Home Builders Update - Staff of LWC met on June 18th with a small work group of representatives from the Home Builders Association of Louisville (HBAL). The work group met to address issues such as the current authorization process for new development projects to proceed, development of an optional service sleeve engineering standard for selected new developments, acceptance of water mains prior to filing of the new development's Record Plat, damage to LWC meter vaults and valve key tubes, frames and lids, status of the System Development Charge (SDC) Funds including the external audit, and discussion of the proposed new Refunding of Installation Cost Main Extension Contract. As established at the start, this work group will develop possible solutions and working procedures to be submitted to the full Land and Development Committee of HBAL for their advice and comment.

Mobile Dispatch Project Update - The Mobile Dispatch Project continues to progress. There have been 11 mobile users live on the system in the areas of Fire Hydrant Servicing, Meter Repair, and Vault Maintenance since early May 2004. The interface that provides the data exchange and automation of information and work flow between the Mobile Dispatch system and the Alliance e-CIS applications has been the most complex and difficult. In efforts to streamline the testing and go-live procedures, the Customer Service employees were split into two groups:

- 1) Customer Service Representatives that handle non-pay service orders, eight users and
 - 2) Customer Service Representatives that handle general service order work, eight users.
- Testing is nearing completion for both groups and go-live for Group 1 is proceeding the week of July 5. Go-live for Group 2 is targeted for the week of July 12 pending any further testing issues and go-live of Group 1. The two groups account for 16 of the 41 projected mobile users and the largest volume of service orders that will be processed by the system.

Viryanet and LWC staff continue to work on the development of the interfaces to link the Mobile Dispatch and LWC work order system for handling the First Run Response work of the Emergency Turners. This phase of the project has undergone initial testing and updates are being programmed by Viryanet for further testing. This group represents an additional 14 mobile users. It is anticipated that this phase will be in production in late July or early August.

GIS Project Update - The construction of the Automated Mapping/Facilities Management (AM/FM) System is in the final stages. All data have been delivered by the vendor (GRW Engineers, Inc.) and checked for quality. Staff are in the process of completing final data loading and testing of the system components prior to making the full system available to LWC personnel beginning in August 2004.

Public Information Initiatives - The Courier Journal published a "special report" this month on companies who store hazardous materials that could impact public health if released. LWC's Crescent Hill and B.E. Payne water treatment plants were both profiled because of chlorine storage. The article

explored alternatives to chlorine use and the safety measures in place to protect the public from an accidental release.

LWC's National Championship Tapping Team was featured in a full page report this month in the Courier Journal. The women's team won their third national title at the American Water Works Association Conference in Orlando, Florida. They set a new record and broke the two minute mark. The team also made guest appearances on WHAS-TV's Good Morning Kentuckiana.

LWC launched its new "Tap into Fitness" partnership with area health, nutrition and fitness professionals in June. A kick-off dinner introduced the educational venture to potential partners. Two schools will pilot the program this fall. It will teach good nutrition, the value of physical fitness and the impact of consumerism on health choices.

LWC hosted workshops for 75 area teachers utilizing our "Adventures in Water" curriculum. Teachers receive an overview of the material, participate in hands-on experiments and tour LWC treatment facilities. 97% of the evaluations were rated excellent. Another workshop is planned in August for Bullitt County teachers. Since the curriculum was rolled-out in 2002 over 700 teachers have participated in the program.

The report was filed.

Closed Session

At 1:07 p.m., Mr. Huber recommended the Board go into closed session pursuant to KRS 61.810(1)(c), to discuss proposed or pending litigation. Ms. Welsh moved that the Board go into closed session, Dr. Wise seconded, and the motion carried.

Open Session Resumed

Mr. Conner moved to return to Open Session, Ms. Willis seconded and the motion carried. The Board resumed open session at 1:42 p.m. There was no action coming out of closed session.

Public Affairs and Customer Satisfaction Committee Report Given

Ms. Willis provided a report of the Public Affairs and Customer Satisfaction Committee. The Committee discussed the proposed charter, which will be considered in an upcoming meeting. The Committee is considering whether to revamp the Pure Tap Program or keep it as is. It is a costly program.

Special Issue Regarding Condemnation of Easement for National Turnpike Project

Ms. Dickens briefed the Board on the necessity and basis for condemnation of this easement needed for the National Turnpike main extension project. The location of the facilities necessary for this critical project will be near the front of the property owner's property, abutting the public right of way. LWC has offered greater than Fair Market Value for the easement property, based on two independent appraisals, and also has offered to relocate the property owner's above-ground pool. Staff has negotiated property purchases for ninety-five percent of the needed properties. Negotiation regarding this easement is at an impasse due to the amount demanded by the property owner as consideration for the easement. Therefore, staff recommended the Board of Water Works condemn the easement to allow the project to move forward.

RESOLVED, that it is hereby determined that it is necessary that the Louisville Water Company obtain an easement on certain land located along National Turnpike in Jefferson County, Kentucky (such land being more particularly described in the Exhibit attached hereto) for the purpose of using such land for installing, connecting, constructing, operating, maintaining, reconnecting, repairing, removing, reconstructing, and/or enlarging one or more water mains and appurtenances in said strip of land, including the right of ingress and egress to and from said strip, such easement to be located as described in the Exhibits attached hereto and at the site and width indicated on the plat attached thereto, made a part hereof by reference, it being the Board of Water Works' determination that such land is needed from:

Laura L. Bailey 9705 National Turnpike Block 1051 Lot 45
Fairdale, KY 40118

and any or all other lawful owners of such properties, the need for such land being to allow the Louisville Water Company to use such land in fulfilling the public purpose of providing purified water to the residents of the Louisville/Jefferson County, Kentucky and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts to purchase the necessary easement have failed, to bring a condemnation action against the owner of such land.

Mr. Conner moved to adopt the resolution relating to the property owned by Laura L. Bailey, located at 9705 National Turnpike, Block 1051, Lot 45, Fairdale, KY 40118. Mr. Martin seconded, and the motion carried.

Contract Awarded for 04-95: National Turnpike 16-inch DIWM Extension

Mr. Huber advised that a change action listed in the agenda is related to this project and will be discussed together with the bid tabulation in order to ensure that the Board has a full understanding of the entire project.

PEH Engineers (PEH) has held a contract with Louisville Water Company (LWC) since October 2001 to provide engineering services for the development of plans and specifications for the National Turnpike/South Park Road Project. In December 2001 PEH entered into another contract for the development of plans and specifications for the Highway 1020 project. The project design efforts were combined, making the original value of these two contracts \$292,517.81. Design and construction of the Highway 1020 project was completed in July 2003. Final design of the National Turnpike/South Park Road project was completed in early June 2004, thus allowing for advertisement of this project on June 16, 2004. The total contract amount was again approved as a result of the need to redesign a portion of the main planned for South Park Road, making the total revised contract \$299,832.35. Design of these two projects has not progressed as smoothly as expected, and as a result, design fees of \$443,564, (\$151,047 in excess of the original contract amount) have been generated by the consultant (PEH). Negotiations conducted over the past few weeks with PEH have narrowed the actual overage attributable to design changes to \$53,849, which increases the final contract amount approximately 21% to \$353,681.35.

This project is to extend water mains to serve the Fairdale area. Seven bids were received to furnish and install 15,675 feet of 16-inch and 1,805 feet of 12-inch ductile iron water main, and 75 feet of 6-inch PVC water main, including all necessary valves and fittings. The project also includes the furnish and install of

106 feet of 30-inch steel casing for a railroad crossing, and 201 feet of 24-inch steel casing for a combined railroad - roadway crossing. T+C Contracting submitted the lowest responsive bid in the amount of \$1,549,000 resulting in a total project cost of \$2,064,005. The low bid is approximately 3% over the Project Manager's Estimate, and the overall unit cost is \$117.57/LF. Although the low bid was slightly higher than the Project Manager's estimate, the bid sequence was very competitive with the five lowest bidders within 10% of the lowest bid. The escalating cost of contractor-supplied ductile iron pipe and steel casing materials kept the bids at a higher level than expected. Dr. Wise moved to authorize the Vice President, Serving Customers & Business Development, to increase the contract with PEH Engineers to \$353,681.35 to complete design of the referenced transmission main project. Ms. Willis seconded, and the motion carried. Ms. Welsh moved to authorize Vice President, Serving Customers & Business Development, to award a contract in the amount of \$1,549,000 to T+C Contracting to install the water facilities associated with this project. This action establishes a \$2,125,170 revised project budget of record for engineering and construction. Dr. Wise seconded, and the motion carried.

Bid Approval Tabled for 10294: Montana Avenue Main Replacement Project

This project is to install 15,610 feet of 6", 8", and 12-inch Pressure Class 350 ductile iron pipe in the Montana Avenue Area located northeast of Churchill Downs. This project piloted the use of the new MBE/WBE sub-contractor utilization program at LWC. Tom Brown Construction Company submitted the lowest responsive bid in the amount of \$994,265 resulting in a total project cost of \$1,428,265. The low bid is approximately 14% under the Project Manager's estimate. The overall unit cost is \$ 91.50/lf. This value is consistent with the unit prices received for MRRP projects in similar areas. Tom Brown Construction's participation was 5% for WBEs and 5% for MBEs. Dr. Wise asked if this meant they met the Disadvantaged Business Enterprises (DBEs) percentage. Ron Green, M/WBE Program Manager, advised we do not use a 10% DBE calculation, but consider the minimum participation levels separately. Mr. Brown submitted a MBE quote to satisfy the Good Faith Effort requirement, but did not use the minority subcontractor. Rather, Mr. Brown accepted a lower subcontractor quote three days after the minority quote, but still prior to our bid date. Ms. Willis inquired about the second lowest bidder's minority participation. Mr. Green advised it was 15% each for MBEs and WBEs. Dr. Wise advised he wanted staff to further explore the details of this bid and the bidder's Good Faith Effort and moved to table this bid until the next board meeting to allow staff an opportunity to do further investigation. Mr. Conner seconded, and the motion carried.

Contract Awarded for 04-41: Copper Tubing

Copper tubing is used throughout the distribution system in the installation, renewal and repair of domestic service lines. Viking Supply Co. submitted the lowest, most responsive bid for a four-month total of \$106,934. This bid represents an approximate 4.67% increase in unit prices from the previous bid six months ago. Mr. Conner moved to authorize the Process Owner, Procurement of Goods and Services, to award a four-month contract totaling \$106,934 to Viking Supply Company. Ms. Willis seconded, and the motion carried.

Contract Renewed for E-872: Construction Inspection and Technician Services – 4th and Final Renewal

In July 2000, the Board of Water Works approved a professional service contract with Quest Engineers, Inc. to provide Construction Inspection and Technician Services, including supplementing existing LWC in house inspector forces with Quest personnel, for the Constructing Capital Improvements Processes. These services provide quality assurance and insure adherence to LWC Standard Technical Specifications for work permitted by its pre-approved contractor workforce. This proposed renewal is the fourth and final renewal per the contract and will utilize three Inspector I positions and four Inspector II positions.

The proposed contract amount of a not-to-exceed amount of \$555,401 represents a 1.8% increase for the Inspector I and Inspector II hourly rate, an increase of 1 cent per mile for mileage reimbursement and no increase for equipment rates. This proposed increase is less than the current CPI that is allowed by the contract. This is an increase of four Inspector II positions from the previous year to maintain adequate inspection coverage with the retirement of five Inspectors in January of this year. Mr. Huber advised that Quest has primarily utilized former LWC employees for the inspector positions. Mr. Martin asked whether utilizing independent contractors costs LWC more than it would to hire them. Mr. Heitzman advised that the cost is fairly even in the end because the company has a variable need for these inspectors. Therefore, it is better to have them through a contract than to have them on staff because they do not work every day. Ms. Willis moved to authorize the Vice-President of Serving Customers and Business Development to renew the existing professional service contract for Construction Inspection and Technician Services with Quest Engineers a fourth year for the not-to-exceed amount of \$555,401. Ms. Welsh seconded, and the motion carried.

Contract Awarded for 03-607: Westport Road Transfer Station Hydraulic Surge Tank

LWC plans to install a hydraulic surge tank at the Westport Road Transfer Station for the purpose of providing protection to the pump station and piping infrastructure from high pressure waves created by an unplanned water supply interruption (power failure, pump failure, or main break). The apparent low bid is 10.9 percent above the engineer's estimate, prepared by consultant CH2M Hill, Inc. Comparison of the estimate to the apparent low bid indicates the difference lies in material costs, specifically steel, electrical, and piping materials. The engineering budget allocation has also been increased to \$44,000 for additional design expenses by staff and the consultant. Mr. Conner moved to authorize the Chief Engineer to award a contract in the amount of \$372,500 to MAC Construction and Excavating, Inc. for installation of a hydraulic surge tank at Westport Road Transfer Station. Ms. Willis seconded, and the motion carried.

Contracts Awarded for 04-42: Pipeline Design and Construction Engineering Consultant

LWC is moving toward outsourcing professional services and uses these consultants for engineering design, surveying, easement acquisition, and contract administration of various size distribution water mains (4" to 12"), water storage facilities, and pumping facilities to be installed throughout the LWC Distribution System in Jefferson, Bullitt, and Oldham counties. Mr. Heitzman summarized our procurement process for professional service contracts. We are moving to getting a pool of qualified consultants. Dr. Wise asked whether we use the same percentage for evaluating the M/WBE efforts in this situation, and Ms. Teasley advised that we do. However, at this stage, we were simply asking these consultants to commit to attempt to achieve the 15% MBE and 5% WBE goals. Dr. Wise inquired as to whether we want to give greater weight to those who meet goals. Mr. Heitzman advised that the evaluated bid program did give greater weight if the percentages were met, but that program was abandoned. For this Request for Proposals, nine engineering consultant firms submitted proposals. A team of LWC engineering staff evaluated the technical proposals and cost proposals. The MBE/WBE Program Manager evaluated the "Good Faith Effort" portion of the submittals. One firm was disqualified for failing to make a Good Faith Effort.

Based upon the evaluations, staff recommends that LWC retain the engineering consulting services of O'Brien & Gere, Qk4, and Quest, with the award of three professional service contracts renewable up to four years. Dr. Wise moved to authorize the Vice President, Serving Customers and Business Development, to execute these unit-price cost contracts. Individual design projects exceeding \$100,000 will be submitted to the Board of Water Works for approval and those exceeding \$20,000 will be submitted to the President for approval. Ms. Welsh seconded, and the motion carried.

Contract Awarded for 03-638: Crescent Hill Filter Plant North-South Building Renovations

During the June Board meeting, the Board authorized staff to initiate the project design for the renovation of the North-South Filter Building at the Crescent Hill Filter Plant. The 100-year old North-South Filter Building has significant deterioration of the slate roof, gutters, concrete wall surfaces, and windows. A Preliminary Engineering Report prepared by consultant Roof Resources, Inc. recommends a phased approach for corrective measures at an estimated project cost of \$3.5 million. A proposal was solicited from Roof Resources, Inc. (CWBE). A not-to-exceed cost of \$235,540 has been negotiated for engineering and architectural design, bidding services, construction administration, and construction inspection services. This proposed contract value of \$235,540 plus the \$53,753 expended for the Preliminary Engineering Report, represents 8.3 percent of the proposed project budget of \$3.5 million. Dr. Wise moved to authorize the Chief Engineer to award a professional services contract to Roof Resources, Inc. in the amount of \$235,540 for engineering and architectural design, bidding services, construction services, and construction inspection for the Crescent Hill Filter Plant North-South Filter Building Renovation. Mr. Conner seconded. Mr. Martin asked whether this will be added to the capital budget. Mr. Heitzman advised it will be placed in a suspense account for up to two years, under current accounting rules, during which time if the project is started, it would be added to the capital program. A vote was taken and the motion carried.

Report Given Regarding Minority and Women Business Enterprises Program

Ron Green, Director of Minority and Women Business Enterprises Program, reported regarding the status of this program. Mr. Green provided the Board a summary of his relevant work experience before joining LWC recently. The Company has recently transitioned our Minority and Women Owned Business Enterprises Development Program from an "evaluated bid" approach to a "good faith efforts" approach. This new approach has now been piloted on two recent projects that are being considered this month by the Board of Water Works. Mr. Green reviewed the company's M/WBE participation goals. He advised we normally exceed goals for WBE and are still working to increase MBE participation. We plan activities to bring together prime contractors and M/WBE subcontractors. We are also trying to attract new MBEs to Louisville. We educate the prime and subcontractors about the need for minority and women business enterprise participations. Mr. Green presented the total spending plan for M/WBEs. Mr. Green advised a 9% goal for this year will put us back on track to achieve a 15% goal by 2007. The current requirements for contractors are that they make an effort to have MBEs and WBEs as subcontractors. This must be demonstrated by contacts and receiving quotes. Mr. Green discussed certification as a MBE or WBE and various entities we recognize as certifiers. Since we have now piloted this new program on two projects, we will review the results, make changes, roll it out to include all capital projects in the 4th quarter of 2004 and out to include goods and service purchases in the 1st quarter of 2005.

Report given regarding the Methodology for Revisions to Planning Assumptions in Ten Year Financial Plan

Staff has begun the review and analysis for updating the ten year proforma income statement and financial plan. The methodology that will be used to revise the key assumptions upon which the plan is constructed will take into consideration: Water Sales Forecast, the Return on Investment and Dividend Growth, the Infrastructure Replacement Reserve, the Rate Equalization and Risk Mitigation Reserve, and the Capital Projects Budget. Staff anticipates that a preliminary draft update to the ten year financial plan will be available for consideration at the August 2004 Board meeting. Mr. Miller is talking to many different financial advisors. Mr. Martin expressed his concerns about establishing more reserves rather than management making budget decisions. Mr. Martin also stated that any financial advisor needs to be making recommendations based on the same assumptions. He feels we need the Mayor's input on this

issue. He requested that Mr. Miller make the RFP for the financial advisor available for review by any Board member that wishes to review it.

Change Action Approved for Watson Lane 16" and Orell Road 12" Grid Tie Project

The original professional service contract with Gresham Smith and Partners for design and inspection of this project was \$83,242 and was later increased to \$94,844.60 to compensate for additional design costs. Construction of the project is now essentially complete. GSP originally estimated a total of 250 hours for construction inspection services. As requested by Staff, this estimate was prepared prior to development of final construction plans and specifications and award of contract. The construction contract was awarded to DF Crane, a relatively new contractor with LWC. The contractor encountered difficult soil conditions and sewer connections that had not been anticipated. As a result of these site conditions, the Consultant spent a total of 770 hours on construction inspection and these additional hours have been verified. The proposed change exceeds the currently approved contract amount (\$94,844.60) by 24 %. Impact to the overall project budget is 12.3 %. Dr. Wise moved to authorize the Vice President, Serving Customers and Business Development to increase the contract with Gresham Smith and Partners to \$117,658.79, and to increase the project budget of record to \$827,585.86 to complete and close out this project. Ms. Willis seconded, and the motion carried.

Change in Scope Approved and Request to Proceed with Advertisement for Bid Granted for Bearcamp Road Booster Pump Station

The 2001 Capital Budget includes a project to install a booster pump station in the southwest area of Jefferson County to supply customers along Bearcamp Road. Water service is now available to this area by installation of 13,000 linear feet of 8" water main in Bearcamp Road under the County-wide Expansion Program. The main serves portions of southwestern Jefferson County and ties into northwestern Bullitt County. Several properties are at elevations that cannot be served by the hydraulic grade available from the 660 pressure zone. This project will install a dual-purpose booster pump station to provide domestic flow and pressure under normal system operating conditions, and fire flow under high demand conditions. The original project budget for the proposed work was \$150,000; a revised budget of \$175,000 is requested due to construction market inflation since the original budget of 2001, easement acquisition expenses, and scope revisions to satisfy the unique domestic and fire demand supply. Ms. Conner moved to increase the budget of Project 01-700: Bearcamp Road Booster Pump Station from \$150,000 to \$175,000, and to proceed with advertisement for bid for the project. Ms. Welsh seconded, and the motion carried (Mr. Martin was not present during this vote, but rejoined the Board immediately thereafter).

Bullitt County Water Improvement Program – Bullitt County Extension Program

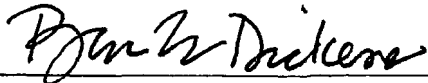

Proposed in the 2004 Capital Budget are funds for construction of a water main extension project on Licksillet Drive, West Indian Stone Road, Big Springs Drive, West Big Country Road, East Big Country Road, East Indian Stone Road and Thunder Road. Petitions have been received from a 2/3 majority of the residents along these roads. The project will provide water service and fire flow to a total of 82 customers along the roads. The budget for the proposed project is \$775,500. The source of funding for this project is 82 customer connection fees of \$5,450 for \$446,900 with the balance of \$328,600 funded from the Bullitt County Water Reserve. Ms. Welsh moved to authorize engineering design and advertisement for bid for this project. Ms. Willis seconded, and the motion carried.

Mr. Martin raised his concern that the Board was not able to meet last week due to a lack of a quorum. He asked other board members to look at all the dates for the remaining board meetings and advise at the next

meeting if there are any known conflicts so that any meeting that needs to be rescheduled can be rescheduled well in advance.

There being no further business to conduct, Mr. Huber recommended that the meeting adjourn at 3:02 p.m.

Respectfully submitted,

Barbara K. Dickens, Secretary to the Board of Water Works

**BOARD OF WATER WORKS
SPECIAL-CALLED MEETING MINUTES
AUGUST 5, 2004**

Board Members Present:

Mr. Stewart Conner

Mr. Gerald Martin

Ms. Wendy Welsh

Ms. Marita Willis

Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Ms. Margaret Harris

Others Present:

Mr. John Huber, President

Ms. Barbara Dickens, Vice President, General Counsel and Secretary

Mr. Robert Miller, Vice President, Treasurer

Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development

Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

Mr. Vince Guenther, Process Owner, Providing Governmental Relations

The Special-Called Meeting of the Board of Water Works was held on Thursday, August 5, 2004 in the Board Room of the Louisville Water Company. Mr. Huber called the meeting to order at 12:33 p.m. Mr. Huber discussed the issue raised by Gerald Martin at the last Board meeting regarding having a quorum present for the meeting. He asked that board members advise him regarding their availability of upcoming regular board meetings.

Corporate Governance Issues Discussed

Mr. Huber stated that a pressing issue for the BOWW is the issue of governance and whether, in light of regulatory changes and best practices, the BOWW should consider any changes to its structure and governing practices.

Barbara Dickens reviewed what laws define the BOWW by summarizing the content of the state charter, statutes, local ordinances, and By Laws that govern the BOWW and the Louisville Water Company as two separate entities. Ms. Dickens advised that the Louisville Water Company was created by Charter in 1854, and the charter was amended 7 times until 1890. An act of the legislature is needed to amend the charter. The Board of Water Works is created and defined by statute, KRS Chapter 96. Although normally any change to a Kentucky state statute would require an act of the legislature, there is a law, referred to as the Home Rule statute, KRS 83.520, which makes all of Chapter 96 permissive to the extent that any local ordinance conflicts with any provision of Chapter 96 and the state statute does not specifically prohibit the conflicting provision. We have local ordinances that pertain to the Board of Water Works. These local ordinances are City of Louisville ordinances. All city and county ordinances are in effect for five years after merger and sunset at that time if not re-adopted by Metro Government. Local ordinances have to be amended by a vote of the Metro Council. Finally, the company has its own By Laws, which set forth duties and responsibilities of officers and conduct of meetings. By Laws may be amended by majority vote of the full Board at any meeting.

Ms. Dickens advised that we believe that there are many significant controls in place to provide transparency, accountability and integrity in the governance of the Louisville Water Company. However, in light of the Sarbanes–Oxley Act of 2002, we feel it is appropriate to reconsider some governance issues. Sarbanes- Oxley Act of 2002 is an act that was passed by Congress to ensure accountability. While LWC is not required to comply with Sarbanes-Oxley, the standards set forth by the Act have grown to be considered best practice in the corporate world. Specifically, Title III and IV provide valuable guidance to LWC on corporate responsibility and enhanced financial disclosures and should be given consideration. The aspects of the Act which may be considered by the BOWW include:

- The necessity to have truly independent directors
 - Making independent decisions by holding executive sessions regularly and having independent nominating and compensation committees
 - Adopting corporate governance guidelines that address matters such as director qualifications, responsibilities and compensation and performance of the board
 - Having a Code of Ethics for board members
 - Making information regarding governance available to the public.
- These are just some of the considerations that should be weighed regarding corporate governance in order to adopt best practices that will enhance the public confidence and trust in the company and the BOWW.

Mr. Huber emphasized that LWC and BOWW are two different entities. He further reiterated that the local ordinances can in effect change state law according to the KRS 83.520 because that statute makes all of KRS Chapter 96 permissive in situations where a local ordinance is enacted to change the particular rule in state law and state law has not specifically prohibited that change. Dr. Joseph Wise asked whether we need to have the local ordinances approved by the new metro government and if the Code of Ethics BOWW members sign when appointed by the Mayor is sufficient to cover them. Ms. Dickens advised in the affirmative to both questions, and further stated that the local ordinances are being reviewed currently to take as a package to the Metro Council for approval.

Mr. Huber discussed the governance goals. Mr. Martin stated aligning the interests of the stockholder and the customers and balancing the short-term and long-term needs of the organization are key for the BOWW. Mr. Huber asked if anyone had anything to add to the goals as stated; there were no additions.

Mr. Huber discussed the actions to be taken to achieve the goals. The first action step will be to create and implement an expanded orientation for board members. Vice President Susan Lehmann will be responsible for developing the orientation, identifying the major business risks, explaining the financial structure, and discussing key operational issues. Mr. Martin recommended tours of the major facilities.

The second action step is to review the BOWW’s obligations annually and get the Mayor’s perspective in a meeting that would be without management present. Mr. Conner noted that this systematizes the contact with the stockholder.

The third action step is to create an Executive Committee. After some discussion, it was decided that this committee would consist of the Board chairperson, two board members and the President and CEO. The Executive Committee will review material and make recommendations and, in some cases, approve some items in lieu of full board action. Mr. Conner commented that publicly-held companies have often used executive committees effectively, but that board

members need to be cognizant that all action, whether taken by executive committee or the full board, is the responsibility of the full board. Mr. Conner stated that he feels many items take significant time without adding valuable input due to the board's lack of technical knowledge or experience with construction or materials. Mr. Conner believes that using an executive committee can be effective, but whatever process we put in place must be consistently implemented. Mr. Martin stated his desire that the Board provide effective oversight based on some threshold. He expressed his concern that the consent agenda is not discussed in detail and that the BOWW may want to consider giving the President more power to deal with those items rather than the BOWW. Mr. Conner stated that the responsibility of a director on a board is to be reasonably informed, acting in good faith in the best interest of the stockholder. Mr. Martin inquired as to whether we can change what the BOWW considers. Wendy Welsh advised that it has been changed before in her tenure. Currently, Mr. Huber considers authorizations committing funds up to \$100,000 for procurement of contracts. Only certain items meet the criteria for the consent agenda. Dr. Wise pointed out that any board member can ask to have something pulled off the consent agenda for a full discussion by the board. Mr. Martin has a concern regarding the board reviewing the list of claims given its depth. Ms. Welsh stated that giving careful consideration to what the board has to approve and consider will enable the board to spend more time on the big picture and critical items such as the River Bank Filtration Project. Mr. Huber advised that staff will prepare a review of what ordinances and By-Laws need amending given the desire to have an executive committee. Dr. Wise commented that having an executive committee will remove some of the decision-making authority for board members not serving on the executive committee.

Mr. Martin suggested that the BOWW should consider meeting frequency. Mr. Conner commented that many publicly-held companies meet only quarterly, with the executive committee meeting in between the regular meetings. Rick Johnstone noted that having monthly full board meetings results in the board being more involved in day to day operations rather than as a policy-making, strategic role. Mr. Martin noted that board members have an obligation to read the materials presented to them and understand them or get clarification from staff in order to meet their obligation of being a good and productive board member. With regard to the Officers' Reports, Mr. Huber commented that these take a long time in board meetings, and everyone agreed that they should be streamlined.

Mr. Huber advised that the staff will recommend changes in what is presented for board approval. He advised that all these meetings will be subject to the Kentucky Open Meetings Act, according to a recent Attorney's General Opinion that held that even a meeting of a board-created subcommittee of public agency has to be open and notice has to be given if any public business is discussed and if there is a quorum of that committee present. If the meetings are established on certain regular dates, notice to the media can be given one time and then further notification of any changed meeting dates.

The fourth action to be taken is to create a Nominating committee. It was discussed that the Nominating Committee will nominate the person to serve as Board Chair and the person to serve as Vice-Chair and also the individuals to serve on particular committees. After the nominating committee presents a slate of officers, the full board will consider approval of the slate.

The fifth action involves separating the role of President and CEO from Board Chair. Rick Johnstone stated that the Mayor believes this represents best business practices and wants the BOWW to consider this in order to make itself more similar to other corporations. Mr. Johnstone commented that no other entities associated with local government have the structure we

currently have. All of them have these two roles separated. The Mayor also suggested, due to his tenure on the board which gives him a greater knowledge of how the LWC operates, Stewart Conner should be considered for the role of Board Chair. Although normally the Mayor wants individuals that he has appointed to serve no more than three terms and Mr. Conner is in his third term currently, it was suggested the Mayor would extend his nomination to the BOWW one additional term if the BOWW elected Mr. Conner as Chair.

The sixth action to consider is whether, in light of moving toward separation of the President and CEO role from the Chair role, the Board should have additional individuals serving on the Board. Mr. Martin believes that in principle this is a good recommendation and suggested that if pursued this should be the company's chief financial officer. Mr. Conner commented that this would mean this individual would take on additional fiscal responsibility without additional compensation, and noted that this individual, Mr. Miller, attends all board meetings anyway. It was determined to keep the board as presently constituted and reconsider this topic in the future.

The seventh action step concerns making sure that appropriate, independent decisions are made for the period in which one person services in the combined role of Board Chair and President and CEO. Mr. Huber stated that he would be diligent in this regard until the transition to separated roles.

Mr. Huber inquired as to whether any board members had any other action steps for management or the BOWW to consider. There were no others. Mr. Huber reviewed the issues which will be coming to the BOWW in the next few months. He noted that the company has achieved many of the goals in the strategic plan such as extending the system throughout the county, replacing or rehabilitating all water mains older than 1931, and expanding the customer base and sales territory. Our debt structure and performance benchmarks will be topics to be addressed through the remainder of 2004.

Mr. Miller reviewed the history of our financial condition over the past 13 years. He noted that our assets have doubled, yet we have borrowed only twice. While our debt has increased, our debt as a percent of our capital structure has not increased. We are looking at financial advisors to help us validate the financial benchmark information we have and use it in the best way to set our profit goal and financial plan. Mr. Huber advised we will be getting into this work by the fourth quarter of 2004. Mr. Martin stated that there needs to be some review of whether the return on equity target is calculated before or after deductions from the Infrastructure Replacement Reserve and other deductions. Mr. Johnstone discussed the Metro Government's experience with Public Financial Management (PFM), the firm that works with the local government. Mr. Martin inquired whether this firm has water industry expertise. Mr. Miller responded that they are a very large firm and have extensive water industry expertise. This is one of the firms Mr. Miller has been reviewing. Mr. Huber advised that he will ask a few board members to assist management in developing the recommendation for selection of a financial advisor.

Mr. Huber inquired as to whether there were any additional questions regarding corporate governance and whether board members wanted to consider these guidelines for adoption now or later. Wendy Welsh recommended the board wait and do it in conjunction with revision of By Laws and local ordinances. There was consensus among the board to handle the corporate governance issue in this manner.

Compensation Committee Charter Approved

Mr. Conner advised that the Compensation Committee had met and thoroughly discussed this proposed Charter, making appropriate changes.. He moved that it be adopted. Dr. Joseph Wise seconded, and the motion carried.

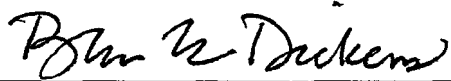

Public Affairs and Customer Satisfaction Committee Charter Approved

Ms. Marita Willis advised that this Charter has been thoroughly discussed by the Public Affairs and Customer Satisfaction Committee and moved that it be approved. Ms. Welsh seconded, and the motion carried.

Mr. Conner moved that the board go into executive session (open session without management present) to discuss corporate governance issues. Ms. Welsh seconded, and the motion carried.

There being no further business of the board, the meeting was adjourned at 2:22 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and
Secretary to the Board of Water Works

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
AUGUST 10, 2004**

Board Members Present:

Mr. Stewart Conner

Ms. Wendy Welsh

Ms. Marita Willis

Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Ms. Margaret Harris

Mr. Gerald Martin

Others Present:

Mr. John Huber, President

Ms. Barbara Dickens, Vice President, General Counsel and Secretary

Mr. Robert Miller, Vice President, Treasurer

Mr. Greg Heitzman, Vice President, Chief Engineer

Ms. Karla Teasley, Vice President, Serving Customers and Business Development

Ms. Susan Lehmann, Vice President, Human Resources and Organizational Development

Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

Barbara Crow, PO, Providing Strategic Communications

Visitors:

Terry Woosley, Team Contracting of Sellersburg, Indiana

The Regularly-scheduled Meeting of the Board of Water Works was held on Tuesday, August 10, 2004 in the Board Room of the Louisville Water Company. John Huber called the meeting to order at 12:40 p.m. As result of Board Member Wendy Welsh not being present due to a conflict at the beginning of the meeting, Mr. Huber advised the BOWW that he would take the agenda out of its usual order to provide all reports not needing BOWW action at the beginning, since there was not a quorum at that time.

Administrative Report

Mr. Huber advised that he had no additional information to report other than the information that will be included in the reports of other officers.

Financial Report

Mr. Miller reviewed financial strategies that have been implemented since the beginning of the year. In March 2004, we revised the Financial Plan to offset the 2003 dividend adjustment, the early retirement incentive program costs, lower industrial water sales, and unanticipated O&M costs. We did this by reducing O&M expenses and depreciation expenses and reducing funding to the Infrastructure Replacement Reserve. In May 2004, we lowered the estimates for residential and commercial water sales. A mid-year rate increase was considered at that time, but we settled on a further reduction of funding to the Infrastructure Replacement Reserve. Through June 2004, we were approximately \$700,000 ahead of our revised Financial Plan. Now, in early August, the financial results have considerably worsened. Lower sales in July eliminated most of that amount and with pumping down nine percent in July, the results for August and September will cause us to miss our revised earnings target and dividend target. It appears that our options are to consider an earlier rate increase, further cost reductions,

Regular BOWW Meeting Minutes

August 10, 2004

Page 1 of 11

or carryover of another dividend pre-payment into 2005. Mr. Miller advised he will have a better picture of our financial condition in order to determine the best course of action within the next month. Mr. Huber advised that two things have really affected where we are at this point: we had 50% more rain in July than normal and water sales are 15MG less than normal. Dr. Wise asked how this compared to Dr. Cerrito's forecast of water sales. Mr. Miller advised that she forecasted water sales would be down about \$300,000 below budget, but in fact we are actually \$500,000 below budget. Dr. Wise asked if we could have Dr. Cerrito develop a forecast that does not consider seasonality or low rain. He believes that if we can get that baseline, we will have a better idea of where to set prices. He commented that he'd like to eliminate the variability due to weather. Mr. Huber agreed, but said that weather is a large variable and this is precisely why staff is recommending we create a risk mitigation and rate stabilization fund to deal with the variability. Mr. Conner inquired as to whether our financial condition has affected our bond covenants or rating in any way. Mr. Miller advised that it has not. Mr. Huber reminded board members that we have a bond rating in the top 15 of water utilities in the country. Mr. Johnstone stated that while the metro government and LWC are in difficult financial times, we compare very well to other cities and utilities.

Mr. Miller stated that the Developer Buyout overpayment has almost resolved itself. The balance of the overpayment has been reduced to approximately \$20,000 by developers repaying the overpayment.

Mr. Miller briefly reviewed the Statement of Revenues, Expenses, and Changes in Net Assets with budget and prior year comparisons for financial results through July 2004. There were no questions regarding Mr. Miller's written report on the Financial Results for July.

Operations Report

Mr. Heitzman presented the Operations and Engineering Report.

Mr. Heitzman noted that production was at the lowest level since 1992 due to the weather. The year-to-date production was 3.9 percent lower than 2003 and 2.4 percent lower than the five-year average production.

Mr. Heitzman noted that the black water complaints had resolved because the issue had been corrected.

With regard to the Riverbank Filtration well, Mr. Heitzman reported that it was returned to service on July 28 after repair of the constant and variable speed motors on the two pumping units. The constant speed pump experienced excessive vibration causing the shutdown. The motor was rebalanced, the soft start unit has been repaired, along with the pump impellers and HVAC system. Repair costs total \$71,000 for these activities.

He noted that the Army Corps of Engineers plans a scheduled closure of the McAlpine Locks from August 9 to 22 for an emergency repair of the gates. We have been working with them on any issues that may impact the company.

Mr. Heitzman reported on the status of the repairs to the Crescent Hill Reservoir. The Reservoir is scheduled to re-open on Monday, August 16. Hall Contracting has completed installation of the PVC liner on the Gate House drain structure and will demobilize the week of August 9. MAC Construction is completing the sidewalk and lighting work the week of August 2. T&C Contracting is working to complete the ornamental fencing along the Reservoir sidewalk by August 13. The plan is to begin filling the Reservoir the week of August 9 and monitor test wells in the area for any leakage. Staff is working with the Mayor's office, Metro Council, the Crescent Hill Neighborhood Association and residents to communicate the schedule of operations.

Mr. Heitzman asked if Board members had questions about anything else contained in his written report. There were no other questions.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report.

The July 2004 abandonment rate was 6.5% compared to 5.0% in June 2004, and 3.3% in July 2003. The year-to-date abandonment rate is 4.96%. Ms. Teasley noted that there is some impact to the abandonment rate as a result of personnel changes in that area. We are working to fill the vacant positions and get staff trained. Bad debt for the month of July was \$48,959 compared to \$53,426 in June 2004, and \$66,190 in July 2003. Bad debt is \$7,059 over budget for the month and \$27,605 over budget year-to-date.

Staff of the Louisville Water Company met on July 27, 2004 with a small work group of representatives from the Home Builders Association of Louisville (HBAL). Staff discussed the current authorization to proceed levels for new development projects, a draft new Refunding of Installation Cost Water Main Extension Agreement, and LWC acceptance of water mains prior to filing of the new development's Record Plat. The group also discussed the status of the System Development Charge (SDC) Funds including the external audit, and a draft new Refunding of Installation Cost Main Extension Contract. The next meeting of the work group is scheduled for September 8, 2004.

The Bullitt County Advisory Board met on July 26, 2004. Staff provided a financial update on the water reserve and the program's capital projects. The Advisory Board reviewed a draft proposal to modify the procedures for executing a Two-thirds Majority Petition Main. These customers will now complete a Letter of Intent Application for Service, in which the customer must prepay their \$450 Service Installation Charge and select a tapping fee payment method. At least two-thirds of the customers on a road must prepay the Service Installation Fee and fully complete the Letter of Intent Application for Service for the project to proceed. The Advisory Board supported the proposal, and it will next be communicated to the Bullitt County Fiscal Court.

Ms. Teasley asked if Board members had any questions about any of these items or items in her written report that she did not highlight. There were no questions.

Strategic Plan 2004 Mid-Year Results Provided.

Mr. Miller provided this report. (The materials for this report were provided under separate cover). Seven of twelve goals are on target. This was a good year for employee safety and water quality. We are not on target for meeting the goal for vehicular accidents. Mr. Johnstone inquired as to why the second quarter results are worse. Mr. Miller stated that no correlation has been determined between the time of the second quarter and the frequency of accidents because, in fact, increased mileage usually correlates to increase accident frequency and our highest mileage is in the first quarter. Mr. Huber asked Susan Lehmann to advise regarding the Full Time Employee count even though that is not a goal. Lehmann advised we have lowered our FTE count to 446 with 10 current openings, which is a reduction of almost 50 employees or nearly ten percent (10%) of our total workforce.

Update Provided on Crescent Hill Filter Plant South Coagulation Basin Renovation

Mr. Heitzman provided this report. In January 2004, the Board authorized a \$2,878,522 construction contract to Kelley Construction for improvements to the South Coagulation system at Crescent Hill Filter Plant. To date, the project is approximately 15 percent complete. The scope of the project includes replacing

mechanical mixing equipment in one basin, replacing clarification equipment in two basins, concrete rehabilitation in four basins, and handrail, lighting, and miscellaneous improvements. The coagulation water treatment process is required for removal of sediment, organic chemicals, and other contaminants from the river water. Progress to date in the first basin (Unit #7) includes demolition and concrete rehabilitation. The clarification equipment that will be delivered this month and the flocculation mixing equipment has been fabricated and is ready for installation. The target for startup of Coagulation Unit #7 is November 2004. By contract terms, the project is to be complete December 2005. Additional work under consideration may extend this date. This communication provides an update on concrete basin wall sealing, Basin #7 floor failure, and the consulting fees. The preliminary findings from work on basin #7 will yield contract changes that will likely exceed 10 percent, requiring Board approval (\$288,000 for this contract). Further, timely decisions regarding change of scope will be required to minimize contractor delay claims, keep the project on schedule, and maintain plant operations. As staff quantifies the specific cost impact to the contract, the President will be advised, and Board ratification of a contract change may be necessary to assure timely resolution to these unforeseen events.

Report Given Regarding River Bank Filtration (RBF)

Ms. Kay Ball provided an update on the RBF project, of which the design is nearing completion and preparations are being made for advertisement and bid of the project this fall. Final plans are 95 percent complete, while specification and contract documents are 90 percent complete. There are no remaining issues related to design of the RBF tunnel system. The project requires acquisition of 18 property parcels and one easement. Fourteen parcels have been acquired or are under contract and four parcels are in the process of condemnation. For the four parcels in condemnation, right-of-entry is expected by December 2004. One easement remains to be acquired, and we are currently under negotiation. A critical decision will be required regarding the bid opening date, based upon the percentage of property available for construction.

In order to manage the project risk, total project cost, and maintain the project schedule, JIG Engineers recommends a method of conflict avoidance and dispute resolution for large, subsurface construction projects, such as the RBF tunnel. Several Alternative Dispute Resolution Methods have been developed for the construction industry, including various forms of structured mediation and arbitration. JIG Engineers has recommended the Company use a Dispute Review Board (DRB) process developed by the American Society of Civil Engineers (ASCE). The process involves establishing a panel of three independent, experienced individuals with substantial knowledge of underground tunneling construction. All members of the DRB must be mutually acceptable to the owner, contractor, and engineer. The DRB members are furnished with project documents, visit the site periodically, and provided with regular progress reports. When a dispute occurs that cannot be resolved by the owner and the contractor (typically above a defined dollar threshold), the DRB is activated to evaluate the situation and document their findings to the owner, contractor, and engineer. The decision is not binding or enforceable, but the findings are admissible in any future proceeding. It is considered a good faith process and results in bidders being more willing to bid the project. The DRB cost is estimated to be approximately \$200,000 for this project, which is 1/2 of 1 percent of the total contract cost. The owner and contractor share in the cost of the DRB process. Legal Counsel and Risk Management are also evaluating other structured methods for dispute resolution for the RBF tunnel project. The DRB process has merits from an engineering and construction perspective, however may not provide maximum protection to the Company should a major construction claim arise.

Mr. Conner stated that he has serious concerns about a non-binding process after which all the evidence in it is admissible in a future proceeding. He has further serious concerns because it is an engineer-developed process and the dispute would ultimately occur between the company and an engineer, i.e. the contractor. Mr. Heitzman advised legal counsel had raised the same exact concerns, but that we definitely

want some form of alternative dispute resolution for a project that is very large for us and will be hindered if it is tied up due to a dispute. This dispute method will resolve issues quickly. Mr. Conner agreed that we want to consider some form of alternative dispute resolution but wants staff to thoroughly investigate all options because he has grave concerns over industry professionals making decisions about their industry. He feels they have a long-term vested interest in their industry and therefore may not be impartial or independent in their decision-making. Ms. Ball advised that this appears to have been developed just for the tunneling industry, because in tunneling contracts it is almost a surety that issues will arise that were not contemplated in the bid specifications. Mr. Conner questioned how it is known that to use some other form of alternative dispute resolution will cost us more in the bid price. Ms. Ball and Barbara Dickens both stated that no one has been able to state with supporting evidence that this is the case, but it is the general belief in the industry that doing anything non-standard will make the bidder wary of risk and increase their bid price to cover it. Dr. Wise suggested we have bidders bid it with and without this process. Mr. Conner simply feels the benefits of this are not quantifiable and therefore bidders will not bid it both ways. Mr. Huber advised that staff will investigate all the options further and provide an update to the Board in the near future.

Long Range Financial Plan Update – Water Sales Projection

Mr. Bob Miller presented information on the water sales projection component of the long range financial plan. (This information was provided via separate cover, not as a part of the bound agenda). Water sales have averaged 37.7 billion gallons per year since 1986. A linear regression of the water sales for that period indicated that consumption for 2004 could likely be expected at or above 40 billion gallons. However, based on pumpage statistics through July, our current forecast for water sales is at or below 38.0 billion gallons. Mr. Miller reviewed revenue, costs, and profits over a range of sales quantities from 35 billion gallons to 42 billion gallons, noting that annual profits over that range of water sales can vary from \$6.8 million under budget to \$5.9 million over budget. Given the recent lower water sales results, it appears prudent to consider reducing the water sales basis for the 2005 Annual Budget and Water Rates from the current level of 38.7 billion gallons to perhaps 38.0 billion gallons. This would result in an additional revenue requirement of 1.8 percent. Mr. Conner asked if this would be in addition to other rate increases, and Mr. Huber advised that it would need to be. Louisville Water Company staff is currently working to improve the forecast of total annual water sales and the distribution of those sales by customer class. Staff is also evaluating the effective use of a Risk Mitigation and Rate Stabilization Reserve.

NOTE: Board member Wendy Welsh arrived during this discussion at 1:48 p.m.

Consent Agenda Reviewed and Approved

There were no changes to the consent agenda and Mr. Conner made the motion to approve, seconded by Dr. Wise, and the motion carried.

The Special-called Meeting minutes from July 20, 2004 were approved.

The List of Claims Paid in July 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved, with the addition of specific project cost for the MSD project in the amount of \$12,400:

Developer Installed Refunding Main Extension Projects

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
03-016	G801M	Glen Oaks Section 11E	\$46,000.00	\$15,200.00
10055	G800M	Blankenbaker Station Business Tract 2	\$48,680.00	
10134	G776M	Yacht Club Estates Phase 2	\$68,350.00	
10357	G778M	Ledgerock Cove	\$39,760.00	
10373	G802M	Guelda Patio Homes	\$53,710.00	\$15,000.00
10376	G777M	Old Henry Business Park Phase I	\$26,590.00	
10404	G804M	Hickory Trace Condominiums Ph. I	\$14,150.00	
10464	G806M	Woods of Harrods Creek Phase I	\$87,620.00	
10474	G803M	Cliffwood Condos Phase 2	\$4,000.00	

Bullitt County Water Main Extension Projects

Project No.	Project Name	Total Project Cost	Customer Contributions	Net LWC Cost
10487	Old Brooks Hill Road	\$95,000.00	\$54,500.00	\$40,500.00

The Board received the report of contracts less than \$100,000 as follows:

00-495	National Turnpike, Farmers Lane, South Park Road Transmission	T & C Contracting, Inc.
03607	Surge Control System, Westport Road Transfer Station	MAC Construction & Excavating, Inc.
00-494	Wolf Pen Branch 36" Transmission Main - Phase I	MAC Construction & Excavating, Inc.
10398	Mary T. Meagher Aquatic Center Parking Lot Improvements	
10040 & 10453	CDBG Phase II Water Main Extension Project	

Contract Approved for 10294: Montana Avenue Main Replacement Project

This project piloted the use of the new MBE/WBE sub-contractor utilization program at LWC. Under this program, prime contractors are required to demonstrate a "good faith" effort in using minority and woman owned businesses when purchasing goods and services related to the construction of LWC projects. This bid was tabled at the July 20, 2004 Board meeting to allow staff more time to review the apparent low bidder's good faith effort toward achieving minority and women business enterprise participation.

We received six responsive bids from pre-qualified contractors to install 15,610 feet of 6", 8", and 12-inch Pressure Class 350 ductile iron pipe in the Montana Avenue Area located northeast of Churchill Downs. Tom Brown Construction Company submitted the lowest responsive bid in the amount of \$994,265 resulting in a total project cost of \$1,428,265. The low bid provided sub-contractor utilization of 5% each for minority and woman owned businesses. Current company spending goals are 15% for MBE and 5% for WBE.

Tom Brown Construction subsequently agreed to utilize a minority supplier for concrete and increase MBE spending by 9.5% for at total amount of 14.5%. The low bid is approximately 20% under the Project Manager's estimate. The overall unit cost is \$ 91.50/lf. This value is consistent with the unit prices received for MRRP projects of similar size and scope. Mrs. Teasley reiterated that the current process requires the bidder to use good faith in the utilization of minority and women owned subcontractors but not meet the W/MBE goals. Mr. Conner moved to authorize the Vice President, Serving Customers and Business Development, to award a contract in the amount of \$994,265 to Tom Brown Construction Company to install the water facilities associated with this project. Ms. Welsh seconded, and the motion carried.

Contract Approved for Projects 10040 and 10453: Community Development Block Grant Phase II Water Main Extension Project

We received four bids from pre-qualified contractors for furnishing and installing approximately 53,084 lineal feet of 8, 6 and 4-inch water mains, one (1) Hydropneumatic Booster Pump Station, forty-seven (47) fire hydrant assemblies, and associated appurtenances. This project is part of the Bullitt County Water Improvement Program and partially supported by a grant in the amount of \$994,000 for extension of 26 miles of water mains to low to moderate income households. This is Phase II. The project will be constructed in LWC easements, Kentucky Highway Department right-of-way and Bullitt County public right-of-way. Team Contracting submitted the lowest responsive bid in the amount of \$1,699,000. Alternate bids were submitted for the upsizing of water mains from 8 to 12-inch on Collings Hill Road and Horsefly Hollow Road. Team Contracting submitted a proposed Alternate Bid in the amount of \$241,000, which is below the engineer's estimate of \$377,625. Therefore, the upsizing of water mains from 8 to 12-inch is recommended by staff for inclusion in the project resulting in a total project construction cost of \$1,940,000. The base bid is 0.84% higher than the Project Manager's estimate. The resulting total unit cost for this project is \$35/LF, excluding the hydropneumatic booster pump station but including the upsizing on Collings Hill Road and Horsefly Hollow Road. This amount is consistent with other water main extension projects of this difficulty and scope. Mr. Conner moved to authorize the Vice President of Serving Customers & Business Development to establish a \$2,593,535 project budget of record for the CDBG Phase II Project and to award a contract in the amount of \$1,940,000 to Team Contracting to install the water facilities associated with these projects. Dr. Wise seconded, and the motion carried.

Contract Approved for 00-494: Wolf Pen Branch 36-inch Transmission Main, Phase I

This project is the first phase of an effort to provide a secondary feed and some redundancy for the 60-inch main along US-42. Phase II of this project, currently under preliminary design, will complete the transmission main installation from Spring Farm Road to Westport Road. The Wolf Pen Branch Road project is identified in the Capital Improvement Plan, with funding through the System Development Fund.

Five bids from pre-qualified contractors were received to furnish and install 10,866 feet of 36-inch ductile iron water main from US-42 to Spring Farm Road, including furnishing and installing 640 feet of 54-inch steel casing (bore and open-cut), and 160 feet of 36-inch ball and socket ductile iron pipe for the crossing of Harrods Creek. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$3,556,790 resulting in a total project cost of \$4,107,490. The low bid is approximately \$300,000 (9%) over the Project Manager's Estimate. The higher estimate is attributable to the need to remove a significant amount of rock, the rapidly escalating cost of contractor-supplied ductile iron pipe and steel casing materials, and the necessity to cross Harrods Creek. Ms. Welsh moved to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$3,556,790 to MAC Construction and Excavating to install the water facilities associated with this project. Mr. Conner seconded, and the motion carried.

Lock Box Services

The current five-year contract with Fifth Third Bank for lock box services expires on October 31, 2004. The lock box service is used to process customer payments. Due to a need to carefully develop the Request for Proposal for these services, staff requested additional time under this contract in order to develop an RFP for lock box services. Dr. Wise asked Mr. Miller to explain how this service is used. Mr. Miller advised that this covers mail payments for us and all the entities for which we bill. The service provider handles the payment completely and credits our account. He noted that the service through Fifth Third Bank has been excellent and very accurate, and this results in increased customer satisfaction. Mr. Conner suggestion that the RFP specifications require that the successful bidder cover the costs of transition from one provide to the other if Fifth Third does not get the contract when a new contract is awarded. Staff will consider whether this is feasible under procurement law. Dr. Wise moved to authorize the Process Owner, Procurement Services, to award a month-to-month contract for lock box services to Fifth Third Bank for the existing monthly charge of \$10,565, not to exceed a total of twelve months at the total amount of \$126,773. Ms. Welsh seconded, and the motion carried.

Contract Awarded for 10398: Mary T. Meagher Aquatic Center Parking Lot Improvements

We received three responsive bids to renovate and expand the parking area for the Mary T. Meagher Aquatic Center. This area provides parking for the MTM Center and provides LWC access to the Crescent Hill Reservoir. We also solicited an alternate bid to install fencing between the new parking lot and the Crescent Hill Golf Course. The bids ranged from \$332,800 to \$365,000 for the base bid, and \$57,000 to \$65,880 for the alternate bid scope. The low bid is 3.7 percent above the engineer's estimate of \$321,000, while the alternate bid is over double the estimate of \$25,000. The higher bid pricing may be attributed to the defined construction schedule and the traffic coordination required during construction. Since the alternate bid exceeds budget, staff will evaluate fencing alternatives with Metro Parks. Further, the pipe relocation portion of the project will be performed with a separate main replacement project for Reservoir Avenue, therefore this \$40,000 budget allocation is available for reallocation. Dr. Wise moved to authorize the Chief Engineer to award a contract in the amount of \$332,800 to MAC Construction and Excavating, Inc. for this project. Mr. Conner seconded, and the motion carried.

Change in Scope Approved for 03-604: Goshen Area Main Replacement Project

A preliminary estimate was put together in 2001 when we were performing due diligence in the acquisition of the Goshen system. This project includes the relocation of 199 customer services presently located within the residences of former Goshen Utilities' water customers. Staff has taken the opportunity of the Automated Meter Reading (AMR) Project to coordinate the replacement of the meters being relocated to the LWC standard meter service configuration with the AMR meters. The relocation of the meters to the standard meter service configuration coupled with the AMR Project will recognize the efficiencies of the AMR. The relocation of the meters requires the installation of meter vaults, meter assemblies, frames and covers. In some instances, the service line from the main to the new meter vault location may need to be replaced. Internal plumbing work is proposed to be completed by a licensed plumber (Southern Plumbing) through their current service contact. The work proposed by this project will be completed by LWC crews, additional Meter Services staff, and Southern Plumbing. The proposed change addresses previously unknown information regarding the meters identified for relocation and allows for replacement of expected service line deficiencies. Though the \$107,340 increase for this project reflects a 95.4% increase, the revised scope of work will complete this work and allow for optimized meter reading through AMR. Mr. Huber advised that when doing due diligence, we consider what it will take to get the system to our standards. To pay for the necessary upgrades, we freeze the acquired system's higher rates until it pays for all the upgrades and then we equalize the rates. The extra cost of the project here would mean the rate equalization would be pushed out another two to three months. Mr. Johnstone asked why we would not just replace the indoor meters with indoor AMR meters since those meters are read through radio frequency. Ms. Teasley advised that the meters still need servicing and testing and, due to liability issues, we always try to stay out of private homes. Mr. Conner moved to authorize the Vice President, Serving Customers & Business Development, to increase the overall project budget reservation to \$219,840 to complete the relocation of customer services and the installation of the AMR meters in the Goshen Area. Ms. Welsh seconded, and the motion carried.

Change in Scope and Request to Proceed with Final Design and Advertisement for Bid Approved for Liberty Street Area Main Replacement Project

The Board of Water Works approved the 2004/2005 Main Replacement and Rehabilitation Program (MRRP) in November 2003. The Campbell Street Area project was included as part of that approval. Although originally projected to be cleaned and lined, after further review of the recent maintenance records by the Infrastructure Planning for these mains and similar vintage cast iron mains, it is now felt that portions of the Campbell Street Area project -- Liberty Street, Market Street, Jefferson Street, Baxter Avenue, Chestnut Street, Marshall Street and Gray Street -- are better suited for replacement. The remaining sections of unlined cast iron pipeline in the Campbell Street Area project scope will be cleaned and lined later this year as originally planned. A new replacement project, Liberty Street Area, has been created for the referenced unlined cast iron mains. The cost estimate for the replacement also includes the renewal of lead services. The unit cost for the replacement of these mains is \$110.10/foot. To maintain the 2004 MRRP budget within the allotted limit of \$9,500,000, one or more other projects will be deferred to 2005 or beyond. Construction of the Liberty Street Area project will help improve both the supply and water quality for the Clarksdale Revitalization Phase 1A project currently under design for the area north of Liberty Street. Doing this work at the same time as the city's revitalization project prevents us from having to cut into newly paved road. Ms. Teasley explained how the main break frequency is determined, in response to Dr. Wise's inquiry. Mr. Conner moved to authorize staff to proceed with the final design and advertisement for bids of the Liberty Street Area Main Replacement Project. Dr. Wise seconded, and the motion carried.

Project Approved 02-750: Kentucky 61 12-Inch Grid Tie

This project will complete a much needed 12-inch grid-tie on KY-61 between Blue Lick Road and Shepherds Crossing. The 12-inch main will be installed primarily in easements located along the east side of KY-61. Total length of the project will be approximately 1,400 feet. The project will also require a 60 foot bore under KY-61 near Blue Lick Road. Construction is anticipated to start in late Fall 2004.

The previous scope of work for this project anticipated the project and a large portion of the funding would be included with Kentucky Transportation Cabinet (KTC) plans for relocation and widening of KY-61 between John Harper Highway and KY 44. LWC was to contribute some capital for the upsizing of the existing 6-inch water to the proposed 12-inch main. The road relocation and widening project has been postponed indefinitely; therefore no funds are available from KTC for relocation of the LWC facility at this time. The proposed main provides a critical connection to the Shepherds Crossing area that cannot wait until the road widening project is re-introduced.

The project is estimated to cost \$187,000, with \$167,80 provided from the Shepherdsville Reserve Fund and \$19,200, to fund enlargement of the main, provided from the Bullitt County System Development Fund. Design shall be accomplished by the LWC Company staff. Dr. Wise moved to authorize staff to proceed with design and advertisement for bids of the KY-61 12-Inch Grid-Tie Project. Mr. Conner seconded, and the motion carried.

Crescent Hill Filter Plant - Advanced Water Treatment Plan Approved

Historically, Louisville has maintained a leadership role in advancing the quality of treated water. This includes pioneer work in filtration, disinfection, and coagulation (1890's); fluoridation (1950's); and riverbank filtration (1990's). The next challenge for the Company is to address the Crescent Hill Treatment Plant, now 100 years in age, to ensure we meet future drinking water regulations and provide high quality water to customers.

The 2002 - 2021 Facilities Plan, prepared by Black & Veatch Corporation, identifies funding in the amount of \$107 million for construction of advanced treatment technology for the Crescent Hill Water Treatment Plant. Advanced treatment technology is necessary to meet future drinking water regulations, including the Interim Enhanced Surface Water Treatment Rule (IESWTR). The next step in evaluating alternatives for advanced treatment is to build on the work of the 2002 Facilities Plan. The Facilities Plan identified the following alternatives: Riverbank Filtration (RBF), ultraviolet (UV) disinfection, ozone disinfection, membrane filtration, activated carbon absorption, and various combinations of these technologies. The Facilities Plan recommended installation of a combination of advanced treatment technologies for the Crescent Hill facility including: Riverbank Filtration (RBF), UV disinfection, and powdered activated carbon (PAC), at an estimated cost of \$107 million. The Facilities Plan also recommended an additional \$38 million of improvements for the Crescent Hill Treatment Plant to upgrade aging infrastructure and integrate the new treatment technologies into existing processes. Staff recommends pursuing the next step in conceptual evaluation of three to four alternatives for Crescent Hill to achieve defined levels of water quality, quantity, and reliability. The evaluation will consist of several phases of study. The three phases of this scope of study are summarized as follows:

Aquifer Characterization	\$ 35,000 – USGS (\$14,000 contribution)
RBF Tunnel Design Concept	\$100,000 – JJG Engineers
CHFP Conceptual Treatment Plan	\$150,000 – Black & Veatch
LWC engineering staff labor	\$ 85,000
Total	\$370,000

The work will begin in 2004, and proceed to completion by mid year 2005. The revised 2004 budget includes \$150,000 to begin the evaluation, with the balance of funding to be budgeted in 2005. The work will be an operational expense for the period in which the work is performed. In conclusion, staff requests authorization to proceed with the evaluation of an Advanced Treatment Plan for Crescent Hill Water Treatment Plant. Mr. Conner asked why this project is not capitalized. Mr. Miller responded that the Internal Auditor and staff have determined that under current accounting rules, this is research and development costs, not capital costs. Mr. Johnstone asked how these two engineers have been selected. Mr. Huber advised that both have a great deal of experience with this project. Ms. Welsh moved to authorize the Chief Engineer to enter into professional services contracts with USGS, JIG Engineers, and Black & Veatch. Mr. Conner seconded, and the motion carried.

Closed Session

At 2:35 p.m., Mr. Huber recommended the Board go into closed session pursuant to KRS 61.810(1)(c), to discuss proposed or pending litigation. Dr. Wise moved that the Board go into closed session, Mr. Conner seconded, and the motion carried.

Open Session Resumed

The Board came back into open session at 2:50 p.m. on the motion of Mr. Conner, seconded by Ms. Welsh and unanimously carried. There was no action taken in closed session.

There being no further business, the meeting was adjourned at 2:51 p.m.

Respectfully submitted,

Barbara Dickens
Vice President, General Counsel and
Secretary to the Board of Water Works

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
SEPTEMBER 14, 2004**

Board Members Present:

Mr. Stewart Conner
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis

Not Present:

Mayor Jerry Abramson
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Mr. Bret Russell, LWC Engineer

The regular meeting of the Board of Water Works was held on Tuesday, September 14, 2004 at the B. E. Payne Water Treatment Plant, 7400 Upper River Road, Prospect, a facility of the Louisville Water Company. John Huber called the meeting to order at 12:42 p.m. Mr. Huber provided the historical background surrounding the B. E. Payne Plant.

Consent Agenda Reviewed and Approved

There were no changes to the consent agenda and Ms. Wendy Welsh made the motion to approve, seconded by Ms. Marita Willis, and the motion carried.

The Special-called Meeting minutes from August 5, 2004 and the Regular Meeting Minutes from August 10, 2004 were approved.

The List of Claims Paid in August 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Refunding Main Extension Projects

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
10060	G881M	Highview Baptist Church - 15201 Shelbyville Rd	\$34,860.00	
10125	G814M	Woods of Glenmary Patio Homes - Phase 4	\$33,930.00	
10133	G807M	Old Brownsboro Crossing	\$229,380.00	
10292	G879M	Waterstone Park	\$78,840.00	
10344	G887M	Coventry at Gardiner Park East	\$38,660.00	
10402	G811M	Falcon Crest Apartments Phase 2	\$66,200.00	\$14,000.00
10407	G809M	Lake Forest - Section 51A	\$24,480.00	
10419	G884M	Windgate Meadows - Section 6A	\$38,050.00	\$7,100.00
10432	G799M	Tanyard Park	\$38,600.00	
10444	G817M	Nichols Meadows	\$44,690.00	\$5,500.00
10445	G810M	Bannon Crossings - Section 4	\$108,440.00	\$16,100.00
10446	G882M	Savannah Springs Condominiums, Phase 1	\$28,610.00	
10447	G883M	Savannah Springs Condominiums, Phase 2	\$41,650.00	
10449	G808M	Woodmont - Phase 6	\$47,710.00	\$9,200.00
10463	G815M	Carrington Greene Condominiums	\$35,550.00	
10467	G812M	Bannon Crossings, Section 2B	\$84,200.00	\$11,000.00
10471	G816M	Harrods Creek Overlook Condos	\$34,310.00	\$3,500.00
10472	G886M	Dri-View Manufacturing	\$54,950.00	
10476	G818M	Alliant Court	\$15,150.00	
10484	G889M	Smyrna Crossings	\$56,290.00	\$1,750.00
10502	G888M	Indian Falls Section 10	\$34,610.00	
10506	G885M	1314 Witawanga Avenue	\$9,000.00	

Developer Installed Tapping Fee Water Main Extension Projects

10443 G880M Vassar Avenue \$11,550.00

Tapping Fee Water Main Extension Projects

10454 G813T Cummings Rd \$18,000.00

The Board received the report of contracts less than \$100,000 as follows:

Procurement Of Materials And Services

03-44	Property & Casualty Brokerage Services Neace Lukens	\$37,527
04-24	Motor Oil, Hydraulic Oil, filters and Gear Oils Newcomb Oil (Hydraulic/Machine Oils)	\$67,094
04-24	Motor Oil, Hydraulic Oil, filters and Gear Oils Vidatt Energy (CMBE) (Transmission/Motor Oils)	\$48,116
04-40	Casing Spacers Water Works Supplies	\$76,395

Procurement Of Professional Services

Professional Service	10233 - Renovation of Coagulation Sedimentation and Softening Basins at BEPWTP O'Brien & Gere Engineers, Inc.	\$71,405
Professional Service	Crescent Hill Treatment Plant - Advanced Treatment Technology USGS Aquifer Characterization U.S. Geological Survey	\$21,000
Professional Service	RBF Tunnel Design Concept Jordon, Jones, Goulding Engineers	\$100,000

Administrative Report

Mr. Huber's report was covered in the reports provided by other officers.

Financial Report

Mr. Robert Miller reviewed information from the State of Kentucky climatological website regarding the unseasonably cool, wet weather that has been experienced in the area the past few months. Mr. Miller highlighted the Statement of Revenues, Expenses, and Changes in Net Assets with budget and prior year comparisons for financial results through August 2004. While we have experienced low revenues, we have made great progress in lowering operating expenses. Mr. Miller reviewed the various options available to the Board to allow us to meet the dividend target for 2004. One option is to refinance one of

the debt principal payments, while funding the Risk Mitigation/Rate Stabilization Reserve Fund. Mr. Miller advised there would be additional discussion of these issues under the Special Issues.

Operations Report

Mr. Heitzman presented the Operations and Engineering Report.

Production – The average production rate last month was 139 MGD, which was 1.4 percent lower than the 2003 August production rate of 141 MGD and 5.1 percent lower than the five-year average August production of 146.4 MGD. The low production rate last month was a result of continued cool and wet weather conditions. The average air temperature was four degrees Fahrenheit lower than August 2003 and the five-year average. The precipitation of 4.14 inches was one inch higher as compared with the average month of August. The year-to-date production was 3.5 percent lower than 2003 and 2.7 percent lower than the five-year average. The last few weeks prior to the Board meeting have had higher pumpage, and it appeared that September would be more on target in terms of gallons pumped to mains.

Notice of Violations (NOV) – Staff received two Tier 3 NOV's in August, neither of which was a health issue. One was related to the Year 2001 Consumer Confidence Report (CCR) for the Goshen water system and the other was related to the June 2004 Total Coliform Rule (TCR) monitoring for the Louisville Water system. The NOV for the Goshen system resulted from late submission of the CCR to the Kentucky Division of Water (DOW). AquaSource was responsible for submitting the 2001 CCR by July 1, 2002. This NOV occurred prior to LWC's acquisition of the Goshen system in August 2002. We have confirmed that the CCR was submitted to Goshen customers timely but not the State DOW timely. No remedial actions are required from the Division of Water for this violation. Staff has reviewed our operating procedure for meeting such requirements, and it is sufficient to prevent this occurrence in the future.

The NOV for LWC's June 2004 TCR monitoring was a result of failure to collect the appropriate number of recheck samples for a positive distribution sample. Regulations require three recheck samples for each positive total Coliform sample. On June 3, one of the regular distribution samples collected on June 2 was tested as total Coliform positive and *E. Coli* negative. As required by regulations, water quality staff collected three recheck samples. Of the three recheck samples, two samples tested total Coliform positive and *E. Coli* negative, a scenario that has not occurred in the past. Water quality staff collected the same three recheck samples again, instead of the six recheck samples required. As a result, LWC violated the Total Coliform Rule monitoring requirement for the month of June 2004. The Division of Water requires LWC to notify its consumers of the violation before June 1, 2005.

Currently, staff is in the process of investigating the root causes of the violation. Preliminary investigation results indicate the SOP did not properly identify an event where one positive sample might yield more than one positive recheck sample, thereby requiring three rechecks for every positive sample obtained. Staff has revised and reformatted the SOP so that it is consistent with the regulations. Staff has been trained and instructed on the new SOP. Although the monitoring violation occurred, there was no health threat to the drinking water, since recheck samples tested negative for Coliform and *E. Coli*.

Wellhead Protection Program, Phase II - LWC submitted Phase II of the Wellhead Protection Plan on August 20, 2004. The plan is currently under review by the Kentucky Division of Water for compliance with the wellhead protection program requirements of the Safe Drinking Water Act. Phase I was submitted on June 20, 2003 and approved on August 19, 2003. The Wellhead Protection Plan includes a thorough analysis and impact of area development on groundwater quality and flow in the vicinity of the Riverbank Filtration system at the B.E. Payne Plant. The plan identifies influence zones and documents existing and potential contaminants to the groundwater. The program includes groundwater monitoring,

contaminant inventory, and public notification. The plan must be updated annually, and we receive comments back from DOW.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report.

Performance Measures – The August 2004 abandonment rate was 7.0% compared to 6.5% in July 2004, and 4.5% in August 2003. The year-to-date abandonment rate is 5.22%. Ms. Teasley advised the abandonment rate should decrease as stability in the customer service area increases. Bad debt for the month of August was \$38,954 compared to \$48,959 in July 2004, and \$26,957 in August 2003. Bad debt is \$2,963 under budget for the month and \$24,525 over budget year-to-date. Mr. Rick Johnstone asked about the wait time that a customer calling in experiences. Ms. Teasley advised we track wait time and advised that customers have the opportunity to select the automated system if they prefer to handle their business in that manner.

Bluegrass Regional Water Commission - The Bluegrass Regional Water Commission was officially created on August 24, 2004. The Commission consists of 11 water suppliers in the central Kentucky area and includes Lexington and Fayette County Urban Government. LWC staff will continue to look for opportunities to sell water in that area and update the Board on Commission participants and activities when further information becomes available.

Closed Session

At 1:08 p.m., Mr. Huber recommended the Board go into closed session pursuant to KRS 61.810(1) (b) and (c) and to discuss property matters and proposed or pending litigation. Ms. Welsh moved that the Board go into closed session, Mr. Gerald Martin seconded, and the motion carried.

Open Session Resumed

The Board came back into open session at 1:47 p.m. on the motion of Mr. Stewart Conner, seconded by Ms. Welsh and unanimously carried. There was no action coming out of closed session.

Committee Reports

Audit Committee Report

Ms. Welsh reviewed the report from the Audit Committee from its meeting held August 31, 2004. She advised that all the high priority items coming out of the 2003 Annual Inspection have been addressed. Mr. Miller discussed the recommendation regarding including comprehensive financial planning in the rate-making process and stated that management agreed with this recommendation but it has been delayed until 2005 due to cost concerns. Ms. Welsh reviewed the issues raised in the annual inventory, specifically with regard to the inventory being accomplished without bar coding and the rolling inventory (truck inventory) issues. Ms. Welsh advised that staff plans an analysis of materials variance to determine if it is a tracking issue due to lack of paperwork or actual inventory shortage. Staff is also going to consider the business case for the purchase of a warehouse management software module. Ms. Welsh reviewed the findings of the revenue audit, which indicated some things are not being metered, resulting in unaccounted for water being higher. With regard to the procurement card audit, Ms. Welsh advised that processes and controls are in place to ensure appropriateness of purchases and that the purchases are within approved limits.

Public Affairs and Customer Satisfaction Committee Report

Ms. Willis reviewed the report from the Public Affairs and Customer Satisfaction Committee held September 3, 2004. Ms. Willis advised that the Committee discussed a plan to communicate the 2005 rate increase in more depth than usual, although it will not result in a substantially higher water bill to the average customer. We will attempt to obtain media coverage for a few background stories on the impact that summer weather patterns and conservation fixtures have on water usage. Ms. Willis advised that the Committee discussed the new proposal to initiate a \$50.00 Service Deposit for all new customers to LWC, returning customers with a history of bad debt, or any customer for whom we have had to write off debt due to bankruptcy. Any new customer can avoid the Service Deposit if they provide the company with a letter of good credit from another water utility or agree to Electronic Funds Transfer. Ms. Willis advised that the Committee supports the proposal, and staff is planning to do testing on the system to ensure implementation of the program will be effective.

Third Quarter Dividend Declaration

Mr. Miller advised the estimated net income for 2004 requires payment of an annual dividend of \$13,766,393 in quarterly installments of \$3,441,598. The quarterly dividend payment will be decreased by \$266,878 to reflect one quarter of the \$1,067,515 dividend prepayment in 2003. On motion of Ms. Welsh, seconded by Ms. Willis and unanimously approved, the Board passed the following resolution to pay the Third Quarter Dividend:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 9, 2004 to adjust the 2003 annual dividend by \$1,067,513, from \$12,318,832 to \$11,251,319, the difference to be subtracted in equal quarterly installments from the quarterly 2004 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2004 Louisville Water Company revised financial plan contemplates the 2004 annual dividend to be \$13,766,393, it would be in order at this time to declare a regular third quarter dividend of \$3,441,598;

RESOLVED, the regular third quarter 2004 dividend of \$3,441,598 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,174,720 to the Louisville / Jefferson County Revenue Commission on September 30, 2004, this being the third quarterly dividend for 2004 less one quarter of the dividend adjustment for 2003, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Return on Equity Target for 2005 Annual Budget

Mr. Miller advised the Company has established a return on equity target in the Annual Budget to provide the sole stockholder, the Metro Louisville Government, with a reasonable return on invested capital. The return on equity target for 2005 is based on the audited financial results for the benchmark group from 1999 through 2003. The five year moving average decreased from the previous year because financial results for the benchmark group in 2003 (the year that was added) were significantly lower than for 1998 (the year that was dropped) due to significantly increased rainfall during the irrigation season for water utilities throughout the eastern United States.

Although the five year moving average has decreased, the return on equity target recommended to be included in the 2005 Annual Budget has increased slightly due to the phase-out of the "one percent less than" component that had been used in previous return on equity targets. Mr. Miller recommended the target for 2005 should be 9.22%, up from the 2004 target of 9.07%, and will yield an estimated budgeted dividend of approximately \$13.75 million. Mr. Conner clarified that the 9.22% is the average of the investor-owned utilities.

Mr. Miller advised staff will be working with a financial advisor in the coming months to evaluate alternative methods for establishing the recommended target for stockholder return component in 2006 and future budgets. The Board had consensus to use 9.22% as the target, and Mr. Huber advised this target will be used as an assumption for budget planning.

Financial Plan Update – Debt Management Issues

Mr. Miller advised the financial plan in the 2004 Annual Budget contemplates borrowing approximately \$75 million over the next five years. Currently, Louisville Water Company has two fixed-rate revenue bond issues totaling \$128,740,000 currently outstanding. The outstanding debt represents approximately 18.5% of our capital structure. The Series 2000 Bonds were a new money issue with a 25 year maturity. The Series 2001 Bonds were a refunding issue and retained the original final maturity date. The principal repayment schedule is conservatively front-loaded, with total annual debt service of approximately \$12 million during 2004-2014, then falling to approximately \$6 million for 2015-2025. The Series 2000 Bonds carry a AAA insured rating from Moody's and Standard & Poor's with an underlying AA1 rating from Moody's and Aa from Standard & Poor's. The Series 2001 Bonds are uninsured and carry at AA1 rating from Moody's and Aa from Standard & Poor's. These are among the highest rated bonds in the water utility industry.

Mr. Miller stated that three key attributes associated with our outstanding bonds merit additional consideration as we contemplate an additional borrowing: whether the repayments is accomplished with level debt service or front loaded; whether we have a fixed rate or variable rate; and whether we refinance any of the current debt to keep from borrowing principal in the same year that we are paying it. These attributes are not necessarily problematic, but represent opportunities to optimize our debt structure as we prepare for the upcoming borrowing. As a result, there are three primary alternatives for addressing the attributes described above while borrowing additional funds. Our options are: to leave the current debt as-is and borrow mix of fixed and variable rate debt in 2005 with principal repayment beginning 2015; refinance all current debt in 2004 or 2005 and borrow fixed and variable rate debt with level debt service; or refinance current principal maturity with variable rate bond anticipation note, then refinance bond anticipation note with bond issue in 2006 or 2007. Mr. Miller discussed the advantages and disadvantages of each option. Mr. Miller also discussed the dividend payment formula is, briefly, sixty percent of net income after deducting bond principal payments and deposits to certain reserves. Since the first two options would refinance the current principal payment, then additional funding would be available for deposits to those reserves or for additional dividend payments. Staff is currently reviewing

these alternatives with Bond Counsel and Financial Advisors to assess the potential savings from refinancing the existing bonds and to determine the optimal method and size of variable rate financing. Mr. Miller advised that staff believe the third option most effectively addresses current debt management issues at the lowest overall cost. It was noted that we have never done variable rate debt. It appears that interest rates will increase, but we do not want to attempt to predict what long-term interest rates will do.

Long Range Financial Plan Update – Risk Mitigation/Rate Stabilization Reserve

Louisville Water Company is updating the components of the ten year proforma income statement and financial plan. There are four key elements that have recently increased the variability of our financial performance: decreased baseline industrial water sales, combined with lower residential and commercial indoor water usage from conservation-type water fixtures and appliances, resulting in total water sales more dependent upon peak season irrigation water usage; higher self-insured retention levels for liability insurance due to hardening of insurance market, but that market is starting to show some signs of softening; sudden increases in security costs when terror alert level rises; and single-year expenses for write-off of undepreciated value of buried infrastructure assets due to relocation requirements.

Also, looking forward, debt service from the contemplated borrowing(s) will provide an additional requirement on water rates. The Risk Mitigation / Rate Stabilization Reserve is a proposed mechanism to provide funding to offset the effect of year-to-year swings in revenues and expenses and to provide for stabilization of future water rate changes. It is not a bond covenant requirement, but is optional.

Mr. Miller discussed the alternatives for financing these risks: (1) Increase the portion of the Operations and Maintenance budget set aside for contingencies, which is used to fund expenditures that are unexpected, cannot be reasonably anticipated, and are generally beyond management's control; (2) Increase the discretionary component of the Infrastructure Replacement Reserve, which was established to provide internally-generated funds for water main replacement and rehabilitation, but was not funded in 2003 due to low water sales and is not likely to be funded again in 2004; (3) Budget water sales at a more conservative level; and (4) Create a Risk Mitigation / Rate Stabilization Reserve.

Mr. Miller explained the Risk Mitigation / Rate Stabilization Reserve could be funded from a rate component specifically established to build the reserve over time, additional profits during unusually high water sales, or existing cash reserves. Requisitions from the Risk Mitigation / Rate Stabilization Reserve would be authorized by the Board of Water Works based on occasions determined solely at their discretion.

Mr. Miller stated that there would be no impact on our earnings if we utilize the Risk Mitigation /Rate Stabilization Reserve. The net income of the Company is determined by generally accepted accounting principles as prescribed by the GASB on an accrual basis of accounting; deposits to or requisitions from the Risk Mitigation / Rate Stabilization Reserve do not affect net income. The amount of net income available for distribution as a dividend is computed as total net income less any bond principal payments and deposits to the Infrastructure Replacement Reserve. If the dividend formula was revised to also deduct net deposits (deposits – withdrawals) to the reserve from Net Income, then the amount of net income available for distribution as dividend could be maintained at targeted levels even during years when revenues and expenses varied significantly. The amount of the deposits to or requisitions from the reserve would be at the sole discretion of the Board of Water Works.

Funding of the Risk Mitigation / Rate Stabilization Reserve is not required by the Series 1992 Bond Resolution; however, additions to or deductions from Net Income for purposes of computing the annual dividend are defined in specific covenants. The establishment of this fund will not adversely affect the bondholders, and therefore, would not require approval of the bondholders. Staff will be working with

Bond Counsel and the Bond Trustee to develop a recommendation to update the dividend covenant for consideration by the City of Louisville and the Board of Water Works prior to year-end. Staff will also be finalizing a recommendation on the size and source of funding to establish the reserve. Mr. Miller stressed that staff want to ensure that use of this fund would not have the effect of relieving any responsibility on the part of management to appropriately maximize the earnings of the company. In Mr. Miller's discussions of this with Moody's, they have been supportive of our exploration of this strategy.

Contract approved for 02-41: Barricade Rentals – Second CPI Renewal

On motion of Ms. Welsh, seconded by Ms. Willis, and unanimously approved, the Board authorized the Process Owner, Procurement Services, to enter into a second CPI renewal of the contract to Flasher Barricade and Lite Company in the amount of \$253,156 for the rental of barricades, which are used to secure Louisville Water Company job sites. This amount represents a 3.3% increase in unit pricing.

Contract Approved for 04-51: Property Protection

Three bids were submitted for a one-year contract, renewable for up to four additional one-year periods, for property protection. All renewals will utilize the Consumers Price Index (CPI), "All Urban Consumers" as a cost adjustment factor. This contract is for security services at various Louisville Water Company sites. The lowest, most responsive bid was received from Louisville Patrol and Detection for an estimated one-year total of \$340,492. This bid represents a 4.7% decrease in unit prices from the previous bid two years ago. Ms. Willis moved to authorize the Process Owner, Procurement Services, to award a one-year contract, renewable for up to four additional one-year periods, for an estimated one-year total of \$340,492 to Louisville Patrol and Detection. Mr. Martin seconded, and the motion carried.

Contract Approved for 04-29: Water Treatment Chemicals

Thirty-two sealed bids were received to award a one-year contract for water treatment chemicals. The lowest, most responsive bids received were:

<u>Chemical</u>	<u>Supplier</u>	<u>Amount</u>
Ammonia	Univar	\$ 80,910
Fluorosilic Acid	LCI	\$108,540
Liquid Chlorine (CHFP)	Brenntag	\$234,780
Liquid Chlorine (BEP)	JCI Jones	\$ 83,820
Liquid Ferric Chloride	Eaglebrook	\$780,458
Liquid Polyaluminum	Sweetwater Tech.	\$ 20,088
Pebble Quick Lime	Carmeuse	\$379,069
PolyDially Dimethyl		
Ammonium	Industrial Chemicals	\$ 50,464
Potassium Permanganate	Carus Chemical	\$ 10,196
Powdered Act. Carbon	Acticarb	\$ 64,560
Powdered Act. Carbon		
(Taste & Odor Grade)	Calgon Corp.	\$ 66,400
Soda Ash	Mays Chemical	<u>\$ 8,372</u>
TOTAL		\$1,887,657

This bid represents an approximate 8.5% increase in unit prices from the previous bid last year. Mr. Conner moved to authorize the Process Owner, Procurement Services, to award a one-year contract to these bidders for a total of \$1,887,657. Ms. Welsh seconded, and the motion carried.

Contract Approved for 04-37: Office Supplies

Five bids were submitted to award a three-year contract for office supplies used company-wide. The lowest, most responsive bid was received from Office Max for an estimated three-year total of \$161,721. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a three-year contract totaling an estimated \$161,721 to Office Max. Ms. Willis seconded, and the motion carried.

Contract Awarded for 03-403: De Mel/Eiler/Keys Ferry Cathodic Protection Project

Four bids were received from pre-qualified contractors to install CP on 9,485 linear feet of 6 and 8-inch cast and ductile iron water mains using 548 sacrificial magnesium anodes. C.P. Systems submitted the lowest responsive bid in the amount of \$186,671 resulting in a total project cost of \$197,671 and a total unit cost of \$20.84/LF. Mr. Conner moved to authorize the Process Owner, Procurement Services, to award a contract in the amount of \$ 186,671 to C.P. Systems to install cathodic protection facilities for this project. Ms. Welsh seconded, and the motion carried.

Contract Approved for 01-700: Bearcamp Road Booster Pump Station

Seven bids were received to install a booster pump station on Bearcamp Road in southwestern Jefferson County. This project will provide a dual-purpose pump station that will supply boosted pressure for domestic use and fire flow under high system demand conditions. The installation of this station also satisfies obligations under the Jefferson County Water Extension Program. D&D Foundation Supply submitted the lowest, most responsive bid in the amount of \$135,000. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a contract in the amount of \$135,600 to D&D Foundation Supply, Inc. (CWBE) for installation of the Bearcamp Road Booster Pump Station. Ms. Willis seconded, and the motion carried.

Update on Corporate Governance Changes

Barbara Dickens discussed the changes that the BOWW decided to make at its August 5th meeting regarding corporate governance. The major changes the BOWW decided to implement are: (1) separating the role of the President and CEO from the Board Chair; (2) having a Nominating Committee that will nominate the Chair and Vice-Chair and all members to serve on the Board's committees; (3) having an Executive Committee comprised of the Chair, the President/CEO, and two other board members that would have some authority and/or ability to review matters usually before the full Board; (4) conducting orientations for all new board members; and (5) meeting annually with the Mayor to obtain Metro Government's perspective on the Company and the Board's obligations. Ms. Dickens advised that the first Board Member Orientation is scheduled for October 5, 2004. Ms. Dickens discussed how the other changes necessitate some revisions of the By Laws, by which the Board is governed, and of Metro Government ordinances. The By-laws were reviewed as information items, and the board members were encouraged to provide feedback regarding the revisions. Mr. Martin commented that the By Laws do not set forth the role of the chair and vice-chair currently, but should be revised to do so. Ms. Dickens advised that she would include that in a proposed amendment. Mr. Martin asked that the By Laws with any new revisions be provided to board members in advance of the next board book if they are going to be asked to approve them. Ms. Dickens advised that they would be. Ms. Dickens reviewed proposed changes to the Metro Government ordinances, all of which deal with changes necessitated by separating the role of the President and CEO from the Board Chairman. These changes need to be considered by the appropriate Metro Government committee in the next month. Mr. Martin moved to recommend approved of the proposed amendments to Chapter 32 of the Metro Government Ordinances. Mr. Conner seconded, and the motion carried.

2004 Annual Inspection Report Accepted

Steve Greseth of Black & Veatch Engineers reviewed the summary of the 2004 Annual Inspection conducted on the adequacy and condition of the Water Works System. The report noted there are twelve (12) high priority recommendations. Six (6) of the recommendations will be addressed in LWC capital projects currently funded or proposed for funding in the draft 2005 Capital Improvement Plan. The remaining six (6) recommendations will be addressed as operation and maintenance items. In the opinion of Black & Veatch, the Louisville Water Company is capable of continuously supplying potable water to its customers. Mr. Conner inquired whether the number of recommendations was average. Mr. Greseth stated he could provide an answer regarding the number of recommendations compared to other water utilities. He noted that the fewer items recommended in 2003 were likely attributable to the fact that staff performing the audit were unfamiliar with LWC. The Board reached consensus to receive the report and file it with the Trustees.

Contract Awarded for Posting of Backlogged Construction Returns

Because GRW was awarded the professional services contract for the AM/FM/GIS work through a request for proposals, LWC is able to pursue a separate professional services contract with GRW for the posting of backlogged construction returns. Since the posting of construction returns is a part of building the facility asset, the costs associated with the backlog effort will be allocated proportionally across the appropriate projects and assets. Mr. Conner moved to authorize the Purchasing Manager to award a professional services contract to GRW Engineers, Inc. for an amount not to exceed \$690,191 Ms. Welsh seconded, and the motion carried.

Change in Scope Approved and Request Granted to Proceed with Final Design and Bid for 03-832: Tyler Water Storage Tank

A final site for the water storage tank in this location has now been approved by Metro Council. The approved location is within the Kroger development being developed by CBRE/Nicklies Company and is located along Taylorsville Road across from Stone Lakes subdivision. Since April 2003, the market for all steel construction has significantly increased. In addition, the budget for land and costs for engineering have increased to accommodate evaluation of multiple sites. Construction will take approximately eighteen months to complete. Ms. Margaret Harris moved to increase the budget of Project 03-832: Tyler/Tucker Station Elevated Water Tank from \$1,300,000 to \$1,860,000, and to proceed with final design and advertisement for bid for the project. Ms. Welsh seconded, and the motion carried.

Apportionment Warrants Issued for Hickory Hills Trail: Echo Trail to East 4,950 ft. and Hickory Valley Road: Hickory Hills Trail to End.

With the completion of this private road water main extension the Board of Water Works is required to issue Apportionment Warrants against the 23 properties assessed in accordance with KRS 96.265. Apportionment warrants will be assessed against 23 properties. Mr. Conner moved to adopt the following resolution for the issuance of Apportionment Warrants and liens against 23 benefited properties along Hickory Hills Trail: Echo Trail to East 4,950 ft and Hickory Valley Rd: Hickory Hills Trail to End in accordance with KRS. 96.265, as described.

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of Hickory Hills Trail: Echo Trail to East 4,950 ft and Hickory Valley Rd: Hickory Hills Trail to End main extension project authorized by Ordinance

No. 19, Series 2000 of the Jefferson County Fiscal Court, adopted on July 25, 2000 such warrants to be against twenty-three (23) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$10,039.43 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Ms. Harris seconded, and the motion carried.

Change Action Approved for 00-418: B. E. Payne Plant Expansion

The scope of work to the B. E. Payne Water Treatment Plant (BEP) to expand treatment and pumpage capacity includes several work elements, including expanding the plant capacity from 45 million gallons per day (MGD) to 60 MGD; a new electrical building and switchgear; a standby power generator; additional pumping capacity; rebuilding filtration systems; and adding a second discharge header and pressure surge relief systems.. The project budget has been set at \$20.5 million. Construction is approximately 70 percent complete. An additional \$124,120 is needed for a 48-inch by 36-inch tapping valve for connection of the surge relief system to the 60-inch discharge header. On August 30, the President authorized staff to proceed with the contract change and allow the contractor to order the pipe and valve materials to accommodate the wet tap before the upcoming winter season. Mr. Martin moved to ratify this contract change in the amount of \$124,120, representing 0.8 percent of the contract. This change increases the approved contract value with Judy Construction (#G167) to \$15,138,975. This change does not increase the current project budget of \$20,500,000. Ms. Willis seconded, and the motion carried.

Oak Hill Property Location Declared Surplus

Ms. Welsh moved to declare the Oak Hill property site surplus by adopting the following resolution:

WHEREAS, the Louisville Water Company originally acquired its Oak Hill property and intended to utilize it for a water storage tank on the property, and

WHEREAS the water storage tank was later located elsewhere, and therefore the Louisville Water Company no longer has any need for the Oak Hill property, and

WHEREAS, the Board of Water Works has been sufficiently advised by the Consulting Engineer, Black & Veatch Engineers, that the Oak Hill property is "excess property" and it should be disposed of pursuant to the provisions of Louisville Water Company's Revenue Bond Resolution, adopted July 14, 1992,

NOW THEREFORE BE IT RESOLVED that the Board of Water Works hereby determines that it is feasible and beneficial and in the Louisville Water Company's best interests to dispose of the said Oak Hill property by advertising it for public bid, pursuant to the provisions of the Bond Resolution adopted July 14, 1992 and the Board hereby recommends and refers the proposed disposition of the Oak Hill property

to the Louisville/Jefferson County Metro Council for consideration of this matter.

Ms. Harris seconded, and the motion carried.

New Approval Levels Adopted for Developer Funded Water Main Extensions

The Board considered a new procedure developed by staff in conjunction with developers and builders to streamline the process for approval for developer funded main extension projects. Ms. Welsh moved to adopt the following new procedure:

The Business System Owner for Pipeline Design and Construction may approve developer-funded water main extensions with a total project cost of \$50,000 or less and Company contribution of less than \$20,000.

The Vice President, Serving Customers and Business Development may approve developer-funded water main extensions with a total project cost over \$50,000 but less than \$250,000 and Company contribution of \$20,000.

The President/CEO may approve developer-funded water main extensions with a total project cost of up to \$250,000 and company contribution of \$100,000 or less.

The Board of Water Works must approve any developer-funded water main extensions with a total project cost of \$250,000 or more and/or company contribution of over \$100,000.

Mr. Martin seconded, and the motion carried.

Main Replacement Projects Approved for College Drive and Manslick and Stonestreet Roads

The previously approved Main Replacement and Rehabilitation Program identifies necessary rehabilitation and replacement of mains. College Drive has been identified due to water quality problems recently. The existing 4-inch cast-iron water main will be replaced with 570 feet of 8-inch PVC pipe. Although not a part of this project, the new 8-inch installation will allow for an eventual grid-tie between College Drive and the 8-inch main serving the Boulder Creek Apartments. The 6-inch asbestos-cement (AC) water mains in Manslick Road between Keys Ferry Road and New Cut Road, and in Stonestreet Road from north of Schooler Lane to Blevins Gap Road are currently targeted for replacement due to a high main break frequency. Ms. Harris moved to authorize staff to proceed with final design and construction and establish a project budget of \$48,000 for the College Drive Main Replacement Project and to authorize staff to proceed with final design and advertisement for bids and to establish a project budget of \$483,000 for the Manslick Road and Stonestreet Road Main Replacement Project. Ms. Willis seconded, and the motion carried.

Authorization Granted for Design and Bid of 12" Main on Highway 42 in Goshen

The 8-inch and 6-inch service lines along Highway 42 in Goshen are planned for upsizing due to growth in the area. A developer in the area is constructing a 12-inch main along Longwood Lane to Highway 1793 and relocating a 6-inch main along Highway 1793. To achieve upsizing, LWC plans to upgrade of this 6-inch line to a 12-inch line and install a 12-inch main extension along Mayo Lane from Highway 42 to the west end of Longwood Lane. Funding for this project is from the Goshen Utilities Reserve. Ms. Welsh moved to authorize the design, advertisement and bid of a 12-inch main extension of approximately 3,800 linear feet along Mayo Lane for a total project budget of \$350,000. Mr. Martin seconded, and the motion carried.

Contract Ratified for 02-645: Recoating Lime Storage Hoppers at CHF

This project will remove exterior lead coatings from two steel lime storage hoppers at Crescent Hill that store approximately 260 tons of lime, which is used for softening of the water to reduce calcium hardness and pH adjustment to reduce the corrosiveness of the finished water in the distribution system. The project also includes replacement of ladders and handrails to meet OSHA safety requirements. The low bid of \$99,811, submitted by KSI, LLC, was approved by the President July 14 and a contract was executed August 5. The pre-bid estimate for the work was \$82,000. The higher bids require a revised budget of \$107,811 to accommodate engineering design and contractor inspection. Mr. Martin moved to ratify the President's award of a contract to KSI, LLC in the amount of \$82,000 and increase the project budget to \$107,811 to recoat the lime storage hoppers at Crescent Hill Filter Plant. Ms. Willis seconded, and the motion carried.

Contract Awarded for 03-615: Engineering Services for Chemical Feed System Improvements

The initial phase of the upgrade of the Chemical Feed System at the Crescent Hill Treatment Plan will focus on processes associated with disinfection, coagulation/flocculation, and taste and odor control. A proposal for the preliminary engineering design in the amount of \$157,600 has been negotiated with Jordan, Jones, and Goulding Engineers (JJG Engineers) in accordance with the Facilities Improvement Consulting Engineering Services method approved by the December 2002 Board. Mr. Conner moved to authorize the Process Owner, Procurement Services, to award a contract in the amount of \$157,600 with JJG Engineers to provide a preliminary engineering design for Project 03-615: Chemical Feed System Improvements at Crescent Hill Filter Plant. Ms. Welsh seconded, and the motion carried.

There being no further business, the meeting was adjourned at 3:55 p.m.

Respectfully submitted,

Barbara Dickens
Vice President, General Counsel and
Secretary to the Board of Water Works

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
OCTOBER 12, 2004**

Board Members Present:

Ms. Margaret Harris
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson
Mr. Stewart Conner

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Mr. Rudy Davidson, Louisville/Jefferson County Metro Government

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers

The regular meeting of the Board of Water Works was held on Tuesday, October 12, 2004 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. John Huber called the meeting to order at 12:41 p.m.

Consent Agenda Reviewed and Approved

Mr. Gerald Martin requested that the September 14, 2004 Regular Meeting minutes be taken off the consent agenda in order to consider recommended changes to them. Mr. Martin suggested adding "as prescribed by GASB on an accrual basis of accounting" after "principles" in the fifth full paragraph on page 8 and replacing the word "manage" in the top paragraph of page 9 with "maximize." Ms. Wendy Welsh moved to accept the minutes with those changes, Ms. Marita Willis seconded, and the motion carried.

There were no other changes to the consent agenda and Mr. Gerald Martin made the motion to approve the remaining items on the consent agenda, seconded by Dr. Joe Wise, and the motion carried.

The List of Claims Paid in September 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

Developer Installed Projects

Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
10331	G897M	Pine Valley Estates Section 4	\$73,630.00	\$15,900.00
10416	G890M	Woodcreek Crossing	\$11,700.00	
10470	G891M	Glen Lakes Section 1A	\$38,950.00	\$7,500.00
10483	G894M	Brookview Industrial Park	\$63,350.00	
10486	G893M	Norton Commons Section A Phase 2	\$119,780.00	
10494	G923M	The Reserve at Glenmary Section 4	\$35,010.00	
10495	G898M	Pine Valley Estates Section 5	\$71,700.00	\$11,700.00
10499	G920M	Fawn Lakes Section 1	\$62,950.00	
10501	G896M	Winding Creek Section 2	\$29,200.00	
10511	G921M	Grandel Forest Estates Section 2	\$30,000.00	
10514	G895M	The Meadows at the Polo Fields Patio Homes Section 1A	\$9,800.00	

The Board received the report of contracts less than \$100,000 as follows:

<u>Capital Program</u>		
10524	Highway 44 - Shepherdsville Qk4	\$28,200
<u>Procurement Of Materials And Services</u>		
03-29	Csi Data Collection - First Cpi Renewal Datamax, Llc	\$28,321
04-58	48" Bell Joint Clamps Hughes Supply Company	\$61,400
04-59	Printing Of Pipeline Map And Valve Location Books Hurt Printing Company	\$25,810
<u>Procurement Of Sole Source Materials And Services</u>		
Sole Source	Oracle Database Software Maintenance Renewal Oracle Corporation	\$86,030

Administrative Report

Mr. Huber discussed a recent article in the Washington Post claiming that water utilities had failed to report information regarding lead in drinking water that would have rendered the utilities out of compliance. Mr. Huber advised LWC has a very aggressive lead removal and lead information program. The regulation on lead in drinking water requires ninety-five percent (95%) of the required samples taken to have less than 15 parts per billion of lead in the samples. Our testing indicates that 95% of our samples have less than 5 parts per billion of lead. We have been involved in several initiatives regarding lead removal, including a testing initiative with Jefferson County Public Schools (JCPS) in which we tested their drinking fountains, testing residences for lead for free if requested by the customer, and a partnership with the County Health Department to provide education regarding lead in drinking water. Mr. Huber emphasized that there is no lead in the water when it leaves our treatment plants. Unfortunately, some homes have lead plumbing that results in lead in the water. LWC used lead piping for service lines from 1860 to 1930. We have an active program to replace those lead lines by 2015. Mr. Huber further advised that some of the utilities in the Washington Post article have contested the claims made. Mr. Martin asked about the use of lead solder. Mr. Huber stated that the prohibition of lead solder began in 1992 and that we treat the water to ensure that it does not absorb the lead used in the solder.

Mr. Huber advised that employees from Seoul, Korea's water department visited us to review what we are doing with Riverbank Filtration.

Mr. Huber mentioned that there is some discussion regarding federal funding of infrastructure.

Financial Report

Mr. Miller reviewed the Statement of Revenues, Expenses and Changes in Net Assets with budget and prior year comparisons for financial results through September. Net Income Before Distributions and Contributions for September of \$2,788,728 was \$704,187 or 20.2% less than budgeted. YTD Net Income of \$20,570,856 is \$2,918,845 or 12.4% less than budgeted, \$1,515,765 or 8.0% more than 2003, and \$1,629,100 less than the revised target amount for 2004. Mr. Martin questioned why the receivables are not reflecting the higher production we had in September. Mr. Miller explained that approximately 25% of September's production is billed in September, with 50% billed in October and the remaining 25% billed in November.

Operations and Engineering Report

Mr. Heitzman presented the Operations and Engineering Report.

Production - The average production rate last month was 145.1 MGD, which was 12.2 percent higher than the 2003 September production rate of 129.4 MGD and 5.5 percent higher than the five-year average September production of 137.6 MGD. Due to wet and cool summer weather conditions, however, the YTD production of 127.7 MGD was still 1.8 percent lower than 2003 and the five-year average of 130.1 MGD.

Zorn Generator Black Out Start Test - In November 2003, staff worked with LG&E to test the gas turbine generator at the Zorn Pump Station and the test was not successful because of problems associated with the gas igniter system, a failed transfer switch at the Hillcrest substation, and a faulty protective relay at the Clifton substation. LG&E repaired the problems in December 2003 and another test was conducted in March 2004. The generator failed to start again because of a high temperature protection alarm. LG&E resolved the issue and staff scheduled the testing date in September to avoid the summer demand period. On September 21, the generator was tested under a black start (no external power) condition without incident.

Dispute Review Board for RBF Project - Staff has evaluated several alternative dispute resolution methods for the upcoming River Bank Filtration (RBF) Tunnel Project at BE Payne Plant, with traditional arbitration and mediation being the two most common forms of alternative dispute resolution. General Counsel has reviewed the various methods available, and staff has concluded the best approach for the RBF Tunnel Project is to adopt the American Society of Civil Engineers (ASCE) Dispute Review Board Process, with some slight modifications to protect the interests of the Company. In the event of a dispute, evidence from the DRB will not be admissible in any future action. The DRB process is expected to cost \$200,000, with costs shared by the Company and contractor.

Increased Material Costs - The Material Price Index reported by Engineering News-Record (ENR) continues to rise. Mr. Heitzman reviewed the ENR charts showing a steep rise in materials costs. These are the result of China purchasing a bulk of the raw materials and also due to transportation costs. While not as drastic as the first four months of the year, it has increased another 1.5 percent from August and is

up 19 percent since January 2004. From one year ago the Material Price Index is up 26 percent. Ductile iron pipe, PVC pipe, steel, and copper water tubing are all major components of this index. The accelerated inflation rate is expected to be reflected in future bid prices, especially for projects involving steel, iron, copper, and cement.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report.

Third Quarter 2004 Customer Satisfaction Results – Customer satisfaction increased in the third quarter of 2004 back to the first quarter Total Customer Satisfaction Index (CSI) level of 845. The 2004 year-to-date average is 842 which exceeds the Corporate Level 1 goal of 840 for the Total CSI. Most of the CSI factors increased or remained stable with the exception of price/value which took a 12 point drop. This is the third drop in customer satisfaction with price/value that we have experienced this year. This is important to watch given the higher than usual rate increase proposed. Perceptions of water quality increased to a new all-time high of 892 for residential non-service customers. Customer satisfaction for the Service CSI recovered from the second quarter drop in satisfaction to 806, a new high for serviced accounts. The year-to-date average of 801 exceeds the Level 3 goal for customer satisfaction for the Corporate Performance Award (800). Satisfaction of residential customers increased for all factors and the residential service index score reached a new high of 812.

Service Rules and Regulations - A cross functional team was chartered in June 2004 to review and update the current Louisville Water Company Service Rules and Regulations. Since the last revision to the Service Rules and Regulations was completed in April 1996 the team was tasked with performing a comprehensive review and submittal of proposed changes. These revisions are anticipated to better serve customer needs consistent with our current practices and procedures. We expect to submit the proposed revisions to the Service Rules and Regulations to the Board for consideration and approval in late 2004 or early 2005. Mr. Huber noted that the new proposed Service Deposit would be a part of this revision.

LOJIC Update – A LOJIC Policy Committee meeting was held on October 1st to discuss several topics including partner operations and capital budget commitments for fiscal year 2005. Based on a total budget of \$1,489,000 for 2005 and the partners' ownership interests, LWC's annual contribution would increase to \$298,000 (\$93,000 capital and \$205,000 O&M) from its current funding level of \$72,000 per year. Due to funding gaps the Policy Committee agreed to put new capital investments on hold with the exception of the critical PVA's Computer Aided Mass Appraisal/GIS conversion project estimated at \$150,000. LWC staff has requested information from MSD on historical contributions of the partners to justify the requested increase in funding; this will be considered as part of the LWC 2005 O&M budget. Some adjustment of the current requested amount may be appropriate because we already pay a licensing fee, while other partners do not.

Closed Session

On the motion of Ms. Welsh, seconded by Dr. Wise, and unanimously carried, the Board went into closed session to discuss litigation pursuant to KRS 61.810(1)(c) and real estate pursuant to KRS 61.810 (1)(b) at 1:15 p.m..

Open Session Resumed

On motion of Mr. Martin, seconded by Dr. Wise and unanimously carried, the Board resumed open session at 1:29 p.m.

Mr. Huber advised that, although the Compensation Committee recently held a meeting, their report would be given at the next meeting since Mr. Conner, who chairs that Committee, is not present today.

Corporate Governance Changes

Ms. Dickens reviewed the revisions proposed to the By Laws. Some of these revisions are contingent upon approval by Metro Council of revised local ordinances pertaining to the Board of Water Works. Those ordinances are scheduled to be considered on the Metro Council consent calendar this week. Mr. Martin moved to amend the By Laws, contingent upon approval of the local ordinances by Metro Council, according to the changes reflected in the October 2004 Board Book and the addition to the responsibilities of the Vice President, Treasurer that he or she attend all board meetings and make reports on matters that need to be considered by the Board. Ms. Welsh seconded, and the motion carried.

Ms. Dickens discussed the Board's desire to have the Board officers and committee members nominated by a Board Nominating Committee. Ms. Dickens advised that the Board can create new committees by resolution. Dr. Wise moved to adopt the following resolution to create a Nominating Committee:

Whereas, the Board of Water Works may create committees by resolution according to its revised By Laws; and

Whereas, the Board of Water Works has determined that a Nominating Committee, made up of three board members, should be established for the purpose of making nominations of officers and board members to positions and committees, respectively; and

Whereas, the Board of Water Works has determined that the creation of the Nominating Committee is in keeping with best corporate practices;

BE IT RESOLVED, that the Board of Water Works Nominating Committee is hereby created to make nominations the Board Chair and Vice Chair, and Board committee members and any other related actions, as set forth in and pursuant to its Committee Charter.

Mr. Martin seconded, and the motion carried. Mr. Huber advised that it would be appropriate to appoint members to the Nominating Committee. Mr. Huber suggested the Board members to serve on the Committee be Mr. Martin, Ms. Willis and Dr. Wise. Ms. Welsh moved to assign those members to serve on the newly created nominating committee. Ms. Harris seconded, and the motion carried. Mr. Huber advised that the Nominating Committee's charge is to meet and make recommendations to the full Board for persons to serve as Chair and Vice Chair and on the Executive Committee.

Mr. Huber stated that staff is seeking direction from the Board regarding the role and function of an Executive Committee. Ms. Dickens presented a proposal regarding what matters would be appropriate for an Executive Committee and what matters should be reserved for the full Board. Ms. Dickens advised that the Board needed to decide whether the Executive Committee should be a committee that takes action on certain matters or who recommends action to the full Board. Mr. Rudy Davidson inquired whether the Mayor's representative would be a member of the Executive Committee. Mr. Huber stated that certainly the Mayor's representative would be encouraged to attend as a non-voting member. Mr. Martin believed this would provide a good flow of information to and from the Mayor's office. Dr. Wise suggested that the Executive Committee could be comprised of each of the Committee chairs. Mr. Huber responded that with four committees now, such a composition would be almost equivalent of the full Board.

2004 Dividend Calculation Considered

Mr. Miller provided this report. The Board revised the 2004 planned dividend from a budgeted level of \$12,698,880 to a targeted level of \$13,766,392 earlier this year in order to pay the dividend at the budgeted 2004 amount while fully funding the prepayment amount of \$1,067,512 from 2003. Staff anticipates that Louisville Water Company will likely be able to achieve the targeted dividend level despite significantly lower-than-expected water sales and with minimal or no dividend prepayment carried forward into 2005. The current forecast for the 2004 dividend is \$13,794,100 which, after deducting the prepayment amount from 2003, will allow for payment at the original budgeted amount.

LWC management has systematically evaluated alternatives to achieve the targeted dividend level; first, by increasing net income through expense reductions; second, by increasing net income through additional revenues; and third, by reducing the deductions from net income prior to the dividend computation. Following the 2003 earnings results and computation of the dividend prepayment, LWC management developed and executed expense reductions that included a workforce reduction accomplished through an early retirement incentive program. Following a revised forecast for lower water sales in 2004, LWC management developed a plan to offset the resulting decrease in net income through a four percent rate increase to be effective June 1st. This plan was considered in conjunction with an alternative to decrease the planned deposits to the Infrastructure Replacement Reserve. The Board determined that the preferred alternative was to repeat the tactic used in 2003 by decreasing the deposits to the Infrastructure Replacement Reserve. Following the lower water sales experienced during the extremely cool and wet summer irrigation season, LWC management evaluated alternatives to reduce the component items that are deducted from net income prior to the dividend computation.

When preparing the dividend forecast, management considered the deduction of the rate differential funds from the computation of the dividend. Louisville Water Company has acquired four water systems in recent years, each of which had significantly higher retail water rates. These rates were "frozen" at the time of the acquisition and the rate differential is computed and deposited into reserves used for funding the acquisition costs plus capital improvements needed to bring each system up to LWC system standards. The deposits to these reserves have previously been excluded from the dividend computation in a manner similar to the Infrastructure Replacement Reserve. However, LWC management has determined that this exclusion is not required by the 1992 Bond Resolution or by any contractual arrangements. This change in practice does not involve any change in the deposits to the Bullitt County Water Reserve or the Goshen Water Reserve and is consistent with generally accepted accounting principles.

Mr. Miller advised that the Company will likely be able to achieve the targeted 2004 dividend level by not making any deposits to the Infrastructure Replacement Reserve in 2004 and by not excluding the rate differential collected in acquired systems from the dividend computation. Staff is computing the additional dividend payments that may be possible from prior years due to this change in practice. Mr. Huber advised that staff reviewed this with our auditors, who acknowledged that this is a policy matter that does not require a change in the accounting practices. Dr. Wise asked what the annual value of the rate differential is. Mr. Huber advised it is approximately \$1.2 million. Mr. Martin stated he supports this and has looked at it carefully. The deduction is not required by the Master Bond Resolution or the system acquisition agreements. Mr. Martin noted that we spend more on upgrading the systems than we collect in the differential. We will still set this amount aside in a separate account and use it for the benefit of those systems as we have agreed to do. Ms. Welsh commented that there is some concern because we have not done this previously and we need to be prepared to answer the question of why this change in practice now. Mr. Huber advised we will equalize the rates of these systems with the LWC rates once their systems are up to our standards. Mr. Martin moved that we discontinue the practice of deducting the rate

differential funds from the calculation of net income available for dividend. Ms. Harris seconded, and the motion carried.

Preliminary 2005 Annual Budget Filed

Mr. Miller provided a summary of the Preliminary 2005 Annual Budget. When the budget development process began this year, staff identified several financial and budget management objectives. He provided an update to the Board on the status of the objectives. Mr. Miller advised the budget requires an increase in our rates of 6.5%, of which 3.2% represents a projected decrease in water consumption.

The Budget plans for funding for the Infrastructure Replacement Reserve in the amount of \$875,000, down by \$1,725,000 from the 2004 budgeted level of \$2,600,000. This reserve was not funded in 2003 or 2004 due to lower than expected water sales. The return on equity target in the proposed Budget is 9.22%, up from the previous target of 9.07%. The 2005 dividend to the City of Louisville is projected to be \$13,318,000, up \$619,400 or 4.9% from the previous budget.

Mr. Miller stated that over ten year planning horizon, increases in revenue requirements range from 4.0% to 4.5%. A full review of the Preliminary Annual Budget by the Board of Water Works is scheduled for November. Ms. Welsh moved to authorize the filing of the Preliminary 2005 Annual Budget with the Trustees and Metro Government by October 31, 2004. Mr. Martin seconded, and the motion carried..

Borrowing Reimbursement Resolution Adopted

Mr. Miller advised the Board may adopt a resolution announcing its intention to reimburse itself with the proceeds from the issuance of tax-exempt obligations for the expenditure of certain projects identified in the 2004-2008 Capital Expenditures Program. By adopting this resolution, the Board of Water Works will be able to replenish funds to be expended during the period from the date of the reimbursement resolution and the date of the bond issue. Mr. Martin moved to adopt the following resolution:

WHEREAS, the Board of Water Works of the Louisville/Jefferson County Metro Government, Kentucky (formerly the Board of Water Works of the City of Louisville, Kentucky, the Louisville/Jefferson County Metro Government being the governmental successor to such City as a result of operation of law), established and acting under the provisions of Section 96.230 through 96.315 of the Kentucky Revised Statutes (the "Board"), as the governing body of the Louisville Water Company (the "Company"), has received and reviewed the Company's 2004-2008 Capital Expenditures Program, more particularly described in detail in Exhibit No. 1, attached hereto (the "Construction Program");

WHEREAS, pursuant thereto, the Board has determined to make capital expenditures for purposes of the Construction Program of approximately \$236,846,714, all or part of which is to be financed from the proceeds of tax-exempt obligations to be issued from time to time by the Board; and

WHEREAS, construction and installation of certain components of the Construction Program are expected to commence prior to the date of receipt of the proceeds of tax-exempt obligations to be issued from time to time by the Company or the Board and it is therefore necessary for the Board or the Company to either borrow moneys on an interim basis from financial institutions and/or to advance moneys from funds of the Company on hand and temporarily available therefore, including, inter alia, the Depreciation Fund

and the Operation Fund, subject in the case of any such interim borrowing or advances to repayment or reimbursement from the proceeds of such tax-exempt obligations to be issued by the Board.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF WATER WORKS OF THE LOUISVILLE/JEFFERSON COUNTY METRO GOVERNMENT, KENTUCKY, AS FOLLOWS:

Section 1. The statements of fact set forth in the preambles to this resolution are hereby incorporated by reference in this Resolution and are declared to be true and accurate in all respects.

Section 2. The Board shall fund the Construction Program on an interim basis pending receipt of the proceeds of tax-exempt obligations of the Board by (i) interim borrowing from financial institutions and/or (ii) temporary advances from the Depreciation Fund and the Operation Fund of the Company. The Board shall hereafter issue its Water System Revenue Bonds for the purpose of funding all or part of the net costs of the Construction Program and shall, to the extent such interim borrowing and/or advances shall have been made, repay such borrowing and/or reimburse such advances.

Section 3. In accordance with the provisions of federal law, including Section 1.150-2 of the United States Treasury Regulations and the Board hereby determines and states that:

(a) The Company reasonably expects and intends to reimburse all or part of the Construction Program expenditures incurred with the proceeds of tax-exempt obligations of the Board.

(b) The declaration of official intent is being made under Section 1.150-2 of the United States Treasury Regulations.

(c) The reimbursements herein authorized are to be effected by application of the proceeds of Water System Revenue Bonds of the Board to be hereafter issued for reimbursing expenditures made in respect of the Construction Program for the years 2004 to 2008, inclusive, as identified specifically in Exhibit No. 1 attached hereto.

(d) The maximum principal amount of bonds to be issued for the five-year Construction Program is \$240,000,000.

(e) Reimbursement from the proceeds of such tax-exempt Water System Revenue Bonds shall be made to (i) any financial institutions providing interim financing for the Construction Program and/or (ii) the Company's Depreciation Fund and Operation Fund, which are required for other governmental purposes and are not available for such permanent financing.

Section 4. This Resolution shall be in full force and effect from and after its adoption.

Dr. Wise seconded, and the motion carried.

Contract Awarded for 99-416: Production Facilities and Solids System Improvements at Crescent Hill Pump Station

Six bids were received to construct an 800,000 gallon waste washwater tank, a four million gallon per day pump station, and drainage and solids transmission control and flow measurement at Crescent Hill Filter Plant. The construction of these facilities will improve filter backwash operations, provide system redundancy, and provide flow monitoring/control to optimize process waste generation and reduce the vulnerability of emergency discharge to the MSD combined sewer system. The apparent low bid is 32.5 percent below the engineer's estimate prepared by consultant CH2M Hill, Inc. Comparison of the estimate to the apparent low bid indicates the difference lies in cost estimates for rock removal,

mechanical equipment, and electrical materials. The contractor confirmed this bid is valid for the specified work. The adjusted project budget of \$4,167,000 includes \$975,000 for future improvements to the Zorn Lagoon, which is scheduled for construction in 2005. Ms. Willis moved to authorize the Process Owner, Procurement Services to award a contract in the amount of \$2,567,000 to Reynolds, Inc. for Crescent Hill Filter Plant Waste Washwater Tank and Pump Station. Ms. Welsh seconded, and the motion carried.

Contract Awarded for 10490 and 10491: Bullitt County Water Improvement Program Community Development Block Grant, Phase III

Five bids from pre-qualified contractors were received for Phase III of the Bullitt County Water Improvement Program, which involves furnishing and installing the following: approximately 53,762 lineal feet of 12, 8, 6 and 4-inch water mains, fifty (50) fire hydrant assemblies, and associated appurtenances. C.J. Hughes Construction Company submitted the lowest responsive bid in the amount of \$2,228,449. Bids were submitted for Alternate Bid Item A for the upsizing of water mains from 8 to 12-inch on Ridge Road and Clarks Lane, but were well above the engineer's estimate of \$399,000. Therefore, the upsizing of water mains from 8 to 12-inch is not recommended by staff for inclusion in the project. Bids were submitted for Alternate Bid Item B for the installation of a 6-inch grid tie on Clarks Lane to an existing water main from Serene Meadows Subdivision. C.J. Hughes Construction Company submitted a proposed Alternate Bid Item B in the amount of \$25,000, which is above the engineer's estimate of \$11,000. This is not a mandatory item. Ms. Teasley advised this grid tie could not be done as a separate project for a cheaper total project cost due to additional bidding and contractor's mobilization costs. Therefore, the installation of the 6-inch grid tie is recommended by staff for inclusion in the project, resulting in a total contract price of \$2,253,449. The base bid is 10.3% higher than the Project Manager's estimate. The resulting total unit cost for this project is \$41/LF. This amount is consistent with other water main extension projects of this difficulty and scope. Ms. Teasley reviewed contributions to be received in the way of tapping fees. Ms. Teasley reviewed total project cost of all three phases of this project. The CDBG Project Total of All Phases Apparent Low Bids is 6.1% above the Engineer's Estimate after Value Engineering, however, it is 2.18% below the independent cost estimate prepared by Project Services. The separation of the CDBG Project into 3 Phases and completing the Value Engineering has resulted in the CDBG Project Total of All Phases Apparent Low Bids being 14.78% lower than the December 2003 Apparent Low Responsive Bid. We have received a Community Development Block Grant (CDBG) in the amount of \$994,000 for this project. Dr. Wise moved to authorize the Vice President of Serving Customers & Business Development to establish a \$2,892,947 project budget of record for the CDBG Phase III Project and to award a contract in the amount of \$2,253,449 to C.J. Hughes Construction Company to install the water facilities associated with these projects. Ms. Willis seconded, and the motion carried.

Human Resources Information Technology Procurement Status Provided

Mr. Miller provided an update on the procurement of a new Human Resources Information System. Proposals were received in August from Solbourne (Oracle), AnswerThink (Oracle), Lawson, and Empower Solutions (PeopleSoft) for the Human Resources Information System (HRIS). AnswerThink has subsequently withdrawn their proposal. The remaining vendors represent the high-end functionality set of solutions for the company. Several mid-range providers were sent a set of specifications, however, none replied to the request for various reasons. The final cost must be within a 15% tolerance limit of the initial pricing as set forth in the RCN specifications to ensure initial pricing was based on the proposals submitted and not a general estimate in efforts to meet minimum requirements. The Board previously approved a capital cost of \$1,870,000 and total cost of ownership estimate of \$2,100,000 at the June meeting. The estimated five-year cost of ownership ranges from \$2,322,619 to \$3,486,368. The cost

projections are based on the initial pricing provided by the vendors in their proposals and other required costs for hardware, software, storage, database licensing, internal staff labor, and expenses for implementation services. The three remaining proposals received by LWC met the minimum criteria and will advance to the final evaluation rounds, which will include scripted demos, site visits, and technical discussions with the vendors. Final implementation plans and pricing will be submitted by the vendors following the site visits and a preferred vendor will be chosen to begin final negotiations. Management plans to bring the final recommendation and pricing to the Board in December 2004 for award of contracts and final budget approval.

Property and Casualty Insurance Renewed

Mr. Miller advised the Company's property and casualty insurance policies expire each September 30th and that policy renewals are not finalized until just prior to the new policy start date. The President authorized renewal of our excess liability insurance coverage with AIG in the amount of \$302,317 and continuing with a \$1 million self-insured retention, contracting with Affiliated Factory Mutual in the amount of \$95,214 for our blanket property insurance of \$166 million, and renewing our workers' compensation coverage with Midwest Employers Casualty for \$19,444 with an increased retention from \$400,000 to \$450,000. Only the contract with AIG requires ratification. Mr. Martin moved to ratify the contract renewal with AIG in the amount of \$302,317 for the Company's excess liability insurance coverage. Ms. Willis seconded, and the motion carried.

Apportionment Warrants Issued for Rocky Creek Lane: Back Run Road to North 2,290 Feet

Ms. Teasley reviewed the status of the distribution extension using the apportionment warrant method for Rocky Creek Lane. A public hearing was held October 29, 2002 for the extension of water service along Rocky Creek Lane: Back Run Road to North 2,920 feet. The Board of Water Works adopted a resolution for this extension to recommend extension to Fiscal Court on March 11, 2000 and Metro Council approved Ordinance No. 67, Series 2003 on April 10, 2003. The construction contract was awarded to Phillips Brothers Construction Company. With the completion of this private road water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the not-to-exceed cost of \$14,000.00 for each lot or tract abutting this extension and currently not served. Apportionment warrants will be assessed against 10 properties. Ms. Welsh moved to adopt the following resolution for the issuance of Apportionment Warrants and liens against 10 benefited properties along Rocky Creek Lane: Back Run Rd to North 2,920 feet in accordance with KRS. 96.265:

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Rocky Creek Lane: Back Run Rd to North 2,920 feet** main extension project authorized by Ordinance No. 67, Series 2003 of the Louisville/Jefferson County Metro Council, adopted on April 10, 2003 such warrants to be against ten (10) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$13,940.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Dr. Wise seconded, and the motion carried.

Change Action Approved for 03514: Blankenbaker Lane Main Replacement Project

Ms. Teasley advised that LWC has a construction contract in the amount of \$100,000 with Debbie Sutherland Excavating for the installation of the 12-inch and 6-inch water main along Blankenbaker Lane from Poplar Hill Road and Twin Hill Road. The original alignment of the project included the installation of 12-inch water main within the limits of Blankenbaker Lane. Rock removal was not anticipated along this alignment. Metro Public Works requested a change in the alignment – moving the pipeline to the east edge of the roadway where significant bedrock quantities were encountered. The total cost of the extras to this project is \$19,643.75. The proposed change exceeds the currently approved contract amount (\$100,000) by 19.6 %. Impact to the overall project budget is 14.4 %. Mr. Martin moved to authorize the Vice President, Serving Customers and Business Development to increase the contract with Debbie Sutherland Excavating to \$119,643.75 and to increase the project budget of record to \$156,343.75 to complete and close out this project. Ms. Harris seconded, and the motion carried.

Change in Scope Approved for 02-402: Overhaul Pump Unit #7 at CHFP

Mr. Heitzman advised Pump Unit #7, with a capacity of 35-millions gallon per day (MGD,) was scheduled for overhaul in 2003 at a budget estimate of \$235,000. The overhaul consisted of rewinding the 1,250 horsepower-13,800 volt motor, rebuilding the pump, and replacing the 30-inch suction and discharge valves. All bids received for this work were disqualified for various bidding irregularities. In addition, the low disqualified bid of \$347,500 exceeded the engineer's estimate of \$215,000. Comparison of the estimate versus the low bid determined the difference was in the cost to rewind the electric motor. The estimate was prepared based on previous bid results of electric motor rewinds. Staff has evaluated various scenarios to reduce project costs, including purchase of a new motor. After review, it is recommended to re-scope and bid the project because rehabilitating the motor is much more cost effective. Based on the bid market result and construction inflation, the new estimate to overhaul Pump Unit #7 is \$400,000. This brings the budget requirement to \$480,000, including engineering, inspection, and valve purchase. In order to reduce these bid informalities, the motor rewind portion of the project will be bid as alternate by two different methods, providing LWC the option to determine which rewind process provides the greatest value to the project. Ms. Welsh moved to increase the budget of Project 02-402 from \$235,000 to \$480,000, and to proceed to advertisement for bid to overhaul Pump Unit #7 at Crescent Hill Filter Plan. Dr. Wise seconded, and the motion carried.

Change in Scope Approved for 00-407 : Long Run Elevated Water Storage Tank

Mr. Heitzman provided an update for this project. The scope of the project is to construct a one million gallon elevated water storage tank operating within the 900 pressure zone to serve growth in eastern Jefferson County. This new tank will replace an existing 850,000 gallon ground storage tank located in the park. The project includes engineering, consultant services, easement acquisition and site improvements, tank construction, supply piping, telemetry, and drainage facilities. The tank will provide improved system pressure and fire flow to this portion of the service area. Since this budget was established in 2000, the tank construction industry has consolidated, thereby reducing competition. In addition, steel prices have increased 26 percent in the past 12 months. Finally, during a pre-construction meeting with potential bidders, radio frequency interference from the WHAS radio tower was identified as a potential issue during construction. Due to these factors, staff has evaluated the budget for the project and recommends adjustments for the project. Ms. Willis moved to increase the budget of Project 00-407: Long Run Elevated Water Tank from

\$1,350,000 to \$1,650,000, and to proceed with final design and advertisement for bid for the project. Mr. Martin seconded, and the motion carried.

Final Design and Approval Given for Network Attached Storage Device and Backup Disc Library System

Mr. Miller advised that the 2004-2006 IT plan identifies several strategies and objectives to continue to build upon the Storage Area Network technology to enhance our Disaster Recovery and Business Continuity capabilities. The Network Attached Storage device will utilize the existing Storage Area Network to allow for data consolidation of several application server platforms and will eliminate the current Novell server providing home directory storage, file and print services for network users at the Third Street and Allmond Avenue locations. An upgrade to the current backup and recovery environment to support the increase storage and bandwidth is needed to ensure reliable backup of desktop, application server, and data server devices over the network. The combination of the Network Attached Storage and Clariion Disk Library provide a scalable solution for improved data management and backup and recovery procedures. The 2005 Capital Improvement Plan includes \$220,000 for the Network Attached Storage device for Third Street Data Center and \$80,000 for the Backup and Recovery System upgrade which includes the Clariion Disk Library. Current estimates for the Backup and Recovery System upgrade are \$100,000. Ms. Welsh moved to increase the budget for the Backup and Recovery System Upgrade from \$80,000 to \$100,000 to provide adequate funding for storage necessary to support corporate backup needs and to bring forward funding in the 2005 budget for the final design and bid of these projects in the fourth quarter of 2004 for a total estimate of \$320,000. Ms. Willis seconded, and the motion carried.

Refinancing of Kentucky Infrastructure Authority Debt Approved

Mr. Miller advised the Company acquired three assistance agreements with the Kentucky Turnpike merger in September of 2000. The Kentucky Infrastructure Authority recently refinanced the Fund C loans which are the subject of the two of the three assistance agreements. These new agreements provide lower interest rates on the existing agreements, release of our existing reserve, and ability to make monthly interest and principal payments electronically. The balance on this debt is \$429,000 with a current rate of 5 ¼ to 5 ½ % interest and the new interest rate would be 3.4 to 4% . Dr. Wise moved to authorize the Vice-President, Treasurer to sign the Kentucky Infrastructure Authority closing agreements following review by General Counsel. Mr. Martin seconded, and the motion carried.

There being no further business, the meeting was adjourned at 2:40 p.m.

Respectfully submitted,

Barbara Dickens
Vice President, General Counsel and
Secretary to the Board of Water Works

**BOARD OF WATER WORKS
SPECIAL-CALLED MEETING MINUTES
October 26, 2004**

Board Members Present:

Mr. Stewart Conner
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Wendy Welsh
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson
Ms. Marita Willis

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Rick Johnstone, Deputy Mayor, Metro Louisville

The Special-Called Meeting of the Board of Water Works was held on Tuesday, October 26, 2004 in the Board Room of the Louisville Water Company. Mr. Huber called the meeting to order at 12:20 p.m.

Executive Committee Discussed

Mr. Huber stated the letter from Barbara Dickens to the Board of Water Works is to serve as a starting point for the discussion of what role the Executive Committee would have with the full Board. The letter suggested matters that could be reviewed by an Executive Committee versus matters that should be reviewed only by the full Board. Mr. Stewart Conner stated the first issue should be to address what type of matters should be considered by the full Board. Mr. Conner believes the Board currently is handling matters that should be handled by management. He feels this must be discussed regardless of whether there is an Executive Committee. He stated the items suggested by Ms. Dickens as Executive Committee matters should be handled by management without Board consideration. Those items include: All Claims for Review and Filing; Contracts over \$100,000 and up to \$1.5 million; Design and Bid for Projects exceeding the President's authority and up to \$2 million; Developer Extension Projects exceeding the authority of the President and up to \$250,000; Change orders and Changes in Scope exceeding the authority of the President and up to \$250,000; and property acquisitions up to \$250,000. Mr. Conner believes all of these matters should be within the authority of the President, with adequate and appropriate controls. Mr. Huber commented that many of those items are already informational only.

Mr. Gerald Martin agreed with Mr. Conner and also felt if more authority is given to management, the Board could hold quarterly meetings rather than monthly meetings. Mr. Conner stated the frequency of meetings is another issue and the necessary frequency would be more apparent after a few months of operation with the President having this new authority level.

Dr. Joseph Wise expressed concern with having two classes of Board members – those on the Executive Committee and those that are not. However, if the matters for possible review by the Executive Committee were within the President's authority, it would seem no Executive Committee would be needed, but it would address everyone's concerns regarding the issues being dealt with by the Board. There was general consensus that the Board currently takes action on items, for which it is given

sufficient information, but of which Board members have little technical understanding. This is a concern for Board members. Mr. Martin commented it is not atypical to have classes of Board members because of the varying responsibility and authority of committees on which they serve.

Dr. Wise inquired whether anything in the statutes or ordinances requires the Board to hear all of these items. Ms. Dickens advised that the only statute requiring Board action has to do with approval and appeals of Apportionment Warrants, and that the Apportionment Warrant program is nearing an end.

Ms. Wendy Welsh expressed it would be inefficient to have an Executive Committee that reviews items that are then considered by the full Board. Mr. Rick Johnstone summarized that the Board wants to take the items listed in Ms. Dickens' letter under Executive Committee and move those within the authority of the President, with assurance of appropriate controls for accountability. Board members were in consensus. Mr. Johnstone stated such a move would make the Board more strategic and less involved in operational issues that should be handled by management. Dr. Wise commented that, while this gives the President more authority, having a Board member serve as Board Chair provides one control mechanism.

Mr. Huber advised staff would prepare a report for a future meeting that lists current controls in place, proposed controls to address the additional authority to be given to the President, and a recommended resolution to give more authority to the President.

Ms. Welsh advised the auditors should be made aware of this at the beginning of 2005 so audits can be conducted with this in mind. Mr. Johnstone commented that the new Metro Government experienced this as well, and the Board may want to consider hiring a consultant to assist with developing and defining appropriate controls.

Mr. Huber discussed meeting frequency. While the Board certainly wants to evaluate how frequently it should meet, there are certain times of the year when there are not as many critical items for consideration, and other times when there are more, such as October and November due to budget consideration. Ms. Dickens reminded the Board its revised By Laws require it to approve a Board meeting schedule in December each year.

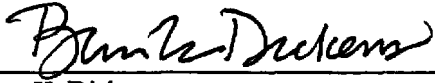

Mr. Huber asked whether Board members agree with the format of the officers' reports. Mr. Conner stated these are the most informative reports he receives, and he liked that the officers highlight the most important items from their written report for their oral report. Mr. Martin commented that the information they receive is redundant because they receive an Executive Summary, a written individual report, and then oral reports. Ms. Dickens advised that the Executive Summary was requested in the past by Board members, and that staff can continue to prepare it, but need not provide it if the Board members do not want it. The Board was in consensus that the Executive Summary is unnecessary.

Mr. Huber inquired whether, once the authority level of the President is increased, the Board wanted to be advised of actions taken by the President. Board members were in consensus that they do not need a report of all actions taken, so long as they have approved the controls and guidelines in place. The President would have to use his own discretion about what is important and necessary to be reported to the Board.

Mr. Huber advised staff will prepare the report regarding the controls along with a resolution to change the authority level of the President in the next couple of months.

There being no further business of the Board, the meeting was adjourned at 1:00 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and
Secretary to the Board of Water Works

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
NOVEMBER 9, 2004**

Board Members Present:

Mr. Stewart Conner
Mr. Gerald Martin
Ms. Wendy Welsh
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson
Ms. Margaret Harris

Others Present:

Mr. John Huber, President
Mr. Robert Miller, Vice President, Treasurer and Acting Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources and Controller
Mr. Jim Smith, Business System Owner, Infrastructure Planning
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Ms. Christy Ray, Notary Public

Visitors:

Mr. Larry Gattis, Black & Veatch Consulting Engineers
Ms. Debra Vaughn

The regular meeting of the Board of Water Works was held on Tuesday, November 9, 2004 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. John Huber called the meeting to order at 12:35 p.m.

Oath Given to Vice President, Human Resources and Organizational Effectiveness

The recent revision to the By Laws made the Vice President, Human Resources and Organization Effectiveness an officer of the Company, thereby requiring Susan Lehmann, who serves in that position, to take the Oath of Office. Christy Ray, a Notary in the Operations Core, administered the Oath of Office to Ms. Lehmann. The signed copy of the oath will be filed with General Counsel Barbara Dickens and with Louisville Metro Government.

Consent Agenda Reviewed and Approved

There were was one change to the consent agenda. Mr. Martin requested that the meeting minutes from the special called meeting on October 26, 2004 be revised as follows: At the end of the last sentence of the first paragraph on page two of the minutes, add "because of the varying responsibilities and authority

of committees on which members serve". Mr. Conner made the motion to approve the items on the consent agenda as revised, seconded by Mr. Martin, and the motion carried.

The List of Claims Paid in October 2004 was filed.

The following Petitions and Applications for Water Main Extensions and Relocations were approved:

<u>Developer Installed Projects</u>				
Project No.	Contract No.	Project Name	Total Project Cost	Net LWC Cost
10048	G931M	Blankenbaker Crossings Apartments	\$152,230.00	\$30,100.00
10430	G928M	Hunsinger Gardens	\$98,270.00	\$3,400.00
10441	G930M	The Paddock at Eastpoint	\$165,900.00	
10489	G935M	Interlink Counseling Service	\$12,580.00	
10509	G932M	Old Henry Business Park Ph. 1B	\$28,600.00	
10512	G933M	Woods of Feyhurst Section 2	\$23,050.00	\$1,300.00
10519	G929M	Ashley Furniture	\$11,900.00	
10528	G934M	Autumn Trace Condominiums Ph. 2	\$51,760.00	

The Board received the report of contracts less than \$100,000 as follows:

<u>Capital Program</u>		
02340	East Blue Lick Road McConahy & Stucker Company	\$24,620
<u>Procurement Of Materials And Services</u>		
03-02	Water Bottles - 1st PPI Renewal Louisville Container (Bottle C)	\$59,000

Administrative Report

Metro Council Ordinances: Mr. Huber reported that on Thursday, October 14, the Metro Council approved the changes proposed by the Board of Water Works to KRS 96.240. The changes established

the role of Chair and Vice Chair of the Board. The changes also clarify the President and CEO may or may not be a member of the Board.

Metro United Way Campaign: The Company is completing the Metro United Way Campaign. We were somewhat concerned giving might be down this year, especially in light of the fact we currently have 441 employees compared to 488 employees in 2003. Last year the campaign raised \$67,000. Employees were very generous this year. Despite having fewer employees, overall pledges to the Metro United Way Campaign are at approximately \$66,800.

Fayette County Election Results: The recent Lexington-Fayette Council elections resulted in a significant change in the Council makeup, especially as regards Council members supporting condemnation of Kentucky American's franchise to serve Lexington and Fayette County. Previously the Council supported condemnation of Kentucky-American's franchise by a 9-6 margin. Following the recent elections, the Council now stands at 9-6 against condemning Kentucky-American's franchise. We continue to work with water suppliers in Central Kentucky, including Kentucky-American, to seek a remedy to their water supply shortage. Our primary involvement continues to be exploring the possibility of a pipeline from Louisville to Central Kentucky to provide the needed supply.

Lead in Drinking Water: The continuing issue of lead in drinking water in Washington, DC and a subsequent article in the Washington Post alleging manipulated lead sampling and reporting in certain cities is having an impact on Congress and on EPA. Water Association staff in Washington, DC advise a change in the Lead and Copper Rule is probable. Additionally, Senator Jeffords has proposed setting a maximum contaminant level for lead at the consumer's tap.

Stage 2 Disinfection and Disinfection By-Products Rule: The water industry has been very concerned over language in the preamble to the Stage 2 Disinfection and Disinfection By-Products Rule. The language essentially states up to 16,000 miscarriages may be caused annually in the United States because of high levels of disinfection by-products. Of the scientific studies conducted to date and completed through peer review, only one shows a very weak relationship between higher levels (but within maximum contaminant level) of disinfection by-products and miscarriages. Other studies show no relationship. At a recent water industry meeting, an EPA official suggested new information may be forthcoming on this topic and is scheduling a meeting later in November to discuss the findings. Part of the conversation will also evaluate the best methods of communicating health risks. Louisville Water Company disinfection by-product levels are much less than the maximum contaminant level.

The report was filed.

Operations and Engineering Report

Mr. Heitzman presented the Operations and Engineering Report.

Production: The average production rate last month was 129.7 MGD, which was 6.3 percent higher than the 2003 October production rate of 122.1 MGD and 3.8 percent higher than the five-year average October production of 124.9 MGD. The higher than normal production rate last month was a result of dry weather conditions through October 12. During the first 12 days of October, the average production was above 150 MGD. Production then decreased to 120 MGD for the remainder of the month when a record amount of rain precipitated in the region. For year-to-date, the average production of 127.9 MGD was 1.0 percent lower than 2003 production of 129.2 MGD and 1.3 percent lower than the five-year average of 129.5 MGD.

Distribution Maintenance Activities: October maintenance activities were up significantly with 68 main breaks. The increase is largely attributed to dry weather conditions and the resulting effect on the soil moisture. Priority one backlog of work activity has risen to 108 units. Staff is working to reduce this to less than 50 units by December 1.

Winter Preparations: As reported last month, staff annually prepares for the possibility of a major winter event in the distribution system. The winter emergency plan has been expanded in scope to be used during any emergency that affects our ability to deliver safe drinking water to our customers. The annual winter emergency planning cycle is underway. The emergency plan has been revised and communication meetings have been held with staff responsible for each major area.

Financial Report

Financial Results: Mr. Miller reviewed the Statement of Revenues, Expenses and Changes in Net Assets with budget and prior year comparisons for financial results through October. Based on the revised financial plan adopted by the Board of Water Works in March 2004 and revised in May 2004, we expected to be \$188,500 above budget on net income for the month of October. The actual results were \$717,000 above budget due to higher revenues, lower operations and maintenance expenses, and higher interest income.

Insurance Broker Fees: Mr. Miller stated there have been significant challenges raised recently by the New York Attorney General and others regarding insurance industry practices of contingency commissions. Louisville Water Company revised its broker services contracts in 2001 to a flat dollar fee for service basis as the only compensation that the agent/broker may receive. If the agent/broker receives any commission or fee other than that paid out by Louisville Water Company for our services, then the amount is to be returned to Louisville Water Company. Staff will be contacting our brokers to ensure that all fees associated with our insurance contracts and services have been in accordance with our contract provisions.

Cost Reduction Planning for 2005: Mr. Miller discussed three primary risks that may prevent Louisville Water Company from achieving its net income and dividend objectives in 2005: higher expenses due to winter emergency maintenance; lower revenues due to decreased summer irrigation sales; and, higher expenses due to a catastrophic liability claim. Staff is developing cost reduction plans that can be implemented if needed in 2005 to mitigate the risk of failing to meet these objectives.

Serving Customers Report

Ms. Teasley presented the Serving Customers Report.

Performance Measures: The October 2004 abandonment rate was 8.5% compared to 3.9% in September 2004, and 4.9% in October 2003. The year-to-date abandonment rate is 5.4%. Factors contributing to higher call abandonment for the month included high call volume, staffing vacancies, and implementation issues related to mobile dispatch. Bad debt for the month of October was \$42,028 compared to \$55,842 in September 2004, and \$36,733 in October 2003. Bad debt is \$111 over budget for the month and \$38,558 over budget year-to-date.

General Assembly Special Session: Governor Ernie Fletcher called the General Assembly into Special Session in October to consider healthcare for state employees and retirees. Government Affairs monitored the activities of the session to determine potential costs to LWC for our retirees covered under

the state health insurance plan. The bill that passed the session has no impact on the Company but an important issue to follow for the upcoming session is the CERS Adjustment Fee for "Unescorted Retirees". This issue was raised during the special session and will likely be introduced again in 2005. An unescorted retiree is one who did not participate in one of the State Health Plans while employed. Past bills would require employers like LWC who have unescorted retirees to pay an adjustment fee to cover the health care cost of these employees once they retire. Estimated cost to LWC if the previously proposed legislation is enacted would be about \$200,000 annually.

Public Information Update: Feedback on the proposed water rate increase was solicited from our Customer Advisory Council. They advised staff to focus on the dollar amount not the percentage increase, promote cost reduction strategies and the impacts of reduced consumption. They also suggested we remind customers living in Goshen, Shepherdsville and the former Kentucky Turnpike district that their rates would not rise, and that water rates do not drive increases in sewer rates.

Compensation Committee Report Given

Mr. Stewart Conner provided a report of the discussion at the September 28, 2004 Compensation Committee meeting. Mr. Conner moved to approve board member stipends of \$100 per meeting, for regular, special and committee meetings. Mr. Martin seconded, and the motion carried.

Board Officers Elected

The Board of Water Works voted on October 12, 2004 to amend its By Laws to allow for a Board Chair and Vice Chair position. Metro Council voted on October 14, 2004 to amend the local ordinances that govern the Board of Water Works to allow these two new positions. In consideration of the Nominating Committee recommendation, Ms. Willis moved to approve the nomination of Stewart Conner as Chair of the Board and Wendy Welsh as Vice-Chair. Dr. Wise seconded, and the motion carried.

Resolution Passed to Adopt the Preliminary 2005 Annual Budget

Mr. Miller identified the major components of the Preliminary 2005 Annual Budget and described how the budgets are developed, controlled and funded. He reviewed the highlights of the Capital Budget and the Operating Budget. He summarized the drivers of the rate increase and described the future years' outlook for the Proforma Income Statement and Financial Plan. Mr. Miller recommended the adoption of the resolution to adopt the 2005 Capital and Operating Budgets, to authorize staff to prepare rate schedules based on a 6.5% rate increase and authorize certain capital projects. On motion of Dr. Wise, seconded by Ms. Welsh and unanimously carried, the Board adopted the following resolutions:

Resolved, that rate schedules be developed and presented by staff for a 6.5% increase, effective for water service beginning January 1, 2005 and thereafter.

Resolved, that the Preliminary 2005 Operating Budget submitted by staff be adopted as the approved 2005 Operating Budget.

Resolved, that the Preliminary 2005 Capital Budget submitted by staff be adopted as the approved 2005 Capital Budget.

Resolved, in respect to the Louisville Water Company 2005 Capital Budget submitted to and approved by the Board of Water Works this day, that the Board hereby delegates to the President of Louisville Water Company, or his designee, the authority to:

1. Proceed to completion for those Projects in the 2005 Capital Budget (and prior year Capital Budgets) with an estimated cost of \$100,000 or less.
2. Proceed with advertisement and bid of Annual Allowance Projects in the 2005 Capital Budget with the stipulation that all contracts exceeding \$100,000 be submitted to the Board for approval.
3. Proceed with preliminary engineering for those Projects in the 2005 Capital Budget estimated to cost over \$100,000 with the stipulation that each item will be fully explained to the Board and approval obtained before proceeding with final design and solicitation of bids.
4. Proceed to authorize contract change orders on those Projects in the 2005 Capital Budget (or prior year Capital Budgets) with an estimated cost of \$100,000 or less where such change orders do not cause the total contract cost to exceed \$100,000.
5. Proceed to authorize contract change orders on those Projects in the 2005 Capital Budget (or prior year Capital Budgets) with an estimated cost of over \$100,000 where such change orders do not exceed 10% of the approved contract price or \$100,000 in change order costs.
6. Proceed to authorize contract change orders on those projects in the 2005 Capital Budget with an estimated cost of over \$100,000, where such change orders exceed 10% of the original contract price, and when a documented business necessity exists, and ratification of such action is sought at the next regularly scheduled Board meeting.

And Resolved, that all contract expenditures greater than \$100,000 must be submitted for approval to the Board of Water Works prior to award and execution of the contract.

Contract Awarded for Bid 04-49: Radio Communications

One bid was received from Business Radio to provide radio communications for an estimated one-year total of \$106,700. This bid represents an 8.3% decrease in unit prices from previous bid in 1999. The Board discussed the continued need for radio service given the availability of cell phone service. A team will be formed to evaluate the radio communications infrastructure and business needs before bidding in 2005. Mr. Martin moved to authorize the Process Owner, Procurement Services, to award a one-year contract for an estimated total of \$106,700 to Business Radio. Mr. Conner seconded, and the motion carried.

Contract Approved for Bid 04-55: Worksite Security

A total of three bids were submitted to award a two-year contract for securing a safe worksite for Louisville Water Company personnel and the motoring public while minimizing traffic impediments. The lowest, most responsive bid was received from Off Duty Police Services for an estimated one-year total of \$283,705. This bid represents a .08% decrease in unit prices from the previous bid in 2002. The bid of Andy Frain has been disqualified for failure to honor bid pricing. Dr. Wise moved to authorize the Process Owner, Procurement Services, to award a two-year contract for an estimated total of \$283,705 to Off Duty Police Services. Mr. Conner seconded, and the motion carried.

Contract Awarded for Project 02658: HVAC Improvements for South Building at Allmond Avenue Distribution Center

Two responsive bids were received for improvements to the heating, ventilating, and air condition system at the main building at our Allmond Avenue facility. This contract will replace portions of the existing system dating from the 1967 construction of the facility. This system has become inefficient and is undersized. The contract consists of replacement equipment supplemented with several individual zone-control units delivering improved air distribution, plus energy management. There were five alternate bid items for which bids were also solicited. The lowest and most responsive bid for the base bid and alternate bid items 2-5 was submitted by G.B.M.C., Inc. Ms. Welsh moved to authorize the Process Owner, Procurement Services to award a bid to G.B.M.C., Inc. for the base bid alternate bid items 2 through 5 for \$424,071 and to increase the budget of record to \$507,071. Dr. Wise seconded, and the motion carried.

Contract Awarded for Project 10280: US 42 – Mayo Lane 12” Water Main Installation and Alternate Grid-Tie

Five bids were received and four were opened from pre-qualified contractors (one bid was returned unopened to a bidder that did not meet all pre-qualification requirements) to install approximately 3,675 lineal feet of twelve-inch PVC pipe, 55 lineal feet of twelve-inch DPW pipe, 4 fire hydrants, and 14 service transfers along Mayo Lane between US 42 and 2575 Mayo Lane (*Base Bid*). Bids were also received and opened to install 400 lineal feet of twelve-inch PVC pipe and 490 lineal feet of DPW pipe including 1 service transfer between 2575 Mayo Lane and Longwood Lane (*Alternate Bid*). This 12” water main will replace the existing 6” PVC water main, and the alternate grid-tie will provide a 12” connection to the proposed Goshen Tank along Highway 1793. MAC Construction & Excavating, Inc. submitted the lowest responsive bid in the amount of \$224,440 (base) and \$70,000 (alternate grid-tie) resulting in a total project cost of \$414,440. The bid is 8% under the Project Manager’s Estimate. The resulting total unit cost for this project is \$89.70 per lineal foot. This unit price compares favorably with other 12” water main projects of this difficulty and scope. Mr. Martin moved to authorize the Vice President of Serving Customers & Business Development to award a contract in the amount of \$294,440 to MAC Construction & Excavating, Inc to install the water facilities associated with this project and to establish a \$414,44 project budget of record for the Mayo Lane 12” Water Main Installation & Grid-Tie Project. Ms. Willis seconded, and the motion carried.

Apportionment Warrants Issued for Scotts Gap Road: End of Existing Water Main to County Line

With the completion of the public road water main extension in Scotts Gap Road, the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the not-to-exceed cost of \$5,450.00 for each lot or tract abutting this extension and currently not served. Apportionment warrants will be assessed against 16 properties. Mr. Conner moved to adopt the following resolution for the issuance of Apportionment Warrants and liens against 16 benefited properties along Scotts Gap Road: End of existing water main to County Line in accordance with KRS. 96.265, as described:

Resolved, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of Scotts Gap Road: End of existing water main to County Line main

extension project authorized by Ordinance No. 19, Series 2001 of the Jefferson Fiscal Court, adopted on August 28, 2001 such warrants to be against sixteen (16) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Ms. Willis seconded, and the motion carried.

Change Action Approved for Project 03603: Goshen Area Main Replacement

Ms. Teasley reported that on November 24, 2003, the Company entered into contract G-559 in the amount of \$638,700 with Southern Pipeline Construction Co. for the replacement of approximately 12,600 feet of 6, 8 and 12-inch water main in the Goshen area. As part of this project, customer service meters have been relocated from customer's backyards and basements to their front yards and attached to the newly installed water mains. Once customer services have been relocated, mains located in non-standard locations have been abandoned. A companion project, administered by Middletown, is also underway in the Goshen area to relocate non-standard meters along roadways where mains will not be replaced.

A 6-inch water main is located in the backyards of residents along a portion of Meadowridge Trail. Because of the location and difficulty of continued maintenance, this main has been targeted for abandonment. During construction, it became evident that many of the services were in fact attached to the 6-inch main in the backyard, and in order to abandon the 6-inch main, these customer services would need to be relocated.

There are fourteen services along Meadowridge Trail that require relocation. Unfortunately, the existing water main along Meadowridge Trail is AC pipe. Due to the lack of structural strength, tapping or other construction activities involving AC pipe commonly result in collateral breaks and leaks along the main. To avoid these persistent maintenance activities, we plan to replace the AC main with approximately 1,200 feet of 6" HDPE water main. In addition to the fourteen water services being relocated, eleven additional water services will be transferred to the new HDPE water main. The cost of this extra work is estimated to be \$115,280.

To minimize disturbance and the amount of surface restoration, directional drilling was specified for this project. Directional drilling is a very effective method of pipe installation provided a suitable alignment, free of rock and other utilities is encountered. Along a portion of Goshen Lane and Springmeadow Drive, utility conflicts and high rock levels were encountered that prohibited the use of this type of trenchless technology. The only suitable alternate alignment was located in the roadway and required the use of traditional trench installation techniques. Additional costs (approximately \$30/lf) were incurred by the Contractor to excavate, install the main and restore the pavement along 1,500 feet of the alignment. The additional cost to install the main in the pavement was \$45,750. The total extras for this project total \$161,030. The proposed change exceeds the currently approved contract amount (\$638,700) by 25.2 %. Impact to the overall project budget is 20.7 %. Mr. Martin moved to authorize the Vice President, Serving Customers and Business Development to increase the contract with Southern Pipeline Construction Co. to \$799,730 and to increase the project budget of record to \$938,730 to complete this work. Ms. Willis seconded, and the motion carried.

Financial Advisor Selected

Mr. Miller advised that staff requested a proposal from Public Financial Management, Inc. for financial advisor services. PFM is the leading provider of independent financial and investment advisory services to municipally owned utilities, state and local governments, and special districts and authorities. PFM also currently served as financial advisor to Metro Government for recent bond issues. PFM is not a broker or dealer and will not bid on the Company's bonds. The scope of work in the request for proposal contained three parts: Debt Management Planning; Metric Benchmarking; and, Bond Issue Financial Advisor Services. The first two components were proposed as fixed fee items, while the third component was proposed as a fee per \$1,000 bond basis. After considering the references and fee proposal, staff recommends selection of Public Financial Management, Inc. as financial advisor for Part A: Debt Management Planning and Part C: Bond Issue Financial Advisor Services. Staff also recommends that the Part B: Metric Benchmarking component be deferred pending further consideration of alternative methods to update our metric benchmarking methodology and targets. The fee for Part A: Debt Management Planning is not to exceed \$50,000. The fee for Part C: Bond Issue Financial Advisor Services will be scaled based on the issue amount of the bonds. Mr. Martin moved to authorize entering into an agreement for financial management services with Public Financial Management. Ms. Willis seconded, and the motion carried.

Discussion of Information Provided About Outside Legal Services Deferred

Ms. Dickens had provided information in the Board materials about how the company has been retaining outside legal counsel and who has been providing these services. Ms. Dickens was unable to attend this meeting and the discussion of these materials was deferred.

Closed Session

On motion of Ms. Welsh, seconded by Ms. Willis, and unanimously carried, the Board went into closed session to discuss litigation pursuant to KRS 61.810(1)(c) and real estate pursuant to KRS 61.810 (1)(b) at 2:10 p.m..

Open Session Resumed

On unanimous consent of the Board members, the Board resumed open session at 2:40 p.m. There was no action as a result of closed session.

There being no further business, the meeting was adjourned at 2:40 p.m.

Respectfully submitted,

Robert K. Miller
Vice President, Treasurer and Acting Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
DECEMBER 14, 2004**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Mr. Greg Heitzman, Vice President, Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

Visitors:

Mr. Larry Gaddis, Black & Veatch Consulting Engineers

The regular meeting of the Board of Water Works was held on Tuesday, December 14, 2004 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Mr. Stewart Conner called the meeting to order at 12:59 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes, seconded by Dr. Joseph Wise, and the motion carried. Mr. Conner advised the members of the BOWW that the items usually listed on the agenda but not requiring board approval have been removed from the agenda and the Board book.

Chief Executive Officer Report Provided

Mr. John Huber provided an update regarding the progress of the study of the setting of the new authorization levels for management to approve contracts and projects. Staff is also in the process of developing a system of internal controls to govern the new process.

Mr. Huber advised that the company received a notice from the County Employees Retirement System (CERS) that company contribution rates will rise in July 2005 from 8.4 to 10.9 per cent. He advised that the company anticipated some change and budgeted for it, but had not expected an increase this high. The impact to the company's budget is about \$130,000. Mr. Robert Miller explained that the three main drivers of this increase are retirement plan investment losses, a

phase-in of the insurance actuarial accrued liability, and differences between the expected and actual experience in turnover, mortality, disabilities, and salary increases.

Mr. Huber advised that a steering group of three board members – Dr. Wise, Ms. Marita Willis, and Mr. Martin – will assist management in making decisions regarding advanced treatment technology for the Crescent Hill Treatment Plant.

Financial Report Provided

Mr. Miller reviewed the Statement of Revenues, Expenses and Changes in Net Assets with budget and prior year comparisons for financial results through November. He stated the Company will achieve more cost reductions than were targeted at the beginning of the year. Based on the current forecast, we will be at or near the targeted dividend amount for the year. In response to a question received from Mr. Martin prior to the meeting, Mr. Miller noted that Contributions in Aid of Construction are lower than budgeted for the month and for the year-to-date due to lower amounts of reimbursements for pipeline relocations and due to an erroneously high budget amount.

Operations and Engineering Report Provided

Mr. Heitzman presented the Operations and Engineering Report.

Production – The average production rate last month was 116.6 MGD, which is typical for the month of November as indicated by the five year average production level of 116.7 MGD. The year-to-date average production of 126.9 MGD was still 1.0 percent lower than the 2003 production of 128.1 MGD and 1.2 percent lower than the five year average of 128.4 MGD. This is attributed to the erosion of the water sales base and cool, wet weather conditions throughout the year.

Winter Preparation - Winter preparation activities have been on-going for approximately two months. One activity is to reduce the backlog of maintenance work in the distribution system. The high priority backlog is 80 units, down from 108 units at the end of October, with a target of 50 or fewer units by the end of December, prior to the peak winter maintenance period. Staff has initiated a plan to reduce the backlog by working crews on Saturdays and also using managed overtime. High priority work includes leaking services, leaking mains, and other situations where surface water can pool and freeze during cold winter months.

Serving Customers Report Provided

Ms. Teasley presented the Serving Customers Report.

Performance Measures – The November 2004 abandonment rate was 6.5% compared to 8.5% in October 2004, and 3.7% in November 2003. The year-to-date abandonment rate is 5.5%. Bad debt for the month of November was \$45,832 compared to \$42,028 in October 2004, and \$48,559 in November 2003. Bad debt is \$3,915 over budget for the month and \$42,477 over budget year-to-date.

Service Rules and Regulations - Beginning in June of this year, a cross functional team was chartered to revise the current Service Rules and Regulations to make them consistent with

current practices and to better serve customer needs. Through regular team meetings suggested changes were recommended and these revisions were reviewed by upper management to ensure consistency and enforceability. The proposed changes have also been shared with the Customer Advisory Council and the LWC work group of the Homebuilders Association of Louisville for their input. It is anticipated that the revised Service Rules and Regulations will be submitted for Board approval in early 2005.

Airport 60" Main Relocation - Staff met with representatives of the Regional Airport Authority (RAA) on November 23, 2004 to discuss their participation in funding the relocation of the 60-inch transmission main that lies in the area planned for extension of airport runways in 2006. The RAA is considering LWC's request, though it has made no commitment to participating. Staff is continuing to pursue reimbursement from the RAA for a portion of the project cost currently authorized at \$3.91 million.

Fort Knox Update - Fort Knox officials announced in November that Hardin Co. Water District No. 1 will take ownership of the sanitary and storm water sewer systems at Fort Knox. This action follows the Army's plan to privatize all utility systems on the base. Electrical power utility facilities have already been privatized and the water system ownership is scheduled for transfer to the Lincoln Trail Regional Water Commission in November 2005. Hardin Co. Water District No. 1 will take over operations of the sanitary and storm water sewer systems on February 1, 2005 and contract day-to-day operations to Veolia Water - North America for \$1.5 million per year. LWC staff will continue to work with the Lincoln Trail Regional Water Commission, primarily through Quest, their consulting engineers, concerning their long range plans for the water system and opportunities for future water sales. These contracts will be renegotiated in three years.

Lebanon Junction Update - Legal counsel for the City of Lebanon Junction recently proposed some minor changes on references to LWC Service Rules in the proposed wholesale contract for clarity. Lebanon Junction has scheduled a special City Council meeting for Thursday, December 9 for final approval of the contract.

Closed Session

Dr. Wise moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) at 1:37 p.m. Ms. Willis seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Wendy Welsh, seconded by Dr. Wise, and unanimously carried, the Board resumed open session at 2:05 p.m. Dr. Wise moved to authorize the President to enter into an agreement with U. S. Pipe Foundry Company for reimbursement for inspection, servicing and repair of 5,878 U. S. Pipe Metropolitan 250, Model 94 fire hydrants purchased between 1997 and 2003, once final approval of the agreement is given by the General Counsel. Ms. Margaret Harris seconded, and the motion carried.

Audit Committee Report Given

Ms. Wendy Welsh provided a report of the December 10 2004 Audit Committee meeting. Regarding the warehouse inventory, the Audit Committee had expressed concern regarding variances in inventory at its previous meeting in August. Mr. Brammell, the system owner for

Managing Distribution Operations, had provided an update at the December Audit Committee meeting and steps are being taken or have already been taken to address the issues causing the variances. Ms. Welsh advised that management is considering the feasibility of acquiring the warehouse module for the financial reporting software system. The committee also discussed the findings of the Pipeline Inspection and Metering Services audits. The committee considered an amendment to its Charter to include responsibility to review and assess the procedures for receipt and retention of complaints. The Charter will be considered by the full Board at the January meeting.

2005 Water Rate Schedule Approved

Ms. Amber Halloran advised an overall 6.5 % water rate increase was adopted at the Board's November 9, 2004 meeting in conjunction with the 2005 Budget. Staff recommends the proposed rate schedule recommended for adoption effective for retail water service on and after January 1, 2005 and for wholesale water service on and after May 1, 2005. The proposed rate schedule was developed in accordance with a cost of service study based upon the methods suggested in American Water Works Association Manual M1, Water Rates. The wholesale water rates for service to North Shelby Water Company and West Shelby Water District also require approval by the Kentucky Public Service Commission. Ms. Welsh moved to adopt the 2005 Water Rate Schedule. Ms. Harris seconded, and the motion carried.

2005 Service Installation Fees, Meter Fees and Miscellaneous Fees Approved

Ms. Karla Teasley provided the report on Service Installation and Meter Fees. In compliance with Service Rule 1.04 new customers are charged the cost of installation of the water service pipe and meter vault. This charge is a flat fee or deposit approximating the anticipated cost of the installation. These fees are reviewed annually for adjustment based upon actual costs from preceding years.

While the average service installation cost increased for ¾-inch and 1-inch domestic services, ¾-inch retrofit irrigation services, and 6-inch and 8-inch fire services, average installation costs decreased for 1 ½-inch, 2-inch, 3 and 4-inch domestic services, and 4-inch fire services. The increase in installation costs is primarily due to increased rock excavation and the method by which the cost of equipment is allocated to service installation projects, which is to allocate based on the actual cost of ownership and maintenance of each item. Mr. Martin moved that new service installation, temporary meter, fire flow and miscellaneous installation fees in effect for 2004 remain the same for 2005. Ms. Welsh seconded, and the motion carried.

Fourth Quarter Dividend Declared

Mr. Miller advised that Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City, and the final quarterly payment is due at this time. The payments are based on the estimated annual net income and each quarterly payment should be as equal as possible. The estimated net income of \$28,070,100 for 2004 requires payment of an annual dividend of \$13,766,393 in quarterly installments of \$3,441,598. The quarterly dividend payment must be decreased by \$266,878 to reflect one quarter of the \$1,067,515 dividend prepayment in 2003. Dr. Wise moved to adopt the following resolution, seconded by Ms. Willis, and unanimously carried:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 9, 2004 to adjust the 2003 annual dividend by \$1,067,513, from \$12,318,832 to \$11,251,319, the difference to be subtracted in equal quarterly installments from the quarterly 2004 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the Louisville Water Company estimated annual net income for 2004 is \$28,070,100 and the projected annual dividend computed in the manner specified in the 1992 Bond resolution is \$13,766,393 and considering dividends declared earlier this year, it would be in order at this time to declare a regular fourth quarter dividend of \$3,441,598;

BE IT RESOLVED, the regular fourth quarter 2004 dividend of \$3,441,598 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,174,720 to the Louisville / Jefferson County Revenue Commission on December 30, 2004, this being the third quarterly dividend for 2004 less one quarter of the dividend adjustment for 2003, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Mr. Miller also reviewed the Board's action taken October 12, 2004 to discontinue deducting the system reserves when calculating the dividend. Mr. Miller advised that this practice, which was not required by the Master Bond Resolution or any law or policy, began in 2002. Staff recommends retroactively applying this practice back to 2002, which results in an additional payment of \$1,320,000 to be paid to Metro Government for amounts that would have been paid in 2002 and 2003 had the dividend been calculated without deducting the system reserves. Ms. Welsh moved to amend the board's action taken on October 12, 2004 to allow the revised dividend calculation, which does not deduct the rate differential funds, to be applied retroactively back to 2002. Mr. Martin seconded, and the motion carried.

Goshen Utilities Merged into Louisville Water Company

During the due diligence phase of acquiring Goshen Utilities, Inc. concerns were raised regarding the safety and integrity of the infrastructure in place in the Goshen Utilities service area. As a result, the decision was made to acquire GUI as a wholly-owned subsidiary of the Louisville

Water Company. Over two years have passed and many improvements have been made to the infrastructure, thereby eliminating any liability concerns at the time of the acquisition.

The operation of GUI as a wholly-owned subsidiary requires LWC to file additional reports and take additional samples. The reporting and testing requirements once GUI is merged into LWC will still be required, but only as a part of the reporting and testing requirements for LWC and not separately. This will eliminate redundant reporting and testing. The rate differential funds will continue to be placed into a separate account, known as the Goshen reserve, to be used for system improvements until the system is brought up to LWC standards. Mr. Martin made the following motion, seconded by Ms. Harris, and unanimously carried:

WHEREAS, in order to create efficiencies and to streamline certain operations and reporting obligations, the Directors deem it to be in the best interest of the Louisville Water Company (hereinafter referred to as the "Company") and its sole shareholder that the wholly-owned subsidiary of the Company, Goshen Utilities, Inc., a Kentucky corporation (hereinafter referred to as "Goshen"), be merged with and into the Company; and

WHEREAS, in order to expedite the process of such merger, the Directors desire to authorize the officers of the Company, as sole shareholder of Goshen, to remove all of the current members of the board of directors of Goshen and elect new directors of Goshen.

NOW, THEREFORE, BE IT RESOLVED, that the Directors hereby approve and authorize the merger of Goshen with and into the Company in accordance with the terms and conditions set forth in an Agreement and Plan of Merger, a copy of which is attached hereto as Exhibit A ("Merger Agreement"); and

FURTHER RESOLVED, that the Directors waive any requirement of prior written notice to the Company of such merger and further authorize any officer of the Company to formally waive such notice and to execute any document necessary to confirm the Company's approval of such merger in its capacity as sole shareholder of Goshen; and

FURTHER RESOLVED, that each of the officers of the Company is hereby authorized and empowered, acting individually or collectively, on behalf of the Company, to execute the Merger Agreement, Articles of Merger and any and all other documents, and take all such further action as may be necessary or appropriate, in connection with such merger; and

FURTHER RESOLVED, that each of the officers of the Company are authorized and directed, on behalf of the Company, acting in its capacity as the sole shareholder of Goshen, to remove all of the current members of the board of directors of Goshen and to elect the following individuals as the new directors of Goshen: Stewart Conner; Wendy Welsh, and Dr. Joseph Wise; and

Ms. Harris moved to adopt the following resolution, seconded by Dr. Wise, and unanimously carried:

WHEREAS, the sole shareholder of the Corporation has determined that it would create efficiencies and streamline certain of the operations and reporting obligations of the sole shareholder and the Corporation if the Corporation were merged with and into the sole shareholder; and

WHEREAS, in order to expedite the process of such merger, the sole shareholder desires to remove all of the current members of the board of directors of the Corporation and elect new directors of the Corporation.

NOW, THEREFORE, BE IT RESOLVED, that the sole shareholder hereby approves and authorizes the merger of the Corporation with and into the sole shareholder in accordance with the terms and conditions set forth in an Agreement and Plan of Merger, a copy of which is attached hereto as Exhibit A and further waives any requirement of prior written notice to the sole shareholder of such merger; and

FURTHER RESOLVED, that all of the current members of the board of directors of the Corporation are hereby removed and the following individuals are elected as the new directors of the Corporation, which directors shall serve until the earlier of their respective death, resignation, removal or the effectiveness of the merger: Mr. Stewart Conner, Dr. Joseph Wise and Ms. Wendy Welsh.

Contract Awarded for Bid 04-69: Ductile Iron Pipe and Fittings

Five bids were submitted for a one-year contract for ductile iron pipe and fittings. Pipe and fittings are used throughout the LWC infrastructure. Re-bidding was necessary because the supplier under the previous contract, US Pipe, declined to renew at PPI renewal pricing due to industry wide increases on iron and metal construction products. The lowest, most responsive bids were: U.S. Pipe (pipe and standard fittings) in the amount of \$2,408,451; Harco, Inc. (non-standard fittings) in the amount of \$116,312; and WaterWorks Supplies (non-standard fittings) in the amount of \$6,817, for a total contract amount of \$2,531,580. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a one-year contract totaling an estimated \$2,531,580 to the suppliers above. Ms. Willis seconded, and the motion carried.

Contract Awarded for Bid 04-85: EMC Clariion Disc Library and Network Attached Storage

Two bids were received for a contract for the purchase, delivery and installation of EMC hardware, including a Clariion Disc Library and Network Attached Storage. This is a component of our business disaster recovery plan. The lowest, most responsive bid was from Pomeroy IT Solutions for a total amount of \$311,294. Ms. Willis moved to authorize the Process Owner, Procurement Services, to award a contract totaling \$311,294 to Pomeroy IT Solutions. Dr. Wise seconded, and the motion carried.

Contract Awarded for Bid 04-82: Chlorine Cylinders for B. E. Payne Plant

Five bids were received to award a nine-month contract for liquid chlorine cylinders for B.E. Payne Treatment Plant. Chlorine is used for water treatment. Re-bidding was necessary due to previously awarded supplier, JCI Jones, canceling its contract. JCI Jones has been disqualified from bidding for a period of one year. The lowest, most responsive bid was received from Univar for an estimated nine-month total of \$121,666. Mr. Martin moved to authorize the Process Owner, Procurement Services, to award a nine-month contract totaling an estimated \$121,666 to Univar. Dr. Wise seconded, and the motion carried.

Contract Awarded for Bid 04-80: Steel Casing Boring and Jacking

Three bids were received for a one-year contract for steel casing boring and jacking. This contract will be utilized for horizontal drilling and jacking steel casing pipe. The lowest, most responsive bid was from M & A Construction Company for an estimated one-year total of \$211,290. Dr. Wise moved to authorize the Process Owner, Procurement Services, to award a one-year contract totaling an estimated \$211,290 to M & A Construction Company. Ms. Welsh seconded, and the motion carried.

Contract Awarded for Project 10524: Highway 44 Main Replacement

Four bids were received to install 5,430 linear feet of 6, 8, and 12-inch ductile iron water main along Highway 44 in Shepherdsville, Kentucky. MAC Construction and Excavating submitted the lowest responsive bid in the amount of \$339,300 resulting in a total project cost of \$517,500. Mr. Martin moved to authorize the Vice President, Serving Customers & Business Development, to award a contract in the amount of \$339,300 to MAC Construction and Excavating to install the water facilities associated with this project.

Contract Awarded for 05-10601, 05-10602, and 05-10605: New Service Installations

Bids were received for 3-year renewable service contracts to begin in 2005 for new service installations. Contracts could be renewed annually for two additional years if contractors have satisfactory performance in completing jobs that internal crews cannot complete due to workload. Mr. Martin moved to authorize the Purchasing Manager to extend a unit price contract to Basham Construction & Rental for ¾" & 1" services not to exceed \$948,000, to Tom Brown Construction for 1 ½" & 2" services not to exceed \$148,250, and Tom Brown Construction for Fire Services not to exceed \$219,760. Ms. Welsh seconded, and the motion carried.

Contract Awarded for Bid 03-52: Stainless Steel Tapping Sleeves – 1st PPI Renewal

Bids were received for a one-year contract for tapping sleeves, renewable for up to two additional one-year terms, utilizing the Producers Price Index for "Other Steel casting, high alloy and stainless steel" as the cost adjustment factor. These tapping sleeves are used to make service installation taps on PVC pipe. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a renewable one-year contract totaling an estimated \$172,976 to Hughes Supply Company for tapping sleeves. Mr. Martin seconded, and the motion carried.

Information Provided Regarding Outside Legal Services

Ms. Dickens gave a report regarding outside legal services providers utilized by the Louisville Water Company. Ms. Dickens advised which firms have provided legal services in 2004. These firms were retained based on the type of legal services needed, and rates and terms have been negotiated and confirmed in letter agreements. Ms. Dickens believes having various legal providers encourages competitive rates, quality service, effective representation, and responsiveness. Ms. Dickens also discussed the types of legal work being provided in-house. Currently, legal service providers are not operating under a RFP for Legal Services. Mr. Conner discussed issues arising from obtaining legal services through a RFP.

Update Provided Regarding Human Resources Information System

Mr. Miller discussed the project status for the procurement of a new Human Resources Information System since the Board was updated in October. The project team has completed its final round of evaluations of implementers and software for the HRIS/Payroll project. In completing the final evaluation, the team considered the following components: software functionality shown during scripted demos and site visits; assessments of implementations at site visits; revised vendor Implementation Plan; and costs. Each vendor was evaluated on a 100 point scale. The results of the evaluation process placed Empower/People soft with the highest evaluated total at 74.13 points. While not the lowest cost solution, Empower Solutions and PeopleSoft are best able to meet the needs of the organization with consideration to costs. Because of PeopleSoft's functionality, the software will allow LWC to make needed process improvements and custom service enhancements with minimal customization. The Board previously had approved a capital cost of \$1,870,000 and total cost of ownership estimate of \$2,100,000 at the June meeting. The cost projections are based on the revised pricing provided by the vendors in their proposals and specific discussions with the vendors on recommended technical platform. The five year cost of ownership is currently projected at \$3,040,617.

Ms. Welsh expressed concern regarding the merger of Oracle and PeopleSoft from the standpoint of future support of and updates to the system. She expressed the likelihood of a reduction in force at PeopleSoft and that may affect product support, and LWC staff should be mindful of the interface costs. Mr. Conner stated this is an expenditure of \$7,000 per employee and that seemed high. Mr. Miller stated that the lower cost solutions do not offer the functionality or interconnectivity that we need. Mr. Conner believes an in depth cost benefit analysis must be performed. Mr. Miller offered to provide additional information regarding what savings the company will recognize by having a new system, such as the elimination of costs for Ceridian. Mr. Conner stressed that board members need to see this before this contract comes to the board for approval. In response to an inquiry regarding the use of the Metro Government's PeopleSoft license, Mr. Miller stated that this has been considered, but PeopleSoft considers the Metro Government and LWC as two separate entities. Mr. Conner asked whether any other entity such as MSD could join in with LWC in its purchase of a new system. Mr. Miller did not believe this is feasible.

Medicare/Retiree Medical Insurance Renewal Approved

Susan Lehmann advised the Board that the Company provides group medical insurance to former employees (and their eligible dependents) who retired prior to the conversion of our retirement program to CERS in 1990 and who pay a portion of the premium. Seventy-eight policies remain, and that number continues to decline, resulting in marketing challenges.

If the retiree population remains stable and enrollees opt to have the same plan as 2004, the estimated value of the insurance contract for Retiree medical coverage is \$118,548 under the new rates, when using the Anthem Low as the base rate. After deducting the estimated retiree contribution, LWC's estimated net cost is \$103,054, an estimated increase in contract value from 2004 to 2005 of 6.7%. Ms. Welsh moved to authorize the Vice President, Human Resources and Organizational Effectiveness to award a contract to Anthem Blue Cross/Blue Shield in the amount of \$118,548. Ms. Willis seconded, and the motion carried.

Budget Established and Authorization Given for Design and Bid for Project 03638: Crescent Hill Filter Plan North-South Filter Building Renovation

Roof Resources, Inc. has completed the preliminary design plans and prepared a construction estimate for the slate roof replacement and building improvements to the Crescent Hill Filter Plant North-South Filter Building. A preliminary engineering report recommended the following improvements estimated to cost \$3.5 million: replace 100-year old slate roof with new slate; replace and rehabilitate gutters, dormers and cresting; replace deteriorated wood roof deck and rehabilitate and re-coat steel trusses; rehabilitate exterior concrete cracks and surfaces; and, replace windows. Using the preliminary design plans, Roof Resources has revised their construction cost estimate to \$3,285,300. The project budget, including construction, consultant fees, and LWC project management totals \$3.65 million, which is 4.2 percent above the conceptual budget of \$3.5 million. Ms. Welsh moved to establish a project budget of \$3.65 million and proceed to final design and advertisement for bid. Ms. Willis seconded, and the motion carried.

Authorization Given for Design and Bid for Bullitt County Water Improvement Program (BCWIP)- I-65 Transmission System Horsefly Hollow Road to Collings Hill Road Grid Tie

Ms. Teasley advised that the BCWIP grid tie between Horsefly Hollow Road and Collings Hill Road will connect two 12-inch mains currently under construction that are partially funded by a Bullitt County Community Development Block Grant (CDBG). This will add to the I-65 Transmission System at the southern end of Bullitt County. It will support supply to the southern portion of the Bullitt County retail service area as well as to the City of Lebanon Junction. The proposed project was originally a 1,650 foot 8-inch grid tie along Rhodes Lane from Horsefly Hollow to Marilyn Way. However, the opportunity to leverage other projects already under construction to create additional transmission capacity at the southern end of Bullitt County has expanded the project scope to consist of the installation of approximately 5,500 linear feet of 12-inch PVC and Ductile Iron water main along Rhodes Lane, Marilyn Way, Gary Way, Christopher Drive, Belmont Road and a LWC Easement from a 12-inch main on Horsefly Hollow Road to a 12" main along Collings Hill Road. The proposed project budget is \$250,000. The System Development Reserve will serve as the source of funding for this project. Mr. Martin moved to authorize the engineering design and advertisement for bid for the grid tie between Horsefly Hollow Road to Collings Hill Road, part of the I-65 Transmission System. Dr. Wise seconded, and the motion carried..

2005 Board Meeting Dates Established

Pursuant to the newly revised By Laws, Ms. Welsh moved to approve the following 2005 Board meetings, all of which would be held at 12:30 p.m in the Board Room of the Louisville Water Company Headquarters:

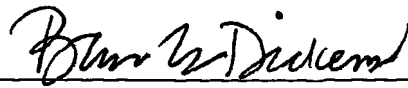

January 11, 2005	May 10, 2005	September 20, 2005
February 15, 2005	June 21, 2005	October 11, 2005
March 15, 2005	July 12, 2005	November 15, 2005
April 12, 2005	August 9, 2005	December 13, 2005

Ms. Willis seconded, and the motion carried.

The Board conducted an executive session without management present. No action was taken.

There being no further business, the meeting was adjourned at 4:00 p.m.

Respectfully submitted,

Barbara K. Dickens

Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
JANUARY 11, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Mr. Jim Brammell, Business System Owner, Managing Distribution Operations
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers
Ms. Debra Vaughn

The regular meeting of the Board of Water Works was held on Tuesday, January 11, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Mr. Stewart Conner called the meeting to order at 12:40 p.m. Prior to the start of the official meeting, staff provided the Board a demonstration of the new Mobile Dispatch System.¹

Minutes from the Previous Meeting Reviewed and Approved

Ms. Wendy Welsh moved to approve the minutes, seconded by Ms. Marita Willis, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber advised the Service Rules and Regulations would be considered on this agenda and will have a separate handout due to a meeting with the Homebuilders Association that occurred after the Agenda Book was prepared. He advised the Capital Projects Authorization process was also on this agenda and staff will be bringing the new Contracts Approval process to the Board in February. Mr. Huber briefly discussed articles recently run in the Courier-Journal regarding the completion of the County-wide Extension Program and rates. One of the EPA's top ten priorities for research and development is new detection methods for microbials, specifically cryptosporidium and giardia. With improved detection methods, we may expect a higher rate of

detection. LWC does detect minor amounts present in river water, which simply means we are required to have greater treatment mechanisms in place to deal with them. This is the reason we self-impose strict goals for water quality. Mr. Huber advised that he is working with Water for People regarding the Indian Ocean tsunami relief effort.

Financial Report Provided

Mr. Robert Miller reviewed the Statement of Revenues, Expenses and Changes in Net Assets with budget and prior year comparisons for financial results through December. Total Sale of Water for December of \$8,172,001 was \$185,169 or 2.3% more than budgeted due to higher residential and commercial water sales for the month. Other Operating Revenue for December of \$430,539 was \$53,052 or 14.1% more than budgeted due to higher late charges, turnoff fees, and returned check fees. Total Operating Revenue for December of \$8,602,540 was \$238,221 or 2.8% more than budgeted. This was only the third month in 2004 in which operating revenues reached the budgeted level.

Total Sale of Water for 2004 of \$99,036,867 was \$2,729,552 or 2.7% less than budgeted due to lower residential and commercial water sales for the year. Other Operating Revenue for 2004 of \$4,425,186 was \$84,814 less than budgeted due to lower late charges and sewer billing charges for the year. Total Operating Revenue for 2004 of \$103,462,053 was \$2,814,366 or 2.6% less than budgeted. This is the second consecutive year in which operating revenues did not reach the budgeted level. This is also the second consecutive year in which the rainfall measure at the Louisville Weather Office was more than 20% above normal for the year.

Mr. Miller advised the final dividend amount will be computed after the auditors complete their audit. Dr. Joseph Wise inquired about putting any amount over the budgeted dividend in a separate fund for situations when we are not able to make the budgeted dividend due to revenue shortfalls, such as in 2003. Mr. Miller agreed this is something the board should consider for future years and would be bringing a recommendation regarding this issue later in the year after he consults with the Financial Advisor.

Operations and Engineering Report Provided

Jim Brammell, Business System Owner for Managing Distribution Operations, presented the Operations and Engineering Report on behalf of Greg Heitzman.

Production – The average production rate last month was 121.5 MGD, which is 6.9 percent higher than the 2003 December production of 113.7 MGD and 4.3 percent higher than the five-year average December production of 116.6 MGD. The higher December pumping could be attributed to the winter storm period, where customers may have run water to prevent pipes from freezing. For the year, the average production of 126.4 MGD was still 0.4 percent lower than the 2003 production of 126.9 MGD and 0.7 percent lower than the five-year average of 127.4 MGD due to erosion of the water sales base and cool, wet weather conditions throughout the year.

Riverbank Filtration Project Status – Staff is finalizing the acquisition of property along Transylvania Beach to accommodate construction of the riverbank tunnel and vertical wells. Staff is working to acquire the remaining four properties. Design plans and construction specifications were completed in December and the project was advertised on December 15, 2004. Staff plans a Minority and Women Enterprise networking opportunity and a pre-bid meeting the week of

January 24. The bid opening is scheduled for Wednesday, February 16. Staff anticipates three to five bidders for the project. The budget estimate of record for the project is \$37,323,300, including project planning and management, engineering design, property acquisition, construction, and sewer installation. Staff anticipates awarding a contract at the March Board meeting.

Winter Storm Beginning December 22. Production staff implemented contingency plans in advance of the storm by assuring there were adequate chemical inventories for both treatment plants, conducting additional monitoring of facilities and equipment in remote locations, removing snow for emergency access to all critical facilities, and staffing at appropriate levels with repair crews and in the call center over the holiday weekend. Therefore, the snow storm had only minor impact on treatment, pumping, and storage operations. The storm did have a cost impact to operations, however. Staffing over the holiday weekend required premium pay for personnel that volunteered to work during the scheduled holidays (December 24 and December 27) and over the Christmas weekend. The preliminary cost estimate for the winter storm response is \$90,000. Employees are to be commended for their volunteer response to working over the Christmas holiday weekend, without an officially declared winter emergency to require a mandatory employee response.

Serving Customers Report Provided

Ms. Teasley presented the Serving Customers Report.

Fourth Quarter and Year End 2004 Customer Satisfaction Results – Customer satisfaction dropped in the fourth quarter to a low for the Total Customer Satisfaction Index (CSI) level of 829 not experienced since the end of 2002. This sixteen point drop occurred primarily in the areas of water quality and customer service, with some drop in reliability and price/value. No segment of the index increased during the quarter, although information ratings increased in most segments. The 2004 year end average for the Total CSI is 839 which is below the Corporate Level I goal of 840 and six points below the 2003 average. Customer satisfaction for the Service CSI decreased to 781 which is also the lowest level experienced since the end of 2002. Factors which dropped substantially for service customers were reliability and customer service with slight drops in price/value, water quality and information. The year end average for 2004 for the Service CSI is 796 which exceeds the Level II goal of 790 under the Corporate Performance Award program and is four points below the 2003 average.

General Assembly Update -- The 2005 session is a short 30 day session divided into two parts and ending March 22nd. The overwhelming issues to be addressed will be adoption of a budget and tax reform. An important issue for staff to follow for the upcoming session is the CERS Adjustment Fee for “Unescorted Retirees”. This issue was raised during the October Special Session and will likely be introduced again in 2005. An unescorted retiree is one who did not participate in one of the State Health Plans while employed. Past bills would require employers like LWC who have unescorted retirees to pay an adjustment fee to cover the health care cost of these employees once they retire. Estimated cost to LWC if the previously proposed legislation is enacted would be about \$200,000 annually, but would not impact the company until July 2005.

Public Information Update - “Water Works”, the video history of Louisville Water Company, is completed and airing on Metro TV (channel 25 on cable) and KET. Copies are being distributed to all local libraries and to the Louisville Visual Art Association. An abbreviated version will be

developed to compliment the Pure Tap school program. LWC wrote and produced the video, Metro TV shot and edited the piece. A rollout is also planned for employees.

Closed Session

Dr Wise moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) at 1:10 p.m. Mr. Gerald Martin seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Dr. Wise, and unanimously carried, the Board resumed open session at 1:32 p.m.

Audit Committee Charter Amended

Ms. Wendy Welsh advised that a report of the Audit Committee was given at the last regular meeting but, because the meeting had occurred after Agenda Books were printed, minutes were not available to the other board members at that time and were provided now for benefit of other board members. Ms. Welsh advised the Audit Committee recommended that the Board approve an amendment to the Audit Committee Charter to include responsibility to review and assess the procedures for receipt and retention of complaints. By consensus, the Board amended the Audit Committee Charter to include this new responsibility. Ms. Welsh advised that the Audit Committee recommended approval of the Audit Committee Plan and Schedule. On motion of Mr. Martin seconded by Ms. Welsh, and unanimously carried, the Board approved the Audit Committee Plan and Schedule for 2005.

Amendments Approved to the Service Rules and Regulations

Ms. Teasley provided the Board a report regarding proposed amendments to the Service Rules and Regulations. A cross functional team was chartered in June 2004 to review and update the current Louisville Water Company Service Rules and Regulations. Team members represented the following areas: facility design, construction and maintenance; distribution operations; water quality and production; distribution design, construction and extensions; new service applications; metering services; risk management; and legal services. With the last revision of the Service Rules and Regulations in April 1996 the team was tasked with performing a comprehensive review and submittal of proposed changes to better serve customer needs consistent with our current practices and procedures.

Through regularly scheduled meetings, suggested changes were recommended from appropriate processes or systems for review by the team. Many changes were made to clarify existing language and assist our customers to better understand the Service Rules and Regulations. Several substantive changes were also made. All suggested revisions were reviewed by upper management to ensure consistency and enforceability. The proposed changes have also been shared with the Customer Advisory Council and the LWC work group of the Homebuilders Association of Louisville to gain their input. Ms. Teasley provided additional information regarding some of the changes requested by the Homebuilders Association. The input of both groups has been incorporated or considered in the proposed changes. Ms. Teasley provided an overview of the major changes and referenced the complete copy of the revisions provided to the Board. Mr.

Martin moved to approve the amendments to the 1996 Service Rules and Regulations. Ms. Welsh seconded, and the motion carried.

New Authorization Levels Granted to President for Capital Improvement Projects

At the October 26, 2004 Special Meeting of the Board of Water Works, the Board considered increasing the authority level delegated to the President for approving capital projects and contracts. At that time, LWC staff committed to develop controls to support the increased authority levels proposed and a resolution for Board approval specifying the recommended authorization levels. Ms. Teasley proposed controls through the implementation of a Capital Projects Authorization Policy and Procedure that will assure all capital projects initiated by the company are necessary, prudent, feasible and well planned. The procedure for the review of capital projects will be maintained and enforced by a Capital Projects Authorization Committee prior to recommending action to the President. The procedures provide guidelines for assessing the detailed project scope, business case justification and implementation plans of all capital projects and project change actions. Ms. Teasley reviewed the process with the Board. Mr. Martin commented that the President should not delegate his authority to approve. Mr. Huber responded that a designee would be made only in the event of the President's incapacitation. Mr. Conner commented that the Board could be called together for a special meeting to make that designation in that event. Mr. Conner stated the audit should include a review of the implementation of this new procedure. Ms. Teasley advised the Board will receive a certification on a quarterly basis, or sooner if the Board so desired, that the process was being followed. Mr. Martin expressed that the certification should be referenced in the resolution.

Ms. Welsh moved to adopt the following resolution granting new authorization levels to the President for approving capital projects:

RESOLUTION TO INCREASE AUTHORIZATION LEVELS FOR MANAGEMENT TO PROCEED WITH PROJECTS

WHEREAS, the Board of Water Works considered increases to the authority delegated to the President of Louisville Water Company at the Special Meeting held on October 26, 2004, and

WHEREAS, the Board of Water Works has previously adopted certain authority levels delegated to the President of Louisville Water Company at the Regular Meeting held on November 9, 2004 as part of the resolution to adopt the 2005 Annual Budget, and

WHEREAS, the management of Louisville Water Company has developed a Capital Projects Authorization Policy and Capital Projects Authorization Procedures as internal controls to support increases to the authority delegated to the President of Louisville Water Company;

THEREFORE BE IT RESOLVED that the Board of Water Works hereby delegates to the President of Louisville Water Company the authority, within the bounds of the Capital Projects Authorization Policy and Procedures, to:

1. Proceed with preliminary engineering for all Projects in the 2005 Capital Budget. with an estimated cost of more than \$2,000,000 with the stipulation that each item will be fully explained to the Board and approval obtained

2. Proceed to completion for those Projects in the 2005 Capital Budget with an estimated cost of \$2,000,000 or less.
3. Proceed with the acquisition of property of \$250,000 or less per parcel as needed for projects in the Capital Improvement Program.
4. Proceed to authorize project change orders of \$250,000 or less on those Projects in the 2005 Capital Budget where such change orders do not cause the total project cost to exceed \$2,000,000.
5. Proceed to completion of non-budgeted capital projects with an estimated cost of \$250,000 or less with an adjustment to the Capital Improvement Program.

AND BE IT RESOLVED, that all projects greater than \$2,000,000 must be submitted for approval to the Board of Water Works before proceeding with final design and solicitation of bids.

AND BE IT RESOLVED, that all project change orders greater than \$250,000 must be submitted for approval to the Board of Water Works.

AND BE IT RESOLVED, that periodically throughout the year the President will certify to the Board of Water Works that approvals are being granted pursuant to the Capital Projects Authorization Policy and Procedures.

AND BE IT FURTHER RESOLVED, that the Internal Auditor will periodically audit and report quarterly to the Board of Water Works that approvals are being granted pursuant to the Capital Projects Authorization Policy and Procedures and the external auditors will attest through agreed upon procedures and report annually to the Board of Water Works that approvals are being granted pursuant to the Capital Projects Authorization Policy and Procedures.

Ms. Harris seconded, and the motion carried.

Ms. Willis left the meeting at approximately 2:05 p.m.

Contract Awarded for Bid 02-27: Fire Hydrants – 2nd PPI Renewal

Sealed bids were accepted in November 2002 for a one-year contract, renewable for up to four additional one-year terms, for fire hydrants. All renewals were to be effective annually utilizing the Producers Price Index, 1015-0425, "castings for construction and utility use" as the cost adjustment factor. Because the PPI category, "Castings for Construction and Utility Use" was abolished by the Bureau of Labor Statistics and documented concerns were raised over the rising cost of raw materials, a negotiated agreement was reached for the upcoming renewal period and includes a 7.6% renewal covering 14 months rather than 12 months, quarterly PPI renewals, and utilization of a new PPI category of "other ductile iron castings. Dr. Wise moved to authorize the Process Owner, Procurement Services, to award a one-year contract renewal totaling an estimated \$1,113,562 to American Cast Iron Company. Mr. Martin seconded, and the motion carried.

Contract Awarded for Bid 04-84: Direct Read Meters

Three bids were received for a fifteen-month contract for direct read water meters. This fifteen month bid will allow direct read meters to be bid in conjunction with pro read meters in 2006. The lowest, most responsive bids from Neptune Technologies for an estimated fifteen-month total of \$827,450 and Badger Meter Company for an estimated fifteen-month total of \$19,776. Census

Company did not directly bid, but submitted a bid through their distributor. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a fifteen-month contract totaling an estimated \$827,450 to Neptune Technologies and an estimated \$19,776 to Badger Meter Company. Mr. Martin seconded, and the motion carried.

Update Provided Regarding Human Resources Information System

Mr. Miller provided a report to the Board regarding the status of the acquisition of a new Human Resource Information System. Based upon feedback received at the December 2004 Board meeting, the HRIS Project Team is continuing to prepare the information requested by Board members. Specifically, the team is addressing the cost-benefit analysis and productivity enhancements expected to be realized with the implementation of the recommended HRIS solution. Vendor pricing contained in their proposals was effective through January 22, 2005. Since the analysis and evaluation of the proposals has expanded, all vendors have agreed to extend their pricing and terms through March 31, 2005. The team will present its analysis and recommendations to the Board at the February 2005 meeting. Board members will receive a detailed communication regarding the team's recommendations in advance of that meeting.

Information Provided Regarding the County Employees Retirement System Contribution Rate

Mr. Miller advised that the Company recently received notice of an increase in the CERS Employers Contribution Rate to be effective beginning July 1, 2005. The new rate of 10.98% represents a significant increase over the current rate of 8.48%. The increase is attributed to retirement plan investment losses, a phase-in of the insurance actuarial accrued liability, and differences between the expected and actual experience in turnover, mortality, disabilities, and salary increases. The new rate was based on an actuarial analysis as of June 30, 2004 and represents the full recommended rate. Future rates may be higher if investment rates of return do not meet the targeted level of 8.5%. Based on information received from Kentucky Retirement System staff, the 2005 Budget contemplated that the employer contribution rate would increase to 9.50%. The new rate will result in an estimated increase in operations and maintenance expenses of \$130,000 in 2005 above the amount included in the 2005 Budget. .

Update Provided Regarding the 60" Transmission Main at the Louisville International Airport

Ms. Teasley provided the Board an update regarding the relocation of the 60" transmission main at the airport. The Regional Airport Authority (RAA) plans to begin construction on the 1000 foot runway extension in the Spring 2006, and the runway would then extend over a critical LWC transmission main. To accommodate these plans, LWC established an in-house design team to fast-track design of the 60-inch concrete transmission water main around the proposed extension of the west runway. Plans for the 60-inch transmission main were completed in time for the December 15, 2004 bid opening. To maintain the current schedule, LWC needs to award the construction contract and start construction in the first quarter of 2005, and complete construction by January 2006. The proposed project will replace the existing 48/60-inch water main currently in the right-of-way of Fern Valley Road and Old Crittenden Drive (temporarily closed) situated approximately 700 feet south of the southern end of the west runway, with a new 60-inch main which will follow the alignment of relocated Grade Lane and relocated Crittenden Drive.

Four bids were received and opened on December 15 and MAC Construction and Excavating is the apparent low bidder with a bid of \$5,600,000. The second and third bids were clustered within 7% of the low bid, indicating an overall understanding of the scope and complexity of the project. The tight bid sequence also establishes the market value for the proposed project. The revised project cost including MAC Construction's bid is \$6,494,693. The budget of record, approved at the May 2004 BOWW, is \$3,912,000, placing the revised project cost approximately \$2,600,000 over the budget of record.

Several design improvements, not included in the original scope of work, were integrated into the final design. These design enhancements involved design revisions to the 60-inch transmission main and modifications to the associated distribution system. The replacement of approximately 2,200 feet of water main along old Grade Lane and Ashbottom Road was previously identified and budgeted as a MRRP project and has a cost estimate of \$330,000. Also staff is proposing to install over 3,200 feet of new 12 and 16 inch main at an estimated cost of \$500,000 to remove several critical customers connected to the transmission main at various locations, from direct dependence on the existing mains. Another increase in cost from the original budget is an estimated \$500,000 in casing pipe. In the event that the RAA extends the west runway at a future date, the casing would allow the main to be accessed for maintenance without disturbing the runway above and avoid another costly relocation of the main. Other factors that significantly increased project costs include site delivery of the concrete pipe (estimated at \$250,000) haul-off costs of excavated materials (estimated at \$500,000), and loss of production due to site constraints for work hours and accessibility (estimated at \$450,000).

A major issue to be resolved on the project is the matter of reimbursement from the RAA. Staff continues to meet with RAA authorities to discuss funding participation for the relocation project. Two funding alternatives exist: reimbursement from the Federal Aviation Administration (FAA) or reimbursement from general revenues of the RAA. RAA authorities have not been able to justify eligibility for FAA reimbursement of costs associated with the relocation of the 60-inch transmission main. Further, the existing RAA budget does not include expense for such a large utility relocation.

With the estimated relocation costs of \$6.5 million and reduced potential for project cost sharing, staff will reconsider the alternative to leave the 60-inch main within the airport property, and require the RAA to protect the water main from the extended runway. In addition, staff will continue to evaluate the bids and any other alternatives as well as work with RAA staff and LWC General Counsel to pursue eligibility for full or partial reimbursement of the relocations costs. Dr. Wise questioned whether we have any indication that the RAA will extend the runway further over the new proposed location. Staff believes this may be a possibility and will work to get additional information on this possibility from the RAA.

Change Action Approved for Project 03-625: South Coagulation Mixer and Clarifier Rehabilitation

Mr. Brammell advised the improvements to the Crescent Hill Filter Plant South Coagulation complex approved by the Board one year ago included replacement of failed mixing and clarification equipment, rehabilitation of concrete structures, and upgrading electrical systems. Construction is approximately 30 percent complete. The first unit, coagulation basin #7, is nearing completion and is projected to be returned to service by March 2005. Rehabilitation of the second unit, plus structural rehabilitation of two other units, is projected to be completed by March 2006.

During work on coagulation unit #7, several unforeseen conditions were encountered, which required modifications to the construction and consultant contracts. Several elements of the mechanical drive equipment are beyond repair and must be replaced. Following sediment removal, the concrete support piers and floor were found to be in poor condition. As reported to the Board in August, a cavity was found beneath the concrete floor, under the central drive mechanism. The cavity was excavated, safe-loaded, and a new reinforced concrete floor was installed. As a result of these changes, the scope of work of the consultant engineer, CH2M Hill, was expanded to include a comprehensive structural evaluation of the basin and additional construction management and oversight to provide quality control.

Mr. Brammell noted that these changes to the contract reflect only partial work required to complete coagulation unit #7 and this project includes work for three additional coagulation units. As previously reported to the Board, these basins have been in various levels of disrepair and several emergency contracts have been awarded in the past three years to maintain safe levels of production. A comprehensive pre-bid assessment of the structure was not performed due to production limitations on removing the unit from service for thorough inspection and marginal ability to maintain safe operating levels during summer months. Remaining work for coagulation unit #7 includes crack sealing with grout injection. This additional work is estimated at \$70,000 and will be reported to the Board at an upcoming meeting.

Dr. Wise moved to authorize the Chief Engineer to increase the value of contract #G634 with Kelly Construction Co. by \$114,056, from \$2,878,552 to \$2,992,608; to increase the value of contract #G529 with CH2M Hill Engineers by \$55,031, from \$395,546 to \$450,577; to increase LWC project management expense by \$20,000; and to establish a revised project budget of \$3,563,185. Ms. Harris seconded, and the motion carried.

Design and Bid Authorized for Pitts Point Road Area Main Replacement Project

Ms. Teasley advised replacement of the 5,420 feet of 6-inch pipe along Pitts Point Road was included as part of the Main Replacement and Rehabilitation Program approved previously by the Board. The original estimated cost of the project was \$400,000. As part of the Kentucky Turnpike Merger Agreement, 3,782 feet of water main along a portion of Highway 44 from Raymond Road to Pitts Point Road was likewise identified for replacement. The estimated cost of the pipeline replacement along Highway 44 was \$226,920. The estimated cost for the combined project is \$690,000. The revised amount exceeds the original combined cost estimate of the projects by \$63,080 (10%). Based on recent bid results for similar type work in the Bullitt County area, the estimate for the replacement of the main in Highway 44 was revised upward from approximately \$60/lf to \$75/lf. Ms. Welsh moved to increase the Project Budget of Record to \$690,000 and to proceed with the final design and advertisement for bid of the Pitts Point Road Area Main Replacement Project. Dr. Wise seconded, and the motion carried.

The Board conducted an executive session without management present. No action was taken.

There being no further business, the meeting was adjourned at 3:05 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

¹ Mr. G.S. Seetharam, Ms. Sherry Dukes and Mr. Eric Ayers provided a report and demonstration of the newly implemented Mobile Dispatch System. The Mobile Dispatch System project implementation started in June 2003 with Viryanet, Inc., who was awarded the contract for the system software, design and implementation services. The Mobile Dispatch System (MDS) Project objective is to automate field service processes through the electronic transmission of service and work orders to field personnel, collection of field data, and update of the host systems. The project scope included significant process re-engineering of the following five key operational areas of the company:

- First Run Response – 14 Emergency Turners (15,000 calls / year);
- Fire Hydrant Maintenance – 3 Fire Hydrant Service personnel (13,000 calls / year);
- Accounting for Water – 7 (3 Repair Leaders, 2 Meter Exchangers, 1 Large Meter Truck, 1 Large Meter Repair) (18,000 calls / year);
- Field Customer Service – 16 Field Customer Service Representatives (118,000 calls / year); and
- Dispatchers (Radio Room & Accounting for Water).

The employees provided the current status of the project:

- 39 or 40 field users are on-line;
- All order types that these users work on, are in the MDS;
- Fire Hydrant Service group were the first to go live in March 2004;
- Field Customer Service and Accounting for Water Representatives went live in several phases spanning June through August 2004. All representatives are live on the system;
- Emergency Turners went live in September 2004;
- Over 48,000 calls have been completed in MDS since March 2004;
- Optimizer is scheduled to run at certain times for every weekday to create the work schedule for the next day based on rules set by the project team;
- Calls created in on LWC host systems are transmitted to MDS and all completion data are sent back to the appropriate host systems through key interfaces developed by Viryanet, LWC staff, and Alliance;

Staff is in the process of completing the final phase of the project. Support of the system applications, hardware and communications will be handled by staff and through support service and maintenance contracts with the vendors.

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
FEBRUARY 15, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Kathy Schroeder, Business System Owner, Supplying Human Resources
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers
Ms. Debra Vaughn

The regular meeting of the Board of Water Works was held on Tuesday, February 15, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Mr. Stewart Conner called the meeting to order at 12:35 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes, seconded by Ms. Wendy Welsh, and the motion carried.

Financial Report Provided

Mr. Miller reported financial results for January 2005. Total Operating Revenues for January of \$9,251,912 were \$281,619 or 3.1% more than budgeted and \$1,026,644 or 12.5% more than the same period in 2004. The budget variance was due to residential water sales which were \$322,430 higher than expected. The prior year variance was due to increased residential and commercial water sales and the increase in water rates. Operation and Maintenance Expenses for January of \$3,573,840 were \$156,320 or 4.2% less than budgeted and \$31,368 or 0.9% more than 2004. Total Operating Expenses for January of \$5,918,078 were \$221,394 or 3.6% less than budgeted and \$230,727 or 4.1% more than 2004. The budget variance was due to lower than expected operation

BOWW Regular Meeting Minutes
February 15, 2005
Page 1 of 9

and maintenance expense and depreciation expense. The prior year variance was due to increases in depreciation expense and water service provided in lieu of taxes. Net Operating Income for January of \$3,333,834 was \$503,012 or 17.8% more than budgeted and \$795,917 or 31.4% more than 2004. Total Net Non-Operating Expense for January of \$307,001 was \$58,785 or 16.1% less than budgeted and \$941,966 or 75.4% less than 2004. The budget variance was due to higher than expected interest income. The prior year variance was due to early retirement incentive program costs which were incurred in January 2004. Net Income Before Distributions and Contributions for January of \$3,026,832 was \$561,797 or 22.8% more than budgeted and \$1,737,884 or 134.8% more than 2004. Capital Expenditures for January were \$4,379,018 or 4.8% of the 2005 Capital Budget of \$91,148,054.

Mr. Miller advised we are off to a good start in 2005 due to residential and commercial sales being up and operating expenses being down. The 2004 Audit is nearing conclusion and a clean report is expected. Mr. Martin asked why interest income was up so much. Mr. Miller stated that cash available for investment was higher than expected and short term interest rates were higher than expected..

Operations and Engineering Report Provided

Mr. Greg Heitzman provided the report.

Production – The average production rate last month was 120.8 MGD, which is 4.0 percent higher than the 2004 January production of 116.2 MGD and 0.4 percent higher than the five year average January production of 120.3 MGD.

Winter Distribution Activity - Distribution Operations personnel repaired 62 main breaks in January. While there have been several challenging days with as many as 12 breaks per day, the monthly total is well below the previous five-year average of 137 for January breaks.

Distribution Work Backlog – As a result of lower main break activity, both the priority 1 and total back-log levels are significantly lower than they have been in previous years, thereby allowing Distribution Operations to focus on execution of the 2005 capital program and also further reduce the backlog of lower priority maintenance work.

Riverbank Filtration Project, Phase II – Bids were scheduled to be opened on February 16th but we have postponed the opening due to several contractors requesting additional time to complete the bid. We held a successful Minority and Women Business Enterprises breakfast to encourage interest by M/WBE contractors and subcontractors.

Serving Customers Report Provided

Ms. Teasley presented the Serving Customers Report.

Lebanon Junction Wholesale Contract – A new water purchase agreement with Lebanon Junction was finalized January 11, 2005. LWC water will initially be utilized by Lebanon Junction for emergencies. Capital improvements in their system are planned in 2005 that will allow the City to routinely purchase water from LWC through the separation of water supplies from water they currently purchase from the City of Bardstown. Lebanon Junction is also negotiating a contract to

supply the Jim Beam Boston plant which will significantly increase their water demands and is expected to increase LWC sales to the City in the 0.75 MGD range.

General Assembly Update - Government Relations has been monitoring the activities of the 2005 Session. To date, the only bill of significant impact to LWC is House Bill 278: *The Small Business High Risk Pool*. The bill establishes a pool to cover high risk individuals for groups of two to ten employees. It is funded by implementing a ½ of 1% premium tax on all health insurance premiums. Based on current information, the estimated cost to LWC would be a minimum of \$16,300 annually. We will also closely monitor the session for bills related to the proposed CERS Adjustment Fee for "Unescorted Retirees". An unescorted retiree is one who did not participate in one of the State Health Plans while employed. Past bills would require employers like LWC who have unescorted retirees to pay an adjustment fee to cover the health care cost of these employees once they retire. Estimated cost to LWC if the previously proposed legislation is enacted would be about \$200,000 annually.

Ms. Teasley reported the legislature, at its 2004 October Special Session, established a blue ribbon commission to examine all aspects of the State's Healthcare Plan including retiree benefits and cost. Susan Lehmann was nominated by the Kentucky Association of Counties (KACO) and Senator David Williams recently appointed her to serve as a member of the commission. This panel will likely discuss the unescorted retiree issue.

Closed Session

Ms. Marita Willis moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) at approximately 12:45 p.m. Dr. Joseph Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Willis, and unanimously carried, the Board resumed open session at 1:10 p.m. No action was taken as a result of closed session.

Audit Committee Report Provided

Ms. Wendy Welsh provided a report of the Audit Committee's discussion and actions at its meeting on February 9, 2005. The Committee reviewed the Transportation Audit completed by Internal Auditor Roger LeMaster in December 2004. Ms. Welsh reported management had already implemented many of the recommendations made in the audit and is working to dispose of a boat owned by LWC for maintenance of the Falls Fountain when it was in operation. The boat is no longer needed.

