT approval) by 8/30/02 and demonstrate less than 6 measurable operational improvements. <u>Note:</u> If any system has not been re-certified by 12/31/02, performance will be evaluated as a 1.0.
E. Control the Cost of Risk (Excluding any significant change in the reserve).	4%	5	=< 1,298,198 (< 95% budget)

SPECIAL ISSUES

Mr. Miller reported on the following:

Declaration of Dividend to the City of Louisville

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City.

The annual audit has been completed. Net income of \$26,271,963 requires a total 2001 dividend to the City of \$13,076,344. This will result in an additional amount of \$477,094 to be added to the regular quarterly 2002 dividend payments.

After proper motion and second, the Board voted to adopt the dividend resolution, providing for a first quarter dividend of \$3,052,095, to the City of Louisville.

Ms. Teasley discussed the following:

Billing and Collection Agreement with Metropolitan Sewer District

Subsequent to the implementation of the new Customer Information System (CIS) and for most of 2001, Staff has been negotiating a new Billing and Collection Agreement with the Metropolitan Sewer District (MSD). This has been a lengthy process involving identifying goals of the two parties, determining the satisfaction level of MSD with current services provided, benchmarking other utilities with similar arrangements to provide billing and collection services, and negotiating key contract terms and conditions.

In February 2002 we were able to reach an agreement with MSD on all major terms of the Billing and Collection Agreement. These terms and conditions were documented in a Memorandum of Understanding between the parties which was executed February 28 (MOU) and has been approved by the MSD Board.

Staff recommends that the Company proceed with finalizing the proposed Billing and Collection Agreement with MSD.

After proper motion and second, the Board voted to ratify the Billing and Collection MOU that staff executed with MSD and to authorize the President to negotiate and execute a final billing and collection agreement with MSD.

Ms. Ball and Mr. Hubbs discussed the following with the Board:

Project 99-402: Riverbank Infiltration Phase II

In 2001 EPA regulations were developed that included riverbank filtration as a treatment technique for microbial reduction.

As pumping at the Payne Plant wells continued through the second year, it became evident that the capacity of the collector well was decreasing with time. The capacity calculated at start-up of the collector well exceeded expectations at greater than 22 MGD for the facility. This available capacity decreased as the aquifer in the immediate area of the well clogged. In the past 12 months this decrease is stabilizing, and the long-term yield is now estimated at 15 MGD. This capacity is consistent with historical values for collector wells in the Louisville area and in the Rhine River valley.

This decrease in anticipated well yield prompted staff to reconsider previous design assumptions for the next construction project. Both the number of wells and the length of riverfront were increased to accommodate the desired system capacity at the Payne Plant of 60 MGD. This increased the estimated cost of the project, and extended the facility beyond LWC property limits.

Staff evaluated alternative designs to minimize the impact of riverbank clogging while maintaining the project objectives for cost, maintainability, and community acceptance. An innovative design was developed that combined traditional vertical well technology with a hard-rock tunnel collector and a single pumphouse. This design concept is being evaluated against previous designs for the next phase of construction at the Payne plant. At this time, the vertical well/hard rock tunnel design appears to be the best design concept for the project.

Staff is re-negotiating the current contract with design engineers Jordan, Jones, and Goulding (JJ&G) to reflect proposed changes in the contract. Upon request, JJ&G submitted a revised contract amount for Task I, Project Definition.

If approved, preliminary design will begin immediately with the subsurface investigations of the alignment. It is anticipated that the final design will be complete and ready to bid in early 2003.

After proper motion and second, the Board authorized staff to proceed with the adjusted Task I, Project Definition, in the not-to-exceed amount of \$633,700, for a revised contract with Jordan, Jones & Goulding, Inc., in the amount of \$1,622,500. It is anticipated that staff will return to the Board in the summer of 2002 with an update and a request for authorization to proceed with Task II, Final Design.

BID TABULATIONS

Ms. Teasley reported on the following:

Project No. 01-318: Cupio Lane and Cupio Lodge Road, Bullitt County Extension Program—Public Road Petition Main

Bids were received and opened Wednesday, February 20, 2002 to furnish and install 4,325 linear feet of 8-inch water main along Cupio Lane and Cupio Lodge Road; furnish and install 3,120 linear feet of 6-inch water main along Cupio Lane and; install seven fire hydrants.

A total of 5 bids were received and opened from pre-qualified contractors. Three "T" Construction Company submitted the lowest responsive bid in the amount of \$107,700 resulting in a total project cost of \$137,300. The low bid is 31% below the Project Manager's Estimate.

After proper motion and second, the Board voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$ 107,700 to Three "T" Construction Company to install the water facilities associated with this project.

Project No. 02-521: Lead Service Renewal II—Portland/Russell Area

Bids were received and opened Wednesday, February 20, 2002 to renew a total of 380 lead services in the Portland/Russell Area of western Louisville. This proposed work would complete the renovation of the water distribution system in this area.

A total of 4 bids were received and opened from pre-qualified contractors. T+C Contracting, Inc. submitted the lowest responsive bid in the amount of \$351,253 resulting in a total project cost of \$416,853. The bid is 8.4% over the Project Manager's Estimate.

After proper motion and second, the Board voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$351,253 to T+C Contracting to renew the lead services associated with this project.

Mr. Heitzman reported on the following:

Project No. 02-LW01-B: Maintenance of Louisville Water Company Grounds

Bids were received and opened Wednesday, February 13, 2002, to obtain grounds maintenance services for the following Louisville Water Company sites:

- | | |
|---|--|
| Site 1 - B.E. Payne Water Treatment Plant | Site 6 - Eighteen (18) Pressure Systems south of Bardstown Rd. |
| Site 2 - Crescent Hill Filter Plant | Site 7 - Twenty-three (23) Pressure Systems north of Bardstown Rd. |
| Site 3 - Zorn Pumping Station | Site 8 - Corporate Headquarters |
| Site 4 - Middletown Distribution Ctr. | Site 9 - Bullitt County System Sites |
| Site 5 - Allmond Avenue Distribution Ctr. | |

Bids were received from eight (8) pre-qualified bidders. Staff recommends the I2.2 Process maintain Site 4; Site 5; Site 6 (Billtown, Bluegrass, Freys Hill, Hikes Lane areas); Site 7 (Cane Run and Zoneton areas); and Site 9 (Bullitt County Office).

After proper motion and second, the Board voted to authorize the Chief Engineer to award three contracts for maintenance of LWC grounds as follows:

- Metro Services for the amount of \$146,680
- GTK Lawn & Landscape for the amount of \$24,660
- Ward Brothers Mowing for the amount of \$3,600

COMMUNICATIONS

Mr. Heitzman discussed the following:

Jefferson County Water Extension Program Summary Report

In the spring of 1990, the Kentucky State Legislature passed Senate Concurrent Resolution 105 that created a Task Force to develop a plan for water service throughout Jefferson County. The Board of Water Works approved and adopted "The Report of the Task Force on the Extension of Water Service in Jefferson County" in July of 1991. Subsequently, the Board adopted "The Implementation Plan for the Extension of Water Service in Jefferson County" and staff initiated the Jefferson County Water Extension Program in 1992. One key goal of the program is to offer public water service to all unserved areas of Jefferson County within a 10-year period, by 2002.

The unserved areas of Jefferson County were divided into three priority areas, known as Extension Areas 1, 2, and 3. The original build out scope identified by the Task Force in 1991 included 255.5 miles of water main serving an estimated 4,340 properties for a budget of \$58.2 million. The Program is funded from a \$18.8 million commitment from LWC; \$6.0 million from Jefferson County through grants and general fund allocations; \$26.2 million from property owners in the form of a fair share apportioned cost (\$5,450 public road share, actual cost for private road share); \$6.3 million from the System Development Reserve for water main upsizing, booster pumping and storage to accommodate future growth. The customer response to the program has been overwhelming, with significant results over the past 10 years.

In 2002, staff will focus on the closeout of the Jefferson County Water Extension Program. Members of the original Task Force, or their replacement appointment, will convene this summer for a status update on the Program's success. Staff will be recommending a final deadline of December 31, 2002 for the subsidized apportionment warrant cost of \$5,450 for public road extensions. Water mains extended in 2003 and beyond can be accomplished by Apportionment Warrant Extension petition, however, the subsidy would not be available.

Staff will proceed to transition the Program in 2002, expecting construction and total Program closeout to be complete by December 2003. The meeting with Task Force members will be reported to the Board this fall, with specific recommendations on the public road subsidy.

Legislative Update

Ms. Teasley provided a Legislative Update to the Board.

HB 659: Merger Clean Up Bill (Rep. Larry Clark, D—Louisville)

This is the clean up language that was necessary to bring current state statutes in line with the new merged government of Louisville and Jefferson County. **Status:** Passed the House, is in the Senate State & Local Government Committee. It is likely to be heard on either Tuesday March 12 or 19.

The one change that is not included in Representative Larry Clark's bill is the language referencing the president of the company being appointed from the board membership. Due to a City of Louisville Ordinance and the Kentucky Revised Statute that gives the Board of Alderman local control over such issues statutory changes are not necessary at this time.

OLD BUSINESS

The next four items were addressed with a single motion.

Ms. Teasley discussed the following:

Issuance of Apportionment Warrants per KRS 96.265; Bush Farm Road: Aiken Road to Old Henry Road and Old Henry Road: Bush Farm Road to Old Henry Trail

A public hearing for the extension of water service along Bush Farm Rd: Aiken Rd to Old Henry Rd and Old Henry Rd: Bush Farm Rd to Old Henry Trail was waived by the one eligible property owner. The project was reviewed by the Board of Water Works in December 2000 and approved to proceed with construction of this main by appending the scope of the Bush Farm Rd: Aiken Rd to Old Henry Rd and Old Henry Rd: Bush Farm Rd to Old Henry Trail project to Project 99-600C: Aiken/Avoca Road 16-Inch Transmission Main. The construction contract was awarded to Southern Pipeline in April 2001.

Issuance of Apportionment Warrants per KRS 96.265; Deer Trace Estates: Deer Run Road, Deer Run Place and Elm Trace Place

A public hearing was held May 27, 1999 for the extension of water service along Deer Trace Estates: Deer Run Road, Deer Run Place and Elm Trace Place. The Board of Water Works adopted a resolution for Deer Trace Estates: Deer Run Road, Deer Run Place and Elm Trace Place on June 8, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 21, Series 1999 on July 13, 1999 for the Deer Trace Estates: Deer Run Road, Deer Run Place and Elm Trace Place project. Louisville Water Company Capital Construction Crews did the construction of this water main. Construction of the water main began in July 2001.

Issuance of Apportionment Warrants per KRS 96.265; Echo Trail: Seatonville Road to Thurman Road

A public hearing was held June 3, 1999 for the extension of water service along Echo Trail: Seatonville Road to Thurman Road. The Board of Water Works adopted a resolution for Echo Trail: Seatonville Road to Thurman Road on July 13, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 25, Series 1999 on August 10, 1999 for the Echo Trail: Seatonville Road to Thurman Road project. The construction contract was awarded to Reynolds, Inc. in December 2000.

Issuance of Apportionment Warrants per KRS 96.265; Routt Road: 9410 Routt Road to the County Line

A public hearing was held July 29, 1999 for the extension of water service along Routt Road: 9410 Routt Road to the County Line. The Board of Water Works adopted a resolution Routt Road: 9410 Routt Road to the County Line on September 14, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 34, Series 1999 on October 12, 1999 for the Routt Road: 9410 Routt Road to the County Line. The construction contract was awarded to Tom Brown Construction in December 2000.

After proper motion and second, the Board adopted the following Resolutions for issuance of Apportionment Warrants and liens against benefited properties in accordance with KRS 96.265:

- On page 90, for Bush Farm Road: Aiken Road to Old Henry Road and Old Henry Road: Bush Farm Road to Old Henry Trail
- On page 94, for Deer Trace Estates: Deer Run Road, Deer Run Place, and Elm Trace Place
- On page 103, for Echo Trail: Seatonville Road to Thurman Road
- On page 116, for Routt Road: 9410 Routt Road to the County Line

**Water Extension Project Pursuant to KRS 96.265;
Rockycreek Lane: Back Run Road to North 2,600 Feet**

The Board of Water Works approved staff's request to proceed with a public hearing for Rockycreek Lane: Back Run Road to North 2,600 at its November 2001 meeting. In accordance with KRS 96.265 a public hearing was held on January 3, 2002 for the property owners along Rockycreek Lane to consider the extension of a water main along this private roadway.

As presented, using the equal assessment method, seven (7) eligible property owners on this private roadway were presented with the "equal share" cost per property of \$20,800. The attending property owners did not agree to proceed with the project at the cost presented.

On January 9, 2002 a certified mail letter was sent to all nine eligible property owners asking them to decide whether they "agree" or "do not agree" to proceed with the water main extension along Rockycreek Lane for an equal cost per property not to exceed \$16,100. Twenty two percent (22%) of the eligible property owners' responses indicate that they agree to proceed with the water main extension.

The staff agreed that it would not proceed with an extension project at this time. No Board action is required.

Mr. Heitzman reported on the following:

Project 97-430A: Cross County Transmission Improvement Project- Pennsylvania Run Road to Bardstown Road Tank: Request to Increase Consulting Engineer Fees (Contract D434)

In March 1997 the Board granted authorization to design and bid project 97-430. The original design contract provided for a single design. For purposes of timing the project was broken into two phases. The first phase was Bardstown Road from Cedar Creek Road to the Bardstown Standpipe. The second phase was primarily in easement between Pennsylvania Run Road and the Bardstown Road Standpipe.

The engineering service contract was adjusted 2 times previously since its execution in March 1997. The requested change to Quest Engineers contract D434 is \$12,500. The total change over the life of this contract is \$24,369, which amounts to 10.6% of the original contract amount.

After proper motion and second, the Board voted to increase consulting engineering fees for Quest Engineers, Inc., under contract D434, in the amount of \$12,500.

Project 97-403B: Shady Acres Booster Pump Station Change Action

In October 2001 the BOWW awarded the subject project to Southern Pipeline in the amount of \$147,269. During final stages of installation of the underground booster pump station the electrical equipment and components required to power the station were damaged as a result of flooding. This correspondence describes repair cost and change order and recommends an increase to the contract with Southern Pipeline.

Two change actions with Southern Pipeline, totaling \$11,810, were issued previously for removal of trees per Jefferson County permit, and for drainage improvements to the site. In addition, a change action with Dakota Pump, in the amount of \$2,180 was authorized in July 2001 to increase the pumps from 30 HP to 40 HP. The total changes for this project increase the budget to \$364,658.

After proper motion and second, the Board voted to increase the value of contract F548 with Southern Pipeline Company, Inc. from \$147,268 to \$171,078, and to increase the project budget from \$338,668 to \$364,658.

Ms. Teasley reported on the following:

Bullitt County Water Improvement Program – Bullitt County Extension Program, Change Action to Contract No. F-165 Engineering Services for KT #2, Central Associated Engineers, Inc.

This contract was originally presented to the BOWW on January 9, 2001, and approved for the provision of engineering services in the amount of \$734,780.90. Since this time, one change action has been approved and a second change action is being considered that would increase the contract amount over 10% of the original contract amount and requires Board approval. This correspondence presents the change action additions to contract F-165 and requests authorization to expand the scope of this project to include these additional engineering design services and hydraulic analyses.

Change Action No. 1 added the provision of a required hydraulic analysis submittal to the Kentucky Division of Water for each water main extension project in KT #2. Change Action No. 2 will add design services and hydraulic analysis required to construct a water storage tank and booster pump station at both Rams Run Road and Ridge Road areas.

After proper motion and second, the Board voted to expand the scope of this project to include Change Action Nos. 1 and 2 for an updated total contract amount of \$839,096.72.

Mr. Heitzman reported on the following:

Project 00-306: Waterford Road Water Main Extension

The Board of Water Works approved Contract No. F380 with Debbie Sutherland Excavating, Inc. on July 16, 2001 in the amount of \$80,000. The project scope includes 1,530 feet of 6-inch DI water main to serve four properties along Waterford Road near the Jefferson/Bullitt County line.

In the past month, the Company has been advised that a large tract of land has been assembled in the vicinity of Waterford Road for future residential development. This development, with full build-out, will have as many as 500 to 700 dwelling units. With the primary entrance from Bardstown Road, a secondary grid supply will be necessary from Waterford Road for adequate system reliability in the future. Further, the City of Taylorsville has expressed an interest in obtaining additional water capacity for Spencer County. Therefore, installation of a 12-inch water main in Waterford Road can provide the first leg to support this future development in Jefferson and Spencer Counties.

Staff has negotiated a revised contract price with Debbie Sutherland Excavating to install 12-inch ductile iron pipe instead of 6-inch DI pipe. The additional contract cost of \$39,000 includes all rock removal for a minimum depth of bury in rock of 36-inches and in dirt of 42-inches.

After proper motion and second, the Board voted to authorize a change order to Debbie Sutherland Engineering for installation of a 12-inch water main in Waterford Road, and establish the new contract limit

of \$119,200. The project budget will be increased to \$166,600 with additional funds coming from the System Development Reserve for the upsizing costs.

NEW BUSINESS

Ms. Teasley reported on the following:

Bullitt County Water Improvement Program – Bullitt County Extension Program

Project 01-314: Rams Run Road Tank, Booster Pump Station and Water Main Extension

Proposed under the Bullitt County Extension Program is a project for Rams Run Road for which we have received a 2/3 majority petition. This correspondence presents a proposed project to construct a portion of this program, and requests authorization for engineering design and advertisement for bid. The proposed Tapping Fee project will provide fire protection and water service to a previously unserved area. Due to the elevations of this road, a water storage tank and booster pump station will be required to serve this area. There are 18 residents along this route and we have 13 "Letters of Intent" for 72% participation.

After proper motion and second, the Board voted to proceed with engineering design and advertisement for bid for the subject project. The results of the bids will be presented to the Board with recommendation for contract award.

Mr. Heitzman presented the following:

Project 01-702: Dry Ridge Road Elevated Water Tank

Project 02-602: Dry Ridge Road Booster Pump Station

Proposed under the 2002 Capital Budget are funds for construction of a new storage facility and booster pump station required to support system growth in southeastern Jefferson County in conjunction with the County-wide Expansion Program.

The proposed facilities will consist of a 250,000-gallon elevated steel storage tank and underground booster pump station operating within a proposed 900-foot pressure zone, along Dry Ridge Road and Old Heady Road. The budget for the proposed tank project is \$750,000 and for the booster pump station project \$200,000.

After proper motion and second, the Board voted to proceed with engineering design and advertisement for bid for the subject projects. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Project 02-454: BEP Roof Replacement Program

Project 02-455: CHWTP Roof Replacement Program

Proposed under the 2002 Capital Budget are funds for replacement of roofs at Crescent Hill and B. E. Payne Water Treatment Plants. A roof condition survey was conducted in 2001 on production facilities roofs by consultant Roof Resources, Inc. Data was collected on the individual roofs based on age, observations, damage, moisture intrusion, etc. A software program calculates a numerical roof condition rating, determines economic return of repair vs. replacement, and provides a ranking and schedule of repair and replacement.

Based on results from the condition survey, the following facilities are proposed for roof replacement in 2002: Project 02-454: B. E. Payne Filter Building Complex and Project 02-455: Crescent Hill Old East Filter Building and Laboratory.

After proper motion and second, the Board voted to proceed with engineering design and advertisement for bid and increase Project 02-454 to \$300,000 and Project 02-455 to \$300,000.

Project 02-611: Sandblast and Re-coat Steel Storage Tanks Annual Allowance

Proposed under the 2002 Capital Budget are annual allowance funds to re-coat steel storage tanks. This correspondence presents the project scope and requests authorization to proceed with engineering design and advertisement for bid.

LWC steel water storage tanks are re-coated on a 15- to 20-year cycle to assure maximum life cycle and to provide optimum internal protection to meet water quality goals and standards. The following two facilities are proposed to be re-coated in 2002: Crestwood Elevated Water Tank and Prospect Elevated Water Tank.

After proper motion and second, the Board voted to proceed with engineering design and advertisement for bid for the Crestwood and Prospect Tank Re-coating projects.

Consulting Engineering Services – Cardinal Hill Secondary Supply – LWC Project 01-557

In August 2001 the Transmission Program presented the results of a RFP for Transmission Program Consulting Proposals to the Board of Water Works. These proposals are to be used on projects identified for outsourcing to consultants. Four firms have been selected and approved by the Board for solicitation of cost proposals.

A cost proposal was requested, from PDR Engineers (PDR), for final design engineering and contract administration services for a secondary supply to Cardinal Hill Reservoir. PDR submitted a cost proposal in the amount of \$272,900, which is \$18,356 less than the independent estimate of \$291,256. This project, initially presented to the Board in March 2001, will improve reliability and connectivity to Cardinal Hill Reservoir.

After proper motion and second, the Board voted to enter into an engineering service contract with PDR Engineers in the amount of \$272,900 for Final Design Engineering Services and proceed with advertisement for bid of phase 1 of this project.

Mr. Miller reported on the following:

Bank Resolution for New Certificate of Deposit

Louisville Water Company has purchased a thirty-six month Certificate Deposit at Louisville Community Development Bank in the amount of \$100,000 and paying 3.5%. The bank has requested an updated corporate resolution to reflect the current authorized signatories.

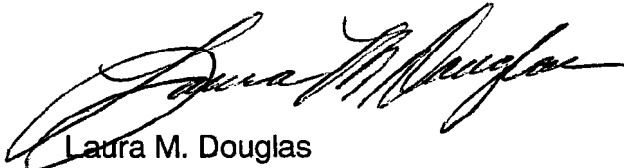

After proper motion and second, the Board voted to adopt a resolution which updates the authorized signatures for the corporation for deposit accounts.

The meeting adjourned at 3:30 P.M.

CERTIFICATION

This is to certify that the following: Bush Farm Road: Aiken Road to Old Henry Road and Old Henry Road: Bush Farm Road to Old Henry Trail is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 12, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas". The signature is fluid and cursive, with a large initial "L" and "D".

Laura M. Douglas
Vice President, General Counsel
Secretary

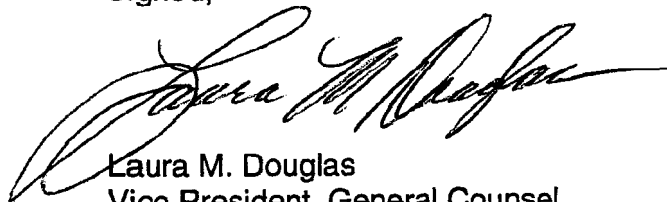

APPORTIONMENT WARRANT RESOLUTION
March 12, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Bush Farm Rd: Aiken Rd to Old Henry Rd and Old Henry Rd: Bush Farm Rd to Old Henry Trl** main extension project, such warrants to be against one (1) benefited property identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following: Deer Trace Estates: Deer Run Road, Deer Run Place and Elm Trace Place is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 12, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
Secretary

APPORTIONMENT WARRANT RESOLUTION
March 12, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Deer Trace Estates: Deer Run Road, Deer Run Place and Elm Trace Place** main extension project authorized by Ordinance No. 21, Series 1999 of the Jefferson Fiscal Court, adopted on July 13, 1999 such warrants to be against twenty (20) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following: Echo Trail: Seatonville Road to Thurman Road is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 12, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
Secretary

APPORTIONMENT WARRANT RESOLUTION
March 12, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Echo Trail: Seatonville Road to Thurman Road** main extension project authorized by Ordinance No. 25, Series 1999 of the Jefferson Fiscal Court, adopted on August 10, 1999 such warrants to be against sixty (60) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

This is to certify that the following: Routt Road: 9410 Routt Road to the County Line is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 12, 2002, a quorum being present.

Signed,

A handwritten signature in black ink, appearing to read "Laura M. Douglas", written in a cursive style.

Laura M. Douglas
Vice President, General Counsel
Secretary

APPORTIONMENT WARRANT RESOLUTION
March 12, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Rouff Road: 9410 Rouff Road to the County Line** main extension project authorized by Ordinance No. 34, Series 1999 of the Jefferson Fiscal Court, adopted on October 12, 1999 such warrants to be against eleven (11) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

FILE NAME: ROCKYCREEK LN

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 98.265, the Louisville Water Company will hold a public hearing for the property owners along Rockycreek Lane: Back Run Road to North 2,600 feet (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Rockycreek Lane.

This public hearing will be held on Thursday, January 3, 2002 at 6:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Routt Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

CORPORATE RESOLUTION
(for Deposit Accounts)

Depositor: Louisville Water Company
550 South Third Street
Louisville, KY 40202

Financial Institution: Louisville Community Development Bank
2901 West Broadway
Louisville, KY 40211-1220

I, the undersigned Secretary of the Corporation named above, HEREBY CERTIFY that the Corporation is organized and existing under and by virtue of the laws of the state of Kentucky as a corporation, with its principal office at 550 South Third Street, Louisville, KY 40202

Account Holder, Louisville Water Company is the complete and correct name of the Account Holder.

I FURTHER CERTIFY that at a meeting of the Board of Directors of the Corporation, duly and regularly called and held on March 12, 2002 at which a quorum was present and voting, the following resolutions were adopted:

RESOLVED, that the Financial Institution named above at any one or more of its offices or branches, be and it hereby is designated as the Financial Institution of and depository for the funds of this Corporation, which may be withdrawn on checks, drafts, advices of debit, notes or other orders for the payment of monies bearing the following appropriate number of signatures: Any 2 (#) of the following named officers or employees of this Corporation ("Agents"), whose actual signatures are shown below:

X _____ Authorized Signer	<u>John L. Huber</u> Printed Name
X _____ Authorized Signer	<u>Robert K. Miller</u> Printed Name
X _____ Authorized Signer	<u>Amber A. Halloran</u> Printed Name
X _____ Authorized Signer	<u>Laura M. Douglas</u> Printed Name

and that the Financial Institution shall be and is authorized to honor and pay the same whether or not they are payable to bearer or to the individual order of any Agent or Agents signing the same.

FURTHER RESOLVED, that the Financial Institution is hereby directed to accept and pay without further inquiry any item drawn against any of the Corporation's accounts with the Financial Institution bearing the signature or signatures of Agents, as authorized above or otherwise, even though drawn or endorsed to the order of any Agent signing or tendered by such Agent for cashing or in payment of the individual obligation of such Agent or for deposit to the Agent's personal account, and the Financial Institution shall not be required or be under any obligation to inquire as to the circumstances of the issue or use of any item signed in accordance with the resolutions contained herein, or the application or disposition of such item or the proceeds of the item.

FURTHER RESOLVED, that any one of such Agents is authorized to endorse all checks, drafts, notes and other items payable to or owned by this Corporation for deposit with the Financial Institution, or for collection or discount by the Financial Institution; and to accept drafts and other items payable at the Financial Institution.

FURTHER RESOLVED, that the above named agents are authorized and empowered to execute such other agreements, including, but not limited to, special depository agreements and arrangements regarding the manner, conditions, or purposes for which funds, checks, or items of the Corporation may be deposited, collected, or withdrawn and to perform such other acts as they deem reasonably necessary to carry out the provisions of these resolutions.

FURTHER RESOLVED, that the authority hereby conferred upon the above named Agents shall be and remain in full force and effect until written notice of the revocation thereof shall have been delivered to and received by the Financial Institution at each location where an account is maintained. Any such notice shall not affect any items in process at the time notice is given.

I FURTHER CERTIFY that the persons named above occupy the positions set forth opposite their respective names and signatures; that the foregoing Resolutions now stand of record on the books of the Corporation; that they are in full force and effect and have not been modified in any manner whatsoever.

IN TESTIMONY WHEREOF, I have hereunto set my hand on _____, 200__ and attest that the signatures Set opposite the names listed above are their genuine signatures.

CERTIFIED TO AND ATTESTED BY:

*NOTE: In case the Secretary or other certifying officer is designated by the foregoing resolutions as one of the signing officers, this certificate should also be signed by a second Officer or Director of the Corporation.

**BOARD OF WATER WORKS
ANNUAL MEETING MINUTES
April 9, 2002**

The Annual Meeting of the Board of Water Works was called to order at 12:30 p.m. by President, John L. Huber.

Mr. Huber then relinquished the chair to Ms. Laura Douglas, General Counsel, for the purpose of receiving nominations for the office of the President.

A motion was made by Ms. Wendy C. Welsh to place in nomination the name of Mr. Huber for the ensuing year. Mr. Owen C. Hammons seconded the motion. The BOWW then unanimously voted to appoint Mr. Huber as President for the ensuing year.

The President then asked for nominations for the office of Vice President, to be filled by election of one of the Board members. The President reminded the Board that the Vice President elected from the Board membership serves in that office without salary.

The motion was made by Ms. Welsh to place in nomination the name of Mr. Phillip D. Bond for the office of Vice President for the ensuing year. Mr. Hammons seconded the motion, and the Board so voted.

The President asked for nominations for the position of Vice President-Chief Engineer. Mr. Bond nominated Mr. Gregory Heitzman to that position for the ensuing year. Mr. Jack Segal seconded, and the Board so voted.

The President then asked for nominations for the office of Vice President-Treasurer. Mr. Hammons nominated Mr. Robert K. Miller for that position for the ensuing year. Mr. Bond seconded, and the Board so voted.

The President asked for nominations for the office of Corporate Secretary. Mr. Hammons nominated Ms. Laura M. Douglas for that position for the ensuing year. Ms. Welsh seconded, and the Board so voted.

The President asked for nominations for the office of Vice President-General Counsel, whereupon Ms. Welsh nominated Ms. Laura M. Douglas for the position for the ensuing year. Mr. Bond seconded, and the Board so voted.

The President asked for nominations for the Office of Vice President – Serving Customers and Business Development, whereupon Mr. Segal nominated Ms. Karla O. Teasley for the position for the ensuing year, The Board so voted.

Ms. Douglas administered the oath of office to Ms. Teasley.

Nominations for Auditor will be brought to the Board in the future after consideration.

The President requested nominations for the Audit Committee, consisting of three Board Members. Mr. Segal nominated Mr. Phillip Bond, Chairperson, Mr. Owen C. Hammons, and Ms. Wendy C. Welsh as members of the Audit Committee for the ensuing year. Mr. Stephen Gault seconded, and the Board so voted.

The President requested nominations for the Compensation Committee, consisting of three Board members. Mr. Hammons nominated Mr. Stewart E. Conner as Chairperson, Mr. Phillip Bond and Ms. Wendy C. Welsh as Committee Members for the ensuing year. Mr. Segal seconded, and the Board so voted.

The President requested nominations for the Public Information and Customer Satisfaction Committee, consisting of three board members. Ms. Welsh nominated Mr. Segal, Chairperson, Mr. Stewart E. Conner and Mr. Stephen C. Gault as Committee Members for the ensuing year. Mr. Bond seconded and the Board so voted.

There being no further business, the Annual Meeting adjourned at 12:45.

**Minutes of 2002 Regular Monthly Meeting
Board of Water Works
APRIL 9, 2002**

Board Members Present

Ms. Wendy C. Welsh
Mr. Phillip D. Bond
Mr. Owen C. Hammons
Mr. Jack H. Segal

Board Members Absent

Mr. Stephen C. Gault
Mr. Stewart E. Conner
The Honorable David L. Armstrong

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel & Secretary
Mr. Gregory Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. Larry Lenahan
Ms. Rhonda Plunkett
Mr. Kevin Grant

Mr. Huber called the meeting to order at 12:50 P.M.

CONSENT AGENDA

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$100,000

Item A: Minutes of Regular Meeting Held **March 12, 2002**
Request: Approve Minutes

Item B: Claims Paid During **March, 2002**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

Developer Installed Refunding Main Extension Projects	Total Project Cost
Greenridge Estates Section 6 (Project No. 99-088)	\$30,740.00

Procurement of Professional Services		Total Project Cost
Professional Service	Highway 329 Secondary Transmission Main— Apple Patch Tank	\$31,634.00

REPORT OF OFFICERS

Administrative Report

Mr. Huber reported on the 48' water main break at the Zorn Avenue pump station. He credited Mr. Heitzman and his staff with remedying the problem. The cost of repair will be \$60,000.00 to \$80,000.00. Mr. Huber also reported that the implementation of "Route Smart" caused some customers to receive "long bills." These individuals were inadvertently billed at a higher rate. We will be crediting these customers approximately \$92,000.00 during the next two weeks.

Financial Report

Mr. Miller gave the Income and Expense Summary for March 2002.

Income and Expense Summary

- 1) Total operating revenue of \$22,064,100 is \$394,400 or 1.82% more than budgeted and \$1,249,000 or 6% more than the same period in 2001. We sold 1.5% more water in 2002 than the same period in 2001. Water delivered to the mains was 0.85% less than 2001.
- 2) Operation and maintenance expense of \$9,520,100 is \$400,500 or 4.04% less than budgeted and \$42,500 or 0.45% more than 2001.
- 3) Operating deductions of \$15,377,800 are \$249,900 or 1.60% less than budgeted and \$717,200 or 4.89% more than 2001.
- 4) Net operating income/deductions of \$6,686,300 is \$644,300 or 10.67% more than budgeted.
- 5) Total non-operating income of \$685,600 is \$264,400 or 27.84% less than budgeted. Total non-operating expense of \$1,680,900 is \$16,000 or 0.96% more than budgeted.
- 6) Net income of \$5,691,000 (line 26) is \$363,900 or 6.83% more than budgeted and \$177,200 or 3.02% less than 2001.

Capital Projects Summary

The capital program as shown on the Capital Projects Summary attached reflects net expenditures of \$9,480,985 against a budget of \$69,509,847 including noncompleted previous year projects carried forward. Gross disbursements were \$11,170,253; however, \$1,689,268 was received as reimbursements. Projects committed aggregate \$82,762,963 or 119.07% of budget. Projects in progress or completed to year-end total \$15,036,065 or 21.63% of budget.

Mr. Heitzman gave the Operations Report for March 2002.

Production and Water Quality - Water pumping for the month averaged 111.3 MGD, consistent with the five-year average pumping. Water quality for the month was outstanding, with turbidity, chlorine, and bacteria at 100 percent of the goal for the month.

Distribution Water Quality - The laboratory staff is evaluating the distribution sampling protocol and schedule for the upcoming summer months. Sampling locations are being reviewed and standard operating procedures developed. Critical storage reservoirs and tanks are being cleaned, including the Cardinal Hill Reservoir. Staff is developing a contingency plan for remote distribution disinfection with chlorine for Cardinal Hill and areas in Bullitt County. Flushing crews continue to flush areas that exhibit low chlorine levels in summer months.

Hydrant Vandalism - The Company has received several reports of individuals tampering with fire hydrants at various locations within the distribution system. Staff is responding to each incident with a defined protocol, which includes dispatching employees and police to the reported sites and following up with flushing and sampling when it is determined to be prudent. Staff will continue to be vigilant in responding to these events.

Ms. Teasley gave the Serving Customers Report for March 2002.

Customer Service – The March 2002 abandonment rate was 7.80%, an improvement over the previous month's abandonment rate of 9.61%. Call volume has returned to normal levels after the RouteSmart implementation. A number of measures to improve Call Center performance were implemented in March, including hiring additional staff. Once new employee training is complete, additional improvement in abandonment rate is expected.

Bad Debt – Bad debt for the month of March was \$30,459, slightly above budget. This amount includes \$12,000 in bankruptcies, with about \$10,000 relating to bankruptcies from cases filed in 2000 and 2001. Controllable bad debt is \$18,439, well under the monthly budget.

First Quarter CSI Results – The Total CSI for the first quarter of 2002 was 838, a seven point drop from the fourth quarter 2001 high of 845. The Service Total CSI for the first quarter was 774, a nine-point drop from the 783 level in the fourth quarter of 2001. These drops were not statistically significant. It appears that some of this decrease relates to the RouteSmart project and the January rate increase. Also, the drop was exclusively for the residential customers, with all factor scores for commercial customers increasing in the first quarter.

Oldham Co Advisory Board Meeting Summary – The Oldham County District No. 1 Advisory Board met March 5, 2002 to review the status of Oldham County capital improvement and water extension programs, and the Oldham County Reserve Fund. Total funding of \$254,959.88 remains in the Oldham County Reserve Fund with \$155,000 of this total committed for projects. LWC staff will develop a plan for committing the remaining balance of the fund (\$99,960) on system improvements.

LITIGATION REPORT

After proper motions and second, the Board adjourned to a closed session for the purpose of discussing litigation, personnel issues and acquisitions of property. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

Compensation Committee Report

Ms. Welsh gave the compensation committee report. The committee recommended the following salaries for the President, Vice Presidents and Officers for 2002 – 2003 (effective April 1, 2002):

Mr. John Huber:	\$175,350.00
Mr. Greg Heitzman:	\$126,677.00
Mr. Robert Miller:	\$120,927.00
Ms. Laura Douglas:	\$120,927.00
Ms. Karla Teasley	\$122,850.00
Mr. Steve Hubbs:	\$102,918.00
Mr. James Wehrle	\$112,747.00

The recommendation was adopted.

Audit Committee Report

Mr. Bond gave the Audit Committee report. Mr. Bond reported on the inventory count that was performed on October 26, 2001. The warehouse is operating within acceptable control limits. Staff will continue to perform bi-monthly cycle counts and will evaluate this process for use with the truck inventories in 2002. There is no concern, at this time, that theft may be occurring.

Mr. Bond discussed the apparent customer over charge that Mr. Huber outlined in his administrative report. Rates are being approximately charged. However, credits will be given to customers with long bills who were charged a higher rate for gallons beyond 6,000 or greater than sixty days.

Mr. Bond reported that the company received an unqualified audit from Crowe Chizek without adjustments or reportable conditions.

After proper motions and second, the Board voted to accept the financial statements.

SPECIAL ISSUES

Mr. Huber spoke to the Board regarding Divestiture of Property at 435 South Third Street.

The City of Louisville is interested in taking direct ownership of the Louisville Water Company's previous office site at 435 South Third Street and locating certain City operations in the facilities.

Title to property acquired by the Louisville Water Company is ultimately vested in the City of Louisville and thus enjoys tax exempt status. Disposition of property owned by the Louisville Water Company is governed by bond resolution. In Section 611 of the 1992 Bond Resolution the Company covenants it will not dispose of or encumber the Waterworks System or any part thereof except as the resolution otherwise permits. Section 661 specifically states:

"Sale or Lease of Properties: "...Nothing herein shall prevent the Company from transferring for nominal consideration real property that is not needed or is no longer useful in connection with the operation or maintenance of the Waterworks System to the City for the exclusive use and enjoyment of the City, including, without limitation, the Crescent Hill Golf Course. Any portion of the Waterworks System consisting of real estate being used as administrative offices may be transferred, at the discretion of the Issuer, to the City for nominal consideration."

Accordingly, the property at 435 South Third Street may be transferred to the City of Louisville at the discretion of the Board of Water Works.

After proper motion and second, the Board voted to authorize the Company to divest itself real estate and facilities located at 435 South Third Street with the City of Louisville taking direct ownership and control of the property and facilities upon closing of the transaction and signing of the deed.

BID TABULATIONS

Mr. Miller discussed the following:

Bid 01-12/Copper Tubing

On March 6, 2002, bids were opened to award a six-month contract for the purchase of copper tubing. Copper tubing is used throughout the distribution system for the installation, renewal and repair of domestic service lines.

A total of six (6) bids were submitted. The lowest, most responsive bidder was the Plumbers Supply Company.

After proper motion and second, the Board voted to ratify the purchase of six (6) month supply of copper tubing from the Plumbers Supply Company totaling \$116,392.08.

BID 02-09/Tapping Saddles for Distribution Pipe

On March 6, 2002, bids were opened to award a two-year contract for the purchase of tapping saddles. Tapping saddles are used to make service installation taps.

A total of six (6) bids were submitted, in which two (2) were bid: (1) a stainless steel strap (for bearing area) brass saddle for PVC pipe and (2) a traditional dual strap brass saddle for iron pipe. The responsive bidder for PVC pipe and iron pipe saddles was the Mueller Company.

After proper motions and second, the Board voted to authorize Staff to award a two-(2) year contract to the Mueller Company totaling \$259,596.00.

BID 01-11: Cold Water Meters (1st PPI Renewal)

On April 25, 2001, proposals were opened to award a one-year contract for cold water meters, with the option to renew up to four additional years utilizing the Producers Price Index as the cost adjustment factor. Water meters are used throughout the Louisville Water Company system to measure cold water usage for billing purposes.

In 2001, a total of two (2) proposals were submitted. The lowest, most responsive proposal was received from **Schlumberger Resource Management** for an estimated amount of **\$1,276,841.00**

This is the first PPI renewal on this contract. This renewal shall be in effect for one (1) year, from May 14, 2002 to May 13, 2003, for an estimated amount of \$1,276,841.00.

Staff requests Board authorization to continue the contract with **Schlumberger Resource Management** for one (1) additional year at the 1.7% PPI increase. The total contract amount is estimated at **\$1,276,841.00**

BID 01-45/Locating Services

On March 13, 2002 proposals were opened to award a one-year contract for locating services. This contract is renewable for up to four (4) additional one-year terms at the sole discretion of the Company. This was a competitive negotiation proposal, whereby services provided are for locating and marking of underground facilities.

A total of three proposals were received. The bidder submitting the best-evaluated proposal was **STS, Inc.** at an estimated cost of **\$265,138**.

After proper motion and second, the Board voted to authorized staff to award a one-year contract, renewable for up to four additional years, for an estimated total of **\$265,138** to **STS, Inc.**

Mr. Miller and Mr. Grant reported on the following:

Project 01-55 Automated Reading Technology and Services LWC KTII service territory

In January 2002, The Accounting for Water Process circulated a Request for Proposal to install, maintain, and read automated reading technology in Kentucky Turnpike District II. Two companies submitted proposals, Itron and Neptune.

The proposals were evaluated on the following criteria: adherence to specifications, quality, delivery and completion, price and experience. The evaluation identified Neptune as the vendor with the better proposal. Neptune submitted an install and bimonthly read cost of \$4.18/read for the first five years and a read cost of \$.44 for the remaining ten years.

This project will provide LWC with operational savings, improved customer information and service as well as the information needed to evaluate future use of Automated Meter Reading in our distribution system.

After proper motion and second, the Board voted to authorize staff to enter into a lease and service unit price contract with Neptune Equipment Company. The contract will be for 2830 units at a cost of \$527,369 for the 15-year period.

Ms. Teasley reported on the following:

Project 01-324 Weavers Run/Pauleys Gap Water Main Extension Project

Title: Wavers Run/Pauleys Gap Water Main Extension Project

Bids were received and opened Wednesday, April 3, 2002 to install 15,089 linear feet of 12-inch and 2,273 linear feet of 8-inch water line along Weavers Run and Pauleys Gap Roads between Highway 44 and the Jefferson County Line.

A total of four bids were received and opened from pre-qualified contractors. Tom Brown Construction Company submitted the lowest responsive bid in the amount of #382,851.00 resulting in a total project costs of \$556,051.00.

After the proper motion and second, the Board voted to authorize the staff to award a contract in the amount of \$382,851.00 to Tom Brown Construction Company to install the water facilities associated with this project.

Mr. Miller reported on the following:

Request Authorization for Award of Contracts for the Purchase and Installation of a Storage Area Network under Project 02-653

One of the Information Technology Systems primary business tasks is to store and manage the Company's data and information in a secure environment to ensure data integrity and the data is accessible for business reporting and analysis. The Technical and Data Architectures have been established to manage this task.

The re-engineering and replacement of our core Information Supply Systems have led to distribution of data processing and storage management to application servers connected to our network. This has allowed for increased data sharing and information access, but has presented LWC with data storage, management, security, and scalability issues. In addition, the Data General platform is nearing the end of its useful life and plans have been made for replacement with more current technology.

To meet these challenges, staff has recommended the purchase of an EMC Symmetrix Storage Area Network (SAN) that will aggregate data storage management, provide for data security and controlled access to information, and provide for scalable storage to meet our system replacement and expanding data storage and information management needs.

After proper motion and second, the Board voted to authorize staff to issue contracts for implementation of this project to EMC Corporation in the amount of \$1,062,531 for the EMC Symmetrix Storage Area Network hardware, software, implementation services, and three-year operations and maintenance agreement and awards a contract to Abacus Solutions in the amount of \$77,550 for networking and interface components to implement the project.

OLD BUSINESS

Ms. Teasley reported on the following:

Issuance of Apportionment Warrants per KRS 96.265

Private Road: Wolf Pen Branch Road to End

A public hearing was held October 29, 1998 for the extension of water service along Private Road: Wolf Pen Branch Road to End. The Board of Water Works adopted a resolution for Private Road: Wolf Pen Branch Road to End on January 19, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 5, Series 1999 on February 23, 1999 for the Private Road: Wolf Pen Branch Road to End project.

After proper motion and second, the Board voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 11 benefited properties along Private Road: Wolf Pen Branch Road to End in accordance with KRS. 96.265, as described.

Water Extension Project Pursuant to KRS 96.265

Buttermilk Ridge Road: Dawson Hill Road to West 2,250 feet

The Board of Water Works approved staff's request to proceed with a public hearing for Buttermilk Ridge Road: Dawson Hill Road to West 2,250 feet at its January 2002 meeting. In accordance with KRS 96.265 a public hearing was held on January 17, 2002 for the property owners along Buttermilk Ridge Road to consider the extension of a water main along this private roadway.

At the public hearing property owners had an opportunity to ask questions about the Apportionment Warrant program and decide if they wanted to proceed with the project.

On February 14, 2002 a certified mail letter was sent to all five eligible property owners asking them to decide whether they "agree" or "do not agree" to proceed with the water main extension Buttermilk Ridge Road for an equal cost per property not to exceed \$19,300. None of the eligible property owners' responses indicate that they agree to proceed with the water main extension.

Staff recommended that the Board of Water Works not refer the Buttermilk Ridge Road water main extension to Jefferson County Fiscal Court.

This item was offered as an advisory to the Board. No Board action was requested.

Request for Change Action Watterson Trail – Main Replacement Project

LWC Project 99-512

On February 1, 2002, the Company entered into a contract in the amount of \$270,350 with MAC Construction and Excavating for the construction of 3,890 LF of new water main along Watterson Trail between Rivanna Drive and Ruckriegel Parkway in the Jeffersontown Area of eastern Jefferson County. Included with the project are the renewal or transfer of 7 fire hydrants and 53 customer services.

After consultation with MAC Construction, LWC Staff is requesting a change in material to HDPE to accommodate the use of directional drilling technology.

The increased cost to supply and install 12-inch HDPE pipe is estimated to be \$45,815 (a 16.9% increase in the contract amount). Savings of over \$63,000 in LWC-supplied materials should be realized by LWC with this switch to contractor-supplied materials.

After proper motion and second, the Board voted to increase the contract amount with MAC Construction and Excavating from \$270,350.00 to \$316,165.00 and to proceed with the project and the change in materials.

Request for Change Action

Beechmont Area – Main Replacement Project LWC Project 01-500

On March 23, 2001, the Company entered into a contract in the amount of \$1,458,000 with MAC Construction and Excavating for the construction of over 23,000 LF of 6, 8, and 12-inch pipe in the Beechmont Area of south-central Louisville. Included with the project are the renewal or transfer of over 30 fire hydrants and 500 customer services.

The project specifications for the Beechmont Area project included a provision that the Contractor could submit a set of supplementary unit prices for the supply and installation of 6 and 8-inch HDPE pipe. Subsequent to the award of the contract, MAC Construction requested to supply and install HDPE pipe on a significant portion of the project to make use of directional drilling technology.

With the switch to contractor-supplied HDPE pipe and service tap materials, significant cost savings can be realized in the quantity of the materials traditionally supplied by LWC. Based on the footage of pipe to be supplied by the contractor as well as a reduction in other materials, cost savings of over \$183,600 in materials supplied by LWC should be realized.

The estimated increase cost in the total project is approximately \$1,500.

After proper motion and second, the Board voted to authorize the Vice President of Serving Customers and Business Development to increase the contract amount with MAC Construction and Excavating from \$1,458,000 to \$1,643,129 and to proceed with the change in materials.

Request for Change Action

Brownsboro Road – Main Replacement Project

LWC Project 01-501

On December 6, 2001, the Company entered into a contract in the amount of \$152,800 with Southern Pipeline Construction Company for the construction of the Brownsboro Road Main Replacement Project in eastern Jefferson County.

MSD has had a long-term plan to install a storm drainage line across Brownsboro Road in the vicinity of Ballard High School. MSD has recently decided to pursue their drainage project at this time to take advantage of low traffic volumes during Spring Break (April 1st to April 5th).

The proposed change will not increase the cost of the Brownsboro Road Main Replacement project, but will allow MSD an opportunity to partner with LWC on a critical public works project.

After proper motion and second, the Board voted to ratify the action taken by the Vice President of Serving Customers and Business Development to increase the contract amount with Southern Pipeline from \$152,800 to \$183,641 and change I scope.

NEW BUSINESS

Ms. Teasley reported on the following:

Bullitt County Water Improvement Program – Bullitt County Extension Program

KT #2 Community Development Block Grant and Drinking Water State Revolving Loan Fund Project
Proposed under the Bullitt County Extension Program is the extension of water mains to existing unserved residents of Bullitt County. The Community Development Block Grant (CDBG) program is a Federal grant program that is administered by the State to assist communities in constructing infrastructure improvements affecting low to moderate income areas. In November of 2001 staff requested authorization to prepare an application for \$1 million in CDBG funding, which was granted. Recently, we received conditional commitment letters from the Kentucky Infrastructure Authority (KIA) for a total of \$206,500 in grant funding for two of the routes in this project. In order to improve the affordability of this project to the low to moderate income residents of this area and to improve the viability of our CDBG application, we request authorization to apply for a \$2.2 million low interest loan from the Drinking Water State Revolving Loan Fund (DWSRF).

The source funding for this project would be a combination of CDBG, DWSRF and KIA funding. The benefiting residents along the proposed routes will pay the debt service on the DWSRF loan, which is estimated to be \$28.03 per month for 20 years, and the Bullitt County Reserve will pay for engineering design and inspection estimated to be \$397,484.00. The Bullitt County Water Reserve will fund any default in the benefiting resident's debt service payments until restitution can be recovered.

After proper motion and second, the Board voted to authorize the staff to proceed with the preparation of an application for DWSRF funding for the subject project.

Mr. Heitzman reported on the following:

Lead Service Line Renewals – Request to Expand the 2002 Program

A stated objective of the Louisville Water Company is to eliminate lead service lines from the distribution system. Although a significant effort has been placed on this activity over the past decade, current records indicate that more than twenty-six thousand lead services remain.

The task of “renewing” a lead service consists of replacing the lead service line from the water main to the meter and from the meter to the customer’s property service connection.

In 2002 staff is budgeted, and has the capacity, to perform approximately 900 lead service renewals. This does not include an additional increment of services, which will be renewed under the Main Replacement and Rehabilitation Program in conjunction with pipeline projects.

Staff has recently reviewed the size of the lead service renewal program and has concluded that an additional work-load of 500 renewals can be accommodated by existing staff. The incremental cost of this work is estimated at \$500,000.

After proper motion and second the Board voted to authorize staff to proceed with execution of an additional 500 lead service renewals in 2002, utilizing incremental funding in the amount of \$500,000 in capital funds. Further, staff will review the lead service renewal program and make appropriate recommendations for funding in the 2003 capital budget.

Ms. Teasley reported on:

Goshen Utilities Improvement

There are two proposed grid tic projects necessary in order to serve the Goshen Utilities service area. Currently, only one connection exists along US 42 at the current Master Meter. Two additional connections will be required in order to initially supply this new service area and this letter requests authorization for engineering design and construction. Descriptions are as follows:

Highway 329 Connection – Constantine Farms west to existing 8-inch water main
Install 800 lf of 8-inch PVC water main and gate valve \$22,000.00

Belknap Beach Connection
Install 1400 lf of 12-inch PVC along Rose Island Road to Belknap Beach Rd.

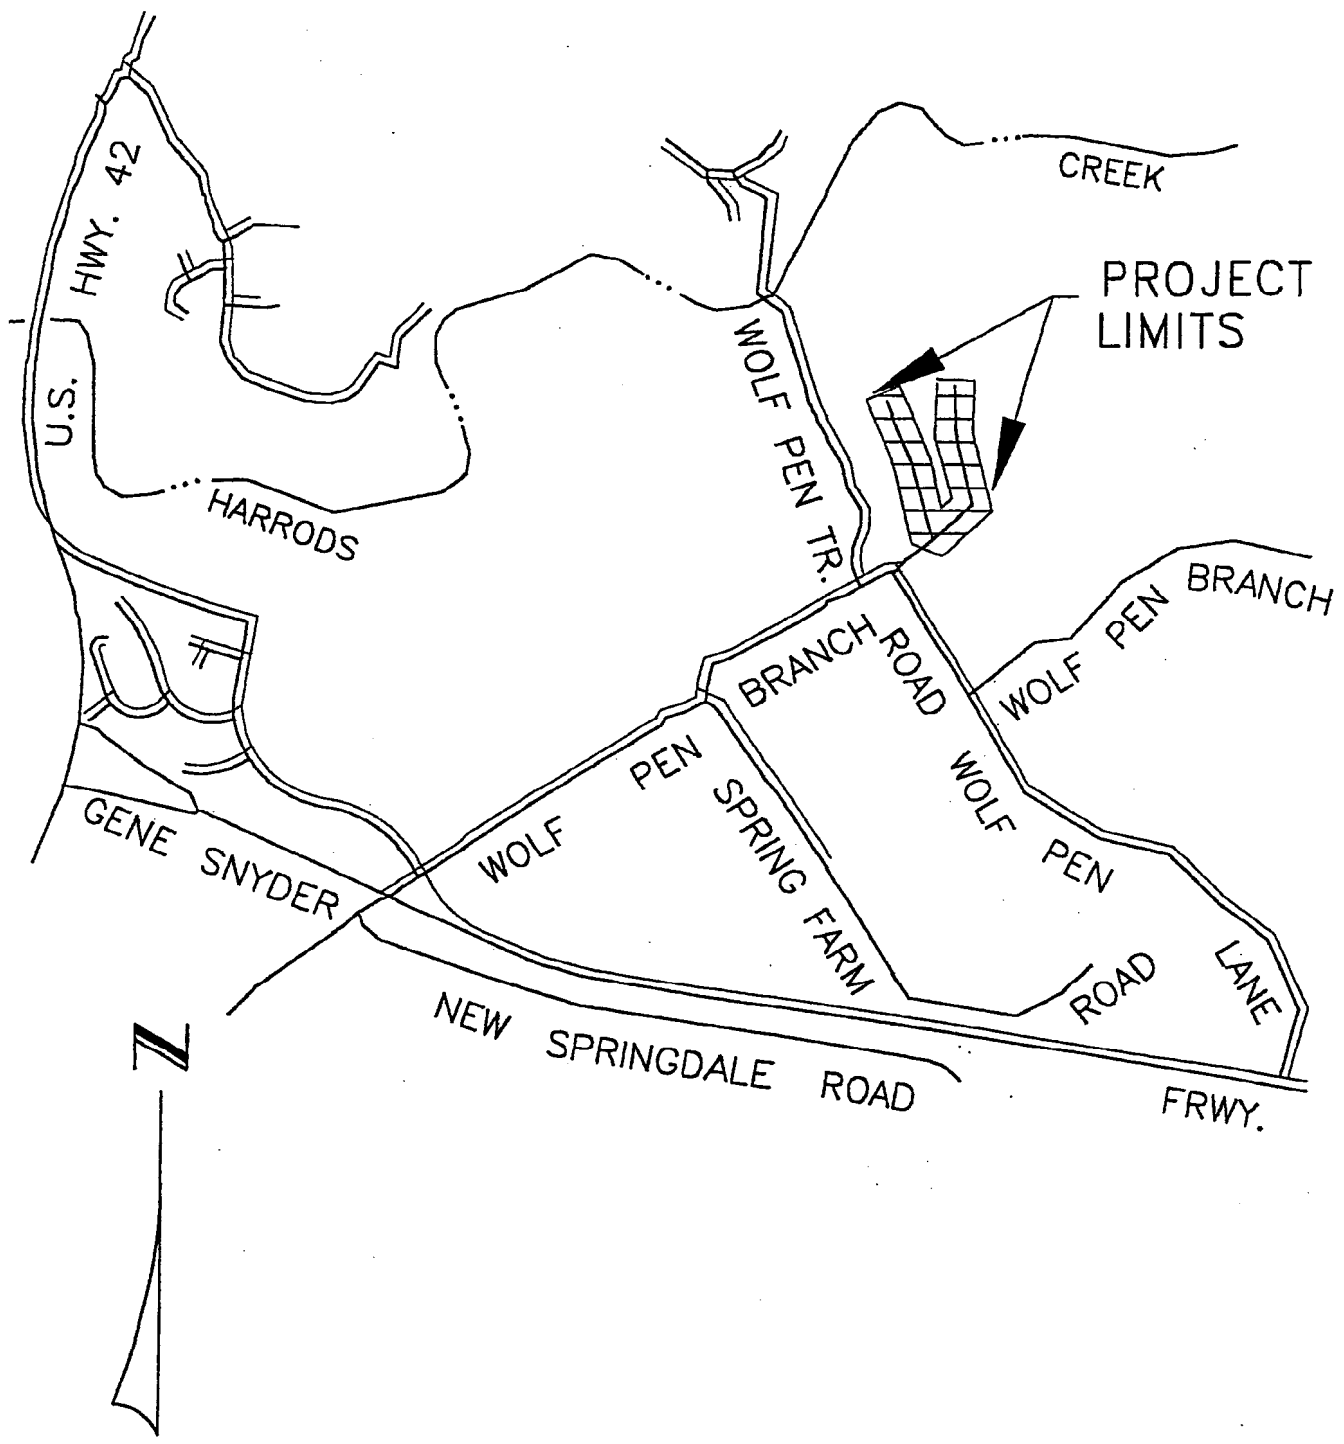

Install 1100 lf of 8-inch PVC along Belknap Beach Road to an existing 8-inch water main. \$125,650.00

After proper motion and second the Board voted to authorize staff to proceed with engineering design and construction for the subject projects.

The meeting adjourned at 3:05 p.m.

APPORTIONMENT WARRANT RESOLUTION
April 9, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Private Road: Wolf Pen Branch Road to End** main extension project authorized by Ordinance No. 5, Series 1999 of the Jefferson Fiscal Court, adopted on February 23, 1999 such warrants to be against eleven (11) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$7,045 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

PROJECT AREA 

FILE NAME: PRIV WOLF PEN BRANCH

Board of Water Works
Resolution
January 19, 1998

It appearing that this Board has received a petition, signed by a majority of the owners of property abutting the **Private Road off Wolf Pen Branch Road**, a private roadway in Jefferson County, and acting thereon convened a Public Hearing on October 29, 1998, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon the Vice President-Chief Engineer of the Company has recommended the extension of such water service to the **Private Road off Wolf Pen Branch Road**, as being feasible and beneficial.

NOW THEREFORE BE IT RESOLVED, that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along the **Private Road off Wolf Pen Branch Road**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Private Roadway off Wolf Pen Branch Road (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Private Roadway off Wolf Pen Branch Road.

This public hearing will be held on Thursday, October 29, 1998 at 6:00 p.m. at the Harrods Creek Fire Department, 8905 U.S. Highway 42 (Prospect, KY).

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

Board of Water Works
May 14, 2002**

Board Members Present

Mr. Jack H. Segal
Mr. Phillip D. Bond
Mr. Stephen C. Gault
Mr. Stewart E. Conner

Board Members Absent

Ms. Wendy Welsh
Mr. Owen Hammons
The Honorable David L. Armstrong

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Gregory Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President Serving Customers & Business Development
Mr. James Wehrle, Vice President, Assuring Resource and Organizational Effectiveness
Mr. Larry Lenahan, City of Louisville Finance & Budget Department

Mr. Huber called the meeting to order at 12:35 p.m.

APPROVAL OF CONSENT AGENDA WAS RECOMMENDED

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$100,000

REPORT OF OFFICERS

Administrative Report

Mr. Huber reported that he has been invited by the League of Women Voters and the Neighborhood Councils to talk about the Louisville Water Company.

The company has now transferred ownership of the 455 South Third Street property to the City of Louisville. The City of Indianapolis has repurchased the water utility for \$540 million.

Mr. Huber also reported that he attended the Derby this year by purchasing three tickets through Neptune Company. He disclosed this due to his interest in making full disclosure to the Board, given an item on today's agenda.

Financial Report

Mr. Miller presented the Income and Expense Summary for April 2002. He began by providing a review of the billing schedule and describing its impact on LWC's receipt of revenue.

Income and Expense Summary

- 1) Total operating revenue of \$28,632,300 is \$346,500 or 1.20% less than budgeted and \$459,500 or 1.63% more than the same period in 2001.
- 2) Operation and maintenance expense of \$13,133,000 is \$483,500 or 3.55% less than budgeted and \$742,700 or 5.99% more than 2001.
- 3) Operating deductions of \$20,861,100 are \$436,100 or 2.05% less than budgeted and \$1,283,700 or 6.56% more than 2001.
- 4) Net operating income of \$7,771,200 is \$89,600 or 1.17% more than budgeted.
- 5) Total non-operating income of \$2,263,100 is \$996,900 or 78.74% more than budgeted.

The journal entries for the retirement and transfer of the old corporate headquarters facility were recorded in April. The remaining book value of the facility was \$879,563, while the most recent appraisal (from June 1, 1998) is \$2,084,000. A new line was created under Dividend Declared (line 21 on the Statement of Income and Retained Earnings) to transfer the property at market value. This entry went directly to Retained Earnings and was similar to a dividend. It is currently identified as Donated Property but will be changed to Distributed Property in May. The total impact to retained earnings is a reduction of the remaining book value. These entries have been reviewed with Crowe Chizek and they concur with our treatment of this transaction.

- 6) Net income of \$7,794,500 is \$1,066,600 or 15.85% more than budgeted and \$313,400 or 3.87% less than 2001.

Capital Projects Summary

The capital program reflects net expenditures of \$14,068,147 against a budget of \$69,509,847 including noncompleted previous year projects carried forward. Projects committed aggregate \$78,297,024 or 112.64% of budget. Projects in progress or completed to year-end total \$16,389,859 or 23.58% of budget.

Financial Information System Proposals Received

Proposals were received on May 8, 2002 from Oracle, SAP, Lawson, JD Edwards and several implementation consultants for software and implementation services related to the new Financial Information System. Staff is currently evaluating these proposals and anticipates that a recommendation for selection will be forwarded to the Board of Water Works for consideration at the September 2002 meeting.

Mr. Conner and Mr. Segal expressed concern regarding the financial treatment of the sale of the building. They asked staff to reconsider the treatment given. Mr. Huber stated that staff would review the action taken and report back to the Board.

Mr. Heitzman provided the Operations Report for April 2002.

Production – Pumping for the month averaged 115.5 MGD, slightly above the five-year average of 114.2 MGD. Spring rainfall has slowed the water demand for irrigation sales that often increase demand by May of each year.

Distribution Water Quality Strategy – In an effort to maintain distribution water quality during summer demand periods, the following activities have been initiated:

- The chlorine residuals for plant effluent have been increased from 2.5 PPM to 3.0 PPM to help residual maintenance in the distribution system.
- Managing storage tank volume by creating a 33 percent turnover volume on each daily cycle
- Seven critical storage reservoirs and tanks have been pressure washed and disinfected for the upcoming summer demand period, including Brooks Hill, Cardinal Hill, Crestwood, Gap in Knob, Peaceful Valley, Phelps Knob, and Zoneton.
- Distribution system flushing, focusing on SW Jefferson and Bullitt Counties
- Evaluation of chlorine and ammonia feed rates at the treatment plant to optimize disinfecting
- Preliminary design on a booster chloramination system for installation in Bullitt County.

Blankenbaker/Buegrass Industrial Park Water Outage - Unauthorized turning of Louisville Water Company valves by contractors resulted in a large portion of the Bluegrass Industrial Park being out of water on April 19 and 20. In addition to customer inconvenience, the activity also necessitated a boil water advisory to be issued due to positive coliform water test results. Louisville Water Company employees worked approximately eighteen hours to resolve this situation.

Crescent Hill Reservoir Status – The north and south basins of the Crescent Hill Reservoir are currently out of service for installation of a new drain system and liner in the south basin. The north basin has been in service for two years since rehabilitation, and draining has allowed an inspection of the liner performance and sediment buildup. Approximately 18 inches of sediment has accumulated and the liner appears to be

in good shape. The north basin will be placed back in service in June, and relining of the south basin will be complete by September.

Ms. Teasley gave the Serving Customers Report for April 2002 Customer Service –

The April 2002 abandonment rate was 8.2%, a slight increase over the previous month's abandonment rate of 7.8%. The increase was caused exclusively by high call volume during the week of Spring Break, April 1 through 5, when many customers typically move or handle billing issues. The balance of the month averaged 4.5%

Bad Debt – Bad debt for the month of April was \$45,814, about \$17,000 above budget. However, bankruptcies made up \$12,000 of the total.

Bullitt County Advisory Board Meeting Summary – The Bullitt County Advisory Board met on April 25, 2002 to review first quarter results. Staff provided financial information regarding the status of the Bullitt County Water Reserve as well as the status on a number of capital projects underway in the former service areas of KT#1 and KT#2. By the end of the first quarter, the Bullitt County Water Reserve became depleted as expected and LWC funds are being loaned to the reserve at 5.34% interest in accordance with the Merger Agreement. Additionally, the Advisory Board reached agreement on a procedure to address high cost per customer majority petition main extension projects to assure that funds from the Bullitt County Water Reserve are being spent wisely.

MSD/LWC Memorandum of Understanding for Sharing of Digital Base Mapping Data – The Company and MSD have prepared a Memorandum of Understanding (MOU) for sharing of digital base mapping data. LWC has been compiling digital base mapping for all of Bullitt County, Kentucky, excluding Fort Knox, as a part of the foundation of the Automated Mapping/Facilities Management (AM/FM) System. In parallel with this effort, MSD has funded the compilation of digital base mapping for approximately 80 square miles of Southwestern Oldham County, Kentucky, as a component of updates for the LOJIC GIS. The Oldham Co. mapping includes all of the current LWC service area as well as the area served by Goshen Utilities. The MOU outlines the intent for LWC to allow MSD to utilize base mapping covering approximately 80 square miles of Northeastern Bullitt County in exchange for the use of the Oldham Co. base data. Both LWC and MSD will retain ownership and copyright of their respective data sets.

REPORT OF COMMITTEES

No committee reports were submitted.

LITIGATION REPORT

After proper motion and second, the Board adjourned to a closed session for the purpose of discussing litigation, personnel issues and acquisitions of property. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

SPECIAL ISSUES

Mr. Miller presented the following:

Transfer of Anthem Stock

Anthem Insurance Companies, Inc. successfully completed its conversion from a mutual insurance company to a stock insurance company through a process known as demutualization. As a result of the conversion, Louisville Water Company received 4,195 shares of stock. The value of these shares is

approximately \$287,350 (based upon a price of \$68.50 per share at the close of business on Wednesday, May 8, 2002).

After proper motion and second, the Board authorized staff to transfer the shares of stock LWC received as a result of the Anthem demutualization to Republic Bank investment Trust Account and conduct any and all subsequent transactions regarding said Republic Trust account which will facilitate the investment sale transfer and/or disposition of such shares.

BID TABULATIONS

Mr. Heitzman reported on the following:

Project No.: 01-316 North Lakeview Drive 16"

Bids were received Wednesday, April 17, 2002, to Furnish and Install approximately 6,195 feet of 16-inch water main in North Lakeview between National Turnpike and Blue Lick Road. In addition, 3,175 feet of 4" PVC water main will be furnished and installed in North Lakeview.

A total of seven (7) bids were received. These bids were evaluated using several weighted factors.

This work will complete a transmission connection to provide improved hydraulics and fire flow availability for the Northern Bullitt County area.

After proper motion and second the Board authorized the Chief Engineer to award a contract in the amount of \$666,538 to T & C Contracting to install water facilities associated with this project.

Mr. Miller reported the following:

Project No.: 02-13 Crane and Compressor, Tractor, Rider Sweeper

Bids were received and opened Wednesday, March 27, 2002 to award a contract for purchase and delivery of one (1) crane with a mounted compressor, one (1) tractor and one (1) diesel powered rider sweeper.

A total of eleven (11) responses were received, of which two (2) were disqualified. The lowest, most responsive bids are listed below:

Diesel Powered Rider Sweeper	Swift Industrial Power	\$ 36,239
General Purpose Tractor	Hunt Tractor, Inc.	\$ 30,678
PTO Air Compressor		
Crane Service Body		
Hydraulic Service Crane	J. Edinger & Son, Inc.	<u>\$ 52,986</u>
TOTAL CONTRACT PRICE		<u>\$119,923</u>

After proper motion and second, the Board authorized staff to award contracts totaling \$119,923 to the bidders listed above.

Project No.: 02-17 Flanged Spool Pieces

Bids were received and opened Wednesday, April 3, 2002 to award a two- (2) year contract for flanged spool pieces for large meter bypasses and test spools. Spool pieces are used in the installation and

renovation of large meters.

A total of 2 responses were received, of which one (1) was a "no-bid". **Derby Welding** was the sole bidder, whose bid totals \$132,689.00. After proper motion and second, the Board authorized the staff to award a two (2) year contract to **Derby Welding** in the amount of **\$132,689.00**.

Mr. Huber decided to move communication to the end of the Agenda. He moved forward to discuss Old Business.

OLD BUSINESS

Mr. Miller reported on the **Automated Reading Technology and Services**. Mr. Miller reviewed the status of the automatic meter reading equipment lease with the Board. The Board authorized staff to lease automatic reading equipment from Neptune Equipment Company at the April Board meeting. The staff now believes purchasing the equipment rather than leasing the equipment is more prudent.

After proper motion and second, the Board voted to ratify staff's decision to move from a lease contract to a purchase contract. The total cost of the contract for 2830 units over the 15-year period will decrease from \$527,369 to \$492,859. All other components of the contract remain unchanged.

Ms. Teasley reported on the following:

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265 Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place (Private Road)

An Apportionment Warrant public hearing was held for Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place on November 15, 2001. The public hearing was held in response to receipt of a majority petition for this private road project.

The property owners in attendance asked Louisville Water Company staff to further research alternative routes for the water main as well as hold a follow up meeting to discuss the results. The follow up meeting was held on December 14, 2001. Three alternative routes were proposed with the attending property owners agreeing that the best alternative provided was the original scope shortened to 1,295 feet at a revised cost per property of \$9,540 based upon five eligible properties.

After proper motion and second and based upon staff recommendation that the project was feasible and beneficial, the Board voted to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of the County ordinance, the Company will proceed with construction on this project.

Ms. Teasley reported on the following:

Amendment of Apportionment Warrant Register Taylorsville Road: Highway 155 to 15903 Taylorsville Rd

The Board approved a resolution for the issuance of Apportionment Warrants for Taylorsville Road: Highway 155 to 15903 Taylorsville Rd at it's October 30, 2000 meeting in accordance with KRS 96.265.

It was determined that Ms. Kimberly Hester's property does have frontage on the water main extension Taylorsville Road: Highway 155 to 15903 Taylorsville Rd and was not included in the original Apportionment Warrant Register due to incorrect Property Valuation Administrator information.

Secondly, the Apportionment Warrant Register approved at the October 30, 2000 Board of Water Works meeting incorrectly identified Tax Block 54 lot 175, owned by Williard and Joan Hester as an eligible property for the Taylorsville Road: Highway 155 to 15903 Taylorsville Rd extension project. Said property was incorrectly identified due to incorrect Property Valuation Administrator information.

After proper motion and second, the Board voted to amend the Apportionment Warrant Register thereby, adding Tax Block 54 Lot 173 (William and Kimberly Hester property) to the apportionment warrant register and omitting Tax Block 54 Lots 175 in accordance with KRS. 96.265.

Amendment of Apportionment Warrant Register

Dixie Beach Road: Dixie Highway West to End of Private Roadway

The Board of Water Works approved a resolution for the issuance of Apportionment Warrants for Dixie Beach Road: Dixie Highway West to End of Private Roadway at its June 12, 2001 meeting in accordance with KRS 96.265(11).

In response to a phone conversation initiated by Mr. Joseph Mattingly, staff was informed by Mr. Mattingly that Tax Block 1138 Lot 22, a benefited property along Dixie Beach Road: Dixie Highway West to End of Private Roadway, transferred from Robert H. & Jean G. Benton to Joseph and Patricia Mattingly. Mr. Mattingly requested staff change the billing of the Apportionment Warrant for Tax Block 1138 Lot 22 to reflect the property transference.

After proper motion and second, the Board voted to amend the resolution for Dixie Beach Road: Dixie Highway West to End of Private Roadway thereby, reflecting the current ownership and address of Tax Block 1138 Lot 22, encumbering Deed Book 7738 Page 681 and releasing the lien for Deed Book 6204 Page 684, in accordance with KRS. 96.265(11).

NEW BUSINESS

Mr. Heitzman reported on Metered Concrete.

Historically the Louisville Water Company has used contractors as an extension of the work force for certain specific activities required in the maintenance of the distribution system. Contractors are traditionally used in areas where the company either lacks expertise or when the capital investment to in-source the work is not cost effective.

Metered concrete is used on a daily basis to prepare roadway sub-bases for final asphalt pavement.

The Company currently has a contract with Preston Highway Metered Concrete, Inc. for the product and services required, however, this contract will expire this month. This contract was recently re-advertised for bid with only Preston Highway submitting a bid. Due to an informality the bid was not accepted. The contract was re-advertised and again Preston received no competition, however, their bid proposal increased by \$133,250 (30%) although the scope did not change. Staff does not recommend award of this contract.

Given the volume of metered concrete used by the company, and considering that the need for this product exists on a daily basis, staff has concluded that current market conditions indicate that it would be advantageous for the company to in-source this work activity.

Although the investment is significant, savings would be immediately realized by elimination of the contractor-provided truck driver. In-sourcing would be accomplished using the two-person crew, which LWC already dedicates to this work; thus, there will be no increase in LWC's workforce and the effective workforce would be reduced by 33%.

After proper motion and second, the Board authorized the staff to proceed with procurement of a metered concrete truck and associated equipment using funding in the amount of \$175,000. Staff will also work with local concrete suppliers to encourage competition in the metered concrete market.

COMMUNICATIONS

Mr. Miller reported that the 2001 strategic plan results will be discussed in June. He then presented the **Bond Rating from Moody's Investors Service**. Moody's Investors Service has affirmed the Aa1 Rating and stable outlook on the Water System Revenue Bonds.

Moody's report states "while system officials indicate a new multi-year capital plan is currently under discussion, officials do not expect any debt issuance for any purpose until at least the 2005-2006 time frame". Upon acceptance of the 2001-2020 Facilities Plan by the Board of Water Works, staff will begin communicating with Moody's and Standard & Poors regarding any additional borrowing needs in order to make every effort to retain this high quality bond rating.

The Board then viewed the Diversity Training Videos created by Human Resources and Organizational Effectiveness. All of the roles were played by LWC Employees.

The meeting adjourned at 2:40 p.m.

**Board of Water Works
Resolution**

May 14, 2002

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place**, a private way in Jefferson County, and acting thereon convened a public hearing on November 15, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President- Serving Customers & Business Development of the Company has recommended the extension of such water service along **Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA

FILE NAME: DEER RUN PLACE

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 98.265, the Louisville Water Company will hold a public hearing for the property owners along Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Deer Run Place: 4590 Deer Run Place to 4630 Deer Run Place.

This public hearing will be held on Thursday, November 15, 2001 at 6:00 p.m. at the Fern Creek Fire Protection District, Station #3, 7700 Rount Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

Sunday November 4, 2001

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

May 14, 2002

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on June 12, 2001, directing the issuance of Apportionment Warrants against properties located on Dixie Beach Road: Dixie Highway West to End of Private Roadway, to reflect the following information:

Revised Account Information:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assessment</u>
830277	Joseph and Patricia Mattingly	16220 Dixie Beach Road Deed Book <u>7738</u> , Pg. <u>681</u> Tax Block <u>1138</u> , Lot <u>22</u>	\$2,472

Original Account Information:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assessment</u>
830277	Robert H. and Jean G. Benton	16219 Dixie Beach Road Deed Book <u>6204</u> , Pg. <u>684</u> Tax Block <u>1138</u> , Lot <u>22</u>	\$2,472

It appearing that such property transferred subsequent to the issuance of Apportionment Warrants on June 12, 2001 with disregard to the Board of Water Works lien.

**MINUTES OF 2002 REGULAR MONTHLY MEETING
BOARD OF WATER WORKS
JUNE 11, 2002**

Board Members Present

Ms. Wendy Welsh
Mr. Owen Hammons
Mr. Jack Segell
Mr. Stewart Connor
Mr. Stephen Gault

Board Members Absent

Hon. David L. Armstrong
Mr. Phillip Bond

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Jim Brammel, BSO, Managing Distribution Operations
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Laurie Williams, Crowe Chizek
Mr. Jim Wehrle, Vice President, Assuring Human Resource and Organizational Effectiveness
Ms. Amber Halloran, BSO Supplying Financial Resources
Ms. Jane Driskell, Deputy Mayor, City of Louisville
Mr. Robert Miller, Vice President, Treasurer Supplying Business Resources

Mr. Huber called the meeting to order at 12:35 p.m.

CONSENT AGENDA APPROVED

- *Minutes of previous meetings*
- *Claims paid during the previous month*
- *Petitions and applications for water main extensions*
- *Authorization for design and bid of projects under \$200,000*
- *Bid tabulations for contracts under \$500,000*
- *Listing for award of contracts less than \$100,000*

Item A *Minutes of Regular Meeting Held June 11, 2002*
Request: Approve Minutes

Item B *Claims Paid During June 2002*
Request: file claims for future audit.

Item C *Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)*

REPORT OF OFFICERS

Administrative Report

Mr. Huber reported on the bio-terrorism bill. There is now a requirement that vulnerability studies be filed with EPA, but they will not be subject to disclosure to the public. We are also required to do an assessment report. We have approximately \$510,000 of grants we received from KIA. We have also made application for funds to perform federal vulnerability reports.

Financial Report

Mr. Miller provided the financial report. He introduced Ms. Laurie Williams of Crowe Chizek who spoke on the first item.

Crowe Chizek has recommended that the Old Headquarters Facility should be transferred to the City of Louisville at book value rather than at market value. Their previous guidance on this matter had not adequately considered the direct ownership relationship between the City of Louisville and Louisville Water Company. Consequently, there will not be a markup of the asset to the market value.

Income and Expense Summary

- 1) Total operating revenue of \$36,529,800 is \$1,596,200 or 4.19% less than budgeted and \$999,200 or 2.81% more than the same period in 2001. We sold 2.12% less water in 2002 than the same period in 2001.
- 2) Operation and maintenance expense of \$16,468,500 is \$539,700 or 3.17% less than budgeted and \$309,100 or 1.91% more than 2001.
- 3) Operating deductions of \$26,152,400 are \$442,800 or 1.66% less than budgeted and \$970,700 or 3.85% more than 2001.
- 4) Total non-operating income of \$1,306,700 is \$282,100 or 17.76% less than budgeted.
- 5) Net income of \$8,885,400 is \$1,459,600 or 14.11% less than budgeted and \$1,089,400 or 10.92% less than 2001.

Mr. Miller noted that the closing of Fisher Packing will result in a \$180,000.00 loss in revenue for The Louisville Water Company.

Capital Projects Summary

Status of Financial Information System Project

As reported at the May 2002 meeting of the Board of Water Works, Louisville Water Company received nine proposals for a new Financial Information System on May 8, 2002 and began our evaluation of the proposals. Upon completion of the initial review, we found that each of the nine proposals contained statements that caused the proposal to be excluded from further consideration. Therefore, staff decided to reject all of the proposals. The cost proposals were not opened, and all proposal packages were returned.

We removed or rewrote the problematic language to allow for meaningful discussion and negotiation. We also changed the evaluation process away from a "process of elimination" and towards a "process of selection". We reissued the Invitation for Proposals in early June 2002. Each of the proposers has indicated their intention to respond to the reissued Request for Proposals. The projected implementation date has been moved from September 2003 to October 2003.

The Series 2000 Bond funds will be fully spent at the end of June 2002. The Louisville Water Company will be able to retain all of its arbitrage earnings as a result.

Operations Report for May 2002

In the absence of the Chief Engineer, the Operations report was given by Mr. Brammell.

Distribution Water Quality

The goals for water quality were met in May. Historically, the period of May to September is the high occurrence season for total coliform. Preventive measures have been implemented by staff to reduce the occurrence rate.

Distribution System

On May 3, 2002, the unauthorized actions of a private plumbing contractor working in a Louisville Water Company easement off River Road resulted in issuance of a boil water advisory in the area. While performing an unauthorized tie-in of a new fire service, the contractor's actions caused a leak on the main.

A boil water advisory was issued for the area due to concern of contamination of the main by back siphoning. The contractor has been billed for the expenses associated with the leak and investigation.

Zorn 48-inch Repair - Repair operations have begun on the 48-inch cast iron main at the Zorn Pump Station. An emergency contract has been issued to Southern Pipeline Construction Company, who mobilized to the site the week of May 27. During the repair operations, the Zorn Pump Station is limited to approximately 150 MGD through the two 60-inch raw water lines. Repairs are expected to be complete and the water main returned to service by July 1. The revised repair estimate is \$131,000.

Serving Customers Report

Ms. Teasley gave the Serving Customer's report for May 2002.

Performance Measures

The May 2002 abandonment rate was 6.6% an improvement over the previous month's abandonment rate of 8.2%, and the lowest rate since December of 2001.

Oldham County Advisory Board Meeting Summary – The Oldham County District No. 1 Advisory Board held a special meeting on May 28, 2002 to review the status of Oldham County capital improvement and water extension programs, the Oldham County Reserve Fund and issues related to the proposed Goshen acquisition by the Company. Total funding of \$250,978 remains in the Oldham County Reserve Fund as of April 30, 2002, with an estimated \$201,025 of this total committed for projects.

Public Information Department Update – During April and May, over 300,000 LWC customers received Consumer Confidence Reports (CCR). This federally required water quality publication was also delivered via a "direct mail packet" to customers living in three West End neighborhoods. The special packet included a CCR, Pure Tap bottle and a synopsis of LWC work in the area. This "direct mail" pilot is an attempt to drive up Customer Satisfaction Index (CSI) numbers in this targeted geographic area. Results are expected in December.

Status of Automated Meter Reading Pilot – The installation of Automated Meter Reading (AMR) in the KTII district began Tuesday, June 4, 2002. It is anticipated that the installation project will be completed within 10-12 weeks. The customers have received post cards informing them of the project objectives and expectations. It is expected that LWC billing will interface with the automated reading software to produce a large percentage of the pilot area's August water bills.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation and acquisition of property. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

No Committee reports were presented.

SPECIAL ISSUES

Mr. Miller reported on the **Declaration of Dividend to the City of Louisville**. Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Commissioners of the Sinking Fund an annual dividend on the Louisville Water Company stock owned by the City.

The dividend is to be paid in quarterly installments, such payments to be based on estimated annual net income and as nearly equal in amount as possible. The budgeted net income of \$27,350,800 for 2002 requires payment of an annual dividend of \$12,208,300 in quarterly installments of \$3,052,075.

After proper motion and second the Board voted to authorize a total quarterly dividend payment of \$3,171,348.00 to the City of Louisville.

BID TABULATIONS

Mr. Brammell reported on the following:

Highway 329 Elevated Water Storage Tank in Oldham County

This tank will provide improved flow and pressure to the 940-pressure plane, plus provide storage capacity for system growth and expansion opportunities.

A base bid for a 500,000-gallon tank and an alternate bid for a 750,000-gallon tank was requested. Two bids were received for this project, ranging from \$803,000-\$948,000 for the base bid, and \$1,094,000-\$1,133,000 for the alternate bid. Based on cost evaluation, increasing the tank capacity by 50% from 500,000 gallons to 750,000 gallons will increase project cost by 29%. Caldwell Tank also submitted a ring foundation design which varies from the specification documents and geotechnical consultants' recommendation.

	Budget Estimate Of Record	Budget After Bids
Base Bid	\$ 775,000	\$ 803,000
Alternate Bid	\$1,050,000	\$1,094,000
Project Budget	\$ 975,000	\$1,294,000

After proper motion and second, the BOWW authorized the Chief Engineer to award a contract in the amount of \$1,094,000 to Chicago Bridge & Iron Company for the alternate bid to construct the 750,000-gallon Highway 329 Elevated Water Storage Tank, and to increase the project budget to \$1,294,000.

Ms. Teasley reported on the following:

Project No.: 02-501 16th Street Area – Main Replacement Project

Bids were received and opened Wednesday, May 15, 2002 to install 9,100 linear feet of 6 through 16-inch water line in the 16th Street Area of Louisville. A total of 4 bids were received and opened from pre-qualified contractors. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$698,600 resulting in a total project cost of \$948,600. This bid was evaluated based on cost, time of completion, and MBE/WBE subcontractor utilization.

The bid was less than 1% under the Project Manager's Estimate. The resulting total unit cost for this project is \$104.24/LF. This amount is in agreement with other MRRP Projects of this difficulty and scope.

After proper motion and second, the BOWW authorized the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$698,600 to MAC Construction and Excavating, Inc. to install the water facilities associated with this project.

Project No.: 02-502 Avon Road Area – Main Replacement Road

Bids were received and opened Wednesday, May 22, 2002 to install 4,210 linear feet of 6-inch water line in the Avon road Area of Louisville. Included with the project are the installation/renewal of 4 fire hydrants and the renewal/transfer of 54 customer services.

A total of 8 bids were received and opened from 4 pre-qualified contractors. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$259,900 resulting in a total project cost of \$296,900. This bid was evaluated based on cost (bid plus LWC materials), time of completion, and MBE/WBE subcontractor utilization. For the base bids \$50,000 is added to the bid amounts, while \$13,000 is added to the alternate bid amounts.

The bid is less than 1% under the Project Manager's Estimate.

After proper motion and second, the Board authorized the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$259,900 to MAC Construction and Excavating, Inc. to install the water facilities associated with this project.

Mr. Brammell reported on the following:

Project No.: 02-454 and 02-455 Roof Replacements at B.E. Payne and Crescent Hill Water Treatment Plants

Bids were received Wednesday, May 29 to replace roofs on the B.E. Payne and Crescent Hill Filter Buildings.

A base bid for the two Filter Building roofs and an alternate bid to add replacement of the Crescent Laboratory Building roof was requested. Six bids were received for this project, ranging \$538,000-\$633,518 for the base bid, and \$35,345-\$64,412 for the alternate bid.

After proper motion and second, the BOWW authorized the Chief Engineer to award a contract in the amount of \$586,000.00 to Geoghegan Roofing Corporation for the base and alternate bids for replacement of roofs at the production facilities.

Mr. Miller reported on the following:

Project No.: 02-16 Meter Setters

On May 29, 2002, bids were opened to award a two-year contract for the purchase of meter setters. Meter setters are used for the installation of domestic services.

A total of seven (7) bids were submitted. The lowest, most responsive bidder was Water Works Supplies, Inc.

This contract shall be in effect for two (2) years, from June 17, 2002 to June 16, 2004, for an estimated amount of \$174, 920.00. This price reflects a 0.6% increase from the previous contract.

After proper motion and second, the BOWW authorized staff to award a two (2) year contract to Water Works Supplies, Inc. for meter setters, totaling \$174, 920.00.

COMMUNICATIONS

No reports were submitted

OLD BUSINESS

Ms. Teasley reported on the following:

Issuance of Apportionment Warrants per KRS 96.265 Boone Trail: Johnson Road to end

A public hearing was held December 10, 1998 for the extension of water service along Boone Trail: Johnson Road to end. The Board of Water Works adopted a resolution for Boone Trail: Johnson Road to end on January 19, 1998 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 3, Series 1999 on February 23, 1999 (a copy of which is attached) for the Boone Trail: Johnson Road to end project.

With the completion of this private water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

During the public hearing phase of this project, residents who had "double frontage" on Boone Trail and an adjacent public road asked the Louisville Water Company to allow them access to the water main via the Boone Trail extension instead of the public road on which their property has frontage. Many of the residents with "double frontage" have lots considered "flag lots" which give them frontage to the public road, but the distance from the public road to their houses is much greater than the distance from Boone Trail to their residence.

After proper motion and second, the BOWW adopted a resolution for the issuance of Apportionment Warrants and liens against 15 benefited properties along Boone Trail: Johnson Road to end in accordance with KRS. 96.265, as described and in consideration of the request of the six "double frontage" residents, the Board also voted to permit those residents to access the water main on Boone Trail and thus be assessed \$1650 (the difference between the private road

cost and the public road cost) in addition to the public road Apportionment Warrant and be encumbered by a separate lien for the additional amount.

Mr. Brammell reported on the following:

Project 01-733: Concrete Apron Renovation at Allmond Avenue Distribution Center

Proposed under the 2002 Capital Improvement Plan is a project for improvements to the Allmond Avenue driving lanes and vehicle, equipment, and materials storage areas.

During conceptual and investigative design phase, additional improvements were identified to improve the management, operation, security, and life of the facility:

- Redesign of the primary and secondary entrances to improve LWC and public traffic safety
- Install a new security gate at the facility main entrance
- Install a new asphalt overlay on the employee parking lot
- Replace and re-grade additional failed concrete pavement, and install four additional catch basins for surface drainage improvement
- Improvements to the site railroad spur for forklift crossing safety

After proper motion and second, the BOWW authorized the Chief Engineer to increase the project budget from \$375,000 to \$625,000 and to proceed to final design and advertise for bid for the subject project.

Project No. 94-792B, Phase I, "Westport Road / I-264 Interchange Mains (Phase I)"

On September 29, 2000, the Company entered into a contract with MAC Construction & Excavating, Inc. in the amount of \$1,170,000 for the above subject project. The BOWW approved change action #1 in the amount of \$404,348 on July 10, 2001, and the President approved change action #2 in the amount of \$69,222 on March 20, 2002, resulting in a current contract amount of \$1,643,570.

Change Action No. 3 is proposed for an increase in the scope of work (850 feet of 36" transmission water main) to connect the new Westport Road Transfer Station to the existing Ormsby Lane 24" Cross-County Header. Installing the 850 foot segment of the transmission main at this time would alleviate a second future disruption to a portion of residential neighborhood in the Washburn/Westport area. This increase in the scope of work would be added as betterment to the KTC contract to be paid 100% by the LWC in the amount of \$434,365. A summary of the contract cost is shown below:

Current Contract Amount	\$1,643,570
Proposed Change Action #3	434,365
Proposed Contract Amount	\$2,077,935
	% increase
	26.4%

After proper motion and second, the BOWW voted to authorize the Chief Engineer to increase the contract with MAC Construction and Excavating, Inc. to \$2,077,935.

NEW BUSINESS

Mr. Brammell reported on the following:

Project No.: 02-603: PRP II Booster Pump Station

Proposed under the 2002 Capital Improvement Program is a project to install a booster pump station to the 810 pressure zone.

Presently the PRP I booster pump station is the single water supply to the 810 pressure zone. Pressure zone storage is 500,000 gallons, which, at full storage, provides approximately 6 hours reserve during average day demand conditions. The PRP I location is somewhat isolated (at Cardinal Hill reservoir), which, combined with overhead power lines, has resulted in unacceptable downtime as a result of power loss from severe storm events. This project will install a redundant pump station at a location on a different power grid to provide improved assurance of water supply to customers.

After proper motion and second, the BOWW voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Project No.: 02-658: Replace HVAC Unit at Allmond Distribution Center Operations/Maintenance Office

Proposed under the 2002 Capital Improvement Plan is a project to replace the central HVAC unit at the Allmond Distribution Center Operations/Maintenance Office. The proposed project budget is \$350,000, allocated \$25,000 in 2002 for engineering, and \$325,000 in 2003 for construction.

The present unit dates from the original 1967 construction of the facility. In addition to the age of the equipment, the unit is inefficient, and is undersized for the present-day occupancy, which is significantly higher than the original intent of the building.

After proper motion and second, the BOWW authorized the staff to proceed with engineering design and advertisement for bid for the subject project. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Ms. Teasley reported on the following:

Bullitt County Water Improvement Program – Bullitt County Extension Program Project 02-313 Weavers Run Tank, Booster Pump Station and Water Main Extension Project

Proposed under the Bullitt County Extension Program is a backbone water main extension, water storage tank and booster pump station installation project on Weavers Run Road. A $\frac{2}{3}$ majority petition has been received from residents on Barrallton Hill and Pendleton Road that would be served by this backbone water main extension, tank and booster pump station. The proposed Tapping Fee project will provide fire protection and water service to a previously unserved area.

There are 26 residents along this backbone main route. This project is necessary to provide water to the Barrallton Hill elevated service area. Estimated project cost is \$867,000.00.

After proper motion and second, the BOWW voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project. The results of the bids will be presented to the Board with recommendation for contract award.

Ms Teasley reported on the following as one unit:

The Louisville Water Company committed to pursue grant opportunities to assist in the funding of the Bullitt County Water Improvement Program as a condition of the Merger Agreement with the former Kentucky Turnpike Water District. To that end, the Louisville Water Company proposed 207 water main extension projects in May 2001 to the Kentucky Infrastructure Authority (KIA). The KIA 2020 Fund B is a state program that provides grant funding to assist communities in constructing infrastructure improvements to help achieve the state goal of bringing potable water to all citizens of Kentucky by the year 2020. The Louisville Water Company has received conditional commitment letters from KIA for grant assistance for seven projects totaling \$590,850.

The projects are: WX21029008 Big Cedar Cr. Ct.(Pine Cr. Rd); WX21029118 Millers Lane(Country Manor Ln); WX21029057 Foley Road; WX21029087 Ironwood Trail; WX21029007 Bearcamp Road; WX21029203 Yorkshire Blvd; and WX21111011 Bearcamp Road.

After proper motion and second, the Board voted to adopt the Resolutions on pages 90, 93, 96 and 99 of the June 2002 BOWW Board book, accepting the 2020/Fund B Grant, approving the Grant Agreements, authorizing the amendment of the 2002 LWC Budget to note receipt of grant funds and authorizing Karla Teasley to sign grant documents. Additionally, the Board authorized staff to proceed with project design and advertisement for bids for the listed 2020/Fund projects.

The meeting adjourned at 1:50 p.m.

**RESOLUTION TO DECLARE SECOND QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 12, 2002 to adjust the 2001 annual dividend by \$477,094 from \$12,599,250 to \$13,076,344, the difference to be added in equal quarterly installments to the quarterly 2002 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2002 Louisville Water Company budget contemplates the 2002 annual dividend to be \$12,208,380 it would be in order at this time to declare a regular second quarter dividend of \$3,052,075.

RESOLVED, the regular second quarter 2002 dividend of \$3,052,075 is hereby declared.

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,171,348 to the Louisville / Jefferson County Revenue Commission on June 28, 2002, this being the second quarterly dividend for 2002 plus one quarter of the dividend adjustment for 2001, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

APPORTIONMENT WARRANT RESOLUTION

June 11, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost **Boone Trail: Johnson Road to end** main extension project authorized by Ordinance No. 3, Series 1999 of the Jefferson Fiscal Court, adopted on February 23, 1999 such warrants to be against fifteen (15) benefited properties identified by present ownership and official records set forth on Exhibit B, attached, each apportionment warrant to be in the principal sum noted on Exhibit B and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

APPORTIONMENT WARRANT RESOLUTION

June 11, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost **Boone Trail: Johnson Road to end** main extension project authorized by Ordinance No. 3, Series 1999 of the Jefferson Fiscal Court, adopted on February 23, 1999 such warrants to be against fifteen (15) benefited properties identified by present ownership and official records set forth on Exhibit B, attached, each apportionment warrant to be in the principal sum noted on Exhibit B and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**MINUTES OF 2002 REGULAR MONTHLY MEETING
BOARD OF WATER WORKS**

JULY 9, 2002

Board Members Present

Ms. Wendy Welsh
Mr. Owen Hammons
Mr. Jack Segell
Mr. Stewart Connor
Mr. Stephen Gault
Mr. Phillip Bond

Board Members Absent

Hon. David L. Armstrong

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President & Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Amber Halloran, BSO Supplying Financial Resources
Mr. Steve Cooper, BSO Distribution Design and Construction
Ms. Melanie Lilly, City of Louisville Finance Department

Mr. Huber called the meeting to order at 12:35 p.m.

CONSENT AGENDA APPROVED

- *Minutes of previous meetings*
- *Claims paid during the previous month*
- *Petitions and applications for water main extensions*
- *Authorization for design and bid of projects under \$200,000*
- *Bid tabulations for contracts under \$500,000*
- *Listing for award of contracts less than \$100,000*

Item A Minutes of Regular Meeting Held July 9, 2002

Request: Approve Minutes

Item B Claims Paid During July 2002

Request: file claims for future audit.

Item C *Petitions and applications for Water Main Extensions and Relocations*
(when in full compliance / SR&R)

REPORT OF OFFICERS

Administrative Report

Mr. Huber reported that Vivendi is now selling United States Filter and other North American Water assets. Mr. Huber also indicated that the Board would hear a favorable financial report from Amber for the month of June. He also reported that a number of regulatory entities had been at LWC's facilities doing routine reviews. The results will go to the Audit Committee. We are now in the process of doing the facility plan and the 2003 budget. More will come to the Board later on these items.

Financial Report

In Mr. Robert Miller's absence, Ms. Halloran provided the report.

Income and Expense Summary

- 1) Total operating revenue of \$44,076,600 is \$1,040,000 or 2.31% less than budgeted and \$261,400 or 0.60% more than the same period in 2001. We sold 4.44% less water in 2002 than the same period in 2001.
- 2) Operation and maintenance expense of \$19,598,700 is \$1,036,500 or 5.02% less than budgeted and \$180,400 or 0.93% less than 2001.
- 3) Net operating income/deductions of \$12,949,800 is \$164,100 or 1.28% more than budgeted.

- 4) Total non-operating income of \$1,558,400 is \$336,900 or 17.78% less than budgeted. Total non-operating expense of \$3,357,600 is \$29,000 or 0.87% less than budgeted.
- 5) Net income of \$11,150,600 is \$201,700 or 1.78% less than budgeted and \$1,730,600 or 13.44% less than 2001.

Capital Projects Summary

The capital program reflects net expenditures of \$22,091,427 against a budget of \$69,509,847 including previous year projects carried forward. Projects in progress are completed to year end represent 38.93% of the budget.

Anthem Stock Sale Results

Staff has completed the sale of Anthem stock that had been received earlier this year as a result of demutualization. The net proceeds after commission for the sale are \$305,715.68. Staff is working to determine any distribution of the sale proceeds.

Financial Information System Proposal Review

Proposals for a new financial information system were received from ten software/implementation vendors, including all nine vendors from the previously cancelled request for proposal. One proposal was disqualified based upon an incomplete submission. Financial qualifications, scripted software demonstrations, and site visits will be performed in the coming weeks.

Operations Report for June 2002

Mr. Heitzman gave the Operations report for June 2002.

Production - The average pumping rate for June was 140.5 MGD, slightly above the five-year average for June pumpage of 139.9 MGD. For the year, pumpage is three percent less than 2001, and one percent less than the five-year average. Production operations is closely monitoring river conditions and systems demands to assure adequate, high-quality water can be supplied during the peak summer months.

Water Quality - There were 289 water samples collected in June, with 7 positive coliforms. All recheck samples were negative. The strategy to improve distribution water quality appears to be successful, based on data collected through June. Through June of 2001, there were 29 positives samples, compared to 15 for 2002 through June.

Distribution System - Distribution maintenance continues to be less than a typical year. The mild winter and low number of main breaks (261 through June) have allowed the work order backlog to be reduced below 700 units.