Ms. Welsh reported the Committee considered the recommendation of the External Auditor contract for 2005. Six companies had responded to a Request for Proposal, and the best evaluated proposals prior to considering cost were Crowe Chizek, our current external auditor, and Strothman, both of which had received equal scores. Upon opening the cost proposals, Crowe Chizek was the highest scoring proposal due to lower costs. The Committee recommended the contract be awarded to Strothman however, since either Crowe Chizek or its predecessor has been conducting the audit for a number of years. The Committee felt the services provided by Crowe Chizek have been excellent. Mr. Martin moved to award a one year contract, renewable up to four

additional years at the sole discretion of the Company, to Strothman. Ms. Margaret Harris seconded, and the motion carried.

Ms. Welsh reported the Committee also reviewed the outstanding audit issues and was satisfied that steps are being made to address those outstanding issues.

Compensation Committee Report Provided

Mr. Stewart Conner provided board members a copy of the minutes not included in the Board Agenda Book due to the meeting occurring the past Friday, February 11, 2005. He advised the Compensation Committee reviewed the Corporate Performance Award, which is a bonus available to all employees Process Owner and below if award goals are met. The percentage of the goals met was 79.15%. The total available award is one percent (1%) of total employee salary from the pool of eligible employees, thereby making the reward per employee \$422.39. Ms. Welsh moved to approve the award of \$422.39 to each eligible employee for the 2004 Corporate Performance Award. Ms. Harris seconded, and the motion carried.

Mr. Conner reported the Committee discussed the 2004 Executive Incentive Award, which is a bonus available to all employees at Business System Owner and above if certain goals are reached. Mr. Conner stated the Committee believed the Company performed very well on the Executive Incentive Plan goals, but did not meet the light switch goal, rendering success of the Executive Incentive Plan goals moot.

Mr. Conner reported the rating for the 2004 ELT Shared Goals was an overall 2.86. The Committee agreed to eliminate the Alternative Treatment goal for 2004 and carry it into 2005. The Committee reached agreement on the goals set for 2005.

Mr. Conner reported the committee discussed the health, dental, life and disability insurance plans for 2005. We received three quotes for health insurance and preliminary trends indicated a 22.5% increase for healthcare premiums. Through negotiations, Humana offered a renewal quote at 13.3%, with minor plan design changes. The quote from United Healthcare had been lower but United's plan contained significant differences and fewer providers. With changes to equalize the plans, the United Healthcare quote was within range of the Humana quote, but still with fewer providers on the plan. Staff recommended renewing the contract with Humana for health insurance. Mr. Martin moved to renew the contract with Humana to provide employee and dependent health care coverage. Dr. Wise seconded, and the motion carried. Mr. Conner stated Delta Dental, the Company's current dental insurance provider, offered a 6% premium increase. Staff had recommended renewing the contract with Delta Dental for dental insurance. Ms. Welsh moved to renew the contract with Delta Dental at a projected annual premium of \$342,584 (projected company cost is \$267,000). Dr. Wise seconded, and the motion carried. Mr. Conner advised the renewal with Monumental is pursuant to a three year rate guarantee, and staff recommended renewal. Dr. Wise moved to renew the contract for Group and Dependent Life with Monumental. Mr. Martin seconded, and the motion carried. Mr. Huber advised the Union may grieve over the minor changes to the health insurance plan, but management feels the changes are permitted by the Union contract and are in keeping with past practice.

Mr. Conner advised the Committee received a very thorough presentation on management's recommendation regarding the Human Resources Information System. The Committee agrees we must replace the current system, but is unsure what the replacement system should be. The cost

estimates for a new system are anywhere from \$500,000 to \$2.8 million. The Committee believes we must seek review by an outside consultant to consider what the Company's needs are, what we requested in our Request for Competitive Negotiations, and what the available options are, including consideration of an Application Service Provider. The Committee directed staff to seek an immediate review by an outside consultant in order to report to the Board at the March 2005 meeting. Mr. Conner noted the Board requested outside review of the Financial System when it was being selected as well. Mr. Conner stated a thorough review by other board members would be appropriate after the consultant has offered an opinion.

New Authorization Levels Approved for Management's Award of Contracts

Mr. Bob Miller advised, pursuant to direction provided by the Board at its October 2004 regular meeting, staff has reviewed and revised internal controls to support a recommendation to increase the authority delegated by the Board of Water Works to the President regarding the award of contracts. Staff has revised the Purchasing Policy, Purchasing Procedures; Bids and Awards Process Flowchart; and, Empowerment and Accountability Matrix for Award of Procurement Contracts. The key elements of the Purchasing Policy are:

- Louisville Water Company will act in the best interests of customers and owners by obtaining the best price available in the marketplace for the specifications, performance, and quality required and will maintain a fair and open marketplace for all vendors.
- Louisville Water Company will follow the Kentucky Bid Law and will use the Kentucky Model Procurement Code for guidance when establishing purchasing procedures.
- The President shall have authority, within the bounds of the Purchasing Policy and the Purchasing Procedures, to proceed with award of contracts of \$1,500,000 or less; proceed to authorize contract change orders of \$250,000 or less where such change orders do not cause the total contract cost to exceed \$1,500,000; and, designate authorized signatories for contracts and contract change orders.
- All contracts greater than \$1,500,000 and all contract change orders greater than \$250,000 must be submitted for approval to the Board of Water Works.
- Periodically throughout the year, the President will certify to the Board of Water Works that approvals are being granted in pursuant to the Purchasing Policy and Purchasing Procedures. The Internal Auditor will periodically audit and report quarterly to the Board of Water Works that approvals are being granted pursuant to the Purchasing Policy and Purchasing Procedures. The external auditors will attest through agreed upon procedures and report annually to the Board of Water Works that approvals are being granted pursuant to the Purchasing Policy and Purchasing Procedures.

Mr. Martin moved to approve the revised Purchasing Policy. Ms. Welsh seconded, and the motion carried.

Mr. Miller recommended approval of a resolution to increase the President's contract approval levels, given the adoption of these internal controls. Ms. Harris moved to adopt the following resolution to increase the authorization levels for management to award contracts:

WHEREAS, the Board of Water Works considered increases to the authority delegated to the President of Louisville Water Company at the Special Meeting held on October 26, 2004, and

WHEREAS, the Board of Water Works has previously adopted certain authority levels delegated to the President of Louisville Water Company at the

Regular Meeting held on November 9, 2004 as part of the resolution to adopt the 2005 Annual Budget, and

WHEREAS, the Management of Louisville Water Company has revised a Purchasing Policy and Purchasing Procedures as internal controls to support increases to the authority delegated to the President of Louisville Water Company;

THEREFORE BE IT RESOLVED that the Board of Water Works hereby delegates to the President of Louisville Water Company the authority, within the bounds of the Purchasing Policy and Purchasing Procedures, to:

1. Proceed with award of contracts of \$1,500,000 or less.
2. Proceed to authorize contract change orders of \$250,000 or less where such change orders do not cause the total contract cost to exceed \$1,500,000.
3. Designate authorized signatories for contracts and contract change orders.

AND BE IT RESOLVED, that all contracts greater than \$1,500,000 and all contract change orders greater than \$250,000 must be submitted for approval to the Board of Water Works.

AND BE IT RESOLVED, that periodically throughout the year the President will certify to the Board of Water Works that approvals are being granted in pursuant to the Purchasing Policy and Purchasing Procedures.

AND BE IT RESOLVED, that the Internal Auditor will periodically audit and report quarterly to the Board of Water Works that approvals are being granted pursuant to the Purchasing Policy and Purchasing Procedures.

AND BE IT RESOLVED, that the external auditors will attest through agreed upon procedures and report annually to the Board of Water Works that approvals are being granted pursuant to the Purchasing Policy and Purchasing Procedures.

Ms. Welsh seconded, and the motion carried. The board reached consensus that it would receive information about what contracts had been awarded under the President's authority level and below through the quarterly audit that Mr. LeMaster will conduct. This information will be presented to the Audit Committee, whose Chair will report it to the Board.

Human Resources Information System Contract Award Deferred

Mr. Conner stated the consideration of the HRIS contract award will be deferred until the March meeting in light of the discussion earlier.

Contract Awarded for Bid 04-54: Copper Tubing

Three bids were received for a four-month contract for copper tubing. Copper tubing is used throughout the distribution system in the installation, renewal and repair of domestic service lines. The lowest, most responsive bid was received from Viking Supply for a total of \$111,058. Hughes Supply was disqualified for taking exception to the delivery schedule stated in the specifications. This bid represents a 7% increase in unit prices from the previous bid four months ago and the cost increase can be attributed to the normal volatility of the copper market. Dr. Wise moved to authorize the Process Owner, Procurement Services, to award a four-month contract totaling \$111,058 to Viking Supply Company. Ms. Willis, seconded, and the motion carried.

Contract Renewed for Bid 04-03: Gate and Wheel Valves

Bids were received on January 14, 2004 for a one-year contract, renewable for up to three additional one-year terms, for gate and wheel valves. All renewals utilize the Producers Price Index, 3491-1, "Industrial Valve – Gate, Globe and Check Valves" as the cost adjustment factor. Gate valves are used for installations, repairs and maintenance within the distribution and transmission systems. This is the first PPI renewal and represents a 7.4% annual increase in unit pricing. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a one-year contract renewal totaling an estimated \$797,435 to Mueller Company and an estimated \$146,682 to U.S. Pipe. Ms. Willis seconded, and the motion carried.

Contract Renewed for 02-67: Detector Check Valves

Bids were received on January 8, 2003 for a one-year contract, renewable for up to two additional one-year terms, for detector check valves. All renewals utilize the Producers Price Index, 3491-1, "Industrial Valve – Gate, Globe and Check Valves" as the cost adjustment factor. Detector check valves are used in the installation of new domestic fire services throughout the distribution system. This is the second and final PPI renewal for this contract and represents a 7.1% annual increase in unit pricing. Mr. Martin moved to authorize the Process Owner, Procurement Services, to award a one-year contract renewal totaling an estimated \$144,739 to Hersey Meter Company. Ms. Harris seconded, and the motion carried.

Contract Awarded for 03-02: 16.9 Ounce Water Bottles

Bids were received on March 19, 2003 for a one-year contract, renewable for up to two additional years, for procurement of water bottles. All renewals were required to utilize the Producers Price Index as a cost adjustment factor. United Graphics was awarded the contract for 16.9 ounce water bottles. The Company made the decision to cancel the contract with United Graphics due to repeated failure to deliver according to contractual delivery schedule and poor quality of labels being affixed to bottles. Presence, Inc. was the next lowest qualified bidder for 16.9 oz. bottles. Presence, Inc. has agreed to honor their original bid price with applied PPI renewals and to provide bottles in accordance with the original specifications. Presence, Inc. price is 3.9% over current contractor pricing. Ms. Welsh moved to authorize the Process Owner, Procurement Services, to award a three-month contract in the amount of \$106,000 to Presence, Inc. Mr. Martin seconded, and the motion carried. The contract will be re-bid after this three month period.

Contract Awarded for 05-06: Facilities Security Enhancements

Two proposals were received in response to a request for competitive negotiation for facilities security enhancements. The best evaluated proposal was from Henderson Services for a total of \$301,806. Aegis Security Design was hired to serve as technical consultant on the project. Funding is provided by a homeland security grant. Mr. Martin moved to ratify the President's award of a contract for facilities security enhancements in the amount of \$301,806 to Henderson Services. Dr. Wise seconded, and the motion carried.

Information Provided Regarding 2005 LOJIC Funding

Ms. Teasley advised the Louisville and Jefferson County Information Consortium (LOJIC) is a multi-agency Consortium developed to build and operate a comprehensive Geographic Information

System (GIS) serving all of Jefferson County, Kentucky. The consortium was formed in the late 1980's and currently consists of Metro Louisville, Louisville and Jefferson County Metropolitan Sewer District (MSD), the Jefferson County Property Valuation Administrator (PVA), and the Louisville Water Company. Current ownership levels in LOJIC are 40% for Metro Louisville, 35% for MSD, 5% for PVA and 20% for LWC.

LOJIC has progressed from being a general information resource for LWC staff to being an indispensable foundation for many aspects of our facility mapping, management and analysis. This is especially true for the newly developed Automated Mapping/ Facilities Management (AM/FM) System, which relies on LOJIC data resources as an underlying structure. LWC purchased a 20% ownership in LOJIC for \$1,395,000 paid to MSD from 1996 through 2001. In recent years, LWC made annual payments of \$71,216 to LOJIC to cover annual operations and maintenance expenses. Under this cost structure a significant portion of funding for LOJIC was provided by MSD. Over the past year the partners have been working towards a more equitable sharing of the ongoing costs of operating LOJIC. The total partner funding proposed for LOJIC in 2005 is \$1,488, 942 with \$1,023,492 earmarked for operational costs and \$465,450 for capital improvements. LWC's share of the proposed funding is \$297,788 based on its 20% LOJIC ownership interest. Of this amount, \$204,698 are designated for operational costs, and \$93,090 for capital improvements. Discussions on LWC's appropriate funding level for 2005 continue with the LOJIC partners.

Information Provided Regarding the Kentucky River Crude Oil Spill Impact on LWC

Mr. Heitzman reported about the crude oil spill event that began on January 26, 2005 in the Kentucky River, when a pipeline owned by Mid-Valley Pipeline ruptured and released an estimated 60,000 gallons of crude oil. The spill was initially contained, but booms holding the oil broke on January 31st. This event had the ability to have a major impact to customers from an aesthetic impact of bad taste and odor, but was not a health issue. However, when customers have major concerns with taste and odor, it becomes difficult to convince the customers the water is safe for consumption. Therefore, it was critical to deal with the taste and odor effects of the spill.

Water Quality staff immediately activated standard operating procedures for spill monitoring and response, which included collecting samples at various locations along the Kentucky and Ohio Rivers, between the spill location and LWC intakes. Staff projected the heavy spill release would pose significant treatment challenges. Our ability to treat the spill to no detectable levels of odor was marginal. The crude oil spill caused the Ohio River water to have a strong petroleum odor that was detectable at the Ohio River and at the Crescent Hill Reservoir. Over the course of dealing with the spill, we had to purchase additional Powdered Activated Carbon (PAC), at higher prices, to ensure we had sufficient quantity to appropriately treat the water and eliminate taste and odor problems.

The oil spill contained a number of regulated chemicals listed in the EPA drinking water standards. These included the BTEX compounds of benzene, toluene, ethylene, and xylene. Although these chemicals never exceeded their MCLs, concentrations of up to 7.5 ppb were detected in the Ohio River. The oil spill did not pose a health risk to the community, but did present significant taste and odor issues to manage. The Company expects to receive full reimbursement from Mid-Valley Pipeline, which is operated by Sunoco Logistics Partners L.P., for all costs associated with treating the oil spill. Therefore, we do not expect the spill to impact our budget. Total costs to manage the

spill are expected to be between \$350,000 and \$400,000, but final costs are unknown because to labor costs are yet to be fully determined.

Budget Established and Design and Bid Authorized for Project 102233: B.E. Payne Water Treatment Plant Coagulation and Softening Systems Renovation

Mr. Heitzman advised the Capital Improvement Program includes a \$7.5 million renovation of the coagulation and softening systems at B. E. Payne Water Treatment Plant (BEP). The coagulation and softening systems consist of various treatment units, including: flocculators; mixers; clarifiers; and chemical feed systems for particle removal, pH adjustment, and softening of the Ohio River source water (surface or well). This project will renovate the existing treatment units to assure current and future LWC water quality goals can be consistently achieved. This renovation provides the first overhaul of the coagulation and softening systems since BEP went into service in 1977, nearly 30 years ago. Upgrading these systems also prepares the treatment process to accommodate the Riverbank Filtration (RBF) source water by 2008. The RBF source water will require moderate softening to reduce calcium concentrations and finished water hardness. The renovation will include the following elements: replacement of three softening mixer systems with new technology for greater process efficiency; replacement of six clarifiers for reduced maintenance; replacement of the lime feed system with new technology for more precise process control; installation of a carbon dioxide feed system for pH adjustment, process stabilization, and distribution system corrosion control; and, rehabilitation of the existing concrete tanks and replace ancillary items, such as handrails, lighting, and access for maintenance.

A Preliminary Engineering Report prepared by consultant O'Brien and Gere Engineers documents the need for these improvements and presents a strategy to implement this project. The project budget is \$12.4 million for construction, consultant fees, and project management. The 2005 capital budget allocates only \$7.5 million from 2004 through 2008 for this work. The cost impact will not be seen until the 2006 Capital Budget. Equipment and material cost increases plus an expansion of the project scope to include chemical feed systems requires an increase in the project budget by \$4.9 million. This is a significant budget increase, however after thorough review of the condition of the facilities and the need to upgrade the chemical feed systems, the project budget for this revised scope is appropriate. Mr. Miller stated this will not change the timing of the upcoming borrowing, but may affect the amount of the borrowing necessary. Mr. Heitzman advised this will come to the board for consideration of the award of a contract probably in the fourth quarter of 2005. Dr. Wise moved to establish a project budget in the amount of \$12.4 million and authorize design and bid for Project 102233. Ms. Willis seconded, and the motion carried.

The Board conducted an executive session without management present. No action was taken.

There being no further business, the meeting was adjourned at 2:35 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
MARCH 15, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair (via Teleconference Call)
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Karla Teasley, Vice President, Serving Customers and Business Development
Ms. Kathy Schroeder, Business System Owner, Supplying Human Resources
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Ms. Kay Ball, Project Manager, Riverbank Filtration
Mr. Ralph McCord, Business System Owner, Pipeline Design and Construction
Mr. Tony Gregory, Business System Owner, Providing Information Technology
Mr. Vince Guenther, Process Owner, Providing Governmental Relations

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers
Mr. David Haas, P.E., Project Manager, J J & G Consulting Engineers
Mr. Robert Wierzbicki, P.E., Director of Construction Services, J J & G Consulting Engineers
Mr. Brian Winslow, Mac Construction
Mr. Mike Greene, Reynolds Construction
Ms. Debra Vaughn

The regular meeting of the Board of Water Works was held on Tuesday, March 15, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Mr. Stewart Conner called the meeting to order at 12:34 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes, seconded by Ms. Marita Willis, and the motion carried. Mr. Martin inquired whether the auditor's management letter has been received. Mr. Robert Miller advised we received the letter this past Friday, and the Audit Committee will have it for the next Audit Committee meeting.

Financial Report Provided

Mr. Miller provided the financial results thru February 2005. Operating Revenues for February of \$8,364,979 are \$316,900 or 3.9% more than budgeted and \$426,922 or 5.7% more than 2004. The budget variance is due to residential water sales which were \$352,226 higher than expected. The prior year variance is due to increased residential water sales and the increase in water rates. YTD Operating Revenues of \$17,616,891 are \$598,519 or 3.5% more than budgeted and \$1,478,180 or 9.2% more than 2004. Operation and Maintenance Expenses for February of \$3,358,548 are \$401,406 or 10.7% less than budgeted and \$551,553 or 14.1% less than 2004. The variance is primarily due to a credit of \$372,710 applied against water treatment expenses for the progress billing of cleanup costs for the crude oil spill. YTD Operation and Maintenance Expenses of \$6,932,389 are \$557,725 or 7.4% less than budgeted and \$520,185 or 7.0% less than 2004. Total Operating Expenses for February of \$5,595,309 are \$360,213 or 6.0% less than budgeted and \$267,041 or 4.6% less than 2004. The budget variance is due to lower than expected operation and maintenance expenses and depreciation expense offsetting higher than expected loss on disposition of property. The prior year variance is due to decreases in operation and maintenance expenses offsetting increases in depreciation expense, water service provided in lieu of taxes, and loss on disposition of property. YTD Total Operating Expenses of \$11,513,387 is \$581,606 or 4.8% less than budgeted and \$36,314 or 0.3% less than 2004.

Net Operating Income for February of \$2,769,670 is \$677,113 or 32.4% more than budgeted and \$718,577 or 35.0% more than 2004. YTD Net Operating Income is \$1,180,124 or 24.0% more than budgeted and \$1,514,495 or 33.0% more than 2004. Total Net Non-Operating Expense for February of \$243,077 is \$116,746 or 32.4% less than budgeted and \$45,495 or 15.8% less than 2004. The budget variance is due to higher than expected interest income, rental income, and allowance for funds used during construction. The prior year variance is due to increases in interest income and decreases in interest expense. YTD Total Net Non-Operating Expense of \$550,078 is \$175,531 or 24.2% less than budgeted and \$987,461 or 64.2% less than 2004. The prior year variance is due to early retirement incentive program costs which were incurred in January 2004. Net Income Before Distributions and Contributions for February of \$2,526,593 is \$793,858 or 45.8% more than budgeted and \$764,072 or 43.4% more than 2004. YTD Net Income of \$5,553,425 is \$1,355,656 or 32.3% more than budgeted and \$2,501,955 or 82.0% more than 2004. Capital Expenditures through February were \$9,690,279 or 10.6% of the 2005 Capital Budget of \$91,148,054.

Mr. Martin inquired what the company's short-term investments are in. Mr. Miller stated they are in U.S. treasury securities.

Operations and Engineering Report Provided

Mr. Greg Heitzman provided the report.

Production – The average production rate last month was 114.0 MGD, which is 4.8 percent lower than the 2004 February production of 119.8 MGD and 2.2 percent lower than the five year average February production of 116.6 MGD. The year-to-date production of 117.6 MGD is 0.7 percent below the year-to-date five year average of 118.5. Maintenance costs were also down because there were fewer main breaks than usual in February.

Ohio River Spill –The total cost (labor and materials) to respond to the emergency is estimated at \$385,000. We are collecting these costs from the responsible oil company.

River Road Country Club – On the morning of February 23, 2005, Louisville Water Company took possession of the River Road Country Club facilities. All furnishings, tools, and equipment were removed from the site before LWC took possession. Domestic water service to the facility has been turned off at the meter, but the fire service remains active. Heat remains on in the main building and is set at 55° Fahrenheit. All building doors were locked. Facilities Management is in the process of draining the swimming pool. Assessment of the condition of the structures is still in progress, however it was noted during the “walk through” that signs of water leakage existed in several areas of the main building.

Advanced Treatment Technology Steering Group – The Steering Group for Advanced Treatment Technology (ATT) conducted its first meeting on January 25. Black & Veatch Engineers presented the scope for pursuing new treatment technology for the Crescent Hill Water Treatment Plant. New technology is required to address future drinking water regulations, the aesthetic quality of water (taste and odor), and the aging infrastructure at the Crescent Hill facility. Black and Veatch presented an overview of the emerging drinking water regulations from the Environmental Protection Agency (EPA) and also provided information on new technologies that are being implemented across the United States to address the regulations. The second meeting of the Steering Group was held on March 10. The focus of this meeting was to present the current knowledge of the Louisville aquifer and evaluate the viability of using River Bank Filtration (RBF) for the Crescent Hill Treatment Plant. United States Geological Survey (USGS) presented an overview of the Louisville aquifer from a water quantity and water quality perspective. LWC staff presented the historical use of RBF at the B. E. Payne Plant and the current tunneling project proposed for B. E. Payne. Jordan, Jones & Goulding Engineers presented the RBF Tunnel concept for consideration to supply the Crescent Hill Plant. Future meetings will focus on other new technologies, including granular activated carbon (GAC) filtration, ultra violet (UV) disinfection, and ozone disinfection. The Steering Group plans a total of five meetings through July 2005. The Steering Group will ultimately present findings and a recommendation to the Board in the third quarter of 2005. Mr. Conner commented that the Group should consider the impact of the recent bid results on the B. E. Payne RBF project.

Serving Customers Report Provided

Ms. Karla Teasley presented the Serving Customers Report.

Performance Measures – The February abandonment rate was 5.8% compared to 9.0 % in January 2005, and 4.9% in February 2004. Bad debt for the month was \$29,390 compared to \$52,619 in January 2005, and \$32,656 in February 2004. Bad debt is \$12,527 under budget for the month and \$1,824 under budget year to date.

Wholesale Customer Proposed Rate Increase - The 2005 Water Rate Schedule contained a rate increase for wholesale customers that purchase water for resale. Effective May 1, 2005 the rate for all wholesale water purchased is \$1.31 per thousand gallons. Five of our six wholesale customers will also be charged an elevated service area surcharge of \$.25 per thousand gallons. LWC held a meeting on March 1, 2005 for all our wholesale customers. Many wholesale customers attended, and we discussed the construction of new water treatment facilities, the development of upcoming water quality regulations, and the wholesale water rate increase proposed for 2005. LWC staff is in

the process of completing the necessary paperwork to file the amended tariff request with the PSC for three wholesale customers regulated by the PSC. LWC does not expect any challenges from our customers to the proposed amended tariffs.

Metered Water Ratio Team Update - Using the new International Water Audit (IWA) standard that has been adopted by the American Water Works Association, the Metered Water Ratio Team developed a multi-year action plan for improving metered water. The new IWA standard translates water loss into economic terms and the action plan is prioritized to address areas of greatest economic loss first. As part of the action plan's development, staff and executive team members learned more about the new standard through on-site presentations by a member of the AWWA Water Loss Control Committee and water loss expert. To stress the importance of the organization's Metered Water Ratio work, the Executive Leadership Team (ELT) created a shared 2005 performance goal for all Vice Presidents that is based on the action plan's major milestones. The ELT will receive regular updates throughout 2005 on the Metered Water action plan progress by team members and the Board will receive a communication on the team's work at an upcoming meeting.

Riverbank Filtration, Phase II Bids Not Accepted

Ms. Kay Ball provided this report.

Three bids were received and opened from pre-qualified tunneling contractors on Wednesday, March 2, 2005 for the construction of the River Bank Filtration (RBF) Tunnel and Pump Station at the B. E. Payne Water Treatment Plant. The low bid was submitted by Kenny Construction Company in the amount of \$48,375,000. This bid is significantly higher than the engineer's estimate of \$31.0 million by \$17.4 million (56 percent). The bid spread from high to low, is \$4.9 million (ten percent). The first two bid prices are within \$429,000 (less than one percent), indicating adequate competition for the work specified.

Jordan, Jones and Goulding Engineers (JJ&G) is the consulting engineering firm working with staff on this project, which includes 8,600 feet of hard rock tunnel with an excavated diameter of twelve feet; thirty-one 16-inch vertical collectors; and a pump station with four vertical turbine pumps, a design which is adaptable for future expansion. Construction of the project requires expertise in the areas of tunneling, well drilling, and heavy construction. Each bid package was required to include a pre-qualified contractor in each of the three categories: tunneling, well construction, and heavy construction. LWC staff worked with JJ&G to insure competition, a good bid sequence, and technically qualified contractors and subcontractors for the specialty trades required for the project. The company also included the Good Faith Minority Business Enterprise and Women Business Enterprise (MBE/WBE) process in the specification to provide business opportunities for minority and women subcontractors. Through the pre-bid process, it was apparent that the opportunity for MBE/WBE participation would result from the second or third tier of subcontracting. In order to allow every opportunity for the subcontractors, staff revised the Good Faith paperwork requirement for submittal within 24 hours of bid.

The project manager's estimate prior to bidding established the contract at \$31,000,000, engineering and supervision costs at \$5,323,300, and sewer installation at \$1,000,000, for a total project cost of \$37,323,300. The apparent low bid set the contract at \$48,375,000, engineering and supervision costs at \$5,323,300, and sewer installation at \$1,000,000, for a total cost of \$54,698,300. JJ&G and LWC staff has initiated the post-bid evaluation of the work. The three

bidders have been contacted to discuss their interpretation of the scope of work, and determine variance and range of cost values for the tunnel, the wells, and the pump station. Although analysis continues, the major discrepancies include: the classification of the tunnel as gaseous; the depth of the tunnel and access shafts; the vertical well construction; construction cost inflation; and overall construction risk. The site conditions and construction restrictions are also being evaluated to determine the impact on schedule and cost.

Mr. Robert Wierzbicki of J J & G Consulting Engineers reviewed the post-bid bidders' responses to inquiry regarding the discrepancies between the estimate and the bid result. They have determined that approximately \$5 million is associated with the classification as a gaseous tunnel, which requires additional probing, ensuring all equipment is non-explosive and constant monitoring for gas presence. The second significant item is approximately \$2.9 million additional for increases in construction costs in 2004. The average increase is nine percent (9%), as a result of steel and concrete increases. This is a trend throughout the market. The third significant item is an additional \$2.7 million for shaft construction. Further unestimated project costs total an additional \$2.5 million. Other less significant additions were for post-estimate/pre-bid design changes by LWC, the bid phase addendum, and costs associated for specialty well drilling equipment, which LWC required could only be used for 12 hours per day, six days a week, rather than 24/7. Mr. Wierzbicki believes the bids are competitive and encouraged the company to consider value engineering to allow the bidders to offer changes to the project to get it under budget.

Mr. John Huber advised, while value engineering may be an effective tool, the changes in magnitude for the project dictate re-bidding the project rather than value engineering. Ms. Barbara Dickens commented the possible scenarios to change the project are all significant changes in scope and would require re-bidding the project. Mr. Heitzman stated the company should release the bidders from their bids, which in turn releases them from their bid bonds. Mr. Martin commented that project costs could increase on a re-bidding of the project. Mr. Wierzbicki responded there appears to be slight stabilization in the market, but that prices could definitely increase. He advised one option would be for LWC to conduct the exploratory drilling before re-bidding to determine if the tunnel must be classified as gaseous or not. We also should consider some of the construction limitations placed on contractors to determine if their impact on the bid price is avoidable.

Mr. Conner agreed that value engineering is not appropriate in this situation. Mr. Martin stated the Board needed to consider how much cost it could bear. Mr. Conner advised we should incorporate the value engineering into the next bid. Mr. Heitzman stated this depends on procurement law and our policy. Mr. Wierzbicki said value engineering is included in the terms and conditions of the bid, but perhaps not to this extent of changes. Mr. Huber recommended the bids and the bid bonds be released. Mr. Martin moved to release the bids and the bid bonds. Ms. Margaret Harris seconded, and the motion carried four to one, with Dr. Joseph Wise voted nay. Dr. Wise stated the bidders did not appear to be bidding the conditions that the engineer approved. Dr. Wise wondered what the engineers estimate would be if the bid conditions that were bid were included in the estimate. Mr. Conner responded that he understood the concern, but does not think this changes anything in the next ninety days while these bids are open. Dr. Wise stated he was comfortable with releasing the bids and bid bonds, thereby making the vote unanimous.

**Contract Awarded On Contingent Basis for Project 03-662 Louisville International Airport
60" Main Relocation**

Mr. Ralph McCord provided this report. Four bids were received and opened on December 15, 2004 to furnish pipeline materials and construct the third and final section of the relocation of the 60-inch concrete transmission main at the Louisville International Airport that started in the 1990s as part of the airport expansion project. The proposed project will replace the existing 48/60-inch water main currently in the right-of-way of Fern Valley Road (temporarily closed) situated approximately 700 feet south of the southern end of the west runway, with a new 60-inch concrete transmission main which will follow the alignment of relocated Grade Lane and relocated Crittenden Drive.

While LWC had intended to relocate the transmission main, the final proposed alignment comes as a result of the Regional Airport Authority's (RAA) announcement last Spring to extend the west runway south by 1,000-feet by Spring of 2006, putting the extended runway in direct conflict with the existing 48-inch transmission main. To meet their schedule, LWC established an in-house design team to fast-track design of the 60-inch water main around the proposed extension of the west runway, and those plans were completed before the bid opening. To stay on the RAA's schedule, LWC needs to award the construction contract by April 2005, start construction in May 2005, and substantially complete construction by April 2006.

MAC Construction and Excavating is the apparent low bidder with a bid of \$5,600,000. The second and third bids were clustered within 7% of the low bid, indicating an overall understanding of the scope and complexity of the project. The tight bid sequence also establishes the market value for the proposed project. The revised project cost including MAC Construction's bid is \$6,494,693. The budget of record, approved at the May 2004 BOWW, is \$3,912,000, placing the revised project cost approximately \$2,600,000 over the budget of record.

The major driver for the project increase are design enhancements involving design revisions to the 60-inch transmission main and work added to address associated distribution system piping issues. Other factors not included in the engineer's estimate were trucking, estimated at \$750,000 for material costs and excavated spoils hauling, and loss of production due to site constraints (work hours and accessibility). Although the RAA has not announced plans to extend the airport facility beyond the current 1,000-foot southern expansion, to avoid another costly relocation of the proposed 60-inch water main with a further runway extension, the final design also included supply and installation of an 84-inch casing pipe and casing spacers that is estimated to cost \$500,000. These factors combined to significantly impact the scope and cost of the proposed project. Staff validated these costs with the likely material supplier (Price Brothers).

The initial design estimate provided for only minimal modifications (tie-ins, etc) to the distribution system in conjunction with construction of the new 60-inch transmission main. However, as the design proceeded, a number of distribution issues, some previously known and planned (MRRP projects) and unknown were identified as needing to be addressed. These distribution system improvements over 5,960 feet will collectively cost approximately \$900,000. Further, contractors' legitimate concerns over being able to maintain a reasonable level of work productivity in the Grade Lane corridor while maintaining traffic flow, utility service, and continuous access to customers such as UPS impacted the project cost by approximately \$400,000 - \$500,000 that was not originally included in the engineer's estimate.

LWC staff has reached an agreement in principle with the RAA where the RAA will reimburse LWC \$1,608,485 for their prorated share of constructing new 60-inch transmission main for costs associated with the 60-inch water main presently within the right of way of Fern Valley Road. This share is approximately 50% of the cost of constructing 3,500 feet of new 60-inch transmission main. In addition, easements must be gained from the RAA, UPS, and the Kentucky Transportation Cabinet.

Mr. Conner inquired what would happen to the existing pipe. Mr. McCord stated LWC will abandon it in place, and RAA will either remove it and then fill and compact the void, or the main will be filled with a non-shrinking grout. Mr. Huber commented that the most difficult issue with this project is timing, because this main cannot be taken out of service most months of the year due to higher flow. Mr. McCord noted we must have this work completed in time to do the tie-in by April 15th or we cannot do the tie-in until November. We are planning for the inability to meet the April 15th date in the event of unavoidable delays.

Mr. Heitzman advised this is the best solution for LWC to get this main out of the direct path of the runway. The proposed easement language with RAA would require LWC to pay for all costs associated with any future relocation unless the property is transferred by RAA to non-governmental entity or if future law allows RAA to reimburse LWC for relocation costs. Mr. McCord stated two issues would have to be immediately addressed with the contractor if the contract is awarded, those being the contract completion date and the amount of casing pipe used. The project schedule has already been extended due to delays in reaching an agreement with RAA.

Mr. Rick Johnstone inquired why we are accepting this much financial responsibility for a project that seems to be caused by the RAA extending their runway over our line. Mr. Heitzman responded that half of the project (in terms of length) was already promised to be completed by LWC at our own cost in 1994. The other half of the project is what we have reached a tentative agreement with RAA to do a 50/50 cost sharing. In terms of property rights, eighty percent (80%) of this project is in former Right of Way and about twenty percent (20%) is in an old easement between LWC and RAA that states LWC will pay in the event RAA requires a relocation.

Dr. Wise moved to establish a new project budget of \$ 6,512,000 for relocation of the 60-inch main at the airport and the associated improvements to the adjoining distribution system and to authorize the President to award a contract in the amount of \$5,600,000 to MAC Construction and Excavating for construction of the project, contingent upon reaching a contribution agreement with the RAA and acquiring all easements and necessary permits from the RAA, UPS, the Commonwealth of Kentucky and Metro Government, all of which must be acceptable to LWC General Counsel. Mr. Martin seconded, and the motion carried.

Public Affairs and Customer Satisfaction Committee Report Provided

Ms. Marita Willis provided a report of the Public Affairs and Customer Satisfaction Committee's discussion and actions at its meeting on February 24, 2005. The CSI trend for serviced customers has been positive for the past two years. Since reaching 800, it has remained relatively steady with the exception of a drop in the fourth quarter of 2004. It is not clear what caused this drop. Regarding the calls received by the Customer Service Center, a very small minority of calls are concerning water quality or main breaks. We have to work to manage the call peaks. We are encouraging use of the Interactive Voice Response (IVR) system. The goal is to have at least 15% of all callers use the IVR. In Bullitt County, we have a phone available for walk in customers to

contact our Call Center, and those calls are given priority. The Service Rules and Regulations have been printed and 500 books were distributed to staff and various customer groups needing a hard copy. They were also posted on the Internet for external customers and the Intranet for internal customers. The new Service Deposit began being applied as in February. It has been applied to approximately 200 customers. .

Ms. Willis stated the Committee also received an update on 2005 General Assembly. Mr. Vince Guenther stated the budget has passed both houses and is fully expected to become law. It includes \$132 million for water and sewer projects and \$61.5 million for Kentucky Infrastructure Authority funding. Included in these amounts is a \$399,000 grant for Hill Top Road in Bullitt County. The grant is significant because it will enable us to extend water along Hill Top Road without using money from the Bullitt County reserve. Also included in the budget is full funding for retiree health insurance benefits without the addition of an Unescorted Retiree Adjustment Fee. Inclusion of this fee will be considered by the Blue Ribbon Commission on Healthcare, to which Vice President Susan Lehmann was recently appointed.

Mr. Guenther stated there were a few bills of interest that LWC watched during the session. HB 278 established a pool to cover high risk individuals for small businesses and, as originally proposed, would have resulted in a ½ of 1% tax on all health insurance premiums. However, the provision requiring the tax was removed from the bill, thereby eliminating any impact to LWC. HB 372 would have required all water and sewer labs in the state to be certified by NELAP, but the bill's sponsor agreed not to call it and wants some discussion on the use of NELAP certified labs in the state. This would affect LWC laboratories if it had passed. HB 59, awaiting the Governor's signature, provides an exemption under the Open Records Act for homeland security records produced by government agencies. HB 130, extending hazardous duty retirement to sewer plant operators and collection system personnel, did not pass. Also, HB 427, allowing multi year rate filings with the PSC did not pass, but the PSC has agreed to discuss the possibility of allowing this.

Ms. Willis advised LWC discussed the rate increase for 2005 as a "business trends" story with both Business First and the Courier Journal (Business Section). The Committee also generally discussed the make-up and functioning of the Customer Advisory Council.

First Quarter Dividend Declared

Mr. Miller advised Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City. The dividend declared for 2004, based upon estimated net income, is required to be adjusted after completion of the annual audit to reflect any difference between estimated and actual net income. The amount of such adjustments is to be paid with or deducted from the regular quarterly dividend payments. The annual audit has been completed. Net income of \$28,569,016 requires a total 2004 dividend to the City of \$14,093,410. The total dividend declared during 2004 was \$13,766,392. The difference between the dividend declared for 2004 and the actual dividend computed for 2004 is \$328,018.

In addition, due to the change in policy to eliminate from its inception in 2002 the practice of deducting the rate differential for acquired systems from net income for the purpose of computing the dividend, the dividend from 2002 and 2003 is increased by \$1,526,239.

The net effect of these computations will result in an amount of \$1,853,257 to be added to the regular quarterly 2005 dividend payments in equal quarterly installments of approximately \$463,314.

The 2005 Annual Budget provides for a budgeted annual dividend of \$13,318,020, or quarterly dividend payments in the amount of \$3,329,505. Along with the quarterly amount for the adjustments, the total quarterly payments would be \$3,792,819.

Dr. Wise moved to approve the following resolution to declare the first quarter dividend to the Metro Louisville Government. Mr. Martin seconded, and the motion carried.

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, an estimated dividend of \$13,766,392 was declared in 2004 based on estimated annual net income while \$12,698,880 was paid in 2004, the difference being the amount of the dividend prepayment of \$1,067,512 which occurred in 2003, and

WHEREAS, the annual audit for 2004 has now been completed which establishes the full dividend for 2004 as \$14,093,410 based on actual annual net income of \$28,569,016, it would be in order at this time to amend the Board resolution of December 14, 2004 to increase the 2004 annual dividend by \$327,018, from \$13,766,392 to \$14,093,410, the difference to be added in installments to the quarterly 2005 dividend payments, and

WHEREAS, the Board of Water Works adopted a resolution at its meeting of December 14, 2004 to eliminate from its inception in 2002 the practice of deducting the rate differential for acquired systems from the net income available for the purpose of computing the dividend, the dividend from 2002 and 2003 to be increased by \$1,526,239, it would be in order to add that amount in installments to the quarterly 2005 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2005 Louisville Water Company Annual Budget contemplates the 2005 annual dividend to be \$13,318,020, it would be in order at this time to declare a regular first quarter dividend of \$3,329,505;

RESOLVED, the 2004 annual dividend is increased from \$13,766,392 to \$14,093,410 and the difference of \$327,018 will be added in quarterly installments to the regular 2005 quarterly dividend installments, and

RESOLVED, the 2005 dividend payment is increased by \$1,526,239, this being the amount of the dividend from 2002 and 2003 due as a result of eliminating from its inception in 2002 the practice of deducting the rate differential for acquired systems from the net income available for the purpose of computing the dividend, to be added in quarterly installments to the regular 2005 quarterly dividend installments, and

RESOLVED, the regular first quarter 2005 dividend of \$3,329,505 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,792,819 to the Louisville / Jefferson County Revenue Commission on March 31, 2005, this being the first quarterly dividend for 2005 plus one quarter of the dividend adjustments for 2002, 2003 and 2004, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Compensation Committee Report on the Human Resource Information System (HRIS) Provided

Mr. Conner reviewed with the Board the activities that have taken place regarding the HRIS since the last full BOWW meeting. It had been decided that the company should obtain an outside peer review of the process utilized by and the recommendation by staff for the HRIS. At the direction of the Compensation Committee, staff engaged Centric Consulting to conduct the peer review. Mr. Conner advised Directors that a thorough review of Centric's findings were included in the Board materials. These findings were reviewed with the Compensation Committee last Thursday, March 10. Rather than go through them in detail, he summarized Centric's basic finding of agreement with the process of Request for Competitive Negotiations (RCN) followed by staff and Centric's finding that PeopleSoft software is the appropriate solution for the organization's human resources technology needs. The real question for the Board is how the company should implement the system, specifically whether a "big bang," (i.e. all at once) approach should be used or a phased approach should be used. Mr. Conner stated the Compensation Committee is comfortable with the recommendation of PeopleSoft as the solution, especially given that "doing nothing" is not an option. However, the Committee felt it needed additional information regarding the costs of implementing the individual modules requested that were in addition to the Core modules.

Mr. Conner advised Centric also reviewed the alternative options of complete outsourcing of HR and the utilization of an Application Service Provider (ASP). Neither of these is a viable option due to the small size of our HR function and the lack of true savings in the face of loss of data control. Mr. Martin confirmed that contractors that handle outsourcing HR from the outside are not interested in companies the size of LWC.

Ms. Wendy Welsh stated she struggles with the addition of modules other than the core modules of HR, Benefits and Payroll. She does not feel the business case justifies additional modules. Mr. Conner asked if the Board is comfortable with the purchase of all the modules, but implementation of only the core modules now and Board consideration of the additional modules at a later time. Mr. Conner reviewed that staff is requesting purchase and implementation of HR, Benefits, Payroll, Basic Self Service, HRMS Portal Pack, Enterprise Learning Management (ELM), and eRecruitment. Mr. Martin stated it appears the extra modules beyond the core modules are only an additional \$30,000 to implement and, if this is the case, we should implement them now to save increased labor costs later. Mr. Conner commented that he received the implementation costs from

staff only today and had not had time to verify them or consider them. Ms. Welsh stated she does not believe enough information has been gathered on the number of recruitment transactions that occur for which eRecruitment is needed. Ms. Lehmann stated LWC received over 4000 resumes and managed 300 internal and 100 external job postings in 2003 and 2004.

Mr. Huber inquired whether the Board is comfortable with the purchase of all of these modules, with the consideration of what to be implemented later. Ms. Lehmann reminded the Board that the pricing given by these companies expires at the end of March 2005, and further delays place us at risk for not meeting the January 1, 2006 "go live" for payroll and for losing the implementation team proposed by Empower, the implementation provider.

Mr. Johnstone feels the Committee has completed the investigation it needs to do and, if the difference in cost to implement the additional modules is not significant, the Board should move forward with them all. Ms. Welsh again commented that she feels the full system being requested by staff is not justified for a company with 450 employees. Mr. Conner noted that Centric estimated savings from utilizing a phased approach. Ms. Welsh agreed, also noting that phasing the implementation allows staff to learn the requirements and perhaps not utilize an implementation partner on the later modules and also results in a less dramatic change for the organization.

Dr. Wise inquired as to the cost of this system proposed per employee. Mr. Huber reviewed Centric's estimates that what we are currently doing is costing the company \$1.7 million over 5 years. The five year cost of the mid-tier provider is estimated at \$2.367 million. The PeopleSoft with the "big bang" approach is estimated at \$2.548 million versus \$2.405 million with a phased implementation ELM. Ms. Kathy Schroeder advised that these costs include our labor costs, which other companies usually do not include when estimating costs of such systems. So, these costs may appear high when benchmarking.

Mr. Huber summarized that there appears to be concurrence from all Directors to purchase the seven PeopleSoft modules listed. With regard to implementation, he recommended the Board agree to implement all of the requested modules except ELM and eRecruitment, and to defer the decision of implementation of those two modules to the Compensation Committee for a decision.

Dr. Wise stated he feels we may be agreeing to pay too much for a system we do not need. Ms. Welsh stated she agreed. She feels because of how the RCN was put together, staff limited the result to what was received and eliminated mid-tier providers. Mr. Conner responded the consultant we hired opined the mid-tier solution is not appropriate for LWC. However, if there is this level of concern of Directors, Mr. Conner did not believe any action on this date was appropriate. Mr. Conner asked if Directors still have questions, and Ms. Welsh stated she does. Mr. Conner stated that Directors will have to immediately provide questions in order for staff to be able to respond in time for a thorough review of those responses by the Compensation Committee at its next meeting. The next Compensation Committee meeting is to be held sometime prior to the BOWW meeting on April 12, 2005. Directors will provide Mr. Conner any questions they have as soon as possible.

Closed Session

Ms. Willis moved to go into closed session to discuss proposed or pending litigation and property matters pursuant to KRS 61.810(1)(b) and (c) at 2:45 p.m. Ms. Harris seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Willis, and unanimously carried, the Board resumed open session at 2:58 p.m. No action was taken as a result of closed session.

2004 Year End Strategic Plan Results Reviewed

Mr. Huber advised the current plan has a horizon of 2008. We have specific measurable goals in four areas: Customer Satisfaction, Product Quality, Financial Results and Employee Quality of Work Life. Seven of fourteen of the goals were met for 2004. We spent more time in 2004 dealing with current issues to the detriment of strategic issues.

Regarding Customer Satisfaction goals, our 2004 average for overall CSI was 839, compared to a 2004 goal of 850. Our 2004 average for Serviced Accounts CSI was 796, compared to a 2004 goal of 800. Our 2004 rate increase was 4.9%, compared to a change in rate that was at or below the anticipated CPI plus 1%, and therefore did not meet the goals. None of the Customer Satisfaction goals were met.

Regarding Product Quality Measures, we meet all three of the distribution water quality goals for coliform, chlorine residual and turbidity by having over 99% of all samples taken negative or below limits, depending on the specific measure. The goal had been 99%.

Regarding Financial Measures, we did not meet the goal of earning a return-on-equity (ROE) at a target level of 1% less than the 5-year moving average ROE for the benchmark group of investor-owned utilities. The goal for 2004 was 9.07%. If budgeted deposits to the Infrastructure Replacement Reserve were made, our ROE would have been 8.85% and without those deposits, it was 9.74%. We did meet the goal to control Operations and Maintenance costs per metered customer to \$167.13, by achieving an O&M cost per customer of \$163.60. We did not meet the goal of achieving annual sales of 38.7 billion gallons. Our sales were 38.3 billion gallons. Finally we did not meet the goal of increasing operating revenue to \$106.3 million; our annual operating revenue was \$103.5 million. Mr. Martin commented that the method of calculating the ROE is going to be considered by the independent financial advisor.

Regarding Employee Quality of Worklife Measures, we met the 2004 goal of a lost time injury frequency rate of less than 3.13 and lost time injuries less than 16 total by having only 5 lost time injuries and a frequency rate of 1.09. We did not meet the 2004 goal of having less than 30 preventable vehicular accidents. We had a total of 37. We also did not meet the 2004 goal for an Internal Customer Satisfaction score of 3.55. The composite score was 3.30. We met both goals regarding contracts with Women and Minority-Owned Business Enterprises. The 2004 goal was 5% each, which we exceeded with 6.25% MBE contracts and 10.2% WBE contracts. Mr. Huber reminded the Board we had formerly utilized an Evaluated Bid program which included M/WBE participation, but had moved to the Good Faith Effort program, which is used by Metro Government. Dr. Wise inquired whether we have implemented a program requiring contractors to use a certain number of women and minorities on the job sites. Mr. Heitzman stated we have not required any certain number of women and minorities on the job site but we track the number from information supplied by contractors. Dr. Wise feels we should have a policy in place requiring a certain number women and minorities to be used on the jobsite.

Mr. Huber stated the Board needs to determine what role the Directors should play in the company's strategic planning. Many companies are considering this issue. Our strategic plan begins by stating our mission, vision and values, and Mr. Huber believes the Board could start with this. We also have 3 key constituencies – our customers, our owner and our employees. The Board could look at planning from the standpoint of constituency groups also. Mr. Conner believes strategic planning should be given preference in the meetings and that it would be appropriate to have a BOWW meeting dedicated solely to strategic planning. Mr. Martin agrees a dedicated meeting is appropriate, and the Mayor should be invited to provide input. Mr. Conner agrees we should have the Mayor's view, but does not think it is necessary to have the Mayor (as sole shareholder) present. Mr. Conner wants to use such a meeting to discuss the cyclical earnings issue caused by weather and the ability of the company to reserve against that. Mr. Miller advised he is working on a report on this topic for the June 2005 BOWW meeting. Dr. Wise commented it would also be appropriate to discuss exactly what business LWC is in, in light of recent discussions regarding Metro Government possibly operating LG&E as a wholly-owned subsidiary of LWC. The Directors were in consensus that a special-called BOWW meeting should be scheduled in June or July to discuss strategic topics only. Ms. Willis suggested having this meeting offsite at one of the places owned by Metro Government.

The Board conducted an executive session without management present. No action was taken.

There being no further business, the meeting was adjourned at 3:35 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
APRIL 12, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Jim Smith, Business System Owner, Business Development
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Mr. Tony Gregory, Business System Owner, Providing Information Technology
Mr. Vince Guenther, Process Owner, Providing Governmental Relations

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers
Ms. Debra Vaughn

The regular meeting of the Board of Water Works was held on Tuesday, April 12, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:41 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Dr. Joseph Wise moved to approve the minutes, seconded by Mr. Gerald Martin, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber stated the Annual Report for 2004 has been completed. Board members were provided copies. He advised the Environmental Protection Agency continues to review and revise the regulations regarding lead. We had a program in the past with the school district to address lead from water fountains. The new regulations would provide, among other things, additional requirements for schools to flush lines after weekends, school vacations and holiday periods. Mr. Huber will keep the Board informed of developments that impact Company operations.

Financial Report Provided

Mr. Robert Miller provided the financial results thru March 2005. Results for March were mixed, in that we lost some ground we had gained on sales in the first two months of the year, but expenses continue to be low, reflecting the mild winter we experienced. Operating Revenues for March of \$8,202,271 were \$249,756 or 3.0% less than budgeted and \$345,400 or 4.4% more than 2004. The budget variance was due to residential water sales which were \$182,022 lower than expected. The prior year variance was due to the increase in water rates. YTD Operating Revenues of \$25,819,162 are \$348,763 or 1.4% more than budgeted and \$1,823,580 or 7.6% more than 2004. Operation and Maintenance Expenses for March of \$3,690,894 are \$107,576 or 2.8% less than budgeted and \$182,207 or 4.7% less than 2004. YTD Operation and Maintenance Expenses of \$10,623,282 are \$665,301 or 5.9% less than budgeted and \$702,391 or 6.2% less than 2004. Total Operating Expenses for March of \$5,972,476 are \$115,488 or 1.9% less than budgeted and \$33,404 or 0.6% more than 2004. The budget variance is due to lower than expected operation and maintenance expenses and depreciation expense offsetting higher than expected loss on disposition of property. The prior year variance is due to decreases in operation and maintenance expenses offsetting increases in depreciation expense, water service provided in lieu of taxes, and loss on disposition of property. YTD Total Operating Expenses of \$17,485,863 is \$697,094 or 3.8% less than budgeted and \$2,910 less than 2004.

Net Operating Income for March of \$2,229,795 was \$134,268 or 5.7% less than budgeted and \$311,996 or 16.3% more than 2004. YTD Net Operating Income was \$1,045,857 or 14.4% more than budgeted and \$1,826,491 or 28.1% more than 2004. Total Net Non-Operating Expense for March of \$173,296 was \$176,796 or 50.5% less than budgeted and \$140,938 or 44.9% less than 2004. The budget variance is due to higher than expected interest income, rental income, and allowance for funds used during construction. The prior year variance is due to increases in interest income and decreases in interest expense. YTD Total Net Non-Operating Expense of \$723,375 was \$352,326 or 32.8% less than budgeted and \$1,128,400 or 60.9% less than 2004. The prior year variance is due to early retirement incentive program costs which were incurred in January 2004. Net Income Before Distributions and Contributions for March of \$2,056,498 was \$42,527 or 2.1% more than budgeted and \$452,934 or 28.2% more than 2004. YTD Net Income of \$7,609,924 is \$1,398,183 or 22.5% more than budgeted and \$2,954,890 or 63.5% more than 2004. Capital Expenditures through March were \$14,220,351 or 15.6% of the 2005 Capital Budget of \$91,148,054.

Operations Report Provided

Mr. Greg Heitzman provided the operations report.

Production – The average production rate last month was 110.8 MGD, which is 1.5 percent lower than the 2004 March production of 112.5 MGD and 2.4 percent lower than the five-year average March production of 113.5 MGD.

Kentucky River Oil Spill Monitoring – The Environmental Protection Agency (EPA) and Kentucky Emergency Response Team are assessing the environmental impacts of the crude oil spill event that occurred in January. The amount of crude oil spilled has recently been revised to 262,542 gallons (6,251 barrels), which is about four times higher than the initial estimate of 60,000 gallons. There were concerns of the potential long-term residual impact of the spill on the River Bank Filtration (RBF) facility at B.E. Payne. As a result, Louisville Water Company (LWC) water quality staff coordinated with United States Geological Survey (USGS) and conducted a water quality survey around the RBF facility, in addition to the daily water quality monitoring at the well. Two rounds of samples were collected at four monitoring locations in the well field. Samples were analyzed for volatile organic chemicals, semi-volatile organic chemicals and other general water quality parameters. There were no detections of the volatile organic

chemicals in the samples collected. Trace amounts of semi-volatile organic chemicals were detected in the first round of samples, but none were detected during the second round. Daily monitoring results as of April 6 at the demonstration well showed no sign of contamination by the spill event. The Company expects to be reimbursed by Mid-Valley Pipeline for the full cost of the spill. Mr. Rick Johnstone asked whether such a reimbursement will positively affect the budget. Mr. Miller responded that it will have no effect because we already have booked it as a receivable.

Tyler Storage Tank – Staff entered into a contract to purchase property on which a storage tank will be located from the Nicklies Company. This site will accommodate the construction of a one MG storage tank along Taylorsville Road at the site of the proposed Kroger development. The current budget for the tank is \$1.86 million. Due to several factors, the cost to construct the tank will exceed the budget allowance approved by the Board in September 2004. Steel prices are currently at a premium, and the tank specification must be modified to address electrical shock potential during construction from nearby radio towers and to prevent the interference with the radio signal. Staff is using Tank Industry Consultants of Indianapolis to assist in the tank design. A modified budget request will be presented to the Board in May for approval and authorization to advertise and bid the tank.

Crescent Hill Slate Roof Project – Roof Resources is completing the design for the slate roof replacement and building improvements for the North-South Filter Building. The plan is to advertise and bid the project within the next 90 days. The project budget for the work is \$3.65 million, approved by the Board in December 2004. During final design, an inspection of the roof was performed, and significant damage to the slate roof was discovered. Mr. Heitzman provided photographs of the damage. The damage is likely a result of the ice and snow storm in December 2004, where ice slid off the chemical building roof, puncturing the slate roof on the adjacent North-South Filter Building. This discovery brings into question the condition of the chemical building slate roof. Previous inspection in 2001 indicated the chemical building roof to be in fair condition, and would not require replacement until after 2010. This damage was not present in the Fall of 2004. Staff has authorized the consultant to perform an inspection of the chemical building roof and prepare a construction estimate for replacement of this roof with the North-South Filter Building project. If this roof also needs replacement, it is a large enough overall project that an economy of scale exists to perform both replacements at the same time. Staff estimates an additional \$540,000 to replace the chemical building slate roof, bringing the total project to \$4.2 million. The consultant will complete the assessment in April, and a full report with recommendation will be provided to the Board in May.

Serving Customers Report Provided

Mr. Jim Smith provided the Serving Customers report in Karla Teasley's absence.

First Quarter 2005 Customer Satisfaction Results – Customer satisfaction increased in the first quarter of 2005 to the highest level experienced since the fourth quarter of 2003. The Total Customer Satisfaction Index (CSI) level is 851 which exceeds the Corporate Level II goal of 850. Most of the CSI factors increased for the quarter with new highs for customers' perceptions of customer service and information. The only segment that dropped in satisfaction for the quarter was the commercial non-service group, returning to 860 (from a high of 889 in 2004).

Customer satisfaction for the Service CSI recovered from the fourth quarter 2004 drop in satisfaction to 802, above the 2004 annual average of 796. This index score is above the Level III goal of 800 for customer satisfaction for the Corporate Performance Award. Commercial service numbers recovered from the substantial drop in the fourth quarter of 2004.

Wholesale Customer Proposed Rate Increase - At the Board's December 14, 2004 meeting, the 2005 Water Rate Schedule was approved. Effective May 1, 2005 the rate for all wholesale water purchased is \$1.31 per thousand gallons. Five of our six wholesale customers will also be charged an elevated service area surcharge of \$.25 per thousand gallons.

LWC has three wholesale customers that are regulated by the Public Service Commission. On March 11, 2005, the Company submitted the necessary paperwork to file the amended tariff request with the PSC for North Shelby Water Company, West Shelby Water District and North Nelson Water District.

The final component of the filing yet to be submitted to the PSC consists of letters of no objection from our regulated customers. LWC received a letter of no objection from West Shelby Water District April 4, 2005.

RAA – 60-inch Main Relocation at Airport - Staff met with representatives of the Regional Airport Authority (RAA) on March 23rd and March 29th to discuss their participation in funding the relocation of the 60-inch transmission main that lies in the area planned for extension of airport runways in 2006. The RAA has agreed to pay LWC \$1.608 million for 50% cost sharing of the 60-inch main relocation caused by the planned runway extension. It has also agreed in principle to easement terms that RAA will reimburse LWC for any future relocation of the planned water main within the new RAA easements as permissible by law. The RAA Board granted the RAA Executive Director the authority to execute the reimbursement agreement and the easements once they are in an acceptable form. The low bidder for this project, MAC Construction & Excavating, has agreed to extend their bid price through April 15, 2005. To maintain the current schedule, the RAA reimbursement agreement must be finalized and executed along with all easements obtained by this date.

AM/FM/GIS - On March 1, 2005, LWC and GRW Engineers, Inc. were jointly presented with an Engineering Excellence Award from the American Council of Engineering Companies (ACEC) Kentucky, for the development of the Automated Mapping/Facilities Management (AM/FM) geographic information system (GIS). The award was presented in recognition of excellence in the field of mapping and surveying technology, and was one of five Grand Awards given by ACEC-KY for engineering-related projects throughout the state of Kentucky.

Closed Session

Ms. Wendy Welsh moved to go into closed session to discuss proposed or pending litigation and personnel matters pursuant to KRS 61.810(1)(b) and (f), respectively, at 1:02 p.m. Mr. Martin seconded, and the motion carried.

Open Session Resumed

On the motion of Dr. Wise, seconded by Ms. Welsh, and unanimously carried, the Board resumed open session at 2:07 p.m. No action was taken in closed session.

Ms. Marita Willis moved to recommend the following salaries for company officers:

Greg Heitzman	Vice President, Operations and Chief Engineer	\$143,600
Robert Miller	Vice President, Supplying Financial Resources and Treasurer	\$134,500
Karla Teasley	Vice President, Serving Customers and Business Development	\$136,600
Barbara Dickens	Vice President, General Counsel and Secretary	\$125,600
Susan Lehmann	Vice President, Human Resources and Organizational Effectiveness	\$133,500
John Huber	President and CEO	\$198,800

Ms. Margaret Harris seconded, and the motion carried.

Board of Water Works
Regular Minutes April 12, 2005
Page 4 of 8

Compensation Committee Report Given

Mr. Conner provided the Board an overview of the committee's discussion regarding the Human Resources Information System (HRIS). Staff has renegotiated with Empower for the implementation of the system and there has been a \$120,000 reduction in the implementation cost proposed previously. Thus, the revised budget requested is \$2,566,000. Mr. Conner inquired whether Directors had any further questions regarding the HRIS. Mr. Martin moved to approve the budget for the purchase and implementation of a new HRIS in the amount of \$2,566,000. Ms. Welsh seconded, and the motion carried.

Audit Committee Report Given

Ms. Welsh provided an overview of the Audit Committee's meeting held March 29, 2005. The Committee met with a representative of Crowe Chizek, Ms. Laurie Haun, who provided a summary of the external auditor's findings. This was a full audit. The Audit Committee inquired of Ms. Haun what it would take for an external auditor to provide the Board an opinion regarding the adequacy of internal controls. Ms. Haun has replied that, although they conduct a full audit, it would take a much more extensive review and the auditor who performs the audit is not likely to want to provide an opinion regarding the adequacy of controls.

Ms. Welsh advised the Management Letter did not note anything significant, but the committee was made aware of three minor issues. Crowe noted three journal entries out of a sample of twenty selected for testing did not have review or approval by supervisory personnel. Management is addressing this by defining a new responsibility in the Oracle module that only allows non-supervisory employees to enter budget or actual journal entries. These entries are then posted by a different employee with only four employees allowed access to the posting responsibility in Oracle. During Crowe's review of water accounts receivable balances, they noted two errors from their sample of the 20 largest balances. Both of these errors were corrected in 2005, but the receivable balances at December 31, 2004 were overstated. Management has worked to define a process for all cancel re-bill accounts greater than \$10,000 so adjusting entries made after month end can be corrected if the period is still open. Additionally, Metering Services is reviewing and updating the edit process to check for significant changes in account billings prior to posting the initial bill.

During Crowe's review of bank reconciliations, they noted that the operating bank reconciliation included checks that have been outstanding for a long period of time, some in excess of one year. Management is working to resolve outstanding checks as many were from the old legacy system. Additionally, a process has been implemented to notify payees on old items after a defined aging.

Ms. Welsh advised that the proposals for an Information Technology General Controls Audit are expected to be received near the end of April. The IT Operating Plan will address the outstanding issue of backup hardware in the event the current equipment is rendered inoperable.

Ms. Welsh advised that the Warehouse Module for Oracle was considered by the Warehouse Management Team, but after presentation to the ELT, that Team will consider the fundamental question of whether LWC should continue operating a warehouse for contractors. The next physical inventory for the warehouse will be in June.

Ms. Welsh advised the committee reviewed the outstanding issues with the Internal Auditor and progress is being made toward resolution of the outstanding issues.

Mr. Conner stated it is difficult to know the right way to handle an audit to determine the adequacy of internal controls, in light of the Sarbanes-Oxley Act. LWC is not governed by Sarbanes-Oxley, which is very stringent, but certainly LWC wants to model the same high standards required by Sarbanes-Oxley. Mr. Conner feels comfortable with staff developing a plan in 2005 for an audit of internal controls, with the audit actually occurring in 2006.

Strategic Plan Overview Provided

Mr. Huber advised staff is providing an overview of the Strategic Plan so that all directors, many of whom are new, will be familiar with the current plan before the Board meets later in the year to discuss strategic planning. Mr. Heitzman provided a summary of the company's vision statement, which is "To be the water supplier of choice throughout the region; operating in a highly competitive, customer-focused manner; delivering outstanding quality, customer satisfaction, and value." We currently provide retail services throughout Jefferson County and in parts of Bullitt and Oldham Counties. We provide wholesale water service to portions of Shelby, Spencer, Bullitt and Nelson Counties. Mr. Huber emphasized we want to be the water supplier of choice to all residents for all uses, including drinking water versus bottled water purchased through other vendors. Mr. Heitzman stated we are operating in a highly competitive and customer-focused manner despite having a monopoly within Jefferson County. We benchmark within and outside of the water industry to ensure our business practices are the best practices. Mr. Heitzman concluded by emphasizing our focus on quality, customer satisfaction and value is at the core of all we do.

Mr. Miller reviewed the company's mission statement, which is "To serve the water needs of our customers through outstanding quality, service and value at a market return to our stockholder." He advised this means more than meeting public health and fire protection needs. As customer expectations grow, there is a greater need for additional services and more information, at the same time as we strive to exceed regulatory standards for quality, pressure and reliability. We are currently reviewing how we measure the market return to our stockholder, which makes up 32% of our overall rates. We must constantly strive to ensure the rates we set are fair to the customer while providing a fair return to the stockholder.

Ms. Susan Lehmann discussed the company's core values of Customer Focus, Teamwork, Pride in Workmanship, Trust, Empowerment, Diversity, Continuous Learning and Continuous Improvement. Our core values are the foundation and support for everything the company does. The company focuses on both internal and external customer needs and expectations. Staff works together to ensure corporate goals are met. We encourage employees to take pride and ownership in the work they do, empowering them to make decisions for which they are accountable and to complete work to satisfy customer needs within defined boundaries. The company believes in diversity and encourages appreciation of differences of all individuals. To be successful, we are committed to lifelong learning by personal development, training and education, and we believe in constantly striving for continuous improvement to achieve higher levels of performance every day.

Ms. Barbara Dickens discussed the governing legal conditions for the Company. The Louisville Water Company was chartered by an act of the General Assembly, and subsequently state statutes have been enacted to further define the role of the Company. The original Charter states the Company has the power to construct and establish a water system within the City of Louisville or elsewhere for the purpose of supplying the city and its inhabitants with water. So the Charter neither expressly limits our services within the City, nor expressly requires the supplying of water to be our sole purpose. Later, KRS 96.23 was enacted for cities of the first class or those with a consolidated government to own a corporation which is engaged in supply water to its inhabitants. Another statute, KRS 96.265, which authorized the county-wide extension program, permitted the company to "extend the corporation's facilities to provide

water services to persons within and outside the city of the first class, *including* extensions into counties adjoining its county of origin.” Therefore, Ms. Dickens advised the statutes do not expressly limit the company’s business to the supply of water within our region or even to adjoining counties only.

Mr. Smith provided an overview of our current marketplace and how we developed from a company serving 256 square miles 15 years ago to a company serving 624 square miles today. A 23-county regional area is considered to be the metropolitan area providing Greater Louisville with workers, supplies and services. This area includes Southern Indiana. Mr. Martin inquired whether we have determined we cannot serve Indiana counties. Mr. Huber stated we have not; we have considered retail service in Indiana, but it was not considered economically feasible. The urban areas of Indiana are served by the U.S. subsidiary of RWE, a German corporation. We provided a proposal a few years ago to provide water on a wholesale basis to that area, but the decision makers did not select it although it was a very cost efficient proposal for them. Mr. Huber advised we want to be in the urban service areas, not the rural service areas.

Mr. Smith stated we have also considered whether we can provide services we already do well through contract operations, such as billing or lab services. Mr. Smith reviewed the statistics regarding the number of customers compared to residential, industrial and commercial consumption. Despite increasing numbers of customers, consumption has declined. We now have fewer customers per miles of main and less consumption per customer. Regardless of the number of customers or consumption, we must still maintain the infrastructure, which is costly to do.

Certification Provided for Projects Approved in First Quarter

In conjunction with the new project approval authorization levels provided to the President by the Board at the January 11, 2005 meeting, the President is required to certify that approvals for projects within his authority are being granted pursuant to the Capital Projects Authorization Policy and Procedures. Mr. Huber certified that the following projects were approved in compliance with this policy and procedure from the time of the Board’s resolution through March, 2005:

- 11003 Notting Hills Section 1A - Developer Extension project
Total Asset Cost = \$190,460
Net LWC Cost (after reimbursement) = \$31,000
- 11029 Hebron Estates/780 Expansion - Nonbudgeted project
Total Cost = \$80,000
- 10529 Tyler Retail Center - Developer Extension project
Total Asset Cost = \$371,300
Net LWC Cost (after reimbursement) = \$139,800
- 11048 BEPWTP RBI Well Building Cooling Improvements - Nonbudgeted project
Total Cost = \$120,000
- 03625 Renovate South Coag Flocc/Sedimentation Basins-CHWTP - Change Action
Contract change = \$46,800
- 10573 Horsefly Hollow Rd-Collings Hill Road Grid-tie - Nonbudgeted project
Total Cost = \$250,000
- 10615 Zorn Water Tower Coating System Rehabilitation – Preliminary Design
Total Cost = \$300,000
- 02656 Replacement of 480 Volt Heating Transformer at CHFP – Preliminary Design
Total Cost = \$300,000
- 10662 Zorn Pump Station Structural Improvement – Preliminary Design
Total Cost = \$150,000
- 10613 CHFP HVAC Improvement – Preliminary Design
Total Cost = \$400,000

- 10611 BEP Lagoon #4 Security Fence Improvement – Preliminary Design
Total Cost = \$147,000
- 10640 System-wide Hydraulic Model – Final Design
Total Cost = \$115,500
- 00418 BEPWTP Improvements - Change Action
Contract change = \$111,687 (no change to total project estimate).

Certification Provided for Contracts Awarded in First Quarter

In conjunction with the new contract authorization levels granted to the President by the Board at the February 15, 2005 meeting, the President is required to certify that contracts and bids within his authority are being awarded pursuant to the Purchasing Policy and Procedures. The President certified that the following contracts were awarded in compliance with this policy and procedure from the time of the Board's resolution through March, 2005:

Procurement of Goods and Services

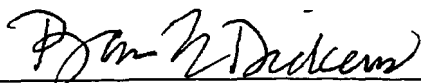

01-54	Telecommunications System and Switch Maintenance Renewal Awarded to Bellsouth Communications Systems, LLC	\$36,486
02-27	Fire Hydrants – 3 rd PPI Renewal Awarded to American Cast Iron	\$1,145,588
03-02	Water Bottles Awarded to Louisville Container (Bottle C) Awarded to Presence (Bottle A)	\$68,648 \$134,753
04-29	Water Treatment Chemicals – Poly DADMAC Awarded to Polydyne	\$27,067
04-33	Inspection, Maintenance & Repair of HVAC Systems – 1 st PPI Renewal Awarded to ACCO, Inc.	\$25,218
05-08	Brass Valves and Fittings Awarded to A.Y. McDonald Awarded to Cambridge Brass Awarded to Mueller Co.	\$40,224 \$37,194 \$279,872
	Awarded to Hayes Pipe Supply	\$77,451
05-09	Small Hand Tools Awarded to Allied Tools	\$128,474
05-14	Steel Casing Pipe Awarded to OPSales	\$67,500
05-17	Polywrap and Polytape Awarded to Hamilton – Polywrap	\$35,312
05-21	Sand Awarded to Rogers Group	\$27,395

Procurement of Professional Services

10233	Renovation of Coagulation Sedimentation and Softening Basins at BEPWTP Awarded to O'Brien and Gere Engineers, Inc.	\$498,944.
-------	---	------------

There being no further business, the meeting was adjourned at 3:20 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

Board of Water Works
Regular Minutes April 12, 2005
Page 8 of 8

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
MAY 10, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson
Ms. Wendy Welsh, Vice-Chair
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government

Others Present:

Mr. John Huber, President
Mr. Rudolph Davidson, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Robert Miller, Vice President, Treasurer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources
Mr. Jim Brammel, Business System Owner, Distribution Operations

Visitors:

Mr. Steve Greseth, Black & Veatch Consulting Engineers

The regular meeting of the Board of Water Works was held on Tuesday, May 10, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Dr. Joseph Wise moved to approve the minutes from the Annual Meeting held April 12, 2005, seconded by Mr. Gerald Martin, and the motion carried. Mr. Martin moved to approve the minutes from the Regular Meeting held April 12, 2005, seconded by Ms. Margaret Harris, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber reported the company is experiencing good financial results because of increased water sales for this period. This could be a result of a lack of meter reading at the end of the year during the snow storm, which may have caused January revenue to include revenue normally billed in December. Staff will look into this possibility to see if this impacted revenue this quarter.

Mr. Huber advised the Good Faith Effort Program has been in place for several months. Since its inception, the Company has always awarded to the low bidder who has either met the 5% WBE and 15% MBE requirements or met the Good Faith Effort according to the Program's objective criteria. Recently,

the M/WBE Program Manager recommended, and the Bids and Awards Committee concurred, to deem an apparent low bidder non-responsive for failing to meet the Good Faith Effort requirements. Mr. Conner asked if we feel the criteria for making this determination is objective. Mr. Huber and Mr. Robert Miller both agreed it is. Dr. Wise inquired as to the bid difference between the lowest bid and the next highest, and Mr. Huber responded that it was less than \$10,000.

Financial Report Provided

Mr. Miller provided the financial results through April 2005. Operating Revenues for April of \$8,497,888 were \$733,958 or 9.5% more than budgeted and \$844,677 or 11% more than 2004. The budget variance was primarily attributed to residential water sales, which were \$588,224 higher than expected. YTD Operating Revenues of \$34,317,050 were \$1,082,721 or 3.3% more than budgeted and \$2,668,258 or 8.4% more than 2004.

Operation and Maintenance Expenses for April of \$3,270,017 were \$504,918 or 13.4% less than budgeted and \$29,687 or 0.9% less than 2004. YTD Operation and Maintenance Expenses of \$13,893,299 were \$1,170,219 or 7.8% less than budgeted and \$732,078 or 5.0% less than 2004. Total Operating Expenses for April of \$5,438,339 were \$555,135 or 9.3% less than budgeted and \$10,031 or 0.2% less than 2004. The Company experienced lower than expected operation and maintenance expenses and loss on disposition of property. The prior year variance is due to decreases in operation and maintenance expenses and loss on disposition of property offsetting increases in depreciation expense and water service provided in lieu of taxes. YTD Total Operating Expenses of \$22,924,203 is \$1,252,229 or 5.2% less than budgeted and \$12,941 or 0.1% less than 2004.

Net Operating Income for April of \$3,059,549 was \$1,289,093 or 72.8% higher than budgeted and \$854,709 or 38.8% more than 2004. YTD Net Operating Income was \$2,334,950 or 25.8% more than budgeted and \$2,681,199 or 30.8% more than 2004. Total Net Non-Operating Expense for April of \$295,412 was \$44,202 or 13% less than budgeted and \$79,371 or 21.2% less than 2004. The budget variance is due to higher than expected interest income, rental income, and allowance for funds used during construction. The prior year variance resulted from increases in interest income and other income. YTD Total Net Non-Operating Expense of \$1,018,787 is \$396,528 or 28% less than budgeted and \$1,207,770 or 54.2% less than 2004. The prior year variance was attributable to early retirement incentive program costs which were incurred in January 2004.

Net Income Before Distributions and Contributions for April of \$2,764,137 was \$1,333,295 or 93.2% more than budgeted and \$934,079 or 51.0% more than 2004. YTD Net Income of \$10,374,061 was \$2,731,478 or 35.7% more than budgeted and \$3,888,969 or 60.0% more than 2004.

Capital Expenditures through April were \$18,928,385 or 20.8% of the 2005 Capital Budget of \$91,148,054.

Mr. Conner commented that the percentages above budget seem really high. Mr. Huber responded that part of the reason for that is because we budgeted water sales more conservatively this year. Mr. Miller stated we have had low Operation and Maintenance expenses and we had a 6.5% rate increase, both of which are also contributing to the higher income. Dr. Wise asked why Operations and Maintenance costs were lower. Mr. Greg Heitzman responded that the company has had fewer main breaks this year. Mr. Martin noted that our profit margin is fifty percent higher year to date. Mr. Miller responded that overall we are having a much better year than last year.

Operations Report Provided

Mr. Heitzman provided the operations report.

Production – The average production rate last month was 114.8 MGD, which is 1.2 percent lower than the 2004 April production of 116.2 MGD and 2.4 percent lower than the five year average April production of 117.6 MGD. The year to date (YTD) production of 115.1 MGD is also lower than the 2004 YTD production of 116.1 MGD and the five year average YTD production of 117.0 MGD. Lower production levels can be attributed to local economic conditions and loss of water sales from the use of low flow, conservation fixtures. Mr. Rudolph Davidson asked if we experience an increase in water consumption during Derby. Mr. Heitzman said overall demand does not increase but there is an overall increase in the need for services in order to be prepared for Derby.

Distribution Operations – Distribution Operations staff worked diligently to ensure that LWC facilities in the vicinity of Churchill Downs and Kentucky Derby Festival events and routes are secure. The sites and routes of approximately fourteen Derby Festival events were evaluated for such things as leaks, loose or missing lids, depressions, missing fire hydrant caps, street plates, and barricades. The Festival event sites included Churchill Downs, Marathon and Mini-marathon routes, Chow Wagon, Pegasus Parade, Thunder Over Louisville, and others. A meeting was held at Churchill Downs with maintenance staff to understand the water supply for the newly renovated grandstand. As a result of these efforts, at least 24 work orders were generated and completed.

Advanced Treatment Technology Steering Group – The Steering Group for Advanced Treatment Technology (ATT) conducted its third meeting on April 21. Black & Veatch (B&V) Engineers presented a summary of water quality regulations, goals, and current performance levels for the Crescent Hill and B.E. Payne water treatment plants. Several of the established LWC goals are not mandated by the state or federal government, yet are critical in maintaining high customer confidence in the quality of water we provide. For instance, the absence of taste and odor is important to our customers but compliance is not regulated. B&V presented information on new filtration technology, including membranes and adsorption processes utilizing granular activated carbon (GAC) and power activated carbon (PAC). On June 7, the Group will be presented with alternative disinfection technologies, to include ultra violet (UV) disinfection and ozone disinfection. Pretreatment processes like sedimentation and solids capture will also be presented. Once all the various technologies have been presented, B&V will assist staff in conducting an analysis to compare the technologies and determine which technology option is best for the Company. The Steering Group will present findings and a recommendation to the Board in the fall of 2005. Mr. Conner asked whether we break out the costs of strategies that are mandated versus those that are not. Mr. Heitzman said we have not done so, but we could break these out. Mr. Conner stated he recognized what is required versus what is optional may not be clear cut. Mr. Heitzman stated some objectives address both required regulations and self-imposed standards.

Workforce Availability – Workforce availability has become an increasing concern for the effective operations of the Company. The unusually high number of employees who are on various types of leave – short or long-term disability, workers compensation, and authorized leave – is impacting the ability to fill classified union positions and complete work units. In addition, initiatives such as the mitigation of American Darling fire hydrants and reducing the backlog of service orders are placing additional burdens on the pool of available employees. Staff is working with Human Resources in an effort to understand the drivers for employee absences, and to initiate the hiring of a replacement pool of Laborers. Mr. Conner asked if the downsizing contributed to this issue. Mr. Heitzman stated we are attempting to determine the reason or reasons for the increase in unavailability. There are a total of 25 employees unavailable for one reason or another. We have reduced by two-thirds our seasonal workforce for the summer.

Board of Water Works
Regular Minutes May 10, 2005
Page 3 of 11

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report.

Performance Measures – The April abandonment rate was 5.5% compared to 3.5 % in March 2005, and 4.1% in April 2004. Bad debt for the month was \$73,176 compared to \$19,053 in March 2005, and \$44,621 in April 2004. Bad debt was \$31,259 over budget for the month and \$6,571 over budget year to date. Ms. Teasley advised the billing cycle drives some of the ebb and flow of bad debt because we bill half of our customers one month and the other half the next month. It takes 90 days for an unpaid balance to be considered bad debt. In the current period, many more customers had balances charged to bad debt and signed for service in April than in March, and this is reflected in the higher bad debt. Mr. Martin inquired how Service Found On (SFO) situations have impacted bad debt. Ms. Teasley explained the timeline associated with SFOs. Mr. Conner asked whether there are industry standards for the abandonment rate and bad debt. Ms. Teasley advised that 5% is the industry standard for the abandonment rate, and ½ to 1% of income is standard for bad debt.

Wholesale Rate Increase - LWC's wholesale rate increase for North Shelby Water Company, West Shelby Water District and North Nelson Water District was reviewed and accepted by the Kentucky Public Service Commission April 22, 2005. This new wholesale rate was effective May 1, 2005 as originally scheduled for all regulated and non-regulated wholesale customers of LWC.

Closed Session

Mr. Martin moved to go into closed session to discuss property issues and proposed or pending litigation pursuant to KRS 61.810(1)(b) and (c), respectively, at 1:06 p.m. Dr. Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Marita Willis, seconded by Dr. Wise, and unanimously carried, the Board resumed open session at 1:28 p.m. No action was taken in closed session.

Strategic Plan Overview Continued from Previous Board Meeting

Mr. Conner advised that in keeping with the review of the current strategic plan, staff will be discussing additional aspects of the strategic plan, but first the Board needed to discuss the scheduling of the Board retreat. Mr. Conner proposed the Board hold the retreat on a Saturday, in light of the difficulty in finding an available date common to all directors. Holding the retreat on a Saturday was acceptable to all of the Directors.

Mr. Huber advised staff would be discussing the Assumptions, Strengths, Weaknesses, Opportunities and Threats in preparation for the Board retreat to discuss the strategic plan. Staff is providing the background for how the current plan was developed so that at the retreat the Directors can discuss our strategies for the future.

Ms. Teasley stated we have to consider what will be driving customer expectations in the future and make assumptions based on those drivers. Assumptions can be defined as management's estimation of marketplace attributes over the planning horizon. Ms. Teasley stated we should assume that expectations for service and water quality, including aesthetic characteristics, will escalate; that LWC water quality goals will remain stricter than regulatory standards; that negative press on the safety and quality of drinking water will affect public confidence; that marketplace needs and customer values must be

continually understood and addressed; and, that marketing strategies of bottled water industries and point-of-use device manufacturers will impact customer confidence.

Dr. Wise asked how we will handle water quality after it leaves the plant and from what delivery point should we be treating the water. Ms. Teasley advised we must meet regulatory requirements at the tap. We will have to decide whether we want to exceed the regulations at the plant and at the tap. Mr. Huber stated this involves risk management and customer trust. Customers expect us to meet the regulations, but they also expect us to manage the risks to them. The EPA does not allow point of entry/use systems to regulate the water quality for large water utilities. Those devices may be used for exceeding the regulations, but not for simply meeting them. Customers judge their water aesthetically, and this gets to public trust. Mr. Conner asked why we would consider improvements to exceed water quality regulations. Ms. Teasley explained the purpose is to provide higher quality water at a fair value. Mr. Conner feels it is already provided for a low price. Mr. Martin stated it will get more expensive to treat water to regulatory standards so alternative treatment strategies such as riverbank filtration are ways to reach those standards in a more cost efficient way. Mr. Heitzman advised cost is an issue because while we can treat water at the plant easily, it becomes more difficult as it leaves our plants. Therefore, decentralized solutions are in the forefront of strategies being considered by water utilities.

Ms. Teasley continued discussing assumptions we have made regarding customer service expectations for the future. We believed the community will continue to expect LWC operations to support and enhance quality of life and for water supply facilities to be safe and secure. We believe improved detection technology for microbes and pharmaceuticals will increase customer concerns for water quality. Additionally, the minimum regulatory requirement of pressure of 30 psi will not meet customer expectations in the future. Mr. Huber stated some evidence exists showing that animals are developing transgender properties due to endocrine disruptors. Mr. Huber advised this will be the new frontier for environmentalists. Our detection capabilities continue to grow. We can detect substances to parts per trillion, which is difficult to explain to customers. Pharmaceuticals and endocrine disruptors will end up in the water table because they are not fully absorbed by the individuals and are carried out in the wastewater system.

Regarding affordability, Ms. Teasley stated our customers expect water to be affordable and available to people of limited means, and what is affordable to our customers may change. MSD rate increases will impact LWC customer's perception of price/value. Acceptance of water rate changes above the CPI is dependent upon customer perception of increased value. Finally, the community expects water system growth and renewal to be timely and closely coordinated with community growth and development.

Mr. Heitzman discussed the assumptions related to Water Quality. Source water quality and treatment will continue to be challenging. Research and development will be a strategic enabler in effectively meeting our future needs. Ohio River and the adjacent aquifer will remain the primary source, requiring protection. Wellhead protection regulations will require continuing surveillance and enforcement efforts. Customer expectations and future regulations require new strategies and techniques in managing distribution water quality.

Mr. Heitzman stated it will be challenging to expand our service and delivery area while we maintain such high levels of water quality. We do a great job of treating at the plant, but as 130 MGD leave our plant, it becomes more difficult to keep the quality high. Customers expect consistent water quality and timely information on variations in water quality. Managing public health risks, meeting customer expectations and increasing regulatory requirements will increase operating costs and capital investments. We are always looking for smarter and more efficient ways to operate. Community health and safety issues require systems to mitigate threats to plant and distribution facilities. Endocrine disruptors and

other emerging health issues will result in new regulations. Our current treatment technologies do not remove pharmaceuticals and endocrine disruptors, but we may be required to do so in the future.

Mr. Miller discussed the assumptions related to Financial Resources. He stated we assume the CPI will increase by 2% to 3% annually. We may need a new borrowing to fund the capital plan during the next five years. Anticipated rate increases will not exceed the anticipated CPI plus 1%. Keeping rate increases within the CPI plus 1% will require productivity enhancements and aggressive cost control. Increasing customer expectations for service and new regulations will require additional capital and operational resources. Mr. Miller advised we are working with Public Financial Management to update our financial planning model and are also working with the University of Louisville to update our water sales forecast.

Ms. Teasley discussed the assumptions related to infrastructure and system growth. Population and demographics will change in accordance with forecasts of UofL Urban Studies Institute and State data center. As has been occurring, we believe consumption per household will decline and population density per mile of water main will decrease. Expansion into adjacent counties has resulted in running longer mains into areas with fewer customers, and this costs more. Concurrent opportunities for water sales and related services will arise. Sometimes the opportunities happen at one time and you have to address them all.

Ms. Teasley stated we must continue to invest in plant, facility and distribution infrastructure that will be required for long-term utility viability. We have to look one hundred years out and plan for a system that will be viable then. Developers and builders expect new methods to reduce cycle time and costs and provide "one-stop shopping" for approvals and permits. We are currently participating in a one-stop shop program with Metro Government and other agencies.

Efficient use of capital requires further capital improvement program optimization. Reliability concerns of the national power system will drive decisions regarding LWC power redundancy plans. This requires us to consider the redundancy of our own system. Purchase of tank sites for development will become increasingly difficult, driving early purchase decisions ahead of development. This is also something we are already experiencing.

Ms. Susan Lehmann discussed the assumptions related to our workforce. Embracing change is necessary to remain competitive and successful. This is true for both the company leadership and frontline employees. Continuous expansion of know how and expanded competencies are required to meet customer expectations. We must be a learning organization.

Ms. Lehmann stated we must effectively empower employees to continue our success as a Total Quality Organization. Just as it has been in the past, our partnership with Local 1683 will continue to provide opportunities for new initiatives. Pre-decisional involvement will benefit employees and LWC. Improvements in internal customer satisfaction are needed to drive improvements in external customer satisfaction and business results. Continuing as an employer of choice will require an integration of cultural diversity and an employee base which mirrors the diversity in our community. Finally, as we expand our distribution system and service area, we are likely to see an increase in resource needs.

Mr. Huber discussed the analysis of Strengths, Weaknesses, Opportunities and Threats. We define Strengths as internal capabilities that enable the pursuit of strategies. We define weaknesses as internal shortcomings that impair the pursuit of strategies. We define opportunities as external opportunities that support the pursuit of strategies. We define threats as external forces that thwart the pursuit of strategies.

Mr. Heitzman highlighted LWC's strengths. These are:

- Customer-focus.
- Regional, high quality, low-cost provider.
- High customer satisfaction.
- Skilled and knowledgeable employees dedicated to LWC's mission.
- Partnership with AFSCME Local 1683, for which we have won awards.
- Systems and process-based TQO.
- Awareness of employee perceptions.
- Abundant source of supply.
- Unique ownership and governance, giving us the advantages of a governmental organization, but allowing us to compete, as well.
- Financially sound.
- Product brand recognition of Pure Tap.
- Water industry expertise.
- Effective infrastructure renewal program.
- Information technology capabilities enable operational effectiveness.
- Ability to handle multiple business opportunities within existing resources
- An effective Public Information program.

Mr. Miller discussed the company's weaknesses. Generally, the main weaknesses are a delay in executing our capital program, the level of internal customer satisfaction, and inconsistently applied performance management. Ms. Harris asked Mr. Miller to clarify the lack of clear empowerment boundaries. Mr. Miller stated this results from a manager's unclear explanation of what the boundaries are, causing an employee to take an action not ultimately supported by management. The outcome is a de-motivation for the employee.

Ms. Teasley highlighted some of the opportunities available to the company. Specifically, LWC has the opportunities to promote regional economic development, to continue to expand diversity in workforce and business relationships, and to participate in research and development partnerships to improve effectiveness and efficiency, particularly in areas of infrastructure and water quality. As we expand workforce diversity and gain diversity in our business relationships, we need to determine how this can give us a competitive advantage. Regarding research and development, we participate in many of these type opportunities through the University of Louisville's Infrastructure Research Group and through the American Water Works Association, but we need to consider whether there are other opportunities of which we are not taking advantage. Our Strategic Innovation Team is considering these ideas.

Ms. Lehmann highlighted the threats the company has to prepare for and deal with today and in the future. Although there are many threats, some of the main threat issues are emergencies affecting the water supply; emerging health concerns with microbials, pharmaceuticals, endocrine disruptors, and other water quality issues; rising health care costs; and potential non-attainment of air quality regulations including impact on economic development and the company's regulatory obligations.

Mr. Conner emphasized the need for directors to become familiar with the materials they are getting over the past two months and in the next couple of months before the retreat. This will allow the Board to move forward to plan for the future.

Affordability of Future Water Rates Considered

Mr. Miller discussed the impact of the Metropolitan Sewer District's consent decree on LWC. MSD anticipates annual sewer rate increases of 6.5%-14.5% as a result of a consent decree filed with U.S.

District Court on April 25, 2005. In addition, the 2005-2014 Financial Plan included in the LWC 2005 Annual Budget contemplates annual water rate increases of 4.0% - 4.5%. As a result, the combined water and sewer bi-monthly bill could exceed \$100 and may become unaffordable for some low income customers. This will require consideration of affordability program alternatives.

Mr. Miller stated the reluctance to pay is not the same as the inability to pay. While the reluctance to pay may result in lower levels of value as perceived by the customer, the inability to pay for service results in a combination of lower revenues and higher expenses for the utility due to late payments, service disconnections, and uncollectible accounts.

It is important to understand the issue of affordability for our customers. Affordability is the ability of customers to pay for utility services billed to them. The affordability threshold is the percentage of income that a household can afford to pay to a utility through user charges. Factors affecting affordability for a community include the median household income, poverty levels, and minimum Social Security and Supplemental Security Income benefits. The affordability threshold is typically set by policy makers at 2% for water service plus 2% for wastewater service. The median Louisville residential bi-monthly water and sewer bill in 2005 is \$72.48 for 12,000 gallons (\$32.86 for water and \$39.62 for sewer *(assuming 6.5% rate increase effective August 1, 2005)*) These bill amounts are above the current 2% threshold for minimum social security benefits but below the 2% poverty threshold for a three person household and well below the 2% threshold for an average household in Jefferson County. If the poverty threshold remains at the current level and water and sewer rates increase at projected levels, then the combined water and sewer bill is forecast to exceed the affordability threshold for poverty-level customers by 2009.

Therefore, Mr. Miller advised we will need to consider the feasibility of an Affordability Program. Louisville Water Company does not have an affordability program comparable to cities with higher water rates and/or larger portions of the population living below the poverty level. Affordability programs in those cities typically consist of a combination of rate design and targeted assistance programs. A major issue for utilities which have an Affordability Program is how you qualify individuals for it. The process for determining eligibility for assistance in paying utility bills can be either managed in-house, outsourced, or simply based on eligibility for other aid programs. The cost for administering these programs varies widely from utility to utility based on the amount of information reviewed to establish qualification.

The company will have to evaluate the pros and cons of having such a program. Reduced bill delinquencies and related service costs are often cited as the primary benefits sought by utilities when implementing an affordability program. These are measurable results for which goals can be established to determine if an affordability program is achieving its intended objective. The most typical drawbacks to affordability programs are the cost of administration, the difficulty in sustaining the program over a long period, and the perceived unfairness of one class of customers being subsidized by the other classes.

Mr. Miller stated staff is currently evaluating alternatives related to monthly billing and automated meter reading. And, since affordability problems will likely occur first for bills with summer irrigation water usage, staff is considering options for equalized or level billing. Dr. Wise stated this is a major problem for LWC, perhaps even more so than for MSD. Mr. Conner feels our shareholder needs to be involved in the initial discussion of whether to have such a program. Mr. Miller stated we have to determine if such a program is sustainable over time. We also have to consider the question of whether distribution of wealth should be borne by the utilities in the community or just dealt with through taxes. Mr. Conner commented that it is an indirect tax because our shareholder is Metro Government.

Information Provided Regarding Strategic Innovation Initiative

In December the company selected Amber Halloran, BSO, Supplying Financial Resources, and Jim Brammell, BSO, Managing Distribution Operations, to attend a newly developed leadership class at the University of Louisville. The class, "Lead Through Continuous Change," was targeted at experienced managers and focused on objectives of enhancing the leadership, communication and change management competencies of participants. Several prominent corporations within the community were represented including Aegon, Brown-Forman, Humana, Papa Johns, Louisville Gas & Electric and others. The class met approximately two days per month and concluded in April. LWC's Susan Lehmann played an integral role in helping design and implement this new course.

Of the many concepts presented in the class, the concept of "Strategic Innovation" was particularly enlightening because of its applicability to problems currently faced by LWC, and because of the potential for this tool to help LWC identify new frontiers of revenue opportunities.

Strategy Innovation is a detailed five-phase process that is intended to precede traditional strategic planning. The purpose of strategy innovation is to identify new opportunities for the business to generate revenue. This requires a complete evaluation of the company's business model and a willingness within executive leadership to make changes to accommodate new revenue opportunities. A fundamental assumption of strategy innovation is that by thoroughly evaluating new markets, and aligning with corporate competencies, there are "frontiers" of new revenue opportunities that can be successfully entered.

The concept of Strategy Innovation was presented to LWC's Executive Leadership Team in the first quarter of '05. ELT embraced the process and directed that a team be formed to pursue this process for LWC. As a result a six member team was formed, sponsored by John Huber, and consisting of members with diverse experience from across the company. The team members are: Amber Halloran, BSO, Supplying Financial Resources; Jim Brammell, BSO, Managing Distribution Operations; Bruce Mingus, Vice-President, Local 1683; Rengao Song, PO, Monitoring & Researching Water Quality & Treatment; Carl Blanton, BSO, Supporting Organizational Effectiveness; and Jim Smith, BSO, Infrastructure Planning. The team is meeting weekly and is currently in the first phase. A project timeline has been developed and the milestone date for a deliverable has been set for early April of 2006. This schedule will allow the results of the strategic innovation process to flow seamlessly into the re-write of the strategic plan. As progress is made on this initiative, and as the various stages are completed, further updates will be provided to the Board.

Mr. Conner commented the team needs a legal and a political "weathervane" to ensure they are not going down a path the company should not follow. Ms. Barbara Dickens advised she serves as a resource to this team. Mr. Brammell commented they are not very far in the process and, at this point, are evaluating the efficacy of all ideas presented.

Budget Increased for Project 10609: Sandblast and Recoat Steel Storage Tanks – Bardstown Road Standpipe

The 2005-06 Capital Improvement Plan includes \$490,000 to rehabilitate the Bardstown Road Standpipe, a five million gallon storage facility built in 1980 in southeastern Jefferson County, near the Glenmary subdivision. The scope originally included recoating the exterior surfaces of the tank. An inspection of the tank interior has been conducted, and staff proposes expanding the scope to fully rehabilitate the structure. This facility is one of two bulk storage facilities on the 860 pressure zone. The coating failure found upon inspection leaves portions of the steel tank exposed to corrosion and also contributes to loss of chlorine residual and nitrification in the water.

Board of Water Works
Regular Minutes May 10, 2005
Page 9 of 11

The revised scope of work for this project is proposed to include the following: recoating tank interior and exterior, extending the service life 25 years; installing water mixing and circulation piping to minimize loss of chlorine during the summer; accessing modifications for OSHA safety (new construction code compliance); and constructing a 1.4 million gallon detention basin to manage tank overflow, cleaning, and site drainage. The budget for the revised scope of work is \$1,393,000, with the recoating planned October 1 through December 31, 2005 to minimize downtime and impact on operations. Ms. Harris moved to increase the budget for the rehabilitation of the Bardstown Road Standpipe from \$460,000 to \$1,393,000. Dr. Wise seconded, and the motion carried.

Budget and Advertisement for Bid Authorized for Project 03638: Crescent Hill Filter Plant North-South Building Slate Roof Replacement

In December 2004, the Board authorized staff to proceed with advertisement and bid of the \$3.65 million slate roof replacement project for the Crescent Hill Filter Plant (CHFP) North-South Filter Building. Upon completion of the bid document in March, a final project walk-through was scheduled to verify all issues were addressed. During the review, a large area of damaged slate roof and roof decking were discovered just below the roof line of the adjacent CHFP Chemical Building. The December 2004 winter storm deposited 10 to 12 inches of snow, sleet, and ice. This mass apparently slid from the Chemical Building roof and impacted the Filter Building roof, resulting in the damage.

An inspection of the Chemical Building roof was conducted in 2001 which reported the remaining life to be approximately 10 years (2012). Following discovery of this recent incident, a follow-up inspection was conducted in April. This inspection revealed an increase in failure of the metal roof elements (gutters, flashings, cresting, etc.) plus an increase in slate damage.

The revised remaining life of the Chemical Building roof is estimated to be three to five years. This information, coupled with the risk to the investment planned for the North-South Filter Building, justify replacement of the Chemical Building roof under the current project. Future snow and ice slides will be mitigated by the addition of snowguards to both building roofs. The cost for this additional work is estimated to be approximately \$545,000, resulting in a new project budget of \$4.2 million. Dr. Wise moved to establish a new project budget in the amount of \$4.2 million for Project 03638 – Crescent Hill Filter Plant North-South Filter Building Slate Roof Replacement and to proceed to advertisement for bid. Ms. Willis seconded, and the motion carried.

Budget Increased and Authorization Given to Proceed with Final Design and Bid for Project 03832: Tyler Elevated Water Tank

The September 2004, the Board approved Project 03832 at a revised budget of \$1.83 million (original budget \$1.3 million) for construction of the Tyler elevated water tank. Unforeseen conditions related to site constructability and worker safety mitigation requires a further adjustment to the project budget. The scope of the project is to construct a one million gallon composite (reinforced concrete and steel) elevated water storage tank operating within the 900 pressure zone to serve the growing Taylorsville Road / Snyder Freeway corridor. The project includes engineering, property acquisition, construction, supply piping, telemetry, landscaping, and drainage facilities. The tank will provide improved system pressure, fire flow, and reliability to the Taylorsville Road area.

The conditions affecting construction of this facility include limited site size, adjacent commercial construction, and construction and worker requirements created by the AM radio transmission towers on Tucker Station Road. The construction site is one-half acre in size within the proposed Kroger development along Taylorsville Road. The limited construction space, in conjunction with the adjacent commercial

development, will result in a construction premium. In addition, the tank site is located within 1,000 feet of Clear Channel's radio tower. The steel tank presents a risk of radio signal interference and electric arcing during construction of the tank. Staff has consulted with both telecommunications experts and tank design specialists on methods to mitigate these risks. Construction methods will be altered to mitigate electric arcing potential, and workers will have to wear radio frequency detection devices and protective gear to safely execute construction. In addition, an allowance is provided to mitigate any signal interference caused by the structure. These mitigation methods will also result in a premium to the construction cost. Ms. Willis moved to increase the budget of Project 03832 – Tyler Elevated Water Tank from \$1.83 million to \$2.65 million and to proceed with final design and advertisement for bid for the project. Ms. Harris seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 3:07 p.m.

There being no further business, the meeting was adjourned at 3:12 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
JUNE 21, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government

Not Present:

Mayor Jerry Abramson
Ms. Marita Willis
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Robert Miller, Vice President, Treasurer and Acting Secretary
Mr. Jim Smith, Business System Owner, Infrastructure Planning and Business Development

Visitors:

Mr. Larry Gaddis, Black & Veatch Consulting Engineers
Mr. Kevin Gallagher, Caldwell Tanks

The regular meeting of the Board of Water Works was held on Tuesday, June 21, 2005 at Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Ms. Harris moved to approve the minutes from the Regular Meeting held May 10, 2005, seconded by Mr. Martin, and the motion carried.

Chief Executive Officer Report Provided

Mr. Huber reported that the National Association of Clean Water Agencies is soliciting federal funding for wastewater projects and discussions have begun in Washington, DC in consideration of a "water tax" to provide this funding. The American Water Works Association and the National Association of Water Companies have announced their opposition to this proposed funding mechanism. Mr. Huber noted that one of the highlights of the recent AWWA Annual Conference was Automated Meter Reading based on radio reads for system-wide installations. He also reported the results of the LWC tapping teams that competed at the conference, with congratulations to the women's team for their third place finish. He also noted that the AWWA Annual Conference also had several international materials and equipment suppliers, including General Electric.

Financial Report Provided

Mr. Miller provided the financial results through May 2005. Operating Revenues for May of \$8,774,497 are \$132,799 or 1.5% less than budgeted and \$653,866 or 8.1% more than May 2004. The budget variance is primarily due to a \$78,400 adjustment representing 98,000 residential customers that were overcharged in January. Operation and Maintenance Expenses for May of \$3,650,856 are \$142,215 or 3.7% less than budgeted and \$589,105 or 19.2% more than May 2004. Net Operating Income for May of \$2,839,181 is \$24,978 or 0.9% higher than budgeted and \$156,441 or 5.2% less than May 2004. Total Operating Expense for May of \$168,937 is \$297,739 or 2.6% less than budgeted and \$81,232 or 15.8% more than May 2004. The budget variance is due to lower than expected interest expense for the delayed borrowing. Net Income Before Distributions and Contributions for May of \$2,670,244 is \$322,718 or 13.7% more than budgeted and \$75,210 or 2.7% less than May 2004. YTD Net Income of \$13,044,304 is \$3,054,195 or 30.6% more than budgeted and \$3,813,760 or 41.3% more than 2004.

Mr. Martin requested an update of the financial planning work performed by PFM. Mr. Miller reported that the improvements to the financial planning model functionality have been completed and that the model would be updated to reflect the water sales forecast prepared by Dr. Cerrito and the revised capital spending plan for the Riverbank Filtration Project. He also noted that PFM is preparing a proposal for developing recommendations for establishing future return on investment targets. He expects this information will be available to the Board about one month in advance of the Strategic Planning meeting scheduled for September.

The Board discussed the agenda for the upcoming Strategic Planning meeting and encouraged Mr. Johnstone to communicate their interest in Mayor Abramson to attend all or a portion of the meeting in order to gain his perspective in balancing the competing interests of rate control, quality and services, and return on investment.

Operations Report Provided

Mr. Heitzman provided the operations report. The average production rate last month was 130.4 MGD, which is 3.3 percent higher than the 2004 May production of 126.3 MGD and 1.5 percent higher than the five-year average May production of 128.5 MGD. For the year to date, the production rate is comparable to the 2004 rate of 118.3 MGD. Due to river and weather conditions, algae populations in the river began increasing in late May and are causing taste and odor problems. Since May 26, geosmin has been detected in the river water at a concentration of near 10 ng/L, which is a level easily detected by customers with normal olfaction senses. Powder activated carbon (PAC) has been added at a dose of 75 pounds/MG and the treatment is effective in removing the odor. Staff anticipates the carbon treatment for taste and odor may be necessary during the entire summer season.

Mr. Heitzman also reported that the Company recently received the Director's Award from the EPA's Partnership for Safe Water. The award is given to utilities that have provided five continuous years of safe, high quality drinking water to customers. The award was presented at the American Water Works Association Conference in San Francisco. Only 37 utilities in the United States have achieved this level of performance by consistently exceeding EPA drinking water standards. LWC has used the Partnership for Safe Water goals in establishing annual water quality goals for filter performance at the Crescent Hill and B.E. Payne Treatment Plants. The Water Quality and Production staff is recognized for their diligent work in attaining this level of performance.

Mr. Heitzman stated that over the past several months, staff has worked with Metro Parks on evaluating alternative uses for the River Road Country Club property. The property is currently open to the public for general use and Metro Parks will be conducting a public information meeting on July 14, 2005 to accept suggestions for future use of the property. Since assuming control of the property from the Club,

LWC has incurred \$40,000 in expenses to clean and secure the building and site. Mr. Heitzman noted that additional expenses are estimated to be \$25,000 for the remainder of the year.

Mr. Heitzman provided an update on the Crescent Hill Alternative Treatment Technology Steering Group, stating that their next meeting will be held on August 16, 2005. He noted that the group agreed to further research five alternatives, including combinations with granular and powdered activated carbon and ozone. This work is in parallel with the value engineering analysis of the BE Payne Plant Alternative Treatment Technology bids that will be completed by August 2005. The Steering Group analysis and recommendations are expected to be completed by October 2005. Mr. Conner requested that the recommendations be presented at one meeting and considered for a decision at the following meeting.

Serving Customers Report Provided

Ms. Teasley provided the Serving Customers report. The installation of Automated Meter Reading (AMR) devices in the three pilot areas of KTHL, Goshen, and Shepherdsville is 99.92% complete. In May, an AMR Evaluation Project Team was chartered, consisting of individuals from across the organization. This team is currently preparing a financial evaluation of the cost/benefit of expanding AMR into other parts of LWC's service area.

Ms. Teasley reported that the State Attorney General's Office contacted LWC staff in March 2005 on a customer issue related to billing. After further investigation, staff has discovered a billing error which concerns customers billed during January and early February of 2005. The error, which relates to service charges for water, wastewater and drainage, resulted from delayed meter reading dates, which were implemented to avoid bill estimations during adverse weather conditions when staff could not access meters. Staff for LWC and MSD are in the process of validating the data quantifying the billing error. The water credit due LWC customers is estimated at approximately \$78,000. LWC staff will continue to work with the Attorney General's Office and MSD on the process and timing to provide credits to impacted customers.

Audit Committee Report Provided

Ms. Welsh distributed draft copies for the Audit Committee minutes from the meeting held on June 6, 2005, noting that the minutes had not yet been approved. She stated that the 2004 Annual Inspection identified 82 recommendations to improve the condition of the facilities. To date, progress has been made on all but 2 of the medium priority items. There were a total of 12 high priority recommendations – those recommendations where an incident or failure causes a life safety, water quality, production, or distribution issue. Of the 12, LWC disagreed with one, completed six, have two in progress, and has planned three. She said that Mr. Smith reviewed the high priority recommendations in detail and that staff intend to complete 75% of the recommendations by the September 2005 Audit Committee meeting and provide an update at that time.

Ms. Welsh advised that our former independent auditor, Crowe Chizek, had noted in its SAS-61 letter it could not express an opinion on the effectiveness of the company's internal controls. This statement had led Directors to ask what it would take to have such a review conducted. This would be a voluntary assessment, since LWC is not bound by the Sarbanes-Oxley Act, and not many companies are submitting to voluntary assessments of their internal controls. She described an analysis prepared by Mr. Miller regarding what is required under Sarbanes-Oxley, what the recommended best practices are, and what could be included in a plan for LWC. Mr. Conner agreed that he believes we should develop a plan to voluntarily comply. Ms. Welsh reported that the IT General Controls audit is moving forward using the COBIT method.

Ms. Welsh advised that the Code of Conduct and Ethics Survey questionnaires went out to all employees in January 2005. We have received responses to all the questionnaires and twenty-four of them needed

follow up based on an affirmative answer to one of the questions. Ms. Welsh noted that thirteen individuals answered the harassment question affirmatively. As a result, staff conducted follow-up to discuss the definition of harassment and to emphasize the time frame covered by the survey. During the follow-up meetings, three employees changed their responses to negative, resulting in only ten affirmative responses. She said that Mr. LeMaster reviewed how LWC's policy on receipt of gifts by employees compared to other local agencies and believes it compares favorably.

Ms. Welsh reported that Mr. LeMaster conducted a review of cash processing and determined that controls were sufficient to allow for a reasonably secured cash handling process. Also, Mr. LeMaster reviewed the outstanding issues from the audits he has conducted.

Ms. Welsh stated that the Committee desires that a policy statement regarding harassment and discrimination and regarding the Company's position on gifts and gratuities be provided to employees every other year that the full Code of Conduct survey is not conducted. Employees would be required to sign a statement indicating their understanding of the Company's position on these matters. Also, the Committee desires that all corporate officers disclose gifts to the Board, including any gifts made to a charity on behalf of the corporate officer.

Second Quarter Dividend Declared

Mr. Miller recommended adoption of a draft resolution to declare the second quarter dividend. Ms. Welsh to approve the following resolution to declare the second quarter dividend with a total quarterly payment of \$3,792,819:

RESOLUTION TO DECLARE SECOND QUARTER DIVIDEND TO THE CITY OF LOUISVILLE

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 15, 2005 to adjust the 2004 annual dividend by \$327,018, from \$13,766,392 to \$14,093,410, the difference to be added in quarterly installments to the regular 2005 quarterly dividend, and

WHEREAS, the Board passed a resolution on March 15, 2005 to increase the 2005 dividend payment by \$1,526,239, this being the amount of the dividend from 2002 and 2003 due as a result of eliminating from its inception in 2002 the practice of deducting the rate differential for acquired systems from the net income available for the purpose of computing the dividend, to be added in quarterly installments to the regular 2005 quarterly dividend installments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2005 Louisville Water Company Annual Budget contemplates the 2005 annual dividend to be \$13,318,020, it would be in order at this time to declare a regular second quarter dividend of \$3,329,505;

RESOLVED, the regular second quarter 2005 dividend of \$3,329,505 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,792,819 to the Louisville / Jefferson County Revenue Commission on March 31, 2005, this being the second quarterly dividend for 2005 plus one quarter of the dividend adjustments for 2002, 2003 and 2004, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Mr. Martin seconded, and the motion carried.

Board Members Reappointed

Mr. Conner reported that the Mayor has reappointed and the Metro Council has approved Stewart Conner and Marita Willis to serve another term on the Board of Water Works.. These terms expires April 30, 2009.

Information Provided Regarding Gene Snyder Freeway Transmission Main

Mr. Huber provided an update regarding the Gene Snyder Freeway Transmission Main project. The 2002-2021 Facilities Plan, prepared by Black & Veatch, recommended the construction of a transmission main following the Gene Snyder Expressway from the English Station Standpipe to Billtown Road. The need for this facility was based on continuing growth in eastern Jefferson County and the expected growth in the service areas of our Shelby, Spencer and Bullitt County wholesale customers. Construction was planned for completion in 2011 at a cost of \$15,547,000.

Mr. Heitzman stated that this project has been deferred for nearly fifteen years by constructing 12" and 16" mains during the Jefferson County Water Extension Program. With the pressure standard change, we need the ability to move more water from north to south in our system. Mr. Huber noted that there have been 13,274 customers added in this area during 1994 to 2004.

Mr. Smith explained that further analysis by planning staff and past operating experience during the drought of 1999 indicates the need for this facility is more urgent. Based on this analysis, the 2004 Capital Improvement Program included this project with preliminary design of this facility planned for 2004 to 2005, final design from 2005 to 2006 and construction scheduled for 2006 through 2009. Initial sizing and the project cost estimate of \$15,547,000 was based on construction of a 48 inch main from English Station to I-64, a 36 inch main from I-64 to Taylorsville Road and a 30 inch main from Taylorsville Road to Billtown Road. Sizing considerations are still underway.

The project estimate for preliminary design, easement acquisition and final design is estimated to cost \$725,000. This will require advancing \$425,000 originally slated for 2006 into the 2005 capital program. After completion of preliminary design, easement acquisition and final facility sizing, Board of Water Works approval will be sought for final design and bidding of this project.

Strategic Plan Overview Continued from Previous Board Meeting

The Board continued its review of the Strategic Plan through an overview of the Company's Constituents, Goals, Objectives and Risks. Mr. Huber explained how we define each of those concepts. He stated that risks will be discussed further at an upcoming meeting. He described three key constituencies: customers, stockholder, and employees.

Ms. Teasley discussed our first major group of constituents, our customers. The goal for Customer Service is to meet and exceed customer needs and expectations, including providing appropriate information on product quality and services. She reviewed the Customer Service objectives and described the risks affecting our ability to meet our Customer Service objectives.

Mr. Heitzman discussed Water Quality as a constituent, noting that this includes customers, the general public, and regulators. The goal is to assure safe water supply, meet water quality regulations and customer expectations for distribution water quality. He reviewed the Water Quality objectives and risks.

Mr. Miller discussed our Stockholder goal to recognize and support our stockholder's interests. He also reviewed the Employee goal to provide an environment which values quality of work life, continuous learning, employee contribution, and well being.

Mr. Huber discussed the other constituents that we must serve: Elected Officials - maintain effective communications and relationships with elected officials and their staffs; Regulatory Agencies - sustain effective partnerships with public health, water quality, and regulatory agencies to better serve our customers; Community - actively support employee and corporate participation in establishing and supporting community goals; and Suppliers - build partnerships to link suppliers and contractors to our diversity strategies and build supplier and contractor partnerships to support our ability to meet and enhance standards and service goals.

Contract Awarded for Project 99407: Goshen Elevated Water Storage Tank

Mr. Heitzman reported that two bids were received for construction of the Goshen Elevated Water Tank in Oldham County. This one million gallon tank will provide improved system pressure, improved fire flow, and a system expansion opportunity for an 840 pressure zone to be created in this growing region of the service area. The bids ranged from \$1,837,100 - \$2,111,100. The engineer's estimate was \$1,380,000. Discussion with the apparent low bidder indicated differences were in the costs for the foundation, concrete and steel, pipeline road bore, special cellular equipment mountings, and construction management. Mr. Heitzman introduced Kevin Gallagher, Vice President of Sales for Caldwell Tanks, who described raw materials supply pricing issues for steel. Mr. Heitzman also distributed information from the Engineering News Record regarding the cost index for construction, materials and steel for the past four years. After extensive discussion by the Board, Mr. Martin moved to authorize the Purchasing Manager to award a contract in the amount of \$1,837,100 to Caldwell Tanks, Inc. for construction of the Goshen Elevated Water Tank, plus establish a new budget of \$2,207,100, which includes an allocation of \$100,000 for consultant construction and coatings inspection services through the 18-month construction schedule. Ms. Harris seconded, and the motion carried.

There being no further business, the meeting was adjourned at 2:45 p.m.

Respectfully submitted,

Robert K. Miller
Vice President, Treasurer and Acting Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
JULY 12, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Mr. Gerald Martin
Ms. Marita Willis
Ms. Margaret Harris

Not Present:

Mayor Jerry Abramson
Ms. Wendy Welsh, Vice-Chair
Dr. Joseph Wise

Others Present:

Mr. John Huber, President
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources
Mr. Carl Blanton, Business System Owner, Organizational Effectiveness

Visitors:

Mr. Larry Gaddis, Black & Veatch Consulting Engineers

The regular meeting of the Board of Water Works was held on Tuesday, July 12, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:30 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the Regular Meeting held June 21, 2005, seconded by Ms. Margaret Harris, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber reported some historical facts from 1852 that he discovered in conjunction with his service on the Marine Hospital Board. At that time, the consideration of whether to build a waterworks in Louisville was generating much discussion.

Financial Report Provided

Ms. Amber Halloran provided the financial results through June 2005. Operating Revenues for June of \$9,391,401 were \$503,782 or 5.7% more than budgeted and \$659,382 or 7.6% more than June 2004. There was an additional adjustment made in June to residential sales totaling \$70,918 representing an estimate to refund 98,000 residential customers that were overcharged in January. Total adjustment accrued year-to-date is \$149,318. The prior year variance is due to the increase in water rates and residential water sales. YTD Operating Revenues of \$52,482,949 are \$1,453,704 or 2.8% more than

budgeted and \$3,981,506 or 8.2% more than 2004. Operation and Maintenance Expenses for June of \$4,045,586 were \$143,578 or 3.7% more than budgeted and \$650,228 or 19.2% more than June 2004. This variance is related to higher production results in chemicals, overtime, and claims incurred. YTD Operation and Maintenance Expenses of \$21,589,742 are \$1,168,856 or 5.1% less than budgeted and \$507,254 or 2.4% more than 2004. Total Operating Expenses for June of \$6,330,790 were \$146,953 or 2.4% more than budgeted and \$902,693 or 16.6% more than June 2004. The budget variance is due to higher than expected operation and maintenance expenses related to increased production and claims reserves. The prior year variance is due to increases in operation and maintenance expenses, depreciation expense, and water service provided in lieu of taxes. We had expected to do an additional borrowing in May of \$40 Million Dollars, but that borrowing has been postponed.

YTD Total Operating Expenses of \$35,190,309 is \$1,263,053 or 3.5% less than budgeted and \$1,700,058 or 5.1% more than 2004. Net Operating Income for June of \$3,060,611 was \$356,830 or 13.2% higher than budgeted and \$243,310 or 7.4% less than June 2004. YTD Net Operating Income or \$17,292,640 is \$2,716,758 or 18.6% more than budgeted and \$2,281,447 or 15.2% more than 2004. Total Net Non-Operating Expense for June of \$243,475 was \$224,220 or 47.9% less than budgeted and \$171,989 or 41.4% less than June 2004. The budget variance is due to higher than expected interest income and allowance for funds used during construction and lower than expected interest expense for the delayed borrowing. The prior year variance is due to an increase in interest income. YTD Total Net Non-Operating Expense of \$1,431,199 is \$918,487 or 39.1% less than budgeted and \$1,460,991 or 50.5% less than 2004. The prior year variance is due to early retirement incentive program costs which were incurred in January 2004.

Net Income Before Distributions and Contributions for June of \$2,817,136 was \$581,049 or 26.0% more than budgeted and \$71,322 or 2.5% less than June 2004. YTD Net Income of \$15,861,441 is \$3,635,245 or 29.7% more than budgeted and \$3,742,438 or 30.9% more than 2004. Capital Expenditures through June were \$29,172,351 or 32.01% of the 2005 Capital Budget of \$91,148,054 or 3% of our revised capital budget.

Mr. Martin asked if we calculate profit margins and track them historically. Ms. Halloran said we do not track that currently but we can do so in the future and add it to the report. Mr. Huber noted there is a rise in residential sales but a decline in commercial and industrial sales, even compared to a conservative budget. Mr. Connor inquired whether there is a correlation between pumpage and water sold. Mr. Huber noted there is up to a two-month lag between consumption and billing. Mr. Martin discussed the increases in 2004 in revenue per customer. Mr. Huber responded it relates to higher irrigation sales.

Operations Report Provided

Mr. Gregory Heitzman provided the Operations report. Due to hot and dry weather conditions in June, the Company set a new record for daily water production in June. On June 24, we recorded pumping of 201.5 MGD and on June 25, we recorded pumping of 204.5 MGD. The previous pumping record was 198 MGD set in August of 1999. Production staff successfully managed the high demand situation with very few low pressure complaints. During the high demand period, the B.E. Payne plant was operated at full 60 MGD capacity for the first time since expansion of the plant, thereby preventing a negative impact to the elevated service area pressures and without any water quality problems. The new filter design and performance of the plant exceeded operating expectations. At the Crescent Hill Filter Plant, however, managing the performance of the filters under the peak demand conditions was a challenge due to their physical design and condition but the filtered water quality targets for turbidity were met for the month. Mr. Heitzman compared this successful effort to the experience in the Summer of 1999 when we were met with significant operational challenges. The high demand reinforces the need to accelerate the Gene Snyder Freeway transmission project. During the recent peak demand, we were using every capability we

had to get water to the Fern Creek and Mt. Washington areas. For the month, the average production rate was also at a record high of 157.7 MGD, which is 13.3 percent higher than the June 2004 production of 139.2 MGD and 11.0 percent higher than the five-year average June production of 142.1 MGD. For year-to-date production, the pumping rate of 124.8 MGD is 2.6 percent above the 2004 pumping rate of 121.7 MGD and 1.4 percent above the five-year average of 123.1 MGD.

Due to river and weather conditions, algae population in the river started to increase in late May and was causing taste and odor problems. Geosmin was detected in the river water at a concentration of near 10 ng/L; a level that can be easily detected by a normal person. Powder activated carbon (PAC) was added to the treatment process for about a month at a dose of 75 pounds/MG, and the treatment was effective in removing the odor and preventing potential customer complaints regarding taste and odor. The taste and odor event may reoccur if dry weather continues. The total chemical cost for treating this taste and odor event was \$82,000.

The unusually dry weather, combined with record pumping through the distribution system, resulted in an unusually high number of 12-inch "split pipe" main breaks. This trend began in May and continued through June. These main breaks are characterized by the pipe splitting longitudinally, typically for the entire length of a section of pipe. Because this mode of failure is "catastrophic," there is typically a higher occurrence of street and property damage, and emergency response must be immediate. In May and June there were fourteen and fifteen split pipe breaks, respectively; which is much higher than a typical spring-summer period.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report. Customer satisfaction increased again in the second quarter of 2005 to the highest level experienced since the survey and index were initiated in 1994. The Total Customer Satisfaction Index (CSI) level is 856 for the quarter and 853 YTD which exceeds the Corporate Level II goal of 850. Customer satisfaction for the Service CSI remained stable at 801 for the quarter and YTD. Commercial service numbers dropped slightly for the quarter.

Staff implemented several new procedures in order to ensure that the billing situation that occurred in January and early February does not impact customers in the future. Upon learning of the error, immediate changes were made to the method used to process a bill that must be canceled and then re-billed in the case of adjustments, reading or billing errors, to ensure that proper fees are charged. In addition, staff has reviewed the billing system's control table files and are prepared to make programming changes to those files to properly assess all service charges should similar events arise again. Staff are also consulting with Alliance, LWC's billing system vendor, to identify long-term solutions that protect against this error occurring again. Staff for LWC and MSD are completing their validation of the data quantifying the billing error. The estimated water credit due LWC customers has been revised to approximately \$150,000 and was reflected in June financial statements. Credits are expected to be issued to impacted customers with the next billing cycle.

The Metered Water Ratio team has taken several steps toward meeting the objectives of its 2005 Action Plan. In the second quarter, Metering Services staff improved processes to more timely address and repair meters not registering, eliminating the significant backlog of this work that existed in January 2005. In addition, Metering Services staff worked to increase the number of field tests conducted on LWC's large meters (3 inch and larger). Cross training existing personnel has increased staffing flexibility and as a result the number of large meters tested through June 2005 is up significantly over year-to-date June 2004. Staff is drafting a comprehensive back billing policy, projected to be implemented later this year, to consistently address billing oversights when they occur. The Duty Exchange program that was re-initiated in 2005 is ahead of schedule with approximately 7,000 meters exchanged through June. In the

second quarter, staff also began to arrange for testing LWC's plant production meters in the third quarter of this year.

The June abandonment rate was 7.8% compared to 5.0 % in May 2005, and 5.0% in June 2004. Bad debt for the month was \$45,190 compared to \$72,842 in May 2005, and \$53,426 in June 2004. Bad debt is \$3,273 over budget for the month and \$40,770 over budget year to date. Customer Service took more calls (3,000 more) than normal and had slightly lower availability rate.

LWC received a Five Year Director's Award from the American Water Works Association for producing drinking water that continually surpasses federal water quality standards.

Closed Session

Ms. Marita Willis moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c), respectively, at 1:15 p.m. Mr. Martin seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin seconded by Ms. Willis, and unanimously carried, the Board resumed open session at 1:31 p.m. No action was taken in closed session.

Strategic Plan Overview Continued from Previous Board Meeting

The Directors received a presentation on the Strategies and sub-Strategies contained in the 2004-2008 Strategic plan. This discussion did not include review of the tactics, which are operational in nature, for completing each sub-strategy.

Mr. Heitzman stated the first strategy is to invest in treatment and delivery systems and technologies that deliver a quality of water service proven to assure public health and safety, meet customer expectations, and exceed regulatory standards. Several sub-strategies support this first strategy. We want to Ensure high-quality water and safety in the treatment and in the distribution system. We need to continue renewal in treatment and delivery systems to ensure reliability. This is evidenced by our commitment to the Main Rehabilitation and Replacement Program (MRRP) and investment in our plants to replace aging equipment. We are striving to install and have operational appropriate advanced treatment technologies at B.E. Payne & Crescent Hill Filter Plant by 2012. This initiative is scheduled in 3 phases, and we are working on Phase 3 currently. We are implementing 2002-2021 Facility Plan recommendations to meet quality, quantity and reliability requirements. We must develop and maintain leading edge know-how and competencies in the science of water treatment and delivery. We recognize we must be able to recruit knowledgeable people to advance the science of water treatment and delivery. We must work to expand Ohio River and aquifer source water protection, and have done this through involvement in with ORSANCO and their technical advisory group since its inception.

Ms. Halloran reviewed the second Strategy, which is to operate competitively and demonstrate leadership in the water supply marketplace, focusing on customer satisfaction and the drivers of quality service and value. To fully realize this strategy, we must institutionalize the Total Quality Organization principles of systems-based management, empowerment, quality of work life, and partnership within LWC. To do so, we must build competitive advantages and focus on all aspects of performance management. We have to strengthen business partnerships and relationships with key agencies, suppliers, and partners, including involvement in the community. We have to look for new ways to increase value to the stockholder and customer. The challenge is to continue to maintain value to our stockholders while also considering our obligations to our customers. In essence, we have to use best practices to anticipate and meet our

customer requirements. It is key for us to ensure a sustainable cost structure and specifically focus on costs that are increasing faster than the CPI such as insurance and fuel.

Ms. Teasley presented the third strategy, which is to increase water revenue by selling more water. To do so, we must implement improvement and extension programs in Bullitt and Oldham County service areas. We have to support sound community planning and design in Jefferson, Oldham, and Bullitt counties. We need to expand water sales in regional retail and wholesale markets where it is mutually beneficial. We have completed many projects to expand our retail area. The bigger challenges are now in the wholesale markets, which will increase sales, and therefore, increase revenue. When we seek to increase water sales, we have to consider how to do so within the boundaries of existing urban infrastructure and support community activities to revitalize brownfields/grayfields. We are always looking at ways to encourage growth and redevelopment in urban areas where our infrastructure is underutilized. Mr. Martin wondered whether this is the strategy we need to use if we want to look at nontraditional ways to increase revenue.

Mr. Carl Blanton presented the fourth strategy, which is to achieve and maintain a high quality of work life as defined in the Next Level Plan. This strategy requires us to offer competitive compensation and benefits with effective reward and recognition programs to enable the recruitment and retention of skilled employees. We must set compensation levels to reward employees appropriately, and we accomplish that through market pricing of jobs. We have to build on the strengths of a diverse workforce to meet our operational objectives. We value diversity and realize it makes us more successful. We need to enhance training and development that facilitates continuous learning and improvement to meet operational objectives. Finally, we must foster an environment that promotes effective communication so that all employees feel free to ask questions and provide feedback. We believe in partnering with employees to encourage them to be owners in the work and the results we achieve.

Ms. Teasley discussed last strategy, which seeks to enhance customer satisfaction and achieve best in class customer service by resourcing and implementing the Enhancing Customer Satisfaction and Customer Confidence Program Plan. LWC has had an enhancing customer satisfaction program in place for a number of years. This includes striving to improve processes to meet customer values, needs and expectations. We have to foster better communication and understanding between cores, systems and processes. This focuses on internal processes to see what level of internal customer service and satisfaction we can achieve because internal customer satisfaction directly impacts external customer service and satisfaction. We have to enhance the Customer Education Program. We must continually strive to enhance customer service and achieve "best in class" customer service by providing reliable and timely access to information through implementation of the Information Technology Strategic Plan. As we provide better tools to our employees, such as ECIS and AMR, these tools allow us to provide better service to our customers and will provide a higher level of customer satisfaction.

Certification Provided for Projects and Change Actions Authorized in the Second Quarter 2005

Mr. Huber certified the following projects have been approved in the Second Quarter of 2005 in accordance with the Capital Projects Authorization Policy and the Procedure related thereto, except for occasions when projects were closed out, and change actions were processed without the committee and the President approval. We have taken steps to ensure this practice will not continue, so that approval of change actions strictly follows the procedure.

Authorization Given to Proceed with Final Design and Bid for Kentucky Street Area Main Replacement Project

The Board approved the 2002/2003 and 2004/2005 Main Replacement and Rehabilitation Program (MRRP) in January 2002 and November 2003, respectively, including the 26th Street Area project. The original project was to clean and line these mains, but after further review of the recent maintenance records by Infrastructure Planning, replacement is more suitable. The Kentucky Street Area Main Replacement Project will include Kentucky Street, 25th Street, 26th Street, 32nd Street, Garland Avenue, Greenwood Avenue, Howard Street, Maple Street, and Midway Street, Grand Ave, 24th St., and 36th St.

The portion of 32nd Street north of Garland Ave was removed from the project because Metro Public Works repaved the street earlier this year. The pipe footages for replacement were increased approximately 5% to allow for the renewal of intersections and in anticipation of the need for additional pipe for vertical and horizontal offsets to avoid obstructions along the alignment of the pipeline. The cost estimate for the replacement includes material costs, upsizing of most of the mains from 6" to 8", 196 service transfers, and 325 service renewals. This replacement work will help to improve hydraulic capacity, water quality and fire flow availability in this area. Mr. Martin moved to increase the Kentucky Street Area Main Replacement Project budget by \$1,142,382 from \$1,122,668 to a Budget of Record of \$2,265,050 and to proceed with the final design and advertisement for bids. Ms. Willis seconded, and the motion carried.

Apportionment Warrant Register Amended

The Board of Water Works approved a resolution for the issuance of Apportionment Warrants for Old Routt Road; Routt Road to South of Floyd's Fork Creek at its November 14, 2000 meeting in accordance with KRS 96.265. Mr. John M. Biller contacted LWC staff to request the removal of 4118 Routt Road from the register. Mr. Biller owns the property known as Tax Block 48 Lot 94, (noted in the register as 4118 Routt Road) for which he received an Apportionment Warrant assessment. Mr. Biller bought Tax Block 48 Lot 94(4118 Routt Road) in 1994 and combined the parcel with Tax Block 48 Lot 83 (noted in the register as 4200 Routt Road) prior to the assessment. During the initial project study, the Property Valuation Administration (PVA) data showed these parcels as two separate properties owned by two different owners, and therefore, we assessed the properties separately. Easement and Right of Way staff subsequently researched the property and confirmed that, on May 25, 1994, it was sold to John Biller & Teresa Biller. Therefore, Tax Block 48 Lot 94 was incorrectly assessed an Apportionment Warrant. Ms. Willis moved to amend the Apportionment Warrant Register, thereby removing Tax Block 48 Lot 94 (W.M.T. Story & April Story) from the Register adopted by the Board on November 14, 2000 in accordance with KRS. 96.265. Mr. Martin seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 2:05 p.m.

There being no further business, the meeting was adjourned at 2:15 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
AUGUST 9, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis

Not Present:

Mayor Jerry Abramson
Dr. Joseph Wise

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Jim Asseff, Business System Owner, Facility Design & Construction
Mr. Don McKay, Business System Owner, Managing Business Risk
Mr. Jim Smith, Business System Owner, Infrastructure Planning and Business Development
Dr. Jack Wang, Business System Owner, Managing Water Quality
Ms. Kay Ball, Program Manager, Riverbank Filtration Project
Mr. Ed Chestnut, Assistant to the President for Strategic Planning & Corporate Measures

Visitors:

Mr. Larry Gaddis, Black & Veatch Consulting Engineers

The regular meeting of the Board of Water Works was held on Tuesday, August 9, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:40 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the Regular Meeting held July 12, 2005, seconded by Ms. Margaret Harris, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber reported that some studies have shown disinfectant by-products regulated in drinking water to cause First Trimester miscarriages. Another study conducted at the University of North Carolina found no causal relationship between disinfectant by-products in drinking water and miscarriages, but showed a very weak relationship with brominated compounds in drinking water. LWC's brominated compounds are very low. Mr. Huber noted that the Energy Bill signed last week did not give the petroleum companies a waiver of liability for MTBE caused injuries. Legislation requires any lawsuits related to these injuries to be filed in federal court. We have had no MTBE issues.

Board of Water Works
Regular Minutes August 9, 2005
Page 1 of 12

Mr. Huber also noted the Senate Committee on Environment and Public Works authorized a bill providing \$15 Million for water infrastructure and \$20 Million for waste water infrastructure. The bill would provide some funding for our RBF initiative but is not likely to be enacted.

Financial Report Provided

Mr. Robert Miller provided the financial results through July 2005. Operating Revenues for July of \$10,315,611 are \$33,356 or 0.3% more than budgeted and 11.9% more than July 2004. The budget variance is lower than had been anticipated and staff is reviewing the algorithm for the monthly spread of the revenue budget. YTD budget allocation is where it should be now, but it was too low earlier in the year. YTD Operating Revenues of \$62,798,559 are \$1,487,060 or 2.4% more than budgeted and 8.8% more than 2004. YTD Operation and Maintenance Expenses of \$25,831,915 are \$857,101 or 3.2% less than budgeted and 4.9% more than 2004. YTD Total Operating Expenses of \$42,080,247 is \$845,720 or 2.0% less than budgeted and 6.2% more than 2004. YTD Net Operating Income or \$20,718,313 is \$2,332,780 or 12.7% more than budgeted and 14.6% more than 2004. YTD Total Net Non-Operating Expense of \$1,734,728 is \$1,071,520 or 38.2% less than budgeted and 47.4% less than 2004. The prior year variance is due to early retirement incentive program costs which were incurred in January 2004. YTD Net Income of \$18,983,584 is \$3,404,300 or 21.9% more than budgeted and 28.4% more than 2004. Construction work in progress decreased by \$21 Million with the close of the Payne Plant improvements project and several other large projects to fixed assets.

Operations Report Provided

Dr. Jack Wang provided the Operations report. Due to dry weather conditions during a portion of the month, the average production rate for the month was significantly higher than that of July 2004. The average production rate of 154.4 MGD was 14.5 percent higher than the July 2004 production of 134.9 MGD and 3.1 percent higher than the July five year average production of 149.7 MGD. The production rate was extremely low, approximately 129.2 MGD, during mid-July because of the residual impact from Hurricane Dennis. The average production during that period was 129.2 MGD, indicating that base water sales are decreasing. Due to higher than normal productions in June and July, the year to date average production of 129.1 MGD is 4.4 percent higher than 2004 and 1.7 percent higher than the five year average. We had no problem supplying water to all areas, but it was more challenging in the Fern Creek area.

On July 13, LG&E advised the Company and the public of potential power outages in Northeast Jefferson and Oldham Counties, which would have a significant impact on water production at the B.E. Payne plant in Prospect. The recent plant upgrade included installation of a dual power feed from LG&E and installation of on-site, diesel generators to power the plant at 50 percent capacity or 30 MGD during emergency power interruptions. Staff will conduct an exercise the week of August 1 to operate the B.E. Payne plant at 30 MGD capacity and supplement the Elevated Service Area with water from the Crescent Hill plant, through the expanded Westport Transfer Station. LG&E has agreed to waive their electric demand charge during the exercise.

Staff received chemical bids for the period beginning October 2005. The prices for most of the chemicals increased, with a significant increase for the primary coagulant (ferric chloride). The impact of the chemical price increase is estimated at \$95,000 for 2005 and \$400,000 for 2006. Staff is evaluating alternatives to reduce this budget impact. Mr. Huber advised that LWC previously used ferric chloride that was a by-product of another chemical process but discovered water quality problems with too much manganese in the chemical, causing "black water" complaints. Thereafter, we required the supplier to

limit manganese, but our supplier could not ensure the limits. This has resulted in a change in what is being supplied which has driven up costs and is reflected in the recent chemical bids.

Until this past June, the Company supplied school systems (public, parochial, and private) in Jefferson, Bullitt, and Oldham Counties with one gallon containers of water during boil water advisories. This past spring, our bottled water supplier discontinued the ability for the Company to obtain gallon containers with a LWC label. In addition, the Jefferson and Oldham County school systems have requested they be provided with the eight ounce bottles, which are safer and more convenient to distribute to school children during an emergency. In response to these events, we have expanded our bottled water production to accommodate the school system emergency water needs, beginning with the new school year. An estimated 2,500 cases or 120,000 eight ounce bottles of water will be provided annually to meet the emergency water needs at an estimated cost of \$40,000.

Mitigation of the stem corrosion problems on American Flow Control fire hydrants is approximately 95 percent complete. The number of field personnel performing this work has been reduced from six to two. A total of 2,643 American Darling hydrants installed between 2003 and 2005 have been inspected. Of these, approximately 1,171 stems have been replaced. The mitigation program will be complete by September and all costs associated with this effort are expected to be reimbursed by American Flow Control.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report. On Tuesday, July 19, 2005, Louisville Water Company held the first meeting of the newly formed Shepherdsville Advisory Board (SAB). The SAB consists of three representatives appointed by the Mayor of Shepherdsville. The Mayor appointed himself, Mr. Hubert Richmond, and Mr. Terry Whittaker to serve on the Board. The SAB shall provide advice and counsel to the President of LWC Board of Water Works on issues related to Shepherdsville service area and the Shepherdsville Water Improvement Program. The SAB will automatically cease to exist at the time of rate equalization. Items discussed at the initial meeting included the charter for the new group, an update of the Shepherdsville Reserve Fund and an overview of completed and planned capital improvements in the area.

Ms. Teasley reported that LWC's documentary "WaterWorks: 150 Years of the Louisville Water Company" recently received national honors from the Alliance for Community Media's Hometown Video Festival. The video was produced by LWC and Metro TV. Copies will be given to local libraries and a shorter version will be created for area schools.

Closed Session

Mr. Marita Willis moved to go into closed session to discuss property and proposed or pending litigation issues pursuant to KRS 61.810(1)(b) and (c), respectively, at 1:08 p.m. Ms. Wendy Welsh seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Willis, seconded by Mr. Martin, and unanimously carried, the Board resumed open session at 1:25 p.m.

Decision Made to Purchase Property

Ms. Welsh moved to exercise the Board's option and purchase an 11 acre site in Eastern Jefferson County off Aiken Road for \$298,000. Ms. Harris seconded, and the motion carried. This site will be used to replace the existing standpipe at Long Run Park and address high demands and low pressure for this area.

Public Affairs and Customer Satisfaction Committee Report Presented

Ms. Willis, Chairperson of the Public Affairs and Customer Satisfaction Committee, provided a report of the Committee's meeting on July 28, 2005. New regulations that would force low income credit card users to pay higher minimum payments may negatively impact their ability to pay water bills. Ms. Willis reported that call volume and IVR usage are both up but there has been a slight decrease in the abandonment rate. LWC is looking for ways to handle the increased call volume.

LWC is adopting a new water industry standard to better manage water loss (previously called "unaccounted for water"). The cross functional team in charge of the conversion has created a water audit to help develop water loss reduction strategies, increase revenues and improve customer service. We have 14%. There has been no formal way to measure this in the past.

Ms. Willis advised LWC customers may be able to pay water/sewer bills on-line through the Interactive Web Response (IWR), an enhancement of the original Customer Information System (CIS). LWC's IWR Team is currently benchmarking other utilities, validating the budget and developing a Request for Competitive Negotiation (RCN).

Ms. Willis reported that LWC has a "Water Shortage Response Plan," which is a part of our overall Emergency Preparedness and Disaster Services Plan. This plan can be used anytime that meeting customer water demand could be an issue such as during a drought, contamination or infrastructure problem.

The Environmental Working Group (EWG), an environmental activist organization, will release a website this summer containing a list of U.S water utilities and any violations they have received between 1996 and 2002. This is old information that has already been covered by the local press but that could spark negative publicity for LWC. We had 82 violations in that six year period, most of which occurred because of problems with a contract lab. LWC's Public Information group is prepared to respond should we get inquiries.

Ms. Willis advised and Mr. Huber reported "blast" communications are being considered (over 500 people at a time). Such a tool could assist LWC with boil water advisories. Mr. Huber noted that there are other opportunities to reach large numbers of people, such as trailing at the bottom of the TV screen.

EPA and water industry research foundation conducted a study to determine whether trihalomethanes (associated with chlorine) cause first trimester miscarriages. The study concluded it does not, contrary to a previous study.

B. E. Payne Plant Advanced Treatment Technology Update Given

Ms. Ball, Program Manager for the Riverbank Filtration Tunnel Project at the B. E. Payne Plant, provide an update of the value engineering exercise being conducted for this project due to the low bid of \$48.4 million, which exceeds Jordon, Jones, and Goulding Engineer's (JJ&G) estimate of \$31 million by \$17.4 million. Following the bid, JJ&G conducted a post-bid analysis to determine what caused the significant variation from estimate to bid. Their analysis, presented to the Board in March, identified a number of

Board of Water Works
Regular Minutes August 9, 2005
Page 4 of 12

factors that account for the discrepancy. The major areas of discrepancy include: the gas tunnel classification, construction cost escalation, tunnel shaft construction, limited construction hours, and limited competition for the project. The value engineering exercise evaluated these areas for opportunities of redesign.

After thorough review of the project elements, and consultation with bidders and specialty contractors, JJ&G conducted a workshop with LWC operations, maintenance and engineering staff, Dave Schafer of Schafer and Associates, Dr. Joe Hagerty of University of Louisville, and Mike Unthank of United States Geological Survey (USGS) to evaluate the alternatives. During the workshop, 11 alternative designs were identified by the participants. The alternatives were evaluated, ranked, and grouped into three categories: solid and soft rock tunnel options with vertical or collector wells; pipe solutions with horizontal collector or vertical wells; and hybrid gravity solutions, using combinations of horizontal and collector wells.

Following the workshop, five alternatives were evaluated in detail for constructability and feasibility; including a construction cost estimate. Each option has advantages measured in terms of cost, constructability, construction risk, customer impact, operations, and maintenance. The five selected alternative designs include:

- Alternative A – Solid rock tunnel, with submersible pump station, vertical wells
- Alternative B – Solid rock tunnel, above grade pump station, vertical or collector wells
- Alternative C – Micro-tunnel (soft rock), above grade pump station, collector wells
- Alternative D – Transmission main connecting collector wells with submersible pumps
- Alternative E – Hybrid solution of gravity collector and vertical wells for 35 MGD capacity using existing pump station, and new pumped vertical wells connected to existing RBF demo well system for 10 MGD capacity, total 45 MGD capacity

JJ&G expects to complete their cost analysis by August 15 for the September Board meeting. These results will also be integrated into the Crescent Hill Advanced Treatment Technology work being conducted by Black & Veatch Engineers. The objective will be to produce an alternative design of 45 MGD capacity that can be constructed within the \$31 million budget allocation. Mr. Connor asked if any of these change the aesthetics. Ms. Ball stated aesthetics was part of the review process and it may require additional communication with the consultants who participated. There would be no above ground structure other than the pump station. The collector and vertical wells would be capped at grade. These changes should open up the project for new bidders who were not willing to bid it as formerly designed. Mr. Conner asked whether all this requires a total re-bidding. Ms. Ball stated it would require re-bidding. Mr. Conner asked what the Board will need to do at the September 2005 BOWW meeting. Ms. Ball stated the Board will need to approve a final redesign of the project at the regular meeting in September.

Crescent Hill Treatment Plant Advanced Treatment Technology Update Given

Dr. Wang stated LWC retained Black and Veatch Engineers (B&V) in November 2004 to evaluate advanced treatment technologies for the Crescent Hill Treatment Plant. The scope of work includes: evaluation of new technology alternatives; facilitating a Technical Workgroup of LWC staff and a Steering Group of Board members to prioritize the alternatives; and performing a cost evaluation of three alternatives. The Steering Group's objective is to reach a consensus decision on the best treatment technology to construct for the Crescent Hill Water Treatment Plant. LWC staff, Black & Veatch Engineers, Jordon Jones and Goulding Engineers, and United States Geological Survey (USGS) have participated in the decision process by providing critical information necessary for consideration. The groups reviewed: advanced treatment technology options, current and future water quality regulations,

water quality goals, operating parameters and operating risk, plant maintenance, constructability, and the feasibility of retrofitting the existing treatment plant while maintaining operations.

The Technical Workgroup is charged with establishing water quality goals to meet the project objectives, evaluating advanced treatment technologies, and prioritization of the treatment alternatives for presentation to the Steering Group. The Workgroup membership was selected to represent a wide range of operations, maintenance, engineering, and management experience in advanced water treatment.

Over the past six months, the Steering Group was presented with the following advanced treatment technologies for consideration: Riverbank Filtration (RBF) technology; membrane filtration technology; granular activated carbon and powder activated carbon adsorption technology; ozone disinfection technology; ultraviolet disinfection technology, and modifications to conventional treatment processes currently in use by LWC. In parallel, the Technical Workgroup reviewed these treatment technologies and developed water quality goals that each technology must achieve. The Technical Workgroup conducted a three-day workshop to identify advanced technologies appropriate for implementation at Crescent Hill. Black & Veatch Engineers provided the Workgroup with nine preliminary alternatives based on water quality goals and compatibility with other processes. The Workgroup screened out four of the nine alternatives by discussing and reviewing each thoroughly.

After completion of the criteria rankings and weightings, the Technical Workgroup conducted the analysis of each of the five alternatives using the Criterium Decision Plus software. The Technical Workgroup's findings were presented to the Steering Group on June 7 and resulted in ranking the five alternatives remaining. In response to Mr. Conner's comment about the cost of RBF, Dr. Wang stated cost was a component of the analysis.

Mr. Huber commented that ozone generation is very expensive. Mr. Martin noted that if we utilize a river intake method we must use something like ozone to treat the cryptosporidium and giardia organisms found in the water and must use something such as Biologically Activated Filters (BAF) or Biologically Active Carbon (BAC) to treat taste and odor.

On June 7, the Steering Group also experimented with the weightings using the Decision Criterium Plus software. The software consistently identified the same top three alternatives. The Steering Group authorized Black & Veatch to perform a detailed cost evaluation, including life-cycle costs, of the top three alternatives. The evaluation will include capital construction costs, as well as operation and maintenance costs over the life of the asset. The Steering Group also recommended the Board of Water Works be provided an opportunity to review the criteria, weightings, and the decision making process used for selection of the three alternatives. This will provide an opportunity to reconsider any options not being evaluated. Black & Veatch will present their cost evaluation on August 16 to the Steering Group. The Steering Group will then work to achieve consensus on a recommended course of action for the Board of Water Works at the September meeting.

Enterprise Risk Management Discussed

Mr. Miller and Mr. Don McKay presented an overview of the Enterprise Risk Management program. Mr. Miller explained that LWC uses a standards definition of business risk as the threat that an event or action will adversely affect an organization's ability to achieve its business objectives and execute its strategies successfully; Enterprise Risk Management is a process to identify potential events that may affect the organization, to manage risks to be within its risk tolerance, and to provide reasonable assurance regarding the achievement of its objectives.

To develop our own approach, we have utilized the "Internal Control Integrated Framework" approach developed by COSO. We have not spent a significant amount of time on quantitatively determining if a risk is likely to occur but rather, what to do to prevent the risk from occurring and what to do if it does occur. Additionally, we have participated in the AwwaRF Project, "Risk Analysis Strategies for Better and More Credible Decision Making." Mr. McKay has taken steps to work with insurance brokers to get major risks insured. From here, we need to incorporate Enterprise Risk Management Capabilities in Decision Support and conduct the next Iteration of Risk Identification, Assessment, and Management Methodology.

Mid-Year Strategic Plan Measurements Reviewed

Mr. Ed Chestnut reported on the progress toward strategic goals, which are goals from 2004 through 2008, and our 2005 goals.

We are on target to meet our Customer Satisfaction goal. Regarding the goal to increase our Customer Satisfaction Index (CSI) to 850 by 2008, the CSI increased again in the second quarter of 2005 to the highest level experienced since the survey and index were initiated in 1994. The Total Customer Satisfaction Index (CSI) level is 856 for the quarter and 853 YTD which exceeds the Corporate Level II goal of 850. Under the goal to increase the Serviced Accounts CSI to 815 by 2008, the CSI remained stable at 801 for the quarter and YTD. This index score is above the Level III goal of 800 for customer satisfaction for the Corporate Performance Award. Commercial service numbers dropped slightly for the quarter with decreases in all factors affecting customer perceptions. We are not meeting the goal to control water rate changes at or below the anticipated change in the Consumer Price Index plus 1%, the water rate increase implemented at the beginning of 2005 is 3.1% higher than the forecast change in the Consumer Price Index +1% for the year as prepared by the Congressional Budget Office in January 2005. This forecast will be updated in mid-August 2005. Mr. Huber pointed out that 3.5% of the 6.5% ate increase was because we dropped the water sales forecast.

LWC water quality goals are all on track except one. The distribution water quality goal regarding coliform bacteria, an indicator of contamination, is on target with the rate of negative coliform samples averaging 99.8%. The results were a significant improvement from 2001 when the total coliform negative was typically below 98% during summer months. The distribution water quality goal regarding chlorine residual is 100% above target. Nitrification control strategies implemented in 2002 enabled us to effectively maintain the chlorine residual throughout the distribution system during the last 3 years. The water quality goal regarding turbidity is not on target. While it has been significantly reduced over the past 5 years, the turbidity levels have on average been 99.6% below the target of 0.5 ntu.

Regarding our financial measures, we have a strategic goal to earn a return-on-equity at a target level of the 5-year moving average ROE for the benchmark group of investor-owned utilities. The 2005 return on equity goal of 9.22% is on target to be met following higher than expected water sales for the first half of the year. Our goal to control increases in O&M cost per metered customer to be no higher than \$175 by 2008 is on target with Operation and Maintenance cost per metered customer of \$80.40 for the first half of the year. This is the result of sustaining the cost reductions achieved in the previous year combined with a significantly reduced number of water main breaks. Mr. Huber pointed out that this is measured against all other investor-owned utilities where we are best in class. We are above our goal to increase water sales to 42.5 billion gallons by 2008. Water sales of 17.9 billion gallons are above the budgeted level and the previous two years. Finally, we are above targeted levels for the goal to increase water revenue to \$124 Million by 2008, with actual operating revenue of \$50.1 million for the first half of the year which is 2.8% above targeted levels.

We are on target to meet most Employee Quality of Work Life measures. Regarding our goal to reduce lost time injury frequency to 3.4 by 2008, the number of lost time injuries for the first half of 2005 was five (5). The lost time injury frequency rate was 2.16 per 200,000 hours worked. Additionally, for our goal of reducing the rate of preventable vehicular accidents to 0.85 by 2008, the actual number of preventable vehicular accidents for mid-year 2005 was 10. The actual preventable vehicular accident rate was 0.72% per 100,000 miles driven compared to the goal of 1.06. We have a goal to attain a composite Internal Customer Satisfaction score of 85.24 (4.26 on a 5 point scale), 2004 ICS Survey score was affected by an organizational restructuring resulting in reduced staff, the elimination of some business processes, the integration of some business processes with other processes, and selected processes being reassigned to different business systems.

Regarding the Minority Business Spending goal to achieve 15% of value of contracts awarded by 2008 to MBE and 5% of value of contracts awarded by 2008 to WBE, the 2005 Minority Business Enterprise spending goal is not on target to be achieved following lower than expected results for the first half of the year. Management is evaluating changes to the procurement procedures to improve results in this area. The Women Business Enterprise spending goal is on target for the year. Mr. Miller noted we have changed how we measure this goal. Before 2005, we measured the percentage from the amount committed to be spent by contractors. Since the beginning of 2005, we have measured it from the amount actually spent by contractors for sub-contractor performed work because we found that sometimes contractors were not spending the contract funds with M/WBE contractors even when there was a commitment to do so.

Mr. Huber summarized these are going well with the exception of contract dollars spent with minority sub-contractors.

20 Year Water Sales Forecast Reviewed

In a continuing effort to effectively forecast water sales for the next twenty years, Louisville Water Company worked with Dr. Patricia Cerrito and compiled monthly data for the thirty year period from January 1975 through December 2004. The data included usage and number of customers for each customer class: residential, commercial, industrial, wholesale, other, and total. The data were first forecast both monthly and yearly with a 20-year lead (240 months) without using any dynamic regressors. Dynamic regressors, as follows, were added sequentially to ensure against over-fitting: population census data and number of households for Jefferson County, Bullitt County, Oldham County and the state of Kentucky; personal income for Kentucky residents; and employment and the number of businesses for Kentucky. In addition, for usage (but not for the number of customers), the PDSI index (Palmer Drought Severity Index) was included.

For the most part, the addition of economic regressors contributed little to the forecast for the next 20 years, indicating that most of the forecast comes directly from the trends in usage and in the number of customers for the previous 30 years. Therefore, the trends in both usage and number of customers are fairly robust, which suggests confidence in the forecasted results. The monthly forecast indicates a very seasonal and slightly increasing pattern for residential, commercial, wholesale, other and total. There was a seasonal, decreasing monthly pattern for industrial. The yearly forecast, while not seasonal, indicated a similar increasing (decreasing for industrial) trend. It appears that the rate of increase in customers will offset the rate of decrease in consumption per customer, resulting in a flat trend line for total consumption over the next twenty years.

Mr. Chestnut reported the rate of change in the number of customers is increasing but it is slowing. Mr. Chestnut advised there are five factors we should consider in the future: support of economic development; expansion of our sales area; continuation of pay for growth policies; management of

Board of Water Works
Regular Minutes August 9, 2005
Page 8 of 12

decreasing per customer usage; and exploration of non-traditional business. Total consumption over the next twenty years is projected to be essentially flat and is dependent upon an increase in the number of customers to offset the decrease in the usage per customer. If the number of customers does not increase by the predicted amounts, then the total consumption is expected to decrease. These consumption forecasts are being incorporated into the long-range financial plan. Mr. Martin asked whether these five factors will be discussed at the Strategic Planning Retreat, and Mr. Huber stated they would.

Regionalization Policy Discussed

Mr. Jim Smith reviewed the Board's current Regionalization policy, adopted in February 1995, which established guidelines for growth of LWC's retail service area, set provisions for providing wholesale water to systems in adjacent counties, and defined acceptable conditions to operate and maintain water systems in adjacent counties under lease agreements. It also established the cost of service methodology for water rates. The policy defined LWC's primary market area as Jefferson County and surrounding counties. Expansion of retail service was limited to Jefferson County and areas in adjacent counties. It required the system to meet urban supply standards with reasonable capital investment. The expansion of retail service must be in the best interest of both the customers acquired and existing LWC customers.

Provisions for supplying wholesale water were based on mutual interests of the wholesale customers and LWC customers, willingness to enter into a contractual agreement for wholesale water service and PSC approval, if subjected to PSC regulation. Wholesale water service is limited to adjacent counties delivered at the county line or another mutually agreeable point. The policy does allow LWC to own and operate transmission lines to wholesale customers in adjacent counties.

Considerations for leasing water systems in adjacent counties included requiring lease terms adequate enough to justify setup costs, limiting lease arrangements to water systems designed and built to urban water supply standards including fire flow capacity, and requiring the leased systems to have sufficient financial resources to fund capital improvements and service debt.

The regionalization policy required rates to be based on the cost of service for retail service in acquired systems, leased systems and wholesale water service. The cost of service for acquired systems and leased systems should include the costs of capital improvements for improving the system to urban supply standards, costs to extend water service to unserved areas, costs for acquiring the system and operating costs. Leased systems may include a surcharge designed to service debt, provide funds for needed capital improvements, fund depreciation and cover operating costs incurred by the leased system.

Several limiting factors in the existing policy may need to be addressed for LWC to fully pursue future regionalization opportunities. Geographically limiting LWC's regionalization efforts to adjacent counties may result in LWC forgoing significant, financially viable opportunities in areas outside of this territory. Limiting retail water service to urban water systems will not allow LWC to pursue acquisition opportunities in rural systems. Technical advances in automation and small-scale treatment systems, federal and state funding initiatives and potential public/private partnerships may transform rural systems into attractive business opportunities. LWC's reliance on the sale of drinking water only will limit our ability to tap markets such as non-potable water sales, combined water and wastewater services, and contract services. Additionally, our reliance on 100% ownership of supply assets, customers and service territories may limit our ability to pursue partnering opportunities and participation in regional water supply commissions. It is recommended the existing Regionalization policy be reviewed during strategic planning to assure the policy provides LWC with the guidance to fully pursue future regionalization opportunities.

Contract Awarded for Project 03638: Crescent Hill Filter Plant Slate Roof Replacements

Mr. Jim Asseff stated that two bids were received for replacement of slate roofs on the CHFP North-South Filter and Chemical Buildings. The scope of work includes slate replacement, painting interior truss work, masonry rehabilitation of the North-South Filter Building, and other miscellaneous architectural improvements. This project will provide a 75-year life extension to the buildings. These structures are projected to house treatment processes and/or support services indefinitely. The bids ranged from \$3,128,571 to \$3,350,000. The estimate prepared by project consultant Roof Resources, Inc. was \$3,800,000. Discussion with bidders indicated the major difference is salvage value of the existing slate; the consultant considered the value to be negligible due to difficulty in removal, however both bidders included salvage value in their bid. Four other eligible bidders declined to bid due to business risk related to the complexity, longevity, and/or bonding required to execute this project. Staff and the consultant communicated this project bid notice to contractors within the Midwestern market, but bid interest beyond the local market was minimal. Ms. Welsh moved to authorize the Purchasing Manager to award a contract in the amount of \$3,128,571 to American Roofing and Metal Company for CHFP Slate Roof Replacements. Ms. Harris seconded, and the motion carried.

Authorization Given to Proceed with Final Design and Bid for Project 10415: Westport Road Transmission Main from Primrose Drive to Ambridge Circle

Ms. Teasley stated the Kentucky Transportation Cabinet (KTC) intends to widen Westport Road from Primrose Drive to Ambridge Circle. In the 2005 Capital Budget, LWC has budgeted two projects for relocation work and for system improvements within this section of Westport Road. Project No. 10415 will combine the two budgeted projects and will provide coordination with the KTC roadway work. KTC expects to bid the road work on October 21, 2005. The project includes relocation of approximately 500 feet of 48-inch concrete water main and replacement of 10,100 feet of 24-inch water main with a 30-inch water main from Chenoweth Lane to Ambridge Circle. The existing 24-inch transmission main suffers from frequent breaks and leaks. It will serve as a supply main to the Westport Road BPS so that the Marquette 30-inch can become a discharge main to supply the planned Oxmoor 36/42-inch main to connect to the Ellingsworth 36-inch main and the 24-inch Cross County Header that are both located at Linn Station Road and Hurstborne Parkway. This configuration will eliminate the need for the proposed Lake Avenue 24-inch transmission main to the Cross County Header for a budgeted savings of \$4,200,000. The distribution main replacement scope was originally planned for 6,280 feet of replacement from Primrose Drive to Ambridge Circle. However, only 5,000 of 6" water main from Primrose Drive to Beechwood Road will be replaced with a 12" water main and a 200 foot 6-inch grid tie from Westport Terrace to Walser Road. Service relocations and transfers along with fire hydrant replacements are also included within the scope of this project. These distribution improvements will address concerns regarding reliability and flow. The proposed project budget for this work is \$4,752,000, with the KTC cost participation being \$1,141,000 or 24%. KTC will review the LWC's final-design plans and specifications, as well as the cost estimate prior to advertisement for bid. LWC's contribution of \$3,611,000, or 76%, is primarily due to the upsizing and replacement of water mains and the related distribution grid-ties. Mr. Johnstone asked the age of the existing facilities in this area. Mr. Huber stated it dates around 1920 and has experienced many main breaks. Ms. Welsh moved to authorize staff to proceed with final design with a budget of record of \$4,752,000 and to advertise for bid. Ms. Harris seconded, and the motion carried. An Agreement with the KTC will be drafted based on the successful bid price. A subsequent request will be made to the Board of Water Works to enter into the agreement with KTC.

Budget Increased and Authorization Given to Proceed with Final Design and Bid for Combined Projects 00401 and 03-600: Zorn Intake Improvements and Zorn Station # 3 Improvements

Mr. Smith advised the Capital Improvement Plan includes a combined \$3,040,000 for improvements to the Zorn Intake facility and Zorn Pump Station #3. The conceptual scope of work included replacement of mechanical equipment within each facility and rehabilitation of the building structures. A Preliminary Engineering Report prepared by consultant Camp, Dresser and McKee (CDM) recommends these improvements proceed as planned, plus recommends additional improvements to extend the life of the structures. The Zorn Intake facility was constructed in 1910 and provides intake of source Ohio River water. The facility houses submerged openings for suction, plus mechanical equipment to screen debris for protection of pumping equipment. This facility was last upgraded 20 years ago and is in need of new equipment and structural improvements to provide a 20-year life extension to the facility. Zorn Pump Station #3 was constructed in 1918 and houses two pumping units (Units #6 and #7), piping, and valves to provide 120 MGD source supply. Pumping Unit #7 has been overhauled, however Pumping Unit #6 is in need of overhaul but cannot be isolated due to aged, failed valves. The suction piping and valves are original to steam pumping equipment and were converted to electrical motors and centrifugal pumps by 1950. Work in Station #3 will include overhaul of Pumping Unit #6, replacement of piping and valves to provide operational and maintenance flexibility and improve the reliability of the station. The building improvements will improve safety and extend the life of the facility. Ms. Harris moved to authorize combining Projects 00-401: Zorn Intake Improvements and 03-600: Zorn Station #3 Improvements, increasing the project budget from \$3,040,000 to \$5,142,000, and proceeding with final design and advertisement for bid. CDM Engineers will be retained for the design and contract administration for this project, with a professional services contract approved by the President. Mr. Conner sought clarification of the amount of the increase in budget. Mr. Asseff advised that the consultant recommended additional improvements after conducting their assessment of the facility's condition. Mr. Huber advised which items were not in the original budget. He also advised this is marine construction because some work is underwater. There may be some issues that are not known and, therefore, we are carrying a larger contingency (15%) than usual. Mr. Huber advised this work is critical, even if we proceed with RBF at CHFP because that project is 7 to 10 years out and we have made all the repairs we can make to this facility. Ms. Welch seconded, and the motion carried.

Budget Increased and Contract Awarded for Shelbyville Road Main Replacement Project

Ms. Teasley stated that although originally projected to be partially main replacement and partially clean and line, further review of the recent maintenance records for these mains by Infrastructure Planning indicated that these mains are better candidates to be completely replacement. The Shelbyville Road II Main Replacement Project also added a dual 12" water main along a portion of the alignment instead of a single 16" main reduce the number of long services, hydrant leads and cross-street tie-ins that would create a costly maintenance and traffic congestion when a break occurs along Shelbyville Road. The pipe footages for main replacement were increased approximately 72% to allow for the installation of dual 12" mains, the renewal of intersections and to address additional pipe for vertical and horizontal offsets that may be needed to avoid obstructions along the alignment of the pipeline. The cost estimate for the replacement includes materials, 76 service transfers, 24 service renewals, 6 service relocates, and 15 service discontinues. The unit cost for the replacement of these mains is \$121.94/ft which is below the initial estimate of \$157.59/ft. This replacement work will help to improve hydraulic capacity, water quality, reliability and fire flow availability in this area along with decreasing the costs for any future maintenance and service connections. Ms. Welsh moved to increase the Shelbyville Road II Main Replacement Project budget by \$428,000 from \$1,245,000 to a Budget of Record of \$1,673,000 and to authorize the Purchasing Manager to award the construction contract to Southern Pipeline Construction Company to proceed with construction and final acceptance into the distribution system. Ms. Willis seconded, and the motion carried.

Board of Water Works
Regular Minutes August 9, 2005
Page 11 of 12

Executive Session Conducted

The Board went into Executive Session without management present at 3:14 p.m.

There being no further business, the meeting was adjourned at 3:25 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
SEPTEMBER 20, 2005**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise
Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Don McKay, Business System Owner, Managing Business Risk
Mr. Jim Smith, Business System Owner, Infrastructure Planning and Business Development
Ms. Kay Ball, Program Manager, Riverbank Filtration Project

Visitors:

Mr. Larry Gaddis, Black & Veatch Consulting Engineers
Mr. Robert Wierzbicki, Jordan Jones & Goulding Engineers
Mr. David Haas, Jordan Jones & Goulding Engineers
Ms. Karen Wunderlin, The Wunderlin Group

The regular meeting of the Board of Water Works was held on Tuesday, September 20, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:32 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Ms. Margaret Harris moved to approve the minutes from the Regular Meeting held August 9, 2005, seconded by Mr. Gerald Martin, and the motion carried.

Committee Reports Deferred

In light of the length of the agenda and the planned address by Mayor Jerry Abramson, the consensus of the Board was to defer the Compensation Committee and Audit Committee reports until the October BOWW meeting.

Chief Executive Officer Report Provided

Mr. Conner asked whether any BOWW member had any questions of any staff as a result of the reports provided prior to the meeting. There were no questions.

Second Quarter Dividend Declared

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company pay the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City in quarterly installments, such payments to be based on the estimated annual net income and as nearly equal as possible. The budgeted net income of \$29,321,700 for 2005 requires payment of an annual dividend of \$13,318,020 in quarterly installments of \$3,329,505. The quarterly dividend must be increased by \$463,414 to reflect one quarter of the \$1,526,239 dividend adjustments for 2002 and 2003 and one quarter of the \$328,018 dividend underpayment for 2004. Ms. Wendy Welsh moved to adopt the following resolution, which provides for a total quarterly payment of \$3,792,819.

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 15, 2005 to adjust the 2004 annual dividend by \$327,018, from \$13,766,392 to \$14,093,410, the difference to be added in quarterly installments to the regular 2005 quarterly dividend, and

WHEREAS, the Board passed a resolution on March 15, 2005 to increase the 2005 dividend payment by \$1,526,239, this being the amount of the dividend from 2002 and 2003 due as a result of eliminating from its inception in 2002 the practice of deducting the rate differential for acquired systems from the net income available for the purpose of computing the dividend, to be added in quarterly installments to the regular 2005 quarterly dividend installments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2005 Louisville Water Company Annual Budget contemplates the 2005 annual dividend to be \$13,318,020, it would be in order at this time to declare a regular third quarter dividend of \$3,329,505;

RESOLVED, the regular third quarter 2005 dividend of \$3,329,505 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,792,819 to the Louisville / Jefferson County Revenue Commission on September 30, 2005, this being the second quarterly dividend for 2005 plus one quarter of the dividend adjustments for 2002, 2003 and 2004, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Ms. Harris seconded, and the motion carried.

Return on Equity Target Discussed

Mr. Robert Miller provided information to the Board regarding the Return on Equity target to provide the sole stockholder, the City of Louisville, with a reasonable return on invested capital. Since 1989, this

Board of Water Works

Regular Minutes September 20, 2005

Page 2 of 13

target has been set based on the five-year moving average returns for a benchmark group of investor-owned utilities. This approach provided a close tie to the marketplace and ensured comparison with consistent financial reporting standards and regulatory requirements. After nearly twenty years of using this methodology, there are key drawbacks that have become apparent: the previously set target of one percent less than the five-year moving average was phased out in 2004 and 2005 in order to provide a target return commensurate with the actual returns earned by investor-owned utilities; annual data for the original benchmark group is decreased and is now available only in filings from public service commissions; and, because weather, economic conditions, and other factors have occasional adverse impacts on earnings results for the benchmark utilities, staff has excluded the effect of extraordinary items from the earnings results but factors considered "ordinary" for accounting purposes can cause utilities to fall short of the financial returns allowed by their public service commissions in their rate cases.

After careful consideration, staff recommends phasing out the current target based on historical earnings and replacing it with a new target based on the simple average of returns on equity allowed by state public service commissions for investor-owned utilities with common equity of more than \$100 million. The simple average of the allowed returns on equity for those utilities is 10.0%. Staff believes that this proposed target methodology would be more timely, relevant, fair, and reasonable for establishing annual budgets and setting water rates. This proposed methodology would be phased in over a three-year period; in 2006, the target rate would be computed as two-thirds based on the previous historic benchmark method rate of 9.22% and one-third based on the PSC-allowed ROE rate of 10.0%. The return on equity target for 2006 based on this proposed methodology would be 9.48%, up from the 2005 target of 9.22%, and would yield an estimated budgeted dividend of \$14.8 million, up from the 2005 budgeted dividend of \$13.3 million.

Mr. Huber emphasized we are carefully considering this due to its strategic importance. Mr. Martin inquired whether Public Financial Management Consultants are considering this issue, and Mr. Miller advised they are. Mr. Martin requested the Board await the results of the PFM report before setting the return rates and other financial objectives for 2006 in the Long Range Plan. Mr. Conner asked about the impact of higher earnings on regulated utilities. Ms. Karla Teasley advised PSCs sometimes order rate cases if the utility does not voluntarily submit to one when there are repeated or consecutive years of higher earnings. Dr. Joseph Wise commented this is a serious issue due to the past rate increase and the current revenue forecast. Ms. Welsh agreed this is something the Board must address. This matter will be discussed in more detail when the Preliminary Budget is presented in October.

Scope Modified for Riverbank Filtration Project at B. E. Payne Plant

Mr. Robert Wierzbicki of Jordan, Jones and Goulding (JJ&G) presented the results of the Riverbank Filtration (RBF) value engineering exercise requested by the Board subsequent to the bid results for RBF at the B. E. Payne Treatment Plant. Mr. Wierzbicki advised JJ&G analyzed the factors driving the cost of the bids, considered value engineering modifications, reviewed the resulting alternatives available and drew conclusions. He reported the major cost drivers were the classification of the tunnel as gaseous, the tunnel and access shaft depth, the need for specialty well drilling equipment, and the nationwide construction cost escalation at the time of the bid. Mr. Wierzbicki described how the various alternatives were developed. JJ&G and staff considered the collection, conveyance and pumping methodology, the desired construction cost of \$31 Million or less, the desired peak flow of 45 Million Gallons Daily (MGD), the public desire of below grade facilities, and the set geographical boundary lines. Mr. Wierzbicki briefly described the evaluation criteria and their weighting. Mr. Martin asked whether non-consideration of cost in the evaluation is because the assumption of the evaluators was that the best alternative would be selected for the \$31 Million. Mr. Wierzbicki responded in the affirmative, further stating that all alternatives can be completed for that amount.

Mr. Wierzbicki discussed the benefits and risk of each type of well, each type of tunnel, and submersible versus above-grade pump stations. The analysis conducted by JJ&G and staff concluded two alternatives were available: Alternative A, a pipeline conveyance option with radial collector wells and multiple below-grade pumping stations with submersible pumps, or Alternative B, a tunnel conveyance option with radial collector wells and a single above-grade pumping station on LWC property. Mr. Wierzbicki discussed the analysis of these two options. This additional analysis led to the development of an additional alternative, which is to modify Alternative B by extending the conveyance tunnel to the existing low lift pumping station (LLPS), convert the tunnel shaft to a pump station, house the electrical equipment in the LLPS, and consider using a siphon between the tunnel shaft and LLPS during non-peak flows to eliminate pumping. This Alternative C would produce 46.7 MGD and cost \$27.8 Million. Alternative A would produce 57.2 MGD and cost \$18.5 Million. Alternative B would also produce 57.2 MGD, but would cost \$29 Million. Mr. Wierzbicki recommended Alternative C because it is easier to operate and maintain, it re-uses existing assets, the tunnel spoils can be handled on LWC property, it uses familiar radial collector well technology, it is safer and more secure, and it allows for future expandability of the RBF system. Mr. Wierzbicki also discussed other considerations the Board should make to improve and lower the cost of the project.

Mr. Conner inquired regarding the difference between Alternative A & C. Mr. Wierzbicki stated the 2 main differences are aesthetics (below grade facilities) and submersible pumps, which are different and costly to maintain. Mr. Huber stated the extra \$9 Million allows us to manage the risks better, specifically the flood risk. Mr. Huber believes Alternative C also provides more reliability. Mr. Conner asked how much of the additional \$9 Million is aesthetics. Mr. Wierzbicki stated it is about one-half of the additional cost. Mr. Huber stated flooding is a serious concern because if you have equipment that is flooded, you cannot reach the pumps for maintenance. Ms. Welsh wondered whether the 1937 flood is the correct measurement. Ms. Ball stated it is the best measurement according to the Army Corp of Engineers. Mr. Huber noted current flood and drainage standards would lessen the impact of a flood event equivalent to the 1937 flood. Dr. Wise questioned whether there is redundancy built into the equipment. Mr. Wierzbicki responded there is but it depends on what and how much you want to make redundant. We could have redundancy on each pump station at our cost.

Regarding aesthetics, Dr. Wise asked to whom we are trying to provide comfort regarding aesthetics. Kay Ball advised it is mainly Transylvania Beach and Mayfair Avenue residences. Mr. Wierzbicki stated a premium is being paid for aesthetics. Dr. Wise asked whether it could be bid in different ways in case the bids for Alternative C were too high. Mr. Huber commented that we may want to consider above grade pumping stations. Mr. Heitzman stated we have made commitments to residents in the area for below grade facilities. He agreed we are paying a premium for aesthetics but stressed the cost is also due to our need for reliability and operational maximization. Mr. Heitzman fears bidding it both ways will increase costs and/or discourage potential bidders because those who can bid pipeline work may not be able to bid tunnel work.

Mr. Conner asked what the next step would be if the ground below is found to be gassy. Mr. Huber stated we would have to stop and consider the other alternatives. We will bore approximately every two-hundred feet. It is classified as gassy because JJ&G had conducted borings down the road about 1500 feet away and found gas at a very low point, much lower than we will tunnel. Even with borings, if we find nothing, it will be classified as potentially gassy so it will be monitored for gas but it will be more unlikely. If the contractor finds gas, it could be a change action to vent gas, have non-explodeable equipment, and take other precautions, even though contractors have been put on notice of the potential. Mr. Heitzman said the determination of the presence of gas is a critical path item before we proceed to final design. Ms. Welsh noted it is possible we could proceed with final design after determining no gas exists and then find gas. She asked whether that would require a change action. Mr. Heitzman stated the bid documents can be drafted with either party assuming the risk. However, if we set it up to have the

contractor assume the risk of gas, then the contractor will add it into their bid price and will get a windfall if they never encounter gas. Mr. Wierzbicki believes the finding of gas will add \$5.5 Million to the project.

Mr. Martin commented that for \$9 Million more we actually get less capacity. Mr. Haas stated this is because we do not currently have ability to run horizontal laterals under properties along the river not owned by LWC. Mr. Heitzman stated these are near the East End Bridge path, and there may be an opportunity to acquire easements in which to place these lines in the future once the bridge construction begins.

Mr. Johnstone asked what is visible on Alternative C. Mr. Heitzman said everything would be below grade. Mr. Conner asked what makes up the additional to get to the total project cost of \$31 Million. Mr. Wierzbicki said the additional \$10 Million includes the cost escalation contingency, aesthetics, and operability and maintainability enhancements. Mr. Conner expressed concern that the additional cost is at least half way driven by aesthetics or having all facilities underground. Mr. Johnstone stated we could have a less costly solution if we could get residents and River Fields to agree to continue the current method with the above ground collection wells like we have now. However, this would be difficult. Mr. Conner stated this is not a legal issue; it is a political one. River Fields is interested in protecting the area's aesthetics.

Mr. Heitzman reviewed the proposed budget compared to the existing budget. Staff recommends proceeding with design and bid of a 6,000' Hard Rock Tunnel with horizontal collector wells. It will be bid in August 2006, contract awarded September 2006, and completed in 2009. He also recommends increasing the JJ&G contract by \$5,704,300, with a total revised budget of \$40,824,800. Mr. Conner asked if we were already considering the premium for aesthetics when we considered the first project. Mr. Heitzman confirmed we had. Mr. Martin commented that there appears to be less moving parts in the Hard Rock Tunnel proposal, which would equate to less maintenance and less cost. Mr. Huber confirmed that is correct. Mr. Martin also noted there is a longer life asset with the tunnel, which also provides lower annual depreciation expense and higher net income to LWC. Dr. Wise stated he would prefer deferring the issue of project selection until a determination is made regarding whether the tunnel is gaseous. Mr. Heitzman amended his recommendation to request authority to increase the JJ&G existing contract by \$515,000 to increase Task I, preliminary engineering and subsurface investigations, to \$1,248,700 for a total revised contract of \$3,838,300 to allow additional subsurface investigation. Dr. Wise made the motion as recommended, Ms. Welsh seconded, and the motion carried.

2005 Annual Inspection Report Given

In order to fulfill Bond Covenants set forth in the Series 1992 Bonds, LWC is obligated to have an annual inspection conducted by an independent Consulting Engineer. Black & Veatch performed an inspection and review of the water supply and treatment facilities and the financial management and rates system. The Louisville Water Company engaged Insurance Audit and Inspection Company to perform the insurance review and LWC staff were interviewed. Black & Veatch concluded that the water supply and treatment facilities and associated equipment have been maintained in good repair and sound operating condition and are capable of continuously supplying water to the Company's customers. Black & Veatch also found LWC is making commendable progress in funding, scheduling and implementing capital projects and correcting deficiencies raised in previous Annual Inspections but should correct high priority items as soon as possible. The audit inspected 17 facilities at 7 locations and noted 19 High Priority items, 51 Medium Priority items and 20 Low Priority items to be addressed.

Larry Gaddis of Black and Veatch highlighted the High Priority Recommendations from the audit. In general, Black & Veatch recommends LWC:

Board of Water Works
Regular Minutes September 20, 2005
Page 5 of 13

- Perform an audit of the electrical system one-line diagrams to ensure these drawings reflect the current status of such systems and update and revise our drawings as appropriate;
- Perform an audit of the facility power system data contained in the most recent documented power system short circuit analysis and protective device coordination studies and perform new power system studies if information is outdated or incomplete; and
- Have a plan to transfer of this institutional knowledge that may be lost through retirement or attrition since it represents significant value for system operations and maintenance.

With regard to the Zorn Avenue River Screen Structure, Mr. Gaddis stated screening equipment and portions of the screen tower support structure are clearly beyond their useful service life and should be replaced and the access to lower levels should be improved. In terms of the Zorn Avenue Raw Water Pump Stations, Mr. Gaddis recommended evaluating the reliability of Pump Station #2 by assessing the pump station's structural, electrical and mechanical systems and consider modifications to the suction and discharge valves and piping on Pump Station #6 to simplify the flow pattern and improve accuracy of the flow meter. In reviewing the condition of the Crescent Hill Filter Plant, Mr. Gaddis stated several factors hinder efficient operations of the filters and LWC should evaluate the filter hydraulics and improve flow distribution to South filters, upgrade East and New East filters to increase filtration capacity, consider retiring the North filters, and design a new filter backwashing system that is more efficient and incorporates a filter to waste capability. Mr. Gaddis advised the audit found the 84" gate valve in the finished water clear well broken open and in need of repair due to the fact that 4 of the 7 high service pumps take suction through this gate valve. He noted LWC has a Fall/Winter project in place for repair of the valve operator and that the work must be coordinated with periods of low water demand.

Regarding LWC insurance, Mr. Gaddis noted LWC was able to obtain increased limits at a premium lower than that of the previous year's policy due to increased competition in the market. Some changes in our insurance were recommended, specifically having a 90-day (rather than the state minimum of 75-day) notice requirement in the event of cancellation, non-renewal, or material change, and requiring as broad additional insured status as available when contracting with other entities.

Regarding the financial management, rates and charges review, Mr. Gaddis stated LWC operates in a sound financial manner. He recommended LWC evaluate an alternative basis for rate of return, develop a more robust performance management tool, incorporate comprehensive financial planning into the rate making process, monitor trends in quality of service and customer satisfaction, provide annual funding for the Infrastructure Replacement Reserve Fund, and assess current policies and procedures for effectiveness and appropriateness with the new governance model the Board has adopted recently.

Mr. Conner noted the Audit Committee is the recipient of the status reports on these recommendations on a quarterly basis. Mr. Martin inquired whether Black & Veatch's recommendation on the Infrastructure Replacement Reserve is a general recommendation or takes into consideration the lack of funding to that reserve in the past two years. Mr. Gaddis stated it considers the lack of funding during the past two years. Mr. Miller noted the report will be filed with the Bond Trustees.

Mayor Jerry Abramson Addressed Board Regarding Upcoming Strategic Planning Meeting

Mayor Abramson began his comments by thanking all Board members for their commitment to the Board on behalf of the citizens of Metro Government and customers of the Louisville Water Company. He stated their contribution is vital to the community.

As we consider future opportunities, Mayor Abramson believes the merged Metro Government may present new opportunities for government departments, agencies, and utilities to work together to glean Board of Water Works

Regular Minutes September 20, 2005

Page 6 of 13

further efficiencies. For instance, there may be efficiencies of scale for procurement of fuel and fleet vehicles. Combined activities for fleet maintenance might create certain efficiencies, and there are numerous other possibilities.

Mayor Abramson discussed the unique structure and ownership of the Louisville Water Company. When there was discussion of the local electric utility being sold by its parent company, the Louisville Water Company was a natural choice for ownership if the utility was to be sold. This unique structure and ownership has created opportunities in the past and may present other opportunities in the future.

Mayor Abramson referred to the depth and breadth of experience among the board members and is looking forward to "out of the box" thinking at the strategic planning retreat next week. The Mayor encouraged the board to work through the process to create new ideas, not simply relying upon how things have been done in the past.

Mayor Abramson firmly stated the most important objective for LWC is to continually produce safe, high quality water, but the dividend is important to the city and should be considered a key objective.

Mayor Abramson has been an active member and leader of the National Conference of Mayors. The organization has information on how various cities provide services and tactics they have pursued to increase efficiency. Mayor Abramson offered to provide access to this information as the strategic plan is developed and possible tactics are evaluated.

Mr. Martin referred to the position of the city as the shareholder of the Louisville Water Company. He inquired how the Mayor thought net income should be disbursed when the Company's earning performance exceeds expectations. The Mayor again affirmed that safety and quality of the product along with maintaining the system should come first. In the event earnings exceed the budgeted expectation, The Mayor is interested in maximizing the dividend within constraints of the dividend formula. When the dividend exceeds the amount budgeted, Metro Government uses it for one-time capital expenditures.

In closing, Mayor Abramson reiterated he would like the Board to look for synergy to create efficiencies among Metro Government departments, agencies, and utilities. Ms. Welsh questioned if the Mayor was comfortable with expansion into adjacent areas. Mayor Abramson replied Metro Government is comfortable with expansion so long as the Company is requested to move into a new arena and the expansion is mutually beneficial. On behalf of the board and the staff, Mr. Conner thanked the Mayor for the discussion and advised we are looking forward to discussing the outcome of our strategic planning retreat next week with the Mayor.

2005 Financial Results Forecasted

Mr. Miller advised three issues significantly affect the financial results for 2005: water sales are forecast to be \$3.6 million higher than expected due to infrequent occasions of rainfall during the irrigation season; interest expenses are forecast to be \$1.3 million lower than expected due to the deferred borrowing following the deferral of the Payne Plant Advanced Treatment Technology Project; and operation and maintenance expenses are forecast to be \$0.6 million lower than budgeted because there have not been any large unexpected expenses requiring funding from the budget contingency. As a result, the net income forecast for 2005 is \$5.5 million more than budgeted. The dividend forecast for 2005 is \$3.5 million more than budgeted. This forecast assumes normal sales and expenses patterns for the remainder of the year. Mr. Huber commented that interest on bonds we anticipated selling never materialized, since the question remains whether we should use the additional revenue or a portion thereof for funding to the Infrastructure Replacement Reserve or whether it should simply go to the bottom line and be figured into the dividend calculation. This is a determination yet to be made.

Types and Purposes of Financial Reserves Discussed

Mr. Miller stated LWC has several types of financial reserves where funds are segregated for specified uses. The first are Bond Covenant Restricted Reserves. These reserves are currently governed by covenants contained in the Master Bond Resolution. The purpose of the Bond Covenant Restricted Reserves is to provide controls for the disbursement of funds for capital projects described in the Bond Issue Official Statement and for the deposit of funds for repayment of the bonds.

Distribution System Extension and Improvement Reserves are governed by policy of the Board of Water Works. The purpose of these reserves is to provide controls for the disbursement of fees collected from customers for the construction of specific types of distribution system extensions and improvements.

The Acquired System Rate Differential Reserves are governed by policy of the Board of Water Works in consideration of the views expressed by Advisory Boards for acquired systems. Upon the acquisition of an existing water system, the Board of Water Works typically commits to hold the water rates constant at the current level for the acquired system until such time as the "rate differential" collected would be equal to the cost of the system acquisition plus any improvements needed to raise the acquired system's distribution system to LWC construction standards. The rate differential is computed as the cumulative difference between the revenues collected at the acquired system rates and the revenues that would have been collected at the existing LWC rates. The purpose of these reserves is to provide controls for the deposit of the rate differential and for the disbursement of those funds for construction of specific capital projects in the service area of the acquired system.

The Infrastructure Replacement Reserve is governed by policy of the Board of Water Works. The purpose of this reserve is to provide supplemental funding for infrastructure renewal projects.

There is one Louisville Water Company fund not covered by the restrictions described above – the U.S. Treasury SLG Fund. It represents the amount of funds that were no longer required from the Series 1986A and 1986B Bond Reserves following the refinancing of those bonds in 1992. These funds are illiquid, though, invested in U.S. Treasury SLG securities maturing in 2013.

Risk Mitigation and Rate Stabilization Reserve Discussed

Mr. Miller discussed additional developments surrounding a Risk Mitigation and Rate Stabilization Reserve. In September 2004, staff proposed the Risk Mitigation / Rate Stabilization Reserve as the preferred mechanism to provide funding to offset the effect of year-to-year swings in revenues and expenses and to provide for stabilization of future water rate changes. After consideration of this matter with the Financial Advisor and Bond Counsel, staff has determined that the objectives identified at that time might better be accomplished through another alternative, i.e., by use of Statement of Financial Accounting Standards No. 71: Accounting for the Effects of Certain Types of Regulations as an additional alternative for consideration. Staff intends to review this accounting standard with the external auditors and the Audit Committee prior to bringing a recommendation to the Board of Water Works.

Last year several factors were identified that have increased the variability of our financial performance, specifically higher self-insured retention levels for liability claims, sudden increases in security costs when terror alert level rises, write-off of undepreciated value of infrastructure assets, and debt service costs associated with large long-term borrowings. Because of uncertainties surrounding the size and timing of expenses associated with these factors, it has not been considered prudent to incorporate these items at full amounts in each year in which they might occur. Instead, staff has budgeted for normal expected levels of activities plus an overall contingency amount. Staff considered several alternatives for financing these factors, including increasing the contingency portion of the Operations and Maintenance

Budget, increasing the discretionary component of the Infrastructure Replacement Reserve, budgeting water sales at a more conservative level, or creating a Risk Mitigation / Rate Stabilization Reserve. Staff previously recommended a Risk Mitigation/Rate Stabilization Reserve, but factors have developed which leads staff to change this recommendation.

Staff evaluated several funding sources for creating this reserve. At that time, it appeared that the most expeditious method would be from existing cash reserves. However, after reviewing this matter with Bond Counsel (Spencer Harper of Ogden, Newel & Welch), it was determined that the reserve could not be established without adverse impact on bondholders only through deferred dividend payments. Also, the creation of the reserve would require a complex change to the dividend covenant in the bond issue that would have the unintended effect of making the dividend calculation less transparent. We could set up the reserve using bond proceeds from an upcoming bond issue or refinancing.

As a result, staff reviewed these risk and rate issues and alternatives with the Financial Advisor, Public Financial Management (PFM). PFM has provided information on Statement of Financial Accounting Standards No. 71: Accounting for the Effects of Certain Types of Regulations used by several clients to accomplish the same intentions. SFAS No. 71 provides guidance in preparing general purpose financial statements for most public utilities. In general, the type of regulation covered by this statement permits rates to be set at levels intended to recover the estimated costs of providing regulated services or products, including the cost of capital (interest costs and a provision for earnings on shareholders' investments). For a number of reasons, revenues intended to cover some costs are provided either before or after the costs are incurred.

If a regulatory authority provides assurance that incurred costs will be recovered in the future, this Statement requires companies to capitalize those costs as regulatory assets to be included in the ratemaking process and recovered in future periods. If current recovery is provided for costs that are expected to be incurred in the future, this Statement requires companies to recognize those current receipts as liabilities to be included in the ratemaking process and recognized as revenues in future periods. This Statement is widely used by investor-owned gas and electric utilities, but has not been widely adopted by municipally-owned water utilities.

The expected advantage from this Statement is the ability for accounting treatment of expenses to more closely match the timing of the recovery of those expenses through rates. This would be based on Board of Water Works authorization for recovery through rates of certain costs in years other than in which they occur. This would require specific Board action on each occasion when this Statement is invoked. The likely disadvantages from this Statement are from the introduction of Regulatory-Prescribed Accounting into statements that have previously used only Generally Accepted Accounting Principles and from the potential "stack-up" future rate increases resulting from the deferral of current expenses into future years.

Mr. Miller advised regulated utilities commonly use this accounting treatment. He recommends if we decide to use it at all that we use it sparingly. Mr. Conner asked if LWC can use this since we are not regulated. Mr. Miller responded that the Board of Water Works is the regulating entity for purposes of this Statement. The external auditor would have to certify that use of this Statement is appropriate. Mr. Martin asked whether this would affect the dividend, and Mr. Miller stated it would affect net income in the current year adopted because it moves expenses to future years. Staff intends to review this accounting standard with the external auditors (Strothman and Company) and the Audit Committee prior to bringing a recommendation to the Board of Water Works.

Budget Increased and Authorization Given to Proceed with Final Design and Bidding for Project 00407: Long Run/Aiken Road Elevated Water Tank

Mr. Heitzman provided an overview of the project to construct a one million gallon elevated water storage tank operating within the 900 pressure zone to serve growth in eastern Jefferson County. This new tank will replace an existing 850,000 gallon ground storage tank at Long Run Park to improve system pressure and fire flow to this portion of the service area. The project includes engineering, consultant services, property acquisition, tank construction, and associated site work. The location of this tank was moved approximately one mile as a result of radio frequency (RF) problems that would likely result with the WHAS-AM radio broadcast tower. Tank Industry Consultants, Inc. (TIC) has been retained to provide design services on this project and develop a project cost estimate. The recommended budget is \$2,965,000, which does not include any increase that may result from the impact of Hurricane Katrina in the Gulf area. The increase of \$1.3 million is due to the current construction premium for elevated storage tanks (\$800,000); engineering design and RF analysis (\$140,000); property acquisition (\$225,000); and a project contingency of five percent (\$150,000). The property acquired is 11 acres and has the potential for being partially surplus or used for an additional LWC purpose. Staff has considered whether another option other than a tank solution could address the pressure and fire flow issues in this area, but believes an elevated storage tank is the correct solution in this situation. Dr. Wise inquired how materials increases affect project management cost. Mr. Heitzman responded that it does not directly affect project management costs, but if material prices are significantly too high, it may drive alternative design work, which does increase project management costs. Mr. Martin moved to increase the budget of Project 00407: Long Run Elevated Water Tank from \$1,650,000 to \$2,965,000, and to proceed with final design and advertisement for bid for the project. Dr. Wise seconded, and the motion carried. The bids for the project will be presented to the Board for approval and award of contract.

Budget Increased and Authorization Given to Proceed with Bid for Combined Project 10233: Renovate B. E. Payne Coagulation, Softening and Chemical Feed Systems, and Authorization Given to Establish Budget and Proceed with Final Design and Bid for new project to Renovate North Filters at the Crescent Hill Treatment Plant

Mr. Heitzman, the Board authorized staff in February 2005 to proceed to renovate the coagulation, softening, and chemical feed systems at B. E. Payne Water Treatment Plant (BEP) with a budget allocation of \$12.4 million. The consulting engineer, O'Brien and Gere, completed their 95 percent design review, and staff recommends several additions to the project scope and budget and the implementation of extensive coordination efforts with concurrent projects at both Crescent Hill Treatment Plant and Zorn Pumping Station. The comprehensive project at BEP includes renovation of the coagulation and softening systems and installation of new chemical feed systems for the first time since the plant went into service nearly 30 years ago (1977). Upgrading these systems also prepares the treatment plant to accommodate riverbank source water, which will require softening to reduce calcium concentrations. During the final design phase, several scope additions have been identified and recommended, including:

- installation of a second electrical feed for the mixing equipment
- replacement of the control valves in the coagulation and softening basins
- increasing the carbon dioxide storage capacity from 9 days to 20 days
- revising the project schedule from 30 months to 36 months to accommodate other major projects at Crescent Hill and Zorn
- increasing construction administration resources for the extended project schedule

The revised schedule will assure a minimum 205 MGD system capacity during peak demand periods and a 180 MGD capacity during slack demand periods. The peak day of record occurred in June 2005 at

204.5 MGD. Review of the BEP project schedule and coordination with other on going plant projects revealed a significant vulnerability of total system capacity during construction. In order to assure reliable system capacity of 205 MGD during peak demand periods, the contractor would be limited to construction from October to April. The limited construction window would further increase contract costs by an estimated \$600,000 and extend the construction period from 36 months to 52 months.

Staff has identified an alternative to keep the total construction time to 36 months. This can be achieved by replacing the media in six filters at CHFP, which will provide a reliable 20 MGD supply during the summer peak demand period. The expanded construction window would eliminate the need to extend construction into a fourth year. The CHFP North Filters were constructed in 1909. The filter media – consisting of gravel, sand, and anthracite – was last replaced in 1970. This filter gallery is maintained for peak summer demand periods, as reserve capacity. Currently, five of these filters have been removed from service due to their inability to meet water quality goals for turbidity and particle removal, which has hindered the reserve capacity. The replacement of the media in six of the 12 filters will also prepare for future filter work planned at Crescent Hill over the next 5 years. The recommended project budget to replace the media is \$360,000, yielding a cost savings for the BEP coagulation project of \$240,000. Dr. Wise inquired whether we will increase daily production by 20MGD. Mr. Heitzman stated the project will provide additional capacity for peak demand.

Dr. Wise moved to increase the budget for the B. E. Payne Coagulation and Softening Systems Renovation from \$12,403,768 to \$14,300,000 and proceed to advertisement for bid and to proceed with engineering design and advertisement for bid for an unbudgeted capital project in the amount of \$360,000 to renovate North Filters at the Crescent Hill Treatment Plant. Ms. Welsh seconded, and the motion carried.

Resolution Adopted to Issue Apportionment Warrants pursuant to KRS 96.265 for Bearcamp Road: Existing Water Main to the County Line

Ms. Karla Teasley advised the Board a public hearing was held October 4, 2001 for the extension of water service along Bearcamp Road: Existing Water Main to the County Line. The Board of Water Works adopted a resolution for Bearcamp Road: Existing Water Main to the County Line on November 13, 2001 recommending the proposed water service extension to Jefferson County Fiscal Court for final approval and passage of an ordinance. Subsequently, Fiscal Court approved Ordinance No. 1, Series 2002 on January 8, 2002 (a copy of which is attached) for the Bearcamp Road: Existing Water Main to the County Line project. The construction contract was awarded to Tom Brown Construction Company.

With the completion of this public water main extension the Board of Water Works is required to issue Apportionment Warrants against the properties assessed in accordance with KRS 96.265. In accordance with the recommendations of the Task Force Report the cost of the extension will be by the equal assessment method for the cost of \$5,450 for each lot or tract abutting this extension and currently not served. Apportionment warrants will be assessed against 29 properties. Ms. Welsh moved to adopt the following resolution for the issuance of Apportionment Warrants and liens against 29 benefited properties along Bearcamp Road: Existing Water Main to the County Line in accordance with KRS. 96.265:

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of **Bearcamp Road: Existing Water Main to the County Line** main extension project authorized by Ordinance No. 1, Series 2002 of the Jefferson Fiscal Court, adopted on January 8, 2002 such warrants to be against twenty nine (29) benefited properties identified by present ownership and official records set forth on Exhibit A, attached,

each apportionment warrant to be in the principal sum of \$5,450 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Ms. Willis seconded, and the motion carried.

Authorization Given to Award Contract, Increase Engineering Services Contract and Increase Total Project Budget for Jackie Way Main Replacement Project

Ms. Teasley advised the Board needed to consider this project change action because, pursuant to Board policy, it exceeded \$250,000 and therefore is under the authority of the Board. Bids were received and opened on July 13, 2005 for the Jackie Way Area Main Replacement Project. The Project Manager recommended award of a combined bid (Base and Alternate) to Southern Pipeline for a total contract amount of \$1,159,000. This amount is \$352,000 (44%) in excess of the original estimate of the contractor cost, but only \$68,320 (6%) in excess of the estimate prepared immediately before bids (\$1,090,680).

The original project included the replacement of under-sized asbestos-cement (AC) pipe and PVC main along Jackie Way and other streets in the subdivision on the southeast corner of Highway 44 and I-65. To facilitate design of the project and to develop a "best practices" guide for the disposal and/or abandonment of AC pipe, the services of an engineering consultant (QK4) were enlisted. Based on research performed by the consultant and meetings with the Risk, Legal, Operations, and Safety areas at LWC, the scope of the project was later modified to include the removal and disposal of the existing AC mains.

The Consultant Cost was originally estimated to be \$55,000. During design and development of the project plans and specifications and research into "best practices", some additional work items were assigned to the consultant – creation of nine easement plats for the grid-ties, design of 2,700 feet of additional pipeline, design of a drainage structure impacted by the main installation, further investigation and research into the disposal of AC pipe, and separation of the bid documents into a base bid and an alternate bid. The cost for these additional work items has increased the primary engineering design contract to \$69,200

During construction of this project several methods of removal of the AC pipe will be piloted - auger reaming, pulling, and excavation - to determine which is the most economical and efficient method. Proper disposal of the pipe will be handled by National Environmental Contracting (NEC) acting as a sub-consultant to QK4 Engineers. NEC will also provide air monitoring during removal of the AC pipe, sampling and testing of the excavated soil and guidance to LWC and the Contractor regarding proper techniques for excavation and handling of the AC pipe on this and future projects involving AC mains. While it is anticipated that on future projects these sub-consultant services will be provided by an environmental consultant attached to the Contractor, it is felt that during this "pilot" project LWC should exercise more control over these items of work. The estimated cost for the sub-consultant services is \$104,875 including \$89,875 (\$5/foot for pipe disposal) and \$15,000 for other on-site engineering services (expertise, sampling and testing).

As a result of the bid prices, increased involvement of the Consultant, and significant involvement by a Sub-Consultant, the total project cost has increased by \$401,900 (35.3%) to \$1,539,075. The resulting unit price is \$78.48/linear foot. Disposal of the AC pipe, the cost of temporary by-pass for lay-in-place

construction, and the additional on-site sampling and testing has added \$5 to \$10 per foot to the cost of the project.

Mr. Martin moved to authorize the Vice President of Serving Customers and Business Development to award a contract in the amount of \$1,159,000 to Southern Pipeline, increase the Engineering Services contract with QK4 to \$174,075 (\$69,200 Consultant, \$104,875 Sub-Consultant), increase the total project budget to \$1,539,075, and proceed with construction of this project. Ms. Willis seconded, and the motion carried.

BOWW Meeting for October 2005 Rescheduled

Due to scheduling conflicts, it was the general consensus of the Directors to move the October regular meeting to October 18, 2005 at 12:30 p.m. This will be a special-called board meeting.

Executive Session Conducted

The Board went into Executive Session without management present at 3:40 p.m.

There being no further business, the meeting was adjourned at 3:50 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
SPECIAL-CALLED MEETING MINUTES
OCTOBER 18, 2005**

Board Members Present:

Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson
Mr. Stewart Conner, Chair

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Vice President, Operations and Chief Engineer
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources and Controller
Mr. Jim Smith, Business System Owner, Infrastructure Planning
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

The special-called meeting of the Board of Water Works, to consider the items on the agenda for the cancelled October 11th meeting, was held on Tuesday, October 18, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Vice-Chairperson Wendy Welsh called the meeting to order at 12:35 p.m.

Minutes from the Previous Meeting Reviewed and Approved

After discussion, Dr. Joseph Wise moved to approve the minutes from the Regular Meeting held September 20, 2005 with changes to the draft minutes as follows:

- Adding Mr. Greg Heitzman as an attendee;
- Changing the time at which the meeting was called to order to 12:32 p.m.;
- Adding the following sentence as the third sentence to the second full paragraph on page 3: "Mr. Martin requested the Board await the results of the PFM report before setting the return rates and other financial objectives for 2006 in the Long Range Plan;"
- Deleting the words "worth to us" and adding "lower annual depreciation expense and higher net income to LWC" in the third full paragraph on page 5;
- Deleting the period at then end of the sentence in the third full paragraph on page 7 and adding the word "but" before "the dividend";
- Deleting the words "controls for the distribution of fees collected from customers for the construction of specific types of distribution system extension and improvements" and add "supplemental funding for infrastructure renewal projects" in the fourth full paragraph on page 8.
- Adding the word "not" before "be established" in the second full paragraph on page 9 and adding an additional sentence in that paragraph stating as follows: "We could set up the reserve using bond proceeds from an upcoming bond issue or refinancing."

Mr. Gerald Martin seconded the motion and it carried. Dr. Wise moved to approve the proposed minutes from the special-called meeting held September 27, 2005, Ms. Margaret Harris seconded, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber discussed the key points agreed to by the Board at the Strategic Planning retreat held on September 27th. Specifically, the Board wishes to explore regional expansion in an area approximately 75 miles around Louisville, to explore horizontal and vertical integration as a means for growth, to seek synergies with other agencies for efficiency, and to become a force for economic development. Each one of these items will have a team address it. The teams will be led by staff members Greg Heitzman, Karla Teasley, Bob Miller and Ed Chestnut. Mr. Huber suggested a different board member serve on each team as a liaison to facilitate effective communication of the progress of the teams to the rest of the Board. The goal is to have the work completed by the teams by mid-year 2006 and update the strategic plan for 2007-2011.

Financial Report Given

Mr. Miller provided the financial report for September. YTD Operating Revenues of \$85,636,171 are \$3,982,601 or 4.9% more than budgeted and \$9,336,027 or 12.2% more than 2004. YTD Operation and Maintenance Expenses of \$34,014,404 are \$481,607 or 1.4% less than budgeted and \$2,057,653 or 6.4% more than 2004. YTD Total Operating Expenses of \$55,646,351 is \$4,233 more than budgeted and \$3,902,034 or 7.5% more than 2004. YTD Net Operating Income or \$29,989,820 is \$3,978,368 or 15.3% more than budgeted and \$5,433,994 or 22.1% more than 2004. YTD Total Net Non-Operating Expense of \$2,461,679 is \$1,294,971 or 34.5% less than budgeted and \$1,523,291 or 38.2% less than 2004. YTD Net Income of \$27,528,141 is \$5,273,340 or 23.7% more than budgeted and \$6,957,285 or 33.8% more than 2004. Capital Expenditures through September were \$43,304,173 or 47.51% of the 2005 Capital Budget of \$91,148,054.

Mr. Huber noted we want to discuss how to deal with the interest we would have paid had we not deferred the borrowing we originally planned. This amounts to approximately \$1 Million. Dr. Wise inquired whether these are actual dollars as opposed to just an accounting treatment. Mr. Miller confirmed these are actual dollars.

Operations Report Provided

Mr. Heitzman reported the average production rate in September this year, which was 137.4 MGD, was 5.3 percent lower than the September 2004 production of 145.1 MGD. September 2004 was typified with dry weather conditions, compared to September 2005. Due to higher than normal productions from June to August, the 2005 year to date production of 133.7 MGD is 4.7 percent and 2.0 percent higher than 2004 and the five year average production, respectively.

Serving Customers Report Given

Ms. Karla Teasley advised the September abandonment rate was 5.3% compared to 11.5% in August 2005, and 3.9% in September 2004. Bad debt for the month was \$60,577 compared to \$62,840 in August 2005, and \$55,842 in September 2004. Bad debt is \$18,660 over budget for the month and \$98,271 over budget year to date. Mr. Martin inquired about the amount of bad debt. Ms. Teasley advised this will be mitigated to a degree by the newly implemented service deposit. Dr. Wise asked whether this applies to long term, good customers, and Mrs. Teasley advised it applies to any customer applying for water

service with a history of bad debt, so neither existing customers nor customers re-applying who have paid their bills timely are required to pay it.

Ms. Teasley reported customer satisfaction dropped for the third quarter from a second quarter Total Customer Satisfaction Index (CSI) of 856 to 842. This drop occurred in the areas of perception of customer service, information, reliability and price/value. Water quality remained stable from the second to the third quarter. Residential service is the only segment of the index that increased during the third quarter. The year-to-date average for the Total CSI is 850, which meets the corporate Level II goal (850). Customer satisfaction for the Service CSI increased to 806 which was the previous high for the service index reached in the 3rd quarter of 2004. The year-to-date average of 803 exceeds the Level III goal for customer satisfaction for the Corporate Performance Award (800). Satisfaction of residential customers increased for water quality, information and price/value and the residential service index score reached a new high of 814. Ms. Welsh noted there was a drop in December last year and asked if this is typical for December. Ms. Teasley responded it is not necessarily common and it could be related to the rate increase that was upcoming in January because the new rates had been reported by the media before December. It could also be associated with higher main breaks

Closed Session Held

Ms. Marita Willis moved to go into Closed Session to discuss Property, Litigation and Personnel matters pursuant to KRS 61.810(1) sections (b), (c) and (f) respectively at 1:10 p.m. Dr. Wise seconded, and the motion carried.

Open Session Resumed

Mr. Martin moved to return to Open Session at 1:54 p.m., seconded by Dr. Wise and the motion carried. There was no action coming out of closed session.

Compensation Committee Report Given

Ms. Welsh provided the Board with a summary of the discussions at the last Compensation Committee meeting held August 15, 2005. Ms. Welsh advised the Committee had been updated on the status of the goals for the Corporate Performance Award and the Executive Incentive Plan. The Company is meeting all goals for the Corporate Performance Award.

With regard to the ELT Shared Goals, Ms. Welsh advised we are meeting the goal related to the Capital plan and revenue, but the Committee considered a recommendation by Mr. Huber to modify the goal relating to the Riverbank Filtration Program as a result of the unusually high bids received on that project. The Board was comfortable with modifying that goal to require a report to the Board of the ATT Steering Group's evaluation of the various alternatives for Phase III by October. The metered water ratio improvements goal is being met and Human Resources is evaluating information to determine if the performance evaluation goal is being met. The Executive Incentive Plan goals are being met with the exception of one part of the water quality goal on individual filter turbidity, which was not met in a previous quarter

Ms. Welsh advised the Committee also discussed salary and benefits for 2006 and the issues the company is facing with rising costs. Mr. Huber advised we are providing benefits at the 75% of the market. Mr. Martin asked whether there would be any follow-up by staff on this, and Mr. Huber advised staff could provide some additional information, but had not been asked for a specific action by the Committee. Dr. Wise pointed out some benefits are determined due to participation in the County Employee Retirement System. Mr. Huber agreed, but noted that many other benefits are negotiable. The Committee also

received an update of the status of the labor agreement negotiations and the new Talent Resource Planning initiative.

Audit Committee Report Given

Ms. Welsh provided a summary of the discussions from the last Audit Committee meeting held on September 16, 2005. She advised the Committee met with Bill Meyer with Strothman & Company CPAs, which we have contracted with to perform outside auditing services and the Committee discussed the issue of Sarbanes-Oxley compliance with him. She conveyed Mr. Meyer's belief that LWC already exceeds the level of internal controls you usually see in government agencies. Mr. Meyer had stated, and the Committee agreed, it would require a tremendous dedication of human and financial resources to obtain the Sarbanes-Oxley certification of internal controls, and LWC could certainly adequately review and test its internal controls without completing the full certification process.

Ms. Welsh advised the Committee received the Annual Inventory Report. The Company is continuing to evaluate the issue of whether to operate a warehouse.

Ms. Welsh stated we have obtained an outside review of our IT general controls. She stated the number one priority is having adequate controls for Disaster Planning and Recovery. A main component of this control is having a person dedicated as the Information Security Officer. She felt this is the most difficult and costly activity to implement out of the audit findings. The other items are being adequately addressed by IT. She reported IT has suggested an audit plan schedule that appears to be reasonable.

Ms. Welsh summarized the outstanding issues from previous audits.

Preliminary 2006 Budget Discussed

Mr. Miller provided an overview of the Preliminary Budget and Financial Plan. The Budget is a static document and remains unchanged during the year, whereas the Financial Plan is a more dynamic document and will be updated throughout the year.

The 2006 Capital Budget is \$73.1 million, and the 2006 Operating Budget is \$117.5 million. The Preliminary Long Range Financial Plan includes the 2006-2015 Proforma Income Statement, the 2006-2015 CIP Funding and Debt Plan, and the 2006-2015 Capital Expenditures Plan. Mr. Miller advised that at this time staff is requesting permission to file the Preliminary Annual Budget and Long Range Financial Plan with Metro Government and Trustee.

Mr. Miller provided some background to the Board regarding how the Budgets and Financial Plan are developed. The Capital Budget is developed based on 2002-2021 Facilities Plan and 2005 Annual Inspection Report, and it contains all construction or acquisition projects having an expected useful life of more than one year. Most of these elements are one-time construction items, and the remainder are recurring equipment replacement purchases, such as fleet, tools, and information technology. Mr. Jim Smith and Ms. Teasley work with project managers to identify project requirements and realistic cash flows and construction schedules. The Capital Budget is reviewed by the Capital Projects Authorization Committee and the President for approval to submit to the Board of Water Works.

Mr. Miller stated the Operating Budget is developed based on the 2004-2008 Strategic Plan and certain planning parameters such as projected water sales, union contract and salary scale increases, and anticipated inflation rate. From the Strategic Plan, synoptic operating plans for each system are developed for the budget year. The Controller works with Business System Owners to develop draft

budgets based on these synoptic operating plans. The Operating Budgets are reviewed by the Business System Owners Council and the Executive Leadership Team for approval to submit to the Board.

Mr. Miller explained how these budgets are controlled under our current policy and procedure. All projects must have an acceptable business justification prior to proceeding with preliminary design. For projects less than \$2 Million having an acceptable business justification, staff has been authorized to proceed to final design and bid. For projects greater than \$2 Million, staff must obtain authorization from the Board of Water Works to proceed with final design and bid and then again to award and execute Contract. Any project change orders or contract change orders greater than \$250,000 require board approval. These items are handled internally through project budget sheets that require approval by the respective operating areas, Capital Projects Authorization Committee and the President. Board members see these as new business to proceed on a project, as bid tabulations for contract award, and as old business for change actions. This process is certified by the president and reviewed by the Internal Auditor on a quarterly basis.

Controls for the Operating Budget results are reviewed monthly by the Executive Leadership Team through a package prepared by the Supplying Financial Resources group. This package contains a thorough review of the income statement components. Based on the current financial results as well as forecasts for pumping and water sales, determinations are made if special measures are needed in order to achieve the earnings target. These results are summarized in the report that is presented to the board each month.

In terms of funding, the Capital Budget is funded primarily from cash generated from operations; that is, profits not paid out as a dividend plus non-cash expenses like depreciation (\$29.5 million). Developers and homebuilders also provide a significant portion that covers distribution system extensions, water services and fire hydrants (\$15.8 million). For large capital budget years, the Capital Budget is also funded from a draw down of cash reserves (currently approximately \$19 million). As the cash reserve levels are drawn down towards minimum working capital levels (sixty days of O&M expenses or about \$8.3 million), plans are initiated to begin the borrowing process. The borrowing planned for 2006 is \$32 million.

Mr. Miller advised the Operating Budget is funded almost entirely from water sales (more than 94%) and is computed as the sum of all of the revenue requirements: Operation and Maintenance expenses, Depreciation, Water Provided in Lieu of Taxes, Retirement of Assets, Net Non-Operating Expenses, and Net Income. Approximately 4% of the operating budget is funded from sewer billing services and late payment penalties. Less than 2% of the operating budget is funded by interest income on our investments.

Mr. Miller provided highlights of the 2006 Capital Budget, which totals \$73.2 million. Infrastructure Replacement / Rehabilitation amounts to \$30.3 million. This includes: Water Main Replacement /Rehabilitation; Distribution Center Facilities and Equipment; Relocation of Facilities; and Pumping Station and Treatment Plant Facilities and Equipment. System Improvements add up to \$20.4 million. These include Advanced Treatment Technology Phase II and III, BE Payne Plant Coagulation and Softening Basins, Crescent Hill Drainage and Solids Improvements and Information Technology Projects. There is \$12 Million in the Capital Budget for growth-related Improvements, including new transmission mains, storage tanks and booster pump stations. There is \$20.4 million for self-financing improvements, such as the Bullitt County Water Extension Program, Developer Financed Distribution Main Extensions, and Fire Hydrants and Service Lines. Mr. Miller noted Automated Meter Reading is not currently included in the capital budget.

Mr. Miller discussed highlights of the 2006 Operating Budget. The Budget shows water sales increased by 3.5%, with the water sales budget increased from 37.5 BG to 38.8 BG, based on forecast developed in conjunction with a University of Louisville statistician, Dr. Patricia Cerrito. This is back to the level budgeted in 2004. This budget assumes Operation and Maintenance expenses will be up \$3.4 million or 7.3% and depreciation will be up \$1.5 million or 7.6%.

Mr. Miller stated the Return on Equity Target of 9.48% based on phasing out five year moving average of investor owned utilities computed at 9.22% (two-thirds) and phasing in current allowed return of 10.0% (one-third). This yields a budgeted net income of \$31.5 million (\$2.2 due to higher ROE target) and a budgeted dividend of \$14.8 million (up \$1.5 million, also due to higher ROE target).

In summary, Mr. Miller stated the issues affecting the rates are increased O&M expenses, increased depreciation expenses, increased free water, and increased net income, which are all offset by increased budgeted water sales and a decreased funding of Infrastructure Reserve.

Regarding future budgeting and planning, Mr. Miller stated the highlights from the Pro Forma Income Statement and Financial Plan include:

- Return on Equity target assumed at 9.48% for 2006, 9.74% for 2007, and 10.0% for 2008-2015.
- Water consumption forecast nearly flat over next ten years.
- Infrastructure Replacement Reserve funding \$2.1 million in 2007, \$1.3 million in 2008, none afterwards.
- Operations and Maintenance expenses are projected to increase by component at about 3% per year.
- Depreciation increase and borrowing tied directly to capital expenditure program.
- Total debt planned over next ten years \$263 million.
- Interest Expense for borrowings are included in non-operating expense.
- Principal payments on Series 2001 bonds conclude in 2014. Principal payments on new bonds commence immediately.
- Water rates are projected to increase by 5.0% to 5.25% each year from 2007 through 2010 and by 3.0 to 4.0% from 2011 through 2015.
- Debt service coverage falls slightly below 2.0 times but remains ahead of minimum debt service coverage covenants in the Bond Resolution.

Mr. Huber stated we put the budget together with sales of 38.8 BG and this amount is very restrictive in the event any contingency occurs. The 4% rate increase proposed is very conservative. Using the Public Financial Management (PFM) planning model, the proposed increase for next year would be about 5.25%. Our sales volatility is growing. Additionally, the CPI has increased by 4.7% over the past 12 months. Mr. Huber stated the Board may want to consider a 4.5% rate increase and use that additional money for the Infrastructure Replacement Reserve. We could also consider dropping our sales forecast. If we had a major percentage rate increase this year, it may help to lower it next year. Ms. Halloran advised if we take a 4.5% rate increase, we would likely need only a 4.9% rate increase next year.

Dr. Wise asked Ms. Barbara Crow how such a rate increase would be perceived this year on the heels of a year in which we provided a greater than budgeted dividend to the Metro Government. Ms. Crow stated this involves the same issues we manage for each rate increase, but we are certainly affected by the impact from other utility rate increases, which have been substantial. Ms. Welsh expressed concern about setting a rate that is too low and resulting in a much larger rate increase next year.

Mr. Martin stated he wants to get input from PFM regarding the determination of depreciation expense because it could effect how we establish the useful life of our facilities. He also wants PFM to provide input on how we calculate the ROE. He wondered whether we could set the rate increases at increments.

Board of Water Works
Special Called Meeting Minutes October 18, 2005
Page 6 of 16

Dr. Wise stated we should not have more than one increase in rates per year, and Mr. Rick Johnstone agreed, adding that our rate increases are relatively small compared to other utilities in the area.

Mr. Miller noted the BOWW's decision to fund the Infrastructure Replacement Reserve (IRR) in the past has been viewed as wise stewardship by many customers and media reports. A 4% increase does not provide any funding for the IRR, but a 4.5% increase would yield approximately \$500,000 for the IRR.

Dr. Wise and Mr. Johnstone requested staff to provide schedules showing varying rate increases at the November BOWW meeting. Directors expressed interest in seeing proposals to level out future rate increases. Dr. Wise moved to file the Preliminary 2006 Annual Budget with the Trustees and the Metro Government. Ms. Willis seconded, and the motion carried.

Best Governance Practices Discussed

Mr. Miller provided the Board an update regarding the ongoing discussion of best governance practices. At the Audit Committee meeting on June 6, 2005, staff presented the highlights of the draft Sarbanes-Oxley Best Practices Implementation Plan, noting that a more detailed plan would be presented at the September meeting. At the Audit Committee meeting on September 16, 2005, staff presented items described in the Implementation Plan for consideration by the Board of Water Works: Corporate Governance Policy and Procedures; Audit Committee Charter update; Code of Ethics for Senior Financial Officers; Whistle-Blower Procedure; and, a proposed change to Executive Incentive Plan

The Audit Committee was in consensus regarding the adoption of each of the elements to the Board of Water Works at the November 2005 meeting to assure continued public confidence in the financial integrity and operations of Louisville Water Company.

Recommended Internal Controls Certification Practices

Mr. Miller reported staff has performed extensive research regarding voluntary compliance with the evaluation and certification of internal controls consistent with Sections 302 and 404 of the Sarbanes-Oxley Act of 2002. At this time, only one organization has been found to have voluntarily sought certification of internal controls by external auditors. Staff has identified the additional resources that we believe would be necessary to accomplish this certification, but believe that LWC should not pursue an internal controls evaluation and certification to the full extent required by the Sarbanes-Oxley Act of 2002 based on the perception that the benefits from doing so are outweighed by the costs and disruptions to the business - to pursue a Sarbanes-Oxley compliant internal controls certification would entail a major disruption to several business systems and require between \$500,000 and \$1,000,000 in additional funding over the next two to three years. Mr. Miller stated, in lieu of pursuing a Sarbanes-Oxley compliant internal controls certification, staff recommends that management develop and implement these plans:

- Develop more straightforward and usable definitions of Control Deficiency, Significant Deficiency, and Material Weakness that reflect specific levels of risk.
- With the assistance of outside expert advice, develop a standard methodology to be used within all business systems to identify, document, evaluate, and certify internal controls.
- Incorporate a review or audit of internal controls methodology compliance as requirement in the System Certification requirements.

This recommended approach would require a certification by each business system owner and would involve a review of the internal controls documentation and testing by internal or external auditors through a defined set of agreed-upon procedures. Staff believes that this approach would implement the

best practices and achieve for LWC the benefits envisioned by Congress when the Sarbanes-Oxley Act was passed. Furthermore, it would operationalize and institutionalize this approach into the daily activities of each business system. Directors were in consensus with staff's recommendations regarding the Company's internal controls processes.

Corporate Policies Considered

Ms. Barbara Dickens advised the Company is attempting to review and revise all its current policies and create new policies where policy gaps have been identified. Certain policies have been earmarked as policy statements that should come directly from the Board of Water Works. As such, those policies will be submitted for the Board's approval. The process of Board policy approval involves the Board reviewing these policies as a First Reading one month, making any changes that may be necessary based on that review, and then considering them the following month as a Second Reading, for approval at that time.

Mr. Miller reviewed a new Corporate Governance Policy, which is in keeping with the previous communication to the Board on this issue. Ms. Dickens reviewed a new policy entitled, "Access to Official Company Meetings and Records" to govern our requirements under the Kentucky Open Records Act and the Kentucky Open Meetings Act. Ms. Dickens reviewed an existing policy on Corporate Charitable Donations, which is being proposed for amendment. There were no comments from Directors at this time. Ms. Dickens advised these three policies would return in November for adoption.

Update Provided Regarding Human Resource Information System

Mr. Miller provided a status update on the implementation of the Human Resources Management System (HRMS). LWC is partnering with Empower Solutions to implement the following PeopleSoft modules – Human Resources, Payroll, Benefits Administration and four (4) employee self service modules that will provide employees online access to their pay, benefits and personal information. The "go-live" date for these modules is January 1, 2006.

Two (2) major segments of the HRMS project have been completed – Process Analysis and Solution Development. In the Process Analysis segment, sessions were conducted to demonstrate the software so that gaps between PeopleSoft's standard offerings and LWC's business needs could be identified and documented. To close those gaps, cost estimates for each modification were determined which allowed each request to be prioritized and evaluated on its own merit. The Solution Development segment consisted of completing the actual coding of the development work, the finalization of the new business processes and the development of a test plan. Significant progress has also been made on the development and testing of the conversion plans that will be utilized to move the data from LWC's existing HRMS system to PeopleSoft.

In early October, the team began its most critical phase – system testing. System testing allows users to test the new business processes and to work on the new system so that potential problems with the software set up can be identified and corrected prior to "go-live". System testing is expected to be completed in mid-November. Therefore, Mr. Miller advised the first phase of the HRMS implementation is on schedule to meet its January 2006 "go live" date and is proceeding within budget. He stated phase II of the HRMS implementation will be presented at the November Board of Water Works meeting.

Certification Provided for Projects and Change Actions Approved During Third Quarter 2005

Mr. Huber reported that the following projects and change actions within his authority were approved in the Third Quarter of 2005 in accordance with the Capital Projects Authorization Policy and Procedure:

Board of Water Works
Special Called Meeting Minutes October 18, 2005

Certification Provided for Contracts and Bids Awarded During Third Quarter 2005

Mr. Huber advised that contracts and bids within his authority were approved in the Third Quarter of 2005 according to the Purchasing Policy and Procedures:

01743	Gene Snyder Freeway Transmission Main Design - Phase 2 CH2M Hill	\$67,700
05-05686	Discontinuing Small Water Services Miller Pipeline	\$68,333
05-63	Seelbach Avenue Area - MRRP MAC Construction & Excavating, Inc.	\$211,750
05-64	Project 03641: Crescent Hill Pump Station Ventilation Improvements J & J Mechanical, Inc.	\$124,876
05-66	Construction Inspection and Technician Quest Engineers, Inc.	\$511,200
05-67	Project 10287 Jackie Way Area Main Replacement Project Southern Pipeline Construction Co. (CWBE)	\$1,159,000
05-72	Project 10382 Kentucky Street Area Main Replacement Project MAC Construction & Excavating, Inc.	\$1,251,300
05-73	Project 02-33 / Millers Drive Water Main Extension Three T Construction	\$49,743
05-76	Project 11-064 Relocation of BEP Low-Lift Generator to Cardinal Hill / PRP Pump Station Walter B. Diecks Electric Co.	\$42,855
05-78	Project 11101 / Norfolk-Southern Inermodal Facility - Water Facilities Relocation Project MAC Construction & Excavating, Inc.	\$54,600
05-85	Project # 10269 / I-65 16-Inch Transmission Water Main Extension	

10286	Basham Construction & Rental Co., Inc. Contingency Contract for Transmission System Emergency Repairs and Capital Improvements - Old Ford Salt River Crossing - Assignment from Bid #05-10	\$617,173
10433	Southern Pipeline and Construction Co. (CWBE) Engineering Services for Distribution System Design and Construction Pipeline, Pump Stations and Tanks - Rams Run Road BPS - Assignment from Bid #04-42	\$385,630
Bid 05-52	Quest Engineers Project 10414 Shelbyville Road II - Breckenridge Ln. to I-264 - Main Replacement	\$27,235
Bid 05-59	Southern Pipeline Construction Co. (CWBE) Project 10275 Brooks Hill Road Water Main Extension	\$1,365,000
Prof. Svc.	Bardstown Road Tank Painting Project - Inspection Services - Assignment from 04-42 / Engineering Services for Distribution Systems Design & Construction Pipeline, Pump Stations and Tanks Quest Engineers, Inc.	\$147,843
		\$55,491

PROCUREMENT OF MATERIALS AND SERVICES

01-54	Telecommunications System and Switch Maintenance Renewal - Amendment to Existing Contract BellSouth Communication Systems, LLC	\$22,608
02-27	Fire Hydrants - 5th PPI Renewal (quarterly renewal - amount is estimated for three American Cast Iron Pipe	\$278,38
02-41	Barricade Rentals (3rd CPI Renewal) Flasher Barricade and Lite Company	\$259,487
03-29	CSI Data Collection - 2nd CPI Renewal Datamax, LLC	\$29,227
03-44	Property & Casualty Brokerage Services - CPI Renewal Neace Lukens	\$39,069
03-51	Vehicular Body and Suspension Repair (Second and Final CPI Renewal) Robinson's Auto Body (CMBE)	\$53,000
04-42	Engineering Services for Distribution System Design & Construction Pipeline, Pump Stations, and Tanks - 1st CPI Renewal QK4	\$553,215
04-51	LWC Property Protection - 1st CPI Renewal Louisville Patrol & Detection	\$350,026
05-19	Lockbox Services, Debit / Credit Card Services and Banking Services Fifth Third Bank - Lockbox Services	\$120,000

	Fifth Third Bank - Debit / Credit Card Services	\$193,552
05-31	Crane and Truck Bed	
	Manning Equipment Co.	\$114,195
05-33	Road & Tire Service	
	Raben Tire	\$159,704
05-35	Stone, Soil and Sand - Award Correction	
	Nugent Sand (Stone only)	\$38,914
	Quality Stone	\$269,09
05-54	Meter Exchange Vehicles	
	Bill Collins Ford - Cab & Chassis	\$65,250
05-55	Water Treatment Chemicals	
	Univar - Liquid Chlorine (CHFP)	\$242,567
	Calgon - Powdered Activated Carbon (Taste & Odor)	\$65,700
	Solvay - Fluosilicic Acid	\$122,544
	Kemiron - Liquid Ferric Chloride	\$1,265,355
	Mississippi Lime - Quicklime	\$441,982
	Polydyne - Poly (diallyldimethylammonium chloride)	\$126,480
	Univar - Ammonia	\$82,698
	Univar - Liquid Chlorine (BEP)	\$119,070

Budget Increased and Authorization Given to Proceed with Final Design and Bidding for Pitts Point Road Main Replacement Project

Ms. Teasley advised the Board had previously authorized staff to design and advertise for bids the Pitts Point Road Area project with a project budget estimate of \$690,000. The project scope at that time included Pitts Point Road from Highway 44 to Kings Lake Drive and Highway 44 from Raymond Road eastward to Pitts Point Road. Based on further analysis of the current and projected water demand in the area served by Pitts Point Road and Raymond Road, the Capital Planning & Hydraulics Process has recommended that the proposed 8-inch main in Raymond Road be extended along Highway 44 by approximately 1,300 feet to Highwater Road, and a new 12-inch main be included along Highway 44 between Bullitt Lick Creek eastward to Raymond Road to replace an existing 6-inch main. This additional work coupled with planned improvements along Raymond Road and Chillicoop Road will improve the water supply to this area, bringing the majority of the fire hydrant flow rates into compliance with current standards. The proposed changes increase the project budget from \$690,000 to \$1,053,724. Funding for the project will come from three sources – Pitts Point Road (MRRP Program – Infrastructure Reserve), Highway 44 (west) from Raymond Road to Pitts Point Road (Bullitt County Water Reserve), and Highway 44 (east) from Bullitt Lick Creek to Raymond Road (System Development Charge Reserve). Dr. Wise moved to increase the Project Budget of Record to \$1,053,724 and to proceed with the final design and advertisement for bid of the Pitts Point Road Area Main Replacement Project. Ms. Willis seconded, and the motion carried.

Change Action Authorized for Project 10031: Westport Road/I-264 Interchange Phase 11

Ms. Teasley stated LWC entered into Contract G-128 with T+C Contracting, Inc. in the amount of \$1,812,900 approximately two years ago for the construction of the pipeline associated with the referenced road relocation project. At the time the contract was signed, the total project cost was estimated to be

\$2,125,311. Construction is now complete, and a single change action in the amount of \$356,138 (\$92,322 for T+C) has been submitted for review and approval. The project included the construction of suction piping under the proposed Westport Road interchange to serve the Westport Road Pump Station. Reconstruction of the roadway interchange is planned to start in Fall 2006. Relocation of the suction main prior to that date has provided the Kentucky Transportation Cabinet (KTC) with an unencumbered work area. Because the main installation project resulted from a KTC road relocation project, LWC will receive reimbursement from KTC for a portion of the costs.

During construction various changes in the scope of work occurred which increased the contract amount, total project amount, and reimbursement amount, such as an increase in the length of the bores under I-264, additional erosion protection measures requested by MSD, unplanned capping of existing mains to facilitate roadway construction, and additional rock excavation. In addition, these scope changes resulted in cost increases in LWC labor, materials, capital interest, miscellaneous utility relocations, and vendor charges. Reimbursement from KTC is expected to increase from \$1,680,652 to \$1,978,956. The net cost to LWC increases from \$444,649 to \$502,493.

Ms. Teasley advised the work is actually being done but the contractor has not been paid and we need to move forward with the reimbursement. Mr. Johnstone asked why LWC is being requested to pay any portion of it because it is relocation at the state's request. Ms. Teasley responded we are paying for the upsizing, which is our choice to do at this opportune time. Mr. Huber affirmed the state reimburses us fully if the relocation is at the State's request and it is a relocation of the same size facilities. Ms. Margaret Harris moved to authorize the Vice President of Serving Customers and Business Development to increase the contract amount with T+C Contracting, Inc. to \$1,905,222 and the total project cost from \$2,125,311 to \$2,481,449. Dr. Wise seconded, and the motion carried.

Grant Approved for Bullitt County Water Improvement Program

Ms. Teasley advised that as a part of the 207 water main extension projects proposed by LWC in May 2001 to the Kentucky Infrastructure Authority (KIA), many of which have already been completed, LWC has received a conditional commitment letter from KIA for grant assistance for Hilltop Road totaling \$399,000. Mr. Martin moved to adopt the following Resolution accepting the Hilltop Road KIA grant, approving the Grant Agreement, authorizing the amendment of the 2005 LWC Budget to note receipt of the funds and authorizing Ms. Teasley to sign the grant documents:

WHEREAS, the General Assembly has appropriated funds for infrastructure projects in the 2004-2006 Budget of the Commonwealth; and

WHEREAS, the Louisville Water Company ("Grantee") has previously determined that it is in the public interest to acquire and construct certain facilities and improvements to the Grantee's utility system (the "Project"); and

WHEREAS, the Grantee desires funding from the Kentucky Infrastructure Authority (the "Authority") for the purpose of acquisition and construction of the Project.

NOW, THEREFORE, BE IT RESOLVED by the Board of Water Works of the Louisville Water Company (Grantee) as follows:

SECTION 1. That the Grantee hereby accepts the grant award and approves the Agreement between the Grantee and the Authority substantially in the form on file with the Grantee for the purpose of providing a portion of the necessary financing to the Grantee for the acquisition and construction of the Project.

SECTION 2. That Karla Olson Teasley, Vice President, Serving Customers and Business Development, is hereby authorized, directed and empowered by the Grantee to execute the Agreement and all other necessary documents or agreements, and to otherwise act on behalf of the Grantee to implement the Project.

SECTION 3. That the Grantee hereby includes in its annual budget the receipt and expenditures of funds subject to the Agreement with the Authority.

SECTION 4. This Agreement shall take effect immediately upon passage.

Ms. Willis seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 3:16 p.m. and returned at 3:35 p.m.

There being no further business, the meeting was adjourned at 3:35 p.m.

Respectfully submitted,

Barbara K. Dickens

Vice President, General Counsel and Corporate Secretary

Visitors:

Mr. Larry Gaddis, Black & Veatch Consulting Engineers
Mr. Bruce Long, Black & Veatch Consulting Engineers
Mr. Phillip Lee, WDRB-TV

The regular meeting of the Board of Water Works was held on Tuesday, November 15, 2005 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:30 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin proposed a change in the minutes at page 6 by deleting the words "seems we could vary" and replacing them with "could affect." Mr. Martin moved to approve the minutes from the Special Called Meeting held October 18, 2005 with the change suggested by Mr. Martin, seconded by Ms. Wendy Welsh, and the motion carried.

Steering Group Recommendations Regarding Alternative Treatment Technology at Crescent Hill Treatment Plant Discussed

Mr. Greg Heitzman discussed the recommendations of the Steering Group on Alternative Treatment Technology for the Crescent Hill Treatment Plant. The Steering Group included John Huber, Mr. Heitzman; Dr. Joe Wise, Mr. Martin, Ms. Marita Willis and Mr. Rick Johnstone, and it met five times in January, March, April, June, August and October of this year. The group reviewed all the practical

treatment options and created nine preliminary treatment alternatives, which were screened down to five alternatives that were reviewed in depth. The Group determined criteria necessary to evaluate those options and utilized special software for that evaluation. This process narrowed the alternatives down to three options, which Mr. Bruce Long of Black & Veatch discussed in more detail. Those options are: a river intake with ozone and biologically active filters (BAF); a river intake with ozone, BAF and ultraviolet rays (UV); and a riverbank filtration (RBF) process with granular media filtration. The latter option will vary depending on whether we assume there is gas or assume there is a potential for gas in the path of the facilities. Dr. Wise asked for further explanation of gassy versus potentially gassy. Mr. Heitzman advised, similar to the B.E. Payne plant RBF project, declaring it gassy will affect precautions we have to take and in turn affect construction costs. Mr. Conner asked whether there is a possibility of no gas, and Mr. Heitzman advised since it is underground and one core drilling indicated gas, it is highly likely gas is present.

Mr. Long discussed the O&M and Capital costs associated with each alternative. He described the sensitivity analysis and the weighting factors applied and advised the sensitivity analysis can produce different results depending on how the various factors are weighted. For example, water quality can be weighted more heavily and it will change the results. Mr. Martin stressed the Directors relied upon staff recommendations for the determination of weighting factors. Mr. Conner asked whether Mr. Long includes regulatory requirements into "water quality" and Mr. Heitzman stated we are talking about water quality above and beyond the current regulations. There are new regulations coming out and we are looking to meet future regulatory requirements.

Mr. Miller provided information about the financial analysis used for evaluating the three alternatives and reviewed the 30 year discounted costs, which resulted in ranking the three alternatives nearly equal. Next, the Company needs to perform a qualitative risk assessment on each alternative. Black & Veatch needs to revise the expected life for the RBF tunnel facilities, extend the analysis to 40 year discounted costs, incorporate retirement of the existing and near-term planned facility assets, incorporate incremental O&M expenses and evaluate effect on the long range financial plan, and provide a written summary of the analysis done.

Mr. Heitzman recommended proceeding with preliminary engineering for RBF and Ozone/BAF Pilot Plant, at an estimated cost of \$2.5 million, which would be expensed over 5 years using the FAS 71 accounting standard, and then conducting an evaluation of those two options over an 18 to 24 month period to make a determination. To get the Crescent Hill facilities upgraded to comply with current and future regulations would be approximately \$80 Million. If we select RBF, it not only addresses regulatory compliance but also aesthetics. Mr. Long stated these are reasonable goals for water quality but they are world-class goals. The various microbes present challenges because of the treatment barriers and protection needed.

Ms. Welsh asked whether the Phase II preliminary engineering would be needed, and Mr. Heitzman stated only if Phase I was successful. Mr. Miller further explained why the costs for the pilot plant would be required to be treated as research. Mr. Conner asked how this compares to the cost of RBF at the B. E. Payne Plant, and Mr. Heitzman stated that since CH produces three times as much water as the B. E. Payne Plant, you can expect it to cost three times more. Mr. Miller emphasized that the costs would be amortized in future years under FAS 71. Mr. Johnstone asked why we had to wait until 2006 to begin expensing the costs, and Mr. Miller stated we may not have to wait until 2006.

Mr. Conner thanked the Steering Group for their hard work. Ms. Willis added it was a valuable experience. Mr. Huber summarized that staff recommend proceeding with the preliminary engineering for the RBF and the Pilot Testing for the BAF Plant in the estimated amount of \$2.5 Million, and to

charge that as a regulatory asset over a 5 year period using FAS 71. Staff will recommend when that period should begin in December. Dr. Wise moved to approve that recommendation, Ms. Welsh seconded, and the motion carried.

2006 Budget Approved

Mr. Miller summarized the highlights of the preliminary 2006 Annual Budget presented at the October 2005 Board meeting. This budget was based on a rate increase of 4.0%. The budget presented in October was based on a water sales estimate of 38.8 billion gallons, which represents the median forecast of water sales. If water sales were to occur below this median level in 2006, then revenues would fall below the amounts required to meet expense and earnings targets. The budget did not include any funding for deposit to the Infrastructure Replacement Reserve (IRR). The recommended rate increase of 4.0% was below the change in the Consumer Price Index for the past twelve months of 4.7%. Water rate increases contemplated over the next four years ranged from 5.0% to 5.25%.

Staff has developed an alternative Preliminary 2006 Operating Budget based on a 4.5% rate increase that would be appropriate for consideration if the funding of additional evaluation of the three treatment options was approved and if no additional deposit to the IRR is considered appropriate. This alternative contemplates rate increases of 5.0% to 5.75% for the following four years.

Staff also developed an alternative Preliminary 2006 Operating Budget based on a 5.0% rate increase that would be appropriate for consideration if the funding of additional evaluation of the three treatment options was approved and if an additional deposit of one-half percent of revenues to the IRR is considered appropriate. This alternative contemplates rate increases of 5.0% per year for the next four years.

Staff believes that either of the Preliminary 2006 Annual Budget alternatives will adequately fund the operations and maintenance of the waterworks system and provide for relatively level rate increases over the next five years. Mr. Huber stated even the 4.5% rate increase is very tight and provides no contingency in the event we do not meet our sales forecast. Mr. Conner asked if this would be the third time we had not funded the IRR, and Mr. Miller responded it will get funded in 2005, but this means it will not be funded 3 of the past 4 years.

Ms. Barbara Crow stated we have to tell the story of our desire to produce high quality water that meets current and future regulations as a driver of the rate increase. Dr. Wise asked how a 5% rate will affect the dividend. Mr. Miller stated the rate set does not affect the dividend, but we are changing the method by which we calculate the return on equity target, which will raise the dividend. Dr. Wise moved to approve the following resolution to adopt the 2006 Annual Budget, file the long range financial plan, and to develop rate schedules for a 5.0 % rate increase.

RESOLVED, that the revised Preliminary 2006 Operating Budget submitted by staff be adopted as the approved 2006 Operating Budget

RESOLVED, that the Preliminary 2006 Capital Budget submitted by staff be adopted as the approved 2006 Capital Budget.

RESOLVED, that the revised Preliminary Long-Range financial Plan 2006-2015 be filed as the Long-Range Financial Plan 2006-2015.

RESOLVED, that rate schedules be developed and presented by staff for a 5.0% increase effective for water service beginning January 1, 2006 and thereafter.

Ms. Welsh seconded, and the motion carried.

Return Analysis Report By Public Financial Management Discussed

Mr. Miller advised he has been working with Public Financial Management (PFM) to upgrade the long range financial planning model to link the proforma income statement, the long term capital expenditures plan, and the long term borrowing plan and to provide other new features and added flexibility and further, to prepare a Return Analysis Report that reviewed methodologies for establishing revenue targets, rate of return, and dividend level and recommended appropriate metrics and target levels.

The upgraded long range financial planning model was used in the development of the Preliminary 2006-2015 Long-Range Financial Plan. The Return Analysis Report was developed from the perspective of the bond rating agencies in consideration of our planned borrowings in 2006 and future years. Five key financial metrics of liquidity, capitalization, debt service coverage, earnings and transfers were identified with recommended initial targets for consideration. Mr. Miller advised PFM compares us against government-owned utilities for borrowings and against investor-owned utilities for operations. They recommend we continue to use a Return On Equity target, we level our future rate increases, and we utilize a different method of computing the dividend.

There is additional work we need to do and staff will be developing a scope of work for them. Mr. Conner advised no action is necessary at this time. Mr. Martin stated all Directors need to have a mutual understanding of how the return analysis is conducted.

Arbitrage Rebate Calculation Discussed

Mr. Miller advised the Company will be required to rebate substantial arbitrage earnings related to the Series 2001 Bonds in 2006. Staff is working with the PFM Group to determine the amount and accrue the liability prior to year-end. The current estimate of arbitrage earnings that must be rebated to the U.S. Treasury is \$550,000.

The arbitrage rebate calculation for the Series 2000 Bonds was performed by the PFM Group for the Installment Computation Period from September 7, 2000 through September 7, 2005. During that period, Louisville Water Company earned \$51,995.34 in positive arbitrage; however, no rebate payment is due because the proceeds allocable to the Project Fund and the Capitalized Interest Fund met the requirements of the 2-year spending exception to arbitrage rebate.

The arbitrage rebate calculation for the Series 2001 was scheduled to be performed in 2006. Because of the complexity of the financings that preceded the Series 2001 Bonds, staff determined to have the arbitrage rebate calculation performed in advance to allow for accrual of any arbitrage rebate liability. Based on currently available estimates provided by the PFM Group, the arbitrage earnings for that issue that must be rebated to the U.S. Treasury is \$550,000. This was attributed to the relatively low yield for these bonds of 4.29% compared to the relatively high yield for the bond reserve fund of 8.22%. It is likely we would have issued the bonds even with this knowledge.

Dr. Wise asked why we would not have sold the SLGs back. Mr. Miller responded the only market is the U.S. Treasury. If they were sold back earlier, there would have been a significant interest penalty imposed. Mr. Conner commented this is money we were not permitted to retain anyway. The downside is that this was reported as income and if we had been advised fully, we would have known to deduct this from expected income. Mr. Miller stated that this is essentially a 100% tax on excess interest earnings. He recommended we reflect this against earnings for 2005 and not restate previous years' earnings because it would not meet the materiality test required for a restatement.

Increase to the Infrastructure Replacement Reserve Deposit Discussed

Mr. Miller reminded the Board the borrowing that was planned for 2005 has been delayed as a result of the decision to defer award of a construction contract for the riverbank filtration wells at the B.E. Payne water treatment plant earlier this year. The 2005 Budget contained net interest expense of \$983,333, based on interest expense of \$1,333,333 for a planned borrowing of \$40,000,000 at five percent interest on May 1, 2005 offset by \$350,000 of interest income on the investment of bond proceeds. Staff intends to recommend to the Board at the December 2005 meeting that the funds that were included in the 2005 water rates for net interest expense is instead deposited to the Infrastructure Replacement Reserve. This would increase the deposit to this reserve in 2005 from an original budget level of \$875,000 to \$1,858,333. Mr. Huber commented that this along with the impact from the preliminary engineering and the arbitrage rebate all need to be considered together at the December Board meeting.

Update Provided Regarding Strategic Planning

Ms. Susan Lehmann reviewed the four key elements of a new vision that the Board and ELT identified during the Board retreat held in September: Regional expansion; Horizontal and vertical integration as a means for growth and innovation; Synergy as a means to drive efficiency; and, Economic development, shift from a reactive approach to become proactive. Sub-teams have been created on each of these four topics to develop strategies in support of these areas, and Board members have been asked to participate on them. A fifth group will review the company's mission and values by the end of the year.

Staff has developed a draft vision statement incorporating each of these elements for the Board's approval:

“Louisville Water Company will become the water supplier of choice throughout the region by expanding:

- the geographic areas we serve,
- the services we provide,
- our impact on the economy, and
- the quality of life in communities we serve.”

Ms. Lehmann advised our goal is to have the Strategic Plan updated by the spring of 2006 so that it may be considered as the 2007 budget process begins. Directors agreed the vision statement reflects the consensus they reached at the retreat.

Financial Report Provided

Operating Revenues for October of \$11,010,308 are \$1,028,865 or 10.3% more than budgeted and \$1,128,906 or 11.4% more than October 2004. The budget variance is due to higher than expected residential and commercial water sales. YTD Operating Revenues of \$96,646,479 are \$5,011,466 or 5.5% more than budgeted and \$10,464,934 or 12.1% more than 2004.

Operation and Maintenance Expenses for October of \$3,916,774 are \$40,869 or 1.1% more than budgeted and \$397,972 or 11.3% more than October 2004. YTD Operation and Maintenance Expenses of \$37,931,178 are \$440,738 or 1.1% less than budgeted and \$2,455,626 or 6.9% more than 2004.

Total Operating Expenses for October of \$6,359,820 are \$177,895 or 2.9% more than budgeted and \$639,391 or 11.2% more than October 2004. The budget variance is due to higher than expected operation and maintenance expenses, depreciation expense, and loss on disposition of property. YTD

Total Operating Expenses of \$62,006,171 is \$182,127 or 0.3% more than budgeted and \$4,541,425 or 7.9% more than 2004.

Net Operating Income for October of \$4,650,488 is \$850,970 or 22.4% higher than budgeted and \$489,516 or 11.8% higher than October 2004. YTD Net Operating Income or \$34,640,308 is \$4,829,338 or 16.2% more than budgeted and \$5,923,509 or 20.6% more than 2004.

Total Net Non-Operating Expense for October of \$314,136 is \$126,739 or 28.7% less than budgeted and \$118,209 or 60.3% more than October 2004. The budget variance is due to lower than expected interest income and allowance for funds used during construction offset by lower than expected interest expense for the delayed borrowing. YTD Total Net Non-Operating Expense of \$2,775,814 is \$1,421,710 or 33.9% less than budgeted and \$1,405,082 or 33.6% less than 2004.

Net Income Before Distributions and Contributions for October of \$4,336,352 is \$977,709 or 29.1% more than budgeted and \$371,307 or 9.4% more than October 2004. YTD Net Income of \$31,864,493 is \$6,251,049 or 24.4% more than budgeted and \$7,328,592 or 29.9% more than 2004.

Capital Expenditures through October were \$48,629,081 or 53.35% of the 2005 Capital Budget of \$91,148,054.

Mr. Martin commented it appears we have a higher Metered Water Ratio compared to this time last year. Mr. Huber responded that previously we had high production and there was a lot of water on the meters for which we had not yet billed.

Operations Report Provided

Mr. Heitzman reviewed the production for October, which was an unusually dry month with only 1.25 inches of rain. The average production rate of 131.2 MGD was 1.1 percent higher than the October 2004 production of 129.7 MGD and 4.0 percent higher than the October five year average production of 126.2 MGD. Due to higher than normal productions from June to August, the 2005 year to date production of 133.4 MGD is 4.3 percent and 2.2 percent higher than 2004 and the five year average production, respectively.

Mr. Heitzman stated the \$20 million project to upgrade the B.E. Payne Plant is now complete and all project elements are fully operational. This project included upgrade of the filter gallery with higher capacity filters, a new air-scour backwash system, and expansion of the high lift pumping from 45 MGD to 60 MGD firm capacity. The project also included installation of a new underground power feed from LG&E, installation of new electric switchgear to power the plant, installation of on-site backup power generation for 30 MGD capacity, installation of pressure surge control, and installation of a new SCADA control system for pumping operations. The contractor, Judy Construction, completed the project in August, and all issues involving project delays and change orders have been resolved. Staff is in the process of closing the project, and although project completion was extended nearly a year after expected completion, the final project costs are \$18.1 million or 12 percent under budget.

Mr. Heitzman advised Directors of a significant main break on the evening of Wednesday, November 2, at the corner of Broadway and 2nd Street. A 12-inch main separated from a 30-inch main, causing the failure and the high volume of water that created a large cavity in the intersection. In addition to roadway damage, there were damages or conflicts with numerous other utilities. Management and crews worked around the clock every day from the identification of the break until the repair was complete.

Serving Customers Report Provided

Ms. Karla Teasley provided customer trend data for the previous month. The October abandonment rate was 11.4% compared to 5.3% in September 2005, and 8.5% in October 2004. Call volume continues to run higher than in 2004, with approximately 31,000 additional calls received year-to-date. Bad debt for the month was \$87,585 compared to \$60,577 in September 2005, and \$42,028 in October 2004. Bad debt is \$45,668 over budget for the month and \$143,937 over budget year to date. A significant portion of the overage is due to higher revenues received in 2005 as compared with 2004 with no change in budgeted bad debt.

Ms. Teasley stated the Shepherdsville Advisory Board met on October 18, 2005, during which staff updated the members about the Shepherdsville Reserve and rate equalization. LWC has nearly completed all system improvements identified in the original Asset Acquisition Agreement.

Ms. Teasley advised the Company has recently received a request from the Bluegrass Consortium to update our proposal to provide finished water to the Consortium.

Contract Awarded for 05-81: Ductile Iron Pipe

Mr. Miller stated three bids were received for ductile iron pipe, which is used throughout the LWC distribution system. The lowest, most responsive bid was submitted by U.S. Pipe and Foundry Company for an estimated one-year total of \$1,816,560, which is a .86% increase in unit prices from the previous bid submitted one year ago. Mr. Martin moved to authorize the Process Owner of Procurement Services to award a one-year contract totaling an estimated \$1,816,560 to U.S. Pipe and Foundry Company. Ms. Willis seconded, and the motion carried. Mr. Huber advised we are considering using less PVC pipe versus ductile iron pipe. PVC bids were very high following Hurricane Katrina, since PVC is a petroleum-based product and many facilities producing petroleum were damaged in the hurricane

Authorization Given to Proceed with Final Design and Advertise for Bids for Old Ford Road Transmission Main Project

Ms. Teasley stated a new 16-inch transmission main in Bullitt County will extend from Carpenter Street at Second Street eastward along Second Street, then southward along the CSX Railroad line across the Salt River to tie-in to the existing 16-inch main in Preston Highway at Beech Grove Road, in order to provide additional hydraulic support to the area south of the Salt River, redundancy for supply south of the Salt River, and operational flexibility for the distribution system north and south of the Salt River. This project was not budgeted as part of the 2005 Capital Improvement Program but residential growth in the area south of the Salt River and west of Highway 61 is underway and more is anticipated. The City of Shepherdsville already has plans to construct a new by-pass connector from Preston Highway westward to Old Ford Road to support this anticipated growth. Joint design and construction of the proposed transmission main with the proposed roadway work is expected to provide significant cost savings.

Construction of the proposed 16-inch transmission main will allow for the replacement of approximately 1,935 feet of 2, and 4-inch unlined cast iron main along the majority of First Street. Services along this corridor will be connected to the proposed 16-inch main which will serve as a distribution main as well as a back-up transmission main along this street. Replacement of these unlined sections of main should improve water quality for these customers while improving fire flow capacity for these streets and streets immediately surrounding the project area.

The estimated cost of this project is \$576,000. As approximately half of the proposed alignment will include the replacement of unlined cast iron mains, \$285,118 (49.5%) of the project cost will be funded from LWC's Main Replacement and Rehabilitation Program with the remaining portion \$290,882 (50.5%) being funded by System Development Charge Reserve. Dr. Wise moved to authorize staff to proceed with final design and advertisement for bids for the Old Ford Road Transmission Main project as a non-budgeted capital project with an estimated cost greater than \$250,000. Ms. Harris seconded, and the motion carried.

Closed Session Held

Ms. Welsh moved to go into closed session to discuss property issues and proposed or pending litigation pursuant to KRS 61.810(1)(b) and (c), respectively at 3:00 p.m. Mr. Martin seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Willis, and unanimously carried, the Board resumed open session at 3:20 p.m. No action was taken in closed session.

Executive Session Conducted

The Board went into Executive Session without management present at 3:20 p.m.

There being no further business, the meeting was adjourned at 3:50 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

Ms. Kay Ball, Program Manager, Riverbank Filtration

The regular meeting of the Board of Water Works was held on Tuesday, January 10, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin stated he had concerns about the clarity of the discussion in the December 13, 2005 minutes regarding Financial Accounting Standard 71. Mr. Robert Miller responded that while it may be very technical in nature, it uses language from the standard itself, so Mr. Miller believes the wording should remain the same so that the independent auditors are certain the Board provided the authority to make the entries under that standard. Mr. Martin moved to approve the minutes from the Regular Meeting held December 13 2005, seconded by Dr. Joseph Wise, and the motion carried.

Chief Executive Officer Report Provided

Mr. Huber provided an update regarding the media coverage involving an LWC meter reader who was threatened by an assailant with a knife. The assailant was captured by police. The meter reader was not harmed and was commended for following the proper safety procedures for the situation.

Mr. Huber also discussed LWC's current chemical feeding system. A bill was introduced in the United States Senate entitled the Collins-Lieberman Chemical Antiterrorism Act, which will impact large water systems using large quantities of chlorine and ammonia and will require changes to "inherently safer technologies." Although it is unknown at this time whether the bill will proceed through Congress, LWC

has already been investigating the ability to generate chlorine on site to prevent storage of it. Another bill of interest is a bill to defray the cost to desalinate water, which is a process becoming more common as water utilities search for new ways to meet water demands.

Financial Report Provided

Mr. Miller stated much of the year-end financial information is not yet available in order to ensure expenses in December are included and payroll data from the new payroll information system is verified. However, he reported total Sale of Water for December 2005 of \$8,521,482 was \$432,752 or 5.4% more than budgeted and \$349,481 or 4.3% more than the same month last year. Total Operating Revenue for December of \$8,980,569 was \$516,839 or 6.1% more than budgeted and \$378,029 or 4.4% more than the same month last year. Total Sale of Water for 2005 of \$110,182,147 was \$5,228,555 or 5.0% more than budgeted and \$11,145,281 or 11.3% more than for 2004. Total Operating Revenue for 2005 of \$115,066,783 was \$5,613,196 or 5.1% more than budgeted and \$11,604,730 more than for 2004.

Operations Report Provided

Mr. Jim Brammell reported the average production rate last month of 115.4 MGD was 5 percent lower than the December 2004 production of 121.5 MGD and similar to the December five year average production of 115.8 MGD. For the year, the average daily production of 130.8 MGD is 3.4 percent and 2.6 percent higher than the 2004 average daily production and the five year average daily production, respectively. Higher production was experienced during the summer months of June, July, and August due to dry weather.

The heavy volume of break activity that began in November continued through December, as we experienced 168 water main breaks. That total is 52 breaks (45 percent) higher than the five-year average of 116 breaks for December, likely due to a season low water temperature of 39.1 degrees.

Mr. Brammell reported the work to repaint the Bardstown Road Tank was not begun until October due to high water demand and, as a result of cold winter temperatures and increasing water main breaks, the Chief Engineer instructed the contractor to suspend the tank painting until spring. To date, the contractor has completed all surface preparation, structural repairs to the roof, and application of two exterior coats and one interior coat of paint. Painting requires surface material and air temperatures above 40 degrees for proper adherence. The storage tank was returned to service in mid December. The contractor will be allowed to remobilize and complete the work in March when weather improves. Dr. Wise asked if the contractor would receive compensation for the delay, and Mr. Brammell responded the contractor costs associated with remobilization, surface preparation, and disinfection are estimated at \$65,000 and the contractor will be reimbursed for those.

Serving Customers Report Provided

Ms. Karla Teasley advised the December abandonment rate was 19.7% compared to 16.5% in November 2005, and 7.0% in December 2004. The year end rate was 8.9% compared to 5.6% in 2004. Total calls received and credit card transactions were well over 2004 year-end results. Additionally, we processed 15,000 new service deposits, also impacting call volume.

Ms. Teasley stated customer satisfaction dropped again in the fourth quarter from a third quarter Total Customer Satisfaction Index (CSI) of 842 to 839. All factors declined (including water quality, customer service, information and reliability) with the exception of price/value, which increased slightly. The year end average of 847 for the Total CSI meets the Level I goal but falls three points short of the Level II

goal. However, this establishes a new high for the yearly average, exceeding the previous high of 845 set in 2003. Customer satisfaction for the Service CSI dropped in the fourth quarter to 795 from the previous high of 806. The year end average of 801 exceeds the Level III goal for the Corporate Performance Award (800). This is also a new high for the year end average. The commercial service segment increased in the fourth quarter, but remained below satisfaction levels in the first half of the year.

The Louisville Metro Water Management Planning Council met December 16, 2005. The group discussed the Water Supply Planning Process, as well as the role and membership of the Council. Staff of LWC and MSD provided updates on the respective utility capital plans. The Council also endorsed the Technology Park, Crittenden Drive and Rose Island Road water pipeline projects and the Bass/Shirley and Transylvania Beach Road wastewater projects.

Closed Session Held

Ms. Wendy Welsh moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) and (g) respectively at 12:55 p.m. Dr. Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Welsh, and unanimously carried, the Board resumed open session at 1:02 p.m. No action was taken in closed session.

Human Resources Report Provided

Ms. Susan Lehmann provided an update about the Human Resources Management System, to which the Company converted on December 17th, with the first payroll run in the first week of January. Human Resource staff has received very positive feedback from employees regarding the Self Service functionality. Mr. Roger LeMaster, Internal Auditor, is completing an audit of the system conversion data and should have his report completed next week. The smooth transition resulted in very few problems needing correction, thereby enabling us to accelerate the implementation of the recently approved modules. The project remains about \$340,000 under budget.

Audit Committee Report Given

Ms. Wendy Welsh provided a report of the discussions held at the January 5, 2006 Audit Committee meeting. Mr. LeMaster had reported on the Procurement Card Audit, advising that controls have greatly improved, in part due to a monthly review process with our current vendor. A few transactions that should not have been charged to the employee's Company card had been reimbursed prior to the audit. A few of the transactions audited were taxed. Our controller submits a form to the state at year end to be reimbursed. Mr. LeMaster also reported one situation where a purchase was made for \$17,000, and because anything over \$10,000 invokes certain purchasing requirements, Mr. LeMaster has made a recommendation to review all such situations where employees have purchasing authority over \$10,000 to see if it is necessary and in keeping with Procurement policy.

Regarding the Rate Making Audit, in previous years, Mr. LeMaster has only validated billing rates and whether they are entered into the system correctly. This year he expanded the audit to include how the rates were made. He opined the controls were good, but could be improved by revising the fixed allocation factors used in the service allocation model and developing standards for the variance that will be allowed between the rates developed and the cost of services for classes of customers. Also, he made

a recommendation to consider automated technology for rate making and to create flowcharts and documented procedures, as well.

The Audit Committee approved a plan of activities for Internal Audit and a plan of topics to be discussed at each of four meetings for 2006. Finally, Mr. LeMaster reviewed the status of all outstanding issues from previous audits.

Riverbank Filtration Phase II Discussed

Ms. Kay Ball stated twenty-eight additional rock borings were completed in December pursuant to the Board's authorization in September 2005 to conduct additional preliminary engineering and subsurface investigations to further evaluate the presence of natural gas for a 6000' hard rock tunnel with horizontal collector wells capped at grade. The results were that natural gas was not encountered. Additionally, the investigations revealed a high quality rock, free of any fractures. Since no gas was encountered in these cores along the tunnel alignment, it is the opinion of Jordan, Jones & Goulding (JJ&G) to reclassify the project from gaseous to potentially gaseous.

With this investigation complete, the final design can now move forward on the 6000' hard rock tunnel with collector wells. The design is anticipated to be complete in late summer for a fall 2006 bid opening. The design changes and project delays require an adjustment to the project budget reservation from the current budget reservation of \$37,838,300 to \$40,424,800. The \$31 million construction estimate will be reviewed prior to bid to reflect the construction market at the time of bid. Ms. Ball reviewed the budget revisions. Mr. Miller advised this project is built into the Long Range Capital Improvement Plan, which is impacted by projects costs as well as what portion of the design work will be expensed and when. Dr. Wise asked whether we have any idea about bidder interest. Ms. Ball feels we will have more bidders interested because current information indicates fewer tunneling projects being bid fall of 2006 and because of the classification as potentially gaseous instead of gaseous. Because of high bid copying costs, Mr. Rick Johnstone suggested using a bid room where bidders can review plans before asking for a copy of them for bid situations where such a process is feasible.

Dr. Wise moved to establish a revised budget reservation in the amount of \$40,424,800, which includes an increase of \$1,966,000 to the JJ&G contract for a total revised contract of \$5,804,300, and authorize staff to proceed with the final design of the Riverbank Filtration tunnel and pump station at B.E. Payne plant. Ms. Welsh seconded, and the motion carried.

Strategic Plan Update: Discussion Held Regarding Additional Earnings Risk Appetite

Mr. Miller discussed the issue of earnings risks associated with new revenue initiatives. Louisville Water Company is updating its strategic plan to create revenue growth in order to offset increasing expenses and declining sales per customer. Several options for increasing revenues involve higher earnings risk than our current business model, which, because we have an exclusive franchise of an inimitable product, is fairly low. A water utility's appetite for additional earnings risk is typically a response to its anticipated growth in sales and expenses. If sales growth is neutral or positive while expense growth is low, then the utility's appetite for additional earnings risk should be relatively low because additional risk is not necessary to achieve earnings objectives. Likewise, if sales growth is low while expense growth is medium or high, then the utility's appetite for additional earnings risk should be relatively high because additional risk may be necessary to achieve earnings objectives.

Utilities sometimes consider expanding into ventures beyond their primary business that build upon their strengths in order to increase earnings. These ventures can either be horizontal or vertical integration

expansion. Horizontal integration involves acquiring additional business activities beyond the franchise area but at the same level of the value chain and is achieved by internal expansion (organic growth) or external expansion (mergers and acquisitions). These opportunities are pursued to achieve economies of scale to enhance profit margins. Vertical integration involves entering into the business activities of its upstream suppliers and its downstream buyers. These opportunities are pursued to improve coordination and capture new profits.

The earnings risk attributes for horizontal integration (taking on a new customer) are a function of the perceived permanence of the customer and the peak consumption factor for that customer. These risks are shared by all customers through the ratemaking process. Mr. Miller stated the risks associated with vertical integration of a water utility (participating in the business activities of its upstream suppliers and its downstream buyers) reside with the owner and should not be shared with the customers in the ratemaking process, since the owner is not required to pursue those opportunities in order to fulfill their franchise responsibilities. For any new revenue initiative, Mr. Miller feels the Board must consider the earnings risk to ensure that business risk controls are in place to limit the risk to an acceptable level.

Mr. Conner feels all this must be measured against the political risk of simply raising rates to generate revenue. Mr. Martin commented we have to consider other corporate structures for any vertical integration opportunity. Dr. Wise stated we must be careful to pursue only opportunities that our shareholder is comfortable pursuing. Mr. Conner stated the Mayor has encouraged us to consider these opportunities both at the Board's Strategic Planning retreat and at other meetings. He stated risks exist with both horizontal and vertical integration opportunities and we must be aware of and apply appropriate controls for those risks. Mr. Johnstone commented that any initiative that is a by-product of work we already do should be considered, whether it is for the purpose of reducing customer rates or providing a greater dividend to Metro Government.

Contract Awarded for Project 10233: Renovation of B. E. Payne Water Treatment Plant Clarification and Mixing Basin Complex

Five bids were received for renovation of the BEPWTP Clarification and Mixing Complex. The work includes replacement of mechanical equipment in six mixing-clarification systems; installation of electrical equipment, instrumentation, and controls; installation of lime and carbon dioxide feed systems; concrete rehabilitation; new handrails; and other miscellaneous improvements. This work will assure the water treatment processes will effectively and efficiently operate to meet LWC goals and regulatory requirements related to water quality; meet requirements of current building codes; and extend the operating life of systems which were placed into service in 1977.

The bids ranged from \$10,833,000 to \$15,921,000. The estimate by consultant engineer O'Brien & Gere was \$12,636,000. Review of the bid with the apparent low bidder indicated no discrepancies in comparison to the scope of work or satisfying the good faith effort toward MBE and WBE participation. Ms. Welsh moved to authorize the Purchasing Manager to award a contract in the amount of \$10,833,000 to Hall Contracting, Inc. for BEPWTP Clarification and Mixing Complex Renovation, and establish a project budget in the amount of \$13,335,270. Ms. Harris seconded the motion. Dr. Wise asked why we should decrease the budget since the project came in under budget. Mr. Huber advised it is to ensure we are accurately tracking percentage of Capital Improvement Program implemented. Upon vote, the motion carried.

Update Provided Regarding Water Sales to Central Kentucky

Mr. Huber advised a proposal has been submitted to the Bluegrass Water Commission. We have received no response to date. Kentucky-American Water Company, which serves the Lexington area, is required by the PSC to come up with a plan to address the water needs in their service area and has recently requested a hearing before the PSC.

Information Provided Regarding New EPA Drinking Regulations

On December 15, 2005, U.S. Environmental Protection Agency (EPA) promulgated two new drinking water regulations: the Long-term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR) and the Stage 2 Disinfection Byproduct Rule (Stage 2 DBPR). The LT2ESWTR aims to reduce the risk of disease caused by Cryptosporidium and other microorganisms found in surface waters. The Stage 2 DBPR builds on existing regulations by requiring water systems to reduce and maintain disinfection byproduct (DBP) levels below regulatory standards at each monitoring site in the distribution system. Together, these new regulations will improve protection against microbial contamination while reducing health risks associated with the byproducts of chlorine disinfection.

Both regulations require large water systems (serving more than 100,000 people) to conduct water quality monitoring and evaluation during the next three years to assess the existing water quality conditions of the source water and in the distribution system. Depending on the monitoring results, water systems may be required to implement advanced treatment technologies to comply with the new regulatory standards. Water systems serving more than 100,000 must comply with the additional treatment requirements by April 1, 2012. Based on historical water quality monitoring results, LWC will have no difficulties in complying with the DBP requirements as its average THMs and HAAs levels at all sampling sites were consistently below 40 ppb and 20 ppb, which is well below the 80 ppb and 60 ppb allowable for total trihalomethanes (THMs) and haloacetic acids (HAAs), respectively.

For the LT2ESWTR, LWC will be likely placed in EPA's Bin 2 category based on previous monitoring results. This will require an additional 1-log removal of particles (for Cryptosporidium and Giardia) at both the B.E. Payne and Crescent Hill treatment plants. Due to the planned implementation of riverbank filtration, the B.E. Payne plant is well positioned for compliance before the 2012 deadline. However, the Crescent Hill plant will have difficulties in meeting the requirements if no additional treatment improvements are made. Currently, staff is piloting the advanced treatment technologies for the Crescent Hill plant, considering riverbank filtration, ozone with biological filtration, and membrane technology. We anticipate a final recommendation will be made to the Board in 2007, thus providing a five year design and construction period to complete the improvements before the deadline.

Consideration of New Board Policies

Mr. Miller reviewed two new board policies for consideration. Staff is proposing an Investment policy to state the board's position on how it invests its money. Staff is proposing a Debt Management policy to communicate that we follow best practices in the industry on how we manage our debt. Mr. Miller advised Mr. Martin has raised a question regarding the restriction against using debt proceeds to finance current operations. Mr. Martin stated he feels we should not restrict the Company on this matter. Mr. Miller responded this is already a restriction in the current bond resolution. Mr. Martin also sought clarification of whether "net revenues" is "net income," and Mr. Miller confirmed it is.

Certification Provided for Projects and Change Actions Approved During Fourth Quarter 2005

Mr. Huber reported that the following projects and change actions within his authority were approved in the fourth Quarter of 2005 in accordance with the Capital Projects Authorization Policy and Procedure. Projects and change actions that needed additional BOWW action were taken to the board for approval.

02466	Bashford Manor Ln relocation	
	Change in project budget estimate =	\$ 82,825
02508	Hi-View Ln main replacement	
	Change in project budget estimate =	\$ 24,157
10287	Jackie Way main replacement	
	Change in project budget estimate =	\$ 401,900
11101	Norfolk-Southern Intermodal Facility relocation	
	Change in project budget estimate =	\$ 53,350
10233	Renovate Coag Clarifier, Softening Mixing, Clarifier, Stabilization Systems at BEPWTP	
	Change in project budget estimate =	\$1,713,865
10382	Kentucky St main replacement	
	Change in project budget estimate =	\$ (109,050)
03615	Chemical Feed System Improvements	
	Change in project budget estimate =	\$ (250,000)
11109	Lewiston Dr main replacement	
	Project budget estimate =	\$ 559,000
11174	Bob-O-Link main extension	
	Project budget estimate =	\$ 153,720
11195	Renovate North Filters at CHFP	
	Project budget estimate =	\$ 360,000
03523	Crittenden Dr II main replacement	
	Project budget estimate =	\$ 1,539,895
10227	English Station elevated water tank	
	Project budget estimate =	\$ 1,660,000
10234	Chemical Feed Systems Improvements at BEPWTP	
	Project budget estimate =	\$ 315,000
10577	Jewish Hospital Muhammad Ali Blvd relocation	
	Project budget estimate =	\$ 57,300
10239	Human Resources and Payroll Information System Replacement	
	Change in contract (no change in estimate) =	\$ 81,750
11162	Waterford Rd water main extension	
	Project budget estimate =	\$ 85,500
11141	Old Henry Crossing Lot 3 Phase A water main extension	
	Project budget estimate =	\$ 74,500
11172	Old Ford Rd 16" transmission main	
	Project budget estimate =	\$ 576,000
99402	Riverbank Filtration – Phase II	
	Change in project budget estimate =	\$ 615,500

99407	Goshen Elevated Storage tank – Cash Flow	
	Latest approved budget estimate =	\$ 2,207,100

Certification Provided for Contracts Awarded During Fourth Quarter 2005

Mr. Huber certified the following contracts have been awarded in accordance with the Purchasing Policy and Purchasing Procedures from October 1, 2005 through December 31, 2005, except for work performed for a transmission pipeline installation. This discrepancy was discovered at the payment stage as a result of an internal control for cash disbursements that prevented payment for that work. The work involved was performed by a construction company working as a subcontractor to a developer on an adjacent developer-funded pipeline project. As a change action, staff-authorized the work as a part of the developer-installed distribution main extension contract. This was investigated by the Procurement Process Owner and the Controller. Upon their review and recommendation to the Bids and Awards Committee, it was determined that this work should have been awarded either through a sealed bid process or as an assignment from the current LWC Transmission Contingency Contract. Ultimately the same contractor performing the work was an approved WBE contractor on the Contingency contract. It was decided to handle this as a ratification of an assignment from the contingency contract. This matter has been directed to the Internal Auditor for additional review.

01557	Cardinal Hill Secondary Supply - Phase 2B - Assignment from Bid #05-10 - Contingency Contract for Transmission System Emergency System Repairs and Capital Improvements Southern Pipeline and Construction Co. (CWBE)	\$206,024
04-77 05-05686	CPI Renewal - 05-05686 Discontinuing Small Water Services Miller Pipeline	\$70,793
04-77 05-10601	CPI Renewal - 05-10601 Installation of 3/4" and 1" Water Service Connections Basham Construction	\$982,128

Consideration of Policies for Adoption

Ms. Barbara Dickens reviewed the Access to Official Meetings and Records and Corporate Charitable Donations policies being considered for adoption. Dr. Wise asked whether we would respond to the request from the Senior Games for water, facility space, a loaned executive, and a donation. Mr. Huber advised we have already provided facility use for their office, and we are reviewing whether we can provide the amount of water requested and a loaned executive. This policy prevents the company from providing a monetary donation. Mr. Martin asked whether public records are defined somewhere, and Ms. Dickens responded they are defined in the statute and legal interpretations of the statute. Mr. Miller reviewed the Corporate Governance policy being considered for adoption. Mr. Martin moved to adopt the new Access To Official Company Meetings and Records policy, the revised Corporate Charitable Donations policy and the new Governance Policy, attached hereto and incorporate herein. Ms. Marita Willis seconded, and the motion carried.

Changes Made to Practices to Support Corporate Governance Policy and Procedure

Mr. Miller reviewed changes to be made to the Audit Committee Charter, the Code of Ethics for Senior Financial Officers, the Whistle Blower Procedure and the Executive Incentive Plan to ensure continued public confidence in our financial statements. Ms. Welsh moved to adopt the revisions to those documents, as attached hereto and incorporated herein by reference. Ms. Willis seconded, and the motion carried.

2006 Amendments to Company Service Rules and Regulations

Ms. Karla Teasley advised the extensive 2004 review resulted in comprehensive changes in 2005 to the Service Rules and Regulations. In an effort to maintain the Service Rules and Regulations and avoid comprehensive changes, the same cross functional team that reviewed and proposed the changes for 2005 was re-convened. Suggested revisions were recommended to the team by the appropriate process or system, through weekly meetings beginning in October 2005. All suggested changes were reviewed by upper management and General Counsel to ensure consistency and enforceability. Ms. Margaret Harris moved to approved amendments to the Service Rules and Regulations, as attached hereto and incorporated herein by reference. Ms. Willis seconded, and the motion carried.

Contracts Awarded for Dental, Life and Disability Insurance Plans and Authorization Given to Award Contract for Health Insurance Plan

Ms. Lehmann advised LWC staff has been working with our independent insurance brokers, Rob Gipperich of Aon and Cornell Starks of Starks and Associates, to evaluate proposals from health, dental, life and disability insurance carriers for the plan year beginning March 1, 2006. Staff is also in contract negotiations with AFSCME Local 1683 (current contract expires on January 31, 2006). Employee benefits (medical, pension, disability, and life insurance) are a significant financial investment to LWC and of major importance to our employees. A considerable amount of time has been spent in the

Collective Bargaining process balancing the welfare of our employees with the costs to the Company and employees. The Labor-Management Negotiating Teams are continuing to meet to finalize the economic aspects of the contract, including benefit plan design and coverage.

Open enrollment for the 2006 benefit plan year is scheduled to begin on February 6, 2006. Staff continues to work with the insurance carriers to negotiate the premiums for our current plans and the premiums associated with alternative benefit plan designs. Staff has received a proposal for renewing coverage with Humana at a projected annual premium of \$4,365,868 (projected company cost is \$3,972,940). This represents a 16.6% increase in premiums from 2005 to 2006. The 2006 budget included a 15% increase for medical coverage -- 1.6% lower than Humana's initial quote. Preliminary collective bargaining discussions indicate a potential for plan design changes, which would reduce the projected increase. In the event that we are not able to negotiate plan design changes with Local 1683 and/or reduced premiums with Humana, our 2006 premiums would increase 16.6%.

Delta Dental will continue to provide dental coverage for LWC in 2006. The current projected increase in premiums is 10%, which represents an annual premium of \$341,294 (projected company cost is \$300,339). The 2006 budget included a 10% increase for dental coverage. This insurance plan is also included in the collective bargaining negotiations. Under current board authorization, the CEO has authority to award this contract. Monumental Life Insurance Co., will continue to provide Group and Dependent Life coverage for LWC in 2006. The projected net premium to the company for 2006 life insurance coverage is \$132,324. The CEO has the authority to award this contract. Fees for the administration of the self-funded short-term disability plan (STD) and premiums for the fully insured long-term disability plan (LTD) will increase 25% and 0%, respectively. The total cost to LWC for CIGNA's administrative fees for these plans are \$89,202 (STD = \$8,605; LTD = \$80,597). The two disability benefit programs do not require approval by the Board of Water Works.

Ms. Welsh moved to authorize the CEO to award a contract to Humana, Inc. for medical insurance pending the outcome of contract negotiations with Local 1683 for plan changes. Dr. Wise seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present a 2:53 p.m.

There being no further business, the meeting was adjourned at 3:06 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
February 14, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Kathy Schroeder, Business System Owner, Supplying Human Resources
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

The regular meeting of the Board of Water Works was held on Tuesday, February 14, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:40 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Dr. Joseph Wise moved to approve the minutes from the Regular Meeting held January 10, 2006, seconded by Mr. Gerald Martin, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber stated there have been media reports regarding downsizing at Ford Motor Company, although no jobs have been lost in the Louisville area. Together the two Ford Truck Plants here locally would comprise the largest commercial customer of Louisville Water Company. Currently, our fleet consists of approximately 60% Ford vehicles. Our vehicles are purchased through a competitive bid or the state pricing contract, which typically has excellent prices for Ford vehicles. Of our total fleet, only 2 vehicles are foreign-made. Mr. Martin asked if Metro Government gives any preference to local suppliers, and Mr. Rick Johnstone confirmed there is. Mr. Huber stated we do not currently give preference to local suppliers.

Financial Report Provided

Mr. Miller stated the auditors from Strothman & Company have concluded their field work, and the audit was thorough but uneventful. The audit findings will be presented to the BOWW Audit Committee at the Audit Committee's next meeting in April.

Mr. Miller reported January financial results are not ready because of the audit recently concluding, the implementation of a new labor cost interface with the new payroll system, a different organizational structure table from 2005 to 2006, and a new revenue budget allocation method.

He reported preliminary 2005 operating revenues of \$115,230,255, which are \$5,776,663 or 5.3% more than budgeted and \$11,768,202 or 11.4% more than 2004. YTD Operation and Maintenance Expenses of \$47,288,399 are \$434,936 or 0.9% more than budgeted and \$3,685,830 or 8.5% more than 2004. YTD Total Operating Expenses of \$76,298,622 is \$1,253,641 or 1.7% more than budgeted and \$6,274,503 or 9.0% more than 2004. YTD Net Operating Income or \$38,931,632 is \$4,523,022 or 13.1% more than budgeted and \$5,493,699 or 16.4% more than 2004. YTD Total Net Non-Operating Expense of \$4,069,887 is \$1,017,030 or 20.0% less than budgeted and \$799,031 or 16.4% less than 2004. YTD Net Income of \$34,861,746 is \$5,540,051 or 18.9% more than budgeted and \$6,292,730 or 22.0% more than 2004. Capital Expenditures through December were \$61,550,042 or 67.5% of the 2005 Capital Budget of \$91,148,054.

Operations Report Provided

Mr. Greg Heitzman presented the Operations report for January. The average production rate last month was 113.6 MGD, which is 5.9 percent lower than the 2005 January production of 120.8 MGD and 4.4 percent lower than the five-year average January production of 118.8 MGD. Lower than normal production may be related to fewer main breaks in January. Twenty-seven main breaks were repaired in January, which is 80 percent below the previous five-year average of 129 breaks. This uncharacteristically low number of breaks follows an exceptionally high period of break activity during the final quarter of 2005. Breaks repaired in that quarter totaled 332, which was 40 percent higher than the previous five-year average for fourth quarter activity. Lower break activity in January is largely attributable to unseasonably mild weather and water temperatures remaining above 40 degrees.

Mr. Heitzman stated Hurricane Katrina has had a significant impact on key construction materials, including PVC and ductile iron pipe. Compared to a year ago, PVC prices are up 30 percent, copper tubing and ductile iron pipe is up 17 percent, and cement prices have increased 6 percent. Cement is expected to increase further due to demand. Another major cost driver is the consolidation occurring in the industries that supply many of our key materials. The small tank market is down to two competitors in this region. The large tank market has four suppliers. Additionally, increased air and water regulations are significantly impacting the cast and ductile iron industry. We expect to see major suppliers such as US Pipe and American Cast Iron Pipe pursue overseas manufacturing and phase out operations in the United States, due to increased air quality regulations. This will impact our material supply chain with respect to cost, quality, and availability.

Mr. Heitzman advised we are considering alternatives to the storage of chlorine at the Crescent Hill Treatment Plant. A consultant has evaluated the alternatives, feasibility and risks and we have received the report. We will be meeting with residents of the area at a meeting to be held March 1st at Field Elementary, where we will gather input on the project prior to making a decision of how to address this situation.

Mr. Martin commented about the low production compared to last year and how that impacted water loss for those periods, and Mr. Huber responded that we had significantly fewer main breaks this January compared to last year and that means less water that was ultimately lost in main breaks was produced. Mr. Johnstone inquired whether the expected reduced frequency of main break activity was considered in the analysis of Riverbank Filtration for the CHTP, and Mr. Miller confirmed it was factored into the analysis. Dr. Wise asked what would be on the agenda of the neighborhood meeting regarding the chlorine storage issue. Mr. Heitzman stated he would provide an overview of the basic information concerning the issue and then allow residents to provide feedback regarding this matter.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report. In many new subdivision developments, LWC is encountering rock when installing new services for water meters. When this occurs, LWC uses a rock saw that cuts the base grade pavement and the curbs in the subdivision. Metro Public Works has informed LWC that they have a very specific standard for repairing these curb cuts by re-pouring the concrete one foot on either side of the cut. This standard is different than our current practice and will increase the cost of each service in rock by approximately \$700. LWC is working with a sub-committee of the Home Builders Association on implementing the use of service sleeves, which will eliminate the need to use the rock saw in new subdivisions and/or increase the cost of installing these services by the additional repair costs. We will also evaluate ways to control our existing costs until such time that we can implement a new policy or practice for service sleeves and adjust service installation fees accordingly.

Wholesale Customer Meeting - LWC hosted a meeting of our wholesale customers on January 20, 2006. The Company shared information on the 2006 Capital Plan, advanced treatment and transmission progress, and Initial Distribution System Evaluation (IDSE) sampling. In addition, detail was provided about the wholesale water rate increase proposed to be effective May 1, 2006, and the cost variables and drivers for this increase.

Ms. Teasley provided a brief update of the legislation being discussed in the current legislative session. To date, roughly 700 bills have been introduced in the 2006 Session of the General Assembly. Bills of interest to LWC include several eminent domain bills. Government Relations is working with the Kentucky League of Cities and the Kentucky Farm Bureau on language that will maintain LWC's current rights for eminent domain. No significant retirement bills have been introduced. Other bills of interest include several bills that will streamline the administrative hearing process and assure that administrative regulations evaluate the cost/benefit of the regulations. Another bill would award treble damages against anyone liable for fish kills that may occur because of releases of chlorinated water into a stream. This bill is still in committee and has generated a lot of opposition. Dr. Wise asked if this has been a problem for LWC, and Ms. Teasley stated it has not.

Compensation Committee Report Given

Mr. Conner stated the report of the discussions held at the January 30, 2006 Compensation Committee meeting is being deferred until a future meeting because the Committee requested staff to do some follow up work on some of the 2006 goals.

Union Contract Ratified

Ms. Susan Lehmann stated in October, 2005 union representatives of Local 1683 and LWC management began labor contract negotiations and completed their work on January 13, 2005. The previous contract

covered the period of February 1, 2000 to January 31, 2006. The team spent the first month of negotiations reviewing each rule in the current Collective Bargaining Agreement and making language changes to enhance and clarify the intent of those rules. The next several months were devoted to economic issues. The team analyzed financial data with respect to overhead expenses (labor, medical, pension, disability, federally mandated benefit programs, such as Workers' Compensation and FICA,); developed estimated five year cost projections based on trends and past experience; and studied benefit programs of other organizations. As a team, the Union and Management negotiators were committed to providing the best contract for our employees, while at the same time developing plan design recommendations to retain our status as "Contractor of Choice". They were successful in these endeavors. On January 31, 2006 the union membership voted to accept the new contract on the first vote and agreed to the improvements in the language as developed by Local 1683 and LWC management.

The contract is a five-year contract covering 2/1/06 to 1/31/11. We have agreed that wages will be increased 3% on 2/1/06 plus a 1% lump sum bonus for approving the contract on the first vote, 2.5% increase plus 1% lump sum on 2/1/07, and 3% increase each year thereafter. Medical Insurance for 2006 will involve a change in the prescription plan to a 3-tier plan and the elimination of employee only free coverage. The parties agreed to begin work on future plan changes to more consumer-driven plans. The Insurance Team will begin meeting in 2006 and, based on plan experience and premium increases, the team may make recommendations move to a more consumer driven plan. For 2007, we expect a change in the PPO plan design. For 2008, there may be possible plan changes to more consumer- driven plans, based on plan experience and premium increases, and the premium split between employee and employer will be adjusted to a 15%/85% split. From 2009-2010, we will continue to monitor plan for possible plan changes, based on plan experience and premium increases. In terms of CERS, we will implement a 1 year waiting period for new hires effective February 1, 2006. In another effort to keep health care costs down, we are exploring the utilization of a Health Care Incentive Plan, in which employees may be eligible to be rewarded for performance during years when the company exceeds financial goals. The reward would be allocated to offset the employee's share of medical costs. Finally, the team created new rules, in response to issues raised since the last contract, involving Uniform allotment, meal money, and job elimination.

John Huber executed the union contract on behalf of LWC. Ms. Wendy Welsh moved to ratify the Collective Bargaining Agreement between LWC and Local 1683 of the American Federation of State and Municipal Employees. Dr. Wise seconded, and the motion carried.

Contracts Awarded for Health, Dental, Life and Disability Insurance Plans for LWC Employees and Dependents

Ms. Lehmann stated LWC staff presented preliminary health, dental, life, and disability insurance premiums for the 2006 benefit plan year at the January 2006 Board meeting and received authority to award contracts for medical, dental, group life and accidental death, short term and long term disability pending the outcome of contract negotiations with Local 1683. Benefit plan changes included in the contract language were approved by Local 1683. The Health plan was awarded to Humana at a negotiated premium increase of 11.5%, the dental plan to Delta Dental of Kentucky with no premium increase over last year, the Life and Accidental Death and Dismemberment to Monument at no premium increase, the Short Term Disability to CIGNA at a premium increase of \$.32 per person for administrative services only; Long Term Disability to CIGNA at no premium increase.

Budget Increased for Phase I, IIA and IIB and Authorization to Proceed to Final Design and Bid for Phase IIB and Bid Awarded for Projects 01557, 11256 and 11264: Cardinal Hill Secondary Transmission Supply

Mr. Heitzman stated the Capital Improvement Plan for 2006 includes \$7.2 million for construction of a secondary transmission supply to the 30 million gallon Cardinal Hill Reservoir. The original scope of the project included construction of 6,500 feet of 24-inch main and 15,800 feet of 30-inch transmission main. During design, the project was initially split into two phases: Phase I, which includes the section of main from St. Andrews Church Road to the reservoir; and Phase II, which extends from the reservoir along St. Anthony Church Road and Outer Loop to New Cut Road. In order to coordinate our work with new development of the Estates of St. Anthony, Phase II was further subdivided into Phase IIA, which includes the section from the reservoir to St. Anthony Church Road and Phase IIB, which includes the remaining alignment along St. Anthony Church Road and Outer Loop to New Cut Road. Construction of Phase IIA in the Estates of St. Anthony was recently completed by Southern Pipeline using the LWC Transmission Contingency Contract. A savings of approximately \$200,000 on the final costs of the Phase IIA portion of the project is anticipated from the \$850,000 original estimate, due to coordination with the development.

Six bids were received from pre-qualified contractors to furnish and install 30 feet of 60-inch concrete water main, 1,360 feet of 48-inch water transmission main, and 4,525 feet of 30-inch water transmission main in easements and right-of-way from St. Andrews Church Road to the Cardinal Hill Reservoir for Phase I of the project. The project allowed bidders to use ductile iron, concrete, or steel for the 30 and 48-inch transmission mains, while the 60-inch pipe was specified as concrete. Steel was included as a new material offering on this project to encourage competition among bidders. MAC Construction and Excavating, proposing ductile iron pipe, submitted the lowest responsive bid in the amount of \$2,429,400 resulting in a total project cost of \$3,056,500. The bid was reviewed and determined to comply with the LWC MBE/WBE program. The low bid of \$2,429,400 is 13.4 percent above the engineer's estimate of \$2,141,892. With six bidders, the bids represent the market price for the specified scope. Materials for the project have increased 51 percent for valves and distribution piping, while engineering has increased for design and construction inspection services. Ms. Margaret Harris moved to authorize the Purchasing Manager to award a contract in the amount of \$2,429,400 to MAC Construction and Excavating to install the water facilities associated with Phase I of this project, and to increase the project budget for this phase of work to \$3,056,500. Mr. Martin seconded, and the motion carried.

Dr. Wise inquired how engineering and inspection costs are determined. Mr. Heitzman stated those costs are not tied to the total cost of the project. We get engineering costs on a not-to-exceed contract basis but are billed on an hourly basis. If the scope is changed, it will usually increase the actual costs of engineering. This line item includes both in-house and outside costs.

Total project costs have increased 2.8 percent over the 2006 budget estimate. Ms. Welsh moved to approve a revised budget of \$7.4 million and to proceed to final design and bid of Phase IIB. Dr. Wise seconded, and the motion carried.

Second Reading and Approval of New Board Policies on Debt Management and Investment

Mr. Miller stated staff had developed the Debt Management Policy and Investment Policy based on best practices identified by the Government Finance Officers Association. The policies were offered for a first reading at the January 2006 meeting of the Board of Water Works. Following the first reading, staff has modified the third statement of the Debt Management Policy in consideration of feedback received at that meeting. That statement now reads "*The Board of Water Works shall not issue long-term debt obligations or utilize long-term debt proceeds to finance current operations of the Louisville Water Company.*" Staff is developing procedures to implement these policy statements. The procedures will also be based on best practices identified by the Government Finance Officers Association. Mr. Martin

moved to adopt the Debt Management Policy and Investment Policy as presented. Dr. Wise seconded, and the motion carried.

Scope and Budget Increased and Authorization Given to Proceed to Final Design and Bid for Bullitt County Water Improvement Program/Bullitt County Extension

Mr. Heitzman advised the Bullitt County Extension Program has a project for the extension of water mains in the Lickskillet Area. The project was originally presented to the Board of Water Works as a two-thirds majority petition project. Since then, the project has received Kentucky Infrastructure Authority (KIA) grants totaling \$393,478 and the project scope has increased. The original project estimate was presented to the Board on July 13, 2004 in the amount of \$775,500 and funding sources included tapping fees and the Bullitt County Water Reserve (BCWR). The original scope included approximately 23,500 LF of distribution water main. The increased scope includes the addition of High Pine Drive (1,300 LF) and Big Spring Court (450 LF) and additional extensions on East Indian Stone (1,100 LF), Big Spring Drive (1,700 LF), and Lickskillet Drive (2,200 LF). The total additional scope is 6,750 LF that increases the project total from 23,500 LF to 30,250 LF. The increased budget includes an additional \$169,480 in the original project budget due to anticipated rock quantities and \$271,430 for the additional project scope, yielding a total project cost of \$1,216,410. Mr. Martin moved to increase the scope from 23,500 LF to 30,250 LF; increase the budget of record from \$775,500 to \$1,216,410; and proceed with final design, advertisement for bid, and construction of this project. Ms. Harris seconded, and the motion carried.

Budget Increased for Project 03603: Goshen Area Main Replacement Program

Mr. Heitzman reported Louisville Water Company entered into a contract with Southern Pipeline Construction Company in October 2003 for \$638,700 to complete main replacement, grid-tie, and associated hydrant and service work in the Goshen area. The project was included in the plan to upgrade the Goshen distribution system to LWC standards, after the acquisition in 2002. The project benefits include improved system pressure, flow capacity, and reliability for the Goshen customers. The project budget of record was \$777,700.

The project included relocation of customer services from backyards and basements to LWC's standard location in front yards. Under the terms of the contract with Southern Pipeline, their work was limited to main and service work located within public right-of-way or LWC easements. Service modifications to internal plumbing on private property, such as moving meters out of homes into the front of properties, were performed by Southern Plumbing and Heating, utilizing their contingency contract with LWC. Initially, these services were estimated to cost \$52,000 (\$800/service) for 65 customers.

In November 2004, the Board of Water Works approved an increase of \$161,030 to the contract with Southern Pipeline for extra work related to water mains, services, and hydrants. At that time no adjustment was made to the estimate for the work being performed by Southern Plumbing or to the estimate for materials and engineering labor. The final cost for the services provided by Southern Plumbing exceeded the estimate by 390 percent. The increase was due to an additional 25 services needing relocation and a higher unit cost for each service that was relocated. Many service relocations required significant internal plumbing alterations (bores through basement walls) and significant restoration on private property. An increase in the cost of LWC-supplied materials resulted from the need for additional pipe materials to complete the added scope of work and recent increases in material prices from suppliers. Further, staff underestimated the engineering and inspection labor associated with the non-standard Goshen distribution system.

Overall, this project increased 75 percent over the original budget. Staff did not present the Southern Plumbing contract change order or the increased costs for material and labor to management in a timely manner. After review of the project, the scope of work and prices paid are appropriate; however, the project was not managed within the controls and expectations established by the Board. The budget increase should have been presented for approval to the Board in advance of work completion. Management is reviewing this incident and other capital projects to assure appropriate authorization is granted in advance of work being performed. Any findings will be reported to the Board in March.

Mr. Conner stated there are two issues: one is the ratification of the increased budget and two is the accurate estimation of the number of services for this project. Mr. Heitzman stated it is also that we did not accurately estimate the cost per service correctly. Mr. Huber commented the Project Manager should have been tracking costs as the project progressed, not simply at the end of the project. Mr. Johnstone asked if there is a reserve in Goshen. Mr. Heitzman stated the Goshen Reserve results from the rate deferential and is used for these costs. Ms. Teasley added the restoration costs were also higher than expected. Mr. Johnstone stated that in looking at this and the Cardinal Hill Reservoir project, we are always needing to increase the budgets of the projects and he hopes we are considering the long-term planning impacts of doing so. Mr. Huber noted that we certainly look at it from the standpoint of that particular project but also from the impact to the entire long term capital program. Ms. Teasley added we will come to the board at a future meeting to update them on total costs of upgrading the Goshen system and the status of the Goshen Reserve account. Dr. Wise moved to ratify the increase of the project budget to \$1,361,410. Ms. Welsh, seconded and the motion carried.

Budget Established and Preliminary Engineering Authorized for Project 10231: Crescent Hill Plant Filter and Backwash System Renovations

Mr. Heitzman advised funds are proposed under the 2006 Capital Budget to renovate filtration and backwash systems at Crescent Hill Filter Plant (CHFP). The CHFP filtration system consists of four distinct banks of filters, identified as the North, South, East, and New East filter galleries. These filters were constructed sequentially between 1898 and 1956. Previous renovations consisted of replacement of filter underdrains and replacement of gravel, sand, and anthracite filter media. The backwash system consists of two storage tanks, totaling approximately 400,000 gallons, which provides the water supply to clean the filters. The waste filter backwash water is collected and transported to the B.E. Payne plant settling lagoons. The last major renovation of the filter system was conducted in 1994 to the South filter gallery: the media and backwash was renovated and an air-scour system was installed. In 2006, the media is being replaced in six filters of the North filter gallery to provide interim filter capacity while work is being conducted on the East filter gallery and on the basin complex at the B.E. Payne plant.

The scope of this proposed project is to install new underdrains, media, valves, and filter-to-waste piping in the East and New East filter galleries to increase the filtration capacity from 126 MGD to 195 MGD, and produce water quality that exceeds current and future regulatory requirements and LWC goals. The backwash system will be replaced with an air-scour system capable of supplying increased pressure and volume of wash water to clean the filter media. The preliminary engineering phase of this work will focus on selecting the underdrain, media, and backwash systems that best satisfy these hydraulic and water quality objectives. Based on experience with the B.E. Payne filter renovation project, staff proposes to use Camp, Dresser and McKee Engineers to perform a preliminary engineering and budget estimate for the work. The Preliminary Engineering Report and budget will be presented to the Board prior to final design and advertisement for bid. Dr. Wise moved to proceed with preliminary engineering and to establish a project budget in the amount of \$11.7 million for Project 10231: Crescent Hill Filter Plant Filter and Backwash Systems Renovation. The procurement of the preliminary engineering services from Camp Dresser &

McKee Engineers will be within the authority of the President and CEO. Ms. Harris seconded, and the motion carried.

Closed Session Held

Mr. Martin moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) at 1:55 p.m. Ms. Welsh seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Marita Willis, seconded by Mr. Martin and unanimously carried, the Board resumed open session at 2:13 p.m. No action was taken in closed session.

Executive Session Conducted

The Board went into Executive Session without management present at 2:13 p.m.

There being no further business, the meeting was adjourned at 2:30 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
March 14, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Ed Chestnut, Assistant to the President
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Mr. Vince Guenther, Process Owner, Providing Governmental Relations

Visitors:

Mr. Peter Naaka, "Save Reservoir Park"
Ms. Mary Barbosa-Jerez, "Save Reservoir Park"
Ms. Sybil Alt, "Save Reservoir Park"

The regular meeting of the Board of Water Works was held on Tuesday, March 14, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Mr. Conner stated the Compensation Committee report was inadvertently left off the agenda. Ms. Margaret Harris moved to add the report to the agenda, Ms. Wendy Welsh seconded, and the motion carried.

Public Expression Held

Mr. Peter Naaka, representing the Save Reservoir Park Organization in Crescent Hill, read a statement to the Board regarding the Board's consideration of constructing a chlorine facility on the Company's grounds in Crescent Hill off Reservoir Avenue. The statement, in total, read:

On behalf of the people of Crescent Hill and the larger Louisville community. Save Reservoir Park (.org) offers the following response to the Louisville Water Company's (LWC) March 1, 2006 presentation regarding the proposed conversion of meadow space in Reservoir Park to a chemical storage and processing facility site.

The more than 2,000 signatures gathered in past weeks attest to the importance of the Reservoir Park meadow as a vital community space. We applaud LWC's efforts to move away from the use of liquefied chlorine gas toward a safer process of water chlorination, and we appreciate LWC's willingness to reconsider initial plans targeting the meadow area. However, subsequent conversations with area neighbors indicate that the March 1 meeting raised more questions and concerns than were answered.

Greg Heitzman (LWC vice president of operations and chief engineer) and Vince Guenther (LWC manager for government affairs) have admitted that recommendations of Atlanta consulting firm JJ&G failed to consider community concerns. LWC's more recent commission of feasibility studies for four other locations at the Frankfort Avenue site however, do not adequately address concerns for the preservation of green, park space for current and future generations, especially in light of LWC Board President John Huber's March 1 comments indicating that LWC regards the entirety of Reservoir Park (including the golf course, tennis courts and aquatic center) as potential sites for future LWC facility growth.

One of the grounding arguments of Save Reservoir Park (.org) is that while the LWC maintains legal control of the properties in its care, the property itself is owned by the citizens of Louisville. Their ownership is a direct result of LWC's status as a publicly owned entity, and the fact that the land is deeded to the City of Louisville. We assert therefore, that all citizens of Louisville (and residents of Crescent Hill, in particular) have a vested interest in the use of the land in Reservoir Park, and must be included in any potential changes in the use of that property.

Neighbors also question whether all reasonable alternatives to on-site chemical production have been fully addressed. At the meeting on March 1, LWC presented three options for transition from the use of liquefied chlorine gas: 1) trucking in 12% hypochlorite ("bleach" roughly two times as strong as household bleach); 2) building a 12% production facility (which would still require liquefied chlorine gas as part of the process); and 3) building a 0.8% production facility (which would produce hypochlorite from salt).

Though Heitzman indicated that trucking in bleach would be nearly as cost-effective as the proposed .8% plant, LWC discarded the first two options - because heavy snows or storms could disrupt delivery by truck in the first case, and because the danger of chlorine gas would not be completely eliminated in the second. However, since the meeting, several citizens have learned that 12% hypochlorite is a readily available commercial product that can be delivered safely via railcar, in rubber-lined tanks. In early 2001, for example, the Cleveland Ohio water works successfully replaced deliveries of liquefied chlorine gas with rail delivery of 12% hypochlorite. Louisville could do the same, taking advantage of reliable rail delivery and good stewardship of public funds.

In addition, in order to comply with new federal regulations, LWC must implement advanced water treatment options (riverbank, ozone and biological filtration, and membrane technologies) at the Crescent Hill Plant by 2012 - implementations that will reduce present chlorine requirements by approximately one half, making the proposed facility 100% oversized. With those changes a mere six years away, a capital expenditure of between \$7 and \$13 million for a new facility, not to mention the loss of an historically important community park space, seems short-sighted, at best.

Why not purchase rail-delivered hypochlorite for the six years in question, and revisit costs, options and locations in the near future? On LWC's present course, we see a possibly browner future in Crescent Hill, where our meadow is gone, and the large obsolete concrete coagulation and filtration basins - basins that could have been removed

and refurbished to provide space for newer technologies - sprout grass and weeds from their seams.

We believe that the plans of the LWC are well-intentioned; but they are poorly-conceived. That LWC is working against the goals of our Metro government, the mayor, Cornerstone 2020, and the Crescent Hill Comprehensive Neighborhood Plan is not an insignificant side issue. A green city is, quite simply, a better city. At a time when the City of Louisville is buying land on its perimeter to use as parkland, it makes little sense to describe and treat the Reservoir Park meadow as "vacant land" as the LWC does in their February Board documents. That meadow is not vacant land. It is home to more than 40 mature trees, and every day hosts children and their families for games of tag, quiet walks and meditation. It is a vital part of Louisville's quality of life, and it belongs to us.

We are committed to the preservation of Reservoir Park as both a nationally unique public park space and a state-of-the-art water "works facility, even if it means the LWC must sacrifice its desire to produce chemicals on site at the present time. And we will engage LWC, its public advisory board, members of Metro Louisville government and the citizens of greater Louisville in order to raise awareness and understanding and find a long-term answer that benefits both LWC and the community.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the Regular Meeting held February 14, 2006, seconded by Ms. Marita Willis, and the motion carried.

Financial Report Provided

Mr. Robert Miller provided the financial results through February 2006. Operating Revenues for February of \$9,047,057 are \$54,373 or .6% less than budgeted and \$682,078 or 8.2% more than February 2005. Operation and Maintenance Expenses for February of \$3,792,405 are \$380,153 or 9.1% less than budgeted and \$433,857 or 12.9% more than February 2005. Total Operating Expenses for February of \$6,199,057 are \$430,831 or 6.5% less than budgeted and \$603,748 or 10.8% more than February 2005. Net Operating Income for February of \$2,848,000 is \$376,458 or 15.2% more than budgeted and \$78,330 or 2.8% more than February 2005. Total Net Non-Operating Expense for February of \$305,923 is \$67,361 or 28.2% more than budgeted and \$62,846 or 25.9% more than February 2005. Net Income Before Distributions and Contributions for February of \$2,542,077 is \$309,097 or 13.8% more than budgeted and \$15,484 or .6% more than February 2005. Capital Expenditures through February were \$7,744,231 or 8.95% of the 2006 Capital Budget of \$86,529,148.

Mr. Miller discussed the Statement of Cash Flows through the end of February, showing a cash balance YTD of \$6,187,091, which is unrestricted. Mr. Martin remarked this is a positive addition to the financial reports. Mr. Martin inquired why the Contributions in Aid of Construction are so low. Mr. Martin stated this does not typically come in level amounts, but depends on projects being done at the time.

Operations and Engineering Report Provided

Mr. Greg Heitzman presented the Operations report for February. The average production rate last month was 112.7 MGD, which is 1.1 percent lower than 2005 February production of 114.0 MGD and 3.5 percent lower than the five year average February production of 116.8 MGD. For the year to date, production is 3.7 percent lower than 2005 and 3.9 percent lower than the five year average, respectively.

Regarding the consideration of the Chemical Building, on March 1, the Company conducted a public information meeting to brief residents on the proposal to build a chemical storage facility at the Crescent Hill Treatment Plant. Approximately 110 residents attended the meeting at Field Elementary School. The proposed facility will provide safe and reliable storage for chlorine, ferric chloride, and coagulant polymer. A Community Advisory Group is being assembled to provide input on the proposed chemical storage facility, including the location. Staff anticipates a recommendation will be presented to the Board by late summer 2006. Mr. Martin asked if there is any other owner of the property because residents have referred to it as a "park." Mr. Heitzman stated it is not legally designated as a park and advised the title to the property is held by Metro Government for the Water Company.

Mr. Heitzman stated a 12-inch main break in Bullitt County resulted in water outages and low pressure for the City of Shepherdsville and an area-wide boil water advisory. LWC restored water service by late afternoon on the same day. Plans are underway to improve the water supply to Shepherdsville, including main replacements, grid ties, and new storage for this area of Bullitt County.

The relocation of the 60-inch water main to accommodate the extension of the west runway and UPS expansion is near completion. The existing 60-inch main was shut down and the water was rerouted through other transmission mains while the tie-in was made. Completion of this project will reroute the 60-inch main to the perimeter of the airport, providing improved access to it. The project budget is \$6.5 million, with \$1.6 million funded by the Regional Airport Authority. Dr. Joseph Wise inquired about the resolution regarding a damaged portion of the 60" main, and Mr. Heitzman advised the contractor replaced it per our request.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report. The February abandonment rate was 6.3% compared to 6.8% in January 2006 and 5.8% in February 2005. Bad debt for the month was \$43,329 compared to \$71,469 in January 2006 and \$23,390 in February 2005. Bad debt is \$8,682 under budget for the month and \$10,776 over budget year to date.

She advised LWC staff will participate in the American Water Works Association Water Matters Fly-In in Washington, DC later in March to meet with their federal legislators on issues of interest to the water industry. This year key issues and messages include: the value of water service; chemical security/emergency response legislation; the Pass the Water Infrastructure Financing Act which expands the clean water and wastewater state revolving loan funds (SRFs); and additional appropriations for the AWWA Research Foundation, the clean and wastewater SRFs, state primacy programs and EPA drinking water research.

Government Relations continues to monitor the activities of the General Assembly. Bills of interest to LWC include topics of eminent domain, retirement, damages for fish kills, "unescorted" retirees, watershed planning, and aerial photography.

Dr. Wise asked what LWC committed to for the 2007 Senior Olympic Games. Mr. Huber stated we have provided the corporate offices at River Road Country Club building for them, and we have committed to 5000 cases of 8 oz filled water bottles.

Closed Session Held

Mr. Martin moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) at 1:09 p.m. Ms. Harris seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Willis and unanimously carried, the Board resumed open session at 1:21 p.m. No action was taken in closed session.

Nomination Committee Report Given

Mr. Martin stated the Nominating Committee met and agreed to recommend all current officer and committee appointments remain the same until reconsideration at the April 2007 Board meeting.

Compensation Committee Report Given

Mr. Conner advised the Corporate Performance Award was achieved at 87.5% of the total possible award, which is 1% of the total salary of all eligible employees divided by the number of employees. Dr. Wise moved to approve the 2005 Corporate Performance Award at this level of achievement. Ms. Harris seconded, and the motion carried. Mr. Conner stated the Executive Incentive Plan was achieved at a level of 6.1% of salary for ELT members and 4.575% of salary for BSOs. Mr. Martin moved to approve the Executive Incentive Plan award at this level. Ms. Welsh seconded, and the motion carried.

Mr. Conner stated the Board also needs to consider changes to the proposed ELT Shared Goals, Incentive Plan Goals, and Corporate Performance Goals for 2006. On the ELT Shared Goals, Goal B has been measured in terms of revenue, and the Committee recommends changing it to a descriptive measurement of Exceptional and Unsatisfactory with a Fully Achieves Expectations result being described according to a timeline for completing various strategic planning objectives. Goal E has been modified to state LWC's commitment to improving its Minority and Women Business Enterprise spending. The second part of this goal is for diversity hiring and promotion.

The Incentive Plan Goals for Goal III D and E have been made more stringent. Goal IV is proposed to be measured according to million gallons sold as opposed to cost per customer. The Goal V (II) will focus on the Organizational Effectiveness Index instead of the Customer Satisfaction Index for this year, since we are alternating those surveys each year. The Cost Control Goal for the Corporate Performance Award would also be measured according to million gallons sold as opposed to cost per customer. Ms. Welsh moved to approve all of the 2006 Goals as proposed, seconded by Ms. Harris, and the motion carried.

First Quarter Dividend Declared

Mr. Miller recommended declaration of the dividend to the Louisville / Jefferson County Revenue Commission on the Louisville Water Company stock owned by the City per the 1992 Bond Resolution. Further, Mr. Miller recommended the adjustment, as required, of the 2005 dividend declared because the annual audit has been completed. Net income of \$34,721,750 requires a total 2005 dividend to Metro of \$16,178,050. The total dividends declared during 2005 were \$15,875,700. The difference between the dividend declared for 2005 and the actual dividend computed for 2005 is \$302,350 and will be added to the regular quarterly 2006 dividend payments in equal quarterly installments of approximately \$75,588.

The 2006 Annual Budget provides for a budgeted annual dividend of \$14,842,140 and a total quarterly payment of \$3,786,123. Dr. Wise moved to approve the following resolution to declare the first quarter dividend:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and
WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and
WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and
WHEREAS, an estimated dividend of \$15,875,700 was declared in 2005 based on estimated annual net income of \$34,217,800, and
WHEREAS, the annual audit for 2005 has now been completed which establishes the full dividend for 2005 as \$16,178,050 based on actual annual net income of \$34,721,750, it would be in order at this time to amend the Board resolution of December 13, 2005 to increase the 2005 annual dividend by \$302,350, from \$15,875,700 to \$16,178,050, the difference to be added in installments to the quarterly 2006 dividend payments, and
WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and
WHEREAS, the 2006 Louisville Water Company Annual Budget contemplates the 2006 annual dividend to be \$14,842,140, it would be in order at this time to declare a regular first quarter dividend of \$3,710,535; therefore, be it
RESOLVED, the 2005 annual dividend is increased from \$15,875,700 to \$16,178,050 and the difference of \$302,350 will be added in quarterly installments to the regular 2006 quarterly dividend installments, and
RESOLVED, the regular first quarter 2006 dividend of \$3,710,535 is hereby declared, and further
RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,710,535 to the Louisville / Jefferson County Revenue Commission on March 31, 2006, this being the first quarterly dividend for 2006 plus one quarter of the dividend adjustments for 2005, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Mr. Martin seconded, and the motion carried.

2005 Strategic Plan Measurements Report Given

Mr. Ed Chestnut advised all the goals in the Strategic Plan were met except four. Specifically, the 2005 goal regarding the water rates was not met because rates increased 6.5%, which is higher than the CPI plus 1%. The Goal to keep the O&M cost per metered customer to no higher than \$173.36, was not met because the O&M cost per metered customer was \$175.63. The goal to reduce lost time injury frequency rate to 2.55 or less was not met, because the rate was 3.41. Finally, the goal to spend 9% or more of the company's spending with Minority Owned Businesses was not achieved because the value of contracts awarded to MBEs was only 6.7%.

Update Provided Regarding Arbitrage Rebate Calculation for Series 2001 Bonds

Mr. Miller reminded the Board that an arbitrage rebate calculation for the Series 2001 Bonds was performed by the PFM Group in October 2005. This was accomplished in advance of the required rebate computation date in 2006 due to the complexity of the financings that preceded the Series 2001 Bonds

and to allow for accrual of any arbitrage rebate liability. Based on the computation by the PFM Group, the amount of arbitrage earnings from March 2001 through December 2005 that must be rebated to the U.S. Treasury was computed as \$608,250 and was accrued on the 2005 financial statements. Staff is also accruing approximately \$12,000 each month for additional arbitrage earnings in 2006.

Following the results of the arbitrage rebate calculation, staff contacted Spencer Harper of Stoll Keenon Ogden to determine alternatives to the current bond reserve structure of relatively high yield U.S. Treasury SLG securities. After extensive review, there has been no feasible immediate alternative identified that would allow for retention of the current securities while reducing the arbitrage rebate amount. It appears that the only recourse open to the Company may be to realign a portion of the Series 2001 Bond Reserve securities for use in creating the reserve for the next bond issue. Meanwhile, staff intends to pursue an independent verification of the arbitrage rebate calculation in order to ensure the amount computed by the PFM Group is correct. Dr. Wise asked whether this money can be set apart and interest earned on it until it is paid back. Mr. Miller stated he believed that is possible.

Update Provided Regarding Long Term Borrowing Plans

Mr. Miller stated the Company will be initiating plans to issue long term debt in the near future. At this time, staff anticipates that it will be necessary and appropriate to enter into a short-term bond anticipation note or line-of-credit facility in order to ensure adequate liquidity while the bond documents are being prepared and the bond sale date is selected. This short term borrowing would be arranged through a competitive bid process from local financial institutions. Once the short term borrowing has been established, and in consideration of recent increases in long-term interest rates, staff intends to promptly proceed with the development of the preliminary official statement and other disclosure documents for a revenue bond issue to provide adequate funding for capital project expenditures for the next one-to-two years. The revenue bond issue would also be arranged through a competitive bid process from bond underwriters from across the country. The principal repayment schedule is planned to commence following the repayment of the final maturity in 2014 from the Series 2000 Bond Issue, with interest-only payments until that time.

The proposed financial firm is Public Financial Management, to be retained through a professional service appointment. Staff recommends Spencer Harper, who is now with Stoll Keenon & Ogden to be retained through a professional services appointment as well. For the Bond Engineering Feasibility Report, staff recommends Black & Veatch, also to be retained through a professional services appointment. Underwriters Counsel, Trustee and Bond Proceeds Investment would all be determined through competitive procurement. Staff has not yet formulated a recommendation for the method to procure Bond Insurance or to select a rating agency. Additionally, staff will be updating the measurements computed in the PFM Return Analysis Report to reflect the audited 2005 financial results. We have budgeted for about a \$40 Million borrowing. Mr. Martin inquired whether we needed to bid out bond counsel. Mr. Miller stated it is not required but is at the discretion of the Board, adding that previous bond counsel did an excellent job and increased the present value of the 1992 bond issue. Mr. Conner agreed previous counsel is well known as very knowledgeable in this area. His fee would be based on the amount of the bond issue, which is typical for this type of legal work. Mr. Conner stated it would probably be a good idea to get estimates for other qualified bond counsel to see what the ranges are.

Update Provided Regarding Kentucky Retirement Systems

Mr. Vince Guenther provided an update regarding the Kentucky Retirement Systems, which covers state employees, state police officers, city and county employees, as well as nonteaching staff of local school

boards and regional universities. KRS 61.565 requires the Board of Trustees of Kentucky Retirement Systems to determine the employer contribution rates based on an actuarial valuation. The most recent actuarial valuation was performed for the period ending June 30, 2005 and Louisville Water Company's new contribution rate effective July 1, 2006 will be 13.19% (Pension 5.97%/Insurance 7.22%). This is up from 10.1%. Employees also contribute 5% for a total of 18.19%, relative to the our contribution of about 6% in 2002. The trends indicate that increases will continue. Plan funding levels for the pension fund are in relatively good shape but the insurance fund is woefully underfunded. Total actuarial liabilities for insurance funds exceed assets by \$5.5 billion.

Previous legislation, HB 290 entitled "CERS Benefit Reduction," changes the retirement benefit structure for new employees hired after July 2004 by lowering the factor from 2.2% of salary for each year served to 2.0%, which results in those employees having to work 30 years to get full retirement instead of the previous 27 years. That legislation also allows employees to earn \$10 per year of service to be applied to their health insurance premium. KY League of Cities and KY Association of Counties are beginning to become more vocal in their concerns with the unfunded liabilities associated with the Retirement Systems. The biggest concern remains the cost of health care, with no real solution suggested for dealing with those costs.. Mr. Huber noted that the employee's contribution has not increased because it would require legislative action to do so. Mr. Conner asked whether we should be studying an alternative to CERS. Mr. Guenther stated discussions have been held about whether to totally separate the CERS funds from all other funds, including separating them for investment purposes. Another suggestion is to balance what the employee and the employer contribute. Mr. Huber noted further that when LWC entered the CERS program, there was no health insurance benefit for retirees. That component was added when investments were flourishing.

Strategic Planning Considerations Discussed

Ms. Susan Lehmann advised the Strategic Planning sub teams are on schedule with their work in updating the Company's Strategic Plan. This work will be completed in June prior to 2007 business planning and budgeting. The central themes considered for the strategic plan thus far involve assuring top line revenue growth and profitability, along with pursuing synergistic opportunities for efficiency and effectiveness with metro government and utilities. Key strategies in the current plan include assuring safe, high quality drinking water and enhancing customer satisfaction. The Board needs to consider the source of investment capital and how LWC would distribute profit or loss from these ventures. Mr. Martin asked what the timetable was for making those decisions. Mr. Huber responded the Board would discuss this in April or May of this year. Mr. Miller stated another question is what sort of corporate structure would be utilized for any business opportunity. Mr. Conner commented he does not think the business structure would matter because all revenues would likely be considered jointly anyway.

Budget Increased for Project 10417: Arnoldtown Road Area Main Replacement

The Arnoldtown Road Main Replacement Project was approved for a budget of \$412,000, which included the installation of 6,549 feet of replacement pipe and new pipe for system grid-ties. Prior to construction, the Capital Construction Crew provided an estimate of \$314,000 for construction of the pipeline. The Project Manager estimated \$80,000 for LWC-supplied materials and \$18,000 for design, resource coordination, and other costs. The final cost of the project is \$716,772; an increase of approximately \$305,000. However, costs associated with the Capital Construction Crew increased almost \$226,000 over the original estimate. Primary contributors to the cost overruns were equipment (\$79,000), the unanticipated use of subcontractors for directional drilling (\$62,000), and LWC labor (\$107,000). A savings of \$22,000 was realized in other areas such as restoration and site safety. Material costs increased nearly \$58,000. The actual footage of pipe installed increased by 422 feet to over 6,971 feet; and resulted

from field changes to the pipeline alignment during construction and the addition of a 6-inch pipe in Windsor Forest Drive near Wildwood Road to complete a grid-tie. Additionally, to minimize the cost of yard and pavement restoration at some locations, the Capital Crew used a subcontractor for directional drilling that utilized HDPE pipe materials purchased by the Capital Crew. Cost for the HDPE pipe was approximately \$49,000.

Even though fewer LWC-supplied materials were utilized, the savings was more than offset by the higher unit cost of the LWC-supplied materials. The unit cost of LWC-supplied materials increased over 50 percent from when the project was originally estimated (\$12.61/ft) to the time material was withdrawn from the warehouse (\$19.16/ft). The increased unit cost resulted in a cost overrun of approximately \$9,000. Similarly the design, resource coordination, and other costs increased approximately \$21,000 over the original estimate. Capital interest charges totaled over \$19,000 while the engineering labor increased almost \$5,000. Approximately \$3,000 in savings was realized when the project scope was revised to eliminate the need for the purchase of an easement.

The Capital Projects Authorization Policy and the procedures related thereto require Board authorization to increase the project budget, but this was not obtained. Management has reviewed the incident and is taking steps to ensure that projects are managed within established controls in the future. In response to Mr. Conner about how the system of cost monitoring works, Mr. Heitzman stated costs are loaded into the system weekly to allow the Project Manager to review and track project costs to make sure the percentages expended are within the budget and are tracking according to the particular stage of the project. Mr. Huber stated issues arise with contracts when unit prices and LWC crews doing the work. Mr. Heitzman stated we are analyzing what work our capital crews can do efficiently and effectively. Mr. Conner noted that the corporate governance initiative we have undertaken is to identify and manage these types of situations. Dr. Wise moved to increase the project budget by \$304,772 to a total of \$716,772 for Arnoldtown Road Area Main Replacement. Mr. Martin seconded, and the motion carried.

Budget Established and Preliminary Engineering Authorized for Baxter Avenue Main Replacement Project

Mr. Heitzman advised the main break frequency and resultant potential property damage claims necessitate the replacement of the 12-inch main in Baxter Avenue between Payne Street and Highland Avenue, which was installed in 1934 and is comprised of cement-lined sand-cast iron. This section of Baxter Avenue is a highly traversed and busy road. The Kentucky Transportation Cabinet (KTC) plans to re-pave Baxter Avenue, including the referenced section, in late summer or early fall 2006, and therefore, it is beneficial to complete this project in the first half of 2006 should allow LWC. A preliminary estimate of \$200/LF is assumed for this project, and while this cost is high compared to other urban 12-inch pipe projects, it is reasonable due to the higher level of traffic control and coordination, the reduced work hours, and the higher level of customer communication and coordination required for this project. Funding for this project will come from the Infrastructure Reserve Fund. Ms. Welsh moved to proceed with final design and advertisement for bids for the Baxter Avenue Main Replacement Project as a non-budgeted capital project with an estimated budget of \$500,000, and to similarly increase the funding for the 2006 Water Main Replacement Program from \$3,502,696 to \$4,002,696. Mr. Martin seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 1:48 p.m.

There being no further business, the meeting was adjourned at 1:59 p.m.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Barbara K. Dickens", written over a horizontal line.

Barbara K. Dickens

Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
APRIL 11, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Dr. Joseph Wise

Not Present:

Ms. Marita Willis
Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Vince Guenther, Process Owner, Providing Governmental Relations
Ms. Barbara Crow, Process Owner, Providing Media Relations

The regular meeting of the Board of Water Works was held on Tuesday, April 11, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Ms. Wendy Welsh moved to approve the minutes from the Regular Meeting held March 14, 2006, seconded by Dr. Joseph Wise, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber advised two chemical security bills have been introduced in the senate to require "inherently safer technology" to minimize the potential for terrorism, and water utilities organizations have asked to be exempt. He advised a new report recommends lower than 4 mg/L of fluoride in the public drinking water supply, but does not recommend discontinuance. Fluoridation is required under state law. Finally, European companies, specifically Nuon and RWE, continue to exit the water industry in the U.S., leaving only French-owned United Water with U.S. holdings.

Financial Report Provided

Mr. Robert Miller provided the report of financial results through March 2006. Overall sales are below budget, with commercial water sales being higher and residential sales being lower than budget. Expenses are also lower currently, but many are expected to be incurred in later months. Management is reviewing our discretionary contractual services to see if they can be deferred or cancelled. Mr. Miller stated we anticipate a borrowing before the second dividend payment is made.

Operations and Engineering Report Provided

Mr. Greg Heitzman presented the Operations report for March, specifically discussing the low March production, which could be attributable to fewer main breaks, and the upcoming April 17th Community Advisory Group (CAG) facilitated meeting to review plans to construct a chemical building at the Crescent Hill Treatment Plant. Mr. Rick Johnstone asked if one alternative to making chlorine on-site is purchasing bleach that would be delivered in railcars, and Mr. Heitzman advised it is.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report, highlighting the lower March call abandonment rate of 2.9%, bad debt for March of \$116,772, First Quarter customer satisfaction results, the wholesale rate increase, and an initiative with the Home Builders Association to install service sleeves off of mains.

Closed Session Held

Dr. Wise moved to go into closed session to discuss executive management performance evaluations pursuant to KRS 61.810(1)(f) at 1:05 p.m. Ms. Welsh seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Gerald Martin, seconded by Ms. Welsh and unanimously carried, the Board resumed open session at 1:25 p.m. No action was taken in closed session.

Ms. Welsh moved to approve the salaries of company officers as follows:

Senior Vice President, Operations and Chief Engineer	Greg Heitzman	\$158,685
Vice President, Treasurer	Bob Miller	\$139,544
Vice President, Serving Customers and Business Development	Karla Teasley	\$141,722
Vice President, General Counsel and Corporate Secretary	Barbara Dickens	\$132,194
Vice President, Human Resources and Organizational Effectiveness	Susan Lehmann	\$138,840
President/CEO	John Huber	\$207,250

Ms. Margaret Harris seconded, and the motion carried.

Audit Committee Report Given

Ms. Welsh gave the report of the Audit Committee's meeting held March 28, 2006. She reviewed comments by the new auditing firm, Strothman & Company. She summarized the results of the Process Safety Management audit and the IT Network Security Audit, which were reported to the Committee. Mr. Conner commented that the Project Management issues discussed as a result of internal audits are being addressed adequately by staff. Mr. Martin asked if we escheat the developer funds to the state when we cannot locate the developer, and Mr. Miller advised we do.

Update Provided Regarding Long Term Borrowing

Mr. Miller provided an update regarding the upcoming long-term borrowing. Two special-called board meetings to handle the borrowing must be scheduled and are currently proposed for May 25 and June 21, 2006 at Noon. He reviewed the documents necessary for the Board to approve. Mr. Miller reviewed the itemization of the cost of the issuance, which is in the range of \$450,000. There are changes which must

be considered for key bond covenants in the 1992 Master Bond Resolution and staff will be reviewing these potential changes with Metro Government and Public Financial Management before presenting a recommendation to the Board in May.

Mr. Martin commented he has compared our debt to total capitalization to other municipally-owned utilities and investor-owned utilities and it is about ½. Mr. Martin asked the purpose of underwriters counsel. Mr. Miller stated this person reviews our disclosures and offers an opinion regarding them.

Mr. Conner requested a short presentation in an upcoming board meeting of what the Board is being asked to consider.

2006 General Assembly Update Provided

Mr. Vince Guenther advised the final state budget is likely to include three Louisville Water Company projects. He reviewed the bills of particular interest to LWC and advised of their status.

First Quarter Certification Provided for Projects Authorized and Change Actions Approved

Mr. Huber certified that the following projects and change actions were authorized in the First Quarter of 2006 pursuant to the Capital Projects Authorization Policy and Procedures:

02648	Ventilation Improvements at Zorn Pump Station	
	Change in project budget estimate =	\$9,980
10613	CHFP HVAC Improvements - Revise cash flow	
	Latest approved budget estimate =	\$550,000
03641	Ventilation Improvements at CHPS - Revise cash flow	
	Latest approved budget estimate =	\$159,876
99402	Riverbank Filtration Phase II	
	Change in project budget estimate =	\$2,486,000
	BOWW approval received	
xxxxx	48" Raw Water Main Valve Replacement - Unbudgeted	
	Requested project budget estimate =	\$115,000
11264	Cardinal Hill Secondary Supply Phase 2B – Funds from project 01557 Phase 1	
	Requested project budget estimate =	\$3,693,500
03603	Goshen Area main replacement	
	Change in project budget estimate =	\$360,059
	BOWW ratification received	
10209	Stonestreet Rd Grid-tie	
	Change in project budget estimate =	\$20,000
11055	Shelbyville Rd III MRRP – Eden Ave to Burnley Rd	
	Change in project budget estimate =	\$194,115
10609	Paint Bardstown Rd Tank – Contract increase, No change in project estimate	
	Latest approved budget estimate =	\$1,097,660
00494	Wolf Pen Branch 36" Main Phase 1	
	Change in project budget estimate =	\$73,050
10135	Reservoir Avenue Phase 2	
	Change in project budget estimate =	\$159,000
10452	Lickskillet area main extension	
	Change in project budget estimate =	\$437,060
	BOWW approval received	
11365	Blossom Ridge Rd main extension	
	Requested project budget estimate =	\$143,000
11251	Weko Seals 30" main in Mellwood at Frankfort Ave	
	Change in project budget estimate =	\$42,500

11371	Broadway (Baxter Ave to Shawnee Park) Lead Service Renewal project	
	Requested project budget estimate =	\$104,000
01557	Cardinal Hill Secondary Supply Phase	
	Change in project budget estimate =	\$515,000
	BOWW approval received	
xxxxx	Baxter Ave main replacement - Unbudgeted	
	Requested project budget estimate =	\$500,000
	BOWW approval received	
10417	Arnoldtown Rd area main replacement	
	Change in project budget estimate =	\$304,772
	BOWW approval received	
98663	National Turnpike relocation	
	Change in project budget estimate =	\$189,906
03801	Update of 1997 Standard Contract and Technical Specifications for Facilities and Pipeline Construction	
	Change in project budget estimate =	\$71,674
10239	Human Resources and Payroll Information System Replacement	
	Change in project budget estimate =	\$162,999
	BOWW approval received	
11337	HRMS Phase II – Cancel 2006 project; Work incorporated in Phase 1 project	
	Current approved budget estimate =	\$431,000
11015	Clifton Heights Area main replacement	
	Change in project budget estimate =	\$(66,480)
11096	Upper River Rd main replacement - Revise cash flow	
	Latest approved budget estimate =	\$171,504
01743	Snyder Frwy transmission main - Revise cash flow	
	Latest approved budget estimate =	\$15,551,408
10355	Chenoweth Ln area main replacement	
	Change in project budget estimate =	\$112,789
11254	Arbegust R/R crossing main replacement - Unbudgeted	
	Requested project budget estimate =	\$297,000
	BOWW approval is required	
10326	Rams Run main extension	
	Change in project budget estimate =	\$35,000
11371	Broadway Lead Service Renewals	
	Change in project budget estimate =	\$28,300
10270	Southern Bullitt County Storage Tank – Revise cash flow	
	Latest approved budget estimate =	\$893,500
11338	Miscellaneous Heavy Equipment purchase – Unbudgeted purchase for three items	
	Requested total project budget estimate =	\$225,447
11360	Shaffer Ln main replacement	
	Change in project budget estimate =	\$103,000
11088	Us 60/Shelbyville Rd	
	Change in project budget estimate =	\$31,700
10087	Highway 1793 main	
	Requested project budget estimate =	\$ 294,637
	BOWW approval is required	
10233	BEPWTP Clarification and Mixing Basin Complex Renovation	
	Change in project budget estimate =	\$(647,490)
	BOWW approval received	
10354	Liberty St main replacement	
	Change in project budget estimate =	\$97,610
10516	Manslick Rd main replacement	
	Change in project budget estimate =	\$55,730
10613	CHFP HVAC Improvements	
	Change in project budget estimate =	\$30,000

11147	River Glades Subd	
	Change in project budget estimate =	\$(28,000)
02603	PRP II BPS (aka Arnoldtown Rd BPS – Revise cash flow	
	Latest approved budget estimate =	\$300,000
99407	Goshen Elevated Storage Tank – Revise cash flow	
	Latest approved budget estimate =	\$2,207,100
11310	Renovate BEP Sludge Lagoon #3 – Revise cash flow	
	Latest approved budget estimate =	\$3,900,000
03832	Tyler Elevated Storage Tank – Defer project	
	Latest approved budget estimate =	\$2,650,000
10227	English Station Elevated Tank – Defer project	
	Latest approved budget estimate =	\$1,660,000
11190	Old Ford Rd	
	Change in project budget estimate =	\$34,236
11392	KY Hwy 480 Elevated Storage Tank 760-780 Pressure Plane	
	Requested project budget estimate =	\$1,000,000
11374	Broadway – 44 th St to Southwestern Pkwy main replacement	
	Requested project budget estimate =	\$120,000
11374	Broadway – 44 th St to Southwestern Pkwy main replacement	
	Change in project budget estimate =	\$74,000
11055	Shelbyville Rd III MRRP – Eden Ave to Burnley Rd	
	Change in project budget estimate =	\$60,000
	BOWW approval is required	
03638	CHFP Slate Roof Replacements	
	Change in project budget estimate =	\$172,125
11022	Ferguson Ln	
	Change in project budget estimate =	\$43,012
03638	CHFP Slate Roof Replacements	
	Change in project budget estimate =	\$28,308
02313	Weavers Run Tank	
	Change in project budget estimate =	\$57,390
11187	South Dixie main replacement	
	Change in project budget estimate =	\$(61,000)
11094	Seelbach Ave main replacement	
	Change in project budget estimate =	\$(63,073)

First Quarter Certification Provided for Contracts and Bids Awarded

Mr. Huber certified that the following contracts and bids were awarded in the First Quarter of 2006 pursuant to the Purchasing Policy and Procedures:

Capital Program

04-42	Johnson Hollow Rd. Grid Tie - Assignment from Bid #04-42 - Engineering Services for Distribution System Design & Construction Pipeline, Pump Stations, and Tanks O'Brien and Gere Engineers	\$20,700
04-42	Licksillet Distribution Water Main - Assignment from Bid #04-42 - Engineering Services for Distribution System Design & Construction Pipeline, Pump Stations, and Tanks O'Brien and Gere Engineers	\$99,966
05-10	48-inch Valve - Zorn Avenue - Assignment from Bid #05-10 - Contingency Contract for Transmission System Emergency System Repairs and Capital Improvements Southern Pipeline Construction Co., Inc. (CWBE)	\$46,000
05-10	Mellwood Avenue & Frankfort Avenue 30-Inch Main Repairs-	

	Assignment to Bid 05-10/Contingency Contract for Transmission System Emergency Repairs & Capital Improvements	
	T & C Contracting, Inc.	\$30,000
05-117	Weavers Run Elevated Water Storage Tank	
	Caldwell Tanks, Inc.	\$506,390
05-119	Mayfair Avenue Drainage Improvements	
	MAC Construction & Excavating, Inc.	\$241,100
05-120	McCubbins Farm Lane & Mary Lane Water Main Extensions	
	MAC Construction & Excavating, Inc.	\$125,978
06-06	Cane Run Road 2A Main Replacement Project	
	Southern Pipeline Construction Co. (CWBE)	\$106,794
06-07	Rams Run & Timberline Drive Water Main Extension	
	Kelsey Construction, LLC	\$399,246
06-24	Broadway Lead Service Renewal Project	
	C Squared, Inc.	\$115,300
06-32	Rams Run Road Booster Pump Station	
	MAC Construction & Excavating, Inc.	\$234,700
06-33	Contingency Contract for Transmission System Repairs & Capital Improvements	
	Hall Contracting	
	MAC Construction & Excavating	*Estimate -
	Southern Pipeline (CWBE)	\$850,000
	T & C Contracting	

*Based on use of previous contract.

Procurement Of Materials And Services

	Employee Health, Dental, Life & Disability Insurance	
	CIGNA - (Disability Insurance)	\$89,202
	Delta Dental of Kentucky - (Dental Insurance)	\$310,267
	Monumental Life Insurance Co. - (Group & Independent Life Insurance)	\$132,324
	Humana (Medical Insurance)	\$4,174,908
01-54	Telecommunications System and Switch Maintenance Renewal	
	BellSouth Communication Systems, LLC	\$31,077
02-27	Fire Hydrants - 6th PPI Renewal	
	American Flow Control	\$1,153,637
02-ELEV01-B	Inspection, Maintenance & Repair of Elevators - 3rd CPI Renewal	
	Schindler Elevator Corporation	\$27,717
04-03	Gate and Wheel Valves - 2nd PPI Renewal	
	Mueller Company (Group 1)	\$867,605
	U. S. Pipe (Group 2)	\$162,511
04-21	Janitorial Services - 2nd CPI Renewal	
	Adams Cleaning (CMBE)	\$49,753
	KIMCO Corporation	\$71,093
	National Janitorial	\$26,442
	Purvis Professional Cleaning Services (CMBE)	\$61,971
04-62	Auditing Services - 1st CPI Renewal	
	Strothman & Company	\$43,936
05-02	Cement (One-year Contract – Renewable)	
	Cemex / Kosmos Cement	\$63,366
05-07	Lawn Maintenance for LWC Grounds - 1st CPI Renewal	

	Commonwealth Land Mgt.	\$37,134
	Valley Crest Lawn Care	\$61,190
05-106	Forklifts	
	Cardinal Carryor	\$61,875
	Yale Kentuckiana, Inc.	\$105,987
05-47 & 05-84	Fleet Vehicles and Dump Truck Bodies - Three Additional GVW Cab and Chassis and One 52,000 GVW Tandem Cab and Chassis	
	Peterson GMC - Kennworth	\$200,271
	Tow Zone Trailer and Equipment Sales	\$58,070
05-92	Polyvinyl Chloride (PVC) Pipe – 1 st PPI Renewal	
	P W Eagle	\$796,920
05-98	Ductile Iron Fittings (Six-month Contract)	
	Hayes Pipe Supply	\$84,539
	Sigma Corporation	\$5,040
	Water Works Supply	\$392,045
06-01	Vehicular Wash / Chemical Supplies (Two-year Contract)	
	Air to Ground Services	\$46,446
06-02	Concrete and Asphalt Surface Cutting (Two-year Contract)	
	Kaufman Concrete Cutting Co.	\$47,300
06-04	Two (2) 48" Gate Valves	
	Plumbers Supply	\$178,550
06-05	Distribution Monitoring Analyzer	
	Rosemont Analytical	\$33,096
06-09	Polywrap (Six-month Contract)	
	Hamilton Plastics, Inc.	\$46,809
06-10	Vending Services (Five-year Contract)	
	Williams Food Services - Coffee Services	Unit Prices
06-11	Safety Barricades, Lights, Cones and Caution Tape (One-year Contract)	
	Consolidated Barricades	\$52,415
06-13	Small Hand Tools (One-year Contract)	
	Allied Tools	\$92,994
	Earth First of Kentuckiana	\$19,790
06-14	Aluminum Hatches (Two-year Contract)	
	USF Fabrication, Inc.	\$139,400
06-15	Sale of Scrap Metal (Five-year Contract - Paid to LWC)	
	River Metals Recycling	\$239,927
06-16	Flanged Spool Pieces (Two-year Contract)	
	Derby Welding	\$67,415
06-17	Copper Tubing (Four-month Contract)	
	Viking Supply Co.	\$210,939
06-18	Towing Services (Two-year Contract)	
	Suburban Towing	\$23,357
06-19	Contingency Contract for Pump Repairs (Two-year Contract)	
	Atlas Machine & Supply	\$45,000
	Reynolds, Inc.	\$64,475
	RPM, Inc.	\$42,625
06-20	Copper Wire (Four-month Contract)	
	Hughes Supply Co.	\$33,250
06-22	CISCO Maintenance Upgrade (Three-year Contract)	
	NetGain Technologies	\$52,620

06-29	Notification & Collection of Delinquent Accounts (One-year Contract – Renewable)	
	Diversified Adjustment Services (WBE)	\$35,593
06-31	16 oz. Water Bottles (One-year Contract – Renewable)	
	Turn Key Concepts	\$88,500
KY State Contract #C04042154	Sun Server Maintenance Renewal Pomeroy	\$21,550
Master Agreement 05-30	Contingency Contract for Motor Repair - Motor Cleaning Work to Zorn Pump Motor #1 - Assignment from Bid #05-30 - Change Action Mohler Technology, Inc.	\$15,765
Master Agreement 06-19	Contingency Contract for Pump Repairs - Pump Repair Work to Zorn Pump #1 - Assignment from Bid #06-19 RPM, Inc.	\$33,930

Procurement Of Professional Services

04-42	Southern Bullitt County Elevated Storage Tank, Phase I Environmental Assessment - Change Action to Assignment from Engineering Services for Distribution System Design & Construction Pipeline, Pump Stations, and Tanks	
	O'Brien and Gere Engineers	\$24,875
Professional Service	Advanced Treatment Technology at CHWTP - Phase III Camp Dresser & McKee, Inc.	\$649,013
Professional Service	Advanced Treatment Technology at CHWTP, Task 1, Phase III - Assignment from Plant and Facilities Engineering Services Jordan Jones & Goulding	\$1,365,000
Professional Service	B.E. Payne Water Treatment Plant Clarification and Mixing Basin Complex Renovation - Assignment from Plant and Facilities Engineering Services O'Brien & Gere, Inc.	\$1,060,000
Professional Service	Bond Feasibility Engineering Report Black & Veatch	\$149,500
Professional Service	Cardinal Hill Secondary Supply, Phase 2B - Topographic Survey Jacobi, Toombs and Lanz, Inc. (MBE)	\$68,336
Professional Service	Contractual Research Assistant for the Development & Application of Computer Based Aquifer Model for B. E. Payne Plant Riverbank Filtration Project University of Louisville Research Foundation	\$69,774
Professional Service	Contractual Research Assistant to Study the Optimization of Water Treatment & Supply University of Louisville Research Foundation	\$41,580
Professional Service	Plant and Facilities Engineering Services - Third CPI Renewal Camp, Dresser and McKee, Inc. CH2M Hill Engineers	Unit Prices
	Jordan, Jones, & Goulding, Inc. O'Brien & Gere, Inc.	

Procurement Of Sole Source Materials And Services

Sole Source	2006 Aerial Photography Proposal Evaluation Metropolitan Sewer District	\$109,729
Sole Source	ECIS - IBM AS/400 Hardware & Software Support & Maintenance 2006 Alliance Data Systems (Formerly Orcom)	\$23,987
Sole Source	ECIS Extended Support 2006 Alliance Data Systems	\$196,245

Sole Source	ESRI (ArcGIS) Software License and Maintenance Agreement - Contract Renewal	
	Environmental Systems Research Institute (ESRI)	\$28,251
Sole Source	Oracle Maintenance Support - HRIS Database Licenses	
	Oracle Corporation	\$30,636
Sole Source	President's Circle Membership Investment and Economic Development President's Circle Investment	
	Greater Louisville, Inc.	\$63,000
Sole Source	Riverbank Infiltration Program - U.S. Geological Survey - Groundwater Monitoring Network	
	U. S. Geological Survey	\$25,000
Sole Source	TIP/ix and TIP/dbi Software License Renewal (2-year Renewal)	
	Inglenet Business Solutions	\$27,400

Contract Awarded for Project 00401: Zorn Intake Improvements

Mr. Heitzman stated two bids were received for renovation of the Zorn Intake Structure and Zorn Pump Station #3. The Zorn Intake facility was constructed in 1910 and provides intake of source Ohio River water. This facility was last upgraded 20 years ago and is in need of new equipment and structural improvements to provide a 20-year life extension. Zorn Pump Station #3 was constructed in 1918 and houses two pumping units (Units #6 and #7), piping, and valves to provide 120 MGD supply. Dr. Wise moved to authorize the Purchasing Manager to award a contract in the amount of \$3,271,000 to MAC Construction and Excavating, Inc. for Zorn Intake Improvements, and to establish a project budget in the amount \$4,814,000. Ms. Harris seconded, and the motion carried.

Change Action Approved and Budget Increased for Project 11055: Shelbyville Road III Main Replacement – Middletown Area – Eden Avenue to Burnley Road

Mr. Heitzman stated further review of the recent and projected private development in the Shelbyville Road – Middletown area indicated it would be better served by two parallel water mains to reduce the number of existing and future long service and hydrant leads, and tie-ins to cross-streets. Seven previous change actions raised the budget from \$204,415 to \$1,478,615 and expanded the project scope. Change Action No. 8, submitted in February 2006, increased the total project amount by \$60,000 to \$1,538,615. These additional funds were required for the acquisition of additional easements along Shelbyville Road. The cumulative impact of Change Action No. 1 to 8 has increased the total project budget by \$273,615 to \$1,538,615 (22 percent increase), since the original Board approval in November 2003. In accordance with Section 8.3 of the Capital Projects Authorization Procedure, Dr. Wise moved to increase the contract with Tom Brown Construction to \$928,915, and revise the project budget to \$1,538,615. Ms. Harris seconded, and the motion carried.

Final Design and Bid Authorized for Project 10087: Highway 1793 12-inch Water Main Supply for Goshen Storage Tank

Mr. Heitzman stated the one million gallon elevated storage tank at Highway 1793 and US Highway 42 currently underway will require a 12-inch supply line, instead of the current 6-inch line, to accommodate the rapid residential growth in the area. The project was not included in the 2006 capital budget, in anticipation that the nearby Longwood development would provide the opportunity to complete a majority of this 12-inch main grid. This subdivision development plan is now final, and the last remaining leg of the 12-inch main must be installed from Longwood subdivision entrance to the new storage tank. This project will replace the existing 6-inch PVC main with 2,955 feet of 12-inch and 16-inch ductile iron water main. The project is estimated at \$295,000 and will be installed by LWC in-house capital crews. Funding for the project will come from the System Development Reserve Fund. Ms.

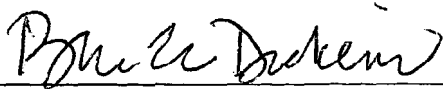

Welsh moved to authorize staff to proceed with final design and construction for the Highway 1793 12-inch water main project with a budget of \$295,000. Mr. Martin seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 2:26 p.m.

There being no further business, the meeting was adjourned at 2:40 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
MAY 9, 2006**

Board Members Present:

Mr. Stewart Conner, Chair

Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Ed Chestnut, Assistant to President and Director of Corporate Measures
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources
Mr. James Bates, Process Owner, Infrastructure Records
Ms. Barbara Crow, Process Owner, Providing Media Relations

The regular meeting of the Board of Water Works was held on Tuesday, May 9, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:30 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Dr. Joseph Wise moved to approve the minutes from the Annual Meeting and the Regular Meeting held March 14, 2006, seconded by Ms. Margaret Harris, and the motion carried.

Chief Executive Officer Report Provided

President John Huber highlighted the success of the Labor Management Partnership as exemplified by winning the University of Louisville Labor-Management Award for the second time in the award's 13 year history. Mr. Huber noted turn-offs, which can occur once a bill balance exceeds \$65.00, are up 34% over the past 4 months and are 40% higher than the 5 year average. Mr. Huber advised LWC employee Marianne Butler is a candidate for the upcoming election of a Metro Council seat. Finally, Mr. Huber stated two bidders were disqualified recently, according to our purchasing procedures, for failure to submit Good Faith Effort documentation required for compliance with LWC's Minority and Women Business Enterprise Program.

Financial Report Provided

Mr. Robert Miller provided the report of financial results through April 2006. Operating Revenues for April of \$8,116,907 are \$665,159 or 7.6% less than budgeted and \$380,981 or 4.5% less than April 2005. The prior year variance is due to the increase in water rates. It appears there are weather-related reductions in pumpage earlier than usual due to higher than normal rainfall. YTD Operating Revenues of \$35,490,755 are \$836,039 or 2.3% less than budgeted and \$1,173,706 or 3.4% more than 2005. Total Operating Expenses for April of \$6,500,419 are \$141,394 or 2.2% more than budgeted and \$1,062,080 or 19.5% more than April 2005. The budget variance is due to lower than expected operation and maintenance expenses and offset with higher depreciation expense. The prior year variance is due to increases in operation and maintenance expenses, depreciation expense, and water service provided in lieu of taxes. YTD Total Operating Expenses of \$25,636,354 is \$297,852 or 1.1% less than budgeted and \$2,712,152 or 11.8% more than 2005. Net Income Before Distributions and Contributions for April of \$1,202,888 is \$981,590 or 44.9% less than budgeted and \$1,561,248 or 56.5% less than April 2005. YTD Net Income of \$8,494,057 is \$944,282 or 10.0% less than budgeted and \$1,880,003 or 18.1% less than 2005. The current flexibility available in the budget is \$1,388,000, which consists of Infrastructure Replacement Reserve funds and the contingency. Management is looking for opportunities to reduce or defer expenses and consider budgeting sales more conservatively next year.

Operations and Engineering Report Provided

Mr. Greg Heitzman presented the Operations report for April specifically discussing the lower than average production and the activities of the Customer Advisory Group for the Crescent Hill Chemical Storage Building.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report, highlighting the below budget bad debt, a recent billing error and steps to remedy it, and the feedback from the Customer Advisory Council about the Interactive Web Response (IWR) and charging a convenience fee for customers using specific payment channels.

Closed Session Held

Ms. Marita Willis moved to go into closed session to discuss litigation pursuant to KRS 61.810(1)(c) at 1:15 p.m. Ms. Harris seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Willis, seconded by Mr. Gerald Martin and unanimously carried, the Board resumed open session at 1:32 p.m. No action was taken in closed session.

Public Affairs and Customer Satisfaction Committee Report Given

Ms. Willis gave the report of the Committee's meeting held on April 12, 2006 regarding LWC's commitment to the 2007 Senior Games, the work completed by the Automated Meter Reading (AMR) cross-functional team to assess the feasibility of implementing an AMR program within our current service area, fees and the basis for increases for installing new services, and key performance measures. The committee also heard a report on the IWR project and recommended charging a convenience fee over the one-time payment channel, including making the necessary modifications to charge, collect and account

for this fee. Mr. Martin moved to accept the committee's recommendation, seconded by Ms. Harris, and unanimously carried.

Existing Bond Resolution Covenants Reviewed

Mr. Miller provided a summary of several important covenants contained in the Series 1992 Bond Resolution, which has also served as the master resolution for subsequent bond issues in 2000 and 2001.

Changes Considered to Section 508 of the Bond Resolution

Mr. Miller stated if the Board of Water Works wishes to implement changes to the covenants to take effect upon the final maturity of the Series 2000 Bonds or upon a call of the maturities of all outstanding bonds, it would be appropriate and timely to consider those changes for implementation with the adoption of the Series 2006 Bond Resolution.

Staff recommended the dividend covenant remain unchanged in the supplemental resolution for the contemplated Series 2006 Bond Issue the fluctuations between the budgeted and actual dividends be minimized to the extent possible by management actions, and the balance of the variation be accepted as consistent with the risk of ownership. However, if the fluctuations between budgeted and actual dividends are to be minimized, staff would support a change to the Bond Resolution to create a Risk Mitigation / Rate Stabilization Reserve. This would be a future action item, and staff will seek input from Metro Government. Mr. Martin emphasized nothing can actually change until the current bonds are paid off as early as 2010. Board members generally agreed that while there may be valid reasons to adjust the dividend, this issue should be carefully considered.

Comparative Analysis of Louisville Financial Results from previous years 2005

Mr. Miller stated staff compared the financial results from 2001 through 2005 by looking at liquidity, capitalization, capacity to make debt service payments, profitability and dividend payment. Staff compared actual results against targeted results, previous results, NAWC 2004 Median results, Fitch Water AA 2004 Median results, Standard's & Poor's Aa 2001 Median results, Moody's A2 2000 Median results, and Charlotte-Mecklenburg Utilities' Results. In terms of liquidity, the financial advisors recommend 200 days of cash on hand; LWC's cash on hand is 96.07 days for last year. Our debt to capitalization ratio is about 27%. In terms of coverage or capacity to make debt service payments, LWC is 4.49 which is well above our target of 2.0. For profitability, our return on equity desired ratio was 9.22, and we ended 2005 at 10.6%. Finally, our dividend payout ratio for 2005 was 49.23%.

Update Provided Regarding Long Term Borrowing

Mr. Miller advised there are two special board meetings scheduled related to this proposed bond issue: first on May 25, 2006 at Noon to review and approve the bond documents and then on June 21, 2006 at Noon to review and approve the final sale of bonds. This is a compact schedule and any changes will likely result in rescheduling these dates. The principal amount of the upcoming bond issue is currently estimated at \$80,000,000. Based on the financial plan prepared in conjunction with the 2006 Budget, this amount would provide adequate supplemental funding for the capital program for the next two years. The estimated total cost of issuance is approximately \$442,000. This is at the lower end of the range of the cost estimate provided in previous reports. These costs of issuance will be amortized over the twenty-five year life of the bonds at an estimated amount of \$17,680 per year. Assuming a bond principal issuance amount of \$80,000,000, these costs of issuance represent 0.55% of the principal amount.

The Company's cash reserves are down to \$8.1 million as capital expenditures continue to outpace cash generated from operations. Staff intends to solicit proposals from local banks for a short-term tax-exempt line of credit facility of \$10,000,000 or less in order to ensure adequate liquidity if large invoices for capital projects are presented for payment earlier than planned, the timing of the bond issue is delayed, or significant operational emergencies develop. The results of these proposals will be presented with a recommendation for approval at the special meeting planned for May 25th.

Disaster Recovery and Business Continuity Planning Discussed

Mr. Miller provided an overview of efforts taken and underway with regard to continuing our business in the event of a disaster. This planning addresses backups to IT systems and employee availability.

LOJIC Presentation Given

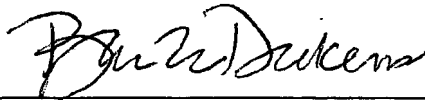

Mr. James Bates, Process Owner, Infrastructure Records, provided an overview of the Louisville and Jefferson County Information Consortium, known as LOJIC, one of the best managed and robust Geographic Information Systems (GIS) in the country. Mr. Bates demonstrated how LOJIC is utilized in LWC operations and the plan to expand it into a stand alone, self-sustaining business unit over the next five years.

Executive Session Conducted

The Board went into Executive Session without management present at 2:58 p.m.

There being no further business, the meeting was adjourned at 3:10 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

Ms. Bonita Black, Frost Brown Todd
Mr. David Naumann, Black & Veatch
Mr. Larry Gaddis, Black & Veatch
Mr. Kevin Thompson, Public Financial Management
Ms. Barbara Bisgaier, Public Financial Management

A special meeting of the Board of Water Works was held, pursuant to proper notice requirements, on Thursday, May 25, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chair Stewart Conner called the meeting to order at 12:06 p.m.

Mr. Robert Miller summarized the issues to be discussed and the Board actions to be taken. There are no recommended changes to the bond covenants.

Bond Feasibility Study Presented

Mr. Larry Gaddis of Black & Veatch presented the results of the engineering study on the general physical condition of the water system. Black & Veatch determined the water system is in good operating condition or adequate steps have been taken to get it in good condition. Mr. David Naumann presented the financial feasibility study results. Black & Veatch opined, based on actual and estimated future annual financial operations, that the water system will yield pledged revenues over the amortization period of the bonds that will be sufficient to meet the payment or deposit requirements of: the principal or redemption price of and interest on all existing bonds and all bonds issued under the resolution as they become due and payable; the depreciation fund deposits, all expenses of operation, maintenance, repair

and replacement of the water system; and, dividend payments equal to 60 percent of the net income to retained earnings less applicable deductions. Further, Black & Veatch concluded that water rates and projected increases were within acceptable ranges for the services offered and were collectable.

Mr. Gerald Martin inquired whether assumptions made by Black & Veatch were consistent with those made in the Long Range Plan. Mr. Naumann advised they are consistent, but stressed that their review was independent based on raw data. Mr. Martin asked whether Public Financial Management (PFM) was involved in the financial analysis. Ms. Barbara Bisgaier of PFM stated they reviewed and provided comments to Black & Veatch as part of a working group process.

Debt Repayment Schedule Discussed

Mr. Miller reviewed the central issues and key decisions to be made for this bond issue. Mr. Miller summarized the current debt status as \$117 million in outstanding debt, with a front-loaded debt service schedule. Borrowing needs are approximately \$258 million over the next 10 years. Mr. Miller discussed the three different approaches to structuring the debt: level, wrap around and back loaded. Mr. Conner asked how these three approaches will affect the interest rates. Mr. Miller and Mr. Kevin Thompson of PFM stated the interest will be higher the further out the debt schedule is extended. Mr. Miller recommends level debt service for Series 2006 because of cost of debt to customers, its favorable perception by the debt market, the ability to add additional debt in the future, and the ability to modify this debt structure by subsequent issues. Mr. Miller summarized how this impacts current debt repayment and the dividend payment. Mr. Huber stated we are also increasing our Return On Equity (ROE) target to 10% from 9.22% which will decrease the effect of deductions for principal repayment over time. Mr. Martin and Mr. Johnstone inquired how this structure affects the dividend payoff. Mr. Miller responded PFM took the dividend into account when considering this alternative, and this is the most advantageous structure. Ms. Bisgaier stated it maintains the greatest flexibility for future borrowing and PFM supports a level repayment schedule.

Pro Forma Ratio Analysis Reviewed

Mr. Miller discussed the financial ratios before and after the Series 2006 Bond Issue. The key findings of this analysis are: (1) the proceeds from the Series 2006 Bonds used to reimburse previous capital expenditures will significantly improve the liquidity ratios; (2) the additional bonds will more closely align the capital structure with the targeted capitalization ratios; (3) the debt service coverage ratio will remain well above statutory and covenant minimums; (4) the targeted increase in ROE to ten percent can be achieved by 2009 which is one year later than previously projected; (5) the revenue requirements associated with the additional debt service and the increased ROE target can be achieved with annual rate increases of approximately five percent if water sales continue at long-term forecast levels and if operations and maintenance expenses increase at or below three percent per year. However, certain costs such as energy, raw materials, retirement and insurance have been consistently increasing more than 3% per year; and (6) the projected financial results used for this analysis do not include more conservative water sales estimates and increased funding of the infrastructure replacement reserve discussed at the previous regular board meeting. The computations for this analysis will also be reviewed by Strothman & Company through agreed-upon procedures. Mr. Conner asked how our additional borrowing of \$95 million in 2 years affects the projected rate increases, and Mr. Huber advised this 5% number contemplates a future borrowing.

Mr. Conner asked if this means we are considering 5% increases as the minimum, and Mr. Miller and Mr. Huber confirmed 5% would be the minimum for the next 5 to 10 years. In response to Mr. Martin, Ms. Bisgaier stated PFM agreed with this analysis. She stated they are working with staff to address the

current issue of low cash reserves. They believe LWC is fully capable of taking on more debt and our debt is much lower than most utilities of our size

Bond Documents Reviewed and Adopted

Mr. Miller presented the bond resolution, attached hereto and incorporated into these minutes. Ms. Harris moved to approve the Bond Documents in substantially complete form with the knowledge there will be minor non-material changes in the document. Mr. Martin seconded, and the motion carried.

Mr. Martin asked several questions related to specific wording in the document and Mr. Miller provided clarification to address those questions. The proceeds of the bond issuance will be for capital construction, thereby allowing other funds to be used for operations and maintenance expenses.

Contract for Line of Credit Awarded

Mr. Miller advised we accepted proposals for a tax-exempt line of credit between \$5,000,000 and \$10,000,000 to be used to meet intermediate construction and acquisition cash flow needs in anticipation of a tax-exempt revenue bond issue of approximately \$80,000,000 to be issued later this year for construction and acquisition of major public water facilities. Five proposals were received, and staff gave the highest evaluation to JP Morgan Chase Bank based on pre-established evaluation criteria. Ms. Welsh moved to award of the line of credit to JP Morgan Chase Bank and requests permission to execute all documents necessary to execute this transaction. Ms. Harris seconded, and the motion carried.

There being no further business, the meeting was adjourned at 1:44 p.m.

Respectfully submitted,

Barbara K. Dickens

Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
JUNE 20, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources

The regular meeting of the Board of Water Works was held on Tuesday, June 20, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:32 p.m.

Mr. Conner informed the Board that former BOWW member Irv Quesenberry died on May 17, 2006. Mr. Quesenberry had previously served on the BOWW for 14 years.

Minutes from the Previous Regular Meeting and Special-Called Meeting Reviewed and Approved

The draft regular minutes from May 9, 2006 were amended to indicate that Ms. Wendy Welsh was not in attendance. With regard to the discussion regarding the proforma ratio analysis, the draft special-called minutes from May 25, 2006 were amended to clarify the last sentence of that discussion as follows: "They believe LWC is fully capable of taking on more debt and our debt is much lower than most utilities of our size." Mr. Gerald Martin moved to approve the minutes from the regular Meeting held May 9, 2006, as amended above, and the Special-Called meeting held May 25, 2006, as amended above, seconded by Ms. Margaret Harris, and the motion carried.

Chief Executive Officer Report Provided

President John Huber advised the federal EPA administrator was the key note speaker at last week's AWWA conference and the topic included a renewed emphasis on efficient water use, which will be reflected in plumbing codes and water efficient product requirements. Further, the Surgeon General spoke on health and wellness and the importance of pandemic planning, which we are currently doing.

Financial Report Provided

Mr. Robert Miller provided the report of financial results through May 2006. Earnings for the month of May 2006 have slipped against budget by approximately \$470,000 due to lower revenues, higher operation and maintenance expenses, and higher depreciation expense. The overall earnings deficit is being addressed via a \$500,000 expense reduction plan, including deferral of some discretionary items. Interest expense for 2006 should come in below budget by approximately \$600,000. Coupled with the contingency, these measures should allow us to meet our earnings target. Mr. Miller also advised he and Vince Guenther, Manager of Governmental Relations, met with the Metro Council Budget Committee to report on our existing budget and future dividends and rate increases, which must be approved by the Board of Water Works.

Operations and Engineering Report Provided

Mr. Greg Heitzman presented the Operations report for May. Due to higher than normal precipitation, the average production rate last month was lower than the same period in 2005. The average production rate for May was 124.6 MGD, which is 4.5 percent lower than the 2005 May production of 130.4 MGD and 0.9 percent lower than the five year average May production of 125.7 MGD. For the year to date, production is 2.5 percent lower than 2005.

Mr. Heitzman reported the Customer Advisory Group met on May 8 and May 15 at the Crescent Hill Treatment Plant. Attendees were escorted on a tour of the chlorine facility. Jordan, Jones, and Goulding (JJG) Engineers presented the chlorine storage alternatives previously investigated and provided an overview of the need for the new chemical storage facility. The Customer Advisory Group will meet again on June 26 to review the five alternatives identified by JJG Engineers.

Mr. Heitzman reported a contractor damaged the 24-inch Cross County Header supplying the southern portion of Jefferson County at the corner of Hurstbourne Parkway and Interstate 64 while excavating the area for a new sewer connection. The Company executed an emergency assignment utilizing the contingency contract to repair the main. The repair costs are estimated at \$40,000 and full recovery is expected.

Dr. Wise asked about the CHFP HVAC renovation program, wherein two of the four bidders were deemed non-responsive to the Good Faith Effort requirements contained in the Minority and Women Business Enterprises Program. The apparent low bidder did not submit all of the documentation required and other required documentation was incomplete. Dr. Wise commented the communication of the specific documentation requirements and the reason the apparent low bidder did not get the recommendation for award should be improved for future bids. Staff noted there are detailed instructions in the Instructions to Bidders, which includes contact information for Ron Green, Program Manager, and each form also has instructions for completing it. Mr. Conner stated the process should be made as easy as possible for the bidders to comply since the goal is to increase minority and women-owned business participation.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report for May 2006. The Metered Water Ratio Team has made progress in meeting its 2006 action plan objectives. LWC's water audit was completed in May using actual 2005 data and included several new estimates of water loss. In addition, a draft Infrastructure Leakage Index, which is the industry's new performance metric for water loss, was completed. Currently, 226 field tests have been conducted on large meters (3" and larger) and among those are 40 of the Top 50 customers. The Duty Exchange Program is on track to meet the 2006 goal of

exchanging 12,000 Neptune T-8 meters. To date 5,086 of the aging T-8 meters have been exchanged, 4,694 by the two dedicated meter exchangers and 392 by other employees within the company. The production meters at the BE Payne water treatment plant are scheduled to be re-tested later this year as a follow-up from the testing conducted in the 4th quarter of 2005.

LWC staff met with representatives of the Home Builder's Association of Louisville Land Development Committee on May 25th to review the latest draft proposal for the pre-installation of service sleeves with developer installed water mains. The joint committee is continuing to refine the proposal for presentation to the full committee in coming months. In addition to this effort, LWC staff has been researching and benchmarking other utilities' service installation fees as a part of evaluating LWC service installation fee increases beginning in 2007.

Closed Session Held

Mr. Martin moved to go into closed session to discuss proposed or pending litigation pursuant to KRS 61.810(1)(c) at 1:28 p.m. Ms. Marita Willis seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Welsh, seconded by Ms. Willis and unanimously carried, the Board resumed open session at 1:35 p.m. No action was taken in closed session.

Second Quarter Dividend Declared

Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville/Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City. The dividend is to be paid in quarterly installments, such payments to be based on the estimated annual net income and as nearly equal in amount as possible. The budgeted net income of \$32,026,900 for 2006 requires payment of an annual dividend of \$14,842,140 in quarterly installments of \$3,710,535. The quarterly dividend payment must be increased by \$75,588 to reflect one quarter of the \$302,350 dividend underpayment in 2005. Dr. Wise moved to adopt the following resolution:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and
WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and
WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and
WHEREAS, the Board passed a resolution on March 14, 2006 to adjust the 2005 annual dividend by \$302,350, from \$15,875,700 to \$16,178,050, the difference to be added in equal quarterly installments to the quarterly 2006 dividend payments, and
WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and
WHEREAS, the 2006 Louisville Water Company annual budget contemplates the 2006 annual dividend to be \$14,842,140, it would be in order at this time to declare a regular first quarter dividend of \$3,710,535;

RESOLVED, the regular second quarter 2006 dividend of \$3,710,535 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,786,123 to the Louisville / Jefferson County Revenue Commission on June 30, 2006, this being the second quarterly dividend for 2006 plus one quarter of the dividend adjustment for 2005, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Ms. Welsh seconded, and the motion carried.

Report Provided Regarding the Series 2006 Bond Issue

Mr. Miller advised staff has prepared final changes to the bond documents that were adopted in substantially complete form by the Board of Water Works on May 25, 2006. Louisville Water Company bonds were upgraded by Standard & Poor's from AA to AA+ based upon comprehensive financial and capital planning that is expected to help support the water works with excellent liquidity, debt service coverage, and capital management and a large amount of reserve funds that substantially increase liquidity. Also, the rating by Moody's Investors Service of Aa1 was affirmed based upon a long-term trend of well managed financial operations – including strong debt service coverage despite recent draws on working capital, a regionally important service area economy, and a manageable debt profile. These ratings affect the Series 2006 bonds as well as the outstanding Series 2000 and Series 2001 bonds. We are currently using a conservative estimate of the true interest cost for the Series 2006 bonds. This rate should be favorable to the amount contemplated in the 2006 Annual Budget. Staff and bond counsel will meet with the Louisville/Jefferson County Revenue Commission before the receipt of bids to obtain its approval for the bond sale. A recommendation for an award of the best evaluated bid based on the lowest true interest cost will occur at a special meeting of the Board of Water Works on June 21, 2006.

The closing of the \$10 million line of credit with JP Morgan Chase Bank is anticipated to be accomplished shortly.

Draft 2007-2021 Strategic Plan Discussed

Mr. Conner complimented staff on the draft strategic plan, noting LWC actually uses the Strategic Plan for planning, unlike some companies who simply place it on a shelf when it is completed. Mr. Huber presented an overview of the draft plan. The key issues before LWC are water quality regulations, the rebuilding or refurbishing of existing plants, assuring top-line growth while maintaining high levels of customer satisfaction, and recruiting and retaining skilled and talented individuals.

Ms. Susan Lehmann reviewed the changes to the proposed Vision, Purpose, Values and Cornerstones. The changes were made after many meetings with employees and emphasize the key components of providing safe, high quality water and earning the trust and confidence of our customers, while also emphasizing our focus on revenue growth. Mr. Heitzman reviewed the assumptions upon which we base the plan, emphasizing additions and changes regarding affordability in light of water and wastewater rate increases, specific regulatory drivers, changing water use patterns, and certain business environment influences. Mr. Conner noted a significant increase to the CPI would raise rates much higher than five percent if we use the CPI plus two percent guideline. Staff noted minor changes will be made to the Assumptions based on feedback presented at the meeting by Directors.

Ms. Teasley reviewed changes to the Strengths, Weaknesses, Opportunities and Threats. Many of the weaknesses apply only to the appetite for new business ventures, and several new opportunities are included due to the consideration of growth and expansion. Most of the threats have existed since the previous plan, but new threats regarding rising costs of health care, retirement benefits and supplies were

added. Mr. Miller added this plan represents a fundamental change in the risk profile because of changing patterns in water consumption. After discussion, staff will add a few statements under weaknesses relating to approval of capital projects, communications, and providing resources to fund strategic initiatives.

Regarding the Constituent Goals and Objectives, Ms. Teasley reviewed those relating to customer service and Mr. Heitzman reviewed the water quality goals that have been changed. Mr. Miller reviewed changes proposed to the owner's interests based on its ownership of physical assets, financial assets and intellectual assets and risks. The collective measures, if achieved, demonstrate a balanced portfolio of those assets. Mr. Martin confirmed with Mr. Miller that PFM concurred with these measures. Ms. Lehmann reviewed changes in the goals relating to employees.

The next meeting will include a review of Strategy V. An updated version of the Strategic Plan will be provided to Directors in advance of the meeting incorporated suggested changes from the meeting.

Budget Increased for Projects 11328: Block Lead Service Renewals and 11321: Fire Hydrant Replacements

Mr. Heitzman advised the 2006 Capital Budget includes \$3.12 million for various improvements to the transmission and distribution systems constructed by LWC in-house crews during slack maintenance periods. These include transmission system improvements, lead service renewals either by block or individually (point), large meter renovations or installations, service modifications, distribution system improvements, fire hydrant replacements and lock installations, blow off installations, and detector check valve installations. Through April, Distribution Operations completed over 40 percent of the assigned Capital Program; however, work was not evenly distributed across the entire program. In an effort to coordinate work with Metro paving schedules, the number of lead service renewals by neighborhood block is projected to increase above the 2006 budget allocation. Fire hydrants are replaced based on a defined set of criteria and work in 2006 is expected to also be above the budgeted allocation. Ms. Welsh moved to increase the budget allocation for two projects: Lead Service Renewals (Block) in the amount of \$300,000 and Fire Hydrant Replacements in the amount of \$275,000. The total Distribution Capital Budget allocation of \$3,117,750 remains unchanged. Ms. Harris seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 2:59 p.m.

There being no further business, the meeting was adjourned at 3:10 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
SPECIAL-CALLED MEETING MINUTES
JUNE 21, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Supplying Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources and Controller

Visitors:

Mr. Spencer Harper, Stoll Keenon & Ogden

Ms. Tamara Williams, Frost Brown Todd
Mr. Kevin Thompson, Public Financial Management
Ms. Barbara Bisgaier, Public Financial Management

A special meeting of the Board of Water Works was held, pursuant to proper notice requirements, on Wednesday, June 21, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chair Stewart Conner called the meeting to order at 12:15 p.m.

Bid Awarded for Series 2006 Bond Issue

Mr. Robert Miller advised staff and LWC consultants met with the Kentucky Revenue Commission earlier in the day and received approval for the 2006 Series Bond Issue. He further advised the Board of Water Works received bids for the Series 2006 Revenue Bonds until 11:00 a.m. today. Eight bidders submitted bids. The best evaluated bid based on true interest cost was at 4.609% and the spread between the highest and the lowest bids was 4.2 basis points. The best evaluated bid was submitted by a bidder prequalified to bid, CitiGroup Global Markets, which chose to insure some but not all of the bond maturities. Mr. Gerald Martin moved to adopt the resolution, attached hereto and incorporated herein, to award the 2006 Series Revenue Bonds bid to CitiGroup Global Markets, Inc., in the principal amount of \$83,845,000.00, seconded by Ms. Margaret Harris, and unanimously carried.

There being no further business, the meeting was adjourned at 12:25 p.m.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Barbara K. Dickens", written above a horizontal line.

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

David Haas, Jordon Jones & Goulding

The special-called meeting of the Board of Water Works was held on Wednesday, July 19, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:30 p.m. This meeting replaced the regularly-scheduled board meeting for July 11, 2006, which was canceled due to conflicts with an industry conference being attended by several senior staff.

Minutes from the Previous Regular Meeting and Special-Called Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the Regular Meeting held June 20, 2006, and the Special-Called meeting held June 21, 2006, seconded by Ms. Marita Willis, and the motion carried. Mr. Conner informed the Board that the two strategic planning items under the Special Issues will be deferred to the next board meeting to enable full participation by all board members.

Budget Increased and Authorization Granted for Final Design and Bid for Project 99-402: Riverbank Filtration

Ms. Kay Ball provided a short history of the progress of this project. On March 2, 2005, bids were received for the riverbank filtration tunnel project and the low bid of \$48.4 million exceeded the \$31 Million estimate of Jordon Jones & Goulding Engineers (JJ&G, by \$17.4 million. The Board directed staff to conduct a value engineering exercise with JJ&G to consider design modifications to allow the project to be built within budget, while meeting the functional objective of delivering a 45 MGD water supply to the B.E. Payne Water Treatment Plant. The Board revised the total project budget reservation to

\$40,424,800 in January 2006 and granted authorization to proceed with the final design. Final design and specifications based on the value engineering work are nearing completion and preparations are being made for bid, which is tentatively scheduled on September 20 of this year. The construction estimate is based on the final design and adjusted to reflect the construction market at the time of bid. The engineer's estimate of \$31 million for construction has been increased to \$34 million and will require an adjustment in the current budget reservation of \$40,424,800 to \$43,424,800. Mr. Robert Wyrzbiecki with JJ&G explained several significant increases to the construction cost index. Mr. Heitzman summarized the major changes resulting from the value engineering exercise including the elimination of designating the subsurface condition as gaseous. The bid allows an alternate to extend the tunnel and add an additional well to add another 15 MGD well capacity if costs are favorable.

Two collector well companies, Collector Wells International and Layne/Reynolds, were in operation in the United States at the time of the original advertisement for bid; both of which submitted applications for pre-qualification (PQ). During the PQ process, Collector Wells International was acquired by Layne/Reynolds, thereby eliminating U.S. based collector well competition in the bid and possibly affecting the project costs. Ms. Ball discussed issues regarding the procurement of the project. Mr. Conner inquired whether, in light of the collection wells completions issue, we could separate it in to two projects, and Mr. Heitzman stated we could, although it would place LWC in the role of construction manager, which may increase contractual risk. Staff will evaluate alternatives for addressing the sole source collector well contractor issue.

Ms. Willis moved to establish a revised budget reservation in the amount of \$43,424,800 and grant authorization to proceed with the bid of Project 99-402: Riverbank Filtration Tunnel and Pump Station at B.E. Payne Water Treatment Plant. Mr. Martin seconded, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber discussed the Chemical Security Act. Water utilities may be exempt but exemption is not automatic. Mr. Huber also discussed revisions to the lead and copper rule. Finally, Mr. Huber stated LWC will pay occupational taxes on director compensation directly to the local government if we confirm they are required to be paid.

Financial Report Provided

Mr. Robert Miller provided the financial results through June 2006. June water sales were slightly less than budgeted and O&M expenses were slightly more than budgeted. Depreciation costs have been rising and are expected to continue exceed budget for the rest of the year. Year-to-date net income is down. LWC should be able to offset the current budget deficit with the lower interest expense and higher interest income and meet the dividend projection assuming no further unusual, unanticipated expenses, normal water sales, no other impacts to the contingency, and no deposit to the Infrastructure Replacement Reserve. Mr. Miller noted an error in the Refundable Contracts category on the Statement of Net Assets. The proceeds from the short-term borrowing should have been reflected in the Bonds and Notes Payable category.

Operations and Engineering Report Provided

Mr. Greg Heitzman presented the Operations report for June. Due to wet weather conditions, the average production rate last month was significantly lower than the same period in 2005. The average production rate for June was 136.6 MGD, which is 13.4 percent less than the June 2005 production rate of 157.7 MGD and 3.6 percent lower than the five year average of 141.6 MGD. For the year to date, production was 4.8 percent lower than 2005 and 2.7 percent lower than the five year average.

LWC will participate with representatives from other water and wastewater utilities in Kentucky, Tennessee, and Georgia to develop an agency response plan and network known as Water and Wastewater Agency Response Networks (WARN). The objective is to provide rapid, short-term deployment of emergency services to restore the critical operations of the affected water/wastewater utility. The WARN effort will be coordinated with existing emergency response systems (i.e. DES and FEMA) and will be funded by a grant from US Environmental Protection Agency. Don McKay will represent the Company on the Kentucky, Tennessee, Georgia WARN committee.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report for June 2006. The June abandonment rate was 6.9% compared to 4.1% in May 2006 and 7.8% in June 2005. Bad debt for the month was \$69,348 compared to \$71,588 in May 2006 and \$45,190 in June 2005. Bad debt is \$17,337 over budget for the month and \$62,235 over budget year to date.

The Total Customer Satisfaction Index (CSI) reached a new all-time high of 857 this past quarter, with gains in the residential non-service and service segments as well as commercial service. The commercial non-service segment stayed flat from the first quarter at 882. The Total CSI year to date average of 851 exceeds the 2006 Corporate Level II goal. All five of the factor scores for the total index increased, with water quality and reliability at new highs. All of the quarterly results meet or exceed the objectives recently developed for the 2011 Strategic Plan with the exception of price/value and information. However, these objectives require that the results be sustained as an annual average. Customer Satisfaction for the Service CSI also increased substantially in the second quarter to 817 from 779 in the first quarter of 2006. This is also a new high for the Service CSI, and the year to date average of 798 meets the Level II goal (two points short of the Level III goal) for customer satisfaction for the Corporate Performance Award. All factors were up for residential service, with a new high in customer service. Factors for commercial service increased with the exception of a slight drop in water quality. Price/value for this segment reached a new high.

Staff, working in conjunction with finance representatives from the Metropolitan Sewer District, has completed the work to validate the water, sewer and drainage credits due to customers over billed for monthly service charges. Letters explaining the credit are scheduled to be mailed in mid-July. The credits will be issued beginning July 17, 2006 and will continue through August 15, 2006 billing.

Closed Session Held

Ms. Willis moved to go into closed session to discuss proposed or pending litigation and personnel matters pursuant to KRS 61.810(1)(b) and(f), respectively, at 1:36 p.m. Mr. Martin seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Willis and unanimously carried, the Board resumed open session at 1:59 p.m. No action was taken in closed session.

Final Update Provided on the 2006 Series Bond Issue

Mr. Miller stated the Series 2006 Bond Issue was successfully closed on July 12, 2006 consistent with the bond calendar schedule established in late March. The true interest cost for the issue was 4.61%. The total amount of proceeds from the issue was \$86,045,538.75 distributed to the Project Fund (\$72.5

Million), payment of the interim Financing (\$10 Million), the Debt Service Reserve Fund (\$2.97 Million), and costs of the bond issue (\$470,750). A requisition to reimburse the Operating Fund, Depreciation Fund and Infrastructure Replacement Reserve Fund for previous capital expenditures will be processed for \$43,549,284.61. The remaining funds will be invested in allowable investments to optimize liquidity and yield until requisitioned for capital project expenditures. In response to Mr. Martin, Mr. Miller stated the credit line has been repaid and is no longer available.

Second Quarter Certification Provided for Projects Authorized and Change Actions Approved

Mr. Huber certified that the following projects and change actions were authorized in the Second Quarter of 2006, pursuant to the Capital Projects Authorization Policy and Procedures:

11319-11328	Managing Distribution Operations Point Capital Program for 2006, cost center 280 – Project Change Action #1 for 1 st Quarter 2006 update revising budget estimates of several projects within program but no change in overall program estimate moving projects to Work in Progress. CPAC-05/11/06, President approval–05/15/06 Previously approved program budget estimate = Change to total program = Approved program budget estimate = <i>Board approval received</i>	\$ 3,117,750 <u>0</u> \$ 3,117,750

Update Provided Regarding Crescent Hill Treatment Plant Chemical Storage Building

Mr. Heitzman updated the Directors on the chemical storage building at the Crescent Hill Water Treatment Plant and the activities of the Community Advisory Group established in April 2006. Meetings held in May 2006 included presentations by LWC staff and JJ&G Engineers on the available technologies for chlorine generation and delivery for water treatment. A June 26 meeting focused on the application of these alternative technologies to five sites at the Crescent Hill Water Treatment Plant.

The five alternative technologies evaluated include: continued delivery of chlorine by 90-ton rail car (Alternative 1); on-site generation of 0.8 percent sodium hypochlorite (Alternative 2); on-site generation of 12 percent sodium hypochlorite (Alternative 3); delivery of 12 percent sodium hypochlorite by truck (Alternative 4); and delivery of 12 percent sodium hypochlorite by rail car (Alternative 5). Five sites were evaluated for the chlorine technologies: the open space area north of the coagulation basins using a reduced footprint (Site A); the existing chemical building, south side Frankfort Avenue (Site B); the area adjacent to the fluoride and POL building, on the south side Frankfort Avenue (Site C); the area adjacent to grounds maintenance building, south side Frankfort Avenue (Site D); and the existing chlorine building (retrofit) (Site E).

The combination of technologies and sites yielded 25 different alternatives; however, several alternatives are not acceptable, reducing the viable alternatives to 11 scenarios that were evaluated for their ability to meet objectives of safety, reliability, operability, and maintenance. Seven of these alternatives were operationally undesirable, leaving four alternatives that warranted further consideration are on-site generation of 0.8 percent sodium hypochlorite at Site A, B or C or truck delivery of 12 percent sodium hypochlorite to the open space area (Site A). In addition to chlorine, this project includes upgrading the ferric chloride and polymer storage to 30-day supply volumes to meet Kentucky Division of Water standards. These four chlorine alternatives will accommodate the ferric chloride and polymer storage upgrades through either a new building or retrofit of the existing chlorine storage building.

On June 26, the Advisory Group agreed to present these four alternatives to their respective constituencies and bring input to the next meeting of the Community Advisory Group scheduled for August 4. LWC staff is reviewing each of these four alternatives in detail in preparation for the next meeting of the Community Advisory Group. Mr. Conner complimented Mr. Heitzman and the neighborhood group on the professionalism exhibited in working well together to achieve a solution. Mr. Martin inquired whether the north basin will need restoration. Mr. Heitzman advised it has been 25 years since the last major renovation of those basins, and future upgrades are inevitable. It is possible that the area at issue will need to be used for other LWC purposes in the future, so it may not be available in the future as a park-like area.

Report Given Regarding the New Service Installation Costs

Ms. Teasley advised the average cost to install a new ¾" water service reached \$810 at the end of 2005 with the three year average cost reaching \$696, widening the gap between the \$450 fee received from each new customer and the Louisville Water Company's (LWC) actual cost. As a result, LWC is subsidizing approximately 44% of the cost to install new ¾" services.

2006 actual costs to install new services are comprised of labor (57%), material (28%), equipment (9%) and contractual services (6%). Increases in wages and labor related overhead, increased drive time and reduced efficiency as a result of increased amount of rock subgrade have had the most significant impact on installation cost increases. Material expenses for ¾" new services have also increased by 25% between June 2004 and June 2006. With a strong housing market, these cost pressures can be more readily absorbed because of the increased efficiency associated with high volumes in concentrated areas.

However 2005 ¾" installations were down 16% from the previous 3 year average, and May 2006 year-to-date housing data indicates a 42% decline in new housing permit requests in the Louisville Metro area when compared to May 2005 year-to-date data.

To help keep new service installation costs and fee increases to a minimum, a pilot program developed with a committee of the Home Builders Association of Louisville (HBAL), is being implemented to provide a cost-sharing incentive to developers for installing PVC pipe called "service sleeves" in the ground at the time of the water main installation. This method allows LWC's service installation crews to run the service line from the main to the meter vault through the sleeve and avoid cutting of pavement and other difficult and costly excavations when a homeowner requests service.

Informal feedback gathered from the HBAL/LWC subcommittee meetings indicates that a multi-year approach to fee increases will be better received so HBAL members can incorporate increases into their cost margins. As a result, LWC staff is considering phasing in fee increases. Staff will also be recommending the 2007 Fee Schedule to the Board in the near future to allow for advance notice of the increases to homebuilders and other new customers.

Mr. Huber explained new customers also pay a \$700 System Development Charge to pay for various facilities such as booster pumps and storage tanks necessary to produce water in a sufficient quantity and at a pressure that is adequate.

Executive Session Conducted

The Board went into Executive Session without management present at 2:40 p.m.

There being no further business, the meeting was adjourned at 2:50 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
SEPTEMBER 19, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. Rick Johnstone, Deputy Mayor, Louisville/Jefferson County Metro Government
Mr. John Huber, President/CEO
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. James Brammell, Director of Engineering and Planning, Assistant Chief Engineer
Ms. Amber Halloran, Controller and Business System Owner, Supplying Financial Resources
Mr. Jim Smith, Business System Owner, Infrastructure Planning
Dr. Jack Wang, Business System Owner, Managing Water Quality
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Mr. Vince Guenther, Process Owner, Providing Governmental Relations
Ms. Kim Reed, Process Owner, First Run Response and Work Order Management

Visitors:

Mr. Larry Gaddis, Black and Veatch Consulting Engineers
Mr. Donnie Ginn, Black and Veatch Consulting Engineers
Ms. Sybil Ault, Crescent Hill Community Advisory Group
Ms. Martha Elson, The Courier-Journal
Mr. Peter Naake, Crescent Hill Community Advisory Group
Mr. Michael Williams, WAVE-TV

The regular meeting of the Board of Water Works was held on Tuesday, September 19, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:32 p.m.

Minutes from the Previous Special-Called Meeting Reviewed and Approved

Mr. Gerald Martin suggested changes to the draft minutes from the regular meeting held August 15, 2006, as follows: under the section regarding the Strategic Plan, change the fifth sentence of the second paragraph on page 5 to "Ms. Teasley stated some business opportunities are potentially low risk and involve low cost to the company to implement."; change the fourth and fifth sentence of the fourth paragraph on page 5 to "Mr. Martin suggested, at a minimum, we should include some funds for use in

the balance of 2006 to further develop and evaluate the top three initiatives. Mr. Conner stated agreement with those estimates, to the extent there is some assurance of success of the initiatives.”; under the section regarding the sources of investment capital for new business opportunities on page 10, add the following sentences to paragraph two after the third sentence: “Mr. Martin voiced disagreement with some of the conclusions and recommendations Mr. Miller arrived at in his presentation to the Board. While he believes a substantial amount of autonomy and organizational separation may be appropriate to maintain between LWC and any new businesses or acquisitions, Mr. Martin recommended the owner should be willing to participate fully in the potential rewards and the possible risks of such expansion or diversification strategies.”; and change the last sentence of the first paragraph on page 10 to state “Mr. Martin believes those opportunities must be addressed on a case-by-case basis.” Mr. Martin moved to approve the minutes from August 15, 2006, with these changes, seconded by Ms. Wendy Welsh, and the motion carried.

Authorization Given for Preliminary Design and Budget Established for the Crescent Hill Chemical Storage Facilities

Mr. Peter Naake addressed the Board on behalf of the Crescent Hill Community Advisory Group.. Mr. Naake stated the group opposes the use of Reservoir Park for a chemical storage facility. They have worked with Louisville Water Company and reached a compromise solution for the facility to be constructed on the south side of Frankfort Avenue on LWC property. They believe this addresses their concerns and shows LWC’s commitment to be a community partner. Mr. Naake thanked LWC staff for their cooperation.

Mr. Greg Heitzman distributed an article from the September 19, 2006 The Courier-Journal regarding this issue. Mr. Heitzman summarized that the evaluation process identified 25 possible combinations of sites and technologies, which were reduced to two feasible solutions based on safety, reliability, operability, maintainability and constructability. The two offered solutions were: (1) an on-site chlorine bleach generation facility constructed in the open field, north of the coagulation basins, with a new building including storage for ferric chloride and polymer chemicals or (2) an on-site chlorine bleach generation facility constructed on the south side of Frankfort Avenue and a retrofit of the existing chlorine building for ferric chloride and polymer chemical storage.

Mr. Heitzman highlighted the advantages and disadvantages of both solutions. Senior management has reviewed the two alternatives and agrees with the Community Advisory Group to pursue locating the chlorine facility on the south side of Frankfort Avenue. The next step is to proceed with preliminary engineering design on the chemical building and the ferric chloride building retrofit. This design phase will finally confirm the feasibility and engineering design assumptions made during the evaluation process. The budget reservation of \$12.2 million will be evaluated by the consulting engineer to determine the adequacy for this revised scope of work. JYG Engineers has provided services for the conceptual design and feasibility report, and staff recommends continuing to work with JYG to perform the preliminary design for the modified scope of work. The authorization of the engineering services agreement is within the contract authority of the President.

This solution allows the open field north of the coagulation basin to remain accessible to the public currently and under normal operating conditions. The procedures for Homeland Security Level 5 (Red) require the closing of Reservoir Avenue and this restricts public access to the plant facilities, including the Crescent Hill Reservoir. The Community Advisory Group was informed that this area must be retained for future plant replacement, rehabilitation, or expansion. In the next 10 years, the north coagulation complex will be replaced or rehabilitated and construction may require use of this open field area. Further, the Board has not yet decided on the advanced treatment technology required to meet future drinking water regulations. This open space may be required for construction of advanced

treatment and or relocation of facilities to accommodate advanced treatment in another area of the plant, and to avoid the taking of any residential property in the area.

Mr. Martin inquired whether pedestrian traffic will also be blocked if Homeland Security required a closing of the facility, and Mr. Heitzman stated it would. Mr. John Huber stated any facility constructed on the south side will be consistent in appearance with other buildings on that side of Frankfort Avenue. He added this is the twelfth plant addition at the Company's Crescent Hill property since the reservoir was built in 1880, and there will be other changes and additions in the future.

Mr. Heitzman stated one final issue to be resolved is access to the area where we will store ferric chloride and polymer. We may have to access this area from Pennsylvania Avenue, but he noted residents were apprised of this and stated no objection to it as a compromise to not using Reservoir Park at this time.

Ms. Margaret Harris moved to authorize staff to initiate preliminary design of the Crescent Hill Chemical Storage Facilities for chlorine, ferric chloride, polymer, and PAC and to establish a budget reservation of \$12.2 million for the project. The chlorine bleach facility will be located on the south side of Frankfort Avenue, and the existing chlorine and PAC feed buildings will be retrofitted to accommodate storage for ferric chloride, polymer and PAC chemicals. Upon completion of preliminary engineering by JJJ Engineers, the Board will be presented with a report and recommendation for final design and bid of the project. Staff will also present the preliminary design to the Community Advisory Group for their input on the final design. Mr. Martin seconded, and the motion carried.

Financial Report Provided

Mr. Robert Miller provided the financial results through August 2006, which were somewhat improved over previous months. Net Operating Revenue for August of \$4,629,936 is \$484,795 or 11.7% higher than budgeted and \$592,774 or 11.4% less than August 2005. However, Net Operating Expenses for the month of August were also higher than normal. Year-to-date Operation and Maintenance Expenses of \$32,824,001 are \$95,939 or 0.3% higher than budgeted and \$2,698,652 or 9.0% higher than 2005. YTD Total Operating Expenses of \$53,608,819 is \$386,418 or 0.7% higher than budgeted and \$4,659,742 or 9.5% higher than 2005. The budget variance is primarily related to higher depreciation expense. YTD Net Income of \$19,972,183 is \$1,406,465 or 6.6% less than budgeted and \$3,826,322 or 16.1% less than 2005.

Mr. Miller stated the forecast for 2006 was prepared using two sets of assumptions on water sales and expenses. Under one assumption, we will achieve the targeted dividend and under the other assumption we will be below target by approximately \$500,000. Mr. Huber noted water sales are fluctuating more than they have historically. Mr. Miller noted the major cost drivers are increased transmission main breaks, pump and motor repairs, overtime expense and the inventory adjustment. The 2006 forecast and the proposed 2007 budget are to be discussed with representative from the Mayor's office at an upcoming meeting. Mr. Martin commented that industrial sales continue declining. Mr. Heitzman commented our largest industrial customer notified us of its intent to utilize wells and thereby decrease the amount of water it purchases from LWC. Mr. Rick Johnstone noted our wholesale sales continue to increase.

Operations and Engineering Report Provided

Mr. Heitzman presented the Operations and Engineering report for August 2006. The average production during last month was 143.9 MGD, a 10.7 percent decrease from the 2005 August production of 161.1 MGD. Last month's production was lower than the five year average August production of 150.1 MGD by 4.2 percent. For the year to date, production is 6.2 percent and 3.2 percent lower than 2005 and the

five year average, respectively. Rainfall is nearly eight inches above normal, and 13.8 inches more than 2005.

July costs were high at \$200,000 (8.8 percent) over budget, bringing the year to date costs to \$307,000 (2.1 percent) over budget. August costs improved slightly, but continued to be over budget by \$162,000 (0.9 percent). These higher expenses were not expected since both production volume and maintenance activity are down for the year. Upon investigation, staff identified several major causes including material and maintenance costs, four large main breaks, an error in budgeting for sand and stone, rising fuel costs, the annual inventory adjustment, and increased overtime.

Beginning in mid August, staff implemented a plan to reduce operating and maintenance expenses to achieve budget by year end by deferring hiring, reducing overtime, shifting routine maintenance assignments to capital work, and suspending any discretionary expenses. Staff is optimistic that the Operations Core will be on or below the budget of \$26.1 million by year end, assuming a winter emergency does not develop in early December. Mr. Martin inquired about the inventory adjustment. Mr. Heitzman stated data is currently being collected on the warehouse and a report will be presented at an upcoming Audit Committee meeting. Mr. Martin inquired whether overtime can be managed differently. Mr. Heitzman stated this is also being analyzed and the goal for operations is to have overtime 7% or below of total labor costs excluding labor-related overhead costs. Mr. Conner asked for clarification regarding the budgeting error for sand and fill, and Mr. Heitzman advised it was an error in the unit cost estimates.

Serving Customers Report Provided

Mr. Huber provided the Serving Customers report for August 2006. The August abandonment rate was 9.2% compared to 8.7% in July 2006 and 11.5% in August 2005. Bad debt for the month was \$40,654 compared to \$47,409 in July 2006 and \$62,840 in August 2005. Bad debt is \$11,357 under budget for the month and \$46,276 over budget for the year.

In response to increasing volume in turn-off activity in 2005 and 2006, staff has re-evaluated the criteria for non-payment turn-offs. Factors considered were rate increases for LWC and MSD over the last several years, impacts of the service deposit implemented in early 2005, costs to LWC and customers and potential impacts on bad debt. Effective in September, the criteria will be adjusted consistent with current rate levels and to optimize collection of revenue at the lowest cost. Staff will continue to monitor the turn-off criteria for appropriate adjustments.

Compensation Committee Report Given

Mr. Conner summarized the discussions held at the Compensation Committee meeting on September 18, 2006. The adjustment in the salary ranges for the market movement has been 2.8% since 2004. The market has had merit increases of 3.4%, 3.5% and 3.7% for 2004, 2005 and 2006, respectively, and is projected to increase 3.7% in 2007. LWC salary budget increases have remained steady at 3.0% in each of those years. Staff is proposing a 3.7% increase overall in the total salary budget. This percentage is for budget planning purposes and individual merit increases would be determined by the employee's manager, according to the proposed 2007 merit matrix and in keeping with each manager's total salary budget. Mr. Conner stated the Compensation Committee agreed with using 3.7% increase overall in the total salary budget for planning purposes. He noted the full Board will approve the final budget which will include overall increases to the salary budget at the BOWW meeting in November.

Third Quarter Dividend Declared

Dr. Joseph Wise moved to adopt the following resolution to declare the Third Quarter Dividend:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 14, 2006 to adjust the 2005 annual dividend by \$302,350, from \$15,875,700 to \$16,178,050, the difference to be added in equal quarterly installments to the quarterly 2006 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2006 Louisville Water Company annual budget contemplates the 2006 annual dividend to be \$14,842,140, it would be in order at this time to declare a regular first quarter dividend of \$3,710,535;

RESOLVED, the regular third quarter 2006 dividend of \$3,710,535 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,786,123 to the Louisville / Jefferson County Revenue Commission on September 29, 2006, this being the third quarterly dividend for 2006 plus one quarter of the dividend adjustment for 2005, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution

Ms. Welsh seconded, and the motion carried.

Strategic Plan, Strategy I: Water Quality and Strategy III: Synergy Discussed

Dr. Jack Wang discussed the changes to the key elements of Strategy I on Water Quality. It is the Company's goal to develop and retain well-qualified individuals in the area of water quality, to construct the facilities necessary to ensure compliance with the Long Term 2 Enhanced Surface Water Treatment Rule and the Disinfection By-Product Rule by 2012, to maintain high levels of achievement in source water quality, and to protect distribution water quality through the implementation of a cross connection control program and other distribution system best management practices.

Ms. Kim Reed discussed the key elements of Strategy I on Synergy. Specifically, the Company is striving to achieve synergies that will reduce cost, improve service and increase efficiency. These synergies can be found through developing procurement consortiums for the purchase of goods and services in order to gain volume discounts, through strengthening key business partnerships, through continual process improvements and staying abreast of industry research, through working with local government and other utilities on planning to better coordinate work, and by providing better access to company information.

Issues Affecting the 2007 Operating Budget

Mr. Miller provided an overview of the major issues that are affecting the 2007 Operating Budget. We have been more conservative in the 2007 water sales estimate, and we plan to increase the deposit to the

Infrastructure Replacement Reserve. The labor and labor-related overhead expense, depreciation, expense and return on equity are driving a rate increase of 6.5%. Without those drivers, the required rate increase would be only 3.0%. Mr. Martin inquired about the increasing depreciation expenses. Mr. Miller explained we cash finance depreciation. Water mains fully depreciate over 65 years and transmission mains fully depreciate over 100 years. Mr. Martin noted the bond issues require funding of depreciation expenses. Mr. Miller stated approximately one-half of each revenue dollar goes to operating the Company, and the other half goes to financing the investments.

Kentucky Retirement Systems Update Provided

Mr. Vince Guenther advised cost pressures affecting the increase in the assessment to employers are expected to increase for the next ten years. Currently, our contribution is 13.19% of payroll and it is expected to rise to 14.6% for the 2007-08 state fiscal year. Some changes have been made over the last two years to lower the costs; however, the major driver for costs is the unfunded retiree health insurance benefits. Recent legislative changes to lower costs include changing the required number of years of service to 30 instead of 27 in order to earn retirement at 60% of salary, raising the minimum age of retirement to 55, and most recently, changing the health plan guarantee to a state contribution of \$10/per month per service year payable to the retired employee to be used for payment of health insurance premiums.

Mr. Huber commented that CERS and our health insurance increases are significant cost drivers affecting our operating budget.

2006 Annual Inspection Report Given

Mr. Larry Gaddis of Black & Veatch Consulting Engineers summarized the findings from the 2006 Annual Inspection. The Annual Inspection is required pursuant to the 1992 Master Bond Covenant and includes a review of insurance policies, financial management and rate system and a physical review of water supply and treatment facilities.

Black & Veatch found that the Company is making commendable progress in funding, scheduling and implementing capital projects and correcting deficiencies identified previously. Overall, the water supply and treatment facilities have been maintained in good repair and sound operating condition and are capable of continuously supplying potable water to the Company's customers. Because of the simultaneous review necessary for the Bond Feasibility Study, Black & Veatch visited more sites than usual – 20 facilities at 11 locations. Their field inspection resulted in recommended actions. Of the recommended actions, 20 were ranked as High Priority, 54 were ranked as Medium Priority, 25 were ranked as Low Priority, 6 were ranked as Observations, and 23 were ranked as needing Routine Follow-Up.

Mr. Ginn highlighted the major High Priority items for Directors. First, designing and constructing facilities to meet the 2012 water treatment regulatory compliance timeline will be challenge and we should evaluate interim alternative improvements to meet those regulations, develop contingency plans, and continue the Advanced Treatment Technology. Second, the Company needs to review rapid material price increases and other drivers of capital project cost increases, perform a risk analysis on alternative project delivery methods. Third, there is 2 years or less of remaining capacity on the B. E. Payne Plant Lagoons due to deposited solids, which may have an adverse impact on suspended solids and chorine levels regulated by our discharge permit. Fourth, we should continue to evaluate risks associated with extending the service life of older facilities. Fifth, there is a need to develop more accurate site drawings at the Crescent Hill Filter Plant for emergency maintenance. Sixth, repair of a 72" gate valve in the clear well at the Crescent Hill Pump Station is needed and is planned for Fall 2006 or Winter 2007.

Notification Given to Directors of Their Responsibilities Under the Kentucky Open Records Act and the Kentucky Open Meetings Act

Ms. Barbara Dickens provided an overview of the legal responsibilities imposed on Directors pursuant to the Kentucky Open Records and Open Meetings Acts. Pursuant to 2005 legislative amendments, all elected or appointed members of government boards must be provided an overview of their responsibilities and sign a statement that this notification has been given. All Directors signed the verification to be provided to Metro Louisville Mayor Jerry Abramson.

Funding Discussed for the Infrastructure Replacement Reserve for 2006

Mr. Miller stated the Infrastructure Replacement Reserve for 2006 was intended to be funded in the amount of \$480,000. During the first eight months of 2006, revenues have been less than expected due to an unusually wet irrigation season. It now appears that revenues, net of expenses, may not be sufficient to fully fund the Infrastructure Replacement Reserve in 2006. Based upon continued low water pumpage through end of the irrigation season, staff recommended deferring funding of the Infrastructure Replacement Reserve for 2006. Dr. Wise moved to adopt the following resolution:

WHEREAS, the Board of Water Works adopted the 2006 Annual Budget on November 15, 2005; and

WHEREAS, the 2006 Annual Budget contemplated funding of the Infrastructure Replacement Reserve in the amount of \$480,000; and

WHEREAS, it now appears that revenues, net of expenses, may not be sufficient to fully fund the Infrastructure Replacement Reserve in 2006;

NOW, THEREFORE, be it resolved by the board of water works, as follows:

RESOLVED, that no further deposits be made to the Infrastructure Replacement Reserve until further notice or for the remainder of 2006, whichever first occurs; and

RESOLVED, that previous deposits to and requisitions from the Infrastructure Replacement Reserve during 2006 be cancelled.

Ms. Marita Willis seconded, and the motion carried.

Budget Increased for Project 03638: Crescent Hill Filter Plan Slate Roof Replacement

Mr. James Brammell reminded the Board of his report in August wherein he apprised Directors of recently discovered and previously unforeseen conditions that require modifications to the construction contract for the slate roof replacement on the CHFP North-South Filter and Chemical Buildings. Several of the wood structural elements of the buildings are rotted and require replacement or repair. The contractor also discovered rotted wood purlins and hip and ridge boards when it removed the slate and roof metals. The contractor has determined gutter brackets are unsalvageable and must be replaced. The Project Manager prepared Project Change Action No. 7 to deal with these conditions. At the August 2006 Board meeting, Dr. Wise asked staff to validate that the work to be performed under Change Action No. 7 was not included in the base bid of the construction contract. Staff has reaffirmed that the work was not included in the original scope of the project. Dr. Wise commented the consultant should have foreseen this issue when estimating the project. Mr. Brammell noted that this is necessary work, for which the Company would have incurred costs in doing the project. Dr. Wise moved to increase the project budget by \$165,083 and to establish a revised project budget of \$4,181,968. Ms. Welsh seconded, and the motion carried.

Budget Increased for Project 10414: Shelbyville Road II Main Replacement

Mr. Brammell advised this project is to replace water mains in Shelbyville Road from Breckenridge Lane to I-264. Subsequent to the last Board approved project estimate of \$1,673,000, several issues have arisen

which have resulted in a need for cumulative funding increases in the amount of \$415,607. Material cost increases of \$340,000 are the primary contributor to the project cost increases, with construction costs adding \$83,607. Staff anticipates a reduction in the anticipated engineering costs of \$8,000. The revised total project budget required is \$2,088,607. The materials estimate included in the most recent Board approved budget was underestimated. This was not discovered until a significant amount of the project had been completed. The shortfall in the materials budget was due to a failure to accurately include sufficient material (pipe) quantities in the estimate and due to an error in the unit cost of the pipe.

Mr. Rick Johnstone sought clarification regarding the project scope. Mr. Brammell advised this project is installing dual mains to avoid cutting into Shelbyville Road and incurring significant costs for each cut and significant disruption to traffic flow. We are nearing the end of the Main Repair and Replacement Project. Dr. Wise noted that, by having contractors purchase the materials directly from us, we are bearing the risk of materials price increases. Mr. Heitzman responded we have accepted that risk historically to ensure quality control in the materials being used in our water distribution system, but certainly it is a point of consideration while undergoing the evaluation of whether to maintain a warehouse or not. Mr. Conner pointed out that the risk, and the estimated cost for it, will simply be passed on to us in the contractor's lump sum bid if we allow them to purchase materials from outside the Company. Ms. Harris moved to increase the value of Project 10414: Shelbyville Road II Main Replacement Project by \$173,000 and to establish a new project budget at \$2,088,607. Ms. Welsh seconded, and the motion carried.

New Service Installation Fees Approved for 2007

Ms. Nora Freeman advised we charge new customers the cost of installation of the water service pipe and meter vault for new services. This charge is a flat fee or deposit, reviewed annually, approximating the anticipated cost of the installation. After the 2006 fee review, staff recommends increasing the 2007 new service installation fee for ¾-inch service by \$75.00 to \$525.00. The 2005 average cost to install a new ¾-inch water service reached \$810.58 with the three-year average cost reaching \$636.02. Year-to-date through July, the average cost to install a new ¾" water service continues to increase to \$915.94 with the in-house capital crews average through July costing \$697.78. This higher average cost of installation is due to the fact that: crews are encountering rock more often during installation; material costs have increased 25% since June 2004, the largest of which is a 109% cost increase for copper in 2005; and we are incurring additional costs for repairs due to curb cuts, which become necessary as a result of the rocky environment in which we are installing the service.

While the year-to-date July 2006 average service installation cost has increased over the 2005 annual average for ¾-inch retrofit irrigation, 1-inch, 1½-inch, 2-inch, 3 and 4-inch domestic services and 6-inch and 8-inch fire services, the cost has decreased for 4-inch fire services. Staff believes these increases are not significant enough to warrant a fee increase and does not recommend any change to the new service installation fees other than the ¾-inch service.

Staff will continue to closely monitor new service installation costs and look for opportunities to control future expenses. One cost control measure is the service sleeve pilot in partnership with the Home Builders Association of Louisville (HBAL) Land Development Committee. Despite these efforts, new service installation fees for ¾-inch services may need to increase again in 2008 to ensure the fees are consistent with the marketplace and to cover the majority of the Company's actual installation cost. Staff will continue to provide actual cost updates during 2007.

Directors discussed whether we should mandate the use of service sleeves. Mr. Huber explained that the difficulty derives from who should bear the additional costs for the service sleeve installation. While this method saves the Company considerably, service installation costs are borne by the homeowner usually but installation of service sleeves, since it would occur when roads are being paved in the development,

would be borne by the developer. Therefore, it would be an additional cost to the developer. Mr. Conner commented that developers would then pass this cost on to the homeowner in the cost of the home. Staff will continue to work on acceptance of this method. Ms. Willis moved to approve the new service installation fee for ¾" services at \$525.00 effective January 1, 2007, seconded by Ms. Welsh, and the motion carried.

Kentucky Infrastructure Authority (KIA) Grant Agreements and Resolutions Authorized for Bob-O-Link Road and Southern Bullitt County Water Storage Tank Projects

Mr. Brammell stated the Company has received conditional commitment letters from KIA for grant assistance for two projects, Bob-O-Link Road, in the amount of \$198,000 and Southern Bullitt County Water Storage Tank, in the amount of \$550,000. Dr. Wise moved adopt the following resolution accepting the Bob-O-Link Road and Southern Bullitt County Water Storage Tank KIA grants, approving the Grant Agreements, authorizing the amendment of the 2006 LWC Budget to note receipt of the funds for both projects, and authorizing the Chief Engineer to sign the grant documents for both projects.

WHEREAS, the General Assembly has appropriated funds for infrastructure projects in the 2006-2008 Budget of the Commonwealth; and

WHEREAS, the Grantee has previously determined that it is in the public interest to acquire and construct certain facilities and improvements to the Grantee's utility system (the "Project"); and

WHEREAS, the Grantee desires funding from the Kentucky Infrastructure Authority (the "Authority") for the purpose of acquisition and construction of the Project.

NOW, THEREFORE, BE IT RESOLVED by the Board of Water Works of the Louisville Water Company as follows:

SECTION 1. That the Grantee hereby accepts the grant award and approves the Agreement between the Grantee and the Authority substantially in the form on file with the Grantee for the purpose of providing a portion of the necessary financing to the Grantee for the acquisition and construction of the Project.

SECTION 2. That Gregory C. Heitzman is hereby authorized, directed and empowered by the Grantee to execute the Agreement and all other necessary documents or agreements, and to otherwise act on behalf of the Grantee to implement the Project.

SECTION 3. That the Grantee hereby includes in its annual budget the receipt and expenditures of funds subject to the Agreement with the Authority.

SECTION 4. This Agreement shall take effect immediately upon passage

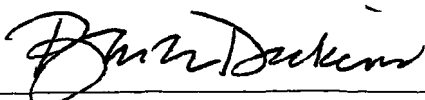

Ms. Willis seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 3:02 p.m.

There being no further business, the meeting was adjourned at 3:20 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
OCTOBER 10, 2006**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Marita Willis

Not Present:

Mayor Jerry Abramson
Ms. Wendy Welsh, Vice-Chair
Dr. Joseph Wise

Others Present:

Mr. Rick Johnstone, Deputy Mayor, Louisville/Jefferson County Metro Government
Mr. John Huber, President/CEO
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Amber Halloran, Controller and Business System Owner, Supplying Financial Resources
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Mr. Vince Monks, Distribution Water Quality Coordinator

The regular meeting of the Board of Water Works was held on Tuesday, October 10, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Minutes from the Previous Regular Meeting Reviewed and Approved

Ms. Margaret Harris moved to approve the minutes from September 19, 2006, seconded by Mr. Gerald Martin, and the motion carried.

Financial Report Provided

Mr. Robert Miller provided the financial results through September 2006, which were as previously forecasted. The revised forecasted revenues were on target at \$700,000 below budget, but Operations and Maintenance expenses, depreciation and other expenses were also below budget and therefore offset the lower revenue.

Operating Revenues for September of \$10,380,141 are \$673,004 or 6.1% lower than budgeted and \$365,931 or 3.4% less than September 2005. Operation and Maintenance Expenses for September of \$3,966,995 are \$117,559 or 2.9% less than budgeted and \$77,940 or 2.0% higher than September 2005. Total Operating Expenses for September of \$6,698,022 are \$302,019 or 4.3% less than budgeted and \$748 or nearly the same as September 2005. Net Operating Revenue for September of \$3,682,118 is \$370,985 or 9.2% lower than budgeted and \$366,679 or 9.1% less than September 2005.

Total Net Non-Operating Expense for September of \$178,979 is \$392,917 or 68.7% less than budgeted and \$140,182 or 43.9% less than September 2005. Net Income Before Distributions and Contributions for September of \$3,503,139 is \$21,931 or 0.6% higher than budgeted and \$226,496 or 6.1% less than September 2005. YTD Net Income of \$23,475,323 is \$1,384,533 or 5.6% less than budgeted and \$4,052,819 or 14.7% less than 2005. Capital Expenditures through September were \$44,470,093 or 51.39% of the 2006 Capital Budget of \$86,529,148 and 52.47% of the revised estimate of \$84,751,430.

Mr. Miller stated under current forecast we anticipate meeting the budgeted dividend, assuming no contribution to the Infrastructure Replacement Reserve and no unusual expenses.

Operations and Engineering Report Provided

Mr. Greg Heitzman presented the Operations and Engineering report for September 2006. The average production during last month was 124.3 MGD, a 9.6 percent decrease from the 2005 September production of 137.4 MGD. Compared with the five year average September production of 137.5 MGD, last month's production was also 9.6 percent lower. For the year to date, production is 6.6 percent and 4.0 percent lower than 2005 and the five year average, respectively. September production levels have not been this low since 1993. September was the second wettest on record with 9.6 inches of rainfall. Through September, total rainfall is 12 inches above the five year average and 22 inches more than 2005.

Due to the recent fall in fuel prices, the Fleet Process will be working with the purchasing and legal departments to pursue pre-purchase of 30 to 40 percent of the expected fuel needs for 2007. Current options being considered include purchasing futures contracts or working with a supplier to pre-buy fuel at current prices and taking delivery in 2007. With adjustments for sales tax and volume discounts, the Company pays approximately 25 cents less per gallon than the retail pump price. Through August, fuel expenses exceed budget by \$82,000 and with the recent reduction in fuel prices to less than \$2.00 a gallon (LWC cost), this budget overage will decline by year end. The 2006 budget assumes an average fuel price of \$2.32 per gallon for unleaded gasoline and \$2.06 per gallon for diesel fuel. Our fuel allocation is approximately one third un-leaded and two thirds diesel.

The bid opening for the Riverbank Filtration, Phase II project has been deferred until November 8, 2006 to increase competition as a result of two other tunneling projects being bid at this time in California. A special-called board meeting at the end of November may be necessary to approve the award of a contract.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report for September 2006. Customer satisfaction dropped in the third quarter from a second quarter Total Customer Satisfaction Index (CSI) of 857 to 831. All factors declined including water quality, customer service, information, reliability and price/value. Comparing 2005 factor scores to 2006 numbers year-to-date, information has dropped the most; however, it is weighted the least in the index formula. Also, the commercial non-service segment dropped the most, followed by the residential non-service segment. The year to date average of 844 for the Total CSI meets the Level I goal but falls six points short of the Level II goal. Customer satisfaction for the Service CSI increased in the third quarter to 820 from the previous high of 817. The year end average of 805 exceeds the Level III goal for the Corporate Performance Award (800). This is also a new high for the year to date average, up from a 2005 full-year average of 801.

A partnership with local artist Tom Foerster has helped raise thousands of dollars for Water For People, a non-profit organization that brings clean water and basic sanitation to thousands of the world's poorest people. Foerster created a series of 15 paintings of the Crescent Hill Reservoir that were displayed at the

historic Water Tower. Forty percent of the sale of those paintings and a portion of the proceeds of note card sales were set aside for Water For People. Additionally, LWC has three corporate giving campaigns: Metro United Way, Fund for the Arts and Water For People, which were combined for the first time this year.

Closed Session Held

Ms. Marita Willis moved to go into closed session to discuss proposed or pending litigation and a business proposal pursuant to KRS 61.810(1)(b) and (g), respectively, at 1:55 p.m. Mr. Martin seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Ms. Harris and unanimously carried, the Board resumed open session at 2:15 p.m. No action was taken in closed session.

Strategic Plan, Strategy II: Customer Satisfaction and Strategy IV: Organizational Effectiveness Discussed

Ms. Teasley discussed the updates and changes to Strategy II regarding Customer Satisfaction, which is to invest in new technologies and programs to enhance customer satisfaction and achieve best in class customer service. Many of the changes focus on customer service information system recovery time objectives and improving internal controls for the customer management system. The additions also address the need to consider affordability for our low income or fixed-income customers and emphasize the importance of business continuity planning in emergency situations.

Ms. Susan Lehmann discussed changes made to Strategy IV regarding Organizational Effectiveness. Formerly this goal focused on a high quality of work life, but it has now been broadened to include other organizational effectiveness initiatives. We plan to maximize the diverse talents in the workforce by effectively implementing our Performance Partnerships process, by rewarding and recognizing positive behavior consistent with our Core Values, and by ensuring skills training in a variety of job classifications, including a continued focus on information technology training.

Preliminary 2007 Operating Budget Discussed and Approved for Filing

Mr. Miller provided an overview of the Preliminary 2007 Budget. The proposed 2007 Capital Budget is \$74,223,154 and the proposed 2007 Operating Budget is \$125,318,900. The Capital Budget is developed based on the 2002-2021 Facilities Plan and the 2006 Annual Inspection Report. The Operating Budget is developed based on the 2007-2021 Strategic Plan and certain planning parameters such as projected water sales, the union contract and salary scale increases, and the anticipated inflation rate. The Capital Budget is funded primarily from cash generated from operations, i.e. profits not paid out as dividend and non-cash expenses such as depreciation. Another major source of Capital Budget funds are the developer contributions in the form of distribution extensions, water service and fire hydrants. The Operating Budget is funded almost entirely by water sales.

The 2007 Capital Budget is approximately \$20 Million lower than what was projected for 2007 in both the Series 2006 Bond Issue and the 2006 Capital Improvement Plan as a result of cash flow adjustments to major treatment plant projects to more accurately reflect current construction schedules and deferral of transmission projects to improve system reliability and redundancy. The reduced capital program will not impair our ability to spend the proceeds of the recent bond issue within the two year requirement. The breakdown of Capital Budget allocations is: Infrastructure Replacement/Rehabilitation - \$26.0 million;

New Technology and Facilities - \$17.9 million; Growth-Related Improvements - \$13.7 million; and Self-Financing Improvements - \$16.5 million.

The 2007 Operating Budget of \$125.3 million is based on the following assumptions: Water Sales Decreased by 1.6%; Operation and Maintenance Expense Up \$2.6 million or 5.2%; Depreciation and Amortization Expense Up \$2.4 million or 12.0%; Non-Operating Expenses Up \$1.6 million or 19.1%; Non-Operating Income Up \$2.7 million or 81.4%

This preliminary budget contemplates a rate increase of 6.5% for water sales on and after January 1, 2007. This rate increase is 1.5% higher than what was forecast in the financial plan contained in the Series 2006 Bond Issue. Without the decrease in projected water sales and the increase in funding to the Infrastructure Replacement Reserve, the rate increase would have been 4.3%.