System Security - High priority continues to be placed on monitoring distribution system security and prevention of water theft. Close coordination with law enforcement will allow our field operations staff to become more vigilant and responsive to such incidents. The Company has also initiated a contractor identification program, which requires contractor vehicles to post a "LWC Contractor" magnetic sign on each licensed vehicle at the job site with a phone number for contact. Contractor pre-qualification certificates are being issued to contractors for field identification.

Zorn Water 48-inch Main Repair - Southern Pipeline Construction Company has completed repair of the 48-inch water main at the Zorn Pumping Station. The site has been restored and the water main returned to service. Total cost to repair this main is estimated at \$160,000. This type of failure was not budgeted in 2002, however, it is expected the repair costs can be absorbed in the existing budget due to the lower number of distribution main breaks projected for 2002.

The main basin of the Crescent Hill Reservoir is now back in service. The concrete work has been completed on the south basin. The liner will be completed and all work on the basins will be done by October. Residents around Crescent Hill are now asking when they will be able to access the reservoir again. Plans call for the installation of an ornamental fence.

Serving Customers Report for June 2002

Ms. Teasley presented the Serving Customers Report for June 2002.

Performance Measures – The June 2002 abandonment rate was 7.1%, a slight increase over the previous month's abandonment rate of 6.6%. This change was primarily due to higher call volume than normal; we received 4,762, or 17%, more calls in June than in May.

Bad debt for the month of June was 25,179. This reflects improved collection results and is below the budgeted amount by about \$4,000.

Extending the Distribution System

New Service Installations
2000 through 2002

Type Service Installations	Jan.-Jun. 2000	Jan.-Jun. 2001	Jan.-Jun. 2002	2000 Year-End Totals	2001 Year-End Totals	2002 Year-End Estimate
3/4" Domestic Services	1,541	1,939	1,784	3,257	3,810	3,525
1" Domestic Services	103	124	99	252	248	215
1-1/2" & 2" Domestic Services	52	41	38	120	113	90
4" & Larger Domestic Services	11	12	10	16	25	20
3/4" Irrigation Services	92	57	32	186	116	70
1" Irrigation Services	42	19	16	68	49	33
1-1/2" & Larger Irrigation Services	8	10	3	14	14	10

2" Irrigation Services	6	4	9	21	16	18
3/4" Retrofit Irrigation Services	273	196	180	512	411	420
Fire Services	31	32	27	82	81	70
TOTALS	2,159	2,434	2,198	4,528	4,883	4,471

We are below the 2001 levels but above the 2000 level in new service installation.

Public Information - The second quarter continues to be a very busy period for the Public Information Team. High profile events such as the Kentucky Derby Festival continue to provide a great platform to highlight our excellent product and service. Over 3,000 cases of Pure Tap were distributed throughout the community; media coverage was extensive and very positive.

Drinking Water Week also showcased our message that the water we produce is safe, healthy and abundant. Local TV stations broadcast their morning shows live from our bottling plant, and National Public Radio did a lengthy interview on the benefits of tap water over bottled brands.

"Adventures in Water," LWC's new curriculum, was also unveiled this quarter. Teacher in-services are underway and will continue through the fall.

Mr. Segell urged staff to review the automated telephone answering service to ensure that it is customer friendly.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation, acquisition of property and a personnel matter. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

In open session after proper motion and second, the Board voted to approve the Goshen closing and authorize the President to execute all necessary documents in furtherance of said closing.

REPORT OF COMMITTEES

No Committee Reports were submitted.

SPECIAL ISSUES

No Special Issues were submitted.

BID TABULATIONS

Mr. Heitzman reported on the following Bid Tabulations:

Project No. 02-29: Restoration and Construction of Paved Surfaces

On June 26, 2002, bids were opened to award a two-year contract for the restoration and construction of asphalt and concrete paved surfaces. The work to be accomplished under this contract consists of system improvement trench pavings and restoring paved and finished concrete surfaces.

Five (5) separate contracts for this service were combined into one (1) contract.

A total of two (2) bids were submitted. The lowest, most responsive bidder was Stoll Construction and Paving, Co., Inc.

After proper motion and second, the Board of Water Works authorized staff to award a two (2) year contract to Stoll Construction and Paving Co., Inc. for the restoration and construction of asphalt and concrete paved surfaces, for an estimated amount of \$1,699,200.00. Bid tabulations are attached for your review.

Project 00-470B Replace Vehicle Lifts at Allmond Distribution Center Garage

Bids were received Wednesday, June 12 to replace four (4) in-ground vehicle lifts at Allmond Avenue utilized for fleet maintenance on Company cars, trucks, and construction equipment. The present hydraulic-operated lifts are aged equipment, plus the new hydraulic and air-hydraulic operated equipment includes enhanced safety locks for improved reliability and operation.

Two bids were received from a limited bidder's pool ranging \$102,000 - \$109,469. The low bidder, H. F. McClure Maintenance Service Inc., has not performed work for LWC; however, a check of references indicated the firm has experience within the scope of work for this project.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a contract in the amount of \$102,000 to H. F. McClure Maintenance Service Inc., for replacement of vehicle lifts at Allmond Avenue.

COMMUNICATIONS

No reports were submitted

OLD BUSINESS

Ms. Teasley reported on the following Old Business:

Issuance of Apportionment Warrants per KRS 96.265 Old Taylorsville Rd.: Highway 155 to Highway 148.

A public hearing was held October 14, 1999 for the extension of water service along Old Taylorsville Rd: Highway 155 to Highway 148. The Board of Water Works adopted a resolution for Old Taylorsville Rd: Highway 155 to Highway 148 on January 11, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance.

With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second the Board of Water Works adopted a resolution for the issuance of Apportionment Warrants and liens against 21 benefited properties along Old Taylorsville Rd: Highway 155 to Highway 148 in accordance with KRS 96.265, as described.

Amendment of Apportionment Warrant Register Taylorsville Rd.: Highway 148 to Highway 155

The Board approved a resolution for the issuance of Apportionment Warrants for Taylorsville Rd: Highway 148 to Highway 155 at it's November 14, 2000 meeting in accordance with KRS 96.265. The Board amended the Apportionment Warrant Register for Taylorsville Rd: Highway 148 to Highway 155 on May 14, 2002.

The monthly Apportionment Warrant Statement for account # 797485, Tax Block 49 Lot 4, was returned to LWC by the United States Postal Service due to an insufficient address. Staff performed property research finding that the aforementioned property is actually a part of Tax Block 49 Lot 5, belonging to James D. Price, that was assessed on Highway 148, Old Clark Station Road, & Eastwood Fisherville Road.

AT&T Communications contacted staff on June 14, 2002 to question receipt of an Apportionment Warrant assessment on property known as Tax Block 49 Lots 37 and 55. AT&T provided a copy of Deed Book 7475 Page 111, recorded on July 6, 2000, transferring the property from AT&T to American Tower Management, Inc.

After proper motion and second, the Board of Water Works voted to adopt an amended resolution removing Tax Block 49 Lot 4 in the name of John and Esther Wolfe and revising the ownership information for Tax Block 49 Lots 37 and 55 for the Apportionment Warrant Register adopted by the Board of Water Works on May 14, 2002 in accordance with KRS. 96.265.

Amendment of Apportionment Warrant Register Routt Road: 9410 Routt Road to County Line

The Board approved a resolution for the issuance of Apportionment Warrants for Routt Road: 9410 Routt Road to County Line at it's March 12, 2002 meeting in accordance with KRS 96.265.

Mr. Calvin Shake contacted LWC staff to inform us that he does not own the property know as Tax Block 54 Lot 3, for which he received an Apportionment Warrant assessment. It was determined that the aforementioned property belongs to Dennis and Jessica Kromenacker, it is assessed by the Bullitt County Property Valuation Administrator, and has access to water through the City of Taylorsville Water District.

After proper motion and second, the Board of Water Works adopted and amended the resolution (Exhibit B); thereby, removing Tax Block 64 Lot 3 (Dennis and Jessica Kromenacker property) from the Apportionment Warrant Register adopted by the Board of Water Works on March 12, 2002 in accordance with KRS. 96.265.

Professional Service Contract for Construction Inspection and Technician Services Contract #E872

A professional service contract with Quest Engineers, Inc. to provide Construction Inspection and Technician Services for the Constructing Capital Improvements Processes was approved by the July 2000 Board. This approval authorized staff to supplement existing LWC in-house inspection forces with Quest Engineers consultant personnel to provide quality assurance and insure adherence to LWC Standard Specifications for work permitted by its pre-approved contractor workforce.

An updated proposal was requested from Quest Engineers to continue to provide these services for the remainder of the 2002 and 2003 Capital Improvement Program based on performance by the Quest Engineers employees and to assure construction quality by maintaining inspection coverage on current capital projects.

After proper motion and second, the Board of Water Works voted to renew the existing professional service contract with Quest Engineers a third year for the not-to-exceed amount of \$455,058 for Construction Inspection and Technician Services.

Ms. Halloran reported on the following Old Business:

00-66: Large and Small Meter Vault Frames and Lids: 1st PPI Renewal

The term of this contract shall be renewable for one year, with the option to renew for up to 3 additional one-year terms. This is a one-year contract renewal utilizing the Producers Price Index (PPI) as the cost adjustment factor, which represents a zero percent (0%) change from the previous contract prices. The Commodity Code referenced is 1015-0425, Gray and Ductile Iron Castings.

Contracts were awarded as follows for an estimated amount of **\$228,405.00**.

Bingham and Taylor

light & heavy frames/lids	\$176,045.00
light & heavy lids only	\$ 19,125.00

General Foundries

Monitor casting and lids \$21,750.00
Monitor lids only \$ 3,060.00

Ford Meter Box
¼ turn lids \$ 8,425.00

After proper motion and second, the Board of Water Works authorized staff to renew a one (1) year contract each with Bingham and Taylor, General Foundries, and Ford Meter Box for frames and lids, totaling \$228,405.00.

99-16: Pipe Repair Couplings, Sleeves, and Bell Joint Clamps: 3rd PPI Renewal

The term of this contract shall be renewable for one year utilizing the Producers Price Index (PPI) as the cost adjustment factor. This represents a 1% increase from the previous contract prices for the stainless steel products and a 0.9% increase for pipe repair couplings and bell joint clamps. This is the last PPI renewal for this contract.

Hughes Supply
Couplings/rings/gaskets \$ 85,961.00

Viking Environmental
Stainless steel sleeves \$ 31,118.00

Smith-Blair
Joint clamps and repairs \$ 25,803.00

Water Works Supply
Large couplings and sleeves \$ 13,437.00

After proper motion and second the Board authorized staff to renew a one (1) year contract each with Hughes Supply, Viking Environmental, Smith-Blair and Water Works Supply for pipe repair couplings, sleeves, and bell joint clamps, totaling \$156,319.00.

NEW BUSINESS

Mr. Heitzman reported on the following New Business:

Facilities Improvement Program; Request for Proposal for Consulting Engineering Services

The 2002 Capital Improvement Program identifies facilities improvement projects having a total value of nearly \$ 70 million dollars to be constructed over the next five years. It has been determined that the design of \$ 30 million of projects must be out-sourced. This equates to approximately \$ 5 million in consultant design contracts.

Toward this end, staff has prepared a Request for Proposal for Engineering Services (RFP) and will solicit proposals from engineering consultants.

The intent of the RFP is to solicit qualifications, experience, and hourly rates for the consultant's key job classifications. An evaluation or scoring matrix will be used by staff to select the firms for future work.

After identifying the firms to be retained, staff will prepare a scope of work for the projects to be out-sourced. Each scope of work will be matched with one of the selected firms and the consulting fee will be negotiated based upon the hourly rates submitted by that respective firm.

After proper motion and second, the Board of Water Works authorized staff to solicit RFP's and begin preliminary engineering for the 2002 Capital Improvement Plan and Engineering Services. The results of the RFP selection process will be presented to the Board. Contracts exceeding \$100,000 will be submitted to the Board of Water Works for approval.

LWC Project 01-745B KY Highway 1020 – Gap In Knob

Project 01-745B was identified in the 2001 capital budget as part of an overall improvement package for the former Kentucky Turnpike Water District. This project includes approximately 6,300 feet of 12" main replacing a 2" water main and strengthening the transmission grid both within the project area and south of the project toward Shepherdsville.

The 12" water main will improve hydraulic support to southern Bullitt County and provide backup supply during the road improvement project planned to widen Highway 61 to Shepherdsville.

The project is part of the Bullitt County "backbone" commitment and is budgeted at \$642,000 as part of the \$5 million Bullitt County Reserve fund.

After proper motion and second the Board of Water Works authorized staff to finalize design and advertise for bid for Project 01-745B KY Highway 1020: Gap in Knob 16" transmission main.

Westport Road 60" / 48" Interconnection Project Project No. 02-673

A project is proposed to install 400 +/- feet of 36-inch water main under the intersection of Chamberlain Lane and Westport Road.

Valve placement on the existing 60" and 48" main is such that if a break, leak, or other maintenance event requires a shut off between Westport Road and Lagrange Road the connection between the BE Payne treatment plant and the Westport Transfer Station is severed.

A valve inserted in the 60" main would be a less costly solution, however, inserting a valve would sever the tie to the English Station Reservoir and supply could not meet demand during a large portion of the outage period.

The project will improve system reliability by allowing flow between the B.E. Payne Water Treatment Plant and the Westport Transfer Station.

After proper motion and second, the Board of Water Works authorized staff to finalize the design and advertise for bid for Westport Road 60"/48" Inter-connection Project, Project No.02-673.

Highway 329 16" Transmission Main: Spring Hill Trace and Applepatch Development Project No. 01-742

A project is proposed to install 4,900 +/- feet of 16" water main and 450 feet of 12" main in Highway 329 between Spring Hill Trace subdivision and Applepatch development. The project will improve flow availability in the North Oldham County area and provide a more hydraulically efficient route to the proposed Apple Patch Tank recently approved for construction.

The size was increased to accommodate future growth of the area north of I-71 and to provide a hydraulically strong feed to the Applepatch tank, which is under construction. The Highway 329 right-of-way is one of the few crossings allowing easy access to the main with minimal easements.

After proper motion and second, the Board of Water Works funded the Highway 329 16" Transmission Main, Project 01-742 in the amount of \$855,440.00 from the 2001/2002 Capital Budget and authorized staff to finalize engineering design and advertisement for bid of the project.

Project 00-451: Production Facilities Security Systems

Proposed under the 2002 Capital Budget are funds to install security systems at the Production Facilities: Crescent Hill, Zorn, and B. E. Payne Treatment and Pumping Plants.

The Simplex security systems installed during construction of the Corporate Headquarters consist of electronic access control and accountability, managed by a computer network. The proposed project, budgeted at \$300,000, will expand the system to the Production facilities to enhance security and expand the record of entry to these facilities. Perimeter ingress/egress points and select building ingress/egress points will become controlled entry to limit access to employees only, with particular emphasis on buildings housing treatment processes. In addition, Distribution Centers located at Almond Avenue and Bullitt County, planned for future years, will be included to provide common and consistent security protocols to all Company facilities. The additional cost to add these two facilities is estimated at \$25,000.

After proper motion and second, the Board of Water Works authorized staff to proceed with engineering design and advertisement for bid for the subject project, and to establish a project budget of \$325,000.

The meeting adjourned at 2:30 p.m.

APPORTIONMENT WARRANT RESOLUTION

July 9, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of its **Old Taylorsville Road: Hwy 148 to Hwy 155** main extension project authorized by Ordinance No. 4, Series 2000 of the Jefferson Fiscal Court, adopted on February 8, 2000 such warrants to be against 21 benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**MINUTES OF 2002 REGULAR MONTHLY MEETING
BOARD OF WATER WORKS**

AUGUST 13, 2002

Board Members Present

Mr. Jack Segell
Mr. Stephen Gault
Mr. Stewart Conner
Mr. Phillip Bond
Ms. Wendy Welsh

Board Members Absent

Hon. David L. Armstrong
Mr. Owen Hammons

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. Ralph McCord
Mr. Don McKay
Ms. Barbara Crow
Mr. Irvin W. Quesenberry
Mr. Larry Gattish, Black & Veatch
Mr. Robert D. Lowndes, Black & Veatch
Mr. Rob Gipperich, Aeon Consulting
Mr. Larry Lenahan
Mr. Tom Woods, Louisville Paving
Mr. Doug Woods, Louisville Paving

Mr. Huber called the meeting to order at 12:30 p.m.

Mr. Huber postponed a discussion of the consent agenda until a quorum was present. He moved to a presentation of the officers' reports. The first Officer's report was given by Mr. Miller.

Mr. Miller provided the Financial Report for July, 2002:

Income and Expense Summary

The Income and Expense Analysis for financial results through July 2002 is as follows:

- 1) Total operating revenue of \$53,101,500 is \$1,180,100 or 2.17% less than budgeted and \$782,200 or 1.50% more than the same period in 2001.

- 2) Operation and maintenance expense of \$23,263,400 is \$850,400 or 3.53% less than budgeted and \$519,000 or 2.28% more than 2001.
- 3) Operating deductions of \$36,791,900 are \$1,089,000 or 2.88% less than budgeted and \$1,184,700 or 3.33% more than 2001.
- 4) Net operating income/deductions of \$16,309,500 is \$91,000 or 0.56% less than budgeted.
- 5) Net income of \$14,193,400 is \$534,300 or 3.63% less than budgeted and \$1,647,200 or 10.40% less than 2001.

Mr. Huber then moved to a discussion of the Consent Agenda since a quorum was present.

CONSENT AGENDA APPROVED

- *Minutes of previous meetings*
- *Claims paid during the previous month*
- *Petitions and applications for water main extensions*
- *Authorization for design and bid of projects under \$200,000*
- *Bid tabulations for contracts under \$500,000*
- *Listing for award of contracts less than \$100,000*

Item A: Minutes of Regular Meeting Held **August 13, 2002**
Request: Approve Minutes

Item B: Claims Paid During **August 2002**
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(When in full compliance / SR&R)

Mr. Huber then moved to a discussion of Item E, under Bid Tabulations (Page 104 of the Board Book). He did so because Mr. Doug Woods and Mr. Tom Woods from Louisville Paving arrived specifically to hear the Board's Discussion on this item. (He thanked them for their attendance).

Project No.: 01-733 Allmond Avenue Pavement Improvements:

Bids were received Wednesday, July 31 for improvements to the Allmond Avenue Distribution Center yard and parking areas. The improvements at the 35-year old facility include replacement of failed concrete aprons, replacement and overlay of asphalt surfaces, drainage improvements, ingress-egress modifications to accommodate new security hardware and improve traffic management for enhanced security and safety.

Four responsive bids were received ranging \$386,500 - \$535,305 versus the engineer's estimate of \$530,000. Bids for this project were evaluated by comparison against established criteria of the base bid, project completion time, MBE participation, and WBE participation (see attachment). The low bidder, Coupe Construction Company, placed a qualification to their unit price submittal for additional work requiring overtime to stay on schedule. Staff has reviewed this qualification and determined it does not materially affect the evaluation of the bid.

After proper motion and second, the BOWW authorized the Chief Engineer to award a contract in the amount of \$386,500 to Coupe Construction Company for improvements to the Allmond Avenue yard and parking areas.

Mr. Huber asked the Board to turn to page 90 in the Board of Water Works Board Book in order to discuss the 2002-2021 Facilities plan. Mr. Huber stated that the Facilities Plan Steering Committee consists of Stephen Gault, Jack Segell, Stewart E. Conner, Irvin W. Quesenberry, Jane Driskell, Kathy Matheny, Greg Heitzman and John Huber.

Mr. Huber asked Ralph McCord to review the Facilities Plan and the report that was provided to Committee.

The Louisville Water Company commenced its five-year review of the Company's 1995-

2015 Facilities Plan in November 2000. In March 2000, the BOWW authorized the Chief Engineer to enter into a contract with Black & Veatch, a nationally recognized engineering consulting firm, to work jointly with Company staff to prepare the 2002-2021 Facilities Plan.

The document developed for the Facilities Plan Steering Committee entitled Louisville Water Company 2002 – 2021 Facilities Plan distributed to the Board on August 13, 2002 is hereby incorporated into these minutes.

After proper motion and second, the Board of Water Works accepted the 2002-2021 Facilities Plan as a twenty year planning guidance document, which is scheduled to be updated in approximately five years.

Mr. Huber then asked the Board to turn its attention to page 83 in the Board of Water Works Board Book for the Operations Report.

REPORT OF OFFICERS

Mr. Heitzman provided the Operations Report.

Operations Report for July 2002

Production - The hot, dry weather of July contributed to a record production level of 165 million gallons per day (MGD) in July. The maximum day pumpage was recorded on July 8 with 181.2 MGD. Staff has observed that the peak demand continues to shift to the Elevated Service Area, with a water demand of over 70-MGD.

Water Quality - The Company produced outstanding water quality for the month, exceeding all three water quality goals of turbidity, chlorine, and bacteria. This is a significant accomplishment, considering the summer water temperature. The water quality strategy to reduce nitrification in the distribution system is fully implemented and is the reason for our success in July. The low river turbidity and water temperature will also begin to promote algae growth in the river. Staff is monitoring the MIB and Geosmin levels in the raw water to assure appropriate taste and odor control is implemented.

Distribution System – The hot dry weather during July has prompted a slight increase in main break activity. High pumping levels and dry soil moisture increases the stress on marginal water mains, accelerating their failure.

System Security - Security of the distribution system remains a high priority. Distribution Operations continues to receive several reports each week of unauthorized fire hydrant use. Security at the Allmond Avenue distribution facility is also a priority and is being addressed with projects to improve perimeter fencing and installation of electronic security access control.

Ms. Teasley provided the Serving Customers and Business Development Report for July 2002:

The July 2002 abandonment rate was 5.9%, and improvement over the previous month's abandonment rate of 7.1%.

Bad debt for the month of July was \$36,879 about \$8,000 above budget.

Currently Louisville Water is owed \$38,702 from Lake in the Woods and \$20,503 from South Hill Apartments, both owned by the same entity. This includes past due and current balances. The County is pursuing legal action against the owner for a number of building code violations as well as failure to pay utility bills. In compliance with a request from the County Attorney's office, LWC has suspended all Collections efforts until a hearing is held on the County's action.

Bullitt County Advisory Board Meeting - The Bullitt County Advisory Board met on July 25, 2002 to review the second quarter results. At the end of the second quarter, the Bullitt County Water Reserve is still borrowing funds from LWC even given a positive cash income to the reserve during the quarter.

LITIGATION REPORT

After proper motion and second the Board adjourned into closed session for the purpose of discussing litigation and a personnel item. Ms. Douglas gave a litigation report in closed session. The Board reconvened into open session without taking any action.

COMMUNICATIONS

After proper motion and second the Board voted to make a distribution of the proceeds from the sale of Anthem Stock as follows:

- 1) 50.7% of the value of the shares to Louisville Water Company, to be treated as ordinary non-operating income.
- 2) 49.3% of the value of the shares to be distributed to Louisville Water Company and retirees of record for the period December 31, 1989 through June 30, 2000 based upon the % of contribution toward premium.

Mr. McKay then reported on the Health Care Benefits Analysis:

Last January, when the Board approved LWC health care and other welfare benefits for the 2002-2003 plan year, it asked for an analysis of future costs and cost containment strategies at the August meeting.

The information was presented to the Board for information purposes only. The hand out distributed by Mr. McKay is hereby incorporated into and made a part of these minutes.

COMMITTEE REPORTS

Mr. Segell passed out the CSI report from the Public Information and Customer Satisfaction Committee. He indicated that at this time, the second quarter CSI score is 784. This exceeds the Level I achievement. Ms. Crow talked about recent feedback from the Customer Focus Group. Customers apparently prefer the current "empty" bottle and label. Ms. Crow also reported that the Jefferson County Public Schools are enthusiastic about the adventures in water curriculum.

Mr. Huber reported that IT is now exploring the use of a mobile dispatch unit.

SPECIAL ISSUES

Mr. Heitzman reported on the Emergency Services Contract.

Project 02-625 Crescent Hill Filter Plan Coagulation Unit #6

The coagulation process, which provides chemical treatment for removal of sediment, organic matter and bacteria from the Ohio River source water, is an essential process in the treatment of water. Several process units have failed over the past two years.

The coagulation process (mixing equipment and concrete basins) is subject to severe duty as a result of constant water immersion, mechanical vibration and stress, chemical corrosion, and weather cycles. The north coagulation basin and clarification equipment were constructed in 1944, while the south basin complex was constructed in 1971. Over the past year, three unit processes *#2m #4, and #7 have failed and cannot be repaired. Simultaneous failure of three or more of these units will reduce production capacity from 240 MGD to 145 MGD. Without replacement of Unit #6, the production facilities do not have reliable capacity to meet peak summer demand conditions.

Based on performance and ability to complete work by the 2003 summer demand period, Vesco Engineering, Inc. was solicited for a design-build proposal to replace all mechanical rotating elements of Coagulation Unit #6 (flocculation and clarifier).

After proper motion and second, the Board of Water Works authorized the President to execute an Emergency Certificate and the Chief Engineer to award an emergency service contract to Vesco Engineering, Inc. in the amount of \$645,394 to replace mixing and clarification equipment in Coagulation Unit #6 and increase Project No. 02-625 CHFP Coagulation System Improvements budget from \$500,000 to 1,075,000 to fund present and future project expenses. The emergency contract price is a not-to-exceed price negotiated by staff based on previous work preformed by Vesco Engineering and comparable bid pricing.

BID TABULATIONS

Ms. Teasley presented:

Project No.: 02-504 Central Avenue (Oldham County) - Main Replacement Project

Bids were received and opened Wednesday, July 17, 2002 to install 2,680 linear feet of 12-inch water line in Central Avenue in Oldham County. Included with the project are the installation/renewal of 5 fire hydrants and the transfer of 19 customer services.

A total of 6 bids were received and opened. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of **\$134,000** resulting in a total project cost of **\$208,600**.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$-134,000 to Southern Pipeline Construction Company to install the water facilities associated with this project.

Project No.: 02-510 Preston Highway - Main Replacement Project

Bids were received and opened Wednesday, July 31, 2002 to install 7,490 linear feet of 6, 8 and 12-inch water line along Preston Highway between Durrett Lane and East Indian Trail in south-central Jefferson County. Included with the project are the installation/renewal of 12 fire hydrants and the transfer or renewal of 82 customer services. In addition to trenching techniques, this project will make use of static main bursting techniques for the installation of 480 feet of 12-inch HDPE pipe.

A total of 4 bids were received and opened from pre-qualified contractors. Tom Brown Construction submitted the lowest responsive bid in the amount of \$512,280.00 resulting in a total project cost of \$743,280.00.

After proper motion and second the Board of Water Works authorized the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$512,280 to Brown Construction Company, Inc. to install the water facilities associated with this project.

Mr. Heitzman presented:

Project Number 01-742 Highway 329 16": Springhill Trace to Apple Patch

Bids were received Wednesday, July 10, 2002, to Furnish and Install approximately 4,900 feet of 16-inch water main in Highway 329 between Springhill Trace and Apple Patch Development. In addition, 450 feet of 12" water main will be furnished and installed in Highway 329.

A total of 4 bids were received from qualified contracting firms. **MAC Construction and Excavating, Inc.**, in the amount of \$765,000, submitted the best-evaluated bid.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a contract in the amount of \$765,000 to **MAC Construction and Excavating, Inc.** to install water facilities associated with this project.

Project No.: 00-451: Facilities Security System

Bids were received Wednesday, July 24 for installation of security hardware at LWC production and distribution facilities. These systems will expand site and building access control and accountability employed by the Simplex system utilized at the corporate headquarters, providing enhanced security and standard corporate-wide ingress-egress control.

Six bids were received ranging \$334,525 - \$397,967. The engineer's estimate was \$295,000, however market conditions for this type service are currently premium and the range of bids validates the market value of the proposed work..

After proper motion and second, the Board of Water Works authorized for the Chief Engineer to award a contract in the amount of \$334,525 to United Electric Company, Inc. for installation of security systems at production and distribution facilities, and to increase the project budget from \$325,000 to \$397,964.

Project No.: 01-733 Allmond Avenue Pavement Improvements

Bids were received Wednesday, July 31 for improvements to the Allmond Avenue Distribution Center yard and parking areas. The improvements at the 35-year old facility include replacement of failed concrete aprons, replacement and overlay of asphalt surfaces, drainage improvements, ingress-egress modifications to accommodate new security hardware and improve traffic management for enhanced security and safety.

Four responsive bids were received ranging \$386,500 - \$535,305 versus the engineer's estimate of \$530,000. Bids for this project were evaluated by comparison against established criteria of the base bid, project completion time, MBE participation, and WBE participation (see attachment). The low bidder, Coupe Construction Company, placed a qualification to their unit price submittal for additional work requiring overtime to stay on schedule. Staff has reviewed this qualification and determined it does not materially affect the evaluation of the bid.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a contract in the amount of \$386,500 to Coupe Construction Company for improvements to the Allmond Avenue yard and parking areas.

COMMUNICATIONS

Ms. Douglas reported on the first meeting of Goshen Utilities on August 1, 2002.

The Special Meeting of the Board of Directors of Goshen Utilities, Inc. was called to order by the President, Mr. John Huber, at 12:15 PM on Wednesday, August 1, 2002.

Mr. Huber stated that at the July 9, 2002 meeting of the LWC Board of Water Works, he had been given the authority, as President of the Company, to perform all acts necessary to effectuate the closing of the contemplated stock purchase agreement by LWC of Goshen Utilities, Inc.'s stock.

After proper motion and second, the Board took the following action at the August 1, 2002 Special Meeting:

1. Adopted a resolution naming the following Board Officers:

John L. Huber	President
Robert K. Miller	Vice President, Treasurer
Gregory C. Heitzman	Vice President, Chief Engineer
Laura M. Douglas	Vice President, General Counsel and Corporate Secretary
Karla O. Teasley	Vice President, Serving Customers and Business Development

2. Adopted a Resolution authorizing the Treasurer to select a depository bank and to execute all depository resolution of the bank.
3. Adopted Resolutions amending the Articles of Incorporation, amending and restating the Bylaws, changing the registered agent for service of process and changing the principal office and address.
4. Adopted a Resolution authorizing the President or his designee to execute a Memorandum of Understanding with the Louisville Water Company governing the provision of billing, collection and operations services.
5. Adopted a Resolution adopting and affirming the Rate Tariff filed with the Public Service Commission on November 15, 1999.
6. Adopted a Resolution ratifying, approving and endorsing the Bank One loan for One Hundred and Fifteen Dollars (\$115,000) which was identified as permitted debt at the July 31, 2002 closing.

OLD BUSINESS

Ms. Teasley reported on the following Old Business:

Issuance of Apportionment Warrants per KRS 96.265

Broad Run: Existing Water Main to Stout Road

A public hearing was held September 13, 2001 for the extension of water service along Broad Run Road: Existing Water Main to Stout Road. The Board of Water Works adopted a resolution for Broad Run Road: Existing Water Main to Stout Road on October 9, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance.

With the completion of a portion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works adopted the attached resolution for the issuance of an Apportionment Warrant and lien against one benefited property along a portion of Broad Run : Existing Water Main to Stout Road in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265

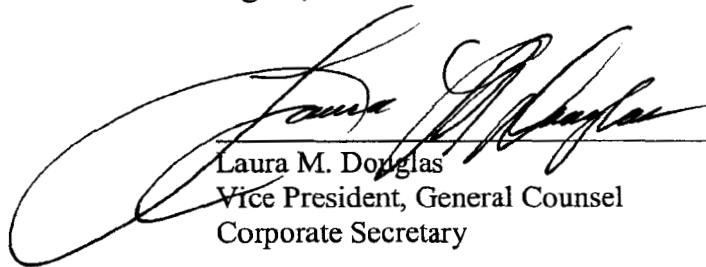

Hidden Creek Ln: Beginning 1,100 feet South of Thixton Lane to South 2,100 feet

A public hearing was held August 5, 1999 for the extension of water service along Hidden Creek Ln: Beginning 1,100 feet South of Thixton Ln to South 2,100 feet. The Board of Water Works adopted a resolution for Hidden Creek Ln: Beginning 1,100 feet South of Thixton Ln to South

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution for the Issuance of Apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Broad Run Road: Existing Water Main to Stout Road** main extension project and is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on August 13, 2002, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

August 13, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Broad Run Road: Existing Water Main to Stout Road** main extension project authorized by Ordinance No. 30, Series 2001 of the Jefferson Fiscal Court, adopted on November 13, 2002 such warrant to be against one (1) benefited property identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

2,100 feet on September 14, 1999 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance.

With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works adopted the attached resolution for issuance of Apportionment Warrants and liens against four benefited properties along Hidden Creek Ln: Beginning 1,100 feet South of Thixton Ln to South 2,100 feet in accordance with KRS. 96.265, as described.

Mr. Heitzman reported on the following Old Business:

**Bullitt County Water Improvement Program – Bullitt County Extension Program
Project No. 02-313 – Martin Hill Rd. to Hwy. 44 to Ft. Knox Main Extension Project**

This project was initiated by the Kentucky Turnpike Water District (KTWD) prior to its merger with the Louisville Water Company on September 29, 2000. The project meets a contract obligation between KTWD and Ft. Knox Military Reservation to provide water service to a new training facility south of Mount Eden Church Road and north of the Salt River. As a result of the merger, this contract obligation is now one of the Louisville Water Company. In June 2001, the Board granted authorization to construct the 8-in. water main to Ft. Knox. Since then, additional change actions were subsequently granted to the engineering consulting firm, Gresham Smith & Partners (GS&P), for the purpose of providing additional survey work, easement surveys, appraisal fees and preliminary design of a booster pump station.

The original budget sheet did not include estimates for LWC provided materials, supplies and internal labor. Change No. 5 is proposed to authorize LWC expenditures for internal labor, materials and supplies not initially included in the original budget sheet.

After proper motion and second, the Board of Water Works authorized the staff to increase the project budget amount to include LWC internal labor, materials and supplies in the amount of \$146,250. The total additions over the life of this project is \$150,756, which amounts to 18.04% of the original project budget. Approval will provide a new project budget of \$986,556.

**Bullitt County Water Improvement Program – Bullitt County Extension Program
Contract No. F202 – Martin Hill Road to Highway 44 to Ft. Knox Main Extension Project**

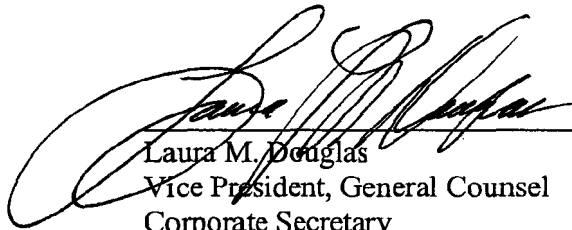

This project was initiated by the Kentucky Turnpike Water District (KTWD) prior to its merger with the Louisville Water Company on September 29, 2000. The project meets a contract obligation between KTWD and Ft. Knox Military Reservation to provide water service to a new training facility south of Mount Eden Church Road and north of the Salt River. KTWD entered into a Professional Services Contract with Gresham Smith & Partners (GS&P) to provide professional engineering and land surveying work for preliminary routing and cost estimating, easement acquisitions, final design, and project inspection and engineering certification of the project at a cost not to exceed \$71,230.

Additional design work for a new storage tank is needed due to the hydraulic necessity of an intermediary pressure plane to provide adequate supply to the Martin Hill booster pump station to supply the Gospel Kingdom Tank.

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution for the Issuance of Apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Hidden Creek Lane: beginning 1,100 feet South of Thixton Lane to South 2,100 feet** main extension project and is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on August 13, 2002, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

APPORTIONMENT WARRANT RESOLUTION

August 13, 2002

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Hidden Creek Ln: Beginning 1,100 feet South of Thixton Ln to South 2,100 feet** main extension project authorized by Ordinance No. 33, Series 1999 of the Jefferson Fiscal Court, adopted on October 12, 1999 such warrants to be against four (4) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

After proper motion and second, the Board of Water Works authorized staff to increase the project budget amount and proceed with engineering design for the tank by Gresham Smith & Partners in the amount of \$22,000. The total additional changes over the life of this contract is \$26,506, which amounts to 37.2% of the original contract amount. Approval establishes a new contract value of \$97,736 and authorizes a tank construction budget of \$270,000.

Ms. Teasley reported on the following Old Business:

Request for Change Action

Liberty Street – Main Replacement Project LWC Project 01-508

On August 20, 2001, the Company entered into a contract in the amount of \$197,950 with Portland Utilities Construction Company for the Liberty Street Main Replacement Project. While the project was intended to pilot the use of static main bursting techniques for the installation of a new 12-inch HDPE water main in a business district setting, the project also specified that the installation of the new main in the intersections would be completed using ductile iron pipe and traditional trench installation techniques.

The scope of the project was revised shortly after the start of the project and the main bursting portion of the project was eliminated in favor of trench installation when it became evident that main bursting would not be possible due to the existence of a multi-duct electrical line in close proximity to the existing 8-inch water line.

Due to the change in project scope from using pipe-bursting techniques to using traditional trench excavation techniques, the contractor incurred additional costs prior to change in project scope. These cost include mobilizations, site preparation and initial pipe installation work totaling \$27,835.70.

With the change to traditional trenching excavation techniques, the Contractor attempted to incorporate the on site existing HDPE pipe into the project. The pipe, which had already been fused together into 200-foot lengths, did not lend itself to traditional trench installation

To accommodate switching to trench excavation techniques and utilizing the Supplementary Unit price for this activity, LWC elected to purchase the on-site HDPE pipe from the contractor. The total cost of the HDPE materials is \$31,890.29. A portion of this cost will be re-assigned to Preston Highway when the remaining 12-inch HDPE pipe is utilized.

After proper motion and second, the Board of Water Works authorized the Vice President of Serving Customers and Business Development to increase the contract amount with Portland Utilities Construction Company from \$197,950 to \$287,354.77 and to proceed with the close out of this project.

NEW BUSINESS

Mr. Heitzman reported on the following New Business:

Project 99-407: Construct Hillcrest Elevated Water Tank

Proposed under the 1999 Capital Budget were funds for construction of a new storage facility required to support system growth in Oldham County. This correspondence presents the project scope and justification, requests authorization for engineering design and advertisement for bid, and recommends a revised budget to fund an increase in storage capacity.

The proposed facility was originally budgeted at \$650,000 for a 500,000 gallon storage tank to provide service to Northwest Oldham County. This budget was later increased to \$900,000 to fund increased market value of storage tank construction and for property acquisition, approved by the April 2000 Board. As a result of the acquisition of Goshen Water Utilities, the service area expansion and growth justifies a larger storage volume.

After proper motion and second, the Board of Water Works authorized staff to proceed with engineering design and advertisement for bid for the subject project, and for the Chief Engineer to increase the project budget to \$1,350,000. Any significant change in project scope or budget identified prior to bidding will be presented to the Board for review and re-authorization to proceed. Staff will also initiate property acquisition in the Goshen area for location of the 1 MG facility.

LWC Project No. 94-792B, Phase II; Furnish and Install Westport Road / I-264 Interchange Transmission Mains (Phase II)

Request for Authorization to Advertise for Bids

The Kentucky Transportation Cabinet (KTC) intends to construct an interchange at Westport Road/Watterson Expressway. This highway construction is being coordinated with LWC's transmission improvements and the new Westport Road Transfer Station. Project No. 94-792B is a two-Phase relocation project to provide adequate suction and discharge piping to and from the new Transfer Station.

Because of the KTC's cost participation and project coordination, the KTC will review the LWC's final-design plans and specification, as well as the cost estimate.

After proper motion and second, the Board of Water Works authorized staff to advertise Project No. 94-792B, Phase II and draft an agreement with KTC for construction and reimbursement of Phase II. Bid results will be presented to the Board for contract approval and authorization to enter into an agreement with KTC.

Consulting Engineering Services – Wolf Pen Branch 36" – LWC Project 01-557

In August 2001 the Transmission Program presented the results of a RFP for Transmission Program Consulting Proposals to the Board of Water Works. These proposals are to be used on projects identified for outsourcing to consultants. Four firms have been selected and approved by the Board for solicitation of cost proposals.

A cost proposal was requested, from Gresham Smith Partners (GSP), for final design engineering and contract administration services for a 36" main between Prospect Village and the 48" main in Westport Road. GSP submitted a cost proposal in the amount of \$226,323, which is \$2,523 more than the independent estimate of \$223,800. The engineering design costs represent 6.1% of the phase 1 construction estimate for this project.

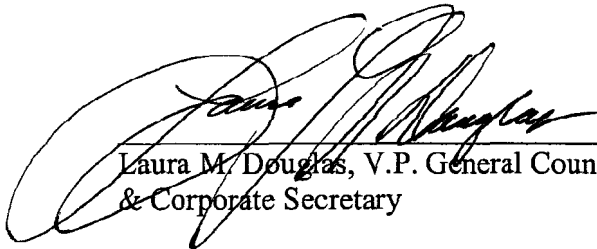

GSP submitted a cost proposal for Phase 1 in the amount of \$226,323, which is \$2,523 more than the independent estimate of \$223,800.

After proper motion and second, the Board of Water Works authorized staff to enter into an engineering service contract with Gresham Smith and Partners in the amount of \$226,323 for Final Design Engineering Services and proceed with advertisement for bid of phase 1 of this project. The Phase I project budget is \$4,070,000.

Mr. Huber announced that the remainder of the agenda for the update on Mid-year Strategic Plan results would be passed to the next meeting board meeting on September 10, 2002.

The meeting adjourned at 3:00 p.m.

Submitted by:

Laura M. Douglas, V.P. General Counsel
& Corporate Secretary

**MINUTES OF 2002 REGULAR MONTHLY MEETING
BOARD OF WATER WORKS**

SEPTEMBER 10, 2002

Board Members Present

Mr. Jack Segell
Mr. Stephen Gault
Mr. Phillip Bond
Ms. Wendy Welsh
Mr. Owen Hammons

Board Members Absent

Hon. David L. Armstrong

Others Present

Mr. John Huber, President
Ms. Jami Young, Corporate Counsel
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. Robert Miller, Vice President, Treasurer
Mr. Larry Lenahan

Mr. Huber called the meeting to order at 12:43 p.m.

CONSENT AGENDA APPROVED

Item Minutes of Regular Meeting Held **August 13, 2002**

A: *Request: Approve Minutes*

Item Claims Paid During **August 2002**

B: *Request: File claims for future audit.*

Item Petitions and applications for Water Main Extensions and Relocations

C: *(when in full compliance / SR&R)*

Developer Installed Refunding Projects	Total Project Cost	Net Cost To LWC
Project 02-020 F925M Cedar Springs Phase 2	\$ 19,750.00

Christman Road (LWC Proj. 02-479)	\$	5,000.00	\$	2,500.00
City of St. Matthews Relocation: Richland Avenue Drainage Improvement Project (LWC Project No.: 02-475)	\$	5,500.00	\$	5,500.00

Item D: Authorization for design and bid of projects *(estimated to cost less than \$200,000)*

Total Project Cost Net Cost To LWC

Bashford Manor Lane Water Facilities Relocation Project (LWC Project No. 02-477)	\$	182,000.00	\$	142,000.00
---	----	------------	----	------------

Item E: Bid tabulations *(award of contracts less than \$500,000 having at least 3 bidders and not more than 5% over budget if there are no bid informalities and the lowest price received is from a qualified Bidder and that the second bidder is within 10% of the low bid).*

- 6) Net income of \$18,131,800 is \$1,540,000 or 9.28% more than budgeted and \$1,116,400 or 5.80% less than 2001.

Capital Projects Summary:

The capital program as shown on the Capital Projects Summary attached reflects net expenditures of \$30,374,038 against a budget of \$69,509,847 including previous year projects carried forward. Gross disbursements were \$34,556,254; however, \$4,182,216 was received as reimbursements. Projects committed aggregate \$84,765,633, or 121.95% of budget. Projects in progress or completed to year-end total \$37,297,693 or 54% of budget.

Operations Report for May 2002

Mr. Heitzman gave the Operations Report for August 2002.

Production: The hot, dry weather continued in August contributing to an average production level of 165.8 million gallons per day (MGD). This is approximately 8 percent above the five-year average of 153.6 MGD. The maximum day pumpage was recorded on August 6 with 185.8 MGD delivered to the distribution system and near record levels.

Water Quality: For the 8th consecutive month, the Company produced outstanding water quality, exceeding all three water quality goals of turbidity, chlorine, and bacteria. Historically, August is the most challenging month to manage distribution water quality due to high water temperature while managing system water demands. The water quality strategy to reduce nitrification in the distribution system has been a success, and staff expects the strategy to yield improved water quality through the remainder of the year.

Low river flow volume (less than 0.2 mph), low turbidity and high water temperature have prompted the development of several algae blooms in the Ohio River. The Company's Taste and Odor control strategy has been implemented, including monitoring and activation of the Taste and Odor panel of internal and external customers. MIB has been detected as high as 10 parts per trillion (PPT) and staff has initiated chemical feed with powdered activated carbon (PAC) at a 25 to 50 pound per million gallon feed rate. We have the capacity to feed as much as 500 pounds per million gallons of treated water to address MIB levels in excess of 10 PPT. In 1999 MIB levels reach 120 PPT. Continued dry weather is expected to increase MIB levels and the need for carbon feed. A carbon feed rate of 50 pounds per million gallons costs approximately \$2700 per day to treat 150 million gallons of water.

There were 17 boil water advisories issued in August due to main breaks. 14 boil water advisories were issued because of positive total coliform test results, while three were issued due to a system pressure drop to below 20 PSI at the break site. These advisories were localized to the customers affected by the main break.

Goshen Utilities Operation: Louisville Water Company assumed Goshen operations on July 31, 2002. On August 14th, a power supply failure at the finished water pump station resulted in a loss of water supply and a pressure drop below 20 PSI. Boil water advisory was issued to the affected customers and subsequently lifted 24 hours later, when test results confirmed no

Debit/Credit Card Payments : LWC began offering customers the opportunity to pay their water bills with their debit or credit cards in the 3rd Street office lobby on August 1, 2002. Currently we are averaging ten transactions per day, which is about the level of transactions that were initially anticipated.

Beginning Tuesday, September 10, 2002 customers will be able to make credit card payments over the telephone during standard work hours. The final implementation of this project will be late fourth quarter 2002 or early first quarter of 2003, which will allow customers to pay their bills with a credit card seven days a week, 24 hours a day via the Interactive Voice Response (IVR) software system.

Public Information : National Public Radio's "The Connection" featured Louisville Water Company's Pure Tap program as part of a three part series on water. LWC received about 10 minutes of national airtime to promote this customer education initiative.

Jefferson County School Superintendent Dr. Stephen Daeschner, put his stamp of approval on LWC's new curriculum "Adventures in Water". In a letter to LWC staff, he called the publication a "vital project" and a "valuable resource" for teachers. In-service programs introducing the curriculum to teachers continue.

Employees participated in a CEO brown bag discussion of both the recent Goshen acquisition and advanced treatment plans. And once again LWC partnered with the Dental Society, manning a large booth at the Kentucky State Fair. The benefits of fluoridated water and good dental hygiene were promoted.

LITIGATION REPORT

There were no regular or closed session items to report.

REPORT OF COMMITTEES

Audit Committee

An Audit Committee meeting was held on August 14, 2002.

Mr. Miller reported to the committee regarding the status of the financial information systems bid. The project is on time. There are no recommended changes to the budget at this time. A recommendation concerning the successful bidder will be brought to the Board in September or October 2002.

Mr. Miller reviewed his plans for designating an external auditor for the 2002 fiscal year. Currently, Crowe Chizek is the auditing firm. We have one more year for renewal for the current audit agreement. Crowe Chizek has been the external auditing firm since 1991. Mr. Miller recommended that the company renew the current agreement with Crowe Chizek. This renewal would establish Crowe Chizek as the company's auditors through April of 2004. Mr.

directing the President to pay \$3,171,348 to the Louisville / Jefferson County Revenue Commission on September 30, 2002.

Mobile Dispatch System

Karla Teasley and Tony Gregory gave the following report regarding the Mobile Dispatch System: LWC is committed to providing best in class customer service and satisfaction. Our field services are key in providing high levels of customer satisfaction, responding quickly to customer needs and service issues, and maintaining the investment we have made in the distribution system. Improving our field service efficiency directly relates to several strategic and operating objectives as identified below:

- Increase the Overall and Serviced Accounts Customer Satisfaction Index significantly by 2004.
- Automate current manual field procedures for work orders and service orders through implementation of an Automated Dispatch and Mobile Computing System.
- Increase in system size through acquisition and growth opportunities will require enhancement of current information system capabilities to provide appropriate information to field staff in efforts to maintain and improve customer service and response times.

Initially, the focus of the automated dispatch and mobile computer system was for customer service orders only. After review of the technology and several benchmarking sessions of the technology utilized by others in the industry, staff recommends increasing the scope to include fire hydrant maintenance, work order assignment, service scheduling, and first run response work orders.

To meet these objectives, staff recommended utilizing existing budget funds in the amount of \$770,000 for the implementation of an Automated Dispatch and Mobile Computing System and allocate an additional amount of \$ 285,000 in capital funding necessary to cover the full scope of the project as outlined above.

Management presented a detailed Business Analysis that outlines the conceptual plans and budgets necessary to procure and implement an Automated Dispatch and Mobile Computing System to support field customer service. Staff requested authorization for final design and request for competitive negotiations for the project at an estimated cost of \$1,055,000.

After proper motion second, the Board voted to implement final design and conduct competitive negotiations for the acquisition of a Mobile Dispatch System.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to enter into Contracts for emergency repairs or capital construction on the transmission system upon approval of the President or the Board of Water Works as required by the 2002 Budget Resolution. The basis of contract award would be: the Contractor's unit price bid entries, the Contractor's work history, and the Contractor's availability to perform the specified work at the time of the emergency/improvement.

Mr. Miller reported on the following Bid Tabulations:

Project No.: 00-15/PVC Pipe-Final PPI Renewal

On May 16, 2000, the Board of Water Works approved the recommendation to award a contract for PVC pipe to Uponor ETI. This contract contained a provision that allowed it to be renewed over a three-year period at the sole discretion of the Company. All renewals would utilize the Producer Price Index, Product Code 3084-114 "Plastic Pipe - Water" to determine any adjustments to the original bid unit prices. This is the second and final PPI renewal.

Staff has reviewed the Producer Price Index and based on favorable market conditions, determined it would be in the best interest of the Company to exercise our right to renew the contract.

After proper motion and second, the Board of Water Works authorized the renewal of the contract with **Uponor ETI**.

Project No.: 02-43/LWC Property Protection

On August 14, 2002, bids were opened to award a two-year contract for property protection. This contract is to protect Louisville Water Company personnel, properties and assets from potential terrorist and criminal activities.

A total of five bids were submitted, with the lowest, most responsive bid from Louisville Patrol and Detection Security, Inc. for an estimated two year total of \$591,168. Three bidders were disqualified for failure to meet technical specifications.

After proper motion and second, the Board of Water Works gave authorization to award a two-year contract totaling an estimated \$591,168 to Louisville Patrol and Detection Security, Inc.

Project No.: 02-36/Worksite Security

On August 14, 2002, bids were opened to award a two-year contract for worksite security. This contract is for traffic control and security at various job site locations.

A total of two bids were submitted, with the lowest, most responsive bid from **Off Duty Police Services Inc.** for an estimated two year total of **\$613,640**.

After proper motion and second, the Board of Water Works gave authorization to award a two-year contract totaling an estimated **\$613,640** to **Off Duty Police Services Inc.**

Mr. Miller reported on the following Bid Tabulation which was added to the Agenda on September 10 2002;

Bid No. 02-46: Water Treatment Chemical Bids

Bids were received on July 31, 2002 for the annual supply of water treatment chemicals to the Crescent Hill Filter Plant (CHFP) and B. E. Payne Water Treatment Plant (BEPWTP).

Staff recommended contracts to be awarded to the best-evaluated bidders. The list of proposed contracts include the recommended contract to Polydyne Co. for Polyaluminum Chloride and Polymer – P(DADMAC) specifically evaluated as the most cost-effective for turbidity removal, as well as a contingency contract to Mead Westvaco for supply of a taste and odor (T&O) grade carbon specifically evaluated as the most cost-effective for MIB removal. Additionally, the award of contingency contracts to U. S. Aluminate for Liquid Aluminum and Univar / VOPAK USA for Sodium Hydroxide are recommended in the event these chemicals are required for treatment.

Based upon annual usage levels anticipated, the recommended contracts for treatment chemicals total **\$1,550,103**.

After proper motion and second, the Board of Water Works approved Vice President, Robert Miller's recommendations of the above mentioned contracts relating to Water Treatment Chemicals.

COMMUNICATIONS

Ms. Teasley reported on the following:

KT II Automated Meter Reading Project

Meter exchanges in the KT II automated meter reading project began the first week of June 2002. Since beginning the project the district has been billed twice, June 28th and August 28th. Neptune equipment supplied 41% of the meter readings for the first billing and 99% of the readings for the second billing.

Installation - LWC personnel interacted very well with Neptune Equipment personnel. The Meter Shop at Allmond served as a staging area, Meter Shop personnel worked hand in hand with the contractor issuing and receiving meters and equipment. Neptune Equipment averaged approximately 250 meter exchanges per week. Although we had numerous issues with vaults and vault covers, our biggest challenge seemed to be data administration.

Throughout the pilot LWC and Neptune Equipment identified several opportunities to improve the data entry process. Neptune Technologies was consulted and requested to provide data files identifying and linking meter and R-900 serial numbers. The data files improve our ability to manage meter history and facilities management records. They also enhance our ability to move or transfer these devices throughout our system. Barcode tools were utilized to improve our ability to assign meter numbers and update service orders lessening instances where numbers are transposed through data entry. LWC created numerous data queries insuring data accuracy and assuring the database is reliable. The data administration is critical to the success of any AMR project.

- Control Increases to Operations and Maintenance Budget. Staff has developed a draft Operations and Maintenance Budget limited to an eight-tenths of one percent increase; additional reviews are underway for items that were not included within that limitation.
- Water Provided in Lieu of Taxes Will Increase. Louisville Water Company will be providing water to additional city agencies in 2003.
- Depreciation Expenses Continue to Increase. With the increased investments identified in the 2002-2021 Facilities Plan, depreciation expenses will continue to increase as the fastest growing expense component.
- Low Interest Rates Reduce Non-Operating Income. Short-term interest rates were budgeted at 3% for the 2002 Annual Budget. Recent investments are earning only 1.6%. Reduced non-operating income in 2003 will require replacement through additional water revenue. This item may be one of the key drivers for the contemplated water rate increase.
- Return on Equity Rate Grows Slightly. The return on equity rate to be included in the 2003 Annual Budget will be 9.07%, increased slightly from 9.02% in 2002.
- Dividend Affected by Bond Principal Payments. Principal payments for the Series 2000 Bonds will commence in 2003. The principal payments are deducted from Net Income prior to computing the annual dividend.

A water rate increase of 3% to 3.5% is being contemplated in order to adequately fund this annual budget. Staff is preparing a Preliminary 2003 Annual Budget for consideration by the Board of Water Works in October 2002.

OLD BUSINESS

Mr. Huber and Ms. Teasley reported on the following Old Business:

**Bullitt County Water Improvement Program – Bullitt County Extension Program:
LWC Project No. 01-324, Weavers Run /Pauleys Gap Road Water Main Extension
Change Action to Contract No. F-742; Tom Brown Construction Company**

This contract was originally presented to the BOWW on April 9, 2002, and approved for the provision of construction services in the amount of \$382,851. Since this time, one change action has been approved and a second change action is being considered that would increase the contract amount over 10% of the original contract amount and requires Board approval. This correspondence presents the change action additions to contract F-742 and requests authorization to expand the scope of this project to include these additional construction services.

Change Action No. 1 modified the project to install 2,373 feet of 8-inch ductile iron pipe in lieu of 8" PVC as bid. This change was initiated because a future booster pump station will be constructed on this portion of the main and pressures of 180-200 psi are expected. Ductile iron pipe was substituted for the originally bid PVC pipe, since it is better suited for the anticipated pressures.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265

Mitchell Hill Rd: Existing Booster Pump Station to South 1,500 feet

An Apportionment Warrant public hearing was held for Mitchell Hill Rd: Existing Booster Pump Station to South 1,500 feet. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to the project. Questions were asked about the length of time required to complete the project. Staff explained in detail and went over their procedures as it pertained to this project. Two of two attending property owners advised they were in favor of extension of water service along Mitchell Hill Rd: Existing Booster Pump Station to South 1,500 feet as proposed at the hearing.

This project meets guidelines and recommendations outlined in the Task Force Report and Implementation Plan for County-wide Extension of Water Service. Staff recommends the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265 and recommends the Board of Water Works refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of the appropriate County ordinance, the Company will proceed to final design and advertisement for bid on this project.

After proper motion and second, the Board of Water Works adopted the resolution to extend water service along Mitchell Hill Road, Existing Booster Pump Station to South 1,500 feet (attached is a copy of the resolution and certification).

Ms. Teasley reported on the following:

Project 03-625: Replace and Rehabilitate Crescent Hill Filter Plant Coagulation Unit #7 Process Systems

Communication to the August Board discussed the history and failure of several coagulation process units at Crescent Hill Filter Plant. This correspondence provides further discussion of the failures, requests advancing 2003 capital budget funds for replacement and rehabilitation of Coagulation Unit #7, and requests authorization to proceed to advertisement for bid.

The coagulation process is essential to plant operations for removal of sediment from the source water. Several units of the South Coagulation train have failed over the past several years. Presently Coagulation Unit #6 is undergoing emergency replacement of mechanical mixing and clarification equipment.

The capital budget request for Coagulation Unit #7 is \$1,125,000, while the project budget approved for Coagulation Unit #6 is \$1,075,000, for a total project budget of \$2,200,000. The 2002-2003 Capital Improvement Plan includes \$2,000,000 for these projects. Please reference Table #1 for the schedule of work elements and associated costs for replacement and rehabilitation of Coagulation Unit #7.

**RESOLUTION TO DECLARE THIRD QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 12, 2002 to adjust the 2001 annual dividend by \$477,094 from \$12,599,250 to \$13,076,344, the difference to be added in equal quarterly installments to the quarterly 2002 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2002 Louisville Water Company budget contemplates the 2002 annual dividend to be \$12,208,380 it would be in order at this time to declare a regular third quarter dividend of \$3,052,075.

RESOLVED, the regular third quarter 2002 dividend of \$3,052,075 is hereby declared.

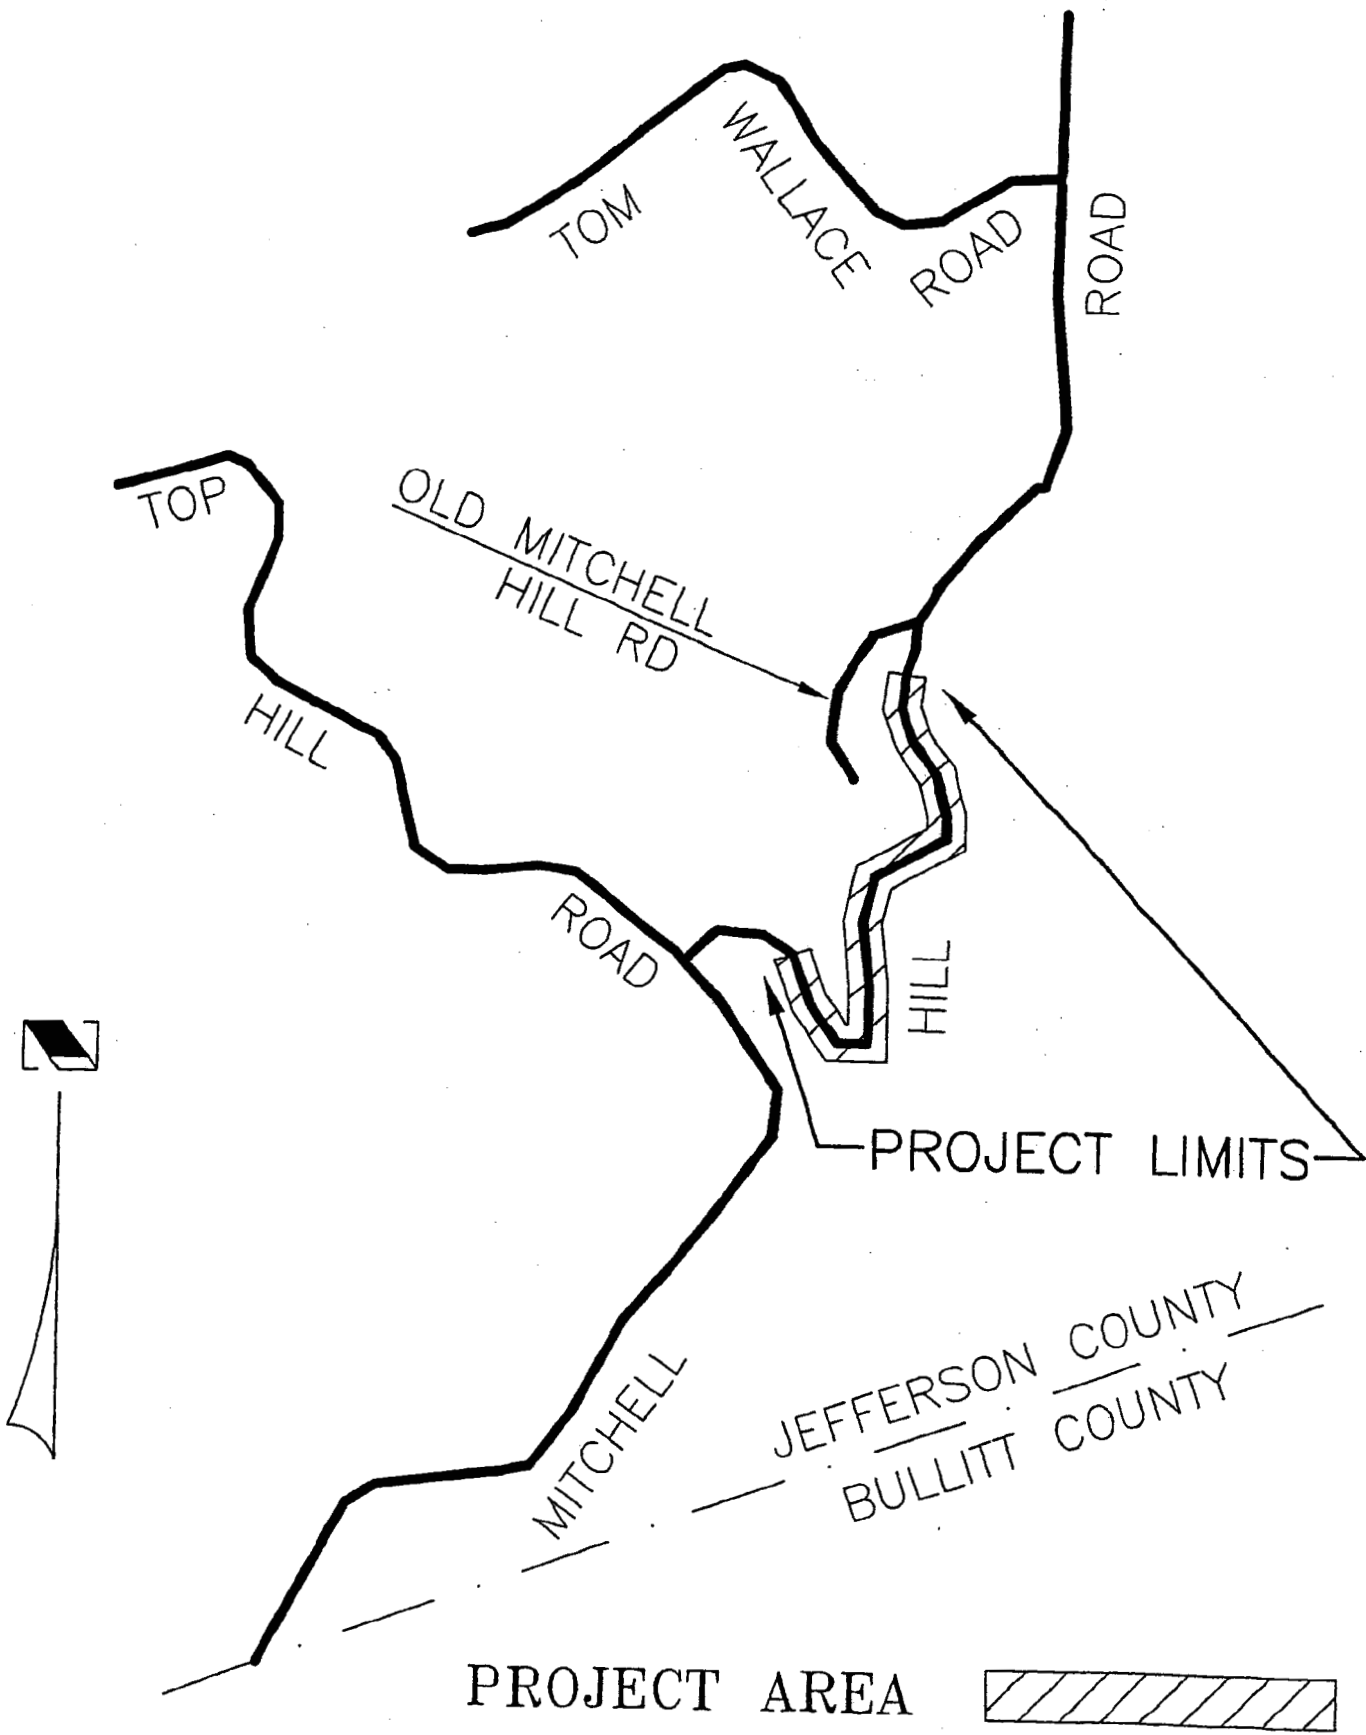

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,171,348 to the Louisville / Jefferson County Revenue Commission on September 30, 2002, this being the third quarterly dividend for 2002 plus one quarter of the dividend adjustment for 2001, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

**Board of Water Works
Resolution**

September 10, 2002

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Mitchell Hill Rd: Existing Booster Pump Station to South 1,500 feet**, a public way in Jefferson County, and acting thereon convened a public hearing on August 29, 2002 notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Serving Customers and Business Development of the Company has recommended the extension of such water along **Mitchell Hill Rd: Existing Booster Pump Station to South 1,500 feet**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Mitchell Hill Rd: Existing Booster Pump Station to South 1,500 feet**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

PROJECT AREA

**Published in Sunday August 18, 2002 Edition of the
Courier Journal**

Legal Notices — **Legal Notices**

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 96.265, the Louisville Water Company will hold a public hearing for the property owners along Mitchell Hill Road: Existing water main South 1,000 feet (as shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Mitchell Hill Road: Existing water main South 1,000 feet.

This public hearing will be held on August 29, 2002 at 7:30 p.m. at the Fairdale Fire Protection District, Station #1, 10015 Mitchell Road.

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 559-3600.

**OCTOBER 8, 2002 MINUTES
BOARD OF WATER WORKS
REGULAR MONTHLY MEETING**

Board Members Present

Mr. Jack Segell
Mr. Owen Hammons
Mr. Stephen Gault
Mr. Phillip Bond
Ms. Wendy Welsh

Board Members Absent

Hon. David L. Armstrong
Mr. Stewart Conner

Others Present

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Ms. Jane Driskell, Deputy Mayor, City of Louisville
Mr. Steve Hubbs
Ms. Kay Ball
Mr. James Smith
Ms. Amber Halloran
Mr. Larry Gaddis
Mr. Bradley Olsen
Mr. Bret Russell

Mr. Huber called the meeting to order at 12:40 p.m. Mr. Huber stated that Mr. Conner indicated he would not be present for today's meeting. For this reason, the compensation committee report would be deferred to the November 12, 2002 Regular Board meeting.

CONSENT AGENDA APPROVED

- *Minutes of previous meetings*
- *Claims paid during the previous month*
- *Petitions and applications for water main extensions*
- *Authorization for design and bid of projects under \$200,000*
- *Bid tabulations for contracts under \$500,000*
- *Listing for award of contracts less than \$100,000*

Item A *Minutes of Regular Meeting Held September 10, 2002*
The Board approved the September 10, 2002 Minutes

Item B *Claims Paid During September 2002*
 Request: file claims for future audit.

Item C *Petitions and applications for Water Main Extensions and Relocations*
 (when in full compliance / SR&R)

Project No.	Contract No.	DEVELOPER INSTALLED REFUNDING PROJECTS	Total Project Cost	Net Cost To LWC

REPORT OF OFFICERS

ADMINISTRATIVE REPORT

Mr. Huber stated that all items he wished to highlight for the Board were otherwise covered elsewhere in the agenda.

FINANCIAL REPORT

Mr. Miller presented the Income and Expense Summary for the month.

INCOME AND EXPENSE SUMMARY

- 1) Total operating revenue of \$73,072,900 is \$1,673,300 or 2.34% more than budgeted and \$3,189,100 or 4.56% more than the same period in 2001.
- 2) Operation and maintenance expense of \$30,608,600 is \$683,000 or 2.18% less than budgeted and \$1,775,600 or 6.08% more than 2001.
- 3) Operating deductions of \$48,086,600 are \$1,231,900 or 2.50% less than budgeted and \$2,238,400 or 4.48% more than 2001.
- 4) Net operating income of \$24,990,300 is \$2,905,200 or 13.15% more than budgeted.
- 5) Net income of \$22,134,200 is \$2,131,400 or 10.66% more than budgeted and \$918,300 or 3.98% less than 2001.

FINANCIAL INFORMATION SYSTEM STATUS

The procurement of the Financial Information System remains on schedule. The project team that is reviewing proposals has completed their analysis work and is preparing to negotiate the provisions of a contract for software acquisition and implementation services. Staff anticipates that their recommendation will be available for consideration at the November 2002 meeting of the Board of Water Works.

OPERATIONS REPORT FOR SEPTEMBER 2002

Mr. Heitzman provided the Operations Report for September 2002.

Production - The dry weather continued in the first half of September and resulted in higher water production.

Water Quality - The water quality in the distribution system continued to be good in September. This is the first year that we met all distribution water quality goals throughout the summer months, indicating the water quality strategies we implemented were successful.

We experienced a taste & odor (T&O) event from September 18 to the end of the month. The MIB concentration in the river reached as high as 44 parts per trillion (ppt) and stayed between 20 to 30 ppt for most of this period. Powder activated carbon (PAC) was used to remove 85% of MIB. Staff appropriately responded to this event and limited the MIB concentration to less than 15 ppt in the finished water. We

received approximately 100 taste and odor complaints during September. A total of \$130,000 was spent on PAC for Taste and Odor control.

Goshen Operation - Due to the dry weather in September, the Oldham County Water District turned off its master meter supply to Goshen. To ensure adequate water supply to Goshen, LWC expedited several improvement projects in the Goshen system. This included conversion of the Goshen well supply from free chlorine to chloramine disinfection and integration of supply from Louisville water. On September 2, a boil water advisory was issued to Goshen system due to low system pressure.

BE Payne Plant Improvement Project – The Board has authorized a project budget of \$20.5 million to upgrade the existing BE Payne Plant from 45 MGD firm capacity to 60 MGD capacity. The project scope includes filter renovations, 15 MGD of additional high service pumping, header modifications, pressure surge relief, new 4160 volt switchgear power supply, and a redundant underground power feed from LG&E's electric substation. In light of the increasing electrical demand and voltage reliability in the Prospect area, as well as security issues, an alternate bid will be taken for on-site diesel power generation. This alternative bid price will be evaluated against the alternative to install a new independent power source and substation from LG&E's 69 KV electric transmission line.

Emergency Assistance to New Albany – On Wednesday, September 25, a site contractor damaged a 24-inch water main at a Kroger construction site in New Albany, IN. The pipeline damage disrupted water supply to New Albany until repairs could be made the next day. The city lost water supply and Indiana-American Water Company issued a boil water advisory. Louisville Water Company offered assistance to Indiana American by providing 2,500 gallons of bottled water and 6,000 tiny tap bottles for distribution to the New Albany School System, Floyd Memorial Hospital, fire departments and local residents. We also delivered our 4,300-gallon water tank truck for standby emergency water for fire protection to the New Albany Fire Department. Mr. Mike Stewart, Manager of Operations for Indiana-American, has thanked the Company for the extensive assistance during the emergency and has pledged a \$5,000 check to the Metro United Way Campaign in the name of the Louisville Water Company.

SERVING CUSTOMERS REPORT

Performance Measures – The September 2002 abandonment rate was 3.7%, a significant improvement over the previous month's abandonment rate of 5.5%. This is also below the best practice goal for abandonment of 5%.

Bad debt for the month of September was \$50,874, approximately \$21,000 over budget. This reflects adverse economic conditions for primarily residential customers who have been disconnected from service with unpaid balances still owing.

Lake in the Woods/South Hill Apartments – A receiver was appointed in September. LWC legal staff has provided the receiver with information on the outstanding balances owed: \$78,530 on Lake in the Woods and \$47,746 on South Hill. We have requested payment for current and future invoices (about \$18,700 per month for both properties), as well as a payment plan to address the arrearages.

Third Quarter CSI Results - The Total CSI for this quarter is down just one point from the last quarter to 846. This reflects steady Total CSI numbers for five of the last six quarters. The year to date average is 844, one point below the 2002 Level II Corporate Goal of 845.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation and acquisition of property. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action in closed session.

After proper motion and second, the Board voted to authorize the president to sign an acquisition agreement with the city of Shepherdsville concerning Louisville Water Company's purchase of its water system. This agreement does not involve the payment of a purchase price. It involves assumption of debt and a commitment for capital improvement.

REPORT OF COMMITTEES

The Compensation Committee report was deferred to the November 2002 meeting.

SPECIAL ISSUES

Ms. Teasley and Mr. Gaddis reported on the Annual Inspection.

In May of 2002, the Board of Water Works authorized engineering consultants Black & Veatch to perform the 2002 Annual Inspection Report on the Adequacy and Condition of the Water Works System. Professional services provided by the consultant included an inspection and review of the water works system as required by the Water System Revenue Bond Resolution, Series 1992, Article IV, Section 612.

The firm inspected nine facility locations: Zorn Pump Station; Crescent Hill Filter Plant and High Serving Pumping Station; Shelbyville Road Booster Pump Station; Brooks Hill Station; Peaceful Valley Booster Pump Station; Peaceful Valley Tank and KT #3 Booster Pump Station. Eighteen high priority items, twenty eight medium priority, twenty low priority and seven routine priority items were cited.

In reviewing the company's insurance program, Black and Veatch found that "the insurance program was in good order and substantially meets the company's needs." The review also noted that the Louisville Water Company operates in a sound financial manner. A copy of the power and presentation prepared by Black and Veatch will be kept with these minutes.

Mr. Miller and Ms. Halloran present the Preliminary 2003 Annual Budget.

The Preliminary 2003 Annual Budget, consisting of the following documents, is submitted for your review:

Page 23	2003 Operating Budget
Page 47	2003 Capital Budget
Page 60	2003-2012 ProForma Income Statement
Page 66	2003-2012 Capital Expenditures Program
Page 168	2003-2012 Financial Plan
Page 170	2003-2012 ProForma Balance Sheet

The proposed budget continues efforts to strengthen the utility and effectively meet current as well as future requirements for safe, high quality water and improved customer service. There is strong emphasis on meeting additional drinking water regulations, replacement or renovation of deteriorating infrastructure, increased efficiency of the delivery system, and continued fiscal responsibility.

The 2003 water sales estimate is \$96,945,900 on sales of 39.541 billion gallons up 4% from the 2002 budget. Operations and maintenance expenses are up 2.7% to \$1,133,900. This 2.7% is due to the cost of chemicals, bad debt, insurance, corporate contingency and labor.

After proper motion and second the Board noted to give staff permission to file the Preliminary 2003 Annual Budget with the Trustees and the City. (Sections 507 and 612 of the Bond Resolution require this filing by October 31, 2002). The 2003 Annual Budget should be adopted before January 1, 2003.

The Board was asked to consider whether it would prefer to handle possible adoption of the Budget at its November 2002 meeting or whether a Special meeting would be necessary. The Board expressed support for a Special meeting in late October. The Board Secretary will poll the Board to identify a suitable date.

2003 Board of Water Works Meeting Dates

Mr. Huber stated that staff will review its meeting schedule and suggest alternate meeting dates for the months of September, November and December. He deferred consideration of a proposal on 2003 meeting dates until the November meeting.

BID TABULATIONS

Ms. Teasley reported on the following Bid Tabulations:

Project Number: 02-518: Muhammad Ali Boulevard Area - Main Replacement Project
Bids were received and opened Wednesday, September 11, 2002 to install 4,810 linear feet of 6 and 8-inch ductile iron water main using traditional trenching techniques, and to supply and install 2,060 linear feet of 4-inch HDPE water main using horizontal directional drilling techniques.

A total of 5 bids were received and opened from pre-qualified contractors. Tom Brown Construction submitted the lowest responsive bid in the amount of \$385,570 resulting in a total project cost of \$518,570. This bid was evaluated based on contract cost, time of completion, and MBE/WBE subcontractor utilization.

The Bid is approximately 5% under the Project Manager's estimate.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$385,570 to Tom Brown Construction to install the water facilities associated with this project.

Project Number: 02-500: 3rd Street – Main Replacement Project

Bids were received and opened Wednesday, September 25, 2002 to install 2,745 linear feet of 4, 6, 8 and 12-inch ductile iron water main using traditional trenching techniques, and to supply and install 2,440 linear feet of 4-inch HDPE water main using horizontal directional drilling techniques.

A total of five (5) bids were received and opened from pre-qualified contractors. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$268,470 resulting in a total project cost of \$362,470.

The bid is approximately 19% under the Project Manager's Estimate.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$268,470 to MAC Construction and Excavating to install the water facilities associated with this project.

Project Number: 00-305: Hickory Hills Water Main Ext. Bids were received Wednesday, September 18, 2002, to install 7,275 feet of 8-inch, 6-inch, and 4-inch PVC water main along Hickory Hills Trail between Echo Trail and end and in Hickory Valley Road between Hickory Hills Trail and end. Hickory Hills Trail is identified in the County-Wide Extension Program in Extension Area 3.

A total of six (6) bids were received from qualified contracting firms. The low responsive base bid in the amount of **\$143,943** was submitted by **Southern Pipeline Construction Co.** The low bid was 17.4% under the engineer's estimate.

After proper motion and second, the Board voted to authorize the Vice-President Serving Customers & Business Development to award a contract in the amount of \$143,943.00 to Southern Pipeline Constructions Company to install water facilities associated with this project.

Mr. Heitzman reported on the following Bid Tabulation:

Project Number: 01-745B: Gap-In-Knob 16-Inch Water Main

Bids were received Wednesday, September 25, 2002, to Furnish and Install approximately 6,070 feet of 12-inch water main in Highway 1020 between Highway 2673 and Hwy 61. An alternate bid for 16-inch water main in lieu of the 12-inch main was also requested.

A total of 6 bids were received from qualified contracting firms. **Mac Construction and Excavating, Inc.** submitted the best bid in the amount of \$285,540 for a 12-inch main and **\$405,500** for a 16-inch main. Their 16-inch bid is below the engineer's 12-inch estimate by \$29,875 or 7%.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award a contract in the amount of \$405,500 to install a 16-inch main to MAC Construction and Excavating, Inc., to install water facilities associated with this project.

Mr. Miller reported on the following Bid Tabulations:

Bid Number: 02-41: Barricade Rental

On September 18, 2002, bids were opened to award a one-year contract, renewable for up to four additional years at the sole discretion of the Company, for rental of barricades.

A total of one bid was received, from Flasher Barricade for an estimated one-year amount of \$240,003.

After proper motion and second, the Board of Water Works voted to authorize award of a one-year contract, renewable for up to four additional years, to Flasher Barricade for an estimated one-year amount of \$240,003. This bid represents a 19% increase in unit prices from the previous bid in 2000.

Bid Number: 02-54: Copper Tubing

On September 18, 2002, bids were opened to award a contract for a six-month supply of copper tubing. Copper tubing is used throughout the distribution system in the installation, renewal and repair of domestic service lines.

A total of five bids were submitted with the lowest, most responsive bid from US Flow for a total of \$138,527.

After proper motion and second, the Board of Water Works voted to ratify the purchase of a six-month supply of Copper Tubing totaling \$138,527 from US Flow. This bid represents 6% increase in unit prices from the previous bid.

Bid Number: 02-35: Ready Mix Concrete

On September 4, 2002, bids were opened to award a one-year contract for ready mix concrete. Ready mix concrete is used for a concrete base in street cuts, driveways and sidewalks after new installations or repairs.

A total of two bids were submitted from Advance Ready-Mix and Pearce Brothers, Inc.

After proper motion and second, the Board of Water Works noted to authorize staff to award a one-year contract totaling an estimated \$520,570 to Advance Ready-Mix and Pearce Brothers, Inc. Call outs will be based on proximity to LWC worksite, availability of material, response time and price.

COMMUNICATIONS

Ms. Ball and Mr. Hubbs reported on Riverbank Filtration, Phase II.

Project Number: 99-402: Riverbank Filtration Phase II

On March 12, 2002 Staff requested authorization to proceed with the bank filtration program on the Kentucky shore and was granted approval for the revised contract with design engineers Jordan Jones & Goulding to evaluate design options and proceed with project definition.

Preliminary design on Phase II of the Riverbank Filtration project is proceeding according to schedule. Evaluations of the subsurface investigations are underway with the preliminary report scheduled to be completed by the end of October. The report will include the results from the rock coring, the pumping tests, and the hydrogeologic assessment.

Research has indicated that the plugging of the riverbank has reached a balance, and the yield has stabilized at 18 to 20 MGD, as originally estimated. The mechanics of bank plugging are now better understood, and the long-term prediction of wellfield yield can be made with reasonable certainty.

In preparation for proceeding to final design of the project, a risk assessment was conducted to summarize the key elements of the project. This risk assessment considered water quality, cost, easement acquisition, constructability, public acceptance, and sustainability. At this time of the project, the issue of easement acquisition for the eighteen properties represents the greatest area of uncertainty for the project. Easement acquisition will have a significant impact the project schedule and project cash flow.

No action is requested at this time. It is anticipated that staff will return to the Board in November of 2002 with the results of the preliminary design along with an updated project cost estimate, a report of the project definition and a request for authorization to proceed with Task II, Final Design.

OLD BUSINESS

Ms. Teasley reported on the following Old Business:

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to K.R.S. 96.265: Lonesome Hollow Rd: Jefferson Hill Rd to North 765 feet.

An Apportionment Warrant public hearing was held for Lonesome Hollow Rd: Jefferson Hill Rd to North 765 feet. The public hearing was held in response to receipt of a majority petition for this public road project.

None of the eligible property owners attended the public hearing for a formal presentation.

After proper motion and second the Board of Water Works agreed to adopt the attached resolution to extend the water service along Lonesome Hollow Road: Jefferson Hill Road to North 765 feet in accordance with K.R.S. 96.265 and to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265: Holsclaw Hill Road: Proposed Booster Pump Station to South 2,100 feet

An Apportionment Warrant public hearing was held for Holsclaw Hill Road: Proposed Booster Pump Station to South 2,100 feet.

Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project. Questions were asked about easements and the alignment of the water main. Three attending property owners advised they were in favor of extension of water service along Holsclaw Hill Road: Proposed Booster Pump Station to South 2,100 feet as proposed at the hearing.

After proper motion and second the Board of Water Works agreed to adopt the attached resolution to extend the water service along Holsclaw Hill Road for the proposed Booster Pump Station to South 2100 feet, in accordance with K.R.S. 96.265 and to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court Pursuant to KRS 96.265: Dry Ridge Lane: Dry Ridge Road to County Line

An Apportionment Warrant public hearing was held for Dry Ridge Lane: Dry Ridge Road to County Line.

Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project. Questions were asked about the need for easements. Four of four attending property owners advised they were in favor of extension of water service along Dry Ridge Lane: Dry Ridge Road to County Line as proposed at the hearing.

After proper motion and second the Board of Water Works agreed to adopt the attached resolution to extend the water service along Dry Ridge Lane: Dry Ridge Road to County Line, in accordance with K.R.S. 96.265 and to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

Ms. Teasley reported on the following Old Business:

Issuance of Apportion Warrants per K.R.S. 96.265

Williams Road: Dry Ridge Road to County Line

A public hearing was held February 22, 2001 for the extension of water service along Williams Road: Dry Ridge Road to County Line. The Board of Water Works adopted a resolution for Williams Road: Dry Ridge Road to County Line on March 13, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 6, Series 2001 on April 24, 2001 (a copy of which is attached) for the Williams Road: Dry Ridge Road to County Line project. The construction contract was awarded to Tom Brown Construction in November 2001.

After proper motion and second, the Board of Water Works adopted the attached resolution for the issuance of Apportionment Warrants and liens against six (6) benefited properties along Williams Road: Dry Ridge Road to County Line in accordance with K.R.S. 96.265, as described.

Issuance of Apportionment Warrants per K.R.S. 96.265

Waterford Road: Bardstown Road to County Line

A public hearing was held July 13, 2000 for the extension of water service along Waterford Road: Bardstown Road to County Line. The Board of Water Works adopted a resolution for Waterford Road: Bardstown Road to County Line on August 8, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 21, Series 2000 on September 12, 2000 for Waterford Road Bardstown Road to County Line project.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance for Apportionment Warrants and liens against four (4) properties along Waterford Road: Bardstown Road to County Line in accordance with K.R.S. 96.265, as described.

The Main Extension for the Bullitt County Section of Williams Road.

The project is not part of the Bullitt County Program on the Jefferson County extension program. We did not achieve a 2/3 majority, but the residents would like the matter presented to the Board.

Staff received a letter from the Bullitt County Williams Road property owners on May 28, 2002, acknowledging that only five property owners are currently interested in the water main extension. The letter stated that they would like to proceed with the project at an increased per property cost. The letter was signed by all five of the property owners that signed Letters of Interest.

After proper motion and second, the Board of Water Works voted to proceed with engineering design and advertisement for bid for the subject project.

Acceptance of Water Extension Project and Referral to Jefferson County Fiscal Court

Pursuant to KRS 96.265: Rose Island Road: US 42 to County Boundary

An Apportionment Warrant public hearing was held for Rose Island Road: US 42 to County Boundary. The public hearing was held in response to receipt of a majority petition for this public road project.

Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project.

This project meets guidelines and recommendations outlined in the Task Force Report and Implementation Plan for County-wide Extension of Water Service. Staff recommends the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265.

After proper motion and second the Board of Water Works agreed to adopt the attached resolution to extend the water service along Rose Island Road: US 42 to County Boundary, in accordance with K.R.S. 96.265 and to refer this project to Jefferson County Fiscal Court for its consideration. Upon approval by Fiscal Court and adoption of County ordinance, the Company will proceed to final design and advertisement for bid on this project.

NEW BUSINESS

Mr. Heitzman present the following New Business:

Project 01-674: Orell Road 12" and Watson Lane 16" – Request for Design/Bid Authorization

The 2002 Capital Budget includes a project to complete 12" and 16" grids in southwestern Jefferson County near Dixie Highway and the LG&E Mill Creek power plant. Total Project cost is estimated to be **\$715,500**.

The Orell Road 12" main will be 1,500 feet in length and extend an existing 12" main to Dixie Highway. The project will also abandon 1,500 feet of 6" A.C. pipe. The project will be coordinated with MSD sanitary sewer construction planned for the same route. Staff will work with MSD to jointly bid the water work with the MSD project.

The Watson Lane portion of the project will install 3,900 feet of 16" main and complete a 16" grid from Lower River Road to Dixie Highway and will include 1,500 feet of 12" grid tie to the LG&E Mill Creek power plant to better serve the power plant water needs.

After proper motion and second, the Board of Water Works voted to proceed with final engineering design and advertisement for bid for Project Number: 02-674 – Orell Road 12" and Watson Lane 16".

Ms. Teasley reported on the following New Business:

Bullitt County Water Improvement Program – Bullitt County Extension Program

Project - Sugartree Booster Pump Station, Knob Creek Road

Proposed under the Bullitt County Extension Program is a project for a Booster Pump Station on Knob Creek Road in conjunction with the previously Board approved Sugartree Storage Tank. The proposed BPS, in conjunction with, the Sugartree Storage Tank will provide water service to the previously unserved elevated areas along the eastern end of Knob Creek Road. Additionally, this BPS will provide the suction supply to the previously Board approved Martin Hill Road BPS which will pump to the Gospel Kingdom Elevated Storage Tank.

After proper motion and second, the Board of Water Works voted to proceed with engineering design and advertisement for bid for the Sugartree Booster Pump Station project. Staff will discuss the appropriate funding vehicle with the Bullitt County Advisory Board. Based upon the input from the Advisory Board, Louisville Water Company's staff will determine the appropriate source of funding and update Louisville Water Company's Board when the regular Bullitt County Advisory report is given. The Board will approve the source of funding at the time of contract award.

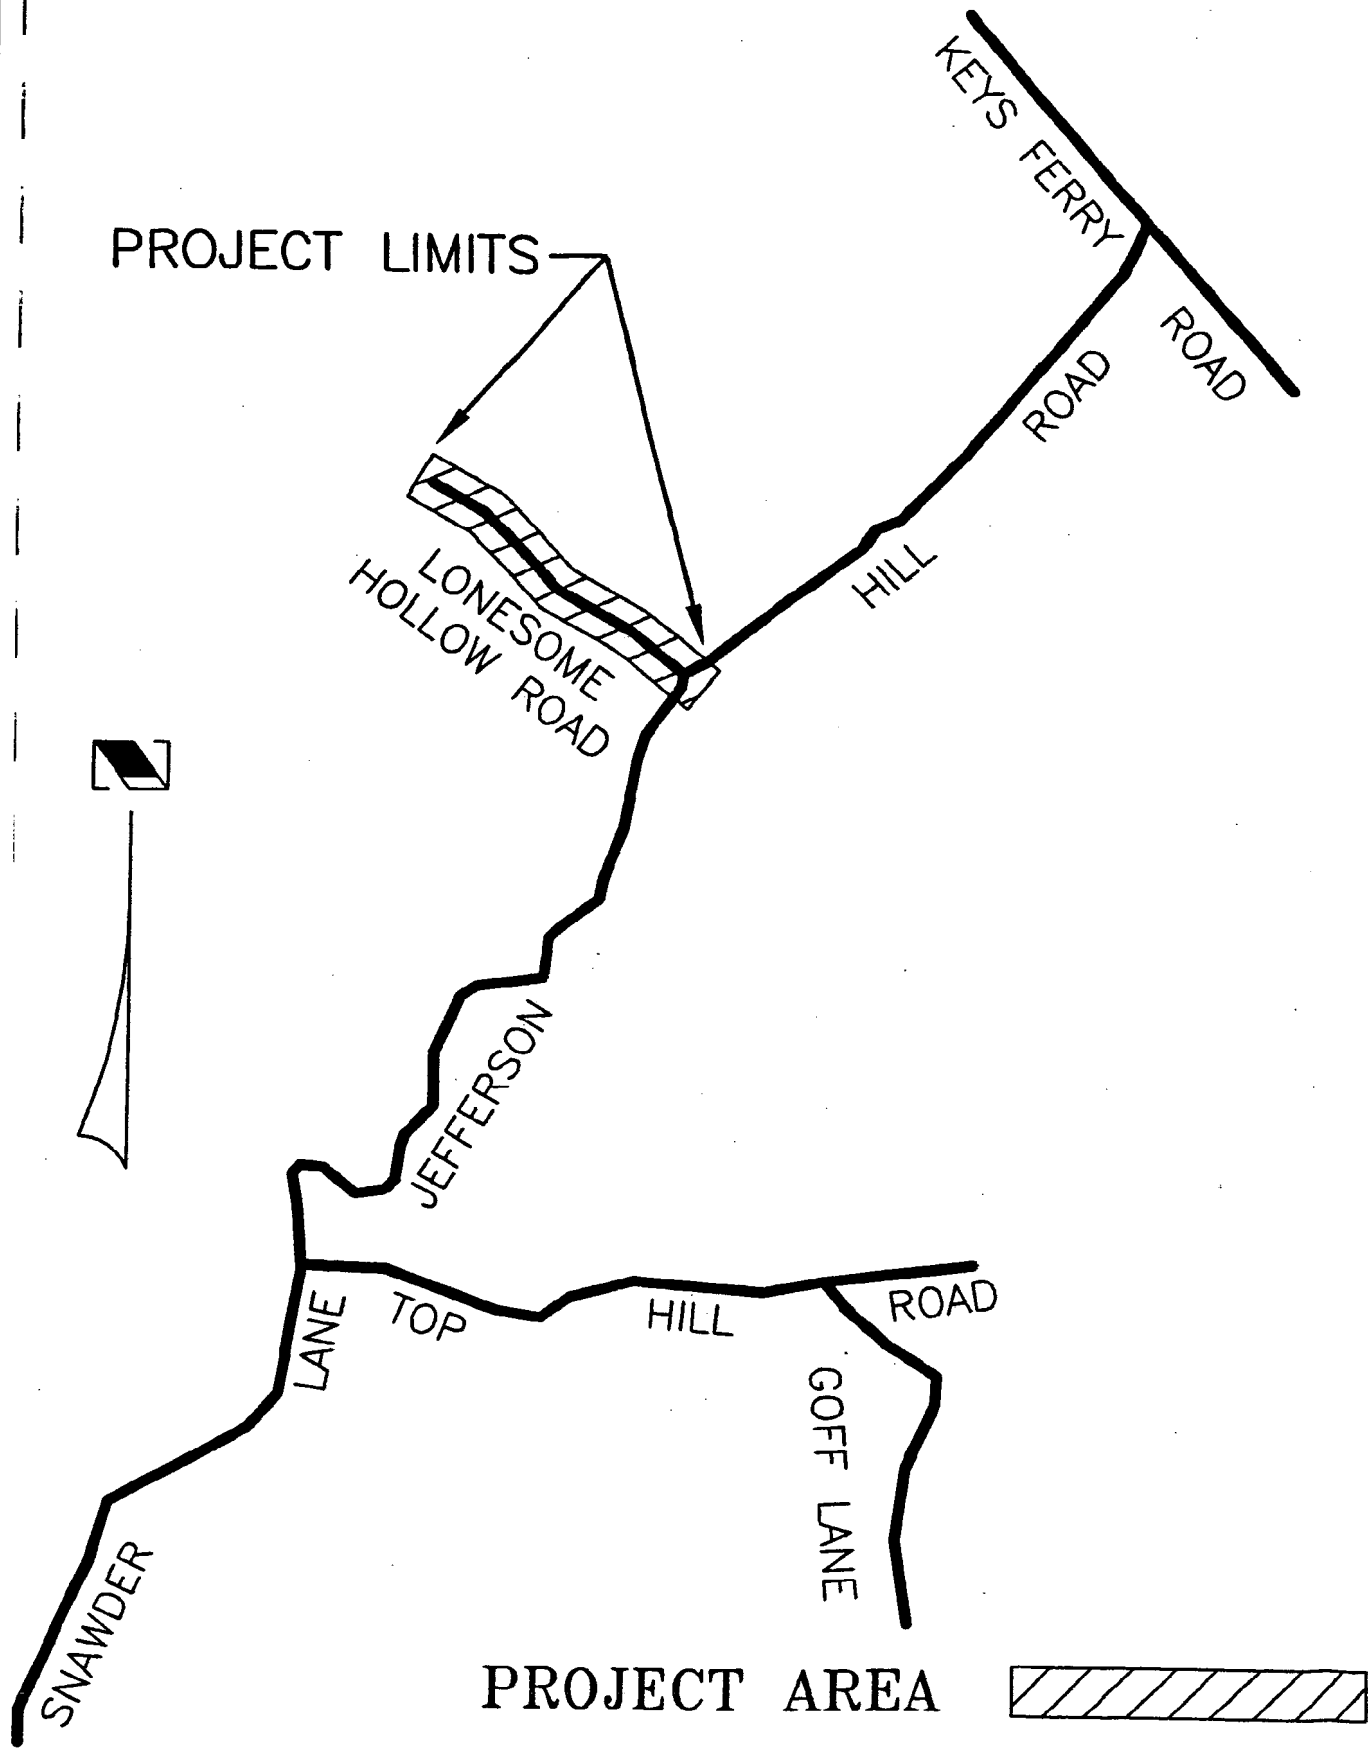

The meeting adjourned at 3:22 p.m.

**Board of Water Works
Resolution**

October 8, 2002

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Lonesome Hollow Rd: Jefferson Hill Rd to North 765 feet**, a public way in Jefferson County, and acting thereon convened a public hearing on August 29, 2002 notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Serving Customers and Business Development of the Company has recommended the extension of such water along **Lonesome Hollow Rd: Jefferson Hill Rd to North 765 feet**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Lonesome Hollow Rd: Jefferson Hill Rd to North 765 feet**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

BOARD OF WATER WORKS
SPECIAL MEETING**

Board Members Present

Mr. Jack Segell
Mr. Stephen Gault
Mr. Stewart Conner
Mr. Owen Hammons
Mr. Phillip Bond
Ms. Wendy Welsh

Board Members Absent

Hon. David L. Armstrong

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Amber Halloran
Mr. Tony Gregory
Mr. Larry Lenahan

Mr. Huber called the meeting to order at 12:15 p.m.

He announced that there were three topics on the agenda. Those topics were: a request for approval of the 2003 Annual Budget; a request to approve an award of a contract to Solbourne for the Financial Information Systems; and a request for permission to purchase property.

SPECIAL ISSUES

A. Preliminary 2003 Annual Budget

The Budget is built around a 3.5% rate increase. The budget projects no increase water sales for 2003. The sales projection therefore is conservative.

Ms. Halloran provided additional detail regarding the 2003 budget. Net Income in 2003 is \$29,238,000.00 or 2.9% over the 2002 forecast. \$12,318,800.00 is the projected dividend to the City of Louisville. This is 1% higher than the 2002 dividend. Water sales for 2003 are projected at \$96,945,900.00. This is only .4% higher than 2002. Operating expenses are \$43,664,500.00 or 2.7% above the 2002 budget. Non-operating

expenses remain relatively unchanged for 2003. An additional \$300,000.00 will go to the Infrastructure Replacement Reserves.

Ms. Teasley provided additional detail regarding the 2003 Capital Budget. The 2003 Capital Budget is based upon the recent 2002 – 2012 Facilities Plan Review compiled by Black & Veatch. That is, all of the Black & Veatch recommendations have been incorporated into the capital budget. Significant capital budget items include an investment in advance treatment technology over twelve years. The twelve year amount is estimated at \$28.5 million. Other significant capital improvements include preservation and extension of infrastructure and supply delivery system improvements. Equipment tools, instrumentation and relocation expenses are also included in the ten year period amount.

For the 2003 budget, the net capital expense is \$54,033.667.00. The gross capital expense, which includes contributed capital from developers and government, is \$77,351,252.00.

Mr. Huber then presented a general overall budget document. He focused upon the ten year period Pro-Forma Income Statement. Over a ten year period, Louisville Water Company is considering a 3.5% rate increase per year. We are assuming a 9.07% return on equity over the ten year period. The debt service coverage during the next ten years will go from 4.35% to 2.86%. The 2.8% figure still exceeds the industry standard by approximately 1%. Mr. Miller led the Board in an examination of the ten year Financial Plan and Pro-Forma Balance Sheet. The next large borrowing for Louisville Water Company will be in 2006. The estimated borrowing in 2006 is \$67,000,000.00. The total amount of debt over the ten year period will increase by approximately \$5,000,000.00.

With the 2003 3.5% rate increase, the average residential water bill will increase from \$14.13 per month to \$14.62 per month. Mr. Huber stated that a water industry survey has reported the likelihood of a 6.5% increase in water rates per year given infrastructure and security needs.

After proper motion and second, the Board voted to adopt the proposed Budget Resolution authorizing a 3.5% rate increase for water service beginning January 1, 2003 and thereafter. The staff will now develop a rate schedule.