Ms. Harris moved to authorize staff to file the preliminary budget with the Bond Trustee and with Louisville/Jefferson County Metro Government, Mr. Martin seconded and the motion carried. Authorization to file the budget does not indicate approval of the budget by the Board. A detailed presentation of the preliminary budget will be provided at the November Board meeting, along with the ten year Proforma Income Statement, the ten year Financial Plan, and the Comparative Ratio Analysis.

Enhanced Cross Connection Control Program Proposed

Mr. Vince Monks advised the Board the 2007-2021 Strategic Plan includes a strategy to ensure delivery of high quality water through the distribution system to customers. One of the tactics to implement this strategy is to enhance the Company's Cross-connection Control Program (CCP) to protect distribution water quality. The Company's current CCP has been successful in identifying potential cross-connections and installing backflow prevention devices on the customer's plumbing to protect the public water supply from contamination. These high risk customers include chemical manufacturers, funeral homes, and hospitals, among others. The CCP includes educating, developing, and maintaining professional relationships with key industrial and commercial customers to minimize the potential cross-connection risk. The Company's Service Rules include a rule on Cross-connection and Backflow Prevention that has been in place since 1995. In addition, Metro Ordinance 52.01 was adopted in 2005, which includes protection of the public drinking water supply from contamination. Additionally, new regulations by the USEPA will require high quality water in the distribution system. To address all these rules and regulations, the enhanced CCP enables LWC to address all commercial and industrial customers, not just high risk customers. The proposed program will be able to keep pace with water industry trends and emerge as a model of Best management practices in cross-connection control.

Staff efforts to enhance the current program included a gap analysis of LWC's current program and the USEPA best practices and expected regulatory requirements; a pilot study of over 30,000 commercial and industrial customer accounts; a program analysis to determine the staffing resources needed to implement the program over a three year period; and a financial evaluation of the enhanced program to determine the revenue requirements needed to fully fund the program. Staff is finalizing the details of the proposed program and will present a full recommendation for adoption of the enhanced Cross-connection Control Program in the spring of 2007 to be effective in mid 2007. Mr. Heitzman summarized that the CCP will have three components: plumbing installation, testing and quality assurance/quality control, which is the enhanced part of the program. Mr. Johnstone asked how many devices are currently in use. Mr. John Ralston stated there are approximately 5000 devices in place and we get information from certified backflow prevention plumbers on another 20,000. Fees charged to customers subject to the program will cover costs of operating the program.

Update Provided Regarding the Louisville and Jefferson County Information Consortium (LOJIC)

Mr. Heitzman provided a status update regarding the Louisville and Jefferson County Information Consortium (LOJIC). LOJIC is a mapping and information management system that allows planners, agencies, and utility operators to effectively manage spatial assets using a common geographic database. Currently, LOJIC participants include Metro Louisville (40% share), MSD (35% share), LWC (20% share) and PVA (5% share). LWC has participated with LOJIC since its inception in 1987 and became a 20% equity owner in 1996. The LOJIC capital investment has exceeded \$20 million, and annual operating costs are \$1.7 million. Annual revenue from maps sales and license fees of \$350,000 help reduce operating costs to \$1.3 million. Since 1987, the LOJIC user community has expanded to over 400, including agencies, educational institutions, and the private sector. Currently, LWC manages all distribution assets within the LOJIC GIS database and also uses LOJIC extensively for planning and engineering. Future applications for LOJIC include water quality and hydraulic modeling, work order management and work crew routing.

In early 2006, the LOJIC Policy Committee initiated a strategic planning process to determine the future of LOJIC. A new MOU will be entered into among the LOJIC partners. The MOU will replace the 1996 LOJIC agreement and continue the Company's commitment to the LOJIC partnership with a 20 percent equity stake and 20 percent allocation of LOJIC operating, maintenance and capital costs. MSD will continue to serve as the Project Management Agency for LOJIC housing the LOJIC information assets, hardware, software, and day-to-day management of LOJIC. LWC has two designated positions serving on the LOJIC Policy and Technical Committees. Currently, the Company's 20 percent share of LOJIC costs is \$255,000 annually. The proposed 2007 budget includes an increase in LOJIC funding to \$314,000 (\$257,000 O&M and \$57,000 capital). This 23 percent increase allows full funding by all LOJIC partners and also includes new investments for hardware, software, and planimetric/topographic upgrades. New LOJIC partners, such as TARC or Jefferson County Public Schools, and new revenue opportunities will offset annual operating expenses.

Certification Provided Regarding Projects and Change Actions Authorized During the Third Quarter of 2006

Mr. John Huber certified that the following projects and change actions were approved in accordance with Company policy and procedure from July 1 through September 30, 2006:

06800	Crescent Hill Filtration Plant Advanced Treatment Preliminary Engineering, cost center 268 – Project Proposal for Prepaid Regulatory Asset. CPAC-07/20/06, President-07/24/06		
	Approved project budget estimate =	\$ 2,500,000	<i>BOWW approval received.</i>
03638	CHFP Slate Roof replacements, cost center 224 – Project Change Actions to increase estimate. CPAC-08/03/06, President-08/07/06		
	Previously approved budget estimate =	\$ 3,792,864	
	Change in project budget estimate =	\$ 389,105	
	Approved project budget estimate =	\$ 4,181,969	<i>BOWW approval received.</i>
10613	CHFP HVAC Improvements, cost center 224 – Project Change Action #6 to increase estimate. CPAC-08/03/06, President-08/07/06		
	Previously approved budget estimate =	\$ 400,000	
	Change in project budget estimate =	\$ 254,533	
	Approved project budget estimate =	\$ 654,533	<i>BOWW approval received.</i>
99402	Riverbank Filtration Phase II, cost center 268 – Project Change Action #10 to increase estimate and revise cash flow. CPAC-07/27/06, President-07/28/06		
	Previously approved budget estimate =	\$ 40,424,800	
	Change in project budget estimate =	\$ 3,000,000	
	Approved project budget estimate =	\$ 43,424,800	<i>BOWW approval received.</i>

11319-11328 Managing Distribution Operations Point Capital program, cost center 280 – Project Change Action #2 to increase overall program estimate. CPAC-09/22/06, President-09/25/06

Previously approved program budget estimate =	\$ 3,117,750

Certification Provided Regarding Contracts and Bids Awarded During the Third Quarter of 2006

Mr. Huber stated it was discovered through a routine audit that two bid advertisements for materials did not appear in the newspaper. These bids for Plastic Meter Vaults and Meter Setters were opened and awarded in the second quarter of 2006. After review, it was determined that Louisville Water Company had submitted the advertisement for publication, but that the advertisement was not printed. A check to verify advertisement before bid opening is now a part of the Procurement process. With the exception of this issue, Mr. Huber certified that the following contracts were awarded from July 1 through September 30, 2006 in according with Company policy and procedure governing purchases:

CAPITAL PROGRAM

05-43	Reservoir Avenue Phase 2 - Assignment from Bid 05-43 Distribution System Repairs	
	10135 Southern Pipeline Construction Co. (CWBE)	\$150,518

06-04	Baxter Avenue Main Replacement Project 11385 Tom Brown Construction Co.	\$298,950

First Reading Given to Policies on Long Range Planning, Financial Management and Risk Management

Mr. Miller reviewed as a first reading new policies proposed to express our company practices and position on long range planning, financial management and risk management. Mr. Conner questioned whether the statements should be policies adopted by company management or policies adopted by the Board of Water Works. Mr. Miller stated he will consider if there needs to be a high level statement for each one of these topics adopted by the Board and will make a recommendation at the next meeting.

Budget Increased and Bid Authorized for Project 10615: Zorn Water Tower Coating System

Mr. Heitzman advised the scope of Project 10615: Rehabilitate Zorn Water Tower Coating System included rehabilitation of the coating system and related repairs to the historic water tower structure. The tower was last coated as part of a major rehabilitation project in the early 1990s. During the design phase additional scope items were identified, including additional structural damage to the lower tower when bricks and masonry fell through the lower soffit of the tower balcony roof. The additional cost of these structural repairs is estimated at \$127,200. In addition, several other items are recommended for inclusion in the project budget: tuck pointing of the interior tower masonry at a cost of \$25,000; fall protection assembly for the interior vertical ladders at a cost of \$19,500; replacement of the deteriorated wood floor platform at the dome level at a cost of \$11,500; electrical upgrades to replace the aviation light assembly at the

dome and replace interior tower lighting at a cost of \$24,750; temporary fencing at a cost of \$10,500; increase in engineering and supervision at a cost of \$25,400; and, an increase contingency to 15 percent on the anticipated construction contract amount at a cost of \$49,390. Ms. Harris moved to increase the budget of Project 10615: Rehabilitate Zorn Water Tower Coating System from \$300,000 to \$593,240 and proceed to advertise and bid the project. Mr. Martin seconded, and the motion carried.

Budget Allocation Increased for Distribution Operations Capital Program

Mr. Heitzman advised Distribution Operations has completed over 86 percent of the assigned Capital Program due to coordination with the Metro Government's paving schedule and the low water sales resulting in fewer operations and maintenance activities. As work was shifted from operating and maintenance costs to capital, specific projects were targeted including lead service, fire hydrant, and large meter and service renovations. In accordance with Capital Projects Authorization Procedures, Ms. Willis moved to increase the budget allocation for in-house capital construction from \$3,117,750 to \$3,713,500, including \$366,000 of additional funding for lead service line renewals. Mr. Martin seconded, and the motion carried

Executive Session Conducted

The Board went into Executive Session without management present at 2:45 p.m.

There being no further business, the meeting was adjourned at 2:55 p.m.

Respectfully submitted,

Barbara K. Dickens

Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
NOVEMBER 14, 2006**

Board Members Present:

Ms. Wendy Welsh, Vice-Chair
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mr. Stewart Conner, Chairperson
Mayor Jerry Abramson

Others Present:

Mr. Rick Johnstone, Deputy Mayor, Louisville/Jefferson County Metro Government
Mr. John Huber, President/CEO
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Ms. Amber Halloran, Controller and Business System Owner, Supplying Financial Resources
Ms. Kay Ball, Program Manager, Riverbank Filtration

Visitors:

The regular meeting of the Board of Water Works was held on Tuesday, November 14, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Vice-Chair Wendy Welsh called the meeting to order at 12:33 p.m.

Minutes from the Previous Regular Meeting Reviewed and Approved

Ms. Barbara Dickens noted an error in the proposed minutes in the last paragraph of the report on the Cross Connection Control Program. Specifically, the last three sentences in final paragraph of the report should read: "Mr. Johnstone asked how many devices are currently in use. Mr. John Ralston stated there are approximately 5000 devices in place and we get information from certified backflow prevention plumbers on another 20,000. Fees charged to customers subject to the program will cover costs of operating the program." Additionally, the minutes should reflect that Mr. Greg Heitzman provided the reports on the final two items considered by the Board. Mr. Gerald Martin moved to approve the minutes, seconded by Dr. Joseph Wise, and the motion carried.

Chief Executive Officer Report

Mr. John Huber advised potential new congressional committee appointments will impact federal initiatives affecting water utilities in the next two years. Specifically, Barbara Boxer (D-CA) will become the Chair of the Environment and Public Works Committee in the Senate and she has previously expressed a desire for a perchlorate standard for water. In the House, John Dingell (D-MI) will likely

become Chair of the Energy and Commerce Committee and has been an advocate in the past of requiring water utilities to comply with the Chemical Security Act.

Financial Report Provided

Ms. Amber Halloran provided the financial results through October 2006 which, although unfavorable, were as forecasted. YTD Operating Revenues of \$96,720,721 are \$2,375,695 or 2.4% less than budgeted and \$74,242 or 0.1% higher than 2005. YTD Operation and Maintenance Expenses of \$40,579,171 are \$521,974 or 1.3% less than budgeted and \$2,647,993 or 7.0% higher than 2005. We are currently performing to meet or exceed our expense reduction plan. YTD Total Operating Expenses of \$67,007,154 is \$179,375 or 0.3% lower than budgeted and \$5,000,983 or 8.1% higher than 2005. YTD Net Operating Revenue of \$29,713,567 is \$2,196,321 or 6.9% less than budgeted and \$4,926,741 or 14.2% less than 2005. YTD Total Net Non-Operating Expense of \$3,026,445 is \$692,513 or 18.6% less than budgeted and \$250,630 or 9.0% higher than 2005. YTD Net Income of \$26,687,122 is \$1,503,808 or 5.3% less than budgeted and \$5,177,371 or 16.2% less than 2005.

Ms. Halloran advised that staff will meet with Metro Government representatives following the November results and provide an updated forecast including the projected final dividend payment for 2006.

Operations and Engineering Report Provided

Mr. Heitzman presented the Operations and Engineering report for October 2006. Wet weather continued in October with 5.3 inches of rainfall. Rainfall for the year is 60.7 inches, compared to 35.1 inches of rain through October of 2005. The average production last month was 116.8 MGD, an 11.0 percent decrease from the 2005 October production of 131.2 MGD. Last month's production was 6.2 percent lower than the five year average October production of 124.6 MGD. For the year to date, production is 7.1 percent and 4.2 percent lower than 2005 and the five year average, respectively.

Mr. Heitzman advised the Company was issued a Notice of Violation (NOV) of the Total Coliform Rule for the compliance period of June 2006. The NOV was issued as a Tier 3 monitoring and reporting violation for failure to submit the proper recheck samples from a routine water sample because, although the recheck samples were taken and submitted, they were labeled incorrectly as regular samples. There was no impact on water quality and public health was not compromised. Staff is meeting with the Kentucky Division of Water (DOW) to appeal the NOV. In addition, staff is reviewing standard operating procedures to determine additional quality control steps to avoid this data entry error in the future. If the appeal is not successful, this NOV will require public notification in the Consumer Confidence Report prior to October 18, 2007. Dr. Wise inquired about the frequency of this type of testing, and Mr. Heitzman indicated we sampled 305 times for the month of October. Mr. Johnstone asked how that number is determined, and Mr. Huber responded it is based on population. Mr. Heitzman advised LWC submits a sampling plan each year that is approved by the DOW.

In an effort to secure fuel for 2007 at the current reduced price, the Company has entered into a contract to provide consulting on strategies and procurement options for fuel and energy purchases. The objective for this contract is to operate within the 2007 budget allocation for fuel despite volatile fuel costs recently.

Mr. Heitzman noted a federal court rejected Calgon Carbon Corporation's claim that its UV disinfection method was patentable as a new use of an old process. The Court found that UV disinfection effectiveness with inactivation of Cryptosporidium and Giardia was inherent in prior methods and Calgon's method was simply a new result of an old process, not a new discovery. Louisville Water Company has considered using UV at the Crescent Hill Treatment Plant as an alternative treatment

technology for compliance with U.S. Environmental Protection Agency's Long Term 2 Enhanced Surface Water Treatment Rule (LT2 Rule).

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report for October 2006. In reviewing the status of the Goshen Reserve fund, staff determined that certain customers are paying less under the Goshen rates than they would pay under LWC rates. For customers with services 1" and larger, they pay lower service charges than the current LWC rates which results in debits to the Goshen reserve instead of credits. Staff is working on the communication plan to transition these customers to the higher LWC rates or permit certain eligible customers the opportunity to downsize their meters.

The Metered Water Ratio team successfully presented the results of the 2005 water audit and analysis to the ELT in the third quarter and provided comparison data for 2004. The 2005 data included more accurate apparent and real loss estimates. The team also calculated LWC's Infrastructure Leak Index, which is the new metric being used by the water industry to track metered water performance. The Index has three performance tiers and LWC is performing in the lowest and best tier. The 2006 action plan and the ELT shared goal are on track to meet 2006 objectives.

Ms. Teasley advised Duane Murner has been elected Oldham County Judge-Executive, and Melanie Roberts has been elected Bullitt County Judge Executive.

News of a proposed water rate increase appeared on the front page of the Courier Journal's Metro Section and the Company received two letters and three e-mails that were unsupportive of the increase.

Closed Session Held

Ms. Marita Willis moved to go into closed session to discuss proposed or pending litigation and a business proposal pursuant to KRS 61.810(1)(b) and (g), respectively, at 1:15 p.m. Dr. Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Dr. Wise, seconded by Mr. Martin and unanimously carried, the Board resumed open session at 2:03 p.m. No action was taken in closed session.

Audit Committee Report Given

Ms. Wendy Welsh provided a report of the Audit Committee's meeting held October 5, 2006. The outside auditor reviewed situations in which specific procedures concerning capital projects and procurement were applied to verify whether the procedures were being followed, and noted no exceptions in the performance of any of the procedures. Mr. Roger LeMaster, the Internal Auditor, conducted an audit of LWC's leases and reported adequate controls exist but could be strengthened.

Ms. Welsh advised Internal Audit observed the annual physical inventory in June and found reasonable controls were in place for counting inventory, but re-counts were necessary due to variances, which for the most part are a result of paperwork and data entry errors due to LWC not having an inventory management module with the Oracle Financial System. The Warehouse Team continues to evaluate outsourcing all or part of warehouse operations and will make a recommendation regarding the direction to take in the near future. Mr. Huber commented the net adjustment required improved for a period of time and has worsened without bar coding. Mr. Johnstone asked the cost of the inventory management

module, and Ms. Halloran advised it is a total cost of approximately \$600,000 for the module and implementation. Directors discussed the various ways in which materials are requisitioned from the warehouse, and Ms. Halloran commented that each job is balanced based on the information from the LWC inspector about what materials have gone into the ground.

Ms. Welsh stated Mr. Robert Miller had provided the Committee an update regarding the Company's voluntary compliance with the substantive components of Sarbanes-Oxley, noting that the Company will not seek actual certification of its financial statements from the external auditor, but will perform the work internally that would be necessary if we were to seek actual certification.

Public Affairs and Customer Satisfaction Committee Report Given

Ms. Marita Willis provided a report of the Public Affairs and Customer Satisfaction Committee's meeting held November 7, 2006. The Monthly Billing Pilot is proceeding. To move forward, the collection cycle will have to be condensed for all customers by a few days. The Interactive Web Response (IWR) project has been rescoped and will include an upgrade to Interactive Voice Response (IVR) because the IVR provider will no longer support the current software. IWR will allow credit card and eCheck payments over the web. IWR will allow payment extensions, and all activity will be real-time to eCIS, meaning it will automatically update the CIS. The IVR will have additional functionality. The Home Service Line Insurance Program was presented and the Committee fully supported moving forward with the program. It provides insurance in the event a customer's own service line needs repair for a relatively low cost paid through the water bill. Mr. Martin inquired whether the team considered having LWC staff provide the plumbing services, and Mr. Huber stated the Company believes the best approach is a collaborative effort with local plumbers who are prequalified by the insurance company to do the work.

Ms. Willis stated the new manager in the call center presented two new quality assurance measures already implemented, which should improve call abandonment and agent availability. The Company will continue with its current communication program regarding lead and will provide additional information at customer's request. Staff have continued to grow the Smile Kentucky! Dental partnership and is working with ORSANCO to bring its floating classroom to Louisville in May of 2007. Mr. Huber suggested an event allowing the Board to view the floating classroom while it is here. In response to a question from Dr. Wise regarding the Home Insurance Program, Ms. Dickens advised approval of the program is within the President's authority granted by the Board.

Authorization Granted to Award a Contract for 99-402: Riverbank Filtration Bids

Ms. Kay Ball advised three pre-qualified bidders submitted bids for the value-engineered Riverbank Filtration Tunnel project. The "value engineering" exercise with Jordon Jones & Goulding resulted in design modifications to allow the project to be built within budget, while meeting the functional objective of delivering 45 MGD supply to the B.E. Payne Water Treatment Plant. The final design consists of a Base Bid of 6,100 feet of bored tunnel, a pump station, and three collector wells capped at ground level with an engineer's estimate of \$34 million. An alternate scope was included in the request for bids for additional tunnel length, one additional collector well, and a tunnel connector for future expansion.

The low bid was received from Mole Constructors, Inc. at a cost of \$29,998,000. Subsequent to the bid opening, the bid documents were evaluated and deemed responsive and responsible. Mole Constructors, Inc. exceeds the Good Faith Minority Business requirements with 15.5 percent Minority Business Enterprise and 5.3 percent Women Business Enterprise participation. Staff recommended awarding both alternate bids in addition to the Base Bid. Alternate Bid 1 includes an additional 1,600 feet of bored tunnel and one additional collector well, which will provide an additional 15 MGD of water supply, for a bid amount of \$3,925,000. Alternate Bid 2 includes an additional tunnel connection, which will provide

flexibility to make a future connection to the tunnel with wells located upstream or across the river, for a bid cost of \$75,000. The total cost of the Base Bid, Alternate Bid 1, and Alternate Bid 2 is \$ 33,998,000. Mr. Martin moved to authorize the President to award a contract to Mole Constructors, Inc in the amount of \$33,998,000 to install the Riverbank Filtration Tunnel and Pump Station including the Base Bid, Alternate Bid 1, and Alternate Bid 2 and reserve the budget at \$43,422,800 to reflect the awarded contract amount. Ms. Margaret Harris seconded and the motion carried. Staff will seek authorization to proceed with construction services included within the existing JJ&G contract at a future BOWW meeting.

Staff Recommended Practice for Amortization of Undepreciated Value of Plan Assets Abandoned Prior to the End of Accounting Life

Mr. Miller advised staff has determined recently, upon completion of several construction projects at its water pumping, treatment and storage facilities, that many of the plant assets being replaced had not reached the end of their accounting life. The remaining depreciation of the original cost of the previous facilities was being recovered through water rates; however, with the replacement of those assets, it is appropriate to remove those previous facilities from the utility-plant-in-service account and to amortize the remaining undepreciated value as a regulatory asset according to Statement of Financial Accounting Standards No. 71 "Accounting for the Effects of Certain Types of Regulation".

In several of these projects, the previous assets were electrical or rotating equipment that had been assigned longer useful lives that were typical of water treatment buildings or basins. In other projects, the previous assets failed prior to the end of their design life. In addition, it was determined that previous identification of abandoned or removed plant facilities had not been consistently applied. . Accounting staff has subsequently reviewed the register of plant assets with engineering and plant operations staff and identified facilities for removal from the utility-plant-in-service account. Mr. Miller reviewed the undepreciated value of the assets by location. The total amount is \$3,611,289.23.

Mr. Miller recommended that the Board authorize the capitalization of the undepreciated value of the utility plant assets no longer in service described above as a regulatory asset that would otherwise be charged to expense and that these costs be amortized over a period determined by the Board and recovered through rates in equal amounts over that same period beginning in 2007. The amortization period selected is at the discretion of the Board, and there is not a past practice by the Company on this matter. Mr. Miller recommended an amortization period of eight years, which represents approximately one-half of the weighted average remaining life of the assets. This would result in an annual amortization amount of approximately \$451,400, offset by a decrease of approximately \$201,800 in annual depreciation expense. Mr. Miller advised staff discussed this matter with Strothman and Company and the external auditor and recommended proceeding to amortize these costs as described. The Preliminary 2007 Annual Budget reflects this recommended accounting treatment.

Mr. Martin inquired whether we are required to include this in the depreciation reserve. Ms. Halloran responded these funds are not deposited in the depreciation reserve account, and Mr. Miller stated it should be recovered through water rates. Mr. Martin asked if this affects the pro forma income statement, and Mr. Miller responded it only affects rates, but not net income or the owner's dividend. Mr. Johnstone asked if this has to be addressed, and Mr. Miller stated it must be addressed because we know these are no longer utility plant in service assets. Dr. Wise moved to authorize the capitalization of the undepreciated value of these plant assets no longer in service as regulatory assets, amortization of them over an eight year period, and recovering of these values through rates in equal amounts over eight years beginning in 2007. Ms. Harris seconded, and the motion carried.

Preliminary 2007 Annual Budget Adopted and 2007-2016 Financial Plan Approved

Mr. Miller advised that following the publication of the Preliminary 2007 Budget in October but the following revisions and corrections have been made: (1) lower operation & maintenance expense of \$100,000 due to lower insurance bids ; higher non-operating income of \$ 47,100 due to increasing the interest rate allocated to capital projects; lower non-operating expense of \$ 75,000 due to capital project write-offs being reduced; the inclusion of bond principal payment for Series 2006 Bonds of \$500,000; and a lower infrastructure replacement reserve deposit by 270,000, thereby reducing the deposit from \$1,230,000 to \$960,000. The effect of these changes is (1) an increase to net income of \$222,100; (2) a decrease to net income available for dividend of \$7,900; and, (3) a decrease to the dividend of \$4,740.

The Preliminary 2007 Capital Budget has also been revised to reflect project proposals and change actions processed after the preliminary budget book was prepared. This has resulted in an increase in the Preliminary 2007 Capital Budget of \$4,178,314; however, more than half of this increase is from revision of cash flows for projects originally budgeted in 2006 but moved to 2007.

Ms. Halloran provided an overview of the 2007-2016 Financial Plan. The Pro Forma Income Statement was developed with ten year planning horizon. The Return on Equity target is assumed at 9.61% for 2007, 9.7% for 2008, and steadily increasing to 10.00% by 2013. Mr. Martin inquired whether we are using the end-of-year equity for the target, and Ms. Halloran affirmed we are. Mr. Martin commented that many companies use average equity to calculate their Return on Equity.

Ms. Halloran stated water consumption for residential, commercial and industrial is forecasted using an average of predicted and lower limits analysis provided by Dr. Cerrito, Statistical Consulting of Louisville, Inc. Wholesale and municipal are forecasting using actual consumption and known changes. Dr. Wise asked if we are accounting for the projected decrease in industrial water sales. Ms. Halloran stated we are but we are also projecting additional wholesale water sales we have a reasonable likelihood of achieving based on current contracts.

The Infrastructure Replacement Reserve funding is \$960,000 in 2007 and ramping up until 2013. Operations and Maintenance expenses are projected to increase 5% depending on specific category during 2007 through 2016. Staff calculated the depreciation and amortization increase using the 10 year capital plan. We included the interest expense of \$3,972,400 for the borrowing in 2006 as a non-operating expense for 2007. The principal payments on the Series 2001 bonds conclude in 2014. Principal payments on new bond issues commence in the year following the bond issue.

In terms of water rates, Ms. Halloran stated we are projecting an increase by 6.5% in 2007 with varying increases, not to exceed 6.5% in 2008 – 2016. The debt service coverage and max debt service coverage remain well above the minimum debt service coverage of 1.3 times in the Bond Resolution covenants and the long-term target of 2.0 times. The Debt Plan assumes a borrowing in 2009, 2011, 2013 and 2016.

Ms. Halloran reviewed the comparative analysis of our financial results based on liquidity, capitalization ratios, coverage ratios, profitability ratios, and dividend ratios. Mr. Martin noted that our dividend payment ratio is higher if you include water provided in lieu of taxes. Mr. Martin recommends we report yield on market rather than yield on book value because that more clearly shows what our owner's investment would be valued at by a taxable investor

Ms. Harris moved to adopt the following resolution to adopt the 2007 Annual Budgets, to file the 2007-2016 Financial Plan, to develop rate schedules for an average 6.5.% rate increase:

RESOLVED, that the Preliminary 2007 Operating Budget as revised and submitted by staff be adopted as the approved 2007 Operating Budget, and;

RESOLVED, that the Preliminary 2007 Capital Budget as revised and submitted by staff be adopted as the approved 2007 Capital Budget, and;

RESOLVED, that the Preliminary 2007-2016 Financial Plan be filed as the 2007-2016 Financial Plan, and;

RESOLVED, that the rate schedules be prepared and presented based upon a cost-of-service rate study with an average rate increase of 6.5% to be effective for water service beginning January 1, 2007 and thereafter.

Dr. Wise seconded, and the motion carried.

Participation in the AWWA Research Foundation Discussed

Mr. Heitzman stated we are involved in 16 projects focused on topics concerning infrastructure, management, and water quality. The total value of the research projects is \$6.0 million. The Company has committed to \$266,798 of in-kind labor and \$3,000 in direct contributions. AwwaRF has committed \$60,600 to the Company for staff labor. The Company's involvement in water infrastructure research has accelerated in the past four years through a partnership with the University of Louisville Speed Scientific School. In 2002, the Company partnered with Louisville MSD and the University of Louisville to form the Center for Infrastructure Research. Since its formation, the Center has received over \$2.5 million in infrastructure grants: \$1.8 million has been awarded from AwwaRF. The Center is quickly becoming nationally recognized for its collaborative approach among utilities, consultants, and educators for water infrastructure research. The Company is an active member of AwwaRF and membership dues for 2006 were \$79,468. Through our involvement we gain critical knowledge that helps us effectively manage emerging issues and exchange best practices with our peers. Our involvement also allows the Louisville Water Company to build on its national reputation as an industry leader in water research and development.

Executive Session Conducted

The Board went into Executive Session without management present at 3:17 p.m.

There being no further business, the meeting was adjourned at 3:22 p.m.

Respectfully submitted,

Barbara K. Dickens

Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
DECEMBER 12, 2006**

Board Members Present:

Mr. Stewart Conner, Chairperson
Ms. Margaret Harris
Mr. Gerald Martin
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Ms. Wendy Welsh, Vice-Chair
Mayor Jerry Abramson

Others Present:

Mr. Rick Johnstone, Deputy Mayor, Louisville/Jefferson County Metro Government
Mr. John Huber, President/CEO
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President, Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Ms. Karla Teasley, Vice President, Customer Service and Business Development
Mr. Jim Brammell, Assistant Chief Engineer and Director of Engineering Planning
Ms. Amber Halloran, Controller and Business System Owner, Supplying Financial Resources
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Ms. Sue Purdy, Process Owner, Budgeting and Ratemaking
Ms. Kay Ball, Program Manager, Riverbank Filtration
Mr. Vince Guenther, Manager, Governmental Relations
Mr. Scott Muhlenbeck, Senior Financial Analyst

The regular meeting of the Board of Water Works was held on Tuesday, December 12, 2006 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chair Stewart Conner called the meeting to order at 12:30 p.m.

Minutes from the Previous Regular Meeting Reviewed and Approved

Ms. Margaret Harris moved to approve the minutes of November 14, 2006, seconded by Ms. Marita Willis, and the motion carried.

Chief Executive Officer Report

Mr. John Huber discussed the arrangement between the Company and the Louisville Visual Art Association (LVAA). The LVAA leases the former pump station at Zorn Avenue for their gallery and offices and also leases a portion of the grounds for rental income to benefit LVAA, for a minimal lease payment. Mr. Huber advised we have been evaluating the arrangement to ensure better management of the risks and the public relations issues involved. It is advantageous to have a tenant there because it is a symbol of Louisville and on the National Historic Landmark Registry, so we need to maintain the building.

Mr. Huber advised the Directors of the Water Supply Planning Meeting to be held Friday, December 15, 2006.

Financial Report Provided

Ms. Amber Halloran provided the financial results through November 2006, which were below forecast. YTD Operating Revenues of \$105,170,690 are \$3,898,033 or 3.6% less than budgeted and \$915,525 or 0.9% less than 2005. YTD Operation and Maintenance Expenses of \$44,361,649 are \$787,117 or 1.7% less than budgeted and \$2,331,781 or 5.5% higher than 2005. YTD Total Operating Expenses of \$73,349,955 is \$655,492 or 0.9% lower than budgeted and \$4,712,765 or 6.9% higher than 2005. YTD Net Operating Revenue of \$31,820,735 is \$3,242,541 or 9.2% less than budgeted and \$5,628,290 or 15.0% less than 2005. YTD Total Net Non-Operating Expenses of \$3,204,652 is \$1,074,514 or 25.1% less than budgeted and \$443,477 or 12.2% lower than 2005. Mr. Gerald Martin inquired why our O&M expenses are higher than 2005 when we have sold less water, and Ms. Halloran advised the increases are due to higher fixed costs.

YTD Net Income of \$28,616,082 is \$2,168,027 or 7.0% less than budgeted and \$5,184,813 or 15.3% less than 2005. A delay in billing resulted in an understatement of our net income by \$750,000. Without this delay, net income would have been only \$150,000 below forecast. In response to Mr. Martin, Ms. Halloran advised staff reviewed the billing delay issue and noted that some accounts needed an additional step to ensure they would be billed a full 365 days for the year. Ms. Halloran advised are still on target to meet the budgeted dividend, assuming no extraordinary unbudgeted expenses in December. Our budget assumes significantly higher operation and maintenance expenses in December.

Ms. Halloran advised we received the annual notice of increase effective July 1, 2007 from the County Employees Retirement System. The employer contribution rate will increase to 16.17% from the current level of 13.19%, representing an increase in pension expense for the Company of 22.6% during the latter half of 2007. This is the third consecutive substantial increase in the employer contribution rate. This follows an increase of 29.5% for the latter half of 2004 through the first half of 2005 and of 20.1% for the latter half of 2005 through the first half of 2006. The LWC 2007 Annual Budget contemplated an increase to 14.7% for the employer contribution portion of the pension expense. This higher rate will result in operation and maintenance expenses increasing by \$170,000 more than budgeted for the latter half of 2007.

Operations and Engineering Report Provided

Mr. Heitzman presented the Operations and Engineering report for November 2006. He advised the Kentucky Division of Water has now rescinded the Notice of Violation issued to the Company on October 18, 2006 for a reporting error found in a Total Coliform Rule Monitoring report from June 2006.

Mr. Martin asked if the Company attempts to collect from at fault parties when they damage LWC infrastructure, such as hydrants. Mr. Heitzman confirmed we do.

Serving Customers Report Provided

Ms. Karla Teasley provided the Serving Customers report for November 2006. The November abandonment rate was 9.0% compared to 10.2% in October 2006 and 16.5% in November 2005. Abandonment improved significantly in November prior to the impact of high call volume after the extended Thanksgiving holiday weekend. Bad debt for the month was \$95,566 compared to \$9,378 in October 2006 and \$60,327 in November 2005. Bad debt is \$43,555 over budget for the month and \$67,765 over budget for the year. Ms. Teasley advised vacancies in the call center continue to require overtime to minimize operational impact. Currently, there are two full-time and one part-time customer service positions vacant.

Mr. Vince Guenther updated the Directors regarding newly elected officials within our service area. There are three individuals newly serving on the Metro Council – Dr. Judy Green, Vicki Welsh and

Marianne Butler; a new Judge/Executive in Oldham County, Duane Murner; a new Judge/Executive in Bullitt County, Melanie Roberts; a Mayor in Shepherdsville who served as Mayor in the 90s but who is newly elected this term, Sherman Tinnell; and new state representatives in Bullitt County, Larry Belcher and Gary Tapp. There were no changes in the Kentucky Senate anywhere in the state, and there were no changes in the local offices in Shelby or Spencer County.

Legal Report Provided

Ms. Barbara Dickens advised we have confirmed that the method utilized by hydrant crews to remove asbestos gaskets did not result in the presence of asbestos in the air at or above the OSHA limit, according to certified air monitoring conducted by the Company's environmental consultant.

2007 Water Rate Schedule Adopted

Ms. Halloran advised the Board directed staff at the previous meeting to prepare rate schedules based upon a cost-of-service rate study with an average rate increase of 6.5% to be effective for water service beginning January 1, 2007 and thereafter. Ms. Halloran reviewed the methodology for computing the rates. Ms. Halloran reviewed the Rate Schedules with the Board. The proposed rate schedule was developed in accordance with a cost of service study based upon the methods suggested in American Water Works Association Manual M1, Water Rates. Staff has also updated demand factors based on standard estimation routines using an average for the previous five years. The wholesale water rates for service to North Nelson Water District, North Shelby Water Company, and West Shelby Water District also require approval by the Kentucky Public Service Commission, but those rates will increase by 5%.

Mr. Rick Johnstone inquired about charges to Burnheim Forest, and Mr. Heitzman advised the agreement for water to Burnheim Forest was inherited in the Kentucky Turnpike merger and those rates are frozen until they reach LWC rates according to that agreement. The amount over LWC rates, the rate differential, funds a portion of the improvements in Bullitt County. Dr. Joseph Wise moved to approve the proposed 2007 rates to be effective for all consumption on and after January 1, 2007. Mr. Martin seconded, and the motion carried.

Fourth Quarter 2006 Dividend Declared

Ms. Halloran advised Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that Louisville Water Company will pay to Louisville / Jefferson County Revenue Commission an annual dividend on Louisville Water Company stock owned by Louisville / Jefferson County Metro Government, Kentucky ("Metro"). The dividend is to be paid in quarterly installments, such payments to be based on the estimated annual net income and as nearly equal in amount as possible. The projected dividend based on the latest estimated annual net income of \$31,788,900 for 2006 is \$14,842,140. Considering dividends declared earlier this year, the fourth quarter dividend should be \$3,710,535. The quarterly dividend payment must be increased by \$75,586 to reflect one quarter of the \$302,350 dividend underpayment in 2005. At the end of the year, the calculation is made of the required dividend pursuant to the formula in the bond covenants. Any adjustment necessary is either an additional quarterly payment or credit in 2007, depending on whether it is actually underpaid or overpaid. Mr. Martin moved to adopt the following resolution to declare and issue payment for the Fourth Quarter 2006 Dividend to Metro:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and
WHEREAS, a covenant written into the Series 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and
WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to

reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and

WHEREAS, the Board passed a resolution on March 14, 2006 to adjust the 2005 annual dividend by \$302,350, from \$15,875,700 to \$16,178,050, the difference to be added in equal quarterly installments to the quarterly 2006 dividend payments, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the Louisville Water Company estimated annual net income for 2006 is \$31,788,900 and the projected annual dividend computed in the manner specified in the Series 1992 Water System Revenue Bond Resolution is \$14,842,140 and considering dividends declared earlier this year, it would be in order at this time to declare a regular fourth quarter dividend of \$3,710,535;

RESOLVED, the regular fourth quarter 2006 dividend of \$3,710,535 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,786,121 to Louisville / Jefferson County Revenue Commission on December 29, 2006, this being the fourth quarterly dividend for 2006 plus one quarter of the dividend adjustment for 2005, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Ms. Willis seconded, and the motion carried

Authorization Granted to Proceed with Phase IV, Construction Services of Consulting Engineer's Contract for Project 99-402: Riverbank Filtration

Ms. Kay Ball advised the overall budget reservation for the Riverbank Filtration Project was adjusted to \$43,422,800 to reflect the base bid and both alternate bids. The Engineering Consultant, JJ&G, proposed a total fee of \$5,804,300 for engineering design and construction services to include four task phases: Task I – Preliminary Design / Subsurface Investigations, \$1,248,700; Task II – Final Design, \$1,940,500; Task III – Bidding Assistance, \$ 193,100; and Task IV – Construction Inspection Services, \$2,422,000. Tasks I and II are now complete, and Task III is nearing completion with total expenses to date of \$3,017,906. With the award of the construction contract, the next phase, Construction Inspection Services, will begin in January 2007. JJ&G has reviewed the number of man-hours necessary for project administration and inspection and has concluded the budget proposed is adequate to cover the 31-month construction period. The inspection services will include two inspectors: one for the above ground pumping facilities and collector wells, and one specialty inspector for the tunneling operations.

Ms. Ball reviewed the current overall project budget and expenditures per category to date. Many events can adversely affect the budget during the construction of a project of this size and complexity. However, staff does not see the need to revise the total project budget. Currently, the budget does not include a contingency for unforeseen construction issues, contract delays, scope revisions, or the sewer installation.

Ms. Harris moved to authorize staff to proceed with Task IV, Construction Inspection Services, included within the existing JJ&G engineering services contract of \$5,804,300, Mr. Martin seconded, and the motion carried.

Budget Increased and Bid Authorized for Phase 1A of Project 01743: Gene Snyder Freeway Transmission Main

Mr. Jim Brammell advised the 2002-2021 Facilities Plan recommended the construction of a transmission main following the Gene Snyder Expressway from the English Station Standpipe to Billtown Road due to continuing growth in eastern and southeastern Jefferson County and expected growth in our service areas

of Shelby, Spencer, and Bullitt Counties. Construction was originally planned for completion in 2011 at a cost of \$15,547,000. Based on more recent hydraulic analyses and growth projections, the sizing and scope of this project has changed from the original concept and has been corrected due to an underestimation of the length of the project.

These scope changes and increases in material and labor prices have raised the total cost estimate to \$26.2 million. A value engineering exercise has been completed, reducing the budget estimate by \$1.6 million. The revised project budget of \$26.2 million was included in the 2007 Capital Improvement Plan, which was approved by the Board of Water Works in November 2006. The increased estimated costs for Phase 1A are: the need for an 84-inch tunnel under Shelbyville Road, the need to maintain vehicular access to and from the Middletown Fire Station, and the requirement by the Kentucky Transportation Cabinet to mechanically bore underneath Interstate 265 to avoid blasting.

The complexity and length of this project necessitates its construction in four phases (1A, 1B, 2A, and 2B), with Phase 1A to begin in 2007. Phase 1B will be deferred until 2012-2016 and Phase 2A will be deferred until 2017-2026. Phase 2B may be advanced in the near future to coincide with other development in the area. The construction of Phase 1A satisfies many of LWC's future needs, including Consulting Engineer's recommendation to address critical supply issues in the eastern and southern service areas. Phase 1A is the critical supply leg for the proposed I-64 Transmission Main to serve the eastern portion of the Company's retail and wholesale service area. Mr. Martin moved to authorize staff to finalize design and advertise Phase 1A for construction. The budget reservation for Phase 1A is \$9,585,799. Dr. Wise seconded, and the motion carried.

Budget Established for Sewer Service Project for Middletown Facility

Mr. Brammell advised our Middletown Substation facility on English Station Road has never been connected to local sanitary sewers. Conditions have become favorable for LWC to pursue constructing public and private sewer lines and making the sanitary connection. The project will include gravity and force mains and a small pump station. LWC will be responsible for obtaining off-site easements. The total project cost for this work is estimated to be \$450,000 of which \$80,000 is expected to be reimbursed, for a net cost to LWC of \$370,000. The project will provide sanitary sewer service to approximately 18.4 acres of property owned by the Company. Ms. Willis authorized staff to proceed with this unbudgeted capital project, seconded by Dr. Wise, and the motion carried.

2007 Board of Water Works Meeting Dates Established

Mr. Martin moved to approve the following dates for meetings of the BOWW for 2007: January 16, February 20, March 13, April 10, May 8, June 12, July 10, August 14, September 18, October 9, November 13, and December 11. Ms. Harris seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 1:55 p.m.

There being no further business, the meeting was adjourned at 2:00 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

BOARD OF WATER WORKS
REGULAR MEETING MINUTES
January 16, 2007

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Mr. Greg Heitzman, Senior Vice President of Operations and Chief Engineer
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Mr. Jim Brammell, Director of Engineering and Assistant Chief Engineer
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources and Controller
Ms. Barbara Crow, Process Owner, Providing Strategic Communications
Ms. Kay Ball, Program Manager, Riverbank Filtration
Mr. Ron Green, Program Manager, Minority and Women Business Enterprises

The regular meeting of the Board of Water Works was held on Tuesday, January 16, 2007 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:35 p.m.

Chief Engineer Elected

Mr. Conner opened nominations for the position of Vice President Chief Engineer, recently vacated due to the reassignment of Mr. Greg Heitzman to the position of Senior Vice President, Operations. Mr. John Huber nominated James Brammell, currently serving as Assistant Chief Engineer, for the position of Vice President, Chief Engineer. Mr. Conner called for other nominations. There were no other nominations and Mr. Conner declared the nominations for Vice President, Chief Engineer to be closed. Mr. Gerald Martin moved to approve the appointment of Mr. Brammell to Vice President, Chief Engineer until the Annual Meeting of the Board in April, 2007. Ms. Margaret Harris seconded, and the motion carried. Ms. Barbara Dickens administered the Oath of Office to Mr. Brammell.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Martin moved to approve the minutes from the Regular Meeting held December 12, 2006, seconded by Ms. Marita Willis, and the motion carried.

Chief Executive Officer Report Provided

Mr. Huber advised Ms. Karla Olsen Teasley has accepted a position as the President of Illinois-American Water. This was a tremendous opportunity for Ms. Teasley. Mr. Huber acknowledged the contributions she made here at LWC during her tenure.

Mr. Huber advised the 70-year anniversary of the 1937 flood in Louisville is approaching. Mr. Huber informed a book titled *The Great Flood of 1937: Rising Waters, Soaring Spirit*, by Rick Bell has been released about the events surrounding the flood. It includes information about the impact to the Water Company.

Financial Report Provided

Mr. Robert Miller reported complete financial reports for December 2006 are not available at this time. Accounts have been held open in order that all expenses through December may be reflected completely on the year-end financial statements. The Statement of Revenues, Expenses, and Changes in Net Assets with budget and prior year comparisons for financial results through December 2006 and the Statement of Net Assets and the Statement of Cash Flows will be available for the February 2007 Board meeting.

The Total Sale of Water for December 2006 of \$8,565,715 was \$569,286 or 6.2% less than budgeted and \$90,288 or 1.0% less than last year. Total Operating Revenue for December of \$8,953,986 was \$583,932 or 6.1% less than budgeted and \$190,054 less than last year. The sale of water and total operating revenue results were significantly lower than expected for the month of December. Staff is continuing to analyze these results to verify their accuracy. We are reviewing metering and billing information for the last four billing months. The Total Sale of Water for 2006 of \$109,100,849 was \$4,670,791 or 4.1% less than budgeted and \$1,215,819 or 1.1% less than last year. Total Operating Revenue for 2006 of \$114,124,676 was \$4,481,964 or 3.8% less than budgeted and \$1,105,579 or 1.0% less than last year. In addition, staff is developing new revenue forecasting and internal control techniques for implementation in 2007.

Current estimates indicate the Net Income Available For Dividend is \$1.4 Million less than projected and we will be below the dividend target by approximately \$600,000. Staff will be meeting with Metro Government officials in the next few days. Mr. Conner asked if this impacts the bond covenants in any way, and Mr. Miller stated it does not. Mr. Martin noted we have no other discretionary funds to utilize to make up this shortfall because we are not making a payment to the Infrastructure Replacement Reserve, and this further confirms our need for high yield revenue opportunities outside of traditional water sales. But for the interest income from the bond issue being higher, our financial situation would be worse. Dr. Joseph Wise asked whether we have analyzed the difference between the cost to the customer now compared to years past due to the combined effects of lower consumption and annual inflation. Mr. Miller advised we have not formally analyzed this, but we will provide an analysis to the Directors at an upcoming meeting.

Operations Report Provided

Mr. Heitzman provided the Operations and Engineering Report for December 2006. Average production last month was 112.9 MGD, a 2.1 percent decrease from December 2005 production of 115.4 MGD. The declining December sales confirmed that our base water sales have eroded over the last few years. For the entire year, production is 6.0 percent lower than 2005 and 4.0 percent lower than the five year average. December rainfall for the Louisville area is 1.81 inches more than in December 2005 and year-

to-date rainfall is 27.23 inches more than the same period in 2005. Production has not been this low since 1996, and consumption has not been this low since 1993.

Oxy Vinyl (former BF Goodrich complex) is in the process of reducing their potable water consumption due to the use of two vertical wells to supplement their production water at the plant. Prior to activation of these wells, Oxy Vinyl consumed an average of 3.05 MGD, or 1.1 billion gallons per year, providing average annual revenue of \$1,428,813. The projected revenue impact from this reduction in potable water use is estimated at \$664,000. Approximately \$415,000 of this water sales reduction was anticipated in development of the 2007 budget.

Serving Customers Report Provided

Mr. Heitzman provided the Customer Service Report for December 2006. The December abandonment rate was 10.5% compared to 9.0% in November 2006 and 19.7% in December 2005. These results are favorable given the staffing issues endured for most of 2006.

Customer satisfaction rose in the fourth quarter to a total Customer Satisfaction Index (CSI) of 843 and all factors increased. The year end average of 844 for the Total CSI meets the Level I goal. Customer satisfaction for the Service CSI dropped in the fourth quarter to 785 from the previous high of 820. The year end average of 800 meets the Level III goal for the Corporate Performance Award (800). Mr. Conner commented, with regard to the price-value component of the CSI, it is difficult for customers to distinguish between our rates and MSD's rates when looking at their bills. Mr. Heitzman responded we realized this and attempted to address it several years ago by formatting the bill into three separate parts. Mr. Conner is still concerned customers do not make a distinction and feels we should continue to look at this issue. Mr. Heitzman followed that monthly billing may help to address the impact of higher rates on the price-value component but agrees we need to consider the impact of MSD charges on our bill.

Mr. Heitzman advised ten years have passed since LWC began using Local 1683 labor to install new water services in 1996. 65,000 new water services, serving approximately 206,000 people, have been installed throughout our service area. The company recently recognized the crews as a result of the \$3 Million in savings realized due to the success of this initiative.

Smile Kentucky!, LWC's partnership with the local dental community, accepted an \$18,235 donation from the Prospect/Goshen Rotary Club after its successful golf scramble. PNC Bank made a \$3,500 contribution to the Rotary Club for this purpose. Proceeds will be used to help purchase a mobile dental van.

Mr. Martin inquired about the decline in the metered water ratio. Mr. Huber stated since it is a percentage of water produced, when we produce less water, the percentage increases although leakage remains constant usually.

Closed Session Held

Ms. Wendy Welsh moved to go into closed session to discuss proposed or pending litigation matters pursuant to KRS 61.810(1)(c) at 1:10 p.m. Dr. Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Mr. Martin, seconded by Dr. Wise, and unanimously carried, the Board resumed open session at 1:30 p.m. No action was taken in closed session.

Amendments Adopted to the Service Rules and Regulations

Mr. Heitzman advised staff reviews the Company Service Rules and Regulations annually to determine if any changes should be made. The by laws of the Board require the Board to approve all changes to the Rules. Staff recommends a few minor changes in the service rules that will clarify the rules for customers. The proposed changes include: disallowing the use of irrigation services for filling of swimming pools (and avoiding MSD sewer charges); requiring installation where service sleeves are available; requiring fire department approval when discontinuing a fire service; defining water main extensions and metered water service to clarify eligibility for tapping fee and developer refunds; and consistently referring to common terms and to LWC throughout. General Counsel has reviewed these proposed revisions. Mr. Martin moved to approve the amendments to the Service Rules and Regulations, as outlined specifically in the board letter, effective January 1, 2007. Ms. Welsh seconded and the motion carried.

Certification Provided for Projects and Change Actions Approved During Fourth Quarter 2006

Mr. Huber reported the following projects and change actions within his authority were approved from October 1 through December 31, 2006 in accordance with the Capital Projects Authorization Policy and Procedure. Certain projects and change actions also obtained the requisite approval by the Board, as noted for those projects and change actions below.

- 10231 CHFP Filter and Backwash System Renovations, cost center 222 – Project Proposal for approval. CPAC-11/03/06, President-11/06/06
Approved project budget estimate = \$ 11,722,000
BOWW approval received.
- 11531 Middletown Substation Facility Sanitary Sewers, cost center 222 – Project Proposal to initiate non-budgeted project. CPAC-12/01/06, President-12/04/06
Total Asset Cost including contribution = \$ 450,000
Approved Net LWC Cost = \$ 370,000
BOWW approval received.
- 11217 Technology Park, cost center 366 – Project Proposal to initiate project. CPAC-11/17/06, President-11/21/06
Total Asset Cost including contribution = \$ 874,250
Approved Net LWC Cost = \$ 370,000
BOWW approval received May 2004.
- 03625 Renovation of South Coagulation Flocculation and Sedimentation Basins at CHWTP, cost center 222 – Project Change Action #7 to increase estimate. CPAC-12/15/06, President-12/15/06
Previously approved budget estimate = \$ 3,767,403
Change in project budget estimate = \$ 110,319
Requested project budget estimate = \$ 3,877,722
BOWW approval required.
- 10615 Zorn Water Tower Coating System Rehabilitation, cost center 224 – Project Change Action #3 to increase estimate and revise cash flow. CPAC-10/06/06, President-10/10/06
Previously approved budget estimate = \$ 300,000
Change in project budget estimate = \$ 293,240
Approved project budget estimate = \$ 593,240
BOWW approval received.
- 06800 Phase III Advanced Treatment Technology, cost center 268 – Project Change Action #1 to increase estimate. CPAC-12/08/06, President-12/12/06
Previously approved budget estimate = \$ 2,500,000
Change in project budget estimate = \$ 686,400
Requested project budget estimate = \$ 3,186,400
BOWW approval required.

01743 Snyder Frwy transmission main, cost center 342 – Project Change Action #6 to increase estimate and revise cash flow. CPAC-12/01/06, President-12/04/06
 Previously approved budget estimate = \$ 15,570,320
 Change in project budget estimate = \$ 10,605,379
 Approved project budget estimate = \$ 26,175,699
BOWW approval received.

Project Proposals For Nonbudgeted Projects Approved By The President:

11534 Shepherdsville 580 PZ modifications, cost center 322 – Project Proposal for non-budgeted project. CPAC-12/19/06, President-12/20/06
 Approved project budget estimate = \$ 110,000

PROJECT CHANGE ACTIONS APPROVED BY THE PRESIDENT:

99407 Goshen elevated storage tank, cost center 222 – Project Change Action #10 to revise cash flow. CPAC-12/15/06, President-12/15/06
 Approved project budget estimate = \$ 2,078,031

00401 Zorn Intake and Pump Station Rehabilitations, cost center 222 – Project Change Action #3 to revise cash flow. CPAC-10/27/06, President-10/30/06
 Approved project budget estimate = \$ 4,814,000

00401 Zorn Intake and Pump Station Rehabilitations, cost center 222 – Project Change Action #4 to revise cash flow. CPAC-12/15/06, President-12/15/06
 Approved project budget estimate = \$ 4,814,000

10233 BEPWTP Clarification and Mixing Basin Complex Renovation, cost center 222 – Project Change Action #6 to revise cash flow. CPAC-10/27/06, President-10/30/06
 Approved project budget estimate = \$ 13,505,890

10609 Paint Bardstown Rd tank, cost center 222 – Project Change Action #9 to increase estimate and revise cash flow. CPAC-12/19/06, President-12/20/06
 Previously approved budget estimate = \$ 1,077,108
 Change in project budget estimate = \$ 28,631
 Approved project budget estimate = \$ 1,105,739

11312 ZPS Power Systems Rehabilitation, cost center 222 – Project Change Action #1 to revise cash flow. CPAC-10/27/06, President-10/30/06
 Approved project budget estimate = \$ 1,986,000

02656 Replacement of 480V transformer at CHFP, cost center 224 – Project Change Action #3 to increase estimate. CPAC-11/03/06, President-11/06/06
 Previously approved budget estimate = \$ 300,000
 Change in project budget estimate = \$ 47,792
 Approved project budget estimate = \$ 347,792

10615 Zorn Water Tower Coating System Rehabilitation, cost center 224 – Project Change Action #4 to revise cash flow. CPAC-12/19/06, President-12/20/06
 Approved project budget estimate = \$ 593,240

10662 Zorn Pump Station Structural Improvements, cost center 224 – Project Change Action #3 to revise cash flow. CPAC-12/19/06, President-12/20/06
 Approved project budget estimate = \$ 157,400

11352 CHFP East Filter Gallery Window Replacement, cost center 224 – Project Change Action #2 to revise cash flow. CPAC-10/27/06, President-10/30/06
 Approved project budget estimate = \$ 160,000

11352 CHFP East Filter Gallery Window replacement, cost center 224 – Project Change Action #3 to decrease estimate and revise cash flow. CPAC-12/19/06, President-12/20/06
 Previously approved budget estimate = \$ 160,000
 Change in project budget estimate = \$ (39,130)
 Approved project budget estimate = \$ 120,870

11353	River Rd Country Club building improvement, cost center 224 – Project Change Action #1 to revise cash flow. CPAC-10/27/06, President-10/30/06	
	Approved project budget estimate =	\$ 250,000
10548	Distribution System Telemetry Installation/Upgrade, cost center 264 – Project Change Action #1 to revise cash flow. CPAC-10/27/06, President-10/30/06	
	Approved project budget estimate =	\$ 197,040
99402	Phase II Riverbank Filtration, cost center 268 – Project Change Action #11 to revise cash flow. CPAC-10/27/06, President-10/30/06	
	Approved project budget estimate =	\$ 43,424,800
99402	Riverbank Filtration Phase II, cost center 268 – Amendment to Project Change Action #11 to revise cash flow. CPAC-11/10/06, President-11/11/06	
	Approved project budget estimate =	\$ 43,424,800
11319	Managing Distribution Operations Point Capital program, cost center 280 – Project Change	
- 11328	Action #3 to increase overall program estimate. CPAC-12/15/06, President-12/15/06	
	Previously approved program budget estimate =	\$ 3,713,500
	Change in project 11325 : Transmission System Improv budget estimate =	18,208

Certification Provided for Contracts Awarded During Fourth Quarter 2006

Mr. Huber certified the following contracts have been awarded in accordance with the Purchasing Policy and Purchasing Procedures from October 1, 2006 through December 31, 2006:

Capital Program

04-42	Distribution System Design and Construction - Pipeline, Pump Stations, and Tanks - Crittenden Drive II Main Replacement - CONTRACT INCREASE	
	03523 Quest, Inc.	\$28,900
04-42	East KY 480 500,000 Gallon Elevated Storage Tank	
	11392 O'Brien and Gere Engineers	\$76,228

04-77	Installation of Water Services, Fire Hydrants, Fire Services and Discontinuation of Small Water Services - 2nd and Final CPI Renewal		
	Basham Construction	05-10601 Installation of 3/4" and 1" Water Service Connections	\$1,019,449
	Miller Pipeline	05-05686 Discontinuing Small Water Services	\$73,484
	Tom Brown Construction	05-10602 Installation of 1 1/2" & 2" Water Service Connections	\$159,423
	Tom Brown Construction	05-10603 Installation of 4" & Larger Water Service Connections	\$98,719
	Tom Brown Construction	05-10605 Installation of Fire Service Connections	\$236,323
	Tom Brown Construction	05-10604 Installation of Fire Hydrants	\$53,083
05-10	Gene Snyder Transmission Main - Phase 2B - Assignment from Contingency Contract for Transmission System Emergency Repairs and/or Capital Improvements		
	01743 and Southern Pipeline Construction Co. (CWBE) 11613		\$671,637
06-108	Westport Road Transfer Station Site Improvements		
	10030 MAC Construction & Excavating, Inc.		\$109,700
06-110	Cardinal Hill Reservoir Roof Replacement		
	11317 Geoghegan Roofing Corp.		\$79,795
06-111	Crescent Hill Filter Plant East/West Filter Building - East Annex Monitor and Lime Building Window Replacement		
	11352 Koch Corporation		\$89,870

06-08	Water Bottles Louisville Container Co.		\$120,548
06-100	Security Services CSI Security Services (MBE)		\$71,604
06-102	Site Restoration Le Famille (MBE)		\$62,935
06-103	Brokerage Services for Medical, Dental, Medicare, HMO Supplement, Short/Long Term Disability and Life Insurance (Group, AD&D, Supplemental, & Dependent) Aon		\$42,000
06-106	Sale of Two Tracts of LWC Surplus Property Bryant & Associates (Tract II)	Paid to LWC	\$231,000
06-115	Polyvinyl Chloride Pipe (PVC) Water Works Supply		\$333,948
06-117	Flowable Backfill - 2 Year Contract Advance Ready Mix Concrete (WBE)		\$729,060
06-119	Truck Mount Valve Exerciser E.H. Wachs		\$49,959
06-120	Insulated Concrete Forms Advance Ready Mix		\$31,448
06-126	Brass Valves and Fittings Water Works Supply		\$50,131

GS-35F-0519M Fins Production Server Upgrade - GSA Purchase			
Paragon Systems			\$25,178
KY State	2007 Chevrolet Impala 4-Door Sedans - Two (2) vehicles		
Contract # C-			
05418665			
11338.15	Bachman Commercial Sales		\$31,161
KY State	Ford F-150 Regular and Super Cab Pickup Trucks		
Contract #C-			
05297095			
11338	Man O'War Ford		\$99,324

Procurement Of Professional Services

04-42	Engineering Services for Distribution System Design & Construction Pipeline, Pump Stations, and Tanks - 2nd CPI Renewal O'Brien & Gere Engineers Qk4 Quest Engineers	Estimate	\$480,000
Professional Service	Gene Snyder Transmission Main (Phase 2B) 01763 CH2M Hill Engineers		\$92,877
Professional Service	Middletown Substation Facility Sanitary Sewers Mindel, Scott & Associates, Inc.		\$42,000

Procurement Of Sole Source Materials And Services

failures, several years are higher, especially those including the severe winters of 1977, 1983, 1989, and 1994. The summer droughts and associated high water demand of 1988 and 1999 also contributed to high main breaks. During moderate weather, such as 1990, 1998, and 2006, main breaks were minimal due to mild winters and slack water demands that place less stress on the distribution system. In 2006, 433 main breaks were recorded – a level not seen since 1975.

In 1985, the Company initiated a water main replacement program to replace high maintenance water mains that contribute to poor water quality and unreliable service. In 1992, after extensive study and evaluation, a comprehensive program to replace or rehabilitate 500 miles of unlined cast iron pipe installed between 1860 and 1935 was approved by the Board. The program included a 15-year, \$150 million plan to reduce distribution maintenance costs and improve water quality, system reliability, hydraulic capacity for fire flow, and overall customer satisfaction. This program is completing its final year in 2007 with a final cost estimate of \$132 million. The program is on target to replace 172 miles of cast iron pipe and rehabilitate another 251 miles of pipe, and is often profiled as an industry best practice for addressing aging water infrastructure. One of the objectives of the program was to reduce distribution system failures (breaks and leaks) from a 10-year moving average of 34 failures per 100 miles of main in 1992 to less than 25 failures per 100 miles of main. Without this investment, annual main failures were projected to be over 1,100 by 2010, requiring main repair budgets of nearly three times the current allocation. Staff continues to refine the infrastructure renewal program with an annual budget of \$8 million. The primary focus of the current program is to replace all remaining lead service lines; replace water mains with high failure rates; and develop techniques to extend the life of the 3,800-mile distribution system. This program has been financed through rates, not debt.

Project Budgets Increased Due to Capital Interest on the Projects

Ms. Amber Halloran advised the Company currently charges capital interest on the majority of our capital

Capital Projects Authorization Policy Clarified

Mr. Brammell stated a significant effort has been undertaken the past year on reviewing and revising the procedures to implement the Capital Projects Authorization Policy. Inconsistencies exist with regard to when projects greater than \$2 million require Board approval, and staff recommend clarifying that authority. Mr. Martin moved to adopt the following resolution, amending the authorization previously granted by resolution, and amending the Board Policy on Capital Project Authorizations:

WHEREAS, the Board of Water Works approved an increase to the authority delegated to the President of Louisville Water Company at the meeting held on January 11, 2005, and

WHEREAS, the Management of Louisville Water Company has developed a Capital Projects Authorization Policy and Capital Projects Authorization Procedures as internal controls to support increases to the authority delegated to the President of Louisville Water Company;

THEREFORE BE IT RESOLVED that the Board of Water Works hereby approves the further clarification to the President of Louisville Water Company the authority, within the bounds of the Capital Projects Authorization Policy and Procedures, to:

1. Proceed with preliminary engineering for all Projects in the 2007 Capital Budget with an estimated cost of more than \$2,000,000 with the stipulation that each item will be fully explained to the Board and approval obtained following preliminary design and prior to final design and solicitation of bids.
2. Proceed to completion for those Projects in the 2007 Capital Budget with an estimated cost of \$2,000,000 or less.
3. Proceed with the acquisition of property of \$250,000 or less per parcel as needed for projects in the capital improvement program.
4. Proceed to authorize *project* change orders of \$250,000 or less on those Projects in the 2007 Capital Budget where such change orders do not cause the total project cost to exceed \$2,000,000.
5. Proceed to completion of non-budgeted capital projects with an estimated cost of \$250,000 or less with an adjustment to the capital improvement program.

AND BE IT RESOLVED, that all projects greater than \$2,000,000 must be submitted for approval to the Board of Water Works following preliminary design and prior to final design and solicitation of bids.

AND BE IT RESOLVED, that all project change orders greater than \$250,000 must be submitted for approval to the Board of Water Works.

AND BE IT RESOLVED, that periodically throughout the year the President will certify to the Board of Water Works that approvals are being granted pursuant to the Capital Projects Authorization Policy and Procedures.

AND BE IT FURTHER RESOLVED, that the Internal Auditor will periodically audit and report quarterly to the Board of Water Works that approvals are being granted pursuant to the Capital Projects Authorization Policy and Procedures and the external auditors will attest through agreed upon procedures and report annually to the Board of Water Works that approvals are being granted pursuant to the Capital Projects Authorization Policy and Procedures.

Dr. Wise seconded, and the motion carried.

Capitalization of Costs Pursuant to FAS 71 Approved on Project 00680: Crescent Hill Filtration Plant Advanced Treatment Technology, Task 1: Riverbank Filtration (RBF) Preliminary Engineering

Ms. Kay Ball advised the Board approved staff to proceed with preliminary engineering for Crescent Hill Filtration Plant Advanced Treatment Technology in the estimated amount of \$2.5 million and to charge the expenditure as a regulatory asset over a five year period using the Financial Accounting Standards No. 71 (FAS 71). The RBF scope of work was developed and expanded to include two long-term pumping tests to address water quality concerns and develop a more thorough understanding of the aquifer. Adding an additional test at the most narrow portion of the aquifer at Glenview Avenue included installation of a pumping well, six monitoring wells, a temporary power supply, electrical service throughout the 12 month pumping period, and a resource for sampling and lab analysis. Analysis of the water samples included a regime of four testing schedules to evaluate for treatment issues, organic compliance, inorganic compliance, and national drinking water standards compliance. Many of the parameters can not be analyzed by the LWC lab and will require contracting with a water-only certified lab. This equates to a \$686,400 deficit in the budgeted amount of \$1.5 million for the RBF Preliminary Engineering. The additional amounts requested are \$2,185,400 for Preliminary Engineering, \$650,000 for Pilot Plant Testing, and \$350,000 for a Facilities Assessment at Crescent Hill, for a total increase of \$3,186,400. Ms. Welsh moved to increase the budget of Project 06800: Crescent Hill Filtration Plant Advanced Treatment Technology in the amount of \$686,400. Mr. Martin seconded, and the motion carried.

Staff also recommends that the Board of Water Works authorize the capitalization of the \$686,400 in additional costs using FAS 71 in the same fashion as the original project. The original project of \$2,500,000 is currently being amortized over five years beginning in 2006. Staff recommends this additional amount be amortized over three years beginning in 2008 so the end date matches the original amortization period and the start date is delayed until 2008 to incorporate in 2008 rates. This will be an increase of approximately \$228,800 in years 2008 – 2010 over the original amount amortized of \$500,000. Mr. Conner inquired as to the extent of the testing, and Ms. Ball explained it is extensive due to the number of tests over a 12 month period. Ms. Harris moved to revise the budget reservation to be charged under FAS 71 to \$3,186,400 with the additional amount amortized over three years beginning in 2008. Dr. Wise seconded, and the motion carried.

Authorization Given to Award Contract for Health Insurance Plan

Ms. Kathy Schroeder advised LWC staff worked with our independent insurance broker, Rob Gipperich of Aon to evaluate proposals from health, dental, life and disability insurance carriers for the plan year beginning March 1, 2007. Premium forecasts and staff recommendations are based upon employee and dependent census data as of October 2006 and may be subject to adjustments. Staff negotiated renewal with Humana at a projected annual premium of \$4,295,000 (projected company cost is \$3,775,000). This represents a 9.5% increase in premiums from 2006 to 2007. The 2007 budget included a 12% increase for medical coverage; actual rate increase is 2.5% lower than budgeted and 5.5% lower than Humana's initial quote. Ms. Willis moved to authorize the President to award a contract to Humana, Inc. for medical insurance in the full amount of \$4,295,000 (Company cost of \$3,775,000). Ms. Welsh seconded, and the motion carried. Dr. Wise asked if there were any changes negotiated for the 2007 plan, and Ms. Schroeder stated there were not.

Ms. Schroeder advised Mr. Huber has the authority to award the contracts for dental, life and disability employee insurance. Delta Dental will increase premiums 2.0%, which represents an annual premium of \$295,000 (projected company cost is \$259,000). The 2007 budget included an 8.0% increase for dental coverage; actual rate increase is 6.0% lower than budgeted. Our new life insurance broker, Aon,

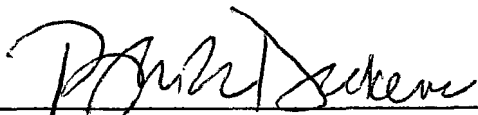

continues to work with our current carrier, Monumental Life Insurance Company, to determine our rates for 2007. At this time, we do not anticipate a rate increase and expect the life insurance rates to come within the budgeted amount of \$142,000. The increase in the net premium over 2006 is a factor of salary adjustments, not a rate increase. Fees for the administration of the self-funded short-term disability plan (STD) and premiums for the fully insured long-term disability plan (LTD) will not increase in 2007. The total cost to LWC for CIGNA's administrative fees for these plans are \$88,500 (STD = \$8,500; LTD = \$80,000).

Executive Session Conducted

The Board went into Executive Session without management present a 2:25 p.m.

There being no further business, the meeting was adjourned at 2:35 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
February 20, 2007**

Board Members Present:

Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis

Not Present:

Mayor Jerry Abramson
Mr. Stewart Conner, Chair
Dr. Joseph Wise

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Mr. Greg Heitzman, Senior Vice President, Operations
Mr. Jim Brammell, Vice President, Chief Engineer
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources and Controller
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

The regular meeting of the Board of Water Works was held on Tuesday, February 20, 2007 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Vice Chair Wendy Welsh called the meeting to order at 12:31 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the Regular Meeting held January 16, 2007, seconded by Ms. Marita Willis, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber advised meetings held with wholesale customers went well. Our rate tariff must be filed with the Public Service Commission (PSC) for wholesale customers regulated by the PSC. The 2008 rate increase for these customers are projected to not exceed 6.4%. Mr. Huber advised the legislative session is underway and a bill has been filed to provide PSC oversight of the Metropolitan Sewer District (MSD). *Men's Health* magazine ranked 100 cities for water cleanliness and graded them from "A" to "D." They graded LWC a "B" due to a monitoring violation over 8 years ago. Mr. Huber commented a Water for Profit article in *CFO Magazine* notes a strong growth strategy is critical for water utilities, which typically operate with a negative free cash flow.

Financial Report Provided

Mr. Robert Miller summarized the unaudited financial results for December 2006. Operating Revenues for December of \$8,921,423 are \$616,495 or 6.5% less than budgeted and \$222,618 or 2.4% less than

December 2005. Water sales for December were significantly lower than expected. Despite a detailed analysis, staff was not able to identify any special cause for the variance other than lower consumption in October through December. YTD Operating Revenues of \$114,092,112 are \$4,514,528 or 3.8% less than budgeted and \$1,138,143 or 1.0% less than 2005. Water sales decreased by 3,074 million gallons or 7.7% in 2006. This is equivalent to more than twenty-eight days of billable consumption. The decrease in operating revenues from lower water sales to residential, commercial, and wholesale customers more than offset a 5.0% increase in water rates effective January 1, 2006. Operation and Maintenance Expenses for December of \$4,150,392 are \$968,205 or 18.9% less than budgeted and \$1,261,713 or 23.3% less than December 2005. The budget variance is primarily due to the contingency included in the December administrative and general expense budget. YTD Operation and Maintenance Expenses of \$48,512,042 are \$1,755,322 or 3.5% less than budgeted and \$1,070,068 or 2.3% more than 2005.

Mr. Miller advised revenues for 2006 were down by \$4.5 Million, O&M Expenses were down \$1.7 Million, and Interest Income was up \$1.5 Million, resulting in Net Income being \$1.3 lower than projected. As a result, the actual dividend owed is down by \$780,000 from the amount budgeted.

January results were favorable due to the length of the bills and not yet reported distribution systems emergency repairs cost. Mr. Miller advised recognition of revenue can vary due to the time between readings, the number of accounts estimated, and the read-to-bill date or month of recognition.

Mr. Miller advised staff has determined that our fuel purchase volumes are too low to economically justify the use of sophisticated financial instruments for this purpose. Staff intends to pursue participation on an existing government-procured fuel supply contract or bidding a new contract on behalf of the Company. The contract with Summit Energy has been concluded but we will maintain that relationship in the event future circumstances warrant pursuing their services again.

Engineering Report Provided

Mr. James Brammell provided the Engineering Report for January 2007. The total budget approved by the Board in April 2006 to replace the traveling screens and to perform specific pump rehabilitation at the Zorn Pumping Station is \$4.81 million. The intake structure houses submerged openings and mechanical equipment to screen debris from the river water. Construction began September 15, 2006 on this very complex and operationally sensitive project, which is now approximately 40 percent complete and is progressing well. The installation of the first traveling screen was completed on February 2 and work on the second screen is underway. Completion is projected for early July 2007.

2006 Capital Program Results Expenditures for the year totaled \$67.5 million, which is \$5.9 million higher than 2005 and \$11.2 million higher than the previous five-year average. The 2006 expenditures amounted to 95.99 percent of the revised capital program of \$70.34 million. This result is 7.06 percent higher than last year and 25.99 percent higher than the previous five-year average.

Operations Report Provided

Mr. Greg Heitzman provided the Operations report for month of January 2007. During late January, main break activity picked up significantly the last 4 days of the month. There were 83 main breaks repaired for the month (42 breaks the last 4 days). The backlog of work orders rose significantly to 876 units. The winter emergency activities likely contributed to the very high call center activity – 37,172 calls received in January with an abandonment of 18.1%. This high call volume and abandonment rate are attributed to several factors, including significant staff shortages; new staff; higher than normal bill estimates; extended bill cycles (7 to 14 days); and winter emergency activities. Several days during the month

exceeded an abandonment rate of 40%. During periods of high call volume, management shifted resources from other operating areas to supplement the call center, implemented mandatory half hour lunches, and worked overtime.

Mr. Heitzman stated there was an error in the December 2006 monitoring report for Total Organic Carbon (TOC) based on data incorrectly entered by our contractor lab. As a result, the Company expects to receive a Tier 3 Notice of Violation (NOV). Staff does not agree with the assessment and has asked for an additional review from the Division of Water.

Mr. Heitzman reported company teams have been formed to develop a request for proposal (RFP) for the service line insurance program and for marketing services to assist with market research and brand strategy.

Audit Committee Report Provided

Ms. Welsh provided an overview of the discussions held at the Audit Committee's meeting on January 19, 2007. She advised 2 of the 3 options from the warehouse evaluation conducted in the Fourth Quarter 2006 have been eliminated. The second option has resulted in considering an "inventory lite" management system, which would be a viable option.

Ms. Welsh advised the procurement card usage audit found internal controls for the procurement card process to be generally effective. Staff is continuing to reduce the number of company cards held by employees. Two control issues were found but had been addressed prior to the audit. Ms. Welsh advised the Internal Auditor conducted an audit of cash processing and noted additional controls have been implemented. Ms. Welsh advised staff is reviewing billing dates to ensure customers are being billed for exactly 365 days per year. The Committee also reviewed the 2007 Audit Plan and the 2007 Audit Committee agenda schedule and received an update of the status of the Network Security Audit's action items.

Compensation Committee Report Provided

Mr. Martin provided a report of the Compensation Committee's meeting on January 29, 2007. He summarized performance toward the goals in the Corporate Performance Award, the Executive Incentive Plan and the ELT Shared Goals. The payout of the Corporate Performance Award is at 62.5% of the eligible award or \$316.56 per employee and \$130,741 total for 413 eligible employees. Mr. Martin moved to approve the Corporate Performance Award payout as described, seconded by Ms. Margaret Harris, and the motion carried.

The Company did not meet the "light switch" net income target required for the Executive Incentive Plan, so although we other goals were met, there is no payout under this Plan.

Under the ELT Shared Goals, ELT achieved a Level 5 for Goal A regarding the Capital Plan, a Level 4 on the RBF Phase II and III goal, a Level 4 on the Metered Water Ratio Improvements Goal, and Level 3 on the Diversity Goals relating to minority and women procurement and the hiring of diverse employees. Regarding Goal B, to create new business strategies and revenue, the Board deferred the discussion of the rating to the Executive Session for a final decision.

Mr. Martin advised the Committee reviewed proposed goals for 2007 and was in consensus to approve the goals as proposed for the Corporate Performance Award and the Executive Incentive Plan. The Committee modified Goal B requiring ELT to create new business strategies to ensure revenue and

profitability to define a Level 3 rating as the completion of three business cases, a Level 4 rating as the completion of three business cases plus the implementation of one frontier project, and a Level 5 rating as the completion of three business cases plus the implementation of two frontier projects. The Committee otherwise agreed with the proposed goals as presented. On motion of Mr. Martin, seconded by Ms. Willis and unanimously carried, the Board approved the ELT Shared Goals for 2007 as recommended by the Committee.

Mr. Martin also recommended, on behalf of the Committee, to set the salary for James Brammell, newly appointed as Vice President, Chief Engineer, at \$119,588 annually until such time as salaries are reconsidered for company officers. Ms. Harris seconded, and the motion carried.

Update Provided Regarding Residential Customer Water Consumption

Mr. Miller reported total consumption in 2006 of 36.978 billion gallons was 1.822 billion gallons or 4.7% lower than budgeted, 3.074 billion gallons or 7.7% lower than 2005, and the lowest amount since 1993. A portion of this decrease was due to higher than normal rainfalls; however, the decrease in residential customer water consumption was part of a larger trend that is expected to continue. The Environmental Protection Agency (EPA) announced it is releasing a final specification for the latest generation of water-saving, high-efficiency toilets, which will use less than 1.3 gallons per flush. EPA also announced it is developing product performance criteria for high-efficiency bathroom sink faucets, which will have a maximum flow rate of 1.5 gallons per minute (a 40 percent reduction from current flow rates).

Mr. Heitzman advised the Company is participating in research with the American Water Works Association and the University of Louisville Center for Infrastructure Research on water use patterns. These patterns have been changing throughout the United States and current trends are adversely affecting many utilities' ability to accurately forecast revenues. Causes of water usage trends appear to be climate/rainfall, household size, water conservation, misclassification of residential customers in the customer database of the utilities, and price increases. Until now, trend data has been focused in the arid Southwest where water rationing is a common occurrence and not in the Midwest. This project is scheduled for completion by July 2009.

Mr. Miller stated monthly residential water bills have not increased commensurate with the changes in water rates due to the decrease in water consumption per household. Moreover, when adjusted for inflation, the monthly residential average bill has not materially changed during 1990-2006. We have reduced the anticipated total consumption in the 2007 Annual Budget to 38.2 billion gallons. Further reductions in budgeted consumption may be necessary if the decline in consumption per household outpaces the increase in the number of households.

Mr. Martin commented the strategic direction of the water business is not favorable unless LWC can increase revenue from water sales and other sources. It is common for water utilities to operate with a negative cash flow and that pattern will continue. We must find additional sources of revenue to satisfy all our stakeholders. Mr. Huber commented we need to consider the structure of our bills. Currently, the fixed price portion of our bills is smaller than the variable portion. Mr. Miller advised more information on this issue will be forthcoming at a future Board meeting.

Strategic Plan 2007-2021 Update

Ms. Susan Lehmann advised the 2007-2021 Strategic Plan was finalized and communicated to all employees by December 31, 2006. Financial resources were included in the 2007 budget to begin implementation of the top line revenue growth sub strategies. One of the 2006 Shared Goals for the ELT

was to "Create New Business Strategies to Ensure Revenue and Profitability." All elements of this objective were completed on or ahead of schedule. The Board agreed to assess ELT's performance on this goal as a part of the 2006 ELT Shared Goal results.

IT Strategic Plan 2003-2006; Summary of Status Report

Mr. Miller provided a status report for the 2004-2006 Information Technology Strategic Plan. The key Information Technology strategies for 2004-2006 included: investment in the four Information Technology Architectures; replacement of or re-engineering of legacy Information Supply Systems; investment in technologies to provide information to employees, customers, suppliers, and business partners quickly and efficiently; initiatives for Business Continuity, Disaster Recovery, and Information Security; and investment in training to support the quality products and services we have in place and will have in the future. Staff has completed a majority of the key elements of these strategies, such as: completion of the Automated Mapping/Facility Management/Geographic Information System project; implementation of the Human Resources Management System; implementation of the Mobile Dispatch System; adoption of Information Technology Control Frameworks and audit plan; and enhancement of network and information security and storage management with the installation of Network Attached Storage devices, data archival (electronic mail) system, and disk backup system.

Several key elements were deferred or cancelled due to changing business priorities and resource availability. Several of these elements will be the focal point for 2007. Also, several initiatives added to the plan in 2006 will continue in 2007. The development of a new IT Strategic Plan is underway and will be ready for use in developing the 2008 Annual Budget.

Engineer of Record/Facility Plan Consultant Selection

Mr. Brammell reported staff developed the Request for Proposal (RFP) for Facility Plan development and conducting annual inspections. Factors in the selection process will include having a current Statement of Qualifications on file with Louisville Water Company; a nationwide and favorable reputation; recent successful experience in performing significant planning studies and/or plant and production engineering work with LWC; and, a local office within reasonably close proximity to Louisville. Based on this criteria, five consulting firms have been invited to submit proposals: CH2M Hill; Black & Veatch; Jordan, Jones & Goulding; O'Brien & Gere; and CDM. Proposals are due March 14, 2007 and staff evaluation should be completed by April 5th. Staff will likely recommend a firm at the May meeting. The first work assignment for the selected consultant will be the 2007 Annual Inspection, which is expected to begin in May. Development of the 2010 - 2030 Facility Plan would begin in 2008.

Budget Increased for Project 10662: Zorn Pump Station

Mr. Brammell reported the Zorn Pump Station Structural Improvements project is presently budgeted for \$157,400 to rehabilitate the Zorn Boiler Building's reinforced concrete in order to remediate spalling and corrosion affecting the structural support columns and beams. The Boiler Building houses critical electrical switchgear and equipment essential to the functionality of the Zorn Pump Station. Cornerstone Engineering, Inc. (CEI) was retained to design a solution to this problem. In the initial investigation, other significant deficiencies with the concrete slabs were detected and some of the original grated openings in the floor have been filled with concrete without reinforcing steel. The construction cost for the additional work, as well as the work in the original scope, is now estimated at \$304,000, and with the addition of a 15 percent contingency and engineering and inspection costs, the total required project budget is \$400,000. Mr. Martin moved to increase the project budget by \$242,600, from \$157,400 to \$400,000, seconded by Ms. Willis and the motion carried.

Project Approved for Emergency Work Resulting From CSX Derailment in Brooks, KY

Mr. Brammell advised the Company incurred extraordinary operating costs and damage to facilities as the result of the CSX train derailment in Brooks, Kentucky on January 16, 2007. An initial assessment of the effect of the incident has been completed and staff has preliminarily determined the impact to LWC. Specifically, the derailment resulted in potential contamination and damage to LWC's facilities requiring unexpected staffing, contractual services, and materials costs. LWC's activities have included: around the clock support to ensure firefighting capacity and respond to questions regarding the water supply; additional water quality monitoring; and engineering, design and construction of new water mains. At this time, the majority of anticipated costs as a result of this derailment and recovery have not yet been expended. We have asserted a claim against CSX to recover the additional costs and damages for the specific facility repairs, in addition to water quality monitoring and unbudgeted labor expenses, directly resulting from this incident. Total estimated costs are \$923,700. LWC has submitted an invoice for a partial claim in the amount of \$14,875.60 and will invoice further as costs are expended. Ms. Harris moved to retroactively approve the initiation and planned completion of a project estimated at \$400,000 for the replacement of the 6-inch main in Huber Station Road, Angela Drive, and Stearns Lane; for the potential replacement of water facilities along Highway 1020; and for other ancillary work with estimated costs totaling \$923,700. Mr. Martin seconded, and the motion carried.

KIA Grant Accepted and Budget Amended to Note Receipt of Funds for Bullitt County Water Improvement Program - Walls Hollow Road Grant

Mr. Brammell stated the Company has received a conditional commitment letter from KIA for grant assistance for the Walls Hollow Road Project in the amount of \$168,000. Mr. Martin moved to adopt a Resolution accepting the Walls Hollow Road KIA grant, approving the Grant Agreement, authorizing the amendment of the 2007 LWC Budget to note receipt of the funds and authorizing James H. Brammell to sign the grant documents.

WHEREAS, the General Assembly has appropriated funds for infrastructure projects in the 2006-2008 Budget of the Commonwealth; and

WHEREAS, the Grantee has previously determined that it is in the public interest to acquire and construct certain facilities and improvements to the Grantee's utility system (the "Project"); and

WHEREAS, the Grantee desires funding from the Kentucky Infrastructure Authority (the "Authority") for the purpose of acquisition and construction of the Project.

NOW, THEREFORE, BE IT RESOLVED by the Board of Water Works of the Louisville Water Company as follows:

SECTION 1. That the Grantee hereby accepts the grant award and approves the Agreement between the Grantee and the Authority substantially in the form on file with the Grantee for the purpose of providing a portion of the necessary financing to the Grantee for the acquisition and construction of the Project.

SECTION 2. That James H. Brammell is hereby authorized, directed and empowered by the Grantee to execute the Agreement and all other necessary documents or agreements, and to otherwise act on behalf of the Grantee to implement the Project.

SECTION 3. That the Grantee hereby includes in its annual budget the receipt and expenditures of funds subject to the Agreement with the Authority.

SECTION 4. This Agreement shall take effect immediately upon passage

Ms. Harris seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 2:04 p.m.

ELT Shared Goal Rating Given

Ms. Willis moved to approve the ELT Shared Goal B concerning the Development of New Business Strategies at a Level 5, seconded by Mr. Martin, and the motion carried.

There being no further business, the meeting was adjourned at 2:18 p.m.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Barbara K. Dickens", written over a horizontal line.

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
March 13, 2007**

Board Members Present:

Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson
Mr. Stewart Conner, Chair

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Mr. Greg Heitzman, Senior Vice President, Operations
Mr. Jim Brammell, Vice President, Chief Engineer
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Mr. Spencer Bruce, Business System Owner, Managing Distribution Operations
Ms. Amber Halloran, Business System Owner, Supplying Financial Resources and Controller
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

The regular meeting of the Board of Water Works was held on Tuesday, March 13, 2007 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Vice Chair Wendy Welsh called the meeting to order at 12:33 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin recommended adding the following to the first sentence of the last full paragraph on page 4 of the February 20, 2007 draft minutes: "unless LWC can increase revenue from water sales and other sources." Mr. Martin moved to approve the minutes from the Regular Meeting held February 20, 2007, as amended, seconded by Ms. Marita Willis, and the motion carried.

Chief Executive Officer Report Provided

Mr. John Huber reported LWC employees Ed Chestnut and Ron Green and BOWW Director Marita Willis are featured in the Who's Who in Black Louisville, Inaugural Edition.

Mr. Huber attended the AMWA Water Policy Conference, where discussions were held regarding the focus of the Democratic congressional committee chairs on increased federal funding for wastewater and water utilities and the regulation of perchlorate and MTBE in water. Mr. Huber advised the EPA is focusing on security, including mutual aid agreements among utilities, water efficiency, the management of water infrastructure, changes in the climate, and water quality issues involving pharmaceuticals and microbials. Additionally the private sector involvement in the water industry may increase if the cap on private activity bonds for water projects is lifted as advocated by the EPA Administrator.

Financial Report Provided

Mr. Robert Miller summarized the financial results for February 2007. Operating Revenues for February of \$9,016,636 are \$737,043 or 7.6% less than budgeted. Operating revenues are lower for nearly all customer classes without an obvious cause, but possible factors include the effect of estimates for meters not read, the effect of variances for billings different from the schedule, challenges in the budget spread, and lower usage per account. Operation and Maintenance Expenses for February of \$4,827,359 are \$232,711 or 5.1% more than budgeted. The budget variance is due to distribution system winter emergency costs. Total Net Non-Operating Expense for February of \$129,798 is \$165,630 or 56.1% less than budgeted and \$176,125. The budget variance is due to higher than expected interest income. YTD Total Net Non-Operating Expense of \$352,750 is \$208,954. Net Income for February is \$894,995 or 39.8% less than budgeted. YTD Net Income is \$673,853.

Mr. Miller commented staffing levels were lowered significantly in 2003, and staff levels are currently even lower than in 2003. Ms. Welch inquired whether the staffing is affecting the abandonment rate in the Call Center. Mr. Greg Heitzman advised the abandonment rate has been due to vacancies as well as inexperience of newly hired call center employees. Mr. Martin commented the cash paid to suppliers was twice what it was for the same period in 2006. Mr. Miller advised staff would follow up on this.

Engineering Report Provided

Mr. Jim Brammell provided the Engineering Report for February 2007. Preliminary engineering is nearly completed on Project 10608—Crescent Hill Filter Plant Chlorine Generation System. A meeting was held on February 26 with the Community Advisory Group to provide a status report and update on the project. The feedback from the CAG was favorable.

Mr. Brammell reported LWC continues to participate on a coordinate capital improvements team with multiple Metro government departments, MSD, and the Kentucky Transportation Cabinet (KTC). The advantages of coordinated construction to the agencies and utilities are lower construction costs, higher productivity, and diminished risk of damage to infrastructure. Current efforts are being made to coordinate LWC projects with Metro's paving schedule. Mr. Huber noted these efforts compliment the BOWW's strategic goal to achieve synergies.

Operations Report Provided

Mr. Heitzman provided the Operations report for month of February 2007. LWC received two Notice of Violation (NOV) letters from the Kentucky Division of Water (DOW) on February 22 regarding a clerical error in the December 2006 monitoring report for Total Organic Carbon (TOC). The analysis date in the original report was incorrectly entered. As a result, Kentucky DOW issued two Tier 3 reporting violations: one for BEP and the other for Crescent Hill Filtration Plant. Staff reviewed the regulations and believes no violation exists because the TOC monitoring occurred and was timely submitted, but simply contained an obvious clerical error.

Bad Debt for the month was \$15,720 compared to \$43,329 in February 2006. Through February, we are \$66,234.93 below budget for bad debt write offs. The improvement in this area is attributed to the continued hard work of collections and cashiering staff and the relatively small number of accounts eligible for bad debt status.

The Company received an Engineering Excellence Honor Award by the American Consulting Engineers Council of Kentucky for the \$18 million construction upgrade of the B.E. Payne Water Treatment Plant in 2004. The award was given for the significant utilization of minority and women business, the ability to upgrade the plant while maintaining operation, integrating new filtering technology, and completing the project well below the budget allocation of \$20 million.

Closed Session Held

Ms. Margaret Harris moved to go into closed session to discuss proposed or pending litigation matters and a specific business proposal pursuant to KRS 61.810(1)(c) and (g), respectively, at 1:05 p.m. Dr. Joseph Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Harris, seconded by Mr. Martin, and unanimously carried, the Board resumed open session at 1:55 p.m. No action was taken in closed session.

Dividend Declared

Mr. Miller advised Section 508 of the Series 1992 Water System Revenue Bond Resolution provides that the Louisville Water Company will pay to the Louisville / Jefferson County Revenue Commission an annual dividend on the Louisville Water Company stock owned by the City. The 2007 Annual Budget provides for a budgeted annual dividend of \$15,673,500. Dr. Wise moved to declare the first quarterly 2007 dividend in the amount of \$3,918,375.

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and

WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and

WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and

WHEREAS, the 2007 Louisville Water Company Annual Budget contemplates the 2007 annual dividend to be \$15,673,500, it would be in order at this time to declare a regular first quarter dividend of \$3,918,375; therefore, be it

RESOLVED, the regular first quarter 2007 dividend of \$3,918,375 is hereby declared, and further

RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,918,375 to the Louisville / Jefferson County Revenue Commission on March 30, 2007, this being the first quarterly dividend for 2007, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Mr. Martin seconded, and the motion carried.

Report Provided Concerning 2006 Strategic Plan Measurements

Mr. Ed Chestnut advised the Compensation Committee received a detailed update of results of the measurements for the 2006 Strategic Plan. The information was provided to the remainder of the Board for their review. Mr. Chestnut also reviewed data on the number of services installed annually from 1996-2006. Mr. Johnstone commented some of the decline may be attributed to the growing number of multi-unit developments, such as patio homes, for which the Company permits master metering.

Discussion Held Regarding Ratio Analysis of 2006 Financial Results

Mr. Miller advised staff has conducted a ratio analysis of the 2006 financial results. Financial management staff plans for and monitors five groups of financial metrics: liquidity, capitalization, coverage, profitability and dividend payout. The annual budget for 2007 contemplates that all measures except for Return on Equity ("ROE") will meet or exceed the LWC targets. LWC revenue bonds currently carry a rating of Aa1 from Moody's Investors Service and AA+ from Standard & Poor's. These ratings are quite favorable and are the next rating below the top rating of AAA. Staff believes there are approximately ten water or sewer utilities in the United States with a rating of AAA. Comparing LWC results for 2006 with the AAA medians identified by Fitch Ratings, the LWC results compare favorably on Long Term Debt to Net Utility Plant and Operating Margin and compare unfavorably on Days of Funded Operations and Debt Service Coverage. LWC is on track to achieve and sustain financial performance that meets or exceeds the targets established in the long term financial plan and to maintain the current favorable bond ratings. However, the results do not indicate that an improvement of the bond rating to AAA will be practical in the near term.

Analysis Provided of Revenue, Consumption and Number of Accounts by Customer Class from 1990 through 2006

Mr. Miller reported the Company has seen lower than expected water sales for three of the past four years. Based upon an analysis of usage per account by customer class, staff has discerned a decrease in the average consumption per account for residential, commercial and industrial customers. Mr. Miller reviewed the revenue, consumption, and number of accounts for the residential, commercial and industrial customer classes for 1990 through 2006. The number of residential customers has increased from 195,641 in 1990 to 244,478 in 2006 due to the extension of water mains throughout Jefferson County and the conversion of previous wholesale customer accounts through mergers and acquisitions. During that time, consumption has increased but at a lower rate due to the offsetting decrease in consumption per account. The number of commercial customers has increased from 17,755 in 1990 to 23,225 in 2006. During that time, consumption increased until 2000 when it began to level out or decline due to a decrease in consumption per account. The number of industrial customers has decreased from 400 in 1990 to 321 in 2006. During that time, consumption decreased both due to a decrease in the number of customers as well as in consumption per account.

With the increasing numbers of residential and commercial accounts accompanied by the decreasing number of industrial accounts, the amount of revenue received from each customer class has changed markedly from 1990 to 2006. Revenue from commercial customers as a percentage of total revenue has increased from 31% to 35% while revenue from industrial customers as a percentage of total revenue has decreased from 14% to 7%. Revenue from residential customers as a percentage of total revenue has remained relatively stable at 44% to 45%. The balance of the difference is attributable to increased wholesale and municipal sales. We have added 61,752 customer accounts from 1990 to 2006 for an increase of 26.6%, from 232,085 to 293,837. Total annual water sales have remained relatively flat during that same period, falling by 34.1 million gallons for a decrease of 0.09%, from 37,012 million gallons to 36,978 million gallons. Also during that same period, Louisville Water Company increased the investment in net utility plant by \$492,802,059 for an increase of 194.6%, from \$253,300,521 to \$746,102,580. These increased investments have resulted in improved water quality, customer satisfaction, and infrastructure reliability. However, they have not resulted in increased total water sales. Further growth in top-line revenue and profitability will require continually increased numbers of customer accounts as well as effective execution of the growth strategies in the 2007-2021 Strategic Plan.

Mr. Huber stated the results of this analysis further support our need to consider our current pricing structure. Mr. Miller agreed, stating this is a high point of discussion at water utility leadership conferences. Mr. Martin expressed concern in meeting our ROE target.

Discussion Held About “Water For Profit”

Mr. Miller advised CFO Magazine published a profile of the water utility industry on February 1, 2007 titled *“Water for Profit: Undaunted by Tight Regulations and Huge Infrastructure Costs, Companies Dive into the Water Business”*. The article notes the steady pace of acquisitions by investor-owned water utilities, despite the effort of municipally-owned utilities to protect their exclusive franchises. The water utility is a capital intensive industry with negative cash flow to build assets to grow net income, without adequate rate increases. Acquisitions of adjacent utilities are necessary to attain economies of scale while providing a fair and reasonable ROE at 10-11%. Mr. Miller noted these pressures are difficult when considering the customer objective to control rate increases at or below 5%, maintain tax exempt bond ratings at Aa1/AA+, and increasing equity while lowering debt. Many water utilities are entering into related non-regulated business lines in order to achieve the balance necessary between these objectives. Mr. Martin commented that while it is the standard method to value water utilities, the way in which we value the Company provides a lower book value that it really is.

Update Provided Regarding Kentucky General Assembly Legislation

Mr. Heitzman noted we have monitored the activities of the General Assembly, but it does not appear any of the proposed legislation still viable in this session will significantly affect the Company.

Update Provided Regarding the Winter Emergency Activities

Mr. Spencer Bruce provided a summary of activities involved in the Winter Emergency, which occurred when the air and water temperatures dropped rapidly. Distribution Operations progressed through three of the four levels of the Winter Emergency Plan. Crews worked 12 to 16 hour shifts over a 2 week period. There were 257 main breaks vs. a five year average of 54 for the month of February. For the first two months of the year, there were 340 main breaks, compared to a total of 436 for all of 2006. There were three road closures, over 210 street cuts, customer driveways or sidewalks, and 3559 work units completed. Meter reading was behind schedule and many routes were estimated in order to prevent bills with greater than 68 service days. As a result, of the 129,424 accounts billed in February 2007, 14,396 (11.12%) were estimated. In February 2006, 140,271 accounts were billed and 1,861 (1.33%) accounts were estimated. Collection related turn off for non-payment and plug services work was suspended during the extreme cold February 5 – 7, resulting in a backlog of 398 work units. This backlog was addressed using overtime and normal collection procedures did not have to be modified. The call center handled 34,985 calls compared to 31,360 for the same period last year. There were no significant impacts from the winter weather on the treatment plants or pumping operations. Management stepped down from the Winter Emergency on February 18, but some impacts from it will continue 60 days beyond then.

2007 Water Rate Schedule Revised

Mr. Miller advised the rates charged to the Kentucky Turnpike Water District #2 customers remained the same after the merger of LWC and the District in October 2000, including a special rate previously negotiated with the City of Lebanon Junction. In January 2005, LWC reached agreement with the City of Lebanon Junction for a standard wholesale contract to replace the previous contract with Kentucky Turnpike Water District #2. Lebanon Junction uses this supply only on an emergency standby basis. Staff noticed that the reference to the special rate for Lebanon Junction had not been removed from the

approved 2007 Water Rate Schedule, as it should have been. This correction to the rate schedule reflects the contract currently in place and does not have a financial impact nor does it impact filings with the Kentucky Public Service Commission. Mr. Martin moved to revise the 2007 Water Rate Schedule to remove the reference to the special rate for the City of Lebanon Junction in Paragraph 6.02.02, seconded by Dr. Wise, and the motion carried.

Condemnation of Easements Approved

Mr. Brammell advised of plans to install a 16-inch transmission water main across two parcels at 16601 and 16603 Dixie Highway located in Southwest Jefferson County. This project is the last segment of a 16-inch transmission main along Dixie Highway from Rogers Lane to Katherine Station Road. A total of 11 easements are required for the project, of which 9 have been acquired. The proposed grid-tie will connect two separate sections of this 16-inch transmission main and will improve area flow availability for fire service and will ensure high quality water is provided. The proposed grid-tie is a necessary component to support growth south of this area. There are no alternatives from the current design that are operationally or economically feasible. Staff has negotiated with the owners of this property along this route for several years without having reached an acceptable settlement; therefore, it is necessary to proceed with condemnation of the two remaining easements required for the project. Dr. Wise moved to adopt the following resolution:

RESOLVED, that it is hereby determined to be necessary that the Louisville Water Company obtain a permanent easement on certain land located along U. S. Highway 31W a/k/a South Dixie Highway in Jefferson County, Kentucky (such land being more particularly described in Exhibits A and B attached to the Resolution) for the purpose of using such land for installing, operating, monitoring, maintaining, and replacing water main facilities, which will enhance water quality and improve fire protection service, it being the Board of Water Works' determination that such land is needed from owners Barry Lee Smith and the Estate of R. Gene Smith, at 16601 and 16603 S. Dixie Highway in Jefferson County, Kentucky, said parcels located at Tax Block 1064, Lots 14 and 20, and any or all other lawful owners of such properties, the need for such land being to allow the public use of said land by the Louisville Water Company in fulfilling the public use and purpose of providing purified water services and fire protection services to the residents of Louisville/Jefferson County, Kentucky and surrounding areas, the Louisville Water Company being hereby authorized, if reasonable efforts to purchase the necessary easements have failed, to bring a condemnation action against the owners of such land.

Ms. Harris seconded, and the motion carried.

Executive Session Conducted

The Board went into Executive Session without management present at 2:50 p.m.

There being no further business, the meeting was adjourned at 3:05 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
APRIL 10, 2007**

Board Members Present:

Mr. Stewart Conner, Chair
Ms. Wendy Welsh, Vice-Chair
Mr. Gerald Martin
Ms. Margaret Harris
Ms. Marita Willis
Dr. Joseph Wise

Not Present:

Mayor Jerry Abramson

Others Present:

Mr. John Huber, President/CEO
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government
Mr. Greg Heitzman, Senior Vice President, Operations
Mr. James Brammell, Vice President, Chief Engineer
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer
Ms. Barbara Crow, Process Owner, Providing Strategic Communications

The regular meeting of the Board of Water Works was held on Tuesday, April 10, 2007 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:38 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Ms. Wendy Welsh moved to approve the minutes from the Regular Meeting held March 13, 2007, seconded by Mr. Gerald Martin, and the motion carried.

Financial Report Provided

Mr. Robert Miller provided the report of financial results through March 2007. Operating Revenues for March of \$9,406,247 are \$223,677 or 2.4% more than budgeted due to higher than expected commercial water sales. YTD Operating Revenues of \$28,722,868 are \$373,786 or 1.3% less than budgeted. Operation and Maintenance Expenses for March of \$4,101,335 are \$61,651 or 1.5% more than budgeted due to distribution system winter emergency costs. YTD Operation and Maintenance Expenses of \$12,913,673 are \$376,244 or 3.0% more than budgeted. YTD Total Operating Expenses of \$21,134,792 is \$318,812 or 1.5% more than budgeted. YTD Net Operating Income of \$7,588,077 is \$692,597 or 8.4% less than budgeted. Total Net Non-Operating Expense for March of \$198,951 is \$96,380 or 32.6% less than budgeted due to higher than expected interest income. YTD Total Net Non-Operating Expense of \$551,701 is \$305,334 or 35.6% less than budgeted. YTD Net Income of \$7,036,376 is \$387,263 or 5.2% less than budgeted.

Mr. Miller responded to Mr. Martin's question in the March meeting about the increase in payments to suppliers and advised the increase corresponds to the payment of an accrual of capital expenditures at the end of 2006. Mr. Rick Johnstone noted the lower use of water by Metro Government is helpful since

those are free water accounts. In response to Mr. Johnstone's request for clarification regarding higher O&M costs per customer, Mr. Miller advised this is due to the higher O&M costs incurred during the Winter Emergency.

Operations Report Provided

Mr. Greg Heitzman presented the Operations report for March. Contractors have completed a significant number of asphalt repairs required as a result of the Winter Emergency. Of the 275 backlog of concrete and asphalt restorations, all restorations will be completed in April, allowing Operations to shift work to the capital program.

In early March, a leak was discovered on the 60" transmission main at Palatka between Southview and Sunny Brook Drive. It is the result of a circumferential break in the prestressed concrete main. This section has been taken out of service to minimize the risk of a catastrophic failure, which other communities have had with pre-stressed concrete cylinder pipe. If pipe cannot be obtained quickly from the manufacturer, the roadway will be covered to allow traffic until the pipe is received and then coordinated with Metro Public Works to be closed for repairs for approximately two weeks.

Call Center operations received 33,135 calls in March compared with 32,477 in March 2006. The call abandonment rate was 7.6%, significantly lower than the January and February rates of 18.1% and 13.4% respectively. Although lower, the abandonment rate exceeded our goal of 5%. We continue to be understaffed in the call center with one fulltime and one part time vacancy. In addition, staff availability was reduced due to sickness and planned vacations. LG&E provided management a tour and presentation of their Virtual Call Center. Staff will continue to benchmark with LG&E and look to transfer best practices to our call center operation.

The first quarter 2007 CSI results show an increase over first quarter 2006. The Total CSI was 856 for the quarter compared to 845 in 2006, while the Serviced Customers CSI was 785 compared to 779 in 2006. A review of the sub-elements of the CSI, reveals an increase in all areas of water quality, customer service, information, reliability, and price value. The residential segments improved, while the commercial serviced and non-serviced segments declined. The overall results were better than expected, considering the 6.5 percent water rate increase in January and the winter emergency and customer service and billing issues experienced during February.

Chief Engineer Report Provided

Mr. James Brammell provided the Engineering report. Expenditures through March 2007 for the capital program totaled \$13.08 million, which is \$233.8 thousand higher than the same period in 2006. These expenditures equate to 14.24 percent of the revised 2007 capital program of \$91.81 million.

The quarterly meeting of the Shepherdsville Advisory Board was held on March 20, 2007 at the Louisville Water Company's Bullitt County office. The Board was briefed on LWC organization changes, the Shepherdsville Rate Differential, the Highway 44 Main Replacement, and Monthly Billing.

Mr. Brammell advised the Huber Station, Angela Drive, and Stearns Lane replacement work from the CSX Train Derailment is complete. CSX-requested scope changes have resulted in the project budget for this water main work to rise from \$400,000 to \$455,300. LWC has received additional information resulting in a decision to replace some length of the existing water facilities in the Highway 1020 corridor. The February estimate, still tentative, was for the replacement of 2,000 feet of 12-inch main at a projected cost of \$266,000.

Compensation Committee Report

Mr. Conner asked Ms. Susan Lehmann to summarize the Committee's discussion regarding 2007 salaries. Ms. Lehmann stated the merit matrix results in a 2.8% move in the market. LWC budgeted a 3.5% overall increase in salaries.

Audit Committee Report Given

Ms. Welsh gave the report of the Audit Committee's meeting held March 29, 2007. She reviewed comments by the external auditors, Strothman & Company. Strothman issued a clean, unqualified audit and found no significant deficiencies or material weaknesses. She summarized the results of the HR Compliance Audit and the status of Outstanding Issues, which were reported to the Committee.

First Quarter 2007 Certification Provided for Projects Authorized and Change Actions Approved

Mr. Huber certified that the following projects and change actions were authorized in the First Quarter of 2007 pursuant to the Capital Projects Authorization Policy and Procedures, with the exception of a purchase for an unbudgeted capital project that was approved by the Bids and Awards Committee contingent upon approval by the Capital Projects Authorization Committee (CPAC), but was actually authorized by an employee without first getting that CPAC approval. CPAC approval was subsequently granted and would have been granted had CPAC had the opportunity to meet prior to the authorization form being submitted. This form was submitted to the vendor early to obtain favorable pricing.

PROJECT PROPOSALS REQUIRING BOARD APPROVAL

11624 Huber Station Rd relocation CSX, cost center 342 – Project Proposal for non-budgeted project. CPAC-01/30/07, President-01/30/07

Authorization Provided for Chief Engineer to sign Kentucky Infrastructure Authority Grant Documents.

Ms. Barbara Dickens advised several projects that have been funded by the Kentucky Infrastructure Authority (KIA) remain open and still have grant documents that need to be submitted to the KIA. The current authorization provided for signing those documents rests with Karla Teasley, who is no longer with the Company. Therefore, it is necessary for the Board to authorize the Chief Engineer to execute all KIA grant documents. Ms. Marita Willis moved to adopt the following resolution to authorize the Chief Engineer to execute KIA grant documents:

WHEREAS, Bullitt County Fiscal Court, Kentucky and the Louisville Water Company entered into a Cooperation Agreement on or about January 21, 2003, whereby the Louisville Water Company will act as an agent for Bullitt County Fiscal Court in administering and implementing the water main extension projects implemented as part of the Kentucky Infrastructure Authority (KIA) for Economic Development Fund for Tobacco/Coal Producing Counties, and WHEREAS, in said agreement, Karla Olson Teasley, was designated as the official representative of Louisville Water Company and authorized to sign all documents necessary in connection with the program, and WHEREAS, as of January 15, 2007, Karla Olson Teasley, was no longer employed by Louisville Water Company, and NOW, THEREFORE, BE IT RESOLVED by the Board of Water Works of the Louisville Water Company that the Chief Engineer for the Louisville Water Company is hereby authorized, directed and empowered to sign all other necessary documents or agreements, and to otherwise act on behalf of the Louisville Water Company to implement the Project.

WX Number	LWC Project No.	Project Name	BOWW Approval Date
WX21029049	11392	East Hwy 480 Tank	5/11/04
WX21029099	03307	Knob Creek Road	5/11/04
WX21029101	10274	Lake Elmo Road Lebanon	5/11/04
WX21029104	11595	Junction	5/11/04
WX21029076	11198	Hilltop Road	10/18/05

Dr. Joseph Wise seconded, and the motion carried.

Closed Session Held

Ms. Welsh moved to go into closed session to discuss proposed and pending litigation and personnel matters pursuant to KRS 61.810(1)(c) and(f), respectively, at 1:15 p.m. Dr. Wise seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Welsh, seconded by Ms. Willis and unanimously carried, the Board resumed open session at 2:05 p.m. No action was taken in closed session.

Ms. Willis moved to approve the salaries of company officers as follows:

Senior Vice President, Operations	Greg Heitzman	\$165,826
Vice President, Treasurer	Bob Miller	\$144,777
Vice President, Chief Engineer	James Brammell	\$126,165
Vice President, General Counsel and Corporate Secretary	Barbara Dickens	\$137,482
Vice President, Human Resources and Organizational Effectiveness	Susan Lehmann	\$144,047
President/CEO	John Huber	\$216,540

Ms. Margaret Harris seconded, and the motion carried.

There being no further business, the meeting was adjourned at 2:07 p.m.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Barbara K. Dickens", written over a horizontal line.

The regular meeting of the Board of Water Works was held on Tuesday, May 8, 2007 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:30 p.m.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the Regular Meeting held April 10, 2007, the Annual Meeting held April 10, 2007, the Special-Called Meeting held April 25, 2007 and the Special-Called meeting held April 26, 2007, seconded by Ms. Margaret Harris, and the motion carried.

Closed Executive Session

Ms. Marita Willis moved to go into closed session at 12:33 p.m. to discuss personnel matters pursuant to KRS 61.810(1)(f), seconded by Dr. Joseph Wise, and the motion carried.

Open Session Resumed

Ms. Willis moved to return to open session at 1:27 p.m., seconded by Mr. Martin and the motion carried.

New President Named Effective Upon the Retirement of President John Huber

Dr. Wise moved to select Mr. Gregory C. Heitzman as President of the Louisville Water Company upon the retirement of current President John Huber and to authorize the Board Chair, in consultation with the Board Compensation Committee, to negotiate with Mr. Heitzman regarding employment terms, which will be reported at the next regular meeting of the Board. Mr. Martin seconded, and the motion carried. Mr. Heitzman made a brief statement thanking the Directors for their confidence in him and the opportunity to serve the Company in this capacity.

Chief Executive Officer Report Provided

Mr. Huber advised schedule changes have made it very difficult to hold a June BOWW meeting. He advised staff considered this issue and adjusted reporting of items and seeking approval of the dividend declaration to this meeting. Directors were in consensus to cancel the June meeting of the BOWW. Mr. Huber also reported the PSC approved the wholesale water rate increases.

Financial Report Provided

Mr. Robert Miller provided the report of financial results through April 2007. YTD Operating Revenues of \$37,512,828 are \$779,683 or 2.0% less than budgeted. Budgeted contingency funds of \$800,000 were moved forward from December to April to offset the winter emergency expenses in the first quarter of 2007. YTD Operation and Maintenance Expenses of \$16,783,433 are \$967,435 less than budgeted. The YTD variance is related to vacant positions, lower materials and contractual services expenses, lower bad debt attributed to delays in turn-offs during the winter emergency, and reduced insurance reserves for claims. YTD Total Operating Expenses of \$27,662,108 is \$1,082,019 or 3.8% less than budgeted and \$2,025,736. YTD Net Operating Income of \$9,850,720 is \$302,336 or 3.2% more than budgeted. YTD Total Net Non-Operating Expense of \$779,586 is \$413,150 or 34.6% less than budgeted and \$580,758. YTD Net Income of \$9,071,134 is \$715,486 or 8.6% more than budgeted and \$577,095 or 6.8% more than 2006. Mr. Miller advised recent movement in the interest rate market has made it feasible to consider refinancing the outstanding Series 2000 bonds. In response to Dr. Wise, Mr. Miller stated we could capture about a 5% present value savings, equating to approximately \$3 Million.

Mr. Miller advised we are well into pandemic planning and the Board will receive a more detailed report at a later meeting.

Operations Report Provided

Mr. Huber presented the Operations report for April 2007. The average production during March was 114.7 MGD, similar to March 2006 and slightly below the 5 year average production. Rainfall for the year of 15.25 inches is below the 5 year average of 18.04 inches. The Oldham County Advisory Board held their bi-annual meeting and each member agreed to continue to serve for an additional three year term. Updates were provided regarding subdivisions in the area, the status of the new North Oldham water tank on Highway 42 in Goshen, a historical perspective of water service applications, and a brief update of the meeting between LWC staff and the Oldham County Water District. Extensive activities were conducted to ensure smooth water service operations for the Kentucky Derby and associated events.

Chief Engineer Report Provided

Mr. James Brammell provided the Engineering report for April 2007. April Capital Program Expenditures through April totaled \$17.05 million, which is \$326.6 thousand higher than the same period in 2006. These expenditures equate to 18.78 percent of the revised 2007 capital program of \$90.76

million. Major repairs were initiated in April and completed by the morning of the Kentucky Oaks on the 60-inch transmission main in Palatka Road. A joint leak was originally suspected; however, investigations revealed that a circumferential crack had formed immediately adjacent to a beveled joint. A Facility Condition Assessment of the buildings, facilities, and infrastructure from the Zorn Intake and Pumping Station to the Crescent Hill Water Treatment Plant has been initiated. Over 30 buildings, structures, and conduits are included in the study - most of which are at or near 100 years old. The purpose of the project is to determine the existing condition and remaining life, including estimated life-extending maintenance costs of the facilities, to assist LWC in its decisions regarding Advanced Treatment Technology. The current phase of LWC's Main Replacement and Rehabilitation Program (MRRP) for unlined cast iron mains is in the final year of design and construction. LWC staff is assembling the business plan for the next generation of MRRP. Mr. Brammell also advised that the plant capacity study has been completed and estimations of capacity at each plant have been confirmed.

Closed Session Held

Ms. Willis moved to go into closed session to discuss proposed and pending litigation and a specific business proposal pursuant to KRS 61.810(1)(c) and(g), respectively, at 2:14 p.m. Ms. Harris seconded, and the motion carried.

Open Session Resumed

On the motion of Dr. Wise, seconded by Mr. Martin, and unanimously carried, the Board resumed open session at 2:28 p.m. No action was taken in closed session.

Information Technology Strategic Plan Development Progress Report Provided

Mr. Miller and Mr. Tony Gregory advised the Information Technology Steering Committee is developing the next draft of the Information Technology Strategic Plan. This plan will provide direction and prioritization for investments to support the corporate strategic plan. The committee intends to complete its work in time for internal review prior to the development of the Preliminary 2008 Annual Budget. The new Information Technology Strategic Plan will cover a planning horizon of ten years and will be reviewed and updated annually to incorporate changing business needs and priorities.

As between the ERP approach, where a single software company provides an integrated product to handle all business information applications, and a "best of breed" approach, where multiple vendor products are integrated through interfaces developed by LWC staff and implementation contractors, the Company will pursue a "best of breed" approach while including strategies and tactics to build up our internal knowledge of full ERP solutions and their application to our business. Mr. Huber commented other utilities have gone with a "best of breed" approach, too. Mr. Conner inquired when the Board will get a high level view of the Company's direction with IT. Mr. Miller responded this process will provide that and he will be bringing a draft IT policy in the near future. Status updates will be provided periodically.

Phase I of the Cross Connection Control Program Approved

Mr. Vince Monks updated the Board regarding the current Cross-connection Control Program (CCP) and staff's desire to enhance it. The Company's current CCP has been successful in identifying potential cross-connections from high risk customers (chemical manufacturers, funeral homes, and hospitals) and installing backflow prevention devices on the customer's plumbing. After an extensive evaluation and pilot program to enhance the current CCP, staff recommends implementation of this program for approximately 24,000 commercial and industrial customers.

Mr. John Ralston explained the new components of the program will be enhanced administration, including a master cross-connection database, annual inspections, customer notification, annual contractor testing, and the resources of 7 full time equivalent employees (2 existing full time and 7 part time staff); a quality assurance and quality control (QA/QC) program, including monitoring and reporting for future regulatory compliance; education, communications, and reporting for key constituencies; and finally, a cross connection administration fee assessed to all commercial and industrial customers to cover the revenue requirements to fully fund the program. The fee is proposed at \$36.00 annually, or \$3.00 per month for all commercial and industrial accounts, but would not be initiated until Board approval is sought and obtained later in the year. This proposed fee will generate an approximately \$864,000 in annual revenue, when fully implemented in 2008. Mr. Conner asked if the program is voluntary, and Mr. Ralston stated it will not be voluntary for these customers. Mr. Martin moved to approve the enhanced Cross-connection Control Program, with the exception of setting the fee proposed for commercial and industrial customers. Ms. Harris seconded, and the motion carried. Staff plans several focus group sessions with impacted customers and leaders of industry groups representing impacted customers to test reaction to the program and proposed fees, and to refine our communication plan. .

Second Quarter Dividend Declared

Ms. Willis moved to adopt the following resolution:

WHEREAS, it has been the long established policy of Louisville Water Company to pay a dividend on its common stock related to its net earnings, after giving consideration to any requirements for debt amortization and bond reserve requirements, and
WHEREAS, a covenant written into the 1992 Water System Revenue Bond Resolution sets forth a formula for determining the amount of any such dividend, and
WHEREAS, such covenant requires payment of a dividend each year based on estimated annual net income, with adjustment upon completion of the annual audit to reflect any difference between estimated and actual net income, such adjustment to be made in the quarterly dividend payments of the following year, and
WHEREAS, an estimated dividend of \$14,842,114 was declared in 2006 based on estimated annual net income of \$31,788,900, and
WHEREAS, the annual audit for 2006 has now been completed which establishes the full dividend for 2006 as \$14,058,863 based on actual annual net income of \$30,689,957, it would be in order at this time to amend the Board resolution of December 12, 2006 to decrease the 2007 annual dividend by \$783,251, from \$14,842,114 to \$14,058,863, and
WHEREAS, it is practical that the difference is deducted from the second quarterly 2007 dividend payment, and
WHEREAS, the 1992 Bond Resolution requires that the Board of Water Works pay a quarterly dividend based on the formula contained therein, such quarterly payments to be as nearly equal in amount as possible, and
WHEREAS, the 2007 Louisville Water Company Annual Budget contemplates the 2007 annual dividend to be \$15,673,500, it would be in order at this time to declare a regular second quarter dividend of \$3,918,375; therefore, be it
RESOLVED, the 2006 annual dividend is decreased from \$14,842,114 to \$14,058,863 and the difference of \$783,251 will be deducted from the second quarterly 2007 dividend payment, and
RESOLVED, the regular second quarter 2007 dividend of \$3,918,375 is hereby declared, and further
RESOLVED, that the President of the Company be and hereby is authorized and directed to pay \$3,135,098 to the Louisville / Jefferson County Revenue Commission on

June 29, 2007, this being the second quarterly dividend for 2007 less the dividend adjustment for 2006, payable pursuant to Section 508 of the Series 1992 Water System Revenue Bond Resolution.

Mr. Martin seconded and the motion carried.

Contract Awarded for Facilities Plan Consulting Engineer

Mr. Brammell advised the bond covenants mandate an inspection of company facilities annually by "an independent engineer or engineering firm or corporation having a nationwide and favorable reputation for skill and experience in such work." Over the past several months, a cross-functional evaluation team consisting of key members from across the company has been engaged in a rigorous and objective process to select a Consulting Engineer for the Company. Five firms responded to the RFP, and three of those firms were subsequently invited to participate in an interview by the LWC team. Upon completion of final scoring, the firm of Camp, Dresser and McKee was the highest overall rated firm. Dr. Wise inquired about the decision to eliminate two of the five firms, and Mr. Brammell provided the basis for the decision. Mr. Martin inquired about the cost for the services, and Mr. Brammell advised the cost figure was actually for a hypothetical project, and therefore was used for evaluation purposes only. Costs for this work were provided by the firms as hourly rates. Ms. Harris moved to approve the selection of the firm of Camp Dresser, and McKee (CDM) as our Consulting Engineer for a one-year term, renewal for four additional one-year terms at the Company's discretion, seconded by Ms. Willis, and the motion carried. The first assignment on this professional services contract will be the 2007 Annual Inspection. Development of the company's twenty-year Facilities Plan is expected to be assigned in early 2008.

Grant Accepted and Agreement Approved for Bullitt County Water Improvement Program - Ridge Road Extension

Mr. Brammell advised the Company has been granted funds from Kentucky Infrastructure Authority to support the Bullitt County Water Improvement Program in the amount of \$15,000 for the Ridge Road Extension project in Bullitt County. Dr. Wise moved to adopt the following Resolution and authorize the Chief Engineer to enter into the attached Cooperation Agreement with Bullitt County Fiscal Court to act as LWC's official representative to coordinate grant requirements, seconded by Ms. Willis, and the motion carried:

WHEREAS, the Kentucky General Assembly passed the 2006-2008 Budget of the Commonwealth where the Ridge Road Extension water main infrastructure project was named for grant funding through the Kentucky Infrastructure Authority, and;

WHEREAS, Bullitt County Fiscal Court has received a conditional grant commitment letter from the Kentucky Infrastructure Authority for a water main project on Ridge Road Extension, and;

WHEREAS, the Louisville Water Company has been approved to implement and carry out the Kentucky Infrastructure Authority Ridge Road Extension grant project by Bullitt County Fiscal Court; and,

NOW, THEREFORE, BE IT RESOLVED by the Board of Water Works that:

1. All policy decisions relating to types of activities to be included in this project will be submitted for approval to the Bullitt County Fiscal Court, Kentucky;
2. The Louisville Water Company agrees to represent the Bullitt County Fiscal Court in implementing and carrying out this Kentucky Infrastructure Authority grant project; and,
3. That the Louisville Water Company will review and give preliminary approval to all reports, expenditures and other correspondence or data necessary to implement the

project; and reports on said implementation will be made to the Bullitt County Fiscal Court periodically; and,

4. Members of the Bullitt County Fiscal Court shall be kept fully informed of all activities relating to the Kentucky Infrastructure Authority Grant Program.

Budget Established and Design and Bid Authorized for Project 10608: Crescent Hill Filter Plan On-Site Chlorine Generation

Mr. Brammell provided an update of the \$12.2 Million project to construct an on-site chlorine generation system that meets the disinfection needs of the Crescent Hill Water Treatment Plant (CHWTP) to allow LWC to eliminate storing pressurized liquid chlorine on site. Currently, the project scope includes a second phase to upgrade the coagulant feed system. A Preliminary Engineering Report has been completed by our consultant, Jordan, Jones, & Goulding Inc. (JJG), for this project. Their work provides the conceptual designs and cost estimates for both phases of the project. The total project estimate has increased substantially. The updated project cost components are: 1) On-site chlorine generation (Phase 1) - \$13.7 million; and 2) Coagulant storage and feed system upgrade (Phase 2) - \$5.3 million for a total revised project cost estimate of \$19 million.

An array of cost reduction options was considered for this project in an effort to more align the scope with available budgeted funds. The measures considered for the chlorine generation portion of the project were ultimately discounted because it was concluded that they would diminish the functionality and reliability of the project. Further discussion of the project focused on the fact that Phases 1 and 2 are operationally independent; however, construction of Phase 2 cannot begin until Phase 1 is complete. There is no compelling reason to begin design on Phase 2 until late 2008 as construction could not begin until 2010 when the chlorine containment building could be vacated. Dr. Wise moved to establish a project budget in the amount of \$13,732,000 for the on-site chlorine generation component (Phase 1) and to proceed with final design and solicitation of bids for the Phase 1 project, seconded by Ms. Harris, and the motion carried. Phase 2 will be re-prioritized. Mr. Huber noted we will be paying approximately \$2 Million more due to moving this to the south side of Frankfort. Mr. Brammell committed to provide additional information on this at the upcoming meeting.

Executive Session

The Board went into Executive Session without management present at 3:29 p.m.

There being no further business, the meeting was adjourned at 3:42 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

**BOARD OF WATER WORKS
REGULAR MEETING MINUTES
JULY 10, 2007**

Board Members Present:

Mr. Stewart Conner, Chair
Mr. Ed Crooks
Mr. Gerald Martin
Ms. Marita Willis

Not Present:

Mayor Jerry Abramson
Ms. Wendy Welsh, Vice-Chair
Ms. Margaret Harris
Mr. Rick Johnstone, Louisville/Jefferson County Metro Government

Others Present:

Mr. John Huber, President/CEO
Mr. Greg Heitzman, Senior Vice President, Operations
Mr. James Brammell, Vice President, Chief Engineer
Ms. Barbara Dickens, Vice President, General Counsel and Secretary
Ms. Susan Lehmann, Vice President, Human Resources and Organizational Effectiveness
Mr. Robert Miller, Vice President, Treasurer

The regular meeting of the Board of Water Works was held on Tuesday, July 10, 2007 at the Louisville Water Company, 550 South Third Street, Louisville, Kentucky. Chairperson Stewart Conner called the meeting to order at 12:32 p.m.

Dr. Joseph Wise Recognized for His Service to the BOWW

Mr. Conner recognized Dr. Joe Wise for his service as a Director of the Board of Water Works. Mr. Huber presented Dr. Wise with an engraved Julep Cup and everyone thanked Dr. Wise for the significant contributions he has made through his service. Dr. Wise stated he has enjoyed his tenure on the Board. He feels he has taken actions to benefit the community and feels confident his replacement, Mr. Ed Crooks, will do the same.

Mr. Ed Crooks Sworn in as a Director of the BOWW

Ms. Barbara Dickens administered the Oath of Office to Mr. Ed Crooks, recently appointed to the BOWW. Mr. Crooks' term continues through March 31, 2011. Mr. Crooks stated he is eager to serve on the Board and commented he is following in the path of someone who has made a significant difference in the building trades and construction industry.

Minutes from the Previous Meeting Reviewed and Approved

Mr. Gerald Martin moved to approve the minutes from the previous Regular Meeting held May 8, 2007, seconded by Ms. Marita Willis, and the motion carried.

Closed Session Held

Mr. Martin moved to go into closed session to discuss proposed and pending litigation and a specific proposal pursuant to KRS 61.810(1)(c) and(g), respectively, at 12:40 p.m. Ms. Willis seconded, and the motion carried.

Open Session Resumed

On the motion of Ms. Willis seconded by Mr. Martin and unanimously carried, the Board resumed open session at 1:11 p.m. No action was taken in closed session.

Chief Executive Officer Report Provided

Mr. John Huber advised the Senior Games held in Louisville from June 22, 2007 through July 7, 2007 were very successful, and the Louisville Water Company provided approximately 260,000 filled water bottles for volunteers and participants. The Executive Director of the Senior Games personally thanked the Company for its support. Mr. Huber also reported a coalition of Mayors across the country have taken a stand against bottled water due to the bottles being a burden on the environment, since only 25% are recycled usually.

Mr. Huber expressed his appreciation to the Board for allowing him to serve as the Company's President for the past 16 years. He thanked them for providing guidance and direction to him, which has helped him be successful in his role. Mr. Conner, speaking for the full Board, thanked Mr. Huber for his dedication to the Company. Mr. Conner advised, of all the many boards with which he has been affiliated over the years, there is no other executive leadership as focused and dedicated to achieving the company's strategic objectives as the Louisville Water Company's leadership team, and this is directly attributable to the quiet confidence Mr. Huber has in leading the Company.

Financial Report Provided

Mr. Robert Miller provided the report of financial results through June 2007. Operating Revenues for June of \$10,772,527 are \$296,034 or 2.8% more than budgeted and \$855,009 or 8.6% more than June 2006. YTD Operating Revenues of \$58,432,272 are \$135,482 or 0.2% less than budgeted and \$3,796,281 or 6.9% more than 2006. Operation and Maintenance Expenses for June of \$4,328,904 are \$91,713 or 2.1% less than budgeted and \$170,508 or 4.1% more than June 2006. YTD Operation and Maintenance Expenses of \$25,548,508 are \$877,343 or 3.3% less than budgeted and \$1,748,455 or 7.3% more than 2006. Net Income Before Distributions and Contributions for June of \$3,360,591 is \$447,645 or 15.4% more than budgeted and \$617,920 or 22.5% more than June 2006. YTD Net Income of \$14,997,809 is \$1,391,771 or 10.2% more than budgeted and \$1,762,889 or 13.3% more than 2006.

Mr. Miller noted \$800,000 of the \$1.39 Million in higher Net Income is attributable to moving the contingency and the interest income forward in the budget. Mr. Miller also advised we have decided to postpone refinancing of the 2000 Series Bonds due to the rise in interest rates. Mr. Martin inquired about the additional revenue in Industrial Water Sales. Mr. Miller responded this is due to a billing correction for one major industrial customer. We have worked out payment terms with the customer to collect the under billing over a two year period.

Operations Report Provided

Mr. James Brammell presented the Operations report for June. Due to dry weather conditions, the production rate in June was the highest recorded in the past twenty years. The average daily production

last month was 161.4 MGD. The system demand was consistently over 180 MGD during first half of the month. Because of high system demand, the Water Quality and Production system had to adjust its day time pumping to assure continuous water supply and operate 4 pumps at the Crescent Hill Pump Station during the day, resulting in the setting of a peak electrical demand. The total budget impact of the extra demand charge is \$140,000 for the next 12 months, of which \$81,000 will be expensed in 2007 and \$59,000 in 2008. The dry weather conditions also created low levels of taste & odor (T&O) compounds, MIB and Geosmin, in the river, which required additional treatment using powdered activated carbon (PAC) to eliminate those compounds in the finished water. Additional impacts from the high water production were higher than usual number of main breaks and a higher call volume than usual. Staffing shortages in the Call Center during this high volume have resulted in a higher than normal abandonment rate of approximately 10 percent. Staff is addressing this issue.

Chief Engineer Report Provided

Mr. Brammell provided the Engineering report for June. 2007 capital program expenditures through June totaled \$28.04 million, which is \$415.9 thousand higher than the same period in 2006. These expenditures equate to 31.53 percent of the revised 2007 capital program of \$88.93 million.

The regular quarterly meeting of the Shepherdsville Advisory Board was held on June 21, 2007 at the Company's Bullitt County office. Board members were presented with financial information on the Shepherdsville water reserve and rate differential. Board members were updated on the plan to implement monthly billing in mid-July for Shepherdsville customers. Finally, in consideration of the recent prolonged period of dry weather, the Board was provided an update on LWC's experience from a production and operations perspective. Mr. Brammell advised new members have been appointed by the Mayor of Shepherdsville and those terms began July 1, 2007. Mr. Miller commented the use of the Advisory Boards has been an excellent avenue to gain their perspective on Company initiatives affecting those constituents.

Mr. Brammell advised the Company rejected the only bid received for the project to coat and rehabilitate LWC's historic water tower because it was nearly \$400,000 higher than the established budget of \$593,240. The project will be reevaluated.

Compensation Committee Report

Mr. Conner advised, according to the authorization provided him by the Board in May, he consulted with the Compensation Committee during the May meeting's Executive Session and Mr. Heitzman's salary has been established at \$185,000. Mr. Conner reviewed the additional terms of the offer accepted by Mr. Heitzman.

Second Quarter 2007 Certification Provided for Projects Authorized and Change Actions Approved

Mr. Huber certified that the following projects and change actions were authorized in the Second Quarter of 2007 pursuant to the Capital Projects Authorization Policy and Procedures:

Project Approvals

12027 Highway 1020 CSX water main replacement, cost center 342 – Project Proposal for non-budgeted project.
CPAC-06/08/07, President-06/08/07

Approved project budget estimate =	\$ 550,911
Contribution =	<u>\$(348,016)</u>
LWC Net Cost =	\$ 202,895

BOWW approval received.

xxxxx Ridge Rd main replacement, cost center 342 – Project Proposal for non-budgeted project.
CPAC-05/11/07, President-05/11/07
Requested project budget estimate = \$ 320,000
BOWW approval required.

12022 Providence Point – Herr Ln main relocation, cost center 342 – Project Proposal for a child project funded in
the 2007 Capital Program. CPAC-05/25/07, President-05/25/07
Approved project budget estimate = \$ 123,500

11653 Shakes Run Section 1, cost center 366 – Project Proposal for project funded in the 2007 Capital Program.
CPAC-04/27/07, President-04/27/07
Approved project budget estimate = \$ 107,000
Contribution = \$ (70,000)
LWC Net Cost = \$ 37,000

10237 Access Control Upgrade, cost center 466 – Project Proposal to initiate project funded in capital program.
CPAC-04/13/07, President-04/16/07
Approved project budget estimate = \$ 139,000

Project Change Actions Approved

10608 CHFP On-Site Chlorine Generation and Coagulant Storage & Feed Upgrade, cost center 222 – Project
Change Action #5 to increase estimate. CPAC-05/04/07, President-05/07/07
Previously approved budget estimate = \$ 12,200,000
Change in project budget estimate = \$ 1,532,000
Approved project budget estimate = \$ 13,732,000
BOWW approval received.

12000 Palatka at Southview – 60” WEKO Seals, cost center 342 – Project Change Action #2 to increase estimate.
CPAC-05/11/07, President-05/11/07
Previously approved budget estimate = \$ 201,451
Change in project budget estimate = \$ 87,965
Requested project budget estimate = \$ 289,416
BOWW approval required.

00407 Aiken Elevated Storage Tank, cost center 222 – Project Change Action #4 to revise cash
flow. CPAC-05/04/07, President-05/07/07
Approved project budget estimate = \$2,965,000

10233 BEPWTP Clarification and Mixing Basin Complex Renovation, cost center 222 – Project
Change Action #8 to revise cash flow. CPAC-05/04/07, President-05/07/07
Approved project budget estimate = \$14,529,806

11551 690 Pressure Zone Booster Pump Station (two 690 PZ BPS), cost center 222 – Project
Change Action #2 to revise cash flow. CPAC-05/04/07, President-05/07/07
Approved project budget estimate = \$3,000,000

11554 Cross Country Header Booster Pump Station, cost center 222 – Project Change Action #1 to revise cash
flow. CPAC-05/04/07, President-05/07/07
Approved project budget estimate = \$1,200,000

99402 Phase II Riverbank Filtration, cost center 268 – Project Change Action #14 to revise cash flow. CPAC-
06/01/07, President-06/04/07
Approved project budget estimate = \$47,168,300

98665 Westport Rd – Herr Ln to Hurstbourne Pkwy, cost center 342 – Project Change Action #3 to increase
estimate (cumulative increase \$104,000). CPAC-06/01/07, President-06/04/07
Previously approved budget estimate = \$ 680,000
Change in project budget estimate = \$ 19,000
Approved project budget estimate = \$ 699,000

Sole Source Purchase	Portable Automatic Hydrant Flushing Device Riehl Systems, Co.	\$24,540

Report Provided Regarding Increased Costs Due to the Relocation of the On-Site Chlorine Generation Building.

Mr. Brammell provided additional information regarding the increased cost for locating the On-Site Chlorine Generation Building on the South side of Frankfort Avenue, which will result in their being two buildings, one new building and one renovated building. Two separate projects will now be executed to complete the intent of the original project, extending the construction schedule by nine months more. This additional time is required because construction on the coagulant system will not be possible until after the new on-site chlorine generation system is functional. The estimated additional costs are: \$300,000 for scope additions including additional fencing, sidewalk replacement, and a contingency for crossing Reservoir Avenue with a new chemical trench, and improvements to the new coagulant

unloading area; \$200,000 for additional piping; \$600, 000 for contractor mobilization on two contracts rather than one; \$400,000 for engineering design, bidding and construction administration for two separate projects; \$300,000 for a longer period of resident observation; and \$300,000 additional for contingency and LWC project management. Mr. Conner stated he had was unaware the premium for moving the building to the South Side of Frankfort, as a compromise with the neighborhood group, was going to be as high as \$2 Million. While it may be the best solution, it is a substantial cost to bear.

Johnsontown Road Main relocation project Authorized

Mr. Brammell advised a project to replace the water mains in Johnsontown Road between Mahoney Drive and Terry Road was included in the 2002-2003 Main Replacement and Rehabilitation Program presented to the Board as a 2004 Alternate project, but was not constructed until Metro Government elected to widen Johnsontown Road in the area covering this main replacement project. Once Metro's project was known, LWC's Capital Projects Authorization Committee and President Huber approved the project in October 2005 with a total project cost estimated to be \$831,000 but only a net cost to LWC of \$327,000. The approval document noted that "BOWW approval is not required". Subsequent review of the project approval process as required by the Capital Projects Authorization Procedure in place at the time indicates that this project should have been approved by the Board. This project includes the relocation of 5,045 feet of 16, 8, and 6-inch ductile iron water main and the removal of 2,270 feet of 6-inch asbestos cement water main. A large part of the 16-inch main installation is upsizing of the existing 6 and 8-inch water mains in order to complete a 16-inch grid-tie. Two fire hydrants were added on adjacent streets to comply with spacing requirements as stipulated by ordinance. The budget has been adjusted because the original Project Proposal included non-cash contributed capital costs. The total project costs are currently estimated to be \$478,120 with an anticipated net cost to LWC of \$284,820. An agreement is currently being negotiated. Mr. Martin moved to proceed to completion with the Johnsontown Road Water Main Relocation Project in the amount of \$478,120, seconded by Ms. Willis, and the motion carried.

Apportionment Warrants Issued Pursuant to KRS 96.265: Holsclaw Hill, End of Existing Water Main to South 1,000 Feet

Mr. Brammell reported the water main extension project for Holsclaw Hill Road: End of Existing Water Main to South 1,000 feet has been completed as approved on October 8, 2002 by the BOWW and on November 12, 2002 by Fiscal Court in Ordinance No. 30, Series 2002. Company employees constructed the main extension. Per KRS 96.265, the BOWW must issue Apportionment Warrants against the three benefiting properties in accordance with the equal assessment method in an amount not to exceed \$5,450.00 for each lot or tract abutting the main that are not currently served.

Ms. Willis moved to adopt the following resolution for the issuance of Apportionment Warrants and liens against 3 benefited properties along Holsclaw Hill: End of Existing Water Main to South 1,000 feet in accordance with KRS. 96.265. Mr. Martin seconded, and the motion carried.

RESOLVED, the Board of Water Works, pursuant to Section 96.265 of the Kentucky Revised Statutes, by these presents directs issuance of apportionment warrants to provide indemnity to the Louisville Water Company for a portion of the cost of Holsclaw Hill: End of Existing Water Main to South 1,000 feet main extension project authorized by Ordinance No. 30, Series 2002 of the Jefferson Fiscal Court, adopted on November 12, 2002 such warrants to be against three (3) benefited properties identified by present ownership and official records set forth on Exhibit A, attached, each apportionment warrant to be in the principal sum of \$5,450.00 and to permit monthly installment payments thereon bearing interest at the rate of 8% per annum on the unpaid balance payable on a timely basis over a period of 240 months, the President and/or the Secretary of the

Board of Water Works being authorized to execute each apportionment warrant with the Secretary being directed to file in the office of the Jefferson County Clerk a Notice of Lien with respect thereto.

Authorizations Amended to Reflect Change in Presidency Effective August 1, 2007

Ms. Dickens advised many situations requiring approval by the Company President simply require the "President" to sign the official documentation related to the particular transaction. However, in some cases, such as with bank accounts, the authorization is held not by the position of President, but specifically by John L. Huber. In those cases, the Board must specifically withdraw authority from Mr. Huber and grant authority to Gregory C. Heitzman to sign official documentation once he assumes the role of President on August 1, 2007. Ms. Willis moved to withdraw authority from John L. Huber and grant authority to Gregory C. Heitzman to provide any and all required authorizations as President of the Louisville Water Company, including bank account transactions, effective August 1, 2007. Mr. Martin seconded, and the motion carried.

Executive Session

The Board went into Executive Session without staff present at 2:08 p.m. The Board returned to open session at 2:13 p.m. No action was taken during Executive Session.

There being no further business, the meeting was adjourned at 2:13 p.m.

Respectfully submitted,

Barbara K. Dickens
Vice President, General Counsel and Corporate Secretary

Update on Local Weather and Main Breaks

Scott Potter and Eric Ayers

Discussion: Eric and Scott reviewed the status of main breaks from December 20, 2000 forward. A summary of the main break activity is attached to these minutes. There were 218 main breaks in December, 2000. One hundred and fifty four (154) of the breaks occurred on or after December 20th. Crews have worked without accidents or injury during this period. Crews will remain on the escalated break schedule until further notice.

Mr. Huber cautioned that we should review holiday schedules in the future to make sure that large numbers of individuals are not scheduled off in the future. In order to respond to the break situation during the December Holiday period, given the vacation schedule, the company was required to pay significant overtime. Mr. Huber also asked Eric and Scott to forward overtime cost figures and other costs for the December main breaks to ELT for its information

HR Problem Solving - Salaried Employee Turnover O/C:
Shared Information and feedback to HR Team

Bob Miller

Discussion: Bob Miller lead ELT in a continued discussion regarding turnover among salaried employees. Bob's handout is attached to the minutes. The proposed best solutions are identified at step 5.

The group determined that it supported extension of incentive pay to BSO's. ELT agreed to look at designing a BSO incentive pay program for review by the Board Compensation Committee. In addition, the group agreed to consider a redesign of the corporate incentive award. ELT also asked the BSO of HR to define the pay equity issues which may be the basis of a counter offer at resignation. When approved, this will be an additional item added to the BSO of HR's empowerment list.

The group also stated its support of mentoring programs as outlined in the Affirmative Action Plan. ELT will work with Beverly Irons in order to review employee attitude and perception survey data with a view towards addressing the quality of work life issues it raises.

Agenda Topics

9:00-9:10 AM Review Minutes and Agenda O/C Approve Minutes and Agenda Greg Heitzman

Discussion: Minuted from the 12-18-2000 meeting were approved as submitted. The minuted from the 01-02-2001 meeting were discussed. It was noted that the item on the HR problem solving team had no action items included. This topic will be scheduled for the January 22, 2001 meeting, for closure. Communication of ELT deliberations to the team was also discussed.

Conclusions:

Minutes from both meeting were approved.

Action items:

HR issues will be addressed at the Jan 22 2001 meeting.

Person responsible:

Deadline:

9:10-10:30 AM NLP II Update and Partnership Council reflections on NLP II Kathy Getsinger
O/C: Shared Information

Discussion: Kathy provided a summary of outcomes for the Partnership with Employees originating from the existing documents. The plan will include an item for the PC to review and provide feedback to ELT on the HREI, the Attitude and Perception Survey, and Qualserve. The PC also noted that there needs to be more effective communication on our company health benefits (and other benefits) to help shape realistic perceptions of what LWC benefits are. The PC also suggested that ELT set realistic goals for corporate achievement. The WQ goals are seldom achieved and appear unachievable.

The team discussed the Partnership with Local 1683. Kathy will work with Katie Farrow with Karla and Bille cross-checking for items under this topic.

The topic of company facilitators was discussed. The 2001 topic will focus on reviewing the facilitator program.

Conclusions:

Action items:

Person responsible:

Deadline:

<p>10:45-11:00 AM</p> <p>Discussion: Greg will discuss cold weather data and cost implications. Leaks on the 60 inch main will also be discussed. Steve (Jim Smith) will provide justification for the emergency contract for rebuilding the flocculator equipment in the South Coag basins.</p> <p>Cost of health insurance costs will be increase by 17%, and we will be switching back to Humana. Anthem's increase would have been 40%.</p> <p>Conclusions:</p> <p>Action items: none</p>	<p>Board Issues</p>	<p>John Huber</p> <p>Person responsible:</p> <p>Deadline:</p>
<p>11:00-11:30 AM</p> <p>Discussion:</p> <p>Sue presented available data on sales for 2000. Estimated sales are 39.8 billion gallons, with wholesale water sales continuing to grow (good year!).</p> <p>Conclusions:</p> <p>Action items:</p>	<p>Greenbacks Report</p>	<p>Richard Royce</p> <p>Person responsible:</p> <p>Deadline:</p>
<p>11:30-11:45 AM</p> <p>Discussion: Bo distributed a summary of the existing and proposed regulations. ELT advised Bo to compile a list of comments focusing 1. Emphasizing the need to focus on monitoring that best suits the needs of public health; 2) On restricting our responsibility in the distribution system to those areas where we have ownership and control, and 3) .</p> <p>Conclusions:</p> <p>Action items:</p> <p>Bo will draft and distribute comments to ELT</p>	<p>KDOW Regulatory Update O/C: Shared Information</p>	<p>Bo Williams</p> <p>Person responsible:</p> <p>Deadline:</p> <p>Bo Williams</p> <p>mid-Jan.</p>

11:45-12:00 PM

Wrap Up (TBO Report and Agenda Preparation)

Greg Heitzman

Discussion: Bob noted that ELT needs to plan for communication of items regarding the HR problem solving team. Strong and healthy discussions were held regarding employee perceptions of benefits. The NLP discussions wandered at times with regards to the who was leading the discussion...we need to be clearer on these types of discussions when we have staff participating in working-level activities. We did not meet our goal of finishing our NLP update for 2001. We had meaningful discussion on product quality and regulatory issues.

AGENDA JANUARY 16, 2001

9:00 Agenda review and meeting approval

9:15 NLP update. OC: complete review

10:30 Break

10:45 Marie Combs will do the Team Effectiveness Assessment OC: complete assessment, share info.

11:15 Open time

11:45 Meeting Housekeeping

1/16/01
9:00 AM to 12:00 PM
Board Room

Leader: Greg Heitzman
Facilitator: None
Recorder: Laura Douglas
Timekeeper: Bob Miller

Attendees: Laura Douglas, Greg Heitzman, Bob Miller, Marie Combs, Kathy Getsinger, Beverly Irons, Karla Teasley

Please bring: Agenda

Agenda Topics

9:00-9:15 AM Review Minutes and Agenda O/C Approve Minutes and Agenda Greg Heitzman

Discussion: The team started the meeting by reviewing and accepting the agenda and the rolls for the meeting.

Minutes from the January 8, 2001 meeting were approved with the following corrections:

1. The January 8, 2001 minutes were taken by Steve Hubbs rather than Laura Douglas
2. Laura Douglas, Bill Meeks, and Richard Royce did not attend the January 8, 2001 meeting. Sue Purdy, Nancy Jenkins, Dwayne Clark and Bo Williams should be added as attendees.
3. Under the KDOW Regulatory update add "The impact of the proposed regulations on consecutive systems." as item 3. Also add: "Greg indicated that Infrastructure will work with Legal to do a comprehensive review of all former KTWD contracts."

Conclusions:

Action items:	Person responsible:	Deadline:

9:15-10:30 AM NLPII Update O/C: Complete Review Kathy Getsinger

Discussion: The first agenda item was a review of the NLPII led by Kathy Getsinger. As a result of the team's review of the section in the NLP regarding Partnership with Employees, ELT decided to ask the Decisions Partners Team to review the goal for Union participation on teams with the intention of establishing a long term goal (ie: 2004 goal for Union participation on teams).

Conclusions: The notes and modifications taken will be captured by Kathy and recorded on the NLPII update form

Action items:	Person responsible:	Deadline:
create the NLPII update form	Kathy Getsinger	

10:30-10:45 AM Break

10:45-11:15 AM Discussion: Following the correction of the minutes, the team returned to a review of the NLPPII. Conclusions:	Team Effectiveness Survey Assessment O/C: Complete Assessment, Share Information	Marie Combs
11:15-11:45 AM Discussion: Marie Combs did the Team Effectiveness Assessment Review. Her report, including recommendations, is attached to these minutes. Marie suggested that ELT do a review of ELT's charter after the new VP joins the team. It was also suggested that Greg discuss the Charter with John prior to the time ELT discusses this item. ELT's discussion will include updating the list of team members and leadership. Marie also reviewed quality tools which could help the team resolve negative conflict. One tool was the "Force Field Diagram". The other tool was the "Criteria Rating Form." The team agreed to integrate the use of quality conflict resolution and problem solving tools more effectively at future meetings. The leader's role will be to remind the team of this affirmation and focus the team on use of the two tools introduced by Marie as conflict arises. Each team member was also encouraged to remind the team to use these tools when that team member believes use of the tools would be helpful. Conclusions:	Team Effectiveness Assessment Review	Marie Combs Action items: _____ Person responsible: _____ Deadline: _____
11:45-12:00 PM Discussion: Bob did the TKO report. His comments were as follows: Timekeeper/Observer Notes 1/16/2001-01-16 +* Greg (Leader) used observation from last week (regarding role of discussion leader during work at table) to modify handling of update of Next Level Plan Expectations. Quite effective discussion, appears to be complete. *Marie Combs brought data, analysis, and recommendations. *Team was self-regulated on time Conclusions: Recommendations for Consideration : 1. Should we move to more direct communication regarding ELT performance? 2. How can we understand goals when there are no written goals?	Wrap Up (TKO Report and Agenda Preparation)	Greg Heitzman Action items: Greg prepared the Agenda for the team for Jan 22 meeting Person responsible: Greg Heitzman Deadline:

ELT Meeting Agenda

Minutes

1/22/01
9:00 AM to 12:00 PM
Board Room

Leader: Greg Heitzman
Facilitator: None
Recorder: Laura Douglas
Timekeeper: Bob Miller
Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Mike Sturgeon
Please bring: Agenda

Agenda Topics

9:00-9:15 AM Review Minutes and Agenda O/C Approve Minutes and Agenda Greg Heitzman

Discussion: ELT offered additional corrections to the January 8, 2001 minutes. The corrections are: Add under KDOW regulations: Infrastructure will work with legal to review all wholesale contracts. The intent is to determine how LWC might protect itself under the contemplated revisions to the State Water Quality Regulating. Also, Bo will work with the state in order to limit to notice requirements to customers actually impacted rather than providing notice to all LWC customers

9:15-9:45 AM HR Problem solving model on Drafter/Surveyor/Engineer Bob Miller and Mike Sturgeon
O/C Complete step 5 of PSM

Discussion: **Drafter** – Mike Sturgeon lead ELT with a discussion of this item. Movement of the Drafter 1 position from grade 4 – grade 5 would not involve a change in pay for the current employees in the drafter 1 positions. Mike also talked about a partnership between LWC and KY Tech to identify candidates for a proposed Drafter Apprentice long term contract. At the end of year 1 of the contract, a review will be done to determine if the contract would be renewed for 1 year. A 1 year renewal would involve tuition reimbursement. They would be considered for Drafter 1 vacancies as they come open. This would not preclude consideration of other candidates not associated with the apprentice program.

Land Surveyor – Mike asked that the Land Surveyor job be moved from a grade 8 to a grade 9. While job evaluation data shows that the Surveyor job is appropriate at grade 9, LWC has had difficulty filling the job. Mike requested that we raise the grade of the job to lessen the degree requirement (degree or comparable experience; a degree is “preferred”) and require licensing.

Engineer: Salary offers for engineers are going up regionally. Mike suggested that HR should look at a control point adjustment in order to attract engineers. Perhaps HR should collect data on salaries for coop and entry level engineers locally to determine how competitive LWC is. Additional information will be provided to ELT in the future

Action items: Bob Miller asked that we amend the employment status policy to include the Drafter 1 from : grade 4 – 5 and develop a partnership with JCC, KY Tech and other public institutions to identify candidates. (One of the features of the internship would involve tuition reimbursement during the 2nd year of the contract.

ELT adopted Mike’s proposal. If HR is unsuccessful at filling the job, then the job will be discussed by ELT before any control point change is made.

9:45-10:15 AM	HR Problem solving model on Grade 3 Clerical Employees O/C Complete step 5 of PSM	Bob Miller and Mike Sturgeon
<p>Discussion: Mike lead ELT in a discussion of the status of Customer Service clerks. Mike suggested that the following activities, currently underway, be continued: Redesign job through job enrichment; allow use short term contract employees and advance hire; consider variable work week. The team adopted these steps then discussed future actions regarding customer service Clerks. Karla suggested the development of a specific career path for customer service clerk. Could there be several levels for customer service clerks: traing of others; dealing with difficult customers and those wanting additional information</p> <p>Action items: The team asked Karla to work with HR on the development of a career path for customer service positions. This would involve automatic career promotions with the personal development of certain competencies. Karla and HR in consultation with John will develop the career path description and advise ELT at subsequent meeting regarding compensation. Karla believes that there is still an issue regarding compensation for customer service clerks. There is, according to Karla, a compensation issue beyond the retention bonus. Karla was asked to come back with a recommendation regarding salary for customer service clerks after working with HR. The team also cautioned that the above described process must be done consistent with the job upgrade process.</p>		
10:15-10:25 AM	Break	
10:30-11:00 AM	HR Problem solving model on Salaried Employees O/C Complete step 5 of PSM	Bob Miller and Mike Sturgeon
<p>Discussion: Turnover of Salaries Employees: ELT agreed to re-consider the issue of changes in salary employee compensation during the budget cycle for 2002 (in summer 2001).</p> <p>Conclusions: Consider this issue during 2002 budget deliberations</p>		
11:00-11:30 AM	2001 Metro United Way/Funds for the Arts Campaign O/C Select loaned Executive and Leadership Chair	John Huber
<p>Discussion: Barbara presented a schedule for volunteers to fill positions for 2001 through 2004. She discussed the Water-For-People campaign for 2001.</p> <p>Action items: Bob will determine if payroll deduction for Water-For-People can be handled by the Cendan pay system, and if so, the option will be provided to employees in 2001.</p>		
11:40-12:00 PM	TKO Report/Agenda Prep	Greg Heitzman
<p>Discussion: Agenda for Jan 29, 2001-01-2</p> <ol style="list-style-type: none"> 1. Salaried Uniform Team – 30 min O/C act on recommendation of team 2. Call Center Compensation – 30 min O/C Act on recommendation 3. Discussion on Cardinal Hill 60” – 30 min O/C Act on recommendations 4. Open time – balance of time <p>Timekeeper/Observor Comments</p> <ol style="list-style-type: none"> 1. Level of discussion went into significantly more detail today, taking additional time 2. Reminder that problem solving model is a cycle that works through step 8 then back to step1 Example: if Land Surveyor job remains nonfilled, as determined through step 8, then consider control point changes 3. Reminder to call for consensus when a recommendation is made 		

**MINUTES
SPECIAL ELT MEEING
January 23, 2001**

Attendance: Karla Teasley, Greg Heitzman, Laura Douglas, Beverly Irons, John Huber

Diversity Goals(Beverly's Presentation regarding AA Goals)

The outcome of the discussion was understanding of the proposal and acceptance of the Computations proposal. ELT indicated that it was concerned about the following issues:

- WPPM scale (0-5); weighting and average of scores
- how does the content of the applicant pool impact the hiring activity
- how are mentoring efforts recognized; should we have equal weighting for all categories
- what impact does the absence of a hiring opportunity have on goal achievement
- should we look at different weighting for MBE, WBE, and HBE performance
- On the culture composite score, now will the President's Office and the new HR core be measured
- Why is AA hiring goal a company wide rather than a core goal
- Should we use a few target questions from the HREI, Team Based Assessment and System Self Assessment rather than using the entire survey

Discussion of concerns

1. WPPM scale will be 1-5, not 0-5
2. Rather than averaging the women and minority hire rate together to get the score for each EEO category hire, we will show a separate score for the eight categories. We will weigh each one equally and average all eight scores to get the WPPM rating.
3. ELT decided to keep the AA hiring goals as company wide goals rather than core goals.
4. HR will now collect data regarding the make-up of each applicant pool. ELT decided that HR will be instructed to develop a process aimed at expanding recruitment efforts to make sure we have a diverse applicant pool. The process will be documented.

Due to time constraints, ELT stopped its discussion and then focussed on the establishment of President and Vice President shared goals for 2001. The team looked at the 2000 goals and determined which ones should be carried forward as 2001 goals.

President and Vice President shared goals for 2001

<u>Goal A</u>	Not needed as a goal for 2001
<u>Goal B</u>	The team voted to keep this goal for 2001. The 1-5 levels of achievement will be modified based on 2001 performance
<u>Goal C – Increased Water Sales</u>	The team decided that it would continue with this goal including the percentages listed
<u>Goal D – Reduce overtime</u>	This goal will be retained in some form. The company goal for 2001 should be 8%. Greg and Karla will provide the team with additional information regarding the score for each level. In addition, Karla and Greg will also come back to the team with recommendations on whether this should remain a <i>shared</i> or individual goal
<u>Goal E - Program for Advanced Treatment</u>	This goal will be retained. Steve will return to the team with specific wording and descriptions for levels of achievement
<u>Goal F – Process Improvements</u>	The team decided to retain this goal. Measurement of goal attainment could include certification progress, process improvement and risk management
<u>Goal G – Cost of Risk</u>	We should retain this goal. However, the team is anticipating feedback from Don McKay regarding the measures. Based on Don’s input, Bob will recommend a team goal. (A history of costs will be provided. Affirmative Action will also count for 8% of the President’s and Vice President’s shared goals.

Observer’s Report

ELT might later consider role of working on a process vs. in a process

Vigorous attention to each other’s concerns by logging and reviewing issues raised. (An improvement by responding to concerns raised in a previous meeting

ELT might later consider review of consequence of deferred agenda items

ELT Meeting Minutes

1/29/01
9:00 AM to 12:00 PM
Board Room

Leader: Greg Heitzman

Facilitator: None

Recorder: Laura Douglas

Timekeeper: Bob Miller

Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Beverly Irons, Nancy Jenkins, Eric Ayers and Greg Armenta

Please bring: Agenda

Agenda Topics

9:00 – 9:15 AM Review Minutes and Agenda O/C Approve Minutes and Agenda Greg Heitzman

Discussion: The minutes were amended modifying the last sentence in the 9:45 – 10:15 a.m. discussions to state: “The team also cautioned that the above described process, including the Team recommendations concerning the Drafter, Land Surveyor positions and the career path descriptions for Serving Customers must be done consistent with the job upgrade process. Previously, reference to Serving Customers was not included in the last sentence.

Action items:	Person responsible:	Deadline:
9:15 – 10:15 AM*	Continue Diversity Goal Review O/C Complete Goal and Accept	Beverly Irons/ Greg Heitzman

Discussion: *The team modified the agenda to add an update on the Cardinal Hill matter and a discussion regarding refinancing the Series 2000 Bond issue.

Cardinal Hill: LWC has experienced three significant leaks in the Cardinal Hill line. There is also a problem with a valve. It is estimated that the cost to repair the line is \$150,000.00. One hundred thousand dollars of the cost is capital expense. The team has been in touch with MSD in order to plan the release of water associated with the repair.

Discussion:
(cont.)

Bond Refinancing: Interest rates have now started to go down. It is now an attractive option to refinance the Series 2000 bonds. There is a significant scarcity of municipal bonds of the type that LWC issues. Therefore, the market is very interested in such bonds. It is anticipated that LWC will make a gross interest savings of 5M and a net present value savings of 3M if LWC proceeds with the refinancing. It is anticipated that the refinancing will take place around April 4.

Hiring: The team discussed whether diversity performance for the company should include mentoring efforts. Beverly cautioned that the company's performance should be measured in terms of hiring. Should hiring in areas that are more underutilized than others be weighted more heavily when determining the company's performance. ELT agreed that weighting would be equal across the board. MBE/WBE/HBE
Spending: The team discussed whether it should apportion the spending goal differently among M's, W's and H's. The team decided that 50% of the goal would focus on M's, 40% would focus on W's, and 10% would focus on minorities.

Culture:

For purposes of determining the company's culture goal, the average scores of the five scores would be used. The scores from the President's office would not be used. For purposes of determining diversity performance for those in the President's office, it may be necessary to use the HREI score only. In any event, those in the President's office will need to review this item. A scale of 1-5 will be used. A five will be the top score ever achieved for the item measured. However, if the survey score is less than three, you cannot receive higher than a three on the WPPM rating.

The WPPM purposes:

Meeting the goal will be a 3. Five % above the goal will be a 4. Ten % above the goal will be a 5. The same would be true on a descending scale. For purposes of measuring the accomplishment of spending goals, the goals will be reported as the five scores and administration. Administration will include the President's office, Audit and Legal.

10:15 - 10:30 AM

Break 10 Minutes

10:30 - 11:00 AM

Review/Update BIN List O/C Revised/prioritized
BIN List

Greg Heitzman

Discussion:

This item was dropped from the agenda in order to add the Cardinal Hill update and the bond refinancing

Conclusions:

Action items:	Person responsible	Deadline:
11:00 - 11:40 AM	Salaried Uniform Team O/C Accept Recommendations of Team: Partnership Council	Nancy Jenkins
Discussion:	<p>The cross functional team which reviewed the possibility of uniforms for salaried employees reported: A copy of the team's proposal is attached. Karla suggested on behalf of the sub team that the partnership council be asked to assess the reaction of those who would and would not be required to wear uniforms. In addition, bench marking information will be obtained from LG&E and MSD regarding the operation of their uniform policy. Karla noted that the budget does not currently cover the year cost of the uniforms. The impact cores would cover their share of the \$20K cost. (The team also understands that Eric Ayers area would be responsible for the process.) The subteam will return later to wrap up this item.</p>	
11:40 - 12:00 PM	TKO Report/Agenda Prep	Greg Heitzman
Discussion:	<p>Bill and Bob <u>both</u> had input on the TKO report.</p> <p>Timekeeper/Observer Notes</p> <ol style="list-style-type: none"> 1) Status report needed for 2) JLH would communicate the importance of Job Evaluation team meeting to team participants 3) Copy of flowchart and process information team will be sent from Mike Sturgeon to ELT. 4) Further review by ELT of job evaluation process is anticipated. 	

**Executive Leadership Team Meeting Minutes
February 5, 2001**

Attendees: Greg Heitzman (Leader), Bob Miller (Recorder), Bill Meeks (Timekeeper/Observer), Jim Wehrle, Steve Hubbs, Scott Potter (for Karla Teasley), J.P. Davis, Laura Douglas, Beverly Irons, Mike Sturgeon

Absent: John Huber, Karla Teasley

Minority Business Development Team Report

J.P. Davis distributed a handout for:

- * 2000 Spending Goal Review
2001 MBD Team Makeup (Beverly Irons will cover new core, Bob Miller will appoint a BSO representative, Scott Potter will verify Barbara Crow's availability, and Steve Hubbs will appoint a BSO and another representative).
- * Summarization of 2000 Action Plan (appreciation noted to Rose Lewis for significant improvement to spending reports; follow-up needed for evaluated bids based on project managers input).
- * 2001 Spending Goals (there was extensive discussion of the methodology for establishing the 2001 Spending Goals and the amount of resources assigned to support the team. The ELT agreed to approve additional spending of \$3,000 for a half page ad for the KMSDC Awards Dinner).
- * The Recommended Action Plan for 2001 was approved as submitted.
- * Development of the 2001 MBD Spending Goals need additional data work to break out:
 - Human Resources and Quality Core from SBR CBS.
 - Corporate Administration from SBR CBS.
 - Production & Delivery Engineering from Infrastructure Core.The MBD Team will perform this work. The ELT agreed to accept the recommended Corporate Goal for M/W/H spending for 2001. The MBD Team will adjust the spread among Cores as appropriate. The ELT will review the 5/4/3/2/1 goal at a later meeting.

Review Minutes

The minutes for 1-23-01 were reviewed and approved. The minutes for 1-29-01 were reviewed, with corrections noted on page in the Culture section. Laura Douglas will update the minutes before distributing.

Job Evaluation Team Charter

Greg Heitzman distributed a copy of the charter provided by Ellen Mackin. The ELT focussed on the boundaries. Mike Sturgeon distributed a copy of the flowchart of Evaluating Initial Grade Placement on Re-Evaluating Job Grades. The ELT discussed the flowchart extensively, especially how to review cases where "market data" is inconsistent with "CBSO needs". The ELT agreed to request that Jim Wehrle and Mike Sturgeon will review the process described on the charter and flowchart to return with recommendations to ELT.

The ELT consensus on moving forward with the Drafter and Surveyor jobs was withdrawn. Those jobs will be discussed with Mike Sturgeon, Jim Wehrle and John Huber. Also, the review works by Karla Teasley may need to be delayed pending outcome of the previously identified discussion.

The ELT acknowledged that there will be adverse consequences in expected progress in the Capital Program and KT2 mapping.

Executive Leadership Team Special Meeting
Minutes February 6, 2001

Attendees: Greg Heitzman (Leader), Bob Miller (Recorder), Jim Wehrle (Timekeeper/Observer),
Laura Douglas, Steve Hubbs, Beverly Irons, Mike Sturgeon, Nora Freeman, Bill Meeks

Absent: John Huber, Karla Teasley

Review Diversity Goal Elements

Beverly Irons distributed a folder of handouts. ELT reviewed "ELT Consensus Decisions Re: Diversity Goals for WPPM":

- Definition of "managers" in item #1 will be discussed later in the meeting.
- Under item #2 bullet #1, change recruitment to hiring.
- Under item #2 bullet #2, add reference to handicapped-owned businesses.
- Under item #2 bullet #3, add reference "as measured by elements of Team Based Ammenment. HRE1 Survey, and System Self Accessment"
- Under item #4, add reference "if no opportunity exists for placement in a category then omit when averaging."
- Under item #10, five areas will be tracked, combining Human Resources/Organization Effectiveness and Corporate Administration.
- Under item #11, add reference "on a monthly basis."
- Under "outreach triggers", the definition of occasions for recruitment and hiring outside the service area will be developed by Jim Wehrle and Mike Sturgeon.
- Also, third bullet will be deleted and replaced with "will track data history where applicant pool does not meet availability."

Weighting of WPP Diversity Goal

The ELT agreed to apply the 20% weighting equally across AA, MBD, and Culture.

Application of Goals

The ELT considered if the Diversity should be split between WPPM and Executive Incentive. Greg Heitzman recommended that for VP's and BSO's.

If BSO Incentive Plan is adopted:

Portions of 40% WPPM at 13% for MBD and Culture components and 2% of Incentive Award.

If a BSO Incentive Plan is not adopted:

Portion of 40% WPPM at 13% for MBD and Culture components and 7% of VP shared goals.

Also, he recommended that if the BSO incentive is adopted, then the Process Owner portion should be changed from hiring results to mentoring efforts.

The ELT agreed with these two options.

The ELT noted that these discussions are quite complex but these actions are needed to move forward on a timely basis.

Definitation of Management. The ELT agreed to a definition of management to be:

- VP's
- CBSO's
- BSO's
- PO's
- Director of Divesity
- Manager of Corporate Measures
- Program Managers

The ELT requested that John Huber determine the "management" status of Internal Audit.

Appreciation: The ELT noted with appreciation the work and contributions of Beverly Irons on the Diversity Goal.

Reviw of President/Vice President Shared Goals for 2001.

Item B – Change computations to use the Revised Capital Budget amount as the denominator (as shown in columns I and J on the 1990-2000 Capital Improvement Program Status.)

Item D – The overtime goals for 2001 as shown on the 2000 overtime goals were adopted.

ELT Meeting Minutes
2/12/01

Attendees: Greg Heitzman (Leader), Billy Meeks, Laura Douglas, Jim Wehrle, Steve Hubbs, Karla Teasley (TKO), Tony Gregory for Bob Miller (Recorder), Nora Freeman (Facilitator).

Agenda Topics

1. Review minutes and agenda: Previous minutes were not available for review. Green backs report was moved to February 19th when full compliment of financials will be available for review. An agenda topic to review Board agenda for the Feb 13 meeting was added and discussed following the break.

2. Partnership Council Update:

Partnership Council provided an update of several issues the group is dealing with. The following two key issues were discussed:

- Emergency Loan Program for Employees – several issues were brought up regarding level of Company involvement, liability, and risk assumed by the Company for an emergency loan program for employees. The Council will be developing a proposal to bring to the ELT and will take into account the following:
 - Boundary Conditions need to be well defined
 - Company constituents provide guidance. The key constituents will include Human Resources, Payroll, and Legal.
 - Benchmarking on what other companies provide similar to this program
 - Who will own the process and be accountable for managing the process.
- ATM located in Third Street Lobby – The Council is reviewing the feasibility of providing an ATM for employee and public use in the Third Street main lobby. The following guidelines were provided to the Council:
 - Work with Facility Design, Construction and Maintenance System on physical location of the machine – inside/outside, and electrical needs.
 - Check with local banks, especially 5/3rd and Republic who provide current LWC banking services, on whether they would be willing to locate a machine in our facilities and what would be the costs associated with installation and maintaining.
 - No significant investment on behalf of the Company for the installation and ongoing maintenance of the machine.
- The Council regarding the team looking into uniforms for Company field personnel provided a brief update. The Council has received informal feedback

from several employees regarding uniforms. The Council was asked and has agreed to collect information from key groups and provide update to ELT at the March 5th meeting.

- The Partnership Council provided a copy and brief overview of their 2001 action plan. The Council requested ELT provide overview of Corporate incentive awards to the Council at an upcoming Partnership Council meeting to gain better understanding of the components and drivers for the awards. Karla Teasley and Billy Meeks volunteered to attend a future PC meeting to present and discuss the incentive awards with the group.

3. Next Level Plan II Update:

An updated NLP II Plan action plan was provided for the teams' review. The team consented to adopt the document with proposed minor changes to be made. Any additional minor changes and comments are to be sent to Kathy Getsinger by Friday, February 16th. Upon completion of the document, the information will be provided to Internal Communications for the development of a Company-wide communication regarding the plan.

4. Board Agenda for Feb. 13, 2001:

The team reviewed the Board agenda for the upcoming Feb. 13th meeting. The primary topic will focus on the Series 1992 Bond Refinancing. No significant items were brought forward for discussion.

5. 2001 VP Shared Goals & Executive Incentive Goals:

The team discussed and finalized a preliminary set of VP Shared Goals. The team deferred the Executive Incentive Goals for discussion at the February 19th and 20th meetings.

The following VP Shared Goals were adopted:

- Goal A: Implement Customer Information System

This goal will be removed. The team discussed substituting a goal for the implementation of other re-engineering projects such as AM/FM/GIS, Financials, or Work Order Management. It was determined that these projects will be more applicable to be included in 2002-2003 goals and objectives.

- Goal E: Program Plan for Advanced Treatment through Bidding of Phase II

Advanced treatment will basically stay the same as 2000 goal with the focus being on contracting for Phase II of the program. Specific measurement criteria

for 2001 will be developed and will focus on August bid timeframe and budget for Phase II of the program.

- Goal F: Enhance Effectiveness

The team agreed to keep the goal with update of the measurement criteria. System Certification measurement criteria will need to be developed. The System Certification process will need to be presented and adopted by ELT prior to finalizing measurement criteria for this goal.

- Goal G: Control Cost of Risk Management

The goal will be adopted as is with update of the measurement criteria for 2001. Team requested that trend data be used to develop the cost measurement criteria for the goal and ensure it is realistic and achievable. The team discussed whether to include implementation of risk management plans developed by the Business Systems. It was determined that implementation of these plans should be included in system operating plans and accountability for implementation will be at the operating levels.

- Diversity Component

A diversity component will be either included in the Executive Incentive goals or added as a VP Shared Goal. This item will be discussed at the special meeting scheduled for Feb 20th, 2001.

6. The meeting concluded and the following agenda was developed for the February 19th meeting.

February 19th, 2001 ELT Meeting Agenda

- 9:00 – 9:10 Review Minutes of previous meetings
Outcome: Approve minutes
- 9:10 – 10:15 System Certification Schedule and Process – Don Whitehouse
Outcome: Review and accept timeline and audit plan
- 10:15 – 10:30 Break
- 10:30 – 11:30 Green Backs Report
Outcome: Shared financial information for 2000 Year end and 2001 January
- 11:30 – 11:45 Executive Incentive Goals
Outcome: Accepted Goals
- 11:45 – 12:00 TKO/Facilitator Reports, Agenda Prep

TKO Report: 5 minute late start. Good shared information between ELT and Partnership Council. Facilitator provided clarification on outcome of NLP II update. Balanced discussion on VP shared goals and agreement on early finish.

Facilitator Report: Team doing better job with time management. Good interaction with Partnership Council to provide leadership and direction to the Council. Opportunity for improvement exists for agenda management to reduce backlog of topics.

ELT Meeting Agenda

Minutes

2/20/01
9:00 AM to 12:00 PM
Rough River Room

Leader: Greg Heitzman

Facilitator: Nora Freeman

Recorder: Steve Hubbs

Timekeeper: Karla Teasley

Attendees: Laura Douglas (9:33), Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller (9:15), Karla Teasley, Jim Wehrle, Nora Freeman

Please bring: Goals Binder

Agenda Topics

9:00-9:10 AM **Review Agenda: O/C Approve Minutes and Agenda** Greg Heitzman

Discussion: Agenda set as follows.

9:15-10:25 AM **Review of 2000 Final Results O/C: Accept Results** **Nora Freeman**

Discussion: Nora distributed the data for fourth quarter and year's final results. For the **Incentive Award**, the "lightswitch" goal was met for net income at Level 2; Level 1 CSI was met; neither WQ goals were met; minimum productivity goals were not met; and the minimum culture goal was not met. For the **Shared Goals**, the CIS goal met a level 4.0; the 2000 Capital Program goal was a 2.1; the Increase Revenue goal was 4.0; the Overtime goal was 4.3; the ATT goal was 5.0; the Increase Operational Performance goal was __; and the Control Cost of Risk goal was 2.7. This yields an overall rating of __. (3.6, 3.7 or 3.9 depending on missing goal being a 3.0, 4.0, or 5.0). The **Corporate Performance Award** was met for one of three WQ goals; the CSI goal was met at level 2; the cost control goal was not met; and one half of the Safety goal was met.

The goal for Increase Operational Performance rating will be provided by Don McKay to Nora for final compilation.

Greg and Karla will follow up to determine the amount of outsourced work for goal "D" on overtime (less than \$100,000?).

Conclusions: The **Executive Incentive Award** will be 3% based on 2000 data.

The **Shared VP Goals WPPM** rating for 2000 is computed at 3.8.

The **Corporate Performance Award** was met at the **50% award level**, resulting in a payout **\$247 per 471 employees**, or approximately \$116,000.

Action items:	Person responsible:	Deadline:
Don McKay will provide final WPPM numbers to Nora on risk plans .	Don McKay	Feb 23
Nora will finalize WPPM rating.	Nora	Feb 27
Determine amount of outsourced work (\$) in overtime goal.	Greg and Karla	Feb 23

10:25-10:40 AM **Break**

Discussion: None

10:40-11:30 AM **Review 2000 Executive Incentive Awards** **ELT**

Discussion: The Net Income goal was retained as-is. The CSI goal was raised to 815 for level 1 and 825 for level 2. The Water Quality goal was modified to reflect 5 sub-goals, each representing 0.4% of the total incentive. (Steve will provide modified wording for the goals for plant effluent water quality. The Productivity goals will be retained as is, with level 1 set at 1% below budgetted levels and level 2 set at 2% below budgetted levels. The Quality of Work Life goal was discussed regarding a Diversity element. John requested the HREI data for the past several years (Karla will provide). The discussion focused on whether the hiring element of the Diversity goal be placed in the shared VP goals, the individual VP WPPM goal, or in the Executive Incentive award.

Conclusions: Goals for all elements were finalized with the exception of the Culture/Diversity Goal.

Action items:	Person responsible:	Deadline:
Provide revised wording for Water Quality Goal	Steve	Feb 23
Provide review the historical HREI goal	Jim	Feb 26
Finalize goals and percentage weightings for VP shared goals and incentive	ELT	Feb 26

11:45-12:00 PM **Housekeeping O/C TKO observations/requests** **Greg Heitzman**

Discussion: Karla indicated that we kept on time through the break, then got behind in formulating 2001 goals. We need to allocate more time to the Monday ELT meeting for completing goals.

Conclusions: Get information to Nora by Thursday or Friday for compilation.

Action items:	Person responsible:	Deadline:
---------------	---------------------	-----------

**Executive Leadership Team
Meeting Minutes
February 26, 2001**

Attendees: Greg Heitzman (Leader), Bob Miller (Recorder), Karla Teasley (Timekeeper/Observer), John Huber, Bill Meeks, Laura Douglas, Jim Wehrle, Ralph McCord, Bret Russell, Kathy Getsinger, Nora Freeman

Minutes Reviewed: The minutes from February 19th were reviewed and approved. The minutes from February 20th were reviewed. The ELT noted that a portion of the discussion regarding the Diversity goal was not documented in the minutes. The approval of the minutes was withheld pending further review at a later time. The agenda was reviewed and revised.

Annual Inspection 2000 Followup: Bret Russell reviewed the Annual Inspection Process, noting that the consultant will be identified following the March 2001 Board Meeting. He then discussed the follow-up process for the 2000 Annual Inspection recommendations, with reference to a handout of the – “2000 Annual Inspection - RECOMMENDATIONS TRACKER” as well as accompanying statistical graphs.

Heitzman noted that there will be two occasions of follow-up at 4th quarter of each year and 2nd quarter for the following year to measure the progress.

Miller noted that ELT needs to review the integration of the monitoring activities for the Annual Inspection, as compared to the monitoring activities for Operating Plan items and WPPM items.

Huber recommended that major items in the Annual Inspection should be separated and noted as apart from the minor items (example of develop long-range plan for Zorn Pump Station versus repair overhead door at facility).

Next Level Plan II Timeline: Kathy Getsinger distributed the final copy of the Next Level Plan II timeline, with copies attached for distribution to Business System Owners.

Future Agenda Items: Greg Heitzman distributed a list for “Future Agenda Items” that was developed with Steve Hubbs from the previous “Bin List”. The ELT reviewed the list and added:

- Cost control review was added to Item #7 “Review Greenbacks Report”
- AMR Report from Kevin Grant.
- Salaried Uniform Team Report.
- Compensation and career pathing for Serving Customers.
- Team effectiveness and facilitation and review and adopt ELT Charter and Groundrules.
- System Certification follow-up alternative recommendations from Don Whitehouse.
- Quarterly review of Shared VP Goals and Executive Incentive Goals.
- EMA stage – Management Audit.

Miller noted that there was not a method in place to screen items to determine if these items were within the scope of ELT work.

Heitzman distributed a draft copy of the ELT Team Charter to be considered at a later meeting.

2001 Goals: Jim Wehrle distributed a copy of the seven-year history of the HREI.

John Huber recommended that the Objective V, on the 2001 Executive Incentive Plan Goals should be composed of two parts:

1% Employee Perceptions Survey

1% Vehicular accidents and lost time injuries (one half percent each).

The ELT extensively discussed setting the amount of the Employee Perceptions Survey result. The 2001 goal was agreed to be set at 585.

The safety goal was set identical to the employee.

Nora Freeman distributed a copy of the draft 2001 President and Vice President Shared Goals. The ELT agreed that Item A. be weighted at 8% with Items B-G weighted at 7% each for a total of 50%. The remaining Diversity Goal component will be weighted at 6% each.

Objective B. agreed "as is" pending filling-in blank. (May revise approach & change to carryover approach in the future).

C&D approved (Bill Meeks noted that a tracking method does not exist on Item D. for work performed outside of emergencies).

E. on hold for Steve Hubbs.

F. The measurements were modified as follows:

Rating Level	Certifications
5	6
4	5
3	4
2	3
1	2

G. The ELT deferred action on this item pending further discussion of the handling of claims reserves and significant claims.

John Huber noted the amount of time to further discuss the goals has drawn to a close and that he will be scheduling a meeting with the Compensation Committee of the BOWW.

Agenda for March 5, 2001

- 9:00 – 9:15 Review minutes for February 20th & 27th and agenda for March 5th.
Outcome: Accept minutes/agenda
- 9:15 – 10:00 Partnership Council Issues
Outcome: Shared information
- 10:00 – 10:30 Vehicle Use Policy
Outcome: Approve policy
- 10:30 – 10:45 Break
- 10:45 – 11:30 Budget Review of 2000 Performance
Outcome: Actions to control 2001 budget
- 11:30 – 11:45 Team Effectiveness Results
- 11:45 – 12:00 TKO/Agenda Preparation

**Executive Leadership Team
Special Meeting Minutes
February 27, 2001**

Attendees: Greg Heitzman (Leader), Bob Miller (Recorder), Karla Teasley (TKO), Bill Meeks, Laura Douglas, John Huber, Nora Freeman

2001 Corporate Performance Award

* CSI Serviced Customers		25%
Level I: 752		8.33%
Level II: 761		8.33%
Level III: 770		8.33%
* Safety		25%
Lost Time Injuries	<= 20	12.5%
Motor Vehicle Accidents	<= 30	12.5%
* Cost Control		25%
Level I: \$155.40		12.5%
Level II: \$153.85		12.5%
* Distribution Water Quality		25%
Turbidity: 99% < .5ntu		8.33%
Chlorine: 99% < .5ntu		8.33%
Bacteria: < 1% positive		8.33%

2001 Executive Incentive Plan Goals

- I. Net Income from Operating Earnings (2%)
 - Accepted as recommended for Level I & II
- II. Customer Satisfaction Index (2%)
 - Accepted as recommended for Level I & II
- III. Reduce Microbial Risks (2%)
 - A. Plant effluent turbidity for period February 1 – December 31 at both plants less than 0.1 ntu (based on on-line turbidity measurements)
 - B. Compile individual filter data for Phase IV requirements of the Partnership for SDW goal of daily max filter effluent less than 0.1 ntu 95% of time for the last quarter of 2001
 - C, D, and E accepted as recommended
- IV. O&M Cost per Customer (2%)
 - Accepted as recommended for Level I & II
- V. Replacement of HREI Goal (2%)
 - A. Safety Goals from Corporate (1%)
Performance Award
 - Vehicular accidents <= 30
 - Lost time inquiries <= 20
 - B. Employee Perceptions >= 585 (1%)

2001 President and Vice Presidents Shared Goals

- A. Build a diverse workforce that mirrors the community
 - Weighting 8%
 - Information source – Beverly Irons

(Note that the two remaining diversity goals will be on individual VP goals at 6% each)

- B. Implement 2001 Capital Improvement Program
 - Weighting 7%
 - Remove “at 100% of budget” from each rating level
 - Use alternative calculation method for denominator
- C. Increase 2001 revenue through increased water sales
 - Weighting 7%
 - No other changes
- D. Continue to reduce overtime
 - Weighting 7%
 - Karla Teasley will provide a quarterly report on work performed by contractors outside declared company emergency work
- E. Execute the Program Plan for Advanced Treatment
 - Weighting 7%
 - Steve Hubbs will provide wording
 - There will be 2 components:
 - Bidding of Phase II
 - Budget component
- F. Increase operational performance
 - Weighting 7%
 - System certification counts as follows:

Level 5	6
Level 4	5
Level 3	4
Level 2	3
Level 1	2
- G. Control the Cost of Risk
 - Weighting 7%
 - No other changes

Meeting Minutes

3/5/01
9:00 AM to 12:00 PM
Rough River Conference Room

Leader: Steve Hubbs
Facilitator: Nora Freeman
Recorder: Greg Heitzman
Timekeeper: Karla Teasley

Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bill Meeks, Tony Gregory (for Bob Miller), Karla Teasley, Jim Wehrle, Nancy Jenkins, Glen Zelch, Dwayne Clark, Scott Potter (10:00 am), Don McKay (10:00 am), John Huber (10:20 am), Kathy Getsinger (11:00 am), Richard Royse (11:00 am) Nora Freeman (at 11:30 am)

Please bring: Agenda

Agenda Topics

9:05-9:15 AM	Minutes and agenda for 2/20/01, 2/26/01 and 2/27/01 were reviewed O/C: Approve minutes and agenda	Steve Hubbs
---------------------	--	--------------------

Discussion:
The meeting minutes of 2/20/01 were reviewed. Items related to the 2001 diversity goals were deferred to the meeting of 2/27/01 to finalize the 2001 VP shared goals and executive incentive goals. Discussion issues were resolved at the meeting of 2/27/01, therefore, the 2/20/01 minutes were accepted as written. The 2/26/01 and 2/27/01 minutes are still outstanding.
Steve Hubbs would like to discuss evaluated bids for plant work if time allows. The meeting agenda was approved.

Conclusions:
Minutes of 2/20/01 approved, agenda approved.

Action items: Minutes from 2/26/01 and 2/27/01 outstanding.	Person responsible: Bob Miller (Recorder)	Deadline: 3/12/01
---	---	-----------------------------

9:15-10:00 AM	Partnership Council O/C: Shared Information	Nancy Jenkins Glen Zelch	
<p>Discussion:</p> <p>A. Emergency Loans for Employees – The Partnership Council (PC) handed out a Decision Letter to ELT for Emergency Loans for Employees. ELT members had concerns over the limitations of the loan size and the payment of the loan upon termination of employment. ELT feels the loan accountability will be with Park Federal. Therefore, the modified process will include the following steps: 1) Orientation for employees of this service and EAP services. 2) Refer to Employee Assistance Program. 3) Refer to Park Federal. 4) Review credit history. 5) LWC sets up for payroll deduction. ELT agreed that a decision letter is not necessary, as this is a minor operational change. Human Resources will coordinate the process and communication to employees.</p> <p>B. Executive Incentive Communication – The PC requested a communication regarding the Executive Incentive Goals and Corporate Performance Award. ELT agreed to attend the PC in April and communicate the status, once the BOWW approves the Executive Incentive Plan and Corporate Performance Award goals.</p> <p>C. Annual Customer Satisfaction Survey – The 2000 annual survey results were distributed. Sixty-two percent of employees responded. The average score was 4.2/6.0., up 10 percent over 1999. Comments on the survey are sorted by core.</p> <p>D. Miscellaneous – The ELT and the PC briefly discussed status on the ATM machine and partnership.</p>			
<p>Conclusions: See above</p>			
<p>Action Items: Jim Wehrle will follow up communication to BSO's on emergency loans (see above). Karla Teasley will work to get a Newsleaks communication and Bill Meeks will work on a Union communication.</p>		<p>Person responsible: Jim Wehrle, Karla Teasley, Bill Meeks</p>	<p>Deadline: 3/19/01</p>

10:00-10:45 AM	Vehicle Use Policy O/C Approve Policy		Scott Potter
<p>Discussion:</p> <p>Scott Potter distributed a proposed revision to the Vehicle Use Policy. The PC and Legal have reviewed the proposed policy changes. The changes include:</p> <p>1.1 Purpose – change from “pool” to “passenger” vehicle.</p> <p>3.2 Vehicle classifications – cleanup of Class A and B definitions to be consistent with Section 3.3.</p> <p>3.3.3 Changed to include CBSO and BSO authorization for operation of vehicles.</p> <p>3.3.6 Class A vehicles may not be used by LWC employees for travel to lunch, unless the travel is in conjunction with a business activity.</p> <p>3.3.7 Class B and C vehicles will allow reasonable personal business during course of the day. Also amend Class B definition to be consistent with Section 3.3.7.</p> <p>3.3.8 Remove Class A and Class B and C vehicles cannot be used on weekends for personal use, only use for compnay business.</p> <p>3.3.9 Class B and C vehicles, employees must leave vehicle if odd for more than three consecutive days.</p> <p>3.6.1 Driver is responsible paying any fines associated with traffic violation.</p> <p>Other miscellaneous provisions are also proposed. Scott will have changes made and the policy updated.</p>			
<p>Conclusions:</p> <p>Scott Potter will make the changes referenced above in the policy and return the policy to ELT for approval.</p>			
<p>Action items:</p> <p>Make changes and update policy.</p>		<p>Person responsible:</p> <p>Scott Potter</p>	<p>Deadline:</p> <p>3/19/01</p>
10:45-11:00 AM	Break		

11:00-11:30 AM	Budget Review of 2000 Performance O/C: Actions to Control 2001 Budget	Kathy Getsigner and Richard Royse	
<p>Discussion:</p> <p>Richard and Kathy provided a five-year summary of expenses, ROE,, O&M cost/customer. Special discussion related to materials and contract services, which were \$1.02 million over budget in 2000. In December, material and services accounts were up a total of \$647,000 over budget. These expenses related to contract support service for the high main break activity and facility locations (C2), the painting of the Crescent Hill Filter Gallery (I2), and permit payments to the City (I5), processing of legal bills in December (L0), and claims adjustments with MSD (R5). John has concerns with the continual high level of expenses during December that cause us to be over budgets. Greg suggested we review the November 2000 budget status and the final 2000 results to determine where we went over budget from Dec to mid January. John suggested we look specifically at the Materials and Supplies and Contract Services for the year to determine where we need added controls in 2001. Richard will further drill down the materials, supplies and contract services to assist in evaluating this overage. John requests a synopsis of the minutes from 2000 where we took specific action on budget controls to operate within budget. Tony suggested that BSO's provide quarterly forecasts for budgets.</p>			
<p>Conclusions:</p> <p>See above</p>			
<p>Action items:</p> <p>At the 3/19 ELTmeeting, ELT will evaluate 2000 material, supplies, and contract services, review the cost control measures that were to take place in 2000, and review the Nov. 2000 YTD results to determine where the over budget expenses were. Steve will get the information from 2000 ELT minutes as relates to cost cutting measures.</p>		<p>Person responsible:</p> <p>ELT, Ricahrd Royse, Steve Hubbs</p>	<p>Deadline:</p> <p>3/19/01</p>

12:00-12:05 AM	Evaluated Bids		Steve Hubbs
<p>Discussion:</p> <p>Steve Hubbs advised the group that the RBI tunnel project will be bid in late March, and would like to use an evaluated bid process. Greg Heitzman will advise the BOWW in his March Chief Engineer's report of the plan to use evaluated bid on RBI; Kay Ball will work with Ted Niemann on the evaluated bid process format. The evaluated bid pilot will be reported to the BOWW in April for integration into standard procurement practice.</p>			
<p>Conclusions:</p> <p>See above</p>			
<p>Action items: See above</p>		<p>Person responsible:</p> <p>Greg Heitzman, Steve Hubbs, Kay Ball, Ted Niemann</p>	<p>Deadline:</p> <p>3/12/01</p>

12:10-12:20 AM	Team Effectiveness Results	Nora Freeman																											
<p>Discussion: Nora Freeman provided a summary of the team effectiveness survey. Areas of improvement include no one dominates, not placing blame, problem solving tools, process to make decisions, fear of reprisal. Areas of decline include: understanding goals, support outside meetings, commitment to contact. Nora suggested a team contract exercise.</p>																													
<p>Conclusions: Followup with special meeting to focus on team charter and team contract.</p>																													
<p>Action items: SteveHubbs will schedule a special three-hour ELT meeting in April to review charter and team contract. John Huber, Nora Freeman, and Jim Werhle will develop an agenda for a special meeting.</p>	<p>Person responsible: Steve Hubbs, Jim Werhle, Nora Freeman, John Huber</p>	<p>Deadline: Mid April, 2001</p>																											
11:45-12:00 PM	Timekeeper/Facilitator Reports and Agenda Prep O/C: Reports and agenda for 3/12/01	Steve Hubbs																											
<p>Discussion: TKO report: The meeting started late, on time with PC, over on Vehicle Policy (extensive detailed discussion), added agenda item on evaluated bids for RBI project. The meeting ended 30 minutes over the specified time.</p> <p>ELT Agenda for March 12, 2001:</p> <table border="0" data-bbox="122 1251 1262 1640"> <tr> <td>9:00 am</td> <td>Review Minutes/Agenda</td> <td>O/C: Accept Minutes, Agenda</td> </tr> <tr> <td>9:10 am</td> <td>Salaried Uniform Policy</td> <td>O/C: Approval of Policy</td> </tr> <tr> <td>9:40 am</td> <td>Board Issues Review</td> <td>O/C: Shared Info</td> </tr> <tr> <td>9:55 am</td> <td>Diversity Goal Summary</td> <td>O/C: Shared Info on Diversity Goal Beverly Irons</td> </tr> <tr> <td>10:30 am</td> <td>Break</td> <td></td> </tr> <tr> <td>10:45 am</td> <td>Operating Plan</td> <td></td> </tr> <tr> <td></td> <td>Gap Assesment/Open Time</td> <td>O/C: Action on Gap Assessment Kathy Getsinger</td> </tr> <tr> <td>11:45 am</td> <td>TKO and Agenda Prep</td> <td>O/C: TKO Report and Agenda</td> </tr> <tr> <td>Noon</td> <td>Adjourn</td> <td></td> </tr> </table> <p>Note: Greg will not be present at 3/12/01 meeting, will send BSO. Next Meeting will be in the Board Room.</p>			9:00 am	Review Minutes/Agenda	O/C: Accept Minutes, Agenda	9:10 am	Salaried Uniform Policy	O/C: Approval of Policy	9:40 am	Board Issues Review	O/C: Shared Info	9:55 am	Diversity Goal Summary	O/C: Shared Info on Diversity Goal Beverly Irons	10:30 am	Break		10:45 am	Operating Plan			Gap Assesment/Open Time	O/C: Action on Gap Assessment Kathy Getsinger	11:45 am	TKO and Agenda Prep	O/C: TKO Report and Agenda	Noon	Adjourn

Meeting Minutes

3/12/01
9:00 AM to 12:00 PM
Board Room

Leader:	Steve Hubbs	
Facilitator:	Nora Freeman	
Recorder:	Susan Camp for Greg Heitzman	
Timekeeper:	Karla Teasley	
Attendees:	Laura Douglas, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, John Huber, Susan Camp for Greg Heitzman, Eric Ayers, Nancy Jenkins, Roger LeMaster, Don Whitehouse, Beverly Irons	
Please bring:	Agenda	
	Agenda Topics	
9:05-9:15 AM	Minutes and agenda for 3/5/01 were reviewed O/C: Approve minutes and agenda	Steve Hubbs
Discussion: The meeting minutes of 3/5/01 were reviewed and accepted as written. The 2/26/01 and 2/27/01 minutes are still outstanding. Changes to the agenda were as follows: Gap Assessment deferred to future agenda; Jim Wehrle would like to discuss computer software training if time allows; and Don Whitehouse added to agenda to discuss COSO. The meeting agenda was approved.		
Conclusions: Minutes of 3/5/01 approved, agenda approved.		
Action items:	Person responsible:	Deadline:
Minutes from 2/26/01 and 2/27/01 outstanding.	Bob Miller (Recorder)	3/19/01

9:15-9:30 AM	Board Items O/C: Shared Information	John Huber Laura Douglas	
<p>Discussion:</p> <p>A. Topics discussed with Compensation Committee:Executive Incentive Shared Goals for 2001; Committee agreed to include BSOs in the Executive Incentive Shared Goals – 7 ½% of BSO base salary, effective May 1,2001 if Board approved. Goals to remain basically the same ; with O&M cost per customer change to 2 levels: at budget and 1 % less than budget. Any board approved action correspondence to come from the Corporate Secretary.</p> <p>B. Status on Bond Issue – Gross Savings – 4.7 to 5 million; Net Savings 3.7 to 4 million</p> <p>C. Consultant for Facilities Plan – Black and Veatch</p> <p>D. Consultant for Base Mapping for Bullitt County – Analytical Services Inc.</p> <p>E. RBI in closed session</p>			
<p>Conclusions: See above</p>			
Action Items:		Person responsible:	Deadline:
9:30-10:30 AM	Salaried Uniform Policy O/C Shared Information	Eric Ayers Nancy Jenkins	
<p>Discussion:</p> <p>Nancy presented the feedback she solicited from 3rd Street Administrative employees regarding the proposed salaried uniform policy. Overall, comments were favorable and in support of the proposed policy.</p> <p>Eric presented the benchmarked information from LG&E and MSD as follows:do not have significant uniform policies for administrative employees, generally extend only to union employees. MSD allows administrative employees to opt in for receipt of 5 uniform shirts per year.</p> <p>ELT members discussed the proposal and provided the following perspectives:important for field personnel to be recognized, open to how the recognition of field personnel is accomplished; if the policy is adopted it must be enforced;discussed budgetary concerns; administer the policy with discipline; clear on which employees are included and which employees are not;supportive of team recommendation – meets the needs of what team was asked to do.</p>			
<p>Conclusions: ELT reached consensus that the policy would be administered on a pilot basis(with specific measures identified)</p>			
<p>Action items: Develop the pilot policy of the salaried uniform policy, including specific measures which validate the success of the pilot. The team which will develop the pilot is: Eric Ayers,Nancy Jenkins,Karla Teasley,Jim Wehrle with input from Laura Douglas. The team will present final pilot policy at future ELT meeting.</p>		<p>Person responsible: Eric Ayers,Nancy Jenkins,Jim Wehrle,Karla Teasley Input by Laura Douglas</p>	<p>Deadline:</p>

10:30-10:40 AM	Break		
10:40-11:10 AM	Diversity Goal Summary O/C: Confirmation of Diversity Goals and Goal Measurements and Next Steps for Implementation	Beverly Irons	
<p>Discussion:</p> <p>Beverly provided final Corporate Diversity Goal document. She recommended that the Corporate Administration area be included in the HROE core under the Fostering a work environment goal for tracking purposes. ELT consented to this change. The document she provided included examples of the three sections of the goal (AA, increase utilization of M,W,HBE, and foster a work environment that values diversity) that each CBSO, BSO, PO will have in their 2001 WPPMs.</p>			
<p>Conclusions:</p> <p>ELT adopted the 2001 Corporate Diversity Goals as presented. Beverly will compile the results of the goals quarterly.</p>			
<p>Action items:</p> <p>Beverly will hold individual meetings with each Core, with CBSO, BSO and POs in attendance within the next two weeks. She will develop a uniform document to be handed out at those meetings with the Diversity Plans as an attachment. Each CBSO should contact Beverly to schedule their respective core meeting.</p>		<p>Person responsible:</p> <p>Beverly Irons, CBSOs</p>	<p>Deadline:</p> <p>Within Next Two Weeks</p>

11:10-12:00 AM	Internal Audit Approach O/C: Shared Information	Don Whitehouse and Roger LeMaster	
<p>Discussion:</p> <p>Don Whitehouse provided an overview of the COSO report – Committee for Sponsoring Organizations, an Internal Control Framework recommended to be utilized by LWC. The report provides a process where Internal Controls are designed to provide reasonable assurance regarding the achievements of objectives in: effectiveness and efficiency of operations; reliability of financial reporting; and compliance with applicable laws and regulations. The components outlined in the report are as follows:</p> <p>Control Environment Components: Integrity and Ethical Values; Commitment to Excellence; Board of Directors or Audit Committee; Management's Philosophy and Operating Style; Organization Structure; Assignment of Authority and Responsibility; and Human Resource Policies and Practices.</p> <p>Risk Components: Entity Wide and Activity-Level Objectives; Risks; and Managing Change.</p> <p>Control Activities: Types of Control Activities; Integration with Risk Assessment; and Controls over information systems.</p> <p>Information and Communication Components: Information – Strategic and Integrated Systems and Information Quality; and Communication – Internal and External.</p> <p>Monitoring Components: Ongoing Monitoring; Separate Internal Control Evaluations; and Reporting Deficiencies.</p>			

<p>Don currently sees gaps in the following areas of internal controls at LWC: linking risks to objectives, formalizing how we measure our controls, and are they accurate and how are they working?</p> <p>Don also provided a final schedule for the Next Level Plan II 2001- 2002 System Certification Audits.</p>		
<p>Conclusions: This will be a followup agenda topic at future ELT meetings.</p>		
<p>Action items: ELT will spend many hours reviewing the COSO report to create an effective work environment for LWC using the COSO process</p>	<p>Person responsible: ELT</p>	<p>Deadline:</p>

<p>12:00-12:10 AM</p>	<p>Computer Training Needs O/C:Shared Information</p>	<p>Jim Wehrle</p>
<p>Discussion: Jim stated the current in-house computer training contract had expired. The training department had provided information that some managers were reluctant for employees to utilize the training due to the cost charged to their individual budgets. The person who had provided the training last year is now on her own and will charge \$20 per hour, compared to the \$45 hourly cost last year. Question was posed, could we have trainer to conduct classes one or two days each week(estimated cost of \$10,000 to \$12,000) and funds to come from Company budget opposed to individual system budgets? Laura stated that whatever is decided that we must follow Corporate procurement procedures.</p>		
<p>Conclusions: Jim and Bob to pursue options, make decision how to implement and provide information back to ELT.</p>		
<p>Action items: See Above</p>	<p>Person responsible: Jim Wehrle, Bob Miller</p>	<p>Deadline:</p>

12:10-12:20 PM	Timekeeper/Facilitator Reports and Agenda Prep O/C: Reports and agenda for 3/19/01	Steve Hubbs
<p>Discussion:</p> <p>TKO report:</p> <p>The meeting started late(5 minutes), approved one set of minutes(3/5/01),moved to Board Issues,then Salaried Uniform Policy, after break Diversity Goal Topic discussed,with consensus reached; Discussed Special Item – Internal Controls; meeting ended 20 minutes over the specified time. Did not have as much balanced participation as usual.</p> <p>ELT Agenda for March 19, 2001:</p> <p>9:00 am Review Minutes/Agenda O/C: Accept Minutes, Agenda</p> <p>9:10 am Cost Control/Greenbacks Report O/C: Shared Information Richard Royse</p> <p>10:40 am Break</p> <p>10:50 am ELT Followup to Strategic Planning O/C: Planned Work on Topics Laura Douglas Issues</p> <p>11:20 am ELT Team Effectiveness Charter O/C: Update Charter/Roles Steve Hubbs Update</p> <p>11:50 am TKO and Agenda Prep O/C: TKO Report and Agenda</p> <p>Noon Adjourn</p> <p>Note: Bob will not be present at 3/19/01 meeting, will send BSO. Next Meeting will be in the Board Room.</p>		

ELT Meeting Minutes

3/19/01
9:00 AM to 12:00 PM
Board Room

Team Leader:	Steve Hubbs
Facilitator:	Nora Freeman
Recorder:	Greg Heitzman
Timekeeper:	Karla Teasley

Attendees:	Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Amber Halloran for Bob Miller, Karla Teasley, Jim Wehrle, Richard Royse, Kathy Gethsinger, Sue Purdy
-------------------	---

Please bring:	Agenda
----------------------	--------

Agenda Topics

9:05-9:14 AM	Review Minutes and Agenda O/C Approve Minutes and Agenda	Steve Hubbs
---------------------	---	--------------------

Discussion:

Minutes were approved for February 26, 27 and March 12, 2001. Note the Executive Incentive Goals were adopted by the Board with the plant turbidity measured for January-December 2001, and the O&M Cost Per Customer Goals have a Level I at atbudget and Level II at 1% below budget. Laura noted the high quality of the minutes for 3/12/01 by Susan Camp.

Conclusions:

Minutes approved as written.

Action items: None	Person responsible: N/A	Deadline: N/A
------------------------------	-----------------------------------	-------------------------

9:15-11:35 AM	Cost Control/Greenbacks Report O/C Shared Information	Richard Royse
<p>Discussion:</p> <p>2000 Expenses - Steve Hubbs reviewed the cost reduction measures targeted in July 2000. These included labor cost savings from not filling positions, proposed reductions from travel, and savings from Cost of Quality pilots. Richard provided a handout summary of 2000 Materials and Contract expenses, which account for \$1.01 million over budget. Largest areas over budget for materials and contract services include C1, C2, C3, P1, P2, R5. Some significant areas over budget include: main break repairs, Ky Underground (BUD) Services, STS utility locates, Y2K emergency generator rental, emergency repair for floculators at Crescent Hill and B.E.Payne Plant, capping of filters at B.E.Payne Plant, and USGS services for RBI. After review of 2000 expenses, ELT feels we are appropriately budgeted in 2001.</p> <p>2001 Income and Expenses – John Huber noted his concerns over net income less than budget through February, 2001 by \$69,000 and \$760,000 less than same period in 2000. Water revenue is up \$134,000 YTD, O&M expenses are \$567,000 over budget, and \$750,000 over last year. Industrial and wholesale water sales were reviewed.</p> <p>2001 Rate Increase - John Huber discussed the pro-rating of the 2001 rate increase. Typically, the rate increase is applied to the first bill in January. The new CIS has prorated the 3.5% rate increase over the first billing period for consumption only used in 2001. This equates to an estimated \$250,000 lost revenue over the first two months of the year. Management must evaluate the alternatives of adjusting the bill for the first two months for this billing error, or absorbing the lost revenues and lost profit for the owner into operations. A business case will be developed by Karla Teasley and presented to John Huber for delivery to the Board, with input from ELT in an advisory capacity to John. Laura Douglas will assist in evaluating the legal alternatives for bill adjustments, considering the Board resolution to apply the 3.5 percent rate increase effective with all bills issued after January 1, 2001. Tony Gregory, Amber Halloran, Bob Miller and John Huber will look into controls for water rate changes and also evaluate appropriate controls for the new financial information system being implemented.</p> <p>Break at 10:45 to 11:00 am</p> <p>Resume Greenbacks Report Review after Break:</p>		
<p>2001 YTD Expenses – Labor, materials, and contract services are over budget by about \$400,000 due to additional main breaks in January, Stoll paving services, police services, and baracade services for 60" repairs. Chemicals are over by \$70,000 due to a change in treatment strategy (treating to 0.05 NTU with enhanced coagulation using ferric chloride). This change could lead to approximately \$300,000 additional chemical costs in 2001, if we keep this treatment strategy.</p> <p>2001 Capital Budget – the 2000 carryover is \$35.8 million yielding a \$113 million gross budget. Karla Teasley suggested ELT review the five-year strategy to resource the Capital Program and achieve the 2004 goal to achieve 90% commitment of the program.</p>		
<p>Conclusions: See above</p>		
<p>Action items: Major O&M cost impacts to budget in 2001:</p> <p>Need to quantify the expenses and revenue associated with:</p> <ol style="list-style-type: none"> 1. 60" main repairs (Karla) 2. Temporary Employees in Customer Service (Karla) 3. January main breaks (Karla) 4. 2001 rate adjustments (Karla) 5. Bad debt expenses higher than budget (Karla) 6. Higher revenue from fees and penalties (Karla) 7. Higher depreciation than budget (Richard) 8. Treatment chemical costs above budget (Steve) 9. Savings from debt refinancing (Bob) 10. Higher than expected material and contract expenses (Richard). <p>Action Items:</p> <p>Each assigned person will quantify the above costs/revenues and forward to Richard by Friday 3/23/01 to input into the monthly report in Greenbacks for March YTD budget analysis.</p>	<p>Person responsible:</p> <p>See Action Item for assignments</p>	<p>Deadline:</p> <p>3/23/01 or asap</p>

11:000-12:20 AM	ELT Follow-up to Strategic Planning Issues O/C: Planned Work on Topics	Laura Douglas
<p>Discussion:</p> <p>Kathy Getsinger prepared handouts for the strategic topics of "Economies of Scale" and "Product Line Diversification".</p> <p>Economies of Scale –</p> <p>Opportunities to leverage expertise:</p> <ul style="list-style-type: none"> - billing services, investment in CIS - GIS investment - Financial System investment - Work Order System investment - Engineering services (pipeline expertise, MRRP, JCEP, BCEP) - Service/meter installations (Middletown) - E-commerce and purchasing co-ops <p>Opportunities to outsource:</p> <ul style="list-style-type: none"> - Plant engineering outsourcing - HR services outsourcing (in or out) - Treatment Plant Operations (in or out) - Lab Services (in or out) <p>Reasons for Strategic Interest – Competition, customer expectation, owner expectations</p> <p>Consequences – market will fill the gap if we do not pursue, do not achieve customer/owner expectations</p>		
<p>Conclusions:</p> <p>ELT needs a special meeting to further discuss these two strategic issues. Greg agrees to head up the "Economies of Scale" topics beginning in July of this year (due to time commitments to KIA and Bullit County Extension Program startup.) The second item of "Product Line Diversification" will be deferred to next year's strategic plan as a strategic topic.</p>		
<p>Action items:</p> <p>Steve Hubbs will set up the special meeting, tentative May 15.</p>	<p>Person responsible:</p> <p>Steve Hubbs</p>	<p>Deadline:</p> <p>Set meeting after 5/1/01</p>

12:20-12:30 PM	TKO and Agenda Prep O/C TKO and Agenda	Steve Hubbs
<p>Discussion:</p> <p>TKO report</p> <p>Meeting started late, Greenbacks report took two hours to complete. ELT Team Effectiveness and Charter deferred to next meeting and did not complete Strategic Plan agenda items. The meeting went over 30 minutes, with balanced participation. Jim Wehrle suggested reading minutes ahead of time to save 15 minutes.</p> <p>Agenda for 3/26/01 :</p> <p>9:00 am Review Minutes and Agenda OC: Approve minutes and agenda – Steve Hubbs</p> <p>9:15 am AMR Presentation OC: Shared information and ELT endorsement for Board recommendation – Kevin Grant</p> <p>10:15 am Break</p> <p>10:30 am Team Effectiveness, Groundrules, and Team Charter OC: Accept Team Charter – Steve Hubbs/John Huber</p> <p>11:00 am Review BIN List OC: Update BIN list – Steve Hubbs</p> <p>11:30 am Water Treatment Strategy OC: Shared information – Steve Hubbs</p> <p>Noon - Adjourn</p>

Attendees:	Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Kevin Grant	
Please bring:	Agenda	
	Agenda Topics	
9:00 AM	Review Minutes and Agenda O/C Approve Minutes and Agenda	Steve Hubbs
Discussion:		
Changes to minutes: The O&M cost per customer goal Level I is set at budget (\$155.40/customer excluding hydrant counts) and Level II is 1% below budget (\$153.85/customer excluding hydrant counts). Also, the new CIS billing system prorated the 3.5% rate increase for consumption used in 2001 and used 2000 rates for consumption in 2000.		
Agenda: Jim asked for an additional five minutes on the agenda to discuss the Corporate Performance Award. ELT agreed to add before discussion of the BIN list at 11:00 am.		
Conclusions: N/A		
Action items: N/A	Person responsible:	Deadline:
	N/A	N/A

9:15 AM	AMR Presentation		Kevin Grant
<p>Discussion:</p> <p>Kevin Grant provided a handout on Project 01-625, Automated Meter Reading for Kentucky Turnpike Water District #2 customers. Kevin provided a brief overview of the evolution of meter technology from mechanical meters to touch pad technology to inbound/outbound systems to the latest technology of using Radio Frequency (RF) to read the meters. Itron and Schlumberger provide the RF technology solutions for AMR. Mobile RF AMR can be read with a mobile van receiving unit riding through neighborhoods, with the ability to read 5,000 to 12,0000 meters per day, depending on meter density. RF meters can also be read with handheld units. The next evolution of RF AMR will be read through a fixed based network using RF or GPS satellite technology.</p> <p>Kevin then presented the AMR Pilot for the KT District # 2. The analysis demonstrates a break even point in year 2008, using a discount rate of 5%. The KT pilot is advantageous due to the higher average cost per read in the KT area (\$4.92/read average), the higher average revenue per customers (averages \$34/month), the lower density of meters in KT#2, and the number of meters within the flood plane in KT#2 (access to submerged meters).</p> <p>Kevin also reviewed information on AMR programs in Houston, Texas and Rockaway Township, New Jersey. The Houston AMR project also recovers investment within an estimated 5 years.</p>			
<p>Conclusions:</p> <p>ELT agrees to endorse the RF AMR system in KT #2 and proceed to the Board for approval of the pilot project.</p>			
<p>Action items:</p> <p>Kevin to present this topic to DPT in April and proceed to Board in May for approval of AMR Project.</p>		<p>Person responsible:</p> <p>Kevin Grant</p>	<p>Deadline:</p> <p>April for DPT; May for BOWW</p>
10:30 AM	Break		
10:40 AM	Team Effectiveness, Groundrules, and Team Charter		
<p>Discussion:</p> <p>John Huber handed out the draft charter for ELT. ELT agreed to the following changes: Jim Wehrle's title to Vice President-Core Business System Owner of Human Resources and Organizational Effectiveness; move regulations and laws to the high-level boundary statement; capitalize Vision, Mission, and Values and redate the charter to March 23, 2001.</p> <p>Groundrules and team effectiveness will be deferred to a special meeting of ELT on April 24, 1:00 to 5:00 pm. Jim, John, and Nora will develop an agenda for the special meeting. Greg will circulate the draft groundrules and Steve will summarize accomplishments of 2000 from the minutes.</p>			
<p>Conclusions:</p> <p>Team Charter accepted by ELT</p>			
<p>Action items:</p> <p>John will update the team charter and distribute. John, Jim, and Nora will develop an agenda for the special ELT meeting on April 24.</p>		<p>Person responsible:</p> <p>John Huber, Jim Wehrle, Nora Freeman</p>	<p>Deadline:</p> <p>April 2, 2001 for Charter</p>

11:10 AM	Corporate Performance Award	Jim Wehrle							
<p>Discussion: ELT must determine the boundary conditions for application of the Corporate Performance Award (CPA). For 1999, the CPA was awarded to all employees as of June 1, 1999 and the employee must be employed as of the date of the award, typically in April of each year. For the 2000 CPA, ELT has agreed to apply the award to all employees (excluding VP's) employed as of December 31, 2000, including employees on approved leave of absence. The employee must be present at the time of the CPA disbursement, typically in April. The Board of Water Works has the final say on the CPA amount and eligibility.</p>									
<p>Conclusions: See above</p>									
<table border="0"> <tr> <td data-bbox="109 480 963 523">Action items:</td> <td data-bbox="963 480 1290 523">Person responsible:</td> <td data-bbox="1290 480 1442 523">Deadline:</td> </tr> <tr> <td data-bbox="109 523 963 602">Jim will circulate the details of the 2000 CPA and document the boundary conditions for employee eligibility.</td> <td data-bbox="963 523 1290 602">Jim Wehrle</td> <td data-bbox="1290 523 1442 602">April 2, 2001</td> </tr> </table>				Action items:	Person responsible:	Deadline:	Jim will circulate the details of the 2000 CPA and document the boundary conditions for employee eligibility.	Jim Wehrle	April 2, 2001
Action items:	Person responsible:	Deadline:							
Jim will circulate the details of the 2000 CPA and document the boundary conditions for employee eligibility.	Jim Wehrle	April 2, 2001							
11:25 AM	Water Treatment Strategy	Steve Hubbs							
<p>Discussion: Steve Hubbs reviewed his briefing paper on water treatment strategy to achieve a turbidity of less than 0.1 NTU for each filter, 95% of the time, finished water (Phase IV partnership goal). An estimated additional \$500,000 is needed to assure we achieve this target level. Previously, the turbidity goal was set for all finished water from each plant at 0.1 NTU, 95% of the time. In 2000, the result was approximately 0.11 NTU, 95% of the time. Achieving a 0.1 NTU target for each filter will allow credit for one log removal for optimized treatment.</p> <p>ELT agreed to allow Steve to continue with the revised treatment strategy to achieve 0.1 NTU for each filter, through April 2001, and then return to ELT with revised cost estimates and alternatives of O&M cost offsets to operate within budget. This includes review of our ferric chloride bid prices. John also requested review of the impact of lime costs for pH adjustments.</p>									
<p>Conclusions: See above.</p>									
<table border="0"> <tr> <td data-bbox="109 1083 963 1125">Action items:</td> <td data-bbox="963 1083 1290 1125">Person responsible:</td> <td data-bbox="1290 1083 1442 1125">Deadline:</td> </tr> <tr> <td data-bbox="109 1125 963 1174">Steve will report back to ELT in May on year-to-date treatment costs.</td> <td data-bbox="963 1125 1290 1174">Steve Hubbs</td> <td data-bbox="1290 1125 1442 1174">Ongoing</td> </tr> </table>				Action items:	Person responsible:	Deadline:	Steve will report back to ELT in May on year-to-date treatment costs.	Steve Hubbs	Ongoing
Action items:	Person responsible:	Deadline:							
Steve will report back to ELT in May on year-to-date treatment costs.	Steve Hubbs	Ongoing							

TKO/Agenda Preparation

TKO Report:

The Agenda Prep started a few minutes late, less time on minutes review. AMR went 20 minutes long. Adjusted agenda well to accommodate CPA. Did not complete BIN list review. Good discussion and understanding of AMR.

Agenda Prep:

April 2, 2001 **Timekeeper/Observer: Greg Heitzman**
Recorder: Bill Meeks

9:00 AM - Agenda and Minutes Review

9:15 AM - GAP Analysis on Operating Plans by Kathy Getsinger

10:15 AM - Break

10:30 AM - Evaluated Bids Presentation by Cindy Kowalski

11:00 AM - Facilitator Program Presentation by Nora Freeman

11:30 AM - Open Time

11:45 AM - TKO/Agenda Prep

12:00 Adjourn

Please bring: Agenda

Agenda Topics

9:00-9:15 AM Review Minutes and Agenda O/C Approve Minutes and Agenda Steve Hubbs

Discussion: Minutes were approved as written

9:15-10:15 AM GAP Analysis on Operating Plans Kathy Getsinger

Discussion: Kathy Getsinger began presentation speaking about how this assessment is the integration of 16 LWC plans. She reviewed these plans in alphabetical order. Kathy then explained the process for developing Gap Assessment. The team agrees that this is a huge undertaking. Kudos to Kathy and her system. Thank You! Bob Miller explains that this is now an accessible data base to ELT an updated very easily. Discussion then ensued concerning Annual Inspection Report

MYAP Matrix

Annual Inspection Business Planning Database

Kathy explains how this Gap assessment cross references to not only plans but strategic groups who are responsible for implementation.

Kathy expresses concerns that some operating plan drafts have broad objectives whose outcomes or results are not specific and difficult to measure. These objectives have weak linkages to other plans and as so, identified gaps are the result.

Kathy ask the team for some direction as to the outcome expected from this report.

What's next? How do we address these gaps?

Comments begin.

Bob Miller states that now a tool has been created to identify gaps. He thinks SAC teams should be used to rectify or tie-in gaps.

Steve Hubbs believes that this great work-in-progress for planning and needs improving.

John says this is a great amount of work and thanks Kathy for her effort. What do we do with this?

Operating plans should be in more detail to be able to track implementation and get them done.

Karla believes a process should be developed to close gaps. The following was the result of a brainstorming activity to determine next steps.

1st Priority:

- Process for ELT to follow in GAP analysis (Assessment)
- Cycle through 2001 to improve planning and plan elements to achieve plan specificity and measueability.
- Intentionally address gaps (2001 or later)
- Address NLPPII gaps first, especially where system work output will be used as input for other systems to prevent gaps in future.
- Determine what gaps are oversights and what gaps are due to lack of supporting plans and resources.

2nd Priority:

- Improve process for developing 2002 operating plans.
- Address plan changes needed to reflect changes in organizational design.

The following action steps were agreed upon to address these gaps.

1. CBSO's will address gaps with BSO's.
2. SAC teams will be involved as appropriate in addressing gaps and revising the operating plan.
3. All BSO's will receive a copy of the GAP assessment, planning database, and operating plan

Deliverable expected:

The April 23rd ELT meeting (this will be the only agenda item) will be dedicated to discussion of gaps and response to action items to address gaps without changing operating plans. There will also be a discussion about items that can not be included in plans because of resourcing gaps.

Kathy will work on 2nd priority items that involve process improvements.

10:15-10:30 AM

Break

10:30-11:00 AM

Evaluated Bids Presentation

Cindy Kowalski

Discussion: Evaluated bids presentation by Cindy Kowalski and Steve Cooper

Cindy presented Evaluated bid program draft. Presentation was very organized. (Handout Included)

Team discussion followed presentation

Laura Douglas had questions on first recommendation. Does this plan develop local minority and women owned business ?

Greg believes this program s/b expanded throughout the company (all cores). He wants to see progress tracked. This will take resources and currently there is a gap within all cores who have not budgeted these additional resources to monitor this program.

Consensus was reached. See Below

CBSO's within their respected cores will be responsible for monitoring and tracking any expansion of evaluated bids within with in 2001 budgets.

Recommendations:

- I. Expand to other cores
- II. Resource for 2001 within current budgets
- III. There should be recognition for participants
- IV. Largest issue is a control mechanism.

11:00-11:30 AM

Facilitator Program Presentation

Nora Freeman

Discussion: Recommendations for improved facilitation development: Accompanied with handout.

Nora made presentation to ELT.

Karla believes that percentage of evaluation to WPPM should include BSO's evaluation of whether NWT is effective. Nora agreed to incorporate this.

Test for consensus called on concept. Recommendations accepted. Consensus taken with budget gaps as a major concern. Where will these funds come from?

9:15-10:00 AM ELT Strategic Plan Assignments O/C: Update and shared information Steve Hubbs

Discussion: Our team discussed the remaining Strategic Issues that are left to be discussed of the 2002-2006 Strategic Plan. The team began brainstorming The Strategic issue Economies of Scale and Competiveness (Issue #6 and # 7). John stressed to the team to ask ourselves what the huge water/wastewater/utility companies can do that we can not? What can we do they can not do in this community as a regional water provider. Greg believes there is a gap in learning what they are really doing (actual practices) and what we hear they are doing. Jim intervened to say he believes there are actually two strategic issues here. 1.) What do the large privatizers do successfully throughout the world that we can't/don't do? 2.) What are the practices/opportunities that we can do in Louisville that large private firms can not or do not want to do? The group agreed that there are two separate issues here and began to brainstorm; creating a handout that was gathered, typed and distributed by Jim Wehrle and Barbara Moir.

Conclusions:

Action items: Team members are to review these issues and prepare for discussion at Strategic Planning Team meetings. Person responsible: Deadline:

10:00-10:15 AM	Break		
Discussion: Break was taken !			
10:15-11:30 AM	Review Financial Status O/C: Develop Plan to operate within budget		
Discussion: Each CBSO explained their buget items within their core. It was agreed that there was not enough time to properly prepare and put together quantified detail on budget items in question. There were some questions on line items that could not be answered at this meeting.			
Conclusions:			
Action items: Each CBSO would quantify and put in detail budget items in question; send information to Richard Royse for proper grouping and redistribution to ELT for future distribution at a future ELT meeting		Person responsible:	Deadline:
11:30-11:45 AM	Vehicle Use Policy O/C Approve Policy	Scott Potter	
Discussion: Scott Potter presented Vehicle Use Policy with proposed changes from prior meeting with ELT. There were changes to paragraphs 3.1,3.3, and 3.7. Discussion ensued concerning individuals on call and the use of companies vehicle in the B and C categories. The ELT agreed and consensed to all conceptual changes to the policy.			
Conclusions:			
Action items: Laura will redraft this policy and Mr Huber will approve.		Person responsible: Laura Douglas	Deadline:
11:45-12:00 PM	TKO and Agenda Prep O/C: Agenda	Steve Hubbs	
Discussion: Greg gave TKO report. Team set agenda for next meeting. Steve, our team leader has E-Mailed this agenda for April 23,2001.			

Executive Leadership Team
Meeting Minutes
April 23, 2001

Attendees:

Leader: Steve Hubbs
Recorder: Bob Miller
Timekeeper/Observer: Greg Heitzman
Members: John Huber, Karla Teasley, Jim Wehrle

E-Mail Communication Protocols.

ELT considered the appropriate use and restrictions of e-mail during an emergency event.

Gap Assessment – Supplying Business Resources.

Bob Miller presented the results of the gap assessment review for the Supply Business Resources Core. He noted three key themes:

- ISO implementation plans will require a more detailed scope of work to determine how much can be implemented in 2001.
- Several of the gaps were related to simple oversight and easily corrected.
- Several of the gaps were related to high level plans that need more discussions to establish adequate detail.

No action was needed by the ELT.

Gap Assessment – Human Resources/Organization Effectiveness.

Jim Wehrle presented the results of the gap assessment review for the Human Resources/Organization Effectiveness Core. He noted a key gap regarding the Internal Customer Satisfaction survey. ELT discussed this matter extensively and determined that this represented a critical gap that needs to be placed on the bin list for closure. Steve Hubbs noted the need for publication of an official “Quality Plan” to support the ISO initiative. Jim Wehrle discussed the Employee Recognition System and agreed to develop further recommendations on this matter. This may result in cancellation of the software development to support employee recognition.

Gap Assessment – CBSO’s, BSO’s, and ELT.

21.01

The ELT noted its’ responsibility for providing timely direction to systems, especially regarding Next Level Plan issues. The ELT requested modification to the control of Operation Plans, allowing more flexibility while maintaining appropriate control. John Huber noted that there should be differing approvals of plan changes:

- For plan items affecting only the originating systems, BSO’s can direct the change with their CBSO approval.
- For non-Strategic Plan items affecting more than one core, BSO’s can direct the change with their CBSO approval and consent of the other BSO’s and CBSO’s.
- For Strategic Plan items, BSO’s can direct the change with their CBSO approval and consent of the ELT.

Minutes

ELT Meeting Minutes

4/30/01
9:00 AM to 12:00 PM
Board Room

Leader: Steve Hubbs
Facilitator: Nora Freeman
Recorder: Bill Meeks
Timekeeper: Greg Heitzman

Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle

Please bring: Agenda

Agenda Topics

9:00-9:05 AM Review Minutes and Agenda O/C Approve Minutes and Agenda Steve Hubbs

Discussion: Minutes were reviewed and approved as written.

Agenda was adjusted to include an item Bob Miller had for discussion in Closed session

Conclusions:

Action items:	Person responsible:	Deadline:

9:05-9:30 AM Communication Process For Boiled Water Advisory Bob Miller

Discussion: Main break activity took place on Barbour Lane causing a boiled water advisory. Confusion took place between Bo Williams and Jack Wang over the responsibility of communicating when to remove the advisory and speaking to state regulators.

Conclusions: Bob and Steve will work together to determine what the process is and who will be responsible in the future.

Action items: The conclusions will be communicated to ELT within a week Person responsible: Bob Miller and Steve Hubbs Deadline:

9:30 – 11:45

Review of Budget and Identify measures to control costs
O/C: Identify the budget forecast for end-of-year and identify specific strategies to operate within this budget. Need: Items for cost reductions from CBSO's

Discussion: Karla began meeting explaining her budget overruns. She began with C2 . After some lengthy discussion about the exact amounts of budget overruns the team agreed to:

Over Budget 3/31/01	\$ 754K
From Contingency	(400K)
C2 year end forecast	350K
C1&C3 year end forecast	100K
Chemical Costs Above Budget	300K
Total Required Budget Cuts	1,100K

This agenda item was nowhere near being complete so the team agreed to pick up this item at 3:00 PM til 5:00 PM today . The Strategic Plan items (Gap Assessment) would be rescheduled.

Conclusions: Pick back up at 3:00 PM with three outcomes of meeting in mind. 1.) Validate info for items that add up to 1,100,000 2.) Communicate strategy for recovering 3.) Across the board reductions

Action items:

Person responsible:

Deadline:

3:00 – 6:00 PM

Review of Budget and Identify measures to control costs
O/C: Identify the budget forecast for end-of-year and identify specific strategies to operate within this budget. Need: Items for cost reductions from CBSO's

Discussion: The team discussed at length this issue and determined that we are 824K over budget. We began discussing strategies to reduce this deficit. Items the group felt were off limits were Pay cuts, lay-offs, Co-ops, Summer-Help, Crediting future vacation, Tuition Reimbursement, Training, Existing clothing and safety shoes allotments.

Conclusions: Each core will identify 2% of cost within their perspective budgets that can be reduced as appropriate before end of year and delivers that information before end of day Thursday.

Communication Strategy

1. Where we are today?
2. How do we get there?
3. End of year goal and why?
4. What are we going to do? Top Down Approach

Action items:

Person responsible:

Deadline:

11:45-12:00 PM

ELT Meeting Minutes

5/7/01
9:00 AM to 12:00 PM
Board Room

Leader: Steve Hubbs
Facilitator:
Recorder: Joan Malone
Timekeeper: Greg Heitzman

Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bob Miller, Karla Teasley, Jim Wehrle, Ed Chestnut, Dwayne Clark, Kathy Getsinger, Amber Halloran, Joan Malone, Sue Purdy, Richard Royse, Mike Sturgeon,

Please bring: Agenda

Agenda Topics

9:00-9:05 AM Review Minutes and Agenda OC Approval of Minutes and Agenda Steve Hubbs

Discussion: The minutes were approved as written.

9:05-9:20 AM Partnership Council O/C: Shared Information Dwayne Clark

Discussion: Dwayne Clark presented a draft summary of companies offering discounts to LWC employees. The PC will work with Marianne Butler to communicate this to LWC workforce. When final list is ready, it will be put on the Intranet, posted on the PC communications boards, and possibly handed out with paychecks. The PC will be responsible for keeping the list updated.. Employee discounts will be owned by the PC. ELT decided discounts need to be consolidated and all of them put under the PC

Dwayne noted the PC is not receiving minutes on a regular basis. ELT advised him the minutes are posted on the Intranet.

<u>Action items:</u>	<u>Person responsible:</u>	<u>Deadline:</u>
The PC will contact Marianne Butler regarding communication of discounts to employees.	PC	When final list is ready
John Huber agreed to give a presentation to the PC on how the Corporate Performance Award and the Executive Incentive Awards work. Dwayne will contact Joan to schedule a time and provide information on what specific information the PC wants from John.	Dwayne Clark	Within one week.
	John Huber	As soon as meeting is schedule.

9:05-9:20 AM Gap Analysis O/C Address issues in gap analysis Steve Hubbs

Discussion: Steve Hubbs presented the results of the gap assessment review for P1and P2. There are no items in the gap analysis that Steve does not plan to address, with the exception of the item under Enhancing Customer Satisfaction related to our cultivating a relationship with our top 10 customers. This is an activity that we do upon request, but is not proactive. The core has not budgeted to expand current activities, but does plan on supporting any activities required by customers. Steve does not intend to increase activity beyond what it has been historically.

Action items: Steve will update operating plan to indicate areas he is addressing. Person responsible: Steve Hubbs Deadline:

<p>9:20-9:50 AM</p> <p>Discussion: Karla discussed C1 and C3 CSRs progression from Grades, 3, 5, to Grade 6. JET has recommended and HR has approved allowing for progression to Grade 6. Hopefully, this will help CSRs see there can be progression in the Call Center. This will be based on competency only—not on seniority.</p> <p>Ed Chestnut presented results of benchmarking he did with five utilities. Ed has not compared the data he got with our Mercer data. Mr. Huber says he wanted to see how CSRs in the water industry as a whole compared to CSRs in other local companies.</p> <p>Conclusions: ELT supports the decision of HR and JET.</p> <p>Action items: Customer Service will work with Jim Wehrle and HR on the JET recommendation to allow CSRs to progress to Grade 6.</p>	<p>CSR Issues O/C Shared Information - How we are dealing with compensation and career pathing issues for the CSRs in my Core</p>	<p>Karla Teasley</p> <p>Person responsible: Wehrle, Quality Office, HR</p> <p>Deadline:</p>
<p>10:20-10:35 AM</p>	<p>Break</p>	
<p>10:35-10:55 AM</p> <p>JLH discussed issues going to the BWW on Tuesday.</p> <p>Action items: No action required.</p>	<p>BWW issues</p>	<p>Person responsible:</p> <p>Deadline:</p>
<p>10:55-11:45 AM</p> <p>Discussion: Richard Royse, Amber Halloran, and Sue Purdy provided ELT with a synopsis of financial results for April, 2001. The review focused on budget variances in Operating Revenue, Operation & Maintenance Expense, Other Operating Expenses, and Non-operating Income & Expense. O&M Expenses YTD exceeds budget by \$282,000; however, Net Income exceeds YTD budget by \$467,000. It was noted that water consumption at the Waterfront Development Corp. has been estimated since Nov., 2000..</p> <p>Action items: Contact Waterfront Development Corp. to discuss their water useage and explore options to reduce the cost of providing this free water.</p>	<p>Greenbacks Report O/C: Shared Information</p>	<p>Person responsible: Karla Teasley Vince Guentner</p> <p>Deadline:</p>
<p>Cost Reductions</p> <p>Discussion: Bob discussed key elements of the cost reduction plan. The two most difficult issues are related to: balancing improved water quality and customer satisfaction goals against higher chemical and labor expenses; and balancing unexpected cost increases against the completion of the programs identified in the 2001 Strategic Plan while remaining within the expense budget. (This includes completion of the 2001 Capital Program.)</p> <p><u>Action items:</u></p> <p>ELT will compile and share their respective proposed budget cuts. Cost reductions will be discussed at the next ELT meeting.</p> <p>Within the next week ELT members who are suggesting personnel changes to cut their budgets should get with Jim Wehrle to discuss. (John pointed out we should first of all work withihn existing policies – example: A person whose position we plan to eliminate can go into the deployment pool.</p>	<p>Cost Reductions</p>	<p>Person responsible: Wehrle, ELT members</p> <p>Deadline: within 1 wk.</p>

11:45-12:00 PM

Housekeeping

Steve Hubbs

Discussion: Greg gave the TKO Report. Everyone participated today. The CSR issue took longer than allotted, but ELT did complete the topic. The Greenbacks report and cost cutting efforts both took longer than allotted.

The group struggled for 15 minutes juggling calendars but did come up with a plan of action which addresses meetings to discuss gap analysis and SPT issues.

AGENDA FOR MAY 14, 2001 MEETING

9:00-9:05 a.m.	Review minutes and agenda. OC: Approval of minutes/agenda	S. Hubbs
9:05-10:00 a.m.	Cost reduction report. OC: Sharing of information/understanding of how each system will fit from the budget.	B. Miller
10:00-10:10 a.m.	Break	
10:10-11:35 a.m.	SPT Issues. OC: sharing of information/strawman report.	L. Douglas
11:35-11:50 a.m.	Prepare agenda for next ELT meeting	S. Hubbs
11:50-12 Noon	TKO report	G. Heitzman

***NOTE: Special ELT meeting scheduled for 5/15/01 is cancelled.
Special ELT meeting has been scheduled for 5/10/01, 2-4 p.m. to discuss gap analysis.***

Special E.L.T. Minutes

Date: May 10, 2001

Board Room

Attendees:

Leader: Steve Hubbs

Recorder: Bob Miller

Timekeeper/Observer: Karla Teasley

Members: John Huber, Laura Douglas, Jim Wehrle, Greg Heitzman

The ELT met to review the Infrastructure 2001 Opportunity Plan Gap Assessment.

Greg Heitzman presented a high level summary of the assessment focusing on the remaining gaps. The key issues considered by ELT were:

Page 1

Bullet 1 The details of the Annual Inspection are contained in NWT plans and WPPM plans and do not represent a gap on the operating plans.

Bullet 3 GIS support for new Work Management, system will be limited to providing the data architectures.

Bullet 6 **Don McKay and Jim Brammell will work together to finalize the security policy and design parameters.**

Bullet 8 **Business Development gap needs further ELT attention.**

Page 2

Bullet 3 Steve Hubbs and Greg Heitzman will address CHPS 42" Header replacement.

Bullet 11 **Bardstown Tank needs further ELT attention.**

Bullet 12 Professional Service Procurement Policy needs to be addressed following alignment of Procurement Process.

Page 3

Bullet 4 "Errors in Assignment" items need to be corrected on MYAPs and gap assessment filters.

E.L.T. Meeting Minutes

Date: May 14, 2001

Attendees:

Leader: Karla Teasly

Recorder: Bob Miller

Timekeeper/Observer: Greg Heitzman

Members: John Huber, Jim Wehrle, Laura Douglas, Bill Meeks

Minutes and Agenda.

Approval of the minutes was deferred pending production of minutes reflecting recent changes. The agenda was approved as presented.

Cost Reduction Report.

The ELT agreed to review the proposed reduction measures and advise each CBSO regarding the impact. The concept considered was "consult with right appeal." The ELT agreed to maintain the 2% target for reduction.

Serving Customers: Karla Teasly intends to move forward with all reductions, noting that the labor reductions may change through the posting process.

Infrastructure: Greg Heitzman noted several items that will be removed from the reduction list, while still maintaining the 2% target. He will publish an updated list. Bill Meeks encouraged careful review of labor reductions by developing plans on how work units will be completed. He expressed strong concern about maintaining productivity gains and ensuring work being completed on time.

Legal: Laura Douglas will make the cost reductions as presented.

Producing and Developing Water: Bob Miller gave the cost reduction report for Producing and Developing Water in Steve Hubb's absence. The group stated that during the May Board Mtg., the Board expressed its strong desire to maintain current treatment levels. The savings categories are:

- 1.) Contractual services. \$100K for reservoir cleaning and 66K for ISO Compliance Services. Note that Jack Wang's area is \$30K over budget. Therefore the total savings in this category will be \$136K.
- 2.) Labor: A presented saving of \$94K. This cost saving includes a \$54K saving by not filling the flushing Crew and a \$28.6K savings by not filling a vacant labor position.

ELT the discussed PDW's suggestion that ISO consulting costs be delayed. However, ELT also acknowledges that ISO compliance in this area is important to the company. John stated that he would suggest this matter with Steve. ELT also acknowledged that there will be a \$233K overage in PDW due to chemical costs.

Business Resources: Bob then presented the cost savings proposal from his core.

- 1.) Bob indicated that the company planned not to use the contingency this year. The total contingency is \$565,000. Bob committed to provide additional information as soon as possible regarding compilation of the vacancy credit.

Bob also stated that it is his assumption that for the balance of the year, our claims experience will be consistent with budget.

Plans also call for the process realignment, which will save FTEs. Detailed plans will be presented for changes before any movement occurs.

The ELT extensively discussed how to establish accountability for reaching these cost reduction initiatives. Greg Heitzman noted that the quarterly review of ELT shared goals will be held soon and that the wording for the goal can be established then. The ELT agreed that the WPPM's for CBSO's and BSO's include a component for meeting the CORE BUSINESS SYSTEM BUDGET.

Note: The ELT agreed for CSBO's to assign timelines for cost reduction items, due to Bob Miller by end-of-week.

Facilitator: Nora Freeman (On Call)
Recorder: Joan Malone
Timekeeper: Bill Meeks
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, John Anderson, Sandra Beyerle, Joan Malone, Glen Mudd

Agenda Topics

9:00-9:10 AM Review Minutes and Agenda OC Approval of Minutes and Agenda Steve Hubbs

Discussion: Minutes from the May 7 ELT meeting were approved.
Minutes from the May 10 Special ELT meeting were approved.
Minutes from the May 14, ELT meeting were approved.

9:10-9:55 AM Gap Assessment in Serving Customers OC: Shared Information Karla Teasley

Discussion: Karla Teasley provided a copy and discussed her Gap Assessment Response for the Serving Customers Core. Under C1, a gap was cited under Diversity Plan under Communications Support. This is being addressed within the existing operating plan.

Under C2 and C3, Karla discussed responses to gaps identified. No plans to revise these systems' operating plans at this time.

Conclusions: No resources gaps and no cross-core issues to be addressed. All gaps cited are being addressed in the operating plans.

Action items: No further action required. **Person responsible:** Deadline:

9:55-10:30 AM Cost Reductions - Finalize Target Numbers by Core and System Bob Miller

Discussion: Bob Miller provided a copy and discussed the 2001 O&M Budget Actual V. Target. The column titled 2001 Target reflects budget cuts proposed. The column titled 2001 Budget are the figures the Board approved. The report does not take into account expenditures in May.

Conclusions: For some areas, we will continue to operate over budget even with the budget cuts.

Action items: Bob will add footnotes as discussed in the meeting and an explanation of "contingency." He will get an updated draft to ELT. **Person responsible:** Deadline:
Bob Miller

An explanation of "contingency" and "vacancy credits" will be discussed at the 6/4/01 ELT meeting.

Bob may add a column titled "Extra Labor" for KOT, SAH, and GCH.

Bob to update with Greg's numbers and develop an explanation for those allocated numbers and add a column for cost additions.

10:45-11:30 AM	Review 2001 Year End Income Statement Forecast	Steve Hubbs
<u>Discussion:</u> Bob provided a copy and discussed the Revised 2001 Forecast Vs. 2001 Budget.		
<u>Conclusions:</u> Leaving any variance for O&M and irrigation water sales out of the picture, the forecast is for a good year this year. Bob noted that the financial gains realized by the refinancing was our owner's to control. The company still has an obligation to operate within budget. ELT discussed the merits of presenting a business case for expanding our regionalization strategy leveraging the gains realized from the refinancing. This will be discussed at a later ELT meeting.		
<u>Action items:</u> Greg will work with Ralph McCord to prepare a proposed business case for expanding water sales and use funding from the refinancing savings to fund additional needed resources.	<u>Person responsible:</u> Greg Heitzman	Deadline: early July
11:30-11:45 AM	Review New Vehicle Accident Policy OC: Approve New Policy	Sandra Beyerle
<u>Discussion:</u> Sandy Beyerle, Glen Mudd, and John Anderson provided a copy and discussed the Draft Revised Vehicular Accident Policy.		
<u>Conclusions:</u> A subcommittee consisting of Bob Miller, Jim Wehrle, and Bill Meeks, in consultation with John Huber, was formed to analyze the policy.		
<u>Action items:</u> Analyze the policy, especially Items 4.3, 5.3, 5.4, and the Preventative Action Matrix. Bring final draft of policy to ELT for approval.	<u>Person responsible:</u> <i>Subcommittee:</i> Bob Miller, Jim Wehrle, Bill Meeks, in consultation with John Huber	Deadline:
Compare the policy to industry standards and determine if the policy is too lenient and how the policy will affect employees who are now "on the Matrix."	HR	
11:45-12:00 PM	Housekeeping	Steve Hubbs
<u>Discussion:</u> TKO Report. The meeting started a few minutes late. We finished early on every item with the exception of the Vehicular Accident Policy which ran over the time allotted. There was even distribution of comments.		

Agenda for Monday June 3, 2001

Agenda Topics

Review Minutes and Agenda, OC Approval of Minutes and Agenda Bill Meeks

Discussion: Minutes from the June 21, 2001 meeting were approved.

Flexibility in Changing Operating Plans, OC: Shared Bob Miller
Information

Discussion: Bob provided copies of and discussed a draft model, Flexibility in Changing Operating Plans. The model uses the Ginsberg Empowerment Model..

Conclusions: The group decided on revisions to the draft as follows: Item 1, CEO column, change C to D; Item 3, CEO column, change C to D; Item 4, letters across the matrix should read N, D, A, W, C. N; Item 4, the group chose Alternative 1.

Action items: Kathy will use the revised model to build a process to communicate to BSOs so they will have the mechanics of how this works. The process to communicate will be discussed at June 11 ELT meeting.

Person responsible:	Deadline:
Kathy	In time for 6/11/01 ELT meeting

Review of Vacancy Credit and Contingency, OC: Shared Bob Miller
Information

Discussion: Bob provided copies of and discussed Comments on Contingency and Vacancy Credit for ELT Meeting June 4, 2001 and LWC Forecast of 2001 Expenses following April Financial Statements. The LWC Forecast of 2001 Expenses had two versions of 2001 O&M Budget Actual Vs. Target attached—one which assumes no budget transfers due to Vacancy Credit and one which assumes budgeted Contingency is fully expended. Bob recommended using the version which assumes no budget transfers due to Vacancy Credit. Bob explained how he came up with the 2001 Target. The group discussed other changes to the document.

Conclusions: Hold BSOs accountable for reaching Colum E, "2001 Target."

Action items: Bob will simplify the example the group decided to use, add the footnote the group discussed regarding Vacancy Credits, and get it to ELT members so they can get to the BSOs this week. It will be in spreadsheet form showing the formulas used.

Person responsible:	Deadline:
Bob Miller	This week

Decide how we will deal with the \$315,000 budget issues (Vacancy Credit) ELT

Team Evaluation, OC: Completed evaluations to Nora		Nora Freeman
Discussion: Nora provided copies of evaluation forms: ELT Team Principles and Groundrules, Quarterly Team Assessment of Facilitator, ELT Team Effectiveness Review Retreat #2, May 31, 2001, Team Effectiveness Survey, ELT Effectiveness Survey-Team Principles.		
Action items: ELT members should complete the forms and return to Nora by Wednesday of this week. This will be discussed at the June 11 ELT meeting.	Person responsible: Each ELT Member	Deadline: Wed. A.M.
Closed Session, OC: Shared information		John Huber
Discussion: Mr. Huber discussed an item in closed session..		
Partnership Council		Dwayne Clark
Discussion: Dwayne gave the PC report, which advised ELT that both the perception and reality of budget cuts impacting those executive leadership roles was important for modeling impact and behavior to the organization. The PC also suggests ELT work to assure frontline employees have the opportunity to suggest budget cuts or alternative budget cuts to the Company.		
Conclusions: We need to involve NWTs/frontline employees in the budget cutting process. We should consider how we get frontline employees involved in cost control.		
Action items:	Person responsible:	Deadline:
Go to BSOs and use organization structure to notify/involve.	CBSOs	
RKM will use e-mail/NewsLeaks to notify and extend invitation for input re budget cuts.	Bob Miller	
Use 2001-2002 budget cycle to allow input from NWTs.	CBSOs	

Recorder Role, Assignment of Role/Shared Information John Huber

Discussion: Joan Malone will serve as Recorder at ELT meetings through the upcoming quarter. The role will be reviewed at the end of the quarter. Joan will prepare the minutes and forward to Barbara Moir for posting on the Intranet. Persons having handouts at the meetings should provide Barbara Moir an electronic copy to be posted with the minutes on the Intranet. Joan will keep a hard copy of handouts in her file.

Action items:	Person responsible:	Deadline:
Provide Barbara Moir e-copy of handouts.	ELT/various others	
Prepare minutes of ELT meetings.	Joan Malone	
Post minutes and handouts to Intranet.	Barbara Moir	

Agenda for 6/11/01 Meeting

9:00-9:10 A.M.	Review minutes/agenda	OC: Approval of minutes/agenda	S. Hubbs
9:10-9:40 A.M.	Budget Process	OC: Shared information	K. Getsinger

Attending: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle

Please bring: Agenda

Agenda Topics

9:00-9:10 AM **Review Minutes and Agenda OC Approval of Minutes and Agenda** Bill Meeks

Discussion: Minutes approved from 6-3-01, and agenda accepted as presented above.

9:10-10:05 AM **2001 Budget Process OC: Shared Information** Kathy Getsinger

Discussion: Kathy presented a process for making changes to the current year operating plans (attachment 1). Kathy also presented the timeline for changing the 2001 operating plans reflecting the revised budget numbers and changes. ELT suggested changes to clarify the process.

Kathy distributed guidelines for operational planning for 2002 (attachment 2). The 3 page (or less) synoptic level operating plan is to highlight the change agenda at the system level affecting the budget from 2001 to 2002, allowing ELT to assess if all critical items are covered.

Conclusions: Current-year operations plan: flow chart to be modified to reflect clarified routine process. When changes are made, the BSO making the change will notify all other BSOs and CBSOs of changes by e-mail message, stating briefly the nature of the changes.

Operations Planning for 2001: ELT accepted the concepts presented.

Action items:	Person responsible:	Deadline:
Revise the flowchart to reflect changes from ELT.	Kathy Getsinger	6-18-01

10:20-11:10 AM	Greenbacks Report OC: Costs & Performance update	Richard Royse and Sue Purdy
<p>Discussion: Richard distributed a handout (attachments 3) for Critical Dates for 2002 budget and Financial Plans. ELT is to hold open August 23 and 24 (capital review), August 28/29/20 (O&M review), and September 6 and 7 (O&M follow-up). Richard also distributed starting assumptions for 2002 budgeting (attachment 4). The revenue stream from the rate increase for 2002 assumes an income stream reflecting what we saw this January and February 2001 (ramped in). Jim W. asked that the impact of WPPM be considered in setting labor cost assumptions. The baseline assumption for the 2002 rate increase will be set at 3.0%. Richard will re-work the 2002 forecasts and provide to ELT.</p> <p>Richard distributed the May 2001 Financial Highlights. Water consumption is down over last year by about 0.5%, with a significant increase in water usage in the "in lieu of taxes" account. Net water consumption very close to "at budget" for the year to date. Expenses are \$950,000 over budget, compared to \$282,000 last month. ELT needs to reconsider strategy for operating within budget.</p> <p>Conclusions: ELT needs to determine where the cost increases have come from, and how to adjust spending to compensate. ELT needs to determine common cause and special variances causing budget overruns.</p>		
Action items:	Person responsible:	Deadline:
ELT special meeting, 2001 budget overrun	Billy Meeks	6-13-01
11:10-11:25 AM	BWW Issues OC: Shared Information	John Huber
Discussion: Refer to Board books...topic cancelled.		
11:25-11:45 AM	Facilitation Assessment Results OC: Shared Information	Nora Freeman
Discussion: Defferred		
11:45-12:00 PM	Housekeeping	Bill Meeks
Discussion: Billy will set the agenda for the next regular ELT meeting 6-25-01.		

Minutes

ELT Meeting

6/25/01

9:00 AM to 11:45 AM

Board Room

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Bob Miller
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bill Meeks, Karla Teasley, Jim Wehrle, Nora Freeman; Amber Halloran, Joan Malone
Please bring: Agenda

Agenda Topics

9:00-9:10 AM Review Minutes and Agenda OC Approval of Minutes and Agenda Bill Meeks

Discussion: Minutes of the June 18, 2001 meeting were approved.

Quarterly Review of ELT Goals OC: Shared Information Nora Freeman

Discussion: Nora provided copies of and discussed second quarter 2001 "to date" results for President and VP shared goals.

Conclusions: All goals are Level 3 or above with the exception of Goal G, "Control Cost of Risk." This goal should be placed in the BIN list for followup.

Action items:	Person responsible:	Deadline:
Present 1st. quarter Incentive Plan results to BSOC at next BSOC meeting. Presentation should include Diversity results. ELT should also attend this BSOC meeting .	John Huber	
Revise the Executive Incentives and revise the colors in the Level Achieved column so it will be easier to see if the Level Achieved is "met" or "unmet."	Nora Freeman	
Work with HR on a 1-page summary of Diversity placement.	Nora Freeman	
Place Goal G in BIN list.	Bill Meeks	

Team Effectiveness Survey Review OC: Shared Information Nora Freeman

Discussion: Nora provided copies of and discussed the ELT Team Effectiveness Survey results and ELT Team Principles Survey results.

Conclusions: The Team Effectiveness Survey results averaged 3.7, and the Team Principles Survey results averaged 3.8.

Recycling

Karla Teasley

Discussion: Karla briefly discussed recycling efforts at LWC.

Conclusions: Recycling will be considered for the 2002 Budget.

Action items:

Advise Recycling Team that this will be considered for the 2002 Budget.

Determine cost of recycling /make recommendation to ELT.

Determine who will be responsible for recycling (which system).

Develop specific Recycling Policy.

Person responsible:

Karla Tasley

Recycling Team/KOT

ELT

Recycling TeamLMD

Deadline:

Closed Session

Steve Hubbs

Discussion: Steve updated ELT members on the INAAP purchase/due diligence and discussed coliform.

Agenda for July 2 ELT meeting:

9:00-9:10 a.m.	Review agenda/approve minutes	Bill Meeks
9:10-9:40 a.m.	Partnership Council OC: Shared information	PC Leader
9:40-10:00 a.m.	Financial Highlights (Budget Cut Proposals) OC: Shared information	Bob Miller/CBSOs
10:00-10:15 a.m.	Break	
10:15-11:15 a.m.	Financial Highlights OC: Shared information	Bob Miller/CBSOs
11:15-11:45 a.m.	Open Time	
11:45 a.m.-12:00 noon	Housekpeeing	Bill Meeks

Attendees: Laura Douglas, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Kathy Getsinger, Greg Heitzman (9:40)
Please bring: Agenda

Agenda Topics

9:00-9:10 AM Review Minutes and Agenda OC Approval of Minutes and Agenda Bill Meeks

Discussion: Minutes were reviewed and approved. Agenda was approved as presented.

9:10-10:10 AM New MYAPs for 2002 OC: Plan Consensus Kathy Getsinger

Discussion: The group discussed the current status of the planning process through Friday, June 30. Vince G. provided the MYAP update for 2002 for Enhancing Customer Satisfaction. Modifications to the MYAP update from last Friday were discussed and approved by ELT. Jim noted that he is working a policy regarding temporary positions, focusing on using temporary employees only for vacant budgetted positions, and requested feedback from BSOs on the concept.

Remaining activities for Strategic Planning includes July 11 meeting on new MYAPs. Remaining items to be discussed are the resources and goals for 2002 in the QWL strategy in the Strategic Plan.

Conclusions:

Action items:	Person responsible:	Deadline:
Provide details for QWL initiative, resources, 2002 goals/outcomes	Jim Wehrle	July 11
Provide summary of items needed to complete SP process (ASAP)	Kathy Getsinger	July 09

10:20-11:45 AM Bob Miller/CBSOs

Discussion: ELT discussed another round of costs reductions to meet current cost overruns.

Concern was expressed over the amount spent on contract and materials accounts. ELT agreed to review the contracts and materials accounts for cost reductions in this area.

The individual ELT members will bring the 2% cost reductions itemized (above the current 2% already identified) to the next ELT meeting for review for further cost reductions

Conclusions: We still need to work towards meeting budget in 2001.

Action items:	Person responsible:	Deadline:
Provide a summary of Contracts and Materials Accounts	Bob Miller	July 9
Provide an additional 2% cost reduction summary per area	VPs	July 9

11:45-12:00 PM

Housekeeping

Bill Meeks

Discussion: AGENDA: July 9, 2001

Please bring: Agenda

Agenda Topics

Review Minutes and Agenda OC Approval of Minutes and Bill Meeks
Agenda

Discussion: Minutes of 7/2/01 meeting were reviewed and approved. Agenda for 7/9/01 was approved.

Partnership Council OC: Shared information Bobbi Elmore/Nora Freeman

Discussion: Bobbi Elmore/Nora Freeman presented information and made suggestions regarding Ozone Action Days. They discussed a shortened workweek, extending the free TARC pass program to all LWC locations, and employee participation in ridesharing programs.

Bobbi/Nora also discussed the LWC Policies Manual. It is posted on the Intranet, but several LWC employees do not have access to the Intranet.

Conclusions: A 10-hour, 4-day workweek will not be considered at this time.

Action items:	Person responsible:	Deadline:
Check with TARC to see if bus service to Allmond Ave. can be improved.	John Huber	
Check into making TARC passes available to <u>all</u> LWC employees, then communicate to employees if the TARC passes are available to <u>all</u> employees.	Jim Wehrle/KOT/M. Butler	
Investigate/communicate to employees info. on ridesharing/carpooling--what it is; how it works.	PC/KOT/M. Butler	
Have Jim Brammell look into the lighting schedule to save electricity.	Greg Heitzman	
Evaluate if shutting computers down at night would save energy—than notify employecs via NewsLeaks.	RKM/IT/KOT/M. Butler	
Laura will distribute copies of LWC's Policies Manual to all BSOs. Greg will provide copies to Middletown and Buttit County. Steve will provide a copy to Payne Plant.	LMD/GCH/SAH	

June Financial Highlights

Richard Royse/Sue Purdy

Discussion: Richard Royse presented copies of and discussed the Financial Highlights for June 2001.

Conclusions: Unaccounted-for water has been rising over the past few months. Water consumption through June, 2001 was 538 million gallons lower than a year ago. O&M expense through June, 2001 was \$1.5 million higher than same period last year, and higher than budget by \$872 thousand.

<i>Action items:</i>	<i>Person responsible:</i>	<i>Deadline:</i>
Check to see if we are appropriately calibrating meters.	Steve Hubbs	
Followup on status of work in progress to change water meters/check consumption at Waterfront Development Corporation.	KOT/SAH	

Strategic Plan

Kathy Getsinger

Discussion: Kathy Getsinger provided copies of and discussed the following: Comparison of 2002 Draft with 2001 Strategic Plan, Louisville Water Company 2002-2006 Strategic Plan, and 2002 Objectives for Strategic Plan Initiatives.

Conclusions:

<i>Action items:</i>	<i>Person responsible:</i>	<i>Deadline:</i>

**Continued Financial Highlights—Forecast for 2001-2001
Budget Parameters**

Bob Miller

Discussion: Bob Miller provided copies of 2001 Operations and Maintenance Budget Actual Vs. Target—Assumes Budgeted Contingency is in Reserve and 2002 Estimated Changes in Sources and Uses of Revenue. Karla Teasley and Steve Hubbs presented additional budget cuts from their respective cores.

Conclusions: Fourth quarter CSI data will not be cut from Karla's budget.

Bob Miller will make a report to the Board at their 7/10/01 meeting as follows: "At this point, ELT's commitment is that our total spending for O&M will be equal to the total amount budgeted. We will be spending the contingency of \$250,000."

Regarding Bob's handout, 2002 Estimated Changes in Sources and Uses of Revenue, this is a work in progress—no conclusions.

<i>Action items:</i>	<i>Person responsible:</i>	<i>Deadline:</i>
At 7/16/01 ELT meeting, discuss, consider, and evaluate if we should take \$750,000 out of Infrastructure Reserve and place it in O&M Budget for 2002.	ELT/Bob Miller	7/16/01
At 7/16/01 ELT meeting, discuss BSOC project of budget funding needs for 2002.	ELT	7/16/01
At 7/16/01 ELT meeting, discuss Bob Miller's handout, 2002 Estimated Changes in Sources and Uses of Revenue.	ELT/Bob Miller	7/16/01

Please bring: Agenda

Agenda Topics

Review Minutes and Agenda OC Approval of Minutes and Agenda Bill Meeks

Discussion: Minutes of the July 9, 2001 meeting were approved. Agenda for July 16, 2001 was approved.

Budget Parameters Bob Miller

Discussion: Bob Miller provided copies of and discussed the 2002 Estimated Changes in Sources and Uses of Revenue.

Conclusions: Establish 2% budget target and require business case be presented for anything over that amount. Include in the budget plans for productivity improvements of 2%.

Action items:	Person responsible:	Deadline:
Communicate Conclusions above to all BSOs.	CBSOs	

Cost Reduction Review Bob Miller

Discussion: Bob Miller provided copies of and discussed the (updated) LWC 2001 Operations and Maintenance Budget Actual Vs. Target, Assumes Contingency Fund is Fully Expended.

Conclusions: Link this to WPPM as an incentive for BSOs. Give extra credit for areas coming in under original budget.

Action items:	Person responsible:	Deadline:
See Conclusions above.	CBSOs	

Closed Session Jim Wehrle

Discussion: Jim Wehrle discussed an item in closed session.

Conclusions:

Action items:	Person responsible:	Deadline:
Jim Wehrle and Laura Douglas will investigate and discuss with ELT at the July 23, 2001 meeting.	JJW/LMD	Prior to 7/23/01

Agenda for July 23 ELT meeting:

ELT members will submit agenda items to Bill Meeks, who will prepare agenda.

E.L.T. Meeting Minutes

Date: July 23, 2001

Board Room

Attendees:

Leader: Karla Teasley

Recorder: Bob Miller

Timekeeper/Observer: Laura Douglas

Members: Jim Wehrle, Greg Heitzman, John Huber

Minutes Approved as Revised. The minutes from the previous meeting should be dated July 16, 2001 rather than June 25, 2001. Otherwise, the minutes were approved.

Agenda Approved. The agenda was approved with minor modifications.

Partnership Council Boundaries. Laura Douglas briefed the ELT on Partnership Council Boundaries. The ELT discussed alternatives for continuing efforts for building Partnership Among Employees. The ELT considered: 1) ongoing employee involvement on an individual or unstructured group basis; 2) establishing task-specific ad hoc groups that focus on a particular issue on a short-term basis and then go out of existence; 3) using staff meetings to address communications, efficiency and productivity issues; 4) increased participation of natural work teams. The ELT emphasized that the changes contemplated did not diminish the commitment to being a Total Quality Organization.

Budget Parameters. Bob Miller handout given: "2002" Est. Changes in Source of Revenue" (dated 7-20-01) This updates/changes last week's handout: Shows taking 700K from Inf. Reserve, which takes O&M available up to 2.3MM from prior 1.6MM (6% vs. 4% increase). It was noted that the budget also has more flexibility due to bond refinancing. Bob gave a handout re O&M cost per customer after adjustments for inflation. Another handout was given re Op revenue per 1000 gals sold, adjusted for inflation. Both of these graphs were relatively flat, after adjustment, despite improvements. Another handout given showing Historical O&M Budget vs. Actual Expenses, plus an adjusted line for a hypothetical 700K addition per year as of 1994, which levels the differences significantly. The ELT supported using this data in developing budget parameters. Budget guidelines to BSO's remain unchanged.

Redeployment Issues. The ELT reviewed issues related to the Redeployment Process.

Next Level Plan 2002 Initiatives. The ELT deferred discussion of this topic due to lack of time.

Minutes

ELT Meeting Minutes

7/30/01
9:00 AM to 12:00 PM
Board Room

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)

Please bring: Agenda

Agenda Topics

Review Minutes and Agenda OC Approval of Minutes and Agenda Bill Meeks

Discussion: Minutes from the July 23, 2001 meeting were approved. Agenda for July 30, 2001 meeting was approved.

Discuss Partnership Council Status and Follow-up O/C: Jim Wehrle
Shared information and Agree on Next Steps

Discussion: Jim Wehrle provided copies of e-mails and memos regarding sunsetting of the Partnership Council.

Conclusions: The Company is still focused on having a Partnership among employees. ELT members and John Huber will rotate having regularly scheduled meetings with employees (no more than 12 employees per meeting) from a cross section of the Company. These meetings will be similar to and may replace the Pipeline Meetings which currently are held once each month. Meetings will alternate between A.M. and P.M and will have a prepared agenda with time at the end of the meeting for questions/discussion of other issues.

Items within the scope of the NWTs and SACs are business planning; operating plan execution; process design and improvement; job-related know-how; tools, technology, materials and equipment; SWOT analysis; risk assessment; and risk management. Items outside of the scope of NWTs and SACs are compensation, vacation, and terms of employment.

Action items:	Person responsible:	Deadline:
RKM and JJW will provide recommendations on scheduling the meetings with BSOs, NWTs, and SACs and work on scheduling the employee meetings. They will work with Marianne Butler to put something in <i>NewsLeaks</i> about the meetings.	RKM, JJW, M. Butler	ASAP

Develop form for NWTs and SACs to use, similar to the one the PC used, for bringing issues to ELT.	RKM, JJW
--	----------

Policy Issues O/C Review and Approve Proposed Changes Jim Wehrle/Mike Sturgeon
to Draft Policy

Discussion: Jim Wehrle provided copies of and the group discussed a draft policy.

Conclusions: Some sections of the draft need to be rephrased. Plans for communicating the policy to LWC employees should include examples of what the policy covers and what it does not cover.

Action items:	Person responsible:	Deadline:
JJW and LMD will work to modify the language in the draft and submit for Mr. Huber's approval.	JJW, LMD	

Policy regarding Temporary Agency Workers

Jim Wehrle

Discussion: Jim Wehrle provided copies of a draft policy regarding temporary workers.

Conclusions: Timesheets for temps should be approved/signed and account # provided by the supervisor in the area where the temporary is working rather than by someone in HR.

Action items:

Create action plan for current temps.

Person responsible:

VP of HR and person responsible for temp, in consultation with the Senior Compensation Committee.

Deadline:

2nd Quarter ELT/BSOC/Corporate Performance Award Goal Review O/C: Shared Information; Agree to Follow-up on Identified Gaps in Performance

Nora Freeman and ELT Members

Discussion: Nora provided copies of second quarter 2001 results for 2001 Incentive Plan Goals, 2001 President and VP Shared Goals, and 2001 Corporate Performance Award Goals.

Conclusions: This is our best record in the past couple of years.

Action items:

Rewrite Objective E before Compensation Committee meets on 8-14-01.

Person responsible:

Steve Hubbs

Deadline:

Nora will make recommended changes, e-mail to ELT, and provide copies of the tables for the Compensation Committee meeting.

Nora Freeman

INAAP

Steve Hubbs

Discussion: Steve gave a brief report on environmental issues regarding INAAP.

Agenda for August 6, 2001

Bill Meeks will e-mail agenda.

Minutes

ELT Meeting Minutes

August 6, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Laura Douglas, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Steve Cooper, Barbara Crow, Katie Farrow, Joan Malone
Please bring: Agenda

Agenda Topics

Approve Minutes Bill Meeks

Discussion: Minutes from the 7/30/01 meeting were approved.

ETIR Report Update Katie Farrow

Discussion: Katie provided copies of the Corporate Team Involvement Levels for 2nd Quarter, 2001; Percent of Employees on Teams 1999-2001 by Quarter; and Corporate Team Involvement Levels by Pay Code.

Conclusions: Overall team participation is good, with second quarter overall average participation at 75.5%, up from first quarter overall participation of 72.0%. Eighty percent of the teams are considered active status. Katie will provide a list of inactive status teams for ELT to review. If any of these teams are no longer needed, they will be permanently disbanded.

Action items:	Person responsible:	Deadline:
Provide list of inactive status teams for ELT review.	Katie Farrow	

Pure Tap Bottling Operation Additional Funding Barbara Crow

Discussion: Barbara provided copies of an e-mail wherein she requested an additional \$65,000 during 2001 to accommodate requests for Pure Tap. Barbara also requested the 2002 Budget be increased to \$150,000, which would allow for 300,000 empty bottles and 8,000 filled bottles. The \$100,000 budgeted for 2001 allowed for 200,000 empty bottles and 7,300 cases of filled bottles.

Conclusions: ELT approved Barbara's request for the additional \$65,000 to cover the remainder of 2001.

Action items:	Person responsible:	Deadline:
Communicate to employees why we are funding this increase in budget and not some other endeavors.	KOT/B. Crow/M. Butler	
Take to CAC and explore ways to reduce the cost to LWC--for example, make Pure Tap available at various locations for customer pickup rather than having LWC ship/mail, or ask customers to pay shipping/mailling charges.	B. Crow/KOT	
Decide where the additional \$65,000 for 2001 will come from.	ELT	
Decide whether to approve the requested \$50,000 increase for 2002.	ELT	

Redeployment, Transfer, Reassignment & Termination Policy Jim Wehrle

Discussion: Jim Wehrle provided copies of the reworded policy.

Conclusions: The group discussed minor revisions to the policy, which was adopted on 7/30/01.

Action items:	Person responsible:	Deadline:
Make minor corrections/changes as noted.	LMD	
Communicate to employees that the new policy is forthcoming and request that they replace the existing Redeployment Policy with this new policy.	JJW/M. Butler	
Make the new policy available at all locations where policy manuals are located.	JJW/M. Butler	

Positive Employee Relations Training Jim Wehrle

Discussion: Jim Wehrle showed a video titled "The Story of a New One-Minute Manager" which defines a management style that focuses on both results *and* employees. Mr. Wehrle says this is the sort of thing we want to build into our LWC Leadership Institute. He plans to use the video in the Positive Employee Relations Training at LWC.

Conclusions: The Positive Employee Relations Training is scheduled for Wednesday, 8/15/01, 8:30 a.m.-12:30 p.m. in the Board Room. Rollout to other employees will be scheduled for October, 2001.

Miscellaneous Items Bob Miller

Discussion:

- (1) Bob Miller will attend a meeting in Frankfort Wednesday, 8/8/01, with the PSC and Rural Water Association to discuss System Development Charges for fire services. LWC's policy is not to charge the SDC for fire services.
- (2) Bob noted that the State will need to develop a methodology for water rate equalization when utilities merge. LWC may decide to put our methodology in front of the PSC and other agencies/utilities.
- (3) Kathy Getsinger's last day was 8/3/01. Bob has realigned Budgeting and Ratemaking to Supplying Financial Resources. For the time being, Bob will retain responsibility for Planning.

Action items:	Person responsible:	Deadline:
Reevaluate the Planning process—get input from BSOs.	Bob Miller	

INAAP Report Steve Hubbs

Steve gave a brief update on INAAP.

Agenda for 8/13/01 ELT Meeting

9:00-9:10 a.m.	Review Agenda	Bill Meeks
9:10-10:10 a.m.	MDB Update on Goals	Cindy Kowalski

Agenda Topics

Review Minutes and Agenda OC Approval of Minutes and Agenda Bill Meeks

Discussion: Minutes from the August 6 ELT meeting were approved.

MBD Update on Goals

Cindy Kowalski

Discussion: Cindy, Steve, and Rhonda had a handout, "MBD Team Presentation to the ELT." They gave a six-month overview of M/W/HBE. MBE and HBE spending for the first half of 2001, at 2.5% and 0.008% respectively, are below the targets of 15% and 0.5% respectively. WBE spending, at 7.2%, is above the goal of 5%.

Conclusions: (1) We should reconsider how we calculate the M/W/HBE spending. (2) We should continue to work on benchmarking. (3) We should consider restructuring the MDB Team.

Action items:

Person responsible:

Deadline:

Reconsider how we calculate the M/W/HBE spending.

ELT/MBD Team

Place KOT's issues regarding HBE spending in her core in the BIN list.

Bill Meeks

Bring recommendations on restructuring the MBD Team to a Nov., 2001, ELT meeting.

MBD Team

Establish new M/W/HBE allocations for each core business system after personnel reassignments are effective in January, 2002.

ELT

Continue to work on benchmarking

MBD Team

Secretarial Support

Jim Wehrle

Discussion: Jim Wehrle provided copies of an e-mail regarding miscellaneous secretarial issues. He proposed adding a full-time employee—an executive secretary to support Mr. Wehrle, Audit, HR, and Diversity. The cost to LWC for the remainder of 2001 would be \$12,000-15,000.

Conclusions: ELT agreed that Jim should proceed with hiring an executive secretary. He should quantify the cost and look at ways to offset the cost.

Action items:

Person responsible:

Deadline:

Proceed with hiring of executive secretary.

Jim Wehrle

ASAP

Quantify cost and look at ways to offset.

Jim Wehrle

ASAP

Greenbacks Report

Bob Miller

Discussion: Bob provided copies of the LWC Financial Highlights for July, 2001, and LWC 2001 O&M Budget Allocation (based on five-year average except for July and August).

Conclusions: Water consumption through July, 2001 was 1.2 billion gallons lower than a year ago. O&M expense through July, 2001 was \$1.7 million higher than the same period last year, and higher than budget by \$708 thousand. Other Operating Expenses through July were \$2 million higher than the same period last year and \$1.1 million higher than budget.

Bob will report to the Board at tomorrow's meeting that our revised budget target will be \$200,000 over original budget due to two workers compensation claims (one claim having been "resurrected" from several years ago).

Nitrification

Steve Hubbs

Discussion: Steve Hubbs discussed the nitrification problem at the Cardinal Hill tank and the treatment plan for eliminating the nitrifying bacteria. He does not anticipate a significant increase in O&M costs due to the nitrification.

Review Board Items

Discussion: John Huber will discuss strategies from the LWC Strategic Plan for 2002-2006. Jim Wehrle will report on the Compensation Committee meeting scheduled for 11:00 a.m. tomorrow, just prior to the Board meeting. Bob Miller will report to the Board that LWC's revised target for 2001 budget will be \$200,000 over original budget due to two workers compensation claims (one claim having been "resurrected" from several years ago).

Agenda for Monday August 20, 2001

Bill Meeks will e-mail the agenda when he has it finalized.

Agenda Topics

Approve Minutes

Bill Meeks

Discussion: Minutes from the 8/13/01 ELT meeting were approved.

Empowerment Model Update

Nora Freeman

Discussion: Nora provided copies of and discussed the Empowerment Pilot Summary January-July, 2001.

Conclusions: There is no "one size fits all" empowerment. Each team is unique—levels of empowerment may vary regarding boundaries. Everyone must know their boundaries and have appropriate training. We must have policies, plans and budgets in place. It should be flexible, be a requirement, and be auditable.

Teams should develop flow charts showing points of decision from beginning to end. The process should be audited to identify gaps and processes by which to close the gaps

Empowerment is a key risk management strategy. In order to have effective systems-based management, we must make sure we are not missing opportunities because people are not appropriately empowered and that we are not taking unmanaged risks. We should create this in a way that BSOs, POs, and ELT consciously think about empowerment in all the things they do and that we have enough structure around it so we know it is being done and we are using it effectively.

ELT agreed to the combination of actions recommended in the summary and to extend the pilot to a broader cross section of the Company. Next year, all BSOs and POs should be involved in some pilot exercise. We should put together a module and roll out at either the system or process level.

It was agreed to bring this back on a future ELT agenda and hear from one or more BSO(s) or PO(s) who was (were) involved in the pilot regarding advantages, benefits and challenges. This will give us more perspective on how to apply to other areas.

Action items:

Person responsible:

Deadline:

Formulate plan based on the input from discussion in today's ELT meeting and bring back to ELT along with input from BSOs and POs who were involved in the pilot.

N. Freeman/BSOs/POs

Video, "How to Build Better Performance"

Jim Wehrle

Discussion: Jim Wehrle showed a video on coaching titled "How to build Better Performance," which discusses constructive criticism and uses six building blocks: (1) Use criticism—don't be afraid to use constructive criticism as a training tool. (2) Criticize privately. (3) Criticize the problem—not the person. (4) Get all the facts. (5) Ask questions and give the employee a chance to respond—listen to the employee. (6) Set realistic goals for improvement. The video will be used in BSO and PO training at LWC.

Update on INAAP

John Huber

Discussion: John Huber gave an update on the INAAP due diligence.

Bill Meeks will e-mail the agenda for the 8/27/01 ELT meeting.

REMINDER: Please bring a copy of ELT roles to the 8/27/01 ELT meeting.

Minutes

ELT Meeting Minutes

August 27, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Nora Freeman, Joan Malone, Jami Young

AGENDA TOPICS

9:00-9:10 AM

Approve Minutes

Bill Meeks

Discussion: ELT approved minutes from the 8/20/01 meeting.

**O&M Budget Gaps 2001; Review Plans for ELT
Approach to 2002; Over-Budgeted Prioritization by
System Core**

Bob Miller

Discussion: The group discussed how to offset the \$65,000 additional funds needed in the 2001 Budget to cover additional Pure Tap expenses and the approximately \$15,000 additional funds to cover hiring a secretary for Jim Wehrle. The additional cost of Pure Tap may be prorated among all systems. Jim Wehrle will find ways to cut \$15,000 from inside HR to cover the 2001 cost for hiring his secretary. These items will be evaluated further when the updated forecast is available 8/28/01.

We should continue our focus on reducing costs wherever possible. Additional ways to reduce costs are: Relook at temporary workers—an item which will reduce costs quickly. Look at chemical costs. Reduce travel expenses. Everyone should look at costs for November/December 2000. If we're headed in the wrong direction for 2001, look at what we can do differently in November/December 2001 to control costs.

Bob Miller referred to page 75 from the August Board book, "LWC 2001 O&M Budget Allocation." He suggested CBSOs discuss this with their BSOs. He also referred to page 111 from the August Board book regarding key budget issues for 2002.

The group discussed additional revenue for fees and penalties—\$700,000-\$800,000—which is accompanied by additional expenses of about \$100,000. We should consider offsetting the \$100,000 additional costs, which impacts Kevin Grant's and Ed Chestnut's systems. We have been absorbing this expense. Ed and Kevin will quantify the \$100,000 expense and provide a summary. It is a good decision to spend \$100,000 to bring in \$700,000-\$800,000 in revenue.

Bob Miller furnished copies of "Schedule A-3 of the Preliminary 2002 Operating and Maintenance Budget" and the schedule for O&M budget hearings this week.

Bob noted that the budget has these variables: rate increases, water sales, O&M expense, and return on equity.

System owners will present their budgets at 2% at the core level and make requests for anything over 2%, providing a basis for the request. They will list items over 2% and the dollar amounts and list as existing or new items. ELT will rank the items. If certain items don't make the cut, we will need plans to change operations so we will NOT spend those dollars. Possibly some items could come out of contingency. Items eligible for contingency are items that cannot be anticipated or controlled—unfunded or underbudgeted items such as fuel. Contingency is a corporate risk management tool.

Action items:	Person responsible:	Deadline:
Quantify \$100,000 cost to generate \$700,000-\$800,000 revenue for fees/penalties.	Teasley/Chestnut/Grant	
Find ways from inside HR to offset \$15,000 for 2001 cost of secretary.	Wehrle	

Review Bin List

ELT

Discussion: This item was deferred to a later ELT meeting so the group could continue with budget discussions.

Review Revised Employee Status Policy

**Jim Wehrle / Mike
Sturgeon**

Discussion: Mr. Wehrle provided copies of the revised Employment Status Policy (#R2-36). He discussed changes to the policy and requested consensus to move forward with the revised policy.

Conclusions: In the future, all invoices for temps will go directly to the area utilizing the temp. The area utilizing the temp will process the invoice for payment.

Mr. Wehrle confirmed that the revised Employment Status Policy in no way interferes with or affects our relationships or contracts with consulting engineers, professional services firms, or independent contractors.

ELT members want to be assured that the operating areas are adequately represented on the Senior Compensation Committee (SCC).

ELT approved the policy with the understanding that Jim will look at variables dealing with operating areas having representation on the SCC. The SCC will try to deal with this in an expeditious manner.

Action items:	Person responsible:	Deadline:
Look at operating areas having representation on the SCC.	J. Wehrle/SCC	

Agenda for September 10, 2001: Bill Meeks will e-mail the agenda when he has it finalized.

Revised Minutes

Minutes

ELT Meeting Minutes

September 10, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle

Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bob Miller, Karla Teasley, Jim Wehrle, Shawna Denny, Amber Halloran, Joan Malone, Sue Purdy, Richard Royse

Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes from the August 27, 2001 ELT meeting were approved.

Metro United Way Campaign

Shawna Denny

Discussion: Shawna Denny addressed the group at the beginning of the meeting regarding volunteers to help with the MUW campaign. She has had a very low response to her e-mail requesting volunteers. She needs a minimum of 1-2 from each core. The volunteers will need to devote 10-20 hours during the first week in October and 1-2 hours per week after that to the campaign.

Conclusions: The group noted that union representation is also needed among the volunteers. Shawna will send another e-mail and the CBSOs will discuss with their BSOs.

Action items:

Person responsible: Deadline:

Send second e-mail requesting volunteers.

Shawna Denny

CBSOs discuss with their BSOs.

CBSOs

Results from Team Assessment Survey

Nora Freeman

Discussion: This item was deferred to a later ELT meeting so the group could discuss budget issues.

Board Issues

John Huber

Discussion: Mr. Huber discussed items to go before the Board on Tuesday, September 11, 2001. They include: the Strategic Plan, liner installation at Crescent Hill, the 2001 Annual Inspection Report, and budget issues.

Greenbacks Report

Richard Royse

Discussion: Richard provided copies of and discussed the LWC Financial Highlights from August, 2001. Water consumption through August, 2001 was 613 million gallons lower than a year ago. The percent of unaccounted-for water through August was 17.86% compared to last year's 15.74%. O&M expense through August, 2001 was \$1.4 million higher than the same period last year, and higher than budget by \$626 thousand. Other operating expenses through August were \$2.5 million higher than the same period last year and \$1.5 million higher than budget.

Richard has added charts on the back of Page 3 showing YTD O&M monthly variance, budget to actual; and YTD net income monthly variance, budget to actual.

Conclusions: Unaccounted-for water should be 15% or less. We should look into this and explain the high percentage of unaccounted-for water. The flushing program contributes to a portion of the percentage over 15%.

West Shelby Water District is the fastest growing wholesale customer, making up some of the wholesale water sales we lost when we purchased KT.

All cores are meeting overtime goals YTD.

We need to expand on Line 6 of Page 1, adding explanation of Other Operating Income.

Action items:	Person responsible:	Deadline:
Explore unaccounted-for water.	KOT/SAH	
Add explanation of Line 6 on Page 1—Other Operating Income.	Richard Royse	

Budget Issues

Bob Miller

Discussion: Bob Miller provided copies of and discussed "LWC 2001 O&M Budget, Actual v. Target (Assumes Contingency Fund is Fully Expended)" and "LWC 2002 O&M Budget." The group discussed the additional cost for Pure Tap (\$65,000) and the 2001 cost for a secretary for Jim Wehrle (approximately \$15,000). They reviewed cost reduction strategies. We need to determine whether cost reduction strategies will work. Karla is lowering number of employees. She may have to move capital employees to O&M for the winter. Steve Hubbs will attempt to reduce chemical costs. We need to clean Cardinal Hill reservoir, which could cost \$30,000—this amount is not budgeted. Greg Heitzman is reducing grass maintenance, with an anticipated savings of \$50,000-\$75,000. Bob Miller can meet his reduced budget with capitalization of time in Financial Resources and capitalization of IT working on the capital project. The \$83,000 under budget is on target for Bob. Managing Infrastructure can meet their target of \$116,000. Administration is overbudget—nothing was reserved for legal expenses, and John Huber noted we still have RF subscription dues, GLI dues, and Economic Development Partnership dues to pay in 2001. Laura Douglas will come up with a new number for legal expenses. Jim Wehrle says his core is at the projected \$183,000 under budget. Serving customers needs additional analysis of \$600,000 gap.

We don't want to defer costs to 2002. We should continue to review discretionary spending.

Steve Hubbs provided copies of ranking for items over 2% target budget. The group discussed the top 14 items to decide if any are discretionary or if funding can be adjusted. Some items we might want to move above Line 14 are Director and Officer insurance and in-house computer training.

If we keep items through Line 14 in the 2002 Budget, this will require a 3.5% rate increase and \$700,000 reduction in Infrastructure Replacement Reserve.

Conclusions: Need updated sheet (2002 O&M Budget) showing revised Column G for Serving Customers and Administration. Bob Miller needs the most up to date numbers for everyone—revised Column E (2002 O&M Budget) from each BSO—that will be published in the budget.

We need to determine who pays the Baker & Daniels invoices.

Action items:	Person responsible:	Deadline:
Provide updated sheet showing revised Column G for Serving Customers and Administration 2002 Budget.	Bob Miller	
Provide revised 2001 Forecast from each BSO—provide most up-to-date numbers to RKM this week.	BSOs/CBSOs	
Followup on Baker & Daniels invoices. Determine who will pay and if the invoices have been paid.	ELT	

Agenda for September 17, 2001: ELT members should provide agenda items to Bob Miller.

ELT Meeting Minutes

September 24, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle

Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Amber Halloran, Don McKay, Joan Malone, Richard Royse

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes from the September 27, 2001 ELT meeting were approved as submitted.

Security

Don McKay

Discussion: Don McKay provided copies of and discussed "LWC Critical Infrastructure Protection" which listed goals, short-term strategies, long-term strategies, and issues/concerns.

Steve Hubbs noted monitoring is being done seven days/week.

Conclusions:

Terrorism risk management should consist of: prevention, monitoring/information gathering, and containment/minimizing effects.

Action items:

	Person responsible:	Deadline:
Apprise BSOs of procedures being taken regarding security.	CBSOs	
Confirm any advantages to "double boil" procedure (consists of two 5 minute boil cycles with cool down cycle between boil cycles).	SAH	
Discuss security procedures again at the 10/1/01 ELT meeting when Don McKay will have new security policy available.	ELT/D. McKay	
Address "Everyone" e-mails in the electronic communications policy.	RKM	

Preliminary 2002 O&M Budget

Amber Halloran

Discussion: Richard Royse provided copies of "LWC 2002 O&M Budget APP.A3," "Additions to Preliminary 2002 O&M Budget above 2%," "2002 Estimated Changes in Sources and Uses of Revenue, Scenario 1," "2002 Estimated Changes in Sources and Uses of Revenue, Scenario 3," "2002 LWC Preliminary O&M Budget (ranking of items over 2%)," and "Manpower Comparison 2001 Budget to 2002 Budget (Regular FTEs)," and "2002 Manpower Comparison for Contract, Seasonal, Co-op, and Temporary Personnel."

The "LWC 2002 O&M Budget APP.A3," has been adjusted to include Items 1-13, 16, 18, 26 and 31 from the Priority List, for a total 2002 O&M Budget of \$41,780,745. "2002 Estimated Changes in Sources and Uses of Revenue, Scenario 1," assumes a 3.5% rate increase and IFR of \$2,300,000. We will have a decrease in revenue when city/county governments merge. Do we want to address this revenue shortfall before 2003? "2002 Estimated Changes in Sources and Uses of Revenue, Scenario 3," calls for a 3.75% rate increase and IFR of \$2,495,000 and gives us room to prepare for merger and the accompanying shortfall in revenue.

Regarding "Manpower Comparison 2001 Budget to 2002 Budget, Regular FTEs" and "2002 Manpower Comparison for Contract, Seasonal, Co-op, and Temporary Personnel," CBSOs should have their BSOs validate the correctness of the numbers. The CBSOs should give Richard Royse any changes in the numbers by noon Wednesday, 9/26/01. Amber will get revisions to ELT by Thursday. We must work out final details this week.

Action items:	Person responsible:	Deadline:
Get any changes in numbers on the manpower comparison documents to R. Royse by Wed., 9/26/01.	CBSOs	
Revise manpower comparison documents and get revisions to ELT members by Thursday, 9/27/01.	Amber Halloran	

Organizational Chart Changes

Jim Wehrle

Discussion: Jim Wehrle provided copies of and discussed "Confidential Potential Variation to BSO Rotation."

Conclusions: The group agreed to move ahead with the proposed BSO rotation incorporating changes discussed under Item 5G. Mr. Wehrle revised Item 5G of the handout and provided copies to ELT members.

Action items:	Person responsible:	Deadline:
Communicate to BSOs when changes will be effective.	CBSOs	

Review BIN List for Prioritization

Bob Miller

Discussion: Bob Miller will initiate an ELT electronic calendar that ELT members will have access to. It will contain a marked up BIN list.

Action items:	Person responsible:	Deadline:
Set up ELT electronic calendar with BIN list.	Bob Miller	

Agenda for October 1, 2001: Please submit agenda items to Bob Miller.

Minutes

ELT Meeting Minutes

October 1, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bill Meeks, Bob Miller, Jim Wehrle, Amber Halloran, Joan Malone, Don McKay, Glen Mudd, Jack Wang

Agenda Topics

Review Minutes Bob Miller

Discussion: Minutes from the September 24, 2001 ELT meeting were approved as submitted.

Employee Code of Conduct and Performance Policy/LWC Organization Chart Jim Wehrle

Discussion: Jim Wehrle provided copies of the Employee Code of Conduct and Performance Policy and a list of relatively minor changes contained in the policy.

Mr. Wehrle also provided copies of the LWC Organization Chart as of December 17, 2001.

No action is required on either of these items.

Security Don McKay

Discussion: Don McKay and Glen Mudd provided copies of and discussed Draft LWC Policy R5-05, Corporate Security Policy.

Conclusions: In the policy, we need to distinguish between biological and chemical contamination, add a statement clarifying that all LWC facilities are restricted access, and define "facilities" for the purposes of this document. We need site specific plans with some centralized monitoring and oversight. LWC is scheduled to meet with Black and Veatch on October 10 to discuss security. Don and Glen will meet with ELT again after the October 10 meeting, noting any revisions recommended by Black and Veatch.

Don and Glen provided copies of and discussed the LWC Security Task Matrix. The group discussed the issues of fencing around the reservoirs. We should consider the community and political aspects of doing this.

Action items: Person responsible: Deadline:

Make revisions noted above and include revisions suggested by B&V at the October 10 meeting. G. Mudd/D. McKay

Preliminary 2002 O&M Budgets – Employee Counts Bob Miller

Discussion: Amber Halloran provided copies of and discussed the Manpower Comparison 2001 Budget to 2002 Budget for Regular FTEs and 2002 Manpower Comparison for Contract, Seasonal, Co-Op, and Temporary Personnel.

Conclusions: LWC is 13 employees over budget.

Action items: Person responsible: Deadline:

Followup regarding Scott's position and the P position. ELT

Provide information under C2--\$1 person \$0 in Budget. Amber Halloran

2001 Forecast	Amber Halloran
Discussion: Amber provided copies of the LWC 2002 O&M Budget, APP.A3 dated 9/18/01.	
Conclusions: Current forecast for 2001 Budget is \$39,900,000 which is roughly \$800,000 over budget. We need to explain to the Board how we went from \$200,000 over budget to \$800,000 over budget.	
Action items:	Person responsible: Deadline:
Get information together which will explain to the Board why we are \$800,000 over budget.	RKM
Total Coliform Occurrence in Distribution System	Jack Wang
Discussion: Jack Wang provided copies of and discussed a report pertaining to Total Coliform Occurrence in Distribution System. Jack recommended that ELT consider recalculating the total coliform goal using the method described in the report.	
Conclusions: This report should be listed as a process improvement for the 2 nd quarter, 2001.	
Action items:	Person responsible: Deadline:
Ask John Huber to consider using the data contained in the report to adjust goals for 2001. Discuss at a future ELT meeting.	ELT
Future Agenda Items	Bob Miller
Discussion: Bill Meeks provided copies of a list of ELT Future Agenda Items.	
Conclusions: Regarding Items 1-10, only Items 3 and 5, Review Progress with QualServe Update Recommendations, and Empowerment Pilots, should remain on the list. Regarding Items A-F, all items with the exception of Item B, Partnership Council Report, should remain on the list.	

Please submit agenda items for the 10/8/01 ELT meeting to Bob Miller.

Minutes

ELT Meeting Minutes

October 8, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Jim Brammell, Ed Chestnut, Laura Douglas, Amber Halloran, John Huber, Don McKay (by telephone), Bill Meeks, Bob Miller, Sue Purdy, Don Spanyer, Karla Teasley, Jim Wehrle, Joan Malone
Please bring: Agenda and Minutes

Agenda Topics

Review Minutes/Review Agenda Bob Miller

Discussion: The minutes were approved as submitted. The agenda for this meeting was discussed and approved.

Integrated Voice Response System Demonstration Don Spanyer

Discussion: Don Spanyer provided copies of and discussed "Interactive Voice Response (IVR)/Computer Telephone Integration (CTI) Project—October 8, 2001 ELT Update." He discussed Phases I, II, and III of the project.

Action items: No action required—sharing of information only. Person responsible: Deadline:

Review Financial Results Amber Halloran/Sue Purdy

Discussion: Amber provided copies of and discussed "LWC Financial Highlights September 2001" and graphs titled "Unaccounted for Water Pattern" and "Unaccounted for Water Percentage."

Conclusions: We have had a good month. Amber noted she would like to get all the 2001 invoices paid in calendar year 2001.

Action items: Person responsible: Deadline:

In the monthly Financial Highlights, track Adjustments for the benefit of ELT. Amber Halloran

Create another version of the Unaccounted for Water Pattern/Percentage showing upper and lower level control limits. Amber Halloran

CSI Karla Teasley

Discussion: Karla provided copies of and discussed linear charts, "Total CSI" and "Serviced Customer CSI (performance award component)."

Conclusions: Total CSI showed improvement in seven of the eight past months.

Action items: No action required—sharing of information only. Person responsible: Deadline:

Review 2001 Budget Forecast

Bob Miller

Discussion: Bob Miller provided copies of and discussed "LWC 2001 Budget v. 2001 Forecasts" and "LWC O&M Cost per Customer, Actual v. Inflation Adjusted."

Conclusions: Net Income and Total Operating Revenue have significantly improved. We will be over budget for 4th quarter, 2001 by about \$350,000. Historically, we see a higher level of expenses in the fourth quarter each year. Our goal is to be over budget by less than \$837,000 for 2001. Additional expenditures for 2001 include additional security, RF, legal expenses, and claims.

The group discussed changing the bond resolution this year regarding the \$961,000 additional revenue lost due to the purchase of KT. This amount is still part of our net income, but we set it aside for expanding that system and serving KT customers. No decision was made regarding changing the bond resolution.

Action items: No action required—sharing of information only. **Person responsible:** **Deadline:**

Review 2002 Budget Document

Bob Miller

Discussion: Bob Miller discussed the 2002 Budget. Bob will take the key schedule and graphs and prepare a supplemental document to present to the Board.

Conclusions: Our recommendations to the Board are: (1) Request a 3.75% rate increase. (2) Request permission to file the budget with the trustees and the City. (3) Present full review of Preliminary Budget at a special Board meeting in late October or at the regular Board meeting in November, 2001.

Through LWC's participation in AWWARF Subscription Program, the AWWARF funds part of the research we do. The Board will need an explanation of outflows and inflows of money for the current RF-funded research project.

Action items: **Person responsible:** **Deadline:**

Get a one-page synopsis of AWWARF expenses and total amount of money reimbursed us by AWWARF for the current RF-funded research project.

Amber Halloran

Review Board Agenda

John Huber/Laura Douglas

Discussion: The agenda for the October 8, 2001 Board meeting will include: security, budget, NIMDA worm, extension for paving and concrete contract with Stoll paving, and the Crescent Hill liner.

Action items: No action required—sharing of information only. **Person responsible:** **Deadline:**

Security

Don McKay (by telephone)

Discussion: Don McKay discussed what he plans to include in his presentation to the Board on Tuesday regarding security. The group discussed other issues regarding security.

Action items: **Person responsible:** **Deadline:**

Prepare a condensed version of the Emergency Preparation Plan and distribute to appropriate persons.

Don McKay/Bo Williams

Agenda for 10/15/01: Bob Miller will e-mail the agenda.

Agenda

ELT Meeting Minutes

10/15/01
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (On call)
Recorder: Steve Hubbs
Timekeeper: Jim Wehrle
Attendees: Laura Douglas, Steve Hubbs, Bill Meeks, Bob Miller, Karla Teasley (10:40), Jim Wehrle, Greg Heitzman
Please bring: Agenda

Agenda Topics

9:00-9:10 AM Review Minutes and Agenda OC Approval of Minutes and Agenda Bob Miller

Discussion: Minutes were reviewed and approved. Agenda was approved as presented.

9:10-9:30 AM Security Planning Don McKay

Don discussed a recent meeting with the consultant (Black and Veach) regarding security at our treatment and distribution facilities. It is estimated that initial security improvements will cost from \$20,000 to \$35,000 this year. Other meetings with key agencies were discussed. Work is underway on securing a better estimate of costs for 2002 budget. A listing of vulnerabilities has been completed and work planned to manage the most significant controllable risks.

Bob brought up the question of technique for boiling and storing water. It was suggested that we include this in the IVR and web site.

The lab should provide details for how to store and disinfect water.

Conclusions:

Action items:	Person responsible:	Deadline:
Arrange for public information for water storage	Don McKay and B Crow	1 month
Provide guidance on water treatment and storage at homes	Don McKay and J Wang	1 month

9:30-9:50 AM

Manpower Comparison by Core

Bob Miller/CBSOs

Bob provided a table of manpower chart by core covering 1999 through the 2002 budget. The summary indicates that we have operated below budgeted levels of employees over the past 3 years. According to this report, we have actually added 2 employees since 1999, and have budgeted 14 more than we had in 1999.

Steve suggested that an accounting of total wages paid (including temps, part time, and contracted labor) be followed as a key measure, broken into O&M and Capital. This will provide a macro view of the one element of operating the company.

Action items:

Person responsible:

Deadline:

Put together a key measure of total employee cost, broken down into full-time, part time, temps, and contracted labor (O&M and Capital)

Bob Miller

None set

9:50:-10:10 AM System and Process Codes for Reorganization

Bob discussed the concern over providing new codes for the realignment currently underway. Bob noted that we can track costs without re-assigning process and system codes, although the capability to make the changes exist.

The group concluded that the most efficient way to proceed is to follow Bob's recommendation to retain the existing system and process codes.

Conclusion: We will continue to use current system and process codes through this reorganization

Action items:

Use existing codes to track costs (Bob Miller)

10:00-10:10 AM

Third Quarter Operating Plan Review

Bob Miller

Bob discussed a proposal to continue with the format used at the last review, which was well received by most BSOs. ELT supported the concept.

Steve noted that for ISO certification, a routine review of management systems was required, and that ISO consultants had indicated that our operating plan reviews do not cover this requirement. To be ISO compliant, we would have to establish a routine (quarterly suggested by consultant) management system review.

Conclusions: Continue to use the format used last.

Action items:

Person responsible:

Deadline:

None

10:25-10:48 AM

Finalize 2002 Operating Plans

Bob Miller

The 2002 budget is completed, and Bob wanted to discuss the process for moving through the 2002 operating plans. Greg noted the concern over the ownership of the operating plans, and if changes to the operating plans needed to go past ELT or budget if they did not involve a change in resources. It was agreed that operating plans would be under the ownership of the BSOs and CBSO.

Bob suggested that we continue to have a compilation of operating plans for 2002, finalized through the CBS. The system owners will be responsible for the Gap Analysis. Any gaps identified are to be resolved at the system level, and at the CBSO level for inter-core issues. Any issues unresolved that reflect a need for additional resources or re-alignment of priorities will be brought to ELT for resolution. A brief scenario of an inter-core gap was explored to clarify the issue.

The need for consistency and accountability of operating plans will be added to the checklist of items to be reviewed by the auditor during certification. Bob will maintain the standard template for compiling the operating plans (this may be moved from Access to be more user-friendly). 2002 operating plans are due complete December 15.

Conclusions:

Action items:

Person responsible:

Deadline:

Complete operating plans due to Anna Norris.

BSOs

12-15-01

10:48-10:55 AM

Diversity Council Update

Jim Wehrle

The council has been selected, including: Christy Weikert, Debra Vaughn, James Mok, Rengao Song, Rhonda Brown, Sonja Davis, Vince Guenther, and Ed Moore.

Greg noted that time for this activity was not budgeted for all of the above council members. The group agreed to track costs for members under constrained O&M budgets.

Conclusions:

Action items:

Person responsible:

Deadline:

None

11:00-11:10 AM

Future Agenda Items

Bob Miller

Bob provided a table of items identified at the last meeting to be considered by ELT. Greg asked that the organization of P1 and P2 be brought to ELT for discussion/approval. Bob suggested that we follow up with an empowerment diagram for organizational changes. Karla asked for an update on certification audits. Security items will be discussed regularly. Laura suggested we routinely ask (monthly) for review of draft policies.

Conclusions:

Action items:

Person responsible:

Deadline:

Produce updated BIN list

Bob

10-22-01

11:10-11:55 AM

NLP II Timeline. (Outcome, approval)

Bob Miller

Karla provided the compilation of the work regarding the NLP II timeline. Greg suggested that deadlines be provided for each element, or noted as ongoing if appropriate, and that a column for accountability be added for tracking and building operating plans. Format will remain as presented through the review process (with the added columns). Nora will fill in these columns based on her best judgement. Questions from Nora on target dates and accountability will be handled with ELT via e-mail.

Discussion of specific items:

Item 20: The lack of funding for ISO was discussed, and the group suggested to change the wording from "obtain" to "assess".

Item 18: Cost of poor quality item was discussed as a tool, with suggestion to word similar to Item 12, with ongoing status.

Item 25: Suggested wording is "Continue alternative contract methods..."

Item 17: Was not budgeted, to be considered if resources become available, with 2003 goal date.

Item 38 and 63: These items were repeated for emphasis/comprehensiveness.

Item 47: Item to be shortened to exclude goal, which would be included in annual goals (end after "increase MBD spending").

Item 59: Broaden to focus on an ongoing goal across the company, evaluate through certification.

Conclusions:

Action items:

Person responsible:

Deadline:

Update document, add column on accountability and deadline date

Nora/Karla/ELT

10-22-01

ELT changes back to Nora

Deadline:

None.

Minutes

ELT Meeting Minutes

October 22, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Laura Douglas, Kevin Grant, Amber Halloran, Greg Heitzman, John Huber, Bob Miller, Jim Wehrle, Don McKay, Joan Malone, Jack Wang
Absent: Karla Teasley
Please bring: Agenda and Minutes

Agenda Topics

Review Minutes/Review Agenda Bob Miller

Discussion: The minutes from the October 15, 2001 meeting were approved as submitted. The agenda for this meeting was discussed and approved.

Security Planning Don McKay/Amber Halloran

Discussion: Don McKay provided copies of and discussed "Projected Additional Security Cost Estimates as of 10/17/01."

Conclusions: A team on security of facilities is being formed. It will be composed of BSOs and POs most directly involved in security of facilities. John Huber will charter the team. Glen Mudd will serve as team leader.

Steve Hubbs asked that no meetings be scheduled in the Training Center at CH other than those involving employees who work within that complex. This will reduce concerns about gate control for the facility for the short term.

Don and Glen are working on a detailed mail handling process which should be finalized this week.

ELT approved installation of ornamental fencing around the CH reservoir. Jim Asseff is working on repairs for the fence at Cardinal Hill.

Action items:	Person responsible:	Deadline:
Check outside labs to see if they monitor for things we don't monitor for.	SAH/McKay	
Communicate with our wholesale customers/send info. we are getting from the federal government on terrorism and security of facilities.	GCH/McKay	

Review Operating Plan Empowerment Matrix

Bob Miller

Discussion: Bob Miller provided copies of the "As Is" version of "Ongoing Process for Changing Content of Detailed Operating Plans (after Final Approval)," and "To Be" version of "Process for Changing Operating Plans."

Conclusions: On the "To Be" version of "Operating Plan Development Empowerment Model," the group added a column heading between BSOs and SACs titled POs. Headings now read: ELT, CEO, CBSOs, BSOs, POs, SACs. An Item 1 titled Creation of Draft Operating Plan was added, with the following keys from left to right: X, X, C, W, C/W, W. Other changes: Item 2, POs column should read C; Item 3, POs column should read W; Item 4, POs column should read X; Item 5, BSOs column should read C/W and POs column should read W.

The heading of the "Operating Plan Development Empowerment Model" will be changed to "Operating Plan Empowerment Model." The word "Development" was deleted from the heading.

In the flow chart decision "diamonds," references to ELT will be deleted.

The group adopted these documents with the changes discussed.

Action items:	Person responsible:	Deadline:
Make changes as discussed/get this document to BSOs for further distribution. Add a footnote item showing an explanation of C/W key.	Bob Miller	

Review Organization Change Empowerment Matrix

Bob Miller

Discussion: Bob Miller provided copies of and discussed the "Draft Organization Structure Change Empowerment Model." Changes in the columns are as follows: For items 1-4, keys in the ELT column should each read C. For Items 1-6, keys in the CEO column should read A, A, A, A, D, D. For Items 5 and 6, keys in the VP HROE column should read A.

Bob noted that we need to differentiate between processes and issues. We need to development processes, then deal with the issues.

Conclusions: The document was adopted by ELT with the changes noted.

Reorganization of P1 and P2

Greg Heitzman, Jack Wang

Discussion: Jack Wang handed out and discussed his confidential draft memo regarding Structure of the Merged System for P1 and P2—Managing Water Quality and Water Production.

Greg discussed the proposed structure of Managing Water Quality and Water Production System (P1 and P2) and Page 3 of the document titled Water Quality and Production Business System Proposed Organizational Changes. Greg noted that employees will be encouraged to rotate from one area to another. Vacancies listed on the righthand side of Page 3 will be posted and filled according to the timetable listed at the bottom lefthand side of the page.

Action items:	Person responsible:	Deadline:
Make changes as noted, get JLH's approval, communicate to employees.	GCH/SAH/Wang	This Wk.
Discuss the proposal and work with HR to evaluate and post the jobs.	GCH/SAH/Wang	

2002 O&M Budget Realignment

Amber Halloran

Discussion: Amber Halloran provided copies of and discussed the "LWC 2002 O&M Budget, APP.A3." Pages 2, 3, and 4 list changes by system from original budget submitted in August. Page 5 lists LWC 2002 budget issues.

Conclusions: ELT accepted the document as shared information with the following: Strike Items 2, 5, and 6. Regarding Items 1, 3, and 4, Amber and Bob will work with John to settle these issues.

Action items:	Person responsible:	Deadline:
Settle issues regarding Items 1, 3, and 4 on Page 5, "LWC 2002 Budget Issues."	Halloran/Miller	

Union Negotiations

Jim Wehrle

Discussion: Jim Wehrle discussed LWC's proposal to the union for contract renewal/extension. He is waiting for the union to ratify the proposal.

Census

Bob Miller

Discussion: Bob Miller provided copies of and discussed an article from the October, 2001 issues of *Government Finance Review* titled "Federal Focus: 2000 Census Yields Unexpected Results." Bob pointed out some highlights of the article: On 4/1/00, the U.S. population stood at 281,421,906. This census was the first in which all 50 states increased in population. Eighty percent of Americans now live in the 276 metropolitan areas that form the center of American society. The metropolitan population grew 14 percent over the last decade compared to nonmetropolitan counties, which grew about 10%.

Agenda for 10/29/01:

Bob Miller provided copies of a list of future agenda items--updated 10/18/01, Items 6 and 9 should be deleted. Regarding Item 7, R. LeMaster will report at the 10/29/01 ELT meeting.

An item on RBI can be added to the list--this will be discussed on 10/29/01.

The Waterworks Management Workshop Group meeting which Greg and Bob will attend on October 25 and 26 will also be discussed at the 10/29 ELT meeting.

Bob will furnish an agenda for the 10/29/01 ELT meeting.

Minutes

ELT Meeting Minutes

October 29, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Kay Ball, Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Roger LeMaster, Ralph McCord, Don McKay, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Karla Teasley, Jim Wehrle, Jami Young
Please bring: Agenda and Minutes

Agenda Topics

Review Minutes/Review Agenda Bob Miller

Discussion: Minutes from the October 22, 2001 ELT meeting were approved as submitted. Agenda for the October 29 ELT meeting was approved.

Security Planning Don McKay

Discussion: Don McKay discussed status of additional security at LWC following the 9/11/01 terrorist attacks. He discussed fencing at Cardinal Hill, roving patrols versus stationary patrols, and incoming U. S. mail. The LWC Security Council will consist of Jim Asseff, Jim Brammell, Barbara Crow, Don McKay, Glen Mudd, Jack Wang, and Bo Williams. Glen Mudd will serve as Council Leader.

Conclusions: The group concurred that our goal is to reduce/control the cost of security without compromising the level of security we provide.

Review Waterworks Management Workshop Results Bob Miller, Greg Heitzman

Discussion: Greg provided copies of and discussed his notes from the Workshop.

Bob noted that the major topic of discussion at the Workshop was security of facilities. One major issue is the risk of truck bombs. Some utilities are moving from chlorine delivered in rail cars to other means of chlorine delivery, requiring background checks on contractors and employees, requiring all employees to wear IDs at all times, and changing visitor IDs to very bright colors to make them more visible. Some utilities have decided they will not allow employees' personal packages to be delivered to the workplace. LWC will check into this.

The AWWARF vulnerability assessment due out within the next few weeks.

Action items:	Person responsible:	Deadline:
Check into employees' personal packages being delivered to the workplace.	Don McKay	
Check into having chlorine delivered by a means other than by rail cars.	Steve Hubbs	
Check into accuracy/timeliness of tracing phone calls	Don McKay	
Check into methods of recognizing Anthrax in HPCs.	Steve Hubbs	

Review Water Utility Council Results Steve Hubbs

Discussion: Steve noted the major topic of discussion at the WUC meeting was security. Other topics discussed were regulatory/legislative in nature.

Steve noted that RBI is a very secure treatment technology.

Certification Status	Roger LeMaster/Scott Muhlenbeck
Discussion: Roger and Scott provided copies of the status of Business System certification. Certification will be discussed with the Audit Committee at their meeting on November 6. The memo listed recommendations which have been offered to multiple systems for consideration in strengthening the quality management system.	
Action items:	Person responsible: Deadline:
Prepare a timeline or schedule on the status of certification so ELT can track the progress.	LeMaster/Muhlenbeck
Regarding best practices, ask system owners what from their perspective are their best practices.	LeMaster/Muhlenbeck
RBI/Goshen/Capital Program	S. Hubbs, G. Heitzman, K. Ball, R. McCord
Discussion: Greg discussed the possible Goshen Utilities acquisition. He explained that the transaction is a stock transaction, which means we assume their assets as well as their liabilities. Greg noted several Board members advised that if possible, an asset purchase is more desirable than an acquisition of stock.	
Ralph McCord gave an update on due diligence regarding the possible acquisition of Goshen Utilities.	
Kay Ball discussed her summary of due diligence on the possible acquisition of INAAP wellfields.	
The group discussed the risks and benefits of acquiring the wellfields.	
Conclusions: Goshen's storage tank may require a short-term investment. That, coupled with our new knowledge that there is potential contamination to Goshen's wellfield, indicates an urgency in fully interconnecting the Goshen system into the LWC system if we acquire the utility.	
We have three alternatives to present to the Board regarding possible acquisition of the INAAP wellfields: (1) Recommend moving ahead but continuing to evaluate if the deal meets key outcomes; (2) Advise that we don't think we can proceed with the current offer and seek to negotiate a reduced lease acquisition price; (3) Pursue wells on KY side and see what develops on the Indiana side.	
Action items:	Person responsible: Deadline:
Get rate schedule for Jeffersonville/Indiana retail/wholesale customers.	Jami Young
Have an executive summary for the Board meeting on Friday. Prepare a draft (by Wednesday) for John Huber to review.	Kay Ball/Steve Hubbs
Future Agenda Items	Bob Miller
Discussion: Bob provide his list of ELT future agenda items updated 10/24/01	
LWC Organization Chart	Jim Wehrle
Discussion: Jim provided copies of the LWC Organization Chart which will be in effect beginning December 27, 2001.	

Agenda for November 5, 2001 ELT meeting:

Bob Miller will e-mail the agenda.

Minutes

ELT Meeting Minutes

November 5, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle
Attendees: Jim Brammell, Laura Douglas, Nora Freeman, Amber Halloran, Greg Heitzman, John Huber, Steve Hubbs, Don McKay, Bill Meeks, Bob Miller, Jim Wehrle, Joan Malone, Jami Young

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes from the 11/29/01 ELT meeting were approved as submitted. Agenda for 11/5/01 meeting was approved.

Security Planning

Don McKay

Discussion: Don McKay gave a security planning update.

The Black & Veatch proposal has been received, and the scope appears to be appropriate. The report identifies four tasks: an initial meeting, a field assessment of key facilities, a report on critical vulnerabilities and remedies, and identifying logical next steps for a 1-3 year period.

Action items:

Person responsible:

Deadline:

Complete fencing at English Station, repair existing fencing at Cardinal Hill, and construct a new fence and add lighting around the Cardinal Hill Reservoir as soon as possible. Fencing will be contracted for asap and documented as an emergency. Normal processes for declaring this to be a nonstandard procurement documented by a Certificate of Emergency and authorized by the President must be followed.

Brammell/ Heitzman/Hubbs

Report on Special Board Meeting

John Huber

Discussion: Mr. Huber reported on the special Board meeting on 11/2/01. The Board approved a 4.25% rate increase for 2002. The Board discussed the Letter of Intent regarding possible acquisition of INAAP well fields and Goshen Utilities.

Conclusions: LWC staff should meet soon with the Board's Compensation Committee to discuss proposed salary increases for below and above Control Point for 2002.

Action items:

Person responsible:

Deadline:

Meet with the Board's Compensation Committee to discuss proposed salary increases for below and above Control Point for 2002.

LMD/JJW/JLH

Year-End Financial Statements Process & Financial Info. System Status

Amber Halloran

Discussion: Amber Halloran provided copies of and discussed the schedule for year-end close and reported on the FINS Project Team. The team went to Nashville to consult with the Nashville Metro Government, which recently completed a similar project. Mr. Huber noted there are three important facets to making this a successful venture: technology, processes, and training/know-how of the user.

Recommendation for 2002 Empowerment and Accountability Activities	Nora Freeman/Jim Wehrle
Discussion: Nora provided copies of and discussed the "2002 Empowerment and Accountability Pilot Activities." She discussed structure, expectations, and timeline for the first company-wide phase.	
Conclusions: ELT approved the recommendation and timeline as presented.	
ELT & VP Shared/Incentive Goal Report for 3rd Quarter	Nora Freeman
Discussion: Nora provided copies of and discussed the 3 rd quarter results for the Executive Incentive Goals, the President and VP Shared Goals, the Diversity Goals, and the 2001 Corporate Performance Award Goals.	
Improvements to Quality Program	Nora Freeman/Jim Wehrle
Discussion: Nora gave an overview of the Improvements to the Quality Program. The process will be called "Quality Opportunity Index" and will replace the Employee Perception Survey, team-based assessment, and system self assessment.	
Organizaton Chart	Jim Wehrle
Discussion: Jim Wehrle provided copies of an updated LWC organization chart which will be effective 12/17/01. The chart is dated 10/29/01, and the only change is in the title of the document.	
Union/Management Partnership	Bill Meeks
Discussion: Bill Meeks stated that a rep from Cornell University and 5 other union reps from across the U.S. will visit LWC on November 8 and 9 as part of the study on Labor/Management partnerships and how they affect unions. Bill has the agenda and background for any ELT member who is interested in attending the meetings. This is the second phase of a three-phase project funded by the Ford Foundation. The only cost to LWC is the time spent in the meetings.	
Performance Appraisal Issues	Jim Wehrle
Discussion: Jim Wehrle discussed the WPPM/performance appraisals. We are working on a new performance appraisal process, and have identified 8 core competencies for management and 8 core competencies for non-management employees. Rhonda Plunkett is working on developing a procedure to score the various competencies and will bring recommendations on scoring to the ELT. The group discussed raising the ratings scale to 1-6 from the current scale of 1-5. This will be discussed at the 11/19/01 ELT meeting.	
Annual Inspection Report	John Huber
Discussion: John Huber noted the Annual Inspection Report is in many ways an audit. Once we have a report, our next step is to issue a management response and create a tracking system to make sure management does what it says it will do. We must consider how we will report to the Audit Committee of the Board on the Annual Inspection Report.	
Conclusions: Bret Russell prepares a summary which can be filed with the Internal Auditor and possibly used to report to the Board.	
LWC Security Polity	Bob Miller
Discussion: Bob Miller distributed copies of the most recent draft of the LWC Security Policy. The group reviewed and discussed the policy.	
Action items:	Person responsible:
Under Item 3.1, add "... distribution system and appurtenances."	LMD
Under Item 4.0, add "... includes but is not limited to...".	
	Deadline:

Future Agenda Items

Bob Miller

Discussion: Bob Miller distributed a list of future agenda items and asked for items to be added to the list. Bob asked if the group would prefer shorter meetings, or including reports from BSOs/others on such items as the metering pilot, the research pilot, GIS, etc..

Action items:

Person responsible:

Deadline:

Add items regarding winter preparedness plan and transitioning of BSOs effective 12/17/01 to the list of future agenda items. RKM

Agenda for 11/12/01 ELT Meeting: Bob Miller will e-mail the agenda.

Minutes

9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle

Attendees: Susan Camp, Laura Douglas, Nora Freeman, Tony Gregory, Amber Halloran, Greg Heitzman, John Huber, Don McKay, Ellen Mackin, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley, Jim Wehrle, Joan Malone, Mary Whitlock

Please bring: Agenda and Minutes

Agenda Topics

Review Minutes/Approve Agenda

Bill Meeks

Discussion: The minutes from the November 5, 2001 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Security Planning

Don McKay

Discussion: Don McKay gave an update on security. LWC staff met with Dr. Atlas, who heads up the National Bioterrorism Task Force, last week. Staff may schedule another meeting with Dr. Atlas. Don discussed fencing at the Crescent Hill Reservoir and fencing of the Middletown tanks.

Action items:

Person responsible:

Deadline:

Advise Tina Ward Pugh and Jane Driskell of LWC's plans for fencing CH Reservoir area and that the area will be closed during construction. McKay/KOTV. Guenther

Review Core & More, Severance, and Attendance Policies

Jim Wehrle, Ellen Mackin

Discussion: Ellen provided copies of and discussed three revised policies. The Core and More Policy contained a revision in Paragraph 3.6 to add a new bullet allowing changes to be made when an eligible employee moves out of a designated service areas. The IRS recently ruled that a qualified family status change now includes an employee who moves out of a plan's designated service area. The Attendance Policy contained a revision in Paragraph 3.5 to reflect that eligible employees now receive three days for perfect attendance versus 2 days (per the new bargaining agreement with the Union effective in 2001). The Severance Pay Policy contained a modification in Paragraph 3.2 to reflect PTO days are now accrued on a calendar year basis versus benefit year. This change is needed since non-union employees receive PTO January 1 each year versus March 1.

Conclusions: ELT approved the three revised policies. John Huber noted that we need a timetable for reviewing and authorizing LWC policies—possibly a rotating schedule such as a three or five year cycle. Laura Douglas will prepare an index to show the last time each policy was reviewed. ELT will discuss at a future meeting.

Action items:

Person responsible:

Deadline:

Prepare an index to show the last time each policy was reviewed.

LMD

Develop timetable for reviewing LWC policies.

ELT

Review Purchasing Policy**B. Miller, A. Halloran**

Discussion: Bob Miller provided copies of and discussed the Draft Purchasing Policy dated November 12, 2001. Bob plans to recharter the Bids and Awards Committee. The rechartered committee will consist of Bob Miller, Amber Halloran, Mary Whitlock, Cindy Kowalski, with Jami Young serving as a resource.

Action items:	Person responsible:	Deadline:
Make changes/revisions to the Purchasing Policy as discussed and bring to ELT at the Nov. 19 meeting.	RKM	
Get comments/suggestions for additional revisions to Bob this week.	ELT Members	

Review IT Strategic Plan**Bob Miller, Tony Gregory**

Discussion: Tony Gregory provided copies of and discussed the IT Strategic Plan 2001-2003 Status Update.

Conclusions: John Huber noted we should address who our key business partners are in this and determine how viable they are. We should also address the risks associated with this and the O&M expenses.

Action items:	Person responsible:	Deadline:
Address who our key business partners are in this and determine how viable they are.	T. Gregory	
Address the risks and O&M expenses associated with this.	T Gregory	

Review October Financial Results**A. Halloran, S. Purdy**

Discussion: Amber Halloran provided copies of and discussed the October, 2001 Financial Highlights and graphs for Unaccounted for Water Pattern and Unaccounted for Water Percentage. Water consumption through October, 2001 was 559 million gallons lower than a year ago. The month of October was 69 million gallons lower than October a year ago. YTD Other Operating Revenue exceeds last year by \$780 thousand and budget by \$1.3 million. This variance is primarily due to an increase in penalties and turn on/off fees. O&M expense through October 2001 was \$2.1 million higher than the same period last year, and higher by budget by \$594 thousand.

Amber noted we are continually working to improve the Financial Highlights report. She discussed reports which have been deleted from the Financial Highlights Report and reports which have been added or replaced with other, more useful, reports.

Review 2002 NLP II**K. Teasley, N. Freeman**

Discussion: Nora provided copies of and discussed the NLP II 2002 Objectives. This was updated November 8 to incorporate minor changes recommended by the ELT. If ELT adopts this, it goes to the BSOs for use in preparing Operating Plans for 2002.

Conclusions: ELT approved NLP II 2002 Objectives with minor changes. We need to get this to the BSOs as soon as possible. Nora will distribute at the BSOC meeting rather than by e-mail.

Action items:	Person responsible:	Deadline:
Make minor changes to the NLP II 2002 Objectives as discussed and distribute to BSOs asap.	Nora Freeman	
Prepare summary update of 2001 accomplishments and get out to all employees.	Nora Freeman	
Decide what we want to do next—the future beyond NLP II.	ELT	

Review Board Meeting Agenda**John Huber**

Discussion: Under communications, staff will recommend amending the governing statutes reflecting on merged government. The Board will also discuss the revised Purchasing Policy and the IT Strategic Plan 2001-2003 Status Update.

Please submit agenda items for November 19 ELT meeting to Bob Miller.

Minutes

ELT Meeting Minutes

November 19, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone

Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes from the November 12 meeting were approved as submitted. Agenda for the November 19 meeting was discussed and approved.

Security Planning

Don McKay

Discussion: Don McKay discussed the following items regarding security: on December 17, Black and Veatch will visit all sites and provide a debriefing; the Middletown fencing is underway; we are preparing for a followup meeting with Dr. Atlas; Glen Mudd and Don McKay plan to attend a three-day security workshop in Milwaukee in December.

Karla noted the BSOs are on notice that we need to be covered during the holidays.

Greg discussed ornamental fencing at the CH Reservoir. Temporary fencing likely will be put up until early next summer. LWC advised Tina Ward Pugh and Jane Driskell that no access will be allowed to the Reservoir during construction of the fencing.

The federal government may provide funding to help pay for security, but has not decided how the money will get to water utilities.

Conclusions: We need to establish a policy on what information we release and to whom.

Action Items:

Person responsible:

Deadline:

Draft policy on what information we release and to whom.

LMD

Certification Approvals**CBSOs**

Discussion: Bob provided copies of and the group discussed the NLP II 2001-2002 System Certification Audit Schedule.

Conclusions: ELT needs to approve six certifications before 2002. We need to get the certification documents to ELT members well in advance of the ELT meeting wherein they will be discussed so ELT members can review the documents prior to the meeting.

Certifications will be discussed at the December 10 and December 17 ELT meetings. On December 10, C1, I4, and I5 will be reviewed. On December 17, I3, R4, and R5 will be reviewed.

P1 and P2, which will be combined in December, will be reviewed in April, 2002.

Action items:	Person responsible:	Deadline:
Discuss certifications as shown above at the December 10 and 17 ELT meetings.	ELT	

Policy Review Cycle**Laura Douglas**

Discussion: Laura noted that all LWC policies are posted on the Intranet. Each policy shows the effective date of the policy. The oldest policy is dated 1998.

ELT briefly discussed the Vehicle Policy. The portion of the policy regarding individual vehicle assignments is pending John Huber's approval. ELT would like to assist in finalizing the vehicle assignments portion of the policy.

Conclusions: ELT recommends that BSOs and CBSOs review appropriate policies every three years and recommend to ELT whether the policies need amendment/revision. Laura will notify BSO/CBSO 60 days in advance that a policy needs to be reviewed for amendment/revision. The date the policy is reviewed and by whom will be documented on the control document (the policy itself).

Action items:	Person responsible:	Deadline:
Create one-page flow chart showing procedure for reviewing policies and discuss at December 3 ELT meeting.	LMD	
Prepare matrix showing expiration date for each policy and discuss at December 3 ELT meeting.	LMD	
Take comments/proposals discussed today and come back with a recommendation at the December 3 ELT meeting.	LMD	

Draft Competencies**Jim Wehrle**

Discussion: Jim Wehrle discussed the Confidential Draft Competencies dated November 9, 2001 and the Draft Confidential Think Piece #8 Performance Appraisal Program. There are 8 core competencies listed in Management and 8 listed in Non-Management.

Conclusions: Karla requested that when Jim brings this back to the ELT, he name other companies using this system.

Action items:	Person responsible:	Deadline:
Provide comments to Jim on the Draft Competencies and Draft Confidential Think Piece #8 Performance Appraisal Program	Each CBSO	

Diversity-Related Goals Scoring Methodology and Weighting**Jim Wehrle, Rhonda Plunkett**

Discussion: Rhonda provided copies of and discussed the Proposed 2002 Diversity Goals. The proposal is consistent with what other private and public companies are doing.

Conclusions: ELT reached consensus on the portion of the proposal titled "Management Performance Appraisal." ELT did not take action on the remainder of the proposal but will provide feedback to John Huber and bring back to ELT at the December 3 meeting. ELT needs John's participation on this.

Action items:	Person responsible:	Deadline:
Provide feedback to John Huber.	ELT	
Discuss again at the December 3 ELT meeting.	ELT	

Winter Preparedness Plan

***Teasley, Hubbs, Wang,
Brammell***

Discussion: Jim Brammell reported on C2 winter preparation. Eric Ayers previously provided appropriate persons with the Winter Operations and Emergency Plan for LWC--Serving Customers CBS 2001-2002. Jim discussed the key elements of the report.

Steve Hubbs provided copies of and discussed the Winterization Checklist for Operations (Hubbs, Nov. 2001) for Crescent Hill Treatment Plan, Payne Water Treatment Plant, and Booster Pumping Stations.

LWC 2002-2006 Strategic Plan

Bob Miller

Discussion: Bob provided copies of the 2002-2006 Strategic plan. Copies of the Plan will be distributed to BSOs today and the plan will be communicated to all employees by December 15.

Bob Miller will e-mail the agenda for the November 26, 2001 ELT meeting.

Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes from the November 19 meeting were approved as submitted. Agenda for the November 26 meeting was discussed and approved.

Security Planning

Glen Mudd

Discussion: Glen Mudd reported on security: the Middletown fencing is complete, and we are getting quotes for the Cardinal Hill Reservoir fencing; a temporary guard shack has been set up at CH until a permanent guard shack can be constructed.

Conclusions: John Huber noted we need to identify contractors working for us in the field—provide LWC logo for contractor vehicles. This needs to be done as soon as possible.

Action items: **Person responsible:** **Deadline:**

Identify contractors working for LWC in the field—provide LWC ID (LWC logo) for contractor vehicles. GCH

BSO Transition Risk Issues

ELT

Discussion: Karla and Greg reported on the status of their BSO transitions. The purpose of the transitions is to expand the breadth and depth of know-how among the BSOs.

Conclusions: Steve Hubbs noted we need to document the expectations and accountabilities for BSOs as they move into their new roles and make sure there is a systematic transfer of information from one BSO to another.

Bob Miller will furnish a list of documents/procedures to be used in the transition. The list will include certification documents, system relationship charts, process maps, progress reports on operating plans from the past quarter, risk assessments, "war stories," calendar for functions to be performed during the year, programs/projects underway, and a copy of the outgoing BSO's WPPM for the new BSO. Bob is available to coach on relationship charts if necessary. Bob noted we should use the empowerment model to get the BSOs fully up to speed in their new roles. (Bob's list is being e-mailed with these minutes.)

Regarding WPPMs for year-end 2001, the CBSOs and BSOs will be responsible for evaluating the BSOs and POs who were under their supervision prior to the transition, but the new/incoming leaders will meet with these employees to set 2002 goals under the new performance appraisal system.

Action items: **Person responsible:** **Deadline:**

Furnish ELT a list of documents/procedures to be used in the BSO transitioning. (Bob's list is being e-mailed with these minutes.) Bob Miller

Riverbank Filtration Update

Hubbs/Wang

Discussion: Jack Wang provided copies of and discussed his and Steve Hubbs' presentation titled "Factors Impacting the Yield of Riverbank Filtration Systems" which they presented at the WQTC Conference in Nashville, Tennessee November 11-15, 2001. The objectives of the RBF Program were to investigate the factors impacting the yield of RBF systems and to discuss the need for future riverbank filtration studies. Conclusions from the study are: partial clogging of the riverbed (riverbank) is unavoidable, and, therefore, some reduction in the yield should be anticipated for RBF system; mechanical clogging was the dominant clogging mechanism in this case; and mechanical clogging could be minimized if the recharging streams promote scouring activities.

MSD Payment Boycott

Laura Douglas

Discussion: It appears many MSD customers in the west end of Louisville may boycott paying MSD charges until MSD takes care of an odor problem in that part of the city. The customers perceive that MSD is not proceeding as promised in taking care of the odor problem. LWC becomes the target of the protestors when they refuse to pay the MSD portion of their bill. Karla noted our agreement with MSD as of right now is a gentlemen's agreement. She noted that if we have a mass turn-off for nonpayment, a significant portion of the city without water would become an issue for the Health Department. She also noted we currently are in the middle of negotiations with MSD.

Conclusions: LWC should analyze the magnitude of the problem—how many locations, exact number of customers, etc.—then discuss our options.

Action items:

Person responsible:

Deadline:

Analyse data and discuss options.

KOT/RKM/ELT

Advise Gordon Garner that we will analyze the data and discuss our options.

John Huber

Open Time—Christmas Decorations

Jim Wehrle

Discussion: Jim Wehrle asked if LWC has a policy regarding Christmas decorations. LWC has no company-wide practice or policy restricting employees on decorating their workspace. Greg noted that each floor at Third St. and various other LWC locations have decorations stored. O'Dell Henderson decorates at Third Street.

Open Time—Timesheet Audit

Bill Meeks

Discussion: Bill Meeks asked about the timesheet audit that is planned. We need to communicate to all BSOs and POs what the audit involves, and the BSOs and POs should discuss with employees who would be impacted by the audit. This is a regular, routine, audit which includes a representation of ALL employees—union and salaried. This is not a special cause audit.

Action items:

Person responsible:

Deadline:

Get a one-page explanation out today to everyone who would be impacted by the audit. Bob Miller will discuss with Roger today. Mike Sturgeon should review the communication before it goes out.

RKM/M. Sturgeon/ R. LeMaster

Open Time—ELT Roles for 2002

Bob Miller

Discussion: ELT needs to select Leaders, TKOs, and Recorders (backup for Joan) for Year 2002

Action items:

Person responsible:

Deadline:

Discuss ELT roles at an upcoming ELT meeting.

ELT

Bob Miller will e-mail the agenda for the December 3, 2001 ELT meeting.

Louisville Water Company Empowerment Model

Empowerment is enabling employees to make decisions to plan and complete the work to satisfy the needs of customers. The boundaries of empowerment are the organizational culture, values and ethics; policies and procedures; job descriptions, performance expectation, employee's training, knowledge and experience; and plans and budgets.

Organization Culture, Values and Ethics

- Strategic Plan and Next Level Plan
- Systems Based Management; Partnership Among Employees; Empowerment; Quality of Work Life
- Customer Expectations and Community Goals and Plans
- Elected Officials Expectations
- Shared Corporate Experiences

Policies and Procedures

- Corporate Policies Manual
- Service Rules and Regulations
- Federal Regulations (USEPA, OSHA) and State and Local Regulations (KDOW, MSD, PSC)
- Departmental Procedures

Job Descriptions, Performance Expectations, and Employee's Training, Knowledge and Experience

- Job Descriptions
- Work Progress and Performance Management Goals
- Training Plans
- Key Constituent Relationships
- Routine Responsibilities

Plans and Budgets

- Certification Documents and Measurements
- Operating Plans and Operating Budgets
- Facilities Plans and Capital Budgets
- Risk Assessments

Effective empowerment ensures that: employees understand their work processes, the boundaries of the processes, and how these processes relate to their customers; employees can make individual decisions and take independent actions within established process boundaries; and employee creativity, knowledge and experience will be integrated into processes.

Minutes

ELT Meeting Minutes

December 3, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Jim Wehrle

Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, John Huber, Don McKay, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle
Absent: Steve Hubbs
Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes from the 11/26/01 meeting were approved. Agenda for the 12/3/01 meeting was approved.

Security Planning

Don McKay

Discussion: Don McKay discussed fencing at the Cardinal Hill Reservoir and the Crescent Hill Reservoir. He discussed upgrades to the Simplex software and hardware and the various access levels. Don will review the appropriateness of all levels of access.

Action items:

Person responsible:

Deadline:

Make sure Russ Maple knows about the closing of the CH Reservoir during construction of the fencing.

Vince Guenthner/KOT

Policy Review Cycle

L. Douglas

Discussion: Laura Douglas provided copies of and discussed the Flowchart for Corporate Policy Development, Revised 8/11/00; the Policy Revision/Development Process; and a matrix of LWC policies.

Conclusions: ELT agreed on 60-day notification to the CBSO/BSO prior to the quarter during which the policy expires. The CBSO/BSO will have the entire quarter to present their recommendations for revisions to the ELT. Policies will be reviewed every three years by ELT.

ELT agreed to post the policies on the Intranet and eliminate the policies binder so employees will not have access to policies which are outdated. We should notify employees that the policy binder is sunsetting and tell them policies can be accessed on the Intranet. One issue is to make sure employees have access to a PC so they can review the policies as needed. Another issue is notification to employees of new policies/changes to existing policies. Notification to employees should be from the CBSOs/BSOs to POs and BSOs/POs to employees. We can also notify employees of new policies/changes to existing policies through NewsLeaks.

Action items:

Person responsible:

Deadline:

Make changes to the flowchart as discussed and bring back to ELT.

Laura Douglas

Notify employees that the policy binder is sunsetting and policies will be posted on the Intranet.

CBSOs/BSOs/POs

Purchasing Policy

B. Miller, A. Halloran

Discussion: Amber Halloran provided copies of and discussed the Draft Purchasing Policy dated December 3, 2001. Bob Miller discussed changes to the document made as a result of discussion at the November 26 ELT meeting.

Action items:

Person responsible:

Deadline:

Make changes to the draft policy as discussed and finalize this with General Counsel, who will draft in policy format and take through the policy development process.

RKM/A. Halloran/LMD

Diversity Hiring Goals

J. Wehrle, R. Plunkett

Discussion: Rhonda Plunkett provided copies of the Affirmative Action Recruitment/Promotion/Progression Goal YTD Sept. 2001 and the Confidential Draft Discussion of Affirmative Action Goals dated December 3, 2001. The documents incorporate changes discussed at the November 19, ELT meeting.

Conclusions: ELT consensed on the four items listed under Recap of Prior Consensus--and on Item 1 under Two Issues. Regarding Item 2 under Two Issues, ELT consensed with Rhonda's and Jim's suggestion to adopt the general approach to goals outlined and allow them several weeks to devise a scoring method.

Action items:

Person responsible:

Deadline:

Work on scoring method.

JJW/Rhonda Plunkett

Open Time

ELT

Discussion: Four issues were discussed: the KMSDC Million Dollar Club Award which LWC recently received; the Financial Information System Business Case (Bob provided a copy); the Empowerment Model which was distributed earlier by e-mail; and the present value of total profit from a typical residential customer.

Bob Miller will e-mail the agenda for 12/10/01 ELT meeting

Minutes

ELT Meeting Minutes

December 10, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Bill Meeks
Attendees: Ed Chestnut, Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Sue Purdy, Karla Teasley
Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Minutes of the 12/3/01 ELT meeting were approved. Agenda for the December 10 meeting was discussed and approved.

Policy Revision and Development Process

Laura Douglas

Discussion: Laura Douglas provided a copy of the Policy Revision and Development Process Flowchart which includes additions and changes discussed at the December 3 ELT meeting.

Action items:

Person responsible:

Deadline:

Advise Laura of any additional changes to the flowchart.

ELT members

Security Planning

Bob Miller

Discussion: Bob Miller reported on changes regarding security guards at Crescent Hill, Payne Plant, Zorn Avenue and Cardinal Hill. The changes represent a significant cost reduction with no compromise in the level of security provided. He reported on the Simplex system—upgrades being made to the software and a reduction in the number of security levels.

Greg Heitzman reported that the magnetic LWC logos will be available for LWC contractors within two weeks. We will provide the logos for contractors' vehicles at the beginning of a job/contract and retrieve the logos when the job/contract is completed.

System Certification: C1 – Providing and Receiving Customer and Public Information **Karla Teasley**

Discussion: Karla Teasley provided copies of and discussed the business system certification document for C1—Providing and Receiving Customer and Public Information Audit Report dated November 20, 2001. The C1 system agrees with the recommendations for improvement noted in the report. Karla recommended ELT approve certification of C1 system on the basis of the documentation provided

Conclusions: ELT approved certification of the C1 system with the understanding that the system will work on the recommendations contained in the report.

The BSO will deliver a Management Response letter to the CBSO and Internal Auditor and develop a schedule and tracking system as a followup to the Management Response letter.

It was noted we should differentiate between gaps and recommendations and differentiate between work to be completed in the coming year and work which can be considered multi-year work.

Action items:	Person responsible:	Deadline:
Deliver a Management Response letter to the CBSO and Internal Auditor and develop a schedule and tracking system as a followup to the Management Response letter.	BSO	
Differentiate between gaps and recommendations and differentiate between work to be completed in the coming year and work which is considered to be multi-year work.	ELT	

System Certification: I5 – Infrastructure Services **Greg Heitzman**

Discussion: Greg Heitzman provided copies of and discussed the business system certification document for I5—Infrastructure Services Audit Report dated October 19, 2001. Greg discussed the two recommendations stated in the Executive Summary and recommended ELT certify the I5 system.

Conclusions: ELT approved certification for I5 business system with the understanding that the system will work on the recommendations contained in the report.

System Certification: R5—Managing Business Risks **Bob Miller**

Discussion: Bob Miller provided copies of and discussed the business system certification document for R5—Managing Business Risks Audit Report dated December 6, 2001. Bob discussed recommendations contained in the audit report and recommended certification for R5.

Greg suggested putting an article in NewsLeaks advising that the C1, I5, and R5 have been certified and providing certificates to the systems which were certified. The certificates would be signed by the CBSO and John Huber. Greg will work with Roger on this.

Conclusions: ELT approved certification for R5 business system with the understanding that the system will work on the recommendations contained in the report.

The BSO will deliver a Management Response letter to the CBSO and Internal Auditor and develop a schedule and tracking system as a followup to the Management Response letter.

Action items:	Person responsible:	Deadline:
Deliver a Management Response letter to the CBSO and Internal Auditor and develop a schedule and tracking system as a followup to the Management Response letter.	BSO	
Provide something in NewsLeaks regarding systems which were certified.	KOT/GCH/RKM	
Provide certificates to the systems which were certified.	GCH/LeMaster	

Review Board Meeting Agenda

**Huber, Miller, Heitzman,
Douglas**

Discussion: John Huber reported that some of the items which will be discussed at the December 11 Board meeting are: water rates and fees, design and RFP for FIS (business case), and the fourth quarter dividend.

**Review Greenbacks Report and Review
Operating Issues and Budgets**

Miller, Halloran, Purdy

Discussion: Amber Halloran and Sue Purdy provided copies of the LWC Financial Highlights for November, 2001. A page has been added to the report which notes highlights for the month. Amber discussed the November, 2001 highlights.

Conclusions: Water consumption through November, 2001 is 288 million gallons lower than a year ago. YTD Other Operating Revenue exceeds last year by \$747 thousand and budget by \$1.4 million. This variance is primarily due to an increase in penalties and turn on/off fees. Billing fees for sewers are also higher than last year and budget. O&M expense through November, 2001 is \$2.4 million higher than the same period last year, and higher than budget by \$706 thousand.

Open Time

ELT

Discussion: Bob discussed additions to the list of future agenda items: ISO 9000/flowcharts/SOPs, system risk assessment, measuring/improving internal customer satisfaction beyond the corporate survey, NWT participation requirements, and shared VP/BSO goals.

The first ELT meeting in 2002 will be January 7. Bob will provide Laura with a current list of future agenda topics.

Bob Miller will e-mail the agenda for the December 17, 2001 ELT meeting.

Minutes

ELT Meeting Minutes

December 17, 2001
9:00 AM to 12:00 PM
Board Room

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Timekeeper: Bill Meeks
Attendees: Steve Cooper, Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Cindy Kowalski, Roger LeMaster, Ralph McCord, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Rhonda Plunkett, Karla Teasley
Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Joan will revise the 12/10/01 ELT minutes as follows: Add the following comment under "Conclusions" and "Action Items" for the topics of System Certification for C1 and System Certification for R5:

"The BSO will deliver a Management Response letter to the CBSO and Internal Auditor and develop a schedule and tracking system as a followup to the Management Response letter."

The agenda for the 12/17/01 ELT meeting was discussed and approved.

Security Planning

Bob Miller

Discussion: Bob discussed the status of installation of fencing at Cardinal Hill. The Black & Veatch Vulnerability Assessment is underway. B&V's final report will be discussed at the first ELT meeting in January. Bob provided copies of a draft Flow Chart of Handling DS Water Quality Threats--LWC is planning exercises to test the effectiveness of the process. We should decide how we will deal with our wholesale customers regarding HR 3448 (Bob provided a copy of HR 3448—Public Health Security & Bioterrorism Response Act of 2001). We should at a minimum share the information with wholesale customers.

Action items:

Person responsible:

Deadline:

Followup on HR 3448 and communicate with our wholesale customers in January.

JVG/GCH

Provide comments on the draft flow chart to Don McKay

ELT Members

System Certification: I3 – Distribution Design and Construction

Greg Heitzman

Discussion: Greg provided copies of and discussed the business system certification document for I3—Distribution Design and Construction Audit Report dated December 13, 2001. Greg discussed the recommendations in the report and recommended to ELT that this system be certified for Year 2001-2002. Greg will meet with the business system SAC to review the results of the audit and implementation of recommendations into the 2002 Operating Plans. The Management Response will be delivered by January 15 to Internal Audit and the CBSO.

Conclusions: ELT approved certification of the system with the understanding that the system will work on the recommendations stated in the Audit Report.

Action items:

Person responsible:

Deadline:

Deliver a Management Response letter to the CBSO and Internal Audit and develop a schedule and tracking system as a followup to the Management Response letter.

BSO

by 1/15/02

**System Certification: R4 – Supplying Information
Technology Resources**

Bob Miller

Discussion: Bob discussed certification for R4-Supplying Information Technology Resources. Bob discussed his concerns regarding certification of this system and feels R4 does not meet the standards for certification at this time.

Action items:

Person responsible:

Deadline:

Have a written response letter in one month. Work with R4 business system and plan to be ready for certification in March, 2002.

RKM

Take-Home Vehicles

John Huber

Discussion: John Huber discussed the list of approved take-home vehicles for Classes B, C, and D.

Action items:

Person responsible:

Deadline:

Send approved list to ELT/others who are approved take-home vehicles.

J. Malone

Provide copies of the latest version of the Vehicle Assignment Policy to ELT/others who are approved take-home vehicles, and work with IT to get the current policy posted on the Intranet.

LMD

System Certification: I4 – Distribution Extensions

Greg Heitzman

Discussion: Greg provided copies of and discussed the business system certification document for I4—Distribution Extensions Audit Report dated August 28, 2001. Greg discussed the recommendations in the report and recommended to ELT that this system be certified for Year 2001-2002. Greg will meet with the business system SAC to review the results of the audit and implementation of recommendations into the 2002 Operating Plans.

Conclusions: ELT approved certification of I4 with the understanding that the system will work on the recommendations stated in the Audit Report.

Action items:

Person responsible:

Deadline:

Meet with the business system SAC to review the results of the audit and implementation of recommendations in the 2002 Operating Plans.

GCH

Cardinal Hill Reservoir Cleaning

John Huber

Discussion: John Huber discussed the bidding out of cleaning of the Cardinal Hill Reservoir.

Conclusions: John emphasized the Cardinal Hill Reservoir must be cleaned, disinfected, flushed, and fully restored to service by May 1. Completing this work by May 1 is of key importance.

Action items:

Person responsible:

Deadline:

Procurement method must achieve the outcome of having the reservoir fully cleaned, disinfected, flushed and restored to service by May 1. Use standard procurement if timeline can be reliably met. If timeline can't be reliably met, pursue the Cardinal Hill Reservoir work under a certificate of emergency and nonstandard procurement.

Hubbs, Halloran

**Minority Business Development Team
Recommendations**

Cindy Kowalksi

Discussion: Cindy provided copies of and discussed the LWC MBD Team Presentation to the ELT. Cindy, Rhonda, Amber, and Steve discussed proposed changes in the reporting/measuring method, changes in the HBE goal, and changes in the structure of 2002 goals.

Conclusions: ELT approved the proposed changes in the reporting/measuring method, separating the HBE goal from the MBE spending goals, a 5% 2002 MBE goal, and a 5% 2002 WBE goal.

Team Effectiveness Survey

Bob Miller

Discussion: Bob Miller handed out copies of the Team Effectiveness Survey.

Action items:

Person responsible:

Deadline:

Complete the survey and return to Nora ASAP.

ELT Members

Bob Miller discussed future agenda items. Laura Douglas will assume the Leadership role of ELT on 1/7/01. Laura will e-mail the agenda for the January 7, 2002 ELT meeting.

Minutes

Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Bob Miller

Discussion: Revised minutes from the December 17, 2001 meeting were approved. Agenda for the January 7, 2002 meeting was discussed and approved.

Black & Veatch Security Assessment/Security Planning

Don McKay/Phil Scott

Discussion: Black & Veatch's written report should be available December 7 or 8. Don reported on the status of security planning at LWC.

Conclusions: ELT should look at the ownership of security as it relates to evaluation and accountabilities.

Action items: Look at ownership of security as it relates to evaluation/accountabilities. **Person responsible:** ELT **Deadline:**

2002 Shared President & Vice Presidents Goals

Laura Douglas/ELT

Discussion: Laura Douglas provided copies of the 2001 President and Vice Presidents Shared Goals and the 2001 Incentive Plan Goals. The group discussed weighting of goals for 2002 regarding Diversity, Competencies, and Operating Plans/Shared Goals in the new performance appraisal system.

Conclusions: ELT consensed on the following weighting: For management (ELT/BSOs/POs): Diversity—10%; Competencies—40%; Operating Plans/Shared Goals—50%. For nonmanagement: Competencies—40%; Operating Plans/Shared Goals—60%.

Action items: Set goals for 2002 at 1/14/02 ELT meeting. **ELT members should come to the 1/14/02 ELT meeting prepared with strawman proposals for 2002 shared/incentive goals.** **Person responsible:** ELT **Deadline:**

ELT members responsible for calculating any portion of the 2001 goals should bring their 2001 YTD calculations to the 1/14/02 meeting. **Person responsible:** ELT

Empowerment Pilots

Nora Freeman

Discussion: Nora Freeman provided copies of and discussed the 2002 Empowerment and Accountability Pilot Activities. Bob Miller provided copies of and discussed his Draft 1/7/02 LWC Empowerment Model and LWC Bids and Awards Committee Empowerment Model.

Conclusions: We are on schedule regarding the timeline. ELT members should attend the Tuesday, March 12, 2002 training session with Lee Ginsburg on Empowerment and Accountability. (This meeting may be rescheduled since there is a Board of Water Works meeting scheduled for that day.)

John Huber noted there are three important pieces to empowerment: sharing information, setting boundaries, and making sure everyone involved knows their process and has effective measures.

Laura Douglas provided copies of and discussed ELT Future Agenda Items. Laura will e-mail the agenda for the January 14, 2002 ELT meeting.

Please bring: Agenda and Minutes

Agenda Topics

Review Minutes

Laura Douglas

Discussion: Revised minutes from the January 7 meeting were approved. Agenda for the January 14 meeting was discussed and approved.

2002 Goals (President and Vice Presidents Shared Goals & Incentive Plan Goals) All

Discussion: Jim Wehrle provided copies of his "P&C Draft 'Strawman' Shared/Incentive Goals" dated 1/14/02. The group discussed Incentive Plan Goals for 2002 and President and Vice President Shared Goals for 2002.

Conclusions: ELT consensed to keep the Incentive Plan Goals the same for 2002 as they were in 2001, and discuss Measures for these goals at the 1/28/02 ELT meeting.

For the Shared Goals, ELT consensed to the following: (A) the Diversity Goal has been addressed, so will be removed from the Shared Goals; (B) retain the Capital Program Goal as a Shared Goal; (C) retain Increased Revenue as a Shared Goal; (D) remove the Overtime Goal as a Shared Goal; (E) retain the Advanced Treatment Goal as a Shared Goal; (F) retain Process Improvements as a Shared Goal; and (G) keep the Cost of Risk Goal as a Shared Goal.

Weighting for the 5 Shared Goals will be 4% for each goal, leaving 30% for individual goals.

Action items:	Person responsible:	Deadline:
Each VP will get with Nora Freeman this week with the final numbers for 2001 goals and have her create draft 2002 Incentive Plan Goals and Shared Goals with Measures. ELT will review and finalize the draft Goals and Measures at the 1/28/02 meeting.	VPs	1/28/02

Update: Legislation and Available Federal Funds Vince Guenther

Discussion: Vince provided copies of and discussed his memorandum regarding Legislative Update.

Conclusions: Vince will provide this update at the BOWW meeting Tuesday, 1/15/02.

Greenbacks Report

Amber Halloran/Sue Purdy

Discussion: Amber Halloran provided copies of and discussed the LWC Financial Highlights for December, 2001 and year-end 2001.

Conclusions: Water consumption through December, 2001 is 395 million gallons lower than a year ago, but 378 million gallons higher than budget. The month of December is 108 million gallons lower than December a year ago. Other Operating Revenue exceeds last year by \$609 thousand and budget by \$1.3 million. This variance is primarily due to an increase in penalties and turn on/off fees. Billing fees for sewers are also higher than last year and budget. O&M expense through December, 2001 is \$2.3 million higher than same period last year and higher than budget by \$979 thousand.

Review 1/15/02 BOWW Agenda

John Huber

Discussion: The Board will discuss the following items at its meeting on Tuesday, January 15, 2002: Audit Committee Report, Compensation Committee Report, Year-End Financial Results, MRRP, Apportionment Warrants in Jefferson County, Legislative Update, Health/Disability/Life Insurance Plan Costs, and AquaSource.

Quarterly Team Effectiveness Review

Nora Freeman

Discussion: This item was deferred to the January 28, 2002 ELT meeting.

Conclusions:

Action items:

Circulate survey results to ELT prior to the 1/28/02 meeting.

Person responsible:

Nora Freeman

Deadline:

Laura Douglas will e-mail the agenda for the January 28, 2002 ELT meeting.

Leader: Laura Douglas
Facilitator: Nora Freeman (On Call)
Recorder: Joan Malone
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Nora Freeman, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Billy Meeks, Bob Miller, Rhonda Plunkett, Karla Teasley, Jim Wehrle
Please bring: Agenda, Minutes, and 2001 Goals

Agenda Topics:

Review Previous Minutes & Agenda

Laura Douglas

Discussion: Minutes from the January 14, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Diversity

Jim Wehrle/ Rhonda Plunkett

Discussion: Rhonda provided copies of and discussed the Proposed 2001 Affirmative Action Results/Proposed 2002 Affirmative Action Format. Jim Wehrle discussed keeping the current format versus adopting the new format.

Conclusions: ELT consensed to keep the 2001 goals as originally written as the basis for evaluation of 2001 results.

ELT should continue to consider measurement and calculation methods for the 2002 goals. Mr. Wehrle suggested HR, Rhonda Plunkett, and he come up with a scale that works better than what we are now using.

Action items:

Person responsible:

Deadline:

Investigate measurement scales.

Wehrle/Plunkett

Team Effectiveness Review

Nora Freeman

Discussion: This item was deferred to the February 4, 2002 ELT meeting.

2001 Goal Results

Nora Freeman

Discussion: Nora provided copies of and discussed the 2001 Fourth Quarter and Year-End Results for Incentive Plan Goals, President and VPs Shared Goals, and Corporate Performance Award Goals. Bob Miller provided copies of and discussed his recommendations regarding Net Income Objective and Measure for 2001 Incentive Plan Goals. If the Compensation Committee and full Board accept these recommendations, we would achieve Level 2 Measure for the Net Income Goal, which is also the "lightswitch" goal.

Bob Miller also provided information on proposed adjustments to the O&M cost per customer data which is part of the Employee Performance Award Goal set. The proposed adjustments, which are for costs incurred in 2001 which were unplanned and beyond the control of employees, reduce the O&M cost to a level which meets the Performance Award Goal.

Conclusions: The results of the Corporate Performance Award Goal will be presented to the Compensation Committee for approval and will include adjustments recommended regarding O&M cost per customer. The Corporate Performance Award is for employees other than the President, Vice Presidents, and Business System Owners.

2002 Goal Setting

All

Discussion: Nora provided copies of and discussed the Draft 2002 President/Vice President Shared Goals. Weighting in 2002 will be: Competencies 40%, Diversity 10%, Shared Goals 20%, and Individual Goals 30%.

Nora also provided copies of the Draft 2002 Corporate Performance Award Goals and the Draft 2002 Incentive Plan Goals which will be discussed at the February 4, 2002 ELT meeting.

Conclusions: ELT consensed as follows for 2002 President/Vice President Shared Goals:

For Objective A (Implement Capital Improvement Program), to adopt Goal and Measures with Weighting of 4% rather than 5% as stated and to add "at budget" under Measure for Level 3 performance. Bob Miller will provide the dollar amounts indicated by an "X" in the draft.

For Objective B (Increase Revenue) and C (Advance Treatment Program Plan), to adopted the Goals and Measures with Weightings of 4% rather than 5% as stated.

For Objective D (Increase Operational Performance), to adopt the Goal and Measures with changes as discussed, with Weighting of 4% rather than 5% as stated. Changes to the Measure column for Objective D are: Change dates under all 5 Measures to ". . . system certification audits completed by 7/30/02," and ". . . systems recertified by 8/30/02." In the Measure column, for Rating Levels 1, 2, 3, 4, and 5, in the phrase, ". . . demonstrate less than (X or a number) measureable. . .," replace the Xs or numbers shown with the numbers 6, 8, and 10, 12, and 14 respectively. In the Measure column, under Rating Level 1, add this note: "If any systems are not certified by 12/31/02, performance will be rated at Level 1.0." Nora provided copies of and briefly discussed information explaining Operational Improvements (formerly referred to as Process Improvements).

For Objective E (Control Cost of Risk), to adopt the Goal and Measures with Weighing of 4% rather than 5% as stated, and to add a note, "At a future ELT meeting, time will be devoted to discussing cost of risks and looking at drivers for cost of risk."

Action items:

Person responsible:

Deadline:

Prepare final version of 2002 President/Vice President Shared Goals.

Nora Freeman

Laura discussed future agenda items.

Laura will e-mail agenda for the 2/4/02 ELT meeting.

Minutes

ELT Meeting Minutes

February 4, 2002
9:00 AM to 12:00 PM
Board Room

Leader: Laura Douglas
Facilitator: Nora Freeman (On Call)
Recorder: Joan Malone
Scribe: Karla Teasley
Timekeeper: Steve Hubbs
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Billy Meeks, Bob Miller, Rhonda Plunkett, Karla Teasley, Jim Wehrle, Nora Freeman
Please Bring: Agenda, Minutes, and 2001 Goals

Agenda Topics:

Review Previous Minutes & Agenda

Laura Douglas

Discussion: Minutes from the 1/28/02 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Team Effectiveness Review

Nora Freeman

Discussion: Nora distributed copies of and discussed the results of the recent Team Effectiveness Survey and the Team Principles Survey.

Conclusions: For the Team Effectiveness Survey, the average for the fourth quarter—4.3—is an all-time high. The Team Principles Survey average for the fourth quarter is also quite good at 4.1.

2001 Diversity Goal Attainment

Rhonda Plunkett

Discussion: Rhonda Plunkett provided copies of and discussed the following: 2001 Affirmative Action Goal Outcome, 2001 Minority Business Spending Outcomes, 2001 Composite Culture Scores, and **Revised** 2001 Composite Culture Scores. Regarding the 2001 AA Goal Outcome, the numbers in the Professionals category include two good faith efforts, which did not affect the overall 2.6 score.

Conclusions: ELT consensed that management-initiated lateral moves will not be included when measuring performance on the 2002 AA Goal. A decision is pending on whether to include lateral moves involving job postings when measuring performance on the 2002 AA Goal.

Action Items:

Discuss AA and MBE Measures in the future.

Person Responsible: **Deadline:**

ELT

Make changes to the composite scores as discussed by ELT

Rhonda Plunkett

2002 Corporate Goals

All

Discussion: Nora provided copies of and the group discussed the Draft 2002 Corporate Performance Awards Goals.

Conclusions: ELT consensed on the Distribution Water Quality Goal, the Cost Control Goal, and the CSI Serviced Customers Goal as drafted. Under the Distribution Water Quality Goal, the Bacteria portion of the goal should be restated to read, "No coliform bacteria in 99% of distribution samples."

Under the Motor Vehicular Accidents portion of Safety Goal, ELT consensed to change the goal from "equal to or less than 27" to "equal to or less than 28." The Motor Vehicular Accidents portion of the Safety Goal should be linked to number of miles driven. ELT consensed on the Lost Time Injuries portion of the Safety Goal as drafted.

Action Items:

Person Responsible:

Deadline:

Double check how we collect data on miles driven and how it is tracked and reported.

GCH/KOT

Prepare final version of 2002 Corporate Performance Awards Goals

Nora Freeman

2002 Incentive Plan Goals

All

Discussion: Nora provided copies of and the group discussed the Draft 2002 Incentive Plan Goals.

Conclusions: For Goal I, Return on Equity, ELT consensed to increase the dollar amount under Level I to \$600,000, increase the dollar amount under Level 2 to \$1,200,000, and increase the dollar amount under Light Switch to \$600,000.

For Goal II, Customer Satisfaction, ELT consensed to adopted the goal as drafted.

For Goal III, Water Quality, ELT consensed to change A to read as follows: "Combined filter effluent turbidity (BEP/CHWTP) for the Period Jan. 1-Dec. 31, 2002 less than or equal to 0.10 ntu, 95% of the time. . . ." Under Goal III, B, change to read, ". . . less than or equal to 0.15 ntu, 95% of the time. . . ." Items C, D, and E were adopted by ELT as drafted.

ELT consensed to adopt Goal IV, Productivity, as drafted.

For Goal V, Human Resources and Organizational Systems, ELT adopted the goal with the following changes: Under Level I, A, change the number of Preventable Vehicular Accidents to "less than or equal to 28;" under Level 2, change the number for the Employee Perception Index to "628 or higher."

Action Items:

Person Responsible:

Deadline:

Prepare final version of 2002 Incentive Plan Goals.

Nora Freeman

Laura provided copies of and the group discussed future agenda items. Laura will e-mail the agenda for the February 11, 2002 ELT meeting.

Minutes

ELT Meeting Minutes

February 11, 2002
9:00 AM to 12:00 PM
Board Room

Leader: Laura Douglas
Facilitator: Nora Freeman (On Call)
Recorder: Joan Malone
Scribe: Karla Teasley
Timekeeper: Steve Hubbs
Attendees: Susan Camp, Laura Douglas, Amber Halloran, Mark Harpe, Greg Heitzman, Steve Hubbs, John Huber, Ellen Mackin, Joan Malone, Bob Miller, Sue Purdy, Karla Teasley, Jim Wehrle
Please Bring: Agenda and Minutes

Agenda Topics:

Review Previous Minutes & Agenda

Laura Douglas

Discussion: Minutes from the February 4, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Review Proposed Changes to COBRA Policy

Ellen Mackin

Discussion: A copy of the revised policy and a memo from Ellen explaining the proposed changes were provided prior to the ELT meeting. Ellen discussed the proposed changes to the COBRA policy. The policy requires minor modifications to clarify COBRA provisions.

Conclusions: ELT consented to the proposed changes.

Action Items:

Person Responsible:

Deadline:

Post revised policy on the Intranet.

Laura Douglas

Newspaper Article , "Knoxville Ranks Near Top in Study of Tap Water"

John Huber

Discussion: Mr. Huber briefly discussed the article.

Conclusions: LWC staff needs to know about the article and be prepared to respond to any questions concerning the article.

Action Items:

Person Responsible:

Deadline:

Get a copy of and analyze the study that is referred to in the article.

GCH/J. Wang

Debit/Credit Card Program

Karla Teasley/Susan Camp

Discussion: Susan Camp provided copies of and the group discussed the Debit & Credit Card Transaction Processing Synopsis dated February 1, 2002. The Debit & Credit Card Transaction Processing option was developed as a result of numerous customer requests for LWC to offer alternative payment methods.

Conclusions: This is not a budgeted item, so we will have to find a way to offset the cost.

Action Items:

Person Responsible:

Deadline:

At the February 25, 2002 ELT meeting, discuss ways to offset the cost of the Debit/Credit Card Program.

ELT

Proposed Revisions to Purchasing Policy

Bob Miller

Discussion: Bob Miller provided copies of and the group discussed the Draft Purchasing Policy dated February 7, 2002.

Conclusions: ELT discussed the policy and consented to several changes. Bob will put the policy in final document format, and ELT will communicate the policy to BSOs/POs.

Action Items:

Person Responsible: Deadline:

Prepare policy in final document format.

Bob Miller/Laura Douglas

Communicate the policy to BSOs/POs.

ELT

Greenbacks Report

Amber Halloran/ Sue Purdy

Discussion: Amber provided copies of and discussed the LWC Financial Highlights for January, 2002. She also provided copies of and discussed the 2002 O&M Budget Comparison to 2001 Actual Expenditures, and LWC January, 2002 Revenue/Usage/Days Billed.

Conclusions: Water consumption in January, 2002 is 294 million gallons lower than a year ago, and 188 million gallons lower than budget. Other Operating Revenue is lower than last year by \$58 thousand and higher than budget by \$64 thousand. O&M expense in January, 2002 is \$274 thousand lower than same period last year, and lower than budget by \$158.2 thousand.

Budget Controls

All

Discussion: This item was deferred to the February 25, 2002 ELT meeting and will be discussed as part of the discussion on 2002 Budget overages.

Conclusions: Items to be discussed on February 25, 2002 regarding 2002 Budget overages are: Health Insurance (\$200,000); Employee Performance Award (\$45,000); Incentive Award (\$115,000); Bankruptcies (\$70,000); Debit/Credit Cards (\$20,000); and Wellhead Protection (\$25,000). These items total \$475,000.

2002 Revenue shortfall will also be discussed at the February 25, 2002 ELT meeting.

Action Items:

Person Responsible: Deadline:

Between now and Feb. 25, ELT members will get with their BSOs, advise them of the \$475,000 overage, and get their BSOs' input on possibilities for budget cuts. ELT members should be prepared to discuss budget cuts at the Feb. 25 meeting.

ELT

Board Items

John Huber

Discussion: The Board will discuss AquaSource (INAAP and Goshen Utilities) and the report from the Public Information/Customer Satisfaction Committee at its monthly meeting on Tuesday, February 12, 2002.

Laura discussed future agenda items. She will e-mail the agenda for the February 18, 2002 ELT meeting.

Minutes

ELT Meeting Minutes

Leader: Laura Douglas
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Karla Teasley
Timekeeper: Jim Wehrle
Attendees: Laura Douglas, Vince Guenther, Greg Heitzman, John Huber, Don McKay, Bill Meeks, Joan Malone, Bob Miller, Karla Teasley, Jim Wehrle
Please Bring: Agenda and Minutes

Agenda Topics

Review Minutes

Laura Douglas

Discussion: Minutes from the February 11 meeting were approved as submitted. Agenda for today's meeting was discussed and approved.

Security Update

Don McKay

Discussion: Don McKay gave an update on security and reported on the results of the Black & Veatch security assessment.

Conclusions: LWC should respond to the B&V security assessment recommendations as if this were an audit. We should issue a management letter.

We should develop procedures to be taken within 4, 8, and 12 hours after any major disaster.

Action items:	Person responsible:	Deadline:
Prepare response management letter to B&V's security assessment recommendations.	Don McKay/Bob Miller	
Develop procedures to be taken within 4, 8, and 12 hours after any major disaster.	Don McKay	

Legislative Update

Vince Guenther

Discussion: Vince Guenther provided copies of and discussed the Bill Status Report.

Regulatory Compliance

John Huber

Discussion: Mr. Huber expressed concern regarding LWC's regulatory compliance. We must make sure we do everything we can to have zero violations. The group discussed tying "zero violations for regulatory compliance" into the shared goals.

Conclusions: Some issues involved in regulatory compliance are: cultural issues; accountability issues; communication issues; education/training issues; and organizational structure/role issues.

ELT consented to the following statements/questions regarding regulatory compliance:

- LWC has a number of regulatory violations over the past few years. Shouldn't have any—customers expect zero violations.
- What are the consequences or accountabilities that should be associated with the violations? They break the law and community trust.
- Violations are also a barrier to our other strategic objectives (i.e., regionalization).
- Our cumulative record on violations is outside of control limits.

ELT consented to the following draft goal statement/question: "What actions must LWC take to have zero regulatory violations?"

Bob Miller developed the following draft problem statement: "The LWC has X drinking water quality regulatory violations on the EPA website. The Company has also been cited for violations of other regulations. These constitute violations of federal and state laws. Our customers expect full compliance, and violations impair the community trust. Continued violations may become a barrier to regionalization and other strategic objectives."

ELT members will use the draft problem statement and the draft goal statement to get input from the various operating areas on strategies to pursue in obtaining zero violations. Options discussed at today's meeting include: putting a team together; bringing someone in from the outside to do the review or facilitate the process; using the problem-solving model.

Bob Miller/Don McKay should discuss how we can tie this into the Risk Management Plan.

Nora Freeman should attend the February 25 meeting and bring the Problem Solving Model.

Action items:	Person responsible:	Deadline:
Get input from operating areas and come to ELT meeting on February 25 prepared to discuss strategies to pursue in obtaining zero violations.	ELT	
Ask Nora Freeman to attend on February 25 and bring the Problem Solving Model. Ask Nora about other tools to use.	Laura Douglas	

MUW Campaign/Loaned Executive & Fund for the Arts: Rotating Responsibility All

Discussion: This item was deferred to a later ELT meeting.

Laura Douglas discussed agenda items for the February 25, 2002 ELT meeting. Laura will e-mail the agenda.

Please Bring: Agenda and Minutes

Agenda Topics

Review Minutes, Agenda & Roles

Laura Douglas

Discussion: Minutes from the February 18 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

A Model for Discussion & Decision Making

Laura Douglas

Discussion: The group discussed approaches LWC might take in dealing with regulatory compliance.

Conclusions: CBSOs/BSOs will deal with system issues. ELT will deal with corporate issues

Some "white spaces" were identified: (1) Corporate issues—we must make regulatory compliance a corporate priority in all areas of the company. Many regulations cross cores/process boundaries, where one area is in compliance and another area is not. (2) Clarify roles—we do not have a clear understanding of the roles of corporate regulatory compliance versus the roles of POs or individual players. We have unclear expectations at each level. (3) Fill in information gaps—make sure people have the information they need.

ELT consented to use the systems-based management approach to deal with regulatory compliance issues.

Mr. Huber pointed out that an environmental audit needs to be a key piece of this. The environmental auditor should be external. We should look for someone who can give us best practices for compliance. Part of the audit should be regulatory compliance.

Action Items:

Person Responsible:

Deadline:

Define the roles of ELT, CBSOs, BSOs, POs and individuals in regulatory compliance.

ELT

Boundaries & Role Clarification

John Huber

Discussion: John Huber gave a "snapshot" of violations.

Conclusions: The group set the following boundaries and role clarifications:

1. Need to report completely, factually and timely in order to fulfill ethical and legal responsibilities.
2. Address issues using systems-based approach and work through the management and processes in place.
3. Clearly assign accountability for regulatory compliance.
4. Individuals/processes should know regulations they are accountable for complying with.
5. Assure we have competencies in place to achieve compliance.
6. Need to have a compliance plan in place (corporate methodology).
7. Have a tracking system in place to monitor compliance plan implementation & reporting.
8. Communication and accountability must be effective when compliance crosses systems and processes.
9. Consider systems, processes and accountabilities within regulating agencies/entities and who we must communicate with for certain issues.
10. If we have a NOV or potential NOV, we must immediately make everyone in the compliance chain aware of the circumstances—individuals, POs, BSOs, CBSOs, CEO, General Counsel, and Manager of Regulatory Affairs.
11. ELT needs to make BSOs aware of the corporate level white spaces and get their perspective on the system level white spaces.
12. We must deal with the most "emotionally inspiring" role in the Company—Regulatory Compliance Manager—better define that role so it is more effective.

Items 1, 2, 10, and 11 are communications items.

ELT consented on the following things we need to do in parallel:

1. Start defining the role of Manager of Regulatory Affairs/Regulatory Compliance.
2. Define scope for the audit.
3. Define what corporate issues ELT needs to deal with.
4. Follow-up with BSOs on what we want them to do. Follow-up by process on regulatory compliance matters affecting their processes, potential gaps in compliance, and white space compliance matters (document).
5. Determine how we track changes in compliance expectations/requirements.

Action Items:	Person Responsible:	Deadline:
Convene group of stakeholders to look at the role of Manager of Regulatory Compliance (Bob Miller, Greg Heitzman, Laura Douglas, Don McKay, Jack Wang, Jim Brammel).	RKM	
Develop a scope of work audit.	RKM/R. LeMaster	
Get BSOs started in identifying issues and root causes.	CBSOs	
Report at the 3/4/02 ELT meeting on timelines for getting this work done.	GCH/RKM	
Get responses from BSOs to problem statement and bring to March 4 ELT meeting.	KOT, GCH, SAH, RKM, JJW	
Present information on environmental regulations/compliance at 3/4/02 ELT meeting.	D. McKay/J. Young	

Response from BSO's to Problem Statement

KOT, GCH, SAH, RKM, JJW

Discussion: This item was deferred to the March 4, 2002 ELT meeting

Final Draft for 2001 Audit

Amber Halloran

Discussion: Amber provided copies of and discussed the final balance sheet and financial statements for year-end 2001.

Laura Douglas discussed agenda items for the March 4, 2002 ELT meeting. Laura will e-mail the agenda.

Minutes

Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Billy Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Roger LeMaster, Scott Muhlenbeck
Please Bring: Agenda & Minutes

Agenda Topics:

Review Previous Minutes, Roles & Agenda

Laura Douglas

Discussion: The minutes from the February 25, 2002 ELT meeting were approved with one minor change: under the first Action Item for the discussion on Boundaries and Role Clarification, the phrase "plus 1-2 other BSOs" should be deleted.

The agenda for this meeting was discussed and approved.

Feedback from BSOs

RKM, GCH, KOT, SAH

Discussion: Bob Miller's feedback: The first step should be to develop an Environmental Policy Statement. The Environmental Management Systems and Implementation Guide for Small to Medium (# of employees) Size Utilities says the program works best if the organization adopts ISO 9000 (quality system) and ISO 14000 (regulatory compliance system). Five issues are: regulatory compliance, quality, audit, risk management, and COSO Model of Internal Controls. This is an ELT and Strategic Plan issue. We should establish a subset of tactics to pursue in our Strategic Plan.

Greg Heitzman's feedback: Discussed with Brammell, Wang, Chestnut, Asseff, McCord. Ralph McCord may be a good resource due to his experience in his previous employment. First, we need to get an inventory of regulations (safety regs, underground storage tanks, water quality regs, hazardous materials regs, lab hygiene, etc.) and produce one document containing the listed inventory or a matrix. Second, we should train on the regs at the corporate and operational areas. Third, we need to better define the corporate role and the operational role. Accountability should be at the operational level, and the corporate role should be defined. Fourth, once we get involved, prepare a comprehensive list of standard operating procedures and format for incident reporting. Fifth, benchmark other utilities. Sixth, regulatory compliance should be a priority in our Strategic Plan.

Karla Teasley's feedback: Agrees with Bob Miller regarding a comprehensive quality approach and incorporating into systems-based management. Has concerns about an "interim fix." There are gaps in documentation throughout the company. Need a decentralized approach to compliance with support from corporate level.

Jim Wehrle's feedback: Suggests team be formed to investigate/study COSO, etc., and put a presentation together to present to ELT. When we send compliance data to a regulatory agency regarding an NOV, we should have some confirmation that the information has been received by the agency. Between now and March 15 when we finalize performance appraisal goals, we might want to look at the goals to see if they sufficiently address this issue and possibly modify the goals. How we address HR type regs is an issue—is it under the umbrella or not? The role of Manager of Regulatory Affairs/Regulatory Compliance is an issue for succession planning and empowerment boundaries.

Conclusions: Strategic Plan and operating plans need to bring focus on environmental compliance.

Initial Progress by ELT Compliance Sub-Teams

RKM/GCH

Discussion: Bob Miller provided copies of and discussed "Summary of Regulatory Audit Sub-Process" by Bo Williams and "Sub-Process Synopsis." Bob discussed four key pieces to the sub-process: prepare scope for the audit, conduct the audit, publish findings, and follow-up.

Greg Heitzman reported on defining the role of Manager of Regulatory Affairs/Regulatory Compliance. Greg provided copies of and discussed minutes from "Regulatory Affairs Meeting 28-Feb.-02." Greg discussed gaps and future steps. Karla suggested Ralph McCord be added to this team.

Conclusions: We must decide if the audit will be in-house or from outside source. Do we have the in-house capacity and know-how?

Audits to be considered and prioritized are (7 items): Hazardous Materials Handling, EPA Risk Management Program, SDWA (monitoring, reporting, compliance), Clean Water Act, Clean Air Act, Process Safety Management, OSHA.

These items are scheduled for audits this year: (1) Process Safety Management, (2) EPA Risk Management Program, and (3) Hazardous Materials Handling. The team felt these audits are important to complete but asked the team to consider risks and resulting priorities that may come from other topics.

We should consider how we manage the white spaces within the regulations, how we will work to shape regulations, and what gaps might be present. The current summary does not include managing white spaces of regulatory organizations and how LWC works to shape regs in the regulation development process, and the team agreed to include these topics.

ELT consented that HR regulatory compliance will not be included in the audit schedule, but that we will address HR issues separately.

The tools we can apply are: environmental tools, environmental implementation guide, ISO 1400, ISO 9000. We should develop an Environmental Policy Statement.

This might be integrated into the NLP and the Strategic Plan.

Bob's team for the audit consists of Bob, Roger LeMaster, Don McKay, and Bo Williams. Bob will meet with the team and bring recommendations for long-term and interim solutions. Steve Hubbs will serve as a resource for the team.

ELT consented to add Ralph McCord to the team to define the role of Manager of Regulatory Affairs/Regulatory Compliance. Greg will discuss with the team whether Bo Williams should be a member of the team or serve as a resource to the team.

Greg's team will meet once each week for the next four weeks. They will use the Problem Solving Model and will report to ELT in four weeks.

Timekeeping Audit

Roger LeMaster

Scott Muhlenbeck

Discussion: Roger LeMaster provided copies of and discussed the Timekeeping Audit Report dated February 18, 2002. The flowchart included in Roger's report is the "ideal" model, not the "as is" model.

Jim Wehrle stated our procedure is different from what he's seen in other companies in that we pay a week in advance and we pay weekly.

Conclusions: Our current procedure is cumbersome and presents the potential for abuse.

Jim Wehrle and Bob Miller will put together a subteam (including Bill Meeks to represent the union) and come back to ELT with a draft response to the report and a tracking system. It was recommended that Amber and the new FIN system be brought into this. Jim would like suggestions from ELT members.

CBSOs are empowered to make appropriate interim changes to address immediate items of concern. CBSOs should let Bob and Jim know of any changes.

The Board of Water Works Audit Committee will be made aware of the report.

<i>Action Items:</i>	<i>Person Responsible:</i>	<i>Deadline:</i>
Determine who should own the timekeeping procedure—Accounting or HR. Bob and Jim will discuss and come back to ELT with a recommendation.	JJW/RKM	
Draft a response to each of Roger's recommendations and develop a tracking system.	JJW/RKM/subteam	
Benchmark for best practices.	JJW/RKM/subteam	

Laura Douglas will e-mail agenda for the March 11, 2002 ELT meeting.

Please Bring: Agenda & Minutes

Agenda Topics:

Review Previous Minutes, Roles & Agenda

Laura Douglas

Discussion: Minutes from the March 4, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Security Update

Don McKay/Glen Mudd

Discussion: Don will get a response to the B&V draft to Laura Douglas by the end of this week. A review of the original scope of work will be part of LWC's evaluation of the draft.

Conclusions: A major concern regarding security is the cost of security guards. Don says our original strategy was for "technology" to replace "heads." This includes electronic detection. Don will discuss with a local professional the most economical way to do this.

We need to finish the fencing and lighting at Cardinal Hill. Once we have this in place, we can make changes and possibly have a roving patrol at Cardinal Hill.

We also need to modify/update the fencing at the CH chlorine site to make it more secure. Some barriers to finishing the fencing have been the weather and a cleaning project with the reservoir. To speed this up, we will push the contractor to finish or find someone who can finish the project. John Huber will send a memo to LWC staff conveying the sense of urgency on getting this work done.

Glen, Laura, and Don plan to meet with Terry Conway who will begin drafting a policy for information release (requests for copies of maps and other information on facilities).

Don or Glen will send another e-mail stressing that everyone must wear the LWC ID badges.

Action Items:	Person Responsible:	Deadline:
Send memo to LWC staff involved in fencing/lighting at Cardinal Hill and CH chlorine site conveying sense of urgency on getting this work done.	John Huber	
Send second e-mail to "everyone" restating the requirement that LWC staff wear ID badges.	D. McKay/G. Mudd	

Legislative Update

Vince Guenther

Discussion: Vince provided copies of and discussed the Legislative Update dated March 11, 2002. Vince's summary included three new bills and the status of the bills which have been discussed in previous reports.

**Distribution of
Performance Ratings**

Jim Wehrle

Discussion: Jim Wehrle provided copies of "LWC Distribution Ratings for 1999 and 2000" and a separate sheet showing the performance ratings for 2001 using the new performance appraisal system.

Conclusions: The percentages for the ratings are consistent across all cores, and we are containing this within the budget restraints. This indicates the new performance appraisal process is working as it is supposed to and as we had hoped it would

ELT consensed to share the percentages on the bottom line only and not to share the actual numbers—share the percentages by core rather than by system.

ELT agreed that no one will have access for input to the goals in the new performance appraisal system except the "controller" of the goal. (There was concern regarding BSOs and POs being able to see what the BSO or CBSO is putting into the system daily.)

**Greenbacks Report/Identification of Cost Over-run
Items**

**Amber Halloran/Sue
Purdy**

Discussion: Amber and Sue provided copies of and discussed the LWC Financial Highlights for February 2002. Amber also distributed copies of the 2002 Budget, February YTD Expected Over Plan Variances.

Conclusions: Regarding Financial Highlights for Feb. for the Balance Sheet: Constructon and Acquisition Fund continues to decline with a current balance of \$11,189,607.

Regarding the Income Statement, some highlights are: Sale of Water is under plan in all categories except Private Fire Services and Free Water; Sick Leave pay-out of \$196,422 was expensed in February and reflected as under applied in Administrative and General Expense; INAAP expenses of \$133,660 were charged to Misc. Income Deductions in February, and legal expenses related to same will be expensed in March.

Regarding the over-run variances, the total is \$502,684 after adjustments were made to the draft "2002 Budget, February YTD Expected Over Plan Variance" which Amber furnished.

We must look for \$1,000,000 worth of expenses to cut using all tools available: last year's discretionary list, last year's successes, and last year's failures. CSBOs will ask the BSOs to come up with ideas, and the CBSOs will report back to ELT on March 25. ELT will discuss the ideas and prioritize to make up \$1 million collectively.

CBSOs should send their ideas for budget cuts to Amber by Friday, March 22, 2002, and she will put into one format.

Action Items:

Person Responsible:

Deadline:

CBSOs meet with BSOs to get suggestions for budget cuts and deliver their ideas to Amber by noon on 3/22/02. Amber will put in one format.

ELT/Amber Halloran

Discuss at 3/25/02 ELT meeting.

ELT

Executive Incentive & Shared Goals

John Huber

Discussion: John reported that he met with the Board's Compensation Committee last week. One of their concerns is the way we have stated the lightswitch goal. The goal can be interpreted in more than one way. Year 2001 net income exceeded budget by \$600,000. Does this mean we achieved our goal? Should this pertain only to the Operating Budget? The Board did agree that we need the lightswitch goal. They want to keep our attention at a high level regarding what it costs to operate the Company.

Conclusions: ELT agreed if net income exceeded budget by \$600,000, we achieved the goal.

We need to clarify the 2001 goal which was worded inconsistently and set the method for this year.

ELT consensed to make the lightswitch goal a goal based on net income and have the actual financial goal pay-out based on net income from operations.

Action Items:

Person Responsible:

Deadline:

Bob Miller will get rewording of the goal to Nora early Tuesday so she can incorporate it into the information which will be presented to the Board at 12:30 p.m.

Bob Miller

Board Agenda Items

John Huber

Discussion: John noted some agenda items for the Board of Water Works meeting on Tuesday: Recommendations for Incentive Awards, Billing and Collections Contract with MSD, RBF Phase III, Summary of CWEP.

Future Agenda Items

Laura Douglas

Discussion: Laura provided copies of list of future agenda items.

Conclusions: Laura will e-mail agenda for the March 18, 2002 ELT meeting.

Action Items:

Person Responsible:

Deadline:

Provide Laura suggestions on items to be added to the list.

ELT

Agenda Topics:

Review Previous Minutes, Roles & Agenda **Laura Douglas**

Discussion: Minutes from the March 11, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and modified to include a topic on E-mail at 10:45.

9:05-9:25 **Employment Status Policy** **Jim Wehrle**

Jim presented a policy change in the LWC employment status policy (R2-36) to bring our policy in line with CERS criteria.

ELT reached consensus on the policy changes as presented and empowered Jim to incorporate a provision for co-op students as appropriate.

Action Items:	Person Responsible:	Deadline:
Investigate the status of co-op students regarding CERS.	Jim Wehrle	4/1/02
Evaluate the current status of contract/part time employees.	Jim Wehrle	

9:25-10:05 **MUW Loaned Executive Rotation** **Laura Douglas**

Laura noted that the objective is to provide a successful MUW program within LWC and select effective persons for the MUW loaned executive rotation. Suggestions included having 4 groups (operations, serving customers, business resources, and administrative support) rotate this role, or have this role added as an assigned responsibility to a particular process. Two specific roles were identified: the loaned executive, and the internal program role. These two roles were discussed as separate roles.

This discussion will be continued when Bob and Karla are available (April 1)

Action Items:	Person Responsible:	Deadline:
ELT will re-consider this in two weeks.	Laura Douglas	04/01/02
Ralph will update Karla regarding this item.	Ralph McCord	

10:20-10:45	Churchill Downs PURE TAP proposal	Barbara Crow
<p>Barbara polled the VPs regarding an extra \$10,000 for 60,000 Pure Tap bottles. The group agreed that we couldn't provide adequate water in bottles, nor empties, in time for the Derby. Because CD is a private for-profit corporation, the group agreed that it must pay for whatever costs were incurred. A subteam (John Ralston, Steve Hubbs, Barbara Crow) will meet with Churchill Downs regarding their concerns with water at Derby.</p> <p>John expressed concern at the risk of this activity, and required that his approval be secured before any activities are pursued.</p>		
<p>Action Items:</p> <p>Crow, Hubbs, and Ralston will meet with CD staff regarding the topic.</p> <p>Any suggestions will be submitted to JLH for approval.</p>		
	Person Responsible:	Deadline:
	Barbara Crow	ASAP
10:45-10:50	Regulatory Compliance	Greg Heitzman
<p>Greg provided a verbal update on the status of the team.</p> <p>The group will report back to ELT on an every-other week basis.</p>		
<p>Action Item:</p> <p>Provide team progress report every-other week</p>		
	Person Responsible:	Deadline:
	Greg Heitzman	04-01-02
10:50-11:20	Open Time	Various
<p>Tony updated the group regarding the failure of the E-mail. At this time, the E-mail is not working at the Third Street office, and will likely be down for the remainder of the day.</p> <p>Greg updated the group regarding the status of security improvements.</p> <p>Jim asked for support for the Diversity roll-out at the Water Tower.</p>		
	Future Agenda Items	Laura Douglas
<p>Discussion: Laura provided copies of the list of future agenda items. The only carry-over item from this meeting is the MUW Loaned Exec and LWC internal program topic (April 1).</p> <p>The ISO topic, and flushing goals, will be handled in the future as an update via e-mail.</p> <p>The NLP III item will be handled as a report distribution.</p> <p>Regarding the Facilities Plan, ELT should be in an "Consult" role, prior to the April 15 steering committee meeting. The executive summary of the current draft of the plan will be distributed to all ELT members.</p> <p>Conclusions: Laura will e-mail the agenda for the March 25, 2002 ELT meeting. 105 minutes will be allocated to the cost containment item. Quarterly Team Assessment will be performed.</p>		
<p>Action Items:</p> <p>Chris will re-distribute the bin list with added items.</p>		
	Person Responsible:	Deadline:
	Laura	

Minutes

ELT Meeting Minutes

March 25, 2002
9:00 AM to 12:00 PM
Board Room

Leader: Laura Douglas
Facilitator: Nora Freeman (On Call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Jim Wehrle
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, Joan Malone, Bob Miller, Karla Teasley, Jim Wehrle, Nora Freeman
Please Bring: Agenda & Minutes
Agenda Topics:

Review Previous Minutes, Roles & Agenda *Laura Douglas*

Discussion: Minutes from the 3/18/02 ELT meeting were approved. Agenda for this meeting was discussed and approved.

Cost Reductions & Budget Control

All

Discussion: Amber Halloran provided copies of and the group discussed the "2002 Proposed Budget Cuts."

Bob Miller prepared a "proposed test" the budget cuts should pass before they are cut from the budget: (1) reduces planned expenses; (2) monitors, measures and reports; (3) no changes to accounting rules; and (4) exercises extreme prudence regarding putting owner's dividend at risk, employee safety at risk, and customer health at risk.

Conclusions: ELT consented to several changes to the list. Amber will prepare a revised list incorporating these changes.

Action Items:	Person Responsible:	Deadline:
Check w/R. LeMaster regarding budget cuts in Internal Audit.	Amber Halloran	
At the 4/8/02 ELT meeting, present revised list of 2002 Proposed Budget Cuts incorporating changes discussed and approved today.	Amber Halloran	

Discussion of New ELT Roles

All

Discussion: Jim Wehrle will take over as Leader of the ELT at the 4/8/02 meeting. Jim will prepare a matrix of proposed ELT roles for the balance of 2002 and present at the 4/8/02 meeting. ELT Leaders have served in the following order: Karla Teasley, Greg Heitzman, Steve Hubbs, Bill Meeks, Bob Miller, Laura Douglas, Jim Wehrle. The leadership role rotates quarterly.

Action Items:	Person Responsible:	Deadline:
Prepare matrix of ELT roles for 2002 and present at 4/8/02 ELT meeting.	Jim Wehrle	

Quarterly Effectiveness Survey

Nora Freeman

Discussion: Nora provided copies of the Team Effectiveness Survey and asked that ELT members complete the survey and return to her today.

Action Items:	Person Responsible:	Deadline:
Complete Team Effectiveness Survey and return to Nora today.	ELT members.	

There will be no ELT meeting on 4/1/02 due to Spring Break. The next ELT meeting is scheduled for 4/8/02, when Jim Wehrle will take over as Leader.

ELT Meeting Minutes April 15, 2002

Roles

Leader: Jim Wehrle
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Ed Chestnut for Greg Heitzman
Attendees: Ed Chestnut, Laura Douglas, Steve Hubbs, John Huber, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Anna Norris, Karla Teasley, Jim Wehrle

Review Minutes and Agenda

Minutes from the March 25, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Team Effectiveness Report—Nora Freeman

Nora distributed and discussed results of the Team Effectiveness survey—First Quarter 2002. The team average is 3.8 for the first quarter.

Nora provided copies of the Facilitator/Observer Report form and the ELT Peer Effectiveness Survey form. She urged the team to use the Facilitator/Observer Report form to focus on areas with low scores.

***ELT agreed to have the TKO use the Facilitator/Observer Report form to provide feedback to the team and to use the Peer Effectiveness Survey. Mr. Wehrle will get clarification on Question 3 of the Peer Effectiveness Survey and communicate to ELT members. ELT members will complete a Peer Effectiveness Survey form for each of their fellow ELT members and provide to Nora by April 24. The results of the survey will be discussed at the April 29, 2002 ELT meeting.**

ELT members agreed that the ELT agenda should be distributed by Thursday of each week for the upcoming ELT meeting and that each ELT agenda should include 15-20 minutes of Open Time.

ELT members agreed that an external evaluation of ELT might be in order to determine what external expectations are, what communications gaps exist, etc.

SOE Certification Report—Jim Wehrle, Nora Freeman

Nora provided copies of and discussed the BSO Audit Report for H2—Supporting Organizational Effectiveness dated April 3, 2002. This is the first certification for this system. The SOE System Advisory Council has responded to the recommendations contained in the report, and Jim Wehrle recommended ELT approve certification.

ELT approved certification for H2.

Greenbacks Report—Amber Halloran, Anna Norris

Amber provided copies of and discussed Financial Highlights for March, 2002. Operations and maintenance expense is under budget by approximately \$400,000 for YTD. This is very good news.

Budget Reduction/Cost Control--All

Amber provided copies of 2002 Proposed Budget Cuts/Expense Reductions, Revised 4/8/02.

The group agreed that since we are approximately \$400,000 under O&M Budget, we should cut the budget more than \$400,000, but less than the \$1 million originally discussed. ELT established a new target budget reduction of \$700,000 and agreed that items which would impact customers should be removed from the list of budget cuts. Of the \$700,000, we have accomplished \$400,000, which leaves \$300,000 additional to achieve.

John Huber will communicate to ELT members items we DO NOT WANT to cut from the budget. Within the next week, ELT members will revise their list of budget cuts and provide to Amber for compilation and distribution to ELT. A new list of budget cuts will be prepared differentiating between what's been cut and what still needs to be cut from the budget.

Mr. Huber noted that we need to differentiate between the Training account and the Travel & Seminars account in the budget.

Diversity Video—Jim Wehrle

Mr. Wehrle distributed and discussed his memo to "Everyone LWC" regarding inaccessible areas during the Diversity filming on April 18 and 19.

ELT Performance Award Recommendation—Bob Miller

Bob Miller provided copies of and discussed ELT Performance Award Recommendation for employees who participated in the accomplishment of significant process improvements in the production of LWC financial statements.

ELT approved Bob recommendations for the awards and agreed to add Amber Halloran to the list of recipients at the rate of \$250. ELT also agreed that Bob will draft a letter of appreciation to Amber for her work in this project, to be signed by each ELT member.

Partnership for Safe Water Training Exercise—John Huber

John Huber noted that Tuesday morning, April 16, LWC will conduct a training exercise at Crescent Hill for the Partnership for Safe Water.

ZPS 48-Inch Main Break—John Huber

Mr. Huber noted we have had to order special parts for the repair of the 48-inch water main at Zorn Avenue, so will need to put this work off until after Derby. Mr. Huber stressed that the work must get started and finished immediately after Derby.

Agenda for April 22, 2002 ELT Meeting—Jim Wehrle

Jim Wehrle will e-mail the agenda for the April 22, 2002 ELT meeting.

BIN List—John Huber

Mr. Huber wants an item added to the BIN list: Think about a management audit. It is likely that the merged City/County government will conduct an audit of LWC.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

ELT Meeting Minutes April 22, 2002

Roles

Leader: Jim Wehrle
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Greg Heitzman
Attendees: Shawna Dawson, Laura Douglas, Amber Halloran, Steve Hubbs, John Huber, Aquila Johnson, Joan Malone, Bill Meeks, Bob Miller, Rhonda Plunkett, Karla Teasley, Jim Wehrle

Review Minutes and Agenda

Minutes from the April 15, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Hiring and DBE Report—Rhonda Plunkett

Rhonda provided copies of and discussed the Corporate Diversity Goals and the 1st Quarter 2002 Affirmative Action Goal Results. The Affirmative Action Goals listed the “new” job groups. The column titled “Availability” includes a pool of qualified people in our SMSA per the 1990 census. The 2000 census data will not be available until next year. Rhonda recommends the LWC AA Goals match the Availability column.

When setting the standard for performance, we need to consider feedback from our constituents: the Board of Water Works and the community at large. We also should consider using a different type chart that contains goals with upper and lower control limits.

ELT decided to solicit additional information before setting the goals. We must decide if we want to accommodate utilization that mirrors the community or mirrors the local workforce or establish some other methodology for setting/accomplishing the goals.

*John will check with constituents, then meet with Jim Wehrle and Rhonda to discuss. A revised list of Corporate Diversity Goals will be presented to ELT.

Blue Book/CAR Streamlining—Shawna Dawson, Nora Freeman, Aquila Johnson

Shawna, Nora, and Aquila provided copies of a survey regarding financial reports (Financial Highlights/Greenback, Blue Book/CAR). The outcome of the survey is to decide how we will put the reports together and then go from there.

John stressed the importance of documentation when changes are made to this type of report. These changes have been documented in the Annual Reports, Technical Addendums, etc., in the past.

Karla noted we should use the Intranet to transmit the information contained in these reports when possible.

We should focus on four key constituencies when doing the survey: (1) current management, (2) Sonja Davis as archivist, (3) the IT group, and (4) our constituency (future management).

ELT approved moving forward with the survey, and adding a column ranking from 1-5 to get feedback on which aspects people feel are most important. We also need to think about how we document the changes this will bring about.

Make recommended changes using quality tools, then bring back to ELT for feedback.

Metro United Way and Fund for the Arts—All

LWC needs to name a Loaned Executive and an Employee Coordinator for the MUW Fall Campaign. Iris Underwood was the Loaned Executive for 2001, so is in line to serve as Employee Coordinator for 2002. (See Barbara Crow's schedule dated January 22, 2001.) We will also need a team of people to work with the Employee Coordinator.

LWC should consider ways to impress upon employees how important MUW is—other companies do things such as casual Fridays for those who contribute to MUW. We should have a system or process that is so reliable it will yield success. Bob will document such a process. He will gather historical information on the process and check with Barbara Crow. Bob will ask Barbara to rework the schedule for the coming five years. On the schedule, "Production and Delivery" should be changed to "Operations."

Bob Miller volunteered to serve as Co-Chair with Iris Underwood for the internal campaign. Bob will check with Iris to make sure she will be available to serve as Employee Coordinator with him.

Bob recommends Darrell Rhodes as the Loaned Executive. Greg will check with Jack Wang to see if Darrell's work can be covered while he serves as Loaned Executive and then check with Darrell to see if he is willing to serve as Loaned Executive.

Regarding Funds for the Arts—Greg will check with Diana Cecil to see if she is willing to serve as Fund for the Arts Team Captain.

Recommend Appreciation Award, Restructuring PA/Wage Matrix—Jim Wehrle

Mr. Wehrle provided copies of and discussed the request for recognition award for those who worked to accomplish the restructuring of LWC's performance appraisal and wage matrix systems.

ELT approved the awards recommendation as submitted. Jim Wehrle will draft a letter to those receiving the award. The letter will be signed by each ELT member.

Recommend Appreciation Award, ZPS 48" Emerg. Main Repair—Greg Heitzman

Greg provided copies of and discussed his request for recognition award for those who worked during the ZPS 48-Inch emergency main break response.

ELT approved the awards recommendation as submitted. No VPs will be included in the award. Greg will draft a letter to those receiving the award. The letter will be signed by each ELT member.

John noted his appreciation for the work Greg Heitzman and Steve Hubbs did during the emergency response.

Report on Waterworks Mgmt. Workshop Group Meeting, Oakland, CA—Bob Miller

Bob reported on feedback he received at the recent meeting, including information on boil water advisories after main breaks, how other utilities use regulatory affairs employees, timing of replacement meters, and wages for meter readers,

Agenda for April 22, 2002 ELT Meeting/BIN List—Jim Wehrle

Jim Wehrle will e-mail the agenda for the April 29, 2002 ELT meeting.

ELT members should e-mail Jim their ideas for BIN list items.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

ELT Meeting Minutes April 29, 2002

Roles

Leader: Jim Wehrle
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Nora Freeman, Rhonda Plunkett, Katie Farrow, Shawna Dawson

Review Minutes and Agenda

Minutes from the April 22, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Plans for Organizational Effectiveness Survey—Katie Farrow

Katie had previously provided copies of the Draft Organizational Effectiveness Index Survey. She gave an overview of the survey, explained how we plan to administer it, and noted we are conducting small focus groups to get feedback on the overall concept before proceeding with a small-scale pilot run. The survey is being designed in response to customer feedback on our existing assessment tools. Katie noted we are working with a prominent consultant in developing the survey. She emphasized this is not a tool for ELT only—it will yield data for everyone. The survey will be conducted in September or October each year.

ELT agreed on the following: The survey should provide space for demographic information, but this information can be left blank if respondents do not feel comfortable providing it. Respondents will be asked to provide process level information.

Bob Miller suggested using a ranking scale of 1 to 10 rather than the 1-5 in the draft.

ELT agreed an article should be put in *NewsLeaks* about the survey. We should explain to employees why we are using two tools this year—the HREI and the Organizational Effectiveness Survey.

First Quarter Goals Assessment—Nora Freeman

Nora provided copies of a notebook titled "2002 Goals" which contains stated goals and first quarter 2002 performance results. Under the Executive Incentive Plan Goals, the Light Switch Goal was not met, but significant progress was made toward achieving it. Goal III-B, the Filter Goal, also was not met. All other Executive Incentive Plan Goals were met.

Nora also discussed first quarter 2002 performance for the President and Vice Presidents Shared Goals and the Corporate Performance Awards.

Peer Assessments—Nora Freeman

Nora handed each ELT member the individual feedback received as a result of the Peer Assessment. Nora/Katie/Jim will check into having someone coach ELT members on their individual assessment concerns if they desire such coaching.

Nora also provided copies of and discussed the ELT Peer Effectiveness Feedback to the third question on the survey: "If you could change one thing about ELT, what would it be?"

An item will be included on the upcoming ELT agenda to get consensus on where we want to go with the survey results. The issues gleaned from the survey results are: (1) Frequency of ELT meetings; (2) Are we focusing on what we should be focusing on? and (3) Is everything coming to the table that should be (are people afraid to speak at the meetings)?

DBE Presentation—Rhonda Plunkett

Rhonda provided copies of and discussed the LWC 2002 M/WBE Spending Outcomes—1st Quarter, 2002. The results are based on a methodology wherein the numerator includes payments to sub-contractors and the denominator includes only current-year spending on multi-year contracts.

ELT approved the new methodology for measuring M/WBE spending. The Total column will be deleted from the report for now. In the column "Type of Procurement," "Capital Program" should read "Capital Construction Program." ELT agreed the term DBE is inconsistent with the terminology M/WBE and that M/WBE terminology be used rather than DBE.

ELT requested that Rhonda have an update included in *NewsLeaks* on the work which has been done and the work in progress regarding AA and M/WBE spending.

Budget Discussion—Bob Miller

Bob provided copies of and discussed the 2002 Proposed Budget Cuts/Expense Reductions, Revised 4/8/02.

A column will be added to the report indicating what portion of the budget cuts have been achieved and what portions are yet to be achieved. The report will also show the revised target budget reduction of \$700,000.

Bob recommends we communicate to frontline employees on Friday of this week or Monday of next week regarding status through April. We should communicate why we are "in the pink" due to RouteSmart, etc. We should provide information on how we monitor the status of our performance on maintaining the budget.

Revised Harassment Policies—Jim Wehrle/Laura Douglas

Jim provided copies of revised policies for Sexual Harassment (R2-02) and Harassment (R2-01). The Sexual Harassment Policy expands on the last paragraph under Item 2, Item 4.0-1, and Item 6.0. The Harassment Policy expands on Item 4.0-1.

ELT approved the modifications to both policies. Under Item 6.0 on both policies, the following phrase should be added to the last sentence: "and will be addressed in a manner consistent with the Employee Code of Conduct."

Metro United Way Loaned Executive—Bob Miller

Bob reported that Darrell Rhodes has agreed to serve as MUW Loan Executive. Total time involved in Darrell's serving as Loaned Executive is approximately 550 hours.

ELT needs to decide where the cost will be charged.

LWC Company-Wide "As-Is" Relationship Chart

Bob provided copies of the chart and asked ELT members to "mark up" or otherwise provide him their recommendations/comments on the chart. This chart will be posted on the Intranet.

Borrowing from Drinking Water State Revolving Loan Fund—Bob Miller

Bob discussed borrowing from the Drinking Water State Revolving Loan Fund. The rates have gotten low enough that we should look into taking advantage of this. We should coordinate this with our existing debt to make sure we don't cause a technical default. The amount involved would be \$2 million at 1.7—1.9% interest.

Ginsberg Empowerment Model—Bob Miller

Bob noted he has three empowerment pilots going using the Ginsberg matrix. He will be glad to help anyone who might need assistance in this area.

Part-Time I and Part-Time II Employees—Jim Wehrle

Jim questioned if part-time employees should be eligible for team recognition awards. LWC now has a policy in effect whereby they are eligible for team awards, but not the Corporate Performance Award.

ELT members will provide Jim input, and ELT will discuss at a future meeting whether to make changes in the policy which would allow part-time employees to receive team recognition awards and Corporate Performance Awards.

Agenda for May 6, 2002 ELT Meeting—Jim Wehrle

Jim Wehrle will e-mail the agenda for the May 6, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
May 6, 2002**

Roles

Leader: Jim Wehrle
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Greg Heitzman
Attendees: Susan Camp, Laura Douglas, Steve Hubbs, John Huber, Roger LeMaster, Joan Malone, Scott Muhlenbeck, Bill Meeks, Bob Miller, Jim Wehrle

Review Minutes and Agenda

Minutes from the April 29, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Peer Review Responses—All

Each ELT member made a verbal commitment in response to the feedback they received from the Individual Peer Assessment.

*ELT consensed to do the Peer Assessment once per year, in late April after the Annual Board meeting. Regarding coaching on performance in ELT meetings, ELT members will work in pairs to provide feedback to each other as follows: Meeks/Huber, Heitzman/Hubbs, Teasley/Miller, Douglas/Wehrle. Each pair will decide how often they will provide feedback to each other. Pairs will be switched quarterly for 7 quarters so each ELT member will have the opportunity to work with everyone else on the ELT.

ELT Role Discussion—All

The issues gleaned from the Peer Assessment were: (1) Frequency of ELT meetings/amount of time, (2) Are we focusing on what we should be focusing on? and (3) Is everything coming to the table that should be (are people afraid to speak at the meetings)?

ELT consensed to the following: hold meetings each Monday, but change the time to 9:00-11:30 a.m.; the leader will construct and distribute the agenda prior to the meeting and ELT members will provide feedback prior to the meeting; keep Open Time on the agenda each week to allow for current topics to be brought to the table for discussion; limit presentations to fifteen minutes maximum, then open for Q&A; state desired outcomes on the agenda in more detail.

I-1 Certificaton—Greg Heitzman

Greg provided copies of and discussed the certification documents for I-1, Infrastructure Planning. Greg recommended this system be certified for 2001-2002.

ELT approved the certification with the understanding that the recommendations contained in the documentation be carried forward by Karla Teasley, who is now CBSO for this system.

I-2 Certification—Greg Heitzman

Greg provided copies of and discussed the certification documents for I-2, Facility Design, Construction, and Maintenance. Greg recommended this system be certified for 2001-2002.

ELT approved the certification with the understanding that the recommendations contained in the documentation be carried forward.

48-Inch Main Update—Greg Heitzman

Greg provided copies of and discussed a communication from Jim Brammell dated May 3, 2002 regarding Zorn 48-inch main repair. The cost is estimated to be \$100,000 to make the overall repair.

Open Time

Jim Wehrle thanked Bill Meeks for the work of the union and the DPT in reaching a mutual decision regarding the role of the Union Quality Coordinator. Nora (Katie) and Bill will develop a current job description and will post the interest form. HR will develop standardized interview questions and scoring.

John Huber passed around one of the Pure Tap bottles which were labeled and filled for the Extreme Park. Mr. Huber noted today kicks off National Drinking Water Week, and Mayor Armstrong was presented the 1,000,000th Pure Tap bottle at a press conference held this morning.

Bob Miller reported on a call he had from Moody's rating agency. They are closely monitoring the merger issue as it relates to bonds which might be affected by the merger.

Agenda for May 13, 2002 ELT Meeting—Jim Wehrle

Jim Wehrle will e-mail the agenda for the May 13, 2002 ELT meeting.

Decisions made by ELT and items requiring action are "shadowed" in these minutes.

**ELT Meeting Minutes
May 13, 2002**

Roles

Leader: Jim Wehrle
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Tony Gregory, Diana Cecil, Roger LeMaster, Scott Muhlenbeck, Barry Kidd (Fund for the Arts)

Review Minutes and Agenda

Minutes from the May 6, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Fund for the Arts—Diana Cecil, Barry Kidd

Diana and Barry provided copies of and discussed a graph showing the breakdown of use of money donated by LWC employees last year. They also provided a handout showing LWC employee giving since 1995 and the percentage change (up or down) from one year to the next. They predict good results this year.

C3 Certification—Karla Teasley, Kevin Grant

Karla and Kevin discussed the certification documentation (copies were provided by e-mail last week). Karla recommended certification of this system.

ELT approved certification with the understanding that the system will move forward on the first two recommendations contained in the Audit Report.

Upcoming Board Meeting—John Huber

Agenda items include the bond rating from Moody's and the Anthem stock transfer issue.

Hiring Goals—Jim Wehrle, Rhonda Plunkett

Rhonda provided copies of and the group discussed the 2002 LWC Hiring Goals, 2002 Hiring Goal Results 1st Quarter, and LWC Hiring Goal Program.

On the document titled 2002 LWC Hiring Goals, in the column titled LWC Target %, under Minorities, Office Support-Clerical, 27.05 should be changed to 24.0. On the document titled 2002 Hiring Goal Results 1st Quarter, a column will be added beside each PA rating which will show the % of LWC target achieved.

Rhonda will attend individual system meetings to explain these documents to the BSOs. She will include in her explanation the background and how we reached these numbers. The BSOs will communicate this information to the POs.

ELT approved the goals with the modification/addition discussed.

Greenbacks—Amber Halloran//Sue Purdy

Amber discussed the LWC Financial Highlights for April, 2002.

Kevin Grant provided copies of and discussed Consumption Analysis for Residential, Commercial and Industrial Customers. Under RouteSmart, after odd months, revenue will be overstated YTD.

Kevin will develop a report/explanation to the Board on what we anticipate to get out of RouteSmart. This will include a goal, the unit cost per meter reading using this system versus not using it, and options for managing meter routes using some method other than Route Smart.

Agenda for May 20, 2002 ELT Meeting—Jim Wehrle

Jim Wehrle will e-mail the agenda for the May 20, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes May 20, 2002

Roles

Leader: Jim Wehrle
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Steve Hubbs, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Tony Gregory, Don McKay, Rhonda Plunkett

***Review Minutes and Agenda**

Minutes from the May 13, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Security—Don McKay

Don reported that an LWC team on security (Vince Guenther, Glen Mudd, and Don) submitted an application April 25th to the EPA for a funding grant for additional security work. This is a noncompetitive grant, and LWC is applying for the maximum amount of \$115,000. EPA will not reimburse for amounts spent 90 days prior to receiving the grant. All work under the grant is required to be completed by the end of 2003.

Steve Hubbs noted we need an intrusion device on all elevated tanks. Don said LWC is evaluating intrusion devices for our storage tanks and other facilities.

Review Simplified Hiring Goals Info—Rhonda Plunkett

Rhonda provided copies of and discussed the revised Affirmative Action hiring goals. The Skilled Craft Leaders job group is not included in the hiring goal score because these positions are governed by union seniority provisions.

Discuss Benefits & Acquisition Issues—Jim Wehrle, Jim Smith

It was noted that we need a business model to use as a starting point for employee benefits when we bring in employees of acquisitions such as Goshen and Shepherdsville. We need to document what our benefits are and what we've done in the past. Documents currently available for use in building a business model are the union contract, listings of job categories and pay rates, and the employee handbook. The business model should allow for some flexibility to negotiate.

Mike Sturgeon, Ellen Mackin, and Jim Wehrle will develop a draft business model and bring to ELT for discussion.

Regulatory Process—Greg Heitzman

Greg reported status of work done by the ELT-commissioned team which is looking at the role of Manager of Regulatory Compliance. They have met about six times to look at this process and have broken the job description into key elements using the Ginsberg Empowerment Model as a tool to assist in determining various job duties. One key element is shaping regs and how we will respond to them and determining what the "to be" model would be for this. There is a great deal of work remaining to be done.

Tony Gregory will check with Bob Miller to see if he has anything to contribute regarding developing a scope of work audit (reference the Feb. 25 ELT minutes wherein it states Bob and Roger LeMaster will develop a scope of work audit).

PA Issues—Mike Sturgeon, Jim Wehrle

Mike reported on a glitch found in the PA system. It involves weightings for individual/operating goals and Diversity/MBD goals. Mike says the glitch is simple to fix and directions are forthcoming. We need to decide what weighting to give the Diversity and MBD goals so that the weighting will be near the original 5% each after the PA system compensates for the glitch.

ELT decided to weight Diversity and MBD goals at 9% each, which equals 10.8% for the two. Original weighting for the two was 10%.

Mike will take this to the BSOC (new rating for Diversity and MSD of 9% each, which equals 10.8% for the two combined compared to a 10% as originally determined).

Mike will communicate to everyone the method for entering weightings into the system to compensate for the glitch.

Agenda for June 3, 2002 ELT Meeting—Jim Wehrle

Jim Wehrle will e-mail the agenda for the June 3, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
June 10, 2002**

Roles

Leader: Jim Wehrle
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Jim Asseff for Greg Heitzman
Attendees: Laura Douglas, John Huber, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley, Jim Wehrle, Jim Asseff, Don McKay, Amber Halloran, Sue Purdy

***Review Minutes and Agenda**

Minutes from the May 20, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Performance Appraisal Issue—Jim Wehrle

Jim provided copies of the scoring for operational goals (re-weighting of goals) to compensate for the PA system "glitch."

Greenbacks & Budget—Amber Halloran and Sue Purdy

Amber provided copies of and discussed the LWC financial Highlights for May, 2002.

On page 9, Top Twenty Users, Fischer Packing, Bob Miller will let the Board know that we are losing Fischer Packing and what this loss will mean to LWC in terms of revenue.

Amber provided copies of and discussed the LWC Consumption/Revenue Analysis and the 2002 Proposed Budget Cuts/Expense Reductions, Revised 6/7/02. The Proposed Budget Cuts/Expense Reductions shows a revised total of \$993,530.

ELT agreed to continue with the budget cuts listed with the exception of Pure Tap purchase, employee outreach, retiree plates, and computer training. These four items will be removed from the list of budget cuts. At the next ELT meeting, the group will discuss other items which may be cut from the budget.

Jim Brammell will update ELT on the status of fuel costs at the next ELT meeting.

Upcoming Board Meeting—John Huber

Two agenda items for the Board of Water Works meeting on June 11 are Evaluated Bids/Alternate Bids and Declaration of the Dividend.

Security Update—Don McKay

Don provided copies of and discussed Level I Physical Security Improvements. The four key elements to security of facilities are: detection, delay, response, and mitigation. Don discussed some items found in the security audit which need to be addressed, all of which are easily corrected, such as removing ladders from towers to eliminate easy access by would-be terrorists.

Four items to be addressed regarding security are: (1) budget, (2) setting priorities, (3) scope, and (4) human resources

Regarding budget, there are no real issues regarding capital budget (fences, lights, doors, etc.), but there are O&M allocation issues. Bob will look at using the Contingency Fund.

Regarding setting priorities, we will use the Ginsberg matrix to set priorities and scope/timing of work.

Regarding scope, Don will work with Sandia Labs to determine issues we need to address. And, as stated above, we will use the Ginsberg matrix to develop scope/timing of work. It is important that we balance the need for secure facilities and operations access with aesthetics and community issues.

Regarding human resources, we need to have dedicated resources for this over the next two years. We need to decide if we will do this in-house or if we will outsource. We might plan to outsource the planning piece of this, but will still need in-house resources to implement and maintain. Don McKay and Jim Asseff say resourcing is covered for work planned for the next 30 days.

Jim Asseff will revise Don's handout to show scheduled completion dates and resourcing prior to the June 24 ELT meeting.

Don will report to ELT on the status of items listed on his handout at the June 24 meeting and then 2-3 weeks after the June 24 meeting..

Agenda for June 24, 2002 ELT Meeting—Jim Wehrle

Jim Wehrle will e-mail the agenda for the June 24, 2002 ELT meeting. There will be no ELT meeting on June 17.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes June 24, 2002

Roles

Leader: Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Laura Douglas
Attendees: Laura Douglas, John Huber, Joan Malone, Bob Miller, Karla Teasley, Don McKay, Jack Wang

***Review Minutes and Agenda**

Minutes from the June 10, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Security Update—Don McKay

Don McKay provided copies of and the group discussed the revised Level I Physical Security Improvements and the Draft LWC Corporate Security matrix. Don noted we will use our current vulnerability assessment in developing a new vulnerability assessment to submit to EPA. If we receive the EPA grant, the cost of labor to prepare the new vulnerability assessment will be reimbursed as part of the grant.

Discuss Additional Budget Cuts—All

The group discussed the 2002 Proposed Budget Cuts/Expense Reductions, revised June 10, 2002. The revised target for budget reductions is \$1.2 million for 2002, which means we are looking for \$300,000 additional in cuts.

Bob Miller will provide additional cuts in Human Resources and Business Resourcing. Bob will also look at reductions in O&M expenses and the Infrastructure Replacement Reserve.

John Huber noted we need to cancel all non-essential travel and go back to the budget and see what else can be cut. We should look at anything that is not related to quality of product or customer service.

The budget for 2003 likely will also be cut, so we need to get the message out that we can't plan to defer items until next year.

ELT members should come to the July 8, 2002 ELT meeting with additional proposed budget cuts.

Open Time—All

AWWA Conference—John Huber.

Mr. Huber reported on discussions held at the conference regarding the long-term contract for operation and maintenance of United Water in Atlanta.

There was considerable discussion at the conference regarding security.

LWC Policies—Laura Douglas, Bob Miller

Laura and Bob will work on the LWC policy revision process. One item to be resolved is how old LWC policies should be before they are revised. LWC policies being posted on the Intranet is still an issue. The LWC policy revision process will be added to the BIN list.

HROE Transition—Bob Miller

HR should provide John Huber copies of the job description for VP of HROE and list of search firms today.

ELT agreed to keep the organizational design of HROE as is and fill the role of VP of HROE as it is now.

John noted that we want to continue ahead with the projects that are currently underway in HROE.

Review BIN LIST—Karla Teasley

The group discussed items for upcoming ELT agendas.

Bob Miller will get the schedule for discussion of the 2003 Budget to Karla so she can include this in upcoming ELT agendas.

Karla will revise the ELT Roles list to reflect the departure of Jim Wehrle.

TKO Report—Laura Douglas

Laura gave the TKO report.

She noted that ELT members should continue the practice of sending someone to represent them at the ELT meetings if they cannot attend

Agenda for July 1, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the July 1, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes July 1, 2002

Roles

Leader: Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Steve Hubbs
Scribe: Bob Miller
Timekeeper: Laura Douglas
Attendees: Laura Douglas, John Huber, Steve Hubbs, Bob Miller, Greg Heitzman, Karla Teasley

***Review Minutes and Agenda**

Minutes from the June 24, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved, with open time allocated to discuss an integrated study program (JLH).

ELT Team Effectiveness Survey-Katie Farrow

Katie presented a revised Team Effectiveness Survey form, noting a change in rating system (to match the terminology used in the Performance Appraisal system). (See handouts #1, #2, and #3).

ELT agreed to the format, and agreed to fill out each of the three forms (the new survey, the proposed survey, and the Team Principles Survey) and return them to Katie by July 5, 2002.

Review of 2003 Budget Assumptions and Parameters-Amber Halloran

Amber presented a "starting point" projection for 2003, assuming no increase in budgeted consumption, a 3.2 percent increase in O&M expenses over 2002 FORECAST, and 0.8% over 2002 BUDGET (see handout #4). The group discussed how to best provide the O&M budget parameters for 2003, and suggested using the budget-to-budget comparison.

Bob noted the projected CPI index increase of 2.5%, compared to a proposed rate increase of 3%. Bob noted the proposal to increase the infrastructure reserve back to the 2001 level of \$3.125 million, from \$2.52 million in 2002. He also noted a proposed increase in depreciation and amortization of 7.1% to a level of \$16.8 million.

John asked that we look at the compensation matrix for salaried employees, particularly those in quartile 3 and 4. John also asked that we look at the competency matrix for performance evaluation (Bob will follow up, noting a report pending from HR).

ELT agreed to the parameters provided by Bob and summarized above as a starting point for the 2003 O&M budget. ELT also agreed to have BSOs provide a 0.8 percent 2003 budget (compared to 2002 budget). This 0.8% budget must cover the core activities of the company. BSOs are to note items that are not included in the 0.8% budget.