B. Recommendations for Award of Contracts for the Implementation of Project 01-489 Financial Information and Executive Decision Support System

Mr. Huber asked staff to present its recommendations for award of the Financial Information System Bid to Solbourne, for implementation and conversion services and to Oracle for system software. Mr. Miller, Ms. Halloran and Mr. Gregory presented the staff's recommendation.

Louisville Water Company has used its current financial reporting system since 1970. This system requires the devotion of five to eight working days per month to close. In

addition, detailed financial transaction data is not available for decision making by management due to the current data architecture.

Ms. Halloran reviewed the process by which staff selected Solbourne as the system implementer. Solbourne, the proposed awardee, was graded higher in all evaluated areas by the team.

After additional discussion, the Board decided to postpone a formal vote on award of the FINS contract until its November 12, 2002 meeting. In the interim period, staff will confer with Board members Philip Bond and Wendy Welsh in order to obtain their prospective.

CLOSED SESSION

After proper motion and second, the Board recessed to closed session for the purpose of discussing acquisition of property. The Board reconvened into open session without taking any action.

ADJOURN

The meeting was adjourned at 2:20 p.m.

RESOLUTION TO ADOPT 2003 ANNUAL BUDGET

RESOLVED, that rate schedules be developed and presented by staff for a 3.5% increase, effective for water service beginning January 1, 2003 and thereafter.

RESOLVED, that the Preliminary 2003 Operating Budget submitted by staff be adopted as the approved 2003 Operating Budget.

RESOLVED, that the Preliminary 2003 Capital Budget submitted by staff be adopted as the approved 2003 Capital Budget.

RESOLVED, in respect to the Louisville Water Company 2003 Capital Budget submitted to and approved by the Board of Water Works this day, that the Board hereby delegates to the President of Louisville Water Company, or his designee, the authority to:

1. Proceed to completion for those Projects in the 2003 Capital Budget (and prior year Capital Budgets) with an estimated cost of \$100,000 or less.
2. Proceed with advertisement and bid of Annual Allowance Projects in the 2003 Capital Budget with the stipulation that all contracts exceeding \$100,000 be submitted to the Board for approval.
3. Proceed with preliminary engineering for those Projects in the 2003 Capital Budget estimated to cost over \$100,000 with the stipulation that each item will be fully explained to the Board and approval obtained before proceeding with final design and solicitation of bids.
4. Proceed to authorize contract change orders on those Projects in the 2003 Capital Budget (or prior year Capital Budgets) with an estimated cost of \$100,000 or less where such change orders do not cause the total contract cost to exceed \$100,000.
5. Proceed to authorize contract change orders on those Projects in the 2003 Capital Budget (or prior year Capital Budgets) with an estimated cost of over \$100,000 where such change orders do not exceed 10% of the approved contract price or \$100,000 in change order costs.
6. Proceed to authorize contract change orders on those projects in the 2003 Capital Budget with an estimated cost of over \$100,000, where such change orders exceed 10% of the original contract price, and when a documented business necessity exists, and ratification of such action is sought at the next regularly scheduled Board meeting.

AND BE IT FURTHER RESOLVED, that all contract expenditures greater than \$100,000 must be submitted for approval to the Board of Water Works prior to award and execution of the contract.

REPORT OF OFFICERS

Administrative Report

Mr. Huber stated the company received a \$108K Grant from EPA to perform a vulnerability assessment. It must be completed by 2003. Recently certain staff attended training regarding the development of vulnerability assessments.

Financial Report

Mr. Miller presented the Income and Expense Summary for October 2002:

- 1) Total operating revenue of \$82,640,800 is \$3,317,000 or 4.18% more than budgeted and \$4,920,000 or 6.33% more than the same period in 2001.
- 2) Operation and maintenance expense of \$32,321,500 is \$359,000 or 1.02% less than budgeted and \$2,352,800 or 7.27% more than 2001.
- 3) Operating deductions of \$54,053,700 are \$1,072,700 or 1.95% less than budgeted and \$2,914,700 or 5.69% more than 2001.
- 4) Net operating income of \$28,587,100 is \$4,389,700 or 18.14% more than budgeted.
- 5) Net income of \$25,324,100 is \$3,363,000 or 15.31% more than budgeted and \$322,400 or 1.26% less than 2001.

Operations Report

Mr. Heitzman presented the Operations Report for October 2002.

Production - The water production in October of 123.1 MGD was slightly lower (1.4%) than October 2001 production due to the heavy rainfall for the month.

Water Quality - The water quality in the distribution system continued to exceed the 95 percent goals for turbidity, chlorine, and bacteria during the month of October.

The taste & odor (T&O) event we experienced in September lasted to early October with a MIB concentration in the river water between 10 and 20 parts per trillion (ppt).

Goshen Utilities Operation - In October, staff completed electrical upgrades at the well pump house and improved the safety for operations. There were no water supply interruptions in Goshen system in October.

00007

Sanitary Survey – The Kentucky Division of Water completed the Sanitary Survey of our production facilities in June and delivered a report of recommendations on October 21. The report states there the inspection revealed no deficiencies or violations. This Sanitary Survey is required as part of the Interim Enhanced Surface Water Treatment Rule that became effective January 1, 2002.

Distribution System – Staff is in the process of preparing for a possible winter emergency. This Plan is developed to define the management accountabilities for operational response, and also to ensure that there will be sufficient resources (personnel, equipment and materials) to deal with a potential emergency.

B.E. Payne Plant Improvement Project – The Company is scheduled to open bids on November 20, for the upgrade to the BE Payne Plant. A pre-bid meeting was held on October 30, with over 12 potential bidders in attendance. A subcontractor partnering session was also held, with over 15 Minority and Women subcontractors in attendance. This project will be bid using a weighted evaluation method, including criteria for price, completion time, and minority/women subcontract utilization. The bid results will be reported to the Board in December with an expected contract award.

Landscape Award – The Louisville Water Company received a second place Landscape Award from the Louisville Beautification League for the landscaping and maintenance of the Third Street Corporate Office complex.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report.

Performance Measures – The October 2002 abandonment rate was 5.7%, an increase from the previous month's abandonment rate of 3.7%. Call volume for October was up 22% from last month, with 35,029 calls received versus 28,603 calls in September. Likewise we received 6,388 or 22% more calls in October 2002 than in October 2001. We attribute the increased calls to greater than normal high bill inquiries due to the drought, and the newly available options to pay by credit card through the Call Center.

Debit/Credit Card Payments – In the months of August and September, we processed 591 debit/credit card transactions for a total of \$70,205.25. The total card transaction fees were \$712.00. The estimated card usage for October was 2,500 transactions, totaling payments of \$252,000.

Also during 2003 we plan to implement our Integrated Web Response (IWR) system. The IWR system will provide customers with internet access to the same information and payment options available through our automated phone system.

City of Shepherdsville – The current goal is to finalize the asset acquisition agreement and close on the purchase of the system by November 15, 2002. This schedule anticipates that LWC will handle meter reading and billing for the November billing cycle.

00008

Oldham County Advisory Board – The Oldham County Water District #1 Advisory Board met October 22, 2002 to review the status of the Oldham County capital improvement and main extension programs and the status of funds in the Oldham County Reserve. Total funding of \$245,505 remains in the reserve with an estimated \$116,000 of this total committed to main extension projects. Following completion of these projects, \$130,000 is projected to remain in the Reserve Fund. Based on staff recommendations, two new projects were approved by the Advisory Board, Highway 22 Main Improvements and Old Floydensburg Road Main Improvements, to replace sections of these water mains experiencing high break frequencies. The estimated cost of \$194,000 for these projects will be funded by the Oldham County Reserve, with the difference to be funded by LWC's capital improvement program for main replacement and rehabilitation (MRRP).

Bullitt County Advisory Board – The Bullitt County Advisory Board met on October 24, 2002 to review results through the 3rd quarter. Staff provided financial information regarding the status of the Bullitt County Water Reserve (BCW Reserve) as well as the status of the capital projects completed and underway under the Bullitt County Water Improvement Program (BCWIP). Since total expenditures related to the BCWIP exceed the total contributions to BCW Reserve to date, LWC is loaning bridge funding as expected.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation and acquisition of property. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

Mr. Huber announced that the Compensation Committee report would be held in abeyance until the December 2002 meeting, given Mr. Connor's absence.

SPECIAL ISSUES

Mr. Gregory and Ms. Halloran presented a recommendation for award of contracts for the implementation of Project 01-489: Financial Information and Executive Decision Support System. This matter was first discussed at the October 2002 board meeting. Mr. Huber reported that Ms. Welsh worked with staff after the October meeting posing a series of questions which staff answered.

The Board approved award of contract to Oracle Corporation in the amount of \$525,192 for the Financial Information System software modules and computer applications, and to Solbourne in the amount of \$1,770,350 for implementation and consulting services for Project 01-489: Financial Decision Support and Executive Support System.

00009

Based on Ms. Welsh's recommendation, staff will contact BOSS Corporation for project monitoring Q & A service to make sure the project is on track. This will be funded from the O & M Budget approved at the October 2002 meeting.

After proper motion and second, the Board of Water Works authorized staff to proceed with acquisition of the financial information system and to award a contract to Oracle in the amount of \$525,192.00 for software modules/computer applications and Solbourne in the amount of \$1,770,350.00 for implementation and counseling services.

OLD BUSINESS

Mr. Huber requested that the Board move to one of the Old Business items up in the Agenda.

Mr. Ball and Mr. Hubbs reported on Project 99-402 Riverbank Infiltration Phase II. On March 14, 2000, the Board of Water Works approved a Professional Service Contract with JJ&G for a not-to-exceed amount of \$1,188,000 for design and construction services for Phase II of the Riverbank Filtration project and authorized Task I (\$199,200) of the contract for preliminary design. In August 2000, the Board authorized proceeding through Task II (\$488,000) and Task III (\$35,600) of this contract to the preparation of final plans and specifications.

On March 12, 2002 the Board authorized staff to increase the professional services budget reservation to \$1,622,500 and authorize JJ&G Engineers to proceed with Task I in the amount of \$633,700. The increase reflected a change in design concept to a solid rock tunnel and vertical well concept. The additional tunnel length, the discovery of natural gas, and property investigation has resulted in additional work anticipated at \$100,000 for Task I and \$588,000 for the remaining tasks. These changes bring the proposed budget reservation to \$2,310,00 for design services, summarized as follows:

Original Budget Reservation for Engineering Services	\$1,188,000
Revised Budget Reservation (3/12/2002)	\$1,622,500
Requested Increase (11/12/2002)	\$ 688,000
Proposed Budget Reservation for Engineering Services	\$2,310,500

After proper motion and second, the Board of Water Works established a new budget reservation for design services at \$2,310,500 and authorize JJ&G to complete Tasks I, II and III for a not-to-exceed price \$1,582,300. This authorization will also increase the project budget from \$31.0 million to \$32.8 million. Any significant changes in costs or schedule will be brought before the Board for approval prior to bidding. A project budget summary is attached for review.

BID TABULATIONS

Ms. Teasley presented the following Bid Tabulations:

Project or Bid No.: 02-519: Log Cabin Lane Area-Main Replacement Project.

00010

Bids were received and opened Wednesday, October 2, 2002 to install 1,730 LF of new 6-inch and 8-inch ductile iron water main using traditional trenching techniques, and supply and install 2,710 LF of new 6-inch HDPE water main using static main bursting techniques in the Log Cabin Lane Area of Anchorage.

A total of 4 bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$242,000 resulting in a total project cost of \$305,400.

After proper motion and second, the Board of Water Works voted to authorized the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$242,000 to Southern Pipeline Construction Company to install the water facilities associated with this project.

**Project or Bid No.: 02-314 Valley View Drive and Partridge Road
Bullitt County Extension Program (BCEP) – Public Road Petition Main**

Bids were received and opened Wednesday, October 2, 2002 to furnish and install 5,900 linear feet of 8-inch water main along Valley View Drive and Partridge Run Road; bore and install 80 L. F. of 8-inch ductile iron pipe in 70 L. F. of steel casing pipe and; install five (5) fire hydrants.

A total of 8 bids were received and opened from pre-qualified contractors. Tom Brown Construction Company submitted the lowest responsive bid in the amount of \$112,825.

After proper motion and second, the Board of Water Works authorized the Vice President of Serving Customers & Business Development to award a contract in the amount of \$ 112,825 to Tom Brown Construction Company to install the water facilities associated with this project.

Mr. Heitzman presented the following Bid Tabulations:

Project or Bid No.: 02-649 HVAC Improvements for Administration Area at B.E. Payne Water Treatment Plant

Bids were received Wednesday, October 23 for replacement of the HVAC system at B.E. Payne Plant that serves the administrative and personnel facilities. The present unit dates from the original 1977 construction of the treatment plant.

Seven bids were received ranging \$133,460 - \$249,000.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a contract in the amount of \$133,460 to Larry's Heating and Air Conditioning Service, Inc. for improvements to the HVAC system at B.E. Payne Water Treatment Plant.

Mr. Miller presented the following Bid Tabulations:

Bid No.: 02-55/Fire Hydrant Locking Devices – Competitive Negotiation

On October 23, 2002, proposals were opened to award a two-year contract for fire hydrant locking devices. Locking devices on the hydrant operating nut renders the hydrant inoperable

00011

except by means of a specialized wrench.

A total of three proposals were submitted with the lowest, most responsive proposal from McGard Special Products for an estimated two-year total of \$193,762.

After proper motion and second, the Board of Water Works authorized staff to award a two-year contract totaling an estimated \$193,762 to McGard Special Products.

This is the first time the Louisville Water Company has purchased this device.

Bid Number/Title: 02-40/Stainless Steel Tapping Sleeves

On October 23, 2002, bids were opened to award a one-year contract for tapping sleeves. Tapping sleeves are used to make extension taps on existing mains.

Nine bids were submitted with the lowest, most responsive bids from Viking Supply and Hughes Supply. This bid represents a 7.4% increase from our prior bid pricing.

After proper motion and second, the Board of Water Works authorized staff to award a one-year contract as follows:

Hughes Supply	\$135,253
Viking Supply	<u>\$ 38,623</u>
Total	\$173,876

This product was last bid five years ago.

OLD BUSINESS (continued)

Ms. Teasley presented the following Old Business items:

Acceptance of Water Extension Project and Referral to Louisville City Council Pursuant to KRS 96.265- Rollington Road: Oak Forest Road to North 900 ft

An Apportionment Warrant public hearing was held for Rollington Road: Oak Forest Road to North 900 ft. The public hearing was held in response to receipt of a majority petition for this public road project.

Following the formal presentation, an opportunity was provided for residents to ask questions and state their position with respect to their project.

After proper motion and second, the Board of Water Works decided that the subject project meets guidelines and determined that the project was feasible and beneficial in accordance with K.R.S. 96.265, thus the Board of Water Works referred this project to Louisville/Jefferson County Metro Council for consideration. Upon approval by Louisville/Jefferson County Metro Council and adoption of the ordinance required by K.R.S. 96.265, the Company will proceed to final design and advertisement for bid on this project.

00012

Acceptance of Water Extension Project and Referral to Louisville City Council Pursuant to KRS 96.265: Vista Hills Blvd: Bardstown Road to End

An Apportionment Warrant public hearing was held for Vista Hills Blvd: Bardstown Road to End. The public hearing was held in response to receipt of a majority petition for this public road project. The public hearing was structured to provide a brief background on the County-wide Water Extension Program, as well as address specific details of the project and process by which water mains will be extended using Apportionment Warrants as prescribed in KRS 96.265.

After proper motion and second, the Board of Water Works decided that the subject project meets guidelines and determined that the subject project was feasible and beneficial in accordance with K.R.S. 96.265, thus the Board of Water Works referred this project to Louisville/Jefferson County Metro Council for its consideration. Upon approval by Metro Council and adoption of the ordinance required by K.R.S. 96.265 the Company will proceed to final design and advertisement for bid on this project.

Amendment of Apportionment Warrant Register-Taylorsville Rd: Highway 148 to Highway 155

The Board approved a resolution for the issuance of Apportionment Warrants for Taylorsville Rd: Highway 148 to Highway 155 at its November 14, 2000 meeting in accordance with KRS 96.265. The Board amended the Apportionment Warrant Register for Taylorsville Rd: Highway 148 to Highway 155 on July 9, 2002.

With the issuance of Apportionment Warrants for the aforementioned project, liens were placed on properties with roadway frontage on the newly installed water main, including property known as Tax Block 55 Lot 68. Staff was alerted by a customer call that a property transfer occurred between Dunbar Springs, LLC and William and Sharon Knight on March 31, 2000 for Tax Block 55 Lot 68.

After proper motion and second, the Board of Water Works voted to adopt the amended resolution; thereby, revising the ownership information for Tax Block 55 Lot 68 for the Apportionment Warrant Register adopted by the Board of Water Works on May 14, 2002 in accordance with KRS. 96.265.

Mr. Heitzman presented the following Old Business items:

Project No.: 01-745: KY Hwy 1020 16" Transmission Main

Authorization was received from the Board in December 2001 to advertise and bid the referenced project. The project proposed is to install 8,350 feet of 16" water main in KY HWY 1020 between North Lakeview Drive and Brooks Hill Road.

Rock quantities were estimated after soundings were performed by the consultant and based on \$125/cubic yard. A total of 16 easements were needed when the final alignment determined and actual costs for the purchases are estimated at \$25,000. Final alignment dictated the necessity for two 30" bores, estimated at \$350/ft.

The Louisville Water Company will not pursue an alternate bid.

00013

The project was part of the KT merger agreement and will be financed through depreciation funds as outlined in the Bullitt County I-65 Transmission Main System projects.

After proper motion and second, the Board of Water Works voted to increase funding to the amount of \$746,127 and proceed to advertisement for bids.

Project No.: 98-607 – Chamberlain Lane Booster Pump Station Change Action

The March 2000 Board awarded a contract for procurement of the Chamberlain Lane booster pump station to Dakota Pump, Inc. in the amount of \$191,900. During fabrication, the manufacturer was requested to install additional equipment and instrumentation.

At the time of bid in March 2000, the easement site for the pump station had not been finalized. As a result, flow metering, originally conceived to be external to the station, was not incorporated into station design. Final easement negotiation with Kentucky Ford Truck Plant produced a site which required flow metering be included within the station capsule. This required equipment to measure and transmit flow information to be added to the project scope. In addition, trolley and hoist equipment utilized for future maintenance of station equipment was added.

The cost for the additional labor and materials is \$27,260, resulting in a final contract value of \$219,160, an increase of 14 percent.

After proper motion and second, the Board of Water Works voted to increase the value of contract E693 with Dakota Pump, Inc. from \$191,900 to \$219,160.

NEW BUSINESS

Mr. Heitzman presented the following New Business item:

Project No.: 02-402: Overhaul Pump Unit #7 at Crescent Hill Pump Station

Proposed under the 2002 Capital Budget are funds to overhaul Pump Unit #7 at Crescent Hill Pump Station.

Pump Unit #7 is a 35-million gallon per day capacity unit, utilized to pump potable water to meet system demand and provide pumping operations reliability. The overhaul was originally budgeted for rewind of the motor and rebuild of the pump for \$200,000. During preliminary engineering it was determined the suction valve used to isolate the pump is inoperable. The additional material and labor costs for valve replacement will require an additional \$35,000, an increase of 17.5 percent.

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project, and to increase the project budget from \$200,000 to \$235,000.

The meeting adjourned at 2:12 p.m.

00014

**Project 99-402 Riverbank Filtration Phase II
Proposed Adjustment to Budget Reservation and Engineering Contract with JJG Engineers**

Engineering Tasks	Original Budget Reservation (3/14/2000)	Approved Budget Reservation (3/12/02)	Proposed Budget Reservation (11/12/02)

**Board of Water Works
Resolution**

November 12, 2002

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Rollington Road: Oak Forest Road to North 900 ft**, a public way in Jefferson County, and acting thereon convened a public hearing on October 1, 2002, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Serving Customers and Business Development of the Company has recommended the extension of such water along **Rollington Road: Oak Forest Road to North 900 ft**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Rollington Road: Oak Forest Road to North 900 ft**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Louisville/Jefferson County Metro Council, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

November 12, 2002

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on July 9, 2002, directing the issuance of Apportionment Warrants against properties located on Taylorsville Rd: Highway 148 to Highway 155 to revise the ownership information for Tax Block 55 Lot 68:

Revised Account Information:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assessment</u>
845175	William & Sharon Knight	Taylorsville Rd Deed Book 7465 Pg. 126 Tax Block 55 Lot 68	\$5,450

Original Account Information:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assessment</u>
845175	Dunbar Springs, LLC	Taylorsville Rd Deed Book 7019 Pg. 689 Tax Block 55 Lot 68	\$5,450

**BOARD OF WATER WORKS
DECEMBER 20, 2002 MINUTES**

Board Members Present

Mr. Stewart Conner
Mr. Stephen Gault
Mr. Phillip Bond

Board Members Absent

Hon. David L. Armstrong
Mr. Jack Segell
Mr. Owen Hammons
Ms. Wendy Welsh

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. Don McKay
Mr. Larry Lenahan
Mr. James Birch
Mr. Andrew Zalla
Mr. William Dulaney, III
Mr. Dale Wilson
Mr. Charlie Waites
Mr. Robert Loundes

Mr. Huber called the meeting to order at 1:05 p.m. and welcomed all of the visitors. He noted that there was not a quorum. He announced that all action taken today would be ratified by the Board at the next meeting. A few items taken up at today's meeting will be circulated prior to the next meeting for approval by unanimous consent. Mr. Huber announced that some items would be moved up on the agenda in deference to the visitors.

CONSENT AGENDA APPROVED

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$100,000

Item A: Minutes of Regular Meeting Held November 12, 2002
Request: Approve Minutes

Item B: Claims Paid During November 2002
Request: File claims for future audit.

Item C: Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

REPORT OF OFFICERS

ADMINISTRATIVE REPORT

Mr. Huber announced that he did not have an administrative report since most of his items would be covered by others during their reports.

FINANCIAL REPORT

Mr. Miller gave the Income and Expense Summary for November 2002.

- 1) Total operating revenue of \$90,904,100 is \$2,423,300 or 2.74% more than budgeted and \$5,280,500 or 6.17% more than the same period in 2001. We sold 2.69% more water in 2002 than the same period in 2001. Water delivered to the mains was 2.17% more than 2001.
- 2) Operation and maintenance expense of \$37,884,800 is \$587,600 or 1.53% less than budgeted and \$2,374,300 or 6.69% more than 2001.
- 3) Operating deductions of \$59,393,600 are \$1,240,800 or 2.05% less than budgeted and \$3,100,400 or 5.51% more than 2001.
- 4) Net operating income of \$31,510,500 is \$3,664,200 or 13.16% more than budgeted.
- 5) Net income of \$27,820,900 is \$2,500,700 or 9.88% more than budgeted and \$508,500 or 1.79% less than 2001.

Mr. Miller announced that Auditors had already arrived and that the FINS Project was now fully underway.

OPERATIONS REPORT FOR MAY 2002

Mr. Heitzman provided the Operations Report for November 2002.

Production - The water production in November of 115.4 MGD was slightly lower (2.2%) than that November 2001 production. Due to the dry weather conditions in August and September, the year-to-date pumpage is 2.2 percent more than 2001 and 1.2 percent more than the 5-year average, respectively.

Water Quality – The water quality in the distribution system continued to exceed the 95 percent goals for turbidity, chlorine, and total coliform during the month of November.

During routine source water monitoring, the water quality staff detected the presence of 1,3-dichlorobenzene in the river water on November 27, 2002. Although the chemical is not a regulated chemical in drinking water, it would result in customers taste & odor complaints if it is not removed from the water. The source of the spill is unknown. Powder activated carbon (PAC) was used to absorb the chemical.

Goshen Utilities Operation - In November, staff completed the installation of altitude valve at the ground storage tank near the well field and converted the Goshen system to a 100 percent Louisville Water supply on November 22. With all system improvements made during past 4 months, the risk of losing water system-wide is reduced significantly. We experienced no water supply disruption in Goshen system in November.

Distribution System –Unseasonably cold weather in late November has lowered finished water temperatures to 45 degrees. Once water temperature passes through 38 degrees, main break activity will accelerate. However, due to the current unseasonably warm weather, breaks have not be anticipated.

A joint leak on a 24-in main in Bells Lane, situated under a Norfolk Southern rail line was discovered in November. An emergency or contingency contract may be executed to repair the leaking water main.

University of Louisville Center for Infrastructure Research – The Center is now up and running, with the hiring of Dr. Thomas Rockaway as Director. The Center's Advisory Board is made up of equal representation from LWC and MSD. Greg Heitzman and Steve Cooper are LWC's representatives on the Advisory Board. The Center will leverage the funding from LWC and MSD, by pursuing grants from Industry trade organizations and Educational Foundations.

Crescent Hill Reservoir – Phase II of the rehabilitation of the South basin of the reservoir is nearing completion, with the liner now installed. Staff is working with the contractor on filling the reservoir to remove trapped air below the liner.

SERVING CUSTOMERS REPORT

Ms. Teasley gave the Serving Customers Report for November 2002.

Performance Measures – The November 2002 abandonment rate was 3.0%, a reduction from the previous month's abandonment rate of 5.7%. This is the lowest abandonment percentage for a month experienced since before the CIS was implemented in 2000.

Bad debt for the month of November was \$37,755, approximately \$8,565 over budget. The write-offs continue to represent primarily small, residential accounts.

City of Shepherdsville – The closing planned on November 15 for the acquisition of the Shepherdsville water system was delayed. The new closing date is December 23, 2002.

Jefferson County Water Supply Planning Council - The annual meeting of the Jefferson County Water Supply Planning Council was conducted on November 20, 2002. The Jefferson County Water Supply Planning Council was established to direct the development of County Water Management Plans per regulatory requirements in 401 KAR 4:220. The next meeting of the Jefferson County Water Supply Planning Council is tentatively scheduled for March 2003.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation and personnel. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

NEW BUSINESS

Mr. Huber thanked all visitors for waiting. He stated that he would take the item on page 147 next. That item involved recommendation that an additional apportionment warrant exemption be added.

The County Wide Extension Program uses the Apportionment Warrant extension method for installation of water main in response to a majority petition of property owners along a project route. In accordance with KRS 96.265, apportionment warrants will be issued to all benefited properties along the route, upon completion of the water main extension. In some situations the property may not be benefited.

Since 1992, three Board policies have been adopted relating to the Apportionment Warrant extensions.

June, 1993 – The Board adopted a policy whereby a waiver of the apportionment warrant is granted to properties owned by the same individual(s) that are situated directly across a public roadway, when such properties have only one dwelling.

March, 1998 – The Board adopted a policy whereby cemeteries or burial grounds are exempted from the Apportionment Warrant assessment when certain conditions are met.

November, 1998 – The Board adopted a policy whereby subject parcels are exempted from the apportionment warrant assessment when separated by a public way from another parcel under the same ownership when certain conditions are met.

After proper motion and second, the Board of Water Works voted to adopt a policy for use throughout Jefferson County when the Apportionment Warrant Extension method is used which would exempt property which does not exceed 80 feet in width the property has no need for water the property is used by two or more property owners for access based on a recorded easement, and the parcels abut a private roadway.

Mr. Huber also gave Mr. James Birch an opportunity to speak.

Mr. Heitzman reported on **B.E. Payne Water Treatment Plant Improvements Project 00-418**

The Company accepted bids on November 20, 2002 for improvements to the B.E. Payne Water Treatment Plant. The project scope includes replacement of electrical switchgear, renovation of filters, upgrade of the backwash system, and expansion of the plant from 45 MGD to 60 MGD firm capacity. An alternate bid scope was also included to construct an on-site backup power supply. The project is funded in the 2000-04 Capital Budget in the amount of \$20.5 million.

Two of the six bids received were disqualified, due to bid irregularities as identified on the tabulation. The remaining 4 responsive bidders include Judy Construction, Building Crafts, Smith Contracting, and Hall Contracting. The low dollar bid was submitted by Judy Construction in the amount of \$15,069,180 for the base and alternate bid scope.

After proper motion and second, the Board of Water Works voted to to award a contract in the amount of \$15,069,180 to Judy Construction, contingent upon the receipt of documentation within 90 days of the bid opening date, specifying equipment supplier, Benschaw, Incorporated has obtained appropriate WBE certification from one of the eight agencies identified by the Company in the bid documents. The Board voted to retain the project budget at \$20.5 Million to accommodate the base and alternate bids, engineering (LWC and CDM Engineers), and remaining elements associated with this project.

Prior to the vote, Mr. Huber asked Mr. Dulaney and Mr. Zalla if they would like to make a statement. They declined. Mr. Huber then asked Mr. Waites and Mr. Wilson if they would like to make a statement. They both offered brief remarks. Mr. Waites offered to allow Board of Water Work's members to review Benschaw's file. Mr. Dulaney asked if the action by the Board would be official action since a quorum was absent. Mr. Huber responded that the Board action is a recommendation only and will be ratified by the Board at the next meeting or prior to the next meeting by circulating a consent letter.

REPORT OF COMMITTEES

Mr. Conner presented the minutes of the September 10, 2002 Compensation Committee. The Committee meeting focused upon the 2003 Performance Matrix. The Matrix will be modified so that employees in the Third and Fourth Quartile who receive performance ratings of 3-5 would experience a 1% lowering of their percentage pay increase. For example, a rating of 4.5 for an employee in quartile 3 may be market movement plus 3% rather than market movement plus 4%. After proper motion and second, the Board voted to adopt the Committee's recommendation.

SPECIAL ISSUES

Mr. Miller presented the 2003 Water Rate Schedule.

At the October 20, 2002 special meeting of the Board of Water Works, the 2003 Annual Budget was adopted with a provision for an overall 3.5% water rate increase.

The proposed rate schedule was developed in accordance with a cost of service study based upon the methods suggested in American Water Works Association Manual M1, Water Rates.

Staff has incorporated two changes to the water rate methodology for 2003:

- Allocations to peak day and peak hour have been revised in accordance with recent changes recommended by AWWA's M1 Manual.
- Use of updated demand factors based on standard estimation routines rather than monitored factors.

These changes are consistent with recommendations included by Black and Veatch in the 2002 Annual Inspection Report.

After proper motion and second, the Board of Water Works voted to adopt the attached 2003 Water Rate Schedule. Note: implementation of the 2003 wholesale rate will require filing a PSC rate case in 2003.

Ms. Teasley distributed a revised Board letter and asked all Board of Water Works members to substitute the revised letter for the one which appears in the Board book regarding the 2003 Service Installation and Temporary Meter Fees (Service Rule 1.04).

After proper motion and second, the Board of Water Works adopted the attached installation fees for 2003.

Mr. Miller presented the Declaration of Dividend to the City of Louisville.

After proper motion and second, the Board of Water Works voted to declare the fourth quarterly 2002 dividend in the amount of \$2,865,491 and authorized the President of the Louisville Water Company to pay \$2,984,766 to the Louisville and Jefferson County Revenue Commission on December 30, 2002 as indicated in the attached Resolution to Declare Fourth Quarter Dividend to the City of Louisville.

BID TABULATIONS

Mr. Miller presented the following Bid Tabulation:

Bid Number 02-27: Fire Hydrants

On November 20, 2002, proposals were opened to award a one (1) year contract, renewable for up to four (4) additional one year terms for fire hydrants and extension kits.

This was procured through competitive negotiation.

A total of five proposals were submitted with the best evaluated proposal from American Cast Iron Company for an estimated one year total of \$990,325.

After proper motion and second, the Board of Water Works voted to authorize staff to award a one (1) year contract renewable for up to four additional years at the sole discretion of Louisville Water Company to December 2007. The estimated first year total is \$990,325.

Mr. Heitzman presented the following Bid Tabulations:

Project No.: 94-792B (formerly 94-792B, Phase II)

Furnish and Install Westport Road / I-264 Interchange Transmission Mains (Phase II)

Bids were received on Wednesday, November 27, 2002, to relocate suction and discharge transmission mains in the vicinity of the new Westport Road Transfer Station. The relocation project is being financed by the Kentucky Transportation Cabinet (KTC) to accommodate the anticipated interchange construction at Watterson Expressway at Westport Road.

Bids were received from four prequalified firms. T & C Contracting, Inc. submitted the lowest bid in the amount of \$1,812,900, or 9.0% below the Project Manager's final-design contract labor estimate of \$1,991,915.

With this project the LWC is taking this opportunity to make some transmission improvements to its 660 and 770 pressure planes.

After proper motion and second, the Board of Water Works voted upon approval and written agreement from the KTC for 79.7% reimbursement of the total project amount of \$2,124,900 and to award a contract in the amount of \$1,812,900.00 to T & C Contracting, Inc. for the above-referenced project.

Project No: 01-745A

KY HWY 1020 16-Inch Water Main

Bids were received Wednesday, November 27, 2002, to Furnish and Install approximately 8,500 feet of 16-inch water main in Right-Of-Way and easements, East of and parallel to Highway 1020 between Highway 1526 (Brooks Hill Road) and North Lakeview Drive.

A total of 8 bids were received from qualified contracting firms. Basham Construction and Rental submitted the best-evaluated bid in the amount of \$598,000. Their bid is below the engineer's estimate by \$17,590 or 2.8%.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award a contract in the amount of \$598,000 to Basham Construction and Rental, to install water facilities associated with this project.

Ms. Teasley presented the following Bid Tabulations:

Installation of Water Services ¾" & 1"	03-296B
Installation of Fire Hydrants	03-298A
Installation of Water Services 1 ½" & 2"	03-298B
Installation of Water Services 4" & larger	03-298C
Installation of Fire Services	03-299A
Renewal of Water Services ¾" & 1"	03-447
Discontinue of Small Water Services	03-1405A

Prior to 2001, the Company solicited annual bids to perform various service installations. In November 2001, an invitation to bid was advertised for 3-year renewable service contracts to begin in 2002. Then, based upon satisfactory performance, the contracts could be renewed annually for a maximum of two additional years.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to extend a unit price contract to Tom Brown Construction for ¾" & 1" services, Fire Hydrants, Fire Services and 1 ½" & 2" services, DSE for 4" & Larger Services and ¾" & 1" Renewals and Miller Pipeline for Discontinues.

Project No: 02-526

Floydsburg Road - Main Replacement Project

Bids were received and opened Wednesday, November 27, 2002 to install 1,700 linear feet of 12-inch water line along Floydsburg Road between Cherry Road and Old Floydsburg Road in western Oldham County.

A total of 3 bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$145,600 resulting in a total project cost of \$195,600.

The bid from Southern Pipeline is 2% under the Project Manager's Estimate. The resulting total unit cost for this project is \$115.06/LF.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$145,600 to Southern Pipeline Construction Company to install the water facilities associated with this project.

COMMUNICATIONS

Ms. Teasley presented the following Communication Reports:

Payment Options Summary of Costs

Methods of Payments: The Louisville Water Company accepts the following methods of bill payment: mail for bank processing (lockbox payments); walk-in lobby transactions; direct withdrawal from checking account (EFT); and debit/credit card via lobby/walk-in or over the telephone. In the 1st quarter of 2003 we also plan to accept credit card payments over the Interactive Voice Response (IVR) system allowing the customer to pay their bill from any telephone 7 days per week/ 24 hours per day.

Analysis of Payment Options: The EFT payment option was found to be the most cost effective method for LWC bill processing at \$.07 per transaction. Next was the lockbox payment option at \$.14, followed by the debit card option at \$1.49, the walk-in lobby transaction at \$1.51 and finally the credit card payment option at \$2.81. The cost to process returned checks is \$4.09.

Debit/Credit Card Usage: Staff will collect measures on a monthly basis to determine the number of customers using these options and at what step in the payment or collection process the card was used. This information will assist staff in performing a cost benefit analysis for the debit/credit card payments.

County-Wide Water Extension Program

Rockycreek Lane: Back Run Road to North 1,800 feet

In accordance with KRS 96.265 a public hearing was held on October 29, 2002 for the property owners along Rockycreek Lane to consider the extension of a water main along this private roadway. The scope of the project as presented at the October 29, 2002 meeting would have extended a 6-inch and 4-inch water main approximately 1,800 feet from Back Run Road to the Tony and Mary Killian property on Rockycreek Lane and includes two fire hydrants for fire protection. As presented, using the equal assessment method, seven (7) eligible property owners on this private roadway were given the "equal share" cost per property of \$15,250. The attending property owners did not agree to proceed with the project at the cost presented.

Earlier this year, January 3, 2002, a public hearing was held in accordance with KRS 96.265 for the property owners along Rockycreek Lane. The scope of the project as presented at the January 3, 2002 meeting would have extended a 6-inch and 4-inch water main approximately 2,600 feet from Back Run Road to the last property on Rockycreek Lane and included two fire hydrants for fire protection. After pursuing alternatives for the water main extension for the January 3, 2002 meeting, the cost per property owner was reduced from \$20,800 to \$16,100. The property owners did not agree to proceed with the project at the \$16,100 cost presented.

In order to exhaust all water main extension alternatives, staff will prepare bid documents and bid the water main extension project pursuing contractor labor cost reductions to provide a final "not-to-exceed" cost to the property owners. Staff will present the results of the bidding process and the response from the Rockycreek Lane property owners to the Board of Water Works in the first quarter of 2003.

OLD BUSINESS

Ms. Teasley presented the following Issuance of Apportionment Warrants per KRS 96.265:

Top Hill Rd: Snawder Ln to Mitchell Hill Rd

Snawder Ln: Top Hill Rd to South 1,600 ft

Goff Ln: Top Hill Rd to South 2,000 ft (end of public portion)

Mitchell Hill Rd: Top Hill Rd to South 1,100 ft

Mitchell Hill Rd: County Line to North 2,950 ft

A public hearing was held June 7, 2001 for the extension of water service along Top Hill Rd: Snawder Ln to Mitchell Hill Rd, Snawder Ln: Top Hill Rd to South 1,600 ft, Goff Ln: Top Hill Rd to South 2,000 ft, and Mitchell Hill Rd: Top Hill Rd to South 1,100 ft. A public hearing was held December 6, 2001 for Mitchell Hill Rd: County Line to North 2,950 ft. The Board of Water Works adopted a resolution for Top Hill Rd, Snawder Ln, Goff Ln and Mitchell Hill Rd: Top Hill Rd to South 1,100 ft July 10, 2001 and for Mitchell Hill Rd: County Line to North 2,950 ft on January 15, 2002 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance.

With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance Apportionment Warrants and liens against 70 benefited properties along Top Hill Rd, Snawder Ln, Goff Ln, and Mitchell Hill Rd in accordance with KRS. 96.265, as described.

Ms. Teasley presented the following Amendment of Apportionment Warrant Register:

1) Echo Trail: Seatonville Road to Thurman Road

The Board approved a resolution for the issuance of Apportionment Warrants for Echo Trail: Seatonville Road to Thurman Road at its March 12, 2002 meeting in accordance with KRS 96.265. The Apportionment Warrant Register approved at the March 12, 2002 meeting is attached as Exhibit A.

Property known as Tax Block 58 Lot 130 located along the Echo Trail water main extension was placed "in-service" on October 31, 2002. The construction of this portion of the water main was delayed by easement negotiation. With the completion of this public water main the Board of Water Works is required to issue an Apportionment Warrant against the property assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the amended resolution attached; thereby, adding Tax Block 58 Lot 130 in the name of Deborah and Michael Creagh, Steven Cline, and Howard Frank Cline, Jr. to the Apportionment Warrant Register adopted by the Board of Water Works on March 12, 2002 in accordance with KRS. 96.265. The adoption of the attached resolution will result in an Apportionment Warrant assessment of \$5,450 for the aforementioned property.

2) Williams Road: Dry Ridge to County Line

The Board of Water Works approved a resolution for the issuance of Apportionment Warrants for Williams Rd: Dry Ridge Road to County Line at its October 8, 2002 meeting in accordance with KRS 96.265(11).

Staff discovered that William A. French was inadvertently assessed for the same property, Tax Block 60 Lot 116, on both the Williams Road and Dry Ridge Road water main extension projects.

After proper motion and second, the Board of Water Works voted to adopt the attached amended resolution for Williams Rd: Dry Ridge Road to County Line thereby removing Tax Block 60 Lot 116 from the Apportionment Warrant Register for Williams Road and releasing the associated lien, in accordance with KRS. 96.265(11).

Mr. Heitzman presented the following Old Business:

Facilities Improvement Program Request for Proposal for Consulting Engineering:

The 2002 Capital Improvement Program identifies facilities improvement projects having a total value of nearly \$ 70 million dollars to be constructed over the next five years. However, in assessing the overall needs of the Louisville Water Company, it has been determined that approximately \$ 30 million of projects must be out-sourced.

In July 2002, the Board authorized staff to prepare a Request for Proposal for Engineering Services(RFP) and solicit proposals from engineering consultants.

Seven firms were invited to submit an RFP and six firms did so. RFP's were received and interviews were conducted. An evaluation, or scoring matrix was prepared by staff to select the firms for future work.

After proper motion and second, the Board of Water Works voted to authorize staff to negotiate contracts for engineering services for projects selected for out-sourcing to Camp, Dresser & McKee, CH2M Hill, O'Brien & Gere and Jordan, Jones and Goulding. Contracts exceeding \$100,000 will be submitted to the Board of Water Works for approval.

NEW BUSINESS

Mr. Heitzman presented the following:

Approval of Purchase – Land for Tank Site Project 01-701 owned by Sheehan and Sheehan
Louisville Water Company staff is interested in purchasing property for the future construction of a new elevated storage tank on Snawder Road off Top Hill Road, adjacent to the Jefferson Memorial Forest in southern Jefferson County. Construction of the tank will improve the fire flow and system expansion opportunities in the 1030 pressure zone in southern Jefferson County and northern Bullitt County.

The property has been appraised and an offer was made and accepted for slightly less than the appraised value of the land.

The following contingencies were included in the offer:

- A) a clear title examination and/or survey to determine there are no restrictions, easements, or regulations that will inhibit the intended use;
- B) an environmental audit to determine the property is free of hazardous or toxic substances;
- C) a geo-technical survey and core drillings to determine the property is suitable for the purchaser's intended use;
- D) a survey of the property to confirm there are no encroachments;
- E) authorization / approval to use the property for the intended use; and
- F) approval by the Board of Water Works

After proper motion and second, the Board of Water Works voted to authorize staff to purchase land for the purpose of constructing an elevated storage tank on Snawder Road in Jefferson County, Kentucky at a price slightly less than the appraised value.

Project 01-616 – Cardinal Hill Detention Basin Request for Design/Bid Authorization

The 2002 Capital Budget includes \$300,000 to construct a detention basin for planned and emergency discharges from the Cardinal Hill Reservoir.

A detention basin is desired to minimize the impact of reservoir draining. Currently water drains downhill from Cardinal Hill Reservoir into neighborhoods that have recently been developed. In order to minimize the risk of possible damage or disruption to our customers at the base of the hill a detention basin is proposed to control the rate the water enters the natural drainage ways.

The Company retained PDR Engineers (Tetra Tech) to evaluate alternatives for the detention facility. Four potential sites were identified with nine alternatives among the sites evaluated. The recommended site for the detention basin will be located near the YMCA buildings and replace a basin that is in need of extensive renovation. Replacement of the basin will allow improved control of rainfall runoff on the YMCA property in addition to providing control of the rate of discharge of water from the reservoir.

After proper motion and second, the Board of Water Works voted to proceed with final engineering design and advertisement for bid for the project.

Crescent Hill Water Treatment Plan Security Improvements:

Following the September 2001 terrorist act, several improvements were enacted at the Crescent Hill Water Treatment Plant to upgrade site security. This correspondence provides discussion of the improvements, and requests authorization of an unbudgeted capital project budget in the amount of \$116,914 to fund the improvements.

The purpose of the various improvements was to construct immediate and long-term site security measures to control access to the facility and to secure vulnerable areas. The improvements in general consisted of the following:

- Gate and fence modifications to secure plant entrance and critical facilities
- Security guard housing and utilities for access control
- Additional concrete in select areas to secure building perimeters
- Additional facility exterior lighting for enhanced visual monitoring

These costs, plus LWC expenses total \$116,914.

After proper motion and second, the Board of Water Works voted to authorize staff to establish a capital project budget in the amount of \$116,914 for Crescent Hill Water Treatment Plant Security Improvements.

Mr. McKay presented the following report on **Health Care, Dental & Disability Benefits.**

Staff provided a projection of health care costs and an analysis of the cost drivers at the August Board meeting. Early projections at time were for health care cost increases in the 20 – 22% range. It now appears that the increase for health care insurance will be just under 20%, that dental coverage will increase approximately 10% and no cost increases will be realized for long-term disability and short-term disability administration.

After proper motion and second, the Board of Water Works voted to authorize staff to enter into a renewal contract with Humana for the provision of Health Insurance in 2003 at a projected net premium of \$3,170,000.00 and to enter into a renewal contract with Delta Dental for the provision of dental coverage at a forecasted net premium of \$254,179.00. No recommendation was presented on life or disability insurance. Staff will present a life insurance contract recommendation in January 2003.

Mr. Miller presented the **Retiree Insurance Renewals.**

Louisville Water Company provides group medical insurance to former employees who retired prior to conversion of our retirement program to CERS in 1990 and to their eligible dependents. All of the eighty-eight policies remaining are covered by Medicare plans for which retirees pay a portion of the premium.

Prescription drug coverage remains the number one issue facing retirees. LWC offers three types of medical plans to our retirees. The remaining 16 retirees are covered by a Medicare HMO plan which provides drug coverage up to \$1,500 per year.

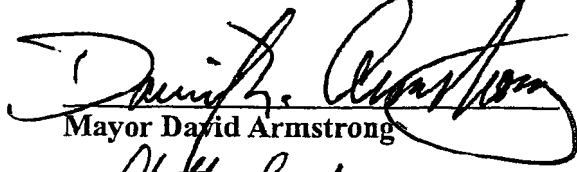

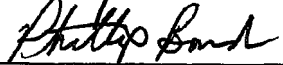

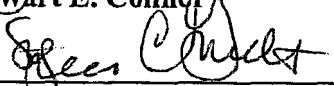

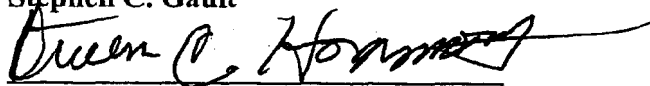

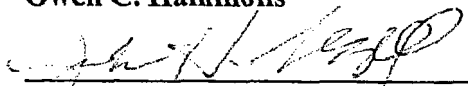

After proper motion and second, the BOWW voted to authorize staff to approve the retiree insurance renewal contract with Anthem Blue Cross/Blue Shield in the amount of \$123,000 for the provision of group Medicare HMO coverage to LWC retirees.

Mr. Huber announced that, at his request, Ms. Douglas prepared a document during the course of the Board of Water Works meeting entitled "Statement of Unanimous Consent" for signature by all Board of Water Works members. Since there was no quorum for the December 20, 2002 meeting, all actions taken by the Board at that meeting must be submitted to the Board for full ratification at the January 2003 meeting. However, there are three items that require action prior to the January 2003 Board meeting based upon critical time restraints. These actions are: declaration and payment of the fourth quarter dividend, adoption and implementation of the 2003 water rate schedule and adoption and implementation of the 2003 Service Installation and Temporary Meter Fees. Therefore, the "Statement of Unanimous Consent" was drafted in order to obtain the signatures of all Board of Water Works' members and, thereby, ratify the action taken on these critical items prior to the January 2003 meeting. (Those Board of Water Works' members present for the December 20, 2002 meeting signed the document immediately upon adjournment of the meeting). Ms. Douglas will circulate the document and obtain the signature of all absent Board of Water Works members. (A copy of the fully executed statement of unanimous consent is attached to these minutes.

The meeting adjourned at 3:15 p.m.

STATEMENT OF UNANIMOUS CONSENT

By unanimous consent, the Board of Water Works adopts as of the date of the signature of the last party so signing, the attached 2003 Water Rate Schedule, the Resolution to Declare Fourth Quarter Dividend to the City of Louisville and the 2003 Service Installation and Temporary Meter Fees (Service Rule 1.04).

WATER RATES

LOUISVILLE WATER COMPANY LOUISVILLE, KENTUCKY

BOARD OF WATER WORKS RULES AND REGULATIONS

6.00 RATES

6.01 For the purpose of classifying revenues, and to provide for different classes of rates, there shall be established seven (7) classes of customers and four (4) areas of service.

The classes of customers shall be identified as:

Residential
Commercial
Industrial
Fire Service
Fire Hydrants
Municipal
Wholesale

The areas of service shall be identified as:

Retail Service Area
Kentucky Turnpike #1 Area
Kentucky Turnpike #2 Area
Goshen Utilities Area

6.02 The rate charge for metered water service shall be comprised of three components except for municipal customers as defined in KRS 96.270 who shall be served as provided therein at no cost to the customer and publicly owned fire hydrants:

- (1.) A service charge based on the size of the meter through which the customer receives such service, and
- (2.) A commodity charge based on the amount of water consumed, and
- (3.) An elevated service area surcharge, if applicable, in Rule 6.02.03.

6.02.01 **Service Charge**

The service charge for classes of customers taking metered service and situated within the **Retail Service Area** shall be charged in accordance with the following schedule:

<u>Meter Size</u>	<u>Service Charge</u> <u>Monthly Bill</u>	
5/8" x 3/4"	\$	4.50
1"	\$	11.25
1 1/2"	\$	22.50
2"	\$	36.00
3"	\$	78.75
4"	\$	135.00
6"	\$	315.00
8"	\$	562.50
10"	\$	855.00
12"	\$	1,305.00
16"	\$	2,587.50

The service charge for customer classes situated within the **Kentucky Turnpike #1** area shall be charged in accordance with the following schedule:

Meter Size

5/8" x 3/4"	\$	6.00	+	4.50	=	10.50
1"	\$	24.00	+	11.25	=	35.25
1 1/2"	\$	54.00	+	22.50	=	76.50
2"	\$	96.00	+	36.00	=	132.00
3"	\$	216.00	+	78.75	=	294.75
4"	\$	384.00	+	135.00	=	519.00
6"	\$	864.00	+	315.00	=	1,179.00

6.02.02 Commodity Charge

The commodity charge for monthly usage for customers within the **Retail Service Area** and the **Kentucky Turnpike #1** area shall be computed in accordance with the following schedule:

	<u>Thousand Gallons</u> <u>Per Month</u>	
First	3	at \$1.63 per 1,000 Gallons
Next	3	at \$1.78 per 1,000 Gallons
Next	194	at \$2.01 per 1,000 Gallons
Next	1,300	at \$1.87 per 1,000 Gallons
Next	3,500	at \$1.71 per 1,000 Gallons
Next	5,000	at \$1.32 per 1,000 Gallons
All Over	10,000	at \$1.16 per 1,000 Gallons

The commodity charge for monthly usage within the **Kentucky Turnpike #2** area shall be computed in accordance with the following schedule:

Thousand Gallons
Per Month

5/8 inch and 3/4 inch connection

First	2	\$15.67 Monthly Minimum
Next	3	at \$4.75 per 1,000 gallons
Next	5	at \$4.27 per 1,000 gallons
Next	15	at \$4.04 per 1,000 gallons
Next	25	at \$3.55 per 1,000 gallons

1 inch connection

First	5	\$29.92 Monthly Minimum
Next	5	at \$4.27 per 1,000 gallons
Next	15	at \$4.04 per 1,000 gallons
Next	25	at \$3.55 per 1,000 gallons

1 1/2 inch to 4 inch connection

First	10	\$51.27 Monthly Minimum
Next	15	at \$4.04 per 1,000 gallons
Next	25	at \$3.55 per 1,000 gallons

Bernheim Forest \$100.00 per month

City of Shepherdsville \$1.40 per 1,000 gallons

City of Lebanon Junction \$1.40 per 1,000 gallons

North Nelson Water District

Up to	4,000	\$7,880.00
Excess of	4,000	at \$1.75 per 1,000 gallons

The commodity charge for monthly usage within the **Goshen Utilities** area shall be computed in accordance with the following schedule:

Thousand Gallons
Per Month

First	2	\$9.51 Monthly Minimum
Next	13	at \$3.00 per 1,000 gallons
Next	15	at \$2.42 per 1,000 gallons
Next	20	at \$1.84 per 1,000 gallons
Over	50	at \$1.27 per 1,000 gallons

Monthly Debt Surcharge of \$1.73 per month

Service Deposit Fee of \$50.00

6.02.03 Elevated Service Area Surcharge

All customers shall pay a surcharge of \$0.19 per thousand gallons if water must be delivered at a higher elevation than the general pressure plane served by the Crescent Hill / Cardinal Hill System, excluding customers in the Kentucky Turnpike #2 and Goshen Utilities areas.

6.03 Wholesale Customers

Wholesale customers which purchase water for resale wherever situated shall be charged: \$1.16 per thousand gallons for all water purchased, the elevated service area surcharge specified in Rule 6.02.3, if applicable, and the service charge specified in Rule 6.02.1.

6.04 Fire Service Charges

The charge for fire service, where water may be taken for fire protection only, shall be in accordance with the following schedule. This charge will also be applicable to such fire hydrants as may be provided by private agencies.

<u>Size</u>	<u>Monthly Charge</u>
4"	\$ 12.25
6"	\$ 24.75
8"	\$ 48.25
10"	\$ 95.00
12"	\$ 190.50

6.05 At the Company's option, bills may be rendered monthly or bimonthly.

6.06 In the event that payment for any charge is not made within twenty (20) days from the billing date, the net amount of the bill shall be increased by 5% and the gross amount thus determined must be paid.

6.07 Where water is used without proper authorization, the estimated quantity of unmetered water used shall be paid for at the rate of \$10.00 per thousand gallons.

6.08 Water taken from a Louisville Water Company public fill station shall be paid for at the rate of \$2.50 per thousand gallons plus such deposits as may be established from time to time.

6.09 Temporary services shall be charged at the rate of \$2.00 per day, plus water consumed at the applicable rate schedule.

Upon adoption, these rates shall become effective for water service on and after January 1, 2003.

Notes:

The bills shown are computed using basic rates only and do not include special charges such as the elevated area surcharge, public fire protection charges, sales, franchises, or other taxes. Water bills for LWC include 3.5% rate increase for 2003, water bills for other utilities do not include any proposed 2003 increase.

Rank #1 is lowest charge.

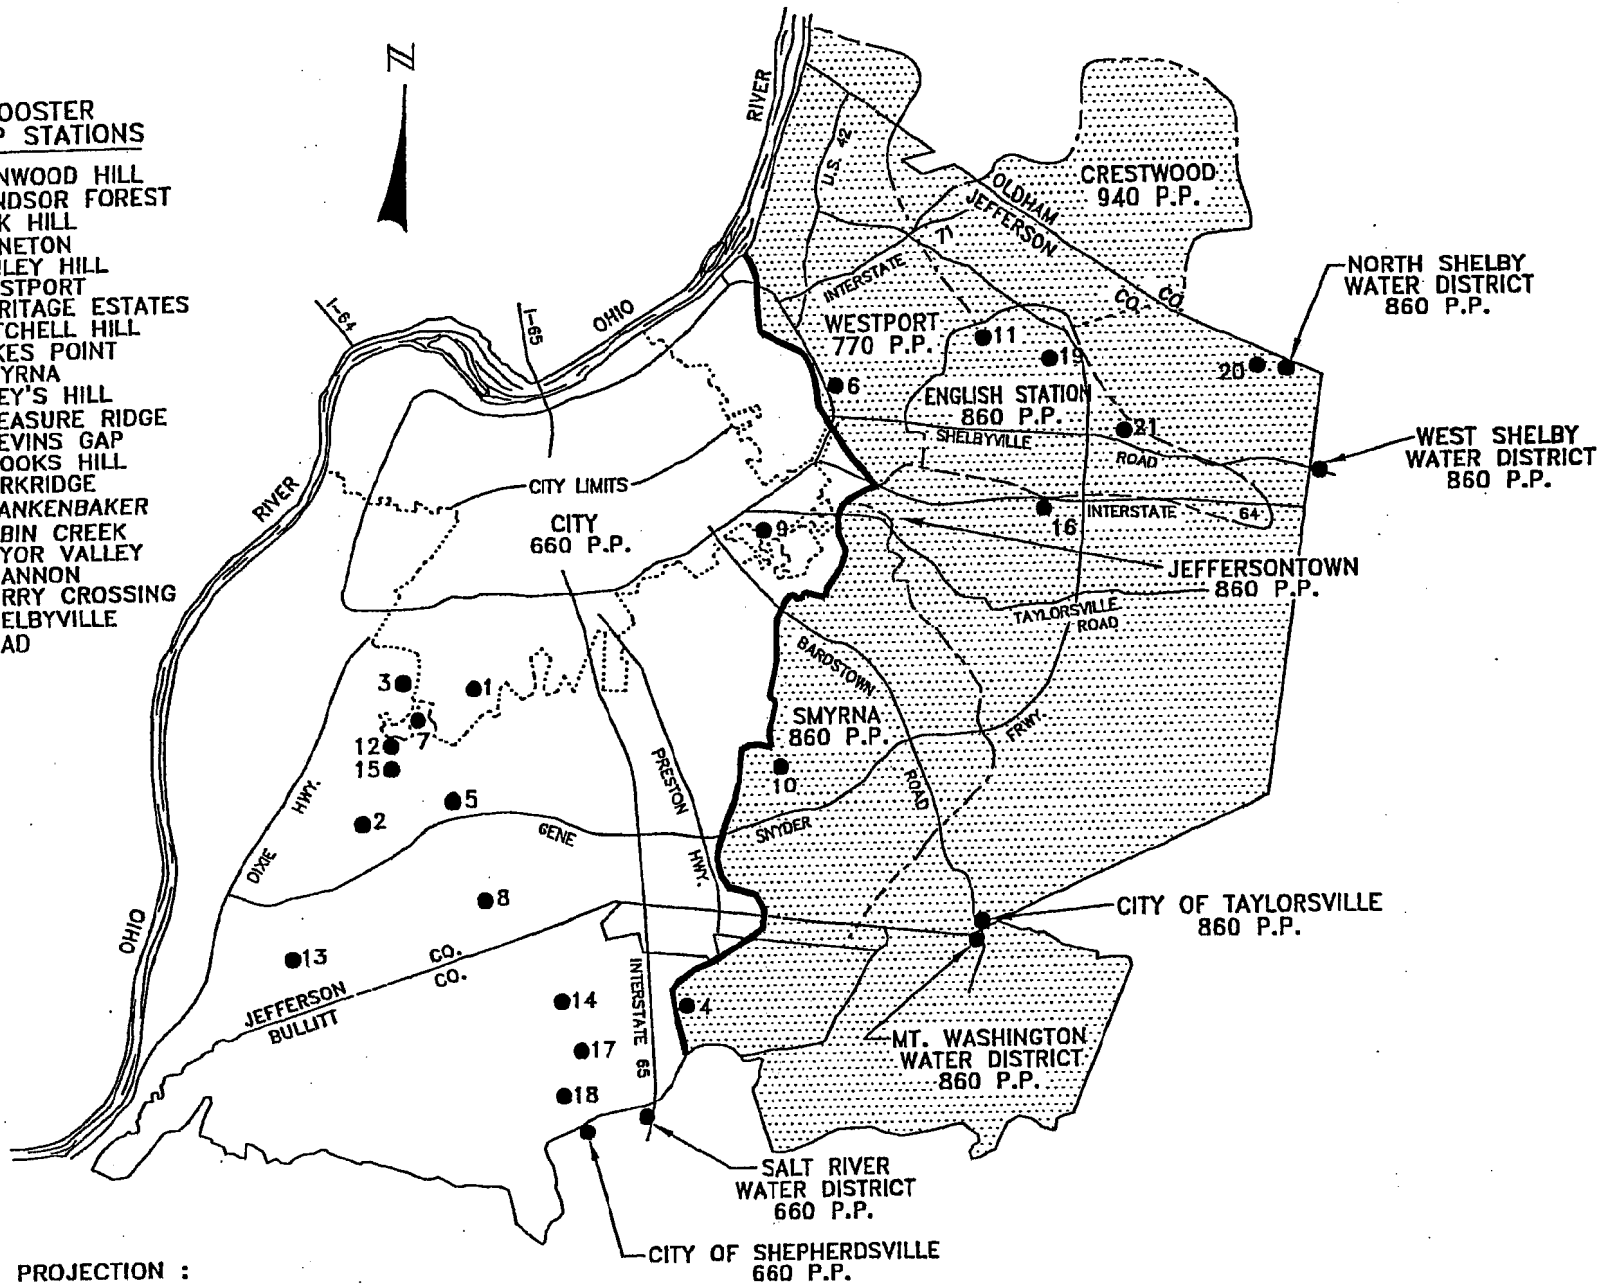

Indianapolis, Lexington, and Missouri American are investor owned water utilities.

FILE NAME: ELEVSERV

**RESOLUTION TO DECLARE FOURTH QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 12, 2002 to adjust the 2001 annual dividend by \$477,094 from \$12,599,250 to \$13,076,344, the difference to be added in equal quarterly installments to the quarterly 2002 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the Louisville Water Company estimated annual net income for 2002 is \$27,240,441 and the projected annual dividend computed in the manner specified in the 1992 Bond Resolution is \$12,021,776 and considering dividends declared earlier this year, it would be in order at this time to declare a regular fourth quarter dividend of \$2,865,491.

RESOLVED, the regular fourth quarter 2002 dividend of \$2,865,491 is hereby declared, and further,

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$2,984,766 to the Louisville and Jefferson County Revenue Commission on December 30, 2002, this being the fourth quarterly dividend for 2002 plus one quarter of the dividend adjustment for 2001, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Ms. Barbara Crow
Mr. Anthony Gregory
Mr. Steve Tucker

Mr. Huber called the meeting to order at 12:40 p.m. He stated that Mr. Conner called with his apologies. He was in a meeting at his office and could not attend. Mr. Huber also announced that Mr. Segell is ill and will not attend.

Mr. Huber stated:

As you are aware, we did not have a quorum at the December 20, 2002 meeting. Based upon my recommendation, the Board members who were present, Mr. Bond, Mr. Conner and Mr. Gault, voted on all items presented anticipating that their actions would be ratified by the Board of Water Works at the January, 2003 meeting.

In addition, based upon my recommendation and immediately upon adjournment of the December 2002 meeting, staff circulated a Statement of Unanimous Consent to obtain the written agreement of all BOWW members to ratify action taken at the December meeting on three critical items whose implementation prior to the January 2003 Board meeting was required. The three items whose immediate implementation was addressed by the Statement of Unanimous Consent were:

- 1) Declaration and payment of the Fourth Quarter 2002 Dividend
- 2) Adoption and implementation of the 2003 Water Rate Schedule
- 3) Adoption and implementation of the 2003 Installation, Temporary Meter and Fire Flow Test Fees.

After proper motion and second, the Board of Water Works voted to ratify all action taken at the December 20, 2002 meeting not addressed by the Statement of Unanimous Consent.

Prior to taking the vote on this matter, Mr. Huber asked Mr. Heitzman to review staff's December 20, 2002 recommendation regarding award of the B.E. Payne Plant bid. Mr. Heitzman provided an explanation by referencing information contained in the December 20, 2002 minutes (see page 17 of the January 14, 2002 Board Book). Mr. Bond encouraged staff to review the evaluated bid program to insure it is consistent with the law. Mr. Huber responded that staff would do so.

CONSENT AGENDA APPROVED

- *Minutes of previous meetings*
- *Claims paid during the previous month*
- *Petitions and applications for water main extensions*
- *Authorization for design and bid of projects under \$200,000*
- *Bid tabulations for contracts under \$500,000*
- *Listing for award of contracts less than \$100,000*

ITEM A: MINUTES OF REGULAR MEETING HELD DECEMBER 20, 2002
REQUEST: APPROVE MINUTES

ITEM B: CLAIMS PAID DURING DECEMBER 2002
REQUEST: FILE CLAIMS FOR FUTURE AUDIT.

ITEM C: PETITIONS AND APPLICATIONS FOR WATER MAIN EXTENSIONS AND RELOCATIONS
(WHEN IN FULL COMPLIANCE / SR&R)

DEVELOPER INSTALLED REFUNDING MAIN EXTENSION PROJECTS

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
02-039	G048M	Panera Bread & Cheddars Restaurants	\$40,870.00	6,050.00
02-081	G044M	Tanyard Springs Section 8	\$27,550.00	
02-103	G041M	Village of Wildwood Phase I	\$121,740.00	22,800.00
02-109	G053M	Apple Patch Phase I	\$17,000.00	

DEVELOPER FINANCED RELOCATION PROJECTS

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
02-105	G049M	Glenmary Commercial	\$32,680.00	

SURCHARGE/LWC TAPPING FEE MAIN EXTENSION PROJECTS

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
02-209	G050C/ G052T	Glenbrook Avenue	\$15,988.00	\$11,020.00

BULLITT COUNTY EXTENSION PROJECTS

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
02-348		Chester Lane	\$140,000.00	

ITEM D: AUTHORIZATION FOR DESIGN AND BID OF PROJECTS (ESTIMATED TO COST LESS THAN \$200,000)

ITEM E: BID TABULATIONS (AWARD OF CONTRACTS LESS THAN \$500,000 HAVING AT LEAST 3 BIDDERS AND NOT MORE THAN 5% OVER BUDGET IF THERE ARE NO BID INFORMALITIES AND THE LOWEST PRICE RECEIVED IS FROM A QUALIFIED BIDDER AND THAT THE SECOND BIDDER IS WITHIN 10% OF THE LOW BID).

ITEM F: AWARD OF CONTRACTS LESS THAN \$100,000.00

	<u>CAPITAL PROGRAM</u>	Total Project Cost	Net Cost To LWC
02-516	Intramural Place - Main Replacement Program Southern Pipeline Construction Co.	\$79,000	
L-02 Contingency Contract	Bells Lane Joint Leak Repair - Phase I Southern Pipeline Construction Co. (CWBE)	\$25,700	

PROCUREMENT OF MATERIALS AND SERVICES

20-J01-B	General Office Cleaning and Housekeeping Adams Cleaning, Inc. (CMBE)	\$70,003	

<u>PROCUREMENT OF PROFESSIONAL SERVICES</u>		Total Project Cost	Net Cost To LWC
Professional Service	Hydraulic Modeling and Area Flow Test QK4	\$24,000	
<u>PROCUREMENT OF SOLE SOURCE MATERIALS AND SERVICES</u>			
Sole Source	E-CIS Enhancements for AMR Implementations Orcom	\$79,532	

REPORT OF OFFICERS

Administrative Report

Mr. Huber informed the Board that the Shepherdsville closing occurred in late December. He also reported that water sales are down. Mr. Huber again assured the Board that staff will review the evaluated bid process. He also said that we will come forward at a later date with a review of our bid irregularity document. Finally, Mr. Huber thanked the Board for executing the Statement of Unanimous Consent in December.

Financial Report

Mr. Miller presented the financial report for December 2002 and year end.

Complete financial reports for December 2002 are not available at this time. Accounts have been held open in order that all revenues and expenses through December may be reflected completely on the year-end financial statements, including entries related to the acquisition of the Goshen and Shepherdsville water systems. Revenues and expenses have been estimated based on the dividend estimate prepared in December.

Projected total operating revenue of \$98,266,415 is \$1,838,915 or 1.9% more than budgeted and \$5,497,215 or 5.9% more than 2001.

Projected operating deductions of \$66,649,803 are \$269,803 or 0.4% more than budgeted and \$3,835,403 or 6.1% more than 2001.

Projected total non-operating income of \$2,940,041 is \$1,059,959 or 26.5% less than budgeted. Projected interest expense and other non-operating expense of \$7,316,212 is \$619,512 or 9.3% more than budgeted.

Projected total net income of \$27,240,441 is \$110,359 or 0.4% less than budgeted and \$1,284,859 or 4.5% less than 2001.

Complete financial reports for 2002 will be available shortly and presented at the January 2003 Audit Committee meeting and the February 2003 Board of Water Works meeting. Auditors from Crowe Chizek will be here on February 3, 2003.

Operations Report for December 2002

Mr. Heitzman presented the Operations Report for 2002.

Production - The water production in December of 116.8 MGD was 4.6% higher than the December 2001 production of 111.6 MGD, and was slightly (0.9%) higher than the 5-year average December production of 115.7 MGD. For the year of 2002, production was 2.4% more than 2001 and 2.1% more than the 5-year average, respectively. The weather patterns for the year were unusual. Although there were drought conditions from July to September, 2002 rainfall was 8.58 inches above normal.

Water Quality – In December, there were 319 regular distribution samples collected, one of which was tested to be total coliform positive. All recheck samples were total coliform negative, and no violations occurred.

For the year, the distribution water quality goals were achieved at 99.5%, 99.7%, and 99.4% for turbidity, chlorine residual and total coliform, respectively. In addition, the Partnership for Safe Water goal of 0.10 NTU turbidity goal for finished water was also achieved at both BEP Water Treatment Plant and Crescent Hill Filtration Plant.

Distribution System – Due to the unseasonably cold weather in November and early December, finished water temperatures were on a sharp decline as reported at the December Board meeting. Fortunately, much milder weather has prevailed in recent weeks and finished water temperatures rose to 45 degrees in mid-December. Staff will continue to monitor weather conditions in an effort to predict the volume of distribution system problems.

Westport Road 24-inch Joint Leak - Leaks on a 24-inch cast iron water main on Westport Road, east of the Watterson Expressway on December 23rd required closure of the road for five days. The repair was significant, requiring the replacement of two 24-inch tees and ancillary work. Staff is compiling the cost of this repair at this time.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report for December 2002.

Performance Measures – The December 2002 abandonment rate was 3.2%. The total abandonment rate for 2002 was 6.3%. This is a reduction from last year's abandonment of 7.1%.

Bad debt for the month of December was \$49,218, about \$20,000 over budget. Bad debt for 2002 was \$508,211 or \$61,185 over the 2001 year end total. Bankruptcies accounted for \$106,703 of the 2002 total. Expected losses associated with Lake in the Woods and South Hill Apartments are not included in these numbers.

City of Shepherdsville – On December 23, LWC closed on the acquisition of the City of Shepherdsville Water system, which serves 1,700 customers in Bullitt County. As part of the agreement, LWC committed to \$1.6 million of water system improvements to upgrade the system to LWC standards for water service and fire protection. The improvements, along with the cost of the assumed debts and liabilities, will be funded by the rate differential. Six Shepherdsville Water system employees have been integrated into the Company's workforce.

Water and Fire Service as Taxes – In accordance with KRS 96.270 LWC provides free water to its owner for use by police, fire, parks, public buildings, etc. If the property is owned by our owner and being used by public employees for public purposes the account is set up as a free water account.

In preparation for the new merged government, staff reviewed Jefferson County Government's and Metro Parks' accounts. In December we rendered final billing and have set these up as free water accounts. There are a total of 125 accounts (68 are for Metro Parks) that were previously paid by the County and will now be included as free water. Based on actual 2002 usage this equates to \$353,209.

Ms. Teasley distributed year end 2002 CSI resells. In the 4th quarter the score dipped from 846 to 825. This comes as a result of a taste and odor issue in the 3rd quarter. The year CSI score is 829. This is level one goal achievement. We achieved level one goal of 777 for serviced accounts.

LITIGATION REPORT

After proper motion and second the Board of Water Works voted to adjourn to closed session for the purpose of discussing litigation and personnel items. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

SPECIAL COMMUNICATIONS

Mr. Heitzman presented a Special Communication's report.

Project 02-625 and 03-625

Renovation of Coagulation Units #6 and #7 at Crescent Hill Filter Plant

Bids were received Wednesday, November 27, 2002 for renovation of Coagulation Unit Processes #6 and # 7 at Crescent Hill Filter Plant. The coagulation process is essential to plant operations for removal of sediment and other contaminants from the river water. Several process units of the South Coagulation complex have failed over the past several years. Currently unit #6 is under emergency repair of clarifying equipment, and unit # 5 recently experienced a failed bull gear, placing the unit out of service.

During evaluation of the bids a number of issues have been identified and each are outlined as follows:

1. VESCO Engineering has raised an issue regarding intellectual property rights of the design used by LWC for this project. VESCO did submit a bid of \$\$1,364,263 and would be disqualified for exceeding their prequalification dollar limit and not providing required bid bonds.
2. Coupe Construction submitted a bid price of \$971,947 and a completion time of 340 days. However they did not include one of the unit prices as requested in the bid documents. Coupe submitted a letter to LWC on December 9, 2002 advising their concern over completion time submittals by other bidders; bid document language

regarding MBE utilization percentage and goals; and their desire to receive the contract award.

3. Judy Construction submitted a bid price of \$980,000 and a completion time of 217 days. However, they interpreted the completion time to begin at the time the site is available for construction, rather than the contract signing date. The Company intended for completion time to begin with the award of the contract.
4. Building Crafts submitted a bid price of \$1,011,661 and a completion time of 180 days. They acknowledge they also interpreted the completion days beginning at the time of site availability; however they have advised in writing they will honor their original completion commitment beginning at the time the contract is awarded.

Upon thorough review of the alternatives, staff recommends that none of the bids be accepted, the project scope modified and re-bid at a later date.

An additional failure in Coagulation Unit #5 in December 2002 has shifted the priority of work from Coagulation Unit # 7 to Unit # 5. With failure of Coagulation Unit #5 while Unit #6 is not in service, the Crescent Hill Plant capacity is reduced to 170 MGD (70%). Therefore it is further recommended to identify the scope of work and proceed with rebuilding of Coagulation Unit #5 in parallel with Unit #6 now under construction. Both a "design-build" approach and a "design-bid-build" approach will be evaluated to expedite the repair of failed Unit #5. Upon completion of Coagulation Units #5 and #6 by year end, the remaining Unit #7 can be advertised for bid for completion of work in 2004.

This matter is presented to the Board for its information. That is, no Board of Water Works action is requested at this time.

BID TABULATIONS

Ms. Teasley presented the following Bid Tabulations:

Project No.: 02-525

3rd Street-Central Business District – Main Replacement Project

Bids were received and opened Wednesday, December 4, 2002 to install 3,445 linear feet of 8 and 12-inch ductile iron water main using traditional trenching techniques along 3rd Street, Muhammad Ali Boulevard, Guthrie Street and Gray Street, in the Central Business District of Louisville.

A total of 5 bids were received and opened from pre-qualified contractors. Tom Brown Construction submitted the lowest responsive bid in the amount of \$524,200 resulting in a total project cost of \$678,550.

The bid is approximately 50% over the Project Manager's Estimate. The resulting total unit cost for this project is \$ 196.97/LF.

This project will be coordinated with the ongoing road widening work on 2nd Street between Broadway and Jefferson and the proposed pavement reconstruction on Muhammad Ali Boulevard between 3rd and 5th Streets.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers and Business Development, to award a contract in the amount of \$524,200 to Tom Brown Construction to install the water facilities associated with this project.

Project No.: 02-530 – Lead Service Renewals – Cedar, Chestnut, Muhammad Ali, Oak
Bids were received and opened Wednesday, December 18, 2002 to renew a total of 326 lead services along Cedar Street, Chestnut Street, Muhammad Ali Boulevard, and Oak Street in Louisville.

A total of 5 bids were received and opened from pre-qualified contractors. Tom Brown Construction submitted the lowest responsive bid in the amount of \$297,840 resulting in a total project cost of \$356,500.

The bid is 5% under the Project Manager's Estimate.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$297,840 to Tom Brown Construction Company to renew the lead services associated with this project.

Mr. Heitzman presented the following Bid Tabulation:

Project No.: 01-323 – Install Martin Hill and Sugar Tree Booster Pump Stations

Bids were received Wednesday, December 18, 2002 for installation of two booster pump stations in northern Bullitt County. These stations will pump to the Martin Hill and Sugar Tree Storage Tanks respectively to provide improved system pressure and fire flow, plus provide capacity for system growth and expansion.

Five responsive bids were received ranging \$423,000 - \$519,330. The source of funding for this project is the Bullitt County Water Reserve.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award a contract in the amount of \$423,000 to MAC Construction and Excavating, Inc. for Installation of Martin Hill and Sugar Hill Booster Pump Stations.

COMMUNICATIONS

Ms. Teasley and Ms. Tucker provided an update on:

Contract E-572: Clean and Cement Mortar Line Cast Iron Water Main In-Place

The following progress has been made pursuant to agreements with Southern Pipeline Construction Company dated April 4, 2002 and September 19, 2002:

- A total of 30,000 feet of water main was identified for potential re-lining because of inadequate lining thickness. During the past year, 8,000 feet were re-lined. The remaining footage will be re-lined in early 2003.
- The agreements required the installation of 19 monitoring and sampling stations at locations that exhibited minimal lining thickness that was less than specified. After video inspection at the sample locations, three additional areas were identified for re-lining.

- Implementation and adherence to the Quality Control Plan has resulted in better communication between LWC and the contractors, enhanced the understanding of the roles and responsibilities of each party, and assurance that every section of the 2002 cleaning and lining works as well as re-lined pipe has been inspected as meeting contract specifications by LWC and the contractor.
- As agreed, Southern Pipeline supplied LWC with a five-year warranty on the performance of the lining on the water mains in the locations where monitoring stations were installed.

While all settlement terms are not complete, Southern Pipeline continues to work in a professional manner toward resolution of the problems associated with the cleaning and lining operations during 2000 and 2001.

OLD BUSINESS

Ms. Teasley presented the following:

Issuance of Apportionment Warrants per K.R.S. 96.265

Deer Run PL: 4590 Deer Run Place to 4630 Deer Run Place

A public hearing was held November 15, 2001 for the extension of water service along Deer Run Pl: 4590 Deer Run Place to 4630 Deer Run Place. The Board of Water Works adopted a resolution for Deer Run Pl: 4590 Deer Run Place to 4630 Deer Run Place on May 14, 2002 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 19, Series 2002 on June 25, 2002 for the Deer Run Pl: 4590 Deer Run Place to 4630 Deer Run Place project. The construction contract was awarded to Southern Pipeline Construction, Inc. in July 2002.

With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 4 benefited properties along Deer Run Pl: 4590 Deer Run Place to 4630 Deer Run Place in accordance with KRS. 96.265, as described.

APPORTIONMENT WARRANT RESOLUTION

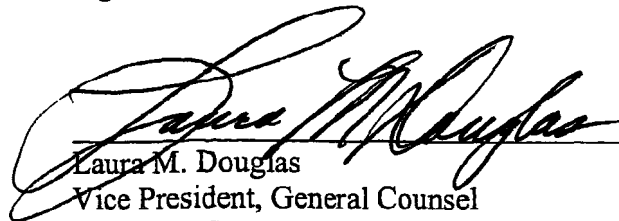

January 14, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Deer Run Pl: 4590 Deer Run Place to 4630 Deer Run Place** main extension project authorized by Ordinance No. 19, Series 2002 of the Jefferson Fiscal Court, adopted on June 25, 2002 such warrants to be against four (4) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$9,202 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution for the Issuance of Apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Deer Run Pl: 4590 Deer Run Place to 4630 Deer Run Place** main extension project authorized by Ordinance No. 19, Series 2002 of the Jefferson Fiscal Court and is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on January 14, 2003, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

Ms. Teasley presented the following:

**Issuance of Apportionment Warrants per KRS 96.265
Johnson Farm Rd: Johnson Road to Johnson Road**

A public hearing was held December 9, 1999 for the extension of water service along Johnson Farm Rd: Johnson Road to Johnson Road. The Board of Water Works adopted a resolution for Johnson Farm Rd: Johnson Road to Johnson Road on January 9, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 3, Series 2001 on March 13, 2001 for the Johnson Farm Rd: Johnson Road to Johnson Road project.

With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 10 benefited properties along Johnson Farm Rd: Johnson Road to Johnson Road in accordance with KRS. 96.265, as described.

APPORTIONMENT WARRANT RESOLUTION

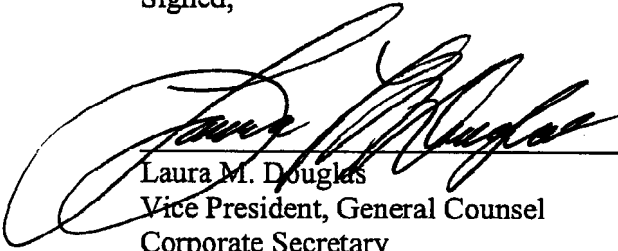

January 14, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Johnson Farm Rd: Johnson Road to Johnson Road** main extension project authorized by Ordinance No. 3, Series 2001 of the Jefferson Fiscal Court, adopted on March 13, 2001 such warrants to be against ten (10) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,489.62 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution for the Issuance of Apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Johnson Farm Rd: Johnson Road to Johnson Road** main extension project authorized by Ordinance No. 3, Series 2001 of the Jefferson Fiscal Court of the Jefferson Fiscal Court and is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on January 14, 2003, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

Ms. Teasley presented the Bullitt County Water Improvement Program – Bullitt County Extension Program – KT #2 Community Development Block Grant (CDBG) Project

Proposed under the Bullitt County Extension Program is the extension of water mains to existing unserved residents of Bullitt County. The Community Development Block Grant (CDBG) program is a Federal grant program that is administered by the State to assist communities in constructing infrastructure improvements affecting low to moderate income areas. In November of 2001 staff requested authorization to prepare an application for \$1 million in CDBG funding, which was granted. In December 2001, we received conditional commitment letters from the Kentucky Infrastructure Authority (KIA) for a total of \$206,500 in grant funding for two of the routes in this project. In November 2002, the Governor's Office announced that Bullitt County would receive \$994,000 in CDBG funding for this project. The Grant Agreement requires that construction be completed by December 2004.

The source funding for this project would be a combination of CDBG, KIA grants, customer contribution and Bullitt County Water Reserve funding. In order to be consistent with the CDBG application, we propose to use the BCWR to provide a tapping fee loan of \$2,636 at 8% simple interest to the benefiting residents along the project routes so that the monthly debt service equals \$22.05 per month for 20 years, which is equivalent to that proposed in the CDBG application. The remaining funding of an estimated \$1,600,331 would be paid from the BCWR. The BCWR will fund any deficit in the benefiting resident's debt service payments until restitution can be recovered.

After proper motion and second, the Board of Water Works authorized staff to:

- 1) proceed with this project with the funding sources listed above;
- 2) to allow the Treasurer to commit to the Bullitt County Fiscal Court that a 20-year tapping fee loan of \$2,636 at 8% simple interest is available to the benefiting residents along the project routes for a monthly debt service of \$22.05 per month;
- 3) to allow the Treasurer to commit to the Bullitt County Fiscal Court that the Company (through the Bullitt County Water Reserve) will bear 100% of costs incurred above the current estimated project cost; and to authorize the staff
- 4) to design, advertise and solicit construction bids for this project, KT#2 CDBG Water Main Extensions, Project #02-346.

**Mr. Heitzman presented Project 00-451:
Facilities Security System Project Change Action**

The August 2002 Board awarded a contract for installation of an access control system at Louisville Water Company production and distribution facilities to United Electric Company in the amount of \$334,525. During installation, the Corporate Security Team requested enhancements to expand system control, monitoring, and operation.

This security system is an expansion of the Simplex Access System installed in the Corporate Headquarters building in 1998. Installation at operating facilities enables the organization to set standard control, accountability, and security protocols at these locations. During execution of the contract, the Security Team requested expanding the contract scope to include the following:

- Parallel video monitoring and camera control to the security guard house at Crescent Hill Water Treatment Plant and the plant operator control center

- Additional interior access point at Allmond Avenue Distribution Center for visitor management
- Use of existing corporate Local Area Network for system communication in lieu of leased phone lines, thereby reducing annual operating costs

The cost for the additional labor and materials is \$37,623, resulting in a revised contract value of \$372,148, an increase of 11 percent.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to increase the value of contract F958 with United Electric Company from \$334,525 to \$372,148, and to establish a project budget of \$465,587.

NEW BUSINESS

Mr. Miller presented the following on **Employee/Dependent Life Insurance**.

Among the benefits provided to LWC employees and made available to their dependents is life / AD&D insurance. Life insurance is provided for employees at no cost with policy limits of \$20,000 for union employees and two times annual salary for exempt and non-exempt employees up to a maximum of \$200,000. Employees may purchase additional amounts of coverage for themselves as well as coverage for dependents.

Our life insurance broker, Cornell Starks & Associates, has done an aggressive search of the market to obtain the coverages at the best possible price. Based upon nine bids submitted to our broker, the lowest cost bid which meets our specifications is from Monumental Aegon, our current underwriter, at an estimated annual net premium of \$153,000 based upon current employee population and compensation forecasts. That amount is 14% under budget.

After proper motion and second, the Board of Water Works authorized staff to renew coverage with Monumental Aegon for the 2003 – 2004 plan year at an estimated net cost to LWC of \$153,000.

Mr. Huber announced that he wanted to take this item out of order because Ms. Welsh must leave the meeting early, based on her travel schedule.

Mr. Miller and Mr. Gregory presented the project to **Expand the Financial Information System project to include Oracle Time and Labor Modules and necessary Solbourne Implementation Services**.

Business process analysis performed during the evaluation of our financial systems indicate that the timekeeping and labor distribution processing better fit under the scope of the Financial Information System due to the current LWC organizational structure, systems alignment, and ownership of the existing processes, business rules, tasks, information flow, and computer systems. Mr. Miller called the Board's attention to the 25 page power point presentation contained in the January 14, 2003 Board Book.

Staff is therefore recommending that the scope of the Financial Information System replacement project be increased to include the necessary Oracle software modules and consulting services to implement the Timekeeping and Labor system. This will replace our current legacy system for timekeeping, labor processing, and attendance. The Oracle Time and Labor system will provide a key interface with our existing Ceridian Human Resource Information System and will provide

the flexibility to move forward with planned upgrade or replacement of this system. The increased scope for the additional Oracle software and Solbourne implementation services will be covered under the existing capital project budget for the Financials which is currently \$3,850,000. The additional Solbourne services will require a change action to the existing contract.

After proper motion and second, the Board of Water Works authorized staff to award the Oracle Time and Labor software and support in an amount of \$52,003 to Oracle Corporation as sole source procurement and the approval of the Implementation Contract Change Action to increase the implementation services provided by Solbourne in an amount of \$449,760. The following table outlines the areas of change.

Area of Change	Current Amount	Change Requested	New Amount	Percent Change
A. LWC Labor Costs (Capital and O/M)	\$1,304,458	\$50,000	\$1,354,458	3.8%
B. Oracle Software Modules (Capital)	\$430,507	\$42,625	\$473,132	9.9%
C. Maintenance and Support (O/M)	\$532,194	\$46,890	\$579,084	7.1%
D. Solbourne Implementation Services (Capital and O/M)	\$1,770,350	\$449,760	\$2,220,110	25.4%
E. Miscellaneous Project Costs (Capital)	\$250,000	\$0	\$250,000	0%
D. Additional IT Hardware/Software (Capital)	\$115,000	\$0	\$115,000	0%
Total Project Change Summary	\$4,393,509	\$589,275	\$4,982,784	13.4%

Mr. Heitzman presented Highway 329 Phase 2: Applepatch Development to Fox Hollow 12" Main Project No.: 02-671

A project is proposed to install 1,270 +/- feet of 16" water main and 3,280 feet of 12" main in Highway 329 between and Applepatch development the Fox Hollow. The project will improve flow availability in the Goshen and North Oldham County area and provide a more hydraulically efficient route to the proposed Apple Patch Tank currently under construction.

A 16" main is extended to Old Zaring Road to accommodate potential future growth east and west along Old Zaring Road and to provide a hydraulically strong feed from the south to the recently acquired Goshen Water System. The increase in size from 12" to 16" for the first portion of the project is a change in scope.

The project budget is currently \$500,000. The Engineering Consultant, Tetra Tech estimates the total project cost to be \$536,520, the Project Manager believes the work can be accomplished within the budget.

After proper motion and second, the Board of Water Works authorized staff to finalize engineering design and advertise this project for bid.

Mr. Heitzman presented Project 20-J01-B, General Office Cleaning & Housekeeping Services at Louisville Water Company

On December 1, 2000, the Louisville Water Company entered into contract with National Janitorial & Building Services Corporation and Adams Cleaning, Inc. for janitorial services. The

initial contract period for both companies began December 1, 2000, with provision to renew the contracts up to two additional years at stated contract values.

National Janitorial provides janitorial services at Allmond Avenue Distribution, B.E. Payne Plant, Middletown Distribution Center, Crescent Hill Water Treatment Plant, Zorn Pumping Station, and Kentucky Turnpike District Office. Adams Cleaning Service provides janitorial services at the Corporate Headquarters only.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to renew two contracts for janitorial services at the Louisville Water Company. One contract would be renewed with National Janitorial & Building Services Corporation for not-to-exceed amount of \$149,682. The second contract would be renewed with Adams Cleaning, Inc. (CMBE) for the not-to-exceed amount of \$70,003.

Ms. Teasley presented the Stonestreet Road – Phase II - Section II Water Facilities Relocation Project : LWC Project No. 02-754

Water facility relocations are necessary to accommodate Jefferson County Public Work's "Stonestreet Road – Phase II - Section II" project in Jefferson County. JCPW intends to widen Stonestreet Road from I-265 to Whitehall Court, near Valley Station Road. As a result, LWC is relocating approximately 1,600 l.f. of 12" DIWM and 415 l.f. of 6" WM along Stonestreet Road and Gaywood Drive. LWC shall be responsible for \$60,000 or 19% of the water facility relocation and installation costs for betterment. The new Metro Government will be responsible for \$265,000 or 81% of the relocation costs.

After proper motion and second, the Board of Water Works authorized staff to design the distribution water facility relocations and to enter into an agreement with Louisville Jefferson County Metro Government for the construction of the distribution water facility relocations as described above.

Ms. Teasley presented the I-65 Transmission Main System Extension Project.

Bids were received Wednesday, December 11, 2002 for the installation of approximately 11,500 feet of 16-inch ductile iron main. The project is necessary to complete the planned Transmission Main System set forth in the Merger Agreement with Kentucky Turnpike Water District.

The former Kentucky Turnpike Water District initiated this project with their pursuit of Congressional Grant funding through the U.S. Congressional Office of Representative Ron Lewis, 2nd U.S. Congressional District, of Kentucky. Grant funding was authorized through a Congressional Budget Line Item for up to \$380,000 in matching funds for this river crossing with a maximum of 45% of the total project cost with the balance of funding being from local sources. LWC funding is from the I-65 Transmission Main System Reserve.

Ten responsive bids were received ranging \$800,000.00 - \$959,000.00 compared to the engineer's estimate of \$731,500. The low bid proposal was submitted by Kelsey Construction, Inc. in the amount of \$800,000.00.

After proper motion and second, the Board of Water Works authorized the Vice President of Serving Customers & Business Development to award a contract in the amount of \$800,000.00 to Kelsey Construction Inc., pending approval to award the contract by the USEPA.

**Ms. Teasley presented the Renewal of 2000 Clean and Cement Mortar Line Contract
Approval of 2003 Clean and Cement Mortar Line Program**

In January 2000, the Louisville Water Company entered into a contract with Southern Pipeline Construction Company for cleaning and cement mortar lining of cast iron water mains in the LWC distribution system. The contract provides for annual extensions of the agreement, with the unit prices adjusted in accordance with the Bureau of Labor Statistics Consumer Price Index - All Urban Areas (CPI-U).

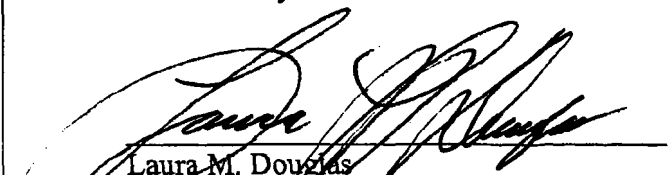

On January 9, 2001, the Board of Water Works (BOWW) approved an initial renewal of the Clean and Line contract for 2001, with a 3.4% increase in unit prices. A second renewal was approved by the BOWW in March 12, 2002. A third renewal is currently requested that will increase unit prices by 2.4% over the 2002 level. The proposed increase matches the increase in the CPI-U over the same period. The attached table provides a summary of the proposed unit prices for the 2003 Clean and Line Program.

An adjustment to the clean and lining unit prices in 2003 is needed to compensate the Contractor for additional work items that were not included in the original scope of work. The Contractor has been directed to install 2-inch meters with back-flow prevention at each tie-in location for the temporary by-pass system and to connect the by-pass system directly to customer's services, thus allowing for better accountability of water used during the cleaning and lining operations. The proposed adjustment will add approximately \$164,000 to the contract amount.

After proper motion and second, the Board of Water Works authorized the renewal of the Clean and Line contract with Southern Pipeline Construction Company for the 2003 Annual Clean and Line project scope, at an estimated contract cost of \$5,032,419 for one year. Additionally, the Board of Water Works authorized staff to pursue a three year warranty on all work performed pursuant to this renewal.

The meeting adjourned at 2:45 p.m.

**BOARD OF WATER WORKS
MARCH 11, 2003 MINUTES**

Board Members Present

Mr. Jack Segell
Mr. Stephen Gault
Mr. Owen Hammons
Ms. Wendy Welsh

Board Members Absent

Hon. Jerry Abramson
Mr. Stewart Conner
Mr. Phillip Bond

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Steve Greseth, Black and Veatch
Barbara Crow
Nora Freeman
Steve Hubbs
Kay Ball
Vince Guentner

Mr. Huber called the meeting to order at 12:35 p.m. Mr. Huber reminded the board that the agenda is large because the Board did not have a February 2003 meeting.

CONSENT AGENDA APPROVED

- Minutes of previous meetings
- Claims paid during the previous month
- Petitions and applications for water main extensions
- Authorization for design and bid of projects under \$200,000
- Bid tabulations for contracts under \$500,000
- Listing for award of contracts less than \$100,000

Item A: MINUTES OF REGULAR MEETING HELD JANUARY 14, 2003
MINUTES APPROVED

Item B: CLAIMS PAID DURING JANUARY 2003
 CLAIMS PAID DURING FEBRUARY 2003
 REQUEST: FILE CLAIMS FOR FUTURE AUDIT.

Item C: PETITIONS AND APPLICATIONS FOR WATER MAIN EXTENSIONS AND RELOCATIONS
 (WHEN IN FULL COMPLIANCE / SR&R)

REPORT OF OFFICERS

ADMINISTRATIVE REPORT:

Mr. Huber reviewed actions taken regarding the agenda for the February 11, 2003 Board meeting.

Since we did not have a quorum, the February 11, 2003 Board meeting was cancelled. There were several items on the February 2003 agenda which required timely action. Mr. Huber authorized award of two contracts and approved a large change action to a contract. The Board was asked to ratify these items today. These items are:

1. Contract 00-84: Flowable Backfill
2. Contract 02-62: Copper Tubing
3. Change Action Order to Contract F958 – Emergency Failure of Coagulation Unite #5 at Crescent Hill Filter Plant

Mr. Huber announced that he is pleased to have Mr. Segell back after his illness. He also announced that he is pleased that Ms. Douglas has taken on an additional role as Chair of the Citizens Commission on Police Accountability.

FINANCIAL REPORT:

Mr. Miller mentioned that Louisville Water Company is required to do an EPA Vulnerability Assessment.

A security report must be provided to the United States Environmental Protection Agency (EPA) on or before March 31, 2003. By September 30, 2003, we must also certify to EPA

that our Emergency Response Plan has been modified to provide for vulnerabilities identified in the assessment.

A chartered team of six persons from critical Louisville Water Company operating areas is conducting the assessment using a methodology developed by Sandia National Laboratories and prescribed by EPA.

Louisville Water Company management uses a Cost of Risk measurement to assess performance on cost control in this key area. This is included in the President and Vice Presidents shared goals and is measured against the annual budget for the year. The components of the Cost of Risk measurement are:

- Administrative Costs
- Excess Liability Insurance
- Property Insurance
- Crime Insurance
- Workers Compensations Stop Loss Premium, Third Party Administrator
- Auto Liability Total Incurred
- General Liability Total Incurred
- Workers Compensation Medical / Indemnity
- Outside Legal Expenses

The Cost of Risk for 2002 was \$1,950,281 compared to a budget of \$1,603,796, resulting in a variance of \$364,485 or 21.6% over budget. The score has dropped from a Level IV at the end of the third quarter to a Level I at year-end 2002. Key drivers for this increased cost since the previous reported amounts were:

- Increased Workers Compensation Previous Year Reserves
- Increased General Liability Current Year Reserves

Continued focus on the Cost of Risk will be included in the 2003 President and Vice Presidents shared goals.

Mr. Miller presented the Income and Expense Summary for February 2003:

Total operating revenue of \$15,535,400 is \$757,600 or 5.13% more than budgeted and \$895,800 or 6.12% more than the same period in 2002. We sold 3.61% more water in 2003 than the same period in 2002. Water delivered to the mains was 8.29% more than 2002.

Operation and maintenance expense of \$6,950,300 is \$261,800 or 3.92% more than budgeted and \$706,000 or 11.31% more than 2002.

Total non-operating income of \$374,600 is \$210,000 or 35.93% less than budgeted. Total non-operating expense of \$1,108,000 is \$12,700 or 1.16% more than budgeted.

Net income of \$3,722,500 is \$82,900 or 2.28% more than budgeted and \$100,600 or 2.86% less than 2002.

OPERATIONS REPORT:

Mr. Heitzman presented the Operations report for January 2003:

Fluoride Feed System in BEP Plant - On December 20, 2002, the inspectors from the State Health Department inspected the BEP plant fluoride feed system and cited the concern of over-feeding fluoride to the finished water supply. On January 21, 2003, staff met with the inspectors and discussed the details of the inspection and their recommendation to install an intermediate fluoride "day tank" by July 21, 2003. The "day tank" will minimize the risk of chemical overfeed. LWC engineers are currently working on the design and we expect the installation to be completed by June 30, 2003.

Crescent Hill Reservoir Security - Staff met with Mayor Abramson and Deputy Mayor Johnstone on January 21 to discuss the plans to improve site security at the Crescent Hill Reservoir. The plan includes perimeter fencing around the entire treatment works north of Frankfort Avenue that will provide the ability to close Frankfort Avenue during emergency situations. Reservoir Avenue will be opened to the public for normal operations. In addition, a second fence is planned for the perimeter of the Reservoir that will control access during daylight hours.

Crescent Hill Reservoir Rehabilitation Status - The South basin of the reservoir was placed in service this past December, however upon filling the reservoir, water was discovered in the monitoring wells and beneath the liner. The reservoir has been drained for inspection. Initial findings, indicate potential leakage in the by-pass access vault that would allow by-pass water to seep through the concrete structure under the liner.

Mr. Heitzman presented the Operations report for February 2003:

Production - The water production in February of 124.2 MGD was 9.8 percent higher than the February 2002 production of 113.1 MGD, and was 7.7 percent higher than the 5-year average production of 115.3 MGD.

Water Quality - Staff collected 321 regular distribution samples in February. All samples exceeded our internal turbidity, chlorine, and bacteria goals that are more stringent than regulatory requirements. Due to sampling error, one sample collected in February showed low chlorine residual of 0.5 mg/L. Follow up samples indicated adequate chlorine residuals were maintained in the system. As a result, there was no water quality monitoring and reporting violation in February.

Mr. Heitzman provided an update on Winter Operations:

Extremely cold temperatures and general inclement weather in late January triggered a dramatic increase in main break and other emergency activity in the distribution system. Treated water from the plant fell below thirty-eight degrees on January 19th and continued to fall. This change resulted in high break activity over the week-end of January 24th - 26th ultimately requiring the company to mobilize all available distribution system employees for emergency repair activities.

After considering the weather and other key indicators, the company declared a "Level II Winter Emergency" on January 28th in an effort to provide more efficient and timely response to emergency activities. "Level II" reorganized employees in Managing Distribution Operations

Business System into a two-shift, twenty-four hour per day operation in an effort to level the availability of resources and to minimize employee fatigue.

The declared emergency remained in effect through February 2nd and overall experience year-to-date has been one of increased work activity when compared to recent years.

Karla Teasley presented the Serving Customers and Business Development Report:

Performance Measures – The February 2003 abandonment rate was 4.5%, compared to 3.7% in January 2003, and 9.6% in February 2002.