ELT discussed the issue of number of employees, and if a target for total staff numbers (full time, part time, temps, etc) should be established. Bob will look at current numbers, and this topic will be discussed at the next ELT meeting.

Integrated Study Program-John Huber

John discussed the concept of the integrated study program as an element of the Leadership Institute. The idea is to have BSOs and PO's read current literature and discuss basic leadership concepts in a team format. The focus of this program is to explore new leadership concepts and discuss in small group

settings. The group setting is expected to yield the greatest amount of benefit for this program. John will send a communication to BSOs and PO's to emphasize the importance of the program.

New Water Curriculum-Barbara Crow and Kelly Dearing-Smith

Barbara provided a history of the Pure Tap program at LWC (see handout #5). The program now reaches 20 percent of all of our customers annually, and 50% of those indicate that the program makes them feel more confident in our product (the balance indicated a neutral effect). These are excellent numbers for a customer education program.

Kelly provided the New Water Curriculum to ELT and had us do an activity. The group noted the excellent quality of the program and thanked Kelley for her hard work.

LWC 150th Celebration

ELT discussed the celebration of the 150th anniversary. The group discussed the focus of the celebration relating to the needs of the community in 1854 compared to the needs of the community in 2004. The group agreed to celebrating the 1854 date, and to put it in perspective with the 1860 benchmark for initiating service to customers. Barbara will put together the program and provide a summary to ELT for consideration.

Open Time

Bob suggested that we allocate some ELT time to Activity Based Accounting, and how it will be incorporated into LWC financial systems. (Karla added this topic to the ELT bin list).

Review BIN LIST—Karla Teasley

July 8 2002 ELT meeting agenda topics: An update of the Risk Assessment will be scheduled for the July 8 meeting. The Greenbacks report will be an agenda topic, along with the 2003 budget. John will provide a summary of BWW agenda.

Karla will add the activity-based accounting item to the BIN list.

TKO Report—Laura Douglas

Laura gave the TKO report. The team used time effectively and complimented the New School Curriculum provided by Kelley. The meeting was effective with good participation.

John noted the upcoming facilities committee meeting, and would like to see the agenda when developed.

John also noted an upcoming health costs report to BWW and need to preview it.

John also asked for the agenda for BWW Public Information Committee meeting.

Agenda for July 1, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the July 8, 2002 ELT meeting based on the above topics.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>

**ELT Meeting Minutes
July 8, 2002**

Roles

Leader: Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Laura Douglas
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Sue Purdy, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the July 1, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Review Greenbacks Report—Amber Halloran

Amber provided copies of and discussed the LWC Financial Highlights for June, 2002.

At the July 15 ELT meeting, Amber will report on total water billed and total revenue month by month by billing cycle for even months versus odd months, January through June, 2002. She will report to ELT on the procedure for accounting for free water. Amber and Sue will report on the chemical budget versus actual expenditures for chemicals.

Additional Proposed Budget Cuts for 2002—Amber Halloran

Amber provided copies of and the group discussed the 2002 Proposed Budget Cuts/Expense Reductions, Revised 7/5/02. The revised list of cuts total \$882,530 versus target of \$1,200,000.

ELT members will ask all BSOs to look at the data, especially the labor data, and evaluate from a net income perspective. We should evaluate the numbers we have and make sure they are correct before we commit to additional cuts. The \$1,200,000 target was driven by the revenue shortfall. Amber will look at the revenue status to help establish an appropriate target. The updated data from the BSOs should be submitted to Amber by Friday, July 12. ELT will look at the evaluated data at the July 15 meeting.

Additional Budget Discussion—O&M for 2003—Amber Halloran

Amber will bring updated recommendations for the 2003 budget to the July 15 ELT meeting. ELT members should be prepared to discuss positions to be filled and then decide what the consequences would be if we do not fill specific positions. Amber will provide a breakdown of position vacancies by system.

Review Board Agenda—Karla Teasley

Agenda items for the Board meeting on Tuesday, July 9, 2002, include the proposed settlement on Southern Pipeline issues and security issues (Simplex Card System).

Review BIN List—Karla Teasley

The group discussed items for the ELT meetings.

Agenda for July, 15, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the July 15, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are shadowed in these minutes.**

**ELT Meeting Minutes
July 15, 2002**

Roles

Leader: Bill Meeks for Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Laura Douglas
Attendees: Steve Cooper (representing Karla Teasley), Laura Douglas, Tony Gregory, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller

***Review Minutes and Agenda**

Minutes from the July 8, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Additional Proposed Budget Cuts for 2002—Bob Miller, Amber Halloran

Amber provided copies of and the group discussed the 2002 Proposed Budget Cuts/Expense Reductions revised 7/15/02, which now totals \$1,010,014. Significant unbudgeted O&M costs for 2002 total \$412,975, of which \$122,000 has already been expensed.

Amber also provided copies of Detailed List of FTE Vacancies by System—Office as of June 30, 2002 and Detailed List of FTE Vacancies by System—Union as of June 30, 2002.

ELT consensed to the following regarding the vacancies:

<u>System</u>	<u># of Vacancies</u>	<u>Position</u>	<u>ELT's Decision</u>
C1	2	Customer Service Clerk I	Fill
C3	1	Customer Service Clerk I	*Hold—S. Cooper will discuss with Teasley/Grant.
11	3	Engineering Technician Business Planner I Business Planner II	Fill Not a vacancy—Larry Bond is filling. *Hold—S. Cooper will discuss with Teasley/Brammell.
14	1	Serv. Appl. Engineering Clerk	Fill
12	1	Electrical Engineer	Fill
15	1	Survey Technician	Filled with full-time employee.
C2	2	Customer Service Clerk I Dispatcher	*Hold—S. Cooper will discuss with Teasley/Grant. This position may be moving to C3. Fill
P1	10	Instrument Technician PO-Maintaining Water Prod. Production Coordinator Water Quality Analyst 2 Distri. Wtr. Qual. Coord. Wtr. Qual. Assurance Spec. PO-Provid. Qual/Safety Assur. Office Coordinator Engineering Clerk	Fill by end of 2002. Filled Fill by end of 2002. Fill by end of 2002. Fill asap. Fill by end of 2002. Fill by end of 2002. Fill Fill
R0	1	Business Planner	*Hold—one person may be able to handle R0 and 11.

<u>System</u>	<u># of Vacancies</u>	<u>Position</u>	<u>ELT's Decision</u>
R5	1	Claim Service Rep.	Fill

Steve Cooper added one vacancy to the list:

I3	1	Resource coordinator	*Hold—may be able to reallocate resources.
----	---	----------------------	--

***Hold until September 1. At that time, make a case for filling in 2002, budgeting or 2003, or dropping.**

Regarding union vacancies, the list totals 7 employees. In addition, there are two upcoming retirements, for a total of 9 union vacancies. We will take in three employees from Goshen, which leaves 6 vacancies. ELT consensed to fill the 6 positions over the next 6 months.

Amber will incorporate the "Holds" into the list of budget cuts and bring back to ELT at the 7/22/02 meeting. Updated information on retirements/retirement replacements will also be discussed at the 7/22/02 ELT meeting.

2003 O&M Budget Discussion—Bob Miller, Amber Halloran

Amber provided copies of and the group discussed the Budget 2003—Possible Scenarios. ELT's objective is to consider and select Scenario 1, 2, or 3.

ELT agreed to stay with Scenario 1 and noted that in order to achieve 0.8% 2003 Budget, there must be a reduction in the 502 FTEs. We will look at the 502 number and come back after further analysis to determine the appropriate number of employees (probably 480-485). The appropriate number will be achieved through attrition.

System Certification—R4 (Information Technology)—Bob Miller, Tony Gregory

Bob and Tony distributed copies of and discussed R4's System Certification Follow-up.

ELT consensed to Bob's recommendation that R4 be certified with the commitment that process flowcharts be created within 4 months. Bob Miller will follow on the creation of the flowcharts.

Review BIN List—All

The group discussed upcoming ELT agendas and items on the BIN list.

Agenda for July 22, 2002 ELT Meeting—Bill Meels

Bill Meeks will discuss the agenda for the July 22 ELT meeting with Karla Teasley. Karla will e-mail the agenda.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

**ELT Meeting Minutes
July 22, 2002**

Roles

Leader: Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Laura Douglas
Attendees: Jim Brammell, Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Mike Sturgeon, Karla Teasley

***Review Minutes and Agenda**

Minutes from the July 15, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

System Certification—R3 (Supplying Financial Resources)—Bob Miller, Amber Halloran

Bob and Amber provided copies of and discussed the certification documents for R3—Supplying Financial Resources. Bob recommended certification for this system.

ELT approved certification for R3—Supplying Financial Resources—with the understanding that the recommendations contained in the certification documents will be implemented into the 2002 Operating Plans. Bob will follow on implementing the recommendations.

Facilities Plan—John Huber

John Huber discussed the 20-year Facilities Plan. We should get information regarding the Facilities Plan ready and decide if we want to solicit media coverage or just be ready to discuss if we are approached. We need to let our audiences know we are continuing to look to the future—the \$915,000,000 Facilities Plan includes infrastructure replacement program, advanced treatment technology, focus on customer and customer outcomes, and dealing with growth. We must explain, with appropriate information put in the appropriate context, that we are able to make this investment in the community with rate increases in the 3.0-3.5% range. Bob recommended creating a one-page document for the August Board meeting identifying key themes/issues in the Facilities Plan and key constituency groups. We also need to identify communication tools and who at LWC would be responsible for communicating the information.

Karla will work with Barbara Crow and come back to ELT in about two weeks to discuss.

System Certification—C2 (Managing Distribution Operations)—Greg Heitzman, Jim Brammell

Greg and Jim distributed certification documents for C2—Managing Distribution Operations. Greg recommended certification for this system.

ELT approved certification for C2 with the understanding that Greg will follow regarding implementation of recommendation into the 2002 Operating Plans.

This system has several processes that are considered best practices. Greg noted we should define procedures for profiling and communicating information regarding systems which have best practices.

System Certification—H1 (Supplying Human Resources)—Bob Miller, Mike Sturgeon

Bob and Mike furnished copies of and the group discussed the SHR Response to System Certification Findings. Bob recommended certification for this system.

ELT approved certification for H1 with the understanding that Bob will provide a supplemental report on the status of Recommendations 5 and 7 in 3-6 months and that other recommendations will be implemented into the 2002 Operating Plans.

Open Time (Procurement Process)—Bob Miller

Bob noted that Mary Whitlock has resigned. Bob will get information out on how her process will be managed until this position is filled. Bob says he is working closely with Legal to make improvements in the procurement process.

Review Bin List—All

The group discussed upcoming ELT agendas and items on the BIN list.

Agenda for July 29, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the July 29, 2002 ELT meeting.

*Decisions made by ELT and items requiring action are “shadowed” in these minutes.

**ELT Meeting Minutes
July 29, 2002**

Roles

Leader: Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Laura Douglas
Attendees: Jim Brammell (for Greg Heitzman), Barbara Crow, Shawna Dawson, Laura Douglas, Amber Halloran, John Huber, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Karla Teasley

***Review Minutes and Agenda**

Minutes from the July 22, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Risk Assessment and the COSO Model—Don McKay, Roger LeMaster, Scott Muhlenbeck

Don McKay provided copies of and discussed his slide presentation "Enterprise Risk Management, The LWC Approach." Roger LeMaster also provided copies of and discussed the COSO Components of Internal Control and the LWC Internal Control Questionnaire. The bottom line of risk management is to maintain the viability of the enterprise.

The LWC Internal Control Questionnaire is broken down into the five pieces of the COSO Model. Roger LeMaster will administer the questionnaire to the SACs (anonymously) and hopes to have the assessments and a report ready by the end of September. The results of the questionnaire will give insights into perceptions within the systems regarding risk and will be used in setting the audit plan for next year.

Facilities Plan Communication—Barbara Crow

Barbara provided copies of and discussed Draft 1 of Communicating the LWC 20-Year Plan. The main purpose of the communication is to keep key audiences in the loop regarding what we are doing at LWC.

Bob Miller will get with Barbara Crow on breaking the total \$912,000,000 into annual or five-year cost increments.

Barbara will continue to work on the communication piece and report to ELT.

Budget Discussion—Bob Miller, Amber Halloran

Amber provided copies of and discussed the vacancies as of July 26, 2002 and LWC Staffing Actual/Forecast. The list of vacancies includes recent and upcoming retirements, but there are additional upcoming retirements which should be added to the list.

The CBSOs will review positions within their cores and get any changes to the list to Amber by Thursday, August 1, 2002. Amber will prepare a new list of vacancies, reconcile the list with HR, and send a revised list to ELT on Friday, August 2, 2002. The list will be current as of July 31, 2002.

ELT Goals—Karla Teasley, Shawna Denny

Karla provided copies of and discussed the second quarter performance for Executive Incentive Goals, Shared President and Vice President Goals, and Corporate Performance Award Goals. For the Executive Incentive Goals, the Light Switch Goal has not been met, but we are moving in the right direction.

John Huber, Karla Teasley, Greg Heitzman, and Jim Smith will meet to discuss performance on Goal A of the President and Vice President Shared Goals. They will analyze the lagging capital program expenditures and determine if the forecast is appropriately spread across the year. They will report to ELT on their findings.

Karla will work with Bob and Amber and provide an update on process changes and stat codes on the way we track work. There is a gap between needs and actual.

Regarding Cost of Risk, there is a significant gap between what we feel our capabilities should be and what they are. Karla will set agenda time in August or September to get Don McKay's insight and discuss.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for August 5, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the August 5, 2002, 2002 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>
--

ELT Meeting Minutes August 5, 2002

Roles

Leader: Bill Meeks for Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Laura Douglas
Attendees: Laura Douglas, Katie Farrow, Kevin Grant (representing Karla Teasley), Amber Halloran (representing Bob Miller), Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Don McKay, Roger LeMaster, Bill Meeks, Glen Mudd, Scott Muhlenbeck

***Review Minutes and Agenda**

Minutes from the July 29, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Discuss Level I Physical Security Improvements—Don McKay

Don says we are continuing to work on the security matrix.

The EPA grant has been approved—the amount is \$115,000, which is the standard amount. This grant money will be used to provide training on approved methodology for vulnerability assessments in October in Indianapolis. Jim Asseff, Jim Brammell, Jack Wang, Jim Smith, Don McKay and Glen Mudd will attend this AWWA-sponsored training.

Glen Mudd reported that the Simplex project (controlled access to facilities/buildings) was bid last week, and bids are in the acceptable range. If approved by the Board, work will begin September 1 and should be completed in 90 days.

2002 Internal Audit Process—Roger LeMaster, Scott Muhlenbeck

Roger provided copies of and discussed the LWC Internal Audit 2002 Progress Report dated July 31, 2002. He discussed what Internal Audit has done year to date and what they plan to do during the remainder of 2002.

John Huber noted that the information contained in this report will be helpful to the Quality Office when they prepare The Next Level Plan III.

ELT Team Effectiveness Survey—Katie Farrow

Katie Farrow provided copies of and discussed the results of the Team Effectiveness Survey—Quarterly Comparison for ELT; the Team Effectiveness Survey for Second Quarter, 2002; and the Team Principles Survey for ELT. Five of seven ELT members responded to the surveys.

The average for the Team Effectiveness Survey for the second quarter was 3.8, which indicates a high performing team.

The Team Effectiveness Survey Quarterly Comparison results and the Team Principles Survey results show that the team should focus on processes to make decisions.

The next surveys should be administered at the end of an ELT meeting or at another time when all seven ELT members can respond to the surveys.

Open Time—All

John Huber provided a corrected copy of the 2002 Corporate Performance Award—2nd Quarter Update.

Amber (representing Bob Miller at this meeting) will check with Bob to see if he wants to bring a different BSO from HROE to the ELT meetings to serve as the HROE representative to ELT until a VP for HROE is hired.

Steve Hubbs discussed visitors from the Ukraine who will be here next week. Steve visited the Ukraine recently, toured their water system, and made recommendations to them.

Greg Heitzman reported that pumpage for the past week was in the high 170 million to low 180 million gallons per day due to the hot, dry weather. Greg and Karla will contact golf courses, subdivisions, and others who irrigate to see if they can take LWC water into their lakes and pump from there as needed rather than have several golf courses/subdivisions/others take from our system at 4:00 or 5:00 a.m. each day.

Bill Meeks has been working with the National AFL-CIO. LWC is being used as a case study on our Union Management Partnership. This case study is similar to the study Cornell did in the recent past.

Bill also discussed the upcoming golf scramble to raise money for the LWC Metro United Way campaign. Local 1683 has a team and the Company has a team.

Amber will check with Bob Miller regarding Iris Underwood serving with him as Co-Chair of the LWC MUW Campaign. (Iris is retiring from LWC this week.)

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for August 12, 2002 ELT Meeting—Bill Meeks

Bill or Karla will e-mail the agenda for the August 12, 2002, 2002 ELT meeting.

PLEASE NOTE THE AUGUST 12 ELT MEETING WILL BE HELD IN THE KENTUCKY RIVER ROOM FROM 10:30 A.M. TO 12:30 P.M.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
August 12, 2002**

Roles

Leader: Karla Teasley
Facilitator: Katie Farrow (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Laura Douglas
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the August 5, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Open Time—Steve Hubbs

Steve introduced visitors from the Ukraine who are here as part of a partnership exchange program. They will be meeting with various key staff members at LWC during the next few days. Karla and other ELT members explained to the visitors what the Executive Leadership Team consists of and what issues the ELT deals with, such as strategic issues, corporate goals, reviewing policies to ensure consistency throughout the company, and overseeing the quality management system.

Board Agenda—Laura Douglas

Agenda items for tomorrow's Board of Water Works meeting include the Facilities Plan 2002-2021, Allmond Avenue paving contract, and a report on the first meeting of the Goshen Utilities Board.

Greenbacks Report—Amber Halloran

Amber provided copies of and discussed the LWC Financial Highlights for July, 2002. She briefly discussed two new one-page reports she will distribute each month prior to finalizing the LWC Financial Highlights. Distribution of these reports--the financial year to date data, and the financial results for the month--will allow time for comments/changes before the Financial Highlights report is finalized.

On page 12 of the Financial Highlights for July, 2002, Amber will research chemical over plan variance and provide a report to ELT.

Amber will provide reporting by core for the preliminary engineering account.

Amber will provide a report on how we account for free water we provide the City and how we account for water used at LWC plant(s). She will complete research on how water delivered to mains is calculated and potential for subtracting from water delivered to mains then billing as free water.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for August 19, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the August 19, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes August 19, 2002

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Jamie Young for Laura Douglas
Attendees: James Bates, Terry Conway, Tony Gregory, Greg Heitzman, Steve Hubbs, John Huber, Dan Lambert, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Jim Smith, Karla Teasley, Jack Wang

***Review Minutes and Agenda**

Minutes from the August 12, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

GIS Update—James Bates, Dan Lambert

James Bates provided copies of and discussed "Project #00-479, AM/FM/GIS Project Overview and Demonstration." James noted that GRW is developing three software applications for LWC: (1) new mapping application, (2) a valve card application, and (3) a web browser application.

ELT requested that James provide the following: (1) updated AM/FM/GIS project timeline for ELT, (2) outline of data maintenance and ownership for facility data. James will provide recommendations for LWC GIS data collection for facility information to Karla Teasley to share with ELT.

System Certification—P1 (Managing Water Quality/Production)—Greg Heitzman, Jack Wang, Roger LeMaster

Greg Heitzman provided copies of and discussed the certification documentation for P1—Water Quality and Production. Jack Wang discussed the recommendations in the certification documentation.

ELT reached consensus with Greg's recommendation that the system not be certified at this time. P1 will proceed to address the audit findings, and Internal Audit will conduct a system certification review in January, 2003. For 2002 Shared President/VP Goals, this means a four rating is the maximum achievable for Goal D—Increase Operational Performance through Process Improvement.

Open Time—All

Manager of Regulatory Affairs Role—John Huber

John Huber noted that since Bo Williams has retired, we need to fill the role he played in working with the Emergency Management authorities and staffing during emergencies. Bob Miller responded that Glen Mudd will be assigned to fill this role. Training will be provided to bring Glen up to speed.

Working with Fire Departments re Automated Mapping and Facilities Management—John Huber

John Huber noted we need to make sure we are working with the fire departments regarding automated mapping and facilities management.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for August 26, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the August 26, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes August 26 2002

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Steve Hubbs
Timekeeper: Laura Douglas
Attendees: Greg Heitzman, Steve Hubbs, Roger LeMaster, Bill Meeks, Bob Miller, Jim Smith, Karla Teasley

***Review Minutes and Agenda**

Minutes from the August 19, 2002 ELT meeting was approved as submitted. Agenda for this meeting was discussed and approved.

Summary of O&M and Capital Budgeting Processes

Amber discussed the Preliminary O&M Budget Presentations to be used to present budgets (attachment 1). The increases that may result from LRO are not included yet in the budgeting. ELT will determine the process to follow for budget approval at the beginning of the process (late Tuesday of early Thursday as ELTs review begins). Wednesday, September 5 was reserved for additional time for ELT to discuss the budget as needed. Karla will lead this process with assistance from Bob.

Jim presented a summary of the 2003 capital budget. The 2003 budget is now estimated at \$81 million. ELT discussed the long-range impact of the capital program on rates, and how the capital plan is balanced between maintaining our existing customer base, expanding our customer base, and projects that "save" money versus capital projects that will result in needs for rate increases. Jim will lead a future discussion on this with ELT on a February 2003 timeline, with focus of using this as input to the 2004 capital budget.

Update on ISO team activities

Steve distributed the ISO team's current documentation on the ISO workplan for Section 4 (Quality Management System) (attachment 2). The team has completed work through section 4.1 and is nearly complete with 4.2.

ELT agreed that the ISO team will come back to ELT in November 2002 with the team's work on a Quality Management System. The team will target having section 4 complete (identifying those items that LWC has and those that it does not have).

Affirmative Action Goals

Rhonda distributed the 2nd Quarter hiring goals results (attachment 3), noting that because of the low number of hires made in 2002, we have gone from a "1" rating to a "5" rating. She also distributed the 2002 hiring goal summary as background to goal attainment.

ELT agreed to continue with the goals as stated for 2002, and to consider improvements for 2003.

Review Bin List—All

The group discussed items on the BIN list and future agenda items. The following topics will be on the agenda:

- Greenback report (shared information)
- Board Agenda (shared information)
- Goshen update (shared information)

The topic of corporate policy review will be considered for the September 16 meeting,

Agenda for September 9, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the September 9 ELT meeting. She noted that September will be the last month in the rotation

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes September 9, 2002

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Steve Hubbs
Timekeeper: -
Attendees: Greg Heitzman, Steve Hubbs, Bob Miller, Karla Teasley, John Huber
Billy Meeks (10:00 am)
Staff: Amber Halloran, Sue Purdy, Rhonda Brown, Angela Harris, Jim Smith

***Review Minutes and Agenda**

Minutes from the August 26, 2002 ELT meeting was approved as submitted. Agenda for this meeting was discussed and approved.

Greenbacks Report

Amber provided the Greenbacks report, noting that there has been some mis-reporting of plant usage and water in lieu of taxes. This has no monetary impact, and will be further explored in the following months. Net income continues strong at \$1.54 million over plan.

ELT discussed the decrease in commercial sales, and requested further analysis of this sector. Amber will explore (as time allows) the customer accounts to determine if this downturn is a result of the loss of accounts, or less consumption across all accounts, or some combination of effects.

Unaccounted-for water continues to be somewhat high, partially as a result of high consumption in August with this water being still unread on the meters.

Sue distributed a report used to allocate budgeted expenses and revenue through the year (attachment 1). She noted that because of RouteSmart, the 5-year averages are no longer being used to estimate revenue. Rather, a calculated allocation based on anticipated meter reading is being used to allocate the planned revenue stream.

Corporate Dress Code

Rhonda and Angela distributed and discussed the dress code policy dated 8/28/2002. ELT discussed the proposed policy, and recommended minor changes regarding effective date (January 13, 2003), application to union employees while in training, and further definition of appropriate dress for Fridays. The policy was approved by ELT with noted exceptions and clarifications.

Goshen Update

Jim Smith updated ELT on the current operational difficulties with the Goshen system. Oldham County Water District has cut off the northern feed to Goshen because of their own shortage of water, causing a deficit in water supply in Goshen. Several construction activities will provide supply options within the next few weeks. The operations group will proceed to balance risk elements and communication activities.

There has been an increase in call volume from the newly acquired system. The customer response to the two recent boil water notices has been mostly positive. A number of checks were lost between AquaSource and LWC as a result of a ripped UPS package, resulting in a number of late payment notices going out. Our first billing is ready to go.

The schedule for fees and the main extension policy need to be solidified, and the quarterly meeting with the Goshen advisory board is proposed for late October/early November will likely cover these issues.

Updated facilities information is being expedited, with hydrants, valves, and key facilities identified and logged.

Review of Board Meeting Agenda

Mobile dispatch is on the Agenda, and staff is prepared to present benefits provided to customers as a result of this program. A verbal update of the Bullitt County AMR system will also be presented to the Board at this meeting. The Annual Inspection report was not distributed to the BWW members prior to the meeting except for an executive summary. The deadline for submitting this report is October 31, along with the annual budget (two months before the end of the fiscal year). This item will be postponed until the October meeting.

Review Bin List—All

No items added to the BIN list.

Agenda for September 9, 2002 ELT Meeting—Karla Teasley

Karla will review the Bin List and provide an agenda for the September 16 meeting, including a substantial amount of time for O&M budget review (90 minutes) and a discussion of Corporate policies.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes September 16, 2002

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Laura Douglas
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bob Miller, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Steve Hubbs will provide revised minutes for the September 9, 2002 ELT meeting. Agenda for this meeting was discussed and approved.

2003 O&M Budget Review—Bob Miller, Amber Halloran, Sue Purdy

Amber provided copies of and discussed the following: LWC LRO Analysis, 2003 Budget, September 16, 2002; 2003 Estimated Changes in Sources and Uses of Revenue; 2003 Budgeted Water Consumption by Class; KT Surcharge/Rate Differential, 2003 Revenue Projections; 2003 Budget (with 3% Rate Increase), Comparison of Revenue under Existing Rates Based on 6/30/02 Consumption Distribution; LWC New Structure, 2003 Operating and Maintenance Budget; LWC 2003 Preliminary Budget Scenarios for Increased Operations & Maintenance; and Additional Items Requested above 0.8% Target Budget.

Amber recommended we continue to capitalize interest on loans in 2003. She will provide additional information on this.

Regarding Additional Items Requested above 0.8% Target Budget, the group agreed to fund items through Item 19.

ELT agreed to identify Item 17 on the list as a pilot project and that the project is for one crew. It requires an implementation plan and approval, and we should determine which process will conduct the pilot. ELT tentatively approved this, but the program itself needs to be approved. The business case says we must be sure we can do this through the pilot program and document that we can meet/exceed the pilot program.

The cost for Item 21 will be absorbed into the warehouse overhead. A proposal would be brought to ELT for consideration.

We need to break Item 18 into two items: (1) \$10,000 for Developing Bid Package for Lagoon, and (2) \$140,000 for Lagoon Clearing if money is available.

ELT would also like additional information on Items 2, 5, 6, 11, 13, and 19. Information on these items should be provided to Amber by Thursday, September 19.

Amber will update the FTE sheet.

ELT approved the recommendation on the 2003 O&M Budget. This will go to the Board for their approval.

ELT Discussion of Corporate Policies—Bob Miller, Laura Douglas

Laura provided copies of and discussed the "as is" flow charge for Policy Revision and Development Process.

ELT agreed we should contract with My Virtual Corporation to get LWC policies finalized in PDF format and posted on the Intranet by the first of the year. The project will include policies which are now in draft format and policies scheduled for revision. Laura noted we are not able to do this in-house because we cannot take staff away from their other duties to focus on getting it completed by the first of the year.

ELT agreed with Bob Miller's request that the HR policies scheduled to be finalized and policies scheduled to be reviewed for revisions be deferred until after the first of the year so HR can concentrate on finalizing the Employee Handbook update and distribution. Bob will communicate to HR that the Employee Handbook should be completed in two months so that they can begin working the policies.

Laura will provide ELT a list of existing policies with implementation dates and projected revision dates at the September 30 meeting.

The General Counsel is the owner of the policy process. Laura will discuss with Roger LeMaster Internal Audit's assistance in updating the policy review process and the policy approval process—the process should be monitored for gaps. John also will discuss with Roger how Internal Audit can be involved in monitoring the policy approval/revision process.

ELT agreed that the Timekeeping Policy should be standard for all systems.

This item--report on Intranet posting of corporate policies (LMD and RKM)--will be added to the BIN list for after the first of the year. The goal is to have the policies posted on the Intranet by January 1, 2003.

Open Time

Bob Miller noted that the existing Dress Code Policy deals with how we appear to customers. Should we add a second piece to the policy on how employees should behave toward customers? ELT agreed that the BSOs should deal with this. This should be a fundamental part of our corporate culture.

Bob also noted that HR will not be the "hemline police" for the Dress Code Policy. It is up to the POs/BSOs to monitor the Dress Code Policy within their processes/systems. He also noted that "slouched trousers" is not included in the Dress Code Policy but should be communicated to employees by the POs/BSOs.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for September 23, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the September 23, 2002 ELT meeting.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

ELT Meeting Minutes September 23, 2002

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Bill Meeks
Scribe: None
Timekeeper: None
Attendees: Kate Farrow, Nora Freeman, Kevin Grant, Greg Heitzman, John Huber, Roger LeMaster, Bill Meeks, Bob Miller, Scott Muhlenbeck, Mike Sturgeon, Karla Teasley, Jami Young
Absent: Laura Douglas, Steve Hubbs

***Review Minutes and Agenda**

Minutes from the September 16 meeting were reviewed and approved, as was the agenda for today's meeting.

Certification and NLP

Nora presented ideas for ELT's consideration. Business System recertifications will be made in 2003-2004.

Discussions ensued on:

- Elements to remain the same
- Elements that will receive more or changed emphasis
- New elements
- Deleted elements

Greg and Billy believe in the Partnership Agreement between Local 1683 and the Company on system with union employees.

Greg believes NWT Charters should be required, standard operating procedure. Where does this fit in the audit plan.

Measures – Results versus activity measures. Need to get a handle on empowerment. Does it apply at the process or the system level.

Set some minimal expectations for documentation standards.

Nora and Roger will take these ideas for system recertification cycle of 2003-2004 cycle to BSOs for input. That input along with proposed changes will be brought back for ELT consensus.

Affirmative Action Program

Rhonda shared information about our current Affirmative Action Plan. ELT members agreed to read and get with Rhonda if information is needed.

RouteSmart Analysis and Metrics

Kevin and Mike shared information on RouteSmart and what has taken place as of today.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Timekeeper Report

There was no timekeeper at today's meeting, as Laura Douglas was absent.

Agenda for September 30, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the September 30, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes **September 30, 2002**

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Laura Douglas
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Rengao Song, Karla Teasley, Jack Wang

***Review Minutes and Agenda**

Minutes from the September 23, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Taste and Odor Issues and Increased Costs—Jack Wang, Rengao Song

Jack Wang provided copies of and discussed a memorandum regarding taste and odor treatment and cost, a timeline of taste and odor events at LWC during September, 2002, and information on the McGuire Environmental Consultants AWWARF project "Water Utility Self-Assessment for the Management of Aesthetic Issues." LWC scored 82% on the self-assessment survey, which is very good.

We need to determine the cost to address storage and pumping issues, to train operators, and how the cost will impact our capital construction program. We can decide treatment strategy based on cost.

ELT agreed to conduct a preliminary engineering evaluation for two-stage dosing of carbon at CH and continue to have 10 ppt as goal, but design so we could control carbon down to 5 ppt.

Activity-Based Costing—Amber Halloran, Bob Miller

Amber provided copies of and discussed an information sheet on activity-based costing which included definition, components, operational involvement, and accounting involvement. Activity-based costing will be a management tool for day-to-day operations. Bob Miller noted this is a cost allocation method. He also noted this is the armor we need to be competitive with other utilities.

The timeline if LWC adopts activity-based costing is around the fourth quarter of 2003 after the FINS is complete.

LWC should conduct research to determine areas of vulnerability in activity-based costing. Greg suggested we consider some type of training, including basic accounting/financial fundamentals, possibly as part of the LWC Leadership Institute.

Corporate Policies Update—Laura Douglas

Laura provided copies of and discussed a list of LWC policies and most recent revision dates. Policy review is scheduled on a three-year basis. Legal advises the policy administrator, the BSO, and the CBSO when it is time to review a policy. The policy administrator, with input from the BSO and CBSO, determines if the policy should be revised or remain as is.

Laura is working with Internal Audit to determine the best method for ensuring that policies are reviewed as scheduled and that we are "working the process," pointing out gaps, etc.

Laura will also work with Internal Audit to get their perspective on corporate definitions for “policies” versus “procedures.”

ELT Team Effectiveness Survey—Karla Teasley

Karla provided each ELT member a Team Effectiveness Survey form.

ELT members should complete the form and return to Nora Freeman by October 2. Nora will collate and report the results of the survey at an upcoming ELT meeting.

Open Time—John Huber

John noted that both LWC treatment plants have chlorine and ammonia and are in residential areas. We need to continue to make sure we have appropriate controls, and also think ahead and look at alternatives (chemicals with less risk). LWC should complete a study and have a recommendation for implementation, possibly having CH2M Hill or B&V negotiate a specific scope of work, or if we can fast track this through the procurement process, we should do that.

Laura suggested we should have a study underway or a recommendation received when we get to merged government.

Greg, Laura, and Bob will discuss the timeframe to act on this and evaluate alternatives for procurement and report to ELT.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for October 7, 2002 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the October 7, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
October 7, 2002**

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Don McKay, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the September 30, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Review Greenbacks Report & Review Operating Issues/Budgets—Amber Halloran

Amber provided copies of and discussed the LWC Financial Highlights for September, 2002; a list of Commercial Consumption (by premise) for 2002 YTD Compared to 2001 YTD; and 2002 Proposed Budget Cuts/Expense Reductions, Revised 10/4/02.

Regarding Financial Highlights, Amber will investigate Contractual Services (Page 12, Summary of O&M Expenses) to see why this is up \$814,841 over 2001.

Regarding Commercial Consumption (by premise), Amber will investigate free water account corrections. Vince Guenther should attend the ELT meeting when Amber's findings are discussed. Amber will also investigate the distinction between industrial and commercial customers.

Regarding 2002 Proposed Budget Cuts/Expense Reductions, the CBSOs will take this information to the BSOs and get updated information on 2002 cuts to Sue Purdy this week. This item will be discussed at October 14 or October 21 ELT meeting.

Discuss Draft Travel Policy—Amber Halloran

Amber provided copies of and discussed the draft Travel Policy, the draft Request for Travel Authorization & Reconciliation form, and the current Travel and Expense Reimbursement Policy. Changes included in the draft are use of procurement cards, changes in the approval process, and payment for lunches on trips which do not include overnight stays. The revised Travel Policy will require "one up" approval on all travel, with BSO approval for up to \$2,500, CBSO for travel over \$2,500, and President for travel out of country. Employees should provide a summary of their travel which will be kept on file.

Regarding rental cars, Amber noted Don McKay wants to include more discussion on insurance. All rental vehicles must be approved by the CBSO in advance of travel. CBSOs will now approve all rental cars prior to travel. Rental cars should only be used when more economical than public transportation or taxi commuting.

ELT agreed to the following regarding lunches for one-day or one-half day seminars/conferences: If travel is for an all-day seminar or conference or half day seminar that extends thru a breakfast, lunch, or dinner period, the meals will be reimbursed by the Company. If travel is for a seminar or conference less than one half day, meals will not be provided. Meals included with the seminar/conference fees are acceptable.

CBSOs and BSOs should encourage employees to use procurement cards rather than cash when traveling on LWC business. Each procurement card receipt should be retained with documentation of purpose and person's involved, and submitted to accounting on a monthly basis.

REVISED

The CBSOs will get input from the BSOs on the draft and provide this information to Amber by Friday, October 18. Amber will then make changes to the draft as discussed and include input from the BSOs. She will format the policy using the policy template and bring the final draft to ELT for approval.

Review Board Meeting Agenda—John Huber

Agenda items for the Tuesday, October 8, Board meeting include introducing the 2003 Preliminary Budget to the Board and discussing the Annual Inspection Report.

ELT Activity on Risk Assessment Discussion—Don McKay, ELT

Don McKay has been discussing risk assessment with all 15 systems. The systems are not identifying a lot of new risks, but have made some changes in ranking of risks. Don proposes a facilitated session in-house wherein we analyze the risks by system and attach weightings to see how we are managing risks. Each system, as part of this, will be updating their risk management plan.

Greg will work with Don to schedule the two special facilitated ELT sessions on Risk Management for November or December.

Nora and Roger will work with Don on establishing risk management expectations (Risk Management Plan, Risk Matrix, Risk Assessment) for future certification.

Open Time

Metro United Way Campaign—Bob Miller

Bob requested the following from ELT members:

- (1) He wants access to employees' time so they can work on the MUW team. He needs a few more team members.
- (2) He wants a commitment from ELT members to encourage employees to attend the MUW presentations. He wants ELT members to get the message out that you don't have to contribute to MUW, but we want you to attend the 15-30 minute MUW presentation and hear the message.
- (3) He requested that ELT members attend the MUW Leadership Breakfast October 18 at MUW's office.
- (4) He encouraged ELT members to participate in/attend the two tapping contests: Men's Tapping Team versus ELT at Allmond Avenue on Tuesday, October 29, at 7:00 a.m.; and Women's Tapping Team versus a team of BSOs on Thursday, October 31, at noon.

Kentucky-American Water Company—John Huber

John Huber noted that the dialogue in Lexington on the possible sale of KAWC is heating up. We will provide requested information, but we do not want to take one side or the other on this issue.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for October 14, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the October 14, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes October 14, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Laura Douglas, Katie Farrow, Nora Freeman, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Johnnie Rice, Karla Teasley

***Review Minutes and Agenda**

The minutes from October 7, 2002, ELT meeting were amended as follows:

Under Discuss Draft Travel Policy, Paragraph 2, third sentence, change "CBSO's" to "CBSOs."
Under Discuss Draft Travel Policy, Paragraph 2, third line, correct spelling of "transportation."

Under ELT Activity on Risk Assessment Discussion, Paragraph 2 should read "Greg will work with Don to schedule the two special facilitated ELT sessions on Risk Management for November or December."

Under Agenda for October 14, 2002 ELT Meeting, change "Karla Teasley" to "Greg Heitzman."

Agenda for this meeting was discussed and approved.

Organizational Effectiveness Index (OEI)—Katie Farrow

Katie discussed the final version of the OEI, which will replace the Team Based Assessment, Systems-Based Assessment, and SAC Assessment. Next year it will also replace the Employee Perceptions Survey. The survey is a bottom-up evaluation. Data from the survey will be broken down into company data, core data, system data, and process data, and will be used to target areas for improvements at the system, process, and individual levels. It will also be used in setting Executive Incentive Goals, Corporate Performance Award Goals, Operating Plans, and individual performance appraisals where appropriate.

Employee participation in the survey will not be mandatory, but employees should be encouraged to complete the survey. The percentage of participation to judge the survey successful is 95% of employees completing the survey.

ELT approved the roll-out and long-term use of the OEI survey.

As encouragement for employees to complete the survey, CBSOs, BSOs, and POs should let employees know that time has been set aside for them to complete the survey.

ELT will review the data when the survey is completed, then decide how to roll the information out to employees.

ELT Team Effectiveness Survey-Next Steps—Karla Teasley, Nora Freeman

Nora provided copies of the ELT Team Effectiveness Survey for third quarter, 2002. The team average for the third quarter is 4.0.

Greg asked if there were any areas ELT wants him to focus on during his term as Team Leader. John Huber suggested following up on the two items which scored the lowest: Balanced Workload and Dealing with Conflict in Meetings.

Review Cost Reduction Strategy—Amber Halloran, Bob Miller

Amber provided copies of and discussed the 2002 Proposed Budget Cuts/Expense Reductions, Revised 10/14/02. We are \$794,738 under budget and are on target for our \$1 million in budget cuts for 2002. This includes the total contingency.

The dividend for 2002 is still above the budgeted amount. We should think about ways to increase the dividend to the City in 2003.

ELT agreed to retain the target of \$1 million for budget cuts based on everything but allocated costs. The target would have been \$1.1 million if we had included allocated costs.

Bob and Amber will take the information on budget cuts and determine if we will exceed the expectations we gave the Board.

Amber will provide an updated version of the budget cuts based on today's discussion. This item will be discussed on a monthly basis for the remainder of 2002.

Open Time--All

Education Conference—Bill Meeks

Bill reported on a fall education conference he attended recently. Bill says the conference basically was "anti-privatization."

Waterworks Management Workshop Group Meeting—Greg Heitzman

Greg provided copies of the agenda for the upcoming meeting in Chicago. Greg will distribute copies of the agenda to those who should provide answers to the various questions. He needs responses by Friday, October 18.

Photo Album—Bob Miller

Bob has a picture album of some LWC employees. The pictures were taken as far back as 1985. He will pass the album around to ELT members.

EMA/Northern KY regarding CIS Options—Karla Teasley

EMA is working with Northern Kentucky on CIS options. They may outsource and may contact us on partnering with them on billing and CIS. Orcom is our vendor and would have to be a key player on anything we might do with Northern Kentucky regarding billing/CIS.

Agenda Items for Special Board Meeting Scheduled for October 30—Laura Douglas, John Huber

Agenda items include the 2003 Budget, the FINS bid, and possibly a discussion on property for a storage tank on Tucker Station Road.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for October 21, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the October 21, 2002 ELT meeting.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

**ELT Meeting Minutes
October 21, 2002**

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Steve Cooper, Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Mike Magee, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the October 14, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

13 Natural Work Team Process Improvement—Steve Cooper, Mike Magee

Bill Meeks and Mike Magee provided copies of and discussed the Process Analysis Redesign for I3.4, Capital Construction Group. The Redesign introduces a pipe collar/sleeve designed to fit over new water main installations at the point where service taps will be made to transfer or renew existing services. The collar eliminates the need to dig under the pipe to wrap chain around for the tapping machine and reduces the time it takes to make a tap by 33 percent, at a cost savings of approximately \$34.00 per service. The only added cost for this process redesign is the pipe collar (8" collar @ \$40.00, and one-half of this cost is recouped because the top half can be used on another service). Based on 2001 statistics, the company would realize a savings of \$10,200 per year on average. Mike's crew is the only LWC crew now using the collar. Mike is now ordering the collars on an as-needed basis.

Intangible savings include the collar keeping the polywrap in place and undamaged, and keeping the pipe from being damaged.

Laura Douglas expressed concern that we should be cautious about making statements about products as was made in the **Public Works** article regarding the collar/sleeve. Jenguard did contact Mike and asked if we would do the article. The article could be construed as LWC endorsing Jenguard and gives the appearance that we prefer this product over other similar products. We should make a decision regarding under what circumstances we would want to put an article in a magazine. We could have done an article on the process itself rather than naming the product.

Karla Teasley, Bill Meeks, and Steve Cooper will prepare a proposal for ELT approval on recognition reward for the Mainstreamers—13.4 Capital Construction Group for their work on this PAR.

Laura Douglas will discuss with Barbara Crow and Bill Meeks will discuss with Mike Magee a procedure to follow when writing articles like the one which appeared in **Public Works** so that LWC would not appear to be endorsing a particular product.

ELT tapping Team for MUW—Greg Heitzman

The tapping team contests are scheduled for October 29 at 7:30 a.m. at Allmond Ave. (ELT versus Men's Tapping Team and December 31, at Noon at Third Street (BSOC versus Women's Tapping Team).

Greg, Bob, Steve and Bill will represent ELT in the October 29 contest. Karla and Laura will attend as coaches/timekeepers. Team members should arrive at 7:00 a.m. The contest will begin at 7:30 a.m.

Bill Meeks and Greg Heitzman will provide information on practice sessions.

Open Time—Bob Miller

Metro United Way—Bob asked ELT members to relay to the BSOs that we need them to encourage their employees to participate in the campaign this year.

Procurement Card Usage—Bob stated the procurement card process has been in place a little over two years and is working fine. The process has been audited with good results. Two important measures of the process are accuracy and timeliness. Our procurement card bill for the past month is over \$200,000 for the first time. Bob found nothing in this bill that looked questionable. Using the procurement card process rather than the PAI system saves time in getting invoices paid. Bob noted we must make sure we have controls and are continually monitoring the use of procurement cards.

We should communicate to the Board and Audit Committee on status of the procurement card process, and we may need to rethink what is included in the list of vouchers we provide to the Board.

Performance Appraisals—Bob said there is still work to be done on the PA system. Some people have not put their reviews into the computer, and some people have put the reviews in, but the goals do not add up to 100 percent (the goals are not weighted properly), so the system cannot give a final rating. The biggest complaint about the PA system is that the system is slow.

Bob encourages everyone to use their own language if the PA system standard language does not fit a particular situation.

He also encourages managers and employees to use the Development Plans and Comments portions of the PA system, even though these tools are optional. During the interim reviews, let employees know this is where they are right now, and they still have time to improve their rating.

Bob wants to make sure everyone gets the reviews into the system and make sure the system generates a final rating.

Bob will follow-up and focus on improvements to the PA system, including the speed of the system.

CBSOs and BSOs should communicate to their employees that OEI results will be rolled into competencies.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for October 28, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the October 28, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
October 28, 2002**

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Steve Hubbs
Timekeeper: Karla Teasley
Attendees: Laura Douglas, Nora Freeman, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Karla Teasley

***Review Minutes and Agenda**

Minutes from the October 21, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Third Quarter Goals Review (Executive Incentive, ELT Shared, Corporate Performance Award)—ELT

Nora provided copies of and discussed the third quarter update for Executive Incentive Plan Goals, Shared President/Vice President Goals, and Corporate Performance Award Goals. Under Executive Incentive Plan Goals, we met the Light Switch Goal for the third quarter of 2002.

Under Goal V of Executive Incentive Plan Goals, Greg will check with Don McKay on definitions for preventable versus nonpreventable vehicular accidents and who currently tracks the actual data for this goal to see if there is a change in the process which would contribute to an increase or decrease in the numbers reported.

The CBSOs will cover the third quarter results with the BSOs, and Nora will also discuss the results in an upcoming BSOC meeting.

Nora provided copies of an outline titled Core Operation Improvements to be used as a guideline for identifying/improving operations (processes). Greg will work with Nora to create a template for operational (process) improvements to help standardize these and begin benchmarking in the industry.

Nora also provided copies of The Corporate Achievements Report for Third Quarter 2002.

ELT accepted the third quarter results for the goals with one change: Regarding certification under Goal D for President/Vice President Shared Goals, Nora will amend the report to show that P1 system was not certified in 2002.

Discuss 2003 Goals—Greg Heitzman

The group discussed shared goals for 2003. For 2002, goals were weighted as follows:

Competencies	40%
Diversity	10%
Shared Goals	20%
Individual Goals	<u>30%</u>
Total	100%

ELT agreed to leave the percentages as is for 2003, if changes to the software can be made to allow round percentages of 40, 10, 20, and 30 for a total of 100 percent. Greg will work with Bob Miller on this.

ELT will decide in January, after year-end results are in, where the OEI fits into the (competencies) goals for 2003.

The group discussed having a FINS goal to replace the ATT goal. Greg will get feedback from Bob before a decision is made on this.

ELT agreed to adjust Goal D under Shared Goals to show the number of certifications Roger has targeted for 2003. We must consider certification, process improvements, and quality management system structure (ISO or equivalent) when setting this goal.

Regarding Goal E under Shared Goals, Control Cost of Risk, we should consider getting an update of risk management plans when setting this goal.

ELT will finalize the 2003 goals in a future ELT meeting, before end of year.

Special Board Meeting Scheduled for October 30—John Huber

Agenda items include award of contract for FINS project, tank site property negotiation, and 2003 Budget.

Waterworks Management Workshop Group Meeting--Greg Heitzman

Greg provided copies of and discussed items from the Waterworks Management Workshop Group meeting which he and Bob attended in Chicago last week.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for November 4, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the November 4, 2002 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" these minutes.</p>

ELT Meeting Minutes November 4, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bill Meeks for Bob Miller
Attendees: Steve Cooper, Laura Douglas, Katie Farrow, Nora Freeman, Amber Halloran (for Bob Miller), Greg Heitzman, Steve Hubbs, John Huber, Ralph McCord, Joan Malone, Bill Meeks, Karla Teasley

***Review Minutes and Agenda**

Minutes from the October 28, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

NLP II Future Direction—Nora Freeman

Nora and ELT members discussed updating the NLP II. ELT agreed an update is needed for the plan to provide direction over the next several years. Nora suggested a timeframe for the update of three years—mid-2003 to mid-2006. She suggested that during the last year (mid-2005 to mid-2006), ELT might work on a completely new NLP. The name of the updated plan and the timeframe covered will be determined when the update is completed.

ELT agreed the update would cover six elements:

1. Accountability/Empowerment
2. Learning Organization & Training
3. Risk Assessment/Risk Management (COSO Model)
4. System-Based Management and Certification
5. Organization Structure/Role Review
6. Partnership with Employees

The six elements fit under the four pillars of LWC's Total Quality Organization: Systems-Based Management, Quality of Work Life, Empowerment, and Partnership among Employees.

There are two deliverables on the update at this time: (1) plan/timeframe, and (2) shared understanding of what this is all about and specifics of what we intend to achieve.

Each ELT member should volunteer to work on one of the six elements. ELT members will let Nora know which element they wish to work on. Greg will work with Nora and bring an outline/framework for the update to ELT in two weeks.

Serving Customers/Business Development Restructuring—Steve Cooper/ Ralph McCord

Ralph and Steve provided copies of and discussed Process Synopsis for (1) New Service Installations, and (2) Capital Pipeline Construction. These process activities were previously considered Union Pilots and Karla, Steve, and Ralph advised ELT these activities have been integrated into daily operations and are currently managed as Processes. ELT discussed the role of Resource Coordinator leading a self-directed work team versus a Process Owner leading a Process or Natural Work Team. The Senior Compensation Committee will determine if the title "Resource Coordinator" will be changed to "Process Owner" for these work areas. Mr. Huber noted that if these pilots are renamed as processes, the

processes must be competitive and the boundary conditions and expectations must be clear. They must maintain flexibility for variable levels of work load activity and have effective measures in place.

Karla will take the input received today and address the concerns expressed by ELT. Karla, Steve, and Ralph will meet with Mr. Huber to discuss the role of Process Owner vs. Resource Coordinator.

Open Time

NWT Recognition—Karla Teasley

Karla provided copies of "ELT Approved Appreciation" which recommended an award to employees in the 13.4 Process for their work in evaluating and determining the benefit of using a lightweight, two-piece collar/sleeve designed to fit over new water main installations at the point where service taps will be made to transfer or renew existing services.

Karla recommended an award of \$150.00 per employee on the team for a total award cost of approximately \$2,400.00. The annual estimated savings exceeds \$2,400.00.

ELT approved the recommended award with the understanding that Karla will add the following reasoning as the basis for the award: the process reduces O&M and Capital costs, assures quality of installation and integrity of poly-wrap, and increases customer satisfaction by returning customers to service in a shorter period of time. This process improvement will be tracked over six months to determine the actual savings.

CDBG Funds Grant—Karla Teasley

Karla reported on an article by Tom Barr which appeared in **Pioneer News** wherein Representative Belcher stated funds for CDBG have been granted. LWC had applied for a \$1 million grant.

After formal notification is received at LWC, Karla will schedule a special Bullitt County Advisory Board meeting to determine how the funds will be allocated.

Health Insurance Cost Increase—John Huber

John reported we had budgeted for an increase in health insurance costs of about 20 percent for 2003. Humana's quote for 2003 has been received and reflects a 27 percent increase, which amounts to \$120,000—\$140,000 additional per year.

We will go into the marketplace for additional quotes and will negotiate further with Humana, which may result in something lower than the 27 percent increase.

Greg will arrange for Don McKay to attend an upcoming ELT meeting to discuss health insurance costs.

Review Bin List—All

ELT members will e-mail any new items for the BIN list to Greg.

Agenda for November 11, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the November 11, 2002 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>

ELT Meeting Minutes November 11, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Karla Teasley/Bob Miller
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, John Huber, Joan Malone, Bob Miller, Sue Purdy, Karla Teasley

Agenda

The meeting began at 9:05 am, with Greg and Karla in attendance. The decision was made to proceed with the agenda as prepared and review minutes when Bob, John and Laura arrive for a quorum. Bill and Steve advised in advance they would not be able to attend the ELT meeting. Bob, Laura and John arrived by 10:00 am, during presentation of the first agenda item.

Greenbacks Report and Cost Reduction Strategy—Amber Halloran

Amber Halloran provided copies of and discussed the LWC Financial Highlights for October, 2002. The major area of concern was the swing of O&M costs from a position of \$683,000 under budget in September to \$359,000 under budget in October. Net Income exceeds budget by \$2.1 million, due to the high sales period from August through October.

ELT agreed we should begin to ID potential O&M expenses that may be eligible for the contingency. Potential Contingency Fund items for 2002 are: (1) \$205,000 for the 48-inch main repair at ZPS; (2) \$150,000 PAC expense for T&O control; and (3) \$200,000 potential write-offs for bad debt.

On Page 9, Top 20 Production Facilities, Item 11, Sue will provide the LG&E location of meter.

On Page 23, Summary of O&M Expenses, under Materials and Supplies and Contractual Services, Amber will provide a breakdown on the variances—actual versus budget—for October. She will provide this information before the Tuesday Board meeting.

Review Minutes

Minutes from the November 4, 2002 ELT meeting were approved as submitted.

LWC and Goshen Board Meeting Update—John Huber/Greg Heitzman

Agenda items for the Board of Water Works meeting include discussion of the acquisition of Shepherdsville, minutes from the last Compensation Committee meeting, and RBF. Discussion of the FINS proposal may be deferred to another Board meeting, if staff is not able to get input from Ms. Wendy Welsh, prior to the Board meeting. Ms. Welsh and Mr. Connor will not be attending the November Board meeting.

Agenda items for the Goshen Board meeting include discussion of proposed changes in rules, capital improvements which have been completed, and capital improvements scheduled for the future.

Corporate Definition of Policy and Procedure—Laura Douglas/Roger LeMaster

Roger provided copies of and discussed the following documents: definitions of “Policy” and “Procedure,” quality manual and quality procedure examples, and a Statement of Policy on Public Water Supply Matters published by AWWA.

ELT agreed to adopt the definitions of “policy” and “procedure” as presented by Roger. “Policy” is defined as “what” we do and “why” we do it. It establishes the framework within which we operate to meet corporate objectives and sets the standards, the guidelines, or rules that we must follow. “Procedure” is defined as “how” we do it and includes the steps we follow to meet policy requirements, how we comply with the business rules, and how we reach our strategic goals and objectives. Policies incorporate strategic goals and objectives and can be modified on a corporate level to meet changes in law or operations, or to meet strategic needs. Procedures can change on an operating level to meet customer needs.

Laura and Roger will identify potential areas where we may need Corporate or Board policies and an outline of how we will develop the policies. They will identify potential gaps in our current corporate policies. Their findings will be added to a future ELT agenda.

Review Bin List—All

The group discussed items on the BIN list and future agenda items. The Organizational Effectiveness Survey, the Internal Customer Satisfaction Index results need to be added to ELT agenda or a meeting set up for review by ELT and BSO’s. Greg will coordinate these items on the Bin List

Agenda for November 18, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the November 18, 2002 ELT meeting.

*Decisions made by ELT and items requiring action are “shadowed” in these minutes.

ELT Meeting Minutes November 18, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Laura Douglas, Katie Farrow, Nora Freeman, Vince Guenther, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Ralph McCord, Bill Meeks, Bob Miller, Johnnie Rice, Karla Teasley

***Review Minutes and Agenda**

Minutes from the November 11, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Growth Limitations in Jefferson County—Ralph McCord

Ralph discussed a map of areas near Bullitt County above 565 elevation in the 660-pressure plane where we cannot provide 40 psi. but have proposed development plans for pressure zone extensions. Ralph also discussed a map of the 860 pressure zone with elevations above 755 which showed areas where 40 psi can not be maintained. The purpose of Ralph's discussion was to get feedback on how we want to work proceed for areas that meet the minimum KDOW requirement for 30 psi, but fall less than 40 psi static water pressure. This issue has become an increasing customer concern, as a result of low flow conservation fixtures and our Distribution Water Quality strategy to cycle all storage tanks 30% volume for water turnover. The tank cycling causes hydraulic grade in the 660 Pressure System to fall to 650 feet in certain areas (SW Jefferson and Bullitt County) and to 810 on the 860 Pressure System (between Taylorsville Rd and Bardstown Rd, near Snyder Freeway). Ralph pointed out his analysis is a static evaluation with certain assumptions on hydraulic grade, and Jim Smith is working on a dynamic model, that will provide more accurate delineation of where the marginal pressure areas are located.

Interim solutions are to: (1) continue to allow areas with static water pressure between 30 and 40 psi to develop with a goal to provide 40 psi in design; (2) identify any projects in the Facilities Plan that resolve the low pressure areas and proceed to implement these projects; (3) develop a communication plan with developers and elected officials to identify areas with marginal pressure (< 40 psi).

Long Term we need relook at our design standards (40 psi target, 30 psi minimum) and determine if a change should be made, considering a design standard of 50 psi; not allowing development until a minimum of 40 psi (or higher) is available; review current development code to determine if pressure requirement should be established in the development code; impact on the Facility Plan if design charges or policy changes are made.

Vince and Ralph will prepare a communication to the Planning & Zoning Commission, home builders, and appropriate public officials identifying areas of concern.

Jim Smith will come to ELT in January when additional work is completed, for ELT to determine if design or policy changes regarding development should be changed.

NLP Future Direction—Greg Heitzman, Nora Freeman

Nora provided copies of Draft NLP Update—Abbreviated Outline and Draft NLP Update—Comprehensive Outline the NLP Update—Abbreviated Outline identifies six areas in the existing NLP document that need updating. ELT identified team leaders, potential team members, and discussed the scope for each of the six areas. Steve presented a draft flowchart for accomplishing sections of the Abbreviated Outline.

Greg and Nora will take the input received today and update the Abbreviated Outline and distribute by the end of this week or next week. Team leaders will let Nora know by the end of this week that their team members will be. If no name is available, the team leader will list as “BSO” or “PO.” Each team will start work on a deliverable in the coming weeks after teams have been established.

Regarding the Comprehensive Outline, the orange print indicates information that is included on the Abbreviated Outline scope and has been assigned. The blue print indicates areas that require updating, but have not been assigned to a team. Greg will add discussion of these gaps to a future ELT agenda.

Nora and Greg will prepare Steve’s draft flowchart in final form, identify items on the Comprehensive Outline which should be added to the Abbreviated Outline, and prepare a timeline for discussion at future ELT meeting (next 2 weeks)

Open Time

Jack Segell—John Huber

John reported that Board Member Jack Segell is in the hospital undergoing medical tests.

Economy—John Huber

John noted that most companies are looking at their benefit programs from top to bottom during this economic downturn.

We should communicate to LWC employees what is going on in the marketplace.

Lake in the Woods/South Hill Apartments—John Huber

At last week’s Board meeting, the Board discussed two apartment complexes—Lake in the Woods and South Hill Apartments—which together owe LWC over \$160,000 for water and sewer service. If/when we discontinue service, we need to give adequate notice to the tenants so they can work out relocation plans before the water is shut off. This involves 180 families.

LWC should: (1) take steps to limit our liability, and (2) do so in a way that we consider the needs of the tenants who must find other housing. ELT members should provide any comments or suggestions they have to John, Laura, or Karla. John, Laura, and Karla will meet to determine appropriate action to be taken.

Metro United Way—Bob Miller

Total giving by LWC employees was \$59,500. This amount does not include a \$5,000 gift from Indiana-American Water Company which was matched by the Brown Foundation for a total of \$10,000. We had an increase in the number of participants and Core Share Givers. Total LWC fund raising will exceed \$69,000. John acknowledged the hard work by Bob for the Team leader role, the Metro United Way team members for organizing the rollout and events, Laura for her Board participation, Bill for his Union and Committee participation; and ELT members and employees for their Leadership Level giving.

Next year we should get benchmarking data from MUW and use that to improve participation. How we can position ourselves for the 2003 MUW Employee Campaign will be discussed at a future ELT meeting. Greg will work with Barbara for an ELT presentation on future campaign roles.

PTO for BSOs/POs—Bob Miller

Bob advised ELT that we have varying levels of PTO for LWC management (BSO/PO), based on when the person was hired and the number of service years. He suggested we relook at this practice and determine if a minimum level of PTO should be established for managers in the company (i.e. 3 weeks or 4 weeks) .

ELT members will provide Bob feedback, and Bob will decide if any proposed changes should be recommended to ELT.

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for November 25, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the November 25, 2002 ELT meeting.

Greg asked ELT members to advise him by Friday, November 22, of any PTO they have planned through January 5, 2003 and if they have backup scheduled to attend ELT meetings in their absence.

ELT members should let Greg know if they prefer to have the regular Monday ELT meetings extended or if they would prefer to have special ELT meetings scheduled to discuss goals and NLP.

TKO Report – Bill Meeks

Started few minutes late, had to extend time for several agenda items to complete, did review bin list, balanced participation.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes November 25, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe:
Timekeeper: Bob Miller
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bob Miller, Karla Teasley, Barbara Crow, Amber Halloran

***Review Minutes and Agenda**

Minutes from the November 18, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Corporate Donation Policy

Barbara Crow presented the Corporate Charitable Donation Policy to ELT for discussion. ELT accepted the recommendations with the following modifications:

Section 3.3 would be modified to indicate that any Vice-President may recommend purchase of tickets to fundraising events (currently reads "Treasurer can recommend..."). Barbara will take the policy to John for his input, specifically if he would like the Corporate Treasurer (or other) to have a role in the approval process. **Barbara Crow will redraft the Policy and forward to Laura Douglas and John Huber for approval and formatting.**

Future Metro United Way and Fund for the Arts Campaigns

ELT also discussed the Rotating Campaign Chair concept, and re-affirmed this strategy for providing high-level participation in the MUW campaign. The group recommended that the rotation schedule for MUW Chair (internal LWC campaign) include all Vice-Presidents, and that the Union President play an active role in this campaign. The MUW Loaned Executive and Fund for the Arts Chair will rotate through the Core Business Systems as is currently practiced. The LWC "Water for People" campaign will also added to the summary of Corporate Campaigns, but does not require a Campaign Chair.

Barbara will pull together a one-page summary on the Corporate Fund Raising Campaigns (MUW, FFA, WFP) for final approval by ELT next meeting (December 2, 2002).

Travel Policy

Amber Halloran provided a modified Travel Policy for consideration. The group discussed what travel would be covered under this policy, with focus on travel requiring reimbursement of expenses.

Suggested modifications include:

- All travel reimbursement requires BSO approval
- Travel in excess of \$2500 requires BSO and CBSO approval
- VP travel in excess of \$500 requires approval of CEO or designee

The policy will include only the overriding concepts for travel (reasonable, approved, no financial loss or gain by traveler), followed by procedure for the detailed elements (acceptable expenses/amounts, receipts).

The group recommended that this policy/procedure activity be pursued according to the recently adopted concept of differentiation between policy and procedure.

ELT targeted this policy and procedure for approval in December 2002, to cover all travel starting in 2003.

Vacation Schedule-Christmas 2002

Greg will assemble a listing of availability for VPs and the President during December and distribute by e-mail.

Agenda for December 2, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the December 2, 2002 ELT meeting. Items to be considered include:

- Ethics questionnaire report back
- Internal control questionnaire report back
- NPL Future Direction update

TKO Report – Laura for Bob

Good meeting, extended time for Travel Policy discussion 10 minutes, ended 10 minutes beyond schedule.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes**

REvised

**ELT Meeting Minutes
December 2, 2002**

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Barbara Crow, Laura Douglas, Katie Farrow, Nora Freeman, Greg Heitzman, Steve Hubbs, John Huber, Roger LeMaster, Joan Malone, Scott Muhlenbeck, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the November 25, 2002 ELT meeting were approved with the following correction:

The last sentence of the second paragraph under "Corporate Donation Policy" should read, "Barbara Crow will redraft the policy and forward to Laura Douglas and John Huber for approval and formatting."

The agenda for this meeting was discussed and approved.

MUW, FFA Campaign—Greg Heitzman, Barbara Crow

Barbara provided copies of the updated draft Corporate Charitable Donations Policy C1-01 with changes noted in red.

John Huber would like to review the draft policy further before it is finalized.

ELT approved the Corporate Campaign Rotation schedule contained in the draft policy.

Internal Control Questionnaire—Roger LeMaster, Scott Muhlenbeck

Roger and Scott provided copies of and discussed the LWC 2002 Internal Control Evaluation—Total Company Observations. The evaluation identified issues regarding communications; recruitment, training, and development; and performance appraisal.

Roger will compile the results of the evaluation by Business System so ELT can check for trends.

Question 7 will be omitted or reworded in future Internal Control Evaluations to reflect a more accurate understanding of the question.

Question 15 needs follow-up to make sure the organization allows for efficient flow of information. This question may be tied in with Question 5.

Roger will isolate all questions regarding communication between systems. We continue to have a gap in communications between employees and need to dissect this information from the evaluation.

ELT will consider the findings from the evaluation when we do the Internal Satisfaction Index and the Organizational Effectiveness Index.

Greg will add this item to the BIN list for discussion in January to determine appropriate actions to take.

2002 Ethics Questionnaire—Roger LeMaster

Roger and Scott provided copies of and discussed the Code of Conduct and Performance and Code of Ethics Questionnaire and Compliance Certification document. This questionnaire will be administered twice per year. Employees who fail to complete the survey may be subject to disciplinary action.

REvised

ELT approved the roll-out of the questionnaire. Roger will prepare a final version incorporating changes discussed by ELT today and make the questionnaire available to the BSOs by January 2, 2003. He will have a session with the BSOC and the Union E-Board to explain the questionnaire. The BSOs will be responsible for having the questionnaires completed by employees in their systems. Roll-outs will be scheduled in January by BSOs. The goal is to have the questionnaires completed and returned by February 1, 2003.

Employees will return the completed questionnaires to Roger in sealed envelopes.

NLP II Future Direction—Greg Heitzman, Nora Freeman

Nora provided updated copies of the Draft NLP Update—Comprehensive Outline, the Proposed NLP Update—Abbreviated Outline, and the NLP Update Flowchart. On the Comprehensive Outline, the items in orange print indicate information that is included on the Abbreviated Outline. The blue print indicates areas that ELT will look at today to determine if these items should be moved to the Abbreviated Outline.

Nora will prepare a new outline incorporating items discussed today, organized by section.

Each team will start work on a deliverable in the coming weeks as soon as the teams have been established.

The group discussed taking a modular approach and spreading deliverables out over calendar year 2003. Nora and Greg will put together a proposed approach, schedule and bring to the next ELT meeting with a draft timeline.

Open Time

PTO for BSOs/POs—Bob Miller

Bob Miller wants time on an upcoming ELT meeting to discuss proposed changes to PTO for BSOs and POs.

ELT members can express any concerns to Bob, and Bob will prepare a proposal for ELT's consideration. This will be added to the BIN list.

Measurement System for LWC—Bob Miller

Bob will meet with Laura McCormick of Indianapolis Water Company this week to discuss their measurement system. This is in preparation for a communication to ELT and ultimately to the Board of Water Work on measurement systems for LWC.

Update on Lake in the Woods/South Hills Apartments—Laura Douglas

Laura gave an update on the two apartments complexes. January 10, 2003 is the date LWC has scheduled to discontinue service. The attorney for the apartment owner does not want us to contact any of the tenants directly to notify them of the turn-off. He says he plans to get an injunction to bar the turn-off.

Bids—Greg Heitzman

Bids for Payne Plant Improvements were received one and one-half weeks ago. The low bidder on the dollar amount is not certified as a local WBE entity Greg is working with Laura and Bob on the approach and recommendation regarding this bid.

Vesco Engineering submitted a bid for design bid work on the Crescent Hill Coagulation #7 Rebuild. They indicated they have a patent on the design, and they are accusing us of infringing on their design copyright on the basis of intellectual property rights. Vesco did submit a bid, however their bid amount exceeded their prequalification limit, and Vesco was not the low dollar bid submitted. Laura is working with Vesco attorney regarding the design copyright claim.

REvised

Review Bin List—All

The group discussed items on the BIN list and future agenda items.

Agenda for December 9, 2002 ELT Meeting—Greg Heitzman

Greg will e-mail the agenda for the December 9, 2002 ELT meeting. Reminder of Special ELT Goals Meeting on December 9, 2002. Greg will provide box lunch at Noon, meeting to follow.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes December 9, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe:
Timekeeper: Bob Miller
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bob Miller, Karla Teasley, Sue Purdy, Amber Halloran, Jim Smith, Anna Norris

***Review Minutes and Agenda**

Minutes from the December 2, 2002 ELT meeting were reviewed and modified to strike the last line in the item on "Update on Lake in Woods..." The agenda for this meeting was discussed and approved with additions to open topics from Bob on a communication from Indianapolis and an update from Laura on the Lake in the Woods account.

Katie introduced Jonathon Berkeley as the recently appointed Union Quality Coordinator.

Greenbacks Financial Report

Amber noted that the unpaid account from Lake in the Woods is currently addressed in the income statement, and is reflected in the bottom line. The net income remains strong at \$2.5 million over plan, but down from \$3.6 over plan from last month. Amber believes this is mostly the result of monthly allocation of income and expense in the budget. John expressed concern that the non-irrigation consumption patterns be closely followed, and that we consider December costs closely and understand the dynamics as we approach the end of the financial year.

Amber advised she has invoiced Jefferson County for the final \$500,000 commitment for the Jefferson County Extension Program.

John noted that for the Countywide Extension Program, LWC should provide a final summary accounting of the program in comparison to initial plan and provide this to Jefferson County officials. Karla will follow-up with Alan Arbuckle to make sure this is summarized in his final report on the Countywide Extension Program.

Board Meeting Agenda

Attendance will be a concern in upcoming months, and the December meeting has been rescheduled to December 20 to accommodate Board members schedules.

Rate increases for 2003 will be presented to the Board for approval. The rate for minimum bill will be increased from \$3.25 to \$3.50 per month to reflect the actual cost of service. Other adjustments for cost of service need to be considered in future years.

The bids for the BEPWTP upgrades were competitive, but there is an issue with the certification of a WBE supplier submitted by the low bidder, Judy Construction. Greg, Bob, and Laura have reviewed the situation and recommendation is to award the contract to Judy Construction contingent upon receipt of the WBE certification documents.

The CHFP flocculator rebuild contract will also be brought to the Board for consideration, but legal issue has been raised regarding the intellectual property rights on the design. These issues will hopefully be addressed prior to the December 20 meeting. At this time, there is no decision from the Bids and Awards committee on this project.

Capital Program Status

Amber noted that we had a significant over-commitment in the capital program for 2003 compared to budget, but that the cash flow for individual projects has been re-evaluated by project managers, and now the commitment is within \$1 million of plan. Amber also noted that significant effort has been made to move projects through the project status codes and close out projects in a timely fashion.

Jim Smith discussed the work in progress on tracking the capital program. Amber distributed a summary of dollars expended by Status Code through September and November 2002. Better definition of the process and adherence to process across the various process owners is needed to improve overall project tracking and closing.

John pointed out that the importance of process is that it defines both the empowerment boundary of the project manager and the control mechanism for the expenditure of capital funds. The process owners are both suppliers and customers of the financial process for tracking project progress and controlling the overall process. The historical aspect of this process goes back to the 1970's capital program and the Board's concern that the expenditure of capital funds be effectively controlled and managed.

John emphasized the importance of value engineering for all projects to assure that the capital program yields maximum value. Our capital program will likely be an item reviewed by the new metro government financial management transition group.

Open Time Items

Indianapolis WW Communications Regarding Incentive Criteria for Contract-Miller

Bob discussed the contract communications criteria for the Indianapolis Water Works, which is weighted at 35% for Customer Satisfaction, 30% for Water Quality (including T&O), 10% for Capital Asset replacement, 5% for capital investment adjustment, 10% for Technical O&M issues, and 10% for miscellaneous issues. Bob noted that some of the individual items seem to be non-strategic. Their goals include that they apply for ISO certification in 2003, be certified by 2004, and ISO 14000 2005.

Laura noted that the Lake in the Woods receiver has offered to pay \$6,000 on the past due amounts and \$3,000 for December, subject to future adjustment. The total number of tenants impacted is 35 as opposed to the previously stated number of 180. The current outstanding amount due is approximately \$188,000, of which \$95,000 is due LWC (balance to MSD). Laura and Karla are working toward resolution, however plan is to turn off service on January 10, 2003 if an agreement is not made.

Agenda for December 16, 2002

Items to be included for the Dec 16 meeting include: NLP III Update; Review of the Accident Policy; and the OEI survey Results. Karla and Steve advised that they would not be in town on December 30.

TKO Report – Bob

Good meeting, good discussion. The group affirmed the desire to maintain open time on each agenda as an open communication forum.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes**

ELT Meeting Minutes December 16, 2002

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: John Anderson, Sandra Beyerle, Laura Douglas (11:05 a.m.), Kate Farrow, Nora Freeman, Bonnie Gimbel, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Don McKay, Bill Meeks, Bob Miller, Glen Mudd, Karla Teasley

***Review Minutes and Agenda**

Minutes from the December 9, 2002 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

NLP II Update--Nora Freeman

Nora provided copies of and discussed the Next Level Plan Update--Inclusive Outline, the NLP Update Subteam Project Guideline, the NLP Update Project Staging, and the NLP Update Project Overview. The NLP Update--Inclusive Outline includes the previous NLP Abbreviated Outline and the previous NLP Comprehensive Outline. The group discussed the status of the nine teams.

Team Leaders should provide Nora the names of their team members this week.

Nora will make revisions to the "package" as discussed today and circulate new drafts by the end of this week.

Accident Policy Approval--Don McKay

Don McKay provided copies of and discussed the draft Vehicular/Mobile Equipment Accident Policy. The biggest change to the policy (previously named the Vehicular Accident Policy) is the addition of Item 3.6--Mobile Equipment.

Sandy Beyerle noted awareness and training regarding the accident policy are the biggest issues in reporting accidents.

Sandy will make revisions to the draft policy as discussed below and e-mail the redraft to ELT members. This item will be discussed by ELT in January, 2003.

- Define mobile equipment versus licensed equipment.
- Define vehicular accident and mobile equipment accident.
- Under Item 3.5, trucks are not mentioned.
- Under Item 4.4d, it should be noted that the police do not always respond to accident.
- Under Item 5.4, drug testing should be referenced.
- Under Item 5.5, LWC should track the point system for one year to get an idea of the magnitude.
- Under Item 5.6, Assessment Action Matrix for Disciplinary Action, 4th Frequency, Bob wants us to look at disciplinary actions other than employee training at employee's own expense.
- Under Item 5.6, Assessment Action Matrix for Disciplinary Action, 5th Frequency, discipline for 13+ points is termination. Before we terminate an employee, there should be some step to remove their driving privileges. One possibility is to remove driving privileges at 3rd or 4th Frequency rather than wait until 5th Frequency and terminate.

ELT members agreed the policy should be as consistent with the Code of Conduct Policy as possible.

ELT agreed the team reviewing/revising this policy should meet with Bill Meeks to get the union's perspective.

New Hire Orientation Process--Bonnie Gimbel

Bonnie provided copies of and discussed the New Hire Orientation Needs Analysis--Structure, Findings, and Recommendations, December, 2002.

Bonnie had four recommendations:

1. Use checklists--helps to prepare, improves consistency, and reduces duplication.
2. Reduce company-wide orientation to one day--improves timeliness.
3. Use LWC Intranet--reduces information overload and is always accessible.
4. Conduct evaluations--improves entire process.

The team Bonnie is working with may also look at a reduced version of orientation for temps and part-time employees.

ELT members should provide their feedback to Bonnie on her four recommendations.

Bonnie will form a cross functional team to look at the four recommendations and develop a communication package and resource strategy. She'll incorporate ELT's input and bring back to ELT the first part of February as shared information. Implementation would be in February.

Open Time

Recognition for LWC Employees Who Worked to Transition Goshen into LWC --Karla Teasley

Karla asked for input on what might be appropriate recognition for LWC employees who worked to transition Goshen into LWC. (For the KT transition, we did ELT recognition.) The recognition could be on several levels, depending on the level of involvement, and should be awarded before the end of 2002 or in early January, 2003.

ELT members should provide Karla names of persons in their cores who worked on the transition.

Karla will prepare a proposal for ELT to review.

Greg will provide Karla information on what was done on the 48-inch main repair so she can use that as a comparison as she prepares her proposal.

Lake in the Woods/South Hills Apartments Update--Laura Douglas

Laura reported on the status of legal actions regarding turn-off of water at the apartment complexes

Review Bin List--All

The following item will be added to the BIN list: Follow-up on results of empowerment pilots in 2003.

Agenda for December 23, 2002 ELT Meeting--Greg Heitzman

Greg will e-mail the agenda for the December 23, 2002 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

1

**ELT Meeting Minutes
January 6, 2003**

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe:
Timekeeper: Karla Teasley
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, Bob Miller, Karla Teasley, Amber Halloran, Vince Guenther

***Review Minutes and Agenda**

Agenda for January 6, 2003

The meeting agenda was developed by Greg Heitzman and was reviewed and approved.

Travel Policy

Amber presented the draft **Travel and Expense Reimbursement Policy**, updated from the previous ELT guidance. The policy was reduced to key policy issues, and details were remanded to a procedures document attached. The team discussed the definition of travel, and asked Amber to consider changes to section 4.2 regarding when an employee must turn in a travel authorization. Amber will make this adjustment and forward the final policy to John for final approval. The team also asked that Amber have the procedures section on approval match whatever changes made to the policy.

ELT also asked Amber to provide a monthly report on travel, listing who, where, and cost.

Metro Louisville Government

Vince provided two handouts on the Mayor's Leadership team, his cabinet, and the new Metro Council. He provided a brief overview of Deputy mayors, Cabinet members, and Council members. He asked that ELT become familiar with the Council members in their particular district. He provided examples of graphics available for meetings with the Council members showing areas with pressures at or below 40 psi. ELT members are expected to share this information with their staff.

Mayor Abramson is expected to announce that Bud Schardein will be assuming the role of Executive Director of MSD.

Fourth Quarter Performance and ELT Effectiveness Survey

Greg provided three handouts: a schedule of team roles, an accounting of ELT time in the past 3 months, and a listing of items dealt with by ELT in the past quarter.

The team discussed the topics handled by ELT over the last quarter, and questioned if it is addressing the proper items. The team recognized the need for improved communication, and the role the ELT has in providing this communication.

Steve will lead the team for the next quarter, and Billy volunteered to be TKO.

Nora distributed the Team Effectiveness Survey, which is to be returned to Nora by Wednesday.

OPEN TIME

Karla distributed the CSI results for the 4th Quarter, which indicated a significant drop for the quarter, led by the residential non-service rating for water quality. The possible causes of the drop included the taste and odor event of this year, and the overall national phsysc regarding economy, and the potential for war.

It was noted that the trend towards decreases in ratings wasn't universal in all segments, and that we shouldn't assume the results are driven by external factors.

Karla will get details from this quarter and look for details that might help explain the drop in the CSI for the quarter. She will also ask Bob Hurd if there are any national trends that might explain the drop.

TKO Report – Karla

Good meeting, good discussion, no blocking behavior.

NEXT MEETING TOPICS

The following were discussed in pulling together the next agenda (January 13, 2003).

No meeting January 20.-look for special topic meeting.

Greenbacks...delay until next meeting

OEI survey results

FINS Project Manager from Solbourne

Move regs sub-team to later meeting.

Finish Goals by 4th week January

Steve and Greg will develop the next agenda for next week.

BIN LIST:

ELT needs to define the process for approving Procedures that accompany Policies, similar to the one presented to ELT on Travel January 6, 2003.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes**

ELT Meeting Minutes January 13, 2003

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Laura Douglas, Kate Farrow, Nora Freeman, Tony Gregory, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Johnnie Rice, Karla Teasley, Henry Lindborg and Bill Zierdt (National Institute for Quality Improvement), Walt Pounds and Sue Burman (Solbourne),

***Review Minutes and Agenda**

Minutes from the January 6, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Minutes from the December 16, 2002 ELT meeting were approved at the January 6, 2003 ELT meeting.

OEI Survey Results--Katie Farrow

Katie introduced Dr. Henry Lindborg and Mr. Bill Zierdt (National Institute for Quality Improvement). Katie provided copies of a magazine article written by Dr. Lindborg, the Organizational Effectiveness Index Report, and a copy of Dr. Lindborg's slide presentation to ELT explaining the results of the OEI Survey.

Dr. Lindborg and Mr. Zierdt noted the OEI survey instrument is for "good" companies who are working to get better--it's not for "sick" companies. They both consider LWC a very strong company and noted that most comments received on the survey were not negative--the comments expressed concerns or suggestions.

Recommendations resulting from the survey are:

- Build on strengths
- Pursue opportunities: consistent application of policy (senior management)
cross-functional cooperation (all)
- Interpret results across the organization
- Develop metrics over time (useful measures)

The consultants recommended picking some sub-elements to work on rather than working on the recommendations as a whole.

Results of the survey will be presented to employees in late January through the BSOs and POs and in *NewsLeaks*.

FINS Project Update and Meeting Solbourne PM--Amber Halloran

Amber introduced Walt Pounds and Sue Burman from Solbourne. She provided copies of and discussed the Implementation Roadmap for the FINS project. LWC currently is finishing the Readiness Phase and is working into the Process Design Phase. The "go live" date is scheduled for September 29, 2003. Amber noted that everyone's support is critical to the implementation of the project

ELT Effectiveness Survey Results--Nora Freeman

Nora provided copies of and discussed the 2002 Fourth Quarter ELT Team Effectiveness Survey results. The team average was 4.0, which is consistent with the third quarter 2002 results. These results confirm this is a high functioning team.

Opportunities for improvement would be in Removing/Resolving Barriers, Decision-Making Process, and Dealing with Conflict in Meetings.

Open Time

January 14, 2003 Board Meeting--John Huber

Agenda items for the Board meeting include discussion of the following: completion of the main replacement project in the central business district, issues regarding the clean and line contract, work at Crescent Hill on flocculators and clarifiers, and adding a module for timekeeping and payroll to the FINS project.

Review Bin List--All

The group discussed items for the BIN list.

Agenda for Tuesday, 1/21/03, Meeting (Monday, 1/20/03, is a Holiday)--Steve Hubbs

Steve will e-mail the agenda for the January 21, 2003 ELT meeting. The agenda will focus primarily on finalizing goals for 2003. Review and approval of the attendance policy for 2003 may be included on the January 21 agenda. If not, it will be included in an upcoming ELT meeting.

Steve will review the status of the 2003 goals to date and provide a strawman for the January 21 meeting.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

ELT Meeting Minutes
January 21, 2003

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Bob Miller
Timekeeper: Bill Meeks
Attendees: Steve Hubbs, Bob Miller, Bill Meeks, Karla Teasley, Laura Douglas, Susan Lehmann, John Huber, Greg Heitzman, Nora Freeman, Ellen Mackin, Rhonda Plunkett.

Minutes Approved:

Minutes from the January 13, 2003 ELT meeting were reviewed and approved as submitted. Agenda for this meeting was discussed and approved.

Changes to Attendance Policy: Ellen Mackin distributed a draft Attendance Policy (attached). She noted that the criteria for a Perfect Attendance should be for union and non-exempt employees. She also noted that leave approved under FMLA does not affect eligibility for a perfect attendance bonus. The revised Attendance Policy was approved by ELT.

Changes to Holiday Leave Policy: Ellen Mackin distributed a draft Holiday Leave Policy (attached). She noted that the provision for holiday pay has been clarified to specify requirements for holidays occurring while an employee is in an unpaid status. Bill Meeks and Greg Heitzman extensively discussed paragraph 3.10 regarding official religious holidays to clarify the existing policy language. The revised Holiday Leave Policy was approved by ELT.

Proposed 2003 Diversity Goal Program: Rhonda Plunkett distributed a handout on the Proposed 2003 Diversity Goal Program (attached). She noted that the tables reviewed at the previous meeting were discarded because they did not add to the clarity or fairness of the goal. She also noted that the target percentage established for an underutilized group will constitute a 3 on a 5-point scale. Rhonda also distributed a handout on the 2003 LWC Hiring Goals. She noted items marked with a question mark, indicating job groups less than one percent under utilized. The ELT decided to use a target of 15% over minority availability. The ELT also chose to use a strict test for underutilization by a straight comparison of current LWC statistics versus the LWC target. The ELT adopted the 2003 Diversity Goals as presented.

Proposed 2003 MBE/WBE Goals: Rhonda Plunkett distributed Third Quarter M/WBE Spending Outcomes YTD. She recommended that the 2003 Goals use the same measurement criteria as in 2002, noting that many of the planned improvements regarding the Evaluated Bid Pilot were under consideration for legal feasibility. The ELT adopted the 2003 MBE/WBE Goals as presented. The ELT also requested that the recommendation to update the Evaluated Bid Pilot be prepared by the end of March for implementation by the end of June.

Review of Draft 2003 President and Vice Presidents' Shared Goals: Nora Freeman distributed a copy of the Draft 2003 Shared Goals (attached). Steve Hubbs distributed a draft 2003 Advanced Treatment Technology Goals. Nora Freeman distributed a copy of an email from Don McKay with a draft 2003 Cost of Risk Goal (attached). The ELT changed the Revenue Goal by rounding the measurement criteria for rating levels of 4 and 5. The ELT changed the Cost of Risk Goal by revising the measurement criteria to reflect Don McKay's recommendations. The Draft 2003 Shared Goals were accepted by the ELT as revised.

Review of Draft 2003 Incentive Plan Goals: Nora Freeman distributed the draft Incentive Plan goals (attached). The lightswitch goal of budget plus \$750,000 was confirmed. Karla Teasley recommended that the Overall Customer Satisfaction Index Goals should be revised to reflect 2002 year end results. Bob Hurd has recommended that Level I should be 835 and that Level II should be 845 (same as 2002). The draft 2003 Incentive Plan Goals were accepted by the ELT as revised.

Review of 2003 Corporate Performance Award: Nora Freeman distributed the draft 2003 Corporate Performance Award. The ELT accepted the draft 2003 Corporate Performance Award as submitted.

Consideration of Financial Information System Implementation as a 2003 Goal: The ELT extensively discussed alternatives for consideration of the FINS Implementation as a 2003 goal. John Huber emphasized the importance of executive commitment to the successful implementation of the project. After careful consideration, the ELT did not include the FINS project in the 2003 Goals.

Open Time Discussions: Greg Heitzman reviewed main break counts and pumpage statistics. Bob Miller reported on unaudited financial results for 2002.

Next Agenda Topics: The bin list was reviewed for agenda topics for the January 27, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

**ELT Meeting Minutes
January 27, 2003**

Roles

Leader: Greg Heitzman for Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Laura Douglas, Nora Freeman, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Minutes from the January 21, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

A follow-up to the January 21 meeting: Susan will follow up with Mike Sturgeon regarding the Attendance Policy approved by ELT to make sure the policy is consistent with the union contract.

Greenbacks and Year-End Financial Report--Amber Halloran

Amber provided copies of and discussed the LWC Financial Highlights for December, 2002.

Sale of water year-to-date revenue is over budget \$2,041,728. Other operating revenue is under budget for 2002 due to lower Miscellaneous Service Revenues.

Amber will follow-up on the following:

1. Prepare a schedule of bonds and the status for Mr. Huber.
2. Work with Kent Horrell to understand the fuel adjustment from LG&E.
3. Analyze Commercial and Industrial usage and assumptions for 2002 Budget.
4. Look at stat code for B. E. Payne Improvement project (stat 2 or 3 in final December status report)
5. Footnote Shepherdsville customers in customer count data.
6. Prepare comparison of part-time employees 2001/2002.

Goals Weighting Discussion--Greg Heitzman/Bob Miller

The group agreed to keep the weightings for 2003 goals the same as they were in 2002:

<u>Goal</u>	<u>Weighting</u>	<u>Weighting to be Entered into PA System</u>
Competencies	40%	40%
Diversity: AA	5%	8%
MBD	5%	8%
Shared Goals	20%	30%
Individual Goals	30%	54%
Total	100%	140%

It should be communicated to employees that we are using the same weightings for 2003 that we used in 2002 and expectations for competency for all non-union employees and for the diversity goal for management (VP,BSO,PO).

Susan will work with HR and do some training on the PA system. She will look for ways to make the system more user friendly. She will get feedback from users regarding opportunities to improve the PA system for potential changes in the PA system for 2004 goals. ELT will discuss weightings for 2004 goals and any changes to the PA during the last quarter of 2003.

Open Time

System P1 2002 Budget Performance--Greg Heitzman

Greg provided copies of and discussed System P1--Managing Water Quality and Production--Fourth Quarter 2002 Operating Performance Results and a memo from Kent Horrell to File regarding Power Costs. These documents provided details on unbudgeted spending in P1, some of which would be eligible for funding by the contingency.

Distribution System Work Volume--January 24-27--Greg Heitzman

Greg provided copies of and discussed a memo from Jim Brammell to Greg regarding Distribution System Work Volume--January 24-27, 2003. It was noted that we need to follow up on the fire hydrant availability information. The Company is currently in Level 1 Emergency for winter response, using extend days to handle the peak workload levels. Staff is evaluating the need to move to Level 2 Emergency, which would shift C2 operations to 12 hour day and night shifts.

Update on Lake in the Woods--Laura Douglas

Laura advised that the judge did not remove the injunction which would allow LWC to shut off water supply to the apartments.

Letter from State Government Contracts Review Committee--Laura Douglas

Laura reported on a letter she received from Bret Yount of the KY House and Senate stating that LWC should submit to the State Government Contracts Review Committee all applications for Personal Services Contracts for the past year. The letter stated that agencies of state government and government entities must ask permission from this committee for Personal Services Contracts. Laura noted LWC has never asked this committee for permission to contract nor has MSD or the City of Louisville. She noted this could be some fall out from the recent bid controversy regarding the B. E. Payne contract. Laura says that LWC's position in this matter will be that we are not required to seek permission from this committee regarding contracts. Laura says no timeframe for response was stated in the letter--she thinks a response within 30 days would be timely.

Review Bin List--All

Review results of President/VP shared goals will be discussed at an upcoming meeting, possibly the February 3 meeting.

Agenda for February 3, 2003 ELT Meeting--Steve Hubbs

Greg will work with Steve on an agenda for the February 3 meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

**Executive Leadership Team
Meeting Minutes
February 3, 2003**

Attendees: Steve Hubbs (Leader), Bob Miller (Recorder) Billy Meeks (Timekeeper), Greg Heitzman, Susan Lehmann, Laura Douglas, John Huber, Karla Teasley, Amber Halloran.

Minutes Reviewed and Approved: The minutes from January 27, 2003 were reviewed and approved. ELT discussed the performance appraisal matrix for 2003.

2002 Cost Reduction Strategy: Amber Halloran distributed a report titled "2002 Proposed Budget Cuts/Expense Reductions" (attached). ELT reviewed the year end results on a core-by-core basis. As of October 2002, ELT anticipated year-end actual O&M expenses of approximately \$800,000 under budget. Actual results were \$315,700 under budget. Key expenditures that resulted in not reaching the target were:

- Performance award payments
- Damage claims
- Bankruptcy and bad debt expense
- Zorn Avenue 48" main break
- PAC for taste and odor control
- Fuel adjustment for pumping power costs

ELT agreed to review 2002 expense items to identify those that are appropriate to charge against the contingency. ELT identified these expense items for 2003 that may affect budget performance:

- Fuel costs for vehicles
- Powdered activated carbon
- Transmission main breaks
- Performance awards
- Bankruptcies and bad debt expense

2002 Goals Review: Nora Freeman distributed Fourth Quarter Results for the Incentive Plan, the Shared President and Vice President Goals, and the Corporate Performance Award. The results for the Incentive Plan Goals resulted in 8.1 out of 10.0 for the Vice Presidents, and 6.075 out of 7.5 for the Business System Owners. The results for the Shared Goals averaged 3.38 out of 5.0 using the computed numbers and averaged 3.6 out of 5.0 using the rounded numbers. The results for the Corporate Performance Award resulted in 70.83 out of 100.00.

Nora Freeman also distributed a schedule for 2003 ELT Goal Reporting (attached).

Open Time Discussions: Greg Heitzman provided a handout of winter emergency status (attached). Breaks are now less than 10 a day, thus we are stepping down off of Level 2 status emergency. There were 190 main breaks during January 2003.

Susan Lehmann provided a handout for ICS/OEI suggestions for follow up by ELT (see attached). ELT agreed with this recommendation. She also noted that LWC will begin recruiting for the BSO-Human Resources position this week.

End

ELT Meeting Minutes February 10, 2003

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Laura Douglas, Janet Fiandaca, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the February 3, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

John had one note regarding rating for the shared goal of Increase Operational Performance. The goal states that if all systems are not recertified by December 31, 2002, 2002 performance rating for this goal will be 1. John plans to waive this since only one system was not recertified, and this system could have recertified, but devoted attention to other priority items. ELT agreed to an overall rating for the Increase Operational Performance goal of 4.

Nora Freeman will change the 2002 performance rating for Increase Operational Performance shared goal to 4.

Policies Posting on Intranet--Laura Douglas

Laura distributed copies of and discussed the LWC Policy Database which shows the current status of all LWC policies. Of the policies not entered into the Intranet, some are in the process of revision/approval, and some need to be formatted for inclusion on the Intranet.

Binders will not be maintained in the future. Each core will decide how it will provide employees access to the policies on the Intranet. CBSOs will communicate this information to BSOs, and this will also be communicated in NewsLeaks.

Janet Fiandaca is the LWC Policy Administrator who will be responsible for maintaining the LWC Policy Database (includes all electronic, computer and hard copies of the policies). Her duties include following up and preparing memorandum to the appropriate System Owner when a policy is up for review; preparing revisions to the old policies upon the System Owner's request; submitting the revised policy to Laura Douglas for review; preparing copies of the revised policies for ELT's review and posting the official copy of the policies on the Intranet. Janet will submit an article in NewsLeaks that will provide employees information on how they can access the Policies via the LWC Intranet.

LWC Budget Contingency--Bob Miller

Bob discussed the tests used to determine if an expense is appropriate for identification as a Contingent expense:

- The expense must be externally-driven.
- The expense must not be controllable by management.
- The expense must be unanticipated.
- The expense must be not appropriate for budgeting.

ELT identified the following items from 2002 that would be eligible for funding from the Contingency:

- | | |
|--|-----------------|
| • Zorn Avenue 48" raw water main break | \$197,000 |
| • Additional power cost due to fuel adjustment | \$150,000 |
| • Carbon for taste and odor treatment | \$140,000 |
| • Additional bankruptcy expense | <u>\$80,000</u> |
| • Total | \$567,000 |

The 2002 Annual Operating Budget included a Contingency of \$565,000.

Board Meeting--John Huber

Agenda items include Income Expense Summary from December, 2002, Ohio River Bridge and Environmental Impact Statement, Payne Plant bids, and discussion of Crescent Hill clarifier and Flocculator improvements.

Open Time

New Compensation Matrix--Susan Lehmann

The new Compensation Matrix was communicated to all nonunion employees on February 7. Market movement is 3%. The rating scale for 2002 performance has changed.

ELT should continue efforts to communicate external elements of our compensation program regarding market movement, CPI information, etc. We should let employees know this is reviewed annually.

ELT Employee Forums--Susan Lehmann

John Anderson is scheduling the forums for 2003 and is seeking input on attendance and format.

ELT agreed to continue with the forums and work on how to make them more dynamic. One possibility is to pick specific topics to focus on and also have an open forum. Topics of discussion will depend on the group being included in the meeting. John noted that interaction between employees is as important as interaction between employees and the Vice Presidents.

Change in Management at the KY Division of Water--Greg Heitzman

Greg reported that Secretary Bickford, who passed away this past year, was replaced by Hank List. Hank List will fill the remainder of Secretary Bickford's term. Jack Wilson, who retired from the Division of Water, is replaced by Jeff Pratt, who reports to Hank List.

Greg says he was told Vicki Ray was relieved of her duties and is being put into another area with the state. He was told all branch managers were relieved of their duties. Greg says there are a lot of changes going on in state government.

Jack Wang will contact Mike Mudd to find out what impact these changes will make. Greg will get current organization charts and more information on the changes from Vince Guenther, and possibly schedule a meeting with Mike Mudd and appropriate key staff at LWC. We'll need to build new relationships.

Security at LWC--Greg Heitzman

Greg provided copies of and discussed a Threat Advisory received from the US EPA Office of Water which provided information on suggested measures under Threat Level Orange. Bob says we have the same drills for Level Orange we do for Level Yellow. We should look at something between Yellow and Orange that we might want to change.

Bob and Greg will follow-up with Don McKay, then ELT will make a decision on whether we should make any changes in our security procedure.

Greg will contact the Division of Water and discuss emergency plans regarding terrorism.

Bill Meeks will continue to communicate to employees regarding status of security.

WEF Conference--Bob Miller

Bob reported that he and Rhonda Plunkett will make a presentation at the WEF Conference on Diversity at LWC.

Review Bin List--All

The group discussed items for the Bin List and items for the February 17 ELT agenda.

Agenda for February 17, ELT Meeting--Steve Hubbs

Steve will e-mail the agenda for the February 17, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes February 17, 2003

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Bob Miller for Bill Meeks
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bob Miller, Anna Norris, Karla Teasley

***Review Minutes and Agenda**

Minutes from the February 10, 2003 ELT meeting were approved with one change: Change the third paragraph under "Policies Posting on Intranet--Laura Douglas" to read as follows:

Janet Fiandaca is the LWC Policy Administrator who will be responsible for maintaining the LWC Policy Database (includes all electronic, computer, and hard copies of the policies). Her duties include following up and preparing memorandum to the appropriate System Owner when a policy is up for review, preparing revisions to the old policies upon the System Owner's request, submitting the revised policy to Laura Douglas for review, preparing copies of the revised policies for ELT's review, and posting the official copy of the policies on the Intranet. Janet will submit an article in **NewsLeaks** within the next two weeks which will provide employees information on how they can access the policies via the LWC Intranet.

Agenda for this meeting was discussed and approved.

Greenback Reports--Amber Halloran

Amber provided copies of and discussed the LWC 2002 Net Income Unaudited dated February 17, 2003; 2003 Revenue budget; and LWC Financial Highlights for January, 2003.

Water revenue through January, 2003 was \$1.5 million higher than last year and \$528,000 higher than budget. Other Operating Revenue was lower than last year by \$74,000 and lower than budget by \$29,000. The O&M expense in January, 2003 was \$574,000 higher than same period last year, and higher than budget by \$316,000.

After discussion of the above-listed documents, follow-up was requested as follows:

- Prepare income statement for Goshen (Amber).
- Review Lake in the Woods/South Hill Apartment accrual monthly (Amber).
- Confirm with Billing any changes to revenue on cycle changes (Anna).
- Add actual revenue to charts for tracking (Anna).
- Develop new reporting for Sale of Water (Group).
- Review with plant increased water usage at B. E. Payne Plant (Amber/Kevin).
- Make a decision regarding whether to accrue bonus pay-outs for the Executive Incentive Plan and the LWC Corporate Performance Award in 2002 and advise ELT (Bob, Amber, Audit Committee).
- John Huber says we should ask ourselves if the Light Switch Goal for the Executive Incentive Plan Goals is okay. John will discuss this with the Board's Compensation Committee.

NLP III Status Update--Focus on SPT Items--Steve Hubbs/ELT Sub-Team Leaders

Steve Hubbs provided copies of and discussed the Next Level Plan Update--Inclusive Outline, Revised December 16, 2002.

Greg says the System Certification Team, the only team with a deliverable due by the end of Q1, is on target.

Karla Teasley reported that the Corporate, System and Process Measures Team will evaluate strategic measures and look for gaps when compared to other utilities. They will make recommendations to the SPT regarding the family of strategic measures.

Susan Lehmann will participate on the Organizational Structure Team, the Learning Organization/Training and Development Team, and possibly other teams.

Susan asked to be copied in on all team activity reports regarding NLP III.

The NLP III Inclusive Outline will be updated quarterly.

Open Time

Portland, Oregon Regionalization--Bob Miller

Bob says Portland Oregon is in the final stages of regionalization. They'll put together "lessons learned" and will share this with us.

Bluegrass Water Consortium--Greg Heitzman

Jim Smith is attending a meeting of this group and will provide a report. LWC's position on this is that we are a third party observer and are not involved in the consortium. We are not taking a position on this.

This item will be added to the BIN list.

Terrorism--Code Orange--Bob Miller

Bob noted we are adding additional roving security to go from site to site.

ELT agreed we should have extensive drilling for employees on contamination of the distribution system and telephone customer service (including Radio Room personnel). Bob will talk to Don McKay about terrorism and drills.

It was noted that all CBSOs, BSOs, and POs should have their employees' home telephone numbers.

Winter Emergency--Greg Heitzman

Greg provided copies of and discussed several graphs and charts which showed activity in the areas listed below during the winter emergency period (January 26, 2003 to February 3, 2003).

- | | |
|---------------------------------------|----------------------------------|
| - Main Breaks per Day | - Emergency Turn Off Requests |
| - Main Breaks and Joint Leaks per Day | - No Water Complaints |
| - Fire Hydrants Out of Service | - Total Hours Worked |
| - Fire Hydrants Serviced | - Total Units Worked and Backlog |

Oldham County Water District--Steve Hubbs

Tom Davis (Chair of the Oldham County Water Supply Advisory Committee) approached LWC regarding information on nitrate. Rengao Song referred them to Dr Minear at U. of Illinois as an expert on nitrate. This involves OCWD's right to deny development in the wellhead protection area.

Review Bin List--All

The group discussed items on the BIN List and items for the February 24 ELT meeting.

Agenda for February 24, 2003 ELT Meeting--Steve Hubbs

Steve will e-mail the agenda for the February 24, 2003 ELT meeting.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

ELT Meeting Minutes
February 24, 2003
(Revised)

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Bob Miller
Attendees: Barbara Crow, Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the February 17, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Follow-Up on Internal Control Questionnaire after ICS & OEI Results--R. LeMaster

Roger provided copies of and the group discussed a document titled "Internal Control Questionnaire Highlights, Executive Leadership Team, February 24, 2003."

Greg Heitzman requested that Scott and Roger "dissect" the responses under Opportunities for Improvement into the percentages of responses which were 5, 4, 3, 2, and 1 in addition to the average of the scores provided. This might allow us to look at the data in a different way and would give us a higher indication of where we should look. Then we can come back and focus on these four areas—we might prioritize in importance regarding which issues to deal with.

John Huber says we must address the gaps in Section 1--Control Environment, quickly.

We need to put together tools to deal with the issues. Susan Lehmann says two focus groups have been held and we can schedule more if necessary.

Each NLP III team leader can look at Control Environment and Opportunities for Improvement to see if there are issues they can address in their work.

Discussion on this topic will continue up next week's ELT meeting.

LWC 150th Anniversary Celebration--B. Crow

Barbara Crow provided copies of and discussed the outline to ELT regarding LWC 150th Anniversary Celebration.

This will be a year-long event in 2004 and would enhance typical events such as National Drinking Water Week. We also would do something special on the exact date in 1854 when LWC was chartered.

Barbara will add elected officials to the list of Possible Partners in Projects.

All the actual planning must be done in 2003, but Barbara will look at the budget again to see what can be funded in 2003 and what can be funded in 2004 and report back to ELT.

ELT members should forward any ideas they have regarding the celebration to Barbara.

Open Time

Program with Dental Society, "Smile Kentucky"--Barbara Crow

Barbara reported on the Dental Society Outreach Program. LWC participated in the program, under which volunteer dentists went to schools, picked 300 of the worst dental cases, and treated these cases.

The program culminated in a dinner last week. The Dental Society noted how impressed it was with the work LWC staff did on this project.

Board of Water Works Compensation Committee Meeting--John Huber

John Huber reported on the meeting of the Compensation Committee last week. The Committee was presented with six sets of data: 2002 performance on the Executive Incentive Plan Award, 2002 performance on Employee Performance Award, 2002 performance on President/Vice Presidents Shared Goals, 2003 Employee Performance Award Goals, 2003 Executive Incentive Plan Award Goals, and 2003 President/Vice President Shared Goals.

The Committee accepted the 2003 Executive Incentive Plan Goals, the 2003 President/Vice President Shared Goals, and the 2003 Employee Performance Award Goals as presented.

The Committee concurred on the 2002 Employee Performance Award as presented in the measures. For the 2002 Executive Incentive Plan Goals, they determined we met the Light Switch Goal.

One topic of discussion was whether the Employee Performance Award and Executive Incentive Award should be accrued in the year earned rather than in the year the award is paid. Based on the conversation, staff looked at accounting rules and the basis on how these goals were created. We recommended that the Performance Award be accrued in the year earned (2002). For the Executive Incentive Award, payment is made entirely at the Board's discretion--the award is paid during the year it is approved and the payment of the award will not be accrued.

The Compensation Committee will recommend to the full Board that we make award for the Employee Performance Award and accrue in 2002, and that we make award for the Executive Incentive Plan Award and accrue in 2003.

"Cost of Being Poor"--John Huber

John Huber noted there is a program under way titled "Cost of Being Poor" which will work on solutions to the poor often ending up paying more for goods and services because they have a more difficult time obtaining the goods and services. With the economy down and social welfare changes being made, we are seeing more and more of this problem. An example is LWC's turn-on fee of \$20 in addition to late charges and bad check charge if applicable. John wants everyone to be aware of this and keep rates as affordable as possible. We also must keep our adjustment policy liberal.

"Pick the Best Water Filter"--Laura Douglas

Laura noted there will be a series on the local TV news on how to "pick the best water filter."

Karla will ask Barbara Crow or Kelley Dearing-Smith to check on this.

Lake in the Woods--Laura Douglas

Laura reported that LG&E has turned off electricity at the apartment complex. Most of the tenants are moving out. This creates a possibility of water pipes freezing. We contacted the lawyers for the receiver telling them we were enjoined and could not turn the water off.

ELT members noted we might recommend to the receiver that valves to vacant apartments be turned off.

Review Bin List--All

Items for Bin List and agenda for March 3, 2003 meeting were discussed.

One item for discuss on March 3 is compensation raises for 2003 (staying within budget).

Agenda for March 3, 2003 ELT Meeting--Steve Hubbs

Steve will e-mail the agenda for the March 3, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
March 3, 2003 (revised)

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bill Meeks
Timekeeper: Karla Teasley
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Don McKay, Bob Miller, Rhonda Plunkett, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the February 24, 2003 ELT meeting were approved with the following change: Under Open Time, "Board of Water Works Compensation Committee Meeting--John Huber," change the last sentence in the fourth paragraph to read: "For the Executive Incentive Award, payment is made entirely at the Board's discretion--the award is paid during the year it is approved and payment of the award will not be accrued."

Agenda for this meeting was discussed and approved.

Follow-Up on Internal Control Questionnaire Process--Susan Lehmann

The purpose of today's discussion on Internal Control Questionnaire process is to develop an action plan for going forward.

ELT members agreed on three key items to cover during the next three months: (1) Question 24.6--Policies and procedures are applied consistently and fairly; (2) Question 22.9--LWC systems cooperate well with one another (communication); and (3) Question 20.3--LWC removes barriers that get in the way of progress. (Regarding barriers, we should determine the difference between internal controls, which are fully appropriate, and actual barriers.)

ELT appointed a subteam to work with Roger to create a list of approaches to work on the three items. The subteam will consist of Susan, Greg, Steve, Roger, and John if John is available, and will report to ELT by mid April. They will review and link the data and identify items that belong to ELT and items that belong to BSOs. They will also identify longer range items and items to integrate into NLP III.

Discussion on Timing of Expenditures and Profits--Bob Miller, Amber Halloran

Amber provided copies of and discussed "Principles of Accounting" and "LWC audit Approach." Discussion included how journal entries are recorded and issues involving timing of entries. The auditors look at all payments of "unrecorded liability." We must match this to revenues in the month services are provided. They also look closely at records retention. Amber noted LWC is governed by principles of accounting. One principle is matching bonuses in the year earned.

Regulations Sub-Team Update--Greg Heitzman/Don McKay

Greg discussed "Regulatory Compliance for Environment, Health, Safety and Water Quality Process Empowerment and Accountability Matrix, November 14, 2003 Version" and "LWC Proposed Regulatory Compliance Model Revised 2/27/03." Don noted we are looking at a process that would consist of three people: the PO, one assisting staff member, and Mike Holt.

Don will make the following additions/changes:

- Under Item 1 of the Regulatory Compliance Model, add one bullet: Notification (per Ginsburg Model) to management of impacted area (CBS and BSO).
- Under the first bullet of Item 3 of the Regulatory Compliance Model, Don will add Ralph McCord to represent Karla's CBS.
- Under Sections 1 and 2 of the Empowerment and Accountability Matrix, Don will include the role of auditor in Sections 1 and 2--he will footnote Roger's role in auditing.
- Under Item 3 of the Matrix, Don will make a separate item for NOV's.

John noted LWC's Public Information area needs to be involved in the communications piece of this.

Jack Wang should establish a relationship with the enforcement people at the Division of Water and Drinking Water Branch. Jack can check with MSD on who they are communicating with.

The ELT agreed this model will be exclusive to Environment, Health, Safety, and Water Quality, although some areas may overlap such as HR, Finance, etc.

Bob, Don and Greg will meet to make revisions and recommendation for adoption. Greg will bring back to ELT in one month.

MBD Program Benchmarking--Rhonda Plunkett

Rhonda provided copies of and discussed the "Comparison of Small, Disadvantaged, Minority and Women Owned Business Utilization Programs." There are two types of programs: (1) M/W/HBE, and (2) DBE. ELT needs a recommendation by the end of March and implementation by the end of the second quarter.

We will choose city's model or a DBE model. Laura noted it is good to have a program consistent with the City's program.

Greg noted we should define what constitutes a good faith effort. This will drive the amount of resources needed to determine if a good faith effort was provided. Laura noted we need to get more information on the City's performance with this program. How does good faith effort translate to spending. The City's good faith effort is not tied to cost.

Follow-up items: (1) ELT members will provide input to Rhonda asap; (2) Rhonda will bring a recommendation to ELT on March 24; (3) include on ELT agenda March 24 following SPT retreat--identify key measures and provide general policy we will follow.

Open Time

Vulnerability Assessment Update--Don McKay

Don McKay gave an update on vulnerability assessment. The team is on schedule for the 12 items in the assessment--they are working on Item 9 now. Don is pleased with how interested the group is in doing this work, and he thinks the work product will be good.

FINS Project--Bob Miller

Bob encouraged ELT members to read the article on the front page of NewsLeaks this week regarding implementation of FINS.

Client Representation Letter--Bob Miller

Bob briefly discussed the Client Representation Letter LWC sent to the external auditors.

Review Bin List--All

The group discussed items for the BIN List.

Agenda for March 10, 2003 ELT Meeting--Steve Hubbs

Steve will e-mail the agenda for the March 10, 2003 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>
--

**Executive Leadership Team
Meeting Minutes
March 10, 2003**

Attendees: Steve Hubbs (Leader), Bob Miller (Recorder), Bill Meeks (TKO), John Huber, Karla Teasley, Laura Douglas, Susan Lehmann, Greg Heitzman, Amber Halloran, Sue Purdy, Nora Freeman, Jonathan Berkley, Kate Farrow, Jim Smith

Meeting Minutes: The minutes from March 3, 2003, were reviewed. The ELT removed the action item under "Discussion on Timing of Expenditures and Profits." The minutes were approved as changed.

Greenbacks Report: Amber Halloran first reviewed follow up items from the previous month's Greenbacks Report. Each of those matters has been successfully resolved. Amber then reviewed the financial highlights for February 2003.

- Sale of water revenue is over budget by \$729,352.
- Operations and Maintenance expense is over budget by \$261,860.
- Net income is over budget by \$82,993.
- Additional winter-related cleanup expenses are expected to show up in March 2003.
- The Budget Process will follow up on certain expense items.

No further action is required.

Organizational Effectiveness Index Focus Group Update: Kate Farrow distributed "2002 Organizational Effectiveness Index: Focus Group Findings" and "2002 Organizational Effectiveness Index: Suggested Strategies for ELT." Kate reviewed these suggested strategies:

- Create incentives for systems to cooperate with one another.
- Consider a comprehensive analysis of business systems for proper alignment.
- Promote resource sharing across systems and processes.
- Clarify the entire policy process
- Address and clarify hierarchical aspects of organization structures.

The ELT agreed to review this matter further at a later ELT meeting.

Growth Policy for New Growth: Jim Smith displayed a map showing areas with potentially low service pressure. The KYDOW requires a minimum of 30 PSI. Jim discussed capital

Executive Leadership Team
Meeting Minutes
March 10, 2003
Page 2

improvements needed to improve these areas to 50 PSI over the next three years. Planned actions are:

- Perform revamp of plan review process.
- Provide low pressure information to potential customers
- Update PSI construction design standard.

Board of Water Works Update: John Huber emphasized the need to streamline presentations at the Board of Water Works meeting tomorrow.

ELT Meeting Minutes
March 24, 2003
CORRECTED

Roles

Leader: Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Bill Meeks
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the March 10, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

MBD Team Recommendation--Rhonda Plunkett

This item was deferred to the 3/31/03 ELT meeting. Laura and her staff have met with the team and will review the recommendation before it is brought to ELT on March 31.

Bob Miller reminded ELT that the MBD Team will discuss three alternatives and present their recommendation from the three alternatives. Their recommendation may be a blended approach from the three alternatives. There are three things we must keep in mind: (1) We do not want to adopt anything our legal team cannot endorse. (2) The solution has to be a practical solution, good public policy/practice, and it would be good to have seen it work successfully elsewhere. (3) It must successfully help us achieve our goals.

Review Recommendations from OEI Survey--Hubbs/ELT

This item will be discussed at the April 14 ELT meeting when ELT will evaluate the recommendations and decide what actions to take on the following issues:

Unequally applied policies
Communications
Cooperation between processes, systems, and cores

Review ELT BIN List from SPT Retreat--Steve Hubbs

Steve provided copies of and the group discussed the BIN List from the SP retreat. The BIN List consisted of the following items:

- **Concept of ownership/accountability using PO/BSO/CBSO titles. Address in NLP II Update work.**

This relates to empowerment and how we define roles and set expectations for the roles. We also want to reduce barriers and perceptions created by titles.

This task will be assigned to a appropriate NLP II update subteams as follows: organizational issues to the "Organizational Structure and QMS subteams (**Hubbs**); empowerment issues to the "Empowerment and Accountability subteam (**Douglas**); and training issues to the "Learning Organization / Training and Development" subteam (**Huber**)

We also could follow-up with more focus groups to identify issues and intended results regarding organizational issues such as employee development, empowerment, and organization.

- **Near strengths--risk management concepts adoptive of COSO Model of Internal Controls, level of cooperation from operating areas for business process re-engineering, the work Nora's group is doing providing assistance on change management capabilities.**

No action required.

- **Project and monitor rate differential for acquired systems when increasing LWC rates annually.**

This falls in the areas of Financial Planning and Karla Teasley/Jim Smith.

- **Performance management process. *The group decided this is an ELT item.***

There are a number of issues with the current process. HR is working to assemble a list of issues and recommendations for improvements which should be ready in early May.

Laura noted that employees think the Performance Management system is tied to the budget. These are two distinct processes but they are linked. We need a tool to rectify when Performance Managements do not match the budget so it does not appear we are inappropriately appraising employees to meet the budget.

ELT members should provide Susan input on any issues they see with the Performance Management system.

Susan will circulate articles and information on Performance Management systems to ELT members.

This item will be discussed at ELT in early to mid-May.

Open Time

APWA Rodeo--Karla Teasley

Steve Cooper is looking for people who are interested in participating in the APWA Rodeo in May. ELT members should contact Karla or Steve for details within the next couple of weeks if interested in participating.

Article in NewsLeaks re FINS Implementation "LWC's Readiness for Change"--Bob Miller

Johnnie Rice conducted a survey to assess employees' state of readiness for change. Bob says communication, training and leadership commitment were some of the key issues noted in the survey results and most of the suggestions or issues identified by the survey have already been addressed.

Other Issues re Implementation of FINS--Bob Miller

Bob will bring to ELT issues which could require ELT and possibly Board approval. One example is the refunding contracts process. FINS is scheduled to go live in Sept.

Team Effectiveness Survey--Steve Hubbs

Steve handled out Team Effectiveness Survey forms and requested that ELT members complete and return the forms to Nora Freeman by March 26, 2003.

Review BIN List--All

BIN List items and agenda items for upcoming ELT meetings were discussed.

Agenda for March 31, 2003 ELT Meeting--Steve Hubbs

Steve will e-mail the agenda for the March 31, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes March 31, 2003

Roles

Leader: Bill Meeks for Steve Hubbs
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Steve Cooper (for Karla Teasley), Laura Douglas, Greg Heitzman, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Rhonda Plunkett

***Review Minutes and Agenda--Bill Meeks**

Minutes from the March 24, 2003 ELT meeting were approved with the following changes:

- Under Roles: Timekeeper was Bill Meeks. Scribe was Bob Miller.
- Under "Review ELT BIN List from SPT Retreat," third bullet, all references to "Performance Appraisal" or "PA" should be changed to "Performance Management."

Agenda for this meeting was discussed and approved.

MBD Team Recommendation--Rhonda Plunkett

Rhonda provided copies of and discussed the LWC MBD Team Recommendation for Evaluated Bid Pilot Replacement, and the Invitation for Bids Policy for Louisville/Jefferson County Metro Government.

If LWC adopts the City's policy, we will establish a Implementation Team to adapt the City's plan for use at LWC and do a pilot using a specific group of projects to see how it works.

Bob Miller wants input from ELT members on three concerns/suggestions:

- Bid says advertise 14 days before bid opening. Will bidders need more time?
- Should we put Invitations to Bid on the Internet?
- Should we post bid results on the Internet?

ELT agreed to adopt 15/5 percent for M/WBE program goals, the same as the City's program goals.

Rhonda's recommendation included hiring one FTE. In the coming three months, Rhonda's team will provide more details on the proposed role to see if we need the FTE or if this can be integrated into other roles at LWC.

Rhonda will report to ELT at the end of April and again at the end of May on the status of:

- Bid language changes
- Policy language changes
- Contract orientation
- Job duties for proposed new role

Brainstorm Ideas for Better Inter-System--All

This item will be rescheduled for a meeting when every ELT member is present.

Bob encouraged ELT members to look at methods of communicating such as in the LWC Rewards & Recognition program--look at how we have communicated in the past.

Greg thinks we need a structured way to put issues on the table and ideas for dealing with the issues.

Bill Meeks and Susan Lehmann will get with Katie and Nora to decide what we want from this discussion. They will ID a deliverable and tell us how to get there.

This will be added to the ELT agenda to be discussed within one month.

Structural Discussion--Greg Heitzman

Greg presented a proposal for reorganization of I2 process. ELT members provided their input.

ELT Quarterly Team Effectiveness Survey--Bill Meeks

Bill Meeks provided copies of the ELT Team Effectiveness Survey results for the first quarter, 2003 and ELT Team Effectiveness Results Quarterly Comparison. The results are very consistent with results from prior surveys. The team average was 4.0.

Bill will add to the BIN List discussion on documenting an ELT decision-making process. ELT must decide if there is a need to document a decision-making process, and if so, establish boundaries for decision making versus notifying versus implementing.

Review Bin List—All

The group discussed items for the BIN List and the agenda for April 7, 2003.

Agenda for April 7, 2003 ELT Meeting—Bill Meeks

Steve will e-mail the agenda for the April 7, 2003 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>
--

ELT Meeting Minutes April 7, 2003

Roles

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Anna Norris, Johnnie Rice, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the March 31, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Greenbacks Report--Amber Halloran, Anna Norris

Amber provided copies of and discussed the LWC Financial Highlights for March, 2003 and the 2004 Budget Accelerated Schedule.

Action items as a result of the discussion of financial highlights are:

- Irrigation report:
 - Note that irrigation consumption and revenue is tied to accounts classified as irrigation in E-CIS
 - Note y-axis scale on graph
- Additional analysis on expenses:
 - Fuel--rate/volume analysis
 - Power
 - Materials/supplies
 - Contractual services

ELT approved the 2004 Budget Accelerated Schedule.

FINS Project Update--Bob Miller, Amber Halloran

Bob says the 6-phase FINS project is successfully underway. Phase 2 is due for completion by April 11. The team is very satisfied with Solbourne's implementation methodologies.

The key messages Bob wants to send are:

- (1) The project should be completed on time and at budget.
- (2) It has been successful so far.
- (3) A lot of things will be happening over the next several months that involve changes, some of which will be policy management changes. One example is developer refunding contracts, including bringing recommendations to ELT and then to the Board of Water Works to buy out old contracts and implement a new process. (We must make it attractive to everyone to buy out the old contracts.)

Johnnie Rice encouraged ELT members to share any comments they receive with her, Amber, or Bob.

Board Agenda Review--John Huber

The Annual Board meeting is Tuesday, April 8, followed by the regular monthly Board meeting. Agenda items include a report from the Board's Compensation Committee, the litigation report (in closed session), and discussion of a backhoe bid.

Open Time

LWC Annual Report for 2002--John Huber

John distributed copies of the LWC 2002 Annual Report which has just been received.

Bluegrass Pipeline--Greg Heitzman

Greg reported that the Bluegrass Water Supply Consortium has invited us to an informal discussion regarding a water pipeline and supply from Louisville.

Karla will schedule a meeting with Bob and Greg to discuss if we want to "show up to answer questions" or if we want to prepare a presentation.

Project Budget Sheet Changes--John Huber

John noted he is getting a lot of project budget sheet changes that have been approved by BSOs. We need to set boundary conditions under which BSOs can authorize project budget sheet changes--for dollar/percentage amounts and project scope. The practice has been that BSOs can approve increases of 10% or less. Changes of more than 10% are considered on a case-by-case basis and taken to the Board if appropriate. There is no documentation for this practice.

Bob Miller will look at internal controls and see where the gap or loophole exists.

Karla will schedule a meeting of Bob, Greg, Karla and Laura to decide appropriate boundary conditions. This will be presented to the Board for review at the May Board meeting.

Wholesale Rate Case Study by PSC--John Huber

LWC will be taking a wholesale rate case to the PSC this year. We need to decide what process and outside support we will use in preparing the rate case. The PSC determines whether the rate case is streamline versus full blown depending on the amount of the increase and feedback they get from the customers. LWC's increase is 10%, but we have not decided how we will phase the increase in.

Laura will check into recent wholesale rate cases and what the percentage increases have been.

Karla will check with Jim Smith and Patti Sheehan to set up communications to customers. We want to advise our wholesale customers well in advance of the increase.

Bullitt County Mapping Costs--John Huber

Amber will allocate costs to appropriate accounts.

John will discuss this with Laura.

BSO Positions Filled--Susan Lehmann

Susan will announce later today that the two BSO positions (BSO of SHR and BSO of Diversity) have been filled.

Contingency Fund for Winter-Related Expenses--Bob Miller

Bob reported that at the March, 2003 Board meeting, Greg distributed a letter from Jim Brammell regarding Winter Operations wherein an estimate was presented for winter-related costs over and above budget levels. Total estimated additional cost was \$283,000. Bob is recommending that this estimate be validated by Accounting and Distribution management, and the finalized amount be moved from the Contingency Fund to the C2 budget in April.

There was also discussion on whether this would be a change from how these items were handled in the past.

ELT agreed to validate these costs in Accounting and Distribution. Once the costs are validated, Bob Miller will discuss with John Huber moving from the Contingency Fund to the C2 budget.

Need for Cost Reduction Based on Known and Estimated Unbudgeted Costs--Bob Miller

Bob asked CBSOs to make a list and quantify unbudgeted costs that are \$30,000 or higher, and we will look at where we are in two weeks.

CBSOs should communicate to BSOs that this is coming due to costs beyond our control.

Bob encouraged ELT members to look at their cost reductions from last year and have their BSOs look at unbudgeted expenses.

Review Bin List--All

The group discussed items for the BIN list and items for the April 14, 2003 ELT agenda.

Agenda for April 14, 2003 ELT Meeting--Bill Meeks

Bill will e-mail the agenda for the April 14, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
April 14, 2003

Roles

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Ellen Mackin, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the April 7, 2003 ELT meeting were approved with the following revision:

Under Open Time, Need for Cost Reduction Based on Known and Estimated Unbudgeted Costs, delete first paragraph. Second paragraph should read, "CBSOs should communicate to BSOs that cost reductions may be coming due to costs beyond our control."

Agenda for this meeting was discussed and approved.

Performance Appraisal Update--Ellen Mackin, Susan Lehmann

Ellen provided copies of and discussed the Organizational Summary of Performance Ratings and Annual Increases. There was an increase in rating levels for 2002 performance over 2001 performance--from 0 outstanding ratings for 2001 performance to 5 approved outstanding ratings for 2002 performance. Movement of people absorbed most of the cost for higher ratings.

ELT should discuss how to reflect employee discipline. Some ratings may have taken discipline into account and lowered the performance score and others did not include discipline in the performance rating. Susan will work on a process so that everyone is evaluated the same way.

Ellen will combine New Technology with Operations and the President's Office with HROE on the Organizational Summary and discuss the revised Summary with ELT before sharing with BSOs.

Ellen distributed a list of issues raised in focus groups. ELT members should provide feedback and additional issues to Ellen by Thursday of this week.

Open Time

Death of LWC Employee, Larry Reid, and Attendance at His Funeral--John Huber

ELT agreed to allow POs to deal with this on a case-by-case basis taking into account the employee's relationship to Larry. Hours of absence would be between 11:00 a.m. and 2:00 p.m. The two processes most closely involved are Middletown and the Capital Crew. This would be excused time off--not PTO--and would be charged to the home account.

Karla will discuss this with Steve Cooper and Ralph McCord.

Employees attending the funeral may use company vehicles, but should be encouraged to carpool.

Metro Council Adopted New Ethics Code--John Huber

John noted an article in a recent edition of the newspaper regarding the Metro Council adopting a new ethics code.

Laura will look at this to see if the new code applies to LWC and/or to the Board of Water Works.

We should be thinking about our ethics policy and decide if we want to align ours to the code adopted by the Metro Council.

This item will be added to the BIN List.

Open Records Request--Laura Douglas

We received an Open Records Request regarding our vulnerability assessment. Laura plans to deny the request.

John noted that any request of this type should be referred to Laura.

Bob will ask Don McKay to contact Disaster and Emergency Services to let them know we received this request and to see if they received such a request.

ORSANCO Meeting--John Huber

John reported on the ORSANCO meeting he attended in Cincinnati, OH last week where monitoring of TMDL (Total Maximum Daily Loading) compounds was discussed.

Conversion of End User Access Data Bases--Bob Miller

Bob will send an e-mail on this. There might be a simple solution such as IT loading Access 97 in addition to the 2000 version on a PC.

This will be included in an upcoming ELT agenda

Southfield Apartments, Injunction Preventing Us from Turning off Water Service--Laura Douglas

Laura reported this is back in Judge Clayton's Court today. She says even if we get a favorable opinion from the Judge, we may not want to shut the water off until May 1, since the tenants have been told they must vacate by May 1.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the April 21, 2003 ELT meeting

Agenda for April 21, 2003 ELT Meeting--Bill Meeks

Bill will e-mail the agenda for the April 21, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
April 21, 2003

Roles

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Tony Gregory, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Ellen Mackin, Joan Malone, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the April 14, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Report on NLP Recertification Sub-Team--Greg Heitzman

Greg provided copies of and discussed the Draft 2003-04 Business System Recertification Documentation Checklist. The process for recertification will be a random process unless management intervention is necessary or unless a critical element is involved. Roger will give 30 days notice to each system prior to recertification and will also discuss with the CBSO prior to the recertification. Roger will begin the process in May. BSOs have been briefed on the process.

ELT adopted the checklist with the changes suggested for Recertification:

Under Section 2, Item 4, reword as follows: "Plans and Actions to Address Organizational Effectiveness Index Survey System Summary (Reviewed Annually)."

Under Section 6, add an item: "Validate Internal Customer/Supplier Links with Relationship Charts."

Under Section 3 of the NLP update, an item needs to be added as follows: "Development of Background Information on Quality of Work Life for NLP Document."

Greg will make the changes discussed today and bring the document back to ELT within the next two weeks.

ELT Recognition--Karla Teasley

Karla provided copies of a list of employees involved in the Goshen acquisition for whom she is recommending monetary recognition. She recommended a two-tier approach--one tier for the key team players who were heavily involved in either negotiating the acquisition or who were heavily involved in operation and sampling after the acquisition. The second tier consists of those employee who reprioritized their work and put forth extra effort to get the work done in addition to their regular work.

ELT approved the recognition and gave Karla the discretion to change the list as appropriate.

Karla will present the awards with a letter of appreciation.

Susan Lehmann and ELT will look at ways to recognize groups for which monetary recognition would not be appropriate.

Update/Discussion of IT Plan--Bob Miller, Tony Gregory

Bob provided copies of and Tony discussed the IT Strategic Plan 2004-2006 Executive Summary and the LWC GIS Project and Integration Timeline. Business Continuity/Disaster Recovery under Key Strategies on Page 8 is the newest item in the Plan.

Action items resulting from the discussion are:

- In addition to a business plan, we also need a framework of where we've been.
- We need snapshots of our business partners and how we can use them to our maximum benefit.
- We need further discussion on the security system and its tie-in to SCADA.
- We need to discuss how organizational alignment will support the IT Strategic Plan.
- Look at whether plant maintenance becomes part of work management system scope or if we should maintain that as a separate application for management.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the April 28, 2003 ELT meeting.

Agenda for April 28, 2003 ELT Meeting—Bill Meeks

Bill will e-mail the agenda for the April 28, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes April 28, 2003

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber,
Susan Lehmann, Tom Cushing, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the April 21, 2003 ELT meeting were reviewed and modified regarding the NLP Recertification agenda item (posted in corporate file). The agenda for this meeting was discussed and approved, with open items added on the Kentucky Supreme Court ruling, items from the Dirty Dozen meeting.

Open Time Agenda Items

The **Kentucky Supreme Court** ruling of last week was discussed.

Cell Phone Review

John noted that the topic of **cell phones** was recently highlighted in the Philadelphia press, and that LWC should again review its cell phone use. LWC's use of cell phones needs to be considered in light of the public scrutiny that can be placed on this business tool. ELT agreed to the following review process:

1. System owners are to review the list of those issued LWC cell phones, to assure that those needing phones have them, and considering those that may not need cell phones.
2. A detailed review of the highest 10% to 15% cell phone bills will be conducted by system owners, providing documentation of any exceptions noted by system owners
3. Input from the BSOs will be sought (through the BSO Council) regarding an overall process for cell phone management, with a focus on a process that will sustain reasonable public scrutiny.

M/WBE Program Update

Rhonda presented an update of the M/WBE Team's progress on developing a program for procurement of contracted services, as a drop-in element to an overall program. ELT affirmed the June 30 deadline for a program to replace the previous program.

She also presented a job description for a M/WBE Program Specialist. ELT discussed the alignment of this position within our existing management structure. Minimum qualifications were discussed, in light of what support would be available to this position within the system where this position is aligned.

ELT suggested alignment of this position be considered by the CBSOs (Bob, Greg, and Susan) of the impacted processes (purchasing, infrastructure support, and diversity).

Open Time Item: Waterworks Management Workshop

Greg distributed copies of the questions/answers from the workshop. Denver and Chicago have water quality/safety policies and provided copies. Security items were discussed, with consistency noted between cities. Cincinnati and Kansas City indicated interest in streambed research. Nora is compiling information on benchmarking for key corporate measures for presentation in Chicago. Remote water quality monitors were discussed in the context of security and quality control.

Open Time Item: Dress Code Policy

Susan suggested that the dress code policy be amended to allow Capri pants. ELT agreed to this change in the Policy.

Review Bin List—All

Add an agenda item to the BIN list for periodic review of organizational alignment, noting that alignment changes have been made in the past that should be holistically considered. (To be included in the NLP update.)

The group discussed items for the BIN List and the agenda for the May 4, 2003 ELT meeting.

Agenda for May 5, 2003 ELT Meeting—Bill Meeks

Karla will e-mail the agenda for the May 5, 2003 ELT meeting. Items to be considered for the May 5 meeting include:

1. First quarter ELT Goals review.
2. Empowerment pilot or Performance Management update
3. New-Hire update

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
May 5, 2003**

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Nora Freeman, Greg Heitzman, Steve Hubbs, Susan Lehmann, Joan Malone, Bob Miller, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the April 28, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Quarterly Review of ELT Goals--Nora Freeman

Nora provided copies of and discussed the 2003 first quarter performance results for the Executive Incentive Award Goals (the Light Switch Goal was not met), The President and VP Shared Goals, the Corporate Performance Award Goals, and the Corporate Diversity Goals.

Under Goal III-E of the Executive Incentive Award Goals, Nora will follow with Jack Wang regarding information related to the measurement cycle being monthly or annual average. For goal purposes, it should be noted that we did not meet this goal in the first quarter.

Under Goal V of the Executive Incentive Award Goals, Nora will change "partiers" to "parties."

Under Corporate Performance Award Goals, Marianne will get an article out in NewsLeaks next week regarding the results for the first quarter.

Under Corporate Diversity Goals, Nora will make corrections and changes as discussed. Nora will continue to include the Diversity Report with the Hiring Goal Results for each quarter and follow up with M/WBE purchases when available for first quarter.

Things to focus on as a result of the first quarter performance:

- Look at cost reduction
- Look at budget overrun
- Look at safety--get something in NewsLeaks and encourage BSOs to look at safety goals (vehicular accidents)

Performance Management--Susan Lehmann, Ellen Mackin

This item will be discussed at a future ELT meeting.

Open Time

Low Water Pressure at Churchill Downs, May 2--Greg Heitzman

Greg report that Churchill Downs lost water pressure for a several hours on May 2 (Oaks Day) at about 6:00 p.m. There was no water in the corporate suite area and low pressure in the infield due to an internal problem with their booster pumps. Chlorine, turbidity, and toxicity tests checked out okay. There was no contamination present, and no boil water advisory was issued.

To help resolve the situation, LWC opened the bypasses on meters on the Central Avenue and Longfield sides of the Downs. We will close the bypasses today.

We will make adjustments before Derby of 2004. Two to three weeks before the Derby, we will pull strainers on master meters. The Longfield Avenue turbine meter will be rebuilt. We will look at on-line water quality and pressure capabilities at Churchill Downs for the future. Churchill Downs maintenance will be advised it appears their pump system may be slightly undersized to handle 81 suites.

Dress Code--Susan Lehmann

ELT agreed to revise the Dress Code to state that capri pants can be worn on Fridays only. This will be communicated to employees through NewsLeaks and through an e-mail.

Operator Issues--Greg Heitzman

Greg discussed four operator vacancies at the plant. Jack and Greg will work with Bill Meeks, John Anderson, Kathy Schroeder, and Rhonda Plunkett on short-term and long-term solutions.

RBF Work--Steve Hubbs

Steve presented to the group results to date of modeling "plugging" on RBF. His work indicates that plugging follows a predictable pattern, and future work will focus on better defining the long-term yield from the demonstration well.

Review Bin List--All

The group discussed items for the BIN List and items for the May 12 agenda.

Agenda for May 12, 2003 ELT Meeting--Greg Heitzman

Greg will work with Bill on the agenda for the May 12, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
May 12, 2003
(revised)

Roles

Leader: Greg Heitzman
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Nora Freeman, Amber Halloran, Greg Heitzman, Steve Hubbs, Susan Lehmann, Joan Malone, Bob Miller, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Minutes from the May 5, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Performance Management--Susan Lehmann, Nora Freeman

Susan provided copies of and discussed a matrix describing performance appraisal and performance management. Performance appraisal is just one element of performance management.

Susan also provided copies of an article titled "Performance Management: Not Just an Annual Appraisal" written by the Performance Management staff of Development Dimensions International.

Susan will share information with ELT in two weeks regarding LWC's performance appraisal system.

Greenbacks Report--Amber Halloran, Sue Purdy

Amber provided copies of and the group discussed the LWC Financial Highlights for April, 2003.

Amber will follow-up on these action items:

- Check on Cardinal Hill and Whipps Mill repairs to determine if they have been expensed YTD.
- Provide detailed analysis complete by May 23 of variances in Materials and Supplies, Contractual Services, and Transportation.

Cost Reduction Strategies--Amber Halloran

The group discussed the \$700,000 budget variance to date.

CBSOs will report to BSOs that based on our understanding of where the costs are now, we must have a \$700,000 reduction company-wide. CBSOs and BSOs should identify by core the best estimate for variances for the year and provide an explanation as to why we have the variances. We should identify at system levels where we can cut costs--attrition/vacancies, contractual services, discretionary, basics (cell-phone use, business lunches, etc.). We should look at our successes in budget cuts from last year and replicate that.

Amber will:

- Categorize year-to-date variance of \$700,000 in the following categories:
 - Attributable to increased water sales
 - Winter emergency
 - Other variances

- Timing
- Add up forecast amounts from all systems synoptic plan reports.
- Pull out 2002 budget reduction sheets. Distribute final for 2002 as a reference.
- Prepare full-year expense forecasts for the following categories:
 - Depreciation
 - Other interest income
 - Gain/loss on equipment
 - Taxes (free water)

CBSOs, BSOs, and Amber should have the above information and be prepared to discuss it at ELT in two weeks.

Board Meeting Summary--John Huber

Agenda items for the May 13, 2003 Board meeting include backhoe bids, EPA risk assessment results (verbal report in closed session), and a report from the Board's Public Information/Customer Satisfaction Committee.

Open Time

Bluegrass Water Consortium--Bob Miller

Bob discussed a letter from Vernon Azevedo, General Manager of Winchester, KY Municipal Utilities, regarding the Bluegrass Water Supply Consortium

Review Bin List--All

The group discussed items for the BIN List and the May 19, 2003 agenda.

Agenda for May 19, 2003 ELT Meeting--Bill Meeks

Bill will e-mail the agenda for the May 19, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
May 19, 2003

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Tom Cushing, Greg Heitzman, Steve Hubbs, Susan Lehmann, Roger LeMaster, Don McKay, Joan Malone, Bob Miller, Scott Muhlenbeck, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the May 12, 2003 ELT meeting were approved with the following change: under Performance Management discussion, change the last paragraph to read, "Susan will share information with ELT in two weeks regarding LWC's performance appraisal system."

Agenda for this meeting was discussed and approved.

Corporate Level Risk Assessment--Don McKay

Don McKay provided a list titled Top Risks Identified by LWC Systems.

The group decided that due to time constraints, discussion of this topic will be deferred to an upcoming ELT meeting (within one month) when a minimum of one hour can be devoted to discussion.

Don will provide a revised list of top risks prior to the ELT meeting when this will be discussed.

Update on Bluegrass Water Consortium--Greg Heitzman, Karla Teasley

Greg and Karla reported on a meeting of the Technical Advisory Committee of the Bluegrass Water Consortium they attended this past week. At this meeting, Greg and Karla answered questions, and Greg gave an overview of general information about the Louisville Water Company including the Company's capabilities to provide water to Central Kentucky.

Jim Smith is our primary contact with the Bluegrass Water Consortium.

Jim will send a follow-up letter. The Bluegrass Water Consortium will let us know when they want a more detailed presentation--possibly within the next month or two.

Open Time

Fund for the Arts--Susan Lehmann

Susan reported that Barbara Crow made a request regarding Fund for the Arts for a "jeans day" other than a Friday, wherein employees can wear jeans if they make a contribution to Fund for the Arts.

Susan will discuss this further with Barbara, due to the current status of LWC's Dress Code Policy.

Indianapolis Water Company--Steve Hubbs

Steve Hubbs reported on his visit to the Indianapolis Water Company last Friday to discuss the groundwater supply there.

Budget Reductions--Bob Miller

Bob asked the CBSOs to get their proposed budget reductions to Amber Halloran by Thursday of this week. This will be discussed at the May 27 ELT meeting.

Review Bin List—All

The group discussed items for the BIN List and the May 27 agenda.

Agenda for May 27, 2003 ELT Meeting—Karla Teasley

Karla or Bill will e-mail the agenda for the May 27 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
May 27, 2003- Revised**

Roles

Leader: Billy Meeks
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Greg Heitzman, John Huber, Steve Hubbs, Susan Lehmann, Bob Miller, Karla Teasley, Ellen Mackin, Nora Freeman, Kathy Shroeder, Amber Halloran, Sue Purdy

***Review Minutes and Agenda**

Minutes from the May 17, 2003 ELT meeting were approved. Susan requested a few minutes of open time in the agenda; otherwise the agenda was approved as proposed.

Performance Appraisal Changes

Susan provided a handout of Performance Management Best Practices and provided a system for Performance Partnership in 2004. ELT discussed the proposal, and agreed to provide feedback to Susan within the next two weeks.

Budget Reduction Strategies

Amber provided a summary of expenses, with focus on Materials/Supplies, Contractual Services, and Transportation. We are currently about \$700,000 over budget, \$401,000 of which is Materials and Supplies, \$115,000 in Contracted Services, and \$90,000 in Transportation (total \$606,000).

The forecast provided by BSOs indicates that we will be approximately \$837,000 over budget, with the \$130,000 of performance awards from 2002 included in this amount. CBSOs will follow up with BSOs on the proposed budget changes. Anyone having concerns with the proposed cuts should discuss this with the appropriate CBSO. ELT will schedule this topic as an item for the June 2 ELT meeting.

Open Time

2003 Customer Satisfaction Survey. Susan asked that the VPs and BSOs provide to Kate Farrow their list of primary suppliers and customers. This is due June 6.

Review Bin List—All

The group discussed items for the BIN List and the June 2 agenda. Billy noted that the BIN list was getting long, and that we may need to consider an additional ELT meeting if the list continues to grow.

Agenda for June 2, 2003 ELT Meeting—Billy will finalize the June 2 Agenda

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

**ELT Meeting Minutes
June 2, 2003**

Roles

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Susan Lehmann
Attendees: Laura Douglas, Kate Farrow, Bonnie Gimbel, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Roger LeMaster, Don McKay, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Sue Purdy, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the May 27, 2003 ELT meeting were approved with the following change: Add John Huber and Laura Douglas to list of attendees.

Agenda for this meeting was discussed and approved.

Corporate Level Risk Assessment--Don McKay, Roger LeMaster

The group brainstormed for a list of corporate level risks to LWC. Roger LeMaster has the list of risks.

Don McKay will consolidate the risks listed. Bill Meeks will work with Don to set up two groups from members of ELT to do a detailed analysis of the consolidated list and rank the risks using criteria in the LWC Risk Assessment Data Worksheet.

The revised list of risks will be discussed by ELT in July.

Budget Parameters for 2004--Amber Halloran, Sue Purdy

Amber provided copies of and discussed the 2004 Estimated Change in Sources and Uses of Revenue.

ELT set the following 2004 Budget boundary conditions which should be provided to the BSOs:

- Use 2.5% without accounting changes (use "budget to budget")
- Leave rate increase at 3.5%
- Reduce infrastructure replacement reserve by @\$275,000 and continue to look at
- Any changes in FTE current levels must have a description of changes and % for the year
- Look at depreciation and amortization
- Look at healthcare costs
- Look at salary assumptions

Amber will provide the guidelines to BSOs by Wednesday, June 4.

New Hire Process--Bonnie Gimbel

Bonnie Gimbel provided copies of and discussed the New Hire Orientation--ELT's Resource Packet. Bonnie reported she and Millie Durrett are working on the e-orientation, which includes a message from the President, information on diversity, safety, an LWC organization chart, acronyms, etc. Bonnie will let ELT members know when the e-orientation is ready (the third week in July) so they can review it on-line. E-orientation allows new employees to log on and e-orient as time allows.

ELT members will review Bonnie's handout and provide feedback within the next two weeks.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the June 9 meeting.

Agenda for June 9, 2003 ELT Meeting—Bill Meeks

Bill will e-mail the agenda for the June 9, 2003 ELT meeting. The meeting time will be 9:00-11:45 a.m. , allowing 15 minutes extra for discussion.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

**ELT Meeting Minutes
June 9, 2003**

Roles

Leader: Bill Meeks
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Karla Teasley
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Rhonda Plunkett, Sue Purdy, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the June 2, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Greenbacks/Budget Reduction--Amber Halloran, Sue Purdy

Amber and Sue provided copies of and discussed the LWC Financial Highlights for May 2003 and 2003 Proposed Budget Cuts/Expense Reductions as of June 6, 2003.

Budget reductions listed for June-December 2002 are \$613,032.

ELT revised the target for budget reductions from \$750,000 to \$1,000,000. CBSOs and BSOs must look for approximately \$400,000 additional in budget cuts. This will be discussed at ELT in two weeks.

Actions items for Amber as a result of the discussion are:

- Determine income statement impact of the Claims reduction
- Find out name the new account Vince just moved to free water
- Add last 12 months average for unaccounted-for water to report
- Check for county parks in numbers
- Determine variance in I1

Ethics Policy--Laura Douglas

This topic was deferred to a future ELT meeting.

MBW/WBE Recommendations Update--Rhonda Plunkett

Rhonda provided copies of and discussed the LWC Minority-Owned and Women-Owned Business Enterprise Program Implementation Plan Draft dated June 9, 2003. This is an update on where the MBD Team is regarding the Implementation Plan for the M/WBE Program.

Under Organizing for Implementation Strategy, Page 6, Bob Miller would like for Rhonda to submit the revised document and program draft to him as well as to Legal for review.

John Huber will meet with Ted Niemann, Cindy Kowalski, and Greg Heitzman, who were key players in the creation and implementation of the Evaluated Bid Pilot, to energize them and ensure their support for the new program. Bob and Karla will provide Joan names of persons from their cores who should attend the meeting. Joan will schedule the meeting. ELT members are welcome to attend.

Rhonda will clearly define the roles and responsibilities of key players in the new program and how they relate to each other. These include the M/WBE Specialist, Purchasing, Project Mangers, and Legal. The MBD Team will also clearly define the Empowerment Model boundaries for these key players.

Board Meeting Agenda--John Huber

Agenda items include a report from the Audit Committee.

Open Time--All

150th Anniversary Funding--Karla Tasley

The cost of the 150th Anniversary Celebration is unbudgeted--\$35,000 this year and \$16,500 in 2004. This includes a history calendar and other items.

ELT decided we should recognize this but do so in a less costly way. John and Karla will discuss this with Barbara Crow.

Old Bluegrass Tank Site--John Huber

John discussed a letter he received from Fred Fischer, Attorney for the City of Jeffersontown, requesting we provide the City of Jeffersontown clear title to the site previously occupied by the Bluegrass Tank at Bluegrass Parkway and Watterson Trail.

Laura Douglas will look at the acquisition agreement and advise what was agreed to, and Greg will discuss the Mr. Fischer.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the June 23, 2003 ELT meeting

Agenda for June 23, 2003 ELT Meeting--Bill Meeks

Bill will e-mail the agenda for the June 23, 2003 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>

***Review Minutes and Agenda**

Minutes from the June 9, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

MBE/WBE Implementation Plan Draft--Rhonda Plunkett

Rhonda provided copies of and the group discussed the Draft LWC Minority and Women Business Enterprise Program Requirements (6/22/03) and the draft Minority and Women Business Enterprise Implementation Plan (timeline). The Draft LWC Minority and Women Business Enterprise Program Requirements is the City of Louisville's program which was adapted for use at LWC.

Rhonda will incorporate additions/changes to the two documents as discussed today. She requests that ELT members provide any additional comments on the two documents by Friday, June 27. Rhonda will prepare the documents in final form for ELT review at the June 30 meeting.

C2 Reorganization--Jim Brammell

Jim Brammell provided copies of and the group discussed his memo titled Reorganization of Managing Distribution Operations (C2) dated June 10, 2003. His proposal would change C2 from 4 processes to 5 processes. Jim's discussion was for shared information only. No action was taken by ELT.

Expense Reductions--Amber Halloran, Sue Purdy

Amber provided copies of and the group discussed the 2003 Proposed Budget Cuts/Expense Reductions dated 6/23/03.

Amber will continue to update the list and will monitor and forecast. The budget cuts listed will be maintained as is with one exception: Eliminate "Reduce Number of Bottles Purchased" under C1. This item will not be included in the budget cuts.

Open Time

Minority Women Procurement Program--John Huber

John noted this is a key component of our diversity strategy, and we should demonstrate that we will make every effort to make it work.

Letter from Bluegrass Area Development District (Bluegrass Consortium)--John Huber

The group discussed a letter from the Bluegrass Area Development District. Karla noted a meeting is scheduled among LWC staff this week to draft a response to the letter.

ELT Roles--Greg Heitzman

Greg provided copies of a list of ELT roles for 2003-2004.

This item will be discussed next week at ELT when Susan is present since she may want to serve as leader beginning October 6.

Tapping Team Competition in Anaheim at AWWA ACE--Bill Meeks

Bill was pleased to report that the Women's Tapping Team won first place (out of 8 teams), and the Men's Tapping Team won 6th place (out of 23 teams).

Bob's Presentation at AWWA ACE on Risk Assessment--Bob Miller

Bob reported that his presentation was well received by Moody's. Bob says what we are doing on risk assessment will go a long way in helping to protect our bond rating.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the June 30, 2003 ELT meeting

Agenda for June 30, 2003 ELT Meeting--Bill Meeks

Bill will e-mail the agenda for the June 30, 2003 ELT meeting. Karla will serve as leader of the meeting since Bill will be out of town.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
June 30, 2003

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Bob Miller
Scribe:
Timekeeper: Susan Lehmann
Attendees: Karla Teasley, Bob Miller, Susan Lehmann, Greg Heitzman, Laura Douglas, Rhonda Plunkett, Roger LeMaster, Scott Muhlenback, Kathy Schroeder, Amber Halloran

***Review Minutes and Agenda**

Minutes from the June 23, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

MBE/WBE Implementation --Rhonda Plunkett

Rhonda Plunkett distributed "Proposed Recommendations for Minority and Women Business Enterprise (M/WBE) Program Implementation" and Attachments A, B, C and D (attached). Rhonda has added a definition of Good Faith Efforts and a provision for an Appeals Committee. Rhonda was also advised to prepare a communication to the Board of Water Works regarding the proposed changes to the M/WBE Program. Laura advised that the provision for an Appeals Committee should be reconsidered. Rhonda agreed to remove this provision.

Rhonda reviewed the recommendation for an Implementation Team and the Implementation Plan (Attachment D). The ELT evaluated the phased-in approach as compared to a go-live approach for all bids at the same time. Rhonda agreed to review the implementation plan with the procurement process management.

P1 Certification

Greg Heitzman distributed a copy of his review of the System Certification elements for P1 (attached). Roger LeMaster noted significant improvements since the previous audit. Greg recommended that P1 be certified for 2003 and committed to certain elements to be updated and completed by December 2003. The ELT approved certification of the P1 Business System as recommended.

Proposed Change in Vacation Policy

Amber Halloran and Kathy Schroeder distributed an "Executive Summary of Vacation Pay Changes" (not attached).

Review Bin List--All

The group discussed items for the BIN List and the agenda for the July 7, 2003 ELT meeting

Agenda for July 7, 2003 ELT Meeting – Karla Teasley

Karla will e-mail the agenda for the July 7, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

**ELT Meeting Minutes
July 7, 2003**

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Don McKay, Bill Meeks, Bob Miller, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the June 30, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Regulations Sub-Team Update--Greg Heitzman, Don McKay

Greg and Don distributed copies of and discussed LWC Proposed Regulatory Compliance Model-2003.

ELT approved the Regulatory Compliance for Health, Safety, Environment and Water Quality Process Empowerment and Accountability Matrix dated June 4, 2003 with the addition/changes shown below. Greg will make these changes, and the document will be used as the guidance document.

- Under Item 1.1, show Barbara Crow as N.
- Under Item 1.5, show Barbara Crow as N.
- Under Item 1.6, show Barbara Crow as N.
- Add Item 2.3, Communicate Final Regulations to External Constituencies as Appropriate, with Barbara Crow shown as W. Everyone else will be shown as N.
- Under Item 5.1, show Roger LaMaster as A and Impacted Area as N.
- Under Item 6.3, show Karla Teasley as C.
- Under Item 6.6, show Karla Teasley as C.

NLP Sub-Team Work Update--Susan Lehmann

Susan provided copies of and discussed the following documents: Next Level Plan Update--Inclusive Outline, Draft Learning Organization Vision/Definition dated July 3, 2003, and NLP Update Timeline. Each team leader provided a brief update on team progress.

Susan will add a column to the Next Level Plan Update--Inclusive Outline titled Percent Complete.

This item will be added to the BIN list for a monthly update on each team's progress.

Review Board Meeting Agenda--John Huber

Board agenda items include a report from the Compensation Committee regarding PTO accrual, a report from the Audit Committee on their June, 2003 meeting, and the Bluegrass Consortium.

Open Time

Trip to Ukraine--Steve Hubbs

Steve reported on his recent trip to the Ukraine.

Bluegrass Consortium--Karla Teasley

Karla and others will meet today to go over the draft response to the Bluegrass Consortium

Labor-Management Conference at Harvard University--John Huber, Bill Meeks

John and Bill reported on their attendance at this conference, which was sponsored by UAW and the Ford Foundation. Fifteen to twenty organizations were represented at the conference by Union and Management employees. John also gave a presentation on LWC's Pure Tap Program at the conference.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the July 14, 2003 ELT meeting

Agenda for July 14, 2003 ELT Meeting--Bob Miller

Bob will e-mail the agenda for the July 14, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes July 14, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman/Billy Meeks
Attendees: Laura Douglas, Greg Heitzman (9:00 to 10:15), Ed Chestnut (10:30-11:30), Steve Hubbs, John Huber, Susan Lehmann, Bill Meeks, Bob Miller.

***Review Minutes and Agenda**

Minutes from the July 7, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed, modified, and open time items identified.

Greenbacks Report: Amber Halloran

Amber distributed the Greenbacks report. Bob expressed concern over the revenue projections for the remainder of the year, noting the implementation of *Route Smart*, and recommended cautious optimism regarding the revenue projections.

Amber noted that disposal of property was over plan by about \$250,000. John asked if the property south of the Airport was being properly considered for disposal. Greg noted that he will follow up with Karla on this item.

The team discussed the issue of late charges with regards to credit card payments. Changes to this policy will require modification of our service rules. Any changes in this policy are to be carefully considered from aspects of customer impact and financial impacts.

The unaccounted-for water values are up for 2003 and remain higher than previous years. The cause of this increase is unknown, although adding the Shepherdsville and Goshen distribution systems might be driving a part of this increase. This increase in unaccounted for water is an area of concern for LWC, and this item will be added to the ELT BIN list for further discussion of a corporate approach of addressing this issue.

The year-to-date O&M costs for 2003 are 10% greater than 2002. Bob cautioned that this is an unusually high value, and asked for a high-level compilation of the components of this increase. Amber will provide this to ELT.

Re-organization of Supplying Financial Resources System

Amber provided an overview of the changes to the SRF system as a result of implementing the FINS project. The FINS project will result in significant changes in work processes. Purchasing will be remaining essentially as-is, but other job processes will be essentially eliminated and completely re-structured. All positions will be posted within the system for the newly created processes.

The system will carry 10% fewer employees after full implementation of FINS (19, compared to the current 21 total staff). This reduction will be realized in the second quarter of 2004. The full staff load of 21 will be carried for 6 months after FINS implementation to cover FINS transition issues.

Positions are to be filled from within the SFR system. ELT discussed the importance of explaining why this method of posting accomplishes the objectives of the company, while demonstrating appreciation for and acknowledging the contribution of the employees successfully driving this re-engineering of the entire business system.

Susan will provide an analysis of previous practice in posting positions following significant changes within processes, in the context of the proposed changes in the SRF system.

Open Time

Shepherdsville. The recent boil water notice for Shepherdsville is a continuation of service problems in this area, and John suggested that it may be advisable to have a single point of coordination for dealing with all issues in Shepherdsville. Karla and Greg are to assure that both systems are communicating and coordinating all activities for the Shepherdsville area.

150th Anniversary. Barbara has proposed a revised budget for the celebration of the 150th Anniversary of the chartering of the company (reference a recent email on this topic). The unbudgeted costs for this item have been approved for 2003.

General Counsel Role. One of the roles of the General Counsel in LWC is to manage and reduce overall legal risk to the company. This role needs to be more clearly established within the company. As an example, legal counsel has responsibility for all contract documents, and the controls over these documents. This needs to be accomplished in a way that empowers employees, within established boundaries, without extending cycle times for processes. A Ginsburg matrix is suggested to help define this process and assist in communicating this role and process.

Laura will bring this issue before the BSOC at tomorrow's meeting.

Coordinators Position at Middletown Capital Construction Crews. After reviewing these positions in detail, it has been determined that these positions should be re-classified as process owner positions.

Review Bin List—All

The increase in unaccounted-for water will be added to the BIN list for ELT consideration. This will be in the context of developing a corporate strategy to address the increasing trend in unaccounted-for water. Current status of leak detection programs, meter exchange programs, sample testing programs, etc. should also be discussed. (Karla)

Inter-departmental job posting and fillings history. (Susan)

Credit card, late fees, and resulting changes in revenue. (Karla)

Dissemination of employee personal information (Salary, pay grade, other). (Susan)

Agenda for July 21, 2003 ELT Meeting—Bob Miller

Bob will e-mail the agenda for the July 21, 2003 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>

ELT Meeting Minutes July 21, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Susan Camp, Laura Douglas, Kate Farrow, Nora Freeman, Greg Heitzman, Brandy Holdridge, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Rhonda Plunkett, Mike Sturgeon, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the July 14, 2003 ELT meeting were approved with the following revision: Under Open Time, General Counsel Role, change second paragraph to read, "Laura will bring this issue before the BSOC at tomorrow's meeting." Delete the words "and Susan" from the sentence.

The agenda for this meeting was discussed and approved.

Update on Empowerment Pilots--Nora Freeman

Nora provided copies of and discussed the following: 2002 Empowerment and Accountability Pilots, Summary of Focus Group Results; 2002 Empowerment and Accountability Pilots, BSO Focus Group--February, 2003; and 2002 Empowerment and Accountability Pilots, PO and Front Line Employee Focus Group--March, 2003.

Bob noted these documents will be useful to the NLP Sub-Team on Empowerment and Accountability since they identify gaps keeping us from reaching full empowerment.

Quarterly Team Effectiveness Review--Nora Freeman

Nora provided copies of and discussed the results of the Quarterly Team Effectiveness Survey. The team average for the second quarter 2003 is 3.80. Performance overall is consistent, with all scores above 3.0.

Recognition--Rhonda Plunkett

Bill Meeks presented recognition certificates to Karla Teasley and Mike Sturgeon for their work in the development and success of the Decision Partners Team.

Credit Card Payments/Late Fees/Changes to Service Rules--Karla Teasley, Susan Camp, Brandy Holdridge

Susan and Brandy provided copies of and discussed an Update on Debit/Credit Card Program dated July 21, 2003. They provided an overview of payments made to LWC by check, cash, and debit/credit card, actual debit/credit card activity for January-June, 2003, and costs to charge customers convenience fee for service.

Confidential Human Resources Information--Susan Lehmann

Susan provided copies of and discussed information on the procedure for sharing of HR information. This procedure will be communicated to employees as they request information from HR.

Open Time

Single Point Accountability for Shepherdsville--Greg Heitzman

Greg discussed the need to identify one person as a contact to coordinate distribution, water quality and operational activities in Shepherdsville in an effort to reduce water main breaks and boil water advisories. The BSOs involved in this are Jim Brammell, Jim Smith, Steve Cooper, and Jack Wang. Greg and Karla will continue to meet weekly to work on this.

Five-Year Anniversary at 550 South Third Street--Bob Miller

Bob noted July 20, 2003 was the five-year anniversary of our occupancy at LWC's corporate headquarters at 550 South Third Street.

Ethics Policy--Laura Douglas

Laura provided copies of the LWC Ethics Policy, the Louisville Metro Government Ethics Policy, and a summary prepared by Roger LeMaster comparing the two.

Laura asked ELT members to review this information before the July 28 ELT meeting wherein it will be discussed.

Right Management Consultants--Susan Lehmann

Susan reported she will schedule Right Management for early September to follow-up on the 1999 culture survey and to evaluate ELT's effectiveness.

Discussion of General Counsel Role with BSOC--Laura Douglas

Laura reported on her attendance at a recent BSOC meeting where she discussed General Counsel's availability to discuss various issues including contract needs, environmental issues, and clean water act issues.

FINS Team--Bob Miller

FINS Team members asked Bob to express their appreciation to ELT, the CBSOs, and the BSOs for their cooperation during the time the FINS Team worked on this project.

Coagulation Units--Greg Heitzman

Greg reported on the status of repair/replacement of Units 5, 6, and 8.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the July 28, 2003 ELT meeting.

Agenda for July 28, 2003 ELT Meeting--Bob Miller

Bob will e-mail the agenda for the July 28, 2003 ELT meeting

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
July 28, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Bill Meeks
Attendees: Ed Chestnut (for Greg Heitzman), Laura Douglas, Nora Freeman, John Huber, Joan Malone, Bill Meeks, Bob Miller, Kathy Schroeder, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the July 21, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Ethics Policy/Metro Louisville Ethics Policy--Laura Douglas

Laura provided copies of Ordinance 0-32-2-03, Metro Government's Code of Ethics. This replaces the version of Metro Government's Ethics Policy Laura provided at the July 21, 2003 ELT meeting. Laura presented a side-by-side comparison of Metro Government's recently-adopted Ethics Ordinance and the LWC Code of Ethics Policy. She noted Metro Government's Ethics Ordinance applies to the officers of the City whereas the LWC Code of Ethics applies to all employees. She further advised that LWC officers are not interpreted in any way to be officers of the City of Louisville. She discussed other differences in the policies. The policies do overlap in some areas.

John will let the Board of Water Works Audit Committee know we have done this comparison and advise them on the differences in the two policies.

The LWC Ethics Advisory Board has not been staffed. Susan will work to staff the LWC Ethics Advisory Board.

Bob will add to the BIN List "Discussion of LWC Nepotism Policy."

Intra-Departmental Job Postings--Susan Lehmann

Susan provided copies of and discussed information regarding office job postings for 2001-2003. Kathy Schroeder and Susan discussed information on past practices and new procedures.

Quarterly Review of ELT Goals--Nora Freeman

Nora provided copies of and discussed 2nd quarter 2003 performance results for Executive Incentive Award Goals, President/Vice President Shared Goals, Corporate Performance Award Goals, and Diversity/MBE Award Goals. Under 2003 Incentive Plan Goals, the Light Switch goal was not met.

Followup items:

Nora will correct first quarter Preventable Vehicular Accidents total to 14.

Bill Meeks will speak with Sandy and Don regarding how preventable vehicular accidents are reported and will ask Don to provide additional information on preventable vehicular accidents and what we can do to reduce the number of these accidents.

CBSOs will check with their BSOs on what the systems are actively doing to prevent vehicular accidents. Each system should review the LWC Vehicular Accident Policy.

Greg will follow-up regarding SCADA and individual turbidity system. ELT would like to know what the issues are and if they are being addressed in a timely way.

Open Time

Bluegrass Consortium--Karla Teasley

Karla provided copies of and discussed a letter to Mr. Don Hassell regarding LWC's interest in providing drinking water on a wholesale basis to Central Kentucky.

FINS Project--Bob Miller

Bob reported that over 122 training sessions are scheduled to be held between August 4 and September 26. Bob encouraged everyone to get their staff scheduled for training early. The training schedule will be released soon.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the August 4, 2003 ELT meeting.

Agenda for August 4, 2003 ELT Meeting--Bob Miller

Bob will e-mail the agenda for the August 4, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes August 4, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Steve Hubbs
Attendees: Susan Camp (representing Karla Teasley), Laura Douglas, Amber Halloran, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Jack Wang (representing Greg Heitzman)

***Review Minutes and Agenda**

Minutes from the July 28, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Changes Resulting from FINS–Amber Halloran

Amber provided copies of and discussed "New Financial System Proposed Accounting Policy and Procedural Policies, July 24, 2003." Go-live date for FINS is September 29, 2003.

Follow-Up on OEI Focus Group Survey Results/Effectiveness of Inter-System Teamwork–Susan Lehmann, Bill Meeks

Susan Lehmann provided copies of and discussed the ELT Organizational Effectiveness Index Action Plan for 2003.

ELT accepted and endorsed the plan with the following action items:

- Objective I-C-1
 - Change to read, "JLH will develop a list of key issues (with consultation of CBSOs/VPs.).
 - Under Accountability for this item, change to JLH.
 - Objective I-C-1 will be added to the BIN List.
 - John Huber will put a list of key issues together in consultation with ELT.
- Objective I-C-2
 - Change to read, "JLH communicates the list to ELT; then the CBSOs/VPs identify BSO responsibility for leading the strategic/operational initiatives."
 - Under Accountability for this item, change to VPs and CBSOs.
 - Objective I-C-2 will be added to the BIN List.
- Objective I-C-3
 - Under Completion Date, change to "During 2004 Operating Plan Process."
 - John Huber will hold CBSOs accountable for intercore support and cooperation.
- Objective III
 - Bob will check with Roger LeMaster on work Roger is doing to determine criteria for setting new policies and standards for documentation and management. This item will be added to the BIN List.
- The Action Plan will be reviewed at future ELT meetings.
- VPs will follow-up on these three objectives in staff meetings.

- Susan will discuss this document with Karla and Greg since they could not attend today's meeting.

Open Time

Update on SCADA System and Individual Turbidity System--Jack Wang

Jack Wang gave an update on implementation issues regarding the SCADA System and individual turbidity system. Extracting information and reporting are the issues related to SCADA implementation.

Update on Lake in the Woods/South Hill Apartments--Laura Douglas

Laura gave a brief update on status of Lake in the Woods/SouthHill Apartments.

Boil Water Advisories/Seven Counties Services in Bullitt County--Laura Douglas

Laura discussed issues raised by employees at Seven Counties Services office in Bullitt County due to boil water advisory. Tests revealed the problem at Seven Counties Services was in the office itself and not in the water. LWC has been working with Seven Counties on flushing the water system in their building.

Process Improvement--Direct Pouring of Styrofoam Forms for Vaults--Bill Meeks

Bill Meeks says this process should be a marked cost improvement on cost of vaults, and the vaults will be stronger.

Update on River Road Country Club--Laura Douglas

Laura provided an update on payments due us from River Road Country Club.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the August 11, 2003 ELT meeting

Agenda for Auust 11, 2003 ELT Meeting--Bill Meeks

Bill will e-mail the agenda for the August 11, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

**ELT Meeting Minutes
August 11, 2003**

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley,

***Review Minutes and Agenda**

Minutes from the August 4, 2003 meeting were approved with the following revision: Delete the fourth bullet--titled Objective I-E--under Follow-Up on OEI Focus Group Survey Results/Effectiveness of Inter-System Teamwork.

The agenda for this meeting was discussed and approved.

Review Board Meeting Agenda--John Huber

Agenda items include discussion of Bluegrass Consortium and update on U. S. Pipe issues regarding fire hydrants and valves.

Overview of Long-Term 2 Enhanced Surface Water Treatment Rule and Stage 2 Disinfectants and Disinfection By-products Rule--Steve Hubbs

Steve Hubbs provided copies of and discussed Review of EPA Proposed Rules: Disinfection By-Products (DBPs) and Long-Term 2 Surface Water Treatment Rule (LT2 SWTR).

There will be no impact to LWC regarding the DBPs Rule.

Regarding the LT2SWTR, Phase 2 of our ATT program will address all needs for the Payne Plant, and Phase III of the ATT program will address the needs at the Crescent Hill Plant.

Steve Hubbs will advise Barbara Crow that this information will appear in today's Federal Register so Barbara will be prepared to respond to any calls we might get from the media.

Review Greenbacks Report and Review Operating Issues and Budgets--Amber Halloran, Sue Purdy

Amber and Sue provided copies of and discussed the LWC Financial Highlights for July, 2003.

On page 12, Amber will begin tracking water consumption versus percent of water produced.

Open Time

Update on Minor, "No Reportable Quantity Level" Chlorine Leak at Crescent Hill Plant--Greg Heitzman
Greg reported that the leak was on a lead gasket and was well below the "no reportable quantity level." All warning systems worked as they were designed to work.

Report on Labor Participation Committee for Metro United Way Campaign—Bill Meeks

Bill reported that the Labor Participation Committee for Metro United Way started the fall campaign by participating in a very successful fundraiser last Friday.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the August 18, 2003 ELT meeting

Agenda for August 18, 2003 ELT Meeting—Bob Miller

Bob will e-mail the agenda for the August 18, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes August 18, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Tony Gregory, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Roger LeMaster, Joan Malone, Bob Miller, Scott Muhlenbeck, Kathy Schroeder, Karla Teasley, Deborah Epperson (Mercer), Scott Cook (Mercer)

***Review Minutes and Agenda**

Minutes from the August 11, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Compensation Grading Practices--Kathy Schroeder and Mercer

Kathy Schroeder provided copies of and discussed the LWC Market Pricing Overview dated August 18, 2003. This document was prepared by SHR and Mercer and provides information on how jobs are graded and evaluated. Deborah Epperson and Scott Cook from Mercer were present to participate in the discussion and answer questions.

Kathy also plans to discuss this information with the BSOC.

Code of Conduct & Performance, Code of Ethics Questionnaire--Roger LeMaster

Roger provided copies of and discussed the Code of Conduct & Performance and Code of Ethics Questionnaire. This survey will be conducted every two years.

ELT added an item to the BIN List as follows: Look at the Ethics Policy under Gifts and Gratuities and provide clarification to employees regarding group dinners and conferences. Roger, Laura, and Susan will lead this discussion at an upcoming ELT meeting.

IT Strategic Plan 2004-2006--Tony Gregory

Tony provided copies of and discussed the IT Strategic Plan 2004-2006 and IT Strategic Plan Budget Summary. This information will be presented to the Board of Water Works at their special meeting on August 26, 2003.

Open Time

Metro United Way--Greg Heitzman

David Blackerby will serve as LWC's Loaned Executive for this fall's MUW campaign. Greg Heitzman reported the internal campaign coordinator will come from the Operations Core and will be named by September 1.

Process Owners Meetings--Susan Lehmann

Susan reported that the POs will begin meeting once per month in an effort to improve communication and cooperation across processes and systems. This is in response to OEI feedback received last year. The meetings will begin in October.

Power Outages--John Huber

John discussed how a power outage similar to the recent outage in Canada and parts of the U.S. might affect LWC. We need to make sure we have reliable fuel supply in the event of a power outage.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the August 25, 2003 ELT meeting

Agenda for August 25, 2003 ELT Meeting--Bob Miller

Bill will e-mail the agenda for the August 25, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Steve Cooper (representing Karla Teasley), Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Ron Raque (Right Management Consultants)

***Review Minutes and Agenda**

Minutes from the August 18, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Code of Conduct & Performance, Code of Ethics Questionnaire (Harassment and Discrimination Issues)--Roger LeMaster

This topic was discussed briefly, and the discussion will resume at a future ELT meeting when Laura Douglas can be present to participate in the discussion.

ELT Effectiveness (Right Management)j--Susan Lehmann

Susan Lehmann provided copies of and discussed Interview Questions for LWC ELT and BSO, LWC ELT Assessment and Development Process, and LWC ELT Organizational Culture Assessment overview. Ron Raque of Right Management Consultants attended the meeting to participate in the discussion. Right Management will be conducting an organizational culture assessment with the ELT.

2003 Cost Reduction Strategy Review--Amber Halloran

Amber provided copies of and discussed the 2003 Proposed Budget Cuts/Expense Reductions as of the end of July. As of the end of July, forecasting for the end of the year indicates we will be \$500,000 over budget, but the \$400,000 Contingency will cut that amount down to \$100,000.

2004 Budget Projections and Reductions--Amber Halloran

Amber provided copies of and discussed 2004 Proposed Budget Reductions, Additional Reductions to 2004 Budget Reductions 8-25-03, and a list of non-discretionary items for 2004 showing O&M impact of each item. Bob furnished copies of and discussed Supplying Business Resources CBS 2004 Potential Budget Reductions.

The VPS will clarify, refine, and finalize their lists of 2004 budget reductions.

Bob will schedule a special ELT meeting for Friday, August 29, to discuss 2004 budget reductions.

Bob will meet with Laura and Karla to review the 2004 reductions discussed today.

Review Bin List—All

The group discussed items for the BIN List and agenda for the September 8, 2003 ELT meeting

Agenda for September 8, 2003 ELT Meeting—Bob Miller

Bill will e-mail the agenda for the September 8, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

Timekeeper: Susan Lehmann (for Greg Heitzman)
Attendees: Ed Chestnut (representing Greg Heitzman), Laura Douglas, Amber Halloran, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bob Miller, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Minutes from the August 25 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Review Board Meeting Agenda--John Huber

Board meeting agenda items include discussion of the Strategic Plan, the IT Strategic Plan, and refunding methods for developer contracts.

Internal Control Questionnaire: Subteam Recommendations/Team Charter--Bob Miller

Bob Miller provided copies of and discussed the LWC Team Charter for the Internal Control Questionnaire Team. This team will deal with the top eight problem areas identified in the 2002 Internal Control Questionnaire results.

Bob will investigate whether Roger and Scott should participate as team members or serve as resources to the team. Also, some key customers of HR may be added to the list of team members.

ELT consensed to move ahead with this with the understanding that Bob will consult with the appropriate persons to determine if this should be in parallel with the OEI or if the OEI should be a part of this.

This item is being added to the BIN list. The team will report to ELT in February, 2004.

Salaried Employee Overtime Policy and Controls--John Huber

John discussed self-authorized overtime for salaried, exempt positions. We should make sure we have appropriate controls.

Susan Lehmann will prepare a recommendation regarding the practice of paying overtime for salaried exempt positions. Karla Teasley and Greg Heitzman will provide a summary of guidelines and controls regarding overtime for salaried exempt positions. This will be discussed by ELT in the near future.

Damage Claims for LG&E Facilities--Bob Miller

LG&E is recommending we jointly pursue a three-prong approach to deal with LG&E damaged facilities:

1. Work to resolve outstanding claims.
2. Form a joint team to develop a process to resolve future damage claims.
3. Work to build a forum on continuing education focused on excavation safety.

Bob will send a letter committing LWC to work with LG&E to make improvements to the process. Laura Douglas will review the letter before it is sent. Bob will furnish a copy of the letter to ELT members.

Greenbacks Report--Amber Halloran, Sue Purdy

Amber and Sue provided copies of and discussed the LWC Financial Highlights for August, 2003.

Open Time

Dividend Payments for Remainder of 2003--Bob Miller

Bob noted that the deposits to the Infrastructure Replacement Reserve have been suspended to ensure that dividend payments to Metro Louisville Government for the remainder of 2003 will meet budgeted levels.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the September 15, 2003 ELT meeting

Agenda for September 15, 2003 ELT Meeting--Bob Miller

Bill will e-mail the agenda for the September 15, 2003 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>
--

ELT Meeting Minutes
September 15, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Ron Green, Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Rhonda Plunkett, Karla Teasley

***Review Minutes and Agenda**

Minutes from the September 8, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Introduction of M/W/BE Specialist Ron Green--Rhonda Plunkett

Rhonda Plunkett introduced Ron Green, LWC's newly-hired M/W/BE Specialist.

Review NLP Subteam Work Updates--Susan Lehmann

Susan provided copies of the Next Level Plan Update--Inclusive Outline and the NLP Update Project Overview, NLP Update Project Staging, and NLP Update Subteam Project Guideline. The leader of each subteam reported on progress in working toward their deliverable.

Action items:

- Bob Miller will be added as a resource to the Quality Management System and ISO Subteam.
- Resources may be an issue for Bill Meeks. Karla offered to help in calling meetings and organizing.
- Kathy Schroeder will be added to the Organizational Structure Subteam as one of the two BSOs which were to be named.
- LWC Relationship Chart will be added to the BIN List.
- Subteam leaders will report to ELT once each month on their progress.
- Subteam leaders will bring their deliverables to ELT as soon as they complete their work rather than have all subteam leaders bring to ELT at the same time.

Current Litigation--John Huber, Laura Douglas, Susan Lehmann

ELT went into executive session to discuss litigation.

Open Time

Report on Jack Segell, Board Member--John Huber

John reported that Board Member Jack Segell is in the hospital.

Right Management Survey--Susan Lehmann

Susan encouraged ELT members to complete and return the 360 degree surveys as soon as possible if they have not already done so.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the September 22, 2003 ELT meeting

Agenda for September 22, 2003 ELT Meeting—Bob Miller

Bob will e-mail the agenda for the September 22, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes **September 22, 2003**

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Greg Heitzman, Steve Hubbs, John Huber, Susan Lehmann, Bob Miller, Karla Teasley, Kelley Dearing-Smith, Amber Halloran, Johnnie Rice

***Review Minutes and Agenda**

Minutes from the September 15 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed, modified slightly, and approved.

Adventures in Water

Kelley Dearing-Smith updated ELT on recent activities from her area. She presented the recent program "Adventures in Water", a spin-off of the Pure Tap teachers curriculum program for the Girl Scouts. She also announced that LWC won the statewide Curriculum Program Award from the Kentucky Council for Environmental Education.

The "Smile Kentucky Program" is expanding this year from 14 to 31 schools, with grants from local companies, ADA, and a higher degree of participation from the U of L School of Dentistry. Dental screenings for this program will take place in November.

Kelley is also looking to work on a partnership with the medical community on a program addressing obesity and diabetes. This program will target both children and parents, promoting water over soft drinks.

The "Clean Hands Up" program continues, promoting good hygiene through hand washing. Kelley is also working on a school-to-school connection between the Eliahu Academy and a Ukrainian school in Rubishne.

The tours program has started again this year, with security precautions specifically tailored to the program.

ELT congratulated Kelley on her success and expressed appreciation for her energy and dedication to the Public Information program.

FINS "GO LIVE" Update

Amber Halloran updated ELT on the FINS progress, and indicated that all looks good for a "GO LIVE" date as planned on Monday, September 29. Training on timekeeping and procurement has gone well, and refresher tutorials are available on the intranet. A special communications need was identified regarding paychecks to make sure all were aware of the transition issues regarding the changeover.

John Huber suggested that Amber look into the possibility of accruing the two days of revenue that will be shifted to October as a result of the changeover this weekend.

ELT expressed appreciation for the hard work and dedication that the entire FINS team has put into this project.

Open Time

OHINKY. Greg Heitzman brought the OHINKY Cup to ELT. OHINKY was originally started 24 years ago to promote better working relations between the waterworks in Indianapolis, Cincinnati, and Louisville as the industry entered an era of intensified regulation.

Metro United Way. Greg presented the goals and strategy for this year's Metro United Way campaign. Greg will co-chair the internal campaign, with support from the organization. Each core is to identify a team member. The goal for this year was set at \$75,000.

Confidentiality Protocol: John reviewed the protocol for confidentiality for ELT. ELT will operate as an open and transparent organization with the following exceptions:

- The entirety of any closed session, topics and discussion.
- Human Resources and employee related topics.
- Items under negotiation.
- Items under litigation.

Maintaining confidentiality when it is appropriate is a fundamental principle and accountability of leadership roles and a breach of confidentiality is a breach of executive trust.

John further reminded everyone that topics brought before ELT are to be fully discussed and debated with opinions and point of view brought forward during the discussions. Once ELT has developed a course of action, each member has pledged to support that action and not to undermine ELT's decision.

Bluegrass Consortium. The Bluegrass Consortium will meet tonight in a public forum. Karla Teasley solicited input regarding LWCs presence at the meeting.

Relationship Charts. Bob Miller contacted the firm that developed the concept of the Relationship Chart. They refer to it as the "Super-System Chart", and were interested in talking to LWC about our use of the tool.

360 Reviews. Susan suggested that all of ELT commit to getting the 360 reviews in by the end of this week.

TIMEKEEPER REPORT: The meeting ran according to schedule, and participation was balanced.

Agenda for September 29, 2003 ELT Meeting—Bob Miller

The group discussed items for the BIN List and the agenda for the September 29, 2003 ELT meeting. Bob will e-mail the agenda for the September 29, 2003 ELT meeting.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.

ELT Meeting Minutes September 29, 2003

Roles

Leader: Bob Miller
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Susan Lehmann
Timekeeper: Greg Heitzman
Attendees: Laura Douglas, Amber Halloran, Greg Heitzman, Steve Hubbs, Susan Lehmann, Joan Malone, Bob Miller, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Minutes from the September 22, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

FINS Implementation Status--Amber Halloran

Amber reported that the new financial information system was "turned on" Sunday, September 28, and everything is going smoothly. FINS team members are available to help anyone who might be having problems with the system.

ELT Utilization Statistics--Bob Miller

Bob provided copies of and discussed his memo to ELT regarding ELT time utilization statistics for July-September, 2003.

4th Quarter ELT Leadership and Roles--ELT

Susan Lehmann will serve as Leader during the 4th quarter of 2003, Steve Hubbs will serve as Timekeeper/Observer, and Greg Heitzman will serve as Scribe.

Susan will revise the list of ELT roles for the coming year and provide to ELT members.

Open Time

Final 2004 O&M Budget Reductions--Amber Halloran

Amber provided copies of and discussed the Final 2004 O&M Budget Reductions, the 2004 Proposed Budget Reductions, the 2004 Proposed Non-Union Labor Budget by System Including 1% Credit, and the Travel Reductions--2004 O&M Budget.

VPs will check with their BSOs today and let Amber know if the numbers under 03-04 Budgeted Manpower Comparison are correct.

ELT Team Effectiveness Survey--Bob Miller

Bob provided copies of the Team Effectiveness Survey and asked ELT members to complete and return it to Nora Freeman as soon as possible.

Center for Infrastructure Research at UL--Greg Heitzman

Greg provided printed information on and discussed the Center for Infrastructure Research at UL. LWC teamed up with UL and MSD to create the Center. The Center is beginning its third year--the first year

was spent getting organized, and the second year was spent applying for grants. Most of the proposed projects are engineering oriented.

AWWA KY-TN Section Annual Conference—ELT

ELT members who will attend the conference are: John Huber, Greg Heitzman, Karla Teasley, and Susan Lehmann. Susan will attend for two days only. Several other LWC staff members will attend, some of whom will present papers at the conference.

CSI Results for 3rd Quarter and YTD 2003—Karla Teasley

Total CSI score for 3rd quarter is 837. Service score for 3rd quarter is 802.

Treasury/Risk Management Article on Business Performance Management—Bob Miller

Bob provided copies of an article titled "Doing BPM Right." Bob says we will be hearing more and more about Business Performance Management in the future.

Benchmarking Survey (Right Management Consultants)—Susan Lehmann

Susan reminded ELT members that the Benchmark 360 Degree Feedback Surveys are due today. A debriefing on this will be scheduled in late October.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the October 6, 2003 ELT meeting

Agenda for October 6, 2003 ELT Meeting—Bob Miller

Susan Lehmann, ELT Team Leader for the 4th quarter of 2003, will e-mail the agenda for the October 6, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes October 6, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Bob Miller
Scribe:
Timekeeper: Laura Douglas
Attendees: Laura Douglas, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Kathy Schroeder, Karla Teasley

***Review Minutes and Agenda**

Minutes from the September 29, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Service Area Requirements for Recruitment/Hiring Policy--Kathy Schroeder

Kathy Schroeder distributed a handout that reviewed the results of a benchmarking survey, current LWC statistics, and highlights of the new recruitment policy.

The ELT reached consensus on the draft policy pending further definition of "region."

Redeployment Policy--Kathy Schroeder

Kathy Schroeder distributed a handout that reviewed the results of a benchmarking survey, and reviewed the current policy and proposed changes for a new policy.

The ELT reached consensus on the proposed changes to the Redeployment Policy.

Discussion in Closed Session--ELT

The ELT discussed Code of Ethics and Diversity issues in closed session.

Review Bin List--All

The group discussed items for the BIN List and the agenda for the October 13, 2003 ELT meeting

Agenda for October 13, 2003 ELT Meeting--Susan Lehmann

Susan will e-mail the agenda for the October 13, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes October 13, 2003

Roles

Leader: Bob Miller for Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe:
Timekeeper: Steve Hubbs
Attendees: Nora Freeman (for Susan Lehmann), Amber Halloran, Greg Heitzman, Steve Hubbs, John Huber, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Mike Sturgeon (for Karla Teasley)

*Review Minutes and Agenda

Minutes from the October 6, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Post Go-Live FINS--Amber Halloran

Amber reported that the system is working well.

Review Greenbacks Report--Amber Halloran

Amber provided copies of and discussed the LWC Financial Highlights for September, 2003 and the LWC September YTD and Full-Year Forecast October 13, 2003.

Per Greg's request, Sue Purdy will provide a spreadsheet with Materials and Supplies actual vs. budget through September.

C3 Reorganization--Mike Sturgeon

Mike provided copies of and discussed "as is" and "to be" organization charts for C3. The reorganization will reduce our number of full-time employees by 2.

Review Board Meeting Agenda--John Huber

Agenda items include ratification items from the September Board meeting since we did not have a quorum at that meeting. The IT Strategic Plan will be deferred to a later Board meeting

Open Time

Metro United Way--Greg Heitzman : Greg provided information on and discussed LWC's Fall '03 MUW Campaign budget, goals, activities/events, strategies, and names of the LWC Internal Committee members.

Wellfield Modeling--Steve Hubbs: Steve reported on wellfield modeling by the U.S. Geological Survey.

Interim General Counsel--John Huber: John reported that Bob Miller will assume the role of Acting Corporate Secretary until Laura Douglas' position is filled. We will bring in someone on an interim basis

to fill the role of General Counsel. Jami Young will work with the Bids and Award Committee in the General Counsel role.

SPT Meeting Agenda—Steve Hubbs: Since John and Susan will not be attending the October 15 SPT meeting, Steve proposed the team meet as a workgroup to explore: (1) operational/financial implications of a pro-forma based on a 3% annual increase in O&M, and (2) plans for rolling out the 2004 Strategic Plan.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the October 20, 2003 ELT meeting

Agenda for October 20, 2003 ELT Meeting—Bob Miller

Susan will e-mail the agenda for the October 20, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes October 20, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs for Joan
Scribe:
Timekeeper: Karla Teasley
Attendees: Susan Lehmann, Greg Heitzman,
Steve Hubbs, John Huber, Bill Meeks, Karla Teasley

Ron Crouch Presentation

Ron Crouch made a presentation on population statistics and observations. A summary of his presentation is appended to the end of these minutes.

*Review Minutes and Agenda

Minutes from the October 13, 2003 ELT meeting were approved as submitted. Agenda for this meeting was modified due to time available after Ron Couch's presentation to include only the item on dividend projection.

DIVIDEND PROJECTION: John Huber

John presented the dividend forecast to city officials last week, and relayed their concerns about the \$500,000 shortfall. John emphasized the need to do everything we can to reduce the shortfall in dividend to the city. Every effort is to be made to implement cost control through the end of the year.

In response to this, ELT reached consensus in implementing a hiring freeze (no new external hires) and a travel freeze (for any travel where registration/airfare has not already been purchased). CBOs, BSOs, and POs are to look for every opportunity to control costs and reduce the impact on the dividend.

Agenda for October 20, 2003 ELT Meeting

ELT reviewed the BIN list. Susan will e-mail the agenda for the October 27, 2003 ELT meeting.

*Decisions made by ELT and items requiring action are "shadowed" in these minutes.
--

Ron Crouch presentation to ELT (October 20, 2003)

Ron Crouch (Director, Kentucky Data Center) provided an enthusiastic presentation of data trends in the past and into the future. Five handouts were presented (see attachments). A summary of his presentation is captured below:

Biggest issues facing Kentucky

1. **Critical thinking skills:** we have tons of data, but we are short of analysis. Ron supports Kentucky's KERA system for this reason.
2. **Understanding the trends.** There are many perceptions that aren't matched with fact.
3. **Magnitude:** understanding the importance of the population pyramid, and its trend towards inverting due to baby-boom population.
4. **Issues:** SWOT analysis. Ron projects that the southeast US will be the economic engine of the next 100 years. California is losing population to 5 states...and the southwest may become the poverty center in the next 100 years.

We need to re-define "old". The population pyramid is getting both "older" and more diverse in the younger populations, mostly Hispanic.

Europe is in trouble because they are facing a population decline, with little immigration. Spain and Italy currently have the lowest birth rates.

Health Care costs. Our paradigm is wrong. We need to focus more attention on prevention, maintaining healthy lifestyles, and providing comfort care at the end stages of life. We currently spend a disproportionate amount of our health care costs on the last years of life, promoted by the medical industry.

For the population pyramid in the US, the growth in the younger age groups (5-20y/o) is Hispanic. In Kentucky, we have no "little baby boom" in the 5 to 20 year category, as in the total US.

Jefferson County's population pyramid is even more inverted than that for Kentucky.

A major education issue identified is interpersonal skills in business. This reflects a need for not only technical skills, but skills in interaction with others.

Major changes are happening in the household...1/3 of primary household providers are women.

Ron predicts that the larger houses built in the 1990s will be obsolete in 2020...households will be smaller and older. The trend instead will be for smaller homes in more dense centers (patio homes).

Questions

Jim Asseff asked about the issue of brain-drain with higher educated Kentucky youth. Ron indicated that the issue is job availability in Kentucky, with kids educated outside of Kentucky.

John Huber asked about the education trends with women in Kentucky. Ron diplomatically addressed this question nearest the highest density of women in the room.

Attending: Huber, Meeks, Hubbs, Heitzman, Lehmann, Teasley, LeMaster, Asseff, Gregory, Chestnut, Freeman, Plunkett, Camp, Schroeder, Wang, Halloran, McKay, Cooper

ELT Meeting Minutes October 27, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Steve Hubbs
Attendees: Nora Freeman, Amber Halloran, Greg Heitzman, Kathy Holder (Frost Brown Todd), Steve Hubbs, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Susan introduced Kathy Holder of Frost Brown Todd. Kathy will serve as Interim General Counsel during our search for an In-House General Counsel to replace Laura Douglas.

*Review Minutes and Agenda

Minutes from the October 20, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Quarterly Review of ELT Goals--Nora Freeman

Nora provided copies of and discussed the third quarter 2003 performance on ELT goals--Executive Incentive Award goals, Shared President/VP goals, and Corporate Performance Award goals.

The Light Switch goal for the Incentive Incentive Award goals was not met

FINS Recognition--Amber Halloran

Amber provided copies of and discussed the FINS Recognition Recommendation.

ELT agreed to proceed with Item 1 of Amber's recommendation.

Regarding Item 2, John Huber will consider the timing issue of this and get back with ELT

Follow-up on Ron Crouch Presentation/Code of Ethics Issues--ELT

Susan asked for follow-up comments on Ron Crouch's presentation last week. John noted and the group discussed the importance of diversity--gender, religion, race, age, ethnicity, etc.

Susan recommended all diversity training in 2004 be done by VPs and BSOs in addition to the training staff. Prior to the training, she will meet with each VP and BSO to give them insight and specifics into employee perceptions regarding diversity at LWC and discuss with them what they can do to overcome any negative perceptions.

NLP Subteam Updates--Susan Lehmann

Susan provided copies of a spreadsheet showing status of NLP subteams.

Subteam leaders will e-mail Susan status updates by Friday, October 31, and Susan will update the spreadsheet and redistribute.

Steve Hubbs provided copies of his 10/27/03 revision of Systems-Based Management (Organizational Structure Subteam) and asked ELT members to provide comments asap. This subteam will meet one more time and bring a recommendation to ELT within the next two weeks.

Karla Teasley provided copies of the LWC Corporate Measures (Corporate, System and Process Measures Subteam) and asked ELT members to provide comments asap.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the November 3, 2003 ELT meeting.

Agenda for November 3, 2003 ELT Meeting—Susan Lehmann

Bill will e-mail the agenda for the November 3, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes November 3, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Greg Heitzman for Steve Hubbs
Attendees: Kate Farrow, Nora Freeman, Amber Halloran, Greg Heitzman, John Huber, Susan Lehmann, Roger LeMaster, Bill Meeks, Bob Miller, Mike Sturgeon, Karla Teasley

***Review Minutes and Agenda**

Minutes from the October 27, 2003 ELT meeting were approved with the following revision:

Under "Follow-Up on Ron Crouch Presentation/Code of Ethics Issues," second paragraph, minutes will be revised as follows: "Susan recommended that all diversity training in 2004 be done by VPs and BSOs in addition to the training staff.

Agenda for this meeting was discussed and approved.

2004 Budget Update--John Huber, Amber Halloran

Amber provided information on the budget which will be presented at the Special Board Meeting on Tuesday, November 4.

ELT members should begin work to identify budget cuts. Susan Lehmann will schedule an ELT meeting to review progress the week of November 17. This effort is to be completed by December 1.

2003 Quality Awards & Recognition Budget--Susan Lehmann

Susan provided copies of and the group discussed a Summary of Quality Awards and Recognition Programs.

ELT agreed to discontinue funds for quality awards and recognition through the end of the year. This does not apply to awards/recognition that have already been approved.

This decision will be included in a communication to all employees regarding dividend shortfall and additional steps we must take during the remainder of 2003 and in 2004 regarding budget cuts. The communication will be sent to all employees after the Special Board Meeting on Tuesday, November 4.

Nora Freeman will provide information on number of LWC employees per customer and million gallons of water sold per LWC employee. This information will help us as we determine a target for cuts.

C3 Certification Audit Recommendation--Karla Teasley/Mike Sturgeon

Mike Sturgeon provided copies of and discussed C3's responses to audit recommendations.

ELT agreed to certify C3 subject to completion of the empowerment pilot. Mike will report to ELT on the results of the empowerment pilot by the end of the first quarter of 2004.

System Certification Requirement to Demonstrate Actions Taken in Response to OEI and ICS Results--Bob Miller/Roger LeMaster

Roger reported on audit steps taken to examine the requirements to demonstrate actions taken in response to OEI and ICS results. Roger looks for actions systems plan to take or have taken to improve scores on the OEI and ICS under Quality of Work Life, Customer Focus, and Partnership among Employees. Systems are primarily focusing on improving communications and relationships with other business systems.

H2 Certification Audit Recommendation--Susan Lehmann/Roger LeMaster

Roger had no specific recommendations regarding this audit. This is the first system audit resulting in no findings or recommendations. Nora and her team are to be commended for this achievement.

ELT agreed to certify H2-Supporting Organizational Effectiveness.

Open Time

NLP Update--Susan Lehmann: Susan provided copies of an update on NLP subteams.

Metro United Way Campaign--Greg Heitzman: Greg provided a verbal update on the MUW campaign at LWC.

Review Bin List--All

The group discussed items on the BIN List and the agenda for the November 10, 2003 ELT meeting

Agenda for November 10, 2003 ELT Meeting--Bob Miller

Bill will e-mail the agenda for the November 10, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes November 10, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

Minutes from the November 3, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Review Board Meeting Agenda--John Huber

Agenda items include discussion/adoption of the 2004 Annual Budget.

Certification Audit Schedule through July, 2005--John Huber

John Huber discussed his recent e-mail regarding two-year cycle for certification audit schedule.

ELT agreed to extend the cycle to July 1, 2005. CBSOs should communicate the schedule to the BSOs and advise them to do periodic checks on their systems to make sure things are operating as they should, since under this schedule, some systems won't be audited for another 1.5 years or so.

Review Greenbacks Report--Amber Halloran

The Greenbacks Report was not available, but Amber did provide copies of and discuss the revenue report for October.

Amber will provide the Greenbacks Report to ELT members this week.

2004 Budget Work--ELT

The group discussed budget reductions for 2004--our target for reductions is \$1.5 million. John Huber noted that if we sell the amount of water forecast for next year, if we operate within budget next year, and if we are able to reduce costs beyond that by \$1.5 million, we will be able to pay the dividend this year and next year without having to involve the infrastructure reserve fund.

Two sub-teams were formed today to report to ELT on suggested cuts/eliminations and the benefits/impacts. The sub-teams will identify areas top down--not bottom up--and also will look at processes and outsourcing. The sub-teams will consist of the following:

1. Capital Sub-Team: Karla Teasley as Leader, Bob Miller, Steve Hubbs, Jim Smith, Bill Meeks, and John Huber.
2. The O&M Sub-Team: Greg Heitzman as Leader, Karla Teasley, Susan Lehmann, Steve Hubbs, Bob Miller, Amber Halloran or her appointee, and John Huber.

Susan Lehmann and Kathy Holder will focus on restraints from the Human Resources perspective.

Amber distributed copies of minutes from a special BSO meeting on 11/7/03 which contain a list of items recommended to ELT for consideration/further study and additional list of items not receiving consensus. John Huber will advise regarding items on the list which might be moved from one area to the other.

Bob provided copies of and discussed the problem statement and root causes. Bob will revise the statement as discussed by ELT and present the revised statement to John Huber for approval. The problem statement will be used as a communication to employees.

Bob will develop Scenario I, Scenario II, and Scenario III for reducing costs.

Bob will have Jim Brammell and Don McKay discuss LWC's policy on take-home vehicles and pool cars and consider alternatives regarding what we need and what we can do differently.

John noted that as we make decisions regarding budget cuts/eliminations, we must keep in mind our goals are to be a Total Quality Organization, provide high levels of customer satisfaction and appropriate returns to our investor.

Open Time

DBP Rule--Steve Hubbs: Steve reported on the status of the proposed Disinfection By-Products Rule.

Review Bin List—All

ELT members will e-mail Susan any updates to the BIN List, and Susan will e-mail the agenda for the November 17, 2003 ELT meeting

Agenda for November 17, 2003 ELT Meeting—Susan Lehmann

Susan will e-mail the agenda for the November 17, 2003 ELT meeting.

<p>*Decisions made by ELT and items requiring action are "shadowed" in these minutes.</p>

ELT Meeting Minutes November 17, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Steve Hubbs
Scribe: Greg Heitzman
Timekeeper: Karla Teasley
Attending: Greg Heitzman, Kathy Holder (9:00), Steve Hubbs, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

***Review Minutes and Agenda**

The meeting started at 8:30, following the recognition program for the tapping teams.

Minutes from the November 10, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Board Nominees--John Huber

Gerald Martin has been nominated to fill the position currently held by Steve Gault, whose 4-year term expired in October. Marita Willis will be filling Jack Segell's vacant position. Terms of the new nominees will run through April 30, 2007 and April 30, 2005. Approval of these nominees is expected prior to the December Board meeting.

Emergency Response Plan Update-Glen Mudd, Angela Harris

Glen Mudd presented a summary of the Emergency Response Plan, reflecting requirements for security elements from acts of terrorism as well as natural/technological disasters. Questions centered around how the documentation will be kept current, and how staff will be trained to respond to the call.

The call-out protocol for notification needs to be clearly defined in the plan, from supervisor level to the CEO. This will be added to the Plan.

A team including Don McKay (leader), Greg Heitzman, John Huber, and Jim Smith will conduct a review of the vulnerabilities identified in the plan. This review will consider remedial measures to address identified vulnerabilities.

DPT Strategic Partnership Agreement—Greg Heitzman, Billy Meeks

Greg and Billy provided an update of the DPT's Strategic Plan. Greg identified the major changes in the Plan. Tactics added include 1.1.1 and 1.1.6. Minor revisions were made to tactic 2.5.2.

The team discussed the focus on creating a positive environment for female workers in all union classified positions (tactic 1.2.2), and that the desired outcome of this tactic should focus on creating a positive culture of opportunity for all in the union workforce. The team also discussed recruiting effectively to provide a more diverse workforce for advancement in the union classifications.

The team discussed building an assessment of progress with the DPT Strategic Plan into the Certification audit (ELT issue). Billy indicated that the union leadership has adequate access to company financial information. Resources for implementing this plan will include allowing union DPT team members time to be available for meetings.

ELT endorsed the plan, and committed to integrate the plan into the operating plans through BSOs and POs. DPT will reconsider tactic 1.2.2 (broaden) and tactic 1.2.1 (recruitment).

Unaccounted For Water-Mike Sturgeon, Amber Halloran, Sherry Dukes

Amber advised that the water usage at the plant had been inappropriately accounted for, resulting in a decrease in unaccounted-for water of about 2% for the year. Mike and Sherry presented a report on activity for leak detection (current and operating as in previous years), critical main survey (on schedule), and meter sample testing. The meter exchange program was abolished in 2001 in anticipation of the AMR project.

The group discussed the various sources of unaccounted for water, and changes in metering in the distribution system.

The 1.5 inch and 2 inch meters are currently not being tested, and are being exchanged based on age only. Data currently available is to be evaluated to determine if the volume of water metered impacts the reading efficiency of these meters, and if a dual metric for age and volume metered is appropriate for replacement scheduling.

Review Bin List—All

ELT members will e-mail Susan any updates to the BIN List, and Susan will e-mail the agenda for the November 24, 2003 ELT meeting

Agenda for November 24, 2003 ELT Meeting—Susan Lehmann

Susan will e-mail the agenda for the November 24, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes November 24 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Steve Hubbs
Attendees: Barbara Crow, Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Minutes from the November 17, 2003 ELT meeting were approved with the following changes: Under discussion regarding Board Nominees, delete parenthetical phrases indicating Gerald Martin is with Hilliard Lyons and that Marita Willis is with PNC Bank. Correct spelling of Jack Segell.

Agenda for this meeting was discussed and approved.

Greenbacks Report—Amber Halloran, Sue Purdy

Amber and Sue provided copies of and discussed the LWC Financial Highlights for October, 2003. We are down \$3.3M for 2003 YTD in water revenue.

Kathy Holder will check into penalties due LWC from Lake in the Woods and South Hill Apartments for past-due payment of water bills. An agreement may have stated that no past-due penalties will be collected—only amount charged for water consumption.

On Page 4, Amber will include actual number of employees per core in future Financial Highlights.

Fund for the Arts—Barbara Crow

Barbara reported that the 2004 Fund for the Arts campaign chair is scheduled to come from Business Resourcing. The campaign usually runs the first week in June.

Barbara and John will work on timing of the campaign for 2004.

Bob Miller will serve as Chair for the 2004 campaign.

EPA's Support of Conservation—John Huber

John reported the MTBE issue likely will be the vehicle to stop the Energy Bill—HR 6—from passing.

Budget Updates--ELT

Bill Meeks reported he is getting more and more comments from union members regarding job security in response to the recent e-mails on the budget and cost cutting.

Susan reported on a meeting she had with MSD regarding their cost reduction strategies.

ELT agreed to communicate to employees what we are considering doing regarding cost reductions.

The O&M and Capital Budget Sub-Teams will report to ELT on Monday, December 1, 2003.

Each CBSO will bring to the December 1 ELT meeting a proposed list of cuts for their core for 2004.

Each BSO should send their reported savings to Amber Halloran for validation. Amber will combine them into one list for ELT review.

Open Time

Report on Metro United Way Campaign at LWC—Greg Heitzman: Greg provided a 2003 Metro United Way Campaign Summary. We had a 14 percent increase over 2002 pledges of \$59,488 and a 2 percent increase over the \$66,000 goal set by ELT for 2003.

Wholesale/Retail Water Sales—John Huber: John provided copies of e-mails showing 2002 wholesale water sales and revenue and 2002 retail water sales and revenue.

Health Insurance Premium for 2004—Bob Miller: Bob reported that our cost for health insurance in 2004 will be less than budgeted.

ELT agreed that any savings realized in health insurance premium in 2004 should be credited to the Contingency Fund.

Upcoming Retirement—Steve Hubbs: Steve announced his plans to retire. He has not set a date, but will retire in the not-too-distant future. Steve will continue to work on the ELT O&M and Capital Budget Sub-Teams. John noted the many contributions Steve has made during Steve's 29 years of employment at LWC.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the December 1, 2003 ELT meeting

Agenda for December 1, 2003 ELT Meeting—Bob Miller

Susan will e-mail the agenda for the December 1, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes
December 1, 2003

CORRECTED—Under O&M Budget Reduction Sub-Team Discussion, change 8th paragraph to read, “Greg will coordinate. . . .”

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Steve Hubbs
Attendees: Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs, John Huber, Susan Lehmann, Bob Miller, Jim Smith, Karla Teasley

***Review Minutes and Agenda**

Minutes from the November 24, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Capital Budget Reduction Sub-Team—Karla Teasley

Karla provided copies of and discussed the Proposed 2004 Short-Term CIP Reductions. Revisions to the list are:

Item B1 19, remove “Dictaphone Recording Equipment.”

Items 19, correct Asset Life of entries dealing with vehicles.

Item B1 23, remove “Safety & Security Imp.-Annual.” This item is addressed in Item B1 22.

Item B1 30, “HR Info. System-HRIS,” Bob Miller will follow with Tony Gregory on this item and get back to Susan. Change explanation to show that this item will be reduced in 2004 and resumed in subsequent years.

O&M Budget Reduction Sub-Team—Greg Heitzman

Greg provided copies of and discussed the 2004 O&M Reduction Strategy. Revisions to the list are:

Line 7, “Reduce Perfect Attendance Incentive for Nonunion, Nonmanagement,” shift the green highlighting to indicate Level 1 Savings is recommended.

Line 9, “Reduce or Eliminate Tuition Reimbursement,” the O&M Sub-Team will explore options to this.

Lines 11 and 12, “Shift Maintenance Crews to Capital Crews (flexibility),” provide information on impact of crews at Level I Savings.

Greg and Karla will make sure no double counting has been done on the two lists (Capital and O&M) regarding vehicles.

Amber will provide an updated list of 2004 BSO proposed additional budget cuts, adding her area, Tony Gregory’s area, and Karla’s BSO areas.

Greg will add Susan Lehmann's non-FTE items to his list.

Greg will coordinate changes discussed and present the revised list to John.

Greg's sub-team will work to establish implementation teams to validate the 28 O&M items and turn them into reality.

Seasonal employees who are being eliminated should be advised by December 17. We should also make their parents aware that they are being eliminated.

Review Bin List—All

The group will review the BIN List and send Susan their suggested agenda items for the December 8 ELT meeting.

Agenda for December 8, 2003 ELT Meeting—Bob Miller

Bill will e-mail the agenda for the December 8, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes December 8, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Steve Hubbs
Attendees: Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs,
Susan Lehmann, Roger LeMaster, Joan Malone, Don McKay, Bill Meeks,
Bob Miller, Scott Muhlenbeck, Sue Purdy, Karla Teasley

***Review Minutes and Agenda**

Minutes from the December 1, 2003 ELT meeting were approved with the following revision: Under O&M Budget Reduction Sub-Team, change 8th paragraph to read, "Greg will coordinate changes discussed and present the revised list to John." Agenda for this meeting was discussed and approved.

Review Board Meeting Agenda—Bob Miller

Bob reported that two new Board members will be sworn in at tomorrow's Board meeting. Agenda items for the meeting include Cost Reduction Plan for 2004, Water Rates and System Development Charge, and 2004 Service Installation Fees.

Review Greenbacks Report—Amber Halloran, Sue Purdy

Amber and Sue provided copies of and discussed the LWC Financial Highlights for November, 2003.

Risk Assessment & Internal Control Evaluation—Roger LeMaster, Scott Muhlenbeck

Roger provided copies of and discussed the LWC Internal Audit Risk Assessment and Internal Control Evaluation dated December 4, 2003 which will be presented to the Audit Committee in March, 2004.