Bad debt for the month of February was \$43,552. This is \$8,135 over budget and includes \$10,484 in commercial bad debt.

Winter Operations – For the month, the Company estimated 6,881 meters, compared to 1,464 in February 2002. In order to keep the estimated readings to a minimum the group worked 73 hours on an extended day basis and 184 hours on weekends, for a total of 257 overtime hours. Additionally it should be noted that February was the first “reading” month for the Shepherdsville accounts. The Shepherdsville acquisition resulted in approximately 1,721 new accounts being added to the read cycle.

The inclement weather did provide an opportunity to evaluate the performance of the Bullitt County AMR pilot program. Data indicates that the radio read program was not adversely impacted by the snow and ice conditions. Of the 2,900 accounts in KT, 2,875 were read without any problems. A total of 25 could not be read as a result of vaults (and read antennas) being totally submerged under water. The 2,875 accounts were read in a one day period.

Salt River Crossing I-65 Transmission System Project in Bullitt County – This project was initiated by the former Kentucky Turnpike Water District with their pursuit of Congressional Grant funding through the U.S. Congressional Office of Representative Ron Lewis, 2nd U.S. Congressional District, of Kentucky. Grant funding was authorized through a Congressional Budget Line Item for up to \$380,000 in matching funds for this river crossing with a maximum of 45% of the total project cost, and the balance of funding coming from local sources.

The Kentucky Division of Water has declined to approve the bidding process because a second advertisement to bidders was not run in a local newspaper of wide circulation. Though the error was on the part of the local newspaper, and the newspaper has formally apologized in writing, the Kentucky Division of Water will not grant a variance or exception to this advertising requirement. Staff is re-bidding this project at this time.

LITIGATION REPORT

Given the press of business, Ms. Douglas announced that she would give an open session litigation report, focusing on the Lake in the Woods and South Hill Apartment litigation, which is a matter of public record and litigation costs. She reported that year-to-date litigation costs are \$9,337.00 or 55.2% under budget.

REPORT OF COMMITTEES

AUDIT COMMITTEE:

Ms. Welsh presented the Audit Committee report for January 28, 2003 and March 10, 2003.
Ms. Welsh presented the Audit Committee Charter to the full Board. This Charter was adopted by the committee at its March 10, 2003 meeting (copy attached for the record).

Ms. Welsh reported on the annual inventory performed in October 2002. The amount of inventory variance increased by 12.19% or \$516,000.00 at the October inventory. This is being followed. After proper motion and second, the Board of Water Works voted to adopt the Audit Charter.

COMPENSATION COMMITTEE:

The Board of Water Works upon proper motion, second and vote, went into closed session to consider certain personnel matters. The Board returned to open session after taking no action.

Ms. Welsh moved for approval of payment of a Corporate Performance Award based upon achievement of 70.83% of the related 2002 goals. Ms. Welsh also moved for approval of payment of an Executive Incentive Award to the President and Vice Presidents based upon achievement of 8.17% of 10% of the related 2002 goals and to the Business System Owners based upon achievement of 6.075% out of 7.5% of the related 2002 goals. Upon second and vote, the motion carried.

SPECIAL ISSUES

Ms. Ball presented the Louisville Water Company Comments Draft Environmental Impact Statement for the Ohio River Bridges Project:

The Louisville Water Company has been communicating with the Federal Highway Administration (FHA) and Community Transportation Solutions, Inc (CTS) to insure our concerns regarding the impact of constructing an Eastern Jefferson County bridge may have on the Bank Filtration Program have been addressed. It has been our position that the concerns of LWC can be adequately addressed in the design and construction of the bridge. Any construction within the aquifer must be compatible with protecting the community's water supply and the wellhead protection area.

Louisville Water Company will evaluate the Final Environmental Impact Statement (FEIS), due to be released in April 2003. At that time, an additional 60 day review period will be granted to federal agencies as well as the general public.

Ms. Ball also advised the Board that in the next few weeks, Louisville Water Company will be approaching seventeen (17) property owners on Transylvania Beach in order to purchase the property or acquire easements. More will be shared with the Board as this develops.

DECLARATION TO CITY OF LOUISVILLE:

The annual audit has been completed. Net income of \$27,832,748 requires a total 2002 dividend to the City of \$12,379,623. This will result in an additional amount of \$357,847 to be added to the regular quarterly 2003 dividend payments.

After proper motion and second, the Board of Water Works adopted a resolution adjusting the 2002 dividend and declaring the first quarterly 2003 dividend in the amount of \$3,079,708 is attached for your consideration. This resolution provides for a total first quarterly dividend payment of \$3,169,170.

BID TABULATIONS

Mr. Huber presented Bid 00-84 / Flowable Backfill:

Louisville Water Company utilizes flowable backfill for compaction material. LWC must have timely, efficient deliveries as well as product performance.

After proper motion and second, the Board of Water Works ratified the award of the the remainder of the contact to the second low bidder, Pearce Brothers. Pearce Brothers has submitted a letter agreeing to take over the contract for the remainder of the contract term at their original bid pricing in the amount of \$240,425.

Mr. Miller presented Bid 02-67 / Detector Check Valves:

On January 8, 2003, bids were opened to award a one-year contract, renewable for up to two additional one-year terms at the sole discretion of the company. All renewals would utilize the Producer's Price Index as a cost adjuster.

Detector Check Valves are installed in fire services eliminating water backflow and assisting LWC in assuring water quality.

Three bids were received.

After proper motion and second the Board of Water Works voted to award a one-year contract, renewable for up to two additional one-year terms, to Hersey Meter Company for an estimated one-year amount of \$134,598. This bid represents a 16% increase in unit prices from the previous bid in 1999.

Mr. Huber presented Bid 02-62 / Copper Tubing:

On January 22, 2003, bids were opened to award a contract for a six-month supply of copper tubing. Copper tubing is used throughout the distribution system in the installation, renewal and repair of domestic service lines.

After proper motion and second, the Board of Water Works voted to ratify staff's purchase of a six-month supply of copper tubing totaling \$165,232 from Hughes Supply Co. This bid represents a 8% decrease in unit prices from the previous bid.

Mr. Heitzman presented Project No. 02-671

Highway 329 16" and 12" Water Main Replacement - Apple Patch to Fox Hollow:

Bids were received Wednesday, February 5, 2003, to Furnish and Install approximately 1,250 feet of 16-inch water main and 3,300 feet of 12" water main in Highway 329 between Apple Patch Development and the Fox Hollow 12" water main.

A total of 9 bids were received from qualified contracting firms.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award a contract in the amount of \$417,000.00 to Southern Pipeline Construction Company to install water facilities associated with this project.

Mr. Heitzman presented Project No.: 03-LW01-B

Lawn Maintenance of Louisville Water Company Grounds:

Bids were received and opened Wednesday, February 19, 2003 for lawn maintenance of Louisville Water Company grounds for the following six sites:

- Site 1 B.E. Payne Water Treatment Plant
- Site 2 Crescent Hill Filter Plant
- Site 3 Zorn Pumping Station
- Site 4 Fourteen (14) Pressure Systems north of Bardstown Rd.
- Site 5 Twenty one (21) Pressure Systems south of Bardstown Rd.
- Site 6 Eight (8) Pressure System in Bullitt County

A total of 11 bids were received and opened from pre-qualified contractors.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award three contracts in the amounts of \$40,250.00 to the Creationist Co for Site #1; \$52,500.00 to Quality Lawns for Site # 2; and \$71,455 to Ward Brothers for Sites #3, #4, #5 and #6, for lawn maintenance of Louisville Water Company grounds.

Ms. Teasley presented Project No.: 03-500 – 2nd Street Area Main Replacement Project:

Bids were received and opened Wednesday, February 26, 2003 to install 4,560 linear feet of 8-inch ductile iron water main using traditional trenching techniques, and to supply and install 200 linear feet of 4-inch HDPE pipe using directional drilling techniques in the 2nd Street Area. The project scope includes 2nd Street, Brook Street, Floyd Street, and Ardella Court.

A total of 5 bids were received and opened from pre-qualified contractors.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$ 296,500 to MAC Construction and Excavating to install the water facilities associated with this project.

COMMUNICATIONS

Ms. Crow presented a description of Smile Kentucky!

One of the goals of Louisville Water Company's Pure Tap program is to create strategic partnerships within the service area to promote the health and safety of our water.

We've been working with area dentists for the past several years to promote Children's Dental Health Month. This year we successfully launched something new. Smile Kentucky! is a campaign to educate children and parents about the importance of oral health and provide dental services to underserved children.

The program highlights a national effort by the American Dental Association (ADA), and Louisville was selected as one of 40 sites across the nation to receive free treatment supplies. The ADA calls Smile Kentucky! one of the largest in the country in terms of scope and community involvement.

- In January, children from 22 schools in Jefferson and Bullitt Counties were screened by volunteer dentists and hygienists (3rd – 5th grade).
- Nearly 300 children received follow-up care February 21st at University of Louisville (UofL) School of Dentistry. Metro Mayor Jerry Abramson paid a visit.

The program received both local and national media attention: a one-hour special on WHAS-TV, local TV news and newspaper coverage, as well as articles by both the American Dental Association and the American Water Works Association.

The program is well on its way to a successful second season. The Kentucky Department of Public Health recently awarded Smile Kentucky! a \$40,000 grant to purchase equipment and expand services to more school children.

Vince Guenther presented a 2003 General Assembly Overview:

HB 337: State Government Review of Public Contracts (Rep. Steve Nunn, R-Glasgow) Places certain "quasi" governmental entities including Louisville Water Company under the Model Procurement Code. Would also require LWC to have professional service contracts and memorandums of agreement approved by the State Government Contract Review Committee.

Status: The bill was amended in the House State Government Committee to delete the provision related to LWC. It is currently pending action on the Senate Floor.

SB 150: KY River Authority and Expanded KY River Basin (Sen. Ed Worley, D-Richmond) Expands the KY River Basin to include a number of surrounding area development districts including KIPDA. Requires Water Management Planning Council to submit plans that are consistent with KRA administrative regulations, long-range water resource plans and drought response plans. The bill also would subject water transferred into the KY River Basin to the water use fees that the KRA assesses and collects from utilities in the basin.

Status: The bill has not had a hearing in committee so it does not have enough time to pass.

SB 127: KY Infrastructure Authority Revolving Loan Funds (Sen. Thayer, R-Georgetown) Allows the KIA to use the Waste Water Revolving Loan funds to secure the issuance of bonds. (This is significant because there is more money available from the Clean Water Act than there is from the Drinking Water Act.)

Status: The bill has passed out of the Senate and is pending a House Floor Vote.

OLD BUSINESS

Ms. Teasley presented the Water Extension Project Pursuant to K.R.S. 96.265 – Homestead Trace - Eastwood & Fisherville Road to East 3,600 ft. as an advisory item:

The Board of Water Works approved staff's request to proceed with a public hearing for Homestead Trace: Eastwood & Fisherville Rd to East 3,600 ft at its December 2002 meeting. In accordance with KRS 96.265 a public hearing was held on January 14, 2003 for the property owners along Homestead Trace to consider the extension of a water main along this private roadway.

Property owners had an opportunity to ask questions about the Apportionment Warrant program and decide if they wanted to proceed with the project. The scope of the project as presented at the January 14, 2003 meeting extended a 8-inch and 6-inch water main approximately 3,600 feet. As presented, using the equal assessment method, five (5) eligible property owners on this private roadway were presented with the "equal share" cost per property of \$27,200. The attending property owners did not agree to proceed with the project at the cost presented.

Staff determined that this matter is one which should not be referred to Louisville/Jefferson Metro Council due to lack of property owner support; the proposed main extension does not meet the criteria set forth by the Board to proceed to the ordinance stage.

Ms. Teasley presented the Oldham County Water Improvement Program – Oldham County Extension Program LWC Project No. 01-309, Highway 1694 Water Main Extension Change Action to Contract No. F-946; C Squared, Inc.

This contract was originally presented to the BOWW on September 12, 2002, and approved for the provision of construction services in the amount of \$189,250. The Contractor was required to furnish and install 5,400' of 8" PVC pipe.

Change Action No. 1 was a change in scope which required the Contractor to furnish and install an additional 540 feet of 8" PVC water main to the end of the project.

Change Action No. 2 required the Contractor to furnish and install an additional 300 feet of 8" PVC water main and install one additional fire hydrant.

The change actions are summarized as follows:

Original Contract - Previously Approved Contract F-946	\$ 189,250.00
Additional Work	
Change Action No. 1 Furnish and Install additional 540 feet PVC pipe	\$ 16,200.00
Change Action No. 2 Furnish and Install additional 300 feet PVC pipe; install one fire hydrant	<u>\$ 10,000.00</u>
Revised Total Contract Cost	<u>\$215,480.00</u>
Change Action No. 1 and 2 – Percent Increase from Original Contract	13.8%

After proper motion and second, the Board of Water Works voted to include Change Action Nos. 1 and 2 for a revised total contract amount of \$215,480 and increase the total project budget from \$208,780 to \$234,980.

Mr. Heitzman presented Acceptance of Water Extension Project for Rockycreek Lane (Private Roadway) Referral to Louisville/Jefferson County Metro Council Pursuant to KRS 96.265

An Apportionment Warrant public hearing was held for Rockycreek Lane on October 29, 2002, in response to receipt of a majority petition for this private road. The project proposed an extension of 1,790 feet at an estimated cost of \$106,750, yielding an estimated cost of \$15,250 per property, with 7 property participants.

The majority of property owners in attendance did not desire to proceed with the project as proposed due to the high cost of the extension. Property owners who were not a part of the original petitioned scope (Back Run Rd to North 1,790 ft) also attended the October 29, 2002 meeting and requested that LWC consider extending the project scope to the end of Rockycreek Lane and determine if a more favorable price could be obtained with additional participants. Staff agreed to conduct additional research, pursue cost saving opportunities, bid the project, and report the findings to the property owners of Rockycreek Lane.

A follow up public meeting was held on January 23, 2003 to present the new information. Alternative routes were discussed with the majority of property owners agreeing that the best alternative is to extend water along Rockycreek Lane from Back Run Road north 2,920 feet. Property owners agreed to proceed with the project if the cost per property was within a range of \$11,500 to \$14,000 based upon 9 to 11 property participants.

Staff met with Chief Mike Schmidt of the Fern Creek Fire Department on January 31, 2003 to review the proposed hydrant spacing.

After proper motion and second, the Board of Water Works voted to approve this project and adopt a resolution forwarding this project to the Metro Council for adoption of an Ordinance. LWC will upsize the proposed water main from the required 6-inch pipe to an 8-inch pipe due to the potential for future development. The upsize costs will be financed by LWC as detailed in the attached Project Summary. This project meets guidelines and recommendations outlined in the Task Force Report and Implementation Plan for Jefferson County Water Extension Program. Staff recommends the proposed extension of water service as feasible and beneficial in accordance with KRS 96.265 and recommends the Board of Water Works refer this project to the Louisville Metro Council for its consideration. Upon approval by Metro Council and adoption of the Ordinance, the Company will proceed with construction on this project.

Additionally, Louisville Water Company has received an additional letter from a property owner who did not participate in the public meetings, but now wants to be a part of the project. The Chief Engineer recommends going forward with the project as designed and offering an opportunity for this property owner to hook up at a later date.

Rockycreek Lane – Private Road Water Main Extension

Project Summary

2/5/2003

Petitioned Scope: Rockycreek Ln: Back Run Rd to North 1,790 ft

- Public Hearing – October 29, 2002 – Louisville Free Public Library, Fern Creek Branch
- 1,790 lineal feet of 6 and 4-inch water main
- \$106,750 estimated cost
- 7 eligible properties
- 4 affirmative petitioners
- 57% of eligible properties
- \$15,250 “equal share” per property cost

Revised Scope: Rockycreek Ln: Back Run Rd to North 2,920 ft

- Follow-up Meeting – January 23, 2003 – Louisville Free Public Library, Fern Creek Branch
- 2,920 lineal feet of 6-inch water main (to be upsized to 8-inch by LWC)
- \$139,400 estimated cost
- 10 eligible properties
- \$13,940 estimated cost per property.
- \$14,000 “not-to-exceed” equal share property cost

Estimated Cost to Upsize Main 6” to 8”

- Contract Labor \$840
- Materials \$6873
- Engineering \$6896
- Total Upsize Cost \$14,609

Ms. Teasley discussed Issuance of Apportionment Warrants per KRS 96.265

Broad Run Road: Existing Water Main to Stout Road

A public hearing was held September 13, 2001 for the extension of water service along Broad Run Road: Existing Water Main to Stout Road. The Board of Water Works adopted a resolution for Broad Run Road: Existing Water Main to Stout Road on October 9, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 30, Series 2001 on November 13, 2001 for the Broad Run Road: Existing Water Main to Stout Road project.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of an Apportionment Warrants and liens against 20 benefited properties along the remaining portion of Broad Run Road: Existing Water Main to Stout Road in accordance with KRS. 96.265, as described.

Mr. Heitzman reported on Project 00-479B: In-ground Vehicle Lift Replacement at Allmond Avenue Garage; Project Change Action

The July 2002 Board awarded a contract for replacement of the in-ground vehicle lifts at Allmond Garage to H.F. McClure, Inc. in the amount of \$102,000. Several construction issues required changes to the work.

The following items, primarily unknown subsurface conditions not shown on facility construction plans, resulted in additions to the scope of work and revisions to the work schedule:

- During excavation of the garage floor, electrical conduits were encountered, requiring relocation, plus excess sub-floor concrete was found, requiring removal to provide enlarged pit space for the new lift equipment.
- The soil surrounding the pits and cylinders has been classified as "special waste" which requires regulated handling and disposal procedures. Disturbance of this soil releases a foul septic odor which permeates throughout the entire facility. Ventilation has been added to eliminate the odor.
- The stationary cylinders for each existing lift were found to be encased in concrete rings. Core holes must be drilled into each ring in order to accommodate safety locking legs on the new equipment.
- Some work elements have been restricted to evening hours due to excessive noise and daily-work interference.

After proper motion and second, the Board of Water Works voted to authorize staff to increase the value of contract F865 with H.F. McClure, Inc. from \$102,000 to \$132,250.

Mr. Heitzman presented Emergency Failure of Coagulation Unit #5 at Crescent Hill Filter Plant Ratification of Contract Change Order

The rotating mechanical equipment in Coagulation Unit # 5 has failed as reported to the Board at the January 14 meeting.

After proper motion and second, the Board of Water Works voted to ratify the President's Change Order to Contract # F958 with Vesco Engineering in the amount of \$401,872 to replace the failed clarified mechanism, remove concrete floor grout, and install access ladder. This change order increases the total contract amount to \$1,046,791. Funding for this scope of work is included in Project 02-625 and 03-625.

NEW BUSINESS

Mr. Miller reported on Purchase of Application Servers, Storage and Oracle Database Processor Licenses

The 2001 – 2003 Information Technology Strategic Plan identifies several key Information Supply Systems that will be replaced through business process re-engineering and design methodologies. Several of the systems re-engineering and replacement projects are underway. They include the Financial Information System, Mobile Dispatch, and Automated Mapping/Facilities Management projects. Future projects include the Human Resources Information System and Risk Management System. There are several Technical and Data

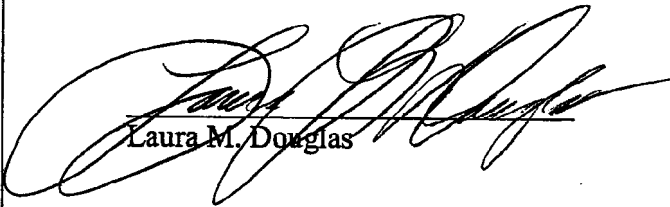

Architecture projects outlined in the IT plan and current Capital Improvement Plan to support these projects. These projects include:

1. Project 03-652: File and Application Server Replacement/Upgrade
2. Project 02-665: Oracle RDBMS

After proper motion and second, the Board of Water Works authorized staff to proceed with final design and request for proposals of these two projects.

The meeting adjourned at 2:37 p.m.

Respectfully Submitted:

Laura M. Douglas

LOUISVILLE WATER COMPANY
AUDIT COMMITTEE CHARTER
MARCH 10, 2003

Committee Role

The committee's role is to act on behalf of the Board of Water Works and oversee all material aspects of the company's reporting, control, and audit functions, except those specifically related to the responsibilities of another standing committee of the board. The audit committee's role includes a particular focus on the qualitative aspects of financial reporting and on company processes for the management of business/financial risk and for compliance with significant applicable legal, ethical, and regulatory requirements as they relate to such business and financial risks.

The role also includes coordination with other board committees and maintenance of strong, positive working relationships with management, external and internal auditors, counsel, and other committee advisors.

Committee Membership

The committee shall consist of at least three independent board members. Committee members shall have (1) a working knowledge of the water industry; (2) a firm understanding of LWC financial statements, including the balance sheet, income statement, statement of cash flow, and key performance indicators; and (3) a sound grasp of key business and financial risks and related controls and control processes. The committee shall have access to its own counsel and other advisors at the committee's sole discretion.

One member, preferably the chairperson, should be literate in business and financial reporting and control, including knowledge of the accounting regulatory requirements, and should have past employment experience in finance or accounting or other comparable experience or background. Committee membership should be considerate of corporate values for diversity. Committee appointments and the committee chairperson shall be approved annually by the full board upon recommendation of the President at the Annual Meeting.

Committee Operating Principles

The committee shall fulfill its responsibilities within the context of the following overriding principles:

- **Communications** – The chairperson and others on the committee shall, to the extent appropriate, have contact throughout the year with senior management, other board members, and other key committee advisors, external and internal auditors, etc., as applicable, to strengthen the committee's knowledge of relevant current and prospective business issues.
- **Committee Education/Orientation** – The committee, with management, shall develop and participate in a process for review of important financial and operating topics that present potential significant risk to the company. Additionally, individual committee members are encouraged to participate in relevant and appropriate self-study education to assure understanding of the business environment in which the company operates.
- **Annual Plan** – The committee, with input from management and other key committee advisors, shall develop an annual plan responsive to the "primary committee responsibilities" detailed herein. The annual plan shall be reviewed and approved by the full board.

- **Meeting Agenda** – Committee meeting agendas shall be the responsibility of the committee chairperson, with input from committee members, management, internal audit, and other committee advisors as appropriate.
- **Committee Expectations and Information Needs** – The committee shall communicate committee expectations and the nature, timing, and extent of committee information needs to management, internal audit, and external parties, including external auditors. Written materials, including audit reports, financial reports, and other appropriate management documentation, shall be received from management, auditors, and others at least one week in advance of meeting dates.
- **External Resources** – The committee shall be authorized to access internal and external resources, as the committee requires, to carry out its responsibilities.
- **Committee Meeting Attendees** – The committee shall request members of management, counsel, internal audit, and external auditors, as applicable, to participate in committee meetings, as necessary, to carry out the committee's responsibilities. Periodically and at least annually, the committee shall meet in private session with only the committee members. It shall be understood that either internal or external auditors, or counsel, may, at any time, request a meeting with the audit committee or committee chairperson with or without management attendance. In any case, the committee shall consider meeting without management attendance separately with internal and external auditors, at least annually.
- **Reporting to the Board of Water Works** – The committee, through the committee chairperson, shall report periodically, as deemed necessary, but at least semi-annually, to the full board. In addition, summarized minutes from committee meetings, separately identifying monitoring activities from approvals, shall be available to each board member prior to the subsequent Board of Water Works meeting.
- **Committee Self Assessment** – The committee shall review, discuss, and assess its own performance as well as the committee role and responsibilities, seeking input from senior management, the full board, and others. Changes in role and/or responsibilities, if any, shall be recommended to the full board for approval.

Meeting Frequency

The committee shall meet at least quarterly. Additional meetings shall be scheduled as considered necessary by the committee or chairperson.

Committee's Relationship with External and Internal Auditors

- The external auditors, in their capacity as independent public accountants, shall report to the board of directors and the audit committee as representatives of the shareholder.
- The committee shall be responsible for pre-approving all audit and non-audit services, including the scope of such work performed by the external auditors.
- As the external auditors review financial reports, they will be reporting to the audit committee. They shall report all relevant issues, including any new information, to the committee responsive to agreed-upon committee expectations. They shall immediately notify the committee of any material weakness in internal controls or potential fraud identified during an audit engagement. In

executing its oversight role, the board or committee should review the methods, audit techniques, and the basis for any findings of external auditors.

- The committee shall annually review the performance (effectiveness, objectivity, and independence) of the external and internal auditors. The external auditors shall conduct their audit engagement under the independence rules of the AICPA. The committee shall ensure receipt of a formal written statement from the external auditors consistent with standards set by the Independence Standards Board. Additionally, the committee shall discuss with the auditor relationships or services that may affect auditor objectivity or independence. If the committee is not satisfied with the auditors' assurances of independence, it shall take or recommend to the full board appropriate action to ensure the independence of the external auditor.
- If the committee decides to retain an audit firm following review, the committee shall, at a minimum, rotate the lead audit partner and audit review partner every five years.
- The committee shall review annually the external auditor's policies and certifications regarding workpaper retention and destruction.
- If either the internal or the external auditors identify significant issues relative to the overall board responsibility that have been communicated to management but, in their judgement, have not been adequately addressed, they should communicate these issues to the committee chairperson.
- Changes in the director of internal audit shall be subject to committee approval.

Primary Committee Responsibilities

The committee should review and assess:

- *Risk Management* – The company's business risk management process, including the adequacy of the company's overall control environment and controls in selected areas representing significant financial and business risk.
- *Annual Reports and Other Major Regulatory Filings* – All major financial reports in advance of filing or distribution.
- *Internal Controls and Regulatory Compliance* – Management's assessment of the system of internal controls for detecting accounting and reporting financial errors, fraud and defalcations, legal violations, and noncompliance with the corporate code of conduct.
- *Internal Audit Responsibilities* – The annual audit plan and the process used to develop the plan. Status of activities, significant findings, recommendations, and management's response.
- *Regulatory Examinations* – The results of examinations by regulatory authorities in terms of important findings, recommendations, and management's response.
- *External Audit Responsibilities* – Auditor independence and the overall scope and focus of the annual/interim audit, including the scope and level of involvement with unaudited interim-period information.

- *Financial Reporting and Controls* – Key financial statement issues and risks, their impact or potential effect on reported financial information, the processes used by management to address such matters, related auditor views, and the basis for audit conclusions. Important conclusions on interim and/or year-end audit work in advance of the public release of financials.
- *Auditor Recommendations* – Important internal and external auditor recommendations on financial reporting, controls, other matters, and management’s response. The views of management and auditors on the overall quality of annual and interim financial reporting.

The committee should review, assess, and approve:

- The code of ethical conduct.
- The internal audit charter.
- Changes in important accounting principles and the application thereof in both interim and annual financial reports.
- Significant conflicts of interest and related-party transactions.
- External auditor performance and changes in external audit firm (subject to ratification by the full board).
- Internal auditor performance and changes in internal audit leadership and/or key financial management.

CERTIFICATION

This is to certify that the following Resolution to Declare the First Quarter Dividend to the City of Louisville is a true copy of the Resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 11, 2003, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
Secretary

**RESOLUTION TO DECLARE FIRST QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, an estimated dividend of \$12,021,776 for 2002 was paid in 2002 based on estimated annual net income, and the annual audit for 2002 has now been completed which establishes the full dividend for 2002 as \$12,379,623 based on actual annual net income of \$27,832,748, it would be in order at this time to amend the Board resolution of December 20, 2002 to increase the 2002 annual dividend by \$357,847, from \$12,021,776 to \$12,379,623 the difference to be added in installments to the quarterly 2003 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2003 Louisville Water Company Budget contemplates the 2003 annual dividend to be \$12,318,831 it would be in order at this time to declare a regular first quarter dividend of \$3,079,708.

RESOLVED, the 2002 annual dividend is increased from \$12,021,776 to \$12,379,623 and the difference of \$357,847 will be added in quarterly installments to the regular 2003 quarterly dividend installments, and

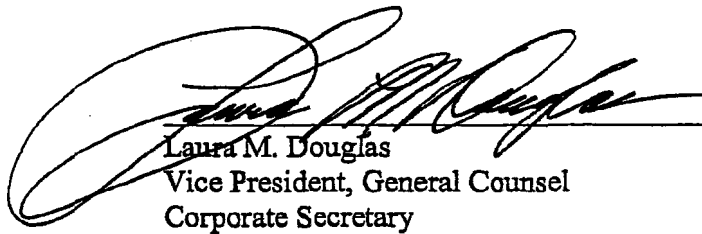

RESOLVED, the regular first quarter 2003 dividend of \$3,079,708 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,169,170 to the Louisville / Jefferson County Revenue Commission on March 31, 2003, this being the first quarterly dividend for 2003 plus one quarter of the dividend adjustment for 2002, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution, dated February 11, 2003, for the extension of water service along Rockycreek Lane: Back Run Road to North approximately 2,920 feet, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 11, 2003, a quorum being present.

Signed,

Laura M. Douglas
Vice President, General Counsel
Corporate Secretary

**Board of Water Works
Resolution**

February 11, 2003

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting Rockycreek Ln: Back Run Rd to North 2930 ft, a private way in Jefferson County, and acting thereon convened a public hearing on October 29, 2002, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water service along Rockycreek Ln: Back Run Rd to North 2,920 ft, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along Rockycreek Ln: Back Run Rd to North approximately 2,920 ft, and, by these presents, does hereby recommend and refer the proposed water service extension to the Louisville/Jefferson County Metro Council, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service

Published in the Sunday, November 24, 2002 edition of

The Courier Journal

ADVERTISEMENT FOR PUBLIC HEARING

Pursuant to KRS 90.765, the Louisville Water Company will hold a public hearing for the property owners along Private Road (Segment 396) Broad Run Road to East 1,750 feet (shown on the map below), to propose the extension of the public water supply system to the property owners along this portion of Private Road (Segment 396) Broad Run Road to East 1,750 feet.

This public hearing will be held on Tuesday, December 3, 2002 at 6:00 p.m. at the Louisville Free Public Library, Fern Creek Branch, 6768 Harlowin Road.

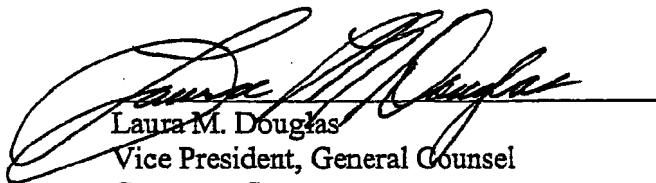

Further information can be obtained by calling the Louisville Water Company Customer Service Department at (502) 569-3600.

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution dated March 11, 2003, for the Issuance of Apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of Broad Run Road: Existing Water Main to Stout Road main extension project, and is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on March 11, 2003, a quorum being present.

Signed,

Laura M. Douglas

APPORTIONMENT WARRANT RESOLUTION

March 11, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of Broad Run Road: Existing Water Main to Stout Road main extension project authorized by Ordinance No. 30, Series 2001 of the Jefferson Fiscal Court, adopted on November 13, 2002 such warrant to be against twenty (20) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**BOARD OF WATER WORKS ANNUAL MEETING
APRIL 8, 2003 MINUTES**

BOARD MEMBERS PRESENT

Mr. Jack Segell
Mr. Stephen Gault
Mr. Owen Hammons
Ms. Wendy Welsh
Mr. Stewart Conner

BOARD MEMBERS ABSENT

Hon. Jerry C. Abramson, Louisville Metro Mayor
Mr. Phillip Bond

OTHERS PRESENT

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehman, Vice President, Human Resources
Mr. Rick Johnstone, Louisville Metro Deputy Mayor
Mr. Rudolph Davidson, Secretary Louisville Metro Public Works & Services
Amber Halloran
Ms. Barbara Crow
Ralph Mccord
Steve Greseth, Black & Veatch
Mr. Howard Abell
Mr. Brian Bunch, Customer

The annual meeting was called to order at 12:35 p.m. The President reminded all it was the annual meeting day. He called the Board's attention to the Annual Report and the Consumer Confidence Report that had been distributed. He then addressed the 2003 Annual Meeting.

The President relinquished the chair to Ms. Douglas, General Counsel.

Ms. Douglas requested nominations for the office of President. A motion was made by Mr. Hammons and Ms. Welsh seconded, to place in nomination the name of Mr. John L.

Huber for the ensuing year. The Board voted to appoint Mr. Huber as President for the coming year. Mr. Huber then resumed the Chair.

A motion was made by Ms. Welsh and Mr. Conner seconded the motion to place in nomination the name of Mr. Phillip D. Bond for the office of Vice President for the ensuing year. The Board voted to appoint Mr. Bond Vice President for the coming year.

The President asked for nominations for the position of Vice President-Chief Engineer. Mr. Gault made a motion and Mr. Segell seconded to nominate Mr. Gregory C. Heitzman to that position for the ensuing year. The Board voted to appoint Mr. Heitzman Vice President Chief Engineer for the coming year.

The President asked for nominations for the office of Vice President-Treasurer. Mr. Conner made a motion and Mr. Segell seconded to nominate Mr. Robert K. Miller for that position for the ensuing year. The Board voted to appoint Mr. Miller Vice President and Treasurer for the coming year.

The President asked for nominations for the office of Corporate Secretary. Ms. Welsh made a motion and Mr. Gault seconded to nominate Ms. Laura M. Douglas for that position for the ensuing year. The Board voted to appoint Ms. Douglas Corporate Secretary for the coming year.

The President asked for nominations for the office of Vice President-General Counsel, whereupon Mr. Segell made a motion and Ms. Welsh seconded to nominate Ms. Laura M. Douglas for the position for the ensuing year. The Board voted to appoint Ms. Douglas Vice President-General Counsel for the coming year.

The President asked for nominations for the office of Vice President—Serving Customers and Business Development, whereupon Mr. Gault made a motion and Ms. Welsh seconded to nominate Ms. Karla O. Teasley for the position for the ensuing year. The Board voted to appoint Ms. Teasley Vice President Serving Customers for the coming year.

The Chair of the Audit Committee will propose an external Audit firm to the full Board on behalf of the Audit Committee at a future meeting.

The President requested nominations for the Audit Committee, consisting of three Board Members. Mr. Conner made a motion and Mr. Gault seconded to nominate Mr. Phillip D. Bond, Chairperson, Mr. Owen C. Hammons, and Ms. Wendy C. Welsh for the ensuing year. The Board so voted.

The President requested nominations for the Compensation Committee, consisting of three Board members. Mr. Gault made a motion and Mr. Segell seconded to nominate Mr. Stewart E. Conner, Chairperson, Mr. Phillip D. Bond, and Ms. Wendy C. Welsh for the ensuing year. The Board so voted.

The President requested nominations for the Public Information and Customer Satisfaction Committee, consisting of three Board members. Ms. Welsh made a motion and Mr. Hammons seconded to nominate Mr. Jack H. Segell, Chairperson, Mr. Stewart E. Conner, and Mr. Stephen C. Gault for the ensuing year. The Board so voted.

There being no further business the Annual Meeting adjourned at 12:50.

**BOARD OF WATER WORKS REGULAR MEETING
APRIL 8, 2003 MINUTES**

BOARD MEMBERS PRESENT

MR. JACK SEGELL
MR. STEPHEN GAULT
MR. OWEN HAMMONS
MS. WENDY WELSH
MR. STEWART CONNER

BOARD MEMBERS ABSENT

HON. JERRY C. ABRAMSON, LOUISVILLE METRO MAYOR
MR. PHILLIP BOND

OTHERS PRESENT

MR. JOHN HUBER, PRESIDENT
MS. LAURA DOUGLAS, VICE PRESIDENT, GENERAL COUNSEL, CORPORATE SECRETARY
MR. GREG HEITZMAN, VICE PRESIDENT, CHIEF ENGINEER
MR. ROBERT MILLER, VICE PRESIDENT, TREASURER
MS. KARLA TEASLEY, VICE PRESIDENT, SERVING CUSTOMERS & BUSINESS DEVELOPMENT
MS. SUSAN LEHMAN, VICE PRESIDENT, HUMAN RESOURCES
MR. RICK JOHNSTONE, LOUISVILLE METRO DEPUTY MAYOR
MR. RUDOLPH DAVIDSON, SECRETARY LOUISVILLE METRO PUBLIC WORKS & SERVICES

REPORT OF OFFICERS

ADMINISTRATIVE REPORT:

Mr. Huber then introduced Susan Lehman, Vice President of Assuring Human Resource and Organizational Effectiveness. Mr. Huber mentioned that the company filed its Vulnerability Assessment and would discuss it with the Board at the May 2003 meeting. Mr. Huber announced that the staff will be recommending adoption of the Louisville Metro Government MBE/WBE Program. Staff will come forward with a complete recommendation at the May 2003 meeting.

Mr. Huber announced that the Lab has a new piece of equipment to assist in the detection of containments.

FINANCIAL REPORT:

Mr. Miller gave the Income and Expense Summary for March 2003:

Total operating revenue of \$23,063,300 is \$902,900 or 4.07% more than budgeted and \$999,200 or 4.53%

more than the same period in 2002.

Operation and maintenance expense of \$10,830,400 is \$723,400 or 7.16% more than budgeted and \$1,310,300 or 13.76% more than 2002.

Net operating income of \$6,229,700 is \$104,600 or 1.71% more than budgeted.

Net income of \$5,102,700 is \$264,900 or 4.94% less than budgeted and \$588,300 or 10.34% less than 2002.

OPERATIONS REPORT:

Mr. Heitzman gave the Operations Report for March 2003:

Production: The water production in March of 121.1 MGD was 8.8 percent higher than the March 2002 production of 111.3 MGD, and was 8.5 percent higher than the 5-year average February production of 114.3 MGD.

Distribution Water Quality: Staff collected 367 regular distribution samples in March. There were no water quality monitoring and reporting violation in March.

Water Sample Testing: To deal with the potential water contamination in the distribution system, we have purchased a Delta Tox toxicity instrument. The portable instrument uses a simple and rapid method for toxicity screening and monitoring of water samples.

Water Treatment Improvement at BEP: Staff in Water Quality and Production made an improvement in treating the water at BEP plant during the month. Due to the physical layout of the treatment plant and chemical feeding locations, the pH value of the finished water at BEP plant has always been lower than Crescent Hill Plant. Typical pH values of the finished water from BEP plant ranged from 7.3 to 7.7, which is a concern for corrosion control in the distribution system. Staff in Water Quality and Production addressed the problem through improving the lime-feeding method. The lime feed application was chosen as the most cost effective alternative, with annual operations cost of approximately \$40,000.

Inspections on Bottle Water Operations: In February, an inspector from the Food Safety Department of Kentucky inspected our bottling operations. The inspectors cited four items for us to correct immediately.

Unregulated Contaminants Monitoring Rule: As required by US EPA, water utilities are required to monitor a list of 11 unregulated contaminants for 4 consecutive quarters during the period of 2001 to 2003. These contaminants include man-made synthetic organic chemicals such as MTBE - a gasoline additive, perchlorate - a rocket propellant, and acetochlor - a corn herbicide. The results of the monitoring period were submitted to EPA on April 8, 2002. Under the revised Tier 3 Public Notification Rule, LWC needs to notify its customers of the UCMR monitoring results within 12 months of the report submitted to EPA. To meet this requirement, the Company has posted results in local newspapers, on the Company's website at www.louky.com, and in the 2002 Consumer Confidence Report being mailed the first week of April, 2003.

Distribution System: Following a challenging winter, Managing Distribution Operations is now conducting business under “normal” operations. Crews whose primary job is to perform capital improvements in the distribution system, such as lead service renewals, large meter renovations, valve/hydrant replacements, are now fully engaged in that work after a long period of emergency operations.

Vulnerability Assessments: As a result of the terrorist attacks on September 11, 2001, Congress established new regulations, administered by EPA, for the development of Vulnerability Assessments for all water utilities with at least 100,000 customers. Staff is now evaluating the results of the assessment, and we have six months to incorporate any needed changes into the Company’s Emergency Response Plan.

SERVING CUSTOMERS REPORT FOR MARCH 2003:

Ms. Teasley provided the Serving Customer’s Report for March 2003:

Performance Measures: The March 2003 abandonment rate was 4.3%, compared to 4.5% in February 2003, and 7.8% in March 2002.

First Quarter 2003 Customer Satisfaction Results: Customer satisfaction substantially increased in the first quarter of 2003 from a year end 2002 Total CSI of 825 to a Total CSI of 853. This marks a new all-time high quarterly score for the Total Customer Satisfaction Index. Customer satisfaction fully recovered from the effects of the taste and odor event last fall which negatively impacted fourth quarter results. The 853 first quarter score exceeds the corporate Level II goal for the Total CSI of 845.

Customer satisfaction for residential serviced accounts is also up for all factors; the service total is at a new record high of 798. This exceeds the previous high of 794 set in the second quarter of 2001. It also exceeds the Level III goal for customer satisfaction for the Corporate Performance Award of 789.

Shepherdsville: Several hundred customers along Highway 44 West in Bullitt County have experienced more than a dozen water outages over the past three months. Communication with these very frustrated customers is almost as important as keeping the main in service.

LWC capital crews are installing a grid tie on Raymond Road to interconnect the LWC and Shepherdsville water systems, providing redundancy and minimizing the number of customers impacted with outages.

Dental Partnership: State Public Health Officials awarded LWC a Certificate of Appreciation during March for providing 50 years of fluoridated tap water. The company recently co-launched a program with the Dental Community reaching thousands of children in Jefferson and Bullitt County with free dental care and dental education. The program recently received \$20,000 in grant money to continue and expand the program next year.

Alternative Refunding Methods for Developer Contracts: Staff in Distribution Extensions has developed some new alternative refunding methods to be considered for future developer refunding contracts. This effort was conducted under an empowerment pilot project which specifically garnered developer customer comments and feedback.

LITIGATION REPORT:

After proper motion and second the Board adjourned into closed session for the purpose of discussing litigation and personnel items. The Board reconvened into open session without taking any action.

BID TABULATIONS

Mr. Huber asked the Board to take one item out of order since Mr. Howard Abell, a bidder was present and interested in the item. The item was Bid No. 03-15 Fleet Vehicles, page 99 of the Board Book. Mr. Miller presented this item.

Bid No.: 03-15 Fleet Vehicles

On March 19, 2003, bids were opened to award a one-year contract for the purchase of fleet vehicles. These vehicles are used to support company operations and perform construction, maintenance and repair of infrastructure in the field.

Mr. Huber asked Mr. Abell to make his comments. Mr. Abell stated that he was interested in the backhoe bid. Mr. Abell briefly described his equipment background and his company. He reported that he was not certain how the information was gathered to determine his company's equipment did not meet the specs. He also challenged whether some of the items that resulted in his disqualification were accurately stated. In his view the only item his backhoe did not meet was bucket rotation. Finally, Mr. Abell cautioned that not awarding the bid to him would result in a 10% increase in the price the Company would ultimately pay. After proper motion and second, the Board voted to approve the staff recommendation regarding award of Bid No.: 03-15 with the exception of backhoe equipment line item 11. Mr. Huber stated that staff would review Mr. Abell's concerns and make a presentation to the Board next month regarding the mini backhoe bid.

A total of thirteen (13) bids were submitted with the lowest, most responsive bids from:

Uebelhor and Sons	\$490,768
Americon	\$248,177
Peterson GMC	\$163,497
Countryside Ford	\$51,404
Freedom Dodge	\$38,742
Byerly Ford	\$19,435
Pearce Motors	<u>\$18,540</u>
TOTAL	\$1,030,563

After proper motion and second, the Board of Water Works authorized staff to award a one-year contract totaling an estimated **\$1,030,563** to the above cited vendors.

The award of mini-backhoe is placed on hold for further discussion and review.

REPORT OF COMMITTEES

Compensation Committee

After proper motion and second the Board approved the Compensation Committee Report. The report will be provided to the Board Secretary.

The Committee voted to authorize a 5% increase for the President and all Vice Presidents with the exception of Steve Hubbs who will receive a 4% increase.

BID TABULATIONS

Mr. Miller presented the following Bid Information:

Bid No.: 03-03 Mail Service

On March 12, 2003, proposals were opened to award a two-year contract for mail services. The mail service contract is for water bill statements and outgoing mail.

A total of three proposals were submitted with the lowest, most responsive proposal from **United Mail Sorting, Inc** for an estimated two-year total of **\$1,241,413**.

After proper motion and second, the Board of Water Works voted to authorize staff to award a two-year contract totaling an estimated **\$1,241,413** to **United Mail Sorting, Inc**.

Bid No.: 03-02 Water Bottles

On March 9, 2003, bids were opened to award a one-year contract for LWC Pure Tap 16 oz. water bottles. These bottles are used to promote the Pure Tap Program and LWC water.

A total of four bids were submitted with the lowest, most responsive bids from:

United Graphics	Bottle A	\$97,000
Presence	Bottle B	\$93,800
Louisville Container	Bottle C	<u>\$62,460</u>
Total for Awards		\$253,260

After proper motion and second, the Board of Water Works voted to authorize staff to award a one-year contract totaling an estimated **\$227,460** to the bidders listed above.

Bid No.: 03-06 Brass Valves and Fittings

On March 12, 2003, bids were opened to award a two-year contract for brass valves and fittings used in service installations, renewals and repairs.

A total of six (6) bids were submitted with the lowest, most responsive bids from:

Water Works Supply	\$272,170
Mueller Co.	\$406,062
A. Y. McDonald	\$68,637
Hughes Supply	\$2,263
Cambridge Brass	<u>\$89,708</u>
TOTAL	\$838,840

After proper motion and second, the Board of Water Works voted to authorize staff to award a two-year contract totaling an estimated **\$838,840** to the bidders listed above.

Mr. Teasley reported on the following Bids:

Bid No.: 02-305 Bullitt County Extension Program – Walls Hollow Road and Walls Hollow Road, North Water Main Extension Project

Bids were received and opened Wednesday, March 26, 2003 to install 5,727 linear feet of 8-inch water line along Walls Hollow Road and Walls Hollow Road, North in Bullitt County. Included with the project is the installation of 7 fire hydrants.

A total of 8 bids were received and opened from pre-qualified contractors. Three T Construction submitted the lowest responsive bid in the amount of \$108,500 resulting in a total project cost of \$164,500.

After proper motion and second, the Board voted to award a contract in the amount of \$108,500 to Three T Construction to install the water facilities associated with this project.

COMMUNICATIONS

Mr. Miller reported on Oracle 11i Financial System Implementation Project Status Review.

The Oracle 11i Financial System implementation Project is successfully underway. The project, which began December 5, 2002, is on time and on budget as it approaches the end of the second of a six-phase implementation strategy.

Overview of Project Phases

- I. Readiness Phase – Completed: February 18, 2003
- II. Process Design Phase – Target Completion: April 11, 2003
- III. Validation Phase – Target Completion: June 27, 2003
- IV. Integration Phase – Target Completion: August 22, 2003
- V. Go Live Phase – Target Completion: September 29, 2003
- VI. Post Go Live – Target Completion: January 2004

Critical Success Factors

Employee involvement and commitment and the Company's change management component of the project are the critical factors that attribute to its success thus far.

From an employee standpoint, the project team's ability to commit their time and energies to the project are a direct result of employees, not directly assigned to the project, maintaining the day-to-day business operations.

Focus group members have made valuable contributions, initially by assisting in the selection of the software and implementation services, and most recently by giving feedback on process design issues.

Significant Process Changes

The business processes associated with the Financial System Implementation Project are being redesigned and reengineering in combination with the software implementation. These changes will result in significant improvements to internal and external customer satisfaction.

One of the changes underway will impact the way LWC works with developers on the cost of new water main installations. Currently, LWC refunds developers one dollar a month for each new customer that connects to a main funded or installed by that developer. The Company is working on a methodology that satisfies the developers, does not add new costs to LWC, and streamlines the administration associated with the process.

This and other changes involving policy matters for Board of Water Works consideration will be presented at upcoming meetings.

Ms. Teasley reported on the Bullitt County Water Improvement Program – Bullitt County Extension Program Kentucky Infrastructure Authority 2020 Fund B Grant Awards

The Louisville Water Company committed to pursue grant opportunities to assist in the funding of the Bullitt County Water Improvement Program as a condition of the Merger Agreement with the former Kentucky Turnpike Water District. To that end, the Louisville Water Company proposed 207 water main extension projects in May 2001 to the Kentucky Infrastructure Authority (KIA).

The recent budget passed by the 2003 General Assembly and signed by the Governor includes Bond Funds in the amount of \$59,000,000 which are authorized for projects within the Water and Sewer Resources Development Fund for Coal Producing Counties. It also includes Bond Funds in the amount of \$54,765,000 are authorized for projects within the Water and Sewer Resources Development Fund for Tobacco Counties. The Water and Sewer Resources Development Fund for Tobacco Counties budget lists water projects in Bullitt County in the amount of \$979,000 dollars in what is essentially matching grant funding. All of the water projects in Bullitt County identify the Louisville Water Company as the recipient of partial funding for three distribution main extension projects, a transmission main extension project and an elevated storage tank project.

The letter is to provide initial information regarding the identification of KIA grant funding. As more information is made available, staff will advise the Board of Water Works.

OLD BUSINESS

Ms. Ball reported on Project 99-402 Riverbank Filtration, Phase II.

On November 12, 2002 the Board of Water Works authorized staff to increase the budget reservation for professional design services to \$2, 310,500 and authorized Jordan Jones & Goulding, Inc. (JJ&G) to proceed with final design.

Staff requested JJ&G to re-assess the pumphouse design from an operational and maintenance perspective.

The new pump station design would be in lieu of the one currently designed for this project. The pumphouse would be built adjacent to the existing low-lift station above the 100 year flood plain. This option will require a complete re-design of the pumphouse, additional subsurface investigations and an additional 2000 feet of tunnel. The new design would result in cost savings from having a much shorter length of transmission main and a much less costly pump station design. Consultant design costs shall increase \$304,000.

In addition, a Phase I environmental site assessment (ESA) of each of the eighteen properties for acquisition has been included. The cost for the Phase I ESA is \$29,000. The changes bring a proposed design services in the amount of \$2,643,500 as summarized below.

Revised Budget Reservation (11/12/2002)	\$2,310,500
Requested Increase	\$ 333,000
Proposed Budget Reservation for Consultant Services	\$2,643,500

After proper motion and second, the Board of Water Works voted to establish a new budget reservation for design services for JJ&G in the amount of \$2,643,500. The project Budget will remain \$32.8 Million as established in the November 2002 BOWW.

Ms. Teasley reported on Issuance of Apportionment Warrants per KRS 96.265

Stout Road: Broad Run Rd to North 7,800 ft

A public hearing was held July 12, 2001 for the extension of water service along Stout Road: Broad Run Rd to North 7,800 ft. The Board of Water Works adopted a resolution for Stout Road: Broad Run Rd to North 7,800 ft on August 14, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 24, Series 2001 on September 25, 2001 (a copy of which is attached) for the Stout Road: Broad Run Rd to North 7,800 ft project. Southern Pipeline Construction Company constructed this water main.

With the completion of the public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of an Apportionment Warrants and liens against 19 benefited properties along Stout Road: Broad Run Rd to North 7,800 ft in accordance with KRS. 96.265, as described.

Ms. Teasley reported on the Issuance of Apportionment Warrants per KRS 96.265

Mint Spring Branch Rd: Chamberlain Ln to Northwest 3,950 ft

A public hearing was held May 20, 1999 for the extension of water service along Mint Spring Branch Rd: Chamberlain Ln to Northwest 3,950 ft. The Board of Water Works adopted a resolution for Mint Spring Branch Rd: Chamberlain Ln to Northwest 3,950 ft on January 9, 2000 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 28, Series 1999 on September 14, 1999 (a copy of which is attached) for the Mint Spring Branch Rd: Chamberlain Ln to Northwest 3,950 ft project. The construction contract was awarded to M & A Construction.

With the completion of this private road water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. The cost of the extension will be by the equal assessment method for the not-to-exceed cost of \$9,443.83 for each lot or tract abutting this extension and currently not served.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 11 benefited properties along Mint Spring Branch Rd: Chamberlain Lane to Northwest 3,950 ft in accordance with KRS. 96.265, as described.

Ms. Teasley reported on the Bullitt County Water Improvement Program – Bullitt County Extension Program KT #2 Community Development Block Grant (CDBG) Project

The Board of Water Works approved various authorizations and commitments for staff to proceed with the design and advertise to bid the extension of water mains to certain unserved residents of Bullitt County which

will be provided partial funding by a Community Development Block Grant (CDBG) in the amount of \$994,000 awarded to Bullitt County Fiscal Court. On February 13, 2003, the Department of Local Government entered into the CDBG Agreement with Bullitt County Fiscal Court.

After proper motion and second, the Board of Water Works voted to adopt Resolution 03-04 (copy attached) as a joint resolution between Bullitt County Fiscal Court and the Louisville Water Company and authorize Karla O. Teasley, Vice President of Serving Customers and Business Development, to execute the Cooperation Agreement between Bullitt Fiscal Court and the Louisville Water Company.

NEW BUSINESS

Mr. Heitzman reported on the Tucker Station Elevated Water Tank

Proposed under the 2003 Capital Budget are future-years funds for construction of a new storage facility required to support system operations in eastern Jefferson County. Based on unforeseen availability of property, it is desired to accelerate construction of this facility.

The elevated water tank will consist of a 1,000,000-gallon pedestal-style elevated storage tank operating within an enlarged 900 pressure zone, located on Taylorsville Road at Tucker Station Road. The tank will provide improved system pressure and fire flow, and provide capacity and redundancy for system operation and maintenance.

The budget for the proposed project is \$1,300,000.

After proper motion and second, the Board of Water Works voted to reallocate funding as described and proceed with engineering design and advertisement for bid for the subject project after Louisville Water Company acquires the contemplated property.

Mr. Heitzman reported on Project 02-648: Ventilation Improvements at Zorn Pump Station and Project 03-641: Ventilation Improvements at Crescent Hill Pump Station

Proposed under the 2002 and 2003 Capital Budgets are funds for installation of ventilation equipment at the Crescent Hill and Zorn Pump Stations.

The proposed installations will provide improved, re-directed fresh air ventilation to each pump station. These pump stations house pumping equipment ranging 1250 to 2750 horsepower, providing source river water and treated city water supplies. As a result of heightened building security policies and procedures which require perimeter entries be closed, ventilation must be reconfigured to assure proper summer operating conditions for the pumping equipment.

After proper motion and second, the Board of Water Works voted to proceed with engineering design and advertisement for bid for the subject projects. Any significant change in project scope or budget identified during bidding will be presented to the Board for review and re-authorization to proceed.

Mr. Heitzman reported on Project 02-618: Crescent Hill Reservoir Improvements Phase III – Site Improvements; Project 03-616: Install Reservoir Overflow and Auxiliary Drain Facilities; and Project 03-642: Install Fence at Crescent Hill North Property

Proposed under the 2002 and 2003 Capital Budgets are funds to execute a third phase of improvements to the Crescent Hill Reservoir and adjacent property.

Three additional projects, budgeted at a total of \$1,050,000, address comprehensive site improvements to maintain, upgrade, secure, and extend the life of the facility.

After proper motion and second the Board of Water Works voted to authorize staff to proceed with engineering design and advertisement for bid for the remaining site improvements at the Crescent Hill Reservoir.

Mr. Heitzman reported on Project 03-455: Crescent Hill Water Treatment Plant Roof Replacement Program

Proposed under the 2003 Capital Budget are funds for replacement of roofs at Crescent Hill Treatment Plant.

A roof condition survey was conducted in 2001 on production facilities roofs by consultant Roof Resources, Inc.

Based on results from the condition survey, the Crescent Hill Pump Station Annex and Crescent Hill Filter Plant Chlorine Building facilities are proposed for roof replacements in 2003.

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with engineering design and advertisement for bid for Project 03-455: Crescent Hill Water Treatment Plant Roof Replacement Program. Any change in project scope or budget identified during final design will be presented to the Board for review.

Ms. Teasley reported on GIS Products and Services Fee Schedule

In December, 2002 LWC completed development of digital base mapping covering all of Bullitt County, Kentucky, excluding Fort Knox Military Reserve.

The Louisville and Jefferson County Information Consortium (LOJIC), in conjunction with the Metropolitan Sewer District (MSD), implemented a cost recovery policy and fee schedule upon completion of initial digital data in the late 1980's.

In order to broaden the opportunity for data cost recovery, staff has worked jointly with LOJIC to investigate the advantages of allowing LOJIC to provide approved LWC data to commercial entities upon request, at costs determined by the LWC fee schedule.

After proper motion and second, the Board of Water Works voted to adopt the GIS Products and Services Fee Schedules attached and authorize the President to negotiate and execute a Memorandum of Understanding with MSD/LOJIC to allow LOJIC to distribute LWC GIS data in accordance with the established fee schedules.

THE MEETING ADJOURNED AT 3:15 P.M.

RESPECTFULLY SUBMITTED:

LAURA M. DOUGLAS

APPORTIONMENT WARRANT RESOLUTION

April 8, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Stout Road: Broad Run Rd to North 7,800 ft** main extension project authorized by Ordinance No. 24, Series 2001 of the Jefferson Fiscal Court, adopted on September 25, 2001 such warrant to be against nineteen (19) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

RESOLUTION NO. 03-04

A RESOLUTION APPROVING A COOPERATION AGREEMENT BETWEEN THE BULLITT COUNTY FISCAL COURT AND THE LOUISVILLE WATER COMPANY RELATING TO THE IMPLEMENTATION OF THE COMMUNITY DEVELOPMENT BLOCK GRANT PUBLIC FACILITIES PROGRAM.

WHEREAS, Title I of the Housing and Community Development Act of 1974, as amended, established a program for Rural Discretionary funding of Community Development activities and transfers authority for implementing this Block Grant Program to the Commonwealth of Kentucky, and;

WHEREAS, Bullitt County Fiscal Court has made application for Community Development Block Grant funds under said Title I of the Housing and Community Development Act of 1974, as amended, and received approval by the Commonwealth of Kentucky of said application.

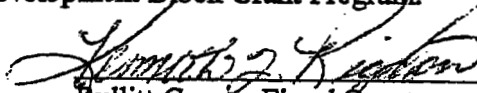

WHEREAS, the Louisville Water Company has been approved to implement and carry out this Community Development Program with Bullitt County Fiscal Court; and,

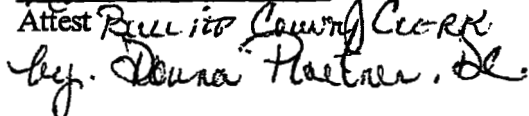

NOW, THEREFORE, BE IT RESOLVED by the Bullitt County Fiscal Court and Louisville Water Company that:

1. All policy decisions relating to types of activities to be included in the application will be approved by the Bullitt County Fiscal Court, Kentucky;
2. The Louisville Water Company, is hereby designated as the unit representing the Bullitt County Fiscal Court in implementing and carrying out this Community Development Program; and,
3. That the Louisville Water Company will review and give preliminary approval to all reports, expenditures and other correspondence or data necessary to implement the program; and reports on said implementation will be made to the Bullitt County Fiscal Court each month; and,
4. The County Judge Executive, or his designated agent, is appointed as the official representative of the Bullitt County Fiscal Court to coordinate the Louisville Water Company activities with overall Community Development Program. Members of the Bullitt County Fiscal Court shall be kept fully informed of all activities relating to the Community Development Block Grant Program.

01/21/03

Date

Bullitt County Fiscal Court

Attest Bullitt County Clerk
by: 

Louisville Water Company

**COOPERATION AGREEMENT BETWEEN
BULLITT COUNTY FISCAL COURT, KENTUCKY AND THE
LOUISVILLE WATER COMPANY**

THIS AGREEMENT entered into the 21st day of January, 2003, by and between the Bullitt County Fiscal Court, Kentucky (hereinafter called "Grantee") and Louisville Water Company, the local water utility, (hereinafter called "LWU");

WITNESSETH:

The Bullitt County Fiscal Court, Kentucky, acting pursuant to on Resolution by the Bullitt County Fiscal Court, has received approval of an application filed with Kentucky Department of Local Government, Division of Community Programs (hereinafter called the "State") for funding of a Fiscal Year 2002 CDBG Program in accordance with provisions of the Kentucky Community Development Block Grant Program. The specific project for which the funding under the Kentucky Community Development Block Grant Program has been obtained is for the construction of water line facilities in scattered areas of Bullitt County.

Title I of the Housing and Community Development Act of 1974, as amended through P.L. 97-35 requires that grant award and administration be initiated by either a City or a County applicant, unless a Cooperation Agreement is prepared between said City or County and a City/County entity established under KRS Chapter 74. In accordance with requirements for a Cooperation Agreement for the Louisville Water Company to administer the proposed Community Development Block Grant Public Facilities Program, Bullitt County Fiscal Court, Kentucky, and the Louisville Water Company agree as follows:

1. That the United States of America and the Secretary of Housing and Urban Development and the Commonwealth of Kentucky be, and hereby are, assured of full compliance by the Bullitt County Fiscal Court and the Louisville Water Company with certifications relating to all regulations and administration of Civil Rights Acts, citizen participation, relocation payments, acquisition policies, accounting procedures, the Hatch Act, minimum wage and minimum hour provisions of the Fair Labor Standards Act and all requirements of the National Environmental Policy Act of 1968;
2. The Louisville Water Company (LWU) is hereby designed as the agent for the Grantee in administering and implementing the Community Development Program;
3. That the Louisville Water Company (LWU) will approve all reports, expenditures and other correspondence and data necessary to implement the program and reports on said implementation will be made to the Grantee each month for their information;

4. That _____, acting as officer for the Louisville Water Company is hereby designed as official representative to coordinate the Community Development activities with Louisville Water Company and the County Judge Executive of Bullitt County Fiscal Court is designated as the official representative to coordinate the Community Development Block Program with County activities. Members of the Bullitt County Fiscal Court shall be kept fully informed of all activities and shall be invited to all meetings relating to the CDBG Program;
5. That this Cooperation Agreement is in effect until the completion of the fiscal year 2002 Community Development Block Grant Program as approved by the Commonwealth of Kentucky;
6. That decisions made relating to any revised or amended activities and/or programs will be made giving consideration to the citizen input and acceptance by the Grantee;
7. That the Bullitt County Fiscal Court has filed said Community Development Block Grant Application on behalf of the County and Louisville Water Company. The County Judge Executive will be authorized to sign the standard forms for execution of the grant to the Kentucky Department of Local Government.

IN WITNESS WHEREOF, the County Judge Executive of Bullitt County, Kentucky, and the officer of the Louisville Water Company have respectively signed this agreement and caused their respective seals to be affixed and attested as of the date and year first written above.

**BOARD OF WATER WORKS
MAY 13, 2003 MINUTES**

Board Members Present

Mr. Phillip Bond
Mr. Jack Segell
Mr. Stephen Gault
Mr. Owen Hammons
Mr. Stewart Conner

Board Members Absent

Hon. David L. Armstrong
Ms. Wendy Welsh

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources
Ms. Barbara Crow
Mr. Vince Guenther
Mr. Don McKay
Mr. Tony Gregory
Mr. S. (G.S.) Seetharam

Mr. Huber called the meeting to order at 12:35 p.m. He identified four items in the Consent Agenda where the Board of Water Works was asked to ratify action taken by staff prior to the May 13, 2003 meeting.

CONSENT AGENDA APPROVED

- *Minutes of previous meetings*
- *Claims paid during the previous month*
- *Petitions and applications for water main extensions*
- *Authorization for design and bid of projects under \$200,000*
- *Bid tabulations for contracts under \$500,000*
- *Listing for award of contracts less than \$100,000*

Item A: MINUTES OF ANNUAL MEETING HELD APRIL 8, 2003
MINUTES OF THE REGULAR MEETING HELD APRIL 8, 2003

REQUEST: APPROVE MINUTES

Item B: CLAIMS PAID DURING APRIL 2003

REQUEST: FILE CLAIMS FOR FUTURE AUDIT.

**Item C: PETITIONS AND APPLICATIONS FOR WATER MAIN EXTENSIONS AND RELOCATIONS
(WHEN IN FULL COMPLIANCE / SR&R)**

DEVELOPER INSTALLED REFUNDING MAIN EXTENSION PROJECTS

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
01-065	G192M	Polo Fields Sec. 13	\$24,140.00

REPORT OF OFFICERS

Administrative Report

Mr. Huber did not offer an Administrative report.

Financial Report

Income and Expense Summary

Mr. Miller presented the Income and Expense Summary for April 2003.

Total operating revenue of \$30,194,900 is \$849,900 or 2.90% more than budgeted and \$1,562,600 or 5.46% more than the same period in 2002. We sold 1.97% more water in 2003 than the same period in 2002. Water delivered to the mains was 7.62% more than 2002.

Operation and maintenance expense of \$14,776,200 is \$699,000 or 4.97% more than budgeted and \$1,643,200 or 12.51% more than 2002.

Net operating income of \$7,494,700 is \$116,400 or 1.58% more than budgeted.

Net income of \$6,119,800 is \$249,400 or 3.92% less than budgeted and \$1,674,700 or 21.49% less than 2002.

Operations Report for May 2002

Mr. Heitzman presented the Operations Report for April 2003.

Production – The water production in April of 117.4 MGD was 1.6 percent higher than the April 2002 production of 115.5 MGD, and was similar to 5-year average April production of 116.9 MGD.

Distribution Water Quality - Staff collected 328 regular distribution samples in March. All samples exceeded our internal turbidity, chlorine and bacteria goals, which are more stringent than regulatory requirements.

BE Payne Plant Inspection – In March, the Kentucky Division of Water conducted an unplanned inspection at BE Payne Water Treatment Plant. Staff received the inspection report in April. The report shows no deficiencies and requires no corrective actions.

Whipps Mill Road 24-inch Repair – The repair of the 24-inch transmission main in Whipps Mill Road, near U of L's Shelby campus is now complete and the water main is back in service. The contingency contract with Peters Construction was used for the repair of the main. The total cost of the repair was \$98,000.

Cardinal Hill/Iroquois Park Road 60-inch Repair - A 60-inch transmission main leak on Iroquois Park Rd was successfully repaired in April using internal joint seals. Staff is to be commended for the careful planning and execution of this repair with no impact on customer water supply. The estimated cost of repair is \$32,000.

Transmission Valve Repairs - With winter emergency operations behind us, operations has shifted attention to the repair or replacement of critical transmission valves. Staff is working with the manufacturer of the valve to repair damaged gear operators on the valve. A number of other transmission valve problems throughout the system are also in various stages of being addressed.

Churchill Downs Low Pressure - On the evening of Oaks Day, Friday, May 2, 2003, a call was received from Churchill Downs in which they reported low water pressure being experienced in the grandstand area of the facility. Upon investigation the problem was not with the water supply being provided by LWC but, rather, was due to internal pumping controls that feed the new corporate suites. Staff remained on site in a consulting capacity with Churchill Downs maintenance personnel until the matter was resolved in the early morning hours of May 3rd.

Stone Lakes Water Pressure Improvements - The Stone Lakes subdivision area off Taylorsville Road has experienced declining water pressure over the past five years due to the rapid development in the area, low-flow water fixtures, and summer drought conditions. Approval is required from Planning and Zoning Land Development Committee for construction of the water tank. In the interim, the Company will move the Stone Lakes area to the Blankenbaker pressure zone, which will improve water pressure approximately 20 psi. This interim solution requires installation of a booster pump station, check valves and boundary valves. The transition to higher water pressure will begin the week of May 12, and be completed by May 23, 2003. Customers in the area have been notified by letter of the planned change.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report for April 2003.

Performance Measures - The April 2003 abandonment rate was 6.5%, compared to 4.3% in March 2003, and 8.19% in April 2002. The year to date number continues to be acceptable at 4.8%.

The increase was due to two days with high call volume, April 14 (Monday after Spring Break week), and April 21 (Monday after three day Easter holiday weekend).

Oldham County Advisory Board - LWC held a meeting on April 22, 2003 with the Oldham County Advisory Board (OCAB) to discuss issues in connection with the Oldham County Water District #1. The meeting centered on the progress of the Oldham County Water Extension Program (OCEP), the status of the Oldham County reserve funds and the future of the OCAB.

The application deadline for the OCEP was December 31, 2002 and LWC has committed to construct four projects which met that deadline.

LWC expects all capital improvement activity to be completed and closed by summer 2004. At that time the Oldham County reserve fund will be depleted, thus fulfilling the purpose of the Oldham County Advisory Board.

We anticipate the sunset of the existing OCAB by July of 2004, and creation of a new advisory board for Oldham County thereafter.

Shepherdsville – About 20 Bullitt County residents attended a neighborhood meeting last month to discuss reliability issues along Highway 44 West. Since the beginning of the year several hundred customers have been without water dozens of times due to main breaks in the area.

Many customers affected by the breaks have been transferred from an old cast iron main to a more reliable PVC pipe.

Main breaks continue to plague other nearby neighborhoods still being fed by old cast iron water mains. LWC crews are working to transfer additional services to more reliable PVC pipes.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation, acquisition of property and personnel issues. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

Public Information and Customer Satisfaction Committee

Mr. Huber and Mr. Gault presented highlights of the Public Information and Customer Satisfaction Committee report.

LWC has given away 1.5 million empty pure tap bottles as a means of branding our product. Since starting the Pure Tap campaign, LWC's customer satisfaction numbers have gone up. The use of the bottle in the campaign has been a spring board to other items.

Ms. Crow indicated there is a significant finished-goods storage problem at the bottling facility. There are concerns regarding vigilance necessary to maintain a quality finished good. In the future, staff will investigate the possibility of outsourcing the bottling operation.

BID TABULATIONS

Mr. Miller presented a report on the following Bid Tabulations:

03-04: Notification of Delinquent Accounts

On April 2, 2003, sealed bids were opened to award a three-year contract for Notification and Collection of Delinquent Accounts. This contract provides for the collection of LWC delinquent water bills, damage claims and other invoices.

Four proposals were received with the lowest, most responsive proposal from Aargon. Aargon will charge an 18% commission on amounts collected.

After proper motion and second, the Board of Water Works voted to authorize staff to award a three-year contract for Notification and Collection of Delinquent Accounts to Aargon at an estimated three year cost of \$758,237.00.

03-19 / Plastic Water Meter Vaults and Elevator Rings

On April 16, 2003, sealed bids were opened to award a three-year contract for plastic meter vaults and elevator rings.

Four bids were submitted with the lowest, most responsive bid from Mid-States Plastics, Inc. for an estimated three-year total of \$642,842.

After proper motion and second the Board of Water Works voted to authorize staff to award a three-year contract totaling an estimated \$642,842 to Mid-States Plastics, Inc.

03-20 / PVC Pipe

On April 16, 2003, sealed bids were opened to award a one-year contract renewable for up to two additional one-year periods at the sole discretion of the company for the purchase of PVC Pipe. All renewals would utilize the Consumer Price Index as a cost adjustment factor.

A total of five proposals were submitted with the lowest, most responsive proposal from Extrusions Technologies, Inc. for an estimated one-year total of \$1,589,375.

After proper motion and second, the Board of Water Works voted to authorize staff to award a one-year contract totaling an estimated \$1,589,375 to Extrusions Technologies, Inc.

This marks a change in the pressure class of pipe from 200psi to 150 psi that Louisville Water Company will use in its system.

03-15 Fleet Vehicles

On April 8, 2003, the Board of Water Works considered bids received for fleet vehicles including rubber tire tractor backhoe/loaders and mini-backhoes. At that meeting, the Board directed staff to further review the bids for those items. Also, since that meeting, the successful bidder for a full size cargo van has refused to honor their bid.

After proper motion and second, the Board of Water Works authorized staff to award a contract to Americon in the amount of \$186,044.00 for the purchase of four Caterpillar rubber tire tractor backhoe/loaders.

Full Size Cargo Van and Award

Award of a contract to Uebelhor and Sons in the amount of \$18,758 for the purchase of a full size Chevrolet Cargo Van. Staff does not make a recommendation regarding the nine backhoe at this time.

01-45 Locating Services

On March 13, 2002, proposals were opened to award a one-year contract for locating services. This contract is renewable for up to four (4) additional one-year terms at the sole discretion of the Company.

A total of three proposals were received. The bidder submitting the best-evaluated proposal was STS, LLC. at an estimated cost of \$265,138.

After proper motion and second, the Board of Water Works voted to award a one-year CPI renewal for an estimated total of \$270,510 to STS, LLC. The first year renewal increase utilizes the Consumers Price Index as the cost adjustment factor.

03-26 / Contingency Contract for Plumbing Services

On April 30, 2003, sealed bids were opened to award a three-year contract for Contingency Contract for Plumbing Services. The contract is based on estimated usage and firm unit pricing. This contingency contract involves plumbing repairs for customer service lines damaged by LWC. Scope includes potable and waste water systems.

Four bids were submitted with the lowest, most responsive bid from Southern Plumbing and Heating for an estimated three-year total of \$205,500.

After proper motion and second, the Board of Water Works voted to award a three-year contract totaling an estimated \$205,500 to Southern Plumbing and Heating.

Ms. Teasley presented a report on the following Bid Tabulations:

03-501 Central Avenue Grid-Tile ProjectBids were received and opened Wednesday, April 30, 2003 to install 1,280 linear feet of 12-inch ductile iron water main using traditional trenching techniques, and to install 135 linear feet of 20-inch steel casing for a railroad bore. Included with the project in the installation of a new 6-inch domestic service for Papa John's Cardinal Stadium.

A total of 4 bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$129,923 resulting in a total project cost of \$184,483.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of **\$ 129,923 to Southern Pipeline Construction Company** to install the water facilities associated with this project.

With the completion of the public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 9 benefited properties along Broad Run Rd: Fairmount Rd to Back Run Rd in accordance with KRS. 96.265, as described.

Mr. Heitzman presented the following Old Buisness Report:

Project 01-557 Cardinal Hill Secondary Supply Transmission Main Change Action

On March 22, 2002, the Company entered into a contract in the amount of \$272,900 with Tetra Tech, Inc. for the design and inspection of the Cardinal Hill Secondary Supply. The project is to be designed and built in 2 phases from the Cardinal Hill Reservoir to St. Andrews Church Road (phase 1) and to New Cut Road at Outer Loop (phase 2).

During the development of the profile for the 50% plan submittal the Consultant determined that negative pressures would be experienced in the pipeline if the standard depth of bury was maintained. The alternative offered at the time by the consultant was to install the main at depths up to 20 feet deep. Rather than install the main at excessive depths the consultant was asked to review alternative alignments.

The new alignments will provide for shorter overall project length and allow for minimum depth of bury for the main. Savings of \$250,000 to \$500,000 is expected during construction.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to extend the contract with Tetra Tech, Inc. to \$328,319.00 and proceed to final design and bid.

Watterson Expressway Interchange at Westport Road Property Transfer with the Kentucky Transportation Cabinet

For several years staff has worked with the Kentucky Transportation Cabinet on significant water facility relocations that are necessary to accommodate the Cabinet's long-standing plan to construct an interchange on the Watterson Expressway at Westport Road.

The Cabinet's project also requires that Louisville Water Company-owned property be conveyed to the Cabinet for roadway construction. To offset the Company's loss of property, and to make suitable provisions for re-construction of water facilities, the intentions of both the Cabinet and the Company have been to exchange property between the two entities in a manner that would meet the needs of both. The specific property transfer requires the conveyance of a parcel containing approximately 0.6 acres from LWC to the Cabinet in exchange for the Cabinet's conveyance to LWC of an adjacent parcel containing approximately 1.9 acres.

The property being conveyed by LWC to the Cabinet is not considered to be excess and the property being received in exchange is of equal or greater value.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to execute the necessary contract to effect the property exchange as outlined above.

BID TABULATIONS

Mr. Gregory presented the following Bid Tabulation:

Mobile Dispatch System Software and Implementation Services

The Mobile Dispatch System is identified in the 2001-2003 Information Technology Strategic Plan to provide information to field employees using mobile computing technologies to improve customer service and satisfaction. Improving our field service efficiency directly relates to several strategic and operating objectives as identified below:

- Increase the Overall and Serviced Accounts Customer Satisfaction Index significantly by 2004.
- Automate current manual field procedures for work orders and service orders through implementation of an Automated Dispatch and Mobile Computing System.

Increase in system size through acquisition and growth opportunities will require enhancement of current information system capabilities

The Board of Water Works authorized staff to pursue the procurement of a Mobile Dispatch System through a Request for Competitive Negotiation (RCN) process in September 2002.

After proper motion and second, the Board of Water Works voted to award a contract to Virya Net in the amount of \$906,032 to provide the Mobile Dispatch System application software, implementation services, and system maintenance; to award a sole source contract to Orcom in the amount of \$122,500 for the development of the Mobile Dispatch System and Customer Information System Interface; and to issue a bid in order to obtain mobile computers and wireless connectivity to the Mobile Dispatch System and other LWC information systems. This will require the purchase of server hardware, laptop computers, wireless network equipment, and wireless data services at different times during implementation of the project. The current estimate for this equipment is \$169,000.

Staff distributed an e-mail from Ms. Wendy Welsh expressing her support of the project. The Board instructed staff not to prepay maintenance contract. Discussion thus far contemplated prepaying maintenance.

NEW BUSINESS

Ms. Teasley presented the following New Business Reports.

Bullitt County Water Improvement Program – Bullitt County Extension Program Project 03-317 Walls Hollow Road Booster Pump Station

Proposed under the Bullitt County Extension Program is a project for Walls Hollow Road for which the Board has previously authorized for engineering design and advertisement for bid. During the engineering design, staff further evaluated the elevations of this road and the adjacent roads of Mitchell Way, Routon Way, Fugerson Court, Pike Lane and Payne Lane and have determined that a booster pump station will be required to serve this area.

There are 45 residences that would be served by this booster pump station.

After proper motion and second, the Board of Water Works voted to proceed with engineering design and advertisement for bid for the subject project. The results of the bids will be presented to the Board with recommendation for contract award.

Bullitt County Water Improvement Program – Bullitt County Extension Program
Project No. 03-315 Johnson Hollow Road/Twin Acres Drive Water Main Extension
Project No. 03-313 Johnson Hollow Tank
Project No. 03-314 Johnson Hollow Booster Pump Station

Proposed under the Bullitt County Extension Program is a water main extension on Johnson Hollow Road and Twin Acres Drive. We have received a 2/3 majority petition from residents on Johnson Hollow Road and Twin Acres Drive for a water main extension. Due to the elevation of these roads, a water storage tank and booster pump station will be required to serve this area and the project becomes a backbone main. The proposed Tapping Fee project will provide fire protection and water service to a previously unserved area, provide improved service to an existing underserved area and allow for an existing hydropneumatic booster pump station to be removed.

There are 17 residents along Johnson Hollow Road and Twin Acres Drive.

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with engineering design and advertisement for bid for the subject project. The results of the bids will be presented to the Board with recommendation for contract award.

LWC Tapping Fee Main Extension – Clover Avenue

A request for a main extension along the remaining unserved portion of Clover Avenue was requested by Mr. Mike Stuber, owner of the parcel located at 5411 Clover Avenue. Mr. Stuber was sent a Surcharge Main Extension Petition/Agreement. Mr. Stuber has responded that the Metropolitan Sewer District (MSD) has started a project to add sewers to this geographic area. As such, there is insufficient time to obtain a 50% plus one majority petition along the project route prior to MSD's contractor completing their work. Extension of a water main along Clover Avenue after MSD has completed its project would cause additional construction damage to areas just restored.

MSD staff has agreed to coordinate their work with a main extension along Clover Avenue. Staff recommends proceeding with the project as an LWC Tapping Fee Main Extension in order to coordinate this main extension with the MSD project.

There are five properties that would benefit from the extension of this water main.

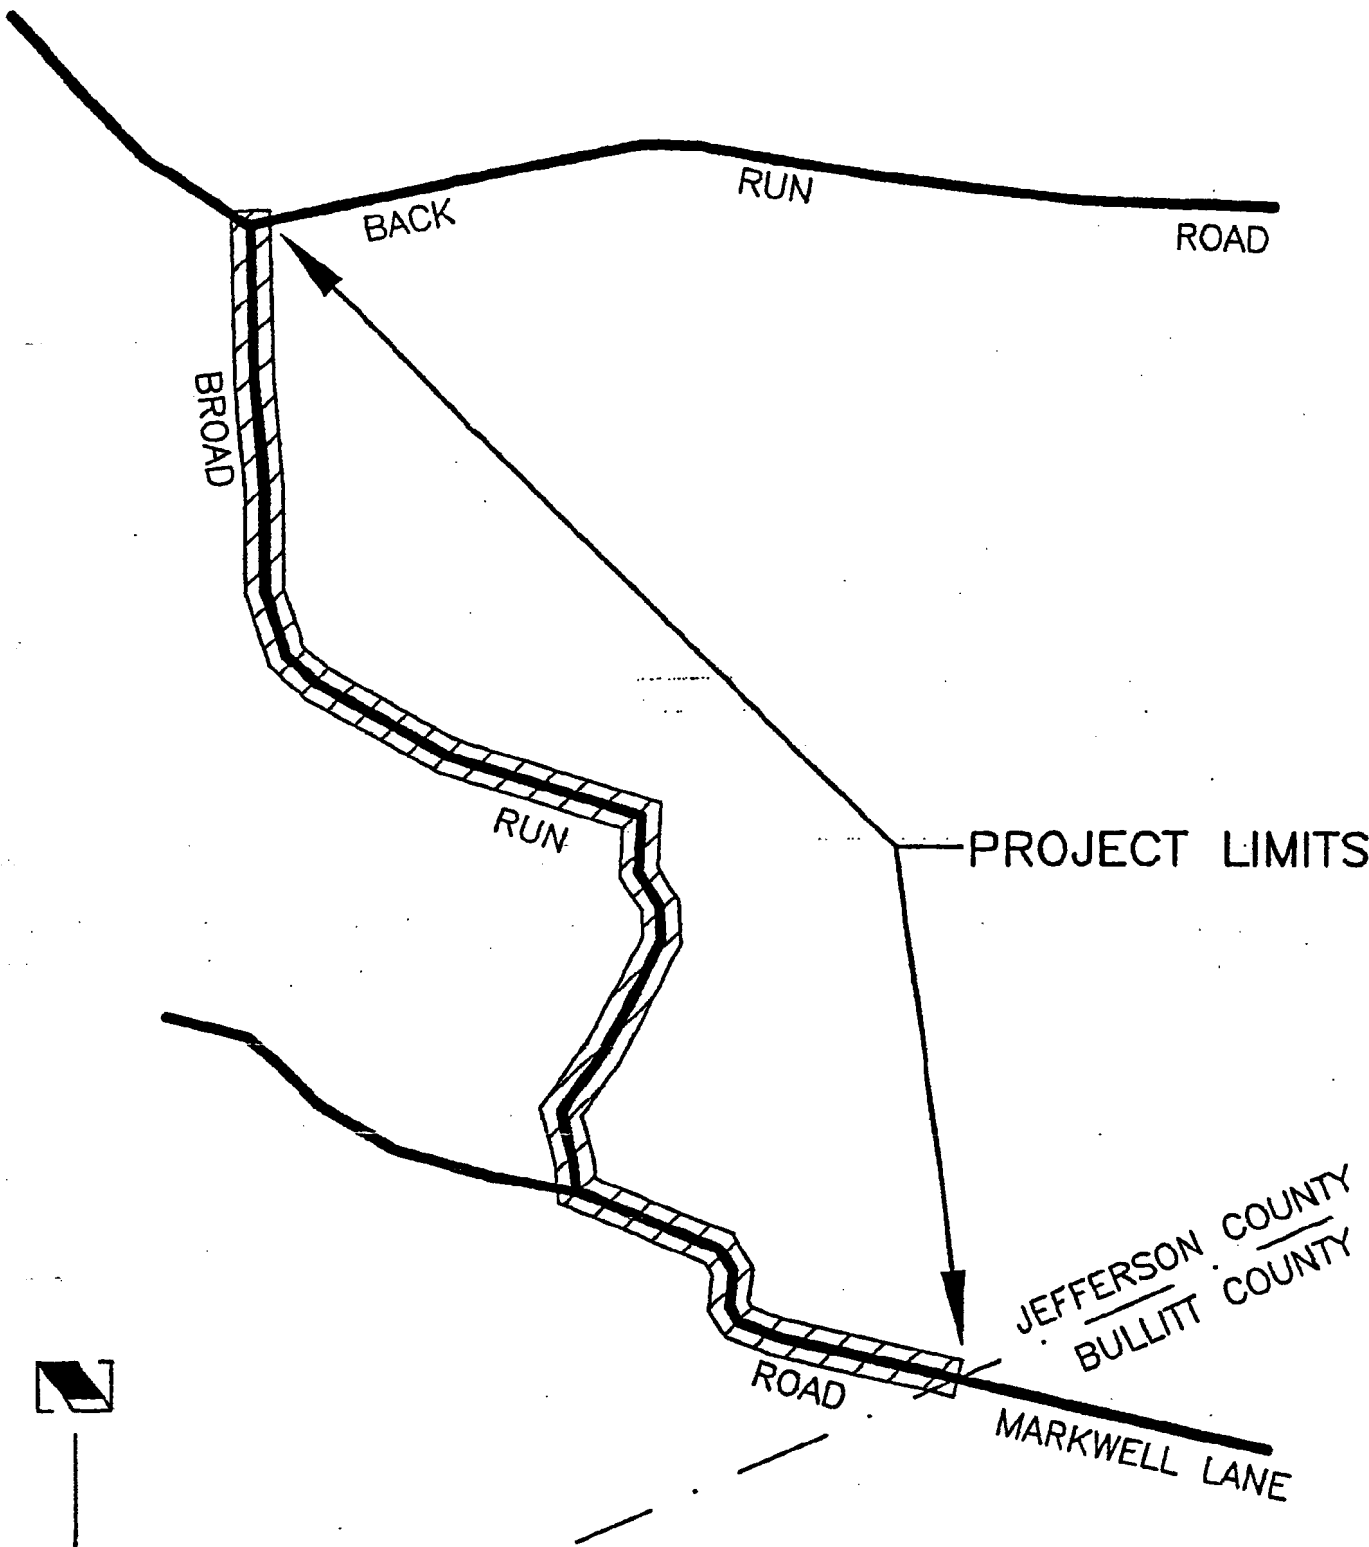

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with engineering design and construction for the subject project with a tapping fee set at the actual cost of the project divided equally by the five properties to be served. The estimated tapping fee is \$2,860 for five potential taps.

The meeting adjourned at 2:35 p.m.

APPORTIONMENT WARRANT RESOLUTION

May 13, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Broad Run Rd: Back Run Rd to County Line** main extension project authorized by Ordinance No. 5, Series 2002 of the Jefferson Fiscal Court, adopted on January 22, 2002 such warrant to be against thirty three (33) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

APPORTIONMENT WARRANT RESOLUTION

May 13, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Back Run Rd: Broad Run Rd to Dawson Hill Rd** main extension project authorized by Ordinance No. 12, Series 2001 of the Jefferson Fiscal Court, adopted on June 12, 2001 such warrant to be against thirty one (31) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

OLD BUSINESS

Ms. Teasley presented the following Old Business Report:

Issuance of Apportionment Warrants per KRS 96.265

Broad Run Rd: Back Run Rd to County Line

A public hearing was held July 12, 2001 for the extension of water service along Broad Run Rd: Back Run Rd to County Line. The Board of Water Works adopted a resolution for Broad Run Rd: Back Run Rd to County Line on December 11, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance

With the completion of the public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. The cost of the extension will be by the equal assessment method for the cost of \$5,450 for each lot or tract abutting this extension and currently not served.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 33 benefited properties along Broad Run Rd: Back Run Rd to County Line in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265

Back Run Rd: Broad Run Rd to Dawson Hill Rd

A public hearing was held April 5, 2001 for the extension of water service along Back Run Rd: Broad Run Rd to Dawson Hill Rd. The Board of Water Works adopted a resolution for Back Run Rd: Broad Run Rd to Dawson Hill Rd on May 8, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 12, Series 2001 on June 12, 2001 for the Back Run Rd: Broad Run Rd to Dawson Hill Rd project. James Parsons Construction, INC constructed this water main.

With the completion of the public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 31 benefited properties along Back Run Rd: Broad Run Rd to Dawson Hill Rd in accordance with KRS. 96.265, as described.

Issuance of Apportionment Warrants per KRS 96.265

Broad Run Rd: Fairmount Rd to Back Run Rd

A public hearing was held November 1, 2001 for the extension of water service along Broad Run Rd: Fairmount Rd to Back Run Rd. The Board of Water Works adopted a resolution for Broad Run Rd: Fairmount Rd to Back Run Rd on November 13, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 2, Series 2002 on January 8, 2002 (a copy of which is attached) for the Broad Run Rd: Fairmount Rd to Back Run Rd project. Southern Pipeline Construction Company constructed this water main.

APPORTIONMENT WARRANT RESOLUTION

May 13, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Broad Run Rd: Fairmount Rd to Back Run Rd** main extension project authorized by Ordinance No. 2, Series 2002 of the Jefferson Fiscal Court, adopted on January 8, 2002 such warrant to be against nine (9) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**BOARD OF WATER WORKS
JUNE 10, 2003 MINUTES**

BOARD MEMBERS PRESENT

MR. PHILLIP BOND
MR. STEPHEN GAULT
MR. STEWART CONNER
MR. JACK SEGELL
MS. WENDY WELCH

BOARD MEMBERS ABSENT

HON. JERRY ABRAMSON
DR. JOSEPH WISE, III

OTHERS PRESENT

MR. JOHN HUBER, PRESIDENT
MS. LAURA DOUGLAS, VICE PRESIDENT, GENERAL COUNSEL, CORPORATE SECRETARY
MR. GREGORY HEITZMAN, VICE PRESIDENT, CHIEF ENGINEER
MR. ROBERT MILLER, VICE PRESIDENT, TREASURER
MS. KARLA TEASLEY, VICE PRESIDENT, SERVING CUSTOMERS & BUSINESS DEVELOPMENT
MS. SUSAN LEHMAN, VICE PRESIDENT, HUMAN RESOURCES
MR. STEVE HUBBS
MS. KAY BALL
MR. STEVEN R. GRESETH, BLACK & VEATCH
MR. RALPH McCORD
MR. BILL MEEKS, PRESIDENT, LOCAL 1682
MR. RICHARD JOHNSTONE

Mr. Huber called the meeting to order at 12:45 p.m. He announced that Dr. Joseph Wise has been appointed to the Board. However, he was not able to attend today's meeting due to a previously scheduled meeting in Germany. Mr. Huber also welcomed the Board to the Allmond facility. Mr. Huber and Mr. Gault provided a brief history on the area and the Allmond facility.

CONSENT AGENDA APPROVED

- Item A:** MINUTES OF THE REGULAR MEETING HELD MAY 13, 2003
APPROVED WITH CORRECTIONS
- Item B:** CLAIMS PAID DURING MAY 2003
FILE CLAIMS FOR FUTURE AUDIT
- Item C:** Petitions and applications for Water Main Extensions and Relocations
(when in full compliance / SR&R)

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost

Sole Source	Underground Facility Markings Kentucky Underground Protection, Inc.	\$85,698
-------------	--	----------

REPORT OF OFFICERS

ADMINISTRATIVE REPORT

Mr. Huber reported that Cincinnati would soon have all 235,000 of its water meters changed to automatic read soon. Mr. Huber also reported on EPA's recent study review which concluded that there are no adverse health impacts associated with atrazine in drinking water. This may have some implications regarding the regulation of endocrine disruptors. Mr. Huber then reported that EPA has now said if water utilities increase water rates 3% "in real terms" they will have the funds to address infrastructure renewal. On the national level there are no federal funds to address infrastructure renewal.

FINANCIAL REPORT

Mr. Miller reported that Moody's will soon be coming forward with a recommendation that water utilities review their rates annually.

Mr. Miller presented the Income and Expense Summary for May 2003.

Total operating revenue of \$38,076,300 is \$731,900 or 1.96% more than budgeted and \$1,546,500 or 4.23% more than the same period in 2002. Water delivered to the mains was 6.76% more than 2002.

Operation and maintenance expense of \$18,124,300 is \$496,400 or 2.82% more than budgeted and \$1,655,800 or 10.05% more than 2002.

Net operating income of \$10,107,900 is \$300,600 or 3.07% more than budgeted.

Net income of \$8,390,500 is \$181,100 or 2.11% less than budgeted and \$494,900 or 5.57% less than 2002.

Mr. Miller also reported that the FINS project is on target to meet the September 29, 2003 "go live" date.

OPERATIONS REPORT

Mr. Heitzman presented the Operations Report for June 2003.

Production - The water production in May of 125.9 MGD was 3.6% higher than the May 2002 production of 121.5 MGD, however was 2.9% lower than the 5-year average May production of 129.7 MGD.

Distribution Water Quality - Staff collected 307 regular distribution samples in May. Water quality in the distribution system exceeded our internal turbidity, chlorine and bacteria goals for the month. There was no water quality monitoring and reporting violation in May.

Ohio River Spill – ORSANCO reported a total of two spills for the month of May. One of the spills occurred in Louisville on May 20th. A truck spilled 1,000 gallons of the pesticide Diazinon at the junction of Interstate 71 and the Gene Snyder Freeway in northeastern Jefferson County. Water quality laboratory staff assisted EPA for the spill response. Samples from the spill site, nearby water ponds and creeks, and the Ohio River were collected and analyzed in LWC's water quality laboratory. The results indicated the spill was contained in the ponds near the scene and did not impact the Ohio River.

EPA On-site Evaluation for Cryptosporidium Testing – The EPA's Long-term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR) requires water utilities using surface water or groundwater under the direct influence of surface water to monitor the cryptosporidium level in their source waters in the future. EPA has not set the final date for monitoring compliance. Water utilities may apply for laboratory certification by EPA through collection of historical data generated using EPA approved methods and laboratories. LWC has been testing the cryptosporidium level in the Ohio River at a frequency of every two weeks since 1999 using Method 1623 – an EPA approved method. EPA staff conducted an on-site evaluation on May 20 and 21. The preliminary feedback indicates no major deficiencies in the testing program. The final evaluation report will be available within 60 days and it is expected LWC's cryptosporidium testing program will be approved by EPA.

Distribution System Maintenance Activity – The backlog of work activity has climbed to 935 work units through May, a 25% increase over 2002 work activity. This increased backlog is a result of the winter emergency in February. In an effort to reduce the backlog, management authorized work on two Saturdays in May to reduce the Priority 1 backlog.

Shepherdsville Water Main Breaks – Water main breaks continue in the newly acquired Shepherdsville system. The Shepherdsville system experienced 11 breaks in May, bringing the total to 53 for the year. Repair costs are estimated at \$165,000. These breaks continue to disrupt water supply to the area resulting in significant customer outages. The cause is increased pressure to the Shepherdsville system and the poor condition of the cast iron pipes. Staff is evaluating procurement alternatives to accelerate the capital improvements.

SERVING CUSTOMERS REPORT

Ms. Teasley presented the Serving Customers Report for May 2003.

The May 2003 abandonment rate was 4.0%, which compares favorably to 6.5% in April 2003, and 6.6% in May 2002.

Bullitt County Advisory Board – The Bullitt County Advisory Board met for its rescheduled regular quarterly meeting on May 27, 2003. Staff provided financial information regarding the status of the Bullitt County Water Reserve as well as the status of the capital projects underway in Bullitt County under the Bullitt County Water Improvement Program.

Shepherdsville – In response to the excessive number of water main breaks in the Shepherdsville system, planning staff have identified two high risk main sections on Carpenter Street (1,100 feet of 6" main) and Third Street (1,000 feet of 4" main) requiring immediate replacement to reduce water supply outages in Shepherdsville. This replacement will be funded by the Shepherdsville Reserve. It is recommended LWC proceed with an emergency contract to address both these water main sections.

Bluegrass Consortium – The Bluegrass Water Supply Consortium is a collection of about 16 water utilities and cities addressing water supply needs in the Central Kentucky area, including Lexington, Frankfort, Nicholasville, Winchester and Shelbyville. Working with O'Brien and Gere Engineers the Consortium has identified a current supply deficit of 10–15 MGD for the region and a long term, 20 year deficit of 70 MGD. Currently the Consortium is evaluating near term supply alternatives to provide 10 to 15 MGD to the region within a 3 to 5 year time frame. Results of the evaluation identified eight alternatives for further, detailed study.

All raw water options will require construction of additional treatment capacity.

LITIGATION REPORT

After proper motion and second, the Board of Water Works adjourned to closed session for the purpose of discussing litigation, acquisition of property and personnel items. The Board reconvened into open session without taking any action.

After proper motion and second, the Board of Water Works authorized staff to credit the Bullitt Count Water Reserve in the amount of \$3,000 effective immediately, and finalize new whole sale agreements with North Nelson and Lebanon Junction.

After proper motion and second, the Board of Water Works authorized the President to enter into a standard purchase agreement to purchase certain property owned by James A, Jr. and Bliss M. Brown for an amount consistent with the appraised value for the purchase of constructing an elevated storage tank pursuant to Project 99-407 on Highway 42 in Goshen, Kentucky.

COMMITTEE REPORTS

Mr. Bond stated that he would like to defer the Audit Committee report until the July meeting so that the full Board could have an opportunity to review the Crowe Chizek Audit report prior to the Committee offering its report.

SPECIAL ISSUES

Mr. Miller presented the Declaration of Dividend to Louisville/Jefferson County Metro.

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville/Jefferson County Revenue

Commission an annual dividend on the Louisville Water Company stock owned by the City.

The dividend is to be paid in quarterly installments, such payments to be based on estimated annual net income and as nearly equal in amount as possible.

After proper motion and second, the Board of Water Works adopted a resolution (certified copy attached to these minutes) declaring the second quarterly 2003 dividend in the amount of \$3,079,708. This resolution provides for a total quarterly payment of \$3,169,170.

BID TABULATIONS

Mr. Miller presented the following Bid Tabulations:

Bid No. 01-11 / Cold Water Meters

On April 25, 2001, sealed bids were opened to award a one-year contract, renewable for up to four additional one-year terms at the sole discretion of the Company for the purchase of Cold Water Meters.

At contract inception, a total of two (2) proposals were received. The first PPI renewal was awarded in March, 2002 reflecting a 1.7% increase and a renewed contract amount of \$1,276,841.

After proper motion and second, the Board of Water Works voted to award a second PPI renewal to Neptune Meter Company reflecting a .9% decrease for an estimated contract total of \$1,263,747.

Bid No. 03-25 / Spoils Recycling

On May 14, 2003, sealed bids were opened to award a two-year contract for the recycling of excavating materials.

Twelve bid packages were solicited and only one proposal was received and evaluated. Our current business partner, "Mother Earth Recycling", failed to return a proposal. Louisville Topsoil submitted the lowest, most-responsive bid for an estimated two-year total of **\$260,250**.

After proper motion and second, the Board of Water Works voted to award a two-year contract totaling an estimated \$260,250 to Louisville Topsoil.

03-32 / Pre-Cast Meter Vaults

On May 14, 2003, sealed bids were opened to award a one-year contract to purchase pre-cast concrete meter vaults.

Two bids were submitted. Sherman-Dixie Concrete submitted the lowest, most-responsive bid for an estimated one-year total of \$101,512. This bid represents a 46% increase from the last bid period.

After proper motion and second, the Board of Water Works voted to award a one-year contract totaling an estimated \$101,512 to Sherman Dixie Concrete Company.

Bid No. 03-36 / Pipe Repair Couplings, Sleeves and Bell Joint Clamps

On May 28, 2003, sealed bids were opened to award a one-year contract, renewable for up to three additional one-year terms at the sole discretion of the Company for the purchase of repair couplings, sleeves and clamps.

Six bids were received.

After proper motion and second, the Board of Water Works voted to award one-year contracts in the estimated values as follows:

Viking Supply Company	\$70,677.22
Water Works Supply	\$22,029.36
Hughes Supply Company	\$18,215.12
Smith Blair Company	\$ 6,319.72
Harco Inc.	\$20,414.08
Mueller Co.	<u>\$ 188.85</u>
Total Estimated Contract Cost	\$ 137,844.35

00-56 / Ductile Iron Pipe and Fittings

On December 6, 2000, sealed bids were opened to award a one-year contract for the purchase of ductile iron pipe and fittings.

Six (6) proposals were received. The bidders submitting the best proposal were U.S. Pipe Inc., Griffin Pipe, Inc., and Hughes Supply Co. at an estimated cost of \$2,077,417.70.

After proper motion and second, the Board of Water Works voted to award a second one-year PPI renewal for an estimated total of \$2,231,769.71. The second PPI renewal represents a 0.1% decrease from last year's unit prices. Total contract price reflects an increase in total cost by 10% as reflected by adjustment of usage estimates.

Ms. Teasley presented the following Bid Tabulations:

03-502 Crittenden Drive- Main Replacement Project

Bids were received and opened Wednesday, May 7, 2003 to install 3,730 linear feet of 16 and 20 inch ductile iron water main using traditional trenching techniques along Crittenden Drive between south of Tug Road (airport postal access road) and south of Maclean Avenue.

A total of 4 bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$258,900 resulting in a total project cost of \$477,340.

After proper motion and second, the Board of Water Works voted to award a contract in the amount of \$258,900 to Southern Pipeline Construction Company to install the water facilities associated with this project.

03-506 Schiller Avenue Area - Main Replacement Project

Bids were received and opened Wednesday, May 28, 2003 to install 7,210 linear feet of 4, 6, and 8-inch water main in the Schiller Avenue Area. The project also includes the installation of 11 fire hydrants and the transfer or renewal of 196 customer services.

A total of 4 bids were received and opened from pre-qualified contractors. MAC Construction and Excavating, Inc. submitted the lowest responsive bid in the amount of \$436,675 resulting in a total project cost of \$589,145.

After proper motion and second, the Board of Water Works voted to award a contract in the amount of \$436,675 to MAC Construction and Excavating, Inc. to install the water facilities associated with this project.

01-215-A&B Bearcamp Road Water Main Extension Project

Bids were received Wednesday, May 28, 2003, to install approximately 13,261 lineal feet of 8-inch water main on Bearcamp Road from the end of the existing main located in front of 11411 Bearcamp Road to the Jefferson/Bullitt County line.

A total of seven bids were received from qualified contracting firms. The low responsive base bid in the amount of \$353,388 was submitted by Tom Brown Construction.

After proper motion and second, the Board of Water Works voted to award a contract in the amount of \$353,388 to Tom Brown Construction to install water facilities associated with this project.

COMMUNICATIONS

Mr. Hubbs reported on **Riverbank Infiltration (RBF) Water Quality Update**.

The purpose of the letter was to provide updated information on the first 4 years of water quality data from the demonstration well at the B.E. Payne Water Treatment Plant. Overall water quality from the well continues to be excellent, and greatly improved over river water. Two water quality contaminants were identified as a potential concern because of their prevalence in groundwater: radon and arsenic.

The most significant source of radon in our service area is from the ground, with accumulation in basements through ground seepage. For a water-related source of radon,

the most significant source would be in a shower, where there is a relatively small room volume and a high degree of escape of the radon from the water.

The radon from the well water dissipates rapidly when placed in the open treatment basins, and the resultant radon level leaving the B.E. Payne Water Treatment plant is below the detection limit of 50 pico-curies per liter.

It is reasonable to assume that the naturally occurring levels of radon in the demonstration well are representative of what would be expected in the wellfield proposed in Phase II of the RBF program. If higher levels of radon are encountered, levels can be dramatically reduced through aeration, a relatively low-cost treatment process. It is thus believed that radon does not pose a significant water quality risk for the RBF program.

Ms. Ball reported on Project Project 99-402, Riverbank Filtration, Phase II

On April 8, 2003 the Board of Water Works authorized staff to increase the budget reservation for professional design services to \$2,643,500 and authorized Jordan Jones & Goulding, Inc. (JJ&G) to proceed with final design.

Staff has met with and made an offer to each of the property owners of the eighteen properties needed to construct the project. Offers were based a certified independent appraisal prepared by Lewman-Miller Company. The proposal includes a number of restrictions on the property and an interpretation of the market value of the property. At this time, property negotiations are continuing on schedule.

Staff has reviewed the FEIS and the impact the Eastern Jefferson County Bridge will have on the Riverbank Filtration project and the wellhead protection area. The FEIS acknowledged the concerns of the potential impact to the aquifer both during construction and upon completion of the bridge. To insure the concerns are addressed, LWC has requested to remain advised of the design elements and be allowed to provide comments throughout the final design phase of the Eastern Bridge.

No action is requested from the Board at this time. Staff will continue to provide regular communications to the Board regarding progress, scope of work and easement acquisition.

OLD BUSINESS

Ms. Teasley reported on the following Old Business:

Issuance of Apportionment Warrants per KRS 96.265

Dawson Hill Rd: Brush Run Rd to Back Run Rd

A public hearing was held January 25, 2001 for the extension of water service along Dawson Hill Rd: Brush Run Rd to Back Run Rd. The Board of Water Works adopted a resolution for Dawson Hill Rd: Brush Run Rd to Back Run Rd on February 13, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for

final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 5, Series 2001 on March 27, 2001.

With the completion of a portion of the public water main extension (Back Run Road north to 8025 Dawson Hill Rd, the Frank and Margaret Pace property) the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the resolution (certified copy attached to these minutes) for the issuance of Apportionment Warrants and liens against 34 benefited properties along a portion of Dawson Hill Rd: Brush Run Rd to Back Run Rd in accordance with KRS. 96.265, as described.

Amendment of Apportionment Warrant Register

Back Run Rd: Broad Run Rd to Dawson Hill Rd

The Board approved a resolution for the issuance of Apportionment Warrants for Back Run Rd: Broad Run Rd to Dawson Hill Rd at the May 13, 2003 meeting in accordance with KRS 96.265. The Apportionment Warrant Register approved at the May 13, 2003 meeting is attached as Exhibit A.

After proper motion and second, the Board of Water Works voted to adopt the amended resolution (certified copy attached to these minutes); thereby, adding the omitted property to the Apportionment Warrant Register adopted by the Board of Water Works on May 13, 2003 in accordance with KRS. 96.265.

Amendment of Apportionment Warrant Register

Broad Run Rd: Back Run Rd to County Line

The Board approved a resolution for the issuance of Apportionment Warrants for Broad Run Rd: Back Run Rd to County Line at the May 13, 2003 meeting in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt the amended resolution (certified copy attached to these minutes); thereby, adding the omitted properties to the Apportionment Warrant Register adopted by the Board of Water Works on May 13, 2003 in accordance with KRS. 96.265.

Amendment of Apportionment Warrant Register

Eastwood-Fisherville Road: Fisherville Woods Drive to Eastwood Cut-Off

The Board approved a resolution for the issuance of Apportionment Warrants for Eastwood-Fisherville Road: Fisherville Woods Drive to Eastwood Cut-Off at the February 13, 2001 meeting in accordance with KRS 96.265.

While researching a proposed water main extension for private road Homestead Trace (perpendicular to Eastwood-Fisherville Road) staff recognized that a property (Tax Block 42 Lot 160) having roadway frontage on both aforementioned roads was not assessed an apportionment warrant along the Eastwood-Fisherville Road water main extension.

After proper motion and second, the Board of Water Works voted to adopt the amended resolution (certified copy attached to these minutes); thereby, adding Tax Block 42 Lot 160 to the Apportionment Warrant Register adopted by the Board of Water Works on February 13, 2001 in accordance with KRS. 96.265.

**Amendment of Apportionment Warrant Register
Snawder Ln.: Top Hill Rd to South 1,600 ft**

The Board approved a resolution for the issuance of Apportionment Warrants for Snawder Ln.: Top Hill Rd to South 1,600 ft at the December 20, 2002 meeting in accordance with KRS 96.265.

While field checking an appeal case along Snawder Ln., staff spoke with property owner Charles Schreiber. After researching the property belonging to Schreiber (Tax Block 1055 Lot 88) staff determined that the Property Valuation Administrator's Office had incorrectly represented his property on the tax maps; the Schreiber property was incorrectly drawn on the tax maps as not having roadway frontage.

After proper motion and second, the Board of Water Works voted to adopt the amended resolution (certified copy attached to these minutes); thereby, adding Tax Block 1055 Lot 88 to the Apportionment Warrant Register adopted by the Board of Water Works on December 20, 2002 in accordance with KRS. 96.265.

Mr. Heitzman reported on the following Old Business:

02-674 Watson Lane 16" Grid-tie/Orell Road 12" Grid-tie Change Action

On April 30, 2003, the Company entered into a professional service contract in the amount of \$83,242 with Gresham Smith and partners for the design and inspection of the Watson Lane 16" Grid-tie and the Orell Road 12" Grid-tie.

During the alignment selection it was determined that easements would be necessary due to a narrow right-of-way along Orell Road. Four easements were included in the original scope, 6 additional easements are required. Three temporary easements are needed to provide sufficient space for boring under Watson lane.

Overall project costs are not expected to increase.

This change exceeds the contract amount by 13.9%.

After proper motion and second, the Board of Water Works voted to extend the contract with Gresham Smith and Partners to \$94,939.50.

02-499 Stone Lakes / Gellhaus Lane Booster Pump Station

This project was initiated to resolve low pressure conditions in the Stone Lakes subdivision off Taylorsville Road near the Gene Snyder Freeway.

Upon further review of development in the area and hydraulic evaluation of the system, an alternative solution is being implemented. The scope includes:

- Identification of property for location of a one million gallon storage tank and extension of the Blankenbaker 900 Pressure Zone to accommodate the rapid growth in the Taylorsville Road corridor.
- Shifting the Stone Lakes area to the Blankenbaker 900 Pressure Zone.
- Installation of a booster pump in the Gellhaus Lane 16-inch water main to transfer water from the English Station 860 Pressure Zone south to the Bardstown Road 840 Pressure Zone. In order to meet the peak summer demand period, a contingency contract was awarded to Hall Contracting to install this pump station at a cost of \$95,750. Engineering, materials, power supply, and pump controls are estimated at \$24,250, bringing the total project cost to \$120,000.

After proper motion and second, the Board of Water Works voted to establish a project budget of \$120,000 for the Gellhaus Booster Pump Station. The \$95,750 contract with Hall Contracting was approved by the President in May.

**02-486 Change Action and Budget Revision
Crescent Hill Filter Plant Parking Lot Expansion**

In April, the Company entered into a contract with MAC Construction & Excavating, Inc. for \$67,800 to expand the parking lot at the Crescent Hill Filter Plant on Frankfort Avenue. During construction of the parking lot, an unstable soil condition was discovered in the area between the existing parking lot and the east filter building.

Expanding the parking lot allows controlled visitor and tour group entry to the treatment plant. The new parking lot will accommodate 35 spaces plus areas for tour buses and deliveries.

During construction, the project engineer authorized excavation and an additional 667 cubic yards of stone for the parking sub-base. The total cost for this additional work, including a change to the security lighting is \$10,080, increasing the construction contract value to \$77,880.

After proper motion and second, the Board of Water Works voted to increase the value of contract G248 with MAC Constructing & Excavating, Inc. from \$67,800 to \$77,880 and to increase the project budget from \$95,300 to \$107,380.

**99-414 Change Action and Budget Revision
Crescent Hill South Reservoir Liner Installation**

The February 1999 Board awarded a professional services contract in the amount of \$198,291 to Fuller, Mossbarger, Scott, and May (FMSM) for engineering design and construction administration on the Crescent Hill South Reservoir Liner Installation. The

contract was increased to \$259,791 by the Board in October 2001 to cover additional design services associated with the project re-bid and change of scope that addressed the failed drain support structure in the South basin. Upon filling the South basin this past winter, it was discovered the basin continues to leak.

The additional engineering costs of \$137,535 for FMSM Engineers includes services for design of the South basin drain structure, inspection services for the South basin construction, and design services for the Gate House foundation and drain structure.

After proper motion and second, the Board of Water Works voted to increase the value of contract #E140 with Fuller, Mossbarger, Scott, and May Engineers from \$198,291 to \$335,826 and establish a revised project budget of \$3,134,582 to complete the project. The remaining Gate House liner work will be bid this summer with installation this fall.

NEW BUSINESS

Ms. Teasley presented the following:

Bullitt County Water Improvement Program – Highway 245 Fill Station.

Proposed under the 2003 Capital Improvement Plan is construction of the Highway 245 Fill Station in Southern Bullitt County. This project is consistent with the intent of the merger agreement between Kentucky Turnpike Water District and Louisville Water Company in providing the opportunity for water to Bullitt County residents.

The proposed project will consist of the installation of a water fill station on Highway 245 just west of I-65 on property leased from Bullitt County Fiscal Court. The project will provide better water service to customers in this part of Bullitt County as well as western Nelson and central Hardin Counties.

The budget for the proposed project is \$115,000.

After proper motion and second, the Board of Water Works voted to proceed with engineering design and advertisement for bid for the subject project. A bid tabulation will be provided to the Board of Water Works by staff when requesting authorization to proceed with construction.

Bashford Manor Lane Water Facilities Relocation Project LWC Project No. 02-466

Water facility relocations are necessary to accommodate Louisville Metro Public Works' (LMPW) "Bashford Manor Lane Road Improvement" project in Jefferson County. LMPW intends to widen Bashford Manor Lane from Newburg Road to Mayo Drive. Therefore, LWC shall relocate and upsize the existing water main from Newburg Road to the newly relocated 12" water main just north of Gladden Drive which was installed in October 2002.

This project consists of relocating and upsizing approximately 1,625 l.f. of 8" water main to 12" water main along Bashford Manor Lane. Two (2) fire hydrants, eleven (11) domestic services and one (1) commercial service shall also be relocated.

The total relocation project cost is estimated to be \$236,000, of which \$30,000 is betterment for upsizing from an 8" water main to a 12" water main. Engineering/supervision is estimated to be \$22,000, materials are estimated to be \$70,000, and contract labor is estimated to be \$144,000.

It is our understanding that this project is currently state funded and as such, LWC shall be pursuing reimbursement for this project from LMPW in the amount of \$206,000.

After proper motion and second, the Board of Water Works voted to authorize the staff to design the distribution water facility relocations and to enter into an agreement with Louisville Metro Public Works for the construction of the distribution water facility relocations as described above.

Mr. Heitzman reported on the following:

00-418 B. E. Payne WTP Improvement Project

Applications Engineering/SCADA Programming Services

The construction bid documents for the B. E. Payne Plant Improvement Project originally included a \$300,000 allowance for Applications Engineering and SCADA Programming Services for operation and control systems of the water treatment plant. At the time of the bid, these elements were not defined, since the company-wide SCADA system implementation was underway under a separate contract.

A scope of work has been prepared and a proposal solicited from CDM Engineers to perform the applications engineering and installation of the SCADA controls systems. CDM was selected from the list of engineering firms retained by the company for facility improvements, based upon review of their price, performance, and experience with the Payne Plant design. A 10 percent contract contingency is recommended for design elements associated with retrofitting the existing plant controls into the new SCADA system. This established the total not-to-exceed contract value of \$247,242.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to enter into a contract with CDM Engineers for these design and installation services for a not-to-exceed amount of \$247,242.

Ms. Teasley presented the following request:

Request for Modification to Project Scope

Shelbyville Road – Main Replacement Project LWC Project 03-507

In the 2002-2003 Main Replacement and Rehabilitation Program (MRRP) book, staff identified two sections of main along Shelbyville Road for replacement. The second section estimated to cost \$1,900,000 includes approximately 14,600 feet of main extending eastwardly from Bellemeade Road to Burnley Avenue.

During preliminary design it became evident that a better division between the two projects would be the pressure reducing station located east of Hurstbourne Lane near Whittington Parkway – approximately 3,500 feet east of Bellemeade Road. The pressure station also forms a well-marked boundary between the 770 pressure plane and the 860 pressure plane, and should minimize problems associated with the operation of valves along this boundary.

For the reasons stated, staff would like to re-define the two projects.

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with the final design and advertisement for bids on the Shelbyville Road project from Whipps Mill Lane to the Pressure Reducing Station.

Mr. Miller reported on the following:

Project 02-665: Purchase of Oracle Database Processor Licenses

The 2001 – 2003 Information Technology Strategic Plan identifies several key Information Supply Systems that will be replaced through business process re-engineering and design methodologies. Several of the systems re-engineering and replacement projects are underway. There are several Technical and Data Architecture projects outlined in the IT plan and current Capital Improvement Plan to support these projects, one of these being additional Oracle database capacity.

After proper motion and second, the Board of Water Works voted to authorize staff to procure five additional Oracle Database Processor Licenses, Enterprise Database Management Tools, and first year support from Oracle off the Commonwealth of Kentucky Contract #C99001136 in an amount of \$187,148. The project is currently budgeted at \$200,000.

Federated Department Stores, Inc. - Stocks

When Federated Department Stores, Inc. filed a reorganization bankruptcy approximately ten years ago, the Louisville Water Company filed a Proof of Claim. Pursuant to Federated's bankruptcy reorganization, LWC received eighty one (81) shares of common stock. We are in the process of requesting replacement stock certificates. When such certificates are received, staff recommends that LWC sell all shares of stock in Federated Department Stores, Inc. through Republic Bank.

After proper motion and second, the Board of Water Works voted to authorize the Controller to sell eighty one (81) shares of common stock in Federated Department Stores, Inc. through Republic Bank.

THE MEETING ADJOURNED AT 3:05 P.M.

**RESOLUTION TO DECLARE SECOND QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 11, 2003 to adjust the 2002 annual dividend by \$357,847 from \$12,021,776 to \$12,379,623, the difference to be added in equal quarterly installments to the quarterly 2003 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2003 Louisville Water Company budget contemplates the 2003 annual dividend to be \$12,318,831 it would be in order at this time to declare a regular second quarter dividend of \$3,079,708.

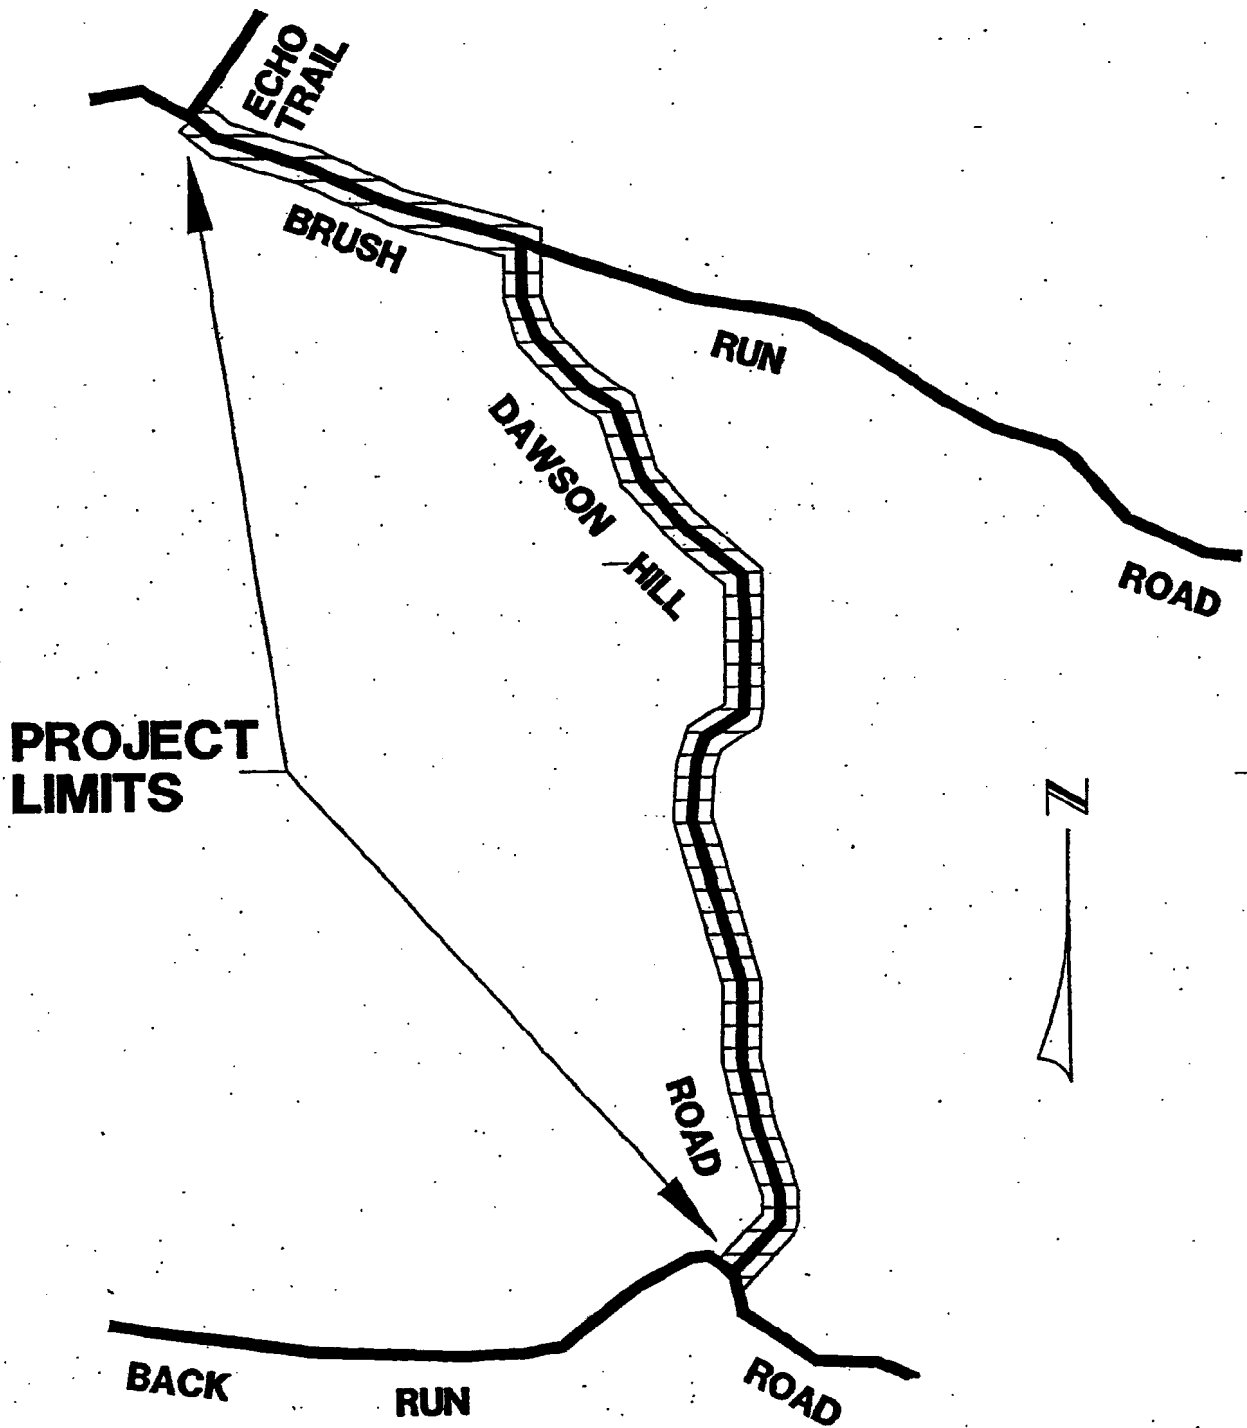

RESOLVED, the regular second quarter 2003 dividend of \$3,079,708 is hereby declared.

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,169,170 to the Louisville/Jefferson County Revenue Commission on June 30, 2003, this being the second quarterly dividend for 2003 plus one quarter of the dividend adjustment for 2002, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

APPORTIONMENT WARRANT RESOLUTION

June 10, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Dawson Hill Rd: Brush Run Rd to Back Run Rd** main extension project authorized by Ordinance No. 5, Series 2001 of the Jefferson Fiscal Court, adopted on March 27, 2001 such warrant to be against thirty four (34) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

PROJECT AREA

FILE NAME: DAWSON HILL

**Board of Water Works
Resolution**

February 13, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Brush Run Road: Echo Trail to Dawson Hill Road**, a public way in Jefferson County, and acting thereon convened a public hearing on January 25, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Brush Run Road: Echo Trail to Dawson Hill Road**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Brush Run Road: Echo Trail to Dawson Hill Road**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

June 10, 2003

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on February 13, 2001, directing the issuance of Apportionment Warrants against properties located on Eastwood-Fisherville Road: Fisherville Woods Drive to Eastwood Cut-Off to add to the Apportionment Warrant Register a property known as Tax Block 42 Lot 160:

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

June 10, 2003

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on December 20, 2002, directing the issuance of Apportionment Warrants against properties located on Snawder Ln: Top Hill Rd to South 1,600 ft to add to the Apportionment Warrant Register a property known as Tax Block 1055 Lot 88:

<u>Account</u>	<u>Name</u>	<u>Location</u>	<u>Assessment</u>
908366	Charles B. Schreiber	Snawder Ln Deed Book 6902 Pg. 867 Tax Block 1055 Lot 88	\$5,450

**BOARD OF WATER WORKS
JULY 8, 2003
BOARD MEETING MINUTES**

Board Members Present

Mr. Stewart Conner
Mr. Stephen Gault
Mr. Phillip Bond
Ms. Wendy Welsh
Dr. Joseph Wise
Mr. Jack Segell

Board Members Absent

The Hon. Jerry C. Abramson

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources
Ms. Barbara Crow
Mr. Tony Gregory
Mr. William Daniel, II - Guest

Mr. Huber called the meeting to order at 12:30 p.m.

He announced that Mr. William Daniel, II, an attorney representing Top Hill Partnership, owner of property located at 1302 Top Hill Road, was present and wanted to make a statement to the Board. Mr. Daniel made his statement essentially arguing that his lot was not buildable and therefore, should not be assessed. The Board of Water Works listened and made no comment. The Board directed General Counsel to investigate the application and meaning of K.R.S. 96.265(d) and Mr. Daniel's legal argument. Ms. Douglas will report back at the next meeting.

CONSENT AGENDA APPROVED

- Item A: MINUTES OF THE REGULAR MEETING HELD JUNE 10, 2003
- Item B: Claims Paid During June 2003
- Item C: PETITIONS AND APPLICATIONS FOR WATER MAIN EXTENSIONS AND RELOCATIONS
(WHEN IN FULL COMPLIANCE / SR&R)

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
DEVELOPER INSTALLED REFUNDING MAIN EXTENSION PROJECTS				
00-055	G350M	FOREST SPRINGS NORTH SECTION 2B	\$23,705.00	
00-093	G354M	LAKE FOREST SECTION 47C	\$18,205.00	
02-082	G356M	FOX HOLLOW PATIO HOMES	\$32,000.00	
02-083	G316M	CHIEFTAIN RIDGE SECTION 2	\$28,200.00

REPORT OF OFFICERS

ADMINISTRATIVE REPORT

Mr. Huber reported that the women's tapping team finished first in the women's AWWA national competition.

Mr. Huber mentioned that the Lexington, Fayette Urban Government Council recently voted to condemn Kentucky American Water Company.

Mr. Huber stated that he recently sent a letter to the Louisville/Jefferson County Metro Mayor reminding him of the terms of each Board of Water Works member. He will send a copy of his letter to each Board of Water Works member.

FINANCIAL REPORT

Mr. Miller presented the Financial Report for June 2003.

Income and Expense Summary

Total operating revenue of \$46,107,100 is \$1,099,100 or 2.44% more than budgeted and \$2,030,500 or 4.61% more than the same period in 2002. We sold 0.12% more water in 2003 than the same period in 2002. Water delivered to the mains was 4.57% more than 2002.

Operation and maintenance expense of \$21,500,200 is \$451,600 or 2.15% more than budgeted and \$1,901,500 or 9.70% more than 2002.

Net operating income of \$12,675,700 is \$701,000 or 5.85% more than budgeted.

Capital Projects Summary

The capital program reflects net expenditures of \$22,483,478 against a budget of \$85,324,333 including noncompleted previous year projects carried forward.

Financial Information System (FINS) Implementation Status

FINS Module Leads have almost completed writing and coordinating the testing of over 250 user procedures. Focus Group members are testing user procedures. These user procedures are the foundation for the content of the end-user training that will begin in mid-August.

The Validation Phase is wrapping up. It consisted of developing test scripts and holding "walkthrough" sessions with Focus Group members and various other employees. The purpose of the walkthroughs is to validate that the individual business processes (within Oracle) meet the Company's business requirements.

OPERATIONS REPORT

Mr. Heitzman presented the Operations report for July 2003.

Production and Maintenance - The water production in June of 134.1 MGD was 4.5% lower than the June 2002 production of 140.5 MGD, and was 5.0% lower than the 5-year average June production of 141.2 MGD. The lower than normal production in the month was a result of cool, wet weather.

Distribution Water Quality - Staff collected 315 regular distribution samples in June. Two of the samples were tested to be total coliform positive, but E. Coli negative. Recheck samples were negative for both total coliform and E. Coli. Sampling results have shown that the water quality in our distribution system exceeded our internal turbidity, chlorine and bacteria goals, which are more stringent than regulatory requirements.

Ohio River Spill - ORSANCO reported a total of 12 spills for the month of June. All 12 spills occurred upstream from our intakes.

Pilot Study of Corrosion Control - Water quality staff initiated a pilot study on corrosion control in our distribution system. The objective of the study is to evaluate the effectiveness of using ortho-phosphate to control distribution system corrosion and to reduce discolored water complaints. The Kentucky Division of Water approved the pilot study plan on June 20.

BE Payne Fluoride Storage Facility - As required by the State Health Department, staff installed a fluoride storage tank at the BEP plant to prevent potential overfeed of fluoride into the finished water. This storage tank is an intermediate vessel that stores a one day supply of fluoride and prevents overfeeding of the chemical. The project was completed before the July 15, 2003 deadline established by the State Health Department. The State Health Department has been notified of the corrective actions.

Goshen Operations - The system demand increased to near 1 MGD and is expected to continue to increase as summer approaches. Staff is in the process of adjusting operational strategies to ensure adequate supply to the system.

US Pipe Valves and Hydrants - Distribution Operations staff continues dialog with U.S. Pipe and Foundry regarding concerns about the performance of the Metroseal resilient seat gate valves and the Metropolitan fire hydrants. Staff has forwarded draft proposals to U.S. Pipe on each of the two issues suggesting how we should proceed with a program to evaluate, test and mitigate the problems that we have encountered. A meeting with U.S. Pipe on these proposals is scheduled for July.

Unauthorized Use of Hydrants - Staff is responding to an increasing number of reports of unauthorized use of hydrants by contractors who are connecting to the hydrants for water needed in their construction operations. Hydrants being operated by individuals for personal cooling and recreation are also increasing. In light of our on-going concerns about distribution system security, staff is responding to these reports following an established protocol.

Broadway at Preston Main Break - A 30-inch by 20-inch cross at Broadway and Preston Streets failed in late June. After considering various repair options, it has been concluded that the opportunity exists to improve the configuration of the piping in this intersection and also to consider the replacement of broken valves in the transmission mains.

Transmission Valve Repairs - Progress is being made on resolving a variety of problems with large transmission valves identified this past winter.

Hybrid Fuel Vehicles - As part of the 2003 fleet replacement program we have added four hybrid fuel vehicles to the fleet. Four Toyota Prius' were received and are now in service.

Mr. Heitzman also reported on U.S. Pipe Fire Hydrants and Gate Valves – Product Performance Issues.

“Metroseal” Resilient Seat Gate Valves - In 2001 LWC encountered problems with difficult-to-operate twelve-inch gate valves furnished by U.S. Pipe. In 2002 LWC experienced additional problems with their valves. The more recent problem has been the inability to get the valves to close to achieve a water tight shut-off.

Staff has maintained a dialog with U.S. Pipe on this issue. By letter dated September 6, 2002, U.S. Pipe's Principal Product Engineer responded to the problem of “high torque required to seal the 12-inch Metroseal valves manufactured in 2001.”

The most recent action of LWC staff was the development of a detailed draft proposal which suggests a program for the inspection and mitigation of problems with the subject gate valves. The proposal also suggests the respective responsibilities of both LWC and U.S. Pipe for conducting and funding this work. This proposal was sent to U.S. Pipe in June 2003.

“Metropolitan” Fire Hydrants - In late November 2002, LWC's fire hydrant maintenance crew reported an apparent trend with U.S. Pipe fire hydrants being difficult to operate, and in some cases the hydrant is completely inoperable.

A review of records indicates that nearly 6,000 hydrants of this type have been purchased from U.S. Pipe and installed since this contract was executed in 1997.

Because of the serious risk associated with non-functioning fire hydrants, staff has taken a number of steps to assess the problem. These steps included a review of contract specifications and the material specification for the stem.

As with the gate valve issues discussed above, staff most recently developed a detailed draft proposal which suggests a program for the inspection and mitigation of problems with the Metropolitan fire hydrants. This proposal was sent to U.S. Pipe in June 2003.

SERVING CUSTOMERS REPORT

Ms. Teasley presented the Serving Customer's report for June 2003.

Performance Measures – The June 2003 abandonment rate was 5.4%, compared to 4.0% in May 2003, and 7.1% in June 2002. The year-to-date number is 4.8%.

Bad debt for the month of June was \$47,963 compared to \$25,179 in June 2002. This is \$12,546 over budget for the month and \$56,059 over budget year to date. The company has recently obtained a new collection agency. We anticipate improved collection results.

Second Quarter 2003 Customer Satisfaction Results – Customer satisfaction dropped from the first to the second quarter by 18 points to a Total CSI of 835. The drop was primarily in the area of residential non-service, decreasing 24 points.

Shepherdsville Update – Work is progressing on the Carpenter and Third Street main replacement projects with both projects expected to be completed by mid-July. A letter to establish project budgets is included separately which provides details of the project scopes, estimates and contingency contractors being utilized to complete the work.

Public Information Initiatives – LWC's Public Information staff continues to market the "Adventures in Water" curriculum. In June approximately 100 teachers went through the two day, in-service sessions at LWC. Before it is reprinted, input from the teachers will be used to update this multi-disciplinary learning tool.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

AUDIT COMMITTEE MEETING

Mr. Bond presented the June 6, 2003 Audit Committee report.

Mr. Bond stated that he wanted to make sure the Board members had an opportunity to review the audit report prior to presenting the committee report.

Mr. Bond reminded the members that certain aspects of the audit report changed based upon Louisville Water Company's compliance with GASB 13. He then proceeded to point out the critical differences in the audit report this year as opposed to last year's report. The statement of net assets is now used rather than a balance sheet.

Mr. Bond noted that Crowe Chizek issued an unqualified opinion.

After proper motion and second, the Board of Water Works voted to accept the audit report from Crowe Chizek and to approve the Audit Committee report.

After proper motion and second, the Board of Water Works voted to retain the services of Crowe Chizek to perform the 2003 Audit for a fee of \$29,300.00.

Mr. Huber then requested that Mr. Conner present the Compensation Committee report.

COMPENSATION COMMITTEE

Mr. Conner presented the Compensation Committee report.

Mr. Conner reported that Louisville Water Company has two non-standard practices. These non-standard practices are as follows:

- 1) Non-Union employees are paid for the current week worked. That is, the Company does not hold a week of pay in reserve.
- 2) The company reserves funds each year to pay the next years vacation. When an employee leaves, the company will pay accrued vacation for the coming year.

Mr. Connor reported that although the company had a right to do otherwise, current employees will continue to benefit from the accrual of future vacation upon departure. As Louisville Water Company switches to a pay in arrears system, employees will be permitted to request payment of one week in advance to be taken from future vacation pay-out at departure. Several Board members expressed an interest in adopting a policy which would negate employees' right to be paid accrued vacation at departure if that employee has been terminated for cause. After proper motion and second, the Board of Water Works voted to adopt a pay one week in arrears policy and to offer employees an opportunity to receive one week of accrued vacation in lieu of experiencing one week without pay. Further, current employees would be treated under the current policy at departure. The Board's action applies to non-union employees only.

SPECIAL ISSUES

Ms. Douglas administered the Oath of Service to Dr. Joseph B. Wise, III.

BID TABULATIONS

Mr. Miller presented the following Bid Tabulations:

03-33: Stone and Soil

On June 25, 2003, sealed bids were opened to award a two-year contingency contract for stone and soil. The contract is based on estimated usage and firm unit pricing. This contract involves the pickup and delivery of stone and soil to LWC job sites.

Ten bids were submitted with the following bidders all submitting responsive bids:

Sellersburg Stone (Stone)
Rogers Group (Stone)
Earth First (Stone)
Liters (Stone)
Quality Stone (Stone)
Mother Earth (Soil)
Earth First (Soil)
Buddeke (Soil)

After proper motion and second, the Board of Water Works voted to authorize staff to award a two-year unit price contingency contract totaling an estimated **\$395,704** to vendors listed above.

03-40: Vehicle Truck Bodies:

On June 18, 2003, sealed bids were opened to award a one-year contract to purchase and install truck bodies to fit cab and chassis purchased in the 2003 Fleet Bid.

Five bids were submitted. Due to operational information provided from truck manufacturer, line item 7 will not be purchased.

After proper motion and second, the Board of Water Works authorized staff to award one-year contracts for the following values:

Wabash National	\$97,412
Americas Body Company	\$24,200
Manning Equipment Co.	<u>\$ 11,223</u>
TOTAL	\$132,835

03-41: Road and Tire Service

On June 25, 2003, sealed bids were opened to award a two-year contract for road and tire service.

Three bids were submitted with the lowest, most responsive bid from **Huber Tire** for an estimated two-year total of **\$340,425**.

After proper motion and second, the Board of Water Works voted to authorize staff to award a two-year unit price contract totaling an estimated **\$340,425** to **Huber Tire**.

Mr. Huber noted that Melvin Huber, Jr. of Huber Tire is a relative. However, Mr. Huber played no role in the award of this bid.

Ms. Teasley presented the following Bid Tabulations:

03-507: Shelbyville Road – Main Replacement Project

Bids were received and opened Wednesday, June 11, 2003 to install 7,310 linear feet of 6, 8, 12 and 16-inch Pressure Class 350 ductile iron water main along Shelbyville Road between Whipps Mill Road and Hurstbourne Parkway in eastern Jefferson County. The project scope includes the renewal of fire hydrants and the transfer or renewal of customer services.

A total of 5 bids were received and opened from pre-qualified contractors.

After proper motion and second, the Board of Water Works voted to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$394,000 to DF Crane Construction Corporation to install the water facilities associated with this project.

03-514: Blankenbaker Lane - Main Replacement Project

Bids were received and opened Wednesday, June 25, 2003 to install 1,340 linear feet of 6 and 12-inch Pressure Class 350 ductile iron water main along Blankenbaker Lane between Poplar Hill Road and Twin Hill Road in eastern Jefferson County. The project scope includes the renewal of 2 fire hydrants and the transfer of 4 customer services.

A total of 3 bids were received and opened from pre-qualified contractors. After proper motion and second, the Board of Water Works authorized the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$100,000 to Debbie Sutherland Excavating to install the water facilities associated with this project.

Mr. Heitzman presented the following Bid Tabulations:

02-674: Watson Lane 16" / 12" Grid Tie

Bids were received Wednesday, June 25, 2002, to Furnish and Install approximately 4,040 feet of 16-inch water main in Watson Lane between Dixie Highway and Tennis Blvd. Approximately 1,500 feet of 12-inch water main will be furnished and installed in Tennis Blvd. between Watson Lane and the existing 12" main that services the LG&E Mill Creek Power Plant.

A total of 6 bids were received from qualified contracting firms.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a contract in the amount of \$463,760 to install a 16-inch and 12-inch main to firms *D.F. Crane Construction Corporation*, to install water facilities associated with this project.

COMMUNICATIONS

Ms. Teasley presented the **Amendment to Shepherdsville Asset Acquisition Agreement**.

On December 23, 2002, the Louisville Water Company and the City of Shepherdsville executed an Asset Acquisition Agreement whereby LWC acquired the assets of Shepherdsville's water system and LWC agreed to operate that system as part of the LWC system.

In an effort to meet the LWC's commitment to serve customers of the former Shepherdsville water system equally with similarly situated customers under LWC Service Rules and Regulations, an Amendment to the Asset Acquisition Agreement between City of Shepherdsville and LWC was executed.

The amendment clarifies that LWC will assess the system development charge on all new water mains installed after the date of execution of the Asset Acquisition Agreement. It also provides that all fire service connections (regardless of when they are installed), and all connections to a

main in service prior to the execution of the Asset Acquisition Agreement, shall be exempt from the system development charge.

The amendment also affects Exhibit R to the Asset Acquisition Agreement. For all three of the subdivisions listed in this exhibit currently under development, LWC shall charge only the standard service installation fee. LWC also agrees to put into the reserve the full Shepherdsville service installation fee for certain lots that have meters already installed, but no applications for service have yet been received. The amount to be placed into the reserve fund is \$31,350.

Ms. Teasley presented the **Bluegrass Water Supply Consortium**.

To address current and future water supply needs in central Kentucky a group of the region's water suppliers formed the Bluegrass Water Supply Consortium. The Bluegrass Water Supply Consortium includes water suppliers from Lexington, Frankfort, Shelbyville, Georgetown, Nicholasville, Winchester, Paris, Mt. Sterling, Versailles, Lawrenceburg, Harrodsburg, Wilmore, Danville, Cynthiana and Lancaster.

Currently, the Consortium is focusing their efforts on identifying the most desirable water supply alternative(s) to provide 10 to 15 MGD to the region within a 3 to 5 year time frame. Louisville Water Company personnel have attended several of the Consortium's public workshops and have met with the Consortium's technical review team to express our interest in the project as a potential supplier for near term and long term regional water supply needs. In response to our interest and the favorable evaluation of Louisville as a supply option, staff has been requested to submit information to the Consortium for comparing the sale of finished water from Louisville to the other supply alternatives. The response is to be based on two scenarios – one, a maximum day demand of 25 MGD and the other, a maximum day demand of 45 MGD.

OLD BUSINESS

Ms. Teasley presented the following Old Business:

Professional Service Contract for Construction Inspection and Technician Services Contract #E872.

A professional service contract with Quest Engineers, Inc. to provide Construction Inspection and Technician Services for the Constructing Capital Improvements Processes was approved by the July 2000 Board. This approval authorized staff to supplement existing LWC in-house inspection forces with Quest Engineers consultant personnel to provide quality assurance and insure adherence to LWC Standard Technical Specifications for work performed by LWC contractors.

An updated proposal was requested from Quest Engineers, based on performance by the Quest Engineers employees, to continue to provide these services for the remainder of the 2003 and 2004 Capital Improvement Program to assure construction quality by maintaining inspection coverage on current capital projects.

After proper motion and second, the Board of Water Works approved to renew the existing professional service contract with Quest Engineers a fourth year for the not-to-exceed amount of \$467,184 for Construction Inspection and Technician Services.

NEW BUSINESS

Ms. Teasley presented the following New Business:

LWC Main Replacement Projects 03-517 and 03-519 - Shepherdsville

Since acquisition of the water distribution system in December 2002, the LWC has repaired numerous water main breaks in Shepherdsville.

Based on the recent main break activity, two areas of immediate concern have been identified - Third Street between Abbott Street and Frank E Simon Street, and Carpenter Street between Second Street and south of Highway 44.

To expedite the replacement of these two troublesome mains, staff initiated Contract 01-30 - Contingency Contract for Distribution System Repairs. To further facilitate the replacement work, two separate replacement projects were created and two different contractors were selected. Project 03-517 replaces the existing 4-inch unlined cast iron water main in Third Street with a new 8-inch HDPE main using main bursting technology.

After proper motion and second, the Board of Water Works voted to establish project budgets of \$110,822 for Project 03-517 and \$151,160 for Project 03-519. The contracts with Tom Brown Construction Company and Southern Pipeline were approved by the President in June.

Mr. Heitzman presented the following New Business:

Request for Top Hill Road Property Conveyance to Louisville/Jefferson County Metro

On June 26, 1990, the Company purchased 3.58 acres located at 2060 Top Hill Road, Fairdale, KY for the amount of \$7,300.00. A site map is attached. The property was originally purchased for a water tank site to serve the Jefferson Forest area. Since that time a water storage tank was constructed at the entrance to Jefferson Forest at Holsclaw Hill Road. The Top Hill Road site is no longer needed for a storage site.

Concurrent with this interest on the Top Hill property, the Company has been in discussions with Louisville/Jefferson County Metro and the Parks Department about construction of a new water storage tank at Long Run Park in eastern Jefferson County. This proposed 1.0 million gallon elevated tank will replace the existing standpipe at the park.

In accordance with Bond covenants, property disposal requires several steps, including a review and assessment by our Consulting Engineer, and approval by the Board of Water Works and Louisville/Jefferson County Metro Council. Typically, excess property is then advertised for public bid. However, in this case we recommend conveyance to Louisville/Jefferson County Metro as consideration for the grant of the easement we require for the Long Run Tank. Black & Veatch Engineers have reviewed the Top Hill property and provided their opinion that the property is considered excess and recommends disposal.

After proper motion and second, the Board of Water Works voted to adopt the resolution (certified copy attached to these minutes) to declare the Top Hill property excess and proceed to transfer the property to Louisville/Jefferson County Metro in accordance with the Bond covenants on disposal of real property.

Mr. Gregory presented the following New Business:

The IT identifies several Information Supply Systems to enhance customer service and satisfaction by leveraging our investment in the Customer Information System. The Business-to-Customer e-Business Application (Interactive Web Response System) is one of the projects identified in the IT plan to meet the customer service and satisfaction objectives of the Company.

The IWR Project will greatly improve customer satisfaction by providing the following features:

- a) customer registration of username/password;
- b) basic account information (name, account #, balance(s), service address, payment history, bad debt info, consumption, mailing address, phone number(s), e-mail addresses);
- c) customer access to change personal data (phone numbers, e-mail addresses, password)
- d) automatic "turn-on" work order generated to reconnect service turned off for non-payment
- e) "high bill" information
- f) payment extensions (HOLDS)
- g) EFT forms for automatic bank charge program
- h) Updated Frequently Asked Questions (FAQ) menu specific to billing, metering, service requests, account information, new-service applications and fee schedule adjustment information.

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with development of a final design and request-for-proposal of the Interactive Web Response system, implementation services and necessary interface development to complete the project.

The meeting adjourned at 3:20 p.m.

**Board of Water Works
Resolution**

July 8, 2003

The Board of Water Works having been sufficiently advised by Louisville Water Company's Consulting Engineer, Black & Veatch Engineers, as to the status of the Top Hill Road property owned by LWC (currently considered "excess property" to be disposed of pursuant to the provisions of LWC's Revenue Bond Resolution, adopted July 14, 1992, as said status is documented in Black & Veatch's letter dated June 10, 2003), which property was originally purchased by LWC to be used for a planned water tank prior to the siting of that water tank elsewhere, and which property is now of interest to the Louisville/Jefferson County Metro Government as a property to be acquired to consolidate the Metro Government's holdings in the Jefferson Memorial Forest.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial and in LWC's best interests to dispose of the said Top Hill Road property by conveying the said property to Louisville/Jefferson County Metro Government, pursuant to the provisions of LWC's Bond Resolution adopted July 14, 1992, and that the Board hereby recommends and refers the proposed disposition of the Top Hill Road property to the Louisville/Jefferson County Metro Council, pursuant to LWC's Bond Resolution adopted July 14, 1992, for the Metro Council's consideration of this matter.

**BOARD OF WATER WORKS
AUGUST 12, 2003
BOARD MEETING MINUTES**

Board Members Present

Mr. Stephen Gault
Mr. Stewart Conner
Dr. Joseph Wise
Ms. Wendy Welsh

Board Members Absent

Mr. Jack Segell
Mr. Phillip Bond
The Hon. Jerry C. Abramson

Others Present

Mr. John Huber, President
Ms. Laura Douglas, Vice President, General Counsel, Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources
Mr. Richard Johnstone, Deputy Mayor
Mr. Steve Greseth, Black & Veatch
Mr. James Smith
Mr. Ralph McCord
Mr. Michael Sturgeon
Ms. Rhonda Plunkett
Ms. Barbara Crow
Mr. Kevin Grant

Mr. Huber called the meeting to order at 12:40 p.m.

CONSENT AGENDA APPROVED

- Item A:** MINUTES OF THE REGULAR MEETING HELD JULY 8, 2003
REQUEST: APPROVE MINUTES
- Item B:** CLAIMS PAID DURING JULY 2003
REQUEST: FILE CLAIMS FOR FUTURE AUDIT.
- Item C:** PETITIONS AND APPLICATIONS FOR WATER MAIN EXTENSIONS AND RELOCATIONS
(WHEN IN FULL COMPLIANCE / SR&R)

REPORT OF OFFICERS

Administrative Report

Mr. Huber reminded the Board members of the August 26, 2003 Special Board Meeting

Financial Report

Income and Expense Summary

Mr. Miller gave the Income and Expense Summary for July 2003.

Total operating revenue of \$54,999,800 is \$758,300 or 1.40% more than budgeted and \$1,898,300 or 3.57% more than the same period in 2002.

Operation and maintenance expense of \$25,098,800 is \$494,000 or 2.01% more than budgeted and \$1,835,400 or 7.89% more than 2002.

Total non-operating income of \$1,407,500 is \$673,500 or 32.36% less than budgeted. Total non-operating expense of \$3,878,100 is \$47,300 or 1.24% more than budgeted.

Net income of \$13,330,600 is \$416,800 or 3.03% less than budgeted and \$862,800 or 6.08% less than 2002.

Operations Report for August 2003

Mr. Heitzman gave the Operations and Engineering Report for August 2003.

Mr. Heitzman reported that the Louisville Water Company experienced an apparent chlorine leak on Sunday, August 10, 2003. The leak was quite small and contained within the building. The leak did not reach the reportable quantity. The plant was shut down. There were no difficulties at plant restart.

Production – The water production in July of 146.9 MGD was 10.9 percent lower than the July 2002 production of 165 MGD and 5.2 percent lower than the 5-year average July production of 155 MGD. The lower than normal production in the month was a result of cool and wet weather.

Plant Maintenance - Coagulation Basin Clarifier #8 at Crescent Hill has shown signs of imminent failure. Coagulation Units #5 and #6 are under emergency repair. Unit #6 is expected to be available for service the week of August 4. If Unit #8 fails prior to October 1, an additional change order may be required to repair the unit under emergency contract with Vesco Engineering.

Emergency Response Planning – Water Quality Staff initiated contacts with the National Guard 41st Civil Support Team – a team that responds to terrorist threats. It was agreed that LWC and the team will conduct a drill together later this year.

Seven Counties Services in Shepherdsville – In early July, water quality monitoring at the Seven Counties Services facility in Shepherdsville indicated the internal water supply was contaminated. Water quality staff determined the contamination was limited to the internal plumbing within the building.

U.S. Pipe Hydrants & Valves – Beginning in August, two representatives of U.S. Pipe and Foundry Company will work with LWC employees to inspect and gather information on the problems experienced with U.S. Pipe hydrants and resilient seat gate valves. The plan is to inspect a large sample of both hydrants and valves, with the sampling results to be used as a basis for identifying further action to remedy these problems. A meeting between LWC and U.S. Pipe will occur in September, after sampling results are available, to begin developing plans for further action. The Louisville Fire Department and County Fire Districts have been advised of the potential hydrant issues.

Proposed Federal Regulations for Microbial Pathogens and Disinfection By-Products - The proposed federal regulations for Microbial Pathogens and Disinfection By-Products have been completed by the EPA and were published on August 11, 2003 in the Federal Register. These rules have been 10 years in the making. LWC will participate in the compilation of comments for the Proposed Stage 2 Disinfection By-Products regulation.

Serving Customers Report

Mr. McCord gave the Serving Customers report for July 2003.

Bad debt for the month of July was \$66,190 compared to \$36,879 in July 2002. This is \$39,840 over budget for the month and \$95,899 over budget year to date.

Shepherdsville Capital Improvements – In response to excessive number of main breaks in the Shepherdsville system, three main sections were identified for replacement or transfers of services. The largest number of breaks occurred in a 6-inch unlined, cast iron water main in Highway 44 from Abbott Street to Saltwell Road.

To date, work has been completed on Carpenter Street and the work on Second Street is 80% complete. Other additional capital work completed or underway in Shepherdsville includes the 8-inch grid tie in Raymond Road (complete), the 12-inch and 16-inch water main through the Shepherds Crossing commercial development (80% complete) and the Chilicoop to Blue Lick 12-inch grid tie (30% complete).

Bullitt County Advisory Board – The Bullitt County Advisory Board met for its regular quarterly meeting on July 28, 2003.

The Advisory Board continues to actively review projects in their initial design phase as well as those under construction. One concern expressed by the Advisory Board is the number of customers along a two-thirds majority main extension who signed a letter of intent to apply for water versus those customers that actually apply for and receive water service following the completion of the main installation. An attached table summarizes the two-thirds majority main extension activity to date.

Public Information Initiatives – Mr. McCord notified the Board that Louisville Water Company will likely outsource its bottling facility. Government Affairs has been actively working with the Metro Council's Public Health and Safety Committee on the City's proposed fire hydrant ordinance.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation, acquisition of property and personnel items. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

Mr. Gault presented the report from the Public Information and Customer Satisfaction Committee held on August 11, 2003.

At the committee meeting, Ms. Teasley reported that the 2003 recommended CSI goal is 850. The 2003 Level I goal is 835.

Louisville Water Company

Bullitt County Extension Program Residents Served Progress Along 2/3 Majority Main Extensions

Project No.	Description	To : From	Petitions Received	Final Tapping Fee	Unserviced Residences	In Service	Services after 6 Months	Percent Served	Services To Date	Percent Served

The 2008 CSI recommended factor goals have been set as follows:

Reliability: 890
Water Quality: 870
Price Value: 815

Mr. Huber reminded the Committee members that there will be additional discussion of these recommended goals at the August 26, 2003 Special Board of Water Works meeting.

Ms. Camp stated that beginning in the 3rd or 4th quarter this year, customers will be able to use an interactive web page and interactive voice response to pay their water bills.

The final item was a review of the Customer Service charges for information purposes only.

	<u>Customer Cost</u>	<u>LWC Actual Cost</u>
Returned Check	\$10.00	\$12.36
Non-payment fee	\$20.00	\$21.78
Service Found On	\$20.00	\$31.02
Cut Angle Value Fee	\$90.00	\$93.81
Leak Detection Fee	\$50.00 hr.	\$39.94

After the committee report, Mr. Huber decided to take two items out of sequence. These items were: Expansion of Automatic Meter Reading Technology and Minority/Women Business Enterprise (M/WBE) Program.

NEW BUSINESS

Mr. Sturgeon and Mr. Grant presented the Expansion of Automatic Meter Reading (AMR) Technology report. They stated that the AMR pilot has been very successful.

The Radio Frequency Automated Meter Reading (RF-AMR) pilot program in the old Kentucky Turnpike Water District No. 2 has been underway for 15 months.

Staff recommends the RF-AMR pilot program be expanded to include the recently-acquired Goshen and Shepherdsville water systems. The expansion of the pilot into these two areas would add 3,843 meters to the 3,031 already in the pilot program for a total of 6,874 RF-AMR sites.

The contract with Neptune Equipment Company provides for the anticipated expansion of the pilot program. The proposal includes a 15-year warranty on the equipment and replacement of the transmitter battery at year 10. The contract also includes a unit price for each meter read in

each billing cycle under contract with Neptune with annual adjustments according to the Consumer Price Index. Estimated capital costs for materials, equipment, and installation of the 3,843 meters are as follows:

<u>Neptune Cost</u>	
Material and equipment	\$316,814
Installation	<u>\$117,311</u>
Total Neptune Cost	<u>\$434,125</u>
<u>LWC Cost</u>	
Operations/Administrative Support	\$ 5,677
Total LWC Cost	<u>\$ 5,677</u>

After proper motion and second, the Board of Water Works authorized a sole-source contract to ORCOM in an amount not to exceed \$60,000.00 to develop automated service order updates.

In addition the Board of Water Works authorized a \$25,000.00 project contingency and a capital budget for the RF-AMR project, including contingency, of \$524,802.00. Prior to the vote, Mr. Huber stated that Louisville Water Company has developed a close working relationship with Neptune. We would like to develop other bidders.

COMMUNICATIONS

Ms. Plunkett reported on the Minority/Women Business Enterprise (M/WBE) Program as a Communications item.

In January of this year, the Executive Leadership Team requested the Minority Business Development (MBD) Team to recommend a replacement for the Evaluated Bid Pilot Program.

The MBD Team recommended a new M/WBE Program modeled after the one used by Metro Louisville.

The new program offers the following highlights and changes:

- 5% overall M/WBE spending goals
- 15% MBE and 5% WBE project goals
- Application to all areas of LWC procurement (construction, professional services, goods and services)
- Contracts are awarded to the responsive and responsible bidder whose bid is the lowest bid price
- Responsive bidders are those who demonstrate "good faith efforts" to solicit and utilize M/WBE firms

An M/WBE Specialist will be hired to lead the execution of the new program.

Effective implementation will depend upon adequate resources and support throughout the organization and from contractors and suppliers.

The Board again expressed their support for the program.

BID TABULATIONS

Mr. Miller reported on the following Bid Tabulations:

BID NO.: 03-42 COPPER TUBING

On July 9, 2003, sealed bids were opened to award a contract for a six-month supply of copper tubing.

Five bids were received.

After proper motion and second, the Board of Water Works authorized staff purchase of a six-month supply of copper tubing totaling \$177,249 from Water Works Supply Company.

BID NO.: 00-66: LARGE AND SMALL METER VAULT FRAMES AND LIDS: 2ND PPI RENEWAL
On February 28, 2001, sealed bids were opened to award a one-year contract for the purchase of small and large meter vault frames and lids. This contract began May 21, 2002 for one year, renewable up to four (4) additional one (1) year periods using the Producer's Price Index – Commodity Code “wpu 1015 – 0425” “Gray and Ductile Iron Casting, Casting for Construction and Utility use” as the price adjustment factor. Meter vault frames and lids are used to secure water meters. At contract inception, a total of eight (8) proposals were received. The bidders submitting the best proposal were Bingham and Taylor, General Foundries and Ford Meter Box at an estimated cost of \$228,405.

After proper motion and second, the Board of Water Works authorized staff to award a second one-year PPI renewal for an estimated total of \$280,008.15. The second PPI renewal represents a 0.2% decrease from last year's unit prices.

PROJECT NO.: 01-207 SCOTTS GAP ROAD WATER MAIN EXTENSION PROJECT

Bids were received Wednesday, July 30, 2003, to install approximately 5,145 lineal feet of 8-inch water main on Scotts Gap Road between Blevins Gap Road and Pendleton Road.

A total of **six** bids were received from qualified contracting firms. The low responsive base bid in the amount of **\$137,500** was submitted by **Trinity Service Company**.

After proper motion and second, the Board of Water Works authorized the Vice President of Serving Customers and Business Development to award a contract in the amount of **\$137,500** to **Trinity Service Company** to install water facilities associated with this project.

COMMUNICATIONS

WATER SUPPLY TO CENTRAL KENTUCKY

Mr. Huber and Mr. Smith reported on Water Supply to Central Kentucky.

Louisville Water Company is currently involved in discussions with the Bluegrass Water Supply Consortium regarding the provision of finished potable water to water districts and municipalities in Central Kentucky. An initial discussion document was submitted to the Consortium on July 9, 2003.

On July 23rd at an open meeting, the Consortium publicly evaluated the proposals received. Louisville Water Company was fourth in the evaluation. The Consortium asked four proposers, including Louisville, to resubmit a proposal. Louisville Water Company submitted a new proposal at \$1.28/thousand gal. up to the daily average usage level. Anything above the average daily usage rate, would be billed at \$1.35/thousand gal. Louisville Water Company's new proposal will now be evaluated by the Consortium. Staff will advise the Board of Water Works of the outcome.

JEFFERSON COUNTY WATER EXTENSION PROGRAM SUMMARY REPORT

Mr. McCord provided the Jefferson County Water Extension Program Summary Report.

Approximately 16 miles of public road water mains from the original scope have not been installed. Some areas have been developed and water mains are no longer needed or have no homes along the route. Other areas have been presented the opportunity for water service, but have failed to achieve the target 51 percent majority petition. Many private roads have not been served due to the high cost of unsubsidized private road extensions. Approximately five miles of main have received a majority petition and are under design for construction in 2003. By year end, we expect the Program to achieve a 90 percent completion rate for public road extensions, recognizing there are remaining pocket areas of the County that do not desire water service. This will leave approximately 300 remaining residents without access to a public water main in Jefferson County, yielding a population served percentage of 99.9.

Staff recommended a final deadline of December 31, 2002 for the subsidized apportionment warrant cost of \$5,450 for public road extensions. This deadline brought closure to the Program in an efficient and cost-effective manner. Water mains extended in 2003 and beyond can be accomplished by Apportionment Warrant Extension petition; however, the subsidy would not be available.

Staff will continue the completion of the Program in 2003, expecting most construction to be completed by December 2003 and total Program closeout to be complete by April 2004.

OLD BUSINESS

Mr. McCord reported on the following Old Business:
ISSUANCE OF APPORTIONMENT WARRANTS PER KRS 96.265
DAWSON HILL RD: BRUSH RUN RD TO BACK RUN RD

A public hearing was held January 25, 2001 for the extension of water service along Dawson Hill Rd: Brush Run Rd to Back Run Rd. The Board of Water Works adopted a resolution for Dawson Hill Rd: Brush Run Rd to Back Run Rd on February 13, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 5, Series 2001 on March 27, 2001 for the Dawson Hill Rd: Brush Run Rd to Back Run Rd project.

With the completion of the public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt a resolution (certified copy attached to these minutes) for the issuance of Apportionment Warrants and liens against 10 benefited properties along Dawson Hill Rd: Brush Run Rd to Back Run Rd in accordance with KRS. 96.265, as described.

Mr. Heitzman reported on the following Old Business:
PROJECT 00-418 B. E. PAYNE PLANT IMPROVEMENT PROJECT
LG&E UNDERGROUND ELECTRIC SERVICE

The B. E. Payne Plant Improvement Project to expand the plant to 60 million gallons per day firm capacity includes an allocation of \$1 million to provide a parallel underground electric power feed from LG&E. This second feed will improve power supply reliability from LG&E.

The existing power feed to the B. E. Payne Plant is an overhead electric line that parallels Timber Ridge Drive. Exposure to storm damage and vehicular traffic make the overhead electric vulnerable to interrupted service. LG&E proposed a parallel underground 12,000 volt, 1,200 amp feed from the Harrod's Creek Electric Substation on US 42.

LG&E provided a cost proposal of \$646,164 for the underground power feed. This cost plus the engineering associated with the design are within the \$1 million budget reservation.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to enter into an agreement with LG&E to provide the underground electric power feed to the B. E. Payne Plant for an amount not-to-exceed \$646,164.

Ms. Welsh abstained from the Board's vote on this item.

PROJECT 02-658 REPLACE HVAC UNIT AT ALLMOND DISTRIBUTION CENTER

This project was authorized in June 2002 by the Board for design and bid at a budget of \$350,000. The final budget estimate has increased to \$475,000 to accommodate a distributed HVAC system and off-hour construction schedules.

The present central-plant multi-zone unit dates from the 1967 construction of the facility. The Allmond Distribution Center was originally utilized for light, industrial use, but over time it has been adapted to administrative use including offices, workstation cubicles and meeting rooms. This adaptive use of the building has led to inefficient operation of a central HVAC system. A distributed HVAC system will provide for maximum operational flexibility.

The distributed HVAC system, duct work, and associated electrical service increase the cost above the budget allocation of \$350,000. In addition, a portion of the work will be scheduled during off-hours and weekends to minimize disruption to LWC business operations.

After proper motion and second, the Board of Water Works voted to increase the budget of Project 02-658 from \$350,000 to \$475,000 and authorized staff to proceed with advertisement for bid. The bid results will be returned to the Board for approval of the construction contract.

PROJECT 99-416 - CRESCENT HILL AND ZORN WASH WATER AND RESIDUALS COLLECTION SYSTEM

In 1999, the Board authorized CH2M Hill Engineers to conduct a comprehensive evaluation of the drainage and solids management systems at the Crescent Hill and BE Payne Treatment Plants.

Staff has reviewed the CH2M Hill recommendations and performed an assessment of the water treatment vulnerabilities and priorities at Crescent Hill. The first priority is to construct a second 800,000 gallon wash water holding tank and pump station at Crescent Hill to optimize filter wash cycles. The second priority is to upgrade the Zorn lagoon facility for emergency storage and discharge of plant residuals to the Ohio River by permit. The third priority is construction of a waste water storage facility and pump station at Crescent Hill that will optimize operations and management of wash water and plant residuals to the BE Payne lagoon system. The combined budget allocation for these improvements is \$4.55 million.

Staff has solicited a proposal from CH2M Hill Engineers in accordance with the Facilities Improvement Consulting Engineering Services RFP approved by the Board in December 2002. A not-to-exceed cost of \$570,600 has been negotiated for engineering design and construction services.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a professional services contract to CH2M Hill Engineers, Inc. in the amount of \$570,600 for engineering design and construction services for the Crescent Hill Wash Water and Residuals Collection System and to establish a budget of \$4.55 million to complete the project. The project will proceed to advertisement and bid and any major change of scope exceeding 10 percent of budget will be returned to the Board for approval.

Mr. Miller presented the following Old Business:

BULLITT COUNTY RESERVE FUND

Mr. Miller discussed the need to establish a Shepherdsville bank account for the Bullitt County reserve fund at the request of the Mayor of Shepherdsville.

After proper motion and second, the Board of Water Works voted to adopt a resolution (a certified copy of the resolution is attached to these minutes) to open a deposit account for the Shepherdsville Bond Reserve.

Mr. McCord presented the following Old Business:

REQUEST FOR CHANGE ACTION LIBERTY STREET – MAIN REPLACEMENT PROJECT 01-508

On August 20, 2001, the Company entered into a contract in the amount of \$197,950.00 with Portland Utilities Construction Company for construction of the Liberty Street Main Replacement Project.

Subsequent to the submittal and approval of Change Action No. 6, Portland Utilities submitted a claim in the amount of \$314,000 to cover lost time and wages that resulted from unforeseen and unforeseeable conditions encountered at the project site.

At the request of the Louisville Water Company, Portland Utilities submitted a revised claim totaling \$182,713.32 for costs associated with delays encountered only within the limits of the intersections of Liberty Street with Brook Street, 1st Street, 2nd Street, and 3rd Street. Staff evaluated the claim based on site conditions, familiarity of the Contractor with the scope of work, a comparison with other similar scoped projects, and the quality of the documentation provided by Portland Utilities.

After proper motion and second, the Board of Water Works voted to issue a change action with Portland Utilities changing the contract price from \$287,354.77 to \$439,354.77, and to proceed with the close-out of this project.

NEW BUSINESS

Mr. Heitzman reported on the following New Business:

PROJECT 03-661 CHAPEZE LANE 16-INCH TRANSMISSION MAIN

The project transmission main is part of the \$5 million Interstate 65 (I-65) Transmission System committed by LWC in the Kentucky Turnpike Water District Merger Agreement. The project includes 3,900 feet of 16-inch water main in Chapeze Lane between Kentucky Highway 61 and I-65.

This leg of the I-65 Transmission System will provide hydraulic support across the interstate to Jim Beam Distillery. Future legs of the transmission grid will link this main north to the Cedar Grove Business Park and east to Highway 245 and set up potential for additional water sales to Lebanon Junction and Nelson County.

After proper motion and second, the Board of Water Works voted to authorize staff to proceed with final design and advertisement for bid. Bids will be submitted to the Board for approval of a construction contract.

PROJECT 00-401 ZORN INTAKE IMPROVEMENTS

The Zorn Intake Tower serves as the primary source of water intake from the Ohio River for the Crescent Hill Treatment plant. The screens were last replaced in 1962 and a major overhaul was conducted in the 1980's. In addition, Annual Inspections recommend a structural analysis of the intake tower and support foundation.

Staff recommends the design work for this project be outsourced using the Facility Improvement Consulting Engineer RFP process, approved by the Board in December 2002. Staff believes CDM Engineers has the experience required to perform the structural analysis and design services.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a contract to Camp, Dresser, & McKee Engineers, Inc. in the not-to-exceed amount of \$161,525 for preliminary engineering design and voted to establish the project budget at \$1,000,000. Upon completion of design, the project will be advertised for bid.

Mr. Smith presented the following New Business:

NORTH NELSON WATER DISTRICT WHOLESALE SUPPLY CONTRACT

Staff is currently negotiating a new wholesale water supply contract with North Nelson Water District (NNWD). The existing contract, executed in 1996, was inherited in the KT Water District merger.

At the June 2003 Board of Water Works meeting staff was authorized to open negotiations with North Nelson Water District, based upon LWC's standard wholesale rate of \$1.35 per thousand gallons for elevated service. The objective of entering into a new contract is to increase water sales to NNWD.

After proper motion and second, the Board of Water Works voted to authorize the President to enter into a new contract to supply wholesale water to NNWD at LWC's standard wholesale elevated service rate of \$1.35 per thousand gallons.

Mr. Miller stated that Louisville Water Company's standard wholesale rate has been in place since 1994. Plans are now in place for staff to move wholesale rates up to \$1.49 per thousand gallons for all wholesale customers.

BEECH GROVE ROAD PORTABLE, BOOSTER PUMP STATION

The following proposes a non-budgeted capital project to install an above ground, portable booster on pump station on Beech Grove Road north of the intersection at Highway 61 and 245 (see attached map). The pump station is proposed to address an unfulfilled, KT Water District contract commitment to supply 350 gallons per minute to Jim Beam's Clermont Distillery. Transmission improvements along Chapeeze Road to supply the contract amounts are 2 to 3 years away from being completed. Installation of the portable pump station will allow us to meet the contract commitments to Jim Beam, alleviate low pressure problems in the Highway 245

corridor during high demands, improve reliability by providing a second source into the 760 PZ, and provide LWC with the capability to supply wholesale water south along Highway 61 to Lebanon Junction. Once transmission improvements are complete, the portable pump station will be stored or relocated to meet future needs.

After proper motion and second, the Board of Water Works authorized staff to proceed with engineering design and advertisement for bid to install the portable booster pump station. Total project costs are estimated at \$124,000.

GAP IN KNOB PORTABLE, BOOSTER PUMP STATION:

The current booster pump station, acquired in the KT merger, supplies water to the Gap in Knob Standpipe, which provides water to the Pointe subdivision in Shepherdsville. Its location in-line is a hydraulic barrier preventing us from utilizing the recently completed transmission improvements line in Highway 61 and 16" line, east of I-65. The new pump station will be located in the access road leading to the Gap in the Knob tank, which will allow us to utilize the transmission improvement while still providing domestic water service and fire protection to the Pointe subdivision.

After proper motion and second, the Board voted to authorize staff to proceed with engineering design and advertisement for bid to install the portable booster pump station. Total project costs are estimated at \$126,155.

Mr. McCord presented the following New Business:

**I-65 TRANSMISSION SYSTEM – SHEPHERDSVILLE & BULLITT COUNTY, KENTUCKY
HIGHWAY 61 AT HIGHWAY 1020 TO ADAM SHEPHERD PARKWAY**

Salt River Development Company, LLC has proposed an applicant financed tapping fee main extension to serve a new public road to be built in 2003 from Highway 61 at Highway 1020 south to Adam Shepherd Parkway that is presently under construction. This new public road will be built on lands presently owned by the State of Kentucky (Kentucky Transportation Cabinet), the City of Shepherdsville and the developer.

This proposed main extension along this route presents an opportunity for the Louisville Water Company to address a number of water transmission and distribution concerns associated with the Shepherdsville water system and the KT#2 meter district south of the Salt River.

It is estimated that the cost to upsize the proposed twelve (12) inch PVC main extension to a sixteen (16) inch ductile iron main extension is \$225,000 for a estimated total project cost of \$780,000.

After proper motion and second, the Board of Water Works authorized the Vice President of Serving Customers and Business Development to execute an Applicant Financed Tapping Fee Contract for a developer installed sixteen (16) inch ductile iron main extension of approximately 10,500 linear feet for total project budget of \$780,000. This will result in a net capital cost of \$225,000 to the Louisville Water Company.

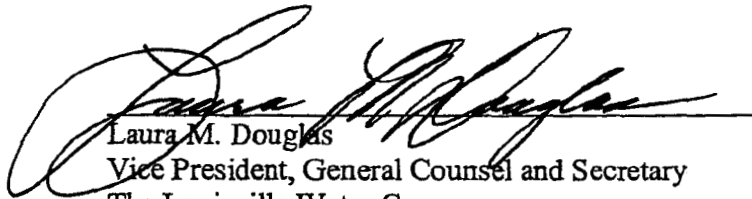

The meeting adjourned at 3:17 p.m.

**Certificate of Resolution
of the
Board of Water Works**

As Secretary of the Board of Water Works, I hereby certify that the Board of Water Works adopted the following resolution at its regular meeting on August 12, 2003, in accordance with its Charter and By-laws.

Authorization to Open Deposit Account

RESOLVED, that upon motion duly made and seconded, Amber Halloran is hereby authorized to open a bank account at the Bullitt County Bank. The Shepherdsville Bond Reserve funds will be deposited in this account.

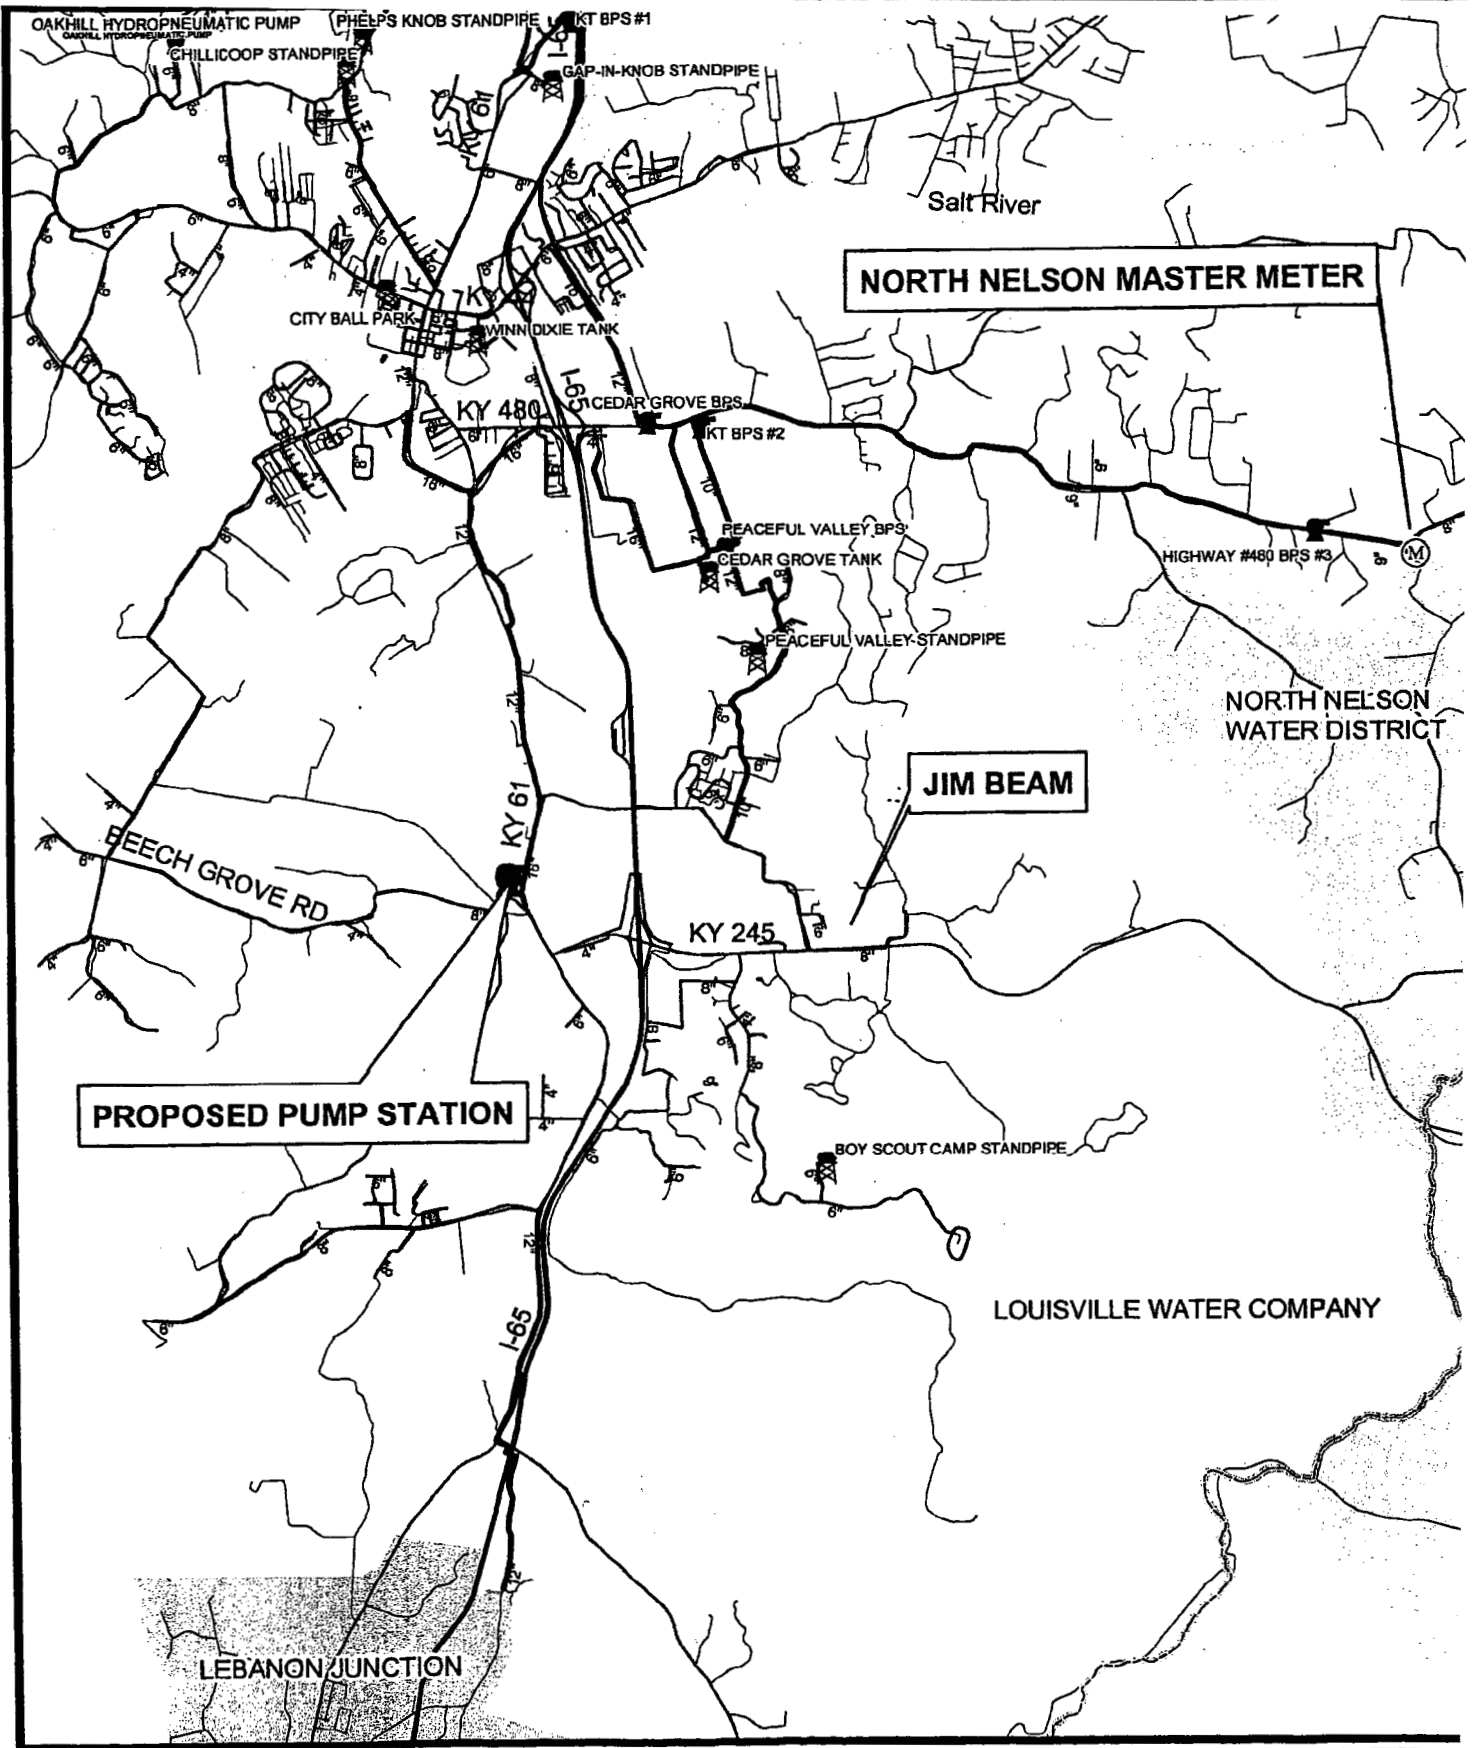

Laura M. Douglas
Vice President, General Counsel and Secretary
The Louisville Water Company

Subscribed and sworn to (or affirmed) before me the 21st day of August, 2003.

Janet Fiandaca, Notary Public

DATE: 8/4/03

Scale: 1"=7000'

**Board of Water Works
Resolution**

February 13, 2001

It appearing that this Board has received petitions, signed by a majority of the owners of property abutting **Brush Run Road: Echo Trail to Dawson Hill Road**, a public way in Jefferson County, and acting thereon convened a public hearing on January 25, 2001, notice of which was duly published in accordance with Chapter 424 of the Kentucky Revised Statutes (a copy of which notice is attached), to consider the benefits of extending water service to such properties, and it further appearing that following such hearing and meeting, and receipt by the Board of a report thereon, the Vice President-Chief Engineer of the Company has recommended the extension of such water along **Brush Run Road: Echo Trail to Dawson Hill Road**, as being feasible and beneficial.

NOW, THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial to extend such water service along **Brush Run Road: Echo Trail to Dawson Hill Road**, and, by these presents, does hereby recommend and refer the proposed water service extension to the Jefferson County Fiscal Court, pursuant to KRS 96.265, for its consideration of an ordinance providing for the extension of such water service.

APPORTIONMENT WARRANT RESOLUTION

August 12, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Dawson Hill Rd: Brush Run Rd to Back Run Rd** main extension project authorized by Ordinance No. 5, Series 2001 of the Jefferson Fiscal Court, adopted on March 27, 2001 such warrants to be against ten (10) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

REPORT OF OFFICERS

Administrative Report

Mr. Huber announced that representatives from GAO visited Louisville Water Company recently to discuss the infrastructure renewal program. GAO representatives reported that Louisville's practices in the area of infrastructure renewal are often held up nationally as best in class.

Mr. Huber also described the role that Louisville Water Company plays with the University of Louisville's Research Foundation.

Financial Report

Mr. Miller presented the Financial Report for August 2003:

Income and Expense Summary

Total operating revenue of \$64,091,900 is \$304,700 or 0.47% less than budgeted and \$1,096,000 or 1.74% more than the same period in 2002. We sold 3.20% less water in 2003 than the same period in 2002. Water delivered to the mains was 1.05% less than 2002.

Operation and maintenance expense of \$28,719,900 is \$358,500 or 1.26% more than budgeted and \$1,821,800 or 6.77% more than 2002.

Net operating income of \$19,107,600 is \$778,500 or 3.92% less than budgeted.

Net income of \$16,297,900 is \$1,597,600 or 8.93% less than budgeted and \$1,833,900 or 10.11% less than 2002.

Mr. Huber stated that given August's poor financial performance, the company is considering declining to make a contribution to the infrastructure replacement fund for 2003. He asked Mr. Miller to present the details of this plan to the Board.

Mr. Miller presented the following report and plan:

The 2003 Annual Budget contemplated funding of the Infrastructure Replacement Reserve in the amount of \$2,285,000. During the first eight months of 2003, revenues have been less than expected due to an unusually wet irrigation season and low interest earnings on investments. This has been accompanied by higher than expected maintenance and retirement of assets and expenses. It now appears that revenues, net of expenses, may not be sufficient to fully fund the Infrastructure Replacement Reserve in 2003.

There are no bond covenants requiring deposits to the Infrastructure Replacement Reserve; these deposits are made solely at the discretion of the Board of Water Works.

When the Board of Water Works established the Infrastructure Replacement Reserve, the Series 1992 Bond Resolution was amended to exclude deposits to the Infrastructure Reserve from Net Income when computing the dividend. The Dividend Computation contemplated the 2003 Annual Budget is as follows:

Net Income	\$29,238,000
Less: Bond Principal Payments	\$ 4,485,000
Infrastructure Replacement Reserve	\$ 2,825,000
Goshen Water Reserve	\$ 207,000
Bullitt County Water Reserve	\$ 1,189,700
Net Income Available for Dividend	\$20,531,300
Dividend	\$12,318,800

The following is an example of the dividend computation if earnings for the year are significantly below budgeted levels and funding of the Infrastructure Replacement Reserve is deferred:

Net Income	\$26,413,000
Less: Bond Principal Payments	\$ 4,485,000
Infrastructure Replacement Reserve	\$ 0
Goshen Water Reserve	\$ 207,000
Bullitt County Water Reserve	\$ 1,189,700
Net Income Available for Dividend	\$20,531,300
Dividend	\$12,318,800

Mr. Huber and Mr. Miller asked the Board of Water Works to consider suspending any deposit to the infrastructure replacement reserve for 2003. The Board will be asked to consider this matter at the October 2003 meeting.

Mr. Miller reported that the FINS project is on target for September 29, 2003 "Go Live" date.

Operations Report for May 2002

Mr. Heitzman presented the Operations and Engineering report for September 2003:

Production – The water production in August of 141.0 MGD was 15.0% lower than the August 2002 production of 165.8 MGD, and was 7.6% lower than the 5-year average July production of 152.6 MGD. The total precipitation for the month was 4.7 inches. This is 3.7 inches more than August 2002 and 2.2 inches more than the August 5-year average. For year-to-date, the total water production is 1.0% lower than 2002 and 0.6% lower than the 5-year average.

Distribution Water Quality – Staff collected 331 regular distribution samples in August. Sampling results have shown that the water quality in the distribution system exceeded our internal turbidity, chlorine and bacteria goals, which are more stringent than regulatory requirements.

Crescent Hill Sludge Discharge – On August 13, a MSD inspector observed an incident of water treatment residuals surcharging from a LWC manhole and overflowing to MSD's storm water collection system on Reservoir Avenue near the Meagher Aquatic Center. The root cause of the incident is the limited capacity of the pipeline to transport the residuals between Crescent Hill and BE Payne Plant lagoons. The Company has issued a professional services contract to CH2M Hill Engineers to design a pump station and collection system that will eliminate these surcharge events. In the interim, staff will meet with MSD to develop operating and reporting procedures to minimize overflow to MSD's storm collection system.

U.S. Pipe Hydrants & Valves – Two representatives of U.S. Pipe and Foundry Company spent the month of August in Louisville working with staff on the inspection of U.S. Pipe fire hydrants and gate valves. LWC has experienced a number of problems with the operability of US Pipe hydrants and valves. The sampling results are currently being documented and will be used as a basis for determining what further action will be required to remedy these problems. We plan a follow-up meeting with U.S. Pipe management in mid-September for the purpose of agreeing on the next steps to be performed in resolving these hydrant and valve issues.

Crescent Hill Reservoir Fencing, Sidewalk and Lighting Improvements – In April 2003, the Board authorized a third phase of site improvements to the Crescent Hill Reservoir with a budget of \$1,050,000. Staff has completed the design for the security fencing, sidewalk and lighting improvements. The estimated cost for this scope of work is \$840,000. The security fence layout and design will allow flexibility to secure the reservoir and treatment complex consistent with the Homeland Security protocol for protecting water treatment facilities. The 2004 budget will include projects for the parking lot expansion for the Aquatic Center and the auxiliary drain system for the reservoir.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report for August 2003:

Performance Measures – The August 2003 abandonment rate was 4.49%, compared to 3.24% in July 2003, and 5.48% in August 2002. The year-to-date abandonment rate is 4.53%. We are very close to achieving our abandonment rate goal of 4.5% or less for 2003.

Bad debt for the month of August was \$26,957 compared to \$66,190 in July 2003, and \$28,630 in August 2002. This is \$8,460 under budget for the month and \$78,350 over budget year to date.

Bluegrass Consortium - As discussed in the August BOWW meeting, LWC, on August 8, submitted a revised response to the Bluegrass Water Supply Consortium (BWSC) for providing water to the Central Kentucky area. The revised response, based on a 2:1 peaking factor, provided rates of \$1.28 per thousand up to 18 MGD of water supplied and our standard wholesale rate of \$1.35 per thousand for greater amounts up to the maximum requested of 45 MGD. Results of these evaluations will be presented in an open forum on September 23, 2003 in Lexington.

Public Information Initiatives – Louisville Water Company partnered this month at the Kentucky State Fair with the Kentucky Dental Association. Over 5,600 children received Pure Tap bottles and free dental education material touting the benefit of fluoridated water. Over 2,300 children received free screenings. LWC employees helped staff the booth.

LITIGATION REPORT

After proper motion and second, the Board adjourned to closed session for the purpose of discussing litigation and acquisition of property. Ms. Douglas gave a litigation report in closed session. The Board reconvened in open session without taking any action.

REPORT OF COMMITTEES

No reports

SPECIAL ISSUES

Mr. Miller reported on the **Declaration of Dividend to the City of Louisville.**

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville/Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City.

The budgeted net income of \$29,238,000 for 2003 requires payment of an annual dividend of \$12,318,831 in quarterly installments of \$3,079,708. The quarterly dividend payment must be increased by \$89,462 to reflect one quarter of the \$357,847 dividend underpayment in 2002.

A draft resolution to declare the third quarterly 2003 dividend in the amount of \$3,079,708 is attached. This resolution provides for a total quarterly payment of \$3,169,170.

Mr. Huber indicated that due to the absence of a quorum a motion of Unanimous Consent would be used to obtain the signature of absent Board Members.

2004 – 2006 Information Technology Strategic Plan

Mr. Huber deferred consideration of the 2004-2006 Information Technology Strategic Plan until the October 2003 Board meeting.

BID TABULATIONS

Mr. Heitzman reported on the following Bid Tabulations:

Bid No. 03-38: Water Treatment Chemicals

On August 6, 2003, sealed bids were opened to award a one-year contract for the purchase of water treatment chemicals. The contract is based on estimated usage and firm unit pricing.

The recommendation for award may not fully comply with state regulatory requirements that all chemicals purchased for the purpose of treating potable water are NSF certified.

The estimated contract value for water treatment chemicals increased by 14.61% over the previous year's bid.

After proper motion and second, the Board of Water Works voted to authorize the Process Owner, Procurement of Goods and Services, to award one-year contracts in the estimated values as follows:

<u>Chemical</u>	<u>Supplier</u>	<u>Amount</u>
Ammonia	Univar	\$75,050.00
Fluorosilic Acid	KC Industries	\$104,287.00
Liquid Chlorine (CHFP)	Univar	\$159,120.00
Liquid Chlorine (BEP)	Univar	\$80,520.00
Ferric Chloride	Eaglebrook	\$749,000.00
Liquid Polyaluminum PACL	Polydyne/Kemiron	\$12,600.00
Pebble Quick Lime	Mississippi Lime	\$324,000.00
PolyDially Dimethyl Ammonium	Polydyne	\$56,000.00
Potassium Permanganate	Calciquest	\$12,500.00
Powdered Activated Carbon	Acticarb	\$64,560.00
Powdered Activated Carbon (Taste and Odor Grade)	Calgon Carbon	\$97,020.00
Soda Ash	Chemical Resources	\$10,650.00
Sodium Hydroxide	Jones Chemicals	\$31,118.00
		\$1,776,525.00

The Board instructed the Chief Engineer to have a discussion with the State regarding UL versus NSF certification. If there is an issue which develops from these discussions which impacts Louisville Water Company's ability to award this contract, this contract award will be reviewed again with the Board at its October, 2003 meeting.

Mr. Miller reported on the following Bid Tabulations:

Bid No. 02-41: Barricade Rentals

On September 25, 2002 sealed bids were opened to award a one-year contract for the purchase of barricades and barricade rentals. The contract began October 9, 2002 for one year, renewable up to four (4) additional one (1) year periods using the Consumer's Price Index.

At contract inception, one responsive and two "no bids" were received. The bidder submitting the best proposal was Flasher Barricade and Lite Company at an estimated cost of \$240,003.

After proper motion and second, the Board of Water Works voted to authorize the Process Owner Procurement of Goods and Services to award a one-year CPI renewal for an estimated total of \$245,043. The first CPI renewal represents a 2.1% increase in contract prices from the previous years.

Bid No. 03-49: Ready Mix Concrete

On August 20, 2003 sealed bids were opened to award a two-year contingency contract for ready mix concrete. The contract is based on estimated usage and firm unit pricing. This contract was bid as a contingency contract, allowing for price and timeliness of delivery to be considered in the procurement of concrete.

Three bids were submitted with the following bidders all submitting responsive bids:

Advance Ready Mix, Inc.

Pearce Brothers

Irving Materials

After proper motion and second, the Board of Water Works authorized staff, to award two-year unit price contracts totaling an estimated \$1,140,000 to vendors listed above.

Ms. Teasley reported on the following Bid Tabulations:

02-341, 02-342 & 02-347

HIGHWAY 44, BEARCAMP ROAD & YORKSHIRE BLVD., BULLITT COUNTY EXTENSION PROGRAM (BCEP)

Bids were received and opened Wednesday, August 27, 2003 to

1) furnish and install 5,715 linear feet of 8-inch PVC water main, install 192 linear feet of 8-inch DI pipe, install 125 linear feet of 16-inch casing pipe (open cut), install 40 linear feet of 16-inch casing pipe (bore and jack), and install seven (7) fire hydrants along Highway 44;

2) furnish and install 3,980 linear feet of 8-inch PVC water main, 60 linear feet of 6-inch PVC water main, and 20 linear feet of 4-inch PVC water main, install 554 linear feet of 8-inch DI pipe, install 402 linear feet of 16-inch casing pipe (open cut); install 52 linear feet of 16-inch casing pipe (bore and jack) and install five (5) fire hydrants along Yorkshire Blvd; and

3) furnish and install 6,635 linear feet of 8-inch PVC water main, install 880 linear feet of 8-inch DI pipe, install 60 linear feet of 16-inch casing pipe (open cut) and install six (6) fire hydrants along Bearcamp Road.

A total of 4 bids were received and opened from pre-qualified contractors.

WHF Inc. submitted the lowest responsive bid in the amount of \$520,010 resulting in a total project cost of \$660,210.

After proper motion and second, the Board of Water Works voted to authorize the Vice President of Serving Customers & Business Development to award a contract in the amount of \$520,010 to WHF Inc. to install the water facilities associated with this project.

03-312 Highway 44 Grid Tie Shepherdsville Water Improvement Program

Explanation of Need: Bids were received and opened Wednesday, August 27, 2003 to furnish and install 1,800 linear feet of 12-inch water main along Highway 44; open cut and install 80 L. F. of 24-inch steel casing pipe and; bore and install 40 L. F. of 24-inch steel casing pipe. The project is a grid tie between an existing 6-inch water main in the old Kentucky Turnpike Water District Division No. 1 service area and a 12-inch main in the old Shepherdsville Water District and extends from Pitts Point Road, 1,800 feet east along Highway 44. This project is a part of the Shepherdsville Water Improvement Program which was established as part of the merger agreement between Shepherdsville Water District and Louisville Water Company.

A total of 5 bids were received and opened from pre-qualified contractors. C Squared Inc submitted the lowest responsive bid in the amount of \$97,600 resulting in a total project cost of \$109,769.

After proper motion and second, the Board of Water Works voted to authorize the Vice President of Serving Customers & Business Development to establish a \$109,769 budget of record and to award a contract in the amount of \$97,600 to C Squared Inc. to install the water facilities associated with this project.

Mr. Heitzman reported on the following Bid Tabulations:

LWC Contingency Contract No. L-03

Transmission System Emergency Repairs and/or Capital Improvements

Annually, the Company solicits bids to perform emergency repairs and capital work on the transmission system.

The Company received six bids on Wednesday, August 27, 2003.

Four firms submitted unit bid prices for heavy pipeline repair/capital work: Hall Contracting of Kentucky, Inc.; MAC Construction & Excavating, Inc.; Miller Pipeline Corporation; and Southern Pipeline Construction Company. Three firms submitted unit bid prices for internal joint sealing work: J. Fletcher Creamer & Son, Inc.; Hunting HTI Rehab, Inc. LLC; and Miller Pipeline Corporation. Compared with the L-02 bid, unit prices for labor have increased up to 5 percent while unit bid prices for equipment showed both an increase and decrease in various categories.

These unit prices were filed. The bids will be bought forward on an individual basis in the future.

03-455 Roof Replacements at Crescent Hill Water Treatment Plant

Bids were received Wednesday, August 27 to replace roofs on the Crescent Hill Filter Plant Chlorine Building and Crescent Hill Pump Station Annex. The roofs on each facility are in excess of 20 years in age and experience leaks. The poor condition of these roofs are detailed in a Roof Condition Survey performed by consultant Roof Resources, Inc.

A base bid for the two roof replacements and an alternate bid for replacement of light monitor windows and masonry rehabilitation were requested. Three (3) bids were received for this project, ranging \$108,938-\$122,112 for the base bid, and \$24,755-\$28,874 for the alternate bid.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award a contract in the amount of \$137,812 to Swift Roofing of E'Town, Inc. for the base and alternate bids for replacement of roofs, windows, and masonry at the production facilities.

OLD BUSINESS

2004 – 2006 Strategic Plan

Mr. Miller reviewed the Strategic Plan with Board members. The distributed plan was color coded, per the Board of Water Work's request at the Special Meeting held in August 2003, to show Board of Water Work's changes made, new items in the 2004 plan and items dropped from the 2002 plan. The Board expressed concurrence with the proposed plan.

LWC Service Rules and Regulations

2.03 Refunding of Installation Cost Extension Method

Mr. Huber announced that this item will be deferred to the October 2003 meeting.

Request for Authorization for One-Time Buyout of Existing Refunding Contracts

Mr. Huber announced that this item will be deferred to the October 2003 meeting.

Issuance of Apportionment Warrants per KRS 96.265

Dry Ridge Ln: Dry Ridge Rd to the County Line

A public hearing was held September 19, 2002 for the extension of water service along Dry Ridge Ln: Dry Ridge Rd to the County Line. The Board of Water Works adopted a resolution for Dry Ridge Ln: Dry Ridge Rd to the County Line on October 8, 2002 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance.

With the completion of the public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265.

After proper motion and second, the Board of Water Works voted to adopt a resolution for the issuance of Apportionment Warrants and liens against 6 benefited properties along Dry Ridge Ln: Dry Ridge Rd to the County Line in accordance with KRS. 96.265, as described.

NEW BUSINESS

Mr. Heitzman reported on the following New Business:

Project No. 02-673 Snyder Freeway 60-inch Valve Installation

This project was originally designed and bid on Sept 18, 2002 as a 36-inch interconnection from the Snyder Freeway 60-inch transmission main to the Westport Road 48-inch transmission main. This interconnection would provide a hydraulic loop between the Westport Transfer Station and the B.E. Payne Plant, in the event of a failure on the 60-inch main south of Westport Road. Bids received were unexpectedly high (\$524,700 to \$642,800) due to large quantities of rock excavation and construction in a developed intersection. The budget for this project is \$371,525.