Roger will change the fourth bullet under Assessment Results to read, "Develop procedures for preventative maintenance of transmission mains and valves."

This item will be added to the BIN list for January when ELT will discuss who will draft a letter to the Audit Committee reinforcing the report.

Backup Recorder—ELT

ELT agreed to rotate "backup recorder" in the matrix of ELT roles. The "backup recorder" will take minutes of ELT meetings when Joan Malone is not available.

Open Time

Cost Reductions/Seasonal Employees for 2004—Bob Miller: Bob asked that an item be put in the minutes that Susan Lehmann will follow up with seasonal employees who will not be called to work at LWC in 2004. She will advise them and their parents as soon as possible.

Technology Transfer Workshop—Steve Hubbs: Steve reported he plans to attend a workshop on Technology Transfer in Eastern Europe in early 2004. The workshop is being sponsored by NATO.

Recent E-Mails regarding Cost Reductions—Susan Lehmann: Susan got feedback that recent e-mail communications did not reach all employees even though the e-mails were sent to "Everyone LWC." It was noted that these communications also appear in *NewsLeaks*.

CBSOs will remind BSOs and POs that e-mails should be shared with *everyone*, especially those who do not have access to e-mail.

Susan will also discuss this at the next BSO and PO meetings.

ELT agreed it would be timely to communicate the status of O&M and Capital Budget reductions to employees this week, and that the communication probably should come from John Huber.

FINS Project Recognition Award—Bob Miller: Bob announced that the recognition award for the FINS project will go out this week. He thanked ELT for their support. This recognition was approved prior to the freeze on recognitions in late 2003.

Regarding the second piece of the recognition request that ELT did not approve, Bob recommended adding the hours the employees worked to their PTO bank for 2004 and including Amber in the recognition. He wanted ELT's feedback on this.

John will make the final decision regarding the second piece of the recognition, but ELT supports adding the time to PTO for 2004 if John approves.

Bob will provide a list of the persons and the number of hours involved.

An article will appear in *NewsLeaks* about the recognition that is being awarded this week.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the December 15, 2003 ELT meeting

Agenda for December 15, 2003 ELT Meeting—Susan Lehmann

Susan will e-mail the agenda for the December 15, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes December 15, 2003

Roles

Leader: Susan Lehmann
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Greg Heitzman
Timekeeper: Bob Miller for Steve Hubbs
Attendees: Susan Camp, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Roger LeMaster, Joan Malone, Bill Meeks, Bob Miller, Scott Muhlenbeck, Rhonda Plunkett, Kathy Schroeder, Karla Teasley

*Review Minutes and Agenda

Minutes from the December 8, 2003 ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

ELT Focus Group Meeting Reviews—Susan Lehmann, Rhonda Plunkett

Rhonda Plunkett provided copies of and discussed Summary of 2003 ELT Communication Forums and Pipeline Meetings. Bob noted the importance of ELT addressing issues promptly.

Susan will send minutes from the focus group sessions immediately after the meetings so ELT can address the issues promptly.

Bob Miller will follow with Roger LeMaster on auditing contractor bids—different expectations across processes and overtime call-out issues.

Susan will follow on concerns expressed about the dress code.

The forums will continue in 2004.

Early Retirement Incentive—Susan Lehmann

Susan reported that meetings have been completed with those who are eligible for the early retirement incentive. ELT members noted the meetings were done in a dignified and informative manner, the information was timely and precise, and employees were very appreciative of the information provided.

Representatives will be here this Thursday to discuss outplacement with those who are interested, and CERS representatives will be here in January.

Susan will communicate regularly as she has new information.

Kathy Schroeder will provide ELT members a list of part-time and temporary employees and a copy of the organizational chart.

C1 Certification Audit Recommendation—Karla Teasley

Susan Camp provided copies of and discussed the response to C2 certification audit recommendations. Karla Teasley recommended certification of C1.

ELT agreed to certify C1--Providing & Receiving Customer & Public Information.

I5 Certification Audit Recommendation—Greg Heitzman

Ed Chestnut provided copies of and the group discussed the response to I5 certification audit recommendations.

Greg Heitzman recommended and ELT agreed to certify I5 with the understanding that Action Item under Recommendation #6 be changed to read: "POs coordinate risk mitigation plans with other BSOs" and that I5 will have a follow-up during the third or fourth quarter of 2004 focusing on process documentation, organizational changes, GIS documentation, and quality of work life issues.

Open Time

Seasonal Hires—Kathy Schroeder: Kathy provided a list of seasonal hires for 2004. No one on the list will return in 2004 unless Susan hears from ELT members today. We want to reduce seasonals where it is cost effective to do so.

Relationship with Homebuilders and Developers—John Huber: John reported there is a critical meeting with the homebuilders and developers coming up. We need to explore alternatives for boosting pressure in elevated areas.

Team Effectiveness Survey—Susan Lehmann: Susan handed out the Team Effectiveness Survey forms and asked ELT members to complete the forms and return them to Nora Freeman.

ELT Roles—Susan Lehmann: Susan will update the matrix of ELT roles and provide to ELT members since the roles will change in January, 2004.

Agenda for December 22, 2003 ELT Meeting—Susan Lehmann

Susan will work from the BIN List to prepare an agenda for the December 22, 2003 meeting. She will e-mail the agenda late this week.

NOTE: ELT will not have a quorum to meet on December 29, 2003. The December 22 meeting will be the last ELT meeting in 2003.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes January 5, 2004

To revise second paragraph under "Cost Reductions—John Huber" to read, "Susan requested that the ELT HR/Legal Sub-Team members attend the HR/Legal Sub-Team meeting this Friday."

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Bill Meeks
Attendees: Sandy Beyerle; Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Don McKay, Bill Meeks, Bob Miller, Karla Teasley

*Review Minutes and Agenda

Minutes from the December 15, 2003 ELT meeting were approved with the following revision: Under ELT Focus Group Meeting Reviews, change third paragraph to read, "Bob Miller will follow up with Roger LeMaster on auditing contractor bids to determine if a correlation exists based on project management."

Agenda for this meeting was discussed and approved.

Preliminary Engineering and Capital Draft Guidelines—Amber Halloran

Amber provided copies of and the group discussed Accounting Guidelines for: (1) Retirement of Assets, (2) Preliminary Engineering Projects, and (3) Capital Projects.

Budget Department will work with the BSOs for quantification on preliminary engineering areas affected by Item 2. This item will be added to the BIN List.

We will report to the Audit Committee and Board of Water Works on implementation of changes to the accounting guidelines.

ELT members will provide individual input to Amber. Amber will revise the drafts and bring them back to ELT in two weeks.

Accident Policy Review—Don McKay

Don provided copies of and discussed the updated draft Vehicular Accident Policy.

Kathy Holder will review and give guidance on Items 5.0 and 6.2.

Don will add a clause dealing with accidents involving alcohol/drugs.

Don will make other changes/additions as discussed and e-mail a revised draft to ELT members.

Open Time

Travel Authorizations for Budgeted Travel—Bob Miller. Bob stated he has two TAs to approve which are budgeted—travel to be in late January by a total of four people.

ELT agreed that all budgeted travel for 2004 that will exceed \$500 will be reviewed by ELT on a case-by-case basis until the O&M Budget Sub-Team presents their recommendations.

ELT approved Bob's request as follows: to allow two persons to attend the Oracle seminar and one person to attend the National Safety Council meeting.

ELT approved John Huber to attend the Water for People meeting in mid-January. Mr. Huber is being elected President of Water for People.

Cost Reductions—John Huber: We need to finalize and document savings and have any modifications to the budget in place asap on O&M, part-time, temporary, and seasonal labor. CBSOs should look at these cost reductions and make sure they are moved as close to January as possible. CBSOs should get this information to Susan by Thursday and she'll provide an update on Friday.

Susan requested that the ELT HR/Legal Sub-Team members attend the HR/Legal Sub-Team meeting this Friday.

John will send a communication to employees after the January 13 Board meeting summarizing cost reduction strategies, including labor-related O&M cost reduction possibilities.

Home Builders Association—John Huber: John reported he had a meeting with the HBAL recently, and we must work to deliver outstanding items to them in a timely way and let them know how we will deal with pressure requirements.

Right Management Meetings—ELT: ELT meetings with Right Management will be postponed until mid-February.

Incentive and Shared Goals for 2004—John Huber: ELT members will provide a draft to Nora regarding the Light Switch goal and other shared and incentive goals with the next two weeks showing year-end updates and proposed 2004 goals.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the January 12, 2003 ELT meeting

Agenda for January 12, 2004 ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the January 12, 2003 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes January 12, 2004

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Bill Meeks
Attendees: Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley

*Review Minutes and Agenda

Minutes from the January 5, 2004 ELT meeting were approved with the following revision: Change second paragraph under "Cost Reductions—John Huber" to read, "Susan requested that the ELT HR/Legal Sub-Team members attend the HR/Legal Sub-Team meeting this Friday."

Agenda for this meeting was discussed and approved.

Review Board Meeting Agenda—John Huber

Agenda items include discussion of employee health, dental, and disability insurance renewals, and LWC's cost reduction plan.

Review Unaudited Year-End Financial Results—Amber Halloran, Sue Purdy

Amber provided copies of and discussed the Organizational Income Expense Analysis for December, 2003, the LWC Dividend Calculation for 2003, and the LWC Dividend Calculation for 2004. We are projecting a gap of of \$2.1 million for 2004 net income.

Upcoming Retirement Celebrations—Susan Lehmann

Susan noted that past practice has been to have a ½ day celebration with cakes, punch, etc. Since several employees will be leaving at the same time, we need to establish a policy regarding celebrations for those taking the early retirement incentive.

ELT agreed to have one celebration at Third Street, one at Crescent Hill, and one at Allmond Avenue (Bullitt County retirees will be included in the AA celebration) during the last week in January. Each celebration will last no longer than 1 1/2 hours. Light refreshments such as cake and punch will be served.

Susan will schedule the celebrations at days/times appropriate for each location, and communicate this information in next week's issue of NewsLeaks

Update of Portable History Display—Barbara Crow

Barbara has a display that was prepared for the City of Louisville's Millennium Celebration a few years ago which she plans to update and use during LWC's 150th anniversary celebration. The display will appear in some of the public libraries, some schools, the Filson Club, and at LWC locations.

Barbara asked ELT for input on updating the display. Some suggestions offered by ELT were:

- Add a Year 1854 item and change the title of the display to show 1854-2004.
- Add an item on Charles Hermany.
- Add an item regarding merger of the water districts into LWC in the 1960s.
- Delete the item regarding the 1978 snow and add an item discussing the 1977 freeze.
- Add to the 1860 item a paragraph regarding number of customers and miles of main then and number of customers and miles of main now (2003).
- Add an item on the union and the partnership with LWC.
- Change the picture under item titled 1937 Flood—the picture was actually taken during the 1964 flood.
- Add an image of a Pure Tap bottle.

Barbara asked ELT members to provide additional changes/additions/comments.

Open Time

Update on General Counsel Position—Susan Lehmann: Susan stated we are conducting interviews now through the first of February. Our goal is to extend an offer in February.

Compensation Committee Meeting—John Huber: John noted the Compensation Committee meeting is scheduled for Monday, February 9. VPs should provide information to Nora by January 20 on 2003 performance and proposed 2004 goals for the Corporate Performance Goals, President and VP Shared Goals, and Executive Incentive Goals. The subject matter for 2004 goals will be the same as for 2003. John and Susan will work on potential changes regarding who is responsible for each goal.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the January 20, 2004 ELT meeting

Agenda for January 20, 2004 ELT Meeting—Karla Teasley

Since Monday, January 19, 2004 is a holiday, the next ELT meeting is scheduled for Tuesday, January 20, 2004. Karla will e-mail the agenda for the January 20, 2004 ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes January 20, 2004

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Bob Miller for Bill Meeks
Attendees: Ron Green, Tony Gregory, Greg Heitzman, Steve Hubbs, Susan Lehmann, Joan Malone, Bob Miller, Rhonda Plunkett, Karla Teasley

*Review Minutes and Agenda

Minutes from the January 12, 2004, ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

M/WBE Program Update—Rhonda Plunkett, Ron Green

Ron Green provided copies of the LWC Minority-Owned and Women-Owned Business Enterprise (M/WBE) Program Update. He gave a brief overview of where we are with the M/WBE Program.

Rhonda noted one challenge the M/WBE Team faces is the loss of some team members due to retirements. She asked for ELT's help in identifying potential team members to replace those who are retiring at the end of January.

Review IWR Business Case and Discuss Evaluated Bid Process—Bob Miller, Tony Gregory

Tony provided copies of and discussed the LWC IWR Team Presentation on the Interactive Web Response Business Case. We are seeking to expand our current Internet services to provide customers with the same features available on the Interactive Voice Response (IVR) System. The Board has approved this project, but Bob and Tony noted that as we move forward, we want ELT's support.

ELT agreed to support the project as it moves forward.

In conjunction with this project, we want to update the appearance of our website. We have the capability to do this in-house.

Open Time

Travel Request—Greg Heitzman: Greg has a request for travel for an employee in his core to attend operator certification training in Owensboro.

Since this employee has attended operator certification training in the past six months, ELT agreed that Greg should get more information and make a decision on whether to send the employee for a second training session or have the employee study on his own and take the certification test in Frankfort.

Strategic Planning Team Meeting—Bob Miller: Bob stated the SPT meeting is scheduled for January 21, 10:00 a.m. to 12:00 noon.

Bob asked that ELT members set up to one hour aside to prepare for the meeting using the e-mail/Internet links he sent earlier.

The SPT will discuss criteria contained in Bob's e-mail/Internet links to determine whether we want to update the 2004-2008 Plan.

Special Board Meeting—Bob Miller: A special Board meeting has been scheduled for Monday, January 26, 2004, 4:15-5:15 p.m. We did not have a quorum present at the January 13, 2004, Board meeting, so projects/issues presented at that meeting will be reviewed at the Special Board meeting for authorization.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the January 26, 2004, ELT meeting

Agenda for January 26, 2004, ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the January 26, 2004, ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes January 26, 2004

Roles

Leader: Karla Teasley
Facilitator: Nora Freeman (on call)
Recorder: Joan Malone
Scribe: Bob Miller
Timekeeper: Bill Meeks
Attendees: Nora Freeman, Amber Halloran, Greg Heitzman, Kathy Holder, Steve Hubbs, John Huber, Susan Lehmann, Joan Malone, Bill Meeks, Bob Miller, Sue Purdy, Karla Teasley

*Review Minutes and Agenda

Minutes from the January 19, 2004, ELT meeting were approved as submitted. Agenda for this meeting was discussed and approved.

Review Agenda for Special Board Meeting—Bob Miller

The agenda for the special Board meeting today at 4:15 p.m. includes reviewing minutes from the January 13, 2004, meeting, taking action on recommendations from the Board members who attended that meeting, and reports from Bob Miller on the Bullitt County CDBG/Coagulation Basin and the Mac Construction bid issues.

Review Greenbacks Report—Amber Halloran, Sue Purdy

Sue and Amber provided copies of and discussed the LWC Financial Highlights for December 2003, Total Capital Program December 2003 YTD, and LWC Dividend Calculation—City of Louisville—Budget for Accrual 2003. Amber noted we are preparing for the arrival of the auditors on Monday, February 2.

Quarterly Review of ELT Goals for 4th Quarter and Year-End—ELT, Nora Freeman

Nora provided copies of and discussed 4th quarter and year-end performance results for the Executive Incentive Goals, the President/VP Shared Goals, and the Corporate Performance Award Goals. The Light Switch Goal for the Executive Incentive Goals was not met.

Nora did not have sufficient information to calculate performance on some of the goals. She will provide an update on 2003 performance at the February 2 ELT meeting.

The group discussed draft 2004 goals. Nora will revise the 2004 goals as discussed by ELT. CBSOs should provide Nora any additional information needed by Thursday, January 29, so Nora can finalize the goals for ELT discussion on February 2.

ELT also discussed the CSI Service Total for 2004 Corporate Performance Award, the Total CSI for the 2004 Executive Plan Goals, and ICS Goal for 2004.

Agenda for February 2, 2004, ELT Meeting—Karla Teasley

Karla will review the BIN list and e-mail the agenda for the February 2, 2004, ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes February 2, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Visitors: Kathie Johnson, Tony Gregory, Amber Halloran

Minutes Approved and Agenda Reviewed

Minutes from the January 26, 2004, ELT meeting were approved as submitted. The Agenda for this meeting was discussed, and Bob Miller asked that the Outcome for the Warehouse Management and Mobile Supply Chain Business Case be amended to show "Decision by ELT for approval and forwarding to the Board." The agenda was approved with that change.

Warehouse Management and Mobile Supply Chain – Bob Miller, Tony Gregory

Tony Gregory provided copies of the Information Technology Strategic Plan - Warehouse Management Systems document to ELT. Discussion followed regarding the options, costs and merits of either keeping the status quo of manual processes versus automating the work using Oracle with Solbourne as the sole source provider, or possibly bidding the project. If used, Solbourne would provide a turnkey operation for LWC. ELT had concerns over the costs that would be incurred, and asked for additional information:

- Quantifying the reduction in adjustment following annual inventory count
- Documenting and clarifying the ongoing relationship with Solbourne
- Analyzing potential reduction in the number of warehouses required
- Describing broader utilization of system

Bob Miller and Tony Gregory will update the Business Case to reflect these recommendations.

Preliminary Engineering Projects and Capitalization Policy – Amber Halloran

Amber Halloran provided copies of a handout on Revision to Retirement of Assets, noting that half of the Retirement of Assets budget has been distributed to the operating areas to cover the labor costs associated with retiring assets. The remainder of the budget will be used for the undepreciated value of retired assets. She also stated that there had been no further changes to the draft capitalization policy. A lengthy discussion ensued regarding the potential effect of the policy on 2004 Operations and Maintenance Expenses. Amber Halloran noted that these changes are reflected in the most recent estimates provided to the ELT. The ELT also discussed their desire to capitalize the entire costs associated with capital crews. Bob Miller and Amber Halloran agreed to seek a written opinion from the outside auditors on this matter.

Amber Halloran will pursue this with Ed Olliges of Crowe Chizek and advise ELT.

Discuss and Finalize 2004 Shared VP and Incentive Award Goals – Nora Freeman

Nora Freeman distributed the Fourth Quarter 2003 Results for the Incentive Plan, the Shared President and Vice President Goals, and the Corporate Performance Award.

Regarding the Capital Improvement Program Spending Goal: the 2003 Capital Budget results need to be reviewed because the Total Amount Committed is less than the Total Amount Expended. Bob Miller will verify with Amber Halloran.

Regarding the O&M Cost per Customer portion of the Corporate Performance Award, John Huber advised Bob Miller to subtract off the cost of ELT/BSO incentive award and add back the pumping and treatment cost of water that was budgeted but not treated, pumped, and sold. Bob Miller will also determine if the 2003 Early Retirement Incentive was included in O&M cost. Susan Lehmann will confirm past procedures for computing number of employees.

Regarding the 2004 ELT Cost of Risk Goal: John Huber asked for information on the components of Risk System Administrative Costs and Legal Administrative Costs. These are composed of Labor and Labor Related Overhead.

Regarding the 2003 Cost of Risk Results: Karla Teasley asked how was it that Don McKay's system results were over budget yet cost of risk results were under budget? Bob Miller agreed to provide a detailed explanation on that. In summary, the 2003 allocation of budget to business systems was greater than 2003 allocation of costs; therefore, unallocated costs that remained in Don McKay's system drove his area over budget. Yet when we added the expenses and budget from the other systems we were under budget from a corporate perspective.

Open Time

Schedule for Finalizing Operating Plans – The ELT agreed that Operating Plans should be finalized between Business System Owners and their Core Business System Owner by March 1, 2004 unless authorized as exception until March 31, 2004.

Partnership for Safe Drinking Water – Greg Heitzman noted that funding had not been included in the 2004 budget to continue participation in the Partnership for Safe Drinking Water. The ELT agreed to continue participation for the \$3,300 membership fee.

Reorganization Issues – The Human Resources Legal Team agreed to meet again on Friday.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the February 9, 2004, ELT meeting.

Agenda for February 9, 2004, ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the February 9, 2004, ELT meeting.

<p>*Decisions made by ELT and items requiring action are “shadowed” in these minutes.</p>

ELT Meeting Minutes February 9, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Visitors: Kathie Johnson, Angela Harris, Rhonda Plunkett, Kathy Schroeder, Liz Gross

Minutes Approved and Agenda Reviewed

Minutes from the February 2, 2004, ELT meeting were approved as submitted. The Agenda for this meeting was discussed and approved.

Review Board Meeting Agenda – John Huber

John Huber reviewed the agenda for the February 10 Board meeting with ELT, and expressed his concern that a quorum may not be present. Mr. Huber would like to bring information on the budget and reorganization to the Board, and will propose we take \$500,000 out of the infrastructure replacement reserve budget this year, with the understanding that amount would be reinstated in the 2005 infrastructure replacement reserve budget. He would also like to show the reductions in number of positions, labor, non-labor O&M expense and depreciation savings that have occurred as a result of early retirements and other expense reduction efforts. After the early retirements, 457 full time positions remain.

ELT agreed to have the revised budget ready in March for the Board of Directors. Greg Heitzman proposed blocking out Friday mornings to meet and finalize changes to the budget.

Safety Shoe Policy

Angela Harris provided copies of a "redlined" draft of a proposed revision to the Safety Shoe Policy. The proposed policy would change the language to allow for one pair of shoes per year at a cost of up to \$120, whereas some employees were using the \$120 to purchase two pairs of cheaper shoes thereby using the full \$120 per year.

After some discussion, Angela was asked to incorporate the comments and suggestions from ELT in another iteration of the policy. This iteration will include identifying the nonunion positions eligible for safety shoes to provide better control in administering the policy (a list of those positions to be attached to the policy), and reducing the amount paid by LWC to a lower amount based on average cost for one pair of appropriate safety shoes. Also the policy will make it mandatory the shoes be worn on the job. This item will be added back to the bin list for review within one month

Quality Celebrations – Rhonda Plunkett

Rhonda Plunkett distributed a recommendation made by herself, Susan Camp and Jim Asseff. They propose to reduce quality celebrations from \$12 to \$8, and initiate a peer-to-peer program mid year. This would reduce the \$47,800 budget by \$14,000, or a reduced Quality Celebrations budget of \$33,800. The recommendation made by Rhonda's team included monthly recognition of employees and teams, with monthly individual and team winners eligible for the honor of Employee or Team of the Year. They also recommended LWC hosting an Annual Holiday Awards Recognition Dinner in December to recognize Employee of the Year and Team of the Year. After discussion, ELT agreed these changes will not be implemented in 2004, but will be considered again in 2005. For 2004, Rhonda will implement the quality

celebrations in 2004 by restructuring the current program to allow for team recognitions, scaled down quality celebrations, and the peer to peer program at mid year.

Non Union Perfect Attendance Bonus – Kathy Schroeder and Liz Gross

Kathy Schroeder distributed a proposal on the Attendance Bonus outlining the current policy, benchmarking with other local companies, possible options, and a recommended pilot program. This would be for the 2004 period (recognized in 2005), and would not affect 2004 payouts for 2003 attendance. An attendance bonus of approximately \$23,000 was paid in 2003 for 2002 perfect attendance, and approximately \$23,000 will be paid in 2004 for 2003 perfect attendance.

Benchmarking shows that LG&E's perfect attendance bonus is limited to union employees (1 day per year); MSD has no plan recognizing perfect attendance; Dallas and Memphis offer up to 4 days per year (one per quarter); and Chicago, Denver and Cincinnati do not offer a plan.

Greg proposed that all non-exempt, non-union employees be given a "true PTO" where the available hours are used for vacation and absences due to illness, medical appointments, etc. instead of the current practice of charging time to PTO hours and Sick hours. If this plan is adopted, existing employees could be paid for days that exceed the specified number of "true PTO" days. This would not apply to new hires. Absences with advance notice would be considered Planned Time Off, whereas absences with no advance notice would be considered Paid Time Off.

John Huber said if we are eliminating or revising the perfect attendance bonus, a timely communication to employees is important to build expectations for 2005.

Kathy Schroeder will draft a communication to employees about the perfect attendance bonus and a revised proposal for 2004 for discussion at an upcoming ELT meeting. Kathy will touch base with Amber Halloran and Tony Gregory to assure no program changes in the software will be required. Bob will confirm when we book the costs for paying the current bonus.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the February 16, 2004, ELT meeting.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the February 16, 2004, ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes February 16, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Visitors: Kathie Johnson, Kathy Schroeder, Jeanie Adkins (Mercer), Roger LeMaster, Don McKay, Claudette Doyle

Minutes Approved and Agenda Reviewed

Minutes from the February 9, 2004, ELT meeting were reviewed. Susan Lehmann asked that the minutes be corrected as follows: first page, first line under the Quality Celebrations heading, change Susan Lehmann to Susan Camp. The minutes were approved with that correction. The Agenda for this meeting was discussed and approved.

Banding for Management Level Compensation – Kathy Schroeder and Jeanie Adkins of Mercer Management

Kathy Schroeder distributed a proposal on compensation banding, and walked ELT through the proposal. Compensation banding is the practice of grouping positions together for common reward treatment. Currently, 36% of utility companies are using pay banding, and 9% are considering it. LWC's jobs are priced in accordance with market pricing surveys which include all markets in the southeast region. However, Louisville's salary market is consistent with national survey results. Banding will provide flexibility and some manager discretion in the amount of pay increase employees receive. The new salary increase matrix provides a salary increase range based on performance and market pricing. LWC's pay philosophy is based on paying wages at the market range. This will place more responsibility on the managers to make decisions on pay increases tied to overall performance management.

The pay banding plan will be implemented for 2003 performance for salary increases effective April 1, 2004. Greg Heitzman asked that Human Resources provide some guidance on the use of rounding up or down on goal results in order to make appropriate decisions in using the merit matrix. Kathy Schroeder said that information will be provided.

Kathy Schroeder said this is a pilot program for LWC management, and adjustments will be made to it as needed.

ELT supports the banding for management level compensation as presented.

Non Union Perfect Attendance Bonus – Kathy Schroeder

Kathy Schroeder distributed a draft communication regarding the Perfect Attendance Bonus for 2004 and asked for ELT feedback following the meeting. The recommendation is for 2004 perfect attendance award to be 1.5 days instead of 3 days. Employees with perfect attendance for 2003 will be awarded 3 days in accordance with current policy. Payment to non-union, non-exempt employees for 2003 sick leave hours accumulated in excess of 120 will be made in February 2004. The Union attendance plan will remain unchanged.

Some discussion ensued regarding manager discretion in allowing employees to take part of a day off for doctor visits, sick children, etc. but not charge time to sick leave, and the need for procedures that will ensure these situations are handled uniformly across the organization.

ELT supports the proposed perfect attendance plan for 2004. Kathy Schroeder will provide clarification for situations where people need to take time off but not charge it to sick leave and whether they can make up the time within a specified period.

Risk Assessment Management Letter – Roger LeMaster and Don McKay

To develop the management response to the Risk Assessment and Internal Control Evaluation completed on December 15, 2003, Roger LeMaster distributed a draft letter developed by Bob Miller. Bob said the draft was intended for discussion and input by ELT. Roger LeMaster would like to present a management response to the Audit Committee in March.

Bob Miller gave an overview of the draft response, which listed objectives and background of COSO modeling and assessments. ELT members made suggestions that Bob will incorporate into another draft. Bob will add specific actions to each response item. Greg Heitzman will send Bob a draft of the language to be inserted in the response to "Develop procedures for preventative maintenance of transmission mains and valves."

Roger LeMaster said he believes that this type of review should be done once every two years. Karla suggested we should focus on those areas of greatest need annually.

Bob will integrate feedback he received and will send a new draft to ELT for further review. This will be placed back on the bin list for discussion with the next two weeks.

Open Time

John Huber reminded everyone that ELT will meet with Right Management at the University Club at UofL tomorrow, and urged everyone to be on time. Susan will provide an agenda for that meeting.

John mentioned water sales for January are \$350,000 under projections, and also cited the loss of 20,000 manufacturing jobs in Louisville over the past several years. He said LWC needs to sustain the cuts it has made and continue to look for cost savings. LWC may need to consider an interim rate increase. John said a key project is to develop an accurate model of water delivered to the mains and so we can translate that on a regular basis (daily or weekly) into future sales. He wants to assure we consistently report water delivered to the mains for sale, as well as unaccounted for water trends throughout the year.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the February 16, 2004, ELT meeting.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the February 23, 2004, ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes February 23, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bob Miller

Absent: Bill Meeks

Visitors: Kathie Johnson, Don McKay, Sandra Beyerle, Amber Halloran, Sue Purdy

Minutes Approved and Agenda Reviewed

Minutes from the February 16, 2004, ELT meeting were reviewed and approved as submitted. The Agenda for this meeting was discussed and approved.

Motor Vehicle Accident Policy – Don McKay and Sandra Beyerle

Don McKay distributed copies of a revised Vehicular Accident Policy for review, discussion and approval. Under 3.0, Definitions, a Vehicular Accident was defined as an "unintentional" event versus an act of malice which would not be handled under this policy.

Under Item 7.2 concerning the assessment of driver points, accidents involving union employees will be investigated by a team of the process owners for Claims & Recoveries and Employee Health & Safety along with a designee of Local 1683 participating at Level IV involvement.

Some discussion was held regarding how to address instances where employees have accumulated significant points under the old system. Greg felt some counseling should be given to employees having significant points to impress on them the importance of safe driving habits.

Implementation of the new policy will start all employees with a clean slate. Don McKay will check to see what the impact would be if the policy is implemented retroactive to January 1, 2004. Susan Lehmann and Kathy Holder will research the issue of whether driver training required by the policy after certain events should be at employee expense.

ELT approved the revised draft policy. Don McKay will advise the implementation date via email.

Status of 2004 Operating Plans

Karla Teasley reported her BSO's plan to have Operating Plans completed by March 1. However certain systems may need additional time due to the impact of the reorganization on their responsibilities.

Bob Miller said Information Technology has completed its Operating Plan. Amber Halloran and Don McKay have not asked for extensions, but Bob believes Amber may need an extension of time.

Susan Lehmann reported that Rhonda will not have any changes to her Operating Plan, and Kathy Schroeder is integrating Supplying Organizational Effectiveness into Human Resources, and will be complete by Wednesday.

Greg Heitzman said the moves within his organization will require some cutting and pasting to update the Operating Plans.

HR is moving employees to new positions and systems, and the budget group will move the numbers following that.

Employee moves are complete in most instances but still transitioning in some. Mail service transition is underway. .

Greenbacks Report – Amber Halloran and Sue Purdy

Amber Halloran distributed Unaudited Financial Highlights for January 2004 for review and discussion. The auditors have not yet completed their audit, so these figures are not considered final until the audit is complete. Amber does not expect the income statement to change. We are \$389,000 under plan in water sales, but there is a billing adjustment of approximately \$40,000 which will improve the February results.

The newer low flush toilets and water conserving household appliances could be having an impact on water sales. Additional analysis is being conducted to determine any long-term changes to base sales.

Open Time

ELT discussed whether additional cost cuts should be made, and whether LWC should consider an interim rate increase. John said the fundamental question is how much of the change is permanent and how much is related to conservation and other factors.

John reported the Metro Government has established a telephone number, 311, for reporting potholes, traffic light malfunctions, signs down, road hazards, etc. Karla will follow up with Marianne to promote this new trouble reporting capability with employees through Newsleaks.

Review Bin List—All

The group discussed items for the BIN List and the agenda for the March 1, 2004, ELT meeting. The Risk Assessment Management Letter will be added to the next agenda, as well as Standards of Work Performance. Right Management work will be added to the bin list and Susan and John will provide a timeframe for discussing next steps.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the March 1, 2004, ELT meeting.

*Decisions made by ELT and items requiring action are “shadowed” in these minutes.

ELT Meeting Minutes March 1, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bob Miller, Billy Meeks

Visitors: Kathie Johnson (Recorder)

Minutes Approved and Agenda Reviewed

Minutes from the February 23, 2004, ELT meeting were reviewed. Susan Lehmann asked that the first line of the second page, "Bob Miller said the budget group is working with operating areas to validate budget changes," be omitted and the following language inserted: "HR is moving employees to new positions and systems, and the budget group will move the numbers following that." The minutes were approved with that change. The Agenda for this meeting was discussed and approved.

Standards of Work Performance - ELT

ELT discussed standards of behaviors and work performance at LWC and agreed to continue discussion at another meeting. Susan Lehmann will use the BSOC as a focus group to gain their perspectives and will report back.

Risk Assessment Management Letter – Bob Miller

Bob Miller distributed the latest version of the proposed response for review and comment.

For Item I, ELT members need to follow up with Don McKay to see what is needed to meet the May 28 deadline for completion of revised system risk assessments and strategic risk assessments, and will need to reprioritize other work to meet this deadline. The same is true for the September 30, 2004 deadline for completion of risk and control interaction assessments and synoptic system risk management plans. Greg Heitzman will furnish Bob with proposed language for Item III that will make it actionable. Susan suggested that Item IV include language stating that implementation of the enhanced performance management system is occurring in a phased approach beginning in 2003, and enhancements will be made in an ongoing fashion.

Bob Miller will incorporate the suggested changes into another draft to be circulated to ELT. John Huber said unless there are other concerns, we will consider this ready to be passed on to the Audit Committee.

Open Time

AWWA Annual Conference - Discussion was held regarding attendees at the AWWA Annual Conference. John Huber, Greg Heitzman, Karla Teasley and Johnnie Rice will attend, as well as the Men's and Women's Tapping Teams. The Women's Tapping Team expenses of hotel room, airline flights, and meals will be paid 100% by AWWA. The Men's Tapping Team expenses will be funded partially by the AWWA KY-TN Section, LWC and the Union. Tapping Team stays are limited to three days unless they use PTO for additional stay and pay their own additional expenses. Practice prior to the trip will be done on their own time.

CIP Results for 2003 - There was a discrepancy in the CIP results for 2003. Karla and Greg will follow up to identify the gap in reporting for the fourth quarter 2003 results.

Staffing – We are eliminating two Drafting positions (O&M), and filling two GIS Technicians (predominately Capital). We will save approximately \$63,800 in the O&M budget.

Review Bin List—All

The group discussed items for the BIN List and the agenda items for the March 8, 2004, ELT meeting. The agenda will include Greenbacks, Water Sales Analysis and Trends, Board Agenda, Unaccounted For Water, and Safety Shoes. Don McKay will be asked to attend ELT in about two weeks to discuss Risk Assessment Plan and Audit expectations.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the next ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes March 8, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bob Miller, Billy Meeks

Visitors: Kathie Johnson (Recorder), Nora Freeman, Amber Halloran, Sue Purdy

Minutes Approved and Agenda Reviewed

Minutes from the March 1, 2004, ELT meeting were reviewed and approved as presented. The Agenda for this meeting was discussed and approved. Karla Teasley informed the group the Safety Shoes topic may not be presented today since she has been unable to confirm the presentation with Angela Harris.

Shepherdsville Main Break Recognition by ELT – Greg Heitzman

Greg Heitzman distributed an email documenting the cooperative effort across systems to identify causes and implement steps to reduce water main breaks in Shepherdsville. Greg suggested that ELT formally recognize this and future examples of successful teamwork in the ELT minutes and in Newsleaks. Greg will draft an article for Newsleaks.

Board Meeting Agenda – John Huber

John Huber briefly commented on the Board agenda, noting that important items of interest to the Board are water usage and sales, and payment of the first quarter dividend.

Unaccounted for Water – Nora Freeman

Nora Freeman distributed a presentation, "Unaccounted for Water, Clarification of 2003 Reporting," for review and discussion. Nora indicated a reporting discrepancy was noted in late 2003 between what was being reported by Accounting and Leak Survey. There was discussion of whether all water is being metered and reported correctly, including water used by the plant. Greg is currently verifying that all metered water is being tracked and accounted for correctly. Sharon Dawson will be coordinating Leak Survey activity and Unaccounted for Water reporting in 2004. Karla Teasley asked ELT to begin thinking about a Corporate focus on unaccounted for water strategies. Greg Heitzman suggested an ELT sponsored team be formed to give this priority in 2004-2005, and Nora agreed this would be helpful.

Travel Request – Bob Miller

Bob Miller sent ELT an email last week requesting approval of Glen Mudd's March 25-27 travel to attend a National Safety Council meeting in Washington, DC at an estimated cost of \$610. Bob received qualified and unqualified approvals, and brought the matter to ELT for further discussion and to document approval of the travel. Greg said for the short term he

recommended ELT continue to review for approval such discretionary items for all travel above \$500. He also commented it was helpful that Bob started the process through emails, which cut down on discussion at ELT. ELT approved Glen Mudd's travel.

Greenbacks Report – Amber Halloran and Sue Purdy

Amber Halloran reported the auditors completed their work, and there were no adjustments to the financials. Work on the Annual Report is underway, and should be completed in time for the April Board meeting.

John Huber expressed his thanks to Amber and Sue for completing the financials in just four days while balancing many other priorities.

Analysis of Water Sales Data – Ed Chestnut

Ed Chestnut handed out high-level information analyzing the last five years water sales for discussion. Our customer base is increasing, but water usage is decreasing. We may be adding customers faster than population growth. He commented this very high level look at the situation confirms the need for more in depth analysis.

It was agreed that discussion of Strategic Plan Results for 2003 would be handled outside the ELT meeting.

Open Time

There were no topics discussed during open time.

Review Bin List—All

The group discussed items for the BIN List and the agenda items for the March 15, 2004 meeting.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the next ELT meeting.

<p>*Decisions made by ELT and items requiring action are “shadowed” in these minutes.</p>
--

ELT Meeting Minutes March 15, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, John Huber, Susan Lehmann, Bob Miller, Billy Meeks

Visitors: Kathie Johnson (Recorder)

Minutes Approved and Agenda Reviewed

Minutes from the March 8, 2004, ELT meeting were reviewed and approved as presented. The Agenda for this meeting was discussed and approved.

Rewards and Recognition Program – Susan Lehmann

ELT discussed the Rewards and Recognition Program, and modified it for the first half of 2004 as follows: Team performance for the last quarter of 2003 and first two quarters of 2004 will be recognized. A budget of \$5,000 will be allocated for team recognition through July 2004, at which time team recognition will be reevaluated. ELT will approve all Team Recognition to assure consistent handling. Quality Celebrations will not be funded for the first half of the year and will be reassessed in July. This matter will be added to the bin list for discussion at that time..

Susan Lehmann's area will research and benchmark recognition programs of other companies in an effort to develop a more comprehensive recognition program at LWC consistent with best practices with the goal to introduce a new program in 2005.

Standards of Work Performance Follow Up – Susan Lehmann

ELT concluded that undesirable behaviors observed by management should be reported to the responsible BSO or Vice President.

ELT agreed the corporate policies in place are adequate and need to be enforced. Susan Lehmann emphasized the need for consistent enforcement of policies across the organization.

Next steps include communicating expectations to managers for handling unacceptable behaviors and communicating and enforcing the policies that are in place.

This topic will be added to the bin list for quarterly review.

Open Time

Susan Lehmann reminded ELT that the Next Level Plan updates are due by the end of March. She also reminded the group that requests for references from retirees and others should be given to HR for response, and will provide only dates of employment and title.

Bob Miller commended Karla Teasley's employees for the great job they did getting the wholesale rates filed with the PSC last Friday.

John Huber's travel plans to Denver on March 22 and 23 to attend a Water for People meeting were approved by ELT. The expenses are estimated to be around \$500.

Bob Miller informed the group he will be seeking feedback on a draft document regarding Principles of Governance for consideration by the Board.

Review Bin List—All

The group discussed items for the BIN List and the agenda items for the March 22, 2004 meeting.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the next ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes March 22, 2004

Attendees: Karla Teasley, Ed Chestnut, Greg Heitzman, Kathy Holder, Susan Lehmann, Bob Miller, Billy Meeks

Absent: John Huber

Visitors: Kathie Johnson (Recorder)

Minutes Approved and Agenda Reviewed

Minutes from the March 15, 2004, ELT meeting were reviewed and approved as presented. The Agenda for this meeting was discussed and approved. Today's agenda consists of five objectives ELT is to complete in 2004. Bob Miller distributed a packet to the group consisting of correspondence and other documents pertinent to today's discussions.

Evaluate Rate Structure & Strategies for Alternatives

Bob Miller gave an overview of the ratemaking process. This is an ELT issue because it concerns LWC's pricing philosophy. Any strategy LWC considers should include rate stabilization for its customers and revenue stabilization for the owner.

After discussion by ELT, Bob summarized that LWC needs to maintain the high integrity of the cost of service rate making methodology in considering alternative rate structures and needs to add the objective of annual stabilization of revenues through creating a risk reserve. Recommendations need to be ready for the Board for a mid-year implementation, and should meet AWWA cost of service guidelines and be consistent with bond covenants.

Fixed vs. Variable Costs

ELT discussed ways to quickly recover financially in times of economic stress, including the use of variable costs such as contract or temporary employees and outsourcing some functions that could be terminated on short notice. Greg Heitzman said LWC needs to create a more flexible labor model. He also said LWC's water quality far exceeds the regulatory requirements, and savings could be realized by reducing the use of water treatment chemicals without significantly impacting water quality.

Greg summarized the approaches: (1) Development of a variable human resource model; (2) Prioritization of activities (including ways to reduce or eliminate activities) and determining variable work levels for lower priority activities.

Billy Meeks said he would like to see financial statements that show fixed versus variable costs.

Create Risk Mitigation/Rate Stabilization Fund

Karla said any fund we set up should be viewed from both the customer's and the Public Service Commission's perspectives, and must have clear guidelines and boundaries in place for its use. Greg sees the fund being built up after net income, for use to offset unplanned, unexpected expenses. Use of these funds would need Board approval.

Outcome for this item: This work will be done by John Huber, Bob Miller, Don McKay, and the Legal Department as needed to set up the fund. The expectation is the group would report back to ELT with recommendations. The timeframe is to have something in place for 2005 for overall budget purposes. Work on this would need to be completed in April-May in order to get board approval if a rate increase is proposed for mid-year implementation.

Slow Rate of Growth of Cost of Operations

Greg distributed a graph of O&M expenses for the period 1992-2002. The group discussed ways variable versus fixed expenses might be identified. Greg will follow up with Amber or Bob to see what data can be provided for analysis to understand the cost drivers for changes in expense levels and develop a strategy to control further increases. He will also check with John Huber to see if Ed Chestnut should be involved in the data analysis.

Summary: We are asking for additional data analysis that will give us cost drivers over time, by area of the company, and by type of expenditure, i.e. labor, material and supplies, contractual services, etc. and a breakdown by system or core.

Next Level Plan

ELT discussed whether the Next Level Plan work should be deferred in light of cost reduction work underway. The team concluded these efforts should be worked concurrently since cost reduction work will continue for the foreseeable future and that work is relevant to the NLP. Karla Teasley believes cost reduction strategies need to be incorporated into the NLP as part of the overall approach. Susan said each team leader should set a realistic deadline to get their team's work completed. Karla said gaps exist because of Steve Hubbs' departure. Greg will take on the Quality Management and ISO piece and Karla and/or Bob will take on the Organization Structure piece. ELT needs to look at the cost reduction and containment strategy and how it fits into the overall document.

Karla summarized: Schedules for completion will be furnished to Susan Lehmann by the end of March which will determine the overall schedule for completion of the document. This will be done concurrently with cost reduction work.

Open Time

Bill Meeks said he would like to bring two team recognition items to ELT, for the PAR Vault Preparation and Installation Improvements, and the SFO process for Reducing Bad Debt. Karla

suggested bringing the BSOs or POs to ELT during the presentation. These will be added to the bin list.

Kathy Holder said this was her last ELT meeting, and thanked ELT for the experience and perspective she gained from working as a client instead of as outside counsel. She expects to work with Barbara Dickens through the end of the week, and will be available at 589-5400 for consultation during the transition.

Greg Heitzman mentioned he will be on Spring Break next week, but anticipates becoming ELT Leader when he returns on April 5. He will send a BSO to represent him at next week's ELT meeting. He asked that Karla set the agenda for the April 5 meeting. Karla will ask Millie to update the Roles spreadsheet for distribution to ELT.

Review Bin List—All

The group discussed items for the BIN List and the agenda items for the March 29, 2004 meeting.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the next ELT meeting.

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes March 29, 2004

Attendees: Jim Asseff (representing Greg Heitzman), Ed Chestnut, Barbara Dickens, Susan Lehmann, Billy Meeks, Bob Miller, John Huber, Karla Teasley

Absent: Greg Heitzman

Visitors: Kathie Johnson (Recorder), Angela Harris, Glen Mudd, Rhonda Plunkett, Kathy Schroeder

Minutes Approved and Agenda Reviewed

Minutes from the March 22, 2004, ELT meeting were reviewed. Bob Miller requested the heading on page 2, "Create Risk Mitigation/Income Stabilization Fund," be changed to, "Create Risk Mitigation/Rate Stabilization Fund." The minutes were approved with that change. The Agenda for this meeting was discussed and approved.

Affirmative Action Plan – Rhonda Plunkett and Kathy Schroeder

Rhonda distributed three handouts for review and discussion: (1) An Executive Summary of the Affirmative Action Program (AAP); (2) Year End 2003 Hiring Goal Results and 2004 Hiring Goals; and, (3) 2003 Affirmative Action Report providing comparison of Human Resources Transactions in 2002 and 2001.

ELT discussed the AAP Executive Summary. LWC is considered a federal contractor because it has federal contracts and provides water to federal employees. As a federal contractor, LWC is required to have an AAP. The AAP is governed by three federal regulations that include steps to increase the representation of women and minorities, promote equal employment opportunity, and eliminate discrimination against women, minorities, veterans, and individuals with disabilities. LWC Management is accountable for meeting AAP hiring goals.

In 2002 the Overall Female Representation was 34% compared to 36% in 2003; and in 2002 the Overall Minority Representation was 24% compared to 23% in 2003. The 2003 Hiring Goal Results indicate underutilization of minorities in the Administrative Supervisory job group.

ELT discussed how to achieve its 2004 hiring goals since external hiring will be held to a minimum. The possibility of setting goals for retention of females and minorities in 2004 was also discussed. Susan said HR is prepared to come back to ELT with some AAP goal recommendations next week. Karla will place this matter on the bin list for April 5 or April 12.

This is Rhonda's last ELT meeting before she leaves the Company, and Karla thanked her for her contributions to LWC over the last few years.

Susan said Liz Gross will become the interim EEOC Officer until Rhonda's position is filled.

Safety Shoe Policy – Angela Harris and Glen Mudd

Angela Harris distributed a proposed revision to the Safety Shoe Policy along with a list of the approved positions. Level 1 on the list consists of positions where daily use of safety shoes is mandatory, requiring replacement of the shoes on an annual basis. Level 2 on the list consists of positions having occasional exposure where safety shoes need to be worn, with replacement every two years.

Angela said the proposed policy and positions in Levels 1 and 2 had been approved by BSOs. ELT concluded that replacement of safety shoes for Level 1 was reasonable and expected, but replacement of safety shoes for Level 2 should be approved by BSOs based on need since occasional wear may not necessitate replacement every two years.

John Huber commended Angela and Glen for working through the changes to this policy. Angela commented the revised policy reduces the replacement cost of safety shoes from \$120 to \$100. The average replacement cost during 2003 was \$105. A 30-day expiration has been added to vouchers issued for replacement of shoes.

Angela summarized ELT's changes: Tier 2 replacements will be based on need and BSO approval. Angela will send the policy to Barbara Dickens for her review and approval. Cost savings will not be significant, but the new policy will provide better control over the process.

Open Time

Travel Request / Licensing Requirements - Jim Asseff asked for ELT's approval for Susan Dougherty's April 13-14 travel to renew her Distribution Operator's License. The travel is estimated to cost \$530. John Huber said he supports this, but inquired if this was the most cost effective alternative for license renewals. He asked that Jim Asseff and Greg Heitzman look into any other options. Billy Meeks commented LWC could do Continuing Education Unit classes in-house to maintain licensing. John Huber said he would like to see LWC do its own training in-house for plant and distribution operator licensing and renewal, and said LWC could do a superior job of this training.

Since Greg Heitzman should be involved in these discussions, this topic will be added to the bin list for discussion in two to three weeks.

Temporary Role Assignments - Susan Lehmann said Rhonda Plunkett's departure necessitates some temporary assignments: Kathy Schroeder will assume Labor Relations; Johnnie Rice will take on the Diversity Council; and Liz Gross will take on the Affirmative Action Program work until Rhonda Plunkett's position is filled.

Medical Insurance Premium Savings – Susan Lehmann said a communication will be sent to employees regarding a reduction in their medical insurance premiums, retroactive to March 1.

Board of Water Works – John Huber mentioned he is in the process of finalizing Board committee makeup for the coming year.

ELT Roles – Karla distributed an updated Roles list. Greg Heitzman becomes ELT Leader on April 5, Billy Meeks will serve as Scribe, Bob Miller as Timekeeper, and Karla as backup recorder. Karla will develop an agenda for the April 5 meeting.

Review Bin List—All

The group discussed items for the BIN List and the agenda items for the April 5, 2004 meeting.

Agenda for Next ELT Meeting—Karla Teasley

Karla will e-mail the agenda for the next ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes
April 5, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, Nora Freeman (representing Karla Teasley), John Huber, Susan Lehmann, Billy Meeks

Absent: Karla Teasley

Visitors: Kathie Johnson (Recorder), Sharon Dawson, Amber Halloran, Roger LeMaster, Mike McGee, Don McKay, Laurie Hahn and Ed Olliges (Crowe Chizek)

Minutes Approved and Agenda Reviewed

Minutes from the March 29, 2004, ELT meeting were reviewed and approved as written. The agenda for this meeting was discussed. Bob Miller said the Outcome for the Risk Assessment Planning topic should be to communicate the plan to ELT, and the Outcome for the Risk Mitigation/Rate Stabilization Fund should be to gain feedback. The agenda was approved with those modifications.

Risk Assessment Planning – Roger LeMaster, Don McKay, Bob Miller

Don distributed a handout of an abbreviated list of operational risks ranked by system and said the plans are to schedule two dates with ELT to identify risks. Meetings will also be set with the BSOs to review risks they previously identified and to identify and rank any new risks. The update will also include the changes in the organizational structure and identify risks resulting from the organizational changes. Bob said the ELT will look at the top 10 of the biggest risks from a strategic perspective, while BSOs will focus on operating objectives. The BSOC is going to address the intersystem risks.

Greg summarized: Don McKay will set meetings with BSOs in parallel to meetings with ELT to get the Risk Assessment updated, grouped and consolidated, and develop a profile for each risk. Don will set up a 90 meeting with ELT within the next 45 days.

Team Recognition

(1) Capital Crew PAR Vault Installations Team Recognition – Mike McGee, Billy Meeks

Bill Meeks said the PAR Vault Installation process was an improvement completed in 2003. He introduced Mike McGee, who explained the use of the polystyrene concrete

forms used in the installation of large meter vaults. The process improvement has improved safety by reducing the time an excavation is left open from several days to only one to two days. The installation cost has been reduced from an average of \$6,700 using an outside contractor, to about \$2,200 using LWC employees to do the work with this new process. The final installation is stronger and more permanent than concrete block installations, and this method of installation is readily adjustable for different elevations from 5 feet to 8 feet. Bill said LWC has installed 12 vaults using this system, at an average cost of \$2,251 per vault.

(2) SFO Process Field Customer Service Team Recognition – Sharon Dawson, Billy Meeks

Sharon Dawson presented the SFO (Service Found On) team process improvement for reducing water theft and bad debt. The process includes new procedures for identification of SFO's and the proper shut off, including installation of meter plugs to prevent meters from being turned on except by LWC. Since rental properties historically presented problems in identifying the person responsible for bill payment, the team began using the Property Valuation Assessment (PVA) records to find owners and bring pressure to bear to identify and locate the responsible party. The new process has reduced SFO bad debt by about 50%. Billy Meeks said this has become a cross system effort which reduces service runs and bad debt.

Greg Heitzman summarized the outcome, which is that ELT approved recognition for both groups at \$50 per team member. There was consensus approval. The respective Process Owners (Cliff and Sharon) will follow with documentation to HR for the recognition.

Risk Mitigation/Rate Stabilization – Bob Miller

Bob plans to open communications on this topic with the City and the Board this week, and is soliciting feedback from ELT. He recommends creating a Risk Mitigation Reserve and said LWC needs to determine the timing, reserve size, how much will be established in 2004, and determine how to allocate the funds. Bob said he had contacted others around the country, and most PSCs cap such a fund at 25% of O&M, or 90 days of O&M expenses. Questions include: how to size the rate increase (the earliest would be June 1, 2004); how do we allocate in our rate making process, and what mechanism will be used for requisitioning to withdraw money from the fund. Greg suggested the process be to document the business case for the Risk Mitigation Reserve, present it to the Board for approval after which deposit can be made to the operating fund. If there is no need to requisition funds and the reserve has reached the cap amount we set, excess contributions could be made to the Infrastructure Replacement Reserve Fund, resulting in a much more stable fund. The Bond Resolution would need to be changed, requiring a legal opinion from the Bond Counsel as well as our General Counsel that bondholders will not be adversely impacted. Bob believes this action will be favorable to the bondholders.

A question remains to be resolved regarding the future role of the Contingency Fund, which presently serves as a backstop for unforeseeable risk events and unbudgeted items; however, the fund is too small for a major risk. Greg favors eliminating the Contingency Fund.

Further comments or ideas should be emailed to Bob Miller, who will meet with John to finalize the proposal for the Board. We will open up the topic and begin the dialogue with the Board at the April 13 meeting and plan to present to the Board in May.

Capitalization Issues – Amber Halloran and Crowe Chizek Auditors Laurie Hahn and Ed Olliges

Bob Miller said the purpose of bringing in Crowe Chizek was to provide clarification on rules we follow to identify whether certain expenses should be capitalized, amortized or expensed in the current period. Amber said the basic capitalization rule is to “match a future benefit to the expense that creates that future benefit”. Amber provided a handout prepared by Crowe Chizek that summarizes their opinions. The following expense categories were discussed:

Acquisition Expenses: Due diligence and business development costs leading up to Board approval for an acquisition cannot be capitalized, but costs following Board approval of an acquisition can be capitalized.

Capital Crew Expenses: Greg asked if LWC’s internal capital crew expenses can be accurately compared to outside contractor expenses since outside contractor expenses include general training and meeting time but LWC’s do not. Ed Olliges responded there is no different set of rules. All direct and certain indirect costs can be capitalized. General and administrative costs should be expensed. Learning costs are generally expensed or assigned to projects in place. All external contractor expenses to construct assets can be capitalized, since the contractor does not detail his expenses for general and administrative activities.

Manager’s (BSO, PO) Expenses: To be capitalized, a manager’s time must be specifically related to a project that yields the future benefit. Generally BSO and PO time is not capitalized, unless working on a specific capital project in a design capacity. Administrative oversight is expensed in the current period.

Engineering Conceptual Design Expenses: The group discussed projects that require conceptual evaluation of alternatives, such as Advanced Treatment Technology. Until a decision is made what capital asset to construct the costs are considered development costs and should be expensed in that time period. Amber advised that until a project is determined “feasible and probable”; the evaluation costs are expensed in the current period. The “feasible and probable” test validates the capital asset.

Property Acquisition Expenses: Once the need for a tank in a defined area has been identified, and the engineers determine the site is feasible and tank construction is probable, then costs for site acquisition can be capitalized, even though the actual site is not yet secured. Planning and hydraulic evaluation for locating storage tanks is expensed.

Greg commented that this will significantly impact the O&M budget allocation for engineering and planning areas (estimated over \$500,000) in 2004 and 2005. We need to be budgeting according to the accounting rules, in order that managers (BSOs and POs) can be held accountable to budgets in a consistent fashion (current budgets do not include adequate allocations for these expenses). Our challenge is to be consistent. Amber will work with affected areas to develop accounting guidelines for capitalizing expenses, and BSOs will prepare 2005 budgets using these capitalization guidelines.

Open Time

There was no discussion during Open Time.

Review Bin List—All

The bin list was reviewed for potential agenda items for the next ELT meeting. Susan Lehmann said she will send ELT the Affirmative Action Plan for offline handling.

Agenda for Next ELT Meeting—Karla Teasley

Greg will prepare and send out an agenda for the April 12, 2004 meeting.

Greg will e-mail the agenda for the next ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes April 12, 2004

Attendees: Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Billy Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Minutes Approved and Agenda Reviewed (9:00)

Minutes from the April 5, 2004, ELT meeting were reviewed. John Huber asked that an additional sentence be added under the Risk Assessment Planning topic, at the end of the first paragraph, as follows: "The BSOC is going to address the intersystem risks." The minutes were approved with that change. The Agenda for this meeting was discussed and approved.

Follow Up On Capitalization Issues (9:12)

ELT briefly discussed capitalization issues. Bob Miller will follow up with Amber Halloran regarding the status of the draft capitalization policy.

Review Board Agenda – John Huber (9:16)

John Huber reviewed the BOWW Annual Board Meeting agenda with ELT. Barbara Dickens will be sworn in at the meeting.

Greenbacks Report – Amber Halloran, Sue Purdy (9:20)

Amber Halloran and Sue Purdy provided copies of and discussed the Financial Highlights for March 2004. Amber commented the budget changes are still being uploaded, and movement to cost centers is expected to be completed this week. The budget comparison in the Financial Highlights is still to the original budget and not the revised budget. Future statements will show comparisons to both the original budget and the revised budget. Budget reductions will be added to the statements to show budget dollar savings. The financial statements continue to show the number of customers has increased but consumption has decreased.

In response to questions from ELT, Amber will provide further analysis on labor and overtime, as well as materials and supplies, contractual services and transportation.

Break (10:10)

HRIS Business Case – Bob Miller (10:22)

Bob Miller said pages 88-96 of the Board book contain a letter and Business Case related to the need for a new Human Resources Information System. He had hoped to take this to the board for authorization, but is not yet prepared to do so. Bob said LWC's present system creates operational issues, technical issues and business risks related to compliance and historical data integrity, and is unsustainable to meet future needs. Susan Lehmann provided a handout identifying Human Resources/Payroll Risks for review and discussion. Savings from a new system are not expected to offset the cost, which would range from \$750,000 to \$1,800,000 over five years. Bob explained he underestimated the cost of a new HRIS when setting the 2004 budget by authorizing only \$250,000. Karla Teasley pointed out the budget impact will be in 2005.

ELT discussed prioritization of this and other IT initiatives, including the Warehouse Management System. Bob believes HRIS is the number one IT priority this year. The Warehouse Management System will not be done in 2004, but could possibly be ready for implementation in 2005. Greg Heitzman said we can look at the warehouse annual inventory at mid year to see if manual processes have impacted ability to manage inventory within control limits and established goals.

ELT members will email their questions and comments to Bob so he can begin communicating with the Board.

Eroding Sales Base and Interim Rate Increase – Bob Miller (11:00)

Bob Miller said the problem that needs to be communicated to Board and LWC customers is a permanent erosion of base water sales, apparently attributable to conservation type fixtures. Bob is looking for a definition of the problem to take to the Board and customers to explain the need for a mid-year rate increase. Timing is important since Board action will be needed in May. John believes the erosion of base water sales will continue in the future as the use of conservation (low flow) type fixtures increases with new construction and plumbing retrofits.

Open Time (11:20)

Sale of Pickup Trucks (11:20) – Billy expressed his concern that the planned sale of pickup trucks would reduce the number of vehicles available for Middletown's use in planning and profiling their jobs. After discussion, Greg advised we will keep the target number of vehicles for sale (minimum of 20), but allow stakeholders to meet and prioritize a reallocation of vehicles (Bill Meeks, Jack Wang, Nora Freeman, Jim Brammell and Ralph McCord).

Decision Partners Team Update (11:30) – A workshop was held at UofL on Thursday, April 8 to focus on team dynamics and to help reenergize the team. Billy said the team lost some of its resources and is made up of mostly new members. John Huber emphasized the need to nurture the DPT and to support the members' attendance and participation at the meetings. Action items on the plan need to be integrated with other plans. Karla, Greg and Susan will make sure BSOs know participation and attendance at Partnership meetings is an operational priority to assure the success of the Labor-Management Partnership. Karla asked that this item be added to the bin list for future discussion.

Review Bin List (11:40)

The group discussed items on the BIN List and the agenda items for the April 19, 2004 meeting. Susan said the Next Level Plan work should be completed by the end May. Billy will present the NLP for Partnerships Among Employees at the next ELT meeting.

Agenda for Next ELT Meeting—Greg Heitzman

Greg Heitzman will e-mail the agenda for the next ELT meeting.

Adjourn (11:50)

***Decisions made by ELT and items requiring action are "shadowed" in these minutes.**

ELT Meeting Minutes April 19, 2004

Attendees: Greg Heitzman (Leader), Karla Teasley (TKO), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann, Bill Meeks

Absent: Bob Miller

Visitors: Kathie Johnson (Recorder), Roger LeMaster

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the April 12, 2004 ELT meeting were reviewed and approved as written. The agenda for this meeting was discussed. The agenda item for R5 Certification will be deferred to a future meeting when Bob Miller can be present.

I2 Certification (9:10)

Greg distributed copies of his April 19 memo to ELT regarding the System Certification of I2 - Facility Design, Construction and Maintenance. The audit revealed that I2 met the basic requirements for system certification, but identified three areas for improvement. Greg discussed the audit responses to each recommendation.

ELT Action – Karla Teasley recommended certification of I2, and there was consensus approval. Greg will communicate to the BSO and System SAC.

NLP Sub-team on Partnership Among All Employees – Bill Meeks (9:40)

Bill Meeks distributed the latest draft of Chapter 3 for discussion, and asked for comments for improvement. John Huber said we want to be sure Internal Customer Satisfaction (ICS) is placed somewhere in the Next Level Plan (if it is not included in the Partnership section) that discusses the need for dialogue between individuals and groups leading to understanding of customers' needs by suppliers.

Greg summarized that we need to make sure the NLP has a section on ICS related to suppliers and other relationships, and how information flows through these groups.

Susan will send an email to other NLP sub-teams to communicate the Next Level Plan must contain all of the sections/topics when completed, so if one sub-team drops an item it should be handed off to another sub-team for inclusion.

John Huber asked that the subsections in Chapter 3 be reorganized. Following the introductory paragraph, either "Achieving Partnership Through SACs and NWTs" or "Communications" will become the new Subsection 3.1. Billy will follow up on Internal Customer Satisfaction and Predecisional Involvement sections, and will make sure every subsection removed from the Partnership Among All Employees draft does not drop off the Next Level Plan. Greg also suggested including the date the Partnership Agreement was signed, and including a group of references used in the section (a bibliography).

ELT Action – ELT approved the substance of the Partnership Among All Employees section of the Next Level Plan, with the changes recommended by ELT. Billy will send ELT a copy of the revised draft upon completion.

Break (10:10)

Review Bin List (10:23)

ELT did a partial review of the bin list. Greg will update the bin list and will schedule another session to review the remainder of the list.

Travel Authorization for Jack Wang – Greg Heitzman (10:43)

Jack Wang plans to attend a World Health Organization and National Sanitation Foundation meeting in May on Water System Security, at an estimated cost of \$1,000.

ELT Action – ELT approved Jack's travel.

Open Time (10:50)

Board Terms (10:50) – Wendy Welsh's and Phil Bond's terms expire in April 2004, and John Huber received notice from the Mayor's office that Phil Bond will be replaced on the Board. Wendy Welsh will continue to serve on the Board. This will require some new committee assignments.

Increased Cost of Materials (10:53) – John commented growth in Asia has increased the demand for materials and driven up costs. LWC will need to analyze the projected impact before setting next year's budget. LWC will also need to consider its capacity to rebid some materials, rather than extend contracts using PPI.

Mercer Evaluations (10:58) – John said Mercer will be evaluating roles and doing market pricing for the Vice Presidents and Assistant to President roles.

Preserve America (11:00) – First Lady Laura Bush will be visiting the LWC Water Tower on Tuesday, April 20, 2004, at 2:00 p.m.

Diversity Training (11:03) – Susan Lehmann said train-the-trainer sessions for ELT and BSOs will be scheduled in June. The training is expected to take two days, and each person will have one topic they can facilitate.

ELT Effectiveness Work (11:06) – Susan said the plan is for two ELT members to facilitate a session with BSOs. Right Management will develop a template to assure consistent meetings are held.

Review Bin List (11:10)

ELT used the extra meeting time to complete its review of the bin list. Greg will incorporate changes to the bin list.

Agenda for Next ELT Meeting—Greg Heitzman (11:22)

Greg Heitzman will e-mail the agenda for the next ELT meeting.

TKO – Karla Teasley (11:24)

Adjourn (11:26)

***Items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes April 26, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann, Bill Meeks, Karla Teasley

Visitors: Kathie Johnson (Recorder), Roger LeMaster, Nora Freeman

Agenda Reviewed (9:05)

Greg Heitzman reviewed the agenda with ELT.

Minutes Approved (9:07)

The minutes were reviewed and approved as submitted.

R5 Certification (9:08)

Bob Miller distributed copies of his April 26 memo to ELT regarding the System Certification of R5 – Managing Business Risk System. The audit for system certification identified six areas for improvement in R5. Bob discussed the System's responses to each of the audit recommendations. ELT discussed the audit recommendations and the merits of certification with specific follow up action items, or to postpone certification until several key recommendations (NWT/SAC structure, process measures, empowerment, and internal customer satisfaction) are addressed. A suggestion was also made to have the HROE area provide training in statistical process control (SPC) since this is a valuable tool in measuring process effectiveness.

ELT Action – ELT agreed that R5 would not be certified at this time. It will be considered for certification again in early October, after the audit recommendations are addressed.

Metered Water Ratio Draft Charter – Nora Freeman (9:45)

Nora Freeman distributed a draft team charter for review, discussion, and approval by ELT. She said the draft included comments from other affected system owners. Nora reviewed the content of the charter with ELT, and commented she believed implementation of strategies would not occur before 2005, at which time five year goals for improvement might be included in the Strategic Plan. ELT asked Nora to bring forward any budget gap issues as early as possible. A change was suggested for Item A, No. 6 under Deliverables, to read as follows: "Implement corporate strategies and develop an action plan to increase the metered water ratio and integrate into system operating plans."

Karla Teasley requested that quarterly progress updates be added to the bin list.

ELT Action – ELT is sponsoring the Metered Water Ratio Team, and approved the charter with modifications suggested.

Break (10:10)

Request for 2 Part-Time Summer Students for AwwaRF Projects – Greg Heitzman (10:25)

Greg Heitzman described the need for two part-time students to work on AwwaRF projects. For the first Project #03002, Bank Filtration System Plugging, the student labor is funded from an AwwaRF grant, having no net impact on the 2004 O&M budget. Steve Hubbs had initiated this Tailored Collaboration Project in summer 2003, before his retirement. Kay Ball will replace Steve as the Project Manager, and Steve will be working on the project as an employee of the University of Louisville, Center for Infrastructure Research. The student labor for this project is not funded from AwwaRF in 2005. LWC must fund 5 months of salary in 2005 O&M budget, if the work is not completed in 2004.

The second student will document processes and procedures for Project # 2954, Distribution Water Quality in New Development and Low Flow Areas. We have a commitment to participate and provide \$15,000 of in-kind contribution, however there is no 2004 budget allocation for the graduate student. A portion of the commitment will be offset by existing staff as in-kind contributions, and approximately \$7,500 will come from Jack's P1 budget. The expense will be absorbed with the P1 budget.

ELT Action – ELT agreed to hire the two students on a Part-Time basis for the AwwaRF project work. A communication will be placed in NewsLeaks regarding these positions.

Open Time (10:45)

Focus Groups on ELT Effectiveness (10:45) – Susan Lehmann distributed an outline for the focus group sessions providing background and main themes. The outline will provide consistency in the meetings. Susan also distributed facilitation guidelines. She recommended one member of each facilitation team take on the role of capturing notes and providing those to her for compilation.

First Quarter Goals Results (11:00) – Ed Chestnut distributed and discussed first quarter results for ELT Shared Goals, Incentive Plan Goals for President, Vice Presidents and BSOs, and the 2004 Corporate Performance Award. Ed will follow up with Amber Halloran whether the first quarter results for the President, Vice Presidents and BSOs 2004 Incentive Plan Goals were based on the original or revised budget figures. Time did not permit ELT's review of the LWC Corporate Measures for the first quarter. This item will be scheduled for review at a future meeting.

Agenda for Next ELT Meeting and BIN List review—Greg Heitzman (11:30)

Greg will email the agenda for the next meeting. Susan noted most NLP Sub Teams will be complete at the end of May, so ELT review of NLP documents will likely roll into June. Greg will look at the bin list to determine if he can schedule Next Level Plan items for discussion at a special ELT meeting during the late May or early June.

Greg Heitzman will e-mail the agenda and minutes for the next ELT meeting.

TKO – Bob Miller (11:35)

Agenda was adjusted to accommodate 1st Quarter Goal Review and Focus Groups. The meeting started five minutes late and finished seven minutes late. All members actively participated. Greg also advised of format changes to the minutes, including time reference, bolded ELT action items, and shaded follow up action items.

Adjourn (11:37)

*Items requiring action are "shadowed" and ELT Decisions are "Bolded" in these minutes.

ELT Meeting Minutes May 3, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, Susan Lehmann, Bill Meeks, Karla Teasley

Absent: John Huber

Visitors: Kathie Johnson (Recorder), Vince Guenther, Barbara Crow

Minutes Approved and Agenda Reviewed (9:00)

The Minutes from the April 26 meeting were approved as written. Greg Heitzman reviewed the agenda with the team.

NLP Sub-Team for Risk Assessment / Risk Management – Bob Miller (9:10)

Bob Miller gave an overview of the proposed draft. The section opens with definitions for business risk, business risk controls and risk management. Next he discusses the cost of risk measure and discusses the COSO Internal Control Model and defines the five primary components of the COSO model. The last page of the document discusses ways in which ELT and the organization intend to improve controls and manage business risks: identify, assess and control risks that occur at the corporate level and develop appropriate business continuity plans. Bob discussed the draft with ELT, including its similarity to ELT's response to the Internal Control Evaluation/Questionnaire and Risk Assessment work completed by Don McKay and Roger LeMaster last year.

ELT suggested we define the acronym COSO for the document and decide the appropriate length in light of the other sections of the NLP drafts. Team members suggested some other brief revisions to the language which Bob will make. Bill indicated that the language is somewhat technical and detailed for front-line use. We may want to edit this and include some of the information in the appendix. Bob agreed to do two versions, one long version and one short version, and let the editing team decide which to use.

C3 Empowerment Pilot Results – Karla Teasley (9:35)

Karla reviewed the documentation for the pilot including Roger LeMaster's report on his review of the pilot. Bill discussed the pilot and indicated that he is seeing more coordination between the process employees in communicating better and reducing non-value added work.

ELT Action - ELT agreed that this met the certification requirement for the Empowerment Pilot, and that all certification requirements have now been met.

Travel Authorization for Jack Wang – Greg Heitzman (9:45)

Greg discussed a proposed trip for Jack Wang to participate in an AwwaRF research workshop in Prague, Czech Republic in June. The workshop concerns herbicides and their metabolites in water, and Jack's expenses are fully reimbursable by AwwaRF.

ELT Action – ELT agreed no approval is required when travel expenses are fully reimbursable by an outside party (i.e. AWWA).

Open Time (9:50)

Job Description Project – Susan said Kathy Schroeder is working on revising job descriptions, and hopes to have the work completed on BSO and PO job descriptions by September 2004. Kathy's goal is for all other job descriptions to be completed by the end of the year. No pay adjustments or grade changes will be made until all of the work is completed.

Recognition for Employees Obtaining Degrees – The practice of awarding plaques to employees who obtain a college degree will be discontinued due to cost reductions. Recognition of employee graduations will be made in NewsLeaks.

ELT Communication Forums – The Communication Forums will begin again in June 2004, and will include certain topics for communication, and topics to obtain feedback from employees on a variety of issues.

Derby Preparations – Because of some significant issues last year and higher security needs, a great deal of preparation was done for the Derby by various systems and processes. The result was that there were no issues, and there was great cooperation between the various areas which prepared us well for any potential emergencies.

Break (10:05)

Review LWC Corporate Measures – Ed Chestnut (10:20)

Ed distributed a chart of LWC Corporate Measures for review and update by ELT. Karla commented the chart initially had been put together by the NLP Corporate Measures Sub-Team, and Ed has updated it with 2003 and 2004 goals. ELT assigned names to items with incomplete goal information so Ed can follow up for data to develop the goals. Ed will update the chart with goal information once the information is made available to him from the identified BSOs.

Karla suggested Notices of Violation (NOVs) be added to the measures chart, and also suggested a column be added to show if goals are being met. The Measures Sub-Team will continue to meet, and Ed will provide trend information to assist in setting five year goals.

Rate Increase Discussion – Bob Miller (11:02)

Bob Miller distributed to ELT a proposed letter to the Board for review, discussion and feedback. Bob said LWC is recommending a 4% water rate increase to be applied across the board, with the exception of the wholesale rate (just changed), Kentucky Turnpike 2 rates, Goshen Utilities rates, Shepherdsville rates, fire service rates, and elevated service area surcharge. The purpose of the 4% increase is to make up the revenue gap in 2004, and will be used to offset a mix of operating expenses.

Bob believes the analysis prepared by Dr. Cerito will help LWC better predict what future water rates should be. Greg asked that any further comments on the proposed Board letter be provided directly to Bob. Barbara Crow said a communication plan for the rate increase is now being prepared.

TKO Report – Bob Miller (11:28)

Bob Miller said good time estimates were made for agenda topics, the presenters were well prepared and had documents ready for discussion. He thought the team slowed up somewhat during the review of Corporate Measures, possibly because the team was unsure of the intended outcome.

It was a successful meeting overall.

Agenda for Next ELT Meeting and Bin List Review – Greg Heitzman (11:30)

Greg reviewed the bin list with ELT for the next meeting, which will probably include Review of Board Agenda, Greenbacks Report, Assessment Tool Presentation, and Capital Budget Sheet Process.

Greg will email the agenda and minutes for the next ELT meeting.

Adjourn (11:35)

*Items requiring action are "shadowed" and ELT Decisions are "**Bolded**" in these minutes.

ELT Meeting Minutes
May 10, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, Karla Teasley (Recorder), John Huber, Susan Lehmann, Billy Meeks

Visitors: Rick Cartor with Right Management, Amber Halloran, Sue Purdy

Minutes Approved and Agenda Reviewed

Minutes from the May 3, 2004 ELT meeting were reviewed and approved as written. The agenda for this meeting was discussed. Five Open Time items were added to the agenda. The agenda was approved with those modifications.

Assessment Tool Presentation

Rick Cartor of Right Management was asked to propose an assessment tool for ELT's consideration. Rick reviewed the features of the Campbell-Hallam Team Development Survey with ELT. Participants (ELT) and Observers (a customer group) rate the team in the following categories: resources, efficiency, improvement, and success. The survey takes about 30 minutes to complete. Rick recommends a survey frequency of no more than twice each year, and once each year is preferable. Observers could be picked randomly and Rick recommends that we might want to include the BSOs as the observer group. Greg summarized the discussion and referenced that we will continue to evaluate the input from BSOs and focus groups to improve ELT effectiveness. The plan is to review the use of this team assessment tool in the fourth quarter to establish a baseline for performance in 2005. Greg will place this item on the agenda for October.

Review Board Agenda

John reviewed items that will be presented at the Board meeting. The Compensation Committee Charter and LWC Governance documents will be held for a later Board meeting. The agenda will include minutes from the Public Affairs and Customer Satisfaction Committee meetings held last Friday. John covered the RBF topic including the status of land acquisition issues and revisions to the project budget. The proposed rate increase was discussed. In light of the proposed LG&E rate increase and further cost cutting at Metro Government, the LWC 4% rate increase may not be recommended. John also discussed options for further cost cutting. He explained that additional reductions in O&M costs could result in added risk and may cut into levels of service. Also, we are still assimilating cuts and staff reductions made earlier this year. As an alternative to a rate increase, Bob will present a scenario of deferring deposits to the infrastructure replacement reserve until the end of the year. This alternative may require advancing the schedule for borrowing for needed capital.

Review Operating Performance (Greenbacks Report)

The Finance staff is in the process of completing the budget changes, although most of them are complete. The group will then spend more time analyzing the variances YTD and work on preparing a year-end forecast.

We are under budget in consumption by 259 million gallons and \$897,000 in water revenue. O&M expense is over budget by \$156,000 but more than this amount (several hundred thousand) relates to advance sick time and PTO paid to early retirees. Depreciation is \$590,000 below budget. Non-operating income/deductions include about \$900,000 paid to early retirees. Budget savings are being tracked as noted on page 3 of \$366,582 in savings through the end of April. Customers are up 4,594 over 2003. Unaccounted for Water is 15.83 YTD, under percentages for 2002 and 2003.

Open Time

Fund for the Arts – Bob stated that the appeal this year will be fairly straightforward and will be handled by staff in Bob's Core in May. We will run the campaign without additional expense to LWC.

Desk Top Computers – Bob referenced his e-mail on this topic from earlier in the week. The issues relate to use of personal software packages on company computers. This causes concern with viruses and other problems. Also, the traffic load on the LWC system is high when employees use the internet for personal use, as well as issues regarding handling personal business on company time. Bob is evaluating the removal of all computer games from computers consistently across the company, including games that come with the company software. Bob is looking for feedback from ELT on these topics and will begin the process to update the policies regarding personal computer use.

APWA Truck Roadeo - Karla reported that the 2004 APWA Truck Roadeo is scheduled for Saturday, May 15. We are still looking for someone to drive in the serpentine event. Contact Larry Hornek for participation or information on the event.

Diversity Council - Susan said they are looking for a volunteer ELT member to serve on the Council for a six month period and participate in planning LWC events including brown bag lunches and the annual diversity celebration. Train-the-Trainer diversity training is scheduled for June 23-24 for ELT members and BSOs.

Auction – The auction was held last Saturday. Twenty-two vehicles were sold for about \$112,850. This is about \$30,000-\$35,000 higher proceeds than was anticipated from the auction.

Review Bin List—All

The bin list was reviewed for potential agenda items for the next ELT meeting.

Agenda for Next ELT Meeting – Greg Heitzman

Greg will prepare and send out an agenda for the May 17, 2004 meeting.

Greg will e-mail the agenda for the next ELT meeting.

***Decisions made by ELT and items requiring action are “shadowed” in these minutes.**

ELT Meeting Minutes
May 17, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, Karla Teasley, John Huber, Susan Lehmann

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Kate Farrow, Johnnie Rice

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the May 10, 2004 ELT meeting were reviewed. Under the topic "Assessment Tool Presentation", Susan Lehmann amended the minutes from, "Rick recommends a survey frequency of twice each year", to read, "Rick recommends a survey frequency of *no more than twice each year, and once each year is preferable*". The minutes were approved with that amendment. The agenda for this meeting was discussed. The Capital Budget Sheet Process presentation will be deferred to a future meeting since Jim Smith could not be present. The revised agenda was approved.

2004 Internal Customer Satisfaction Survey – Kate Farrow (9:10)

Kate Farrow distributed materials for discussion related to the Internal Customer Satisfaction (ICS) survey. The ICS survey is currently set for August 2004, with a budget of \$27,000. Kate outlined some of the difficulties that will be faced in analyzing data at the process level due to the reorganization. Scores at the corporate level will still be valid. After some discussion ELT concluded the data are still valid and will be used at the process level even though analysis and comparison will be more difficult than in the past.

ELT discussed whether the ICS should be held in August 2004 as planned or deferred to the first or second quarter of 2005. ELT decided having the survey in August is important to keep the emphasis on internal customer satisfaction, to help new processes identify and communicate with customers about their needs and expectations, and to keep communications open to find out what customers need. John Huber pointed out with a leaner organization, it is even more important to identify and deliver what the customer wants. He also said that systems need to be operating in a manner where the system is self sustaining and not dependent on any one employee for the success of its operation.

ELT Action: Decision was made to conduct the Internal Customer Satisfaction Survey in August 2004. Kate will coordinate the survey with System and Process Owners.

Consensus Tool – Johnnie Rice and Kate Farrow (9:55)

Johnnie and Kate introduced a tool for measuring levels of consensus from a 1 (least) to a 5 (highest) level of agreement. This allows everyone to express their level of consensus and opens up communications on why the differences exist. Greg suggested using the tool through June 30 and evaluating its value to ELT for continued use. John and Ed pointed out that no matter what level of consensus an individual may express, any decision ELT makes by consensus must be fully supported by each team member. Discussion of the consensus tool surfaced questions regarding the appropriate use of ELT's time in making some decisions that could be handled at the President, VP, or BSO levels. Greg will add this to the bin list for further discussion.

ELT Action: The consensus tool will be used through June 30 and evaluated at that time for continued use.

Travel Expenses – Greg Heitzman (10:25)

Greg reported travel through April of 2004 was \$6,490 compared to \$28,568 for the same period of 2003. The savings could be a result of travel budget reductions or possibly the review and approval by ELT for travel over \$500.

Bob will do further checking to assure all expenses through 2004 are reported.

John Huber said we need to decide how many employees to send to the AWWA KY-TN Section Annual Conference in July, and what future level of support LWC will provide for tapping teams. Greg and Karla will follow up with Bill Meeks on the issue of tapping team support. Barbara, Bob, Greg, Karla, and Susan will determine how many employees should be sent to the AWWA KY-TN Section Annual Conference. Attendance in the past included eight tapping team members and seven to ten other employees.

Open Time (10:35)

David Chervenak, Sr. passed away last week. He was an auditor with the firm of Cotton & Allen and worked with LWC as lead external auditor for many years and was also father to LWC employees Paul and Dave (retired) Chervenak.

Joan Malone's father also passed away last week.

TKO Report (Bob Miller) (10:38)

Bob said he didn't do a very good job as Timekeeper today, but observed there was honest and open discussion in the meeting.

Review Bin List—All (10:39)

The bin list was reviewed for potential agenda items for the next ELT meeting. Greg will add to the bin list a Review of ELT Shared Goals for Weighting, as well as weightings for EEO Goals and Women & Minority Hiring.

Agenda for Next ELT Meeting – Greg Heitzman (10:43)

Greg will prepare and send out an agenda for the May 24, 2004 meeting.

Greg will e-mail the agenda for the next ELT meeting.

Meeting Adjourned (10:50)

***Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.**

ELT Meeting Minutes
May 24, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, Karla Teasley, John Huber, Susan Lehmann

Absent: John Huber

Visitors: Kathie Johnson (Recorder), Amber Halloran, Jim Smith, Anna Norris, Ellen Mackin, Kathy Schroeder

Minutes Approved and Agenda Reviewed (9:01)

Minutes from the May 17, 2004 ELT meeting were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

Open Time (9:06)

ELT Communications Forums – Susan Lehmann distributed an overview of the 2004 Communications Forums and a schedule of meetings and rotations. The meetings have been added to ELT members' calendars through Outlook. The meetings will be held about every five weeks, with at least two ELT members present at each meeting. Bonnie Gimbel will coordinate the meetings.

Upcoming ELT Meetings – Greg is coordinating the scheduling of a special meeting on June 1 on the Next Level Plan reviews. The June 7 meeting will focus on Greenbacks, etc. Greg will also determine if there is a need for an ELT meeting the week of June 14 since he, John and Karla will be attending the AWWA Annual Conference in Orlando.

Capital Budget Sheet Process – Jim Smith, Amber Halloran, Anna Norris (9:15)

Jim Smith distributed proposed new forms for discussion. He stated the purpose of the presentation was to get ELT's opinion whether work on the new process for capital budget sheets was headed in the right direction. Jim said the process will provide more accountability at the process level and will assure changes are entered into the FINS system. Projects under \$100,000 will not require as many signatures if there are no changes in the budget. Anna Norris will be preparing monthly and/or quarterly reports for ELT and the BSOs on projects underway.

Jim said the plan is to submit a Capital Project Proposal form just once each year. Amber said the Budgeting area will provide approved Capital Project Proposals in a binder to each BSO. The format is very similar to the old form but requires more stringent justification up front. When a change in status necessitates a Change Action, the change action form will be submitted. Any change in status will go through the approval and documentation process. ELT requested that Jim and Amber prepare guidelines on what constitutes a change action. Greg commented it might be a 10% change in scope, time, or cost.

Bob said it will be helpful to be able to compare progress reports against planning documents. ELT discussed how one initiative may be made up of several projects, i.e., provide water to residents in a geographical area, and Karla asked if there would be a good way to relate

projects that contribute to the intended outcome. One manager should be accountable for the intended outcome.

Greg expressed his concern whether we have the resources necessary to coordinate and track the additional paperwork flow he foresees being generated using the new system.

Capital project status meetings will continue to be held. BSOs will have the primary control of their programs along with their Process Owners. Jim said the project proposal will be rolled out first, and we may institute the change this year or next year. Amber said the new system will be introduced to the BSOC tomorrow. Examples will be developed to share with them.

Greg suggested an Empowerment Matrix be prepared as a tool to get everyone on the same page. The Consensus Decision Tool (CDT) was used to determine levels of consensus on whether to roll out the new process. Everyone agreed to move forward with the proposed changes in the Capital Budget Process, with CDT levels above 3. Comments during the consensus process included not knowing enough about the existing budget process and concerns regarding the approvals, roles, and coordination. This will be addressed with an Empowerment Matrix.

ELT Action: ELT reached consensus (CDT level 3 plus) on proceeding with the new Capital Budget Process. Amber and Jim will rollout the process to the BSOC tomorrow for feedback and then finalize the process, including an Empowerment Matrix. The fully documented process will be returned to ELT in the form of a Capital Budget Process policy/procedure for full implementation with the 2005 Capital Budget.

Break (10:15)

Remove Sufficient Costs from 2004 Operations – Amber Halloran (10:30)

Amber distributed information on how the dividend to the City of Louisville is calculated. Included in her handout was a statement on the Status of Cost Reductions.

Amber was optimistic that net income will allow payment of the dividend.

For follow up, Amber will send a spreadsheet to ELT of the makeup of the \$1,982,796 in Budget Reductions to Date in 2004.

Review ELT Goals for Weighting, EEO Goal, MBD Goal – Susan Lehmann and Greg Heitzman (10:38)

Goals Weightings - Susan distributed material on goals weightings for ELT, BSOs, POs, and frontline employees for discussion. The VP/ELT goals and weightings have been set by John with input from Susan. Each Vice President will set the weightings for their BSOs; the BSOs will decide for the POs; and POs will decide for frontline employees. Job descriptions are being updated to include competencies for individual jobs. To assure the goals weightings are not arbitrary and are realistic, managers will need to articulate to employees how and why the assigned weighting is determined.

ELT goals weightings distribution are 30% for Shared President and VP Goals, 60% for Individual Goals (up 6% for 2003), 10% for Corporate Diversity Goals (down 6% from 2003), yielding a total 100% for goals. Mr. Huber desires to use 30% for the Competency weighting (down 10% from 2003). The PA weighting rates for overall scores is 70% for Goals (up 10%) and 30% for Competencies (down 10%).

BSO and PO goals weightings distribution are 90% for Individual or Shared Goals (up 6% from 2003) and 10% for Corporate Diversity (down 6% from 2003), yielding a total of 100% for goals. The Competency weighting can vary from 20% to 40% for BSOs, POs, and front line employees.

Kathy Schroeder will present these changes at the BSO and PO meetings and then rollout to frontline employees. Susan said employees have input on what the percentages should be, but managers have the final decision.

MBD Goal – Ron Green discussed the 5% MBD goal with ELT. He felt it should be raised to 7%, but as yet does not have the data to support such a change. ELT asked that data be gathered and analyzed before a decision is made to raise the MBD goal. Amber Halloran said she will work with Ron to see where we ended last year and will return to ELT with a recommendation for the 2004 MBD goal within 30 days. In the meantime, communication will be made that the goal is expected to go up. Greg will add this to the bin list for the third or fourth week of June.

Diversity Goal – Susan distributed a document on the Diversity Goal for discussion. She said each VP, CBSO, BSO, and PO will have a goal weighted at 5% that states “I actively support Diversity at LWC and serve as a role model to the organization”. Indicators will be used instead of measures, and the document contained 40 examples of indicators for diversity-related behaviors. Corporate indicators will include Affirmative Action (hiring, promotions, and progressions), Diversity Training/Communications, and Employee Complaints (EEO, grievances, behavioral, environmental complaints).

Outcome – ELT will implement the Goals and weightings as provided by Kathy. ELT members may provide feedback to John or Susan regarding the goals and weight distribution. Kathy Schroeder will present this plan at the BSOC meeting tomorrow.

TKO Report – Bob Miller (11:28)

Bob commented since the agenda and minutes were approved well before the next topic was scheduled, ELT made good use of its time by discussing Open Time topics. He also said ELT may want to identify the desired outcome before beginning discussion of a topic. He felt there was a high consensus level among ELT.

Bin List and Agenda – Greg Heitzman (11:35)

Greg will review the bin list and send out the agenda for the June 1 meeting.

Meeting Adjourned (11:37)

***Items requiring action are “shadowed” and ELT Decisions are “Bolted” in these minutes.**

ELT Meeting Minutes June 1, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, Bill Meeks, Karla Teasley, John Huber, Susan Lehmann, Kate Farrow

Minutes Approved and Agenda Reviewed (10:10)

Minutes from the May 24 meeting were reviewed and approved. The agenda was adjusted to allow John to discuss the Capital program and for Greg to update the ELT on the May 30 power outages.

Capital Program (10:15)

John provided a summary of recent capital projects that have exceeded budget. These include: Riverbank Filtration; HRIS system; Crescent Hill Waste System; Crescent Hill Slate Roof; and increasing bid prices. Further, the Infrastructure Reserve will be used for a second year to supplement lower revenue. John suggested that we need to review our Capital strategy, impact on borrowing schedule, and rate increase. The ELT Capital Sub-team will begin to look into these issues and report back to ELT.

Power Outage (10:20)

Greg provided a summary of plant operations during the power outages on May 30. There were two storm fronts that moved through the service area. The first front moved through Louisville at 4:00 pm, and did not impact operations. The second front came through Louisville between 11:00 pm and 12:00 midnight causing power outages at the Crescent Hill Treatment Plant, Zorn Pump Station, and several booster pumping stations in the distribution system. Power supply from LG&E's Clifton substation was interrupted, causing partial power outages at Crescent Hill and Zorn facilities. Although the plant was not shut down, production levels were significantly reduced for a four hour period, until pump units could be transferred to the Hillcrest power supply. Several chemical feed systems were impacted with the power feed interruption. The storms also disrupted power supply to major pumping stations, including Westport, Freys Hill, and Chamberlain. SCADA phone line signals were lost from a number of remote pump stations and storage tanks. This limited the ability to conduct remote operations of key facilities. Backup power was restored and there was adequate storage in the distribution system that prevented loss of water supply. There were no water outages related to the storm and no boil water advisories were issued.

Facility Management workers were brought in on Memorial Day to remove fallen trees at Crescent Hill on Reservoir Avenue and a number of other remote facility sites. Staff is working to clear the downed trees and compile costs associated tree removal. At this time there appears to be no building or facility damage. John recommended we follow up with LG&E regarding the critical importance of power to key facilities.

NLP Process (10:30)

Greg explained the process for the NLP section review and the use of the CDT for approval of each NLP section. The agenda will be adjusted to accommodate sections with varying length. Greg and Kate will perform an assessment at the break to determine if meeting strategy needs to be adjusted after the break.

NLP Sections 1 & 2 (10:40)

ELT reviewed Sections 1 and 2 of the NLP. Kate and Greg will work with John to update Section 1. ELT identified several items for John to consider in the Section 1 update (see attached table). John will be the primary author for Section 1, to set the tone for the NLP document. Greg presented Section 2. The follow up items are documented in the attached table.

ELT reached consensus level 4+ approval for Section 2, including the assigned follow up tasks. Greg will coordinate completion of Section 2 with Kate and assure all follow up items are completed. Kate will e-mail a final version to ELT members for information only.

Break (12:00)

NLP Sections 3 (1:05)

ELT reviewed Section 3. Bill previously submitted Section 3 to ELT for approval. Several follow up items are included in the attached table. Bill will continue to serve as the coordinator for Section 3 and work with Kate to finalize this section. Kate will e-mail a final version to ELT members for information only.

NLP Section 4 (1:25)

Susan presented the draft Section 4 for ELT review and comment. The follow up items are included in the attached table.

ELT reached consensus at level 4+ approval for Section 4, including the assigned follow up tasks. Susan will coordinate completion of Section 4 with Kate and assure all follow up items are completed. Kate will e-mail a final version to ELT members for information only.

NLP Section 5 (2:20)

Bob presented the draft Section 5 for ELT review and comment. The follow up items are included in the attached table.

ELT reached consensus at level 4+ approval for Section 5, including the assigned follow up tasks. Bob will coordinate completion of Section 5 with Kate and assure all follow up items are completed. Kate will e-mail a final version to ELT members for information only.

Summary/Housekeeping (3:00)

A summary of the meeting was provided by Greg. Sections 1, 6, and Appendix need ELT review and approval. This will require another special meeting. Greg will schedule this meeting before the end of June, to complete review and approval of these sections. Greg also provided a brief overview for the June 7 ELT meeting and will prepare an agenda from the Bin List and e-mail to members.

TKO report (3:10)

Bob summarized the meeting and reported active participation. Agenda was adjusted to adequately cover the content. A majority of the time was spent on Systems-based Management elements of the NLP. Bob also suggested the group consider what the NLP update will be titled. A follow up meeting will be required to complete the NLP review process.

Adjourn (3:15)

* ELT Decisions are "Bolded" in these minutes.

NLP Update 2004

Section	Task	Responsible Party	Date
1	Integrate the following in Section 1. <ul style="list-style-type: none"> - Cost Reduction Strategy - The need for flexibility and the ability to reorganize when necessary (add emphasis) - LWC is "Operating As" vs. "On Our Way" to a TQO - Internal Customer Satisfaction drives External - Incorporate Key Industry Trends information (referring to info from Ed Chestnut and Bob Miller) - Changes in business conditions <ul style="list-style-type: none"> o Revenue and income reductions o Decrease in base sales 	John Huber	
2.5	Validate core descriptions	Karla Teasley Susan Lehmann	6/4
2.5	Discuss with John Huber how to list or if to list the Office of the President	Barbara Dickens	6/4
2.7	Insert Relationship Chart into text	Kate Farrow	Final
2.8	Insert measures table into text and add in the employees' role	Karla Teasley Ed Chestnut	6/11
2.9	Add language addressing the organizations move to create a corporate Standard Operating Procedure template for future ISO certification	Greg Heitzman	6/4
2.10	Integrate MBD, communicating the message, and central procurement	Bob Miller	6/11
2.11	Update to include 2-3 examples of its Matrix use <ul style="list-style-type: none"> - HR Benchmarking - Risk Management - Customer Service 	Bob Miller	6/11
2.11	Define Metric vs. Process benchmarking	Bob Miller	6/11
2.12 2.13 2.15	Combine to reflect significant process changes driven by the ELT	Greg Heitzman	6/11
2.14 2.16	Combine to discuss continuous process improvement	Greg Heitzman	6/11
2.18 2.19	Merge 2.19 into 2.18	Greg Heitzman	6/4
2.18 2.19	Review HROE's role in Certification Audits Merge 2.19 into 2.18	Susan Lehmann	6/4
2.20	Review section with John Huber to validate expectations for ISO 9001:2000 versus 14000	Greg Heitzman	6/4
3.1	Update subsection to include or reference "Performance Partnerships"	Susan Lehmann Bill Meeks	6/4
3.3	Need the date of the latest Partnership Agreement was	Bill Meeks	6/4

Section	Task	Responsible Party	Date
	signed and a copy for inclusion in Appendix		
3.5	Review Communications sections in entire document and coordinate with Section 4	Kate Farrow	Final
4	Include Leadership Institute in Section 4	Susan Lehmann	6/11
4.2	Add more specifics regarding corporate goals and results of ICS & OEI	Susan Lehmann	6/11
4.3	Incorporate diversity hiring goals and update the reference to management goals for diversity	Susan Lehmann	6/11
4.4	Review with other "communication sections" in Sections 1, 2, 3, 5, and 6 and combine or clarify differences	Kate Farrow	Final
4.7	Update Rewards and Recognition section to discuss in more detail the plans for 2005-2007, sub-team's survey results, and opportunities for continuous improvement	Susan Lehmann	6/11
4.8	Review section for possible inclusion in Section 3 – Partnerships	Susan Lehmann Bill Meeks	6/11
5	Review subsection order (i.e. Section 5.5 to 5.3)	Bob Miller Kate Farrow	6/11
5.1	Link to Boundaries section (5.6) - Reference employee boundaries	Bob Miller	6/11
5.2	Review and coordinate on managers' and employees' responsibilities from section 5.2 and 4.8	Bob Miller Susan Lehmann	6/11
5.3	Update to include Consensus Decision Tool used by ELT, DPT – toolbox	Bob Miller	6/11
5.3	Prepare text on employee's ability to communicate "bad news" – "tell the truth". Coordinate with Kate on where to include.	Bob Miller	6/11
5.10	Review the old Section 2.18 NLP to update, Consider moving to Section 4.8; consider including a union/non-union discussion on accountability and non-performance	Bob Miller Susan Lehmann Bill Meeks	6/18

Final – This task will be completed when the document is finalized.

ELT Meeting Minutes
June 7, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, John Huber, Bill Meeks, Karla Teasley, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Amber Halloran, Cindy Kowalski, Carol Stuecker (Stuecker & Associates), Ruth Lancaster

Minutes Approved and Agenda Reviewed (9:06)

Minutes from the June 1, 2004 ELT meeting were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

New Employee Assistance Program (EAP) Provider – Stuecker & Associates – Cindy Kowalski and Carol Stuecker (9:10)

Cindy Kowalski distributed an overview packet of services provided by Stuecker & Associates, as well as a Supervisor Guideline. She then introduced Carol Stuecker of Stuecker & Associates, who described her company and the services they provide. Stuecker is a regional firm with offices all over the United States and throughout Kentucky. Companies they serve locally include Colgate Palmolive in Jeffersonville, Indiana and ten school systems throughout the state. They consider themselves workplace specialists and all staff therapists have at least 15 years of experience.

Cindy Kowalski said rollout to employees will occur in 30 minute presentations in two weeks to let employees know what services are offered. Supervisor training will occur in six to eight weeks and will include BSOs and POs.

A plan has been developed to transition employees currently with Value Options to Stuecker, based on where they are in their counseling. Employees with only a few sessions left will finish up with Value Options and others will transition to Stuecker.

In response to Greg Heitzman's inquiry, Ms. Stuecker said her company can furnish statistical reports that indicate how LWC compares with other clients. Greg stated the reports may help identify training needs at LWC.

Travel Authorizations (9:45)

Travel for Bill Meeks, Tom Cushing and Bruce Mingus - Bill said he, Linda Kaboolian, and Aileen Beach are doing a piece on Labor Management Partnerships at Harvard. Bill has secured funding from AFSCME for travel expenses for himself, Tom Cushing, and Bruce Mingus, but asks ELT approval for the time away from work June 20-30. This trip is tied to the ASCME Convention, and both are completely funded by ASCME.

ELT Action: Reimbursed travel does not require ELT approval; however ELT endorsed the participation in this Labor Management Program. Approval will proceed through the CBSO and President. Greg will coordinate interim staffing issues with Jim Brammell. Greg will add a Labor Management Partnership report from Bill Meeks to the bin list for July or August.

Travel for Glenn Mudd - Bob Miller said Glenn Mudd is Chairman of the Utility Division of the National Safety Council and will be attending a division meeting (the third of four such meetings) in Denver at a cost of \$1,700. The National Safety Council will pay \$800 and LWC's part of the expenses will be \$900.

ELT Action: ELT approved Glen Mudd's travel. A report by Glen Mudd on this activity will be added to the bin list for late 2004 (following Glen's fourth division meeting).

Board Agenda – John Huber (9:50)

John Huber said the agenda is long and asked presenters to give concise reports. He discussed the possibility of deferring some items on the agenda to a future meeting. He is considering holding a special meeting, possibly the fourth Tuesday of June, to discuss Corporate Governance. Bob Miller suggested the committee assignments could be coupled with the Governance meeting. Margaret Harris will attend her first meeting as a Board member on June 8. She will serve on the Public Affairs and Customer Satisfaction Committee. Phil Bond will be at the Board lunch tomorrow and will be presented with a Julep Cup commemorating his service to the Louisville Water Works Board.

Break (10:10)

Review High Level Financial Information – Amber Halloran (10:17)

Amber distributed high level financial information for review and discussion. A full-blown Greenbacks report will be presented at the next ELT meeting (June 21). Bob expects to distribute a year-end forecast later today, and commented it appears we are ahead of the revised budget plan. Amber also advised the new wholesale rates are now being billed.

Operators Licensing – Ruth Lancaster (10:40)

Ruth Lancaster gave a PowerPoint presentation with an overview of operator licensing at LWC. She and ELT discussed logistical and budget issues with training and testing, and the need to have licensed employees in the pipeline for job openings. Greg recommended LWC support training, testing and license renewals for positions where licensing is required as well as training, testing and license renewals for positions where licensing is not required to keep qualified employees available to maintain flexibility in staffing.

ELT used the Consensus Decision Tool (CDT) on two issues:

Scenario I – LWC will cover expenses (fees, travel, work hours) related to training and license renewal for employees in positions requiring operator licensing as part of the job duties (union and non-union).

ELT Action: ELT reached consensus level 4+.

Scenario II – LWC will cover expenses (fees, travel, work hours) related to maintaining license renewals for those employees that possess an Operators License and may not currently be in a job position that requires the license. (ELT did not address the situation where employees who do not possess the license and desire to obtain the license for future job eligibility.)

ELT Action: ELT reached consensus above level 3+.

Follow up: Greg will work with Ruth Lancaster and Jack Wang and will bring a policy position statement back to ELT for consideration. The policy will address Operator License requirements, license expenses, and authorizations for travel and training to maintain licenses. The policy also needs to address the situation where employees desire to become licensed for future job eligibility and career advancement and the policies associated with reimbursement for expenses.

Susan Lehmann observed this topic could have been handled by the BSOC.

Executive Session – Mr. Huber requested ELT go into executive session. Upon returning to open session the meeting concluded.

TKO Report – Bob Miller – Bob Miller noted that the meeting ran very close to the scheduled time until the final topic and agreed with Susan that the final topic could have been handled by the BSOC.

Bin List and Agenda – After discussion of the attendance at the AWWA Annual Conference (John, Karla, Greg, Bill attending) and review of BIN list, it was decided to skip the June 14 ELT meeting and resume with expanded meetings on June 21 and June 28. Greg Heitzman advised he would review the BIN list and prepare an agenda for June 21.

Meeting Adjourned

*Items requiring action are “shadowed” and ELT Decisions are “Boded” in these minutes.

ELT Meeting Minutes
June 21, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Ed Chestnut, Barbara Dickens, John Huber, Karla Teasley, Susan Lehmann

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Ron Green, Amber Halloran, Sue Purdy, Kate Farrow

Approval of minutes and agenda was deferred until a quorum could be present at the meeting.

Greenbacks Report – Amber Halloran (8:15)

Amber Halloran distributed the Greenbacks report to attendees and discussed financial highlights for the month of May. Amber commented that wholesale water sales are up due to the rate increase.

At Greg Heitzman's request, Amber will have footnotes added to the Greenbacks report showing revisions from the original budget for the employee count, O&M expenses, and income statement (to note changes from the Board adopted budget). On the page where the Sale of Water Revenue graph appears, Amber will add a graph showing the monthly consumption pattern. Greg said the new monthly report prepared by Anna Norris showing capital projects routed for approval during the month was very helpful.

Revised budgets have been distributed to BSOs.

Bob Miller said the current NewsLeaks includes a communication to employees on LWC's financial performance through May 2004.

Minutes Approved and Agenda Reviewed (9:07)

Minutes from the June 7, 2004 ELT meeting were reviewed. A revision was made under the section "Review High Level Financial Information." The sentence, "A full-blown Greenbacks report will be presented to ELT on Monday, June 14," has been amended to "A full-blown Greenbacks report will be presented to ELT on Monday, June 21." ELT did not meet on June 14th. The minutes were approved with that change. The agenda for today's meeting was reviewed and approved.

2004 M/WBE Spending Goal – Amber Halloran and Ron Green (9:15)

Ron Green distributed copies of a presentation on M/WBE Spending Goals and led ELT through the presentation. Ron and Amber Halloran recommend resuming the 5-year plan to achieve 15% MBE spending by 2007 and establishing a 9% MBE and 5% WBE spending goal in 2004. The annual goal will increase 2% each year until the 15% spending goal is reached in 2007. Ron mentioned that considerable communication and partnering has occurred with other businesses and contractors promoting the hiring of M/WBE vendors. Work will continue to build a diverse vendor database and educate prime contractors on hiring minorities. Ron also reported that KMBC will be hosting a conference June 23-24 at the Convention Center and encourages ELT and BSOs to attend.

At Greg's request, Amber will also add M/WBE spending to the Greenbacks report each month. ELT used the Consensus Decision Tool for adoption of the 2004 M/WBE spending goals.

ELT Action: ELT reached 4+ consensus to adopt the MBE spending goals of 9% in 2004, 11% in 2005, 13% in 2006, and 15% in 2007, and continue with the current 5% goal for WBE spending.

Susan Lehmann and Amber Halloran will return to ELT with a recommendation to recognize members who worked on the M/WBE team.

John Huber asked Ron to prepare a communication to the Board on the new MBD program to be made in July or August along with any changes in the certifying agencies.

Recognition Request for Time Recap Sheet Team – Amber Halloran (9:40)

Amber Halloran distributed and discussed her recommendation for a \$50 per team member recognition for the Time Recap Report Team members. The team met during the months of March, April, and May working to simplify Oracle time recap reports for Union employees. The simplified time recap was rolled out the week of June 21 to communicate changes to the Union body.

The team members were: Joe Lueke, Kate Farrow, Terrance Cobb, Diana Smith-Cohen, Mike Howard, Willy Yates, and Bill Meeks. Greg recommended recognition also be given to Amber Halloran and Jim Brammell for their sponsorship and participation, for a total of nine recognitions (if consistent with past team recognition for BSOs). ELT used the Consensus Decision Tool.

ELT Action: ELT reached 4+ consensus to award \$50 per team member recognitions to Amber Halloran, Jim Brammell, Joe Lueke, Kate Farrow, Terrance Cobb, Diana Smith-Cohen, Mike Howard, Willy Yates and Bill Meeks. Amber will follow up with processing the recognition award.

Travel Authorization for Shannon Strulson – Greg Heitzman (9:45)

The estimated expense for Shannon Strulson to travel to Pine Mountain to attend the Certification Class and take the exam is \$698.00. Shannon is a Lead Operator Apprentice, a position that requires the Operator Class IV license. Greg recommended approval for her travel. ELT used the Consensus Decision Tool.

ELT Action: ELT reached 4+ consensus to approve Ms. Strulson’s travel expense to take the Certification Class and Exam.

Break (9:50)

Next Level Plan – Greg Heitzman (10:05)

Kate Farrow distributed the latest draft of the NLP and Appendix, and an NLP Outline of sections and owners for deliverables (updates).

Section 1

Section 1 will be an overview to employees of our strategies to meet goals on quality, customer satisfaction, and value. The following topics captured in today’s meeting may duplicate some of the brainstorm topics from the June 1 ELT meeting:

1. Cost reduction strategy
2. Need for flexibility
3. Need to reorganize
4. Change LWC from “as is” to TQO
5. Internal Customer Satisfaction
6. Energy market
7. Slower growth curve
8. Growth strategy

The Consensus Decision Tool was used.

ELT Action: ELT reached 4+ consensus that John Huber and Kate Farrow are empowered to complete Section 1 of the Next Level Plan.

Section 3

John Huber raised concern that Internal Customer Satisfaction is not adequately covered in the plan. After discussion, the team felt a subsection should be created in Section 3. Kate Farrow volunteered to write the new subsection to Section 3 regarding Internal Customer Satisfaction.

Section 6

Section 6 will be renamed Organization Structure and Roles. Bob Miller volunteered to be the coordinator for this section, and Karla Teasley agreed to provide assistance. Everything in the Appendix related to Roles will be moved to Section 6, and each section coordinator will decide what charts and reference material go into the Appendix.

The need for timelines was discussed. Everyone agreed an overall timeline was not needed for the Plan. Each section coordinator will determine if there are critical deliverables that are time dependent, and if so, will include critical target dates in the respective section.

ELT Action: ELT reached 4+ consensus that Kate Farrow and Bob Miller are empowered to complete Section 6. Kate will coordinate completion of the Appendix from information supplied from section coordinators.

Greg will put time on the next agenda to discuss the information Bob provided in his June 18 email regarding defining and naming the Next Level Plan Update. The topic will also cover other logistical elements of the Plan, such as editing the Plan, publishing, and communications roll-out to employees.

Loaned Executive for Metro United Way – Karla Teasley (11:32)

Karla asked ELT if LWC should provide a loaned executive this year considering employee cuts were significant. John Huber will contact Metro United Way to see if LWC can step out for a year. The Company will sponsor an internal campaign for 2004, with leadership by the HROE Core.

Executive Session

Mr. Huber requested ELT go into executive session. Upon returning to open session the meeting concluded.

TKO Report – Bob Miller

Bob Miller said an occasional four-hour meeting can be effective and productive for accomplishing ELT work. Bob said a change in the routinely scheduled starting time needs to be accompanied by an update to the electronic calendars. Bob said there were good candid discussions.

Bin List and Agenda

Greg will develop the agenda from the Bin list.

Meeting Adjourned (approximately Noon)

***Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.**

ELT Meeting Minutes
June 28, 2004

Attendees: Greg Heitzman (Leader), Bob Miller (TKO), Barbara Dickens, John Huber, Kathy Schroeder (representing Susan Lehmann), Karla Teasley

Absent: Ed Chestnut, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Kate Farrow, Roger LeMaster, Don McKay, Sandra Beyerle

Minutes Approved and Agenda Reviewed (8:07)

Minutes from the June 21, 2004 ELT meeting were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

Elimination of Severance Policy for Office Personnel – Kathy Schroeder and Amber Halloran (8:25)

Kathy and Amber distributed information regarding past practices for vacation accrual, severance, non-union pay cycle, and advance pay for non-union employees. These changes were approved by the Board of Water Works at its October 2003 meeting. Changes involving the pay cycle going to one week in arrears and discontinuance of advance pay for non-union employees have already been implemented. The Board approved the vacation accrual payout to be implemented in July 2004. The payout applies to non-union employees. Union employee vacation and sick leave accrual will remain unchanged at this time. Amber and Kathy asked for approval of their plan to implement the changes for vacation accruals and sick leave, as well as their draft communication to LWC salaried employees.

Kathy Schroeder will include examples and charts in the communication to non-union employees showing how 7/12 of their next year vacation accrual will be converted to sick leave. Non-union employee accrued vacation time (7/12) will be reduced by the 5 days that were advanced the week of 9/29/03 to place non-union salaried employees on the one week in arrears pay cycle, and the remaining accrued vacation time will be placed in the employee's sick leave account. The sick leave policy will be amended so employees can bank up to 20 days per year instead of the current 15 days per year (consistent with Union employees), and any excess over 20 days will be paid out in February 2005. The vacation policy will remain as is with vacation earned on January 1 (for the previous year) and added to the employees' vacation account at that time (i.e. non-union employees will be granted vacation PTO earned from the previous year into the PTO account on January 1, based on years of service eligibility).

ELT used the Consensus Decision Tool.

ELT Action: Consensus was reached at level 5 to eliminate the severance policy for office personnel as set out above.

Karla Teasley suggested that meetings be scheduled to explain the changes, where employees can attend on a voluntary basis, and Kathy Schroeder agreed.

Corporate Policy Gaps – Barbara Dickens and Roger LeMaster (8:57)

Barbara Dickens distributed a memorandum to ELT regarding gaps in corporate policy, the policy adoption process, and official corporate procedures for discussion. She asked that ELT members review the memo and particularly the items on page 4 listing policies that may need to be adopted and communicate any additional gaps and comments to her. Barbara also discussed the lengthy process followed in policy adoption. She suggested an improved, streamlined process would be origination of the new policy or revised policy at the PO or BSO level, initial review by legal, subsequent revisions (if necessary) by BSO, approval by appropriate VPs, final approval by legal, then reporting the change to ELT. Barbara is looking for input on the new process and will return to ELT for approval of the new process in the third quarter. Greg will place the topic back on the bin list for further discussion in August or September 2004.

Vehicular Accident Policy – Don McKay and Sandra Beyerle (9:28)

Don McKay distributed copies of the latest draft of the Vehicular Accident Policy. The expected outcome from today's presentation is approval of the revised policy by ELT. Changes to the draft were discussed, particularly Section 7.6 concerning the points to be assessed to a driver in the event of an accident. Points are assessed on a 1-5 scale (see Appendix A).

Don also pointed out Section 8.4 provides that even if an employee is not at fault in an accident, the employee is still subject to discipline up to and including termination if he is in violation of the Employee Code of Conduct Policy and/or Drug & Alcohol Policy at the time the accident occurred.

The chart of Motor Vehicle Accidents for 2002-2004 YTD shows 30 accidents through June 22, 2004, whereas the yearly total was 49 for 2002 and 56 for 2003. Don McKay said motor vehicle accidents have risen to the top of the list on BSOC risk assessments.

The Consensus Decision Tool was used.

ELT Action: ELT reached consensus of 4+ to adopt the revised Vehicular Accident Policy to become effective July 1, 2004 (pending Mr. Huber's approval of policy).

Don said that points previously assessed against employees will be removed so each employee driving company vehicles can begin under the new policy with a clean slate. Don advised an information card describing steps to take in the event of a vehicular accident will be placed in each vehicle.

Break (10:00)

System Certification Audits – Kate Farrow (10:20)

The administration of system certifications was moved from Roger LeMaster to Kate Farrow in January 2004 following the reorganization. Kate will not make any changes to the 2003-2005 certification audit plan, so the process and expectations will remain the same. Kate and John Huber will meet with select employees (NWTs and SACs) to gain feedback regarding the certification process and the importance of the Quality Program. Kate will work with Roger LeMaster, David Simmons, Jack Wang, and Greg Heitzman to develop future certification

requirements for the 2006-2008 review cycle. Future certification requirements will be adopted that position the Company for ISO 9000 certification by 2008. BSOs should notify Greg Heitzman if they desire to participate in developing the 2006-2008 ELT system certification requirements.

Kate also distributed a copy of her new Job Description and 2004 Performance Goals (with weightings) to ELT. Kate has a direct reporting relationship to Susan Lehmann.

Next Level Plan Logistics – Greg Heitzman and Kate Farrow (11:35)

Completion of Sections:

Section 1 – John Huber will have this section completed by July 2 or July 9.

Section 6 – Bob Miller will have this section completed by July 2.

Title of NLP Document

ELT considered several names, and decided the new document will be titled 2004 Next Level Plan and Beyond - LWC Organizational Effectiveness and the four pillars of quality will be shown on the cover. Kate will prepare and circulate a cover page to ELT for review. John Huber will approve the final cover page.

Editing

Barbara Crow and Kelley Dearing-Smith are available internally, but Kate will check with two external editors, Cindy Stairs and Katherine Murrell, and get estimates. Kate Farrow and Susan Lehmann will make a decision based on cost whether to use internal or external editors.

Printing

Black and white hard copies will be furnished to Process Owners, Business System Owners, Vice Presidents, Union leaders and SAC members, plus 25 extra copies will be printed. The document will be made available in color online. Kate will follow up on costs and will determine the final number of copies to be printed.

Communication/Rollout

Greg and Kate will work on communications and rollout, and Bob Miller will be available as a resource to them. Bob suggested rollout could be done serially to place more emphasis on each section.

Overall NLP Timeline

Draft to BSOC by 7/15
Editing done by 8/1
Printing done by 9/1
Rollout from 9/15 – 10/31

John said draft copies should go to BSOs as they develop operating plans.

The topic will be put back on the bin list for discussion before rollout in September.

ELT used the Consensus Decision Tool.

ELT Action: Consensus was reached at level 4 on the logistics and procedures for completion and rollout of the Next Level Plan as set out above.

NLP communications and rollout will be added to the bin list.

Review Bin List – Greg Heitzman (11:30)

Greg said he will work with Bob Miller on transitioning the role of ELT Leader to Bob for the third quarter of 2004. Greg reviewed the bin list with ELT and will make the agreed upon changes. He will add Next Level Plan Rollout and certification audits to the bin list.

Open Time (11:55)

Hiring Vacancies – Kathy Schroeder said there are two clerical positions that will be posted.

Travel Expenses for attending AWWA KY-TN Meeting – Kay Ball is the Treasurer, and her expenses are estimated at \$700; Greg and Karla will attend the full conference, which will be about \$500 each. The Consensus Decision Tool was used.

ELT Action: Consensus was reached at level 4+ to approve travel expenses for Kay Ball, Karla Teasley and Greg Heitzman to attend the AWWA KY-TN Conference in July 2004. Other employees are approved for attendance at the conference per JLH email of June 11. The one and two day trips to Nashville are less than \$500 and do not need ELT approval.

Manganese – Greg briefly explained the manganese precipitation problem that is causing an increase in black water complaints. He will follow with a communication from Rengao to ELT.

TKO Report – Bob Miller (12:10)

Bob said when reviewing the agenda, ELT needs to reach agreement on the topic and outcome. Bob said we are 10 minutes over, due to taking a 20 minute break.

Bin List and Agenda (12:12)

Greg will develop the agenda from the bin list.

Meeting Adjourned (12:12)

***Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.**

ELT Meeting Minutes
July 12, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

ELT Roles – Roles changed at the beginning of the new quarter: Bob Miller is ELT Leader, Karla Teasley is Timekeeper, Susan Lehmann is Scribe, and Bill Meeks is Backup Recorder.

Minutes Approved and Agenda Reviewed (9:08)

Minutes from the June 28, 2004 ELT meeting were reviewed. In the Corporate Policy Gaps section, fourth line, the sentence, "She suggested an improved, streamlined process would be BSO recommendation to Legal, then signoff by Vice President or President, then reporting the change to ELT," was amended. Barbara Dickens changed the sentence to read: "She suggested an improved, streamlined process would be origination of the new policy or revised policy at the PO or BSO level, initial review by legal, subsequent revisions (if necessary) by BSO, approval by appropriate VPs, final approval by legal, then reporting the change to ELT." (Highlighting added to denote change.)

It was also noted that review of the ELT Agenda should have been reported as 8:07 instead of 9:07. The minutes were approved with those amendments. The agenda for today's meeting was reviewed. The Procurement Card Risk Management topic will be rescheduled to next week, and the time will be used to discuss the status of the Next Level Plan. The agenda was approved with those changes.

Board Agenda – John Huber (9:20)

Governance items will be discussed at a special board meeting to be held in July if schedules will permit. John Huber will meet with Stewart Conner and Gerald Martin this week to discuss how to proceed and he also hopes to receive feedback from the Mayor's office.

There continue to be quorum issues, but at present it appears all six Board members will attend the rescheduled Board meeting on July 20. The agenda for the July 20 Board meeting is straightforward. Ron Green will give an update on the MBE program. The 10-year financial plan is a key issue for discussion.

Treatment for Manganese – Greg Heitzman (9:25)

Greg updated ELT on the successful treatment for manganese that was the cause of black water complaints. He called attention to the water quality complaints chart in the board book. Total water complaints are down, but black water complaints were up and peaked in June. The source was determined to be a higher concentration of manganese in the ferric chloride used in the coagulation process. Greg is pursuing a credit from the supplier. He will also pursue with

AWWA getting standards established for the amount of manganese present in ferric chloride used in the water treatment coagulation process.

Review Operating Performance (Greenbacks Report) – Amber Halloran and Sue Purdy (9:28)

Amber distributed the June Greenbacks report, and guided ELT through the highlights. She said water sales and water consumption were both over budget.

Amber asked ELT's assistance in getting invoices paid timely so expenses can be recognized in the current period.

After discussion of the financial results, Bob summarized follow up items that Amber is to provide to ELT via email:

- Detailed breakout of non operating income and expenses
- Detailed analysis of transportation and variances
- Labor report
- Miscellaneous expense variances
- A report of deductions from Labor budget and what was added (total number by system)

Break (10:15)

Travel Request for Mike McGee – Greg Heitzman (10:30)

Because a Class IV Distribution License is required in Mike McGee's new position, Greg Heitzman recommended approval for Mike's travel to attend the Certification seminar and workshop, and take the test for certification. Expenses are estimated at \$511 if Mike attends the August 24-27 workshop/test.

ELT Action: ELT approved Mike McGee's August 24-27 travel request to obtain a Class IV Distribution License.

Resources – Susan Lehmann (10:33)

Next Level Plan - Susan Lehmann committed that her department will provide the resources to complete the Next Level Plan, and will keep to the schedule established by ELT for completing, printing, editing and publishing the NLP Document. John Huber and Bob Miller will complete Sections 1 and 6 this week.

Karla, Greg and Susan will schedule a meeting between them to discuss communications, and will then schedule a meeting with BSOs.

Certification Audits – Susan said HR will also keep to the schedule for Certification Audits since Kate Farrow has accepted a new position. In the interim the current HR staff will handle Certification Audits. John Huber asked Susan to distribute a schedule for the audits remaining to be completed in 2004.

Internal Customer Satisfaction Survey - Susan said the interim plan is for Helena Dahman and Kathy Schroederl to handle the Internal Customer Satisfaction Survey in August.

Agenda and Bin List – Bob Miller (10:40) – Bob Miller reviewed the bin list with ELT, and will send out the agenda for the next meeting. Greg asked that discussion of the Consensus Decision Tool be added to the bin list to decide whether it was effective and whether its use should continue.

TKO Report – Karla Teasley (10:47)

Karla said the meeting started five minutes late, but moved on schedule to the Greenbacks Report, and ran over by 5 minutes. The Procurement Card Risk Management topic was deferred to another meeting, and ELT ended 40 minutes early. This was a consistent meeting on communication.

Meeting Adjourned (10:50)

***Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.**

ELT Meeting Minutes
July 19, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the July 12, 2004 ELT meeting were reviewed. Greg Heitzman corrected the minutes to read "Treatment for Manganese" instead of "Treatment for Magnesium." The word "magnesium" also needs to be replaced with the word "manganese" throughout the paragraph.

Susan Lehman asked that the minutes be amended in the "Certification Audits" paragraph under the "Resources" heading: The sentence, "Her position will be filled, but in the interim the current HR staff will handle Certification Audits" will be changed to, "In the interim the current HR staff will handle Certification Audits."

Susan also asked offline that the "Internal Customer Satisfaction Survey" under the "Resources" heading, be amended to say, "Susan said the interim plan is for Helena Dahman and Kathy Schroeder to handle the Internal Customer satisfaction Survey in August."

The minutes were approved with those changes. The agenda was reviewed and modified to combine the topics on 2005 Budget Parameters and Schedule with the Rate Equalization/Risk Mitigation Reserve Fund.

2005 Budget Parameters and Schedule, and Rate Equalization/Risk Mitigation Reserve Fund – Bob Miller and Amber Halloran (9:10)

Bob Miller distributed a presentation titled, "Development of 2005 Annual Budget Parameters, Presentation to Executive Leadership Team" and led ELT through the presentation.

John Huber said LWC needs to roll out the methodology on the Risk Equalization/Risk Mitigation Reserve Fund to the Board and the City as soon as possible. Susan Lehmann said it was important to distinguish between the Risk Mitigation Reserve Fund and the Infrastructure Replacement Reserve.

Break (10:10)

2005 Budget Parameters and Schedule, and Rate Equalization/Risk Mitigation Reserve Fund – Bob Miller and Amber Halloran – Continued (10:25)

Bob commented that pages 2-5 of the presentation represents work the company must complete. Karla expressed concern about communicating the rationale to customers for a 2005 borrowing to secure a lower interest rate than what could be expected for a 2006 borrowing.

ELT discussed a rate increase of 9.8%. John said he feels if LWC asks for more than 6.5% it would be a multi-year increase. That is, a large increase this year would make it difficult to increase rates at all next year.

Bill Meeks asked about the difference the company would pay in interest rates if its bond rating went from AA to A. Bob Miller will furnish that information to ELT via email.

Discussion was held regarding the baseline budget increase for 2005 and the role of ELT and the BSOs in setting the budget and making decisions on discretionary items over the baseline. Bob suggested he and Amber develop a communication for review and approval by John Huber.

John Huber and ELT commended Bob and Amber on the work and preparation that went into their presentation.

Evaluate Rate Structure and Strategies for Alternatives – Bob Miller (11:20)

Bob Miller will be sending out an email to ELT describing the strategy alternatives.

Decision Partners Team Update – Bill Meeks (11:19)

To save time, Bill distributed a July 19, 2004 update to ELT, and asked that any comments be sent to him.

Open Time – (11:22)

Training Room A – Susan Lehmann said she has booked Training Room A for the period September 10 through October 29 or HRIS demos. As it is not needed, the room will be made available.

Metro United Way Campaign – Susan would like to get dates scheduled for the campaign. Bob will let Susan know whether any funds were budgeted for the MUW campaign. Susan proposes the campaign be held the last week in October. Bill Meeks said Union planning for their campaign is underway, and sponsorship will need to be considered and approved by ELT.

Agenda and Bin List – Bob Miller (11:25) – Bob Miller reviewed the bin list with ELT. At Susan's suggestion, Bob will remove Kate Farrow's name as presenter for topics on the bin list and will replace Kate's name with Susan's. Bob Miller will send out the Agenda and bin list for the next ELT meeting.

TKO Report – Karla Teasley (11:28)

Karla said ELT is finishing on time because two items were removed from the agenda. ELT went 45 minutes over on the Budget Parameters/Rate Equalization/Risk Mitigation Reserve Fund combined topics, and no outcome was reached except agreeing that additional work was required. There was good discussion.

Meeting Adjourned (11:32)

<p>*Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.</p>
--

ELT Meeting Minutes
July 26, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann

Absent: Barbara Dickens, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Roger LeMaster

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the July 19, 2004 ELT meeting were reviewed. Under the "2005 Budget Parameters and Schedule, and Rate Equalization/Risk Mitigation Reserve Fund" heading appearing on the first page, John Huber corrected the second paragraph, second sentence, to read, "John said he feels if LWC asks for more than 6.5% it would be a multi-year increase. That is, a large increase this year would make it difficult to increase rates at all next year." (Underscoring denotes change.)

A correction was made to the action block under the same heading as follows: "Bob suggested he and Amber develop a communication for review and approval by John Huber." (Underscoring denotes change.) The sentence, "If they get consensus the topic will go on the agenda for next week" was stricken from the minutes.

Susan Lehmann asked that clarification be added to the Training Room A topic under Open Time, as follows: "Susan Lehmann said she has booked Training Room A for the period September 10 through October 29 for HRIS demos. As it is not needed, the room will be made available." (Underscoring denotes change.) The minutes were approved with those changes.

The agenda for today's meeting was discussed and approved.

Second Quarter Goals Review (Incentive, Shared, Employee Performance) – Ed Chestnut (9:10)

Ed Chestnut distributed and discussed the second quarter results.

President, Vice Presidents and BSO 2004 Incentive Plan Goals – During discussion of results of preventable vehicular accidents (Objective V), a request was made for a report of vehicular accidents by Core. Bob Miller will ask Don McKay to send out reports to the CBSOs for their review.

2004 ELT Shared Goals – After brief discussion of the funding and timing for the RBF Phase III, Bob Miller said he and Greg Heitzman will meet to determine how to provide funding for the remaining RBF Phase III activities for 2004. Bob will put this item on the ELT agenda for the August 2 meeting.

John Huber asked Susan Lehmann for a synopsis of certification audits completed and those remaining to be completed this year.

Bob will follow up with Amber Halloran on plans to compute the amount of capital project commitments.

Bob summarized the Goals Review discussion: Problem areas are tied to water sales, capital expenditures, and vehicular accidents.

Break – 10:08

Procurement Card Audit – Bob Miller, Amber Halloran, Roger LeMaster (10:25)

Roger LeMaster discussed the results of the Procurement Card audit. The previous Procurement Card audit was performed in 2000, and it is Roger's recommendation audits be done annually going forward. LWC will be changing to 5/3 Bank for Procurement Cards this year. Amber said each of the current 231 card holders will be required to re-enroll during the transition to 5/3 Bank.

The audit report noted five recommendations to further strengthen controls and reduce costs, and Amber Halloran reviewed her responses to the audit recommendations. Amber stated that monthly procurement card usage reports were available from the liaisons in each area.

John Huber requested a listing of each procurement card holder and their per transaction and monthly limits.

Open Time (11:15)

Bluegrass Consortium –Greg Heitzman said the next step for the Bluegrass Water Consortium is to get a legal entity created. Nine of ten local entities have signed the document to create a water commission. The remaining entity to sign is Fayette County government. The Consortium has met with state and federal elected officials to discuss potential grant funding. The Consortium will need to create a grid of interconnects. They are still a long way from building a treatment plant.

Closed Session (11:18)

Meeting Adjourned (11:30)

***Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.**

ELT Meeting Minutes
August 2, 2004

Attendees: Bob Miller (Leader), Bill Meeks (Volunteer TKO), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann

Absent: Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Smith

Minutes Approved and Agenda Reviewed (8:03)

Minutes from the July 26, 2004 ELT meeting were reviewed and approved, and the agenda for today's meeting was reviewed.

Water Sales Information and Implications – Bob Miller (8:05)

Bob Miller reported that LWC was approximately \$700,000 ahead of the revised financial plan as of the end of June. He also noted that the revised financial plan anticipated a deposit of \$620,000 to the Infrastructure Reserve Fund. However, the estimated water sales variance for July is \$500,000 less than budgeted. With the lower pumpage numbers for July, Bob said that he anticipates that we will not be able to make a deposit into the Infrastructure Replacement Reserve in 2004, and that if water sales continue to lag, we will not be able to achieve the targeted results in the revised financial plan without further expense reductions or an interim rate increase or a carryover into next year. Ed Chestnut is working with Dr. Cerito to update the forecast through year end.

Advanced Treatment Phase III Funding – Bob Miller and Greg Heitzman (8:20)

Greg gave a brief overview of the project. The objective is to present the best alternative to the BOWW for approval next year.

John Huber noted that the strategies behind Advanced Treatment Technology were overall risk management and customer satisfaction. The investment required to meet the known regulatory requirements could be less than that needed for the total scope of Advance Treatment Technology. He stated that we need to research three key assumptions for treatment options at the Crescent Hill plant:

- Because of the varying energy requirements for each alternative, what is the future for energy prices?
- What is the future use of the Zorn Pumping Station?
- What is the future of the Crescent Hill Filter Plant?

Greg said they are proposing taking a recommendation to the Board of Water Works for approval to spend 30-40% this year, and the balance next year. The total estimate for the work is \$370,000. \$150,000 of that amount would be spent in 2004. The \$150,000 is unbudgeted and would be funded from the \$770,000 earmarked for unbudgeted items in 2004. \$220,000 would be budgeted for 2005.

Quality Celebration – Susan Lehmann (8:30)

Susan Lehmann distributed a report on Quality Celebrations. She recommends suspending the peer to peer and quality celebrations for the remainder of 2004. ELT discussed further reducing

spending for 2004 team recognitions. Greg recommends reducing the team recognition spending from \$20,000 to \$10,000. Bob checked for consensus to further reduce 2004 spending to \$10,000, recognizing we have already spent about \$3,000.

ELT Action: ELT reached consensus to reduce the 2004 spending for team recognitions from \$20,000 to \$10,000.

ELT considered Amber Halloran's request to recognize the five-member M/ WBE team at \$50 each, or \$250 total, for their work in implementing a process to increase minority and women participation in all areas of procurement.

ELT Action: ELT reached consensus to award \$50 each to the five M/WBE team members, Ralph McCord, Denise Hettinger, Lynn Humphrey, Barbara Mullen, and Ron Green.

Open Time (8:52)

ICS Survey – Susan Lehmann said the ICS surveys are being distributed today, and she requested 100% participation in order to achieve valid statistics.

2005 O&M Budgets – John Huber said we must keep focused on the long term and balancing the funding of current needs with creating future organizational capabilities. This requires training and development of employees as a key part of succession planning. Bob said he will be distributing a prioritized Strategic Plan to BSOs shortly to keep the focus on strategic initiatives.

Bin List and Agenda – Bob Miller (8:57)

Bob reviewed the bin list with ELT. Bob will prepare and email an agenda for the next ELT meeting.

TKO – Bill Meeks (8:57)

Bill Meeks commented ELT started on time and stayed on track. We ran over by approximately 15 minutes.

Meeting Adjourned (9:00)

***Items requiring action are “shadowed” and ELT Decisions are “Bolded” in these minutes.**

ELT Meeting Minutes
August 9, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Amber Halloran, Glen Mudd

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the August 2, 2004 ELT meeting were reviewed. John Huber asked that the second paragraph under the Advanced Treatment Phase III Funding topic be changed to read as follows:

“John Huber noted that the strategies behind Advanced Treatment Technology were overall risk management and customer satisfaction. The investment required to meet the known regulatory requirements could be less than that needed for the total scope of Advance Treatment Technology. He stated that we need to research three key assumptions for treatment options at the Crescent Hill plant.” (Underscoring denotes new sentence added to paragraph).

The August 2 minutes were approved as modified. The agenda for today’s meeting was reviewed and approved.

Review Special Board Meeting – John Huber (9:13)

John Huber and ELT discussed the August 5 meeting during which the Board decided to proceed with changes in governance, including separation of the CEO role from the Board Chair, and establishment of an Executive Committee and a Nominating Committee. He noted that the Board wanted an enhanced orientation program for new members.

The Nominating Committee will nominate the Board Chair and Vice Chair from among the board members, who will be elected annually. The Executive Committee will be made up of the Board Chair, two board members, and the President. The Executive Committee will have significant authority to take action and to recommend action to the Board. The current Board members want to see high level topics, less detail, and they want to concentrate more on policies, controls and guidelines. They also want more streamlined board reports from LWC leadership. These changes may place additional oversight responsibility on Internal Audit to assure policies and procedures are being followed.

John Huber said he would like to have the new governance system in place by the November Board meeting.

Board Committee meetings are considered public meetings, and notices will be sent to the media who have asked to be notified.

John said the City is satisfied with the leadership team at LWC and noted that the governance changes are being adopted as a best practice.

Board Agenda Review – John Huber (9:50)

John reviewed the agenda items for the regular meeting to be held on August 10th and asked for brief board reports that cover the core issues.

Travel Request for AWWA DSS and WQTC Conferences - Greg Heitzman (10:00)

Greg requested approval for travel of Kim Reed and Mike McGee to attend a Distribution Symposium in Chicago. They will be driving to Chicago. Expenses are estimated at \$1,630 for Kim Reed and \$1,439 for Mike. Greg said both Kim and Mike will benefit from the training because of their new roles. Greg also expects them make a knowledge transfer to their colleagues when they return.

ELT Action: ELT approved the estimated travel expenses for Mike McGee and Kim Reed to attend the symposium.

Department of Transportation Hours of Service and Travel Request for NSC Conference – Glenn Mudd and Bob Miller (10:07)

Glen Mudd is Chair of the Utility Division of the National Safety Council which is composed of safety professionals from all utilities. He is a member of the Board Delegates of the National Safety Congress, where a key topic for discussion is the Hours of Service Rule which restricts the number of hours a DOT driver can be active and potentially drive. Utilities are no longer exempt from this rule. Glen distributed a synopsis of the issues for discussion.

Bob said Glen's travel expense is estimated at \$1,080, and asked for ELT's approval for Glen to attend the NSC meeting.

ELT Action: ELT approved Glen Mudd's travel to attend the NSC meeting.

Break (10:22)

Financial Results for July 2004 – Amber Halloran and Bob Miller (10:34)

Amber Halloran distributed and reviewed a high level report of results for July 2004. Bob said that the financial results for the year are not expected to achieve the revised financial plan targets.

Executive Session (10:57)

Introduce Carl Blanton – Susan Lehmann (11:25)

Carl Blanton, the new BSO for Organizational Effectiveness, was introduced to ELT. Carl has 29 years of experience in human resources, including training and development, performance management and quality initiatives.

Bin List and Agenda – Bob Miller (11:35)

Bob Miller reviewed the bin list with ELT, and will send out an agenda for the next ELT meeting.

TKO Report – Karla Teasley (11:40)

Karla said ELT had an aggressive schedule today, and finished up 10 minutes over schedule. The items discussed in Executive Session took longer than anticipated, but there was good discussion.

Meeting Adjourned (11:43)

ELT Meeting Minutes
August 16, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Greg Heitzman, John Huber, Susan Lehmann

Absent: Barbara Dickens, Ed Chestnut

Visitors: Kathie Johnson (Recorder), Amber Halloran, Kathy Schroeder

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the August 9, 2004 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Policy Considerations – Susan Lehmann and Kathy Schroeder (9:10)

ELT reviewed and discussed recommended policy changes.

Travel Request for AWWA WQTC Conference (10:20)

Greg Heitzman requested ELT approval for Roger Tucker to attend the AWWA WQTC Conference in San Antonio, TX beginning November 12. Roger will be a presenter in the algae monitoring session at the conference and the cost is estimated at \$645. The question was raised whether it would be more cost effective for Roger to attend and get the benefit of the full conference. The cost would be approximately \$1,645 for the full conference. Once the conference program is published, Greg will decide whether to recommend Jack Wang or Rengao Song for attendance as well. John Huber commented attendance at the conference allows LWC to hear the latest industry issues.

ELT Action: Travel for Roger Tucker to attend the AWWA WQTC Conference in November 2004 was approved as requested.

Travel Requests – John Huber (10:27)

John Huber asked ELT's approval for his travel to attend Water for People meetings in August and September. The first trip is to attend Water for People Board meetings in Denver, CO, August 26-27, estimated at \$650 and the second Water for People trip is to Pittsburgh, PA, September 2, estimated at \$500.

ELT Action: Travel requests for John Huber to attend Water for People Meetings in Denver, CO, and Pittsburgh, PA were approved.

Break (10:30)

Financial Results – Amber Halloran (10:44)

Amber Halloran reviewed the Greenbacks report with ELT. In response to John Huber's question, Karla Teasley will follow up on the water usage for the body contact water feature at Waterfront Park. She will also seek additional information to determine whether the water feature being used by the public, but not designed for public use, is using recycled water, which may be a potential health risk. The budget process was briefly discussed. Karla asked if there

is an expectation of a summary operating plan to accompany the budget information. Bob and Amber will discuss this and communicate back to ELT.

Open Time (11:25)

Opening of Crescent Hill Reservoir - Greg said the Crescent Hill Reservoir opened this morning, and will be open from 7:00 a.m. to 7:00 p.m. daily. Installation of the fence continues on the north bank. The reservoir is open two-thirds of the way, from the entrance to the northeast corner. If Homeland Security raises the security alert level to orange, the reservoir will be closed to public use; if the alert level is raised to red, Reservoir Avenue will be closed.

Fleet – John Huber expressed interest in existing fleet issues, and would like to see more emphasis on ensuring adequate investments in the capital budget, where appropriate. Greg will set up a separate meeting and will invite ELT members to discuss the issues.

Bin List and Agenda – Bob Miller (11:33)

Bob Miller reviewed the bin list with ELT. Bob will email the agenda for the next ELT meeting.

TKO Report – Karla Teasley (11:35)

Karla reported the team started five minutes late, and took longer than anticipated to discuss certain topics. Information sent in advance of the meeting was helpful.

Meeting Adjourned (11:40)

ELT Meeting Minutes
August 23, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Carl Blanton, Amber Halloran, Don McKay, Roger LeMaster, Marianne Butler

Minutes Approved and Agenda Reviewed (9:07)

Minutes from the August 16, 2004 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Risk Assessments – Don McKay and Roger LeMaster (9:12)

Don McKay distributed a packet to each ELT member, which included:

- 2004 ELT/BSOC Risk Assessment Tasks
- LWC Strategic Risk Profile
- Potential Strategic Risks/Vulnerabilities Previously Identified by ELT
- Draft Risk/Control Assessment Worksheet
- Risk Assessment/Control Catalog
- Top 15 BSOC Composite Operational Risks
- LWC Operational Risk Interactions by System

ELT discussed and assigned risk values to several of the Potential Strategic Risks/ Vulnerabilities that were identified by ELT earlier in 2004. Bob Miller will either set aside sufficient time at an upcoming ELT meeting or schedule a separate meeting to complete the assignment of risk values to the list.

System Certification Update for Managing Business Risks – Don McKay and Bob Miller (10:03)

Don McKay distributed copies of his August 6 memorandum to Bob Miller giving his responses to audit recommendations made by Internal Audit in December 2003. ELT approval of the System Certification of Risk Management was considered in April 2004, but was postponed until adequate action and response was made to the audit recommendations.

Don McKay reviewed each recommendation and response, and answered questions asked by ELT during his presentation. ELT agreed Managing Business Risks had fully addressed the recommendations made by Internal Audit.

ELT Action: ELT approved System Certification of Managing Business Risks.

Break (10:20)

System Growth Opportunities – Greg Heitzman and Karla Teasley (10:35)

Greg Heitzman said he and Karla Teasley met last week with representatives of the Hardin County District and learned the Lincoln Trail Regional Water Commission has been established in Hardin County. Greg described the circumstances that may increase LWC's opportunity to provide water and/or related services to Ft. Knox. After October 2005, the Department of Defense will no longer operate the system or subsidize the cost of water production at Ft. Knox. LWC may be able to construct a water supply pipeline into Hardin County for either baseline use or emergency use

through either the I65 corridor or the Dixie Highway corridor. Jim Smith is their key contact at LWC. We will be following up with them in the near future.

Debt Management Planning – Bob Miller and Amber Halloran (10:52)

Bob Miller distributed and discussed his presentation to ELT on Debt Management Planning. He reviewed the scope of work to be performed by the Financial Advisor. He identified the elements to be included in the Debt Policy and Investment Policy. He described the attributes, benefits, and challenges of our existing debt structure. He reviewed the alternatives for alleviating the issues related to interest rate risk and the front loading of principal maturities.

Every 1 Reads – John Huber and Marianne Butler (11:15)

John Huber said this is a partnership between Jefferson County Public Schools, Metro Louisville and Greater Louisville Inc. to get students reading at grade level. Marianne Butler and Bill Meeks met with Sam Corbett last week to discuss LWC's possible involvement in the program. Employees interested will take 90 minutes of training and will meet with a student 30 minutes each week. It is not feasible for union employees to participate because the schools want the consistency of the same employee with the same student each week. Marianne will develop a rollout communication. We are looking for 10 participants, and are encouraged to enlist spouses and retirees. Employees must get their Manager's approval to participate. Most sessions will be between the hours of 11:00 and 3:00, and no overtime will be paid to employees as a result of their participation.

Open Time (11:35)

Diversity Training Facilitation – Susan Lehmann asked ELT to participate in Diversity Training, and to encourage their BSOs to participate as well.

Diversity Activities Packs – Susan Lehmann said there are Activities Packs available for use in NWT and SAC meetings.

Board Member Orientation – Susan is putting together an orientation program for new board members, and will send a draft to ELT today. Each ELT member will be on the agenda to talk about their Core. The orientation is expected to be held in late September or early October.

Fair Labor Standards Act Changes – Susan said HR is evaluating how recent changes will affect Louisville Water Company.

Labor Day Holiday – Bob Miller asked if ELT should reschedule its September 6 meeting to Tuesday, September 7 because of the holiday, or cancel the meeting. The September 6 meeting will be canceled.

Bin List and Agenda – Bob Miller (11:43)

Bob Miller reviewed the bin list with ELT. Bob will email the agenda for the next ELT meeting.

TKO Report – Karla Teasley (11:45)

Karla Teasley said the meeting started on schedule. The material distributed by Don McKay for the Risk Assessment was very beneficial and the group was able to reach consensus in assigning risk values. The Debt Management Planning presentation by Bob Miller was beneficial. The meeting ended 15 minutes late.

Meeting Adjourned (11:46)

ELT Meeting Minutes
August 30, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Barbara Dickens, Greg Heitzman, Susan Lehmann, Bill Meeks

Absent: Ed Chestnut, John Huber

Visitors: Kathie Johnson (Recorder), Jim Asseff, Jim Brammell, Amber Halloran, Kathy Schroeder

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the August 23, 2004 ELT meeting were reviewed. Susan Lehmann asked for a change to the minutes: on the second page, under the Diversity Training Facilitation heading, the sentence should read: "Susan Lehmann asked ELT to participate in Diversity Training, and to encourage their BSOs to participate as well." The minutes were approved with that change. The agenda for today's meeting was reviewed and approved.

Susan announced that Janet Geurin Muller accepted the position of Manager of Workforce Diversity.

BSOC Recommendations on Management Roles – Kathy Schroeder, Jim Asseff and Jim Brammell (9:10)

Kathy Schroeder distributed and discussed the BSOC's position paper concerning the responsibilities of the ELT and BSO. The paper described ELT as Strategists, and BSOs as Developers/Implementers.

In response to Susan Lehmann's question about what the BSOs would like to see done differently, Kathy said a good example is the work they're doing on the budget for 2005.

Bob Miller asked whether "setting the organization structure" is defined as what the cores and systems will be. Jim Brammell said ELT would establish core systems and business systems, but defining processes and resources would be an operating issue for BSOC. The BSOs would allocate their employees within the system.

Jim Brammell said the position paper is a first attempt to define the roles of the BSOC and ELT, and is not a final product. The BSOC is seeking validation of their approach before developing an implementation plan to accomplish this intent. The ELT was generally supportive of the approach but want to consider it further.

Discussion of BSOC Recommendations – ELT (9:50)

ELT discussed the BSOC position paper. Bob Miller will review the recommendations with John Huber and Susan Lehmann. This topic will be on the agenda for further discussion at the next ELT meeting.

Mailing Paychecks – Amber Halloran (10:04)

Amber Halloran shared information with ELT regarding a change being considered in the way distribution of paychecks/deposit stubs is handled. A cost/benefit analysis is being done on the feasibility of mailing paychecks to employees instead of distributing them at work.

Long-term strategies for payroll include requiring all employees to receive direct deposit and consideration of a move to bi-weekly payroll.

Break (10:25)

Revenue Shortfall – Bob Miller (10:40)

Bob Miller estimates revenues will be between \$700,000 and \$800,000 below budget for August. As a result, the overall financial results will be \$100,000 to \$200,000 below the revised financial plan results even after reducing the funding of the Infrastructure Replacement Reserve to zero. Rainfall is 11 inches above normal for the year. The temperature for July was 4 degrees colder than normal, while August was 6 degrees colder than normal. It appears that the earnings target will not be met.

Bob will add this topic to the agenda for the next ELT meeting to review August results and continue the discussion.

Risk Mitigation/Rate Stabilization Reserve – Bob Miller (11:20)

Bob Miller reviewed plans for development of a Risk Mitigation / Rate Stabilization Reserve. He reviewed the sequence for use of funds. He also reviewed the causes for significant potential swings in revenues and expenses that impact the dividend. He identified the alternatives available for "smoothing out" those swings and recommended establishment of this reserve. He described the criteria for the size of the reserve and outlined the change that would be needed to the dividend covenant of the bond resolution.

Open Time (11:25)

Audit Committee Meeting – The meeting will cover the annual inspection, annual inventory, an overview of the revenue audit, an update on the procurement card audit, and any outstanding issues.

Public Affairs & Customer Satisfaction Meeting – The meeting will be held Friday, September 3. Correspondence and communication around the rate increase will be discussed, as well as service deposit work as a mechanism to reduce bad debt. The service deposit capability is there, and we have met the legal tests. This would target one-third to one-half of bad debt.

Bin List and Agenda – Bob Miller (11:30)

Bob Miller reviewed the bin list with ELT. Bob will email an agenda for the next ELT meeting to be held September 13.

TKO Report – Karla Teasley (11:32)

The meeting ran over by five to 10 minutes on each item. The BSOs did a good job of defining roles of ELT and BSOC and putting together a good starting product. The paycheck issue was of value. The revenue shortfall issue went about 20 minutes longer than planned.

Meeting Adjourned (11:37)

ELT Meeting Minutes
September 13, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Barbara Dickens, Greg Heitzman, John Huber, Carl Blanton (for Susan Lehmann)

Absent: Ed Chestnut, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the August 30, 2004 ELT meeting were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

BSOC Recommendations on Management Roles – ELT (9:12)

ELT discussed the Position Paper prepared by the BSOC and identified points to further define the BSOC responsibilities:

- Responsible as primary stewards of organizational resources
- Responsible for the efficient and effective operation of the company to be accomplished through the use of TQO practices
- Responsible for a streamlined organization committed to high levels of quality and customer satisfaction.

ELT then discussed the BSOC role as Developers/Implementers and identified points to further define the BSOC role:

- Accountable for operational risk management
 - overall emergency response planning that goes beyond terrorism
 - emergency response drills
- Effective stewards of resources (human resources, financial resources, LWC's reputation and image, etc.)
- Corporate social responsibility and service to the community
- Cultivate effective internal and external relationships at the operating level (Public Works, Homebuilders Association, drinking water programs and Division of Water related to water pollution)
- Mentor, coach and develop employees
- Assure a work environment that is safe and provides a high quality of work life
- Ensure regulatory compliance by analyzing regulatory proposals and recommending approaches for shaping regulations

ELT agreed that Bob Miller will capture the ideas for inclusion in BSOC role, and will prepare a communication for review with John Huber and Susan Lehmann. Bob and Susan will meet with Kathy Schroeder, Jim Asseff and Jim Brammell to share ELT's suggestions and answer any questions.

ELT will further discuss their role as Strategists at the September 20 ELT meeting. ELT will incorporate insights gained during work with Right Management into the ELT role. Bob will discuss with Susan whether publication of the Next Level Plan needs to be delayed pending completion of this work on ELT/BSOC roles, since changes may be necessary in the NLP Roles Section to maintain consistency. The ELT/BSOC Roles document may be added to the NLP Appendix. Bob asked ELT members to bring their Right Management material to the September 20 ELT meeting for reference during the ELT roles review.

Public Financial Management Group (PFM) – Bob Miller (9:50)

Bob announced that representatives from PFM will be meeting with LWC this afternoon. Jerry Martin will also attend to hear their presentation. If they are accepted as the Financial Advisor, they will provide consulting services on debt management planning, benchmarking, and preparation of financial disclosure information in support of a debt issuance.

Review Board Agenda – John Huber (9:58)

This meeting will be held at B.E. Payne, and will include an Audit Committee Report (annual inspection progress and annual inventory results); a Public Affairs and Customer Satisfaction Committee Report (public information approach to rate increase, and initiation of a customer deposit); Return on Equity target for 2005; debt management issues; and, recommendations on establishing a Risk Mitigation / Rate Stabilization Reserve. John Huber said Board approval will be sought for Chapter 32 local ordinance changes so the changes can be acted on by the Metro Council. By-Laws changes will be considered at a future BOWW meeting.

Break (10:25)

Review Financial Results for August 2004 – Amber Halloran, Sue Purdy (10:38)

Amber Halloran distributed the Financial Results for August, and discussed the highlights with ELT. For future reports Sue Purdy will add an “as of” date next to the employee count since there was some confusion about the count. Karla Teasley was appreciative of the work Anna Norris has done in preparing and distributing monthly Capital Budget Reports. Amber Halloran also distributed and briefly reviewed a new analysis report on labor hours.

Discussion of Revenue Shortfall – ELT (11:20)

ELT discussed the strategies that could be used to address the revenue shortfall. Bob Miller said he will recommend either carrying a dividend prepayment into next year or using debt management techniques this year so there is no carryover into next year. Bob Miller will prepare an updated forecast of year-end financial results.

TKO Report – Karla Teasley (11:42)

There was good dialogue related to the financial information, but the topic exceeded the time allotted. Karla suggested 45 minutes is the appropriate amount of time for the review of monthly financial results. The information provided in the revenue shortfall discussion was good.

Meeting Adjourned (11:44)

ELT Meeting Minutes
September 20, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Ed Chestnut, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Jim Brammell, Kim Reed, Janet Geurin Muller

Ed Chestnut was welcomed back!

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the September 13, 2004 ELT meeting were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

BSOC Recommendations on Management Roles – Define ELT Role as Strategists (9:13)

Bob Miller said he and Susan Lehmann will be meeting with Kathy Schroeder, Jim Brammell and Jim Asseff on Friday to discuss ELT's suggestions to further define the BSOC Role. Susan will also meet with Rich Cartor of Right Management this week to discuss the work in progress.

ELT extensively discussed their role as "Strategists." Susan Lehmann will provide an updated draft incorporating the ideas and suggestions from today's meeting. Bob Miller will put time on the September 27 ELT agenda to further discuss the role and make the language and intent consistent with the Strategic Plan and Next Level Plan documents and consistent with the Right Management work.

Break (10:13)

Fleet Cost Analysis Presentation – Amber Halloran, Jim Brammell, Kim Reed (10:22)

Amber Halloran explained that through August 2004 the Transportation account is \$335,027 over budget. This variance is due to:

- | | |
|--|-----------|
| ▪ Fleet Maintenance Department over budget | \$142,586 |
| ▪ Fleet Hourly Rates approximately 5% too high | \$109,019 |
| ▪ Allocation to Capital less than expected | \$ 83,422 |

Kim Reed distributed and discussed her Fleet Cost Analysis explaining the \$142,586 variance from budget in O&M expenses. The items contributing to the variance include increased cost of fuel, an unfunded initiative (cement truck), previously capitalized items not funded in fleet (accounting rules changed qualifying amount from \$500 to \$2,500), and preventable vehicle accident repairs.

In response to Greg Heitzman's request, Kim will email mileage data for the past two years to ELT. Jim Brammell said benchmarking data is under development and will be furnished to ELT when completed.

ELT thanked Kim Reed and Jim Brammell for the well-prepared presentation.

Introduction of Janet Geurin Muller, Director of Workforce Diversity – Susan Lehmann (11:07)

Susan Lehmann introduced Janet Geurin Muller, Manager of Workforce Diversity, to the ELT. Janet most recently was Program Coordinator for Jewish Family Vocational Services

Open Time (11:10)

Board Member Orientation – Susan Lehmann reminded ELT to submit presentation outlines to her by September 21, and to let her know whether Powerpoint will be used in the presentation.

O&M and Capital Budgets – Bob Miller said additional items have been identified that were not included in the individual system O&M budgets. These items will be given to the BSOC for prioritization. Jim Smith will be working with the BSOs to realign timing of cash flows for the capital improvement plan. The Budget Department will be bringing updated information to the next ELT meeting.

Policy Development – Barbara Dickens noted that she will be bringing updated information about new policies that need to be developed at the October 4th or 11th meeting.

TKO Report – Karla Teasley 11:25

The fleet cost analysis by Kim Reed and Jim Brammell provided an excellent and detailed review of information on fleet budget variances. Bob noted that Bill Meeks will be the ELT Team Leader beginning in October.

Meeting Adjourned – 11:26

ELT Meeting Minutes
September 27, 2004

Attendees: Bob Miller (Leader), Karla Teasley (TKO), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Ed Chestnut, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Minutes Approved and Agenda Reviewed (9:05)

Minutes from the September 20, 2004 ELT meeting were approved as written. The agenda for today's meeting was reviewed and approved.

BSOC Recommendations on Management Roles – Finalize ELT Role as Strategists – Susan Lehmann (9:07)

Susan Lehmann distributed a memorandum from Bob Miller, dated September 21, addressed to Kathy Schroeder, Jim Asseff and Jim Brammell, that was used to communicate ELT's feedback on the BSOC/BSO Position Paper and BSOC/BSO roles and responsibilities. She said the BSOs were in agreement with the recommended changes, and were optimistic about the progress being made.

ELT reviewed and made further refinements to the ELT role. Susan Lehmann will make the changes and send out to ELT, and will provide a copy to Rick Cartor and Ron Raque for their feedback. Susan had met with Rick Cartor last week. He expects to work through the tactical differences during the October and November meetings.

Break (10:15)

Preliminary 2005 Operating and Capital Budgets – Amber Halloran and Sue Purdy (10:30)

Amber Halloran said she expects to have the preliminary 2005 budget book ready for print by October 1. Amber distributed and discussed information related to the budget. Amber also discussed a proposed revision to the method of calculating the dividend that would not exclude the Goshen and Bullitt County rate differentials from net income, thus allowing LWC to pay a larger dividend to the City of Louisville. Bob Miller and Barbara Dickens will assure this action will not violate any existing agreements or covenants before proceeding.

Greg Heitzman discussed the need to put \$3,000 to \$5,000 in the 2005 budget for the purpose of conducting Fund for the Arts and Metro United Way fundraising campaigns. Karla Teasley said the loaned executive for United Way is another issue to be considered. Greg suggested the United Way loaned executive issue be reviewed on a quarterly basis.

Amber said the Capital Budget will be \$75,409,780 before contributions. Amber will send a copy of the Capital Budget to ELT. Bob, Amber and John will move forward with finalizing the preliminary 2005 budget.

Standards of Work Performance – Susan Lehmann (11:15)

Susan reported that it appears that unacceptable behaviors are being addressed, and the situation has improved.

Travel to WQTC Conference – Greg Heitzman (11:20)

Greg recommended sending Jack Wang to the conference in San Antonio at an estimated cost of \$1,500. Greg will check to see if he has any remaining budget to cover the travel; however, due to the importance of this conference to LWC, John Huber recommended Jack attend the conference. Greg Heitzman will email ELT whether he has remaining budget to cover the travel.

ELT Action: ELT approved Jack Wang's travel to attend the WQTC Conference at an estimated cost of \$1,500.

Open Time (11:27)

Metro United Way Campaign – Susan Lehmann said the team met last week. There is a funding gap, and Susan requested the four Core Vice Presidents contribute \$1,000 each from their budgets to fund the 2004 campaign.

ELT Action: ELT agreed the four Core Vice Presidents will provide \$1,000 each from their budgets to fund the 2004 Metro United Way Campaign.

Agenda and Bin List – Bob Miller (11:32)

Bill Meeks becomes ELT Leader at the October 4 meeting; other roles are Barbara Dickens – Scribe; Greg Heitzman – TKO; and, Susan Lehmann – Backup Recorder. Bob Miller and Bill Meeks will work together on the minutes and agenda for the October 4 meeting for distribution to ELT.

TKO Report – Karla Teasley (11:35)

The meeting started on time but went over on the ELT roles topic. ELT made good progress reaching the intended result. Karla suggested more time should have been allotted to the budget topic. There was good participation among ELT at the meeting. She commended the budget group for the work they did in working with the BSOs to prioritize the budget, and in working with the capital budget team to get the capital budget finalized.

Meeting Adjourned – (11:38)

ELT Meeting Minutes
October 4, 2004

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Ed Chestnut, Barbara Dickens, Bob Miller, John Huber, Susan Lehmann, Karla Teasley
Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Minutes Approved and Agenda Reviewed (9:06)

Minutes from the September 27, 2004 ELT meeting were approved as written. The agenda for today's meeting was reviewed and approved.

Next Level Plan Communication Sub Team Report – Greg Heitzman, Karla Teasley and Susan Lehmann (9:11)

Susan Lehmann reported she, Greg Heitzman and Karla Teasley met last week with the BSOC. The recent work done on BSO and ELT roles will be incorporated into the Next Level Plan document. The Next Level Plan rollout will be done in small group team meetings, with the appropriate management present, during December 2004 and January 2005. A Powerpoint presentation will be made to provide consistency between the meetings, and a handout of the presentation will be given to employees instead of the full Next Level Plan document. The complete Next Level Plan document will be made available for review upon request. Greg Heitzman, Bill Meeks, Susan Lehmann and Carl Blanton will work together on the Powerpoint presentation, and the CBSOs will work with BSOs to set up team meetings. Bill Meeks will add a review of the Powerpoint presentation to the bin list for mid November.

2004 Metro United Way Campaign – Susan Lehmann (9:22)

The campaign will be held October 15 to November 5. The goal for 2004 is set at \$60,000.

Open Time (9:47)

Customer Satisfaction Index - Karla Teasley distributed and discussed the favorable CSI Results for the third quarter 2004. The Service CSI total is at an all time high of 806, and is the piece most impacted by LWC employees.

Internal Customer Satisfaction Survey – Susan Lehmann is expecting results from Deyta soon, and will schedule a meeting with ELT to discuss the results and the rollout.

New Executive Education Program at UofL – Susan Lehmann mentioned that Louisville Water Company is entitled to send two employees to the Executive Education Program at the University of Louisville, two days a week during the period January-May 2005. The focus is on leading change, and is appropriate for the Vice President/BSO level. There will be 20-25 students in the class.

Break (10:00)

Preliminary 2005 Operating and Capital Budgets Status Report – Amber Halloran (10:17)

Amber Halloran said the budget went to the printer last Friday. She commended the work Sue and the budget department did in completing the budget. Amber distributed and discussed a comparison of 2004 budgets to 2005 proposed budgets, the ten year proforma income statement, and the ten year financial plan.

John Huber suggested we might want to propose to the board, once we meet the net income target, to set aside some money in the Infrastructure Reserve Fund.

Karla Teasley said the Capital Budget Sub Team will meet a few more times to set expectations for the economic analysis that needs to be done, and to create an implementation plan for the capital budget.

Travel Request – Amber Halloran (10:47)

Amber Halloran requested approval for Ron Green to attend the National Minority Business Supplier Business Opportunity Fair in Washington, DC, October 18-21, 2004 at an estimated cost of \$1,850. The expectation is Ron will provide a report to ELT upon his return. Greg suggested Ron discuss the tunneling project with Kay Ball before he leaves.

ELT Action: ELT approved Ron Green's travel to attend the National Minority Business Supplier Business Opportunity Fair in Washington, DC, October 18-21, at an estimated cost of \$1,850.

Discretionary/Variable Costs – Bob Miller (10:50)

Bob Miller recommends a plan be developed to quickly extract costs from the 2005 budget should a need exist. He suggested the \$800,000 of discretionary items prioritized by the BSOs for inclusion in the 2005 budget would be the place to begin to identify and plan for quickly extractable costs. John Huber said two items to consider in planning whether or when to extract costs are winter costs and mid year sales. After ELT develops guideline and boundary conditions, this project will be given to the BSOs to develop a plan to quickly extract costs that will include prioritization, timing elements and conditions. A plan should be completed by December 15 if possible, and the plan would become part of the 2005 Operating Plan.

In response to a request by John Huber, Bob Miller will develop and communicate to ELT data on trends for the last 5-10 years for inactive services.

TKO Report – Greg Heitzman (11:22)

There was full attendance and the meeting started on time. We saved time on the Next Level Plan topic, and the other topics took longer than scheduled. Communication was good, but Karla and Greg spent more time than others discussing budget items. Greg suggested a conscious decision be made to either extend time or conclude discussion when the Timekeeper indicates time is up on a particular topic.

Agenda and Bin List - Bill Meeks (11:25)

Bill reviewed the bin list with ELT. John Huber requested these items be added to the bin list:

- 10 Year Proforma - look deeper into assumptions
- Water sales growth
- Depreciation forecast – what is our capacity for completing capital programs, etc.
- 4.5% rate increase
- Fixed v. variable costs
- Rate Equalization/Risk Mitigation

Bill Meeks will email the agenda for the October 11 meeting.

Meeting Adjourned (11:30)

ELT Meeting Minutes October 11, 2004

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Ed Chestnut, Barbara Dickens, Bob Miller, John Huber, Kathy Schroeder (for Susan Lehmann), Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Scott Muhlenbeck

Minutes Approved and Agenda Reviewed (9:06)

Minutes from the October 4, 2004 ELT meeting were reviewed. Kathy Schroeder said Susan Lehmann had a correction to the minutes. The last sentence under the Metro United Way topic should be deleted since the Metro United Way team has no follow up planned with ELT. Greg Heitzman also had a change. Under the Next Level Plan topic, the first sentence should read, "Susan Lehmann reported she, Greg Heitzman and Karla Teasley met last week with the BSOC." The minutes were approved with those changes. The agenda for today's meeting was reviewed and approved.

Review Board Agenda – John Huber (9:09)

John Huber reviewed the agenda for the October 12 Board Meeting.

Policy Review Process – Barbara Dickens (9:22)

Barbara Dickens presented and discussed her recommendations for policy revisions and approvals. Her recommendation for a more streamlined process would allow for a more frequent policy review and would be in keeping with ISO standards as required for ISO certification. ELT made suggestions for Barbara to consider in a new draft. Suggestions included review and recommendation by the President to the BOWW for approval of "corporate" policy matters to be designated later. Most other policy revisions would be acted on by the BSOC after a first reading and formal information flow to the ELT and then a final reading prior to BSOC approval. Barbara will incorporate the suggestions into a new draft to be considered at a future ELT meeting. Karla asked that Barbara consider and prepare a draft of how procedures would be approved, so that the entire process for policy and procedure approval could be considered together. Bob stated that he would provide further feedback to Barbara after the meeting.

Break (10:17)

Greenbacks Report – Amber Halloran, Scott Muhlenbeck (10:35)

Amber distributed and discussed the financial highlights for the month of September. She commented that additional review work will be done on the depreciation account.

Open Time (11:17)

United Way Breakfast – Kathy Schroeder said the United Way Leadership Breakfast will include Process Owners, Business System Owners and ELT, and will be held October 20 in Training Room A.

HRIS Travel – Kathy Schroeder said the budget for the HRIS project includes site visits, but she felt it appropriate to notify ELT the travel would be taking place. Kathy will send an email to ELT regarding the planned travel.

Zoo Event – John Huber reminded everyone of the October 23 Fall Fun Fest at the Louisville Zoo.

Risk Assessment – Bob Miller noted that Don McKay has provided a timeline for the remaining work by the ELT and BSOC on corporate-level and system risk assessments that are scheduled for completion by year-end. Bob will work with Bill Meeks to place this on the bin list.

Agenda and Bin List – Bill Meeks (11:25)

Bill Meeks reviewed the bin list with ELT for next week's agenda. Bill will complete the agenda and email it to ELT.

TKO Report – Greg Heitzman (11:30)

There was full attendance since Kathy Schroeder filled in for Susan Lehmann. We exceeded the allotted time on topics during the first half of the meeting. Greg said in future meetings he will give TKO status about 5 minutes before time is up on a topic to see whether the group agrees to extend the time or end the discussion. The group seemed engaged. There were different levels of participation depending on the topic being discussed.

Meeting Adjourned (11:33)

ELT Meeting Minutes October 18, 2004

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Ed Chestnut, Barbara Dickens (Recorder), Bob Miller, John Huber, for Susan Lehmann, Karla Teasley

Visitors: Kathy Schroeder; Carl Blanton; Jaeson Welch & Neil Smith from Deyta Corporation

Minutes and Agenda Approved (9:07)

Minutes from the October 11, 2004 ELT meeting were reviewed. There were no changes to the minutes and they were approved. The agenda for today's meeting was reviewed and approved.

Internal Customer Survey (ICS) Results Reviewed (9:10)

Susan Lehmann introduced Jaeson Welch & Neil Smith, who were present to review the ICS results for 2004. Neil reviewed the questions and the range of responses. 2015 surveys were sent out and 95% were returned. 38 were returned without response, which is a very low number overall. Scores for LWC remain moderate in 2004, with results neither exceeding 4 nor fully below 3. Significant changes in ratings for LWC were: "Importance of this process to you" increased and "Timeliness of service" decreased (from 3.30 to 3.22). The process importance overall for the Company was 4.29, up from 4.21 in 2003. Overall satisfaction dropped from 3.35 in 2003 to 3.30 this year. Staff courtesy received the highest satisfaction rating. Key satisfaction drivers for 2004 are "quality and accuracy of services" (108) and "timeliness of services" (59). Those two, plus the following three made up the Top 5 satisfaction drivers: "explanations provided about delays" (48, "courtesy and friendliness of staff" (44) and "quality and accuracy of product received" (38). One of process performance rankings for the 39 processes ranked significantly higher than LWC Overall, and five process performance rankings ranked significantly lower than LWC Overall.

Jason advised that it is difficult to evaluate performance on our Company goals because the reorganization resulted in not having the same systems to compare. Both Greg and Karla believed that a comparison could and should be done, stating that 80% or more of systems remained intact in the reorganization so we should be able to drill down and compare results from 2003 to 2004. Greg commented that we have accumulated a wealth of information over the years with these surveys and it would be regretful if we had to disregard the previous information. Deyta advised it would work with Susan and Carl to show comparison of systems to last year so that Deyta can compile a comparison to evaluate performance on Company goals.

In terms of customer comments, many were complimentary of specific individuals. There were negative comments as well. Deyta recommends we focus on quality and accuracy of services provided and timeliness of services to improve our ICS results next year.

Susan recommended each ELT member review his or her results and that we discuss it again at ELT in two weeks. If anyone has specific questions for Deyta, those should be presented to Carl so that one person is communicating with Deyta.

Break (10:15)

System Certification Audit – Supplying Information Technology (10:30)

Bob advised that the IT System is not ready for certification. Bob feels that the recommendation for approval last year was premature and adequate controls to ensure steps for improvements were being taken was not put in place last year. Bob intends to address all structural deficiencies in the next month. Karla cautioned Bob to not rush an important initiative such as this, understanding that Bob is eager to see improvements in place. Bob discussed the ICS results for Supplying IT Resources. John feels that there needs to be more discussion about and ownership of what IT's role should be as a part of a Total Quality Organization. ELT agreed that quality principles require that how work is done is as important as what is done. Bob will report back to ELT on this systems certification audit in an appropriate time frame.

Metro United Way Update (11:13)

The first event is the kickoff breakfast scheduled for Wednesday, October 20th at 8:15. Karla advised that a location competition is being discussed. Each site is brainstorming for events ideas. Susan asked the ELT to encourage BSOs and POs to attend the breakfast. An event is being planned for retirees, and we are repeating the agency visits, allowing individuals to see how Metro United Way funds are critical in our community.

Open Time (11:17)

Waterworks Management Workshop – Greg attended this workshop in Chicago, Illinois on October 14 and 15. Greg reviewed the questions that were submitted by LWC and others that were of particular importance to us.

Courier-Journal Article on Proposed Rate Increase – John stated that the article was correct on the majority of points. We contacted MSD to make sure they were aware that we didn't discuss anything about MSD with the C-J reporter, but that the reporter gathered any information about MSD on his own. We also advised the C-J that we only recommend action to be taken by the Board.

Agenda and Bin List – Bill Meeks (11:34)

Bob discussed that some strategic planning items on the Bin List need to be considered by the full Strategic Planning Committee. He will work with Bill on these items. Bill Meeks reviewed the bin list with ELT for next week's agenda. Bill will complete the agenda and email it to ELT.

TKO Report – Greg Heitzman (11:38)

There was full attendance. We took less time on the ICS results but more time than allotted to discuss the IT System Certification and the Open Time items. The group seemed engaged and participated fully, except for Barbara who kept minutes.

Meeting Adjourned (11:40)

ELT Meeting Minutes October 25, 2004

Attendees: Bill Meeks (Leader), Jim Asseff representing Greg Heitzman (TKO), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Nora Freeman, Sharon Dawson, Carl Blanton and Vince Ilari

Minutes and Agenda Approved (9:05)

Minutes from the October 18, 2004 ELT meeting were reviewed. Barbara Dickens noted the time for the Minutes and Agenda Approved heading should be 9:07, not 9:0. Under the Internal Customer Satisfaction Survey topic, she corrected the name from Dale to Neil in the second sentence. The minutes were approved with those changes. The agenda for today's meeting was reviewed and approved.

Metered Water Ratio Update – Nora Freeman, Sharon Dawson and Vince Ilari (9:08)

Nora Freeman said the team is seeking feedback from ELT on the format for their recommendations to be presented to ELT next month.

Sharon Dawson distributed information including:

- Metered Water Ratio Team Update;
- Draft 2003 Water Audit for LWC using the International Water Association Format;
- Statement of Unavoidable Annual Real Loss; and
- Draft Metered Water Ratio Team Recommendations Format.

She said the team was tasked with three deliverables, a water audit, development of an action plan to improve management of the metered water ratio, and development of a metered water ratio goal for 2005. Recommendations to improve management of the metered water ratio will be presented to ELT for feedback/approval in November.

Vince Ilari discussed the draft LWC Water Audit for 2003, which uses the International Water Association Format. Karla Teasley asked ELT to provide feedback on the proposed format for making improvement recommendations. Bob Miller agreed with the format but suggested lines be numbered on the Water Audit to tie back to the line recommendation for improvement, and state the benefit being targeted. Nora Freeman said this work is an iterative process that will continue to be refined.

ICS Update – Susan Lehmann and Carl Blanton (9:45)

Carl Blanton distributed a comparison of 2003 results with 2004 results, and discussed the calculation used to arrive at a score. He emphasized the need to focus on what the scores reveal rather than how the scores are calculated. The value of the ICS points management in the direction to make improvements.

Break (10:15)

Quarterly Goals Update – Bob Miller (10:30)

In Ed Chestnut's absence, Bob Miller presented the third quarter results. On ELT Shared Goals, the items for follow up are the budgeted sales and RBF Phase III Alternative Treatment measurement

criteria. Bob reviewed the 2004 Incentive Plan Goals; the light switch goal is not achievable. We are at 75% for the Corporate Performance Award.

Open Time (10:55)

Employee/Diversity Event at the Louisville Zoo – John Huber said the event went very well Saturday.

AWWA Regional Officers Meeting – John Huber said he attended the AWWA Regional Officers Meeting in Indianapolis last week and spoke with Tom Curtis of AWWA. Mr. Curtis referred to the Washington Post article on lead, and said he expects a revision will be made to the regulation to get an MCL at the tap instead of at the meter.

Next Level Plan – Susan Lehmann said she sent ELT an email attaching proposed language describing roles for ELT and BSOs for inclusion in the “Beyond the Next Level Plan” document. She asked for ELT’s revisions or comments by Friday, October 29. Kathy Schroeder is reviewing the document with the BSOs to get their comments.

UofL Executive Education Program – Susan Lehmann said an article will be placed in Newsleaks concerning LWC’s entitlement to two places in UofL’s Executive Education Program. The employees will be selected from among CBSOs, BSOs and POs.

Metro United Way Agency Visits – Susan encouraged attendance at Metro United Way Agency tours.

Observance of 2005 New Year’s Holiday – Susan Lehmann said the holiday will be observed on Friday, December 31, 2004. Amber Halloran is working on the accounting aspects of observing the holiday in 2004 instead of 2005.

Agenda and Bin List - Bill Meeks (11:12)

Item 6 can be removed from the bin list. An item will be added concerning action by ELT related to the Internal Customer Satisfaction results. Bill will email the agenda for the November 1 ELT Meeting.

TKO Report – Jim Asseff (11:15)

There was good participation and ELT kept on track with the agenda.

Meeting Adjourned (11:17)

**ELT Meeting Minutes
November 8, 2004**

Attendees: Karla Teasley (Leader), Greg Heitzman (TKO), John Huber, Susan Lehmann, Bob Miller

Absent: Ed Chestnut, Barbara Dickens, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy, Carl Blanton, Ralph McCord, Daniel Tegene

Minutes and Agenda Approved (9:05)

Minutes from the November 1, 2004 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Metro United Way Update – Susan Lehmann (9:07)

Susan Lehmann reported the Metro United Way Goal has been reached, with \$61,582 in pledges as of this date. We are down by the number of givers, 206 this year versus 258 last year. There were 90 Care Share givers this year, versus 72 last year. John Huber will draw for prizes on Tuesday, November 09, 2004. Susan requested that Vice Presidents follow up to assure all pledge cards are turned in.

Operating Performance Review – Amber Halloran (9:10)

Amber Halloran reviewed the October 2004 Financial Highlights with ELT. Revenue exceeded the budgeted revenue. Amber and Sue will look at the Commercial accounts to see whether this customer class may have been over budgeted for 2004, and Scott Muhlenbeck will look into variances in the larger accounts.

Amber distributed and discussed a revised budget forecast for operating expenses, which she will distribute to BSOs. She will continue to work with the BSOs to refine this forecast.

Break (10:00)

Board Meeting Agenda – John Huber (10:16)

Barbara Dickens will either be late or absent for the Board Meeting, and Bob Miller will take minutes in her absence. The two key issues for the meeting are the budget and rates. The Nominating Committee will meet at 11:45. The Compensation Committee will present a report. The outside legal services report will be deferred if Barbara Dickens is unable to attend the meeting.

I4 System Certification Audit – Karla Teasley, Carl Blanton (10:25)

Karla said the certification audit contained no recommendations for improvement, even though major organizational changes were made to I4 in early 2004 as a result of the corporate reorganization. Carl Blanton commended the documentation and application of quality principles, the active Natural Work Teams and System Advisory Council.

ELT Action: ELT agreed to Certify the I4 - Pipeline Design and Construction Business System.

Open Time (10:35)

US Pipe & Foundry – Greg Heitzman gave a brief update on the status of discussions with US Pipe & Foundry regarding corrosion of fire hydrant stems. Greg and Jim Brammell are working with US Pipe to resolve this issue.

Dechlorination Patent – John Huber asked whether LWC was pursuing getting a patent for the dechlorination device developed and used by LWC employees. Karla Teasley will follow up on whether to pursue a patent or whether to share the information with other entities. Bob Miller asked Karla to keep Don McKay apprised of the direction we take on this.

Lexington-Fayette Council Elections – Following the election, the Council stands at 9-6 against condemning Kentucky American's franchise to serve Lexington and Fayette County, where it previously stood at 9-6 in favor of condemnation. No action has been taken.

Bin List and Agenda – Karla Teasley (11:05)

Karla Teasley reviewed the bin list, and no items appeared ready for presentation by Monday, November 15. There is time set aside for a special ELT meeting on Friday, November 12, from 1:00-3:30 to continue work on the Strategic Risk Assessment. Karla will determine which date works best for ELT to work on the Risk Assessment, Friday, November 12, or Monday, November 15, and will confirm a date. The other ELT meeting will be cancelled.

TKO Report (Greg Heitzman) 11:13

Karla acted as Leader in Bill's absence. The team went through all the items on the agenda. The Greenbacks report was done in the allotted time. The System Certification of I4 took less time than anticipated. There was balanced participation in the meeting. The meeting finished 15 minutes early.

Meeting Adjourned (11:15)

**ELT Meeting Minutes
Special Meeting
November 12, 2004**

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Karla Teasley, Barbara Dickens, John Huber, Susan Lehmann, Bob Miller

Absent: Ed Chestnut

Visitors: Don McKay

Minutes and Agenda Approved (1:00)

Minutes from the November 8, 2004 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Strategic Risk Review (1:10)

Bob Miller and Don McKay, reviewed the risk rankings by ELT members, the strategic risk map, and "red zone" risks. The team used the risk assessment tool to assess targeted risks, using a consensus approach to identify triggers, consequences, and pre-event and post-event controls. The team assessed four high level risks, and will continue the risk assessment at a future ELT meeting.

Open Time (3:10)

Metro United Way - Susan updated the ELT on the Metro United Way Campaign totals and participation levels, and Greg, Bob. Karla agreed to have \$1,000 moved from their materials and supplies budget to Susan's budget to cover the United Way expenses for the campaign.

TKO Report – Greg Heitzman (3:20)

The meeting started five minutes late, but the team stayed on task and ended topics within the allotted time. There was good progress made in reviewing the high level strategic risks. There was balanced participation. The meeting adjourned ahead of schedule at 3:25 pm.

Meeting Adjourned (3:25)

**ELT Meeting Minutes
November 22, 2004**

Attendees: Karla Teasley (Leader), Jim Asseff for Greg Heitzman (TKO), Barbara Dickens, Bob Miller

Absent: Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Johnnie Rice

Minutes and Agenda Approved (9:05)

Minutes from the November 12, 2004 Special ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Career Planning and Development Process – Johnnie Rice (9:10)

Johnnie Rice distributed information and discussed the Career Planning and Development Process with ELT. She emphasized that each employee is responsible for their own career planning and development. Mentoring of employees will be part of the career planning and development process, but this element of the process remains to be developed. Johnnie proposes bringing together a cross-functional group to develop the process.

Johnnie will schedule time to attend staff meetings to share information on the Career Planning and Development Process with BSOs and POs. Information will be shared with employees through posters and articles in Newsleaks.

NLP Rollout – Johnnie Rice (9:42)

Johnnie said a PowerPoint presentation is being developed in order to provide consistent information in rollout meetings. Karla suggested the presentation be emailed to BSOs for their feedback before the presentation is finalized. The goal is to finalize the presentation and then begin scheduling rollout meetings with the NWTs and SACs.

Open Time (9:46)

Identification of Cost Reductions – Bob Miller discussed the next steps to be taken by the BSOC on identification of cost reductions. Bob will continue to communicate with Kathy Schroeder, as BSOC Team Leader, and Amber Halloran, as Controller, on further expectations regarding cost reductions.

Break (10:00)

Risk Assessment – Bob Miller and Don McKay (10:15)

Since there were few ELT members present at today's meeting, a decision was made to defer this topic to a future meeting when more members are present to participate.

TKO Report – Jim Asseff (10:25)

There was good participation today.

Meeting Adjourned (10:25)

**ELT Meeting Minutes
November 29, 2004**

Attendees: Bill Meeks (Leader), Jack Wang for Greg Heitzman (TKO), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Ed Chestnut, Greg Heitzman

Visitors: Kathie Johnson (Recorder), Don McKay, Roger LeMaster

Minutes and Agenda Approved (9:05)

Minutes from the November 22, 2004 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Residential Water Treatment Devices – John Huber (9:06)

John Huber reported on a recent meeting he had with Gary Metzgar of General Electric. Mr. Metzgar requested the meeting to discuss GE's home water treatment devices. There is a good market for these devices in Europe because failing infrastructure cannot deliver high quality drinking water to the home. GE believes the United States will be in the same position at some point and foresees a growing market for home water treatment devices. This item will be added to the bin list for further discussion in approximately two months, and will also be discussed in a Strategic Planning Team meeting.

Risk Assessment – Don McKay (9:25)

ELT continued work on Risk Assessments.

Open Time 11:15

Susan Lehman provided an update on the Right Management follow-up with ELT members and John Huber. An email detailing this process will follow.

TKO Report

Jack Wang communicated it was a good meeting. Expressed interest in follow-up on in-home treatment devices.

Meeting Adjourned 11:30

**ELT Meeting Minutes
December 6, 2004**

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Jack Wang, Don McKay, Amber Halloran, Carl Blanton

Minutes and Agenda Approved (9:05)

Minutes from the November 29, 2004 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Open Time (9:07)

AwwaRF Futures Project Meeting - Greg Heitzman reported on the AwwaRF Futures Project meeting he attended in Huntington Beach, California last week. Greg distributed the work product from the meeting which identified the top ten trends impacting the water industry. These trends will be published in issues of the AWWA Journal over the next three to six months. The topic will be added to the bin list for further discussion.

Water Quality Technology Conference – Jack Wang (9:15)

Jack Wang reported on his recent attendance at the Water Quality Technology Conference. The seminar provided new information and tools on how to establish a comprehensive distribution system water quality monitoring plan. With regards to the Lead and Copper Rule, the EPA does not require any adjustment on LWC's part at this time. EPA will promulgate the Stage 2 D/DBP Rule and LT2 ESWTR in 2005 and no major changes will be anticipated. He recommended that LWC consider adoption of best management practices for distribution system management. This will be considered at an upcoming Strategic Planning Team meeting.

Jack also reported on his recent attendance at the AWWA Workshop on Utility Accreditation. He recommended that LWC consider participation in piloting the AWWA's standards to determine effectiveness and auditability of the standards. The "standards" are a compilation of industry best management practices. Some 2006 budget resources will be required, and this item will need to be added to the Strategic Plan. This topic will be added to bin list. Greg and Jack will bring back resource requirements, etc. to ELT at a future meeting. Jack also recommended that LWC consider pursuit of ISO 14000 certification instead of ISO 9000 certification. This will also be considered at an upcoming Strategic Planning Team meeting.

R3 (Supplying Financial Resources) System Certification Audit – Bob Miller, Amber Halloran, Carl Blanton

Bob Miller, Amber Halloran and Carl Blanton discussed the audit findings, and corrective action taken by R3, and recommended R3 be certified.

ELT Action: ELT approved the certification of R3

Bob Miller said he will bring the System Certification Audit for R4, Supplying IT Resources, to ELT next week to demonstrate R4 has now met the requirements for certification, and to recommend certification. Another review in second quarter of 2005 will be made to assure requirements continue to be met.

Break (10:13)

Risk Assessment (10:25)

ELT continued its work on the Risk Assessment.

TKO Report

Meeting Adjourned 11:35

ELT Meeting Minutes December 13, 2004

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Carl Blanton, Amber Halloran, Sue Purdy, Jack Wang

Minutes and Agenda Approved (9:05)

Minutes from the December 6, 2004 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Board Agenda – John Huber (9:07)

John Huber reported the Audit Committee met last Friday, December 10 and said the committee is looking forward to hearing more about the inventory software business case. The 2005 water rate schedule will be presented at tomorrow's board meeting, as well as service installation fees, and declaration of the 4th quarter 2004 dividend, approval of the merger of Goshen Utilities into LWC, and appointment of board members to Goshen Utilities Board of Directors. The LWC dividend will be paid to the City as forecast, with payment of any additional dividend resulting from the new computation method to be made after the first quarter of 2005. On January 1, 2005, Goshen Utilities will be dissolved and LWC and Goshen will become one system. A presentation on the Mobile Dispatch system will be given during lunch.

Greenbacks and CERS Increase – Amber Halloran and Sue Purdy (9:25)

Amber and Sue distributed and discussed the November financial highlights. November revenue was lower than expected. Amber will prepare and distribute the 2005 consumption budget, and will research the increase in fire services consumption.

Amber said the CERS rate increased from 8.48% to 10.98%, effective June 30, 2005. Amber will research why CERS raised the rate more than anticipated.

Break (10:25)

System Certification of P1 (Managing Water Quality & Production) - Jack Wang, Carl Blanton (10:30)

Jack Wang discussed the certification audit findings and steps taken to implement the recommendations. Greg said we have various forms of documentation, including forms, flow charts, and SOP documentation, and feels we need to look at a corporate standard for documentation. SOPs and documentation will be added to the bin list for future discussion, as well as LWC becoming ISO certified relative to procedures, SOPs, flowcharts, etc.

John Huber requested that Jack Wang prepare a synopsis on the merits of becoming ISO 9000 certified vs. becoming ISO 14,000 certified.

Carl Blanton said he is satisfied that P1 has met the requirements for certification.

ELT Action: ELT approved the system certification of P1, Managing Water Quality & Production.

TKO Report – Greg Heitzman (11:02)

The meeting started five minutes late. Two agenda items had already been deferred to a future meeting, and the meeting ended 30 minutes early.

Bin List and Agenda (11:04)

Bill Meeks reviewed the bin list for agenda items. He asked if ELT could be present for an 8:30 meeting to allow extra time to address remaining bin list topics. Bill will send out the agenda for the next meeting.

Greg asked that the topic of a briefing on ISO 9000 vs. ISO 14,000 certification be added to the bin list.

Susan Lehmann will begin as ELT Leader in January. Bob Miller will be the Scribe, Bill Meeks will be TKO, and Barbara will be backup recorder.

Meeting Adjourned (11:05)

ELT Meeting Minutes December 20, 2004

Attendees: Bill Meeks (Leader), Greg Heitzman (TKO), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Nora Freeman, Sharon Dawson, Vince Ilari, Carl Blanton, Tony Gregory, Jim Smith

Minutes and Agenda Approved (8:35)

Minutes from the December 13, 2004 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Metered Water Ratio – Nora Freeman, Sharon Dawson and Vince Ilari (8:40)

Nora distributed copies to ELT of the Water Audit for 2003 and the Metered Water Ratio Team's Recommendations and Strategies. Nora said the team wants ELT's agreement on the priorities listed, or suggestions on prioritizing the items. After gaining input from ELT on prioritization, the team will set goals for 2005-2006. Bob Miller committed to meet with IT to include Items Nos. 1, 2, 5, 9, 10, 11, and 13 in IT's 2005 Operating Plan, and will direct them to coordinate with Nora. Nora requested ELT to place this item back on the Bin List for discussion in the first quarter of 2005.

Corporate Policy Approval Process – Barbara Dickens (9:20)

Barbara Dickens distributed flowcharts for the approval processes for both policies and procedures, an example of a good policy statement (media relations), an example of an LWC policy that is in fact a procedure, and ISO certification document control requirements.

Barbara discussed her proposed methods for approvals of policies and procedures. She said her goal is for Legal to become the central repository for all policies and procedures, and to have the policies and procedures posted on the intranet. She discussed the example of a policy statement as being a very broad statement of intent, including the "why" and "what" we believe. The team agreed we need to identify which corporate policies should be approved by the board versus what can be approved through the BSOC approval process. Barbara will incorporate the suggestions made by ELT and will send out a new flowchart for Policy approvals to ELT. Barbara will continue to work on the procedures model, and will get on the BSOC agenda to discuss the process and seek BSO feedback.

ELT Action: ELT approved the model presented by Barbara Dickens for approval of LWC Policies.

Break (10:12)

R4 System Certification – Bob Miller, Carl Blanton and Tony Gregory (10:25)

Bob commented that the IT area has now met all the requirements for certification, and he recommended they be certified with the condition that the system be audited again in 2005 to assure certification requirements continue to be met. Tony commented the group now has more structured meetings with a formalized agenda, improved communications, minutes being

posted on the intranet, etc. In response to Karla's questions about the benefits of holding focus group meetings with major customers, Tony said it helped them better understand the ICS survey results. They learned end users were satisfied with the services and products provided, but had issues with timeliness and communications, which colored their overall rating of IT. The result is that IT has instituted a formal communication process, and plans to meet once a quarter to discuss customers' operating plans. This will allow IT to plan and provide the appropriate tools and technology to meet customers' needs. After some discussion, Karla Teasley recommended R4 be certified.

ELT Action: ELT approved the system certification of R4.

I1 System Certification – Karla Teasley, Carl Blanton and Jim Smith (10:47)

There were four recommendations, and all but a portion of one of the recommendations have been completed. Carl Blanton said he is satisfied I1 has met the requirements for system certification.

Karla recommended approval of system certification of I1 with the condition the integration opportunities and process changes for the GIS, Infrastructure Records, and Surveying process be documented, reviewed by Carl Blanton, and submitted to ELT before end of 2Q 2005.

ELT Action: ELT approved the I1 system certification.

Open Time (11:10)

Winter Preparedness – John Huber said the winter storm being forecast for the next several days includes very low temperatures and snow. He recommended scheduling crews to work instead of relying on calling them out. Public Information may also want to get some advisories out to help customers prevent frozen pipes.

Dividend Forecast – Bob Miller clarified the reason why a portion of the funds resulting from the new dividend calculation for 2002 and 2003 could not be used to create a Risk Mitigation Reserve. He said the action the board approved related to using the new dividend calculation for dividends that would have been payable in 2002 and 2003, and it was not appropriate to use the funds to create a Risk Mitigation Reserve.

Strategic Planning Team Leadership – John Huber said Susan Lehmann will lead the Strategic Planning Team next year. He commended Bob on his performance as SPT Leader in 2004. Karla said an issue that came up in the last SPT meeting was SPT and ELT roles.

TKO Report (11:32)

Greg said the meeting started a few minutes late, but most items were covered on time. One item was deferred to a future meeting.

Karla thanked Bill Meeks for his leadership during the last quarter. Susan Lehmann is the next ELT leader.

Agenda and Bin List (11:35) – Susan Lehmann will distribute the agenda for the next meeting. A request was made to add a review of Ed Chestnut's work-in-progress to the bin list.

Meeting Adjourned (11:40)

ELT Meeting Minutes January 10, 2005

Attendees: Susan Lehmann (Leader), Bob Miller (Acting TKO), Ed Chestnut, Barbara Dickens, Jack Wang (representing Greg Heitzman), John Huber, Susan Lehmann, Karla Teasley

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Carl Blanton, Amber Halloran, Maria Mullaney, Kathy Schroeder

Minutes and Agenda Approved (9:08)

Everyone welcomed back Ed Chestnut!!

Minutes from the January 3, 2005 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Boundary Conditions for Cost Reductions – Kathy Schroeder (9:12)

Kathy Schroeder reported on the current BSO work product on cost reduction planning. The purpose of today's presentation is to gain feedback on the BSO's proposals and on items that were previously considered off-limits for cost reduction planning.

Bob Miller said he now believes a better approach for LWC would be to have costs for winter emergencies and similar events passed on to the customer instead of cutting valid and needed commitments from the budget, or delaying work that needs to be done. As effective managers, we need to remedy inefficiencies on an ongoing basis, but not as a reaction to an emergency situation.

Bob thanked the BSOs for their work in identifying items for reduction, but he feels the organization needs a case for why we should not respond in a crisis mode. This topic will be added to the bin list for further discussion in approximately two weeks.

Draft Preliminary Financial Statements– Amber Halloran, Maria Mullaney (9:53)

In about three weeks the external auditors will be here. Amber discussed the preliminary financial results for 2004 year end. We are \$1 million over the forecast in revenue for December, but \$2.8 million under for the year. Amber will further review O&M expenses to assure 2004 expenses are charged in 2004.

Break (10:12)

Draft 2005 Shared VP, Incentive, and Corporate Performance Award Goals – Susan Lehmann, Bob Miller, Carl Blanton (10:20)

2004 shared goal results are not yet available, but we should have them in the next few weeks. Susan does not propose a change for the corporate performance award for non-union employees, Process Owners and below. Karla asked whether the goals were challenging enough. After some discussion, Susan asked Ed to begin looking at what the 2005 goals should be.

Susan discussed whether the large number of goals each ELT member has (4-6 individual goals, 5 shared goals, 8 competencies, 2 Diversity goals) makes the each goal more “diluted” because of the volume of goals to be measured. She would like to have a team develop alternatives for consideration to provide greater focus on priorities. Bob Miller said goals should provide direction, motivation and accountability. ELT discussed the value of shared goals in making “strategic generalists” of ELT members.

Susan Lehmann, Carl Blanton, Karla Teasley and Barbara Dickens will develop recommendations for John Huber and will bring them back to ELT in two weeks.

Board Agenda John Huber (11:12)

Mr. Huber went over the agenda with ELT. He mentioned the Audit Committee minutes will be presented for information only. A special issue is Service Rules and Regulations. The Mobile Dispatch presentation will be made at lunch. The CERS contribution rate increase will be discussed.

Open Time (11:18)

Performance Review Process – Susan Lehmann said the deadline for submission of Performance Partnerships is February 28. It is very important that everyone meet the deadline this year because HR has many concurrent deliverables, and timing is tight. Penalties for not meeting the deadline are being identified and considered. HR will be updating the salary matrix to reflect market movement and ranges to be used for pay increases. Salary changes for ELT must be reviewed and approved by the Board in April.

Flood – Jack Wang said we are prepared for the high water. John Huber asked that attention be given by our geo-technicians to possible landslides at Cardinal Hill because of saturated soil.

Agenda and Bin List – Susan Lehmann (11:25)

Susan will send out the agenda and bin list for the next meeting. Karla asked to add recognition for the GIS project to the bin list.

TKO Report – Bob Miller (11:27)

Bob felt the agenda was well planned and executed. There was some catch up required for those absent from the first part of the meeting.

Meeting Adjourned (11:30)

**ELT Meeting Minutes
January 18, 2005**

Attendees: Susan Lehmann (Leader and Acting TKO), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bob Miller, Karla Teasley

Absent: Bill Meeks, John Huber

Visitors: Kathie Johnson (Recorder), Carl Blanton, Amber Halloran, Sue Purdy, Jack Wang

Minutes and Agenda Approved (9:05)

Minutes from the January 10, 2005 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Recognition for Process Improvements – Jack Wang, Carl Blanton (9:09)

Improving Response to Customers' Water Quality Complaints – Jack Wang distributed an LWC Operational Improvement form describing the past practice of dealing with water quality complaints, which never identified a root cause for the complaint, and the new practice where CSRs use screening questions so WQ staff may identify the root cause. This allows WQ staff to properly address the issues. Water quality complaints decreased 26% in 2004 compared to 2003, and decreased 15% compared to the five year average. Carl Blanton distributed a summary showing how the team used LWC Core Values in this effort.

ELT Action: Approval was given for a recognition award of \$50 per team member. The team members are: Rhonda Thome, Robert Calloway, Nora Freeman, Rengao Song, Mark Campbell, Scott Smith, Kent Horrell, Don Spanyer, Mary Helen Blume, Tony Sweazy and Susan Camp. ELT also approved adding Jack Wang's name to list to receive a \$50 recognition award.

Utility Accounts Cost Cutting Strategy – Jack Wang distributed an LWC Operational Improvement form. Jack said telephone utility bills had previously not been furnished to Water Quality and Production for usage verification. Staff determined five circuits could be eliminated at a savings of \$1,166 per month, and also worked with Accounting to properly allocate some costs that had been inappropriately allocated to the Water Quality and Production system. Carl Blanton provided a summary showing the team used LWC Core Values.

ELT Action: Approval was given for a recognition award of \$50 per team member. The team members are: Cindy Kowalski, Kent Horrell and Kerry Forster. Carl Blanton will process these awards for payment.

Both of these team accomplishments occurred in 2004. Carl Blanton stated that while recognition for these achievements will come from the 2005 Recognition Budget, he will be revamping the recognition program for 2005 accomplishments. His business system is developing the new program and will be communicating that in the near future.

Metered Water Ratio Team Recognition – Karla Teasley, Carl Blanton (9:28)

Karla Teasley distributed a January 10 memorandum from Nora Freeman requesting recognition for the Metered Water Ratio Team in the amount of \$50 per participant, and also attaching a copy of the Operational Improvement form. Karla said the work done in 2004 is significant enough to warrant team recognition. Their work included benchmarking metered

water ratio practices of the Philadelphia Water Department, completing a water audit, and developing recommendations and strategies. Carl Blanton provided a summary showing how Core Values have been demonstrated by this team.

ELT Action: Approval was given for a recognition award of \$50 per team member. The team members are Ginny Adwell, Laura Amshoff, Cliff Buechel, Brian Burba, Sharon Dawson, Kate Farrow, Jayne Guidry, Vince Illari and Tammy Raley. ELT also approved adding Nora Freeman's name to the list to receive a \$50 recognition award.

Karla Teasley said she will bring recommendations to a future ELT meeting for recognition awards for the GIS Project, Service Rules & Regulations, and Mobile Dispatch teams. Greg will check to see if there are any remaining recognitions that need to be made from his Core. Susan asked to have recognitions for 2004 efforts completed by mid February.

Greenbacks Report – Amber Halloran, Sue Purdy (9:37)

Amber led ELT through the Unaudited Financial Results. She said the figures have changed from the preliminary report because of charges and accruals. The financial results for the year 2004 will not close until after approval by the external auditors.

Break (10:15)

Roundtable Update (10:30)

Bob Miller – Bob commented on a recent Letter to the Courier-Journal Editor criticizing LWC's rate increase. Bob feels consideration should be given to John Huber sending a rebuttal Letter to the Editor. ELT discussed the pros and cons of such an action.

Bob said in the process of disclosing information related to a borrowing, Standard & Poor's asked how the new merged government was working for LWC. Mr. Huber will be asked for an official answer to the question, but Bob commented he feels it has been seamless, with no major impacts on LWC. Karla commented free water is an issue, and expects more entities and fire districts will request free water. Greg sees fewer county issues under the merged government, and thinks we are better aligned for growth and development issues.

In answer to S&P's question regarding what new perspectives our Board of Directors has brought, Bob responded he believes it is a strong business acumen.

Bob requested Vice Presidents to urge staff to timely process invoices. More than \$200,000 in additional expenses were submitted during the second week of January. Discussion ensued whether this is an operational issue that should be managed by the BSOs. Susan commented it is an operational issue to be addressed by the BSOC, but ELT needs to be aware of it.

Karla Teasley – The Capital Projects Authorization Committee work was approved by the Board last week. The committee will begin its work in the next two weeks, and Karla anticipates the work will take a good portion of her time. Jim Asseff has agreed to become a team member.

Services Rules and Regulations were approved at the board level, and work is underway on the communications aspect. Copies will be furnished on request, and the document will be posted on the website. We will continue to work with the Homebuilders Association which takes issue with the System Development Charge (SDC).

Public relations work needs to continue regarding the wholesale rate increase. Work will continue in order to gain PSC approval of the rate increase.

Barbara Dickens – Most LWC policies need to be updated. Barbara will attend a BSOC meeting at some point to discuss.

Barbara continues to work on condemnation cases related to RBF.

Sonja Davis and Beverly Soice started timekeeping and task accounting on January 3. This will provide good measurement for goals and a better understanding of how resources are allocated.

Legal is in the process of making requests for distribution of funds on foreclosure cases where funds were not previously recovered.

Greg Heitzman – The winter impact has settled back down and 2005 is starting off well. The flood has not significantly impacted LWC.

LWC is scheduled to open bids on the RBI project on February 16. A pre-bid meeting will be held in about two weeks.

Standard construction specifications for distribution pipeline were last done in 1997. The last audit recommended separating contract documents from technical specifications. We are ready to finalize. Technical specifications have to go through the Department of Water for approval. A meeting is set to discuss in parallel what to do to update contract documents.

More water quality modeling will be required to meet distribution water quality requirements driven by regulations. We are increasing the cross-connection control program this year, potentially developing a draft ordinance working with Vince Guenther

Karla asked about the Alternative Treatment Technologies (ATT) Steering Group, and requested to attend the meetings. Greg said the first meeting is Tuesday, January 25.

Greg asked that names of individuals being recommended to attend the AWWA Annual Conference be furnished to Kathie Johnson.

Ed Chestnut – Ed will be sending out the template for semi-annual reports with key measures. He will be meeting with Carl, Amber and Roger on 2004. Another meeting will be held to establish criteria for the review process. He wants to set the framework to distribute the information to the organization.

Susan Lehmann – Planning for the union contract negotiations will begin in the first quarter. John Ralston, of UofL's Labor/Management Center, may facilitate the negotiations but that decision will be made jointly by management and the union. Negotiations are expected to begin in August or September.

Open enrollment will go to the BOWW for approval in February. The new plan will take effect March 1, and we will likely stay with Humana. We anticipate minor design changes this year, but expect there to be more significant plan changes in the 2006 plan.

The project to update all job descriptions continues, and the management positions should be completed by the end of March. Front line employee job descriptions should be completed by the end of the year.

Susan expects to have HR policies revised by the end of the second quarter.

The HRIS project will go to the board in February, and Susan plans to update the ELT in advance of the board meeting.

Performance Partnerships are due by February 28. Performance reviews and ratings must be entered into Performance Impact, and Performance Impact must be locked by February 28. Pay increases will be communicated March and will be effective April 1, 2005. Pay increases for union employees will be processed for payment February 1. Sick payout is being processed and will go out in February.

Sexual Harassment training for managers begins the end of this month and will be rolled out to remaining employees in February and March.

In response to Susan's request for feedback on the Roundtable report used in today's meeting, Karla thinks having the Roundtable every two to three weeks would be sufficient.

Agenda and Bin List – Susan Lehmann (11:28)

Susan will send out the agenda and bin list for the next meeting.

Meeting Adjourned (11:30)

**ELT Meeting Minutes
January 24, 2005**

Attendees: Susan Lehmann (Leader and Acting TKO), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Don McKay

Minutes and Agenda Approved (9:05)

Minutes from the January 18, 2005 ELT meeting were reviewed. Barbara Dickens asked that her "Roundtable" report on page 3, paragraph 3, be amended to read: "The Legal Department started timekeeping and task accounting on January 3. This will provide good measurement for goals and a better understanding of how resources are allocated." The minutes were approved with that change.

ELT discussed and accepted a new practice for publication of ELT minutes that will allow for approval of the minutes by ELT before they are accepted and published. In the future, distribution of draft minutes will be made to ELT members only. At the next ELT meeting, the minutes will be reviewed, revised if necessary, and approved for publication.

The agenda for today's meeting was reviewed and approved.

Risk Assessment – Don McKay (9:15)

ELT continued its work on risk assessments.

**ELT Meeting Minutes
January 31, 2005**

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Ralph McCord (representing Karla Teasley)

Absent: Karla Teasley

Visitors: Kathie Johnson (Recorder), Carl Blanton

Minutes and Agenda Approved (9:04)

Minutes from the January 24, 2005 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

2004 Corporate Performance Award, Executive Incentive Plan, and ELT Shared Goal Results – Ed Chestnut (9:05)

Ed Chestnut distributed a draft letter to the BOWW Compensation Committee stating all 2004 Corporate Performance Award goals had been met by employees in each of the four components, and recommending payment of the Corporate Performance Award to qualified employees.

A review was made of the 2004 Incentive Plan Goals results. The light switch goal was not met. ELT discussed the reasonableness of certain goals measures, including preventable vehicular accidents. Bob Miller will follow up on the most recent benchmark data.

ELT 2004 Shared Goal Results were discussed. The RBF Phase III goal was not achievable since the work was deferred as a result of low revenue. The measure for this goal may be discussed with the Compensation Committee.

Break (10:25)

2005 Corporate Performance Award Goals – Ed Chestnut (10:40)

Ed Chestnut discussed the 2005 Corporate Performance Award Goals. The Lost Time Injuries goal will be reduced from ≤ 16 in 2004, to ≤ 6 in 2005. The goal for Preventable Motor Vehicular Accidents will remain at the ≤ 30 level. Carl Blanton related that his former employer had set a goal of zero accidents (whether it be vehicle or some other kind). ELT decided a goal of zero preventable vehicular accidents would require more analysis but might be achieved over a three or four year span with incremental reductions in the goals. Bob Miller will work with Glen Mudd on a three year plan to reduce the preventable vehicular accidents goal to zero.

The draft 2005 Executive Incentive Plan Goals were discussed. The Light Switch Goal will be changed to read: 2005 Net Income must exceed \$29,671,700 (budget of \$29,321,700 plus \$500,000. The measure to achieve a Rating of I for Item I will be amended to: Net operating income exceeds the budget by more than \$500,000. The measure to achieve a Rating of II for Item I will be amended to: Net operating income exceeds the budget by more than \$1,000,000.

Susan Lehmann and Carl Blanton discussed their team's proposal to change ELT Shared Goals from the current equal sharing amongst ELT members to a new method where those whose responsibilities most affect the outcome share the goal. After some discussion regarding how

much influence an individual has on revenue from water sales, John Huber stated it is crucial to LWC that ELT remain accountable for increased revenue through increased water sales.

ELT discussed the changes being proposed by Susan and Carl, and felt the proposal for ELT Shared Goals would require more analysis before being adopted. Susan and Carl will work offline with John Huber on the proposal. The BOWW Compensation Committee is set to meet February 11.

Travel Request – Greg Heitzman (11:30)

Greg Heitzman requested approval for a three person team (from Operations, Maintenance, and Engineering) to make three trips to other utilities to see how they manage the on-site production of chlorine. He estimates the cost at \$1,500 to \$1,800 per trip, or a total travel expense of approximately \$5,000 over two months. The first trip would be during the week of February 21.

ELT Action: ELT approved the travel request.

Water for People Campaign – This topic was deferred to a future meeting.

Meeting Adjourned (11:42)

ELT Meeting Minutes February 7, 2005

Attendees: Susan Lehmann (Leader and Acting TKO), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Carl Blanton, Tony Gregory, Amber Halloran

Minutes and Agenda Approved (9:04)

Minutes from the January 31, 2005 ELT meeting were reviewed. Greg amended the first sentence under the Travel Request on page 2 to read: "Greg Heitzman requested approval for a three person team (from Operations, Maintenance, and Engineering) to make three trips to other utilities to see how they manage the on-site production of chlorine." The minutes were approved with that change. The agenda was reviewed and approved.