Staff has evaluated alternatives to provide the transmission flexibility and minimize the cost of construction. The recommendation is to install two line valves on the 60-inch transmission main between Westport Road and LaGrange Road, on each side of the new Chamberlain Lane pump station supply line. This will allow flexibility to operate the Freys Hill and Chamberlain Lane pump stations from three sources: B.E. Payne Treatment Plant, Westport Road Transfer Station, and English Station Reservoir. In addition, the 2020 Facility Plan includes funding for a parallel 36-inch transmission main from B.E. Payne to Westport Road to be constructed from 2004-2008. This project will be accelerated to provide operational flexibility in the event of a transmission failure.

The revised project budget is estimated to be \$241,000 for engineering, materials, and installation. The Materials are estimated at \$167,000 and installation using the Contingency Contract is estimated at \$40,000.

After proper Motion and second, the Board of Water Works voted to authorize staff to proceed with final design and advertisement for bid of the materials for this project. The material bid results and the request to use the annual Contingency Contract will be presented to the Board for approval.

Project No. 03-833

Broadway at Preston Street 30-inch / 20-inch Transmission Main Improvement

In June 2003, a leak developed on the 30-inch x 20-inch cast iron cross in Broadway at Preston Street. In order to mitigate the risk associated with a complete failure of the transmission main, the intersection piping has been isolated and removed from service. The excavation has been plated to assure safe travel on Broadway and Preston Street.

Engineering has completed the evaluation of the repair alternatives and the recommendation is to replace the cross with two 30-inch tees, a line valve and new piping. The connection between the 30-inch main and the 20-inch main will be reconfigured to form straight connection,

eliminating two bends. This revised configuration will allow for ease of installation and future operational flexibility.

The project budget is estimated to be \$110,000, including engineering, materials, and construction. Design work is to be accomplished by Louisville Water Company staff.

After proper motion was made and second, the Board of Water Works voted to fund the 2003 capital budget in the amount of \$110,000 and authorized staff to proceed with final design and utilization of the L-02 Contingency Contract for Transmission Main Repairs and Capital Construction.

Mr. Huber stated that all items considered today will be presented to the Board for ratification at the October 2003 meeting.

The meeting adjourned at 2:25 p.m.

**RESOLUTION TO DECLARE THIRD QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 11, 2003 to adjust the 2002 annual dividend by \$357,847 from \$12,021,776 to \$12,379,623, the difference to be added in equal quarterly installments to the quarterly 2003 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2003 Louisville Water Company budget contemplates the 2003 annual dividend to be \$12,318,831 it would be in order at this time to declare a regular third quarter dividend of \$3,079,708.

RESOLVED, the regular third quarter 2003 dividend of \$3,079,708 is hereby declared.

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,169,170 to the Louisville/Jefferson County Revenue Commission on September 30, 2003, this being the third quarterly dividend for 2003 plus one quarter of the dividend adjustment for 2002, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

APPORTIONMENT WARRANT RESOLUTION

September 9, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Dry Ridge Ln: Dry Ridge Rd to the County Line** main extension project authorized by Ordinance No. 29, Series 2002 of the Jefferson Fiscal Court, adopted on November 12, 2002 such warrants to be against six (6) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**BOARD OF WATER WORKS
AUGUST 26, 2003 SPECIAL BOARD
MEETING MINUTES**

Board Members Present

Mr. Jack Segell
Mr. Stephen Gault
Dr. Joseph Wise
Mr. Stewart Conner
Ms. Wendy Welsh
Mr. Phillip Bond

Board Members Absent

The Hon. Jerry E. Abramson

Others Present

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources
Mr. Richard Johnstone, Deputy Mayor, Louisville/Jefferson County Metro
Mr. Steven Greseth, Black and Veatch
Mr. Stephen Hubbs, Vice President, New Technology
Ms. Barbara Crow, Process Owner, Public Information

Mr. Huber called the meeting to order at 12:10 p.m.

2002-2006 STRATEGIC PLAN MID-YEAR 2003 REPORT

Mr. Huber provided a historical perspective on the development of strategic planning at Louisville Water Company. He indicated that we are pleased to report mid-year results that indicate nine out of fourteen specific measurements are on target to achieve Louisville Water Company's 2003 goals. The increase in the Customer Satisfaction Index for serviced accounts is particularly noteworthy. The areas that are not on target are water rate changes, return on equity, operation and maintenance cost per customer, and preventable vehicular accidents. The results for the diversity goals will be reported at year-end. Mr. Miller reviewed the specific mid-year results.

2004 – 2008 DRAFT STRATEGIC PLAN

Mr. Huber provided an overview regarding the development of the draft 2004 - 2008 Strategic Plan and reviewed the Mission, Vision, and Values statements.

Mr. Conner asked for identification of specific changes in the Strategic Plan. Mr. Huber replied that a markup of the additions, changes, and deletions to the previous Strategic Plan would be sent to the Board by the next meeting.

Ms. Teasley presented the assumptions for Customer Expectations. Mr. Bond noted that higher MSD rate increases may have an impact on customer satisfaction. Mr. Heitzman presented the assumptions for Water Quality. Mr. Miller presented assumptions for Financial Resources. Mr. Conner advised that staff should consider an alternative benchmark to the Consumer Price Index for comparing anticipated changes in water rates.

Mr. Heitzman presented assumptions for Infrastructure and System Growth. Ms. Lehmann presented assumptions for Employees. Mr. Miller presented assumptions for Business Environment Influences.

Mr. Hubbs reviewed the strengths, weaknesses, opportunities and threats. He noted that certain of the weaknesses from the 1992 – 1996 Strategic Plan have become strengths for 2004 – 2008.

Karla Teasley presented the constituent goals and objectives relating to Customers. Ms. Welsh emphasized the need to consider a price benchmark other than the consumer price index.

Greg Heitzman presented the constituent goals and objectives relating to Water Quality. Mr. Bond recommended adding a reference to RBI in the constituent goals and objectives. There was also discussion relating to Taste, Odor and Discolored water issues.

Mr. Miller presented the constituent goals and objectives relating to the Stockholder. Ms. Lehmann presented the constituent goals and objectives relating to Employees. Mr. Huber presented the constituent goals and objectives relating to Elected Officials, Regulatory Agencies, the Community, and Suppliers.

Greg Heitzman presented Strategy I: Invest in treatment and delivery systems and technologies that deliver a quality of water service proven to assure public health and safety, meet customer expectations, and exceed regulatory standards.

Mr. Miller presented Strategy II: Operate competitively and demonstrate leadership in the water supply marketplace, focusing on customer satisfaction and the drivers of quality service and value. Mr. Segell recommended more specific reference to research provided by University of Louisville Economists as a basis for assumptions and adjectives.

Ms. Teasley presented Strategy III: Increase water revenue by selling more water.

Ms. Lehmann presented Strategy IV: Achieve and maintain a high quality of work life as defined in the Next Level Plan.

Ms. Teasley presented Strategy V: Enhance customer satisfaction and achieve best in class customer service by resourcing and implementing the Enhancing Customer Satisfaction and Customer Confidence Program Plan.

Mr. Gault advised staff to consider adding reference to the need for site acquisition for tank sites in advance of development.

Dr. Wise advised staff to consider the possibility of using the GDP price deflator in lieu of the CPI as benchmark for water rate changes.

2004 - 2006 INFORMATION TECHNOLOGY (IT) STRATEGIC PLAN

The Board determined to review the 2004 - 2006 Information Technology Strategic Plan at a later date.

The meeting adjourned at 2:20 p.m.

Respectfully:

Robert Miller, Vice President, Treasurer

**BOARD OF WATER WORKS
MEETING MINUTES
OCTOBER 14, 2003**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Stephen Gault
Dr. Joseph Wise

Board Members Absent:

Mayor Jerry Abramson
Mr. Jack Segell
Ms. Wendy Welsh

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Mary-James Young, Corporate Counsel
Mr. Steven Greseth, Black & Veatch
Mr. Jim Smith
Ms. Amber Halloran
Mr. Tony Gregory
Ms. Barbara Crow
Mr. Ralph McCord
Mr. Don McKay

Mr. Huber called the meeting to order at 12:35 p.m.

Ratification of Actions Taken at September 9, 2003 Board Meeting

Mr. Huber noted that there was not a quorum present at the September 9, 2003 meeting and reviewed actions taken at the meeting. Upon proper motion and second, the Board of Water Works unanimously voted to ratify all items voted upon and resolutions adopted at the September 9, 2003 meeting. Copies of the following Certified Resolutions are attached to these minutes:

- Resolution to Declare Third Quarter Dividend to the City of Louisville
- Apportionment Warrant Resolution – Dry Ridge Lane: Dry Ridge Road to the County Line

Mr. Huber also noted that he had authorized award of certain contracts presented at the September 9, 2003 meeting and asked the Board to ratify these items. The contracts awarded by the President are as follows:

- Ready Mix Concrete
- Barricade Rentals
- Water Treatment Chemicals

Mr. Miller distributed a letter wherein he recommended a modification to one of the award of contracts for water treatment chemicals. He noted that staff has determined that K. C. Industries was not certified for ANSI NSF Standard 60 by NSF in accordance with bid specifications and state drinking water regulations. He recommended that the best bid that fully complies with these specifications and regulations was from Solvay Fluorides.

Mr. Gault moved to ratify the President's award of certain Contracts presented at the September 9, 2003 meeting. He also moved award a one-year contract for the purchase of Fluorosilic Acid to Solvay Fluorides for the estimated amount of \$110,160. Upon second and vote, the motions carried.

Consent Agenda Reviewed and Approved

The minutes from the September 9, 2003 meeting of the Board of Water Works were approved.

The List of Claims Paid for September 2003 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Project	Contract	Project Name	Project Cost	Net Cost
Developer Installed Refunding Main Extension Projects				
02-089	G448M	Park Duvalle Phase 3B-2	\$38,050.00	
02-090	G449M	Park Duvalle Phase 3B-3	\$17,150.00	
02-091	G450M	Park Duvalle Phase 3B-4	\$18,460.00	
03-036	G447M	Oak Valley Section 3	\$53,700.00	
03-066	G455M	Scott Mills Road	\$12,300.00	\$1,200.00
03-072	G453M	Kellerman Place Section 3	\$42,350.00	
03-079	G454M	Polo Fields Section 17	\$12,180.00	
03-086	G479M	Greenwood Meadows Section 2	\$34,030.00	
Bullitt County Main Extension Projects				
03-327		Rams Run South Extension	\$13,000.00	\$7,550.00
Developer Relocation Projects				
03-851		Nichols Bus Shop	\$34,500.00	

Financial Report Filed

Mr. Miller presented the financial results through September 2003. He noted that this was the third month of four low irrigation sales months, with 30 more days of rain during 2003 than in 2002 and 23 more days of rain than during the five year average.

Total operating revenue of \$73,066,000 is \$1,577,900 or 2.11% less than budgeted and \$6,900 or 0.01% less than the same period in 2002. We sold 5.20% less water in 2003 than the same period in 2002. Water delivered to the mains was 2.73% less than 2002. Operation and maintenance expense of \$32,127,700 is \$229,900 or 0.72% more than budgeted and \$1,519,100 or 4.96% more than 2002. Operating deductions of \$50,561,800 are \$287,500 or 0.57% more than budgeted and \$2,479,200 or 5.16% more than 2002. Net operating income of \$22,504,200 is \$1,865,400 or 7.65% less than budgeted and \$2,486,100 or 9.95% less than 2002. Total non-operating income of \$1,754,800 is \$918,400 or 34.36% less than budgeted and \$424,300 or 19.47% less than 2002. Total non-operating expense of \$4,986,100 is \$61,300 or 1.25% more than budgeted and \$49,100 or 0.97% less than 2002. Net income of \$19,272,900 is \$2,845,200 or 12.86% less than budgeted and \$2,861,300 or 12.93% less than 2002 as a result of the low water sales, higher expenses, and low investment income.

Mr. Miller also distributed a forecast for the remainder of 2003. The net income is forecast to be \$3,681,000 less than budgeted. He noted that staff is continuing to take measures to meet the dividend target for the year.

Ms. Halloran and Mr. Gregory reported on the successful implementation of the new Oracle Financial Information System. The Board offered congratulations to them and their staff for completing the project on-time and on-budget.

The report was filed.

Operations Report Filed

Mr. Heitzman provided the Operations Report.

The water production in September of 129.4 MGD was 14.6 percent lower than the September 2002 production of 151.5 MGD, and was 9.1 percent lower than the 5-year average September production of 142.4 MGD. For year-to-date, the total water production of 130.1 MGD is 2.7 percent lower than 2002 production and 1.6 percent lower than the 5-year average. The lower than normal production in the month was a result of cool and wet weather. There were no major production or maintenance problems during the month.

Staff collected 317 regular distribution samples in September. Sampling results have shown that the water quality in our distribution system exceeded our internal turbidity, chlorine and bacteria goals, which are more stringent than regulatory requirements. There were no water quality monitoring and reporting violations in September. There were three Boil Water Advisories issued for September as a result of main breaks, all of which were localized to the main break areas.

Staff continues to work with U.S. Pipe representatives toward resolution of problems with U.S. Pipe fire hydrants and gate valves. A meeting was held in September with U.S. Pipe to review data which was collected in a joint inspection effort in August. Progress was made in that meeting in both defining the scope of the problems, and in developing mitigation strategies. Of primary concern at this time is identifying any fire hydrants in the system that may be inoperable. Toward this end, the Company is partnering with fire departments across the community to inspect hydrants for operability. This hydrant inspection program will be completed by December 1, prior to the winter season.

Repairs of a failed 30-inch by 20-inch cross in Broadway at Preston Street were completed in September by Southern Pipeline Construction Company. The work required significant traffic control which impacted traffic flow for the duration of the work. The main is being placed back in service at this time and only remedial restoration work remains. The cost estimate for this work is \$57,000. This work will be capitalized as the repair presented the opportunity to make significant pipe and valve improvements to this piping configuration.

The report was filed.

Serving Customers Report Filed

Ms. Teasley provided the Serving Customers Report.

The September 2003 call abandonment rate was 4.27% compared to 4.49% in August 2003 and 3.73% in September 2002. The year-to-date abandonment rate is 4.50%, meeting our goal for 2003. We will work toward maintaining these results through year-end.

Customer satisfaction was relatively flat from the second to the third quarter with an increase of two points to a Total CSI of 837. The residential non-service segment increased slightly, primarily due to increased perceptions of water quality and customer service. The largest drop in satisfaction related to price/value. Serviced accounts continue at a high level of satisfaction, increasing two points to a new high of 802. Higher satisfaction for commercial customers was the primary driver of the increase with improved perceptions of water quality, customer service and information. The year-to-date Total CSI is 842 compared to a Corporate Level II goal of 845. The year-to-date average for Serviced Customers is 800 compared to a Level III goal of 789. These results reflect very favorably on the quality of service provided by LWC employees to its customers.

The Mobile Dispatch System project implementation has been underway since June 2003. Viryanet, Inc. was awarded the contract for the system software and implementation services by the Board of Water Works in May 2003. The hardware and wireless communication system components have been purchased and initial system installation has been completed. The project team and Viryanet personnel have completed the initial configuration of the system based on the functional specifications provided by LWC staff. Currently, the project team is undergoing system training and has begun testing the system functionality and some of the key interfaces to other information supply systems. The system implementation is on track for the December 2003 go-live of the initial phase of the project. The remaining phase of the project for First Run Response procedures is on track for a March 2004 go-live. The project is currently under the total budgeted amount; however, there have been some cost variations in the areas of wireless

network design, networking equipment, interfaces, and LWC internal labor costs. Staff is in the process of analyzing the remaining project needs and costs, and updating the budget as necessary. Staff plans to provide a detailed summary of the project at an upcoming Board meeting.

The report was filed.

Closed Session Discussion

After proper motion and second, the Board went into closed session at 1:05 p.m. for the purpose of discussing litigation and acquisition of property. The Board reconvened in open session at 1:30 p.m. after taking no action.

Audit Committee Report Filed

Mr. Bond presented a report from the Audit Committee. He noted that the Audit Committee had met on September 23, 2003. Roger LeMaster and Scott Muhlenbeck had presented the 2003 Inventory Audit. The inventory variances are down; however, there is a concern regarding the truck inventory.

The Committee had reviewed results from the Code of Ethics Questionnaire. Four hundred eight-four questionnaires were sent out and all were returned. Eighteen employees had reported concerns regarding harassment and discrimination issues. There will be follow up by management and the Audit Committee on this matter.

The Committee had also reviewed the Contract Administration Audit. The audit focused on the necessity for General Counsel's review of contracts prior to signature by the President at certain dollar amounts and the necessity for legal review prior to changing standard documents. On a similar matter, the Committee had reviewed the property lease audit. The Internal Auditor recommended centralized record keeping and consistent legal review of all leases.

Mr. Bond noted that the new financial information system went "live" on September 29, 2003. Auditors from Crowe-Chizek will be in-house soon to begin their preliminary work on the 2003 financial audit. Mr. Bond extended thanks to Ms. Welsh for her early advice and input on the project.

The report was filed.

Compensation Committee Report Filed

Mr. Conner presented a report from the Compensation Committee. He noted that the Compensation Committee had met on October 7, 2003.

Mr. Conner reported that the salaried and hourly staff are now paid one week in arrears. This was accomplished by paying the week of September 29 through October 3 from accrued 2004 vacation. He then provided a detailed explanation of past practices and future recommendations on vacation accruals. He noted that staff has recommended the conversion of 7/12ths of the accrued vacation to sick leave and increasing the amount of sick leave that can be carried over

each year from 15 days to 20 days. Employees will then be required to use seven rather than five sick days before they can access short term disability. Staff will review this policy change with representatives from Metro Louisville government before proceeding. The report was filed.

Funding of the Infrastructure Replacement Reserve in 2003

Mr. Miller reported that the 2003 Annual Budget contemplated funding of the Infrastructure Replacement Reserve in the amount of \$2,825,000. It appears that revenues, net of expenses, will not be sufficient to fully fund the Infrastructure Replacement Reserve in 2003.

Mr. Miller indicated that it would be appropriate to consider a resolution to defer funding of the Infrastructure Replacement Reserve for 2003. Mr. Bond moved to adopt the recommend resolution. Upon second and vote, the motion carried. A certified copy of the resolution is attached to these minutes.

Authorization to File Preliminary 2004 Annual Budget with City and Trustees

Mr. Miller provided a brief summary of the Preliminary 2004 Annual Budget. The Board agreed to review the budget at a special meeting to be scheduled in late October or early November. Upon proper motion and second, the Board authorized staff to file the Preliminary 2004 Annual Budget with the City and the Bond Trustees by October 31, 2003 in accordance with covenants in the Series 1992 Bond Resolution.

Discussion Deferred on Information Technology Strategic Plan

Discussion of the 2004 – 2006 Information Technology Strategic Plan was deferred until the November 2003 meeting.

Saratoga Springs Application for Water Main Extensions Approved with Service Limitations

Mr. McCord reported that Louisville Water Company has received two applications for extension of water mains to serve a proposed development, Saratoga Springs Section 1A and Section 1B. There are a total of 69 lots planned for the first two sections of this development, of which 20 lots, 9 in Section 1A and 11 in Section 1B, will not meet the newly implemented customer satisfaction minimum design water pressure of 40 psi at the meter.

He recommended that these two projects proceed as proposed by the Applicant except that the Applicant agrees that water service applications will not be accepted by LWC for those 20 lots (Lots 18-20, 40-45, 88-92, 153-154, and 173-176) which will not meet the newly implemented customer satisfaction minimum design water pressure of 40 psi at the meter until such time that one of the following conditions are met:

- Property is acquired by LWC, and Metro Louisville Planning & Design approves the same property for the construction and operation of an elevated water tank to support a 900 foot msl Pressure Plane in the vicinity of Taylorsville Road from Tucker Station Road to the Gene Snyder Freeway, or

- Applicant extends a main from Section 1B of Saratoga Springs to the 8-inch water main located along Sweeney Lane which would allow for Saratoga Springs to be moved from the 860 foot msl Pressure Plane along Old Heady Road to the existing 900 foot msl Pressure Plane supporting Taylorsville Road at Tucker Station Road, or
- Applicant extends a main from Section 1B of Saratoga Springs to the existing Stone Lakes Subdivision property boundary and LWC completes a grid tie from such main to the 12-inch main in Stone Lakes Subdivision which would allow for Saratoga Springs to be moved from the 860 foot msl Pressure Plane along Old Heady Road to the existing 900 foot msl Pressure Plane supporting the Stone Lakes Subdivision.

Mr. Bond questioned the timetable for meeting the conditions. Mr. McCord indicated that the developer prefers the second choice, to be completed within nine to twelve months. Mr. Conner move to authorize the proposed main extensions for Saratoga Springs Section 1A and Section 1B, with the conditions as set forth above. Upon second and vote, the motion carried.

Change to Service Rules and Regulations:
Refunding of Installation Cost Extension Method

Staff had previously advised the Board of Water Works of its work with its developer community customers to develop an accelerated refunding payment method as opposed to the current twenty-year refund schedule annual payments on July 8, 2003. Staff has since developed a proposed alternative Refunding of Installation Cost Extension Method (Rule 2.03). This alternative method would pay the developer the present value, discounted at a rate of 5% per annum, of the monthly refund amount per size of meter connected to the distribution main extension for which they advanced funds. At the time the Refunding Contract is executed with LWC, the developer applicant would select one of the anniversary dates, from two to five years from when the main extension is placed into service, for the present value to be calculated and to be refunded. The benefits to LWC include reduced administration costs as well as improved cash management.

Staff met with the Land and Development Committee of the Home Builders Association of Louisville (HBAL) at their July 15 meeting to present the proposed rule change and to offer them the opportunity to express their thoughts and concerns. The resulting response from the HBAL Land and Development Committee is supportive of the proposed change. Mr. Bond moved for approval of the addition of Rule 2.03 Refunding of Installation Cost Extension Method to the Service Rules and Regulations. Upon second and vote, the motion carried.

Buyout of Existing Refunding Contracts Authorized

LWC staff currently maintains 1,144 refunding contracts. The total maximum anticipated refund liability for these contracts over the next twenty years is \$6,450,265. Upon adoption of the proposed changes to Section 2.04, Mr. Miller noted that LWC can significantly reduce the administrative burden associated with these refunding contracts by offering a one-time buyout. A policy adopted previously by the Board of Water Works allows staff to process contract buyouts initiated by the developer based on a ten percent discount of the future anticipated payments for the contract. This discount factor was set when long-term tax-exempt interest rates were about eight percent. Buyouts using this discount factor typically occur less than five times

per year. Staff believes that a lower discount factor could result in a significant increase in contract buyouts and, likewise, a decrease in the continuing contract administration responsibilities.

Dr. Wise moved to approve the recommendation to lower the discount factor used to calculate contract buyouts to five percent for the period between October 15, 2003 and April 15, 2004 and that the developers be solicited to participate in a one-time buyout of the existing refunding contracts. Upon second and vote, the motion carried. Mr. Miller noted that the purchase price if all of the contracts were bought out is approximately \$4,300,000. The difference between the total maximum anticipated refund liability and the buyout purchase price would be considered as additional contributed capital.

Contract Awarded for Project 03-520: Lead Service Renewals – Contractor Installed

Sealed bids were received and opened Wednesday, September 24, 2003 to renew a total of 253 lead services on portions of East Brandies Street, East Jacob Street, Sherry Road, Lydia Avenue, and East Breckinridge Street. A total of 4 bids were received and opened from pre-qualified contractors. Tom Brown Construction Company submitted the lowest responsive bid in the amount of \$223,146 resulting in a total project cost of \$291,306.

After proper motion and second, the Board of Water Works authorized the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$223,146 to Tom Brown Construction Company to renew the lead services associated with this project.

Bids Reviewed for Bid 03-43: Contingency Contract for Distribution System Repairs

Sealed bids were received and opened on October 1, 2003 to award a two-year contingency contract for Distribution System Repairs. The contract is based on estimated usage and firm unit pricing. Four firms submitted unit price bids: Mac Construction, Southern Pipeline Construction, Tom Brown Construction, and T&C Contracting. Compared to the prior year bid, unit prices for labor increased 3% annually.

Contracts will be issued on an as-needed basis, with the approval by the President for contracts up to \$100,000 and by the Board of Water Works for contracts exceeding \$100,000. The basis of contract award will include: the Contractor's unit price bid entries; the Contractor's work history for timeliness, quality, coordination and safety; and the Contractor's availability to perform the specified work to meet operational needs.

Contract Awarded for Project 02-618: Crescent Hill Reservoir Site Improvements Phase IIIA Security Fence Installation

Sealed bids were received and opened on October 1, 2003 to new install security fencing at the Crescent Hill Reservoir and the Crescent Hill property boundaries north of Frankfort Avenue. The base bid includes installation of fencing and gates. The alternate bid added removal of existing fence and vegetation for properties along Pennsylvania Avenue. Five bids were received for this project.

After proper motion and second, the Board of Water Works voted to authorize the Chief Engineer to award a contract in the amount of \$401,810 to T&C Contracting, Inc. for the alternate bid for installation of security fencing and gates plus vegetation removal at Crescent Hill Filter Plant.

Project Remediation Update: Clean and Cement Mortar Cast Iron Water Mains

Ms. Teasley reported that by letter agreement dated April 4, 2002 between Louisville Water Company and Southern Pipeline Construction Company, the Company amended and renewed the Clean and Line contract for one additional year. At that time it was agreed that the amendment resolved some, but not all, of the outstanding issues. It was also agreed that the parties would resolve those remaining issues by July 1, 2002. The amendment required Southern to reline designated sections of cast iron pipe that did not receive a minimum thickness of 1/16th inch. Southern has completed all of this re-lining work.

Dependent upon the condition of the lining, sub-standard sections of lining are over-sprayed, cleaned and re-lined, or the pipe is replaced prior to acceptance. During the period referenced above, five sections of cement lined pipe totaling just over 1,500 feet have been identified for re-spraying. This footage represents less than 4% of the total pipe footage lined. No instances of fallen lining or bare pipe have been observed this year.

Amendment of Apportionment Warrant Register: Stout Road: Broad Run Road to North 7,800 Feet

While researching an Apportionment Warrant appeal in the Stout Road area, staff discovered that Tax Block 57 Lot 54 was mistakenly given a contiguous parcel waiver; Tax Block 57 Lot 199 (account # 899629) was identified as the contiguously assessed parcel. Both parcels are owned by Virgil Hawthorne, however, staff's research identified that Lot 199 is owned by Virgil and Vicki Hawthorne while Lot 54 is owned by Virgil Hawthorne and Virginia Stevens, thus making the properties ineligible for the contiguous parcel waiver.

After proper motion and second, the Board of Water Works voted to approve the resolution amending the resolution approved at the April 8, 2003 Board meeting for Stout Rd: Broad Run Rd to North 7,800 ft. A copy of the certified resolution is attached to these minutes.

2003 Annual Inspection Report Filed

Steve Greseth of Black & Veatch distributed a summary presentation of the 2003 Annual Inspection Report. The report was based upon inspection and review of water supply and treatment facilities, insurance policies, and financial management practices and water rates. He stated that it is the opinion of Black & Veatch that the water supply and treatment facilities and associated equipment have been maintained in good repair and sound operating condition and are capable of continuously supplying potable water to the Company's customers. He reviewed a list of recommended actions and assigned priorities based on field inspection results. The report was filed.

Project 03-603 Goshen Area Main Replacement Project Authorized for Final Design and Advertisement for Bids

Ms. Teasley noted that in 2002, Louisville Water Company completed acquisition of the Goshen Utilities water treatment and distribution system from AquaSource. To identify and prioritize potential system improvements, the Goshen Distribution System Improvement Program was established. Improvement planned through this effort include the completion of system grid-ties, replacing under-sized mains, relocation of mains, and abandonment of mains which are no longer adequate to provide service. Staff has initially identified over 11,000 feet of distribution system pipeline that currently needs to be constructed, replaced, upsized, or abandoned. The estimated cost of the improvements currently planned totals \$725,500.

After proper motion and second, the Board of Water Works authorized staff to proceed with the final design and advertisement for bids on the Goshen Area Main Replacement Project as described above.

Bullitt County Water Improvement Program Request for Consulting Engineering Services Approved

The 2003 Capital Improvement Program identifies improvements to the distribution system in the former Kentucky Turnpike Water District in Bullitt County having a total value of approximately \$18 million dollars to be constructed over the next five years. A number of these projects are currently being designed by in-house staff, and are in various stages of design and construction. Toward this end, staff has prepared a Request for Proposal for Engineering Services (RFP) and will solicit proposals from engineering consultants. The intent of the RFP is to solicit qualifications, experience, and hourly rates for the consultants' key job classifications. LWC staff will then perform a qualifications based selection using information provided by the consultants' submittals. The results of the RFP selection process will be presented to the Board. Contracts exceeding \$100,000 will be submitted to the Board of Water Works for approval.

After proper motion and second, the Board of Water works authorized staff to issue the RFP and to begin preliminary engineering.

Professional Services Contract Awarded for Projects 03-625 & 04-625: Crescent Hill Flocculation and Sedimentation Basins Renovation

An emergency services design-build contract was executed with Vesco Engineers to rebuild Clarifier #5 and # 6 in 2003 after complete failure of the units. This work is progressing well, with unit #6 in service and unit #5 expected for service in November. Staff is recommending to proceed with the remaining work in the South Coagulation complex using the conventional design-bid-build process over the next two years. This includes outsourcing of the engineering design and construction management services.

The South Coagulation system consists of four individual treatment trains of flocculators and clarifiers for solids and organics removal from the source river water. Work remaining to complete rehabilitation of the entire train is scheduled to be executed over an 18-month period and has a current project budget allocation of \$3.0 million. An internal assessment of the project scope has been completed and a revised budget of \$3.5 million is recommended to perform a

complete renovation of the South Coagulation complex. A project scope summary is provided in Exhibit #1. The increase in project budget will allow for coating of critical concrete and steel elements in the flocculation basins, to protect them from ferric chloride chemical attack. An alternative bid scenario will consider coating of the concrete surfaces in the clarifier basins. The consulting engineer will prepare an independent estimate prior to bid to validate the LWC estimate. A project contingency of 10 percent is included to cover unforeseen structural deficiencies that are discovered once the basins are removed from service.

A cost proposal for the engineering design and construction management services was solicited from CH2M Hill Engineers in accordance with the Facilities Improvement Consulting Engineering Services RFP approved by the Board in December 2002. A not-to-exceed cost of \$395,546 has been negotiated for engineering design and construction services. The selection of CH2M Hill is based on their experience and expertise in this area, and their utilization of sub-consultant Vesco Engineering. Vesco is currently rebuilding two clarifiers (#5 and #6) under an emergency design-build contract, and their services as a sub-consultant allow LWC to leverage the knowledge and experience gained on that work to improve quality assurance and quality control on this final work on the South Coagulation system.

After proper motion and second, the Board of Water Works authorized the Chief Engineer to award a professional services contract to CH2M Hill Engineers, Inc. in the amount of \$395,546 for engineering design and construction services for Crescent Hill Flocculation and Sedimentation Basins Renovation, to establish a project budget of \$3.5 million, and to proceed to advertisement for bid.

Liability & Property Insurance Contracts Ratified

Mr. McKay reported that the “hardening” of the insurance market has compelled LWC staff and our broker to explore alternative strategies for our property and excess liability insurance programs to try to control premium costs while maintaining appropriate coverage limits and features. Our underlying philosophy continues to be to retain as much risk as we can comfortably justify and insure for catastrophic losses.

In order to preserve the coverages needed for a water utility and to minimize premium, we have made two significant changes to our liability program. First, we have increased our self-insured retention (SIR) from \$500,000 to \$1 million per occurrence. Doing so saves an estimated \$85,000 per year in premium and will pay for itself if we have no single loss in excess of \$500,000 during the next 5.7 years. Secondly, we have layered our \$35 million excess policy limits as follows :

\$ 1 million	Self-Insured Retention
\$10 million excess of SIR	AIG
\$25 million excess of \$10 million	Lexington 40% / AWAC 60%

Significant coverage features include terrorism, limited pollution coverage, failure to supply and employment practices liability. It should be noted that there is employment practices coverage only in the first \$10 million layer above the \$1 million SIR. The renewal date for the excess liability policy was October 1 with negotiations of premium and coverage terms continuing

through the close of business September 30. LWC President John Huber authorized acceptance of terms and conditions pending ratification by the Board.

After proper motion and second, the Board of Water Works ratified the purchase of excess liability insurance as described above for an annual premium of \$312,692, an increase of 90% over the past three years.

Mr. McKay also reported that the premium for property insurance experienced a 10% decrease while enhancing our coverage. Significant coverage features include blanket limits of \$121,833,000, terrorism coverage, earthquake limits of \$25 million and property loss control services at no additional charge. The premium for the coming period will be \$91,153.

There being no further business to come before the Board, the meeting was adjourned at 3:20 p.m.

Respectfully submitted:

Robert K. Miller
Vice President - Treasurer
And Acting Corporate Secretary

**RESOLUTION TO DECLARE THIRD QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 11, 2003 to adjust the 2002 annual dividend by \$357,847 from \$12,021,776 to \$12,379,623, the difference to be added in equal quarterly installments to the quarterly 2003 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2003 Louisville Water Company budget contemplates the 2003 annual dividend to be \$12,318,831 it would be in order at this time to declare a regular third quarter dividend of \$3,079,708.

RESOLVED, the regular third quarter 2003 dividend of \$3,079,708 is hereby declared.

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,169,170 to the Louisville/Jefferson County Revenue Commission on September 30, 2003, this being the third quarterly dividend for 2003 plus one quarter of the dividend adjustment for 2002, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

October 14, 2003

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on April 8, 2003, directing the issuance of Apportionment Warrants against properties located on Stout Rd: Broad Run Rd to North 7,800 ft, to remove Tax Block 57 Lot 54 as a contiguous parcel to Tax Block 57 Lot 199 and issue a separate Apportionment Warrant for Tax Block 57 Lot 54:

**BOARD OF WATER WORKS
MEETING MINUTES
November 4, 2003**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Stephen Gault
Ms. Wendy Welsh
Dr. Joseph Wise

Board Members Absent:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources & Organizational Effectiveness
Mr. Jim Smith
Ms. Amber Halloran
Mr. Tony Gregory
Ms. Barbara Crow

A special meeting of the Board of Water Works was held on Tuesday, October 4, 2003 in the Board Room of Louisville Water Company. Mr. Huber called the meeting to order at 3:30 p.m.

Mr. Huber provided introductory comments, noting that a previously contemplated budgeted increase in water sales of 0.5% was no longer warranted based on 2003 results. As a result it has become necessary to change the recommended overall water rate increase from 4.0% to 4.5%. In addition, staff also recommends lowering the 2004 Operation and Maintenance Budget by \$350,000 and increasing the funding of the Infrastructure Replacement Reserve by a like amount.

Mr. Miller distributed a handout of his presentation notes. He opened his presentation by summarizing the components of the Preliminary 2004 Annual Budget:

- 2004 Capital Budget
- 2004 Operating Budget
- 2004-2013 Proforma Income Statement
- 2004-2013 Capital Expenditures Plan
- 2004-2013 Financial Plan

Mr. Miller reviewed how the budgets are developed. He noted that the Capital Budget, developed based on 2002-2021 Facilities Plan, contains construction or acquisition projects

having expected useful life of more than one year, with most elements being one time construction items. The balance are recurring equipment replacement purchases, such as fleet, tools, and information technology. Ms. Teasley and Mr. Smith work with Budget Item owners to identify project requirements and realistic cash flows and construction schedules. The Operating Budget is developed based on the 2004-2008 Strategic Plan and certain planning parameters such as projected water sales, union contract and salary scale increases, and the anticipated inflation rate. From the Strategic Plan, synoptic operating plans are developed for the budget year. Ms. Halloran and Mr. Miller work with Business System Owners to develop draft budgets based on these synoptic operating plans. The Capital and Operating Budgets are reviewed by the Executive Leadership Team for approval to submit to the Board of Water Works.

Mr. Miller then reviewed how the budgets are controlled. He noted that for the Capital Budget:

- For projects < \$100,000, staff has been authorized to proceed to completion.
- For projects > \$100,000, staff must obtain authorization from the Board of Water Works to Proceed with Final Design and Bid and then again to Award and Execute Contract.
- Any change orders that take a project from < \$100,000 to > \$100,000 require board approval.
- Also, any change orders of > 10% for projects > \$100,000 require board approval.

These items are handled internally through project budget sheets that require approval by the President and associated Vice Presidents. And, these are typically addressed during board meetings as new business to proceed on a project, as bid tabulations for contract award, and as old business for change actions.

Operating Budget results are reviewed monthly by the Executive Leadership Team through a package prepared by Amber's group. This package contains a thorough review of the income statement components. Based on the current financial results as well as forecasts for pumping and water sales, determinations are made if special cost reduction measures are needed in order to achieve the earnings target. These results are summarized in the report presented to the board each month.

Mr. Miller then reviewed how these budgets are funded. The capital budget is funded primarily from cash generated from operations; that is, profits not paid out as a dividend and non-cash expenses like depreciation. Developers and homebuilders also provide a significant portion that covers distribution system extensions, water services and fire hydrants. For large capital budget years such as 2003 and 2004, the capital budget is also funded from a draw down of cash reserves. The operating budget is computed as the sum of all of the revenue requirements: Operation and Maintenance expenses, Depreciation, Water Provided in Lieu of Taxes, Retirement of Assets, Net Non-Operating Expenses, and Net Income. The operating budget is funded almost entirely from water sales (94%). Approximately 4% of the operating budget is funded from sewer billing services. The remaining 2% of the operating budget is funded by interest income on our investments.

Mr. Miller then presented key projects from the 2004 Capital Budget:

Treatment Plants

Begin construction of Riverbank Filtration at Payne Plant \$4,000,000

- Continue Payne Plant Reliability Improvements \$8,450,000
- Renovate Crescent Hill Basins and Drainage System \$3,200,000
- Crescent Hill Reservoir Site Improvements \$700,000
- Crescent Hill Slate Roof Replacement \$1,000,000

Storage

- Construct storage tanks at Long Run, Hillcrest, and Tucker Station \$3,250,000

Transmission and Distribution System Improvements

- Standiford Field Transmission Main Relocation \$1,300,000
- Transmission Main Construction in National Turnpike, Cardinal Hill, Wolf Pen Branch Road \$4,250,000
- Main Replacement and Rehabilitation and Lead Service Renewal \$9,500,000

Distribution System Extensions

- Developer Financed Distribution System Extensions \$7,700,000
- Services and Hydrants \$3,400,000
- Bullitt County System Improvements \$8,227,000
- Goshen System Improvements \$810,000
- Shepherdsville System Improvements \$532,000

Mr. Miller then presented highlights of the 2004 Operating Budget. He noted that water sales are expected to remain flat in 2004, with no increase overall increase to the current budget of 38.7 billion gallons. Residential and commercial sales are expected to be flat to slightly down, while Water in Lieu of taxes will be up 20%, industrial consumption up 4%, and wholesale consumption down 11%.

Operation and Maintenance Expenses are budgeted to increase by \$1,800,000 or 4.1%, composed of Labor and Non-Medical Benefits Costs up \$588,400; Medical Insurance up \$260,000; Power for Pumping up \$428,000; Water Treatment Chemicals up \$104,200; and, Liability Insurance up \$164,000. Depreciation expenses are budgeted to increase by \$553,000 or 3.2%. This is lower than expected due to over budgeting in 2003. Shorter-lived assets such as Information Technology investments drive the increase in 2004.

Mr. Miller emphasized that a key change in the 2004 Operating Budget was that Non-Operating Income was budgeted to decrease by \$1,400,000 or 38.2% due to lower interest rates and lower investment funds available. He noted that the Company was planning to draw down fund balances by \$17,000,000 during 2004. Also, he projected that investments would earn an interest rate of 0.9% in 2004, down from 2.5% budgeted in 2003.

The Return on Equity Target has previously been based on one percent less than five year moving average of investor owned utilities computed at 8.50%. However, in accordance with the 2004-2008 Strategic Plan, the 2004 Budget is based on maintaining target at 9.07%. This yields a budgeted net income of \$30,177,200 (up \$939,200 or 3.2%) and a budgeted dividend of \$12,693,400 (up \$374,600 or 3.0%).

Considering the components of the revenue requirements over the past five years, Operation and Maintenance expenses have remained constant at about 42%, while Depreciation has increased from 13.8% to 15.3% and Net Income has decreased from 29.2% to 27.9%. With no increase in water sales, decreased investment income, and increased O&M and depreciation expenses, combined with transferring \$350,000 from O&M Expense to the Infrastructure Replacement Reserve, this yields a recommended overall rate increase of 4.5%. Mr. Miller noted that staff was also developing a recommended 10.6% increase in wholesale water rates, which have not been increased since 1994.

Mr. Miller then reviewed the 2003 projected financial results and presented a recommended dividend strategy. He noted that the most recent forecast for Net Income is down \$3,680,000. If no actions were taken regarding the Infrastructure Replacement Reserve, the dividend would be down \$2,200,000. By canceling the deposits to the Infrastructure Replacement Reserve, the dividend is down \$491,200. Given other local economic news, our owners have sent a very clear message on the necessity to fully meet the 2003 budgeted dividend. We have implemented a hiring freeze, a travel freeze, and a number of other cost reduction measures. We are looking to achieve sustainable cost reductions rather than transfer costs from one year to another or from O&M to capital. Mr. Miller recommended that the dividend for 2003 be paid at the budgeted level. Even with cost reductions, this will likely result in an overpayment of up to \$500,000. Normally, this would result in the 2004 Dividend being reduced by a like amount. Instead, the dividend underpayment could be offset through a combination of cost reductions (preferred) supplemented by a decrease in funding of the 2004 Infrastructure Replacement Reserve (if needed). This would result in the City being paid at least the budgeted dividend in 2003 and 2004.

Mr. Miller then provided a review of the Financial Plan for the next five years. It appears that a borrowing will be necessary beginning with \$14,000,000 in 2005. This would be handled as a bond anticipation note. If the capital plans remains unchanged, we would need a revenue bond issue in 2006 of \$57,000,000 would be needed to cover capital requirements over the next five years. It can be anticipated that another \$22,300,000 would be needed in the following five years after that. Net Income and the Dividend will increase at a rate of 3% to 5% per year over the planning horizon. Rate increases over the next five years are anticipated to be in the 3% to 4% range, except for the year when the new bond service comes online, when an increase of up to 5.75% might be needed.

Mr. Miller noted that a draft resolution to adopt the 2004 Annual Budget had been prepared to adopt the 2004 Capital and Operating Budgets, authorize staff to prepare rate schedules based on a 4.5% rate increase and provide certain authorizations regarding commencement of capital projects. Several board members observed that a 4.5% rate increase may not be sufficient to adequately fund all initiatives contemplated for 2004. Mr. Huber provided background information on efforts to keep rate increases at or below the anticipated change in the inflation rate while maintaining high customer satisfaction. Mr. Miller noted that this was the only rate increase higher than 3.5% during the past ten years except for the year following the September 11th terrorist attacks. Mr. Huber observed that the U.S. E.P.A. has indicated that CPI plus 3% may be appropriate for water utility rate increases to address infrastructure replacement needs. Mr. Conner emphasized the need for staff to address projected rate increases that are higher than CPI plus 1%.

It was the consensus of the Board of Water Works that staff should revise the Preliminary 2004 Operating Budget based on a rate increase of slightly less than 5.0%, and that updated budget schedules should be brought to the regular meeting on November 11th for further consideration at that time.

There being no further business to come before the Board, the meeting was adjourned at 4:55 p.m.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Robert K. Miller". The signature is written in a cursive, flowing style.

Robert K. Miller
Vice President - Treasurer
and Acting Corporate Secretary

**BOARD OF WATER WORKS
MEETING MINUTES
NOVEMBER 11, 2003**

Board Members Present:

Ms. Wendy Welsh
Dr. Joseph Wise
Mr. Stephen Gault
Mr. Stewart Conner

Board Members Absent:

Mayor Jerry Abramson
Mr. Phillip Bond
Mr. Jack Segell

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer & Acting Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources
Ms. Kathy Holder, Acting General Counsel
Mr. Rudolph Davidson
Ms. Amber Halloran
Ms. Kay Ball
Mr. Steve Greseth
Ms. Barbara Crow
Mr. Jim Smith
Mr. Ralph McCord
Mr. Don McKay
Mr. Alan Arbuckle

Mr. Huber called the meeting to order at 12:35 p.m.

Opening Remarks from John Huber

Mr. Huber offered a remembrance of Jack Segell, past member of the Board of Water Works who passed away on October 16, 2003. He also provided a review of the current financial condition and year-end forecast for net income. He discussed plans to reduce Operation and Maintenance Expenses and Depreciation Expense by at least \$1,500,000 in 2004. He noted that this matter will be reviewed further at the December 2003 and January 2004 meetings. He also noted that we may have seen increased outdoor water use in past years may have offset decreased indoor water use, and that this matter needed further analysis. He also observed that an additional rate component may be needed to mitigate increased risks in the future.

- Applicant extends a main from Section 1B of Saratoga Springs to the 8-inch water main located along Sweeney Lane which would allow for Saratoga Springs to be moved from the 860 foot msl Pressure Plane along Old Heady Road to the existing 900 foot msl Pressure Plane supporting Taylorsville Road at Tucker Station Road, or
- Applicant extends a main from Section 1B of Saratoga Springs to the existing Stone Lakes Subdivision property boundary and LWC completes a grid tie from such main to the 12-inch main in Stone Lakes Subdivision which would allow for Saratoga Springs to be moved from the 860 foot msl Pressure Plane along Old Heady Road to the existing 900 foot msl Pressure Plane supporting the Stone Lakes Subdivision.

Mr. Bond questioned the timetable for meeting the conditions. Mr. McCord indicated that the developer prefers the second choice, to be completed within nine to twelve months. Mr. Conner move to authorize the proposed main extensions for Saratoga Springs Section 1A and Section 1B, with the conditions as set forth above. Upon second and vote, the motion carried.

Change to Service Rules and Regulations:
Refunding of Installation Cost Extension Method

Staff had previously advised the Board of Water Works of its work with its developer community customers to develop an accelerated refunding payment method as opposed to the current twenty-year refund schedule annual payments on July 8, 2003. Staff has since developed a proposed alternative Refunding of Installation Cost Extension Method (Rule 2.03). This alternative method would pay the developer the present value, discounted at a rate of 5% per annum, of the monthly refund amount per size of meter connected to the distribution main extension for which they advanced funds. At the time the Refunding Contract is executed with LWC, the developer applicant would select one of the anniversary dates, from two to five years from when the main extension is placed into service, for the present value to be calculated and to be refunded. The benefits to LWC include reduced administration costs as well as improved cash management.

Staff met with the Land and Development Committee of the Home Builders Association of Louisville (HBAL) at their July 15 meeting to present the proposed rule change and to offer them the opportunity to express their thoughts and concerns. The resulting response from the HBAL Land and Development Committee is supportive of the proposed change. Mr. Bond moved for approval of the addition of Rule 2.03 Refunding of Installation Cost Extension Method to the Service Rules and Regulations. Upon second and vote, the motion carried.

Buyout of Existing Refunding Contracts Authorized

LWC staff currently maintains 1,144 refunding contracts. The total maximum anticipated refund liability for these contracts over the next twenty years is \$6,450,265. Upon adoption of the proposed changes to Section 2.04, Mr. Miller noted that LWC can significantly reduce the administrative burden associated with these refunding contracts by offering a one-time buyout. A policy adopted previously by the Board of Water Works allows staff to process contract buyouts initiated by the developer based on a ten percent discount of the future anticipated payments for the contract. This discount factor was set when long-term tax-exempt interest rates were about eight percent. Buyouts using this discount factor typically occur less than five times

end forecast for the Dividend remains at the budgeted level of \$12,318,800 in consideration of cancellation of deposits to the Infrastructure Replacement Reserve in 2003 and cost reductions to be accomplished in 2003 and 2004.

Operations Report Filed

Mr. Heitzman presented the October 2003 Operations report.

Lead and Copper Monitoring – Water quality staff completed the distribution system sampling as required by the EPA Lead and Copper Rule (LCR). As a result, there is no further action required at this time for lead and copper compliance.

Winter Planning - Winter planning activities began in October in preparation for possible emergency operations that could arise from sustained cold weather this coming winter season. Staff in Managing Distribution Operations have updated the Emergency Plan and have begun to perform preparatory work in anticipation of possible increased work activity.

Serving Customers Report Filed

Ms. Teasley provided the October 2003 Serving Customers Report.

Bullitt County Advisory Board – The Bullitt County Advisory Board met for its regular quarterly meeting on October 27, 2003. Staff provided financial information regarding the status of the Bullitt County Water Reserve as well as the status on the capital projects underway in Bullitt County under the Bullitt County Water Improvement Program.

Oldham County Advisory Board – Louisville Water Company (LWC) staff held a meeting with the Oldham County Advisory Board on October 24, 2003 to discuss the latest activities of the Oldham County Water Extension Program (OCEP), status of the Oldham County Reserve Fund, proposed system improvements and additional Oldham County updates. Staff presented a summary of the OCEP, stating that LWC had originally projected 15 projects with 166 unserved residences, or water mains adjacent to 12.1 miles of roadway and \$2,036,000 in expenditures. The actual result has been 8 projects with 122 unserved residences, or water mains adjacent to 8.3 miles of roadway and expenditures of \$1,243,000. This would result in 77 out of 122 residents who participated and received subsidies. The value of the 77 subsidies is \$192,500. It was indicated that the deadline for subsidies will likely expire in May 2004 and that would be a good time to sunset the current Advisory Board, which brought about discussion of future Oldham County Advisory Board representation.

Ft. Knox – In October, LWC staff learned that water utilities in Hardin County intended to form the Lincoln Trail Regional Water Commission. Prospective members include Ft Knox, Elizabethtown, Hardin County Water Districts No. 1 and No. 2, and the city of Radcliff. The Commission will purchase, own and operate the Ft. Knox water system assets, fulfilling the Army's requirement to privatize its water system. Individual utilities would retain ownership and control of their respective systems and service areas. Currently, members are preparing

legislation for their respective political bodies to approve the formation of the water commission and their individual participation. To date, only the city of Radcliff has approved joining the Commission. One of the first tasks of the Commission will be to assess long term water supply needs for the region, referencing a study conducted for the region in 2001. This study identified the wholesale purchase of water from LWC as the most cost-effective option to address long term water supply needs in Hardin County. Staff will continue to follow the development of the Commission and its long range water supply planning efforts.

Automated Meter Reading – The Automated Meter Reading Pilot (AMR) expansion to Goshen and Shepherdsville continues to progress as scheduled. Meter change out activity was initiated in Goshen starting September 2003. The Shepherdsville meter change out is scheduled to begin the second week of November. AMR implementation in Shepherdsville is expected to be complete before year end 2003.

Closed Session Discussion

After proper motion and second, the Board went into closed session at 12:55 p.m. for the purpose of discussing matters under negotiation, personnel matters and actual and threatened litigation. The Board reconvened in open session after taking no action.

Petition for Easement Condemnation

Mr. Heitzman recommended that the Board of Water Works adopt a resolution authorizing staff to proceed with a Petition for Condemnation to obtain an easement over property owned by William and Patsy Eddins of 7815 Highway 329 in Oldham County. Ms. Welch moved for approval of the resolution. Upon second and vote, the motion carried. A certified copy of said resolution is attached to these minutes.

2004 Budget Adopted

Mr. Miller distributed revised schedules for the Preliminary 2004 Annual Budget based on changes discussed at the November 4 meeting:

- Change water rate increase to 4.9%.
- Increase funding for operation and maintenance expenses by \$350,000.

Mr. Conner moved for approval of a resolution to adopt the 2004 Capital and Operating Budgets, to authorize staff to prepare rate schedules based on a 4.9% rate increase, and to provide certain authorizations regarding commencement of capital projects. Upon second and vote, the motion carried. A certified copy of said resolution is attached to these minutes.

2004 – 2006 Information Technology Strategic Plan

Mr. Gregory presented the 2004 – 2006 Information Technology Strategic Plan. He noted that we are approaching the successful conclusion of the 2001-2003 IT Strategic Plan. The

Information Technology plan provides strategies to meet the challenges and achieve the objectives set forth in the LWC Strategic Plan by using Information Technology as a strategic enabler to leverage technology investments. The key Information Technology strategies for 2004 – 2006 include:

- Sustain investment in the four Information Technology Architectures.
- Continue re-engineering and replacement of legacy Information Supply Systems to meet changing business information needs, improve business operations and enhance customer satisfaction.
- Invest in technologies to provide information to employees, customers, suppliers, and business partners quickly and efficiently, leveraging investment in existing Information Technology Architectures.
- Provide for Business Continuity, Disaster Recovery, and Information Security.
- Invest in continuous training to maintain appropriate skill base and competencies for providing quality products and services to meet the strategic business objectives of the LWC Strategic Plan and associated program plans.

Staff requested acceptance of the 2004 – 2006 Information Technology Strategic Plan. Key components of the plan will be brought to the Board with appropriate business justification for approval to implement as specific projects. The plan was accepted as submitted.

Mobile Dispatch System Software and Implementation Services
Project Change Request

Mr. Gregory reviewed the project scope for the Mobile Dispatch System, noting that it will allow for the transmission of work orders and service orders electronically to computer-enabled field personnel over a wireless network. The Mobile Dispatch System project has been underway since June 2003. Currently, the project team and Viryanet implementation personnel are finalizing the interface design and programming and are preparing for system testing. Key components of the system are on target to begin operation in December 2003 and the remaining processes which include First Run Response procedures are on track for a March 2004 go-live so as not to interfere with potential winter emergency operations.

The project has experienced some cost increases, especially in the areas of the Orcom interface design and programming and LWC internal staff labor. The result of these changes is a \$210,252 projected budget increase to complete the project. This includes the \$75,000 project contingency. The original Orcom E-CIS interface estimate of 700 hours prior to vendor software selection was based on Orcom's work with other utilities using similar systems, but not specifically ViryaNet. During initial discussions between Orcom, LWC, and ViryaNet, it was determined that a more detailed scope analysis be performed to identify the specific data exchanges and transactions needed for the interface. This resulted in a 90 hour effort from Orcom to provide an updated design, programming and testing estimate of 874 hours for the ViryaNet specific interface needed for the project. This estimate did not include the 90 hours for the scope analysis performed by Orcom. It was also determined that an additional 90 hours were needed to develop non-vendor specific updates to the E-CIS product to support project implementation for service order updates and data exchange. This

results in an increase of 354 hours from Orcom to fully develop the interface to LWC specifications.

The original budget for internal staff labor was \$160,000 to provide for project management, business process analysis, bid specification development, and vendor evaluation and selection. It was anticipated that the implementation would be handled primarily by the selected vendor with some staff support for project management and system configuration. After initial business analysis with the vendor, LWC project members were retained for implementation of the project to support the interface design, system configuration, system setup, process re-engineering and testing efforts. This time was not reflected in the May 2003 budget proposal to the Board. This effort has resulted in an incurred cost of \$120,000 in labor during the June to October 2003 timeframe. An additional \$83,620 is estimated to complete the project resulting in a total overage of \$203,620.

Ms. Welsh moved to approve staff's recommendations for the following items:

- Utilize the project contingency of \$75,000 to reduce the project variance to \$210,252. Staff has performed a detailed cost analysis and the revised budget is anticipated to be adequate to complete the project with full functionality.
- Orcom CIS Interface contract change of \$77,962 (63.6%) for a new amount of \$200,462,
- Total capital project change of \$210,252 (15.7%) for a new amount of \$1,547,552,
- Total project cost change of \$210,252 (12.6%) for a new amount of \$1,872,617.

Upon second and vote, the motion carried.

Network Attached Storage Device Procurement Authorized

The 2004-2006 IT plan identifies several strategies and objectives to continue to build upon the Storage Area Network technology to enhance our Disaster Recovery and Business Continuity capabilities. The plan outlines three phases to improve the security and high availability of our data and information supply systems utilizing storage area network technology and wide area network connectivity to distribute processing, storage management, and data backup and recovery processes.

Recently, staff has experienced challenges in providing adequate storage capacity for the application and data servers that are part of the Crescent Hill data center environment such as SCADA, laboratory information, and end-user data files. Phase I of the Disaster Recovery and Business Continuity strategy is the purchase and installation of a Network Attached storage device at the Crescent Hill data center.

The proposed storage device will allow for data consolidation of several application server platforms and will eliminate the current Novell server providing home directory storage, file and print services for the network. The storage system will also provide for better data management, information security, system growth, and backup and recovery strategies for critical desktop information currently being stored on local hard drives with no guaranteed backup due to the space limitations. This phase of the plan is estimated at \$123,000 and will

provide for the hardware, software and installation services as well as 36 months maintenance and support.

Ms. Welsh moved to approve authorization for the staff to bring forward the 2004 budget to provide funds for the procurement and installation of a Network Attached Storage Device for the Crescent Hill Data Center to take advantage of some aggressive pricing currently being offered by our business partner EMC on this equipment. Upon second and vote, the motion carried.

Contract Awarded for Project 03-603: Goshen Area - Main Replacement Project

Bids were received and opened Wednesday, October 15, to supply and install 12,585 LF of new 6, 8 and 12-inch HDPE water main, tie into existing asbestos cement water mains, install 16 fire hydrants and transfer or relocate 148 customer service in the Goshen area. A total of 4 bids were received and opened from pre-qualified contractors. Southern Pipeline Construction Co. submitted the lowest responsive bid in the amount of \$638,700 resulting in a total project cost of \$777,700. The bid is approximately 5.3% under the Project Manager's Estimate. The resulting total unit cost for this project is \$ 61.80/LF. This unit cost is in line with other MRRP projects of this scope and difficulty.

Mr. Gault moved to approve authorization for the Vice President, Serving Customers & Business Development to award a contract in the amount of \$638,700 to Southern Pipeline Construction Co. to install the water facilities associated with this project. Upon second and vote, the motion carried.

Contracts Awarded for Bid 03-51: Auto Body Suspension and Repairs

Sealed bids were opened to award a one-year contingency contract for the purchase of vehicular body and suspension repairs. This contract is renewable up to two additional, one-year terms at the sole discretion of the Company. All renewals will utilize the Consumer Price Index as a cost adjustment factor. The contract is based on estimated usage and firm unit pricing. Five bids were received, a 11% decrease from the previous unit price contract dated October 2000.

Mr. Conner moved to authorize the Process Owner, Procurement of Goods and Services, to award one-year contingency contracts to Louisville Frame & Fender, Robinson's Auto Body, and Randy's Import Auto Sales. Upon second and vote, the motion carried.

Contract Renewed for Bid 99-25: Lock Box Services

Sealed bids were opened to award a one-year contract for the purchase of Lock Box Services. The contract began November 1, 1999 for a lump sum amount for two years, renewable up to three (3) additional one (1) year periods using the Consumer Price Index. The bidder submitting the best proposal was Fifth-Third Bank at an annual cost of \$124,044.

Ms. Welsh moved to authorize the Process Owner Procurement of Goods and Services to award a one-year CPI renewal for an estimated total of \$126,772.92. This CPI renewal represents a 2.2% increase in contract prices from the previous year. Upon second and vote, the motion carried. Mr. Miller noted that Banking Services are currently provided by Republic Bank at no cost.

Contract Renewed for Bid 02-27: Fire Hydrants

The contract for procurement of Fire Hydrants began on November 11, 2002 for one year, renewable up to four additional one year periods using the Producers Price Index. Based on evaluation criteria and results of samples tested, a one-year contract was awarded at that time to American Cast Iron Co. for an estimated total of \$990,325.

Mr. Wise moved to authorize the Process Owner Procurement of Goods and Services to award a one-year PPI renewal for an estimated total of \$1,034,910. Upon second and vote, the motion carried. This first PPI renewal represents a 0.5% increase in contract prices from the previous year. Due to an anticipated increase in the volume of fire hydrants to be purchased in the coming contract year, the value of the contact has increased by 4.5% overall from the previous.

Contracts Awarded for Bid 03-52: Stainless Steel Tapping Sleeves

Sealed bids were opened to award a one-year contract for the purchase of stainless steel tapping sleeves. This contract is renewable for up to two additional one-year terms at the sole discretion of the Company. All renewals will utilize the Producers Price Index as a cost adjustment factor.

Mr. Conner moved to authorize the Process Owner, Procurement of Goods and Services, to award one-year contracts in the following estimated amounts:

Hughes Supply Company	\$168,100.53
Viking Supply Company	\$ 24,694.25
Harco, Inc.	\$ 2,083.54
Total Contract Price	\$194,878.32

Upon second and vote, the motion carried. This represents a 1.56% increase from the previous bid in October 2002.

Contract Awarded for Project 02-674: West Orell Road 12" Grid Tie

Bids were received by the Louisville Metropolitan Sewer District (MSD) on Monday, October 27, 2003 for a sewer project in Southwest Jefferson County. The bid package included installation of 1,700 feet of 12-inch water main in West Orell Road. The 12-inch water main will complete a transmission grid from Lower River Road to Dixie Highway, improving water pressure and flow availability during peak demand periods. The project is being coordinated with MSD to minimize impact on traffic and residents.

A total of three bids were received from qualified contracting firms. Basham Construction and Rental submitted the best bid in the amount of \$139,093 for the project. Their bid is above the engineer's estimate by \$20,343 or 17.1%. The 17% increase is due, in part, to a discrepancy in the bid quantities as presented on the bid tab provided by MSD.

Upon review of the project scope with the contractor and evaluation of alternatives, it is recommended to proceed with the project as bid. A rebid alternative is not expected to provide savings, and alternative pipeline paths are not cost effective. Further, partnering with MSD to coordinate utility work has considerable value to the community. The project is funded from the System Development reserve.

Mr. Conner moved to authorize the Chief Engineer to enter into an agreement with the Louisville Metropolitan Sewer District to install a 12-inch main using Basham Construction and Rental, to install water facilities associated with this project. Upon second and vote, the motion carried.

Retiree Medical Insurance Renewed

Louisville Water Company provides group medical insurance to former employees who retired prior to the conversion of our retirement program to CERS in 1990. This coverage is also extended to their eligible dependents. There are eighty-four policies remaining which are covered by Medicare plans for which retirees pay a portion of the premium. The number of covered retirees and/or dependents continues to diminish resulting in marketing challenges.

LWC offers three medical plans to our retirees. Two of these plans are traditional Medicare Supplement products (one of which offers limited prescription coverage). Seventy of our retirees are covered under these plans. The remaining fourteen retirees are covered by a Medicare HMO plan which provides unlimited generic drug coverage and up to \$1,500 annually for approved brand name drugs. The Medicare supplement plans will be renewed with a 6.7% increase for the low option and 11% decrease for the high option (plan with prescription drug coverage). The level of coverage offered under the Medicare HMO plan has been enhanced with no premium increase.

Mr. Conner moved to authorize the approval of the contract for Anthem Blue Cross/Blue Shield in the amount of \$121,000. Upon second and vote, the motion carried.

Board of Water Works 2004 Meeting Schedule

The 2004 meeting schedule for the Board of Water Works was presented for information only. The meetings are scheduled on the second Tuesday of every month during 2004.

Bluegrass Water Supply Consortium Update

Ms. Teasley provided an update on the Bluegrass Water Supply Consortium. On October 13, 2003 staff attended the final public workshop of the Bluegrass Water Supply Consortium held in Lexington. This workshop presented the final results of the Consortium's evaluation of eight, long-term water supply options for the Central Kentucky region and identified future activities and timelines for forming the Bluegrass Regional Water Commission. Results of the evaluations identified the purchase of water from LWC as the least-cost alternative, approximately 11% lower than the next least-cost alternative on a cost per MGD per year basis. Evaluations were based on the combined costs of producing or purchasing 9 MGD on a "take or pay" basis and the cost of constructing facilities for delivering, or producing and delivering 45 MGD. The purchase of water from LWC finished second behind the Kentucky River treatment plant alternative in the overall evaluation, which was based upon ratings for cost, water quality, adequacy of capacity, ease and timing of implementation, and flexibility of the alternative to be phased in over time to match area growth.

Discussions with Consortium members indicated the flexibility of phasing in treatment capacity, the future control over supply facilities, and past issues with public acceptance of a Louisville pipeline solution, persuaded Consortium members to rate the Kentucky River treatment plant solution ahead of purchasing water from LWC in the overall evaluation. Consortium members did, however, note concerns over the feasibility of constructing the Kentucky River treatment plant within the expected 3 to 5 year timeframe. Other concerns voiced by the Consortium included the public and political acceptance of a supply solution other than the least-cost alternative. To date, the Consortium has received only four "take or pay" contract commitments, totaling 26 MGD, in response to their solicitation of non-binding letters of intent from the 16 Consortium members. An amount of 22 MGD out of this 26 MGD commitment was from Lexington, which cannot be a water commission member due to membership being limited to public entities.

The consortium identified the preparation of the final report for the feasibility study and the formation of a regional water commission as the two critical tasks to accomplish by the end of 2003. Participation on the Commission will require "take or pay" commitments and approvals from the members' governing entities. As a consequence, some of the Consortium members may not pursue participation in the Bluegrass Regional Water Commission. Creation of the Commission will be a critical prerequisite in securing the necessary funding for the project to continue. LWC staff will continue dialogue with Consortium members and follow their progress in establishing a regional water commission.

Federated Department Stores Stock Sale **Revised Resolution Adopted**

At its June 10, 2003 meeting, the Board approved a resolution for LWC to sell 81 shares of Federated Department Stores, Inc. stock obtained in bankruptcy proceedings. As we have no

record of ever having received the stock certificates, an Amended Resolution is attached authorizing LWC to apply for replacement stock certificates. The Amended Resolution also provides authorization for the Controller to sell the shares through Republic Bank once the replacement certificates are received.

Mr. Conner moved to approve the amended resolution. Upon second and vote, the motion carried. A certified copy of said resolution is attached to these minutes.

Issuance of Apportionment Warrants for Brush Run Rd: Echo Trail to Dawson Hill Rd

With the completion of the public water main extension along Brush Run Rd: Echo Trail to Dawson Hill Rd, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the cost of \$5,450 for each lot or tract abutting this extension and currently not served. Staff recommended the adoption of a resolution for the issuance of Apportionment Warrants and liens against 9 benefited properties along Brush Run Rd: Echo Trail to Dawson Hill Rd in accordance with KRS. 96.265, as described.

Ms. Welsh moved to approve the resolution. Upon second and vote, the motion carried. A certified copy of said resolution is attached to these minutes.

Issuance of Apportionment Warrants for Brush Run Rd: Dawson Hill Rd to Routt Rd

With the completion of the public water main extension along Brush Run Rd: Dawson Hill Rd to Routt Rd, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the cost of \$5,450 for each lot or tract abutting this extension and currently not served.

Staff recommended the adoption of a resolution for the issuance of Apportionment Warrants and liens against 43 benefited properties along Brush Run Rd: Dawson Hill Rd to Routt Rd in accordance with KRS. 96.265, as described. Mr. Conner moved to approve the resolution. Upon second and vote, the motion carried. A certified copy of said resolution is attached to these minutes.

Issuance of Apportionment Warrants for Echo Hill Trail: Echo Trail to End and Woodland Springs Rd: Echo Trail to East 500 ft

With the completion of this private road water main extension service along Echo Hill Trail: Echo Trail to End and Woodland Springs Rd: Echo Trail to East 500 ft, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the not-to-exceed

cost of \$8,416.60 for each lot or tract abutting this extension and currently not served. Apportionment warrants will be assessed against 17 properties.

Staff recommended the adoption of a resolution for the issuance of Apportionment Warrants and liens against 17 benefited properties along Echo Hill Trail: Echo Trail to End and Woodland Springs Rd: Echo Trail to East 500 ft in accordance with KRS. 96.265, as described. Mr. Conner moved to approve the resolution. Upon second and vote, the motion carried. A certified copy of the resolution is attached to these minutes.

**Issuance of Apportionment Warrants for a Portion of Bearcamp Rd:
Existing Water Main to the County Line**

With the completion of a portion of the public water main extension along Bearcamp Rd: Existing Water Main to the County Line, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the cost of \$5,450 for each lot or tract abutting this extension and currently not served.

Staff recommended the adoption of a resolution for the issuance of an Apportionment Warrant and lien against 1 benefited property along Bearcamp Rd: Existing Water Main to the County Line in accordance with KRS. 96.265, as described. Ms. Welsh moved to approve the resolution. Upon second and vote, the motion carried. A certified copy of the resolution is attached to these minutes.

LWC Service Rules and Regulations – Main Extension Methods

Louisville Water Company is now completing the Jefferson County-wide Extension Program (JCWEP). In anticipation of its completion, the President and the Vice President of Servicing Customers and Business Development authorized the formation of a cross-functional team to address a number of pending issues relating to the completion of this program. One of those was what main extension methods would be available upon the completion of the JCWEP.

Staff has identified possible main extension situations where the existing mains extensions methods did not allow for an equitable means for extending mains. The team has developed the following new main extension methods which LWC staff believes will address those difficult main extension situations. These extension methods are:

- Two-thirds Majority Tapping Fee Extension Method (Proposed LWC Service Rules & Regulation 2.04)
- Rebating Tapping Fee Extension Method (Proposed LWC Service Rules & Regulation 2.06)

The Two-thirds Majority Tapping Fee Extension Method allows for a main extension along a publicly dedicated Right-of-Way (ROW) where two thirds of the residents along the route

agree to apply for service and pay their prorated share or tapping fee of the cost of the main extension. The Company would finance the remaining third that will be paid by subsequent tapping fee payments by future customers. The Rebating Tapping Fee Extension Method allows for a main extension along either a publicly dedicated ROW or a private road where one or more residents agree to pay all of the cost of the installation of the main on a prorated share or tapping fee basis. Any subsequent customer who arranges for service through tapping this main would pay the established tapping fee which would be rebated equally to all active service account holders connected to this main at the end of each year. This tapping fee would expire after 20 years.

Staff recommended the removal of the existing Surcharge Extension Method (LWC Service Rules & Regulation 2.04) and the adoption of the Two-thirds Majority Tapping Fee Extension Method (Proposed LWC Service Rules & Regulation 2.04), and Rebating Tapping Fee Extension Method (Proposed LWC Service Rules & Regulation 2.06). Staff requested the Board approve and adopt by resolution these proposed rules.

Mr. Wise moved to approve the adoption of the resolution. Upon second and vote, the motion carried. A certified copy of the resolution is attached to these minutes.

Project 03-607 Authorized: Westport Road Transfer Station Hydraulic Surge Tank

The 2003 Capital Budget includes funds for construction of a hydraulic surge tank at the new Westport Road Transfer Station. The new Westport Road Transfer Station and associated transmission mains at Watterson Expressway and Westport Road are nearing completion. The pump station is undergoing startup testing and the transmission mains are under construction with expected completion in spring 2004. The new pump station is designed to transfer up to 45 million gallons per day (MGD) to the elevated service area, compared to the existing 16 MGD pump station. In consideration of this increased capacity, consultant CH2M Hill Engineers recommends installation of a surge suppression system. The system will include a steel storage tank of approximately 15,000 gallons to dampen any hydraulic pressure waves created by unplanned supply interruptions within the elevated service area. The system will operate with a combination of air and water to absorb the pressure surge and reduce the impact of pressure surge on the transmission mains and pumping station. The project budget for this work is \$300,000.

Ms. Welsh moved to authorize the finalization of the engineering design and proceed to advertisement for bid for Project 03-607: Westport Road Transfer Station Hydraulic Surge Tank. Upon second and vote, the motion carried. Significant changes in project scope or budget will be returned to the Board for review prior to bid.

**Project 02-632 Authorized: Solids Lagoons Renovation
B. E. Payne Residuals Piping System**

Proposed under the 2002-2004 Capital Budgets are funds for construction of pipe diversion structures at B. E. Payne Water Treatment Plant (BEPWTP) to provide flexibility in

managing treatment plant residuals. Under current operations, the BE Payne Plant water treatment residuals from intake screening, coagulation, softening, and filter backwash discharge to lagoons #2 or #3. The proposed design, prepared by O'Brien & Gere Engineers, Inc., will provide flexibility to route plant residuals to multiple lagoons, as shown in the attached schematic. The project will allow lagoon cycling and provide several benefits for improved operation of the facility, including:

- Maintenance and control of vegetation in the lagoons
- Drying and concentration of accumulated waste streams
- Evaluation and maintenance of earthen berms for integrity and leakage
- Management of the lagoons as a system to maintain compliance with KPDES discharge permits

The project will also prepare us for full-scale renovation of the lagoons planned for 2010-2015. The lagoons were originally constructed in 1971. The budget for the subject project is \$425,000.

Mr. Wise moved to authorize the finalization of the engineering design and proceed to advertisement for bid for Project 02-632: Solids Lagoons Renovation – B. E. Payne Residuals Piping Diversion. Any change in project scope or budget identified during final design will be presented to the Board for review. Upon second and vote, the motion carried.

2004-2005 Main Replacement and Rehabilitation Program Authorized

Ms. Teasley reviewed the 2004 – 2005 Main Replacement and Rehabilitation Program. The 2004-2005 Capital Budget includes annual funding in the amount of \$9,500,000 in 2004 and \$7,000,000 in 2005 for main replacement and rehabilitation and lead service renewals. The 2004 program includes of 9.3 miles of replacement, 14.2 miles of rehabilitation, renewal of approximately 1,460 lead service lines from main to the property connection and replacement of approximately 173 fire hydrants. The 2005 program includes replacement of 10.5 miles of water main, renewal of approximately 1,650 lead service lines and replacement of approximately 96 fire hydrants.

Ms. Welsh moved to approve the 204-2005 Main Replacement and Rehabilitation Program, as described in a handout report that was presented to the Board of Water Works and further authorized the Louisville Water Company to proceed with engineering design and advertisement for bid. Individual bids, exceeding \$100,000 will be returned to the Board for authorization to proceed with construction. Upon second and vote, the motion carried.

There being no further business to come before the Board, the meeting was adjourned at 2:50 p.m.

Respectfully submitted:

A handwritten signature in cursive script, appearing to read "Robert K. Miller".

Robert K. Miller
Vice President - Treasurer
And Acting Corporate Secretary

AMENDED RESOLUTION

WHEREAS, it was found that Federated Department Stores, Inc. filed a reorganization bankruptcy approximately ten (10) years ago and the Louisville Water Company filed a Proof of Claim in the Bankruptcy proceeding.

WHEREAS, the Louisville Water Company does not have the record of receiving the Stock Certificates, the Louisville Water Company was recently notified by Federated Department Stores, Inc. that the Louisville Water Company owns eighty one (81) shares of stock as a result of the bankruptcy.

WHEREAS, as a result of the notification from Federated Department Stores, the Louisville Water Company has requested replacement stock certificates.

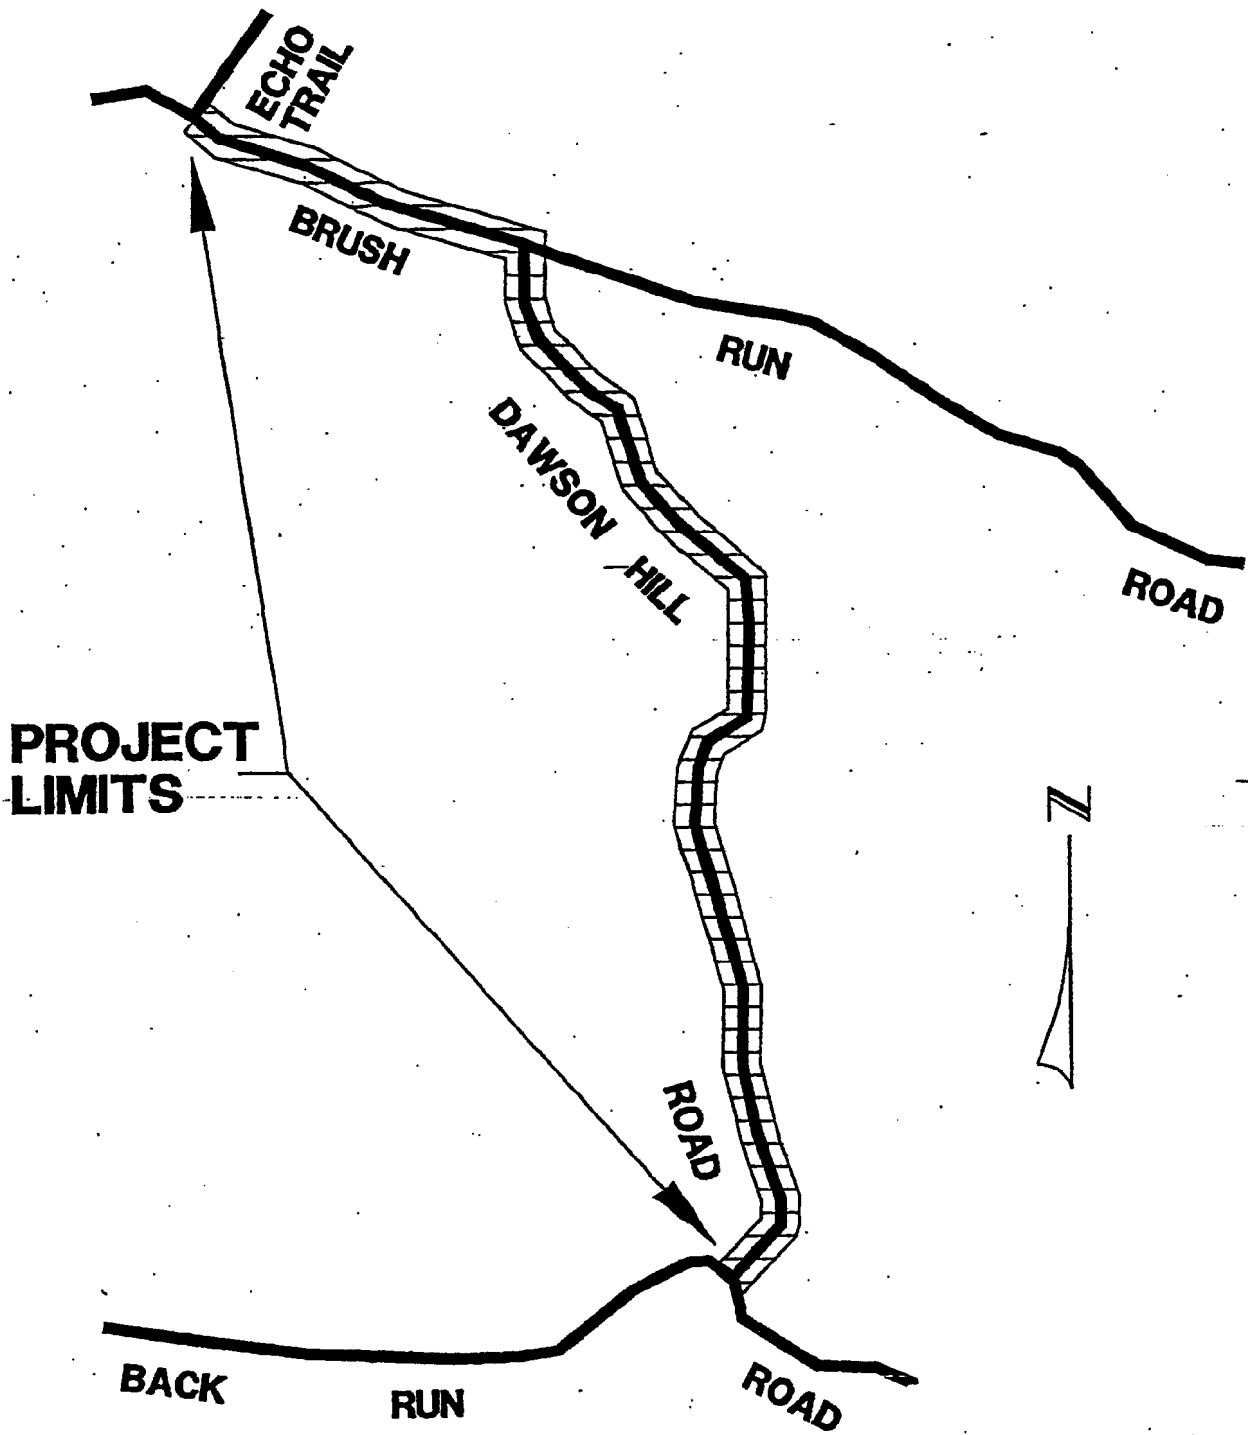

RESOLVED, that the Controller, Amber Halloran, be and hereby is authorized and directed to apply for and obtain the replacement Stock Certificates.

RESOLVED, that upon receipt of the Federated Department Store's replacement stock certificates, the Controller, Amber Halloran, be and hereby is authorized and directed to sell eighty one (81) shares of common stock in Federated Department Stores, Inc. through Republic Bank.

APPORTIONMENT WARRANT RESOLUTION

November 11, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Brush Run Rd: Echo Trail to Dawson Hill Rd** main extension project authorized by Ordinance No. 5, Series 2001 of the Jefferson Fiscal Court, adopted on March 27, 2001 such warrants to be against **nine (9)** benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Exhibit "A"

DRAFT RESOLUTION TO ADOPT 2004 ANNUAL BUDGET

RESOLVED, that rate schedules be developed and presented by staff for a 4.9% increase, effective for water service beginning January 1, 2004 and thereafter.

RESOLVED, that the Preliminary 2004 Operating Budget submitted by staff be adopted as the approved 2004 Operating Budget.

RESOLVED, that the Preliminary 2004 Capital Budget submitted by staff be adopted as the approved 2004 Capital Budget.

RESOLVED, in respect to the Louisville Water Company 2004 Capital Budget submitted to and approved by the Board of Water Works this day, that the Board hereby delegates to the President of Louisville Water Company, or his designee, the authority to:

1. Proceed to completion for those Projects in the 2004 Capital Budget (and prior year Capital Budgets) with an estimated cost of \$100,000 or less.
2. Proceed with advertisement and bid of Annual Allowance Projects in the 2004 Capital Budget with the stipulation that all contracts exceeding \$100,000 be submitted to the Board for approval.
3. Proceed with preliminary engineering for those Projects in the 2004 Capital Budget estimated to cost over \$100,000 with the stipulation that each item will be fully explained to the Board and approval obtained before proceeding with final design and solicitation of bids.
4. Proceed to authorize contract change orders on those Projects in the 2004 Capital Budget (or prior year Capital Budgets) with an estimated cost of \$100,000 or less where such change orders do not cause the total contract cost to exceed \$100,000.
5. Proceed to authorize contract change orders on those Projects in the 2004 Capital Budget (or prior year Capital Budgets) with an estimated cost of over \$100,000 where such change orders do not exceed 10% of the approved contract price or \$100,000 in change order costs.
6. Proceed to authorize contract change orders on those projects in the 2004 Capital Budget with an estimated cost of over \$100,000, where such change orders exceed 10% of the original contract price, and when a documented business necessity exists, and ratification of such action is sought at the next regularly scheduled Board meeting.

AND BE IT FURTHER RESOLVED, that all contract expenditures greater than \$100,000 must be submitted for approval to the Board of Water Works prior to award and execution of the contract.

**BOARD OF WATER WORKS
MEETING MINUTES
DECEMBER 9, 2003**

Board Members Present:

Mr. Phillip Bond
Dr. Joseph Wise
Ms. Marita Willis
Mr. Stewart Conner
Mr. Gerald Martin

Board Members Absent:

Mayor Jerry Abramson
Ms. Wendy Welsh

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer & Acting Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources & Organizational Development
Ms. Kathy Holder, Acting General Counsel
Mr. Richard Johnston, Deputy Mayor
Ms. Barbara Crow, Process Owner, Public Information
Ms. Amber Halloran, Business System Owner, Financial Resources
Ms. Kathy Schroeder, Business System Owner, Human Resources

A regular meeting of the Board of Water Works was held on Tuesday, December 9, 2003 in the Board Room of Louisville Water Company. Mr. Huber called the meeting to order at 12:35 p.m.

Willis and Martin Sworn In as New Board Members

Pursuant to Kentucky Constitution § 228 and K.R.S. 96.240, Ms. Kathy Holder administered the oath of office to the newly appointed board members, Ms. Marita Willis and Mr. Gerald Martin. Copies of the signed oaths are attached to these minutes.

Opening Remarks from John Huber

Mr. Huber announced that 2004 is the 150th anniversary of chartering the Louisville Water Company. Barbara Crow reviewed activities planned for celebrating the anniversary.

Mr. Huber reviewed the results of the recent Metro United Way fund raising campaign at Louisville Water Company led by Greg Heitzman. The goal of \$66,000 was set at ten percent higher than last year's contributions. The actual amount contributed by Louisville Water Company employees was \$67,566. Mr. Bond expressed his appreciation to all

employees for surpassing the goal. Mr. Huber recognized the efforts by AFSCME Local 1683 leadership and members.

Consent Agenda Reviewed and Approved

The minutes from the November 4, 2003 special meeting of the Board of Water Works were approved. The minutes from the November 11, 2003 regular meeting of the Board of Water Works were also approved.

The List of Claims Paid for November 2003 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

Project	Contract	Project Name	Project Cost	Net Cost
10045	G554M	Louisville Metro Commerce Center	\$56,550.00	
10046	G551M	Billtown Farms Section 3	\$132,640.00	\$8,800.00
10049	G516M	Pleasant Colony Commercial Phase I	\$50,660.00	\$11,500.00

Financial Report Filed

Mr. Miller presented the financial results through November 2003. Operating Revenue of \$89,949,665 is \$2,791,969 or 3.0% less than budgeted and \$963,964 or 1.1% less than the same period in 2002. We sold 6.0% less water in 2003 than the same period in 2002. Operation and Maintenance Expenses of \$39,548,371 is \$307,390 or 0.8% more than budgeted and \$1,664,560 or 4.4% more than 2002. Total Operating Expenses of \$62,492,233 are \$606,898 or 1.0% more than budgeted and \$3,118,214 or 5.3% more than 2002. Net Operating Income of \$27,457,435 is \$3,398,867 or 11.0% less than budgeted and \$4,082,178 or 12.9% less than 2002. Net Non-Operating Expense of \$3,957,049 is \$1,123,082 or 39.6 % more than budgeted and \$237,654 or 6.4% more than 2002. Net

Income of \$23,500,386 is \$4,521,949 or 16.1% less than budgeted and \$4,319,832 or 15.5% less than 2002. Excluding the overhead amount to be allocated to Capital in December, Net Income of \$24,059,224 is \$3,963,111 or 14.1% less than budgeted and \$3,760,994 or 13.5% less than 2002.

Mr. Miller reported that the Kentucky Retirement Systems has increased their employer contribution rate from 7.34% to 8.48% effective July 1, 2004. Staff had anticipated an increase in the contribution rate and had prepared the 2004 Budget based on an increase to 8.00%. The additional increase beyond the budgeted amount will be approximately \$61,900. He noted the recent announcement of the shutdown of the Frito-Lay plant on Crums Lane, which is currently one of our top twenty largest customers, using 7 million gallons per month. The annual revenue loss from the shutdown of their plant will be approximately \$140,000. He also noted that the Technology Services area of Louisville-Jefferson County Metro Government recently achieved significant cost savings through the use of a "reverse auction" for procurement of Information Technology equipment. Staff is reviewing their methodology in anticipation of applying it on future procurements.

Operations Report Filed

Mr. Heitzman presented the November 2003 Operations Report.

Water production in November of 116.6 MGD was 1.0 percent higher than the November 2002 production of 115.4 MGD, and was 0.9 percent lower than the 5-year average November production of 117.7 MGD. Sampling results continue to show that the water quality in our distribution system has consistently exceeded our internal turbidity, chlorine, and bacteria goals, which are more stringent than regulatory requirements, for the month as well as for year-to-date. There were no water quality monitoring or reporting violations in November.

Staff worked with LG&E in early November in preparation for LG&E to test their gas turbine generator at the Zorn Pump Station. The generator failed to start due to problems with the gas igniter system. LG&E also discovered a failed transfer switch at the Hillcrest electric substation during the test. LG&E has attempted to repair this switch on two occasions. During the first repair attempt on November 21st, Crescent Hill lost power briefly due to a faulty protective relay at LG&E's Clifton substation. The loss of power resulted in an emergency shut down of the two pumps at Crescent Hill, a drop in system pressure and a temporary loss of chemical feed systems. Power and normal treatment/pumping operations were restored in approximately 15 minutes. After LG&E repaired the protective relay at the Clifton feeder, a second attempt to repair the transfer switch at the Hillcrest substation was done on December 2nd. However, this attempt also failed. LG&E is currently ordering parts to complete the repair. The test of the gas turbine generator will be scheduled once repairs are made.

LG&E recently announced a twelve percent increase in electric rates pending Kentucky PSC approval. Our account representative has advised the impact on LWC's industrial rate may be less than twelve percent and is expected to go into effect in 2004. The Company budgeted \$3,550,000 for total electric use. A twelve percent increase would increase 2004 operating

expenses by \$426,000. This is in addition to the \$400,000 increase in power already included in the 2004 O&M budget.

Winter planning activities continued in November in preparation for possible emergency operations that could arise from sustained cold weather this coming winter season. A thorough list of preparatory activities has been compiled and assigned to staff across the company to execute. A leading indicator of winter emergency activity is the temperature of finished water leaving the treatment plant. At the end of November, water temperature was approximately 50 degrees. When water temperature passes through 38 degrees, an increased rate of water main failure occurs. The maintenance backlog of work has been reduced to an acceptable level of 560, in preparation for the upcoming winter period.

The Center for Infrastructure Research (CIR) at the University of Louisville had a very successful year. During 2003, the Center has been successful in attracting four external research grants with a total contract value of \$1.2 million. These funds were awarded from both the American Water Works Association Research Foundation (AwwaRF) and the National Science Foundation (NSF). The Center is also performing self-funded research on void detection under street pavements using ground penetrating radar. The CIR is also one of two finalists for a proposal sponsored by the Water Environment Research Foundation. Louisville Water Company and MSD have each pledged \$50,000 per year, over a 5-year period (2001-2005), to assist the Center in getting established as a national center for urban infrastructure research. In 2004, the Center will focus on expanding membership base to other local utilities and agencies (LG&E, Metro Louisville, KDOT, etc) and also recruit partners from consultants and contractors.

Serving Customers Report Filed

Ms. Teasley presented the November 2003 Serving Customers Report.

Staff met with wholesale customers on November 18 to discuss our proposed 2004 increase in wholesale water rates. In attendance were representatives from North Shelby Water District, West Shelby Water District, and Mt. Washington. Staff also presented and discussed key issues of interest, including future water quality regulations and LWC's advanced treatment plans, future LWC capital improvement plans benefiting our wholesale customers, water system security and emergency response issues, and LWC's master meter maintenance/quality assurance program.

Staff met with representatives of the Home Builders Association of Louisville (HBAL) during November to discuss various concerns about water main extension projects. The HBAL representatives expressed concern regarding the new Metro Government fire hydrant ordinance, warehousing costs, engineering and inspection costs, and material costs. Another significant concern is the recently adopted 50 psi design standard with 40 psi as the minimum standard for a main to be made available for new services. The solution to pressure issues for select portions of Jefferson County requires additional storage and expansion of the 900 msl Pressure Plane and the 770 msl Pressure Plane. However, the time delay in LWC being able to implement these storage tank and pressure plane expansions is viewed by these representatives as LWC limiting development. Staff has scheduled a series of meetings with HBAL representatives to collectively find common ground to address these concerns and develop interim solutions.

Ms. Teasley noted that 9.64% of bills were estimated in November 2003 due to restricted duty injuries to five meter readers.

Closed Session Discussion

After proper motion and second, the Board went into closed session at 1:30 p.m. for the purpose of discussing future acquisition of real property and anticipated and current litigation. The Board returned to open session at 2:05 p.m. after taking no action.

2004 Cost Reduction Plans

Mr. Miller noted that Louisville Water Company has experienced one of the most financially challenging years in the past quarter-century. Significant cost reductions will be needed in 2004 to meet the budgeted dividend requirement while offsetting any overpayment of the 2003 dividend. Additional sustainable reductions will be needed to keep future water rate increases at or below levels targeted in the 2004-2008 Strategic Plan.

Staff is pursuing five strategies in order to achieve necessary cost reductions and provide additional flexibility in responding to future financial challenges:

- Reduce 2004 costs by \$2,000,000.
- Contain the growth of future costs to 3% per year.
- Convert fixed costs into extractable variable costs in order to, if needed, extract up to \$300,000 per month and to implement the cost reductions within two weeks.
- Consider creation of a risk mitigation / rate equalization reserve.
- Consider redesign of our rate structure to stabilize revenue in low consumption years.

Mr. Miller summarized efforts to reduce 2004 costs by \$2,000,000. The remaining strategies will be reviewed in detail at subsequent meetings. Staff is targeting three areas for cost reductions in 2004:

- | | |
|--|----------------------------|
| ▪ Depreciation Expense | \$200,000 |
| ▪ Operations and Maintenance Non-Labor Expense | \$600,000 to \$800,000 |
| ▪ Operations and Maintenance Labor Expense | \$1,000,000 to \$1,200,000 |

Staff has reviewed the 2004 Capital Budget and identified internally-financed projects that had the shortest depreciable lives to be cancelled or deferred. An update to the 2004 Capital Budget is being prepared to cancel or defer funding for approximately 44 projects. This will allow Depreciation Expense in 2004 to be approximately \$200,000 below budget. Externally financed projects funded by developers and projects with an anticipated construction schedule longer than one year were not considered.

Staff has reviewed the 2004 Operations and Maintenance Budget and identified non-labor expenses to be reduced or eliminated by these methods. Implementation plans are being developed to achieve actual reductions in each of these areas. Monitoring and measurement programs will track these implementation plans. An update to the 2004 Operations and Maintenance Budget is being prepared to remove or reduce funding for these items, transferring approximately \$600,000 to \$800,000 to the contingency account. Staff is

RE: Board of Water Works
Member Oath of Office

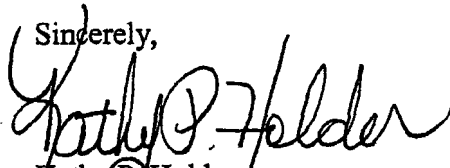

Dear Ms. Geraghty:

Pursuant to K.R.S. 96.240, we are enclosing for filing with the Louisville/Jefferson County Metro Revenue Commission, the original signed Oaths of Office for the following Board of Water Works newly appointed members:

- 1) Gerald Richard Martin
- 2) Marita Ann Willis
- 3) Dr. Joseph B. Wise, III

Please do not hesitate to give me a call if you have any questions.

Sincerely,

Kathy P. Holder
Interim General Counsel
Louisville Water Company

Enclosures: Signed Oaths of Office

An Equal Opportunity Employer

BOARD OF WATER WORKS

OATH OF OFFICE

DECEMBER 9, 2003

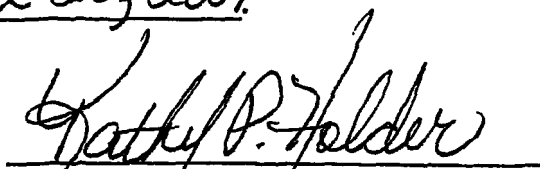

I, Gerald Richard Martin, do solemnly swear that I will support the Constitution of the United States and the Constitution of this Commonwealth, and be faithful and true to the Commonwealth of Kentucky so long as I continue a citizen thereof, and that I will faithfully execute, to the best of my ability, the appointed office, Board of Water Works Board Member, according to law; and I do further solemnly swear that since the adoption of the present Constitution, I, being a citizen of this State, have not fought a duel with deadly weapons within this State, nor out of it, nor have I sent or accepted a challenge to fight a duel with deadly weapons, nor have I acted as second in carrying a challenge, nor aided or assisted any person thus offending, so help me God.

NOTARY PUBLIC

**RESOLUTION TO DECLARE FOURTH QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of the Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution set forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 11, 2003 to adjust the 2002 annual dividend by \$357,847 from \$12,021,776 to \$12,379,623, the difference to be added in equal quarterly installments to the quarterly 2003 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2003 Louisville Water Company budget contemplates the 2003 annual dividend to be \$12,318,831 it would be in order at this time to declare a regular fourth quarter dividend of \$3,079,708.

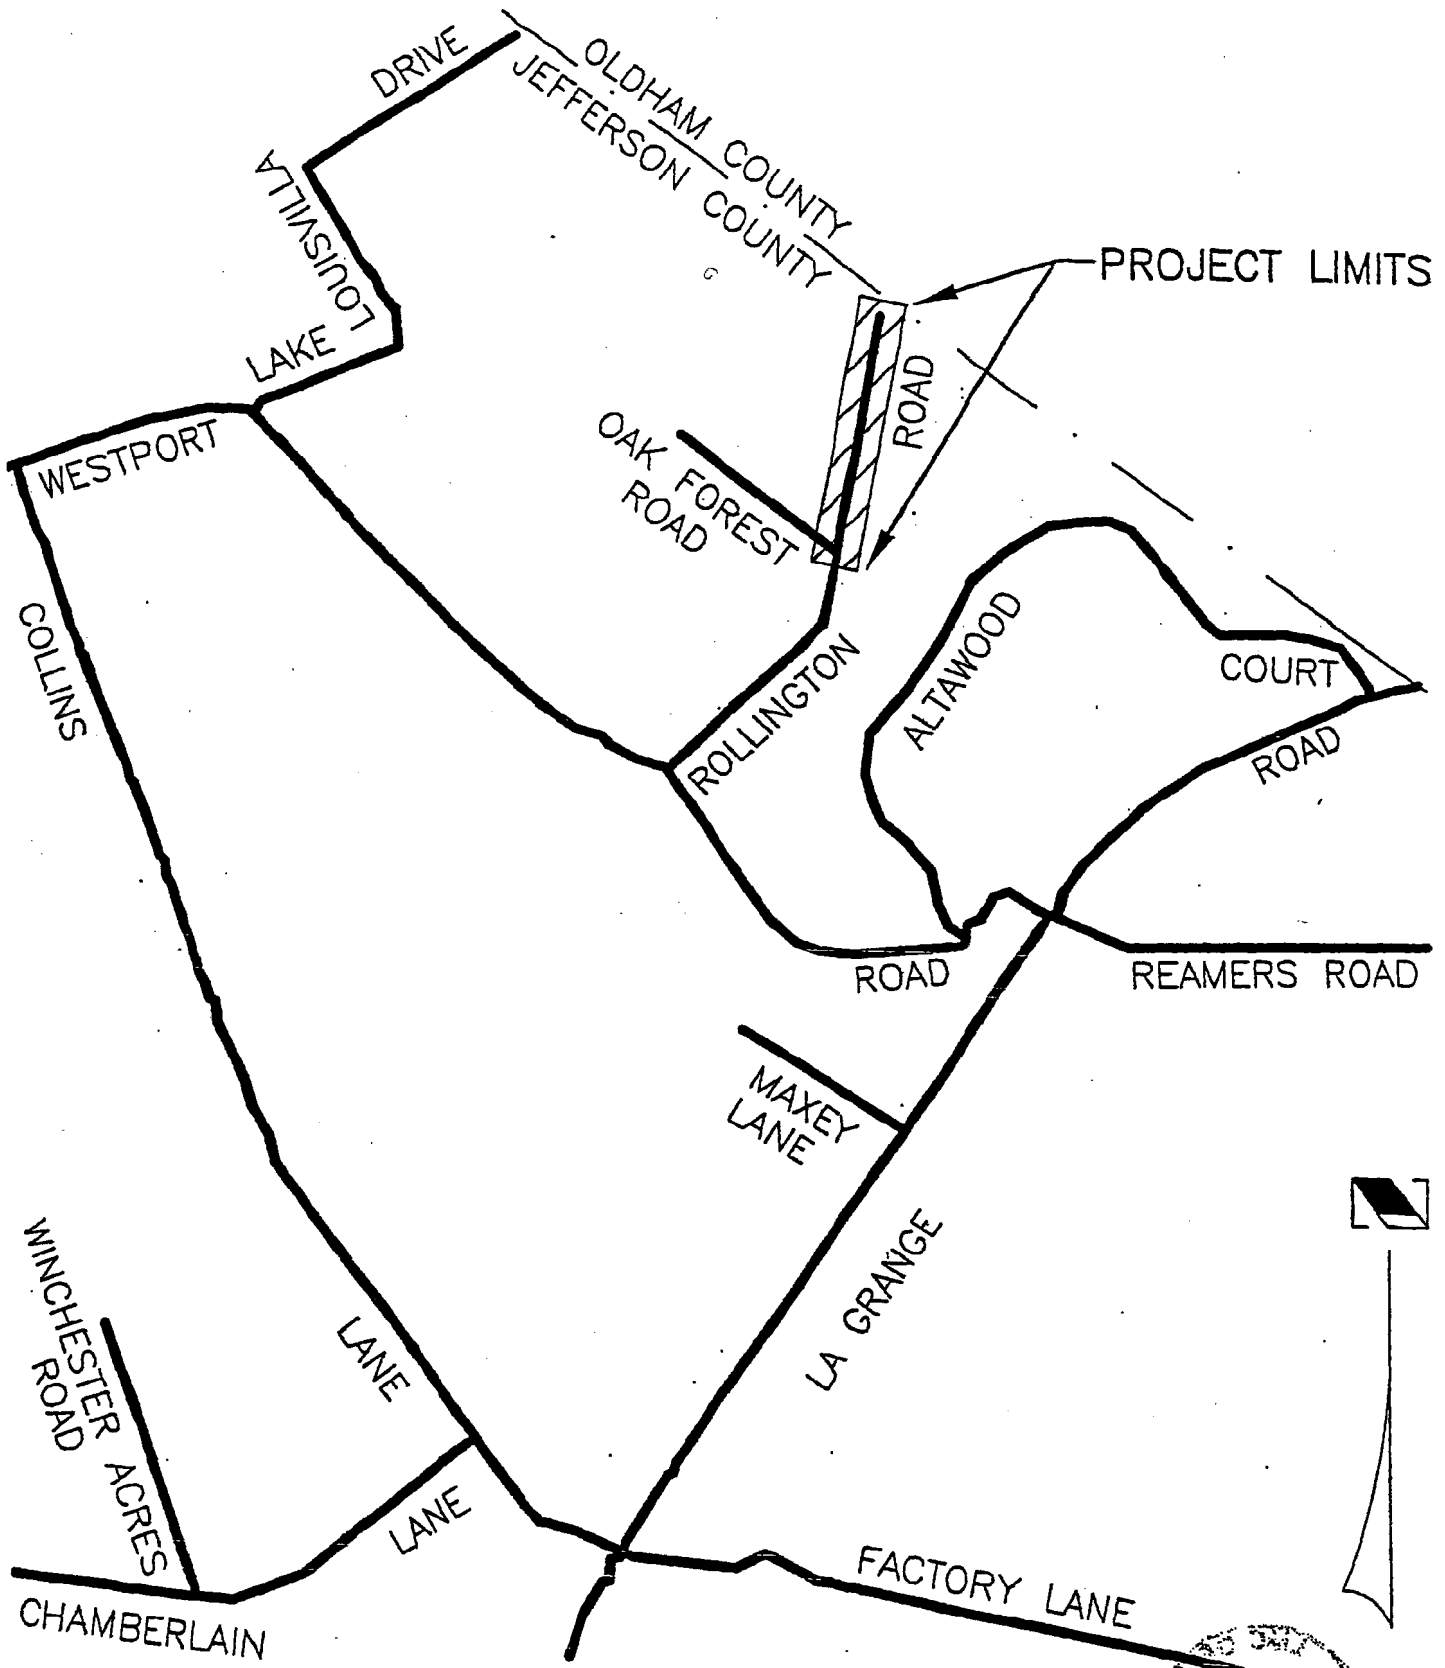

RESOLVED, the regular fourth quarter 2003 dividend of \$3,079,708 is hereby declared.

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,169,170 to the Louisville/Jefferson County Revenue Commission on December 30, 2003, this being the fourth quarterly dividend for 2003 plus one quarter of the dividend adjustment for 2002, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

APPORTIONMENT WARRANT RESOLUTION

December 9, 2003

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Rollington Rd: Oak Forest Rd to County Boundary** main extension project authorized by Ordinance No. 33, Series 2003 of the Louisville/Jefferson County Metro Council, adopted on March 13, 2003 such warrant to be against one (1) benefited property identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute the apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**BOARD OF WATER WORKS
MEETING MINUTES
JANUARY 13, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Gerald Martin

Board Members Absent:

Mayor Jerry Abramson
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer & Acting Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources & Organizational Development
Ms. Kathy Holder, Acting General Counsel
Mr. Don McKay, Business System Owner, Managing Business Risks
Ms. Kathy Schroeder, Business System Owner, Supplying Human Resources
Ms. Barbara Crow, Process Owner, Public Information
Mr. Bryan Cavan, T+C Contracting, Inc.

A regular meeting of the Board of Water Works was held on Tuesday, January 13, 2004 in the Board Room of Louisville Water Company. Mr. Huber called the meeting to order at 12:30 p.m. and announced that there was not a quorum. He indicated that the agenda and items presented would be reviewed by the attending board members to develop recommendations for ratification at a subsequent special or regular board meeting.

Consent Agenda Reviewed and Approved

The minutes from the December 9, 2003 regular meeting of the Board of Water Works were approved.

The List of Claims Paid for December 2003 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

03-097	G578M	Kenbrook Pointe	\$29,240	
10051	G579M	Seminary Woods Res. Condominiums	\$30,200	\$5,900

10058	G582M	Willowgate Subdivision Section 2	\$70,600
10080	G581M	Rivers End Garden Homes	\$56,150

Developer Installed Tapping Fee Main Extension Projects

03-087	G585T	Kingdom Way Extension	\$35,650	\$4,450
--------	-------	-----------------------	----------	---------

Surcharge/LWC Tapping Fee Main Extension Projects

03-201	G598C/ G599T	Spring Drive	\$170,030	\$153,440
--------	-----------------	--------------	-----------	-----------

Bullitt County Water Main Extension Projects

10123		Wilderness Way	\$95,530.00	\$41,030	\$54,500
10130		Pinecrest Drive	\$7,500.00	\$2,050	\$5,450

Administrative Report

Mr. Huber reported that the City of Louisville had applied for federal funding for the security fencing project at Crescent Hill Water Treatment Plant and for the Riverbank Infiltration Project Phase II at the B.E. Payne Water Treatment Plant. He noted that staff had met recently with representatives from the Home Builders Association on issues related to the new minimum pressure design standard.

Financial Report Filed

Mr. Miller presented the preliminary unaudited financial results through December 2003.

Operating Revenue of \$97,687,187 is \$2,444,211 or 2.4% less than budgeted and \$484,844 or 4.9% less than the same period in 2002. We sold 1.8% less water in 2003 than the same period in 2002. Operation and Maintenance Expenses of \$43,668,261 is \$89,823 or 0.2% more than budgeted and \$1,300,338 or 3.1% more than 2002. Total Operating Expenses of \$68,403,125 are \$492,758 or 0.7% more than budgeted and \$2,660,171 or 4.0% more than 2002. Net Operating Income of \$29,284,062 is \$2,936,969 or 9.1% less than budgeted and \$3,145,015 or 9.7% less than 2002. Net Non-Operating Income of \$2,147,606 is \$1,422,394 or 39.8% less than budgeted and \$43,245 or 2.0% less than 2002. Interest Expense of \$6,552,670 is \$286 less than budgeted and \$234,510 or 3.5% less than 2002. Net Income of \$24,878,998 is \$4,359,077 or 14.9% less than budgeted and \$2,953,750 or 10.6% less than 2002. Based upon these preliminary unaudited results, the dividend overpayment for 2003 was approximately \$920,000. Staff is pursuing cost reductions for 2004 which are expected to fully offset the effect of this overpayment and allow for the 2004 dividend to be paid at the budgeted amount.

Operations Report Filed

Mr. Heitzman presented the December 2003 Operations Report.

Water production in December of 113.7 MGD was 2.7 percent lower than the December 2002 production of 126.9 MGD, and was 1.3 percent lower than the 5-year average December production of 115.2 MGD.

Water quality in our distribution system consistently exceeded our internal turbidity, chlorine, and bacteria goals on a monthly basis for the entire year. These goals are more stringent than regulatory requirements. There was no water quality monitoring or reporting during the year.

Under EPA's Long-term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR), LWC is required to monitor and test for the cryptosporidium level in the Ohio River source water monthly for 2 years using an EPA approved laboratory. To be approved by EPA, laboratories have to pass EPA's Laboratory Quality Assurance Evaluation Program for Analysis of Cryptosporidium. This program involves 6 rounds of performance evaluation tests and an on-site laboratory inspection. LWC's water quality laboratory successfully passed these tests and was granted "Approval Pending" status in December. "Approval" status is dependent on promulgation of the LT2ESWTR by EPA. A total of 22 laboratories were approved by EPA, of which half are commercial laboratories and the other half utility laboratories. LWC is the only laboratory in Kentucky that is approved by EPA to perform such tests for Cryptosporidium.

A thorough RMP Audit and Inspection was conducted at the B.E. Payne facility on December 3 by Mr. Jim Bottom, a Technological Hazards Coordinator with the Louisville Metro Emergency Management Agency. Overall, the audit went very well. Mr. Bottom was very complimentary as to how clean and orderly the site was, even with such major construction work under way at the plant. Mr. Bottom mentioned that LWC did very well on the audit and felt that LWC had no major flaws in the RMP system. There were several minor findings primarily involving documentation issues and the issues are being promptly addressed. Mr. Bottom will forward his audit findings to the Jefferson County Air Pollution District, who will then report to the USEPA. Staff has requested a copy of the audit from Metro EMA.

Staff worked with LG&E in early November in preparation for LG&E to test their gas turbine generator at the Zorn Pump Station. The generator failed to start due to problems with the gas igniter system. LG&E also found a failed transfer switch at the Hillcrest substation and a faulty protective relay at LG&E's Clifton substation during the trouble shooting. In December, LG&E repaired the equipment at both substations. Staff plans to retest the generator with LG&E in January, weather permitting.

The Company received bids on November 26, 2003 to upgrade the HVAC system at Allmond Avenue. Staff is evaluating alternatives for this project, including reducing the scope and re-bidding the project to fit within the budget allocation. The Company also received bids on November 26, 2003 for installation of a ventilation system at both the Zorn and Crescent Hill Pumping Stations. The Project Manager anticipates finalization of the alternatives in January and a recommendation will be reported to the Board in February.

Mr. Heitzman also distributed and reviewed a graph of Finished Water Temperature and Water Main Breaks for 2001 through 2003. He noted that we are approaching a peak main break period as the raw water temperature cools below forty degrees.

Serving Customers Report Filed

Ms. Teasley presented the December 2003 Serving Customers Report.

The December 2003 abandonment rate was 5.02% compared to 3.74% in November 2003, and 3.20% in December 2002. The year-to-date abandonment rate is 4.52%.

Ms. Teasley distributed and reviewed a graph of the Customer Satisfaction Index for 1999 through 2003. Customer satisfaction substantially increased in the fourth quarter of 2003 from a third quarter Total CSI of 837 to a Total CSI of 855. This is a new high quarterly score for the Total Customer Satisfaction Index, 2 points above the first quarter high. The year end results of 845 (annual average) meets the corporate Level II goal for the Total CSI of 845. Customer satisfaction for serviced accounts remained high during the fourth quarter at 800, just 2 points below the third quarter high of 802. The year end results for the serviced accounts were also at 800 (annual average). This exceeds the Level III goal for customer satisfaction for the Corporate Performance Award of 789. This annual result also meets the serviced account goal recently established for the LWC Strategic Plan for 2008. Mr. Bond asked about the effect of MSD rate increases. Mr. Huber discussed potential rate impact of a possible EPA consent decree.

Ms. Teasley noted that Orcorn, LWC's Customer Information System (CIS) provider and business partner, was acquired by Alliance Data Systems in December. In various publications, Alliance Data describe themselves as a leading provider of transaction services, credit services, and marketing services. From a risk management perspective, it appears that their biggest risk comes from the possible loss of one of several large customers. Orcorn representatives have indicated that the acquisition is very positive for them and provides more support for future growth. They do not anticipate any negative impact on service to their clients.

Staff has recently been evaluating the benefits of charging a deposit to customers for water service. The CIS implemented in 2000 provides new capability for managing deposits in an automated manner. The time and expense of managing deposits manually was a major factor in deciding to eliminate the use of deposits in the mid-1990s. Initial data evaluation indicates that a deposit charged to new customers could result in a substantial reduction in bad debt. Staff will continue to evaluate the benefits and disadvantages of charging deposits and will consult with MSD staff concerning their interests in this matter.

As a result of the federal government mandate to privatize Army military base utilities, Ft. Knox participated in the creation of the Lincoln Trail Regional Water Commission (LTRWC). The water commission was formed under KRS 74.420 – 74.520, and includes the cities of Elizabethtown, Radcliff, Hardin County Water Districts #1 and #2, and Ft. Knox. LTRWC plans to acquire Ft. Knox's water assets, and sell the excess capacity to other water utilities in Hardin and adjacent counties. Two unusual features of this partnership are that a federal agency is one of the organizing entities, and that another of the entities (City of

Radcliff) does not own a treatment plant or a distribution system. Both of these entities are able to appoint a commissioner to serve on the Board of the LTRWC.

Early Retirement Incentive Program Reviewed

Ms. Lehman reviewed the results to-date from the early retirement incentive program. She stated that some of the jobs will be eliminated or consolidated, and the remainder will be filled. She noted that further reductions in workforce size may be needed.

Audit Committee Report Deferred

The Audit Committee met on January 6, 2004. The report from that meeting was deferred.

Employee Health, Dental, Life & Disability Insurance

Mr. McKay and Ms. Schroeder presented recommendations for renewal of employee health, dental, life and disability insurance. LWC staff has been working with our independent insurance brokers, Rob Gippich of Aon and Cornell Starks of Starks & Associates, to evaluate proposals from health, dental, life and disability insurance carriers for the plan year beginning March 1, 2004. Premium forecasts and staff recommendations are based upon employee and dependent census data as of October 2003 and may be subject to adjustments.

Fully-insured and self-funded healthcare quotes were received from five underwriters - Humana (the incumbent), Anthem, United Healthcare, Aetna and CIGNA. All but Humana and Anthem were eliminated based upon pricing. Self-funding appears to offer little cost benefit at this time based upon claims and fixed cost projections and because of improved market competition among the fully-insured plans. Early trends had indicated a 16 % + increase for healthcare premiums and LWC staff had budgeted a 10% increase. However, aggressive negotiation by our broker has resulted in a renewal quote from Humana at no premium increase and a 1.65% premium decrease quote from Anthem. Additionally, modifications will be made by management to our two available plans which will bring the LWC plans more in line with plans offered by other public entities and which will further reduce premiums by approximately \$100,000. Those modifications will increase the co-pay for specialist office visits from \$15 to \$20 and will increase prescription co-pays from \$8 to \$10 for generic prescriptions and from \$15 to \$20 for brand name drugs. Mr. Bond moved to approve renewing coverage with Humana at an annual premium of \$3,627,800 to minimize enrollment issues and to better position LWC for future renewal negotiations. Upon second and vote, the motion carried.

The incumbent insurance carrier, Delta Dental, has quoted a 4% premium increase which is below market trend. Mr. Conner moved to approve the renewal with Delta Dental at a projected net premium to the company, exclusive of employee contributions, of \$264,000. Upon second and vote, the motion carried.

The incumbent life insurance underwriter, Monumental, has offered a renewal quote at no increase in rates. Mr. Bond moved to approve renewing group and dependent life insurance with Monumental at a projected net premium to the company of \$158,000. Upon second and vote, the motion carried.

Fees for administration of the self-funded short term disability plan (STD) and premiums for the fully-insured long term disability plan (LTD) do not meet the criteria for approval by the Board of Water Works. It appears that we will be changing insurance carriers for a projected savings of 14% and a total cost of \$80,500 while improving STD plan administration.

Bids Discussed for Project 03-625: Renovation of South Coagulation Complex at Crescent Hill Filter Plant and for Projects 10039 and 10040: Bullitt County Community Development Block Grant Phase I Water Main Extension Project

Mr. Heitzman reported that bids were received on Wednesday, December 17, 2003 for Renovation of South Coagulation Flocculation and Sedimentation Basins at Crescent Hill Filter Plant. The coagulation process is essential to plant operations for removal of sediment, organics, and other contaminants from the river water. Three of four flocculators and two of four clarifiers were previously replaced under emergency contract. This project will complete replacement of all remaining mechanical equipment, plus rehabilitate concrete wall and floor cracks and replace remaining ancillary items in the South Coagulation complex. Seven bids were received ranging \$2,245,550 - \$3,514,000. The lowest bid was submitted by MAC Construction in the amount of \$2,245,550. MAC Construction has advised the company by letter that they desire to withdraw their bid and bid bond due to a material mistake in their bid. The company is evaluating this issue and considering various alternatives.

Ms. Teasley reported that bids were also received on Wednesday December 17, 2003 for the Bullitt County Community Development Block Grant Phase I Water Main Extension Project. The projects will be constructed in LWC easements, Kentucky Highway Department right-of-way and Bullitt County public right-of-way. These projects are part of the Bullitt County Water Improvement Program which was established as part of the merger agreement between Kentucky Turnpike Water District and Louisville Water Company and include a \$994,000 Community Development Block Grant and a \$206,500 Kentucky Infrastructure Authority grant. Four bids were received ranging \$3,789,000 - \$6,665,000. The lowest bid was submitted by MAC Construction in the amount of \$3,789,000. MAC Construction has advised the company by letter that they desire to withdraw their bid and bid bond due to a material mistake in their bid. The company is evaluating this issue and considering various alternatives.

Closed Session Discussion

After proper motion and second, the Board went into closed session at 1:20 p.m. for the purpose of discussing potential litigation. The Board returned to open session at 2:15 p.m. after taking no action.

MAC Construction Bids Discussed

Mr. Huber stated that the board will take not action on the MAC Construction bids at this time. The Board will take this matter up again at a special meeting or at the next regular

meeting. The Board instructed staff to finalize negotiations with MAC Construction in an attempt to resolve this matter.

Contract Awarded for Bid 00-56: Ductile Iron Pipe and Fittings

Mr. Conner moved to authorize award of a third PPI contract renewal for an estimated \$2,370,551 to US Pipe and Hughes Supply for Ductile Iron Pipe and Fittings. Upon second and vote, the motion carried.

Contract Awarded for Project 03-524: Lead Service Renewals - Various Locations

Bids were recently received to renew a total of 245 lead services on portions of South 20th Street, South 23rd Street, North 29th Street, South 32nd Street, South 41st Street, and South 42nd Street. The water mains in this area were previously cleaned and cement-lined, and these streets have been identified for re-paving by Metro Public Works in 2004/2005. Mr. Bond moved to award a contract in the amount of \$196,400 to Southern Pipeline Construction Company to renew the lead services associated with this project. Upon second and vote, the motion carried.

Minimum Pressure Design Standard Issues Discussed

Mr. Huber stated that last year, Louisville Water Company raised its minimum design standard for pressure from 30 psi to 40 psi. The previous 30 psi design standard matched the state regulatory requirement. The Federal Energy Policy Act of 1992 required all plumbing fixtures manufactured after January, 1994 be low flow plumbing fixtures. The low flow characteristics of these fixtures are created by inducing significant pressure loss through the fixture. As a result, a minimum 30 psi pressure standard no longer meets customer needs. Several issues have arisen following implementation of the higher minimum design standard.

Staff met with representatives of the Home Builders Association on December 19 to address these issues. After receiving the input of these key constituents, staff has determined that we need to migrate to the 40 psi minimum pressure standard rather than adopting it as a hard and fast requirement. The Louisville Water Company is not a regulator of development, but rather its role is to ensure its activities are in conformance with the development plan and to streamline its processes for extending water facilities so as not to create barriers for community growth.

Staff will be meeting with the Home Builders Association representatives again this month to outline our approach for addressing the pressure issues and also to discuss possible alternatives for procurement of materials for developer-financed main extensions. Currently, these materials are purchased by the Louisville Water Company with the developer reimbursing the Company for its cost of the material, sales tax, and warehousing charges.

2004 Cost Reduction Plans – Status Update

Mr. Miller provided a status update of the cost reduction plans. As reported at the December 2003 meeting of the Board of Water Works, staff is targeting three areas to reduce costs by \$2,000,000 in 2004:

- Depreciation Expense \$150,000 to \$200,000
- Operations and Maintenance Non-Labor Expense \$800,000 to \$1,000,000
- Operations and Maintenance Labor Expense \$1,000,000 to \$1,200,000

Staff has reviewed the 2004 Capital Budget and identified internally-financed projects that had the shortest depreciable lives to be cancelled or deferred. Externally financed projects funded by developers and projects with an anticipated construction schedule longer than one year were not considered. Also excluded were any safety or security related projects. This allows for an expected reduction in 2004 Depreciation Expense of approximately \$160,000.

Staff has also reviewed the 2004 Operations and Maintenance Budget and identified non-labor expenses to be reduced or eliminated. Implementation plans are being developed to achieve actual reductions in each of these areas. The estimated reduction in 2004 Operations and Maintenance Non-Labor Expense is approximately \$1,000,000.

Following approval by the Board of Water Works at the December 2003 meeting, management commenced a voluntary early retirement incentive program for non-union employees with 20 or more full years of service with Louisville Water Company. There were thirty-nine employees eligible for the program. The severance calculation is (1.5 times the number of full years of LWC service, up to a maximum of 52) times the weekly base salary. If elected, benefits would continue through the end of February 2004. The program provides a 45 day consideration period, allowing an additional 7 days after signing the agreement for the employee to revoke the decision. For employees signing by December 31, 2003, the severance cost will be recognized as a 2003 expense. The remaining severance costs will be recorded in 2004. Management expects that a portion of the severance costs will be offset by not filling certain positions vacated by these employees. Management also anticipates that an involuntary workforce reduction will be needed following the voluntary early retirement incentive program. The estimated reduction in 2004 Operations and Maintenance Labor Expense is approximately \$1,000,000 to \$1,200,000.

Since the 2004 Budget was adopted, there have been several adverse changes to anticipated revenues and expenses. The combined effect of these items will require additional cost reductions of approximately \$390,000. Management is continuing to review workload requirements to determine an optimal workforce size and is evaluating alternative organization structure designs.

Clean and Cement Mortar Line Project Year-End Update

Ms. Teasley reported that by letter agreement dated April 4, 2002 between Louisville Water Company and Southern Pipeline Construction Company, the Company amended and renewed the Clean and Line contract for 2002. At that time it was agreed that the amendment resolved some, but not all, of the outstanding issues, and that the parties would resolve the remaining issues by July 1, 2002. The April 4th amendment required Southern Pipeline to reline designated sections of cast iron pipe that did not receive a minimum thickness of 1/16-inch. As previously submitted, Southern has completed all the required re-lining work.

At the completion of the cleaning and lining operations, each run is video inspected for quality of the lining (surface finish, honey-combed texture, and fallen or missing lining). Exposed ends of the pipe, at pull-holes and from cut-out sections, are also visually inspected and checked for lining quality and measured for lining thickness. Dependent upon the condition of the lining, sub-standard sections of lining are over-sprayed, cleaned and re-lined, or the pipe is replaced prior to acceptance. During the period referenced above, pipe sections totaling just over 2,000 feet were identified for re-spraying. This footage represents less than 4% of the total pipe footage lined. No instances of fallen lining or bare pipe have been observed in 2003.

Renewal of 2000 Clean and Cement Mortar Line Contract and Approval of 2004 Clean and Cement Mortar Line Program

Ms. Teasley stated that in January 2000, Louisville Water Company entered into a contract with Southern Pipeline Construction Company for cleaning and cement mortar lining of cast iron water mains in the LWC distribution system. The contract provides for a maximum of four annual extensions of the agreement, with the unit prices adjusted in accordance with the Bureau of Labor Statistics Consumer Price Index - All Urban Areas (CPI-U).

On January 9, 2001, the Board of Water Works (BOWW) approved an initial renewal of the Clean and Line contract for 2001, with a 3.4% increase in unit prices. A second renewal was approved by the BOWW in March 12, 2002. As part of the renewal negotiations, the Contractor agreed to forgo the unit price increase for 2002. A third renewal, with a 2.4% increase in unit prices, was approved by the BOWW in January 14, 2003. A fourth and final renewal is currently requested that will increase unit prices by 1.8% over the 2003 level. The proposed increase matches the increase in the CPI-U over the same period. The attached table provides a summary of the proposed unit prices for the 2004 Clean and Line Program.

Similar to 2003, an adjustment to the clean and lining unit prices in 2004 is needed to compensate the Contractor for additional work items that were not included in the original scope of work. The Contractor has been directed to install 2-inch meters with back-flow prevention at each tie-in location for the temporary by-pass system and to connect the by-pass system directly to customer's services, thus allowing for better accountability of water used during the cleaning and lining operations. The Contractor has also been required by Public Works to provide enhanced customer notification of temporary changes in the parking status within the work zones. This often requires door-to-door notification by the Construction personnel. The proposed adjustment will add approximately \$85,000 to the contract amount.

Based on the estimated footage for the project areas and the contract unit prices, a contract cost and a total cost have been calculated for each proposed area. The estimated contract cost is \$2,021,050. The total project cost is estimated to be \$2,435,000. Mr. Bond moved to approve a fourth and final, one-year renewal of the Clean and Line contract with Southern Pipeline Construction Company for the 2004 Annual Clean and Line project scope, at an estimated contract cost of \$2,021,050. Upon second and vote, the motion carried.

Bashford Manor Lane Water Facilities Relocation Project Approved

Ms. Teasley stated that a letter was submitted to the BOWW in June 2003 requesting authorization to enter into an agreement with Louisville Metro Public Works (LMPW) to design and construct the distribution water facility relocations for the "Bashford Manor Lane Road Improvement" project in Jefferson County. LMPW intends to widen Bashford Manor Lane from Newburg Road to Mayo Drive, at which time LWC staff proposes to relocate and upsize the existing water main from Newburg Road to the 12" water main just north of Gladden Drive.

Previous information indicated that this project was state and federally funded, so LWC would only be responsible for the cost of upsizing its facilities estimated at \$30,000. However, we have since learned that state funds were not allocated specifically for this project. Rather the monies are in a general "pool" to pay for all current LMPW projects. As such, LMPW will only reimburse LWC for "direct conflicts". ("Direct conflicts" are instances where the water main is physically in conflict with proposed road improvements, such as when a storm sewer is proposed in the same location as an existing water main. "Direct conflicts" do not include instances where the water main currently lies behind the curb and/or sidewalk but will be under the pavement when the roadway is widened.)

The total relocation project cost is estimated to be \$255,500, of which \$135,500 is proposed to be paid by LWC. This cost is betterment for upsizing from an 8" water main to a 12" water main and moving the water main out from under the proposed pavement. Engineering/supervision is estimated to be \$21,000, materials are estimated to be \$50,000, and contract labor is estimated to be \$184,500.

Mr. Conner moved to authorization the Vice President of Serving Customers and Business Development to enter into an agreement with Louisville Metro Public Works to design and construct the distribution water facility relocations for the aforementioned project. Upon second and vote, the motion carried.

Change Action Approved for Financial Information System Implementation Services Contract

Mr. Miller stated that the Oracle Financial Information System went live on September 29, 2003 as scheduled. The system replaces a number of legacy applications and provides the Company with capabilities identified within the scope of the project. During the project, staff and the Solbourne implementation team performed a detailed business process analysis and re-engineered several key business processes to gain the efficiencies offered by the system. The Oracle system also positions the Company to implement additional modules and functionality to meet changing business needs and gain further efficiencies and benefits.

The current project budget of \$4,982,784 was approved by the Board of Water Works in January 2003. This amount includes both Capital and Operations and Maintenance expense funding. Several areas of the project have come in at or under budget. However, additional time and services were required of Solbourne for post go-live support, development of key business reports, training and technical workshops, custom modifications to meet specific business needs, and creation of data layers for end users. The additional amount to cover

implementation services and post go-live support is \$172,650 and the additional associated travel expenses are estimated to be \$120,831 for a total amount of \$293,481. This represents an increase of 13.2% over the approved contract amount. Staff is required to obtain approval by the Board of Water Works for contract changes greater than ten percent.

Mr. Bond moved to increase the contract with Solbourne by \$293,481 for a total of \$2,513,591 and that the Financial Information System project be increased to by \$17,289 for a project budget amount of \$5,000,073. Upon second and vote, the motion carried.

Amendment of Apportionment Warrant Register
Dawson Hill Rd: Brush Run Rd to Back Run Rd

The Board of Water Works approved a resolution for the issuance of Apportionment Warrants for Dawson Hill Rd: Brush Run Rd to Back Run Rd at its August 12, 2003 meeting in accordance with KRS 96.265. Staff received a request from Lee Horelick, a real estate attorney, to release the lien placed on Tax Block 58 Lot 177; a lien was placed on said property as a contiguous parcel to Tax Block 58 Lot 63 which fronts the water main placed in Dawson Hill Rd. Tax Block 58 Lot 177 is located at the rear of Tax Block 58 Lot 63 and does not have road frontage on the water main in Dawson Hill Rd. It was legal staff's opinion to release the lien on Tax Block 58 Lot 177 for the purposes of a real estate transaction; a Louisville Water Company lien remains on Tax Block 58 Lot 63. Mr. Conner moved to the adopt the amended resolution for Dawson Hill Rd: Brush Run Rd to Back Run Rd (Exhibit B); thereby removing Tax Block 58 Lot 177 as a contiguous parcel to Tax Block 58 Lot 63 on the official register. Upon second and vote, the motion carried.

Project 10240: Replacement of the Orcom Customer Information System AS/400
Computer Systems Authorized for Final Design and Bid

Mr. Miller stated that the current technical platform for the Orcom E-CIS includes two IBM AS/400 servers to provide for production processing and testing of new releases, patches, bug fixes, new programs, and interfaces for integration with other systems. These servers were installed in July 1999 as part of the Customer Information System implementation project. The servers were sized to support the system based on the defined scope of the project and to allow for normal growth. In 2002, the systems were added to the LWC Storage Area Network to provide additional storage capacity and improved processing times.

The systems have been expanded to support additional functionality, growth, new custom programs, and interfaces with other strategic Information Technology projects such as the Interactive Voice Response (IVR) and Mobile Dispatch System (MDS). With this expansion, the production system is at maximum processing capacity. The test system continues to provide an environment to install and test new releases, patches, programs for additional functionality, and interfaces; however, it can no longer provide a production platform for disaster recovery. The replacement systems will provide additional processing power and scalability and both systems will be capable of running a production environment, providing better recoverability in the event of failure or disaster. The replacement hardware and installation services are estimated at \$175,000.

The maintenance agreements required to support the current technical platform are \$105,000, \$75,000 for hardware and \$30,000 for software. The replacement systems will allow LWC to eliminate several components of the existing configuration and place the equipment in a lower maintenance category. The annual maintenance for the proposed replacement systems is estimated to be \$35,000 for hardware and \$12,000 for software for a total cost of \$47,000. This results in an annual reduction of Operating and Maintenance cost of \$58,000. In addition, the current version of the end-user interface software for the E-CIS will no longer be supported in 2004. Orcom has provided an upgrade path for the Company and will support our current environment through March 2004. The software and implementation services are estimated at \$25,000.

Mr. Bond moved to approve authorization for final design and bid of the project for a budgeted amount of \$200,000. Upon second and vote, the motion carried.

There being no further business to come before the Board, the meeting was adjourned at 2:50 p.m. Actions taken at this meeting will require ratification by a quorum of the Board of Water Works.

Respectfully submitted:

Robert K. Miller
Vice President - Treasurer
and Acting Corporate Secretary

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

January 26, 2004

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on August 12, 2003, directing the issuance of Apportionment Warrants against properties located on Dawson Hill Rd: Brush Run Rd to Back Run Rd, to remove Tax Block 58 Lot 177 as a contiguous parcel to Tax Block 58 Lot 63 on the official register approved on the aforementioned date.

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution is a true copy of a resolution duly and unanimously adopted at the Special meeting of the Board of Water Works of Louisville, on January 26, 2004 a quorum being present.

Signed,

Robert K. Miller
Vice President - Treasurer
Acting Corporate Secretary

**BOARD OF WATER WORKS
MEETING MINUTES
JANUARY 26, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Gerald Martin
Ms. Marita Willis

Board Members Absent:

Mayor Jerry Abramson
Ms. Wendy Welsh
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer & Acting Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources & Organizational Development
Ms. Kathy Holder, Acting General Counsel
Mr. Bryan Cavan, T+C Contracting, Inc.

A special meeting of the Board of Water Works was held on Monday, January 26, 2004 in the Board Room of Louisville Water Company. Mr. Huber called the meeting to order at 4:40 p.m., noting that a quorum was not present for the January 13, 2004 regular meeting of the Board of Water Works. Mr. Miller distributed a draft copy of minutes from that meeting. He also distributed a copy of materials from the previous meeting covered under Special Issues:

- Employee Health, Dental, Life and Disability Insurance
- Project 03-625: Renovation of South Coagulation Complex at Crescent Hill Filter Plant
- Projects 10039 and 10040: Community Development Block Grant Phase I Water Main Extension Project

Recommendations from Previous Meeting Approved

Mr. Conner moved for approval of recommendations from the January 13, 2004 meeting excluding those topics covered under Special Issues. Upon second and vote, the motion carried.

Employee Medical, Dental and Life Insurance Policies Renewed

Mr. Miller reviewed recommendations for renewal of employee medical, dental and life insurance policies.

Mr. Bond moved to approve renewal of the medical insurance coverage with Humana at an annual premium of \$3,627,800. Upon second and vote, the motion carried.

Mr. Conner moved to approve renewal of the dental insurance coverage with Delta Dental at a projected premium, net of employee contributions, of \$264,000. Upon second and vote, the motion carried.

Ms. Willis moved to approve renewal of the life insurance coverage with Monumental at a projected premium, net of employee contributions, of \$158,000. Upon second and vote, the motion carried.

Closed Session Discussion

After proper motion and second, the Board went into closed session at 4:50 p.m. for the purpose of discussing potential litigation. The Board returned to open session at 5:20 p.m. after taking no action.

MAC Construction Bid Settlement

Mr. Conner moved to allow MAC Construction to withdraw their bids for Project 03-625: Renovation of South Coagulation Complex at Crescent Hill Filter Plant and Projects 10039 and 10040: Community Development Block Grant Phase I Water Main Extension Project and return their bid bonds due to material mistakes made in the compilation of their bids and in consideration of payment of \$60,000 by MAC Construction to Louisville Water Company for damages and other costs. Upon second and vote, the motion carried.

Contract Awarded for Project 03-625: Renovation of South Coagulation Complex at Crescent Hill Filter Plant

Mr. Heitzman recommended award of a contract to Kelley Construction & Excavating in the amount of \$2,878,522 for construction of facilities for Project 03-625: Renovation of South Coagulation Complex at Crescent Hill Filter Plant. Mr. Martin moved for approval of this recommendation. Upon second and vote, the motion carried.

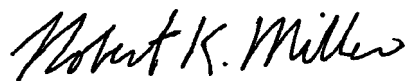

All Bids Rejected for Projects 10039 and 10040: Community Development Block Grant Phase I Water Main Extension Project

Ms. Teasley recommended that all bids be rejected for Projects 10039 and 10040: Community Development Block Grant Phase I Water Main Extension Project. She stated that staff intends to review the design for opportunities for value engineering and to re-bid the work in whole or in parts. She noted that MAC Construction is not eligible to participate

in subsequent bidding for this project. Mr. Bond moved for approval of this recommendation. Upon second and vote, the motion carried.

There being no further business to come before the Board, the meeting was adjourned at 5:25 p.m.

Respectfully submitted:

Robert K. Miller
Vice President - Treasurer
and Acting Corporate Secretary

**BOARD OF WATER WORKS
MEETING MINUTES
FEBRUARY 23, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise

Board Members Absent:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer & Acting Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources & Organizational Development
Ms. Kathy Holder, Acting General Counsel
Mr. Rudy Davidson, Louisville Metro Government

A regular meeting of the Board of Water Works was held on Monday, February 23, 2004 in the Board Room of Louisville Water Company. The regular February 2004 meeting, originally scheduled for February 10th, had been postponed to accommodate board member's schedules. Mr. Huber called the meeting to order at 3:05 p.m.

Mr. Martin asked for clarification on criteria for the consent agenda. Mr. Huber reviewed standing instructions from the Board for each item.

Consent Agenda Reviewed and Approved

The minutes from the January 13, 2004 regular meeting and the January 26, 2004 special meeting of the Board of Water Works were approved.

The List of Claims Paid for January 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

03-075	G584M	Chenoweth Park Patio Homes	\$50,080.00
03-094	G586M	Keeling Place Section 3	\$29,650.00

10070	G583M	Winding Creek Section 1	\$169,660.00	\$18,000.00
10093	G587M	Bannon Crossings Section 1	\$102,870.00	\$13,300.00
10101	G555M	Lake Forest Section 39A	\$65,030.00	\$3,425.00
10068	G605M	Autumn Gardens Phase 1	\$20,850.00	
10082	G603M	Woods of Landis Lakes Section 3	\$59,780.00	
10090	G600M	Middletown Village Condominiums	\$27,650.00	
10077	G604M	Stone Lakes Section 4	\$67,910.00	
10108	G610M	Smyrna Place	\$35,230.00	
10076	G602M	Hillpark Townhomes	\$8,080.00	
10078	G601M	Village of Wildwood Phase 5	\$59,780.00	

Developer Installed Tapping Fee Main Extension Projects

02107	G611T	Maureen Drive	\$73,800.00	\$13,900.00
-------	-------	---------------	-------------	-------------

Administrative Report

Mr. Huber stated that the company is analyzing components affecting lower water sales: lagging national economic conditions, weather, and conservation. He noted that there had been significant job loss from the local economy. He reviewed the Federal Energy Policy Act, which mandated low flow water fixtures. He stated that recent low flow water fixtures were more effective than earlier models. In addition, household appliances have become more water efficient. It will be difficult to determine the effect of each of the components which affect sales until further staff analysis is performed.

Mr. Huber noted that staff has developed plans to reduce expenses in 2004 by \$2,000,000. However, if water sales continue to decrease in 2004, there are few "shock absorbers" remaining. He stated that an interim water rate increase may be needed in order to fully fund the 2004 revenue requirement. He noted that the last interim rate increase occurred in early 1990 following high winter related expenses. A recommendation on any interim rate increase would be needed early in the second quarter of the year. Based upon water pumping statistics, water sales may be 2.0% to 2.5% below levels anticipated in budget.

Financial Report Filed

Mr. Miller presented financial results for January 2004. Total Operating Revenues for January were \$445,499 or 5.1% less than budgeted. Residential water sales were \$255,625 or 6.9% less than budgeted and commercial water sales were \$243,533 or 8.1% less than budgeted. We sold 3.9% less water in January 2004 than the same period in 2003. Operation and Maintenance Expenses for January were \$45,939 or 1.4% more than budgeted. Sick leave and vacation for participants in the early retirement incentive program was paid out in January. Total Operating Expenses for January were \$126,257 or 2.3% more than budgeted. Water Service in Lieu of Taxes was \$85,200 higher than budgeted. Gain/Loss on Disposition of Assets did not include \$60,000 budgeted for January. Net Operating Income for January was \$571,756 or 18.4% less than budgeted. Other Income and Deductions for January was \$890,644 or 250.3% more than budgeted. Early retirement incentive costs of \$947,000 were recorded for employees signing the

agreement after year-end. Net Income for January was \$1,462,401 or 53.1% less than budgeted.

2004 Cost Reduction Plans – Status Update

There were 39 employees eligible for the recent early retirement incentive program. At the conclusion of the eligibility period, a total of 30 employees elected to participate, with their last day of employment on January 30th. The total amount of the severance payments was \$1,247,700, with approximately \$300,000 of that amount recorded as a current expense in 2003. The remaining amount is a current expense in 2004. The Early Retirement Incentive Program is expected to increase expenses in 2004 by approximately \$150,000. However, beginning in 2005, it is expected to result in annual savings of approximately \$1,000,000 per year. Mr. Huber noted that a portion of the incentive program costs would be funded through a reduction in funding in the Infrastructure Replacement Reserve by \$500,000 in 2004, but that this funding would be restored in 2005.

Staff is working to minimize the number of positions that will need to be replaced among those vacated through the Early Retirement Incentive Program. Likewise, as staff backfills those positions, we are intending to create a net reduction of 30 positions as a result of the 30 retirements. In addition, staff is eliminating the use of all temporary positions and has significantly reduced the number of seasonal employees that will be hired during the summer. The number of part-time positions has also been slightly reduced. It has been determined that an involuntary workforce reduction is not planned. Management has realigned the organization structure, resulting in three fewer business systems. It will be necessary to update operating plans to reflect the new structure. Beyond the workforce reductions, management will also be focused on the successful execution of plans to reduce non-labor operations and maintenance expenses.

Additional Financial Information Provided

Mr. Miller reviewed benchmarking results for 2002 comparing Louisville Water Company to fourteen investor-owned utilities whose annual operating revenues exceed \$50,000,000. The data used for this comparison is furnished in the annual NAWC Investor-Owned Water Utilities Financial & Operating Data Summary. Louisville Water Company continues to rank number one in Operations and Maintenance Cost per Customer. We increased in Return on Net Utility Plant, Return on Total Assets, Customer per Employee, Return on Common Equity, Dividend Payout Ratio, and Employees per Thousand Customers. We ranked the same as last year in Gallons Sold per Employee, Operating Revenue per Employee, Operating Revenue per Customer, Operations and Maintenance Cost per Customer, Employees per Billion Gallons Sold, and Net Utility Plant per Dollar of Revenue. We declined slightly, from 8th to 9th position, in Net Utility Plant per Customer and from 1st to 2nd position in Debt to Equity Ratio.

Mr. Martin raised questions about how the comparable companies were selected, how the relative performance ratios were calculated, whether the LWC return on investment should be adjusted for a tax effect, and the computation of owner's equity. He suggested getting independent input from accountants, financial analysts, rating agency staff or investment bankers on which performance indicators should be most useful and which return rates or ratios that the board or senior management may rely on to make decisions about capital spending, staffing, management performance, compensation, return on investment targets, and prudent dividend policy. Mr. Miller agreed to provide additional information on these questions and recommendations.

Warehouse Record Keeping Procedures Discussed

Mr. Miller noted that, as a result of the recent implementation of the new Financial Information System, certain previously automated record keeping tasks at the Warehouse have been discontinued and have been replaced with manual processes. This includes bar-code reading and inventory count entry into handheld units that have reached the end of their useful life and were not integrated into the new inventory system. We have revived the old "pen and paper based, tag and manually count" procedures while we develop and analyze the business case for an Oracle-based warehouse management system. We do not anticipate significant difficulties while we continue to operate the warehouse with these less efficient, less automated procedures.

Operations and Engineering Report Filed

Mr. Heitzman presented the Operations and Engineering report.

The water production in January of 116.2 MGD was 7.6 percent lower than the January production of 125.8 MGD, and was 2.4 percent lower than the five-year average January production of 119.8 MGD. The lower than average production may be attributed to 117 fewer main breaks in January 2004 compared to January 2003. Staff collected 296 regular distribution samples in December. All samples met the water quality standards. Distribution water quality complaints decreased 40 percent in January as compared to January 2003. The decrease may be attributed to the new coagulant application strategy implemented by water quality staff in the 4th quarter of 2003 and the reduction in main breaks. Staff will continue to monitor the trend and assess the impact of treatment changes implemented in 2003.

The new security fence for the Crescent Hill reservoir is now being installed. Chain link fencing along the east boundary is complete, while crews have begun installation of ornamental fencing along Frankfort Avenue. An informational meeting with the neighborhood residents was held on February 3 to inform residents of Pennsylvania Avenue about the project impact. The project will continue through June (weather permitting), with installation of the fence, sidewalks, and lighting for the reservoir. Staff also met with representatives of Metro parks and the Crescent Hill Gold Course to explore plans to upgrade the parking lot north of the Reservoir. Current plan is to complete a design in 2004, and begin work this fall, for completion in spring 2005.

LOJIC GIS Partnership – A LOJIC steering team has been established with representatives from LWC, Metro Louisville, MSD, and PVA to develop a long term operating strategy for LOJIC, the local geographic information consortium. LWC is a 20 percent equity owner in the LOJIC GIS data sets. Metro Louisville owns 40 percent, MSD 35 percent, and PVA 5 percent. Annual operating expenses for LOJIC are \$1.3 million, with LWC contributing \$72,000 annually to support the operations. The steering team is evaluating the investment over the past 15 years by each of the partners to determine the future operating and investment strategy. The steering team is also evaluating the LOJIC governance structure. LWC can expect its operating share to increase from the current \$72,000 to approximately \$250,000, based on the current 20 percent ownership share. The impact to the Company may begin as soon as July 1, the beginning of MSD's fiscal year. With a larger share of the operating expenses, LWC will become a more active participant in operating decisions of LOJIC. Since 1987, LWC has limited its participation to the Policy and Technical Committees of the LOJIC governance structure at MSD.

Regarding the funding for the Center for Infrastructure Research Funding, Mr. Heitzman noted that in January of this year, the federal government passed the FY04 (October 2003 - September 2004) budget. Included in the budget of the Omnibus bill is a \$500,000 line item for the University of Louisville Center for Infrastructure Research. The purpose of the funding is to provide research into methods and technology to address aging water and wastewater infrastructure. EPA Region IV will administer these funds upon submittal of a detail of planned expenditures by the Center.

Serving Customers Report Filed

Ms. Teasley presented the Serving Customers Report.

The January 2004 call abandonment rate was 4.9% compared to 5.02% in December 2003, and 3.69% in January 2003. The year-to-date abandonment rate is 4.9%.

The Bullitt County Advisory Board maintains a keen interest regarding the number of customers along a two-thirds majority main extension who signed a letter of intent to apply for water versus those customers that actually apply for and receive water service following the completion of the main extension. The Advisory Board is looking forward to the results achieved from the recently implemented reminder letter procedure for those customers who signed a letter of intent, but have not yet applied for service within six months of notification of project completion.

A draft contract is under legal review for the new Refunding Cost of Installation Main Extension Method approved by the BOWW in October 2003. The proposed buyout of the contracts executed with the 20-year pay-out plan is prepared, but can not be executed until the new contract is available for use. Staff anticipates the finalization and the implementation of the new contract by early March.

Staff is working with the Home Builders Association of Louisville staff to obtain current addresses for holders of Refunding Cost of Installation Main Extension Method 20-year

pay-out contracts for whom staff does not have a current address. A meeting was held on February 12 to meet with representatives of the Home Builders to outline our approach for addressing the pressure issues and to discuss possible alternatives for procurement of materials for developer-financed main extensions.

Closed Session Discussion

Pursuant to K.R.S. 61.810c, Board went into closed session at 4:10 p.m. for the purpose of discussing pending litigation. The Board returned to open session at 4:35 p.m. after taking no action.

Audit Committee Report

Mr. Bond presented the Audit Committee report. A meeting of the Audit Committee was held on Tuesday, January 6, 2004. Regarding the Capital Budget Audit, Mr. Bond stated that process improvements were underway for the Capital Budget process, so Internal Audit has approached the audit in two parts: first, auditing the as-is process, and then auditing the post-improvement changes. The Audit Committee has expressed interest in reviewing the capitalization policy. Mr. Bond noted that staff performance measurements were focused on amount of capital spending accomplished, so staff seemed to accomplish easier projects first before tackling higher priority projects. The Audit Committee intends to follow up on improvements in this area.

Mr. Bond reviewed the 2004 Audit Plan, noting work for: continued annual review of Procurement Cards; expense reports; timekeeping; project inspection; and, fleet management. Mr. Huber noted that there has been a reduction in the Internal Audit staff, and the 2004 Audit Plan was being revised to reassign the system certification audits.

It was the consensus of the Committee to issue a Request For Proposal for selection of an outside auditor for the coming year, allowing Crowe Chizek to participate in bidding but must change the audit partner. The Committee emphasized that they are satisfied with Ed Olliges and that this decision was not a reflection on this work. Mr. Miller stated that Crowe Chizek has previously provided pricing for the coming year.

The Committee members agreed to prepare individual responses to the Audit Committee Self-Assessment Guide and will send the results to Mr. LeMaster for compilation.

Mr. Bond noted that many outstanding audit issues were resolved with the implementation of the Financial Information System. Mr. Martin expressed compliments toward the completeness of follow up on audit recommendations. Mr. Davidson stated that the City is interested in the results of the fleet management audit when it is completed.

Compensation Committee Report

Mr. Bond also presented the Compensation Committee Report. A meeting of the Compensation Committee of the Board of Water Works was held on Monday, February 9, 2004.

Regarding the 2003 Incentive Plan Goals Results, he stated that the Light Switch Goal for Net Income was not met, but most of the component goals within the incentive plan had been met. He stated that the overall weighted score for the 2003 President and Vice Presidents Shared Goals results was at level 3.2 on a 5.0 point scale.

Regarding the 2004 Draft Corporate Performance Award Criteria, he stated that staff accomplished 62.5% of the goals. The amount of the proposed payout is \$300.22 per eligible employee, for a total payout of \$129,995. Mr. Bond made a motion to pay the Corporate Performance Award as proposed. Upon second and vote, the motion carried.

Mr. Bond reviewed the 2004 Draft Corporate Performance Award criteria and the 2004 Draft Incentive Plan Goals. He stated that the Light Switch Goal for Net Income would be set at \$350,000 and that the Net Operating Income goal would be set at \$350,000 for Level I and at \$700,000 for Level II. He also noted that the Internal Customer Satisfaction goal was established at an increase in composite score for Internal Customer Satisfaction survey results. Regarding the 2004 Draft President and Vice Presidents Shared Goals, Mr. Huber stated that the Cost of Risk goal methodology had been revised to include Legal Staff Labor and Labor Related Overhead. It was the consensus of the Board to accept the 2004 Incentive Plan Goals and the President and Vice Presidents Shared Goals.

Mr. Huber discussed contemplated adjustments to the salary scale in 2004. He noted that the 2004 Annual Budget included funding for up to a 3% increase in salaries. Based on the local labor market, it appears that the overall market movement for salaries has increased 2.5%. He stated that management intends to adjust the control point for each job grade by 2.5%, but that salary increases would be based on merit and that employees would not automatically receive an increase.

Contract Renewed for Bid 02-67: Detector Check Valves – 1st PPI Renewal

Mr. Conner moved to award a one year contract totaling an estimated \$135,143 to Hersey Meter Company for Detector Check Valves. Upon second and vote the motion carried. This PPI renewal represents a 0.9% increase from previous unit prices.

Contract Awarded for Bid 04-01: Tapping Saddles

Mr. Conner moved to award a two year contract totaling an estimated \$266,681 to Smith Blair Manufacturing Company for Tapping Saddles. Upon second and vote, the motion carried. This represents a 14.3% increase from previous bid pricing in 2002.

Contract Ratified for Bid 03-65: Copper Tubing

Ms. Willis made a motion to ratify the award of a six month contract totaling a \$268,212 to Water Works Supply Company for Copper Tubing. Upon second and vote, the motion carried. This represents a 44% increase from previous bid pricing. The price of copper has been on an upward trend since October 2003 due to increased demand in China and growing strike threats at copper mines.

Contract Awarded for Bid 04-03: Gate and Wheel Valves

Mr. Bond made a motion to award one year contracts for an estimated \$742,491 to Mueller Company and an estimated \$136,575 to U.S. Pipe and Foundry Company. Upon second and vote the motion carried. These contracts are renewable for up to three additional one year periods. All renewals will utilize the Producers Price Index. This represents a 12.8% decrease from previous bid pricing.

Contributions in Aid of Construction

Mr. Miller reported that Contributions in Aid of Construction provide critical funding necessary for the expansion of the Louisville Water Company distribution system. In 2003, Louisville Water Company received \$13,249,414 in contributed capital from developers, home builders, government agencies and other customers. The contributions in aid of construction were in the form of distribution system extensions, pipeline relocation costs, system development charges, apportionment warrant collections, tapping fees, surcharge collections, and service and fire hydrant fees. Total Contributions in Aid of Construction of \$227,321,636 represent approximately one-third of the total asset value of Louisville Water Company.

Contributions in Aid of Construction have increased significantly over the past twelve years. Between 1992 and 2003, Contributions in Aid of Construction totaling \$150,547,173 were received. There are several key drivers for this increase, dating back to the implementation of the Jefferson County Water Extension Program in 1992:

- Apportionment Warrant Main Extension Method authorized
- System Development Charge implemented
- Tapping Fee increased from \$1,000 to \$5,450
- Jefferson County Government contribution of Community Development Block Grant funds and other funds

Also, merger of Kentucky Turnpike Water Districts #1 and #2 into Louisville Water Company in 2002 included significant contributed capital. New development brought over three-fourths of the new customers of Louisville Water Company during the past twelve years. Property developers and home builders are key constituents in providing capital and customers for new growth.

Louisville Water Company implemented a System Development Charge in 1992 as part of a "growth helps pay for growth" strategy. Since that time, through year end 2003 the System Development Charge has provided a revenue stream totaling \$19,258,815 towards funding growth related improvements that occurred during that same time. System Development Charge collections during 2003 were \$2,535,000.

Water sales from the retail service area are expected to remain relatively flat in the next several years. Demographic shifts require investments that gain little or no additional sales. It is important to provide every cooperation possible in working with property developers and home builders in order to assure our continued sales base.

Human Resources Information System

Mr. Miller stated that one of the key objectives in the 2004-2006 Information Technology Strategic Plan is the replacement of the Human Resources Information System. The existing Human Resources System was provided by Ceridian and installed in 1994. The system also included payroll as part of the application set. In 1996, the human resources application was upgraded to the version currently being used by LWC today. The payroll application was not upgraded at that time due to application bugs and has resulted in duplicate data entry of several key data sets to ensure information integrity. Both applications have been heavily customized to meet LWC business needs.

The current applications are DOS-based and present significant technical challenges to maintain and support. As technology has evolved, the current applications have limited the Human Resource and Payroll department's capabilities to streamline processes and expand or improve service provided to employees and customers. In addition, Ceridian support resources for these applications are minimal and no further investment is being made to enhance the applications in use by LWC. This has led to the purchase of additional software and creation of separate databases to maintain, track and manage its processes. This results in operational inefficiencies and duplication of work. Other functions within the organization, including OSHA compliance and Training, are also impacted by the limited functionality of the current application and are using other processes and applications to manage their information needs.

Replacement of this system was originally scheduled to occur in conjunction with the Financial Information System project, but management determined that selection of the financial software provider should not impact the selection of the human resource system provider. Although the systems must be integrated with each other, the major providers of human resources systems are compatible with the Oracle Financial System. It was also determined that the new Human Resources management team should participate in steering the selection and implementation of the new system.

There are many solution providers in the market that can offer integrated products or services to meet the business needs and objectives of LWC. This may involve the procurement of a software package or a contractual arrangement with an applications service provider. The current estimate for the annual cost of ownership is approximately

\$250,000. Management is assembling a team to analyze the current business processes, identify functionality needs, and evaluate potential technology solutions that will meet these needs. The analysis of the team and recommended business direction will be communicated to the Executive Leadership Team and the Board of Water Works in the coming month.

AM/FM/GIS Project and Budget Update

Ms. Teasley reported that Louisville Water Company is rapidly approaching the completion of the Automated Mapping/Facilities Management (AM/FM) System, a core information system designed to collect and convert LWC's pipeline infrastructure into a GIS format. At the end of 2003, 16 of the 17 data delivery areas for the AM/FM/GIS project had been submitted to LWC for at least primary quality evaluation. The overall quality of work from GRW Engineers has remained good. Completion of the data collection/conversion effort is contingent on delivery and quality assurance for the final data area, which encompasses the West Louisville portion of the LWC distribution system. While still in a state of development, the data from the AM/FM/GIS has already been used successfully to identify and analyze facility information for priority projects. It is anticipated that the AM/FM system will be accessible to LWC employees in early 2nd Quarter 2004.

Through the end of the 3rd Quarter 2003, internal labor expenses for the AM/FM project averaged close to the expected expenditure curve. The beginning of the 4th Quarter 2003 represented a departure from those expectations when labor costs rose significantly. This rise in costs is primarily attributable to the following factors:

- A greater than anticipated effort required to adequately assure the quality of data from some areas of the distribution system with extremely dense and complex facilities.
- The accumulation of multiple primary and secondary data deliveries resulting in no lulls in the QA/QC effort, with little decline in internal labor demands near the end of the project.
- An increase in internal work on the Web Browser application to incorporate alterations made by the vendors (ESRI and GRW).

While other components of the AM/FM project, including hardware and software purchases, have been completed for \$88,440 less than anticipated, the increase in labor costs outlined above will result in the total project cost exceeding the overall estimated budget of \$4,474,840. No action was required.

No Action Taken for Private Road off Broad Run Road (Segment 396): Broad Run Road to East 1,750 ft.

The Board of Water Works approved staff's request to proceed with a public hearing for Private Road off Broad Run Road (Segment 396): Back Run Road to North 2,600 at the November 2002 meeting. In accordance with KRS 96.265 a public hearing was held on

December 3, 2002 for the property owners along Private Road off Broad Run Road (Segment 396) to consider the extension of a water main along this private roadway.

Using the equal assessment method, three (3) eligible property owners on this private roadway were presented with the "equal share" cost per property of \$19,440. Two of three eligible property owners attended the hearing; one wishing to proceed (Clark) and one wishing not to proceed (Brown) at the presented cost.

Staff received a second petition requesting water service from property owners along Private Road off Broad Run Road (Segment 396) and held a public hearing as statutorily required on April 22, 2003. Information identical to the December 3, 2002 public hearing was presented. Three of three eligible property owners attended the hearing; two property owners wishing to proceed, Parsons and Clark, and one wishing not to proceed, Brown, at the presented cost.

Staff informed property owners attending the meeting on April 22, 2003 that the feasibility of the project would be determined by staff's ability to successfully negotiate easements with the declining property owner (Brown) and another property (Kushner.) Kushner owns the portion of the private road which connects to the public road (Broad Run Road) containing the water main needed to feed Private Road off Broad Run Road (see Exhibit "A".) The Kushner property has water service from the Broad Run Road water main and would not be benefited by the private road water main extension.

After extensive negotiations, staff was unable to obtain the easements required to construct the water main using the Apportionment Warrant method; therefore, Ms. Teasley requested that the Board of Water Works not refer the Private Road off Broad Run Road (Segment 396) water main extension to Louisville/Jefferson Metro Council due to the lack of required easements. The proposed main extension does not meet the feasibility criteria set forth by the Board to proceed to the ordinance stage. Property owners still interested in a water main extension have additional options available to them including the Refunding Tapping Fee method, the Applicant Financed Tapping Fee method, as well as the Apportionment Warrant method. No action was taken on this matter.

**Amendment of Apportionment Warrant Register Brush Run Rd:
Dawson Hill Rd to Routt Rd**

The Board approved a resolution for the issuance of Apportionment Warrants for Brush Run Rd: Dawson Hill Rd to Routt Rd at the November 11, 2003 meeting in accordance with KRS 96.265. The Apportionment Warrant Register approved at this meeting is attached as Exhibit A.

Ms. Sue Shearer contacted LWC staff to inform us that the two pieces of property she owns are contiguous to one another and she should have received one assessment instead of two. Property research was conducted and staff found that the Jefferson County Property Valuation Administrator's (PVA) records were incorrect and Ms. Shearer

should have only received one assessment. Staff contacted PVA to inform them of the error in their records.

Mr. Bond moved to adopt the amended resolution (certified copy attached to these minutes); thereby, removing account # 924547, Tax Block 59 Lot 127, and adding the aforementioned property to account # 924544 as a contiguous property to the Apportionment Warrant Register adopted by the Board of Water Works on November 11, 2003 in accordance with KRS. 96.265. Upon second, and vote, the motion carried.

There being no further business to come before the Board, the meeting was adjourned at 5:35 p.m.

Respectfully submitted:

Robert K. Miller
Vice President - Treasurer
and Acting Corporate Secretary

**RESOLUTION AMENDING PREVIOUS
APPORTIONMENT WARRANT RESOLUTION**

February 23, 2004

RESOLVED, that the Board of Water Works, by these presents, amends a previous resolution of this Board, adopted at its meeting on November 11, 2003, directing the issuance of Apportionment Warrants against properties located on Brush Run Rd: Dawson Hill Rd to Routt Rd removing the following account and including the subject property as contiguous property for account # 924544:

<u>Account</u> <u>Assessment</u>	<u>Name</u>	<u>Location</u>	
0924547	Sue Shearer	Brush Run Rd Deed Book 7656 Pg. 276 Tax Block 59 Lot 127	\$5,450

CERTIFICATION

I, the undersigned, hereby certify that the foregoing Resolution dated February 23, 2004, to amend a previous resolution of this Board, adopted at its meeting on November 11, 2003, directing the issuance of Apportionment Warrants against properties located on Brush Run Rd: Dawson Hill Rd to Routt Rd, is a true copy of a resolution duly and unanimously adopted at the regular meeting of the Board of Water Works of Louisville, on February 23, 2004, a quorum being present.

Signed,

Robert K. Miller
Acting Corporate Secretary

**BOARD OF WATER WORKS
MEETING MINUTES
MARCH 9, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise

Board Members Absent:

Mayor Jerry Abramson
Mr. Stewart Conner
Ms. Wendy Welsh

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer & Acting Corporate Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers & Business Development
Ms. Susan Lehmann, Vice President, Human Resources & Organizational Development
Ms. Kathy Holder, Acting General Counsel
Mr. Rick Johnstone, Deputy Mayor, City of Louisville
Mr. Steve Greseth, Black & Veatch
Ms. Barbara Crow, Process Owner, Strategic Communications
Mr. Ed Chestnut, Assistant to the President

A regular meeting of the Board of Water Works was held on Tuesday, March 9, 2004 in the Board Room of Louisville Water Company. Mr. Huber called the meeting to order at 12:35 p.m. There was not a quorum present at that time.

Financial Report Filed

Mr. Miller presented financial results through February 2004. Total Operating Revenue of \$16,138,710 is \$504,573 or 3.0% less than budgeted and \$598,279 or 3.8% more than the same period in 2003. Operation and Maintenance Expenses of \$7,614,753 is \$489,719 or 6.9% more than budgeted and \$530,911 or 7.5% more than 2003. Total Operating Expenses of \$11,711,881 are \$21,788 or 0.2% more than budgeted and \$521,464 or 4.7% more than 2003. Net Operating Income of \$4,426,829 is \$526,361 or 10.6% less than budgeted and \$76,816 or 1.8% more than 2003. Total Net Non-Operating Expense of \$1,537,540 is \$825,832 or 116.0 % more than budgeted and \$780,923 or 103.2% more than 2003. Net Income of \$2,889,290 is \$1,352,193 or 31.9% less than budgeted and \$704,108 or 19.6% less than 2003. The year-end forecast for Net Income is \$31,465,500, which is \$1,279,200 or 4.2% more than budgeted. The year-end forecast for the Dividend is \$13,766,400, which is \$1,067,500 or 8.4% more than budgeted, in consideration of the cost reductions combined

with lower funding of the Infrastructure Replacement Reserve as shown in the revised 2004 financial plan.

Operations and Engineering Report Filed

The water production in February of 119.8 MGD was 3.5 percent lower than the February 2003 production of 124.2 MGD, and was 2.5 percent higher than the 5-year average February production of 116.9 MGD. The year-to-date production was 5.8 percent lower than 2003 and equal to the 5-year average production.

Mr. Heitzman reported that staff discovered a small quantity of mercury in the softening wastewater effluent stream at the Crescent Hill Treatment Plant on January 22, 2004.. The quantity discovered was less than one pound and, upon investigation, it was determined that the mercury was not released into the environment. The wastewater and finished water have been tested and found to be free of mercury. Air monitoring for mercury was conducted by an environmental consultant and found to be below reportable levels. As a precautionary measure, air ventilation was provided and the area of the spill has been isolated from routine operations. Risk Management is conducting a complete investigation of the incident to determine the source of the mercury release. An inventory of all mercury in the plant is being finalized. Mercury has historically been used in flow metering and temperature measuring devices throughout water production and distribution facilities. Over the past 20 years, the Company has slowly phased out the use of mercury measurement devices for temperature and flow. The incident will be documented, including recommendations regarding future handling, reporting, and monitoring of hazardous chemicals used in water production facilities.

Mr. Heitzman noted that Metro Louisville is receiving a Critical Infrastructure Grant of \$3 million that must be used for security infrastructure. The Company will receive \$400,000 of the \$3 million grant to enhance water system security. The grant comes through the Department of Homeland Security to the State Department of Emergency Management. The Company will use the grant for installation fencing and other security measures at the Crescent Hill Water Treatment Plant. Mr. Huber recognized the contributions made by Deputy Mayor Johnstone on this grant funding.

Mr. Heitzman reported on progress at the Payne Water Treatment Plant. The B.E. Payne improvement project is entering the second construction season with approximately 55 percent of the work complete. This \$15 million plant upgrade increases plant capacity from 45 MGD to 60 MGD, adds hydraulic surge protection, renovates the filters and backwash valves, upgrades the power supply, and adds on-site diesel power generation for 30 MGD capacity. The current scheduled completion date is June 2005, prior to the peak summer demand period. The scheduling and coordination of the project with on-going operations of the plant has presented significant challenges. The major issue has been the delivery of the main utility switchgear in accordance with contract specifications. After extensive review by the consulting engineer (CDM Engineers), the contractor (Judy Construction), and staff, there is now agreement among all parties to provide the switchgear specified in the contract documents. These deliberations have extended the project schedule by approximately nine

months to resolve the electrical switchgear issues. Further, a critical tie in to the 60-inch transmission main has been postponed, due to the inability to secure a tight, leak-free shut off on the existing transmission main and also comply with Kentucky discharge regulations of chlorinated water into Harrods Creek. To date, approximately \$90,000 has been authorized to change the electric supply feed to match LG&E power feed. Additional change order requests are being evaluated by staff, including a time extension of the contract completion date, additional electrical modifications, and additional consulting engineer services for extensive shop drawing review and construction inspection for an extended schedule. Staff is preparing a complete report of these issues for presentation and approval at the April Board meeting.

Mr. Heitzman reported on leakage at the Crescent Hill Clearwell. Over the past five years, staff have been working on evaluation of leakage into the Crescent Hill Pump Station Annex. This leakage has been identified in the Annual Inspection reports as a critical operating issue to resolve. The source of the water leakage is assumed to be the adjacent 25 million gallon clearwell reservoir, however extensive monitoring and testing have not pinpointed the exact source. Over the past six months, additional monitoring wells have been drilled on the exterior of the building to determine the underground geologic formations and water levels. The test confirms the leakage is primarily located around the annex and the source is either the clearwell or water from leaking discharge piping in the area. The water travel path into the pump station is likely along the soil-rock interface or around the suction piping that passes from the clearwell to the pump suction chamber. Over the years, the rate of leakage has increased significantly. The pump station foundation is non-reinforced concrete, and continued degradation will slowly undermine the stability of the foundation. The next phase of investigation will begin this month to dewater the clearwell chamber adjacent to the pump station and perform monitoring of the exterior test wells and interior leakage rates. This exercise will determine if the clearwell volume or pressure head is a major contributor to the leakage. Ultimately, the solution will be to repair the source of the leak (if possible) or to intercept the water source and divert it from the pump station foundation to an appropriate waste drain.

Mr. Heitzman reported on improvements to the Mary T. Meagher Aquatic Center Parking Lot. The scope of the project is to renovate and expand the existing parking lot north of the Crescent Hill Reservoir. The existing parking lot accommodates up to 150 vehicles. Metro Parks has documented over 500 vehicles park in the area during February swim meets. Staff is working with Metro Parks (golf and swimming) to evaluate expansion of the lot to a 250 vehicle capacity. An expanded lot will infringe upon hole number one of the Crescent Hill Golf Course. One alternative will be to evaluate expansion of the Golf Course parking lot near Brownsboro Road to accommodate overflow parking during the peak winter swim season. The preliminary schedule for this project is to request budget funding at the April Board meeting, finalize design in May, and bid the work in June for construction during the fall. Substantial completion is targeted by December in preparation for the peak indoor swim season.

Quorum Present

A quorum was present beginning at 12:45 p.m.

Consent Agenda Reviewed and Approved

Mr. Martin stated that the minutes from the February 23, 2004 regular meeting of the Board of Water Works did not reflect the questions that he had raised on benchmarking results for 2002 prepared by staff comparing Louisville Water Company to fourteen investor-owned utilities. Specifically, he had unresolved questions about how the comparable companies were selected, how the relative performance ratios were calculated, whether the LWC return on investment should be adjusted for a tax effect, and the computation of owner's equity. He suggested getting independent input from accountants, financial analysts, rating agency staff or investment bankers on which performance indicators should be most useful and which return rates or ratios that the board or senior management may rely on to make decisions about capital spending, staffing, management performance, compensation, return on investment targets, and prudent dividend policy. Mr. Miller agreed to revise the minutes to reflect the questions raised by Mr. Martin. The minutes from the February 23, 2004 regular meeting of the Board of Water Works were approved as revised.

The List of Claims Paid for February 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

01-111	G607M	Glenoaks Sec. 11D & Grid Tie Sec.12	\$93,900.00	\$14,450.00
03-017	G613M	Wilke Ridge Section 3B & 3C	\$59,460.00	\$3,300.00
03-082	G616M	Kellco Trade Center	\$13,200.00	
10053	G627M	Austin Park Phase 1	\$36,200.00	
10067	G619M	Woods of Farnsley Moorman Ph. 2A	\$15,750.00	
10081	G615M	Monticello Park Section 2	\$42,090.00	
10122	G624M	The Reserve at Glenmary Section 3	\$47,330.00	
10132	G614M	The Cotswolds	\$24,620.00	
10299	G617M	Shops of Forest Springs Phase 2	\$14,680.00	
10303	G612M	Windgate Meadows Section 3	\$58,780.00	
10353	G625M	Shelbyville Road Plaza	\$36,440.00	

Developer Installed Tapping Fee Main Extension Projects

10293	G618T	Finn Avenue Extension	\$3,350.00	
-------	-------	-----------------------	------------	--

Bullitt County Extension Projects

10349		Haley Avenue	\$22,275.00	
10350		Pine Valley Court	\$15,000.00	\$3,750.00
10362		Lobb Point Road	\$17,740.00	\$4,435.00

Serving Customers Report Filed

Ms. Teasley presented the Serving Customers Report. As a follow up to our wholesale meeting in November, LWC staff met informally with the Kentucky Public Service Commission (PSC) staff on January 15, 2003. We provided information regarding our proposed wholesale rate, and asked for guidance regarding the approval process and planned implementation. Among other documents, the PSC requested a letter from our regulated wholesale customers indicating they had no objection to the proposed rate increase. Staff subsequently sent letters to North Shelby and West Shelby asking them to forward this letter to the PSC. Staff also sent letters to our non-regulated wholesale customers, Mt. Washington and City of Taylorsville, reminding them of the proposed timeline for implementation. Staff has completed all internal work necessary to forward the PSC filing request to our outside counsel, Mr. James Park, with the Lexington office of Frost, Brown, and Todd. We anticipate the formal filing with the PSC regarding the wholesale customer rate increase to occur within the month of March, allowing our regulated customers adequate time to complete their pass through filing with the PSC before the May 1 effective date.

Ms. Teasley stated that Government Affairs has been monitoring the activities of the 2004 General Assembly. It has been a session dominated by discussions of the Budget and possible tax reform. Consequently, there have been very few issues that would impact the Louisville Water Company. Several retirement bills are being tracked including one that will reduce benefits for future employees and one that would require LWC to pay an additional fee to cover the cost of retiree health insurance. This bill has also been amended to reduce the actuarial impact so it is unclear whether it would have a negative impact on overall cost to the Company if enacted.

Ms. Teasley reported on a meeting with the Land and Development Committee of the Home Builders Association of Louisville on March 2, 2004. Previously, the committee had submitted a list of nine issues of concern to them. Staff presented a handout addressing eight of the nine issues. A stand alone draft "New Development Extensions Guidelines" was presented for review and comment to provide for continued development activity while assuring 40 psi pressure at the meter of each customer. Staff and a small subgroup of the Land and Development Committee will be meeting to refine these guidelines jointly and to continue to work on other issues of concern.

Closed Session Discussion

Pursuant to K.R.S. 61.810c, Board went into closed session at 1:05 p.m. for the purpose of discussing proposed and pending litigation. The Board returned to open session at 1:50 p.m. after taking no action.

Water Usage and Water Sales Data Discussed

Mr. Miller presented an analysis of water usage and water sales data prepared by Ed Chestnut. He noted that following the disappointing 2003 water sales results, staff has initiated a detailed statistical analysis of water usage patterns over the past five years in order to discern the stability of our water sales base following changes in the local economy, weather conditions, and water conservation practices. This analysis indicates that despite continued growth in customer accounts, our overall trend for customer water usage is declining. This synopsis is a work-in-progress, with additional information and forecasts forthcoming. Dr. Wise recommended consideration of changes to the rate structure given decreased water usage per household. Mr. Johnstone recommended trend analysis over ten years. He noted that recently added infrastructure should have lower maintenance costs. He also recommended consideration of additional marketing of irrigation services. Mr. Miller stated that staff intends to develop an intra-year forecasting tool in 2004 that will allow for better estimation of water sales based on pumping data.

Revised 2004 Financial Plan

Mr. Miller reported that Louisville Water Company has developed the attached revised financial plan for 2004 to achieve these objectives:

- Pay Dividend at 2004 Budgeted Target Level
- Fully Offset 2003 Dividend Adjustment
- Fully Offset Cost of Early Retirement Incentive Program
- Fully Offset Reduced Industrial Sales Revenues
- Fully Offset Unanticipated Operations and Maintenance Expenses

In order to achieve these objectives, management has developed and implemented cost reductions and recommends these changes to the 2004 Financial Plan:

- Reduce Operations and Maintenance Expenses by \$1,119,200.
(This requires an overall decrease of \$2,312,500 in order to partially offset Early Retirement Incentive Program costs of \$1,295,450 and fully offset Unanticipated Operations and Maintenance Expenses of \$550,700)
- Reduce Depreciation Expenses by \$160,000
- Reduce funding of the Infrastructure Replacement Reserve in 2004 by \$500,000.
(This funding will be used to offset the balance of the Early Retirement Incentive Program costs and will be replaced in the 2005 Annual Budget through savings that will sustained for multiple years.)

Mr. Miller recommended acceptance of the Revised 2004 Financial Plan. This will provide the basis for payment of the 2004 Dividend at the budgeted target level and will serve as the measurement standard for determining progress of the cost reductions. Dr. Wise moved for acceptance of the plan as recommended. Upon second and vote, the motion carried.

Declaration of First Quarter 2004 Dividend to City of Louisville

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City. The dividend for 2003, paid based on budgeted net income, is required to be adjusted after completion of the annual audit to reflect any difference between estimated and actual net income. The amount of such adjustments is to be paid with or deducted from the regular quarterly dividend payments. The annual audit has been completed. Net income of \$24,580,534 requires a total 2003 dividend to the City of \$11,251,319. The total dividends declared and paid during 2003 was \$12,318,832. This will result in an amount of \$1,067,513 to be deducted from the regular quarterly 2004 dividend payments.

Mr. Bond moved to adopt a resolution to recognize adjustment of the 2003 dividend and declare the first quarterly 2004 dividend in the amount of \$3,441,598. This resolution provides for a total quarterly payment of \$3,174,720. Upon second and vote, the motion carried.

Contract Awarded for Bid 04-09: Flanged Spool Pieces

Ms. Willis moved to award a two-year contract for an estimated total of \$146,842 to Derby Welding & Machine Company for Flanged Spool Pieces. This bid represents a 9.8% increase from the previous bid in 2002. Upon second and vote, the motion carried.

Contract Renewed for Bid 01-45: Locating Services

Dr. Wise moved to award a one-year contract renewal for an estimated total of \$275,906 to STS, LLC for Locating Services. The Consumer Price Index (CPI) represents a 2% increase over prior year. Upon second and vote, the motion carried.

Contract Awarded for Project 10288: Market Street Main Replacement

Bids were received and opened Wednesday, February 18, 2004 to install 3,910 feet of 12-inch Pressure Class 350 ductile iron pipe along portions of Market Street and Jackson Street. The low bid is approximately 34% over the Project Manager's Estimate, and the resulting total unit cost for this project is \$142.59/LF. Although the low bid was considerably higher than the Project Manager's estimate, the bid sequence was very competitive with all four bidders within 20% of the low bid. The higher than usual unit price is consistent with the unit prices received for previous MRRP projects in or near the Central Business District. Due to the sluggish economy, a more aggressive bid sequence had been anticipated from the contractor pool. The difficulty of the work and the proximity of the work site to the Central Business District likely kept the bids at a higher, more reasonable level.

Dr. Wise moved to award a contract in the amount of \$ 424,515 to MAC Construction and Excavating to install the water facilities associated with this project. Upon second and vote, the motion carried.

Contract Awarded for Project 03504: Mockingbird Valley Area Main Replacement

Bids were received and opened Wednesday, February 25, 2004 to furnish and install 8,400 feet of 4, 6, and 8-inch HDPE along private roads in the Mockingbird Valley Area including the Louisville Country Club. The low bid is approximately 33% under the Project Manager's Estimate, and the resulting total unit cost for this project is \$71.41/LF. Although the low bid was considerably less than the Project Manager's estimate, the bid sequence was very competitive with all three bidders within 4.5% of the low bid.

Ms. Willis moved to award a contract in the amount of \$ 496,880 to C-Squared, Inc. to install the water facilities associated with this project. Upon second and vote, the motion carried.

Contract Awarded for Project 02-632: Solids Lagoons Improvements - Payne Plant Residuals Piping System

Bids were received Wednesday, February 4 to construct new piping structures at BEPWTP for managing treatment plant residuals. The piping structures will allow diversion of plant waste residual from intake screening, coagulation, softening, and filter backwash processes to multiple lagoons. The improvements will provide flexibility to operation of the facility.

Dr. Wise moved to award a contract in the amount of \$249,000 to Louisville Paving Company, Inc. for installation of diversion piping structures at B. E. Payne Water Treatment Plant. Upon second and vote, the motion carried.

Strategic Plan 2003 Year End Results Reviewed

Mr. Miller reviewed the results for measurable goals for key constituent areas in the 2002-2006 Strategic Plan. He noted that the goals related to product quality and customer satisfaction were achieved while goals related to water sales and financial performance were not met.

Unaccounted for Water Results for 2003 Reviewed

Ms. Teasley reviewed Unaccounted for Water results for 2003. Unaccounted for water is a key performance indicator for the Louisville Water Company and measures the amount of water that is lost as unmetered within the distribution system. Generally, it is calculated by dividing the total gallons of water metered by the total gallons of water delivered to the mains. Late last year, it was discovered that the measure was not being consistently reported in 2003 across the organization and to the Board. When the discrepancy was discovered, LWC staff involved in the reporting of the measure including accounting, plant, metering/billing and leak survey personnel met to resolve the difference. As staff was resolving this discrepancy, they consulted industry best practices for calculating this

measure. They identified that water used within the treatment plant processes should not be considered as part of the unaccounted for water calculation. In recent years, LWC's calculation has included plant water use in both the totals for water delivered to mains and water metered. Thus to be consistent with industry best practices, staff recommends removing the water used in treatment plant processes from both the numerator and denominator of the calculation for improved water accounting. Making this change increases the annual unaccounted for water percentage from historic figures by approximately one tenth of one percent, which is due to rounding. For 2004, water used in plant processes will continue to be excluded from the unaccounted for water calculation. LWC's water use, both for domestic and plant purposes, will continue to be closely monitored and tracked. Further, LWC staff has clearly identified accountability for reporting the unaccounted for water measure in order to minimize the potential for any future reporting discrepancies.

Apportionment Warrants Issued for Vista Hills Blvd: Bardstown Road to End

With the completion of this public water main extension, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the cost of \$5,450 for each lot or tract abutting this extension and currently not served.

Ms. Willis moved to adopt a resolution for the issuance of Apportionment Warrants and liens against 3 benefited properties along Vista Hills Blvd: Bardstown Rd to End. Upon second and vote, the motion carried.

City of Lebanon Junction Wholesale Water Purchase Agreement Authorized

Ms. Teasley noted that staff is currently negotiating a new water purchase agreement with the City of Lebanon Junction to replace the existing emergency water supply contract executed in May 2000 with the KT Water District. The existing agreement calls for utilizing LWC water as an emergency backup supply to Lebanon Junction's primary water supply purchased from the City of Bardstown. The rate specified by the 40-year contract was \$1.40 per thousand gallons, with no minimum usage required. Due to the rate differential between the existing contract with LWC (\$1.40 per 1,000 gallons) and rates for water purchased from Bardstown (\$1.25 per 1,000 gallons), Lebanon Junction has not purchased any water from LWC. The City of Lebanon Junction has expressed concern over the capacity and reliability of their water line from Bardstown and desires to utilize LWC water to routinely supply the portion of their community west of I-65. Water use for this part of their system is estimated to be 150,000 to 200,000 gallons per day, which would result in approximately \$70,000 to \$80,000 of additional annual revenue for LWC. A draft contract proposal submitted to Lebanon Junction this month calls for selling water to the City at our standard wholesale rate of \$1.16 per thousand gallons prior to May 1, 2004 and \$1.27 per thousand gallons after May 1, 2004.

Dr. Wise moved to authorize the President to enter into a standard wholesale contract to supply water to Lebanon Junction at LWC's wholesale rate for the general service area. Upon second and vote, the motion carried.

There being no further business to come before the Board, the meeting was adjourned at 2:40 p.m.

Respectfully submitted:

Robert K. Miller
Vice President - Treasurer
and Acting Corporate Secretary

LOUISVILLE WATER COMPANY
 REVISED FINANCIAL PLAN and
 COMPARISON OF TWO YEAR DIVIDEND TOTALS
 (In Thousands of Dollars)

		2003 BUDGET	2004 BUDGET		2003 ACTUAL	2004 REVISED TARGET

**RESOLUTION TO DECLARE FIRST QUARTER DIVIDEND
TO THE CITY OF LOUISVILLE**

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, an estimated dividend of \$12,318,832 for 2003 was paid in 2003 based on budgeted annual net income, and the annual audit for 2003 has now been completed which establishes the full dividend for 2003 as \$11,251,319 based on actual annual net income of \$24,580,534, it would be in order at this time to amend the Board resolution of December 9, 2003 to decrease the 2003 annual dividend by \$1,067,513, from \$12,318,832 to \$11,251,319 the difference to be deducted in installments to the quarterly 2004 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2004 Louisville Water Company revised financial plan contemplates the 2004 annual dividend to be \$13,766,393, it would be in order at this time to declare a regular first quarter dividend of \$3,441,598;

RESOLVED, the 2003 annual dividend is decreased from \$12,318,832 to \$11,251,319 and the difference of \$1,067,513 will be deducted in quarterly installments from the regular 2004 quarterly dividend installments, and

RESOLVED, the regular first quarter 2004 dividend of \$3,441,598 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,174,720 to the Louisville / Jefferson County Revenue Commission on March 31, 2004, this being the first quarterly dividend for 2004 less one quarter of the dividend adjustment for 2003, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

APPORTIONMENT WARRANT RESOLUTION

March 9, 2004

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Vista Hills Blvd: Bardstown Rd to End** main extension project authorized by Ordinance No. 31, Series 2003 of the Louisville/Jefferson County Metro Council, adopted on March 13, 2003 such warrants to be against three (3) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute the apportionment warrants with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

**BOARD OF WATER WORKS
MEETING MINUTES
APRIL 13, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development
Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

The Regular Meeting of the Board of Water Works was held on Tuesday, April 13, 2004 in the Board Room of the Louisville Water Company. Mr. John Huber called the meeting to order at 12:45 p.m.

Consent Agenda Reviewed and Approved

With regard to the minutes from the previously approved February 23, 2004 Meeting, the BOWW reviewed the minutes again because they did not include a revision requested at the March 9, 2004 meeting by Gerald Martin. Mr. Robert Miller summarized why the minutes from the February 23, 2004 did not ultimately show this revision and his recommendation that they be revised to include the following:

"Mr. Martin raised questions about how the comparable companies were selected, how the relative performance ratios were calculated, whether the LWC return on investment should be adjusted for a tax effect, and the computation of owner's equity. He suggested getting independent input from accountants, financial analysts, rating agency staff or investment bankers on which performance indicators should be most useful and which return rates or ratios that the board or senior management may rely on to make decisions about capital spending, staffing, management performance, compensation, return on investment targets, and prudent dividend policy. Mr. Miller agreed to provide additional information on these questions and recommendations."

Mr. Huber recommended that the consent agenda be approved with the change in the minutes to the February 23, 2004 minutes and also with the suggested change included in the agenda for the draft March 9, 2004 minutes. Dr. Wise made the motion, seconded by Ms. Welsh, and the motion carried.

The minutes from the March 9, 2004 were approved.

The List of Claims Paid in March 2004 was approved.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Develop Installed Refunding Main Extension Projects

10328	G669M	American Red Cross	\$ 9,000.00	
10304	G622M	Arbor Creek Pike Property	\$ 7,770.00	
10328	G672M	Locust Creek Section 4	\$81,420.00	\$17,500.00
10356	G670M	Indian Falls Section 8A	\$63,220.00	\$ 7,400.00
10330	G647M	Woods of Farnsley Moorman 2B	\$75,680.00	
10359	G668M	Billtown Farms Section 4	\$78,780.00	\$11,200.00
10365	G671M	Wildwood Phase 4	\$69,620.00	\$ 7,100.00
10361	G675M	Old Brownsboro Gardens Phase 3	\$17,820.00	
10353	G625M	Shelbyville Road Plaza	\$36,440.00	
10089	G608M	Mansfield Estates	\$40,070.00	
10367	G673M	Little Spring Farm Section 2A	\$71,070.00	\$ 7,900.00

The Board received the report of Contracts less than \$100,000.

Administrative Report

Mr. Huber stated that, pursuant to an advisory issued by the Department of Homeland Security, the Federal Government is beginning to provide grant funds for assisting water utilities in dealing with threats of terrorism. The Federal Government is also pursuing online monitoring devices to be placed in the distribution system and is reviewing its regulatory authority for requiring such devices throughout the distribution system.

Mr. Huber stated that other updates, such as water sales, will be provided along with other portions of the agenda.

Financial Report

Mr. Miller advised that the title of reports in the financial statements is different under the new GASB 34 requirements. Mr. Miller reviewed the Statement of Revenues, Expenses, and Changes in Net Assets with budget and prior year comparisons for financial results through March. Total Operating Revenue of \$23,995,581 is \$858,366 or 3.5 less than budgeted and \$927,223 or 4.0%

more than the same period in 2003. Operation and Maintenance Expenses of \$11,325,673 is \$516,447 or 4.8% more than budgeted and \$387,058 or 3.5% more than 2003. Total Operating Expenses of \$17,488,773 are \$166,562 or 0.9% less than budgeted and \$553,274 or 3.3% more than 2003. Net Operating Income of \$6,506,808 is \$691,805 or 9.6% less than budgeted and \$373,948 or 6.1% more than 2003. Total Net Non-Operating Expense of \$1,851,774 is \$784,217 or 73.5% more than budgeted and \$693,847 or 59.9% more than 2003. Net Income of \$4,655,034 is \$1,476,021 or 24.1% less than budgeted and \$319,899 or 6.4% less than 2003. Mr. Miller advised that expenses are higher, in part, as a result of high gasoline prices and legal fees due to the lack of in-house legal staff.

Operations and Engineering Report Filed

Mr. Heitzman presented the Operations and Engineering Report.

The water production in March of 112.5 MGD was 7.1 percent lower than the March 2003 production of 121.1 MGD, and was 1.7 percent lower than the 5-year average March production of 114.4 MGD. The year-to-date production was 6.1 percent lower than 2003 and 0.5 percent lower than the 5-year average production.

On March 4, 2004, Water Quality staff initiated a two-week period of operating the BE Payne Plant with 100 percent supply from the riverbank filtration demonstration well. The test was completed on March 19, 2004. During the test period, staff collected valuable information on radon levels and water hardness that will allow design for water softening and pH adjustment. From the analysis, aeration of the well supply will not be required, since radon levels are below regulatory limits. Further, the test results indicate that existing plant facilities can be easily modified to treat the riverbank filtered water through softening and pH adjustment. Staff is evaluating the impact on operations and maintenance budgets, considering changes in chemical use, power and maintenance schedules. Water quality will be significantly enhanced as a result of the additional treatment processes.

On March 24, 2004, LG&E attempted another start of the gas turbine generator at Zorn Pump Station. The generator failed to start again. This is the third attempt to run the emergency generator. Production staff is requesting a written report from LG&E on why the generator failed to run and what steps can be taken to resolve the problem. Staff will continue working with LG&E to get the issue resolved and plan to conduct future testing on a regularly basis.

Louisville Water Company acquired the Goshen water system in August 2002. The acquisition of the system included two elevated storage tanks: the Spindletop 250,000-gallon tank and the Harmony Landing 50,000 gallon tank. Due to its age, the Spindletop tank required structural reinforcement to the roof to assure stability of the tank. The project is complete and the tank returned to service. The existing Goshen storage tanks provide adequate volume for average day water demands; however do not have adequate volume for peak summer demands or for the planned residential growth in this area of Oldham County. Staff is working with the Oldham County School District and area developers to locate suitable property for a one million gallon water storage facility that will ultimately replace the two Goshen storage tanks. Plan is to have this new regional storage facility in service by summer of 2006.

A recent article in the March 22 edition of Engineering News Record profiles the recent increase in material prices for steel (20 to 60 percent), ductile iron (17 percent), copper tubing (16 percent), and plywood lumber (41 percent). In addition, local vendors have advised the company of expected increases for cement and concrete. The recent rise is being attributed to high energy prices and the strong demand for building material commodities in China. Although these high construction prices have not yet impacted broad inflation rates, these prices are making their way through suppliers to owners on major construction prices. This wave of price increases can be expected to impact our costs for all metallic piping and steel structures, such as water tanks.

Serving Customers and Business Development Report Filed

Ms. Teasley presented the Serving Customers Report.

Customer Satisfaction dropped moderately in the first quarter of 2004 from a fourth quarter 2003 Total Customer Satisfaction Index (CSI) high of 855 to a Total CSI of 845. This result is consistent with the 2003 annual average Total CSI score of 845. This exceeds the corporate Level 1 goal for the Total CSI of 840. Factors which went down in satisfaction levels included water quality, reliability, price/value and information, while customer service satisfaction levels increased to a new high (876 for residential non-service). Customer satisfaction for the Service CSI continued to climb in the first quarter of 2004 to 805, a new high for serviced accounts. This exceeds the Level 3 goal for customer satisfaction for the Corporate Performance Award of 800. Satisfaction increased in the areas of water quality, information and price/value for serviced customers.

As mentioned last month Louisville Water Company staff met informally with the Public Service Commission staff on January 15, 2004, to discuss the proposed water rate increase for regulated wholesale customers of LWC. Based upon direction from the PSC staff, LWC worked closely with our outside attorney, Mr. James Park, with the Lexington office of Frost, Brown, and Todd to meet the filing requirements. Mr. Park filed a request for a wholesale water rate increase with the PSC on March 12, 2004. A new wholesale agreement for North Nelson to obtain water service at LWC wholesale rates was also filed with the PSC. Assuming there is not an inquiry or intervention, the PSC advised LWC staff that upon filing the rate request, the PSC would respond within 30 days, which was April 12, 2004. LWC staff had not received documentation from the PSC prior to the BOWW meeting, but it appears that the wholesale rate increase will be accepted by the PSC and LWC will be able to implement the rate increase within the originally budgeted timeline of May, 2004.

LWC staff met with the Oldham County Water District Advisory Board on March 31, 2004. The Advisory Board reviewed the status of reserve funds, system improvements and progress on the Oldham County extension program. The Advisory Board approved disbanding on June 30, 2004 following completion of all projects and spending the remainder of the reserve funds. The Board also approved forming a new Oldham County advisory board composed of five representatives from various constituencies in LWC's Oldham County service area. The existing members of the Oldham County Water District Advisory Board will continue to serve on the new Board.

Compensation Committee Report

Committee Chairperson Stewart Conner provided a report of the Compensation Committee meeting held on Wednesday, April 7, 2004 and attended by board members Mr. Conner and Ms. Welsh. Mr. Conner discussed that the Compensation Committee would have a proposed charter for the entire Board to review at the next regular meeting.

With regard to Director compensation, Mr. Conner stated that the committee felt the current Director compensation was appropriate at this time, and the Committee recommends that it stay the same, especially given our current financial issues. However, Mr. Conner agreed that with the addition of Mr. Martin to the Compensation Committee, he would put it back on the next Compensation Committee meeting to be discussed.

Vice President Susan Lehmann presented the board with the employee Compensation Program, emphasizing that these were enhancements to the current program rather than a complete re-design of it. Ms. Lehmann explained that the 2004 Merit Matrix will allow managers discretion on decisions of merit based on the employee's performance rating. The revised program provides a merit increase only, rather than the merit increase plus the market movement or cost of living increase under the previous administration of the program.

Closed Session

At 1:50 p.m., Mr. Huber recommended the Board go into closed session pursuant to KRS 61.810(1)(b) to discuss real estate, KRS 61.810(1)(c) to discuss proposed or pending litigation, and KRS 61.810(1)(f) to discuss personnel matters. Mr. Martin moved that the Board go into closed session, Mr. Conner seconded, and the motion carried.

Open Session Resumed

The Board resumed open session at 2:30 p.m. and Mr. Bond moved that the Board approve the following salaries effective April 1, 2004:

Greg Heitzman, Vice President-Chief Engineer	\$136,750.00
Robert Miller, Vice President-Treasurer	\$130,500.00
Karla Teasley, Vice President-Serving Customers	\$132,600.00
Susan Lehmann, Vice President-Human Resources	\$120,000.00
John Huber, President	\$189,284.00.

Ms. Willis seconded the motion, and the motion carried. This concluded the action coming out of closed session.

Audit Committee Report Given

Committee Chairperson Phillip Bond provided a report of the Audit Committee. The Audit Committee met on April 5, 2004 with Ed Olliges and Laurie Haun of Crowe Chizek. Mr. Olliges and Ms. Haun reviewed the Management Letter from the company-requested Walkthrough of Revenue, Expenditure and Payroll Cycle, and Amber Halloran provided the company's response,

which included actions taken to correct the items noted in the letter. Ms. Haun reviewed the Management Letter from the Annual Audit and Ms. Halloran and Robert Miller provided the company's response, which included actions to correct any reportable conditions item. The Audit Committee felt that the company's response was adequate. The Audit Committee also reviewed the Financial Statements, and it was determined that the dividend prepayment would be shown as a separate line item.

The Audit Committee received a report from Roger Lemaster, Internal Auditor, on Risk Assessment and Control Evaluation, and Mr. Miller provided the company response, including the actions that the company is taking to improve controls and manage risks: examine staffing levels related to performance against system objectives; establish goals in each business system operating plan to improve communications between systems; continue the Executive Leadership Team's examination of corporate policies and consider training managers in policy application; develop procedures for preventive maintenance of transmission valves; and organize facility safety teams and conduct regular field and facility safety audits. Of all these, Mr. Bond stressed that the Committee wanted to ensure that there are adequate staffing levels related to performance against system objectives.

Mr. Bond advised that the Committee had fully considered the auditor selection for the 2004 annual audit. Because of the start-up time for the next audit being in April after the prior year audit report is given, and because the process to request proposals would take until about June, the Committee felt it appropriate to extend the current audit contract with Crowe Chizek for one additional year based on last year's pricing. The Committee felt that if the Board continues for another year with its current auditor, that a different partner at the audit firm should oversee the audit.

Mr. Martin moved that the Board delay consideration of a new independent auditor until the 2005 audit year. Mr. Bond stressed that any recommendation for a different auditor is simply in the spirit of Sarbanes Oxley (SOX) Regulations and in no way a negative implication toward Ed Olliges. Ms. Willis seconded, and the motion carried.

Special Issue Regarding Water Rate Usage

Mr. Huber initiated discussion of Dr. Patricia Cerrito's analysis of water usage. Mr. Miller provided an overview of Dr. Cerrito's report, which provides details on water usage in gallons. The report indicates the trend for residential water sales is stationary, despite the increase in residential customers. The forecast for residential water sales is approximately 740 million gallons below the budgeted amount. Mr. Huber noted that the decline appears to be a result of a wider use of conservation-type plumbing fixtures and the fact that sales related to irrigation are dependent on the weather conditions. Commercial water sales have been steadily decreasing since 1999 for three reasons: 1) the economy; 2) the fact that multi-residential communities are considered a commercial account and the data shows high vacancies in those type communities; and 3) the use of conservation type plumbing fixtures. The forecast for commercial water sales is approximately 400 million gallons below the budgeted amount. The forecast for industrial water sales is approximately 450 million gallons above the budgeted amount. The forecast for total water sales is approximately 150 million gallons above budget due to increase water

provided in lieu of taxes. Mr. Miller noted that this information should be considered to determine if the Board should enact a mid-year rate adjustment. Mr. Huber noted that we would realize only half the benefit of a rate increase because it would be ramped in and only be in effect for half the year. The Board also may want to consider a Rate Equalization and Risk Mitigation fund to better respond to revenue issues. Such funds have been implemented in the Western United States, for example. Mr. Huber noted that we have instituted cost saving measures, which helps, but additional cost saving measures might threaten the service and quality we provide. Our customer base is growing by one and a half percent (1 ½ %), but water sales have still decreased. New customers are very important to the long-term picture. New customers outside of Jefferson County represent approximately one-fourth (1/4) to one-third (1/3) of all new customers. More information regarding a mid-year rate adjustment will be on the May 2004 Board agenda.

Contract Renewed for Bid 00-66: Small and Large Meter Vault Frames and Lids

Mr. Conner moved to award a one-year contract to Bingham & Taylor in the amount of \$211,817.00 for Light and Heavy Frames and Lids and \$32,381.00 for Light and Heavy Lids; to General Foundries in the amount of \$28,950.00 for Monitor Casting and Lids and \$3,369.00 for Monitor Lids; and to Ford Meter Box in the amount of \$9,250.00 for ¼ Turn Lids. Ms. Welsh seconded, and the motion carried.

Contract Awarded for Bid 04-11: Aluminum Hatches

Mr. Martin moved to award a two-year contract to Cierra/Babcok-Davis in the amount of \$120,500.00 for aluminum hatches to concrete meter vaults. Mr. Bond seconded, and the motion carried.

Contract Awarded for Project 02-528: Old Floydburg Road Main Replacement

Mr. Conner moved to award a contract to Tom Brown Construction in the amount of \$290,420.00 to install the water facilities for this project. Dr. Wise seconded, and the motion carried.

Contract Awarded for Project 02-618: Crescent Hill Reservoir Site Improvements Phase IIIB

Mr. Bond moved to award a contract to Mac Construction and Excavating, Inc. in the amount of \$474,900 for the installation of sidewalks, lighting and other facilities at the Crescent Hill Reservoir. Ms. Welsh seconded, and the motion carried.

Draft Principles of Corporate Governance

Mr. Huber discussed the proposed Draft Principles of Corporate Governance. Although LWC is not governed by Sarbanes Oxley, we want to follow some of those same principles. Mr. Miller advised that we had previously adopted the framework from the Committee of Sponsoring Organizations of the Treadway Commission (COSO) regarding guidelines to manage internal

controls. Mr. Miller reviewed the elements of the governance and management. Adoption of the Draft Principles of Governance will be considered at an upcoming board meeting.

Legislative Update

Mr. Vince Guentner provided a legislative update. Mr. Guentner noted that the activity in the session resulted in very little impact to LWC. As of this meeting, the state has not passed a budget.

Construction Inspection Coverage and Quality Assurance

Ms. Teasley provided this report. LWC staff analyzed our construction inspection coverage and developed a Quality Assurance Program to provide appropriate levels of consistent and quality inspection services. This program will increase inspection coverage, thereby ensuring a longer life for our water system, and will also provide support to our Internal Auditor for audits relating to pipeline construction. The board was advised that five (5) Construction Inspectors accepted the early retirement offer. Two positions will be filled with employees moving from other roles. It will be necessary to retain the services of at least three (3) additional construction inspectors through a contract previously approved by the Board with Quest Engineers

Human Resources Information System (HRIS)

Mr. Miller provided this report. Mr. Miller states a HRIS is part of an important set of integrated computer applications to help the company manage information, benefits, payroll, training, tax filing and recruiting. The current system used for payroll applications is outdated and incompatible with our servers and desktops, thereby requiring us to maintain an outdated operating system for the sole purpose of managing payroll. Further, there is limited functionality, access, ability to upgrade, and ability to interface systems with the current system. Extensive benchmarking has occurred to determine an appropriate solution for LWC. The current budget for this project was \$250,000, but this amount was simply to move to a supported release of our existing software, and did not provide for additional functionality. A more appropriate base funding level is between \$750,000 and \$1,000,000 although the eventual recommended budget may need to be even higher. Staff is evaluating four options and will present the business case and request authorization to proceed with final design and solicitation of proposals at an upcoming Board meeting.

Contract Change Action Approved for Project 99-414: Crescent Hill South Reservoir Liner Installation

Dr. Wise moved to authorize the increase of contract F695 with Hall Contracting to a maximum of \$264,000 and increase the total project budget for this project from \$2,850,000 to \$3,332,582. Mr. Martin seconded, and the motion carried.

Apportionment Warrant Issued for Lonesome Hollow Road: Jefferson Hill Road to North 765 Feet

Dr. Wise moved to adopt the following resolution for the issuance of Apportionment Warrants and liens for 2 benefited properties on Lonesome Hollow Road in accordance with KRS 96.265:

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Lonesome Hollow Rd: Jefferson Hill Rd to North 765 feet** main extension project authorized by Ordinance No. 31, Series 2002 of the Jefferson Fiscal Court, adopted on November 12, 2002 such warrants to be against two (2) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute the apportionment warrants with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Mr. Bond seconded, and the motion carried.

Budget Change Approved for Project 10028: Shawnee Area Clean and Line

Mr. Bond moved to approve an increase in the budget amount for the Shawnee Area Clean and Line Project from \$1,845,373 to \$1,972,262.34 and to proceed with final close-out of this project. Ms. Willis seconded, and the motion carried.

Authorization Given to Proceed with Final Design and Advertisement for Bids for Montana Avenue Area Main Replacement Project

Dr. Wise moved to authorize staff to proceed with final design and advertisement for bids of the revised scope for the Montana Avenue Main Replacement Project in the projected budget amount of \$1,557,000. Mr. Bond seconded, and the motion carried.

Authorization Given to Proceed with Final Design and Advertisement for Bids for the Mary T. Meagher Aquatic Center

Mr. Bond moved to authorize staff to establish a capital project budget in the amount of \$400,000, proceed with design, and solicit bids for the parking lot improvements at the Mary T. Meagher Aquatic Center. Ms. Willis seconded, and the motion carried.

There being no further business to conduct, Mr. Huber recommended that the meeting adjourn at 4:25 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel
and Secretary to the Board of Water Works

**BOARD OF WATER WORKS
ANNUAL MEETING MINUTES
APRIL 23, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Stewart Conner
Mr. Rick Johnstone, designee for Mayor Jerry Abramson
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development

The Annual Meeting of the Board of Water Works was held on Tuesday, April 13, 2004 in the Board Room of the Louisville Water Company. Mr. John Huber called the meeting to order at 12:35 p.m.

Election of Officers

Mr. Huber relinquished the chair to Barbara Dickens, General Counsel, to conduct the election of the Company President. Ms. Dickens asked for nominations for the position of President. Ms. Welsh nominated John Huber. Mr. Conner moved to approve John Huber as President, and Dr. Weis seconded that nomination. Dr. Weis clarified that we should accept other nominations, if there were any. There were no other nominations. The motion carried unanimously, and Mr. Huber was named President.

Mr. Huber resumed Chair of the meeting and recommended Phillip Bond as Vice-President of the Board (serves without compensation). Mr. Conner made the motion for Phillip Bond as Vice-President, seconded by Ms. Welsh, and the motion carried unanimously.

Mr. Huber recommended Mr. Gregory Heitzman for the position of Vice President-Chief Engineer. Ms. Welsh made the motion for Gregory Heitzman as Vice-President, Chief Engineer, seconded by Dr. Weis, and the motion carried.

Mr. Huber recommended Mr. Robert Miller for the position of Vice President-Treasurer. Dr. Weis made the motion for Robert Miller as Vice President-Treasurer, Ms. Welsh seconded, and the motion carried.

Mr. Huber recommended Barbara Dickens as Vice President-General Counsel and Corporate Secretary of the BOWW. Mr. Conner moved to approve Barbara Dickens as Secretary, Dr. Weis seconded, and the motion carried.

Mr. Huber recommended Ms. Karla Teasley for the position of Vice President-Serving Customers and Business Development. Dr. Weis made the motion for Karla Teasley as Vice-President-Serving Customers and Business Development, Mr. Gerald Martin seconded, and the motion carried.

Selection of Auditor

Mr. Huber advised that the selection of the auditor would be discussed at a future meeting of the BOWW.

Committee Appointments

Mr. Huber stated that he had talked with members of the BOWW, and all had agreed to serve on the various committees.

Mr. Huber recommended that the Audit Committee be comprised of Mr. Phillip Bond, Chairperson, Dr. Joseph Wise and Ms. Wendy Welsh for the ensuing year. Mr. Conner made the motion for those members to serve on the Audit Committee for the ensuing year, Mr. Martin seconded, and the motion carried.

Mr. Huber recommended that the Compensation Committee be comprised of Mr. Stewart Conner, Chairperson, Mr. Gerald Martin, and Ms. Wendy Welsh for the ensuing year. Dr. Weis made the motion for those members to serve on the Compensation Committee for the ensuing year, Ms. Willis seconded, and the motion carried.

Mr. Huber recommended that the Public Affairs and Customer Satisfaction Committee be comprised of Ms. Marita Willis, Chairperson, Mr. Stewart Conner and Dr. Joseph Weis for the ensuing year. Mr. Martin made the motion for those members to serve on the Public Affairs and Customer Satisfaction Committee for the ensuing year, Ms. Welsh seconded, and the motion carried.

There being no further business, Mr. Huber recommended the BOWW adjourn. Dr. Weis made a motion to adjourn, seconded by Ms. Willis, and the motion carried. The Annual Meeting adjourned at 12:45 pm.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Secretary

**BOARD OF WATER WORKS
MEETING MINUTES
MAY 11, 2004**

Board Members Present:

Mr. Phillip Bond
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise
Not Present:
Mr. Stewart Conner
Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development
Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

Visitors:

Barbara Crow, Process Owner, Providing Strategic Communications
Vince Guenther, Process Owner, Providing Governmental Relations
Steve Greseth, Black & Veatch Consulting Engineers

The Regular Meeting of the Board of Water Works was held on Tuesday, May 11, 2004 in the Board Room of the Louisville Water Company. Mr. John Huber called the meeting to order at 12:35 p.m.

Consent Agenda Reviewed and Approved

Regarding the April Annual and Regular Meeting minutes, Ms. Welsh noted that both minutes incorrectly reflect the day of the meetings as Monday instead of Tuesday. Also, there was an error in referring to Ms. Welsh as Mister. Other than those changes, there were no changes to the consent agenda and Ms. Welsh made the motion to approve, seconded by Dr. Wise, and the motion carried.

The minutes from the 2004 Annual Meeting held April 13, 2004 and the Regular Meeting minutes from April 13, 2004 were approved.

The List of Claims Paid in April 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
02-056	G739M	The Plaza at Hurstbourne Green Ph. 2	\$33,570.00	\$8,600.00
03-081	G678M	Bridle Bend Way Extension	\$18,550.00	
03-088	G626M	Polo Fields Section 16	\$55,700.00	\$8,100.00
10062	G681M	Worthington Place Section 2	\$114,180.00	
10091	G741M	Valhalla Vista Condominiums	\$66,200.00	
10109	G620M	Wyndemere Condominiums	\$61,300.00	
10113	G621M	Claymont Springs Subdivision	\$154,080.00	
10117	G740M	Gardiner Park Section 3	\$34,630.00	
10131	G745M	Family Medicine Associates	\$28,500.00	
10136	G683M	Bethany United Methodist Church	\$17,500.00	
10137	G686M	Tucker Lake Estates Condo. Sec. 3	\$54,220.00	
10332	G684M	Arlington Meadows Section 2	\$89,770.00	\$16,700.00
10333	G623M	The Gardens at Claymont Springs	\$37,120.00	
10342	G677M	Farmstead Subdivision Ph. 1	\$18,950.00	
10343	G680M	Seminary Woods Res. Condo. Ph. 2	\$46,520.00	\$9,000.00
10358	G744M	Prologis Park Phase II	\$33,650.00	
10375	G688M	Silver Oaks Section 5A	\$60,480.00	
10379	G746M	Fountain Avenue Phase 3	\$5,830.00	
10380	G742M	Bridlewood Trails Section 3B	\$52,450.00	\$700.00
10381	G743M	Bridlewood Trails Section 3C	\$35,730.00	

10396	G749M	Valencia at the Summit	\$15,570.00
<u>Tapping Fee Main Extension Projects</u>			
G748T		Nall Avenue	\$12,400.00

The Board received the report of Contracts less than \$100,000 as follows:

Operations And Maintenance

04-33	Inspection, Maintenance and Repair of HVAC Systems	
	ACCO, Inc.	\$24,920

Procurement Of Materials And Services

03-55	Employee Assistance Program Service (Three Stuecker & Associates	\$38,004
03-LW01-B	Lawn Maintenance of LWC Grounds Creationist Company	\$41,860
03-LW01-B	Lawn Maintenance of LWC Grounds Ward Brothers Mowing	\$73,833
03-LW01-B	Lawn Maintenance of LWC Grounds Quality Lawns	\$54,075

Administrative Report

John Huber explained that he has nothing to report that is not contained in the other reports that will be given. Mr. Huber advised that, in light of all the work being conducted at the B.E. Payne plant and the RBI project, he would like for the Board to hold one of its meetings there in possibly June or October to acquaint newer board members with the work there. He will provide more information to the Board later regarding meeting at the plant.

Financial Report

Mr. Miller presented the Financial Report.

Mr. Miller reviewed the Statement of Revenues, Expenses, and Changes in Net Assets with budget and prior year comparisons for financial results through April 2004. Usually, these results are compared against the budget that the Board approved, which is important, but it is also important to compare these results to the Revised Financial Plan, which was done. Total Operating Revenue of \$31,648,792 is \$979,920 or 3.0% less than budgeted and \$1,453,868 or 4.8% more than the same period in 2003. Total Operating Expenses of \$22,934,018 are \$688,744 or 2.7% less than budgeted and \$186,009 or 0.8% more than 2003. Net Income of \$6,488,217 is \$1,144,326 or 15.0% less than budgeted and \$454,713 or 7.5% more than 2003. Mr. Martin asked for clarification regarding the 2003 prepaid dividend, and Mr. Miller advised that this is reflected in the increased dividend target for 2004. Mr. Bond sought clarification regarding the depreciation and amortization and Mr. Miller stated that because staff is closing out some projects later than anticipated, and expenses for those projects will get booked later in the year. Therefore, the company's financial forecast is positively affected by depreciation at this time. Mr.

Martin asked for an explanation for the significant increase in accounts receivable – water. Mr. Miller will research this matter and report back later.

Operations and Engineering Report Filed

Mr. Heitzman presented the Operations and Engineering Report.

Production – The water production in April of 116.2 MGD was 5.2 percent lower than the April 2003 production of 121.4 MGD, and was 1.8 percent lower than the five-year average April production of 118.0 MGD. The year-to-date production was 7.0 percent lower than 2003 and 0.9 percent lower than the five-year average production.

Goshen Fluoride Incident – On April 16, water quality staff discovered that one of the four daily samples (the one near the ground storage tank) collected from the Goshen system had a fluoride concentration of 3.6 ppm, while the other three samples had normal concentrations (~1.0 ppm). An investigation is underway to determine the cause (system failure or operator error). Staff followed appropriate procedures in response to the incident including notification to the state agencies. As a result, no violation occurred.

Bank Filtration Well Pump Failure – In April, the second Riverbank Filtration well pump failed. As a result, the B.E. Payne plant is currently supplied from 100 percent Ohio River source water. Staff is in the process of investigating the causes of pump failure and collecting cost information for the repairs. It is important for the RBI project to make sure that the pump failure is not related to design, which could impact the overall project. The pump repair is expected to be complete by July and returned to operation.

Crescent Hill Pump Station, 48-inch Transmission Main Leak – During April, staff conducted a series of fluoride tracer tests on the pump station discharge header to validate the source of the annex leakage. These tests confirmed a major leak on the north 48-inch discharge header, outside of the building. Water has been leaking through the pump station annex walls for over 20 years. The leakage is estimated to be over 300,000 gallons per day. Finding the leak will reduce the total amount of unaccounted for water. The 48-inch main has been isolated and repair efforts initiated. Contracts have been executed with Miller Pipeline and Hall Contracting to install approximately 15 internal joint seals. FMSM Engineers are also being used to evaluate the external soil conditions in the area of the leak, to assure we do not have a major underground void that would impact the building foundation. The estimated costs for this internal repair and subsequent investigation are currently estimated to be approximately \$50,000. Completion of the work is anticipated by May 14.

Crescent Hill North-South Filter Building Slate Roof Replacement - This project was proposed in the 2003 Capital Budget at an estimated cost of \$2.0 million to cover slate roof replacement only. The Company retained Roof Resources, Inc. to perform a comprehensive analysis of the condition of the slate roofs and building structure at Crescent Hill. The final report was delivered to the Company in April 2004. The report documents significant deterioration to this 100 year old facility. The report recommends major corrective actions, including: replacing the slate roof and gutters; rebuilding dormers; removing ornamental cresting on the roof ridge; replacing and reinforcing roof deck and rafters; replacement of damaged windows; and repair of exterior building cracks. The revised estimated project budget for full building rehabilitation, including construction, consultant fees, and project management expenses, is \$3.5 million. Staff is evaluating the report to identify improvements that meet operating objectives, consider historic and architectural features, and extend facility life. Final recommendations and proposed budgets will be presented to the Board in June.

Derby Festival Security Preparations – Staff from across the company collaborated on planning and executing plans to ensure that appropriate field checks were made of key water supply facilities prior to

the major Derby Festival events. This effort included checking Derby Festival sites and routes for a variety of possible problems, including: loose or missing valve box lids, loose or missing caps on fire hydrants, water main leaks and street depressions, and any incomplete restoration work. For Oaks and Derby, the distribution system was thoroughly checked for proper valve operations, meter availability, and fire hydrant availability and security. LWC staff were on call and available for any emergency regarding water supply. There were no reported incidents with the Derby Festival this year.

Warehouse Inventory Preparations – Staff has begun the preparation process for the annual inventory which is to be performed in June. This year's annual inventory count will be performed manually, since the bar coding technology used in the past is not compatible with the new Financial Information System. Plan is to install a new warehouse management module in 2005 that will link to the new Financial Information System. The physical count process will be more labor intensive to conduct and will require overtime to complete. Actual results may show increases in absolute and net adjustments due to the manual count process.

Serving Customers and Business Development Report Filed

Ms. Teasley presented the Serving Customers Report.

Dispatch System - A project team has been working with Viryanet and Alliance on implementing the Mobile Dispatch System since June 2003. The system has been in production since March 4, 2004 when the fire hydrant maintenance system was implemented. The system will more effectively route service orders, thereby reducing fuel costs and employee time allocation. Ultimately it will interface with the Interactive Web Response System. The total cost for the system includes the individual unit costs, which include Global Positioning Systems. The most recent group to go-live was the repair leaders, who have been using the system since April 19th. Other groups that have recently started using the system include meter exchangers and the large meter repair team. The next group of users to move to production are the customer service representatives which is by far the largest group in terms of the number of mobile users and the number of service visits completed in a day. There is also a significant amount of testing and complexity involved with the multiple types of service orders and huge volume of this work. The current schedule anticipates having all 40 users in production by the second week of June 2004.

Automated Meter Reading - Installation of Automated Meter Reading (AMR) equipment in the three pilot areas of Goshen, Shepherdsville and Kentucky Turnpike #2 is progressing and AMR equipment will be installed in 100% of services in the pilot areas by the end of 2004. As of April 2004, Neptune Technology Group, Inc. has completed the installation of new AMR meters pursuant to the contract. The AMR technology is performing well and 5,765 meters were read remotely through the first billing cycle of 2004 with an accuracy of 98.51%.

Wholesale Rate Increase - LWC's wholesale rate increase for North Shelby, West Shelby and North Nelson Water Districts was reviewed and accepted by the Kentucky Public Service Commission in April. The new wholesale rates went into effect May 1, as originally scheduled for all regulated and unregulated wholesale customers. Staff has been notified of a rate increase by the City of Mt. Washington which passes on the cost of LWC's wholesale rate increase to the City's retail customers. Also staff is aware that our regulated wholesale customers are completing the filing requirements to pass the increase along to their retail customers.

Bullitt County Advisory Board - The Bullitt County Advisory Board met for its regular quarterly meeting on April 26, 2004. Staff provided financial information regarding the status of the Bullitt County Water Reserve as well as the status on the capital projects underway under the Bullitt County Water Improvement Program. The Advisory Board engaged in vigorous discussion regarding the number of

customers along a two-thirds majority main extension who signed a letter of intent to apply for water versus those customers who actually apply for and receive water service following the completion of the main installation. Data presented to the Advisory Board by staff indicates that 70% of those customers along a 2/3 majority main extension apply for and receive water service within 12 months as opposed to the 2/3 majority petition stipulation of 6 months. The Advisory Board requested LWC staff to devise a solution that will assure those residents who sign a 2/3 majority petition for a main extension will apply for and receive service. Bullitt County Judge-Executive Kenneth Rigdon also attended the meeting and expressed his opinion that those who sign a 2/3 majority petition should honor their obligation and apply for and receive service. The Advisory Board also expressed concern with the total price of the Community Development Block Grant Project, but indicated support for LWC to proceed with dividing the project into three separate bid proposals and implementing value engineering strategies to encourage vigorous bid competition. Staff is considering other approaches, such as a deposit or promissory note that potential customers along the water main extension might sign, to ensure they apply for service within the six months. The problem in Bullitt County is different than what LWC dealt with in Jefferson County because the Jefferson County Extension Program operated under a specific state statute allowing the Board to issue the Apportionment Warrants. LWC can consider that option as well, but it would require legislative action and may result in negative perceptions among those residents.

First Lady Laura Bush visited the Louisville Water Tower in conjunction with the Preserve America Program on April 20, 2004. This visit helps position LWC to seek funds from this program.

Closed Session

At 1:20 p.m., Mr. Huber recommended the Board go into closed session pursuant to KRS 61.810(1)(b) to discuss real estate and KRS-61.810(1)(c), to discuss proposed or pending litigation. Mr. Bond moved that the Board go into closed session, Ms. Welsh seconded, and the motion carried.

Open Session Resumed

The Board resumed open session at 1:30 p.m. There was no action coming out of closed session.

Special Issue Regarding Riverbank Filtration, Phase II

Kay Ball, RBI Project Manager provided this report.

As we near completion of the design of the project, it is necessary to revise construction estimates based on specific material and equipment requirements and the construction methods designated in the plans and specifications. Since the last update to the Board in April 2003, the tunnel alignment has increased from 8,000 feet to 8,600 feet. This design improvement relocates the entrance caisson from the floodplain to a secure area adjacent to the pump house. This change will eliminate the tunnel equipment and truck traffic across the lagoons and through residential neighborhoods. The construction requires specialized equipment for tunneling, material handling, and removal. This design will provide for secure access and will reduce the vulnerability of flooding during construction. The cost estimate based on 95 percent design plan completion has increased from \$28,000,000 to \$31,000,000. This revised budget estimate includes an 11 percent construction contingency.

Staff has successfully negotiated 13 (68 percent) of the 18 properties necessary to move forward with the project. Second appraisals have been completed on the remaining properties and offers have been made based on the higher of the two appraisals. Easement acquisition remains a critical component of this project and will have significant impact on the bidding schedule and cash flow. It is anticipated staff will

return to the Board in June to discuss the property acquisition and alternative acquisition methods. At this time, acquisition and legal fees remain within the \$1.0 million budget reservation.

As a result of the wellhead protection program and the easement acquisition, the Company proposes to install sanitary sewers along Transylvania Beach Road. The sewers will allow elimination of the existing septic tanks serving the residents. We are in the process of negotiating with MSD for the installation of the sewers at an anticipated cost of \$1,000,000. This will be included as a separate project in the 2005 budget.

Staff requests the Board establish a revised budget reservation in the amount of \$37,323,300 and grant authorization to proceed with the bid of Riverbank Filtration, Phase II. It is anticipated staff will return to the Board in the fall of 2004 with the bid and request for approval to proceed with the contract. Mr. Heitzman clarified that there will be no impact on this year's capital budget, but that the project will be spread out for the next three to five years. Mr. Martin moved to approve the revised budget reservation in the amount of \$37,323,300 and to proceed with bids for this project. Dr. Wise seconded, and the motion carried.

Ms. Ball presented the information regarding the Consulting Engineers Contract for the RBI project. Ms. Ball noted that the Board Agenda documentation indicating that the cost for the Consulting Engineer to handle the bidding is incorrect: it should state a cost of \$8,000 rather than \$30,000 for bidding. Ms. Ball reviewed the proposed time schedule, with the clarification that once the construction company is selected, it may want to change the project schedule. Ms. Welsh moved that the Board approve a contract with Jordan, Jones & Goulding on a per unit hourly basis in the amount of \$3,323,300. Ms. Willis seconded, and the motion carried.

Special Issue Regarding 2004 Water Sales and Revenue Forecast

Following the decreased water sales results in 2003 and early 2004, an Analysis of Water Usage for 1994-2004 was prepared to determine if the recent sales decrease indicated an erosion of our water sales base. The analysis forecasts that residential and commercial water sales will be lower than previously anticipated, offset only partially by higher than anticipated industrial sales. In order to offset the lower water sales and to ensure adequate recovery of the revenue requirements for the year, staff recommends consideration of two alternatives:

- Defer funding of the Infrastructure Replacement Reserve in 2004
or
- Increase in water rates of 4.0% effective June 1, 2004

Mr. Huber advised that, while those two options are available, it has become clear that a mid-year rate increase is not a favorable course of action. Mr. Huber advised that certainly cutting operating costs is important, and the company is already doing that. However, to cut any more costs will impact quality and service. Therefore, deferring the funding of the Infrastructure Reserve Fund appears to be a more desirable option at this time. This will move the time for borrowing forward and will increase the amount of the borrowing. Further, the usual year-end rate increase will need to be significant. Mr. Miller reviewed a spreadsheet setting forth these options, including the option of taking no action at this time.

Mr. Bond inquired as to how the Infrastructure Replacement Reserve Fund is usually funded. Mr. Miller stated that one-twelfth (1/12) of the budgeted amount each month is placed into the Fund. If LWC suspended this practice, it would stop placing this money into the Fund, which pays for infrastructure maintenance and is drawn on regularly for those costs, and it would also reverse current payments to the Fund for this year.

Mr. Huber clarified that we took \$2.3 million out of the budget last year but then had to add back in \$500,000 for unanticipated expenses, resulting in a net reduction of \$1.8 million from the budget.

Dr. Wise noted that since this Fund is used to keep our infrastructure maintained, suspending this practice of funding the Infrastructure Reserve Fund will impact our cash reserves since that is where the company will have to go to the funds for infrastructure maintenance needs. Mr. Miller agreed that this reduces the company's safety net. The budget would still contain a \$700,000 contingency in our Operations and Maintenance Budget. However, we would have to strictly scrutinize any projects scheduled.

Mr. Huber commented that sales are varying more and we are also carrying a \$1,000,000 self insured retention now, both of which mean that LWC is assuming more risk. As a result, the Board may need to consider a risk mitigation and stabilization fund in the future. He advised that the problem we are experiencing with eroding water sales is not unique in the water utility industry in the southeast region. Mr. Bond commented that this problem appears to be a more permanent problem and may force us to seriously consider a rate increase to deal with it.

Contract Awarded for Bid 04-34: Utility Locating Services

Dr. Wise moved to award a one-year contract, renewable up to three years, to Utility Locating and Mapping Services in the amount of \$454,310 for services to locate underground utilities. Ms. Welsh seconded, and the motion carried.

Contract Awarded for Bid 04-20: Restraint Joint Adaptors

Ms. Welsh moved to award a one-year contract to Viking Supply Company in the amount of \$127,452 for restrain joint adaptors used to join two pieces of water pipe. Mr. Bond seconded, and the motion carried.

Contract Awarded for Bid 04-13: Meter Setters

Dr. Wise moved to award a two-year contract to Hayes Pipe Company in the amount of \$194,337 for meter setters used for the installation of domestic services. Mr. Bond seconded, and the motion carried.

Report Given Regarding Lead and Copper Rule

The Board was advised that the issue of lead and copper in drinking water is one that has received considerable attention from the public lately due to the incident of elevated lead levels in Washington, DC's drinking water supply. LWC has always been in full compliance with the Lead and Copper Rule requirements. In 1993, LWC completed the initial LCR monitoring and treatment study as required by the Kentucky Division of Water (KYDOW), and was approved to use pH adjustment as the "optimal" corrosion control method for minimizing the dissolution of lead and/or copper from the plumbing materials. This treatment method provides stable water with balanced pH, alkalinity, and calcium carbonate. The stable water reduces the dissolution of lead and copper into the water.

Although not required by regulation, LWC implemented a proactive lead service line replacement program in 1985. This program is coordinated with the annual Main Replacement and Rehabilitation program (MRRP). Lead service lines were used by the Company from 1860 to 1937, when copper was introduced as the service line standard. Approximately 75,000 lead service lines were installed during this period. By 1985, approximately 40,000 lead service lines remained in the system. Replacement with the annual MRRP and upon customer request has reduced this number to approximately 22,000. The Company has adopted a goal to eliminate all remaining lead service lines by 2015. In addition to these efforts, the Company provides educational programs through our Pure Tap initiatives, coordinated with

the local school district to test all of its drinking water fountains, and coordinates with the local Health Department to test individual homes anytime there is a high lead reading for an individual.

The incident of elevated lead level in Washington, DC's drinking water has received considerable attention from the public. The incident occurred after a change in water treatment methods, when changing from chlorine to chloramine disinfection process to minimize the formation of disinfection by-products. There is no scientific evidence showing that chloramine disinfection promotes elevated lead levels in drinking water. The incident may have been caused by a treatment change impacting the corrosion control strategy (pH level). EPA is currently reviewing the case and sees that there are many lessons learned from the DC experience, particularly in the area of public education and notification. EPA is considering additional workshops in the area of corrosion control, lead service line replacement, public notification, and public education. At this time, there are no planned changes by EPA to the Lead and Copper Rule.

In summary, LWC has always been in compliance with the Lead and Copper Rule. The levels of lead and copper in Louisville's drinking water have always been significantly lower than regulatory standards (1/3 of the action level). LWC will continue to optimize the treatment process to meet all water quality regulations and to replace aging lead service lines from the distribution system. Public notification and education efforts on lead in drinking water will continue.

Change in Scope Authorized for Chapeze Lane Transmission Main Project

Dr. Wise moved to authorize staff to proceed with advertisement for bids for the Chapeze Lane Transmission Main Project with a project budget of record of \$363,802 from \$310,500 due to confirmation of a significant amount of shale and hard rock. Ms. Welsh seconded, and the motion carried.

Apportionment Warrant Issued for Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to east 1,600 Feet; Tidwell Road; Lonesome Hollow Road to east 700 Feet

Mr. Bond moved to adopt the following resolution for the issuance of Apportionment Warrants and liens for 9 benefited properties on Lonesome Hollow Road, as described above, in accordance with KRS 96.265:

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to east 1,600 Feet; Tidwell Road; Lonesome Hollow Road to east 700 Feet** main extension project authorized by Ordinance No. 31, Series 2002 of the Jefferson Fiscal Court, adopted on November 12, 2002 such warrants to be against two (2) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute the apportionment warrants with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Dr. Wise seconded, and the motion carried.

Grant from Kentucky Infrastructure Authority Approved for Bullitt County Extension Program

Mr. Bond moved to approve the acceptance of Tobacco Settlement Fund Grants from the Kentucky Infrastructure Authority for the Bullitt County Extension Program for the projects listed below, authorizing the amendment of the 2004 LWC Budget to note receipt of grant funds, approving the grant agreement, authorizing the Vice President of Serving Customers and Business Development to sign all documents, and adopting the resolution set forth herein below:

<u>State ID No.</u>	<u>Project</u>	<u>No. Served</u>	<u>Proposed KIA Grant</u>	<u>Tapping Fee</u>	<u>Total</u>
WX21029104	Lebanon Junction Project	925	\$383,000		\$1,157,700
	Hwy 61 - Hwy 733 to Lebanon Junction Corp. Limit	23	\$60,323	\$39,348 (\$1,711 each)	\$182,700
	500,000 Gallon Storage Tank	925	\$231,715	N/A	\$700,000
	Booster Pump Station	925	\$91,963	N/A	\$275,000
WX21029020	Brooks Hill Rd. Extension	40	\$126,000	\$46,166 (\$1,154 each)	\$276,570
WX21029100	Knob Creek Rd. Extension	4	\$90,000	\$19,537 (\$4,884 each)	\$210,000
WX21029049	E Hwy 480 Storage Tank	1,000	\$300,000	N/A	\$891,000
WX21029101	Lake Elmo Rd. Extension	17	\$80,000	\$44,262 (\$2,604 each)	\$177,400
	TOTALS		\$979,000		\$2,712,670

RESOLUTION FOR PROJECTS:

WX21029020, WX21029049, WX21029100, WX21029101, and WX21029104

RESOLUTION OF THE LOUISVILLE WATER COMPANY (“Water Utility”) ACCEPTING THE GRANT, APPROVING THE GRANT AGREEMENT, AUTHORIZING THE AMENDMENT OF LOCAL BUDGET, AND AUTHORIZING A REPRESENTATIVE TO SIGN ALL RELATED DOCUMENTS

WHEREAS, the Water Utility has previously determined that it is in the public interest to acquire and construct certain facilities and improvements to the Water System (the “Project”) and

WHEREAS, the Water Utility has made application to the Kentucky Infrastructure Authority (the “Authority”) for the purpose of providing monies to acquire and construct the Project; and

WHEREAS, the Kentucky Infrastructure Authority has approved a conditional commitment of funds for the project.

NOW, THEREFORE, BE IT RESOLVED by the Board of Water Works of the Louisville Water Company as follows:

SECTION 1. That the Water Utility hereby accepts the grant award and approves the Grant Agreement between the Water Utility and the Authority substantially in the form on file with the Water Utility for the purpose of providing a portion of the necessary financing to the Water Utility for the acquisition and construction of the Project.

SECTION 2. That Karla Olson Teasley is hereby authorized, directed and empowered by the Water Utility to execute the Grant Assistance Agreement and all other necessary documents or agreements, and to otherwise act on behalf of the Water Utility to implement the Project.

SECTION 3. That the Water Utility hereby amends its annual budget to allow for the receipt and expenditures of funds subject to the Grant Assistance Agreement with the Authority.

SECTION 4. This Agreement shall take effect immediately upon passage.

This agreement shall take effect immediately upon passage.

Ms. Welsh seconded, and the motion carried.

Authorization Given for Participation in the Technology Park Project

Dr. Wise moved to authorize \$370,000 participation to own, operate and maintain the future public water system in Technology Park and to authorize the Vice President of Serving Customers and Business Development to complete and execute the MOU and DFDI related to the project. Ms. Willis seconded, and the motion carried. Mr. Bond abstained from this vote because he served as a member on the Naval Ordinance Re-Use Board.

Change in Scope and Authorization Given to Advertise for Bids for Project 03-607: Westport Road Transfer Station Hydraulic Surge Tank

Mr. Martin moved to authorize staff to advertise for bids and establish a new project budget in the amount of \$376,000 from a previous budget amount of \$336,000 for the Westport Road Transfer Station Hydraulic Surge Tank. Mr. Bond seconded, and the motion carried.

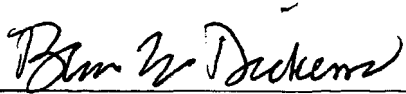

Authorization Given to Proceed with Final Design and Bids for Project No. 03-662: Louisville International Airport 60" Main Relocation (Phase III)

Ms. Welsh moved to authorize staff to proceed with final design and bids for the relocation of the 60" Main at the Louisville International Airport, to increase the project budget to the amount of \$3.91 million from \$3.82 million, and to seek reimbursement for a portion of the costs from the Regional Airport Authority. Dr. Wise seconded, and the motion carried.

Mr. Huber advised that Phillip Bond will be going off the board and that this may be his final meeting. Mr. Huber thanked Mr. Bond for his dedicated and valuable service to the Board of Water Works.

There being no further business to conduct, Mr. Huber recommended that the meeting adjourn at 3:10 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel
and Secretary to the Board of Water Works

**BOARD OF WATER WORKS
MEETING MINUTES
JUNE 8, 2004**

Board Members Present:

Mr. Stewart Conner
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise
Not Present:
Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development
Mr. Rick Johnstone, Deputy Mayor, Metro Louisville
Mr. Rudolph Davidson, Cabinet Secretary for Public Works and Services, Metro Louisville

Visitors:

Steve Greseth, Black & Veatch Consulting Engineers
Kay Ball, Program Manager, Riverbank Infiltration Project

The Regular Meeting of the Board of Water Works was held on Tuesday, June 8, 2004 in the Board Room of the Louisville Water Company. John Huber called the meeting to order at 12:35 p.m.

Barbara Dickens administered the Oath of Office to new Board member, Margaret Harris.

Mr. Huber advised that due to Phillip Bond coming off of the Board, the Board needed a Vice-President. He recommended Wendy Welsh as Vice-President of the Board. Stewart Conner made the nomination of Ms. Welsh as Vice-President, seconded by Gerald Martin. Mr. Huber asked for other nominations, and there were no other nominations. Motion carried.

Consent Agenda Reviewed and Approved

There were no changes to the consent agenda and Ms. Welsh made the motion to approve, seconded by Marita Willis and the motion carried. Rick Johnstone inquired whether the procurement cards are audited. Mr. Huber advised that they were regularly audited, and the most recent audit of them just occurred.

The Regular Meeting minutes from May 11, 2004 were approved.

The List of Claims Paid in May 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

<u>Project</u>	<u>Contract</u>	<u>Project Name</u>	<u>Total Project Cost</u>	<u>LWC Cost</u>
10337	G758M	Jefferson Trace Section 8	\$41,430.00	
10338	G754M	Falcon Crest Condominiums Ph. 1	\$47,750.00	
10345	G747M	Old Henry Crossing Section 1	\$76,670.00	\$24,500.00
10347	G757M	Landherr Estates Section 3B	\$32,100.00	
10360	G760M	Saddle Ridge	\$24,060.00	
10364	G685M	Beechwood Estates Section 4	\$72,500.00	
10374	G750M	Bannon Crossings Section 2A	\$57,740.00	\$8,300.00
10377	G756M	Norton Commons Section A Ph. 1	\$219,550.00	
10385	G759M	Harrods Crossing	\$122,250.00	\$1,300.00
10391	G751M	Woodridge Crossings Section 2	\$48,950.00	
10395	G755M	Memory Place-Martin House Lane Ext.	\$26,400.00	\$5,800.00
10399	G753M	Stonehaven Commons	\$15,450.00	

The Board received the report of Contracts less than \$100,000 as follows:

Procurement Of Professional Services

Professional Service	Roofing-Related Design and Management Services – Renewal Roof Resources	Unit Price Contract
Professional Service	2004 Annual Inspection and Report Black & Veatch	NTE \$32,435
Bid #00-48	Auditing Services Crowe, Chizek and Company, LL	NTE \$29,300

Procurement Of Goods And Services

Bid #04-27	Small Hand Tools	
	United Rentals	\$13,431.00
	Rayco	\$27,338.25
	United Rentals	\$23,367.50
	Best Products (CMBE)	\$ 8,284.50
	Rayco	\$57,631.25

Bid #03-36	Pipe Repair Couplings, Sleeves and Bell Joint Clamps – 1 st PPI Renewal	
	Viking Supply Company	\$71,056.02
	Water Works Supply	\$22,869.90
	Harco, Inc.	\$20,740.71
	Hughes Supply	\$18,601.28
	Smith Blair Company	\$ 6,456.91
	Mueller Company	\$ 190.17
Bid 04-39	Steel Casing Pipe	
	Pittsburgh Pipe Company	\$41,918.20

Administrative Report

Mr. Huber called attention to our capital program, which has grown extensively and will be discussed in more detail in Robert Miller's report. Mr. Huber stated that any other issues he has will be covered in other reports.

Financial Report

Mr. Miller presented the Financial Report.

Mr. Miller reviewed the results through May 2004. Year-to-Date total operating revenue of \$39,769,424 is \$1,508,461 or 3.7% less than budgeted and \$1,680,176 or 4.6% more than the same period in 2003. Water sales for the remainder of the quarter are expected to be below budgeted levels.

Operation and Maintenance expenses for May of \$3,064,655 were \$638,263 or 17.2% less than budgeted. Year-to-Date O&M expenses of 17,686,907 is \$481,832 or 2.7% less than budgeted and \$516,475 or 2.8% less than 2003. O&M expenses for the remainder of the quarter are expected to be well below budgeted levels due to cost reduction initiatives currently underway.

Year-to-Date Net Income of \$9,230,767 is \$1,388,340 or 13.1% less than budgeted and \$959,219 or 11.6% more than 2003. Net Income for the remainder of the quarter is expected to be at budgeted levels, with decreased operating revenue offset by decreased operating expenses.

Mr. Miller also reviewed Forecast of 2004 Financial Results. Mr. Miller advised that LWC is facing four key challenges to meet its 2004 earnings target: 2003 Dividend Prepayment of \$1,779,187; Revenue Forecast Shortfall of \$2,041,048; Early Retirement Incentive Program costs of \$ 949,266; and additional unbudgeted O&M expenses of \$ 631,517. This totals a potential shortfall of \$5,401,018. Mr. Miller advised that staff is executing five tactics that are expected to allow us to meet the earnings target: O&M expense reductions of \$2,407,081; depreciation expense reductions of \$ 182,250; revenue from the sale of surplus fleet vehicles brought in \$106,000; the assignment of the budget contingency in the amount of \$728,298; and the decision to reduce funding of the Infrastructure Replacement Reserve by \$1,977,289. The total of these reductions: \$5,401,018.

Staff has updated the forecast of 2004 financial results: 2004 Net Income: \$29,988,200; 2004 Infrastructure Replacement Reserve: \$622,711; and 2004 Dividend: \$13,766,400.

The net income forecast is \$1,477,300 below the targeted amount. However, with the reduced funding of the Infrastructure Replacement Reserve, the net income available for distribution as dividend is on target. The dividend forecast is also on target. Based on actual financial results through May 2004, Louisville Water Company is approximately \$197,800 ahead of schedule for meeting the 2004 earnings target. Dr.

Wise commented that, due to the variability of water sales, we need to do something to plan so that we are not relying on weather to improve our financial position. Mr. Huber advised that we had budgeted water sales conservatively, but perhaps should have been even more conservative. Mr. Huber also advised that the concept of a Rate Equalization and Risk Mitigation Fund is being evaluated and may be presented to the Board for consideration. This would be a reserve fund the Board could draw upon in a shortfall. Mr. Huber also advised that our rate base is behind 2 % of what it should be. He noted that we are dealing with the impact of the early retirement program, the benefits of which we will not realize until next year. In response, Gerald Martin noted that the two percentage estimate is a need-based estimate, not a market-based estimate. The Financial Report was filed.

Operations and Engineering Report Filed

Mr. Heitzman presented the Operations and Engineering Report.

Production – The water production in May of 126.3 MGD was 0.3 percent higher than the May 2003 production of 125.9 MGD, and was 2.0 percent lower than the five-year average May production of 128.9 MGD. The year-to-date production was 4.5 percent lower than 2003 and 1.1 percent lower than the five-year average production.

Distribution Water Quality – Staff collected 290 regular distribution samples in May and all internal water quality goals were achieved. There were five boil water advisories issued in the month due to main breaks, three of which were issued in the field due to site conditions and the other two were issued by lab staff based on water quality test results. All advisories were localized in the main break shut-off zone.

Severe Weather Conditions – The severe weather conditions on the evening of May 30 caused power supply interruptions at the Crescent Hill Treatment Plant, Zorn Pump Station, and several booster pumping stations in the distribution system. Power supply from LG&E's Clifton substation was interrupted causing partial power outages at Crescent Hill and Zorn facilities. Although the plant was not shut down, production levels were significantly reduced for a four hour period until pump units could be transferred to the Hillcrest power supply. Several chemical feed systems were impacted with the power feed interruption. The storms also disrupted power supply to major pumping stations, including Westport, Freys Hill, and Chamberlain. SCADA phone line signals were lost from a number of remote pump stations and storage tanks. This limited the ability to conduct remote operations of key facilities. Fortunately, backup power was restored and there was adequate storage in the distribution system that prevented loss of water supply. There were no water outages related to the storm and no boil water advisories were issued. Facility Management workers were brought in on Memorial Day to remove fallen trees at Crescent Hill on Reservoir Avenue and surrounding property.

EPA Risk Management Plan Submittal – EPA requires periodic update of Risk Management Plans (RMP). The existing Risk Management Plan was submitted in 1999, and an update of the plan is required by June 15, 2004. Risk Management Plans are required to be filed for any facilities that use or store large quantities of hazardous or flammable chemicals as defined by EPA. The requirement to perform Risk Management Planning and prepare a Risk Management Plan was established with the Clean Air Act of 1990. Dissemination of the information contained in Risk Management Plans is covered under the Emergency Planning and Community Right to Know Act (EPCRA - 1986). The two regulated chemicals used by the Company are chlorine and ammonia. The Company has conducted extensive reviews of the operations and management for chlorine and ammonia processes. Process improvements include installation of containment structures, chlorine scrubbers, automatic shutoff systems, and leak detection for the hazardous chemicals. Routine testing and monitoring is also performed on these systems. The Risk Management Plans provide documentation for emergency response personnel and the community regarding the presence and handling of hazardous chemicals.

LWC Wastewater Discharge Permit – On March 26, 2004 the Company applied to MSD for a wastewater discharge permit for the Crescent Hill Treatment Plant. The permit was requested as part of the Company's strategy to develop an overall management plan for handling treatment plant waste streams. MSD issued the permit on May 20. The permit allows up to 800 gallons per minute discharge into MSD's combined sewers at two CSO locations, #125 and #132. This permit provides relief in managing plant operations, especially during peak demand periods. The primary wastewater flows include: water from reservoir draining and cleaning operations; waste flows from the coagulation and softening processes; and filter backwash water. Prior to 1975, these waste streams were recycled in the plant treatment process or returned to either Beargrass Creek or the Ohio River under State discharge permit. With construction of the BE Payne Plant in the late 1970s, four large lagoons were constructed to handle the Crescent Hill waste flows. Discharge from the lagoons into the Ohio River is allowed under KPDES permit. The MSD permit becomes effective June 7, 2004 and expires June 1, 2009.

CHPS Annex Leak Repair – In April, staff determined that the source of the water leak was from the 48-inch discharge header on the north side of the pump station (Frankfort Avenue). Staff isolated the leak and conducted visual inspection inside the header on April 29. Miller Pipeline installed Weko seals on 15 internal joints from May 4 to May 6. After the repair, LWC crews conducted excavation from outside the building to expose voids around the pipe. Flowable cement fill (100 psi mix) was used to fill the voids around the pipe up to the spring-line. Voids were found on the east side of the pipe and close to the building foundation. Probing on the west side of the pipe concluded that there were no appreciable voids. The excavation was back-filled on May 12. The header was flushed, disinfected and placed in service on May 26. Inspection of the test wells has verified the leak has been completely stopped and the annex leakage problem resolved after many years of evaluation and investigation. Total estimate for this repair operation is approximately \$50,000. The diligence and creativity of an in-house team lead by Project Engineer Steve Tucker in developing the plan to identify and repair the joint leak in the 1926 transmission main was acknowledged.

Vehicle Auction – In an effort to streamline operations and reduce costs, 22 vehicles were sold at auction on May 8. The vehicles sold included pool cars, pick-ups, and dump trucks. The vehicles sold were selected based upon mileage, age, and maintenance history. Remaining vehicles in the fleet have been reassigned as necessary to ensure that there is minimal impact on operations. The auction brought net proceeds of \$106,000 to the Company. Rudolph Davidson inquired as to what the depreciation schedule is for vehicles. Mr. Heitzman responded that it is 5-7 years.

Mr. Davidson commented that LWC needs a representative on the Emergency Response Team, which met recently on Memorial Day due to severe weather. Mr. Huber responded that LWC used to have a representative but due to a retirement, will need to be replaced on the team.

Serving Customers and Business Development Report Filed

Ms. Teasley presented the Serving Customers Report.

Performance Measures – The May 2004 abandonment rate was 4.8% compared to 4.1% in April 2004, and 4.0% in May 2003. The year-to-date abandonment rate is 4.6%. Bad debt for the month of May was \$62,625 compared to \$44,621 in April 2004, and \$44,245 in May 2003. Bankruptcies are the highest they have been since April 2002. In 2001 Carbide Graphite filed bankruptcy within 90 days of making a water payment to LWC. The payment was considered a preference payment and \$5,625.67 was required to be reimbursed in May of 2004.

Annual Inspection - The 2004 Annual Inspection was conducted by Black and Veatch from May 19 to May 21. In accordance with the bond covenants for the Series 1992 Bonds, Black and Veatch performed an inspection and review of the water supply and treatment facilities, insurance policies, and financial management and rate methodologies. The inspection focused on the physical conditions of water supply and treatment facilities and review of facility operation and maintenance practices. Preliminary results of the inspection indicate LWC facilities and equipment have been maintained in good repair and sound operating condition and are capable of supplying high quality drinking water to LWC customers on a continuous basis. The final 2004 Annual Inspection Report will be completed and submitted to the BOWW at its September meeting.

Acquisition of Land for Storage Tanks - Substantial progress continues in acquiring land for construction of critical storage facilities. Tanks of note include the planned 1.0 MG elevated storage facility in Goshen to raise system pressures and fire flows to LWC standards; two, 1.0 MG elevated tanks to upgrade fire flows and equalization and emergency storage in the expanded 770 pressure zone (PZ); and two, 1.0 MG elevated tanks to improve fire flow and equalization and emergency storage in the expanded 900 PZ. Expansion of these pressure zones will provide improved customer water pressure and fire flows in the Hikes Point, southern Preston Highway, Middletown and eastern Taylorsville Road areas in Jefferson County. The Goshen tank site is in the final stage of negotiation and site evaluation phases. The planned 900 PZ tank for the Middletown area is entering the final site evaluation phase and Taylorsville Road 900 PZ tank is currently in the community facility review process. Potential sites identified for the tanks for the 770 PZ expansion are currently under review for final site selection.

Home Builders Association Update - Staff has finalized a draft for the new Refunding of Installation Cost Main Extension Contract. This new contract provides for the one time payment for twenty (20) years of monthly refund amounts based upon the number of services active on the selected anniversary date from when the main is placed in service. In addition, this contract implements the increased monthly refund amount per meter size. Staff has provided a draft of the new Refunding of Installation Cost Main Extension Contract to the Home Builders Association of Louisville (HBAL) for their review and our request for input on the contract language. The HBAL has agreed to form a small working group from the Land Development Committee with LWC staff to provide input to LWC on the new contract as well as other issues of concern to the development and homebuilder's community. When this group of HBAL representatives and LWC representatives develop a plausible solution to the various issues, then the full Land Development Committee will provide input on the "draft" solution developed by the small group.

LG&E Benchmarking - LWC staff are participating in an American Water Works Association Research Foundation project on customer service best practices. As part of this project, LG&E was selected as a good candidate for a site visit to obtain customer service best practices and benchmarking information from the electric and gas industry. LWC staff attended the session on May 27 which included other utility project members from Cincinnati Water Works. Topics included meter reading and meter services, credit and collections and call center operations. The information will be used to better understand customer expectations for service and to evaluate new approaches to improve service levels.

Public Information Initiatives - LWC staff appeared on National Public Radio's "State of Affairs" show. It was a chance to showcase LWC's 150 years of service to the community. Topics varied including LWC history, advanced treatment, infrastructure renewal, lead and home treatment devices. WLKY-TV's four-part series on lead also aired this month highlighting the company's aggressive lead abatement programs. Ford Motor Company used the company's historic Water Tower as a backdrop for a new Ford truck commercial.

Children's Health Partnership - Public Information will launch a new partnership this fall focusing on children's health issues. Working with area pediatricians and health professionals this education project will focus on exercise and nutrition for school age children.

Annual Water Quality Report - Customers are receiving LWC's annual water quality report. The 2004 Pure Tap report is included in water bills for the next two months. Nearly 300,000 informational reports will be distributed pursuant to this federal requirement.

The report was filed.

Closed Session

At 1:04 p.m., Mr. Huber recommended the Board go into closed session pursuant to KRS 61.810(1)(b) to discuss real estate and KRS 61.810(1)(c), to discuss proposed or pending litigation. Dr. Wise moved that the Board go into closed session, Mr. Conner seconded, and the motion carried.

Open Session Resumed

Ms. Welsh moved to return to Open Session, Mr. Conner seconded and the motion carried. The Board resumed open session at 1:10 p.m. There was no action coming out of closed session.

With regard to the committee items on the agenda, Mr. Huber recommended that they be deferred to another meeting, possibly a special-called meeting, prior to the July 13, 2004 meeting. Mr. Huber suggested that this be heard along with another item that Gerald Martin has asked the board to consider regarding Corporate Governance. Mr. Huber briefly described the statutory framework of the Board and LWC and the local ordinances governing the Board.

Special Issue Regarding Declaration of the Second Quarter Dividend

Mr. Miller discussed the declaration of the Second Quarter Dividend.

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City. The dividend is to be paid in quarterly installments, such payments to be based on the estimated annual net income and as nearly equal in amount as possible. The estimated net income of \$31,465,500 for 2004 requires payment of an annual dividend of \$13,766,393 in quarterly installments of \$3,441,598. The quarterly dividend payment must be decreased by \$266,878 to reflect one quarter of the \$1,067,515 dividend prepayment in 2003. The Board will consider a resolution providing for a total quarterly payment of \$3,174,720. Mr. Martin moved to declare the Second Quarter Dividend, Dr. Wise seconded, and the motion carried.

Condemnation of Property for the Riverbank Infiltration Project

Ms. Dickens and Kay Ball provided this report.

Ms. Dickens briefed the Board on the necessity and basis for condemnation of some of the properties in the Riverbank Infiltration Project (RBI). There has been considerable research and planning to determine the course of action necessary to accomplish this project. RBI involves constructing an 8,600 foot tunnel, thirty-one (31) vertical collector wells, and a pump house, for the purpose of providing an innovative system of bank filtration utilizing the Ohio River aquifer.

The location of the facilities necessary for this critical project will be on undeveloped, private properties located along Transylvania Beach Road off of River Road, near the B. E. Payne Treatment Facility. Each property owner has a developed tract of land with a residence on it and an additional, undevelopable tract, the latter of which is the tract that LWC needs. In each of the situations, LWC has offered Fair Market Value for the property, based on two independent appraisals, and also has offered to install sanitary sewers to the remaining property at LWC cost, a value to the property owner of approximately \$30,000. Based on these offers, staff has negotiated property purchases for sixty-eight (68) percent of the needed properties. Negotiations regarding four of the remaining properties are at an impasse, and therefore, require the Board of Water Works to consider condemnation for fee simple acquisition of the properties. The Board was briefed on the efforts to reach an agreement in each of these four situations.

Dr. Wise asked Kay Ball to explain the need for fee simple purchases versus easements. Ms. Ball and Mr. Huber explained that, unlike most easements where only pipe is laid, these properties will contain a tunnel and more importantly, wells. It is of critical importance that the wells be protected from contaminants and this can only be accomplished in this area with total control over the property. Mr. Conner inquired why we are installing sewers as a part of this project. Ms. Dickens responded that, again, the focus on is preventing contamination to the wellheads by eliminating septic tanks, lateral fields, and seepage pits currently used for sanitary waste disposal.

Ms. Dickens stressed that with these four properties, the issue is not the purchase price, but that the owners simply refuse to negotiate a sale at all. Ms. Dickens and Mr. Huber recommended that due to the impasse, the Board resolve to obtain the properties through its powers of condemnation.

Mr. Conner moved to adopt the following resolution relating to the property owned by Gary and Margaret H. Fuqua located at 6404 Transylvania Beach Road:

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain fee simple title to certain land located along Transylvania Beach Road in Jefferson County, Kentucky (such land being more particularly described in the Exhibit attached hereto) for the purpose of using such land for installing, operating monitoring, maintaining, replacing, and protecting all facilities relating to the riverbank filtration well project system, which consists of a tunnel, piezometers, and a series of vertical collector wells thereon, necessary to be protected from direct introduction of possible contaminants, it being the Board of Water Works' determination that such land is needed from:

Gary and Margaret H. Fuqua, his wife; 6404 Transylvania Beach Road;
Prospect, KY 40059; Block 204 Lot 44

and any or all other lawful owners of such properties, the need for such land being to allow the Louisville Water Company to use such land in fulfilling the public purpose of providing purified water to the residents of the Louisville/Jefferson County, Kentucky and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts to purchase the necessary land have failed, to bring a condemnation action against the owners of such land.

Mr. Martin seconded, and the motion carried.

Dr. Wise moved to adopt the following resolution with regard to property owned by Mary Howard located at 6400 Transylvania Beach Road:

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain fee simple title to certain land located along Transylvania Beach Road in Jefferson County, Kentucky (such land being more particularly described in the Exhibit attached hereto) for the purpose of using such land for locating, installing, operating, monitoring, maintaining, replacing, and protecting all facilities relating to the riverbank filtration well project system, which consists of a tunnel, pizometers, and a series of vertical collector wells thereon, necessary to be protected from direct introduction of possible contaminants, it being the Board of Water Works' determination that such land is needed from:

Mary Howard, unmarried; 6400 Transylvania Beach Road; Prospect, KY 40059; Block 204 Lot 52

and any or all other lawful owners of such properties, the need for such land being to allow the Louisville Water Company to use such land in fulfilling the public purpose of providing purified water to the residents of the Louisville/Jefferson County, Kentucky and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts to purchase the necessary land have failed, to bring a condemnation action against the owners of such land.

Mr. Conner seconded, and the motion carried.

Mr. Martin moved to adopt the following resolution relating to the property owned by Stephen R. and Susan M. Miller, located at 6406 Transylvania Beach Road:

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain fee simple title to certain land located along Transylvania Beach Road in Jefferson County, Kentucky (such land being more particularly described in the Exhibit attached hereto) for the purpose of using such land for locating, installing, operating monitoring, maintaining, replacing, and protecting all facilities relating to the riverbank filtration well project system, which consists of a tunnel, pizometers, and a series of vertical collector wells thereon, necessary to be protected from direct introduction of possible contaminants, it being the Board of Water Works' determination that such land is needed from:

Stephen R. and Susan M. Miller, husband and wife; 6406 Transylvania Beach Road; Prospect, KY 40059; Block 204 Lot 53

and any or all other lawful owners of such properties, the need for such land being to allow the Louisville Water Company to use such land in fulfilling the public purpose of providing purified water to the residents of the Louisville/Jefferson County, Kentucky and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts to purchase the necessary land have failed, to bring a condemnation action against the owners of such land.

Dr. Wise seconded, and the motion carried.

Dr. Wise moved to adopt the following resolution relating to the property owned by Doris Thompson located at 6402 Transylvania Beach Road:

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain fee simple title to certain land located along Transylvania Beach Road in Jefferson County, Kentucky (such land being more particularly described in the Exhibit attached hereto) for the purpose of using such land for installing, operating monitoring, maintaining, replacing, and protecting all facilities relating to the riverbank filtration well project system, which consists of a tunnel, pizometers, and a series of vertical collector wells thereon, necessary to be protected from direct introduction of possible contaminants, it being the Board of Water Works' determination that such land is needed from:

Doris Thompson, unmarried; 6402 Transylvania Beach Road; Prospect, KY
40059; Block 204 Lot 43

and any or all other lawful owners of such properties, the need for such land being to allow the Louisville Water Company to use such land in fulfilling the public purpose of providing purified water to the residents of the Louisville/Jefferson County, Kentucky and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts to purchase the necessary land have failed, to bring a condemnation action against the owners of such land.

Ms. Welsh seconded, and the motion carried.

Contract Awarded for 04-35: Valve Boxes

Valve boxes are castings used to access gate valves. A total of five bids were submitted with the lowest, most responsive bid from General Foundries for an estimated total of \$105,154. This bid represents an approximate 35% increase in unit prices from the previous bid last year. The cost increase can be attributed to industry wide cost increases on iron and metal construction products. Dr. Wise moved to authorize the Process Owner, Procurement of Goods and Services, to award a one-year contract totaling an estimated \$105,154 to General Foundries. Mr. Conner seconded and the motion carried.

Contract Awarded for 01-11: Cold Water Meters – 3rd PPI Renewal

This contract, originally awarded on April 25, 2001, is renewable for up to four additional one-year periods utilizing the Producers Price Index (PPI), industry and product code 3824-23 – “Fluid Meters and Counting Devices, liquid meters” as a cost adjustment factor. This is the third PPI renewal and represents a 1.5% annual increase in unit pricing. Ms. Welsh moved to authorize the Process Owner, Procurement of Goods and Services, to award a one-year contract renewal totaling an estimated \$1,284,389 to Neptune Technology Group. Ms. Willis seconded. Mr. Martin asked about the PPI renewal. Mr. Miller advised it gives us the exclusive right to renew the contract up to the PPI only. The motion carried.

Contract Awarded for 03-20: Polyvinyl Chloride – 1st PPI Renewal

This contract, originally awarded April 16, 2003, is renewable for up to two additional one-year periods utilizing the Producers Price Index, Industry and Product Code 3084-104, “Plastic Pipe – Water” as a cost

adjustment factor. This is the first Producers Price Index (PPI) renewal and represents a 5.5% annual increase in unit pricing. Mr. Conner moved to authorize the Process Owner, Procurement of Goods and Services, to award a one-year contract renewal totaling an estimated \$1,089,015 to Extrusion Technologies. Ms. Welsh seconded, and the motion carried.

Contract Approved for Replacement of the Alliance Customer Information System

The Alliance E-CIS includes two IBM AS/400 servers, installed in July 1999, to provide for production processing and testing of new releases, patches, bug fixes, new programs, and interfaces for integration with other systems. The systems have been expanded to support additional functionality, growth, new custom programs, and interfaces with other strategic Information Technology projects such as the Interactive Voice Response (IVR) and Mobile Dispatch System (MDS). With this expansion, the production system is at maximum processing capacity and has been scheduled for replacement with funds allocated in the 2004 Capital Budget. The test system continues to provide an environment to install and test new releases, patches, programs for additional functionality, and interfaces; however, it can no longer provide a production platform for disaster recovery. The replacement systems will provide additional processing power and scalability and both systems will be capable of running a production environment, providing better recoverability in the event of failure or disaster. The maintenance agreements required to support the current technical platform are \$41,100 for hardware and \$28,000 for software for a total annual maintenance cost of \$69,100. The replacement systems will allow LWC to eliminate components of the existing configuration and place the equipment in a lower maintenance category. The annual maintenance for the proposed replacement systems is estimated to be \$35,000 for hardware and \$7,700 for software for a total cost of \$42,700. This results in an estimated annual reduction of operations and maintenance cost of \$26,400. The price includes all hardware components and installation services. The purchase will be from IBM through the KY State Contract C99000428 for this equipment.

In addition to the IBM servers, hardware and data migration services will be required to connect the new systems to the EMC Storage Area Network and migrate the data to the servers. This phase of the project has increased the scope of work and cost required to meet the business objectives of the upgrade. Mr. Huber advised that his nephew works for IBM with the education and state contracts. Mr. Huber wanted to disclose this information but was not aware of whether his nephew has anything to do with this particular contract. This phase of the project will be bid separately and is estimated at \$80,000. Ms. Welsh moved to award a contract to replace these systems with updated technology for an amount of \$175,441 and to increase the capital budget from \$200,000 to \$255,441 to cover the cost for the hardware, installation services, Storage Area Network connectivity and data migration. Mr. Martin seconded, and the motion carried.

Contract Awarded for Community Development Block Grant, Phase I

This project is a part of the Bullitt County Water Improvement Program. We have received a Community Development Block Grant (CDBG) in the amount of \$994,000 for extension of 26 miles of 8, 6 and 4-inch water mains in low to moderate income households of KTWD #2 and a Kentucky Infrastructure Authority (KIA) grant for \$206,500 for two routes on this project, Foley Rd and Ironwood Trail.

A total of four bids were opened on December 17, 2003 on the original bidding of the CDBG project. The apparent low bid was withdrawn and one bid was disqualified. The second low bid was 49% higher than the engineer's estimate. As a result, all bids were rejected and a value engineering analysis was conducted. Staff recommended splitting the project into three separate phases that would be bid separately to allow smaller contractors to bid on the individual project phases. Staff also recommended a series of value engineering modifications to the plans in an effort to reduce the project costs. The bid tabulation

presented is the result of re-bidding the first of the three CDBG projects. The remaining two phases will be bid this summer.

A total of two bids were received and opened from pre-qualified contractors. Southern Pipeline Construction submitted the lowest responsive bid in the amount of \$873,000. Alternate bids were submitted for the extension of 6-inch and 4-inch water mains on Slate Bluff Trail (a two-thirds majority petition has been received), which is contiguous to the CDBG routes but is not a part of the CDBG grant. Southern Pipeline Construction submitted a proposed Alternate Bid in the amount of \$27,774, which is below the engineer's estimate of \$34,100. Therefore, Slate Bluff Trail is recommended by staff for inclusion in the project resulting in a total project construction cost of \$900,774. The base bid is 6.6% higher than the Project Manager's estimate. The resulting total unit cost for this project is \$34.58/LF. This amount is consistent with other water main extension projects of this difficulty and scope. Dr. Wise moved to authorize the Vice President of Serving Customers & Business Development to establish a revised \$1,172,304 project budget of record for the CDBG Project Phase I and to award a contract in the amount of \$900,774 to Southern Pipeline Construction to install the water facilities associated with this project. Mr. Martin seconded, and the motion carried.

Contract Awarded for 04-26: Restoration and Construction of Asphalt and Concrete Paved Surfaces

A total of three bids were submitted with the lowest, most responsive bid from Stoll Construction & Paving, Co., Inc. for an estimated two-year total of \$1,253,060. This bid represents an approximate 13% decrease in unit prices from the previous bid two years ago. Mr. Conner moved to authorize the Process Owner, Procurement of Goods and Services, to award a two-year contract totaling an estimated \$1,253,060 to Stoll Construction & Paving Co., Inc. Ms. Welsh seconded, and the motion carried. Mr. Huber advised that we have been and will continue to evaluate whether it makes the best business sense to outsource this work rather than do it in-house.

Contract Awarded for 03-661 Chapeze Lane – 16-inch Transmission Main Project

A total of seven bids were submitted to supply and install 3,860 feet of 16-inch Pressure Class 350 ductile iron pipe along Chapeze Lane. The project will also include the supply and installation of 435 feet of 30-inch steel casing for the crossing of Interstate 65 and Highway 3219. Southern Pipeline Construction Company submitted the lowest responsive bid in the amount of \$448,000 resulting in a total project cost of \$517,032. The low bid is approximately 52% over the Project Manager's Estimate, and the resulting total unit cost for this project is \$133.95/LF. Although the low bid was considerably higher than the Project Manager's estimate, the bid sequence was very competitive with the four lowest bidders within 9% of the low bid. It appears that the volume of rock removal and the boring beneath I-65 are the major contributors to the high bids. The resulting unit price is consistent with the unit prices received for previous transmission main projects of this scope and magnitude. Dr. Wise moved to authorize the Vice President, Serving Customers & Business Development, to set a project budget in the amount of \$517,032 and award a contract in the amount of \$ 448,000 to Southern Pipeline Construction Company to install the water facilities associated with this project. Mr. Conner seconded, and the motion carried.

Board Advised of Mayor's Appointment and Reappointment of Board Members

Mr. Huber advised the Mayor has reappointed Wendy Welsh to a third term on the Board of Water Works. The Mayor has appointed Margaret Harris to the Board of Water Works. Ms. Harris will replace long-serving Board Member, Phillip Bond. Both Ms. Welsh's and Ms. Harris' terms expire April 30, 2008.

Report Given Regarding Accounts Receivable Balance

Mr. Miller provided this report. At the Board of Water Works meeting on May 11th, it was noted that the April 2004 balance for Accounts Receivable-Water of \$4,308,509 was \$1,108,411 or 34.6% higher than the April 2003 Balance and an explanation of the increase was requested. Staff has analyzed the water revenue and ending accounts receivable balances dating back to the beginning of 2002 and has determined the following: April is our lowest sales month each year and likewise, has the lowest accounts receivable balance each year; the balance of Accounts Receivable-Water for April 2003 was the lowest level of accounts receivable for the past 28 months; the balance of Accounts Receivable-Water for April 2004 was closer to the mean for the past 28 months and represented 16.9 average days of revenue; the month-to-month variance for the Average Collection Period is within expected control limits; and finally, on average, customers pay their water bill between 1.3 days and 7.5 days before the late payment penalty date (21 days after the billing date), when a 5% penalty is added to their bill. In summary, the increase in Accounts Receivable-Water from April 2003 to April 2004 was due to normal variation. The accounts receivable balance for April 2003 was unusually low, but within the expected range. Mr. Martin commented that the report was excellent and was presented well.

Report Provided Regarding Changes to Planning Assumptions in Ten Year Financial Plan

Mr. Miller provided the Board a report regarding the Ten Year Financial Plan. Louisville Water Company prepares a ten year proforma income statement and financial plan in conjunction with the long range Facilities Plan. The proforma income statement and financial plan are updated each year during the development of the annual budget. During the time since the ten year financial plan was last updated in October 2003, there have been significant changes to the assumptions upon which the plan was based: (1) water Sales were expected to increase by one-half of one percent annually over the planning horizon. It now appears that water sales will be flat to slightly decreasing over the next ten years; (2) expenses were expected to increase by three percent annually over the planning horizon and cost reductions have been implemented to reduce our long term cost structure, but materials and insurance expenses are increasing at a significantly higher rate; (3) Capital Project Budgets have increased by \$12,725,000 during January 2003 through June 2004 as a result of changes in the scopes of several large projects and all of these changes were reviewed in a list compiled by Mr. Miller; (4) deposits to the Infrastructure Replacement Reserve are \$5,425,000 below amounts contemplated in the 2003 and 2004 Annual Budgets; (5) the availability of return-on-equity information for investor-owned utilities has been reduced as a result of buy-outs by foreign corporations, and the standard reporting format for municipally-owned utilities has been revised; and (6) the advanced buyout of Developer Financed Refunding Contracts will be approximately \$4,300,000 if all developers accept the buyout offer.

As a result of these changes, it will be necessary to update the ten year financial plan in advance of the development of the annual budget. Mr. Miller advised that we will need to do a borrowing in the near future and he will be looking for an analyst to assist with that. Mr. Martin agreed that we need to get the right experts reviewing the right data and providing us advice on the plan. Staff anticipates that a revised financial plan will be available for consideration at the August 2004 Board meeting.

Change in Scope Approved for Crescent Hill Reservoir Improvements, Phase III

This project is being implemented in three separate phases: Phase A includes installation of security fencing at the Reservoir and LWC property boundaries north of Frankfort Avenue; Phase B includes improvements to the concrete sidewalk and lighting; and Phase C will address improvements to the Gatehouse. Phases A and B are in progress, with Phase C to be defined and designed for bid later this year. Under Phase A, fencing installation is approximately 45 percent complete and is projected to meet the July 31 completion date. Work on Phase B is underway, with demolition of the existing concrete surfaces ahead of schedule, and the project is also expected to be complete by July 31. As fencing

installation has progressed, several modifications to the work have been required. These include changes to the fencing materials and vegetation removal. Dr. Wise asked whether there were any permanent structures in the fence line and Mr. Heitzman advised there are not. Dr. Wise moved to authorize the Chief Engineer to increase the value of contract #G532 with T&C Contracting 10.2 percent, from \$401,000 to \$441,954 to complete security fence installation at the Crescent Hill Reservoir and LWC property north of Frankfort Avenue, and establish a new project budget of \$1,181,664. Ms. Welsh seconded, and the motion carried.

Change in Scope Approved for B.E. Payne Water Treatment Plant Expansion

The scope of work on this \$20.5 million project includes expanding the plant capacity to 60 million gallons per day. Major work elements include: a new electrical building and switchgear; installation of a standby power generator; additional pumping capacity; rebuilding filtration systems to provide high-rate filtration, air-water backwash, and filter-to-waste; and adding a second discharge header and pressure surge relief systems to distribute flow and protect the pumping and piping infrastructure.

Construction is approximately 60 percent complete. The construction contract allows 18 months for construction completion. At this point, the contractor is behind schedule and has requested a time extension to complete the work. The Company is considering adding nine months to the project schedule for a projected completion date of June 2005. The construction delays have been caused by disagreement between the contractor and the Company's engineer (CDM Engineers) regarding approvals for electrical equipment, delivery, installation, and testing. Judy Construction disagreed with specification regarding equipment in the contract. Specifically, it wanted to put in a more elaborate electrical system but our consulting engineering firm recommended against that and specified a system they felt was much suitable for our needs. The other reason for being behind schedule is that work on filters and critical piping is not allowed during peak summer demand periods (June through September).

The project budget and construction contract are \$20,500,000 and \$14,769,180 respectively. Approved change orders to date total \$84,574, representing 0.6 percent of the original contract value. Mr. Heitzman reviewed the change orders with the Board. Pending change orders for modifications to the electrical and instrumentation systems, pump motor wiring, SCADA monitoring, filter-to-waste piping, duct work in the generator building, block and curtain wall between the transformers and the electrical building, window panels, and painting total \$161,101. The total of change actions 1 and 2 is \$245,675 or 1.7 percent of the original contract value. Of this amount \$17,053 will be reimbursed to LWC from project consultant CDM Engineers (or their sub-consultant United Construction) for an error in specifying and approving the new window system. Ms. Willis moved to authorize the Chief Engineer to increase the value of contract #G167 with Judy Construction Company by \$245,675, from \$14,769,180 to \$15,014,855. Mr. Johnstone asked whether we would still be doing this project if we had been in the same financial condition we are in now at the time it was started. Mr. Huber emphasized that this plant is extremely important because our load has shifted to the east end and this plant supplies the east end, so he responded that we would be doing the project. Mr. Conner seconded, and the motion carried. Dr. Wise abstained from this vote.

Change in Scope Approved for B.E. Payne Water Treatment Plant Expansion Consultant Contract

The original consultant proposal depicted construction services over an 18-month schedule and included funds for contract administration as a percentage of the conceptual construction cost estimate. Several tasks have required more extensive oversight than the amount estimated by the consultant, resulting in an increase in the budget for construction administration. The increase is attributed to extensive pumping

equipment submittal and factory performance reviews for compliance with contract specifications; and extensive electrical equipment submittal reviews for compliance with contract specifications.

The consultant engineer expenses through March 2004 total \$1,050,816 or 98 percent of the \$1,075,512 contract value. Additional construction administration remains to be performed through the original 18-month construction period to assure adequate construction oversight, plus the construction contract schedule is expected to be extended nine months into June 2005. Based on historical construction administration requirements and the anticipated construction contract extension, the value of the CDM contract is requested to be increased \$316,449 to complete outstanding tasks.

The project budget includes a total of \$2,194,198 for LWC staff and consulting engineer fees. LWC costs are under budget and projected to remain below budget. The proposed new consultant contract value of \$1,391,961 represents 8.6 percent of the construction budget, and 6.8 percent of the total project budget. Even with this change, the total engineering cost is well within acceptable benchmark control limits (i.e. 10%) for a project of this magnitude and complexity. Dr. Wise questioned why the contractor was not advised that he had to adhere to the specs. Mr. Heitzman advised that the contractor was advised emphatically that he had to adhere to the contract specifications and this began the delay when the contractor ceased work in response to that demand. This will be the basis for the liquidated damages. Mr. Conner moved to authorize the Chief Engineer to increase the value of professional engineering services contract #F517 with CDM Engineers \$316,449 to \$1,391,961. Ms. Willis seconded, and the motion carried. Dr. Wise abstained from this vote.

Issuance of Apportionment Warrants for Mitchell Hill Road: Existing Water Main to South 1,000 Feet

Ms. Welsh moved to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 2 benefited properties along Mitchell Hill Rd: Existing Water Main to South 1,000 ft in accordance with KRS. 96.265, as described.

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Mitchell Hill Rd: Existing Water Main to South 1,000 ft** main extension project authorized by Ordinance No. 26, Series 2002 of the Jefferson Fiscal Court, adopted on October 8, 2002 such warrants to be against two (2) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute the apportionment warrants with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Dr. Wise seconded, and the motion carried.

Issuance of Apportionment Warrants for Lonesome Hollow Road: Joyner Hill Road to dead end; Joyner Hill Road: Lonesome Hollow Road to east 1,600 Feet; and Tidwell Road: Lonesome Hollow Road to east 700 Feet.

Mr. Conner moved to adopt the attached resolution for the issuance of Apportionment Warrants and liens against 20 benefited properties along Lonesome Hollow Rd: Joyner Hill Rd to dead end; Joyner Hill Rd: Lonesome Hollow Rd to east 1,600 ft; Tidwell Rd: Lonesome Hollow Rd to east 700 ft in accordance with KRS. 96.265, as described.

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for the cost of **Lonesome Hollow Rd: Joyner Hill Rd to dead end; Joyner Hill Rd: Lonesome Hollow Rd to east 1,600 ft; Tidwell Rd: Lonesome Hollow Rd to east 700 ft** main extension project authorized by Ordinance No. 6, Series 2002 of the Jefferson Fiscal Court, adopted on February 12, 2002 such warrants to be against twenty (20) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, the apportionment warrants to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute the apportionment warrants with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Ms. Willis seconded, and the motion carried.

Final Design and Bid Authorized for Security Equipment

Of the original grant of \$115,000 in May 2002 from the United States Environmental Protection Agency, there are remaining unused funds because much of the work on the first two portions of the work was completed by staff, those being the vulnerability assessment and the emergency response plan. Therefore, the remaining unused funds from the USEPA grant are available to be applied to the security enhancements portion of the work which is just getting underway. LWC also received a pass-through grant from the Office of Homeland Security through the Commonwealth of Kentucky and facilitated by Metro Government in the amount of \$400,000 for the purchase, construction and implementation of surveillance and detection equipment for critical facilities. The equipment design and specifications by a consultant are to be funded under the EPA grant, and the actual purchase and installation of equipment will be funded under the broader Homeland Security grant. Ms. Welsh moved to authorize final design and bid of surveillance and detection equipment for critical facilities. Mr. Conner seconded, and the motion carried.

Bid Authorized for Production Facilities and Plant Waste Residuals Systems Improvement

This bid is a continuation of improvements approved in June 1999 for Crescent Hill and B. E. Payne Water Treatment Plants. The evaluation recommended \$22.5 million of improvements scheduled from 2002 through 2012. The concept of the work comprising the \$4.55 million budget was to construct two waste water storage tanks and pump stations at Crescent Hill and improve the Zorn lagoon. CH2M Hill has completed their final design for the Crescent Hill wash water tank. The original estimate for this portion of the work was budgeted at \$2.0 million. Extensive rock removal, equipment costs, construction material inflation, and scope additions have caused the final design estimate to increase to \$3.5 million. This project is critical to the Company for two reasons: through the ability to perform a series of filter backwashes to assure high water quality and assure regulatory compliance with management of plant waste residuals. The construction of a new one million gallon waste storage tank will improve filter backwash operations and provide a backup facility for operational flexibility. The additional storage and operating flexibility will also reduce the vulnerability of an emergency discharge to MSD's combined sewer system that may trigger a violation of the Clean Water Act. This project also includes installation of flow monitoring of all waste streams that will assist in managing overall plant water use and waste residuals.

The design and construction of a second wash water storage tank and pumps (99-416C) on Reservoir Avenue will be deferred. The \$2.0 million reservation for this work will be allocated to Project 99-416A/B. Further, staff recommends that CH2M Hill be directed to finalize design for upgrade of the Zorn lagoon as a temporary holding facility for discharge of plant waste residuals into the Ohio River under KPDES permit. The Zorn lagoon upgrade will allow the 24-inch waste water line to B. E. Payne lagoons to be taken out of service for cleaning operations. Cleaning is intended to remove suspected blockages and restore the pipeline capacity to 100 percent. This plan, along with the new MSD waste discharge permit, will defer (or eliminate) the need to invest in the second wash water storage tank and pump station on Reservoir Avenue. This strategy will, however, require a periodic allocation of O&M funding (every 3-5 years), to clean the 24-inch waste water line. Mr. Martin moved to revise the budget from \$3.5 million to \$4,125,000 and to proceed to advertise for Project 99-416A/B to construct the wash water tank and pump station, upgrade the Zorn lagoon and clean the 24-inch waste line. Mr. Conner seconded, and the motion carried.

Amendments Made to Services Rules and Regulations: 2.02.1 Tapping Fee Extension Method, Cost of Extension and 2.03.1 Refunding of Installation Cost Extension Method, Application

The Service Rules and Regulations for the *Tapping Fee Extension Method* and the *Refunding of Installation Cost Extension Method* currently require deposits for the estimated cost of the main extension to be made by certified or cashiers check or an irrevocable letter of credit from an institution on the Company's list of approved institutions.

Staff believes that it is no longer necessary to require a certified or cashiers check; instead, a personal or business check can be accepted since the check will clear or be returned before work on the main extension begins. Dr. Wise moved to amend the Service Rules 2.02.1 and 2.03.1, effective immediately, to reflect this change. Ms. Welsh seconded, and the motion carried.

Human Resource Information System

It has been determined that the existing Human Resource Information System does not meet current needs, is unsustainable for future business needs, and should be replaced. Mr. Miller reviewed the numerous issues we have that cause problems with our payroll. Management oversight and project teams have been established and a project plan and business justification has been developed for a Human Resource Information System that supports the LWC Strategic Plan objectives and tactics. An extensive benchmarking effort has been undertaken that has included meetings with local businesses and discussions with industry peers and vendors to determine the appropriate solution set for LWC. Staff reviewed mid-range providers such as Abra Suite from Best Software, Ultimate, ADP, and Ceridian as well as, high-end providers such as Oracle, PeopleSoft, and SAP. All of the organizations that participated in the benchmarking effort are using high-end Financial Information Systems and high-end Human Resources and Payroll applications that are integrated either through common software modules or database interfaces. These organizations have also implemented, or are in the process of implementing, employee self service functionality. Mr. Miller reviewed the pros and cons of high end versus low end systems.

As a result of the Benchmarking and Software Comparison efforts, staff recommends replacing the existing Human Resources/Payroll applications with an integrated, industry standard solution to meet the defined business requirements and mitigate the technical, operating, and business risks. Ms. Welsh inquired as to where we stand on our capital budget now, given that we have had a number of projects that have had increases in their capital budget. Mr. Huber advised that with everything recommended for approval today, our capital budget will be 9.8 million over. Mr. Johnstone advised that Metro Government has PeopleSoft and we may be able to piggyback on their contract. Ms. Welsh also advised

Oracle is trying to acquire PeopleSoft, and if this is successful, the support of PeopleSoft products into the future is a concern. Mr. Miller advised that this current request is only to approve authorization to bid, not approve a contract. Mr. Conner commented that this is a tough year already financially, and we are deferring other capital projects, so maybe we need to consider deferring this one as well. Mr. Miller and Susan Lehmann stressed that the aging payroll system is currently unsupported by Ceridian. They both stressed that this project has been deferred and further deferral will result in increased business risks. Mr. Heitzman commented that the Company did make a decision to defer the work order system, which had been on track for this year as well. Ms. Welsh moved to increase the Capital Budget for Project 10239: Human Resource Information and Payroll System to \$1.87 million, with a total five-year cost of ownership estimated at \$2.1 million, and to proceed with final design and solicitation of request for competitive negotiations for Project 10239: Human Resource Information and Payroll System. Mr. Conner seconded, and the motion carried.

Change of Scope Approved and Authorization to Bid and Proceed with Design Given for Crescent Hill Filter Plant North-South Filter Building Roof Replacement

The 2003 Capital Budget includes \$2.0 million for replacement of the slate roof on the 100-year-old North-South Filter Building at the Crescent Hill Filter Plant. This building houses 120 million gallons of filtration capacity. Consultant Roof Resources, Inc. was contracted to perform a comprehensive analysis of the 100-year building and slate roof. A report prepared by Consultant Roof Resources documents deterioration of the building elements, including: slate roof, dormers, windows, gutters, crestings, deck, rafters, trusses, and building walls. Mr. Heitzman provided photographs of the various roof problems. The consultant recommends corrective action to replace deteriorated roof and associated support elements and to rehabilitate concrete wall structures and surfaces. Implementation of this work will provide the required environment for filtration operations, extend the facility life, and retain the building's architectural features. The revised project budget to perform the comprehensive improvements to the facility total \$3.5 million. The original \$2.0 million budget did not include renovation of the concrete walls, windows, and roof sub-structure. Mr. Martin asked whether there is a risk that the roof may collapse. Mr. Heitzman advised that the structural engineer did not find any sign of imminent collapse. Mr. Conner said that there are historical and aesthetic reasons for replacing the roof with another slate roof, but given our financial condition, does not think this is the year to do it. Mr. Huber suggested we proceed with design only, which would amount to \$225,000, if we can proceed on the actual project within two years. Mr. Martin stated that we should include this in the next bond issue, which would occur within the next 12 months. Dr. Wise moved to establish a revised project budget for Project 03-638: Crescent Hill Filter Plant North-South Filter Building Renovation in the amount of \$3.5 million, and to proceed with engineering design. Ms. Welsh seconded, and the motion carried.

Mr. Huber advised that a special meeting may occur the Tuesday or Thursday of the last week of June and that he would contact Board members regarding their schedules. There being no further business to conduct, Mr. Huber recommended that the meeting adjourn at 3:15 p.m.

Respectfully submitted,

Barbara K. Dickens, Secretary to the Board of Water Works

**BOARD OF WATER WORKS
SPECIAL-CALLED MEETING MINUTES
JULY 20, 2004**

Board Members Present:

Mr. Stewart Conner
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise
Not Present:
Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development
Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

Visitors:

Ron Green, Director, Minority and Women Business Enterprises Program
Terry Woosley, Team Contracting of Sellersburg, Indiana

The Special-Called Meeting of the Board of Water Works was held on Tuesday, July 20 2004 in the Board Room of the Louisville Water Company. John Huber called the meeting to order at 12:36 p.m. This meeting was called to consider items scheduled for the July 13, 2004 Regular Meeting, which was cancelled due to lack of a quorum available for that date.

Committee Appointments

Due to the expiration of Phil Bond's term on the Board and the appointment of Margaret Harris to the Board, Mr. Huber recommended new Committee Appointments. Mr. Huber accepted nominations for a new member of the Audit Committee and a Chair of the Audit Committee. Mr. Huber recommended Ms. Wendy Welsh as Chairperson and Mr. Stewart Conner to serve on the Committee. Mr. Huber asked for any additional nominations. There were no others. Dr. Joseph Wise moved to approve Ms. Welsh as Chair and Mr. Conner as a member of the Audit Committee. Mr. Gerald Martin seconded, and the motion carried. Mr. Huber nominated Ms. Margaret Harris to the Public Affairs and Customer Satisfaction Committee. There were no other nominations. Ms. Welsh moved to approve Ms. Harris as a member of the Public Affairs and Customer Satisfaction Committee. Mr. Conner seconded, and the motion carried.

Consent Agenda Reviewed and Approved

There were no changes to the consent agenda and Ms. Willis made the motion to approve, seconded by Dr. Wise, and the motion carried.

The Regular Meeting minutes from June 8, 2004, as submitted with changes from the Board book version, were approved.

The List of Claims Paid in June 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

<u>Project</u>	<u>Contract</u>	<u>Project Name</u>	<u>Total Project Cost</u>	<u>LWC Cost</u>
10069	G768M	Smithfield Greene Condominiums	\$65,350.00	\$1,800.00
10118	G765M	English Station Professional Park Ph. I	\$20,080.00	
10119	G769M	Renaissance LS Phase I	\$59,420.00	\$10,000.00
10291	G762M	Hamilton Property-Beta Way Extension	\$68,750.00	
10340	G766M	Heritage Creek West Section 2	\$168,160.00	
10341	G767M	Heritage Creek East Section 7	\$10,580.00	
10383	G763M	Dorsey Village	\$55,200.00	
10392	G764M	Air Hydro Power 2550 Blankenbaker	\$56,900.00	\$17,000.00
10397	G771M	Woodhaven Place Section 2	\$79,360.00	\$19,900.00
10401	G775M	Wal-Mart Supercenter #5417	\$142,830.00	
10405	G772M	Hardwood Forest Subdivision Sec. 3	\$81,060.00	
10408	G773M	Lake Forest Section 51B	\$24,380.00	
10418	G761M	Oak Grove Estates Section 1	\$63,630.00	

10424	G770M	Autumn Trace Condominiums Phase I	\$42,070.00
10427	G774M	Gene Paulin Way	\$7,500.00

The Board received the report of Contracts less than \$100,000 as follows:

Procurement Of Professional Services

Professional Service	Internal Customer Satisfaction (ICS) Survey Deyta, Inc.	\$20,205
----------------------	--	----------

Administrative Report

Mr. Huber briefly discussed the issue of Corporate Governance. He advised that Mr. Martin, Mr. Conner and he met to discuss issues of corporate governance and that he subsequently reviewed issues with Rick Johnstone, on behalf of Mayor Jerry Abramson. Mr. Huber anticipates calling a Special-Called Board Meeting on August 5, 2004 to discuss this topic, if additional work on the subject can be completed in time. If it cannot, then the meeting would be held later in August. Mr. Huber advised that any other items he has are covered in the reports of other officers.

Financial Report

Mr. Miller presented the Financial Report. He reviewed the Statement of Revenues, Expenses, and Changes in Net Assets with budget and prior year comparisons for financial results through June 2004. The Reconciliation of Actual Results to the Revised Financial Plan shows progress towards meeting the revised net income and dividend targets for the year. Total Operating Revenues for June of \$8,732,019 were \$33,944 or 0.4% more than budgeted. YTD Total Operating Revenue of \$48,501,443 is \$1,474,517 or 3.0% less than budgeted, \$2,394,341 or 5.2% more than the same period in 2003, and \$194,100 more than the revised target amount for 2004. Operation and Maintenance Expenses for June of \$3,395,359 were \$419,464 or 11% less than budgeted. YTD Operation and Maintenance Expenses of \$21,082,488 is \$901,074 or 4.1% less than budgeted, \$561,951 or 2.6% less than 2003, and \$354,300 less than the revised target amount for 2004. Total Operating Expenses for June of \$5,428,098 were \$473,178 or 8% less than budgeted. YTD Total Operating Expenses of \$33,490,251 are \$1,290,538 or 3.7% less than budgeted, \$63,647 or .2% less than 2003, and \$546,700 less than the revised target amount for 2004. Net Operating Income for June of \$3,303,922 was \$507,123 or 18.1% more than budgeted. YTD Net Operating Income of \$15,011,192 is \$183,979 or 1.2% less than budgeted, \$2,457,989 or 19.6% more than 2003, and \$740,800 more than the revised target amount for 2004.. Total Net Non-Operating Expense for June of \$415,464 was \$59,614 or 16.8% more than budgeted. YTD Total Net Non-Operating Expense of \$2,892,190 is \$757,076 or 35.5% more than budgeted, \$703,077 or 32.1% more than 2003, and \$28,600 more than the revised target amount for 2004. Net Income Before Distribution s and Contributions for June of \$2,888,458 was \$447,509 or 18.3% more than budgeted. YTD Net Income of \$12,119,003 is \$941,055 or 7.2% less than budgeted, \$1,754,912 or 16.9% more than 2003, and \$712,200 more than the revised target amount for 2004. Capital Expenditures for the year are \$25,160,623 or 23.7% of the revised 2004 Capital budget of \$105,993,786.

Mr. Miller advised that the company recently provided offers to buy out the future payments for developer financed water main extension refunding contracts as previously authorized by the Board of Water Works. The computer application computing the buy out for all refunding contracts erroneously

counted fire services when computing the services eligible for refund. The contracts for water main installation specifically exclude fire services for the purpose of computing the refunds. This error affects 47 of the 621 buyout offers. He advised that we have rescinded and corrected the affected offers that had not yet been accepted. There were 18 offers that had been accepted before the error was detected. The amount of the overpayment was \$84,222 and we are working with the developers and contractors to have the overpayment returned. Mr. Miller reported that approximately \$12,000 of the \$84,000 that was overpaid has been repaid by developers.

Mr. Huber inquired as to whether contractors are submitting invoices timely. Mr. Miller stated that for the most part, they are submitting them timely. Mr. Miller advised that the favorable variance we have in Net Income can easily be reduced by additional rainy weather. Mr. Martin asked about our capital expenditures. He noted a significant drop in our Contributions In Aid in the last two months. He asked if those two things are tied together. Mr. Miller said that they could be connected. Mr. Huber advised it may be impacted by state contracts, but that we will look into this and report to the Board next month. In response to a question from Mr. Conner, Mr. Miller clarified that the non-operating expense was due to the early retirement costs. Mr. Huber advised, in response to a question from Mr. Martin, that this was not in the original budget.

The Financial Report was filed.

Operations and Engineering Report Filed

Mr. Heitzman presented the Operations and Engineering Report.

Production – The water production for June of 139.2 MGD was 3.8 percent above the June 2003 production of 134.1 MGD. The June production level nearly matched the 5-year June average production level of 140.1 MGD. The year-to-date production average of 121.7 MGD remains slightly below the 5-year average of 122.9 MGD. Higher pumping in June is attributed to a dryer June, with 3.75 inches of rain.

Distribution Water Quality – Staff collected 304 distribution water compliance samples in June. There was one positive coliform sample collected and the recheck samples were negative for coliform and E coli. There were 10 local boil water advisories issued related to main breaks. The 99 percent corporate goals for turbidity, chlorine, and bacteria were all achieved for the month of June.

Water Quality Complaints – Typically, LWC receives approximately one black water complaint from customers every month. A black water complaint is categorized as small particulate matter that settles in a glass of water, toilet bowl, sink, or pool. Upon investigation, the source of black water is often iron corrosion particles dislodged from pipe during hydrant flushing or a main break. During May and June, the number of black water complaints increased dramatically, with 12 complaints in May and 25 in June. Water Quality staff analyzed the water samples and determined the water had a high level of manganese, up to 40 parts per billion (ppb). Further investigation isolated the source to the Ferric Chloride chemical used in the coagulation treatment process at Crescent Hill. The Ohio River source water also has elevated manganese levels. This situation does not cause a problem with water quality compliance, but is a problem with customer satisfaction. We have reached a verbal agreement with Eagle Brook, our ferric chloride supplier, to reimburse us for costs associated with this problem up to \$10,000.

In response to the high manganese levels, a treatment strategy was developed and implemented to reduce manganese below 20 ppb in the finished water. Manganese does not pose a health threat, however it does present an aesthetic concern to customers. The federal EPA regulatory standard for manganese is 50 ppb. Best practice calls for finished water levels less than 20 ppb to avoid long-term discolored water and

customer complaints. Manganese is difficult to remove using conventional treatment methods. The process requires either micro filtration (such as membrane technology) or oxidation of the manganese to manganese dioxide that can be removed by either sedimentation or filtration. Staff performed chemical analysis to determine the optimal treatment method. On June 21, the free chlorine dosage was increased from 3.0 to 3.25 parts per million (ppm) to increase the oxidation potential of the water. On June 23, staff initiated a potassium permanganate chemical feed rate of 3 pounds per million gallons at the Zorn intake structure. After evaluation of the treatment results, a secondary permanganate feed was set up at the Crescent Hill coagulation effluent to optimize the oxidation process and reduce the dosage of permanganate. The feed rate was reduced to 0.2 pounds per million gallons. Through Wednesday, July 7, the treatment process has lowered the manganese levels to less than 20 ppb for finished water, and the customer complaints have reduced. Staff is working with the ferric chemical supplier Eaglebrook to improve the chemical quality and recover costs associated with the interim treatment strategy. The ferric chloride specification has also been updated to include a maximum manganese contaminant level for quality control. The increased chemical costs associated with the permanganate feed is estimated at \$5,000 for treatment through August 1, when the improved quality of ferric should be available from Eaglebrook Chemical. An exhibit of customer water quality complaints, including black water complaints is included for review.

Riverbank Infiltration Update – Since April 14, the River Bank Infiltration collector well at BE Payne plant has been out of service due to failure of the motors to operate the pumps. The constant speed RBI pump and motor was removed from service on June 9 due to excessive vibration. The pump has been completely disassembled, inspected, and is in good condition. There were some small items in need of repair, including the bearing inserts and impeller balancing. The motor had more extensive damage resulting in metal to metal contact and wear. Repairs are being made to bracket supports, upper and lower bearings, and the ratchet adapter assembly to stabilize the motor operation. Repairs will include new and re-machined parts. The variable speed RBI pump had electrical component failure in the variable frequency drive cabinet. The hardware was losing an electrical supply intermittently during operation. The damaged electrical component has been replaced. A wiring error was also found and corrected on the motor protection circuitry. Both units are planned to be back in service during the week of July 26. Estimated cost of repair is \$65,000.

Memorial Weekend Power Outage - On Sunday, May 30, there were two waves of storms that hit the Metro area, which caused many power outages. The first wave hit the area around 5:00 pm, but did not have any impact on operations. The second wave hit the Crescent Hill plant at 11:30 pm and caused power and phone outages at several pumping and storage facilities. Power supply was interrupted at Crescent Hill Treatment Plant, Zorn Pump Station, Frey's Hill Pump Station, Westport Pump Station, and Chamberlain Lane Pump Station. There was adequate storage on the system and therefore no customers were without water service. Following the event, staff conducted a follow up exercise to identify vulnerabilities in the power systems and develop recommendations. Staff will meet with representatives from LG&E to review the power supply and also consider a power system vulnerability assessment by outside consultant.

Memorial Weekend Storm Damage – The storm on May 30-31 damaged and brought down trees at various Company sites, including Claremont Avenue Jacobs School Road, Reservoir Avenue, Westgate Place, Westport pump station, Bardstown Road tank site, and Mitchell Hill tank site. A total of fourteen downed trees had to be removed and ten trees with damaged limbs had to be trimmed. The removal of the trees and trimming of tree limbs were outsourced to Creationist Tree Service for a total cost of \$7,240. Three additional downed/damaged trees at Reservoir Avenue were removed as part of the fencing capital project and the removal cost is \$2,285. Staff labor costs of approximately \$9,000 were incurred for the overall clean up. The total cost for the storm damage clean up is \$18,525. There was no structural or roof damage to Company facilities.

Pesticide Workshop in Prague – Dr. Jack Wang participated in a Pesticides Symposium held on June 4 in Prague, Czech Republic. This Symposium was sponsored by AwwaRF and the International Water Association's (IWA). The Symposium consisted of two components: a one-day public session and a two-day closed work session. The Symposium was attended by 50 international participants, including representatives from US EPA, USGS, and European water utilities. Nineteen presentations were given in the symposium, covering various topics including pesticide occurrence in water bodies, impact on water treatment, pesticide health effects and analytical methods. Dr. Wang presented the Company's experience on herbicide monitoring and treatment along the Ohio River.

Jefferson County Air Pollution Control District (JCAPCD) - LWC has been issued air permits by the Jefferson County Air Pollution Control District (JCAPCD) for the handling of various chemicals at the Crescent Hill and BE Payne treatment plants. The regulated chemicals are lime, soda ash, and carbon. The permits set limits on particulate emissions during chemical unloading operations and also require monthly documentation and inspections records. The JCAPCD inspected the CHFP and BEP facilities on June 8, 2004. The inspection focused primarily on equipment and recordkeeping associated with our air permits. There were no findings during the inspection and the JCAPCD inspector, Mr. Heil was impressed with the operations.

Billtown Road Area – 900 Pressure Zone Expansion: - On June 21, Infrastructure Planning and Distribution Operations executed a planned expansion of the 900 Pressure Zone in southeastern Jefferson County. The specific area is generally along Billtown Road, bounded by Watterson Trail on the north and Fairgrounds Road on the south. Although this area previously had water pressure that exceeds the regulatory requirement of 30 psi, the pressure was not adequate from a customer perspective. The purpose of the expansion was to increase water pressure for approximately 800 households in the area. As a result of the change, these customers realized an incremental increase in water pressure of approximately 30 psi. Following pressure zone expansion, there were nine main breaks caused by the increase in operating pressure. These mains will be reviewed for potential replacement with the annual main replacement program.

Annual Inventory Taken - LWC's annual inventory was conducted on June 18 and 19. The scope of the inventory included counting parts and materials at company facilities at Allmond Avenue, Middletown, Bullitt County, and also on Company trucks. Internal and external auditors participated to ensure the validity of the process. Results are being compiled and will be reported to the Board Audit Committee.

July 13, 2004 Storm – LWC lost power at both the B.E. Payne and Crescent Hill Plants, in addition to several tanks and pumping stations. We resumed power at both plants prior to initiating generator power, but we had to use generator power for several of our pumping stations. The PSC requires a Boil Water Advisory if a storage tank goes below a certain level, which occurred only at the Peaceful Valley tank in Bullitt County. Power was restored within the hour of the tank going empty and we refilled it. Power was restored everywhere by Friday, July 16th. LWC incurred costs of approximately \$20,000 for facility damage, overtime for employees and some clean-up costs.

Serving Customers and Business Development Report Filed

Ms. Teasley presented the Serving Customers Report.

Performance Measures – The June 2004 abandonment rate was 5.0% compared to 4.8% in May 2004, and 5.4% in June 2003. The call volume for the month, 37,664 calls, was at its highest level since October of 2003. The year-to-date abandonment rate is 4.6%. Bad debt for the month of June was

\$53,426 compared to \$62,625 in May 2004, and \$47,963 in June 2003. Bad debt is \$11,509 over budget for the month and \$20,446 over budget year-to-date.

Second Quarter 2004 Customer Satisfaction Results – Customer satisfaction dropped for the second quarter in a row and from the first quarter 2004 Total Customer Satisfaction Index (CSI) of 845 to 837. This eight point drop occurred primarily in the areas of customer service, information and price/value. Commercial non-service is the only segment of the index that increased during the second quarter. The year-to-date average for the Total CSI is 841 which is still slightly above the corporate Level I goal of 840. Customer satisfaction for the Service CSI decreased to 792 which is the lowest level experienced since the end of 2002. The year-to-date average for the Service CSI is 798.5 which exceeds the Level II goal for customer satisfaction for the Corporate Performance Award of 790. Satisfaction of these customers decreased in all areas except price/value.