Water for People Campaign – John Huber (9:06)

John Huber discussed the possibility of an on-line giving campaign during the last week of March, and suggested holding two to three brown bag lunches and having information about Water for People on the intranet. The Fund for the Arts campaign will be held the second week of May 2005. ELT discussed the feasibility of bundling the WFP, Fund for the Arts, and Metro United Way Giving campaigns this year, but decided to defer any bundling of campaigns until 2006. Susan Lehmann said the statistics she has seen indicate no reduction in giving when campaigns are bundled and that employees appreciated being solicited only once rather than multiple times throughout the year. For 2005, ELT decided to hold the Water for People on-line giving campaign in March, with John Huber coordinating the effort. Greg will hold the Fund for the Arts giving campaign in May 2005.

Bob Miller will follow up to see if payroll deductions can be made for WFP donations and, if so, whether payroll deductions can be initiated from the intranet site.

ELT Communications Forums – Carl Blanton and Bonnie Gimbel (9:20)

Carl Blanton and Bonnie Gimbel discussed whether LWC needs to continue to hold both the Pipeline Breakfasts and ELT Communications Forums. Both meetings are designed to encourage two-way dialogue among employees and Company executives. After discussion, ELT decided the monthly Pipeline meetings should continue to be scheduled, but that ELT Communications Forums will be held bi-monthly instead of monthly. Since John Huber attends monthly Pipeline meetings, he will be excluded from the rotation for Communications Forums. To encourage more dialogue with employees, there will be only two Vice Presidents at each forum instead of three. Questions submitted in advance will be woven into the discussion or addressed at the end of the meeting. The forum may also focus on a particular theme of interest to employees. Greg suggested that Vice Presidents make site visits and/or attend NWT and SAC meetings in the months when forums are not scheduled to increase communications opportunities with employees.

Bonnie and Carl will prepare a schedule for 2006 ELT Communications Forums.

Travel Budgets – Future Direction – Greg Heitzman (9:47)

Instead of ELT continuing to approve travel of \$500 or greater, Greg suggested going back to the previous approval guidelines (printed on the back of the Travel Authorization form). Following some discussion, Greg summarized that travel requests will be approved using the

old controls shown on the back of the travel request form. John Huber will approve attendees for travel to the KY-TN Section Annual Meeting and AWWA Annual Conference. ELT will monitor the monthly travel reports from Amber, and will review the budget for corporate travel each quarter.

HRIS Project Update – Kathy Schroeder (10:16)

Kathy Schroeder discussed the business case for implementing PeopleSoft at Louisville Water Company, comparing the costs/benefits of implementing PeopleSoft to the costs/benefits of implementing a mid-range product. Doing nothing is not an option for LWC because the system will no longer be supported, does not interface with other systems, and uses employee resources for manual tracking, documentation, verification of data, etc. with significant risk to the company and loss of employee resources. Choosing a mid-range system is not a preferred option because it only allows LWC to maintain the status quo, adding limited self-service. The five-year implementation cost for the mid-range solution is estimated to exceed \$2.1 million without providing needed functionality, without controls to mitigate risks, and without reengineering and streamlining processes. The PeopleSoft 5-year gross cost of ownership is estimated at \$2.9 million, with an estimated 5-year net cost of ownership of \$1.9 million due to offsets from salary savings, capitalized internal labor, and other efficiencies. HR believes Empower/PeopleSoft is the best choice because it will allow for productivity and service enhancements, system integration to improve accuracy, and controls to mitigate risks and improve compliance reporting. Implementation would begin in February 2005 with go-live January 1, 2006. ELT discussed what, if any, impact the merger of Oracle and PeopleSoft might have on LWC choosing PeopleSoft. Tony will confirm that support for the system would be provided by PeopleSoft until at least 2013.

Kathy said a condensed presentation will be made to the Board.

Shared Goals – Susan Lehmann (11:28)

Susan reported that Ed Chestnut is in the process of updating the ELT Shared goals for 2005. The Operational Improvements goal and the Cost of Risk goal will be moved to the BSOC as a shared goal. New goals on Metered Water Ratio and Performance Management are being developed. The Board Compensation Committee meets this Friday.

Oil Spill Update – Greg Heitzman (11:31)

Greg will email an update.

Agenda– Susan Lehmann (11:32)

Susan Lehmann will prepare an agenda from the bin list.

Meeting Adjourned (11:32)

**ELT Meeting Minutes
February 13, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Absent: John Huber

Visitors: Kathie Johnson (Recorder), Susan Camp, Carl Blanton

Review Minutes and Agenda – Greg Heitzman (1:55)

The minutes from the February 6 ELT/Strategic Planning meeting were reviewed and approved. The agenda was reviewed and approved.

Review Board Agenda (1:37)

ELT reviewed the BOWW agenda. Barbara Dickens commented visitors concerned with the potential location of a chemical storage facility at Crescent Hill may be present at the board meeting. In order to accommodate additional visitors, the board meeting will be held in Training Room A following lunch. A public meeting with residents is scheduled for March 1.

Providing Customer and Public Information System Certification – Karla Teasley, Susan Camp, Carl Blanton (1:55)

Karla Teasley and Susan Camp discussed the results of the recent certification audit. Following discussion of the improvement recommendations, Karla recommended that the certification be postponed six months, when another review can be made by the certification audit team of items identified for improvement in the certification audit.

ELT Action: ELT agreed to revisit certification of Providing Customer and Public Information in six months after the audit team reviews actions taken to implement suggested improvements.

Natural Work Team Recognition – Karla Teasley (2:45)

Karla Teasley discussed the progress made by the Duty Exchange Program team. Their goal was to exchange over 10,000 low performing meters by 12/31/05, and they met their goal in October. Karla recommends a \$50 recognition voucher per team member. The team members are Ginny Adwell, Brian Burba, Dexter Keeylen, Mike Bingham, Dave Gnau, Scott Spalding, Sharon Dawson, Glenda Bloom and Stacey Bowles.

ELT Action: ELT members agreed to support recognition of this team through the award of a \$50 voucher per team member.

Bin List and Agenda – Greg Heitzman (3:00)

Greg Heitzman reviewed the bin list with ELT. He will prepare and distribute the agenda for the next ELT meeting.

Adjourned (3:05)

ELT Meeting Minutes February 14, 2005

Attendees: Susan Lehmann (Leader), Ed Chestnut, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Absent: Barbara Dickens

Visitors: Kathie Johnson (Recorder), Jim Brammell, Jim Smith, Amber Halloran, Sue Purdy

Minutes and Agenda Approved (9:07)

Minutes from the February 7, 2005 ELT meeting were reviewed. The minutes will be corrected to show that Karla Teasley was not absent at the February 7 meeting. The minutes were approved with that change. The agenda was reviewed and approved.

Review Board Agenda – John Huber (9:08)

John Huber discussed the February 15 BOWW agenda. The Audit Committee will recommend a contract with Strothman as our external auditor instead of Crow Chizek. The Compensation Committee met last week and approved payment of the Employee Performance Award. With respect to the HRIS, the committee will recommend to the Board that a peer review be done to assure the PeopleSoft recommendation is the best, most cost effective solution for LWC. They are hopeful to have a recommendation back by March. Proposed LOJIC funding for 2005 will be discussed, and the Board will be updated on the Kentucky River crude oil spill impact on LWC. An increase will be requested in the budget for renovation of the BE Payne water treatment and coagulation and softening systems from \$7 million to \$12 million.

Bob Miller commented we need to identify an effective date for the proposed change management authorization to award contracts

2004 Recognitions (9:25)

Capital Construction Crew

Jim Brammell requested team recognition be given to the Capital Construction Crew for the purchase and use of a 12" auger which allows them to bore driveways and install PVC pipe without damaging property and inconveniencing customers. This eliminates the need for an outside contractor. The crew has done 15 such bores at a cost of \$756 each versus the \$1,010 per bore using a contractor. They have realized \$3,807 in savings to date. This new procedure is a significant improvement in providing better service to both external and internal customers.

ELT Action: ELT approved a team recognition of \$50 each for the Natural Work Team members, plus Mike Magee and Cliff Buechel. Jim Brammell will furnish names of team members to Carl Blanton.

Service Rules and Regulations

Karla Teasley distributed a memo from Susan Camp requesting team recognition be given to the Service Rules and Regulations team for its work in reviewing and updating the document. The update effort was significant and was long overdue.

ELT Action: ELT approved a team recognition of \$50 each for the team members, plus Millie Durrett for her contribution typing the revisions, and Susan Camp for her work with the team.

Greenbacks Report – Amber Halloran, Sue Purdy (9:50)

Amber and Sue discussed the January financial results with ELT. January water revenue was over budget by \$272,300. Amber will furnish information to Mr. Huber on bad debt as a percent of revenue in 2004 and 2005 budget. Greg Heitzman will work with Sue Purdy in analyzing the 2005 travel budget of \$170,830. Travel expense in 2004 was \$37,961.

Amber reported the auditors have finished their on-site work and should complete their analyses by the end of this week.

Break (10:25)

Recognitions (10:37)

Boundary conditions for ELT Recognitions will be reviewed for applicability in 2005. Karla Teasley plans to bring two additional recognitions for consideration by ELT within the next one to two weeks.

Roundtable Updates (10:50)

Billy Meeks – Billy reported on the recent union elections, and will send out an email to ELT summarizing the final election results.

Bob Miller – The borrowing environment has changed and disclosure requirements have increased significantly. With CH2M Hill the bond feasibility study consisted of a 14 page summary of the borrowing; Black & Veatch's approach is much more in depth. B&V plans to conduct the bond feasibility study concurrent with the annual inspection.

Greg Heitzman – LWC has experienced only a few main breaks because of the winter weather, and the level of maintenance work is extremely low.

The RBF bid opening has been deferred to March 2. If timing will not permit us to present this at the March 15 board meeting, it may be necessary to call a special board meeting to consider the issue.

Work resulting from the crude oil spill is winding down. There is residual oil clinging to roots and debris requiring continued treatment for taste and odor, but levels are returning to normal. It is expected treatment will continue to Friday, and possibly through the weekend. Bob Miller suggested using the experience gained from this emergency to update the Emergency Response Plan. Greg said they used the spill

scenario in the Emergency Response Plan for the oil spill emergency and found it to be very helpful.

Greg said he is on a UofL committee to select an endowed chair, which may be an opportunity to recruit someone with infrastructure research experience. The objective is to have someone in place by July.

John Huber – Performance Partnerships must be completed by February 28. John pointed out there is a Performance Management Shared Goal that will require getting goals and reviews completed, etc. in a timely way. The Compensation Committee agreed we need to work towards an ultimate goal of zero lost time injuries over the next few years, but they felt the 2005 lost time injury goal back of ≤ 6 was too aggressive and adjusted the 2005 goal to ≤ 12 lost time injuries.

LWC needs to dispose of the work boat acquired to maintain the Falls Fountain. The boat cost almost \$200,000, and is fully depreciated.

Louisville Metro government continues to work on the possibility of acquiring LG&E.

Karla Teasley – The Capital Project Authorization Committee recently met and recommended approval for a number of projects. The committee is off to a good start. The goal is more timely review of items previously requiring board approval.

Susan Lehmann – Susan will email the Performance Management Goal to ELT when it is completed. The February 28 ELT meeting will be focused on Strategic Planning.

Ed Chestnut – Bob Miller and Ed Chestnut are consulting with Dr. Cerrito on revenue projections by class, by year.

Agenda and Bin List (11:34) – Susan Lehmann will email the agenda and bin list for the next meeting.

Meeting Adjourned (11:35)

ELT Meeting Minutes February 21, 2005

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Nora Freeman, Stu Bowns (Hydromax)

Minutes and Agenda Approved (9:05)

Minutes from the February 14, 2005 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Best Practices in Water Loss Control – Stu Bowns, Hydromax (9:07)

Stu Bowns prepared an educational session for ELT members on the water industry's best management practices for water loss control, as documented by AWWA's Water Loss Control Committee. Shortcomings with past industry practices to measure water loss were reviewed and along with how the new International Water Audit format improves water accounting. Efforts by Philadelphia and Halifax in implementation of this methodology were discussed along with typical opportunities for improvement for utilities just adopting the IWA standard. A copy of Stu's presentation will be distributed to ELT members.

Break (10:30)

Roundtable Updates (10:45)

Ed Chestnut – Ed distributed the 2004 Strategic Plan Measurements Report and requested ELT's feedback by Monday, February 28. Ed will update the document before the Agenda Prep meeting on March 2. Karla commented this document was a work product of the ELT Measurements Sub-Team. Greg suggested adding a column for the name of primary data provider. Greg and Ed will ask the BSOC to take the lead in establishing 2005 goals for items that had a goal identified in 2004.

Karla Teasley – The MSD Billing Agreement is close to being finalized. Barbara Dickens has been working on this. A meeting will be held regarding the MSD agreement this afternoon. The document will be changed to extend the Agreement to the year 2007.

The Public Affairs and Customer Satisfaction Committee will meet Thursday, February 24 and will cover the customer service measurement trend summary, CSI, abandonment rate, drivers of call volume, and payment trends. There will be a brief update on service rules and implementation of the service deposit. Barbara Crow will give updates on the rate increase and Customer Advisory Council.

Barbara Dickens – The owner of the Lake in the Woods and South Hill apartments has surfaced and has been indicted on five checks for LWC totaling about \$75,000. Any

recovery will be a positive since the debt was previously written off. Total remaining debt to LWC is approximately \$98,000 not including the fees and late charges.

Barbara took the corporate policy approval process to the BSOC, and the new process has gained their approval. There are some issues still to be resolved.

Greg Heitzman – Special handling for the crude oil spill was discontinued last week, and operations are now back to normal. The cost to LWC for special handling and supplies resulting from the crude oil spill is estimated at between \$375,000 to \$400,000. Recovery will be sought from Mid-Valley Pipeline and its insurance carrier.

Greg discussed recognition for the group involved in handling the oil spill. ELT agreed with Greg's suggestion for providing all employees involved with the spill response a \$50.00 recognition vouchers for corporate clothing and a catered lunch. Greg will prepare a list of the employees to receive vouchers. The estimated cost for this recognition is \$5,200 (80 employees x \$65.00 per employee) and the expense will be absorbed in the Operations budget (org 200).

Susan Lehmann – Next week the ELT meeting will be a strategic planning session, and Amber Halloran and Jim Brammell will give updates on a Strategic Innovation Model that they have learned as part of the curriculum in the UofL Executive Education Program, Leading through Continuous Change program they are enrolled in.

Meeting Adjourned (11:35)

ELT Meeting Minutes
February 28, 2005
Minutes Approved 3/7/05

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Jim Brammell, Bruce Mingus, Jim Smith

Minutes and Agenda Approved (9:05)

Minutes from the February 21 ELT meeting, including revisions by Barbara Dickens and Greg Heitzman published prior to the meeting, were reviewed and approved. The agenda was reviewed and approved. This is the first ELT meeting where strategic planning will be included. Strategic planning will be discussed in the last ELT meeting of each month.

Bill Meeks introduced Bruce Mingus, the new Vice President of Local 1683. Bruce has been with Louisville Water Company for 6-1/2 years, and has spent most of that time working at Allmond Avenue.

Strategic Planning (9:06)

Water Sales Forecast – Bob Miller

Bob Miller noted that the most recent long-range forecast for water sales was included in the 2002-2021 Facilities Plan completed in 2001. Bob said he and Ed Chestnut are working with Dr. Cerrito of UofL to do a more detailed analysis, using data from 1975 to the present to track the effects of weather, economic conditions, etc. Dr. Cerrito will do a forecast of total sales by customer class. Dr. Cerrito will also forecast peak usage. She will also be developing a methodology for 60 day forecasts with high degree of accuracy. The immediate short term of what we will do with the study is work with PFM to update the long range financial plan. Dr. Cerrito will look at historical data going back 30 years, and will project forward 20 years.

John Huber commented in addition to identifying average and peak usage points, it will be important to identify the valleys because there is more risk on the downside. Bob will include that, as well as the impact of conservation devices. John suggested General Electric, Home Depot, AWWA, and other sources may be able to supply data for analysis. John also advised that we may want to break out traditional commercial consumption from multi-family housing consumption. Greg Heitzman advised that we may want to include pumping data in the model. Greg also advised that he and Jim Smith are working with the U of L, Center for Infrastructure Research (CIR) on a small project to evaluate the impact of low-flow conservation fixtures on residential consumption. Dr Tom Rockaway and Dr. Paul Coomes are the principal investigators. This project will be funded under the annual contributions of LWC and MSD to the CIR.

Jim Brammell mentioned in the past he has done water demand forecasting using public domain software. Bob Miller suggested at the next meeting we discuss work prepared by PFM regarding O&M cost component forecasting. Dr. Cerrito's work is due by April. Karla Teasley asked what staff support is needed. Amber and Jim will work on the PFM part; Dr. Cerrito will have a co-op assisting her.

Strategic Innovation Model – Jim Brammell, Amber Halloran

Amber distributed a presentation entitled "Strategy Innovation" by Robert D. Nixon, Ph.D., University of Louisville. Amber and Jim led ELT through the presentation, and discussed the concepts and how they might be applicable at LWC. Jim Brammell commented using the model would not replace strategic planning, but should precede strategic planning. The concept is for bottom up planning involving a diverse team with a liaison between the team and top management. The team would produce creative, break-through ideas and business opportunities they would evaluate and prioritize, then hand off the ideas to the strategic planning team in the form of a business case.

Break (10:43)

Strategic Innovation Model – Jim Brammell, Amber Halloran (discussion resumed 10:43)

John said we have to keep in mind the boundaries of our charter as a water utility; however, there are some things we can explore:

- What is possible within the regulated core system
- What is possible outside the regulated core business

John said this is a fundamental policy matter that the board will want to be more involved with. Jim suggested working with the Revenue Sub Team, and ELT discussed what the makeup of such a team should be, including its size, diversity, etc. Karla said the time scheduled for the Revenue Sub Team on March 8 could be used to discuss the team makeup and direction. Jim and Amber suggested ELT select the team members. It was decided to discuss this more at next week's ELT meeting.

Meeting Adjourned (11:35)

ELT Meeting Minutes
March 7, 2005
Minutes Approved 3/14/05

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Jim Brammell, Anna Norris, Jim Smith, Carl Blanton

Minutes and Agenda Approved (9:04)

Minutes from the February 28 ELT meeting were reviewed. Greg Heitzman revised the minutes by adding three sentences under the Water Sales Forecast heading, at the end of the second paragraph, as follows:

“Greg also advised that he and Jim Smith are working with the U of L Center for Infrastructure Research (CIR) on a small project to evaluate the impact of low-flow conservation fixtures on residential consumption. Dr. Tom Rockaway and Dr. Paul Coomes are the principal investigators. This project will be funded under the annual contributions of LWC and MSD to the CIR.”

The minutes were approved with that change. The agenda was reviewed and approved.

Open Time (9:05)

Performance Reviews - Susan Lehmann reported that pay increase spreadsheets will be distributed on Tuesday.

Pricing for BSO Positions – Susan Lehmann said Mercer pricing for BSO positions continues and should be completed in the next month or so. Any changes will be made retroactive to April 1.

Phoenix Water Quality Issues – John Huber (9:05)

John Huber discussed the situation in Phoenix in January 2005 when its water utility was overwhelmed and it issued a system-wide boil water advisory. Factors leading to this action included two of its five treatment plants being closed for maintenance and storm damage to a third treatment plant. Severe water turbidity overwhelmed the fourth plant when water was discharged into dusty stream beds that had not experienced a significant flow of water for several years. A boil water advisory was issued at 2:00 a.m. The situation was worsened by ineffective communication to consumers, not using the emergency notification system, providing health-based information to the public about the safety of the water (purview of local health officials), and inability of consumers to contact the utility because its telephone system was overwhelmed.

John Huber felt it was important to use the Phoenix event to look at LWC's preparedness for an emergency situation. ELT's discussion included:

- Reminding the public about storing bottled water for emergency situations
- Timely communications, here and in adjacent counties
- Using the right media for communications

- Looking into use/cost of crawlers across TV screen
- IVR
- Outbound customer calls in some cases
- Checking to see what Metro Government has in place for alarms
- Updating Emergency Response Plan
- Reviewing the work done on Cryptosporidium
- Reviewing LWC's technology for necessary capabilities
- Reinforcing relationship with local health officials
- Contingency arrangements with other call centers
- Pre-arranged scenarios with health department for boil water advisory and boil water orders
- Partnering with Emergency Response
- Have a plan with Public Health on the uses of water in an emergency situation

Our current methodologies may have gaps; John said the follow up is to review minutes to identify gaps. Bob and Karla will take this issue to the BSOC to get their recommendation on next steps.

Review of 2005 Capital Program Goals – Amber Halloran, Jim Smith, Anna Norris (10:00)

Jim Smith distributed bar charts depicting capital expenditure trends versus budget (period 1994 – 2004) and versus revised budget (period 1998 – 2004), and a spreadsheet of capital budget and spending from 1994 – 2004. ELT discussed the “committed” figure, what it represents, and its informational value. The outcome from the discussion was to recommend to the Compensation Committee that the Shared President and Vice President Goal for the Capital Improvement should be based on the percent of the revised capital budget that was spent during the year and that the reference to the percent committed should be deleted. Greg Heitzman expressed concern over the loss of use of the percent committed measure, as this measure was previously used as a leading indicator for the progress of the annual capital program. The expended measure will leave only one metric for measuring the capital program, and this measure is not an indicator of program effectiveness. Ed Chestnut will check the current goal to determine if the percent spent targets are consistent with the recommendation brought by Amber, Jim, and Anna. (Ed verified after the meeting that the current goal percent spent targets are valid as submitted to the Committee).

Break (10:45)

Strategic Innovation Discussion – Jim Brammell, Amber Halloran (11:00)

Jim Brammell recommended a team size of 5 – 6 individuals, from as many functional areas as possible, a public relations person, and an outsider. Jim estimated as much as 25% of an individual's time will be devoted to the team activities. John Huber will serve at the team sponsor.

ELT decided the Revenue Sub Team will continue its work to expand LWC's reach into this part of Kentucky and Indiana, and looking at how we sell water, whereas the Strategic Innovation Team will look for creative, break-through ideas and opportunities to create revenue.

Jim Brammell and Amber Halloran will schedule a meeting with John Huber to discuss the makeup of the new team and its charter.

Adjourned (11:32)

ELT Meeting Minutes
March 14, 2005
Minutes Approved 3/21/05

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Jim Brammell, David Collier, Tony Gregory, Sue Purdy

ELT Photo (9:00)

A group photo was taken of ELT for the LWC 2004 Annual Report .

Minutes and Agenda Approved (9:13)

Minutes from the March 7 ELT meeting were reviewed and approved. The agenda for today's meeting was approved.

Review Board Agenda – John Huber (9:14)

John Huber noted the board agenda doesn't include projects less than \$2 million or contracts less than \$1 million. Of the eight items on the agenda, only three are action items. There will be two committee reports, the PA&CS Committee and the Compensation Committee. The Compensation Committee report will deal solely with HRIS. Wendy Welsh is unable to attend the meeting, but will participate in the HRIS discussion by phone at 2:00 p.m. The dividend declaration for the first quarter of 2005 will be made, which will include a quarter of the budgeted 2005 dividend plus nearly \$400,000 resulting from recalculating the dividend for the years LWC collected rate differentials. A very clear audit trail will be documented for any future questions regarding the dividend calculation. There will be an update on the RBI project. The General Assembly update will be given as part of the PA&CS committee report. John reported that the Compensation Committee agreed with using PeopleSoft as the new HRIS system; however, the Compensation Committee has asked if there are advantages to implementing pieces over time, and developing in-house capabilities for PeopleSoft. Centric's analysis showed the PeopleSoft solution is not much more expensive than the mid-range solution over the first five years, and is the most advantageous solution after seven years.

Inventory/Warehouse Management Project – Jim Brammell, David Collier (9:28)

Jim Brammell said a project update will be given at the March 29 Audit Committee. David Collier distributed a presentation on the Information Technology Strategic Plan, Warehouse Management System, which he and Jim Brammell discussed with ELT. Amber will prepare an additional analysis of the impact implementation of the system will have on rates. Tony indicated the cost of implementation could change when bid out.

John Huber asked whether an analysis had been made of the costs/benefits of continuing to warehouse materials at LWC versus allowing contractors to buy materials in-spec from outside suppliers. The last analysis was done in 1996, which led LWC to continue warehousing. John Huber requested a new analysis be done to determine the best course for LWC (continuing to warehouse materials for contractors, or allowing

contractors to buy from outside suppliers) before a decision is made to approve the proposed Warehouse Management System.

Break (10:46)

Greenback's Report – Amber Halloran, Sue Purdy (10:57)

Amber Halloran and Sue Purdy reviewed and discussed the Financial Highlights for February 2005. Amber reported the external auditors made no changes to the financial reports for January and February 2005, which are now considered final.

Topics Deferred (11:31)

The BSOC Shared Goals topic and Open Time topics were deferred to a future meeting.

Adjourned (11:32)

ELT Meeting Minutes March 21, 2005

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Tony Gregory (for Bob Miller), Greg Heitzman, Bill Meeks, Karla Teasley

Absent: John Huber, Bob Miller

Visitors: Kathie Johnson (Recorder), Carl Blanton, Kathy Schroeder

Minutes and Agenda Approved (9:05)

Minutes from the March 14 ELT meeting were reviewed and approved. The agenda for today's meeting was approved.

Review of 2000-2004 Strategic Goals – Ed Chestnut (9:06)

Ed Chestnut distributed material related to Constituent Goals and Objectives for the period 2000 – 2004, for review and discussion at a future ELT meeting. The desired outcome is to discover and document lessons learned for consideration when setting future goals. Greg suggested adding a five year target plus annual goals, and Karla requested adding the year a goal was changed from its original target.

Ed also asked for comments on ELT shared goals. The measure for the Performance Management Goal will be reports that reviews have been completed by the trimester due dates established by Human Resources. Each VP will be responsible for reporting to Ed that trimester reviews have been completed for each for each of their nonunion employees. Roger LeMaster will do random audits to assure the reviews have taken place. Susan asked Ed to remove the "Goal removed in 2004" comment from the AA hiring goal line. She said the comment is misleading. This information continues to be tracked and is a corporate goal, but not an individual goal.

BSOC Shared Goals – Kathy Schroeder, Carl Blanton (9:28)

Kathy Schroeder distributed draft goals for discussion. She said the BSOC will meet tomorrow to continue work on the goals. Carl Blanton recommends the BSO shared goals replace current team goals to reduce duplication. Team goals not covered in the BSOC shared goals can be moved to individual goals. When asked about the O&M Cost Control goal, Carl and Kathy responded the goal relates to budget management, not O&M cost per customer. Kathy Schroeder said they will update ELT through email as changes are made to the BSOC Shared Goals. Greg asked how reporting and tracking will be done. Carl suggested reporting results to ELT each quarter. Kathy expects work on the BSOC Shared Goals will be completed in early April.

Break (9:50)

Roundtable Updates (10:00)

Karla Teasley – The Bullitt County Advisory Board will meet this afternoon. Karla said the 2/3 majority petition project is going well. Residents are now required to sign a contract and make a deposit before they get water. The fire hydrant and valve installation work is going well. Karla is working with Barbara Dickens to finalize the MSD agreement. She is working to finalize 2005 goals. There are some issues to be worked through in Metering Services. Nora Freeman has asked for IT assistance regarding the recent high bill issue.

Ed Chestnut – An intern is entering data for the revenue forecast that Dr. Cerrito is doing for LWC. Microfilmed records of consumption data prior to 1994 are very poor quality. Barbara Dickens said this is a Records Management issue and questioned the value of continuing to microfilm records. ELT discussed pursuing other technology options for record storage and retrieval.

Ed requested any changes to the ELT Shared Goals be given to him this week.

Bill Meeks – The union election results are completed. Except for Bill, the Executive Board is made up of all new members. Bill will email information on the election results to ELT. Bill is working to develop a survey on issues to include in contract negotiations. Training for maintenance mechanics is moving forward.

Barbara Dickens – Work is continuing on corporate policies. Barbara asked Vice Presidents to start work on the policies being recommended by their BSOs. Barbara reported she has been spending a lot of time on litigation support and property issues (difficult easement issues). She discussed the difficulty she's encountered with railroad crossing agreements. Greg will meet with Barbara to discuss LWC's historical handling of railroad crossing agreements, and will furnish legal opinions from his files.

Greg Heitzman – Regarding the Riverbank Filtration project, Greg reported the bids came in 56% over the estimate, and the Board rejected all bids. The consulting engineers did a detailed report of the differences. A decision was made to continue working with the consulting engineer on value reengineering the project over the next three to four months. Greg will meet with Bob Miller regarding the accounting rules on money spent to date, and how to handle current and future costs.

Greg and others from LWC attended a Business Diversity Strategy Workshop. Companies represented included ADP, Humana, Hilliard Lyons, LG&E, Brown Forman, and others.

Susan Lehmann – The BOWW Compensation Committee will meet Thursday to review Vice Presidents' performance evaluations and develop recommended salary increases for the full Board. Pricing for the HRIS bid has been extended through April but there will be changes to the terms of the contract. Salary spreadsheets are due March 23, and salary worksheets are to be turned in by April 4. The effective date of salary increases is April 1.

Recent email policy violations resulted in termination of two employees. Additional employees were disciplined. HR is working with Tony Gregory to update the policy,

develop additional security measures and training for all employees. The revised policy will also address instant messaging and employee access of their personal email accounts at work. Training will require employees to sign a statement they understand the policy and agree to adhere to it.

Next week's ELT meeting will include Strategic Planning. Susan Lehmann reported she will be on PTO, and asked Barbara Dickens to begin her term as Leader a week early by leading the March 28 meeting. Barbara agreed.

Adjourned (11:30)

ELT Meeting Minutes March 28, 2005

Attendees: Barbara Dickens (Leader), Ed Chestnut, Bob Miller (Recorder), Karla Teasley, Bill Meeks, Greg Heitzman

Visitors: Amber Halloran, Jim Brammell, Kathy Schroeder, Jim Smith, Vince Guenther

Minutes and Agenda Approved

Minutes from the March 21 ELT meeting were reviewed and approved.

Ed Chestnut distributed a copy of meeting goals to review the constituent objectives for the 2000-2004 Strategic Plan. The ELT accepted the agenda as proposed. Ed also noted that John Huber was interested in additional consideration of changes in power and energy costs.

2000-2004 Strategic Plan Measurements Report Received

Ed Chestnut reviewed the format of the report using the Customer Satisfaction measures as an example.

Overall CSI

Greg recommended that LWC reconsider the decision to lower the overall CSI goal (and not expend the resources needed to meet the higher goal) since the projection of rate increases are now higher and the makeup of the Board has changed. Karla noted that additional research would be needed to identify the perceived value of expanding this program. Ed noted that the overall measure tracks very closely to the residential non-service measure. **The ELT agreed to revisit this decision to lower the overall CSI goal.** Jim Brammell raised the question about how we might calculate the value of raising the overall CSI (i.e., how much should LWC be willing to spend to raise the CSI). Greg observed that we might benchmark this with LG&E how they assess the value of this type of program.

Serviced Account CSI

Karla reviewed the scale used to measure customer satisfaction. Greg asked for additional correlation analysis to determine if there is a relationship between serviced account CSI and other factors such as sales, O&M budget variance and profit. Karla questioned if we could determine a relationship between the workforce reduction and the recently lower results for this measure. Bob emphasized the need to assess and separate common cause variance from special cause variance. Karla noted the need to reduce the reasons why customers need to call for service. Karla noted that the serviced account CSI is increasing faster than the overall CSI. Greg requested further analysis to determine if the increase in serviced account CSI is masking a decrease or flattening in the overall CSI. He recommended for analysis purposes to hold the serviced account CSI flat to determine what the effect would have been on the overall CSI. Karla noted that customer expectations have increased over that time.

Water Rate Changes

Bob reviewed the history of rate increases since 1990 and noted two key changes since 1999 have occurred: (1) LWC projected water sales are now assumed as flat or decreasing and (2) LWC costs are increasing faster than the CPI. Jim Brammell expressed interest to assess if there was a more appropriate index or composite of indices that might serve as a better predictor of where our cost structure is headed. Greg noted that our task is to determine the balance of efforts to increase revenues while reducing or controlling expenses.

Water Quality – Coliform

Greg noted that recent years have been lower demand years (and lower temperature years) and that we may not be able to say with certainty that the higher water quality results are sustainable. Greg also reviewed actions taken to assure higher reliability of samplers and sampling techniques. He also noted increased water main flushing in response to water quality complaints and a full cleaning of the Cardinal Hill storage facility. Karla asked: "Does lower positive coliforms translate into higher water quality or is it an improvement in process?" Greg answered: "It's primarily an improvement in process." As regulations change and require sampling in worst case scenarios we are going to develop new processes to meet the goals. Jim Smith also noted that some portion of the improved water quality measures may be attributed to the replacement/rehabilitation of unlined cast iron pipe.

Water Quality – Chlorine Residual

Greg reviewed the contributing factors that affect chlorine residuals in Bullitt County and southwest Jefferson County. Greg noted that recent years have not fully tested the effectiveness of measures taken to mitigate the loss of chlorine residuals. He expects that chlorine residuals will fall during future occasions of high water temperature, but not as much as before. Karla encouraged further consideration of providing funding for initiatives that have been identified but not yet resourced. **The ELT agreed to revisit this issue to consider additional funding for this strategy. The ELT also agreed that "worst case scenario" data should be fully considered when evaluating this strategy.**

Water Quality – Turbidity

Greg attributed the improvements in this measure to changes at the plant, plus increased flushing and replacement/rehabilitation of unlined cast iron pipe. Karla asked about achieving Phase IV of the Partnership for Safe Water. Greg discussed consideration of balancing filter rebuilds at Crescent Hill while evaluating alternative treatment technologies for that plant. Greg noted that achieving Phase IV by 2008 will require renovation of the filters.

Financial Measures – Return on Equity

Bob reviewed three key issues related to this goal: (1) GASB compliant reporting no longer reports an amount for stockholders equity; (2) the returns earned by investor-owned utilities have continued to decline; and (3) LWC has phased out the "one percent less than" component of the goal. Greg considered alternative methods for computing this stockholder return goal. Bob discussed the attributes of return on assets/return on rate base. Greg recommended consideration of an alternate/higher return for business outside our core business.

Halifax Regional Water Commission Information

Bob displayed a wall chart used by HRWC to communicate their mission, goals, objectives and results.

Next Meeting Agenda

The ELT considered devoting the next meeting to continue the risk assessment work.

**ELT Meeting Minutes
April 4, 2005**

Attendees: Barbara Dickens (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Billy Meeks

Visitors: Don McKay, Roger LeMaster

Minutes and Agenda Approved (9:05)

Minutes from the March 28, 2005 meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Open Time: CSI First Quarter Results Reviewed (9:06)

Karla shared the CSI results from the first quarter. Total CSI went from 829 to 851 and the Serviced CSI increased from 781 to 802. We also experienced high jumps in Water Quality from 858 to 886. The price/value factor for residential non-service went from 760 to 783, which is remarkable given the recent rate increase.

Risk Assessment Work – Don McKay (9:12)

ELT continued its work on the Corporate Risk Assessment.

Break (10:00)

Risk Assessment Work – Don McKay (10:10)

ELT continued its work on the Corporate Risk Assessment.

AwwaRF Technology Transfer Conference – Best Practices in Asset Management – Greg Heitzman (11:10)

Greg Heitzman gave a presentation of the Asset Management Workshop that he attended during the AwwaRF Technology Transfer Conference. The Research Advisory Council, on which Greg serves, is doing workshops on various topics. This particular workshop was specific to the distribution system and reviewed performance, repair and rehabilitation of the system.

Bin List Reviewed and Agenda Discussed (11:35)

Adjourned (11:40)

**ELT Meeting Minutes
April 11, 2005**

Attendees: Barbara Dickens (Leader), Susan Camp (representing Karla Teasley), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Absent: Karla Teasley

Visitors: Amber Halloran, Sue Purdy

Minutes and Agenda Approved (9:05)

Minutes from the April 4, 2004 meeting were reviewed. The paragraph under Open Time was amended per Karla Teasley's email as follows:

"Open Time: CSI First Quarter Results Reviewed (9:06)

Karla shared the CSI results from the first quarter. Total CSI went from 829 to 851 and the Serviced CSI increased from 781 to 802. We also experienced high jumps in Water Quality from 858 to 886. The price/value factor for residential non-service went from 760 to 783, which is remarkable given the recent rate increase."

Items following "Adjourned (11:40)" will be deleted from the approved minutes. The minutes were approved with those changes. The agenda was reviewed and approved.

Review Board Agenda – John Huber (9:06)

John Huber reviewed the agenda for the Annual Board of Water Works Meeting that will be held tomorrow. There will be a report of the Nominating Committee, election of the Chair and Vice Chair, elections of Louisville Water Company officers, and reports from the Audit and Compensation Committees.

Greenbacks Report – Amber Halloran, Sue Purdy (9:10)

Amber and Sue reviewed the financial highlights for March 2005. Revenue is over the budget for the month of April 2005. Ed Chestnut will determine if there is a correlation between apartment occupancy and the city occupational tax. Amber will do further analysis to see why GE consumption has dropped. Mr. Huber asked for a short paragraph for the May Board Report on the anticipated impact of the new bankruptcy law on bad debt.

Roundtable Reports (9:40)

Greg Heitzman – As Chair of the Fund for the Arts giving campaign at LWC this year, Greg discussed his plans for the campaign, which will be held May 16-20. He recommended the \$5,000 budget for giving campaigns be allocated as follows:

Water for People \$250

Fund for the Arts	\$750
Metro United Way	\$4,000

Greg discussed his plans for the FFTA campaign. He wants to raise the participation rate in 2005, as well as the dollar amount, and is targeting to match the 2003 giving results. Incentives and fundraising options were discussed. Greg proposes three drawings for a PTO day for employees giving at a certain level. He proposes 7-10 employee meetings, and may piggyback on NWT and SAC meetings. Pledge cards will be distributed at the meetings. Barbara Sexton-Smith, from FFA, will make herself available to speak at each meeting, which will last about 30 minutes, including a 4 minute video. Allan Cowan of FFA will speak to a Winners Circle meeting of ELT and BSOs. Greg asked the Vice Presidents to assist in recruiting team captains from each location.

In answer to Karla Teasley's concern, there is no budget for a Metro United Way Loaned Executive. The Metro United Way/Loaned Executive topic will be placed on the bin list for discussion at a future meeting.

ELT Action: ELT approved Greg Heitzman's approach to the Fund for the Arts giving campaign, as well as the allocation of the \$5,000 budget as stated above.

Break (10:05)

Roundtable Reports – Continued (10:20)

Bob Miller – Bob Miller reported he attended a meeting in Canada last week on Risk Analysis Strategies for Decision Making. There were 30 utilities represented, most of which are “corporatized” government-owned utilities. LWC was considered by the conference leaders and attendees as having one of the most comprehensive Enterprise Risk Management Programs. Key take-aways from the meeting were: 1) management discussion and analysis section of the annual report should include a discussion of risks; 2) discussions of strategic planning with a board of directors should also include the related risks; (3) utilities are still developing methods for evaluating risk interactions and risk aggregations. John Huber requested a copy of two publications that Bob saw at the meeting, “20 Questions Directors Should Ask About Risk” and “20 Questions Directors Should Ask About Strategic Planning.”

Susan Lehmann – Positions for an HR Analyst and an HR Assistant have been posted. LWC has joined The Conference Board at a reduced cost of \$7,500 this year, and \$10,000 in subsequent years. The Conference Board provides resources for every business function. Ed Chestnut will serve as liaison between LWC and The Conference Board. Susan plans to attend a meeting on leadership development and succession planning.

Susan said as a result of employees out on disability, impending retirements, etc., HR will begin recruiting for labor positions to build a pool of applicants.

Susan is polling Board members on strategic planning topics they would like to discuss.

Barbara Dickens – Barbara has spent much of her time on litigation and BOWW issues. Beverly Soice has been working through some old foreclosures. Barbara and Beverly

were recently trained on electronic filing of bankruptcy claims so they can file proofs of claim on lower value claims. Each claim is evaluated as to appropriateness of handling in house or sending to outside counsel. Most of the in-house work can be done online, although Beverly must attend creditor meetings.

Ed Chestnut – At next week's ELT meeting, Ed will distribute a 2004 Performance Indicator Profile from the QualServe Benchmarking Survey. This is in preparation for the April 25 Strategic Planning Team meeting.

Bill Meeks – Bill is still working on DPT issues. Sub teams are developing training programs for mechanics. Bill is preparing for arbitration of a grievance on call outs.

Greg Heitzman – The EPA reported to Jack Wang the crude oil spill was 262,542 gallons, about 4 times higher than the first estimate.

Labor resources are a major issue. There are 10-12 individuals on short-term disability. We were notified by American Darling that 1,100 hydrants need remediation. We will be pulling 6-9 employees to complete the hydrant work before winter. Will track costs related to hydrant repairs so we can make a claim. Also, Jim Brammell has employees loaned to Nora Freeman.

We are finalizing a contract with JJ&G to develop alternatives for the RBI project, including tunnel alternatives, collector wells (located below the flood plain), and vertical wells. This will be a 3-4 month exercise including JJ&G and other outside consultants. We are pressing ahead on the Transylvania Beach condemnations.

Problems identified with the Tyler Tank project include the increased price of steel and interference with radio signals.

We discovered the chemical building slate roof at the filter plant was damaged during the winter. This will require \$25,000 to \$50,000 to repair the slate roof at the CHFP. Replacement of the slate roof on the chemical building is estimated to cost \$560,000.

The Regional Airport Authority - We have reached an agreement with RAA stating that LWC and RAA will split equally the remaining cost of a relocation project which is not reimbursed by the FAA, so long as RAA is not prohibited by law from doing so. If RAA is prohibited, LWC would bear the full cost that is not reimbursed by FAA. Easements and RAA agreement should be executed this week before the Mac Construction bid award deadline.

John Huber – Board members Marita Willis and Stewart Conner are up for reappointment. Margaret Harris is a candidate for a Metro Council seat, and if appointed she will not complete her BOWW term.

A meeting was held between Rick Johnstone, the Parks Department and LWC regarding maintenance of the River Road Country Club. LWC will maintain the buildings, and Parks will maintain the open space and the greens. The fairways will be allowed to grow long to discourage use. In May and June, Metro Government wants to gain web input on the use of the facility, then hold a meeting at the Water Tower regarding the best use of the property.

A decision needs to be made whether to sell the work boat or transfer it to the Waterfront, where it could be available to LWC should the need arise.

Bob Miller – Bob remarked that a water quality incident at Walkerton, Ontario about 5 years ago continued to receive significant discussion from utilities in England, Canada, and Australia at a conference he recently attended on risk management. He noted that a representative from Walkerton recommended that utilities review the results of risk assessments with their Customer Advisory Councils.

Bin List (11:28)

Barbara Dickens will add discussion of the Metro United Way Campaign and Loaned Executive to the bin list. Hopefully the Risk Assessment will be completed at next week's ELT meeting.

Adjourned (11:30)

ELT Meeting Minutes April 18, 2005

Attendees: Barbara Dickens (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Don McKay, Roger LeMaster

Minutes and Agenda Approved (9:05)

Minutes from the April 11, 2005 meeting were reviewed. Greg Heitzman pointed out two changes to the minutes:

On page 1 under Greenbacks Report, third line, "occupancy tax" was changed to "occupational tax."

Under Roundtable Reports, Greg Heitzman's report, the 5th paragraph was amended to:

We discovered the chemical building slate roof at the filter plant was damaged during the winter. This will require \$25,000 to \$50,000 to repair the slate roof at the CHFP. Replacement of the slate roof on the chemical building is estimated to cost \$560,000.

ELT Roles and Schedule – Barbara Dickens 9:07)

Barbara distributed a revised schedule for ELT roles through 2006, adding Ed Chestnut to the rotation of Leaders. Barbara proposed changing the meeting time for ELT meetings to Monday afternoons. After some discussion, ELT will review their schedules and discuss this further on Monday, April 25 at 9:00. It is expected ELT will begin holding meetings from 1:30-3:00 on Monday, May 2, with the last meeting of each month devoted to Strategic Planning.

Risk Assessment – Don McKay and Roger LeMaster (9:20)

ELT continued its Risk Assessment work.

Break (10:20)

Risk Assessment – Don McKay and Roger LeMaster (10:30)

Risk Assessment work continued.

Competencies Reviews – John Huber (10:40)

John thanked the group for sending a review of his Competencies to Ron Raque of Right Management for compilation. He reported that he met with Ron last week to discuss the Competencies feedback where reviewer anonymity was carefully maintained. John is in

the process of planning how to use this valuable feedback.

Metro United Way – Karla Teasley (11:00)

Karla distributed a document from 2002 suggesting changes to the Corporate Charitable Donations Policy and designating which core would have the responsibility of the MUW and FFA campaigns and from whose core the MUW Loaned Executive would be selected each subsequent year. ELT discussed the value the MUW Loaned Executive position can bring to both LWC and the chosen employee through networking with high achievers in other organizations and further developing management and leadership skills over the two to three month period they serve. The Vice Presidents will follow up with the BSOs, and the topic will be added to the bin list for discussion again in two to three weeks.

Susan commented that New Hire Packets will now include information on Water for People, Metro United Way, and Fund for the Arts in order to begin showing early on the value the Company places on community support.

Open Time (11:25)

April 25 Strategic Planning Meeting – Ed Chestnut distributed a 2004 Performance Indicator Profile in preparation for the April 25 Strategic Planning meeting. The information was interpolated by Ed from the 2004 APQC QualServe Performance Indicators Water and Wastewater Utilities Survey Benchmarking Summary.

Agenda and Bin List – Barbara Dickens (11:28)

Barbara Dickens said the next ELT meeting will be Strategic Planning. Barbara will add Risk Assessment and Metro United Way Loaned Executive to the bin list.

Adjourned (11:30)

ELT Meeting Minutes April 25, 2005

Attendees: Barbara Dickens (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran

Minutes and Agenda Approved (9:05)

The April 18 minutes were reviewed. Karla Teasley corrected the first paragraph, last sentence, under the Metro United Way topic, to read:

“The Vice Presidents will follow up with the BSOs, and the topic will be added to the bin list for discussion again in two to three weeks.”

The minutes were approved with that change. The agenda was reviewed and approved.

Constituent Goals & Objectives – Ed Chestnut (9:06)

Ed Chestnut reviewed the Constituent Goals & Objectives as they were developed in 1999 for the 2000-2004 Strategic Plan. Greg Heitzman suggested changes to the original goal be footnoted or indicated in green.

Return on Equity - Bob Miller resumed the discussion from March 28, 2005 regarding the return on equity target: (1) GASB compliance reporting no longer reports an amount for stockholders equity; (2) the returns earned by investor-owned utilities have continued to decline; and (3) LWC has phased out the “one percent less than” component of the goal. Bob said that he intends to evaluate alternatives for this measure by profiling:

- What are the alternative measures and benchmark organizations that we might use?
- What are the data sources for these measures (NAWC, PSC, etc.)?
- What time period should be used (5 years, 3 years, 1 year)?

John Huber noted that the profit target based on return on equity had previously been higher than if the target had been based on return on rate base or return on assets; however, due to the significant capital investments made over the past several years, the target based on return on rate base may now likely be at or above the target based on return on equity.

Greg asked if free water and fire protection should be considered. Bob noted that free water and fire protection is provided in lieu of property taxes while the return on equity is provided as a return on the financial investment by the City.

Operations and Maintenance Cost per Customer – Bob noted that the O&M cost per customer had dropped markedly in 2004 as a result of the cost reduction initiatives that

took place last year. He expects that the results for LWC will be significantly lower than the results for investor-owned utilities. (The results from NAWC were recently published and are being analyzed by the Budget and Ratemaking Process.)

Water Sales and Revenue - Bob distributed a graph of historical water consumption data by customer class and by month for the past thirty years. He commented that while conservation devices reduce the average consumption, they do not reduce peak consumption levels since conservation devices are not related to peak uses. The use of conservation fixtures introduces variability into the revenue stream. Greg said we should show the data on a per customer basis. Bob discussed the old "allowable usage" method of billing where the minimum bill included 3,000 gallons usage. John said that any changes to the minimum monthly bill should include consideration of a low income program that is administrable at a reasonable cost.

John further elaborated on return and ratemaking methodologies. He noted that the return could be determined on a utility basis (equity basis or asset basis) or on an agency basis (revenue basis or asset basis). He noted that the criteria for ratemaking was to stabilize rates without burdening the poor while funding the capital program through a combination of cash flow and debt. The ELT also considered alternative depreciation methodologies.

Break (10:15)

Constituent Goals and Objectives (continued) (10:30)

Human Resources Effectiveness Index – Ed Chestnut noted that the HREI had been discontinued and was no longer measured.

Lost Time Injuries – Bob noted that the number and rate of lost time injuries in 2004 represented a significant decrease over time, but that staff was unable to discern the cause of the decrease.

Preventable Vehicular Accidents – Bob said that the number of preventable vehicular accidents had remained relatively constant over the past three years. In order to evaluate the rate of preventable vehicular accidents, Jim Brammell will be verifying the number of miles driven by year during 2000-2004.

Diversity Goals – Ed stated that the data set for Diversity measures during 2000-2004 was incomplete.

Board Strategic Planning – Susan Lehmann (10:45)

Susan Lehmann reported a meeting for Board members to discuss strategic planning will be held in July or August. A portion of each board meeting is now being used to focus on one of the strategies. Susan is collecting topics for discussion from the board members for the special meeting. Rick Johnstone had suggested having the meeting at the Jefferson Memorial Forest Lodge, and consideration is being given to using an outside facilitator.

ELT Meeting Time – Barbara Dickens (10:50)

ELT agreed to begin meeting from 1:30-3:00 on Monday afternoons during May and June, with the 4th Monday being devoted to Strategic Planning. At the end of June, ELT will decide whether to continue with the new meeting schedule. Next week's meeting will include a quarterly goals update by Ed Chestnut, an update from the Metered Water Ratio Team, and an update on the MWBE goal results from Amber Halloran.

Open Time (11:00)

Tank Sites – John Huber requested a status report on the Tyler, Long Run and Goshen Tank sites. Karla reported that a meeting was held with Goshen representatives last Friday, where LWC communicated the current status of the project and took their feedback. Greg said we expect to open bids on the Tyler Tank in 60 – 90 days. The Long Run Tank site is located within 1000 feet of the WHAS tower, and we are looking for a new site. An option has been executed on property having the correct elevation and distance from the WHAS tower. The goal is to have all three tanks operational by the summer of 2007.

Food at Meetings – John Huber brought up the issue of providing food at certain meetings. Karla Teasley will follow up with Marianne Butler on the costs and budget to provide food at Pipeline, ELT Communications Forums and Diversity Brown Bag Luncheon meetings.

Risk Assessment – Barbara Dickens said she had suggested to Don McKay that he get with Greg Heitzman for the risk assessment of plant issues, and then share with ELT later. Greg will schedule a meeting with Don, and will invite ELT members as optional attendees.

Adjourned (11:20)

ELT Meeting Minutes May 2, 2005

Attendees: Barbara Dickens (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bruce Mingus (representing Bill Meeks), Bob Miller, Karla Teasley

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Sharon Dawson, Nora Freeman, Ron Green, Amber Halloran

Minutes and Agenda Approved (1:30)

The April 25 minutes were reviewed and approved. The agenda was reviewed and approved.

Barbara Dickens briefly discussed certain upcoming conflicts with ELT meetings. The May 30 meeting is Memorial Day; the June 6 ELT conflicts with the scheduled Audit Committee meeting; and, on June 13, John Huber, Bob Miller and Greg Heitzman will be attending the AWWA Annual Conference. Karla suggested canceling ELT during the week of May 30 unless there were pressing items, and then scheduling an additional meeting before the conference. Barbara will ask Beverly Soice to see whether the June 6 meeting can be moved earlier in the day, and will ask Beverly to communicate any changes to ELT.

Review Progress and Update Quarterly Goals – Ed Chestnut (1:34)

Ed Chestnut distributed results for 2005 ELT Shared Goals, 2005 Executive Incentive Plan Goals, and Corporate Performance Award Goals for discussion.

ELT Shared Goals – The goals were met or exceeded, except for the Capital Improvement Program goal which is below 65% expended, and the Performance Management Goal which cannot be measured until after trimester reviews have been reported.

2005 Executive Incentive Plan Goals – The light switch goal is on target. Item III, E was not on target. Bob Miller brought up deferred maintenance and depreciation of the five filters at CHFP North which are being retired due to their condition. Greg will check on the status of the retirement of the five filters in CHFP North. Item III, Parts A, B, C and D were on target.

2005 Corporate Performance Award – The goals for CSI Serviced Customer, Distribution Water Quality and Cost Control were exceeded in the first quarter. The Safety goal shows 3 lost time injuries during the quarter with an annual goal of equal to or less than 12 lost time injuries, and there were 5 preventable motor vehicular accidents for the quarter with an annual goal of less than or equal to 30 preventable motor vehicular accidents.

In response to John Huber's question regarding the best performance that can be expected from the Capital Program in 2005, Greg Heitzman responded there is currently no model we can use to project potential future cash flows. Karla Teasley said recent changes to tracking for the capital program will provide additional measures, providing more detail and separating out deferred projects like RBI, adding unbudgeted projects and increases to existing projects. Greg said capital spending in 2005 will remain fairly flat while projects are getting into design. Karla said she will have the capital program team work on a model for predicting capital project cash flows.

Metered Water Ratio Team Update – Nora Freeman, Sharon Dawson (2:00)

Nora Freeman distributed the Metered Water Ratio Team Action Plan, the ELT goal for Metered Water Ratio Improvements, and the LWC 2005 and 2003 Water Audit Analysis for discussion. Sharon Dawson led ELT through the first quarter activity on the Action Plan. Sharon noted the backlog of service orders for malfunctioning meters was reduced by over 50% since January 2005. Back billing work is scheduled to be completed by the second quarter. A field test schedule for larger meters is being developed to ensure all larger meters are tested every 2-3 years. Priority is being placed on testing broken meters and meters not tested in three years. They are averaging field tests of 50 meters a month, which is extremely good. Greg suggested an analysis of meter sizing be done in parallel with the field tests. Nora said she will incorporate that in the process. The reinstatement of the duty exchange program has resulted in the exchange of 4,000 meters to date. Work has not yet begun on identification of proper meter sizing for 3" and larger services. Sharon said they are currently investigating the price of testing plant meters to assure meter output accuracy. Greg said he will follow up with Hydromax to get a quote. Sharon thanked Bob Miller for the support provided by I.T. in the development of reports to assist in tracking meters from delivery to retirement. Sharon briefly discussed the Metered Water Ratio Team Action Plan for 2006.

Bob Miller suggested the team consider a visual presentation at the AWWA KY-TN Section meeting since he believes this work will be of interest to other utilities.

M/WBE Spending Goals – Amber Halloran and Ron Green (2:35)

Ron Green reported the method of gathering and reporting the data has changed this year. Previously the data was obtained from Bids & Awards on bids of \$20,000 and above. The FINS accounting system now allows extraction of M/WBE dollars actually spent. For the 2005 reporting, actual dollars spent are being used in the report of MBE and WBE Spending Outcomes. The first quarter results were disappointing but not unexpected due to M/WBE bidders bidding against suppliers in many cases, contracts being extended, and bundling of contracts. Ron Green and Amber Halloran will return to ELT in about four weeks with recommendations to improve the Good Faith Effort program and M/WBE spending results.

Open Time (2:55)

Billing - Bruce Mingus brought up the issue of separating MSD billing from LWC billing because of MSD rate increases and customer perceptions. Bob Miller suggested adding this topic for discussion next week. Karla suggested getting input from the Customer

Advisory Council and others on separate bills and monthly billing instead of bimonthly billing.

Risk Assessment – Bob Miller and Greg Heitzman met with Don McKay and completed the Risk Assessment. Don McKay will compile the information and bring a summary back to ELT within the next two to three weeks.

Agenda and Bin List for Next Meeting – Barbara Dickens (3:08)

Barbara said the next meeting will include a review of the Board Agenda, the Greenbacks report, and the Metro United Way Loaned Executive.

Adjourned (3:10)

**ELT Meeting Minutes
May 9, 2005**

Attendees: Barbara Dickens (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Minutes and Agenda Approved (1:35)

The May 2 minutes were reviewed and approved. The agenda was reviewed and approved.

Review Board Agenda – John Huber (1:37)

John Huber briefly reviewed the agenda for the May 10 BOWW meeting, and discussed the one-day strategic planning event being planned. He commented the strategic planning meeting may need to be scheduled on a Saturday if schedules can't be coordinated during a weekday.

Greenbacks Report – Amber Halloran, Sue Purdy (1:45)

Amber Halloran and Sue Purdy distributed the Greenbacks Report for April 2005. Revenue was up \$2,527,100 over the same period last year, and was over budget by \$1,021,600. There was some discussion regarding the validity of the consumption data. Greg Heitzman will check to be sure the pumpage numbers are being reported correctly. Greg requested further analysis be done on elevated service area consumption versus general pressure consumption. Karla agreed to drill down on the billing data to see if any of the revenue collected in January including December consumption and communicate with ELT members regarding her findings.

Metro United Way Loaned Executive – Karla Teasley (2:25)

Karla Teasley said the feedback she received from her BSOs regarding a loaned executive for Metro United Way as a development opportunity was it would place a hardship on the Core. Greg Heitzman and Bob Miller said they received the same message from their BSOs. ELT decided to forego sending a loaned executive in 2005, but will consider budgeting and planning for it next year. The topic of Corporate Social Responsibility will be added to the bin list for further discussion.

Impact of MSD Consent Decree – Affordability Issues – Bob Miller (2:55)

Bob Miller distributed and discussed a May 10 letter to the BOWW providing information on affordability issues resulting from planned annual sewer rate increases of 6.5% and 14.5%, and annual water rate increases of 4.0% to 4.5%. The letter discusses affordability issues and programs to address affordability issues. Staff is evaluating alternatives to monthly billing and automated meter reading, and is considering options for equalized or level billing.

Open Time (3:05)

Fund for the Arts Rollout – Greg said the Fund for the Arts rollout would begin with the BSO meeting on May 10, and the overall campaign will be held during the week of May 23.

Agenda and Bin List – Barbara Dickens (3:08)

Barbara Dickens said the next meeting will be on reviewing and finalizing the action plan resulting from the Risk Assessment, through which Don McKay has led ELT. Ed Chestnut has agreed to lead the ELT meeting since Barbara Dickens will be attending a continuing legal education seminar.

Meeting Adjourned (3:10)

**ELT Meeting Minutes
May 16, 2005**

Attendees: Ed Chestnut (Leader), Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Absent: Barbara Dickens

Visitors: Kathie Johnson (Recorder), Don McKay

Minutes and Agenda Approved (1:30)

The May 9 minutes were reviewed. Karla Teasley amended the minutes as follows:

Under the heading Greenbacks Report, the last sentence was amended to read:

“Karla agreed to drill down on the billing data to see if any of the revenue billed in January included revenue that normally would be billed in December, and communicate with ELT members regarding her findings.”

Under the heading Metro United Way Loaned Executive, the first sentence was amended to read:

“Karla Teasley said the feedback she received from her BSOs regarding a loaned executive from management ...”

Under the heading Impact of MSD Consent Decree – Affordability Issues, the last sentence was amended to read:

“Staff will be evaluating monthly billing as part of the automated meter reading evaluation, and may also consider options for equalized or level billing.”

The minutes were approved with the above changes. The agenda was reviewed and approved.

Risk Assessment Summary Review – Don McKay (1:35)

Don McKay presented the Action Plan resulting from several ELT working sessions on the Strategic Plan Risk Assessment for review. Don will provide a summary, without ranking, for management’s Operating Plans development.

Open Time (3:05)

Mike Elston, Jr. Fundraiser - Bill Meeks reported on a fundraiser planned for Mike Elston, Jr. on Saturday, May 21, 2005, 6:00 P.M. at Holy Cross High School, 5144 Dixie Highway. Donations may be made to the Mike Elston Fund. Please contact Betsy Clan, extension 2708, for information.

Oldham County Wastewater – Karla Teasley reported that the Oldham County Sewer District is conducting comprehensive planning meetings. Karla will attend the next meeting at Oldham County Fiscal Court and has documents available from a meeting last week with Oldham County Sewer District staff.

Organizational Comments from Doug Cobb - Mr. Huber reported on Fellow Rotarian Doug Cobb's comments about building a successful, high energy organization. Mr. Cobb regularly visits the Great Places to Work Institute's web site for factors contributing to 1) successful recruitment and retention of employees, 2) developing highly productive employees, 3) facilitating high energy in the organization, and 4) building the foundation pieces of empowerment and trust. He also attends their annual conferences. Appriss Group has attempted to build their workplace around Pride, Energy and Empowerment. Pride relates to what they do and the customers they serve. Energy is what each team member is expected to bring to their team mates. Empowerment is about the relationship between bosses and team members. Good bosses are a necessary factor in promoting pride, energy and empowerment in the work place. "People join companies; people leave managers." He discussed too, the analogy of cultivating a culture as you would a garden where it would be most desirable to plant and nurture rather than just let it grow on its own.

Adjourned (3:20)

ELT Meeting Minutes May 23, 2005

Attendees: Barbara Dickens (Leader), Greg Heitzman, Susan Lehmann, Bob Miller, Bruce Mingus (representing Bill Meeks), Karla Teasley

Absent: John Huber, Bill Meeks

Visitors: Kathie Johnson (Recorder)

Minutes and Agenda Approved (1:34)

The May 16 minutes were reviewed and approved. The agenda was reviewed and approved.

Breakfast Meetings with Employees – Karla Teasley (1:35)

Karla Teasley distributed copies of an email containing a summary from Marianne Butler of how food costs are currently covered for Pipelines, ELT Forums and Diversity Brown Bags. After some discussion, Greg Heitzman suggested a budget be established for 2006 to cover nominal food costs for Pipelines, ELT Forums and Diversity Brown Bags, and ELT agreed. Pipelines would be budgeted by the President's Office, and ELT Forums and Diversity Brown Bags would be budgeted by HROE. Food costs for the remainder of 2005 will continue to be charged to the President's budget for Pipeline Meetings, and HROE will be charged for ELT Forums and Diversity Brown Bags. Greg further suggested that food not be purchased by the Company for routine meetings such as NWTs and SACs, etc, and ELT agreed. The purchase of food for recognition events would be authorized at the BSO level in line with guidelines yet to be developed, and the CBSO will be advised of the action. The food expense would be charged to the Core recognizing the project milestone, etc.

Greg Heitzman will draft guidelines regarding the purchase of food for meetings. He will send the guidelines to ELT members for comment and/or approval regarding food for Pipelines, ELT Forums and Diversity Brown Bags, as well as food at recognition and project milestone events. The guidelines will then be given to the BSOs for review and comment.

Roundtable Updates (2:00)

Karla Teasley – A meeting was held with Shepherdsville's Mayor Sohm two weeks ago. Quarterly Advisory Board Meetings are expected to begin in July 2005. Karla will advise Barbara Dickens as these meetings occur so payment of the stipends can be processed.

The Homebuilders Association Work Group met last week and discussed the SDC. We confirmed an audit will be done again this year (in the next 2-4 weeks). The service sleeve pilot and billing for damaged services was also discussed.

Susan Lehmann – The HRIS project begins today in Training Room B. Empower is on site.

For the upcoming contract negotiations, training in Effective Communications and Mutual Gains Bargaining has begun. Kathy Schroeder will serve as chief spokesperson for the Company, with Carl Blanton and Jim Brammell also at the table. There will be eight union employees in the negotiations, representing Local 1683.

In late April, Susan began participating in the Blue Ribbon Commission on Health Care for the State. Meetings are scheduled in Frankfort Tuesday and Wednesday this week. The state is moving to self-funded insurance.

The Board Strategic Planning Meeting will be held September 27.

The ICS Survey is scheduled for August. The OEI was originally scheduled for the fourth quarter, but will be postponed to the first or second quarter of 2006 because of other priorities in SOE. Consideration is being given to holding these surveys on alternating years, so each survey is done every two years.

Barbara Dickens – Work continues on the development of policies. Most of the HR policies have been completed. The BSOC will be reviewing four policies at tomorrow's meeting.

Bruce Minguo – The fundraiser for Mike Elston was a big success, with over \$21,000 being raised.

Ed Chestnut – The 20 year consumption forecast project being done by Dr. Cerrito is expected to be completed next week. Ed has been working with Greg Heitzman and Dr. Coomes at UofL on residential usage to determine factors affecting revenue. ECIS extracts from 2004 data will be provided to Dr. Coomes for this work, which is expected to take three to four months. Barbara Dickens will prepare a confidentiality agreement for use of the ECIS data.

Last week Ed participated in an AWWA Webcast, moderated by Jack Hoffbuhr, titled "Applying Benchmarking Performance Indicators Data at Your Utility." Ed will forward information to anyone interested in receiving it.

Work continues on completing the dashboard report, which will be made available on the intranet and updated quarterly.

Greg Heitzman - The Fund for the Arts campaign is in progress, with meetings scheduled this week at different locations. Christy Ray, Barbara Mullen, Judy Chodynieski and Ruth Lancaster have shown a lot of energy and creativity in planning the fundraising campaign.

Metro Government has requested LWC pay for materials and engineering for a traffic roundabout at Norton Commons. No commitment has been made by LWC as yet. Bob Miller noted related expenses will be deducted from profit since the project was not budgeted.

The Annual Inspection by Black & Veatch was completed last week, and LWC is in good shape. Steve Greseth of B&V will send a letter with recommendations, which Jim Smith will present to the Audit Committee. This will go to the Board in July or August.

River Road Country Club buildings and parking are the responsibility of LWC. The public will have no access to the club house, but the grounds will be open to the public for a 45 day period during which ideas may be submitted to Metro Government on the long-term use of the property. We will split the \$15,000 cost for Gresham & Smith's professional consultation on potential uses of the property. Gresham & Smith has done work for Metro Parks in the past.

The B. E. Payne plant project is expected to be completed by August 1. Six of the eight filters are now working and producing high quality water.

Bob Miller – Placing the I.T. System Certification on the intranet has proved helpful. Links to minutes of I.T. meetings posted on the intranet are now being emailed to Bob and I.T. staff for review.

Bob distributed copies of the proposed Sarbanes-Oxley Best Practices Implementation Plan for LWC to be considered by the Audit Committee in September.

Bob asked how CBSOs are documenting completion of trimester performance appraisals. ELT members generally noted they have been asking for an email confirmation from their respective BSOs.

Upcoming ELT Meetings – There will be no ELT next week because of the Memorial Day holiday. The June 6 meeting will consist of a presentation by the Conference Board, and the June 13 meeting is canceled since three ELT members will be attending the AWWA Annual Conference. A special meeting will be called if needed.

Adjourned (3:25)

ELT Meeting Minutes June 6, 2005

Attendees: Barbara Dickens (Leader), Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: BSOs attended for the Conference Board Presentation portion of the meeting.

The Conference Board (10:05)

Brian Hallahan from The Conference Board gave a presentation on the benefits of LWC's membership. Mr. Hallahan discussed specific ways membership will benefit LWC by providing research, training and development, benchmarking, and access to leaders in the national and international business world. The Conference Board produces information and publications accessible on-line and in print that are included in our membership fee. LWC can also choose to join a Council within The Conference Board that addresses matters specific to LWC's business. Membership on a Council is an additional cost and attendance at meetings is often required.

Minutes and Agenda Approved (10:40)

Greg noted that in the May 23 meeting minutes reflecting his Roundtable update, Gresham and Smith's name is reversed. Also, Barbara suggested removing "beginning next week" from the first sentence of the paragraph regarding River Road Country Club in Greg's report since we have had responsibility for the building and property since the final Bankruptcy Court's order in January 2005.

Fund for the Arts Campaign 10:45

Greg provided final numbers on the Fund for the Arts employee campaign, which was a huge success. Employee participation increased to 38% compared to 12.31% in 2004, and exceeded the 2005 goal of 23% employee participation. We raised \$20,896, exceeding the 2005 goal of \$13,000. Total monetary employee giving is up from \$8,296 in 2004 and \$13,222 in 2003. Greg expressed appreciation to his team of Christy Ray, Barbara Mullen, Judy Chodynieski and Ruth Lancaster, who put on such a successful campaign. Greg made recommendations for the 2006 campaign. He recommends continuing the activities that were done this year, i.e. arts performances, 15-20 locations meetings, special events like car washes and cook-offs, and raffles for gifts and PTO days. Greg recommends raising the budget to \$2,500 to cover food, gift cards, Fund for the Arts incentive gifts, and performance honorariums. Many ELT members felt having Barbara Sexton-Smith assigned to LWC was a critical component of this year's success and we will likely seek her to be assigned to LWC next year, if that is possible.

Open Time Items (11:10)

Greg Heitzman – We are having a mild taste and odor event due to the lack of rainfall. We have not experienced significant complaints. Greg will monitor and provide ELT updates as needed. We could move to a two-step treatment process, such as was used with the oil spill, but it is labor intensive and costly. Greg will make sure a process is in place to handle any increase in the T&O event next week, when many individuals are out for the AWWA Conference.

John Huber – At a recent Pipeline meeting, many employees stressed the need to be able to interact more regularly with co-workers at other locations through trainings, tours and other opportunities for interaction. Human Resources is looking into how to accomplish this. Susan suggested this is item for consideration by the BSOC.

Future Agendas (11:25)

Barbara reminded the team ELT decided not to hold next week's ELT meeting due to half the members attending the AWWA Conference. On June 20th, ELT will review the board agenda and Greenbacks report and will consider an update of the Good Faith Effort program by Amber Halloran and Ron Green. On June 27th, the meeting will cover Strategic Planning, specifically the topics for the BOWW Special-Called Meeting in September. On June 28th, a special ELT meeting has been scheduled and training regarding Sarbanes-Oxley will be conducted.

Adjourned (11:30)

**ELT Meeting Minutes
June 20, 2005**

Attendees: Ed Chestnut (Leader), Greg Heitzman, John Huber, Carl Blanton (representing Susan Lehmann), Bob Miller, Karla Teasley

Absent: Barbara Dickens, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Jim Brammell, Amber Halloran

Review Minutes and Agenda – Ed Chestnut (1:35)

The June 6 minutes were approved as written. The agenda was reviewed and approved.

Karla Teasley noted a change to be made to the May 23 Minutes, under the report of Ed Chestnut, first line, the word “assumption” should be changed to “consumption.” The change will be made to the minutes and the new version will be saved in the computer but the amended minutes will not be redistributed.

Review Operating Performance – Amber Halloran (1:38)

Amber Halloran distributed the Financial Highlights for May 2005 to ELT for discussion. May results continue over budget in revenue and consumption.

System Certification – Managing Distribution Operations – Jim Brammell (2:08)

The System Certification Audit performed on Managing Distribution Operations was very favorable and contained no specific recommendations. Jim Brammell said the audit process went very smoothly, and commended Carl Blanton and his group for their spirit of partnership and cooperation. Greg Heitzman recommended ELT approve the System Certification of Managing Distribution Operations.

ELT Action: ELT approved the Certification of the Managing Distribution Operations system. Barbara Dickens and Susan Lehmann had previously given their approval of the certification.

Board Agenda – John Huber (2:15)

John Huber reviewed the BOWW agenda. Joe Wise and Marita Willis will not be attending. Mr. Huber expects the meeting to move briskly through the topics. Jim Smith will attend with a graphic of the Gene Snyder Freeway Transmission Main project.

Supplying Information Technology System Certification Report – Bob Miller (2:25)

The Supplying Information Technology System met requirements for certification late last year; however, Bob Miller had requested an audit be performed again in six months to assure ongoing compliance. Bob said the recent audit of the IT system revealed it had exceeded his expectations, and said the team was using the principles to its

advantage for meeting documentation and communications, etc. Bob has heard from John Huber, Susan Lehmann, Ed Chestnut and Greg Heitzman, who voted to approve certification. Responses have not yet been received from Bill Meeks, Barbara Dickens or Karla Teasley.

Open Time Items (2:35)

Greg Heitzman – During the AWWA Conference, LWC was presented with the Partnership for Safe Drinking Water five-year Directors Award.

John Huber – The Environmental Working Group (EWG) will be publishing water testing data online sometime in July. LWC has until June 29 to review and return comments to EWG on the accuracy of the LWC data. Rengao Song is reviewing the data and will respond to EWG.

Bob Miller – While at the AWWA Conference, Bob attended the Chief Financial Officer Conference, put on by CFO Magazine. The topic was business performance management systems. Bob said he was pleased to hear that some of the decisions made by LWC over the past few years are being recommended as best practices.

Agenda and Bin List – Ed Chestnut (2:47)

The next agenda will consist of the Strategic Planning discussion topics for the Board Strategic Planning Meeting.

Adjourned (2:50)

ELT / STRATEGIC PLANNING TEAM
Meeting Minutes
June 27, 2005

Team Members Present: Bill Meeks, Susan Lehman, Bob Miller, Karla Teasley,
Ed Chestnut, John Huber, Vince Guenther

Absent: Greg Heitzman, Barbara Dickens, Jim Smith, Jim Brammell,
Amber Halloran

Leader: Susan Lehman

Recorder: Billy Meeks

Meeting started 10 minutes late.

The team reviewed minutes for June 20th, 2005 and they were approved as written.

The team ensued upon a discussion of four topics:

1. Are we a utility or an agency?
2. Declining sales per customer
3. Rate Requirements/Regulation versus Customer Satisfaction.
4. What is the appropriate return to the city?

First Topic: Are we a utility or an agency?

The team began discussion on advantages and disadvantages..

John commented that we need to make sure the BOWW is fully aware of our position in this community as it relates to this issue. There are advantages to being a corporation. However, there are activities we need to be aware of. Some believe we are an agency and as a part of Metro Government and share responsibilities within Louisville Metro. Freedom to act needs to be protected in both scenarios. Educating the BOWW on the advantages of being a chartered and governed within our current business model is very important to our community and their role in continuing this as is business model.

Second Topic: Declining Sales per Customer

Discussion Ensued. Karla explained that preliminary information may be available on Dr. Ceretto's study. BOWW should and may want to know what declining sales per customer means to them. The team discussed their needs to be a business strategy to deal with this issue. Is this a demographic shift only or true reduction in consumption per household? The team felt the outcome of this discussion was to discuss the Boards reaction to this issue, as it may effect this community and look for direction from the BOWW for business strategies.

Third Topic: Rate Requirements/Regulations Versus Customer Satisfaction

Team discussed briefly and decided to communicate and Educate BOWW on this issue. Brainstorm their strategies on this particular issues focusing on the point of diminishing returns for higher customer satisfaction.

Fourth Topic: What is the appropriate return to the city?

Their needs to be a follow up after studies are published from PFM and Black and Veatch determining what alternative financial measures should be used to measuring LWC's return from business activity. Discussion ensued and decision made to educate the BOWW on the impact to Metro Louisville's return on their investment and option's on how to measure that.

There was also discussion about shifting some resources to funding the reserves this year such as infrastructure replacement reserve and possibly a risk mitigation stabilization reserve and the impact of these reserves to Return On Equity.

There were no open discussion items. However the team wishes Barbara a speedy recover to her medical problem.

Meeting adjourned

**ELT Meeting Minutes
July 5, 2005**

Attendees: Barbara Dickens (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Roger LeMaster

Review Minutes and Agenda – Barbara Dickens (9:34)

The June 27 minutes were reviewed and approved. Today's agenda was reviewed and approved.

Sarbanes-Oxley Training and Implementation – Roger LeMaster and Bob Miller (9:36)

Roger LeMaster distributed three documents consisting of his July 5 memo to the ELT on the Institute of Internal Auditors Training on SOX, Bob Miller's draft implementation plan for Sarbanes-Oxley at LWC, and hardcopy of the PowerPoint presentation that Roger gave to ELT today. Bob Miller commented the Sarbanes-Oxley Act was stated in broad terms, but compliance will require much work and stringent controls. Although LWC is not currently required to comply with Sarbanes-Oxley, the BOWW Audit Committee has directed LWC to comply. ELT was appreciative of the overview and presentation provided by Roger and Bob.

Break (10:15)

Water Sales Growth Forecast – Ed Chestnut, Dr. Patricia Cerrito (10:25)

Dr. Cerrito attended the ELT meeting and answered questions regarding the Water Sales Growth Forecast. The forecast is based on trends from the past 30 years, and projects water sales for the next 20 years. The trends show that future water sales per customer are decreasing, but this is offset by an increased number of customers. Dr. Cerrito recommended that the forecast should be updated annually.

Roundtable Updates (11:00)

Barbara Dickens reported there are 15 corporate policies in draft form at the VP level, 5 policies in the first reading phase, and 6 policies that have gone through the total process and are ready to be posted on the intranet.

Barbara noted an increase in the number of easement acquisition issues, related primarily to the airport project.

The Archive Room has been reworked, and a database is needed to allow for electronic searches. Consideration is being given to acquiring a new records management system to allow users to search for documents. John Huber inquired about the security of old annual reports. Barbara said there are multiple copies, but we could consider moving one set to an offsite location.

Bill Meeks – The June 30 arbitration has been canceled. Bill is preparing for negotiations, which will be held in late September or early October.

Bob Miller – We are developing the next steps for our Enterprise Risk Management program with a primary focus on disaster recovery and business continuity. We will also need to review and revise the strategic risk assessments.

We are also developing the concepts and methods for continuously updating our expense forecast in order to reallocate resources as needed.

Greg Heitzman – Production records were set during two days of 200+ MGD pumpage. Improvements made since 1999 contributed to this success. Greg commented that alternatives are being considered to building storage tanks. We are proceeding with the Goshen tank. We expect to complete the Alternative Treatment Team's work around September.

Ed Chestnut – Work continues with Dr. Coomes of UofL on usage per customer, looking specifically at residential users in 2004 to determine the effect of low flow conservation devices. Greg found two AwwaRF topics that may be helpful. We are looking at emerging trends for low flow fixtures.

Susan Lehmann – HROE is finalizing the job description update project. Results have been reviewed with John Huber, and meetings will be scheduled with the VPs and BSOs review the changes. LWC's diversity celebration is scheduled for October 6 at the Water Tower. The Blue Ribbon commission is completing its work, and Susan will miss the board meeting as a result.

John Huber – The Strategy Innovation Team has identified 174 ideas and is using the matrix to reduce the number. They want to begin looking at home treatment devices right away; Board consensus will be required for them to proceed.

Karla Teasley – The Customer Service Index results are very favorable this quarter in spite of challenges presented by the rate increase, etc. The CPAC is looking at the capital budget for 2006. \$75 million is currently anticipated for 2006 expenditures based on projects already underway and those previously planned for 2006. We will need to limit new projects and prioritize existing projects to get the work completed.

Agenda and Bin List – Barbara Dickens (11:26)

The next agenda will include the Greenbacks Report, and a report on the GE meetings.

Adjourned (11:30)

ELT Meeting Minutes July 11, 2005

Attendees: Barbara Dickens (Leader), Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Nora Freeman (representing Karla Teasley), Amber Halloran (representing Bob Miller)

Absent: Ed Chestnut, Karla Teasley, Bob Miller

Visitors: Kathie Johnson (Recorder), Carl Blanton, Sue Purdy

Review Minutes and Agenda – Barbara Dickens (3:32)

The July 5 minutes were reviewed. Per an email from Karla Teasley, the minutes will be revised under her Roundtable Report to delete the third sentence and substitute: "\$75 million is anticipated for 2006 expenditures based on existing and planned projects for 2006." The minutes were approved with that change. Today's agenda was reviewed and approved.

Board Agenda – John Huber (3:35)

Wendy Welsh will not be attending the board meeting; Susan Lehmann will be at the Blue Ribbon Task Force meeting, with Carl Blanton will fill in for her at the board meeting. The board agenda is very straightforward.

John mentioned he is to make a quarterly certification to the Board that approvals are being granted pursuant to the Purchasing Policy and Capital Projects Authorization Policy and Procedures when awarding contracts by the Bids & Awards Committee and for capital projects spending. For capital projects, we need to tighten controls to assure Change Actions have been approved before the change action work is actually completed.

Strategic Innovation Team Update: General Electric Contacts – Carl Blanton (3:37)

Carl distributed and discussed an LWC Powerpoint presentation on the two meetings held between the Strategic Innovation Team and the General Electric, and a GE Powerpoint presentation suggesting a complementary business relationship using GE's home water treatment devices. The Strategic Innovation Team's goal is to complete their analysis and make a recommendation on the merits of a partnership with GE by the end of this year. Carl said GE sees LWC as a way to gain entry into customers' homes. John Huber said issues to consider include the risk of regrowth, and the public perception about water quality if we promote the use of home water treatment devices.

Greenbacks Report – Amber Halloran, Sue Purdy (4:05)

Amber and Sue distributed and discussed the June 2005 Financial Highlights. Year-to-Date Revenue is \$3,769,200 above last year.

Sue Purdy will prepare an analysis of general consumption growth trends for general versus elevated pressure for the past 3-5 years. Budget will also look at contractual services and materials and supplies for 2005 compared to 2004.

Discussion was held regarding requests for discretionary spending as a result of increased revenue. For the most part, LWC should continue with the savings realized through budget cuts made in early 2004. Greg Heitzman believes parameters should be developed that will allow BSOs to make discretionary spending decisions up to a certain dollar amount when savings are realized through process improvements or budget management; however, any significant savings would become a corporate decision. Amber said Bob Miller would like to see a formal process in the form of revised forecasts and requests for additional spending. Amber suggested a sub team of the BSOC could work the issue.

Agenda and Bin List – Barbara Dickens (4:40)

The next agenda will include an update from the Strategic Innovation Team and a review of progress on the Quarterly Goals.

Ed Chestnut will begin his term as ELT Leader on July 18.

ELT Meeting Minutes July 18, 2005

Attendees: Ed Chestnut (Leader), Greg Heitzman, Susan Lehmann, Bill Meeks, Karla Teasley, Amber Halloran (representing Bob Miller)

Absent: Barbara Dickens, John Huber, Bob Miller

Visitors: Kathie Johnson (Recorder), Jim Brammell

Review Minutes and Agenda – Ed Chestnut (1:35)

The July 11 minutes were reviewed and approved as written. Susan Lehmann asked that an amendment be made to the July 5 minutes under the Roundtable Reports, indicating that Bill Meeks reported the arbitration had been “canceled” instead of “rescheduled.” The change will be made and communicated. The agenda for today’s meeting was reviewed and approved.

Open Time (1:40)

ELT briefly discussed the incident that occurred this morning where a Fairdale fire fighter was injured while testing a fire hydrant.

Strategy Innovation Team Update – Amber Halloran and Jim Brammell (1:45)

Jim Brammell and Amber Halloran distributed and discussed a Power Point presentation, “Strategy Innovation Team Update On Recent Activities.” Using screening criteria, the team has pared down more than 175 revenue generating ideas to 60. The next step will be to prepare a one page fact sheet on each idea. Process improvements identified will be turned over to the BSOC. Jim discussed the next steps to a possible partnership with GE, which will include briefing and receiving direction from the Board, and a customer survey which may take months to complete. A yes/no decision on the partnership is expected by the end of the year. Jim also discussed the project schedule. He expects the Strategy Innovation Team’s work will be completed by the end of March 2006. Karla Teasley recommended the team report to the Board in August or September to provide them background information for their Strategic Planning Retreat in September.

Roundtable Reports (2:15)

Karla Teasley – Regarding the billing problem encountered early in 2005, Karla expects credits can be made in September.

Greg Heitzman – Greg commented it will be a challenge to prioritize capital projects. Karla encouraged Greg to attend the CPAC meetings to help prioritize the projects.

During the recent peak demand, the system was pushed to pump 205 MGD, with no significant problems encountered. Greg plans to test the system for vulnerabilities in production by removing the BE Payne plant from production in order to identify and

address weaknesses. LG&E recently put us on notice they have concerns about the reliability of the power supply to the Payne plant over the next few months until LG&E completes installing additional power lines.

Amber Halloran – Amber said work is being done on the upcoming budget preparation process, and budget packages should be distributed this week. Amber commented on problems experienced with the ICMA company match. The software application responsible for making the match is corrupt. As a result, employees participating in ICMA did not receive their full match for 2004, and have received no match in 2005. The company match will be done manually up to June 2005. The matches will be checked again in November to assure all matches have been made. This problem will be eliminated in 2006 with the new payroll system.

A prebid conference was held last Wednesday on Bank Services, Debit/Credit Card and Lock Box services. There were only three banks that met our criteria for the Lock Box service. Bids will be received this Wednesday, July 20.

Bill Meeks – No update today.

Susan Lehmann – The final meeting of the Blue Ribbon Commission will be held tomorrow. There are over 40 recommendations to be voted on, most of which do not affect LWC.

Agenda and Bin List – Ed Chestnut (2:45)

Next week's meeting will consist of Strategic Planning and discussion of Dr. Cerrito's findings. Greg added IDSE to the bin list, and will send out an email to ELT on the topic.

ELT Meeting Minutes July 25, 2005

Attendees: Ed Chestnut (Leader), Greg Heitzman, Susan Lehmann, Karla Teasley, Bob Miller, John Huber, Barbara Dickens

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Jim Brammell, Amber Halloran, Jim Smith

Review Minutes and Agenda – Ed Chestnut (1:33)

The July 18 minutes were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

Strategic Planning – Overview of Dr. Cerrito's 20-Year Forecasts – Ed Chestnut (1:35)

Ed Chestnut distributed background information and graphs related to Dr. Cerrito's 20-year water usage forecast. Data from the 30-year period January 1974 through December 2004 were used to forecast the next 20 years' usage, then regressors were used in the model, including population census data, number of households, income, employment, and number of businesses. The regressors had little impact on the model, indicating the data were robust. The Palmer Drought Severity Index was also included for usage, but not the number of customers, with little impact on the model. The results indicate a flat trend line for total consumption over the next 20 years since the rate of increase in customers will be offset by the decrease in consumption per customer. John Huber commented he would like to see "commercial" divided into commercial-residential and commercial-business. Karla said there is a group looking at this for the sales tax audit. Greg commented the caption for Figure 3 should be "Forecasts per Customer Account, 2005-2025" instead of "Forecasts of Per Capita Usage, 2005-2025." Greg also commented it would be better to have charts based on historical usage prior to 2005. so valid comparisons could be made.

Jim Smith said issues affecting water usage include loss of industrial sales, the number of people per household, and the influx of low flow and conservation fixtures. Jim commented we should also consider what could happen if a large employer like GE or Ford left town.

John Huber said the factors we should consider include:

- Economic development
- Expanding sales area
- Pay for growth policies
- Decreasing per-customer usage
- Non traditional business

Greg said a continuing concern is rate design and the assumptions that are used in the rate design. Bob Miller believes that the only sustainable rate design over the long term is a pure cost of service basis.

Open Time (2:55)

Susan Lehmann – Susan commented ELT needed to discuss whether to continue supporting tapping teams in competitions. Bill Meeks indicated in an email today that he favors continuing the support, which involves time off from work to attend competitions, and related supplies. The tapping teams practice on their own time. It is estimated to cost LWC approximately \$18,000 a year in missed labor and supplies for eight people to attend the Section and Annual Conferences. Bob Miller recommended that the decision to fund the union travel and training and the decision on which employees will be selected for travel and training should be separated. After some discussion, ELT agreed not to send tapping teams to the AWWA Section meeting in September, and to evaluate alternative training, development, and recognition opportunities that will benefit a larger number of union employees. Greg and Karla will follow up with Bill Meeks to discuss these alternatives

Greg Heitzman – The Fund for the Arts recognized LWC as among the top 30 firms in this year's campaign, and also recognized Greg and Christy Ray for their work on the campaign. LWC received recognition in several categories.

Agenda and Bin List – Ed Chestnut (3:20)

Next week's agenda will include the quarterly update on goals, budget parameters, and a discussion of the annual inspection. Karla Teasley will be absent, and will notify Ed who will be attending in her place.

Adjourned (3:25)

ELT Meeting Minutes August 8, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Jack Wang (representing Greg Heitzman), John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Absent: Greg Heitzman

Visitors: Kathie Johnson (Recorder), Janet Muller, Amber Halloran, Sue Purdy

Review Minutes and Agenda – Ed Chestnut (1:35)

The August 1 minutes were reviewed. Jack Wang amended the last sentence of the first paragraph under Quarterly Goals Update to read: "Greg advised he will get with Jack to determine the basis for measuring Phase IV of the Partnership and that we interpret Goal III E (<0.15 ntu for each filter 95% of the time) consistent with the Phase IV Partnership measure (measured monthly for individual filters)."

Susan Lehmann amended the minutes in the second paragraph under the Quarterly Goals Update: "John Huber asked ELT to send any ideas on shared goals design measurements to him or Susan Lehmann." (Underscoring denotes the change.)

Susan Lehmann also amended the last sentence in Open Time: "Greg, Karla, Carl Blanton and Bill will meet with the Tapping Team..." (Underscoring denotes the change.) The minutes were approved with those changes. The agenda for today's meeting was reviewed and approved.

Diversity Expo Update – Janet Muller (1:40)

Janet Muller discussed plans for the October 6 Diversity Expo to be held from 11:30 – 3:00 at the Water Tower. She requested ELT support the Expo by serving food, and she encouraged participation in the talent show or ethnic fashion show.

Board Agenda – John Huber (1:50)

John Huber said the agenda was straightforward, but long, and requested Officers' reports be brief.

Open Time (1:55)

Operations – Jack Wang reported a pump failed during the high demand Saturday, but the problem was fixed on Sunday. The highest recent demand was Friday, at 188.6 MGD. The Payne Plant automated equipment problem is being resolved. A test was run last Tuesday under the potential scenario of reduced pumpage at Payne because of a power outage. Pumpage at Payne was reduced to 30 MGD, with remaining pumpage supplied by Crescent Hill. The test was very successful, but Jack feels Crescent Hill could sustain pumping 180 MGD in an emergency situation for only about a week.

Mike Elston Funeral - Bill Meeks reported Mike Elston passed away yesterday. Bill will provide details about the arrangements when he receives more information.

Office Space – John Huber reminded ELT to maintain the open office environment established when it moved to the new building by keeping cubicle walls at the lower height. Office space allocation at Third Street needs review since there are several open offices. Work groups should remain together.

White Papers for Board Strategic Planning – Susan Lehmann said white papers for the Board Strategic Planning meeting should be completed and distributed internally in advance of the August 29 ELT meeting. After edits and revisions are made, the white papers can be distributed to the Board in early September.

Talent Resource Planning – Susan Lehmann said the BSOC meeting will be held at 8:30 tomorrow. ELT is asked to attend on the topic of talent resource planning.

Policies and Procedures – John Huber initiated a discussion regarding the status of corporate policies and procedures. He summarized the discussion as follows:

1. We have affirmed procedures are the domain of the BSOs and POs.
2. Cross-system procedures are the domain of the BSOC.
3. Accountability for having appropriate procedures in place rests with the BSO and CBSO and belongs in their job descriptions.
4. Certification audits will review procedures in place and determine whether adequate procedures are in place.
5. Procedures must be in place at, or shortly after, adoption of a policy to assure the policy is appropriately implemented.

ELT agreed on Items 1, 2 and 3 above. Items 4 and 5 will be added to the bin list for discussion again within the next three weeks.

Greenbacks Report – Amber Halloran, Sue Purdy (2:40)

Amber distributed and discussed the financial results for the month of July.

Agenda and Bin List – Ed Chestnut (3:10)

Topics for the next agenda include the Fund for the Arts campaign and 2006 campaign budget, a report on metered water ratio goal for the 2nd quarter, and BSO/PO market pricing. Bob Miller commented he received an exceptional presentation on the process used in pricing the BSO/PO positions, and has a high degree of confidence in the process.

Ed mentioned the Compensation Committee will meet on Monday at 3:00, so the next ELT meeting will begin at 1:00 and end by 2:30 to allow set-up time in the Board Room.

Adjourned (3:20)

ELT Meeting Minutes August 1, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Jim Smith (representing Karla Teasley)

Absent: Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Ron Green

Review Minutes and Agenda – Ed Chestnut (1:35)

The July 25 minutes were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Quarterly Goals Update (1:37)

1. Review Progress and Update Quarterly Goals – Ed Chestnut

Ed distributed information on the 2nd Quarter status of 2005 ELT Shared Goals, 2005 Incentive Plan Goals, and 2005 Corporate Performance Award. All goals appear to be on target with the exception of 2005 Incentive Plan Goal III E. Greg said it could be possible to meet the goal if we measure on an annual basis at a percentage level instead of quarterly. Greg is confident BE Payne will meet its filter turbidity goal going forward. Greg advised he will get with Jack to determine the basis for measuring Phase IV of the Partnership and that we interpret Goal III E (< 0.15 ntu for each filter 95% of the time) consistent with the Phase IV Partnership measure (measured monthly for individual filters).

John Huber asked ELT to send any ideas on shared goals design for 2006 to him or Susan Lehmann.

2. M/WBE Goals – Amber Halloran and Ron Green

Ed Chestnut distributed a graph depicting mid-year M/WBE spending outcomes. The Minority Business Enterprise Goal is not on target for achievement, but the Women's Business Enterprise goal is on target. Ron Green distributed an agenda of M/WBE items he wished to discuss, and he asked ELT to review the material later and provide him any feedback. MBE spending is calculated from actual payments and good faith efforts. There is a gap in the goods and services area because minority suppliers cannot compete with big suppliers. In answer to Ed Chestnut's question, Ron said the goal of 9% is achievable, but not in the short run.

Following some discussion, John said we need to consider how to roll in construction contracts, professional services contracts, goods and services, and maintenance contracts.

Budget Parameters – Amber Halloran (2:25)

Amber distributed a 2006 Preliminary Budget Schedule. The process for the 2006 budget is similar to last year. The deadline for the Capital Budget was July 15. The Operations and Maintenance Budget is due August 19, and budget presentations will be made September 21-22. Amber expects to present the preliminary budget to the Board on October 11. John Huber said the budget should be realistic and straightforward. Amber will provide weekly updates to ELT through email to keep ELT informed of the BSOC's budget progress and proposed funding for all corporate initiatives. Jim Smith said he expects to have a snapshot of the capital budget by the end of this week. Jim will send ELT a capital budget schedule similar to the O&M budget schedule.

Discuss Annual Inspection Report – John Huber (2:55)

John Huber discussed issues raised in the 2005 Annual Inspection Report.

- The \$5 million in work at Zorn is on the Board agenda.
- Plant record drawings and records. Planning for and implementation of a state-of-the-art plant records management tool.
- Snyder transmission main – how much can the cycle time can be compressed.
- Key decision to be made on Crescent Hill filters and filter capacity.
- Electrical system planned maintenance and replacement schedule.
- Knowledge management. Being a learning organization is important to us as retirements occur.
- Succession planning across the organization.
- Need for an improved capital planning tool.

Black & Veatch feels there has been significant improvement since they began inspections for us

Open Time (3:04)

Susan Lehmann – The BSOC meets Tuesday, August 9. ELT should plan to attend at 8:30 to discuss resource talent planning.

Bill Meeks – Because he was absent during the July 25 ELT meeting when a decision was made to discontinue funding the tapping teams, Bill asked for more background information on the decision. Since the tapping teams do not currently have a title to defend, ELT decided to discontinue funding prior to the September 2005 AWWA KY-TN Section meeting competition. Winning at the KY-TN Section meeting would mean subsequently defending their title at other events. Greg suggested meeting with the tapping team to get their input on how to benefit a greater number of union employees with the approximately \$18,000 previously used to fund the tapping teams. Greg also suggested including Carl Blanton in the brainstorming session if his schedule will permit.

Greg, Karla, Carl Blanton and Bill will meet with the Tapping Team to discuss alternatives for training, development, recognition, reward for implementation in 2006.

Agenda and Bin List

Ed Chestnut said the August 8 agenda will include discussion of the board agenda, greenbacks report, and diversity expo update.

Adjourned (3:15)

ELT Meeting Minutes August 15, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Nora Freeman, Sharon Dawson, Brian Burba, Kathy Schroeder, Claudette Doyle

Review Minutes and Agenda – Ed Chestnut (1:05)

The August 8 minutes were approved as submitted. For the record, Amber Halloran sent an email and requested a change to the August 1 minutes concerning MBE spending. The sentence, "Ron said the M/WBE reports are based on what is committed in Bids & Awards and actual spending," will be amended to read, "MBE spending is calculated from actual payments and good faith efforts."

Today's agenda was reviewed and approved.

2Q Metered Water Ratio Goals – Nora Freeman, Sharon Dawson, Brian Burba (1:07)

Nora Freeman distributed the 2005 and 2006 Metered Water Ratio Team Action Plan. The 2005 action plan items contained updates for the second quarter. Another status report will be given to ELT following the 3rd quarter, at which time ELT will be asked to help prioritize items on the 2006 Action Plan list.

Sharon Dawson led the team through the 2nd quarter 2005 action plan updates. Greg suggested a snapshot water audit be performed during a slack period for Shepherdsville, Goshen to determine metered water loss.

Fund for the Arts Update and 2006 Budget – Greg Heitzman (1:34)

Greg Heitzman distributed a summary of the 2005 Fund for the Arts fundraising goals, and activities used to achieve the goals. The budget for the three fundraising events was discussed. Greg suggested combining the three fundraising events (Water for People, Fund for the Arts, and Metro United Way) into one campaign in 2006 to make better use of resources. Susan Lehmann suggested the leaders of the three campaigns meet to discuss an appropriate budget for 2006.

BSO/PO Market Pricing – Kathy Schroeder and Claudette Doyle (1:48)

Kathy Schroeder provided information on results of the market pricing of the BSO/PO positions. John Huber said this was a very rigorous and objective process based on market data. Susan Lehmann said there were very few changes made across the company, which tells us we are on track. Susan commended Kathy Schroeder and Claudette Doyle for their work on this project. The next step will be to meet with the

BSOs. Staff positions will be evaluated beginning later this year and will continue into 2006.

Open Time (2:05)

Future ELT Meetings – Ed Chestnut discussed conflicts with the September 5 and September 12 ELT meetings. Since Labor Day is September 5, ELT agreed to hold the meeting another day that week. There were several attendance conflicts with the September 12 meeting (AWWA KY-TN Section meeting, etc.), and ELT agreed to cancel the September 12 meeting altogether.

Metro United Way Campaign – Karla Teasley said because of labor negotiations, Marianne Butler proposed the campaign be held during the week of September 26-30, with Leadership meetings held the prior week. The budget for this year's campaign is \$4,000.

Sarbanes-Oxley Compliance – Bob Miller commented we're making progress on the analysis for voluntary compliance with Sarbanes-Oxley; however, he is concerned with the costs associated with voluntary compliance for internal controls. Bob said the Board needs to be made aware of the price tag associated with voluntary compliance for internal controls.

36" Wash Water Main Break – John Huber commented the plant personnel did a very good job with the 36" wash water main problem that occurred last week.

Agenda and Bin List – Ed Chestnut (2:28)

Ed will develop and distribute an agenda for the August 22 meeting. Kathy Schroeder and Amber Halloran will attend to discuss HRIS payroll changes. John Huber suggested adding the combined fundraising campaigns as part of the topic on Corporate Social Responsibility, Item No. 2 on the bin list. He also said Item No. 9 on Residential Water Treatment Devices could be deleted since it was being evaluated by the Strategy Innovation Team.

Adjourned (2:30)

ELT Meeting Minutes August 22, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman, Bob Miller, Kathy Schroeder (representing Susan Lehmann), Karla Teasley

Absent: John Huber, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Johnnie Rice, Amber Halloran, Roger LeMaster

Review Minutes and Agenda – Ed Chestnut (1:33)

The August 15 minutes were reviewed and approved as written. Today's agenda was reviewed.

Mentoring Program at LWC – Johnnie Rice (1:35)

Johnnie Rice distributed a flow chart showing the steps that will be used to implement a mentoring program at LWC. She gave a high level walkthrough of the program. The intent is to open mentoring to all employees interested in participating. (Employee must have received a Performance Review rating of "Fully Achieves Expectations" to participate.) Johnnie commented this program will complement the performance partnership process. She also distributed self assessments to ELT and asked that they be completed and returned to her by the end of this week.

Direct Deposit Initiative – Amber Halloran, Kathy Schroeder (2:03)

Amber Halloran and Kathy Schroeder distributed notes on the mandatory direct deposit initiative and discussed the cost savings and benefits to LWC and its employees. This change will affect 135 employees who currently receive a "live" check each payday. 68 of the 135 already have a partial direct deposit, and 72 receive only a "live" check. Benefits include savings to LWC of \$9,000 in paper and printing charges, \$35,000 savings in sorting time, less opportunity for employee identity theft, and elimination of producing manual checks when checks are lost or destroyed. Another benefit is on-line pay stubs that will be made available for access at Kiosks. Amber is working with a bank to provide a checking or deposit account at no charge for any employee who needs one. Under the current system, employees may designate up to three separate deposits, but when the new payroll system is implemented in January, they may designate up to 10 separate deposits. Implementation is planned for October 31.

Sarbanes-Oxley Voluntary Compliance – Bob Miller (2:20)

Bob Miller distributed information on Sarbanes-Oxley Voluntary Compliance Policies. The Board of Water Works has voluntarily enhanced its own governance policies to assure continued public confidence in the financial integrity and operations of LWC. The guiding principles considered in developing the policies were:

- Having a board committed to effective governance that holds management to the highest standards of accountability.
- Transparency of financial conditions and operations.
- Transparency of transactions with interested parties with no improper benefits at the expense of the organization.
- Access to sound counsel unaffected by conflict of interest.

Included in the information provided by Bob was a table showing the section of the Sarbanes-Oxley Act impacting LWC, and the BOWW policy related to that section. Below are some highlights from that table:

Title II - Auditor Independence

- Section 201 - External auditors are prohibited from providing non-audit services.
- Section 202 - Audit Committee must pre-approve all services performed by the independent auditor.
- Section 203 – Lead (or coordinating) audit partner and reviewing audit partner of the public accounting firm must rotate off the audit at least every five years.
- Section 204 – Public accounting firm must report to the audit committee all critical accounting policies and practices discussed with management; alternative treatments of financial information and treatment preferred by accounting firm; other material written communications between accounting firm and management.
- Section 206 – Public accounting firm cannot have employed the CEO, CFO or Controller, or other person in an equivalent position, during one year preceding the audit.
- The audit contract must be rebid at least every five years.

Title III – Corporate Responsibility

- Section 301 – The Audit Committee is directly responsible for the appointment, compensation and oversight of the work of any registered public accounting firm employed by its company, and the firm shall report directly to the audit committee. The Audit Committee Charter provides authority and funding to engage independent counsel or other advisors necessary to carry out its duties.
- Section 303 – Code of Ethics for Senior Financial Officers prohibits same from taking an action to fraudulently influence, coerce, manipulate or mislead an auditor for the purpose of rendering the financial statements materially misleading.
- Section 304 – Executive Incentive Plan requires CEO, CFO and Controller to reimburse the company for incentive compensation received by the individual during the 12-month period following the issuance of financial statements if an accounting restatement is necessary due to misconduct.
- Section 305 – Anyone convicted of securities fraud is prohibited from being an officer of the Company.

Title IV – Enhanced Financial Disclosures

- Section 402 – Personal loans to any director or executive officer by the Company are prohibited.
- Section 403 – Audit Committee will review the Code of Ethics Questionnaire responses from Company officers.
- At least one member of the Audit Committee must be a “financial expert.”

Title VIII – Corporate and Criminal Fraud Accountability

- Documents and records sent or received in connection with the audit must be retained for seven years.

Title IX – White Collar Crime Penalty Enhancements

- Sections 901-906 – Treasurer will include a certification in each month’s financial report provided to the Board of Water Works that the information contained in the report fairly presents, in all material respects, the financial condition and results of the Company.

Title XI – Corporate Fraud Accountability

- Section 1005 – Anyone convicted of securities fraud is prohibited from being an officer of the Company.

Open Time (2:45)

On behalf of Susan Lehmann, Kathy Schroeder reminded ELT that white papers for the Board Strategic Planning meeting are due on Friday, August 26. She asked that the papers be sent to her for distribution to the consultant and to others internally. There was some discussion whether the white papers were to draw conclusions and make recommendations. Kathy Schroeder will email Karen Wunderlin for guidance and will communicate her advice to those presenting white papers.

Agenda and Bin List (2:43)

Ed Chestnut said the next agenda will be devoted to Strategic Planning.

Adjourned (2:45)

ELT Meeting Minutes August 29, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenthner, Amber Halloran, Karen Wunderlin, Jim Smith

Review Minutes and Agenda – Ed Chestnut (1:33)

The August 22 minutes were approved as submitted.

Strategic Planning (1:35)

Ed Chestnut introduced Karen Wunderlin of Wunderlin Company, who briefly described the Board Strategic Planning event on September 27 as a Visioning Retreat instead of a traditional strategic planning meeting. The group should emerge from that meeting with a vision of what the company should look like in the year 2020.

Review of White Papers

An overview of each white paper was briefly presented and discussed, and suggestions for improvement were made. None of the papers will draw conclusions, but will present ideas to stimulate thought and dialogue.

The description of who we are will be included in John Huber's white paper, "Are we an agency or a utility?"

To help prepare the board members, Karen Wunderlin asked Greg Heitzman to send out AwwaRF Futures Group material to the BOWW in advance of the meeting. The Board will also be sent Ed Chestnut's work on trends, and Bob Miller's and Amber Halloran's work on financial models.

Since the LWC Mission Statement applies to all of the white papers, the meeting will begin with the Mission Statement.

Karen Wunderlin said the material and white papers will be sent to the BOWW on September 10. Greg suggested changing the order of the presentations to:

1. Are we an agency or a utility? (John)
2. Rate requirements/regulations vs. customer satisfaction (Greg)
3. Declining sales per customer (Karla)
4. What is the appropriate return to the city (Bob)

The company should have 3-5 ideas resulting from the BOWW Strategic Planning for strategic planning teams to work on. Key staff members would lead the teams, with an ELT member participating on each team.

Jim Brammell said the Strategic Innovation Team may change their completion date so they can get their information to management for the strategic planning process.

Format for Board Strategic Planning Event

There will be a combination of individual and small group work. Individual time will be spent thinking about and writing about what we want our company to be. This is an experiential process. Action steps will be discussed at the end. The Mayor will address the group at the end of the meeting.

Karen will brief the board on the process during the September 20 Board Meeting.

Adjourned (3:00)

ELT Meeting Minutes September 6, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Absent: John Huber

Visitors: Kathie Johnson (Recorder), Carl Blanton, Roger LeMaster

Review Minutes and Agenda – Ed Chestnut (1:33)

The August 29 minutes were reviewed. Karla Teasley amended the minutes to add Karen Wunderlin's name as a visitor, and also revised the last sentence of the final paragraph under "Review of White Papers" to read: "Jim Brammell said the Strategic Innovation Team may change their completion date so they can get their information to management for the strategic planning process." (Underlining denotes change.) The minutes were approved with those changes. Today's agenda was reviewed.

Open Time (1:35)

White Papers – Susan Lehmann asked that white papers and related material for the September 27 Board Strategic Planning session be sent to her, with a copy to Beverly Soice, by Friday, September 9.

Hurricane Katrina Emergency Response – Greg Heitzman represented John Huber in a meeting in the Mayor's office today. He said any LWC resources should be coordinated through Don McKay, who will coordinate further with Doug Hamilton. 500 individuals are expected to arrive today for a brief stay in the East Hall of the Fairgrounds, and then on to other accommodations for weeks (or months). Assignments of Metro employees to the disaster relief effort must be approved at the Cabinet level. Requests by employees on the Metro payroll who want off as individuals to help in disaster relief must take vacation or comp time, and the requests must also be approved at the Cabinet level.

Any requests by LWC employees for time off to assist in the disaster relief should be forwarded to Susan Lehmann.

Last week, Joan Riem and John Huber discussed LWC assistance to hurricane victims, during which John Huber said we could waive service deposits for hurricane victims relocating to Louisville. Greg Heitzman reported there are some supply chain issues. Jack Wang and Rengao Song are looking at critical supplies to meet our needs.

Implementing Corporate Policies and Procedures – Barbara Dickens (1:58)

Barbara Dickens previously distributed documents and flowcharts for the policy development process and procedure approval process for review by ELT members.

Following discussion, consensus was reached to proceed with Barbara's proposal on procedure development.

Performance Partnership Goal – Roger LeMaster (2:35)

Roger LeMaster stated the 2005 Performance Partnership objective was to have each employee of the company receive a performance review during the first trimester. Roger called randomly selected employees and asked whether they had received a timely performance partnership review. His audit revealed the goal was not met for the BSOs and ELT. Carl Blanton sends out a reminder to the BSOs and ELT. Future reminders will also be sent to Process Owners. Susan Lehmann believes timely completion of Performance Partnership Reviews should remain a common goal among ELT and BSOs; however, she believes the goal should not be a shared goal in the future since the failure of some to meet the goal penalizes everyone sharing the goal. ELT discussed the issue of annual goals not being completed until sometime during the first quarter of the year, and suggested goals for 2006 be set by the end of the 4th quarter of 2005.

Susan Lehmann said the Performance Partnership Goal topic will be discussed at the next BSOC meeting.

Meeting Adjourned (3:00)

ELT Meeting Minutes September 19, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman (Recorder), John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Jim Smith, Amber Halloran, Sue Purdy

Review Minutes and Agenda – Ed Chestnut (1:35)

The August 8 minutes were approved as submitted

Today's agenda was reviewed and Open Time will include a brief update on the 2005 Metro United Way Campaign by Karla and an update on Strategic Planning Meeting by Susan. The agenda was approved.

Board Agenda (1:37)

John provided a brief summary of the Board meeting scheduled for September 20th. The agenda is full and John requested the Officer reports be limited to 5 minutes total and John will cover any major communications items from the Officer reports during the lunch meeting. The Committee Reports will be deferred to October. Special Issues will include the Dividend declaration; the Return on Equity target; and recommendations for Phase II of the RBF Tunnel Project at BE Payne plant. Mayor Abramson will attend the Board meeting with Karen Wunderlin at approximately 2:00 pm to discuss the upcoming Strategic Planning session on September 27th. The October Board meeting will be held on October 18th, rather than October 11th.

2006 Capital Budget (1:50)

Jim provided a handout on the 2006 Capital Budget, including a summary by category and the list of proposed projects. Jim also provided a summary of the new CPAC approval process for the 2006 Capital Budget. The 2006 Capital Budget includes projects totaling \$78.2 million, slightly above the \$75 million target. The 2005 carryover into 2006 is estimated between \$5 and \$10 million, down significantly from the peak of \$50 million in 2002, and \$15 million in 2004. Expenditures have been between \$50 and \$60 million the past several years. John requested a follow up meeting with Jim to review the details of the 2006 Capital Budget.

Greenbacks Report (2:05)

Amber and Sue covered the Greenbacks report. Financial highlights include: increased water revenue by \$3.4 million over budget; operating and maintenance expenses under budget by \$485,000; non-operating income up \$450,000 over budget (due to cash investments and higher interest earnings); net income up \$4.9 million over budget. Other highlights include: industrial consumption is down for many of the top 20 customers, while residential, commercial and wholesale consumption is up compared to 2004;

overtime hours YTD are 8.2 %, up from 6.7% in 2004 (due to the number of vacancies and various emergencies); the capital program is 48% expended, or \$38.3 million of a \$79.5 million program. John asked about the impact of capitalized interest on large capital projects. Amber will follow up with Project Managers on explaining how capitalized interest impacts capital projects.

Risk Mitigation & Rate Stabilization Reserve (2:30)

Bob provided a summary of his Board letter on Risk Mitigation/Rate Stabilization Reserves. A Risk Mitigation Reserve would require changes in the Bond covenants and Bondholder approval. Bob has evaluated the ability to apply Financial Accounting Standards (FAS) 71 for Regulatory Accounting for certain LWC expenses that are unplanned or unexpected. FAS 71 may be an alternative to a designated Risk Mitigation Reserve, and allow expenses to be allocated over multiple years. Bob will be presenting his findings to the Board for discussion. Bob also advised that he has received the draft report from PFM on a financial analysis of the Company.

Open Time (2:50)

Metro United Way Campaign – Karla provided a summary of the 2005 Campaign. Campaign week begins September 26th, and includes agency visits, various internal fund raising events, and presentations by Metro United Way agencies. The 2005 Goal is set at \$67,000, similar to 2004 giving levels, due to the impact Katrina may have on giving. ELT and BSO's are encouraged to attend the various agencies and events where possible next week

Strategic Planning – Susan recommends holding ELT meeting time on Sept 26th for strategic planning or use the time to work on ELT bin list. The meeting will allow discussion for input from the Mayor at the September 20th Board meeting and any final preparation needed for the Board strategic session on September 29th. Susan asked that we provide any agenda items to Ed for the September 26th ELT meeting.

Adjourned (3:05)

ELT Meeting Minutes September 26, 2005

Attendees: Ed Chestnut (Leader), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran

Review Minutes and Agenda – Ed Chestnut (1:32)

The September 19 minutes were reviewed. Susan Lehmann had two changes. In the last sentence under the Board Agenda topic, the Board Strategic Planning date of September 29 was corrected to September 27. The last sentence under the Greenbacks Report topic was clarified: "PM's" refers to Project Managers. The minutes were approved with those changes.

Strategic Planning – Susan Lehmann (1:35)

The Strategic Planning Team reviewed the agenda for the Board Strategic Planning session to be held tomorrow at 8:00 a.m. at the Horine Center in the Jefferson Memorial Forest. The objectives for tomorrow are to briefly discuss the materials and white papers already provided and to produce a new vision statement by 2:00 p.m. for review with the Mayor. John Huber said we have to understand what things are driving us in order to change the model of the company. In developing a new vision, we need to keep in mind any synergies that could be achieved with Metro agencies, as well as issues contained in the white papers. Bob Miller distributed a PFM summary, but said it is still a work in progress and will not be on the agenda at the Board Strategic Planning meeting.

Jim Brammell expressed concern that a vision statement focused only on water and related products could limit new products/ventures.

Budget – Amber Halloran (2:23)

Amber said the BSOC will meet tomorrow on the budget. The budget book must be given to the printer next Thursday in order to have it printed in time for the Board meeting. John said the BSOC did an outstanding job putting the budget together.

ELT Agenda (2:25)

John Huber and Susan Lehmann will not be able to attend the October 3 ELT meeting. After some discussion, it was agreed the October 3 agenda will be devoted to a discussion of 2006 Operating Budget issues. Ed Chestnut will prepare the October 3 ELT agenda. Karla Teasley becomes ELT Leader on October 3.

Meeting Adjourned (2:30)

ELT Meeting Minutes October 3, 2005

Attendees: Karla Teasley (Leader), Carl Blanton (representing Susan Lehmann), Ed Chestnut, Greg Heitzman, Bob Miller

Absent: Barbara Dickens, John Huber, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran

Review Minutes and Agenda – Karla Teasley (1:33)

The September 26 minutes were reviewed and approved. The agenda was reviewed and approved.

O&M Budget Update – Amber Halloran (1:35)

Amber Halloran distributed a summary of 2006 Estimated Changes in Sources and Uses of Revenue (with Reserve Deduction) for review and discussion. Amber expects to have the budget report ready for the printer this week. She reported that based on a 4% rate increase, \$550,000 of unbudgeted initiatives can be funded. There was discussion regarding the addition of two full-time positions; clarification is needed from John Huber regarding expectations for a 2006 full-time head count. Amber will finalize the prioritization list, and direction will be sought from John Huber regarding boundary conditions for head count.

Open Time (1:56)

Metro United Way Campaign - Karla Teasley reported the Metro United Way Campaign so far has raised \$55,767 of the \$67,000 goal. There are many pledge cards that still need to be turned in. Pledge cards must be turned in by October 6 to qualify for the incentive drawing on October 10. Karla will send notes of thanks to those who made agency visits.

3Q CSI Results – Karla Teasley distributed and discussed the 3Q 2005 CSI results. Karla said the scores dropped in some areas, but everything was still within control limits. She attributes the drop in Price/Value to higher bills in the third quarter.

Agenda and Bin List – Karla Teasley (2:15)

Greg asked that a topic be added to the bin list for 30-45 minutes concerning EEO Statistics, with Kathy Schroeder and Janet Muller as presenters, sometime in November. Karla Teasley will email the agenda for the next ELT meeting.

Adjourned (2:25)

ELT Meeting Minutes October 17, 2005

Attendees: Karla Teasley (Leader), John Huber, Ed Chestnut, Greg Heitzman, Bob Miller, Kathy Schroeder (representing Susan Lehmann)

Absent: Barbara Dickens, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Review Minutes and Agenda – Karla Teasley (1:35)

The October 3 minutes were reviewed and approved. The agenda was reviewed and approved.

Open Time (1:38)

Bardstown Road Storage Tank – Greg Heitzman said LWC entered into a contract to paint the 5 MG Bardstown Road storage tank, which was removed from service in mid September, then drained for preparation work in early October. Greg said without the tank in service, the Fern Creek elevated service area is being supplied by pumping operations at Smyrna and storage from the English Station standpipe. The Public Information group has been informed in the remote event of a pumping failure, which could cause a boil water advisory to be issued affecting up to 25,000 customers. Emergency power is available in the event of a power loss. There is no reason to think a failure will occur, and Greg decided not to notify customers of the situation; however, staff is preparing a call list of major customers in the area. This vulnerability will exist for the next 60 days. Customer Service will be alerted to identify a pattern of low pressure calls in the area as a possible power/pump failure.

Greenbacks Report – Amber Halloran, Sue Purdy (1:50)

Amber and Sue distributed and discussed the financial results for September. Water revenue through September 2005 is \$9 million above the same period in 2004. Amber will provide further analysis on staffing levels.

Review Board Agenda – John Huber (2:20)

John Huber reviewed the agenda. He commented that several factors, including the sales forecast, the need to fund the infrastructure replacement reserve, sales volatility, weather risk, etc., lead him to believe a 4.5% rate may be more appropriate than the 4% increase recommended in the preliminary budget book. Amber will run a financial model with a 4.5% increase. The Board will receive a current status of the HRIS Phase II implementation. The remainder of the agenda is straightforward.

Long-Term Financial Planning Discussion (2:40)

Bob Miller said the 2006 budget was split into two separate books, one for the 2006 capital and O&M budget and the second for the 2006 -2015 long-range financial plan. The long-range plan was prepared using the new financial model from PFM. Amber led ELT through the key measurements consisting of borrowing, net income, consumption, rate increase, dividend, and debt ratio. Our assumption is to always have 60 days cash. We have \$2,000,000 budgeted for interest expense and \$600,000 in interest income which nets to \$1,400,000 included in 2006 in interest related to borrowings.

AMR was removed from the long-range capital plan as the savings side has not been quantified.

Bob remarked that the biggest risk in the 2006 budget is if we are under budget in sales we will be under budget in net income unless we reduce expenses. We budgeted at the predicted sales level which is the median. There is a 50% chance we will exceed budget and a 50% chance it will be less. Bob would like some sort of contingency to give us options in our 2006 plan if we don't make our budgeted net income. It could potentially be \$2,000,000 either way.

We are reviewing the preliminary budget with the BOWW tomorrow. Bob would like to have another meeting on this before the BOWW takes action in November and Bob will discuss this risk with the BOWW tomorrow as well. Bob would like an in-depth analysis done before the November BOWW meeting. Bob would like to have a full ELT meeting to discuss. Greg said moving the rate increase from 4% to 4.5% would provide about \$500,000. The group also discussed building a reserve from 2005 profits. Additionally, we could defer our borrowing in 2006 and not implement discretionary spending in 2006 until later in the year.

Agenda and Bin List – Karla Teasley (3:15)

Karla reviewed and discussed the bin list items for agenda topics.

Adjourned (3:20)

ELT Meeting Minutes October 24, 2005

Attendees: Barbara Dickens (Acting Leader), Ed Chestnut, Greg Heitzman, Susan Lehmann, Bob Miller, Nora Freeman (representing Karla Teasley)

Absent: John Huber, Bill Meeks, Karla Teasley

Visitors: Kathie Johnson (Recorder), Kate Farrow, Roger LeMaster

Review Minutes and Agenda – Barbara Dickens (1:35)

The October 17 minutes were reviewed and approved. The agenda was reviewed and approved.

Review of Service Installation Costs and Fees – Nora Freeman and Kate Farrow (1:38)

Kate Farrow said new measurements (using the new FINS system) were put in place in 2004 to monitor the cost of performing service installations. YTD data indicates those costs will likely remain at the 2004 levels or rise. She distributed charts depicting insourced and outsourced service installation costs over the past ten years. Greg pointed out that an exact comparison cannot be made of insourced to outsourced work because contractors include all direct and indirect costs in their work, whereas some indirect costs are not included for insourced work. Excluding indirect costs and economies of scale in contractor pricing, Kate said insourced installations this year have saved \$2,016,030. Greg believes if indirect costs were added to LWC's service installation costs, LWC would still realize in excess of \$1 million in savings per year doing the work inhouse. Greg said another benefit of the Middletown crew is having an experienced workforce available to deploy in emergency situations. This is particularly helpful during the winter months when there are more main breaks.

Kate said 2004 costs appeared higher than prior year averages, and after further analysis this year, she expects 2005 costs to remain similar to 2004. Some discussions have begun regarding the possibility of increasing the service installation fees to get back them back into alignment with actual costs, or try to make the use of service sleeves mandatory in an effort to bring costs back down without having to raise service fees. No change in the service installation fee is recommended for 2006, but groundwork is being laid regarding the possibility in 2007. The data presented to ELT today is also being shared with the Homebuilders Association subgroup, in an effort to get their input on the rising costs and the possibility of raising the fees in the future.

Company Policy Statement for Ethics Survey "Off Years" – Roger LeMaster and Susan Lehmann (2:14)

Roger LeMaster said at its June 6 meeting, the Audit Committee reviewed the Code of Ethics and expressed the most concern with the sections on harassment and discrimination. Roger distributed for discussion with ELT a proposed certification letter to employees soliciting disclosure of acts of harassment or discrimination. Following

discussion of the letter, suggestions were made to add bullet points defining acts considered to be unlawful discrimination. The sections on harassment and sexual harassment already include defining bullet points. Roger LeMaster will rework the section and will make distribution to ELT of the final product before distributing it to employees.

Roger also discussed the Audit Committee's interest in disclosure by officers of gifts/gratuities having a value of \$50 or more. Bob Miller commented this issue may also be tied to procurement authority levels. Roger and Bob will work through which employees should sign the off-year certification and communicate with ELT for further feedback on issues.

Quarterly Goals Review – Ed Chestnut (2:34)

Ed Chestnut distributed ELT Shared Goals, Executive Incentive Plan Goals, and a Corporate Performance Award chart updated for the 3rd quarter.

ELT Shared Goals – Item A (Implement revised 2005 Capital Improvement Program) is currently at a level 2, but on target for a 3. Item B (Increase 2005 Revenue through increased water sales) is at level 4. Ed said John Huber will approach the BOWW regarding the achievement level for Item C (RBF Phase III, ATT) since the July meeting was deferred to August 16 to allow integration of BEP and RBF value engineering. Item D (Metered Water Ratio Improvements) is level 3, and Item E (Performance Management) is level 1.

Executive Incentive Plan Goals – The Light Switch goal is currently being met (3Q YTD operating income exceeded the budget by 23.7%). All other goals were on target with the exception of III-E (Achieve individual filter turbidity) where one filter at CHFP did not meet the filter turbidity goal in January.

Corporate Performance Award – All goals were met.

Report on Waterworks Management Workshop – Bob Miller (2:47)

Bob Miller attended the Waterworks Management Workshop in Chicago last week. He said unionized professional employees of EPA are taking a strong stance asking AWWA to revisit the fluoridation of drinking water. He also said utilities seem to be admitting capital programs are going well, but they are struggling with O&M costs. Bob said LWC seems to be the only utility considering any level of implementation of Sarbanes-Oxley. He said few utilities restrict season turnoffs. AC pipe is being abandoned in place. Training programs are seen as important, but nothing much is being done. Bob said it was interesting that Portland, OR provided the most help in Hurricane Katrina disaster recovery. Evidently this was because their crews were self-contained and had their own communications set up.

Bin List and Agenda – Barbara Dickens (2:55)

The next meeting will be devoted to Strategic Planning. Dates for pending bin list topics were amended to show November as the date scheduled. Karla Teasley will send out the minutes and agenda for the next meeting.

Adjourned (2:57)

**ELT/Strategic Planning Meeting Minutes
October 31, 2005**

Attendees: Susan Lehmann (Leader for Strategic Planning) Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller

Absent: Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran, Jim Smith

Strategy Innovation Update – Jim Brammell and Amber Halloran

Jim Brammell said the Strategic Innovation work was a five step process: Staging, Aligning, Exploring, Creating, and Mapping. They are now at the Exploring phase, the phase that will require the greatest effort, and expected to be the most difficult from a work perspective because of balancing priorities, resources, budget, and time demands. This phase may involve talking to customers, forming focus groups, consulting with key constituencies, etc. The three opportunities being explored are:

1. Bottled water
2. GE partnership on home water treatment devices
3. Full service plumbing

Amber Halloran said the team met with the author of the book on Strategy Innovation. GE is interested in doing a survey as it relates to point of use devices. A high level survey should be developed by early January 2006. GE is also willing to allow us to test any of their point-of-use devices. Jim Brammell and Rengao Song will obtain feedback on this work from the Customer Advisory Council meeting tomorrow.

Board Strategic Planning Retreat Follow Up – Karen Wunderlin

Karen Wunderlin said the Board has an expectation LWC will bring a vision statement to the November board meeting. The ELT formed into groups of 3 to 4 people to discuss the pros and cons of LWC's strategic planning process. The groups reported:

What is good about the process?	What do we want to do improve?
<p>ELT pushing budget development to the BSOs and focusing more on strategic issues. LWC uses a disciplined process for Strategic Plan Development. Risk assessments were performed at the Strategic level. Much of the previous plans were accomplished. The Strategic Planning Team has been good at communicating up regarding performance. The company has been effective at branding and image management.</p>	<p>Focus on strategic vision instead of tactics. Five-year plan doesn't translate well to yearly planning. Look for more opportunity for inspiration. Add tracking/monitoring mechanism. Prioritization and resources. Clear expectations for what should be accomplished. Link SP and Facilities Planning more closely. Communicate better to stakeholders and employees. Link strategy to constituent goals and objectives.</p>

Bob Miller reviewed the draft vision statements he prepared. Suggestions for improvement were made. Bob will re-work the vision statement and email it to the team.

Karen said each ELT member and a board member should participate on one of the following teams, to be formed and led by:

Greg – Expansion of Service Area (to add more customers)

Karla – Vertical and Horizontal Integration (to expand the services we provide)

Ed – Synergy for Efficiency (to control our costs and rates)

Bob – Economic Development (to add more customers and jobs)

Susan will send out an email asking on which team individuals want to be placed. Bob Miller will rework and forward the Vision piece. John said we should map out what it will take to do the Strategic Planning by next May.

Adjourned at 3:00 p.m.

ELT Meeting Minutes November 7, 2005

Attendees: Karla Teasley (Leader), Ed Chestnut, Greg Heitzman, Susan Lehmann, Tony Gregory (representing Bob Miller)

Absent: Barbara Dickens, John Huber, Bill Meeks, Bob Miller

Visitors: Kathie Johnson (Recorder), Nora Freeman, Sharon Dawson

Review Minutes and Agenda – Karla Teasley (1:35)

The October 31 minutes were reviewed and approved. The October 24 minutes were previously approved via email. The agenda was reviewed and approved.

3rd Quarter 2005 Metered Water Ratio Goals Status – Nora Freeman, Sharon Dawson

Sharon Dawson discussed her recent attendance at an IWA (International Water Association) Leakage Conference in Halifax, Nova Scotia. This is an international conference held every two years. Pressure management is recognized as having a great deal of impact on leaks in the distribution system, and managing pressure without adverse impact on the customer is important in reducing leaks. Another topic discussed was the use of District Metered Areas where acoustic surveys are done on the distribution system to detect leaks. Surveys are done about every two years.

Sharon distributed the Metered Water Team Action Plan results for the 3rd Quarter. She indicated the team was a little behind on drafting procedures for back billing customers, primarily due to resource issues. Field testing of large meters is ahead of schedule by about two months. (Additional resources have been budgeted for 2006, pending Board approval.) The duty exchange program is going well, with completion expected earlier than anticipated. A part time resource to improve the temporary service meter process was not funded for 2006, and the team is looking at making other process improvements. Through the third quarter, 64 fire service accounts were investigated, and over half have significantly reduced consumption on their fire service accounts.

Roundtable Discussion (2:20)

2006 Management and Corporate Goals – Ed said a discussion needs to be held before year end to set 2006 ELT Shared Goals, Executive Incentive Goals and Corporate Performance Award Goals. This should be added as a future agenda topic on the ELT bin list.

Measures and Statistical Process Control Class - Ed distributed an announcement of a new class to be conducted by Ed and Bonnie Gimbel. He said there was good interest in the class.

Dr. Paul Coomes Visit to LWC – On November 30 at noon, Dr. Paul Coomes will present his research findings to the leadership of ELT, MSD and possibly LG&E on his detail specific study regarding the decrease in total sales for residential customers. Dr. Cerrito will also be invited to attend. A box lunch will be provided.

ICS Survey Results – Susan Lehmann said she is working to get the ICS Survey Results added to the bin list for discussion by ELT. She will share corporate results with ELT beforehand. Carl Blanton will prepare a summary of the data.

U of L Executive Education - 2006 "Lead Through Continuous Change" Program - Susan sent an email last week to eligible employees about the "Lead Through Continuous Change" class that will begin in January 2006, requesting interested individuals to contact her. John Huber will select two employees to attend.

Talent Resource Planning – Susan said this work is almost complete. A TRP Roundtable meeting is scheduled for December 15.

Strategic Planning – Four sub-teams have been formed. Susan will be asking the Board members on which teams they have an interest to serve. She would like the teams to get started before year end and finish their work in the March-April timeframe. Karen Wunderlin will participate in team kick-off meetings. Consideration is being given to a smaller, fifth team to validate Mission and Values.

2006 Combined Fund for the Arts, Metro United Way and Water for People Giving Campaigns – Logistical considerations for a combined giving campaign need discussion. Kathie has been asked to schedule a meeting with Bob Miller, John Huber and Susan Lehmann to discuss the 2006 combined campaign.

Corporate Policy Process – Via a voice mail message played by Susan Lehmann for the ELT, Barbara Dickens gave an update on corporate policies. Thus far, 64 policies have been identified, 14 have been through the process, 4 are in the process, and 22 are in draft form. Barbara requested Greg and Karla get four more policies through the process before year end. She will need to receive them by November 17 for that to occur.

Barbara reported she completed the New York Marathon in her second best time of 4.34!

2005-2006 Winter Emergency Plan – Greg Heitzman said the winter emergency plan and contingency plan are being developed and should be completed by December 15.

2nd & Broadway 30" Main Break – Greg reported the project has been delayed because other utilities must coordinate and complete their repair work as well. We expect the road to be opened in the next two days. LWC's repair cost is estimated at between \$15,000 to \$20,000.

Bardstown Road Tank – The tank was removed from service October 1 and is now being painted. There is a contingency plan in the event of a main break, etc. The project is on a fast track to be completed before bad weather.

B.E. Payne – There is a valve leak in a 60" main at B.E. Payne. The repair can't be done this year and is being deferred until spring. An interior inspection will be performed while the main is down.

Crescent Hill – An 84" valve for the supply line from the clear well to the pump station is not operating properly. Repair will be a delicate operation since there is a risk of the

valve being damaged in the closed position if not handled correctly. Work will begin in the next four weeks.

RBI Project – We are doing core drilling for gas. Results are expected in December.

ATT Project – We will seek board approval to pursue the ATT project in parallel with the RBI project. Bob and Amber are looking at the most appropriate accounting method.

FINS – Tony Gregory reported on the attempted cutover to the upgrade this past weekend. They encountered problems with timecards, and brought up the old systems again. The team will regroup later today.

ECIS Upgrade – Karla discussed ECIS upgrade options. Alliance has a new customer information product in development with significant advantages, but it will not be available until 2008. The question is whether to move to the next ECIS upgrade and potentially go to the NextGen product in the future, or wait for the NextGen product with no interim upgrade. Further investigation of the next generation product will be needed. Karla said they are leaning toward deferring an upgrade to wait for availability of the next generation product.

Capital Program Goal – The goal for capital spending is expected to meet the “Fully Achieves” level for the program based on year-to-date results.

Bluegrass Commission – A positive meeting was held with the group about a month ago. They are expected to submit a written request to LWC to update our written proposal from August of 2003 to supply water to the Commission.

NAWC Meeting - Karla attended the NAWC meeting and National Drinking Water Symposium last week. Discussions were held with staff from American Water about condemnation issues in Lexington as well as water supply opportunities.

Update on Billing Error Handling – For the billing error on monthly bills where the read schedule was set outside the read window in ECIS, LWC must quantify this error back to 2000. A formula approach will likely be used, and a daily proration is expected to be implemented where service charges are calculated on a daily basis.

Agenda and Bin List – Karla Teasley (3:25)

Karla will prepare and distribute an agenda for the next meeting.

Adjourned (3:26)

ELT Meeting Minutes November 14, 2005

Attendees: Karla Teasley (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Review Minutes and Agenda – Karla Teasley (1:35)

The November 7 minutes were reviewed and approved. The agenda was reviewed and approved.

Review Board Agenda – John Huber (1:38)

WDRB will attend the BOWW meeting, primarily to hear about the 2006 budget and the rate increase. Those items will be covered in the first part of the meeting.

Greenbacks Report – Amber Halloran, Sue Purdy (1:50)

Amber Halloran and Sue Purdy distributed and discussed the financial results for October 2005. Revenue continues to be favorable.

Open Time (2:25)

Mentoring Program – Susan Lehmann encouraged ELT members to become mentors. So far, two ELT members have committed to become mentors.

TRP Forms – Susan requested Greg and Karla to send her updated TRP forms.

2006 Goals – Ed Chestnut requested the topic of 2006 ELT Shared Goals, Incentive Plan Goals, and Corporate Goals be placed on the bin list for discussion. Karla will place this on the bin list for at least two meetings in December.

Any thoughts on the goals structure should be given to Ed Chestnut.

Agenda (2:44)

Susan Lehmann will put together an agenda for the Strategic Planning Meeting to be held on November 21, and Karla will develop an agenda for the November 28 ELT meeting.

Adjourned (2:45)

ELT/Strategic Planning Meeting Minutes November 21, 2005

Attendees: Karla Teasley (ELT Leader), Susan Lehmann (Leader for Strategic Planning) Ed Chestnut, Barbara Dickens, Greg Heitzman, Bob Miller

Absent: John Huber, Bill Meeks

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran, Jim Smith

Review Minutes and Agenda – Karla Teasley (1:33)

The minutes from the November 14 ELT meeting were approved as submitted. The agenda was reviewed and approved.

Strategic Planning

Susan Lehmann said the BOWW, at its meeting last week, approved the vision statement drafted by Bob Miller. Basically, the vision is to grow the company. The next step is to initiate sub teams to work on strategies in support of the vision.

Synergy as a Means to Drive Efficiency – Ed Chestnut is the team leader. He has identified John Huber and Don McKay as team members, with Joe Wise and Rick Johnstone serving as Board liaisons. Resources include Lynn Humphrey, Kim Reed, Jim Asseff, Vince Guenther, David Collier and Barbara Dickens. So far, Ed has identified the State of Virginia as a model to include for synergy and continues to research the topic. Karla Teasley suggested AWWA and NAWC could provide good examples of synergy in the water industry, and Jim Brammell suggested he look at the City of Indianapolis as a possible model.

Horizontal and Vertical Integration as a Means for Growth and Innovation – Karla Teasley is the team leader. Karla said team members are Jim Brammell, Vince Guenther, Amber Halloran, Barbara Dickens (resource), and Jim Smith. Jerry Martin will serve as Board liaison. At some point a marketing resource may be needed.

Economic Development – Bob Miller is the team leader. Patti Kaelin and Jim Asseff are team members, and Marita Willis and Margaret Harris are Board liaisons. Vince suggested consideration be given to redevelopment and brown field areas.

Regional Expansion – Greg Heitzman is the team leader. Jim Smith, Ralph McCord, Nora Freeman, and Kay Ball are being considered for team membership, and Patti Kaelin, Vince Guenther and Barbara Dickens will serve as resources. Wendy Welsh and Jerry Martin will be Board liaisons. Greg will meet with Jim Smith to discuss the final team makeup.

Susan Lehmann distributed a timeline for team activities and deliverables. Karen Wunderlin will attend each team kickoff meeting, which is expected to last about an hour.

A fifth team made up of John Huber, Barbara Dickens, Greg Heitzman, Ed Chestnut, Susan Lehmann and Stewart Conner will review and update LWC's mission and values. Focus groups will be held by SOESOE in January/February to obtain input from employees on the mission and values. Future Strategic Planning meetings will include progress updates from each team leader.

Agenda and Bin List – Karla Teasley (2:18)

Karla Teasley said the next ELT meeting will include the ICS topic. She will review the bin list for additional topics.

Adjourned (2:20)

ELT Meeting Minutes November 28, 2005

Attendees: Karla Teasley (ELT Leader), Susan Lehmann, Ed Chestnut, Barbara Dickens, Greg Heitzman, Bob Miller

Visitors: Kathie Johnson (Recorder), Neil Smith and Jason Welsh of Deyta

Review Minutes and Agenda – Karla Teasley (1:33)

The minutes from the November 21 ELT meeting were reviewed. Ed Chestnut amended the fourth sentence in the second paragraph under Strategic Planning as follows: "So far, Ed has identified the State of Virginia as a model **to include** for synergy and continues to research the topic." (Emphasis added to denote change.) The minutes were approved with that change. The agenda was reviewed and approved.

ICS Results – Neil Smith and Jason Welsh of Deyta (1:35)

Neil Smith and Jason Welsh presented a summary of the recent survey results, which showed improvements in most areas. The survey was improved this year by limiting the number of surveyors of a supplier, assuring the right employees were selected to evaluate a supplier, and requesting written comments for low scores. Following the presentation, discussion was held regarding the frequency of future ICS surveys. Deyta said it will look to LWC for guidance on how quickly the data can be evaluated, strategized and improvements implemented – sometimes it takes more than a year to implement the changes. Requests for additional information on the survey results should be directed to Helena Dahman. Deyta will provide information on the table used to arrive at scores.

Office Closing Procedure – Karla Teasley (2:30)

The recent severe weather that caused LWC to dismiss employees early (4:20) resulted in situations where no one was answering telephones or performing other needed services. Discussion was held regarding the identification of essential versus nonessential personnel. Greg said he believed Jack Wang's and Jim Brammell's employees know their designation. Also, other employees identified in the winter emergency response plan should know their designation. Other employees may not know whether they are considered essential or nonessential. A coordinated process needs to be followed when an emergency event occurs to assure ongoing business needs are met. Bob will follow up with Don McKay and the BSOs on how to address situations other than winter emergencies that call for early dismissal of nonessential employees.

State Pension Plan (CERS) – Bob Miller (2:40)

Bob Miller discussed increases in the State Pension Plan contribution rates. The non hazardous rate has increased to 13.19%, while LWC budgeted for 12.50%. The hazardous rate increased to 28.2%. Bob will send out more information as it becomes available.

Approval of Corporate Policies – Barbara Dickens (2:45)

Barbara reported there were 6 policies being given a second reading tomorrow at the BSOC meeting.

Presentation by Dr. Coomes on Declining Residential Water Sales – Ed Chestnut (2:50)

Ed Chestnut reminded the group of Dr. Coomes' presentation on declining residential water sales at 12:00 p.m. Wednesday, November 30, in Training Room A. Box lunches will be provided to attendees.

Agenda and Bin List – Karla Teasley (3:00)

Karla said the next agenda will include time to discuss ELT Shared Goals and the Corporate Goals for 2006 as well as Jack Wang's presentation on the Initial Distribution System Evaluation. She requested any items for the agenda be forwarded to her.

Adjourned 3:05

**ELT Meeting Minutes
December 5, 2005**

Attendees: Karla Teasley (ELT Leader), Ed Chestnut, Barbara Dickens, John Huber, Greg Heitzman, Susan Lehmann, Tony Gregory (representing Bob Miller)

Absent: Bill Meeks, Bob Miller

Visitors: Kathie Johnson (Recorder), Jack Wang

Review Minutes and Agenda – Karla Teasley (1:35)

The minutes from the November 28 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

IDSE – Pending Regulations Affecting the Distribution System – Jack Wang (1:37)

Jack Wang distributed a summary of key near term actions by LWC to meet anticipated deadlines by the EPA regarding the Long-Term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR). He also identified tasks LWC will need to complete to meet the anticipated deadlines for the Stage 2 Disinfectants and Disinfection Byproducts Rule (Stage 2 DBPR) requirements. LWC will likely be placed in the Bin 2 category which will require additional treatment for Cryptosporidium. Jack said LWC is one of the labs certified by the EPA to conduct LT2 monitoring tests. Certification of another individual to conduct the LT2 monitoring tests is desirable. John Huber commented LWC will need to be ready to communicate to the public regarding the purported risk for spontaneous abortions from disinfectants and disinfection byproducts in the water. Greg requested Jack talk with the Health Department this week. Jack said there is a need to expand the Lab within the next three years since more work will be done there.

2006 ELT Goals – Ed Chestnut (2:05)

ELT discussed proposed changes to the 2006 Incentive Plan Goals. Following discussion Jack Wang agreed to send an email to Ed Chestnut on the proposed changes to Item III, E. Discussion of goals will continue at a future ELT meeting.

ELT Went into Closed Session (2:30)

Agenda and Bin List – Karla Teasley (2:55)

The December 12 ELT meeting will cover the board agenda and financial highlights. Susan Lehmann said Strategic Planning will not be held in December because of the holidays.

ELT Meeting Minutes December 12, 2005

Attendees: Karla Teasley (ELT Leader), Ed Chestnut, Barbara Dickens, John Huber, Greg Heitzman, Susan Lehmann, Bob Miller

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy, Nora Freeman, Johnnie Rice

Review Minutes and Agenda – Karla Teasley (1:35)

The minutes from the December 5 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Review Board Agenda – John Huber (1:37)

Mr. Huber reviewed the board agenda. Special issues to be covered include accounting treatment of preliminary engineering for ATT, the 2006 Water Rate Schedule and New Service Fees, recommendation to increase the Infrastructure Replacement Reserve Deposit, and declaration of the fourth quarter dividend. Ray Hoyt will make a presentation to the board regarding a request for LWC's support of the Senior Olympics to be held in 2007. Two LWC corporate policies will be given a first reading. The increase in CERS contribution rate will also be discussed.

Review Operating Performance – Amber Halloran, Sue Purdy (1:55)

Amber Halloran and Sue Purdy distributed and discussed the 2005 Rate Study FY 2006 that will be presented to the Board tomorrow. They also distributed the November Financial Highlights for review and discussion. Consumption year-to-date was 2.4 million gallons higher than budget, and revenue was \$10.8 million higher than last year and \$4.8 million higher than budget.

Performance Partnership Trimester Questionnaire Results – Johnnie Rice (2:33)

Johnnie Rice distributed and discussed the questionnaire results. The return rate was 72%, and the responses were very good overall. SOE is available to answer any questions regarding the results.

Metering Services System Certification – Nora Freeman (2:45)

Nora Freeman commended the SOE audit team for doing a very comprehensive and collaborative audit. The certification audit report was very favorable. Nora discussed the best practices identified during the audit as well as one audit recommendation. Karla Teasley recommended Certification of the Metering Services Business System, and ELT concurred.

Open Time (2:52)

AMR Team Recognition – Karla Teasley recommended \$50 clothing vouchers for each AMR team member, and ELT concurred.

Metro United Way Team Recognition – Karla Teasley recommended \$50 clothing vouchers for MUW team members, and ELT concurred.

MSD – John Huber reminded the group that MSD is LWC's biggest customer and should be treated with a high level of integrity.

Monthly Billing – John Huber said LWC needs to do a thorough evaluation whether monthly billing should be implemented at LWC. He requested this topic be added to the bin list for future discussion.

Agenda and Bin List – Karla Teasley (3:05)

Karla will send out an agenda for December 19, which will be the last ELT meeting in 2005. The agenda will include topics of EEO Statistics and ELT Goals Update. Greg Heitzman becomes ELT leader in January.

Adjourned (3:06)

**ELT Meeting Minutes
December 19, 2005**

Attendees: Karla Teasley (ELT Leader), Ed Chestnut, Barbara Dickens, John Huber, Greg Heitzman, Susan Lehmann, Bill Meeks, Tony Gregory (representing Bob Miller)

Absent: Bob Miller

Visitors: Kathie Johnson (Recorder), Kathy Schroeder, Janet Muller, Claudette Doyle

Review Minutes and Agenda – Karla Teasley (1:35)

The minutes from the December 12 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

EEO/AA Statistics Review – Kathy Schroeder, Janet Muller and Claudette Doyle (1:37)

Kathy Schroeder distributed LWC EEO/AA statistical information for review and discussion. She identified job groups where minorities and females were underutilized. Janet Muller discussed expanded recruitment efforts and the available resources for recruitment. John Huber commented LWC would benefit from employing more bilingual employees. Boundary conditions for recruitment and hiring will be added to the bin list for discussion in January.

Kathy Schroeder commented the Phase I HRMS system implementation yesterday went surprisingly well. HR met with 250 employees in December to introduce the self-service aspects of the new payroll system. The changes were well received overall.

2006 ELT Goals Update – Ed Chestnut (2:25)

Ed Chestnut led the group through the draft ELT Shared Goals Worksheet and the proposed measures for 2006. Objective B will be changed to a goal to grow revenue. Mr. Huber mentioned one of our goals in 2006 will be to lay the groundwork for increasing revenue. He also mentioned one of his goals will be to have an evaluation completed on the feasibility of monthly billing.

ELT briefly discussed which goals need to be moved from ELT to the BSO level. Additional discussion will be held when the goals topic is covered again in January, but it is anticipated the performance management will become a BSO goal.

Greg Heitzman summarized the draft goal development work and responsible parties:

- A. Capital Goal – Karla and Greg
- B. Increase Revenue – Karla and Greg
- C. ATT – Greg Heitzman.
- D. Metered Water Ratio - Karla Teasley
- E. Succession Planning – Susan Lehmann

The goals discussion will continue in January 2006.

Meeting Adjourned (3:35)

ELT Meeting Minutes
January 9, 2006

Attendees: Greg Heitzman (ELT Leader), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Ed Chestnut, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran

Review Minutes and Agenda – Greg Heitzman (1:42)

The minutes from the December 19 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Review Board Agenda – John Huber (1:44)

John Huber briefly reviewed the BOWW agenda. Greg Heitzman noted he will not be present at the Board meeting but will be represented by Jim Brammell.

Revenue Update and Year End Process – Amber Halloran (1:50)

Amber distributed the Revenue Expense Schedule with Budget Comparisons for review and discussion. She also distributed a brief statement on the status of key activities related to closing 2005 accounting. Accrual forms for 2005 expenses are still being accepted. Draft 2005 financial reports will be distributed on January 23, 2006. The external auditors will arrive January 30 to begin looking at internal controls and begin preliminary work on the audit. The 2005 audit should be completed, including final reports, by February 28.

2006 Goals Development – Greg Heitzman (2:00)

ELT discussed 2006 goals development. Greg Heitzman summarized the discussion as follows:

Goal A – Capital program remains as written, and we will validate 2006 targets once 2005 expenses and carryover is finalized.

Goal B - Revenue will have three alternatives.

1. Milestone based to support the 2006 Strategic Plan strategies.
2. The revenue based goal updated for 2006 budget.
3. A combination of 1 and 2 above. Ed and Greg will work on this goal and present to John for review.

Goal C – RBF and ATT will be developed further by Bob and Greg to include a Risk Assessment exercise in 2006.

Goal D – Metered Water Ratio Improvements will be refined by Karla and distributed for comment via email.

Goal E - Performance Management will be replaced with a Diversity Goal. The previously suggested goal of succession planning will become a common individual goal for ELT members. Susan Lehmann will draft language for the common individual goal and distribute for comments. The Diversity Goal will be in two pieces: Ed Chestnut and Ron Green will draft the M/WBE goal, and Susan Lehmann will draft the hiring goal.

Everyone will finalize goals and get the final version to Ed Chestnut by noon on January 18. This will allow Ed time to put the goals in the final format for review with John Huber. The final set of goals will be reviewed at the next ELT meeting on January 23. A Compensation Committee meeting will be scheduled for late January/early February.

Open Time – (3:25)

Special ELT Meeting - Greg Heitzman discussed whether a special ELT meeting should be scheduled to further develop and finalize shared goals. It was decided a special meeting would not be necessary if goals development continues offline and concurrence is given through emails.

Pandemic Procedures – Bob Miller reported a meeting was held today to discuss procedures at Louisville Water Company in the event of an Avian Flu Pandemic.

Adjourned (3:35)

ELT Meeting Minutes
January 23, 2006

Attendees: Greg Heitzman (ELT Leader), Barbara Dickens, Susan Lehmann, Bob Miller

Absent: John Huber, Karla Teasley, Bill Meeks

Visitors: Kathie Johnson (Recorder)

Review Minutes and Agenda – Greg Heitzman (1:35)

The minutes from the January 9 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

2006 Goals Development – Ed Chestnut (2:36)

Ed Chestnut distributed a packet containing the 2006 ELT Shared Goals Worksheet, 2006 Incentive Plan Goals Worksheet, and Corporate Performance Award Worksheet, and well as graphs providing historical information on Corporate Measures, Capital Expenditures and Customer Satisfaction Index Scores. The worksheets provided 2005 objectives and measures, and proposed objectives and measures for 2006.

2006 ELT SHARED GOALS:

Objective A, Capital Improvement Program. There was discussion about the amount of 2005 carryover. Greg Heitzman, Jim Brammell, Karla Teasley and Ed Chestnut will work on this goal and email the final version to ELT.

Objective B, Create New Business Strategies. A base goal, "Create New Business Strategies to Ensure Revenue and Profitability," and an alternate goal, "Increase 2006 Revenue through Increased Water Sales," were provided.

Objective C, BE Payne RBF Phase II and CHFP Advanced Treatment Phase III. Accepted as presented.

Objective D, Metered Water Ratio. Accepted as presented.

Objective E, 1) MBE Spending and 2) Hiring and Promoting Minorities. Susan Lehmann will confirm with Kathy Schroeder the goal statement, "Percentage of target placement of underutilized categories based upon quarterly results, averaged at the end of the year," and give to Ed Chestnut. .

A follow up task is to get data from Amber Halloran and work to balance the achievability of the M/WBE numbers for procurement.

LIGHT SWITCH GOAL:

The Light Switch Goal was accepted as presented.

2006 INCENTIVE PLAN GOALS:

- I. 2006 Net Operating Income exceed the budget \$36,877,900. Accepted as written.
- II. Meet and exceed customer needs. Same as 2005.
- III. Reduce microbial risk. Measures D and E changed from 2005, and were accepted as written.
- IV. Perform work more productively. Accepted as written.
- V. Provide an environment which values quality of work life. Accepted as written.

CORPORATE PERFORMANCE AWARD:

The proposed corporate performance award was discussed, and was approved as presented.

Common Individual Goal for Succession Management. Susan Lehmann distributed draft language for this goal for discussion. The date BSOs will be required to have an Individual Development Plan in place was changed to March 15. The weight of the individual common goal will be determined between the CBSO and John Huber. Susan will complete the language for this goal and will email it to ELT members for review.

Open Time

Change in Time for Next ELT Meeting - Greg said the next ELT meeting would need to be held at 2:30-4:00 since the Compensation Committee would be meeting that day.

Southern Indiana – Bob Miller asked which Strategy Sub Team was responsible for Southern Indiana. Greg Heitzman will cover Southern Indiana where LWC doesn't have retail service. Greg will add this information to his team charter. It was agreed each sub team will develop a charter clearly defining their boundaries and roles.

Monthly Financial Reporting to ELT - For future "Greenbacks" reports from Amber Halloran, Bob Miller suggested ELT begin looking at financial results outside certain boundary conditions.

Strategic Planning Meeting - The next ELT meeting will be Strategic Planning. Greg will work with Susan Lehmann on the agenda for that meeting.

Adjourned (3:30)

**ELT/Strategic Planning Meeting Minutes
January 30, 2006**

Attendees: Greg Heitzman (ELT Leader), Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Vince Guenther, Jim Brammell, Jim Smith

Review Minutes and Agenda – Greg Heitzman (2:40)

The minutes from the January 23 ELT meeting were reviewed and approved. The agenda for today's meeting was reviewed and approved.

Open Time (2:42)

Compensation Committee Update – John Huber gave a brief summary of the topics covered during the Compensation Committee meeting held earlier that day. Results are not official until the 2005 financial results have been audited, and Board action will not be taken until the March Board meeting. We will reserve the cost for the Corporate Performance Award, Executive Incentive Plan Goals, and Shared Goals as an expense in 2005, for consideration of award by the BOWW in 2006.

Strategy Innovation – Amber Halloran discussed the three frontiers identified by the Strategic Innovation team and its recommendation to bring in marketing expertise to work with the team. The SI team suggests putting out a Request for Proposal for 160 hours. This recommendation will be discussed further with John Huber, the team's sponsor.

Strategic Planning, Synergy and Efficiency Sub Team Update – Ed Chestnut (3:10)

Ed Chestnut gave a brief account of the team activities to date. The team is on schedule. The team will meet the 1st and 3rd Tuesday of each month.

Strategic Planning, Regionalization Sub Team Update – Greg Heitzman (3:20)

Greg said this team will meet every two weeks on the 1st and 3rd Fridays of each month. Greg distributed a draft team charter. The team is on schedule.

Strategic Planning, Economic Development Sub Team Update – Bob Miller (3:35)

This team will meet the 2nd and 4th Monday of each month. The team is on schedule.

Strategic Planning, Horizontal and Vertical Integration – Karla Teasley (3:43)

This team will meet for about two hours every two weeks.

Strategic Planning Process – Susan Lehmann and John Huber (4:02)

The Mission, Vision and Values statement has been finalized. Carl Blanton will conduct focus groups on employee perceptions. Susan Lehmann will form a team to review existing corporate strategies into the new plan along with newly developed strategies.

A follow up item for Susan is to identify BSOs not currently committed to a Strategic Planning Sub Team and fill out this integration team. She will also check with Karen Wunderlin to see if our methodology fits.

Strategic Planning Sub Team Charters (4:25) - Each sub team is developing a draft charter for their respective teams to approve.

Agenda and Bin List – Greg Heitzman (4:30)

Greg reviewed the bin list with ELT and adjusted dates for presentations. Two items should be added to the bin list:

- Discussion of system certifications – Carl Blanton
- Strategies for CERS Participation – Vince Guenther

Meeting Adjourned (4:37)

**ELT Meeting Minutes
February 6, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy, Roger LeMaster

Review Minutes and Agenda – Greg Heitzman (2:40)

The minutes from the January 30 ELT/Strategic Planning meeting were reviewed. Greg Heitzman asked that this paragraph be added immediately before the “Agenda and Bin List” topic on page 2:

“Strategic Planning Sub Team Charters” - Each sub team is developing a draft charter for their respective teams to approve.”

The minutes were approved with that change. The agenda for today’s meeting was reviewed and approved.

2005 Draft Financial Results – Amber Halloran, Sue Purdy (1:40)

Amber Halloran distributed the Unaudited Financial Highlights for December 2005. She commented LWC is over budget by \$5 million in net income for the year. Amber plans to meet with ELT members individually to get input on the information they would like to see in the monthly financial reports.

Internal Control Survey – Roger LeMaster (2:15)

Roger LeMaster reported a 70% return rate of the surveys, which was very good. ELT discussed the survey results and some common themes noted in the compiled comments. Roger would like to get survey results communicated to employees before the Organizational Effectiveness Index begins. Newsleaks will be used in communicating the results to employees, and information will be posted on the intranet. Bob Miller and Roger LeMaster will develop an introduction for the intranet posting.

As a follow-up, Roger, Greg and Susan will discuss the survey results with the BSOC and ask them to help identify issues across the organization. Bob Miller is available to them as a resource. Karla Teasley requested a comparison of survey results with the previous ICS survey, which Roger will provide. A follow up discussion by ELT will be added to the bin list for the latter part of March. John Huber said we need to communicate the results to the Audit Committee, including any action plans to address issues across the organization. We will plan to communicate this at the June Audit Committee meeting.

Bin List and Agenda – Greg Heitzman (3:05)

Bob Miller requested that a follow up be added to the bin list for late March to further discuss steps LWC can take to address issues/perceptions identified during the Internal Control Survey.

Greg Heitzman reviewed the bin list with ELT for future agendas. Greg will prepare and distribute the agenda for the next ELT meeting.

Adjourned (3:10)

**ELT Meeting Minutes
February 13, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Absent: John Huber

Visitors: Kathie Johnson (Recorder), Susan Camp, Carl Blanton

Review Minutes and Agenda – Greg Heitzman (1:55)

The minutes from the February 6 ELT/Strategic Planning meeting were reviewed and approved. The agenda was reviewed and approved.

Review Board Agenda (1:37)

ELT reviewed the BOWW agenda. Barbara Dickens commented visitors concerned with the potential location of a chemical storage facility at Crescent Hill may be present at the board meeting. In order to accommodate additional visitors, the board meeting will be held in Training Room A following lunch. A public meeting with residents is scheduled for March 1.

Providing Customer and Public Information System Certification – Karla Teasley, Susan Camp, Carl Blanton (1:55)

Karla Teasley and Susan Camp discussed the results of the recent certification audit. Following discussion of the improvement recommendations, Karla recommended that the certification be postponed six months, when another review can be made by the certification audit team of items identified for improvement in the certification audit.

ELT Action: ELT agreed to revisit certification of Providing Customer and Public Information in six months after the audit team reviews actions taken to implement suggested improvements.

Natural Work Team Recognition – Karla Teasley (2:45)

Karla Teasley discussed the progress made by the Duty Exchange Program team. Their goal was to exchange over 10,000 low performing meters by 12/31/05, and they met their goal in October. Karla recommends a \$50 recognition voucher per team member. The team members are Ginny Adwell, Brian Burba, Dexter Keeylen, Mike Bingham, Dave Gnau, Scott Spalding, Sharon Dawson, Glenda Bloom and Stacey Bowles.

ELT Action: ELT members agreed to support recognition of this team through the award of a \$50 voucher per team member.

Bin List and Agenda – Greg Heitzman (3:00)

Greg Heitzman reviewed the bin list with ELT. He will prepare and distribute the agenda for the next ELT meeting.

Adjourned (3:05)

**ELT Meeting Minutes
February 20, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, Susan Lehmann, Bill Meeks, Amber Halloran (representing Bob Miller), Karla Teasley

Absent: Bob Miller

Visitors: Kathie Johnson (Recorder), Vince Guenther

Review Minutes and Agenda – Greg Heitzman (1:33)

The minutes from the February 13 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

CERS Retirements – Vince Guenther (1:35)

Vince Guenther distributed an overview of the Kentucky Retirement Systems and copy of a letter from Bill Hanes, Executive Director of the Kentucky Retirement Systems dated February 14, 2005, addressing concerns of local city and county governments over employer rate increases. Vince and ELT discussed the limited options available to manage the increasing cost of CERS. Vince said any effective reform of the system would need to be undertaken by the Governor.

Financial Results for January 2006 – Amber Halloran (2:10)

Amber distributed and discussed the January 2006 financial results, and audited results for December 2005. She commented the new auditors, Strothman, were very thorough and did a good job. She plans to start work on the annual report this week.

Corporate Social Responsibility – Karla Teasley and Susan Lehmann (2:17)

Combined Fundraisers - Susan Lehmann has been working with Karla and Barbara, and they have concluded employees must sign documents for continued payroll deductions in 2006. An article will be published in Newsleaks, and we will ask employees whether they wish to continue with payroll deductions. A combined two-week campaign will be held around September or October. Each campaign will have a chair, but the campaigns will run concurrently. One form will be used for all three fundraisers (Water for People, Fund for the Arts, and Metro United Way).

John Huber mentioned Smile Kentucky and asked if our work in Jefferson County schools is proportionate to our involvement in schools outside Jefferson County. Karla will check on this.

Environmentalism – Karla asked if LWC should take a more proactive role with respect to environmental principles. She distributed a Draft Statement of Environmental Principles jointly prepared by UofL, Jefferson County Public Schools, and Louisville Metro Government for discussion. The BSOC will be asked to identify a potential team leader and team to work on this topic. Greg suggested we use the draft document as a starting point.

Community Involvement – Professional groups would count as community involvement. Karla distributed a 2006 Corporate Social Responsibility Questionnaire and asked for ELT approval, which was given. Consideration will be given to incorporate community involvement into job descriptions or job expectations, as well as career/development planning for Process Owners and above. Karla will follow up with Marianne Butler in the next few weeks and will work with Human Resources to build expectations into job descriptions, etc. After the survey results are in, Marianne will work to develop a map of community involvement by employees to identify gaps.

Adjourn (3:05)

**ELT/Strategic Planning Meeting Minutes
February 27, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Bill Meeks, Bob Miller, Karla Teasley

Absent: Barbara Dickens, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran, Jim Smith, Karen Wunderlin

Review Minutes and Agenda – Greg Heitzman (1:30)

The minutes from the February 20 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Synergy and Efficiency Sub Team Update – Ed Chestnut (1:35)

Ed reported the team finalized its team charter and is on track with its work. No SWOT or gap analyses have been done. The team is hopeful it will identify doable strategic synergies. Any overlaps/ideas that surface will be shared with the appropriate team(s) for their consideration.

Regionalization Sub Team Update – Greg Heitzman (1:50)

The team charter has been completed and confidentiality agreements have been signed. A SWOT analysis will be completed. The team is on schedule.

Economic Development Strategy Sub Team Update – Bob Miller (2:05)

Two experts shared their perspectives with the team in February. SWOT and gap analyses will be completed. The team is on schedule.

Vertical and Horizontal Integration Strategy Sub Team Update – Karla Teasley (2:20)

A SWOT analysis is nearly completed. Interviews are planned to get the perspectives of some Louisville business leaders. Three team meetings will be held in March, and a gap analysis will be done.

Strategic Plan Vision and Purpose – Greg Heitzman (2:45)

In Susan's absence, Greg commented we don't want to lose what was built into the existing Strategic Plan, and will be taking the core Strategic Plan and moving it forward.

Discussion will be held at the Board Agenda Prep meeting regarding the timing for an update to the Board on sub-team activities.

2006 Proposed Goals – Ed Chestnut (3:00)

ELT discussed the revised 2006 Proposed Goals. Follow up items:

- Bob Miller will prepare a description for the first part of ELT Shared Goal E relating to the MBE spending goal. Discussion was held regarding the attainability of the goals as currently written, and it was agreed the goals should be changed. Ed Chestnut will make the change.
- Susan Lehmann and Kathy Schroeder will develop a description for the second part of ELT Shared Goal E relating to underutilized job categories placements.

Open Time (3:55)

IT Investment Resources - Bob Miller introduced an idea to form an internal advisory group to prioritize the timing and amounts of IT investment resources. Bob distributed a white paper prepared by Tony Gregory as to what should be considered in establishing an information technology steering committee. Tony would like to present this at a future ELT meeting. John Huber commented a front-line users forum is also needed.

Agenda and Bin List (4:08)

Greg will develop and email an agenda for the March 6 meeting. A presentation by Tony Gregory on an IT Steering Committee will be added to the bin list.

ELT Meeting Minutes
March 6, 2006

Attendees: Greg Heitzman (ELT Leader and Recorder), John Huber, Barbara Dickens, Susan Lehmann

Absent: Ed Chestnut, Bill Meeks, Karla Teasley, Bob Miller

Visitors: Tony Gregory, Nora Freeman, Carl Blanton, Barbara Crow, Amber Halloran, Kathy Schroeder

Review Minutes and Agenda – Greg Heitzman (1:30)

The minutes from the February 27 ELT meeting were reviewed and approved as written. The agenda was reviewed and approved.

System Certification – Carl Blanton

Carl provided a brief summary of the 2004-05 certification process and the certification plan for 2006 (handout). Carl reported that six Business Systems are up for certification in 2006. The areas of focus include: Performance Partnerships; Internal Customer Satisfaction; Natural Work Team effectiveness; and documentation. In addition, Carl discussed ISO certification, workforce planning, intranet documentation methods currently used by some systems, and the need to pursue a program for knowledge management and knowledge transfer. Carl stressed the need to shift toward knowledge and vision with the quality program.

John asked ELT if we need more structure and discipline to our quality program and the certification process. John discussed the value of ISO certification because of future EPA regulations (citing how Las Vegas process documentation was used to defend the water system from accusations of a cryptosporidiosis outbreak as an example).

Greg suggested a mid-year assessment of the O&M budget to determine if funds were available to begin a gap analysis for ISO 9000 or ISO 14000 by external consultant. An estimated \$20,000 is needed to conduct a gap analysis. If complete by early 2007, this would allow 18-24 months to become ISO compliant by the December 2008 Strategic Plan goal.

Senior Olympics Summer 2007 – Barbara Crow

Barbara advised ELT that the Company has committed office space at the former River Road Country Club to Ray Hoyt (Olympics Director) to serve for coordination of the 2007 Senior Olympics being held in Louisville. She advised Ray has requested 250,000 bottles of pure tap water, a value of approximately \$85,000. ELT discussed the logistics in producing the additional supply, which is nearly 75 percent over annual production of 350,000 bottles. The commitment will require additional labor and bottle resources during the peak bottling period of April through May 2007. Barbara reported that Tyler Mountain (Anita) no longer provides private label bottling, and other small bottlers can not handle this quantity. ELT agreed that this one time event would provide a good marketing and branding opportunity, and also serve as LWC's contribution, valued at over \$100,000, to the Senior Olympics. John agreed for Barbara

to advise Ray Hoyt that LWC will provide the bottled water for the events. In addition to filled pure tap bottles, LWC will provide approximately 5,000 empty bottles.

HRMS Team Recognition – Kathy Schroeder and Amber Halloran

Kathy and Amber provided a brief summary and handout of the successful HRMS implementation and results. They recommended the team be recognized and rewarded similar to the FINS team, with four levels (Level I – PTO valued at \$1,700 and \$250 paid on LWC pay check; Level II – PTO valued at \$850 and \$250 paid on LWC pay check; Level III - \$150 paid on LWC pay check; Level IV - \$100 paid on LWC pay check). The levels were determined based upon the levels of involvement of various team members. ELT also agreed that Kathy, Amber, and Tony Gregory be included with the recognition, consistent with past practice to include BSOs on corporate team recognition. ELT approved the recognition and reward as presented by Kathy Schroeder. See Kathy's handout for the employees participating on the team and eligible for the recognition.

Open Time

John Huber mentioned a recent presentation he heard by Stephen Daeschner of Jefferson County Public Schools on the changing demographics of Jefferson County school children. He recommended we have this information presented to ELT and BSOC to identify future trends that will impact our future workforce and market place.

Agenda and Bin List (2:45)

Greg will develop and email an agenda for the March 13 meeting. Tentatively, the agenda will include the Board meeting review, Greenbacks Financial Report, and the IT Steering Committee Charter Proposal.

**ELT Meeting Minutes
March 13, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, Susan Lehmann, Bill Meeks, Bob Miller. John Huber and Karla Teasley arrived at approximately 2:30 p.m.

Visitors: Kathie Johnson (Recorder), Susan Camp, Tony Gregory, Amber Halloran, Sue Purdy.

Review Minutes and Agenda – Greg Heitzman (1:35)

The minutes from the March 6 ELT meeting were reviewed. A correction was made to the minutes to show that Ed Chestnut was absent from the March 6 meeting. The minutes were approved with that change. The agenda was reviewed and approved.

Review of Board Agenda – Greg Heitzman

As John Huber was meeting offsite during most of the ELT meeting, Greg Heitzman reviewed the BOWW agenda. The agenda was straightforward. Greg mentioned Peter Naaka, with the “Save Reservoir Park” group, had requested five minutes on the Board agenda to read a statement regarding the chlorine plant being considered at Reservoir Park.

IT Steering Committee (1:45)

Bob Miller said the IT Steering Committee concept was being brought to ELT for their discussion and input. ELT felt the committee should function at a strategic level and should develop the next IT Strategic Plan. The team makeup should consist of 3-4 BSOs and 2-3 ELT members. Greg recommended the Steering Committee focus on updating the IT Strategic Plan and allow BSOs to work on resourcing the plan through operating and capital budgets. Susan Lehmann recommended Practical Solutions be asked for their input on the team. Any further input on the subject should be furnished to Bob and Tony through email. This topic will be added to the ELT bin list for approval of the charter and empowerment matrix again in 3-4 weeks.

Review Operating Performance (Greenbacks Report) – Amber Halloran (2:15)

Amber Halloran and Sue Purdy distributed and discussed the February financial results. Amber presented a high level review of February’s results. LWC was under budget in water revenue by \$90,000. Overtime was over budget, and Amber will follow up to understand what is driving the overtime expense.

Open Time (2:45)

Airport Work – Greg reported the Airport 60-inch tie in was completed on Sunday and the new 60-inch main placed in service. No incidents were reported during the tie-in period. Attention will now focus on the abandonment of the existing 48-inch main in Fern Valley Road. Ted Niemann is coordinating this work as Project Manager.

Community and Business Leader Interviews – Karla reported she, John Huber, and Jerry Martin met with J. D. Nichols today, and a meeting will be held with Bill Street on Wednesday. These

meetings are being held to get perspectives from community and business leaders on the work of the Horizontal and Vertical Integration Strategic Planning Sub Team.

Agenda and Bin List – Greg Heitzman (2:55)

Greg reviewed the bin list with ELT. Bob asked that the Borrowing Update and Timeline be added to the bin list. Greg will prepare and distribute the next ELT agenda. Greg will also provide a copy of the ELT roles for the remainder of the year by e-mail.

Adjourn (3:05)

**ELT Meeting Minutes
March 20, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann, Tony Gregory (representing Bob Miller), Karla Teasley

Absent: Bill Meeks, Bob Miller

Visitors: Kathie Johnson (Recorder), Kathy Schroeder

Review Minutes and Agenda – Greg Heitzman (1:45)

The minutes from the March 13 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

ELT Roles – Greg Heitzman (1:47)

ELT discussed the upcoming roles. Bob Miller becomes Leader on April 3. Greg will ask Christy Ray to update the roles schedule through the year 2007.

EEO/AA Quarterly Update – Kathy Schroeder (1:50)

Information developed by Evelyn Freeman of F. W. Consultants, Ltd. was distributed for review. The report was based on statistical data as of December 2005.

Discussion of measurement of the Shared Hiring Goal was held. Greg summarized the discussion. The reporting system must be manageable with an understandable goal. We will continue to track the data quarterly, focusing on underutilized categories, but will also have a rollup of total numbers by union, non exempt, and exempt, with metrics or controls established. This will be a two part goal. The first part is to track underutilization of minorities using the current measuring system. The second part will be developed by Kathy Schroeder to include numbers for underutilization of women and minorities by union, exempt, and non exempt classes as of December 31, 2005. Kathy Schroeder will develop target numbers so the improvement in hiring of women and minorities can be tracked through the year. Kathy will report back to ELT in April on the progress through the first quarter for the underutilized categories (Part 1) and also provide a recommendation on the target measures for union, exempt, non-exempt (Part 2).

Open Time (2:50)

Manager, Distribution Operations Position – Greg Heitzman announced that Spencer Bruce, formerly of Rohm & Haas, will begin work with LWC as Manager, Distribution Operations effective March 31. Greg will introduce him at ELT on April 3, and will arrange meetings to introduce him to the C2 organization. His office will be at Almond Avenue.

Centralized Contract Files – Barbara Dickens has been working with Amber Halloran, Lynn Humphrey, Beverly Soice, and Greta Howard on a project to keep all contracts except deeds in the confidential file storage room on the lower level. Once a contract is closed out, it can be

shipped off site. This project is being worked collaboratively between Legal and Procurement. John Huber mentioned the lower level may not be an ideal location for file storage due to potential flooding, and the third floor may be a better location. Details are still being worked through. This will become a documented procedure.

Warehouse Fire - Greg reported the flow availability was excellent for fighting the six alarm fire downtown on Friday. He estimated between 10,000 to 12,000 gallons a minute was used by the Metro Fire Department. The Central Business District is designed to provide 20,000 gallons per minute capacity for fire flow demand. The flows at Cardinal Hill and Crescent Hill were monitored, and no problems were encountered by LWC operations. LWC also provided an Emergency Turner and Supervisor on site for coordination of water supply. The Metro Fire Department reported no problems with hydrants or the water supply.

Agenda and Bin List – Greg Heitzman (3:11)

Greg said he will send out the agenda for the next meeting, which will probably be devoted to Strategic Planning sub team updates.

Adjourn (3:12)

**ELT/Strategic Planning Meeting Minutes
March 27, 2006**

Attendees: Greg Heitzman (ELT Leader), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran, Jim Smith, Karen Wunderlin

Review Minutes and Agenda – Greg Heitzman (1:35)

The minutes from the March 20 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Strategic Planning Sub Team Updates (1:38)

Synergy and Efficiency Sub Team – Ed Chestnut reported his team is on target to complete their work by the end of April.

Regionalization Sub Team – Greg reported his team completed a SWOT analysis, and will complete a gap analysis. They are scheduled to meet 4 times in April. Meetings have been held with investment people regarding the viability of funding. Greg expects the team to deliver a strategy by the April 28 deadline.

Economic Development Strategy Sub Team – Bob Miller discussed the progress his team made during March. The team is on track to meet the deadline.

Vertical and Horizontal Integration Strategy Sub Team – Karla Teasley reported a SWOT analysis is complete, and a gap analysis is underway and should be completed tomorrow. Two meetings have been held to gain the perspectives of local business leaders (J. D. Nichols and Bill Street). Karla expects the team's work will be completed on time.

Updating the Existing Strategic Plan – Susan Lehmann (2:15)

The team is going through the current strategies, which have been broken up into sub groups. Jack Wang is leading the group on product quality; Karla is leading the group on service and quality; Susan Lehmann is working on organizational effectiveness; and, Ed Chestnut is working on organizational efficiency. The group will meet again in mid April.

Open Time (2:25)

Affordability Issues – Bob Miller noted that he met recently with Marion Gee to discuss the future affordability of combined water, sewer, and drainage bills based on rate increases contemplated through 2010. MSD and LWC have independently begun studying approaches used in larger cities facing similar issues. Bob and Marion plan to meet again to share their findings and consider this matter further.

Employee Feedback on Vision, Values and Purpose – Carl Blanton, Johnnie Rice (2:30)

Carl Blanton distributed and discussed results from the Focus Group on Vision, Values and Purpose. He said the focus group was interested in the process and was forthcoming with suggestions. Vince noted several of the comments could be addressed by wordsmithing the document so its intent was clearer.

Johnnie Rice will provide feedback to those who participated in the focus group meetings. Carl mentioned the evident pride employees have in providing a product vital to life, firefighting, etc. Greg said we can use the focus group feedback as a resource document at the end of the process. Susan Lehmann will schedule a meeting to review the Strategic Plan document following the May 11 Board meeting. Susan thanked Carl and Johnnie and their group for the work they did on this project.

Open Time (2:55)

Employee Corporate Performance Award – Ed Chestnut discussed the gross amount of Corporate Performance Awards being reduced by about 55% due to taxes and other deductions.

Available Property East of Allmond Avenue – Greg Heitzman mentioned the parcel near Allmond Avenue is up for sale again. LWC has no immediate need for the property.

Agenda and Bin List – Greg Heitzman (3:02)

Greg will develop and distribute an agenda for the next ELT meeting.

Adjourn (3:15)

ELT Meeting Minutes
April 3, 2006

Attendees: Bob Miller (ELT Leader), Carl Blanton (representing Susan Lehmann), Greg Heitzman, John Huber, Vince Guenther (representing Karla Teasley)

Absent: Ed Chestnut, Barbara Dickens, Susan Lehmann, Bill Meeks, Karla Teasley

Visitors: Kathie Johnson (Recorder)

Review Minutes and Agenda – Bob Miller (1:35)

The minutes from the March 27 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Review Strategic Plan Assumptions (1:40)

Bob Miller led the group through the Assumptions, and the group discussed whether the assumptions were still valid and still drivers. Bob Miller will provide a summary of the changes to ELT.

Open Time (2:50)

Change in Operating Status Review Template for BSOs – Greg Heitzman discussed the changes in the proposed form, and asked for feedback.

Agenda and Bin List (2:55)

Bob Miller said the next agenda will include discussion of the Board agenda, financial reports, an update on the borrowing, and other items. Bob will email the agenda.

Adjourn (2:57)

**ELT Meeting Minutes
April 10, 2006**

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman (Recorder), John Huber, Kathy Schroeder (for Susan Lehmann), Bill Meeks, Karla Teasley

Absent: Susan Lehmann

Visitors: Amber Halloran, Roger LeMaster, Kathy Schroeder

Agenda and Minutes Review – Bob Miller (1:30)

The minutes from the April 3 ELT meeting were reviewed and approved. The agenda was reviewed and approved.

Board Summary – John Huber (1:35)

John provided a brief overview of the Board agenda, including the Annual Meeting, and Regular Meeting. John mentioned several items from the Audit Committee report, including business continuity planning and adequacy of controls on the Capital Program.

Americana Foundation – John Huber (1:40)

John and Bill provided a summary of their trip to meet with Edgardo Mancilla of the Americana Foundation. John advised LWC can't make a monetary contribution, but can consider coordinating a project to rebuild a community play set. The project would use LWC employee volunteers and we would solicit material donations from local suppliers. John will work on developing these ideas further with Bill.

Public Affairs and Customer Satisfaction Committee Meeting – Karla Teasley (1:45)

Karla advised everyone of the planned meeting on Wednesday afternoon. The meeting agenda will include an update on AMR, monthly billing, service sleeves for new development, credit card convenience fees, and call center measures.

Financial Review – Amber Halloran (1:50)

Amber and Sue led a discussion of the Financial Report for the month of March. High level discussions included water sales revenue, net income, overtime costs, O&M costs, and the capital program. Although O&M expenses are under budget, ELT concluded we need to be cautious with discretionary spending, since YTD revenue is under budget by approximately 1% and YTD pumping is down 3%. We need to communicate to BSO's to review any discretionary spending and determine if any deferrals are appropriate. In addition, Amber will work on the

details driving overtime above budget. Kathy also projected a higher than normal employee vacancy rate, with employees announcing retirement.

Bond Issue and Timeline – Bob Miller (2:30)

Bob provided a brief summary of the plans to issue up to \$80 million in bonds to fund the capital program over the next several years. Bids will be received over the internet. The Board will meet on May 25th to authorize the bond issue documents and again on June 21 to approve the bond sale. The Bond Feasibility study is underway with Black & Veatch. Bob will be briefing the Board on Tuesday on the timeline and expectations. One key issue will be to discuss any changes to the Bond covenants. The timeline is tight, and Bob requests cooperation from staff in various areas to execute the bond issue in a timely fashion.

Internal Control Survey – Roger LeMaster (2:50)

Roger provided a summary of the major areas for improvement identified in the survey. These include: communications; training and development; adequacy of staff resources; and timely filling of jobs. ELT discussed various approaches for follow-up. Kathy advised the BSO's planned to review the results from the OEI survey and then develop an action plan for any common elements. We all agree the need to communicate the purpose and need for internal controls to management and employees. Bob will also work to schedule a future ELT agenda topic with subject area experts (communications, training & development, and human resources) to develop an approach to address these areas.

Adjourn (3:10)

**ELT Meeting Minutes
April 17, 2006**

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Karla Teasley

Visitors: Kathie Johnson (Recorder), Jack Wang, Amber Halloran

Review Minutes and Agenda – Bob Miller (1:35)

The minutes from the April 10 ELT meeting were reviewed. The minutes will be amended to show that Susan Lehmann was absent and was represented at the meeting by Kathy Schroeder. The minutes were approved with that change. The agenda was reviewed and approved.

Consider Changes to Bond Covenants – Bob Miller and Amber Halloran (1:38)

Bob Miller reviewed the advantages and disadvantages of three possible options to change the dividend calculation contained in Section 508 – Payment of Dividend (excerpted from the Series 1992 Bond Resolution. ELT discussed the three dividend calculation options at some length. Bob Miller said he will discuss this topic with ELT again before the May Board Meeting.

LT2 and DBP Regulations Update – Jack Wang (2:23)

Jack Wang distributed copies of a PowerPoint presentation prepared by Monica Ottens, Rengao Song, and Jack Wang providing an overview of the LT2ESWTR and Stage 2 DBP Regulations, and the status of LWC's readiness.

Following the discussion, Greg summarized that LWC needs to take another look at critical human resources needed for compliance monitoring and contingency planning for short-term technology alternatives for the Crescent Hill plant.

Agenda (3:15)

Bob Miller said the next ELT meeting agenda will consist of Strategic Plan sub team reports.

Adjourned (3:16)

**ELT Meeting Minutes
May 1, 2006**

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Greg Heitzman, John Huber, Carl Blanton (representing Susan Lehmann), Bruce Mingus (representing Bill Meeks), Susan Camp (representing Karla Teasley)

Absent: Barbara Dickens, Susan Lehmann, Karla Teasley

Visitors: Kathie Johnson (Recorder), Kay Ball

Review Minutes and Agenda – Bob Miller (1:34)

The minutes from the April 17 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

2007 Water Professionals Conference – Kay Ball (1:36)

The 2007 Water Professionals Conference will be held at the Galt House July 15-18, 2007. The conference is a joint meeting of the WEA and AWWA KY-TN Sections. This is the third year for the joint conference. LWC and MSD will co-host the 2007 Louisville meeting. Kay's purpose in bringing the matter before ELT is to solicit support for employees who become involved in organizing and working the conference. She will also be addressing the BSOC regarding employees to fill committee positions and assist with the conference. Kay will furnish ELT a list of the positions that need to be filled on various committees, registration, etc. Bob Miller asked Kay to let him know of any funding requirements for the 2007 Conference by July 2006.

ELT Measures Quarterly Report – Ed Chestnut (1:46)

Ed Chestnut reviewed the first quarter measures results with ELT.

Payne Plant Risk Assessment – Bob Miller (2:06)

Bob Miller distributed risk catalog sheets on the BE Payne RBF project for the preconstruction, construction, and post construction (operational) phases of the project. He recommended the BOWW be given a synopsis of the risk catalog information instead of the catalog sheets. Greg said risk assessment work has now begun on the Crescent Hill Plant advanced treatment technology alternatives.

Open Time (2:20)

Business Continuity Exercise – Bob Miller related his recent review of the business continuity plan at a northeastern U.S. regional water authority. Key lessons learned:

- Identify facility loss to be managed.
- Identify capabilities needed to achieve recovery by recovery time objectives..
- Know recovery point objectives.
- Have measurable criteria to determine success of BCP exercises.

Agenda and Bin List (2:33)

Bob Miller will email the agenda for the next meeting, which will likely consist of changes to the bond covenant, a summary by Jim Brammell on the Waterworks Management Workshop, discussion of the May 11 Strategic Planning workshop, and a review of the board agenda and April financial results.

Adjourned (2:35)

ELT Meeting Minutes May 8, 2006

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Brammell, Amber Halloran, Sue Purdy

Review Minutes and Agenda – Bob Miller

The minutes from the May 1 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

Review Board Agenda – John Huber

John Huber reviewed the board agenda, noting the agenda is briefer than normal, but the topics may have lengthy discussion. He expects a good deal of discussion regarding the decrease in water revenue over the same period in 2005. Karla Teasley expressed concern over competition for resources among the various corporate initiatives currently underway with the addition of the significant team workload for pandemic planning. The ELT agreed to discuss this matter further at the May 15th meeting.

Changes to Bond Covenants – Bob Miller

Bob Miller reviewed his letter to the BOWW summarizing existing bond resolution covenants, and a second letter to the BOWW setting forth potential changes to the bond resolution, with the recommendation the dividend covenant remain unchanged.

Greenbacks Report – Amber Halloran, Sue Purdy

Amber Halloran and Sue Purdy reviewed the April 2006 Financial Results, noting that net income through April was \$944,282 under budget. Bob Miller stated that \$200,000 of the variance was due to no interest earnings on bond funds because of the timing of the bond issue for later in the year and that the earnings are not eligible for distribution as dividend. The ELT agreed to identify tactics to meet the earnings target at the May 15th meeting.

Waterworks Management Workshop – Jim Brammell

Jim Brammell reviewed answers received to Louisville Water Company questions at the Waterworks Management Workshop held recently in Los Angeles. He noted that an electronic copy of the answers will be available in the coming weeks.

Preparations for Upcoming Strategic Planning Session – Susan Lehmann

Susan Lehmann discussed the agenda for the half-day strategic planning session scheduled for Thursday May 11th.

Open Time

There were no items discussed under open time.

Next Agenda

The ELT agreed to consider a recommendation to charter an IT Steering Committee at the next meeting in addition to the two items noted above.

ELT Meeting Minutes May 15, 2006

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Absent: Barbara Dickens, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Carl Blanton, Tony Gregory, Amber Halloran

Review Minutes and Agenda – Bob Miller

The minutes from the May 8 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

IT Steering Committee Charter – Bob Miller, Tony Gregory

Bob Miller distributed a charter for the proposed IT Steering Committee for review and discussion. Tony Gregory stated he found no standard practice among water utilities in having a steering committee for information technology. Bob discussed sponsorship for the team, and recommended he be the team sponsor. Because of the importance of this team's work, he will provide regular updates to ELT.

Bob discussed the proposed makeup of the Steering Committee, which included mostly BSOs. Karla Teasley said ELT should be sensitive to the number of requests given the BSOs to participate on teams. The BSOC is already involved in updating the corporate strategic plan, preparing the budget, providing operating status reports, etc

ELT discussed the responsibilities of the proposed IT Steering Group. Bob will hold a first meeting of the Steering Committee and report back to ELT. John Huber said the Steering Committee's responsibility will be to review resources and assure alignment with strategic objectives.

Tactics to Achieve Earnings Target – ELT

LWC is currently \$800,000 under in net income, \$200,000 of which is earnings not achieved in the form of interest on bond proceeds. ELT discussed measures that can be taken to meet the earnings target. Karla recommended the expense reduction work done in 2004 be revisited instead of starting from scratch. The BSOC will be asked to identify expenditure reductions of \$500,000 after consulting with their respective CBSO; ELT will be notified, and John Huber will provide final approval. The BSOC has a June 2 deadline to have their recommendations completed.

Resource Competition among the Corporate Initiatives

This topic will be moved to a future ELT agenda due to lack of time at today's meeting.

Agenda and Bin List – Bob Miller

Additions to the bin list include discussion of information to include on a daily dashboard, and identifying opportunities to reshape the organization to create variability. Bob Miller will email the agenda for the next ELT meeting.

Adjourned (3:05)

**ELT Meeting Minutes
May 22, 2006**

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran

Review Minutes and Agenda

The minutes from the May 15 ELT meeting were reviewed and approved. A correction was made to the fourth sentence under the heading "Tactics to Achieve Earnings Target," as follows:

The BSOC will be asked to identify expenditure reductions of \$500,000 after consulting with their respective CBSO; ELT will be notified, and John Huber will provide final approval.

The minutes were approved with that change. Today's agenda was reviewed and approved.

Resource Competition among the Corporate Initiatives

ELT discussed the BSO's extra commitments, including the Strategic Plan, Strategy Innovations, SI sub-teams, pandemic planning, identification of expenditure reductions, the bond issue, new project initiatives, and the 2007 budget. Some of these commitments are slowing down, and some have a near completion date. The items with the nearest deadlines and no timing flexibility are: expense reductions, the borrowing, Strategic Plan, and budget preparation. Those with the longest lead times and some flexibility are: pandemic planning, Strategy Innovation and IT Steering Committee kickoff.

Communications with BSOs to identify work priorities will be made in staff meetings, and also at the BSOC (to help identify project interdependencies).

Review Agenda for Special Meeting of the BOWW on Bond Issue Document Approval

Bob Miller reviewed the agenda for the May 25 BOWW Special Meeting on the bond issue document approval. Dave Naumann and Larry Gaddis of Black & Veatch will attend to discuss the bond feasibility study.

Open Time – Open Time was cancelled due to lack of time. Proposed topics will be added to the bin list.

Agenda and Bin List

The topic of Cross Connections will be added to the bin list. Bob Miller will develop and distribute the agenda for the next ELT meeting. Since May 29 is a holiday, the next ELT meeting will be held June 5.

Adjourned (3:05)

**ELT Meeting Minutes
June 5, 2006**

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Greg Heitzman, John Huber, Karla Teasley

Absent: Barbara Dickens, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Kathy Schroeder

Review Minutes and Agenda

The minutes from the May 22 ELT meeting were reviewed and approved. A correction was made under the Agenda and Bin List heading. The first sentence was amended to read: "The topic of Cross Connections will be added to the bin list."

The minutes were approved with that change. Today's agenda was reviewed and approved.

Cost Reduction Planning Status

Kathy Schroeder and Amber Halloran discussed the recommended expense reductions identified by the BSOC.

Risk Identification and Assessment for Capital Projects

Bob Miller stated that the risk identification and assessment work done by LWC was well received by the bond rating agencies. ELT discussed the LWC Operational Risk Catalog for BE Payne RBF, which was done for the phases of pre-construction, construction, and post construction.

Open Time

Strategic Planning Updates – John Huber said final editing of the revised strategic plan is nearly complete. The BOWW will review the newly updated plan at the June Board meeting. The Strategic Planning team will meet tomorrow from 10:00-12:00.

Agenda and Bin List

Bob Miller will develop and distribute the agenda for the next ELT meeting to be held June 19.

Adjourned

ELT Meeting Minutes June 19, 2006

Attendees: Bob Miller (ELT Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy, Roger LeMaster, Don McKay

Review Minutes and Agenda

The minutes from the June 5, 2006 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

Review Financial and Operating Results

Amber Halloran and Sue Purdy distributed and discussed the financial results for May 2006. Year-to-date water sales were \$981,500 under budget, primarily due to the cool, rainy weather this year. Sue Purdy is in the process of setting up meetings with ELT members to gain feedback on the types of reports that would best meet their needs.

John requested that Bob Miller provide a financial forecast for the remainder of the year at the July BOWW meeting.

Parameters for 2007 Operating Budget

Amber Halloran and Bob Miller discussed 2007 budget parameters with ELT. Amber is planning to distribute budget packages July 10. Amber will ask BSO's to complete decision papers for new initiatives and resource requests to get an understanding of the requests and associated budget dollars.

Internal Control Report

The report provides a big picture of the internal controls to address business risks. Bob Miller will draft a response for consideration by ELT to set dates for accomplishment of recommendations and forward to the Audit Committee.

Board Meeting Update

John Huber said the strategic plan document will be the main focus of tomorrow's Board meeting. The overview and discussion should be very high level.

Agenda and Bin List

Bob Miller will be on PTO during the June 26 ELT meeting, so Bill Meeks will begin his term as ELT Leader on June 26.

Adjourn (3:20)

ELT Meeting Minutes June 26, 2006

Attendees: Bill Meeks (Leader), Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Karla Teasley

Absent: Barbara Dickens, Bob Miller

Visitors: Kathie Johnson (Recorder), Carl Blanton, Tony Gregory, Vince Guenther, Kathy Schroeder

Review Minutes and Agenda

The minutes from the June 19, 2006 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

Strategic Planning Follow Up

Susan Lehmann discussed edits made to the Strategic Plan resulting from feedback received during the June 20 BOWW meeting. Karla Teasley discussed changes to the SWOT Analysis, and will incorporate the changes ELT agreed to today.

John Huber suggested the Horizontal and Vertical Growth Strategy be presented to the BOWW in July, then two more Strategies will be presented in August and two more in September.

Susan Lehmann will distribute the edited Strategic Plan to the Board with a transmittal letter saying the plan incorporates their edits and will be used as a guiding document. We will continue to review and update the plan. The next step will be to review the strategies in detail.

Performance Partnership Review

Kathy Schroeder reviewed the Summary of Performance and Salary Increases with ELT. She noted there was a marked increase in the number of employees receiving an "Exceeds Expectations" rating. Carl Blanton said there was insufficient documentation supporting many of the "Exceeds" ratings, and emphasis will be placed on having stretch goals for employees, and in documenting reasons an employee is rated "Exceeds Expectations." Susan Lehmann said she would like to see definitions for ratings emphasized in the review process next year.

Open Time

John Huber discussed the critical importance of a drug-free workforce and the need to assure LWC is utilizing best practices in seeking to maintain a drug-free workforce.

Adjourned (3:20)

ELT Meeting Minutes July 17, 2006

Attendees: Bill Meeks (Leader), Barbara Dickens, Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Carl Blanton, Tim Hester, Amber Halloran, Sue Purdy, Susan Camp

Review Minutes and Agenda

The minutes from the June 26, 2006 ELT meeting were reviewed. Susan Lehmann changed the second paragraph under the Strategic Planning Follow Up heading, as follows:

“John Huber suggested the Growth Strategy be presented to the BOWW in July, then two more strategies will be presented in August and two more in September. “

Susan also revised the last sentence under the Performance Partnership Review heading, as follows:

“Susan Lehmann said she would like to see definitions for ratings emphasized in the review process next year.”

Today’s agenda was reviewed and approved.

Review BOWW Agenda

ELT reviewed the board agenda. No representatives from Metro Government will be present at the meeting, which may result in Item IV.C. being deferred.

Character First Presentation

Tim Hester of Character First gave background information on the formation of the organization, and presented a video of testimonials. He discussed how the concept works and how training and materials are introduced to individuals supervising others. The training facilitates recognition of good character traits demonstrated in achieving a goal.

Open Time

LWC President - John Huber mentioned an ad is expected to appear Wednesday in the Courier-Journal for an RFP to recruit his successor.

Random Drug Testing - The policy for random drug testing is being revised, and implementation is expected in the next 4-6 weeks.

Greenbacks

Amber Halloran and Sue Purdy reviewed financial results for the month of June. Year-to-date water revenue was under budget by \$828,700, while consumption was 246,600 MG less than budget. Staff continues to analyze revenue patterns to try and identify any anomalies that would account for revenue being under budget. Overtime is \$333,000 over budget, partially due to unfilled positions. Reports are currently being developed to capture overtime hours and dollars by system.

Providing Customer Service and Public Information System Certification

Susan Camp discussed the steps taken to meet certification requirements. The certification had been deferred following consideration by ELT in February 2006. A total of 13 process improvements were submitted by the Providing Customer Information & Assistance process, the highest among all business systems. The bulk of issues cited in the certification audit were related to the Call Center. After some discussion, consensus was reached by ELT to certify the system.

Bin List and Agenda

Bill Meeks briefly reviewed the bin list, asking for presentation dates so the bin list can be updated. He will develop and distribute an agenda for the next ELT meeting.

Adjourn

ELT Meeting Minutes July 24, 2006

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller

Absent: Karla Teasley

Visitors: Kathie Johnson (Recorder), Nora Freeman

Review Minutes and Agenda

The minutes from the July 17, 2006 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

Roundtable Updates

Bob Miller - Don McKay continues to work on business continuity planning. Tony Gregory and Bob Miller are planning a kick off of the new IT Steering Committee. Bob said he would like LWC to consider standardizing documentation, testing and certification of internal controls so LWC is assured of predictable results.

Susan Lehmann – LWC is recruiting to fill 30 open positions, 15 of which are union vacancies that have been on hold since Spring 2006. The greatest need is in the Call Center and Customer Service. Interviews will begin in August for the union vacancies, and 7 union positions will be filled in the September timeframe; another 7 or 8 union positions will be filled by the end of the year, budget permitting. Policies and procedures continue to be updated. Job description update work continues with Mercer. OEI results were reported last week. System certification work was completed for Infrastructure Planning and Facility Design, and the Water Quality system certification work is underway. The Training Bytes sessions have been well received. A "How to Interview" guide is being developed and rollout is expected in the third quarter.

John Huber - A Request for Proposal has been published to solicit proposals from executive search firms to recruit John's possible successor. The best three executive search firm proposals will be taken to the Board to select a firm.

Mr. Huber discussed some concerns regarding funding for the remaining 2/3 majority main extension in Bullitt County.

There are concerns to be discussed and resolved regarding MBE awards to brokers who then subcontract the work to others. Mr. Huber will discuss this further with Barbara Dickens.

Mr. Huber mentioned the forecast reports for the Quarterly Operations meeting do not reflect budget cuts identified earlier in the year.

Ed Chestnut – Ed is sending out the template for mid year BOWW strategic plan measures this week. Ed wants to present the 2Q goal information at next week's ELT meeting. John asked that ELT look at the August-September BOWW agendas and get information to Barbara Dickens, with a copy to him. Ed asked for input on updating quarterly goals. Ed mentioned possibly using time without an accident as a measure for employee safety and vehicular accidents. Susan Lehmann suggested Ed contact Carl Blanton to tap his experience with this kind of measure. Ed said he just completed the QualServe Benchmarking Survey. While the

industry numbers are not available yet, Greg thought it would be useful for Ed to make a presentation to ELT on LWC's numbers and trends, and then make another presentation when industry results are available.

Greg Heitzman – The Zorn Station had major repairs. The Zorn intake presented major system constraints, but the problem has been moved from the critical stage to less of a concern. There is a leak in a 48" cast iron pipe that will not be easy to repair, and alternative solutions are being evaluated.

The work order system is being reevaluated with input from Nora Freeman and Jack Wang. Use of capital crews for pipeline capital construction is being considered - do we have enough activity?

Spencer Bruce is working on safety training documentation for C2, and is also looking at overtime hours.

The BOWW has approved the revised budget for RBF. The budget is going up \$3 million, driven by construction costs. The project is expected to be bid in the next two months. Work is underway to define a sole source provider for the collector wells. Greg is optimistic bids will be opened in September.

Greg has another Community Advisory Group meeting scheduled August 4 to discuss the Crescent Hill chlorine plant issue. They are attempting to narrow four alternatives down to two.

The Bluegrass supply proposal is currently being examined, and Bob Miller is preparing a presentation to educate the Bluegrass Water Commission on how we set water rates. This likely will be done within the next two weeks.

Nora Freeman (for Karla Teasley) - Credits to monthly customers resulting from the billing windows problem is going smoothly. Credits were issued last week. There was a kick-off meeting of the monthly billing pilot team this morning. Nora will recruit a representative from MSD to serve on the monthly billing pilot team.

Bill Meeks – Training assessments are underway. They are moving forward with the Ideaport, which Bill described as a high-tech suggestion box to increase process improvements.

John Huber commented on the Cross Connection team's recommendation to assess \$65 per commercial customer, generating approximately \$1.8 million. Bob Miller feels strongly that no assessment be made, but that the cost should be covered in rates across the customer base.

Susan Lehmann mentioned the joint charitable giving campaign will be held September 18-29.

Bin List and Agenda

Bill Meeks will be out of the office next week. Bob Miller volunteered to lead the ELT meeting. Bill will send out the agenda.

Adjourn

ELT Meeting Minutes July 31, 2006

Attendees: Bob Miller (Leader), Ed Chestnut, Greg Heitzman, John Huber, Karla Teasley

Absent: Barbara Dickens, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Jim Asseff, Carl Blanton, Jim Brammell, Harold Hunt, Sharon Dawson, Nora Freeman, Tammy Raley,

Review Minutes and Agenda

The minutes from the July 24, 2006 ELT meeting were reviewed. Susan Lehmann was absent from the meeting, but later provided the following changes to her Roundtable Update, beginning with the second sentence of the update:

"The greatest need is in the Call Center and **Customer Service**. Interviews will begin in August **for the union vacancies**, and 7 union positions will be filled in the **September** timeframe; another 7 or 8 union positions will be filled by the end of the year, **budget permitting**." *(Changes indicated in bold text.)*

Today's agenda was reviewed and approved.

Metered Water Ratio Team Action Plan Update

Tammy Raley reviewed results of the 2005 water audit compared to the 2004 water audit. Results using the Infrastructure Leakage Index (ILI) Performance indicators showed an improvement over the 2004 water audit of 0.65% primarily due to changes in the method for estimated unmetered water usage. Harold Hunt reviewed the basis for changing the method for estimated water loss due to fire hydrant testing and water main breaks. Kate Farrow reviewed the basis for changing the method for estimated water loss due to slow meter registers. John Huber noted that the best opportunities for improving the Infrastructure Leakage Index may be through acceleration of the meter exchange program. Sharon Dawson stated that the program was on track with most action items. John Huber encouraged the team to continue putting more emphasis on 1-1/2" and larger. Greg Heitzman commented on the good documentation that was provided.

Facility Design, Construction and Maintenance System Certification

Carl Blanton reviewed the findings cited in the certification audit and steps taken by the system to address the issues for the Facility Design, Construction and Maintenance System. Jim Asseff said he agreed with all the recommendations that were made in the certification audit. Jim Brammell said he believed the findings were appropriate and should be easy to remedy. Jim Brammell recommended the system be certified, and ELT agreed to the System Certification of the Facility Design, Construction and Maintenance System.

ELT congratulated Jim Asseff on a very successful career with LWC. Jim is retiring effective August 1 2006.

Open Time

Monthly Billing Update – Karla Teasley reported that Paul Hollinsead of MSD will participate on the Monthly Billing Team.

Boil Water Advisory – Greg said the BWA issued for parts of Eastern Jefferson County is affecting about 5,000 customers. Investigation into the cause of the pressure failure is continuing.

Meeting Adjourned

**ELT Meeting Minutes
August 7, 2006**

Attendees: Bob Miller (Leader), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann

Absent: Greg Heitzman, Bill Meeks, Karla Teasley

Visitors: Kathie Johnson (Recorder), Carl Blanton, Jim Brammell (for Greg Heitzman), Vince Guenther (for Karla Teasley), Amber Halloran, Vince Monks, Scott Muhlenbeck, Janet Muller, John Ralston, Jim Smith, Rengao Song, Jack Wang

Review Minutes and Agenda

The minutes from the July 31, 2006 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

Cross Connection Control Program

Vince Monks distributed a PowerPoint presentation regarding the Cross-Connection Control Program for commercial and industrial customers. Vince cited some instances where serious contaminants can enter a distribution system as a result of cross connections from back pressure or back siphonage. Three options for an enhanced Cross Connection Control Program were offered in the presentation, and the team recommended Option B, which is a full risk assessment to be completed in three years or less. A few changes to the presentation were suggested by ELT members. The funding method is still to be worked out. ELT agreed that Option 2 was the most appropriate approach. The team is on track to present its recommendation to the Board at the September meeting.

Infrastructure Planning System Certification

Carl Blanton commented the certification audit for the Infrastructure Planning System went very well. There were two recommendations made and have already been implemented. Jim Brammell and Carl recommended the system be certified, and ELT concurred.

Diversity Expo

Janet Muller discussed the Diversity Expo, and asked ELT to solicit donations from restaurants, etc. for prizes at the event. She will also ask the BSOC to solicit donations of prizes. Janet asked ELT to provide her with any ideas for activities/entertainment at the Expo.

Shared Goals

Ed Chestnut distributed 2Q shared goals results, to be reviewed by ELT in a future meeting. Ed noted the goals inventory of benchmarking data for 2005 is preliminary. Results for ELT Shared Goal Objective E on Hiring and Promotions will be presented by the BSO-Human Resources at a future ELT meeting.

Adjourn

**ELT Meeting Minutes
August 14, 2006**

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Scott Muhlenbeck, Don McKay

Review Minutes and Agenda

The minutes from the August 7, 2006 ELT meeting were reviewed and approved. Today's agenda was reviewed and approved.

Review Board Agenda

John Huber discussed the Board agenda. Most of the discussion will involve special issues and growth strategy. Wendy Welsh will be absent, and Joe Wise will present the Audit Committee report.

Review Operating Performance

Amber Halloran and Scott Muhlenbeck presented financial results for the month of July. Amber will furnish a report on labor and overtime expense.

Executive Delegation and Succession for Pandemic Illness Planning

Don McKay distributed and discussed a presentation on Business Continuity Planning in the event of widespread employee unavailability due to illness, natural disaster, or chemical, biological or radiological events. Don discussed the LWC teams currently working to have a response plan prepared by the end of September, 2006.

Don asked the ELT, as the Executive Delegation & Succession Team, to develop and document an emergency pre-delegation plan for all officers, with documented parameters of authority and accountability to be delegated. ELT is also to develop and document a two-level succession plan for all company officers for the duration of the crisis, with documented criteria for implementation and termination of succession. Delegation assumes the return of the sick employee; succession assumes the employee is not returning. Bob Miller will furnish an example of the delegation and succession documents, and will schedule a meeting to discuss further.

Don commented the overall success of continuity planning depends on each team's commitment to the process.

Agenda and Bin List

Bill Meeks will develop and send out the next agenda.

Adjourn

ELT Meeting Minutes
August 21, 2006

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Roger LeMaster, Janet Muller, Kathy Schroeder

Review Minutes and Agenda

The minutes from the August 14, 2006 ELT meeting were reviewed. At Karla Teasley's suggestion, the second sentence was omitted from the paragraph under the heading, "Review Operating Performance." Today's agenda was reviewed and approved.

Outreach and EEO/AA Information

Kathy Schroeder distributed and discussed a summary of EEO/AA activity for the 2nd Quarter of 2006. Janet Muller discussed the Outreach efforts during the 2nd Quarter, in which two new recruiting resources were added.

Diversity Expo

Janet Muller appealed to ELT to solicit prizes to give away at the Diversity Expo, and extended the deadline for such prizes to September 8. Janet will send a letter to each prize donor acknowledging their gift.

Procurement Card Controls

Amber Halloran and Roger LeMaster discussed issues with Procurement Cards. There are 246 pro-cardholders, each having a per purchase limit, and per month limit. Amber said a significant issue is getting manager approval of monthly charges. A team is looking at the pro-card process to make revisions and reduce the number of cardholders. Roger LeMaster has begun an audit, and is looking at the appropriateness of charges, approvals, accountability, non-compliance, etc. The pro-cards are a great tool, but the program must have stringent controls and be carefully managed. Amber will furnish a YTD report of employee spending using pro-cards, by area, to help managers make decisions to cut unneeded pro-cards, or tighten pro-card limits.

Open Time

Customer Advisory Group – Crescent Hill Water Treatment Plan – Greg Heitzman updated ELT on the meeting he and John Huber attended today with the Customer Advisory Group regarding issues in locating a chlorine plant at Crescent Hill. The Advisory Group is appealing to LWC to use the south side of the property instead of the north side. This may be feasible with some retrofitting and resolution of ingress and egress issues. Greg said he expects to bring the matter to the Board on September 19.

Strategic Planning Meeting Canceled

The Strategic Planning meeting is canceled for August 28. John Huber asked if the BSOs had what they needed from the Strategic Plan for budgeting purposes. Greg suggested an exercise be added to the Bin List for sometime in October-November to identify gaps for unfunded initiatives or changing priorities. John mentioned the importance of planning for knowledge management and being a learning organization in anticipation of upcoming retirements.

Agenda and Bin List

Bob Miller suggested the next ELT agenda be used to discuss the delegation and succession documents to be used in the event of widespread employee unavailability. Bill Meeks will develop and send out the agenda and bin list for the next ELT meeting.

Adjourn

ELT Meeting Minutes August 28, 2006

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, Bob Miller, Karla Teasley

Absent: John Huber, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Carl Blanton, Spencer Bruce, David Collier, Amber Halloran, Don McKay

Review Minutes and Agenda

The minutes from the August 21, 2006 ELT meeting were reviewed. At Greg Heitzman's recommendation, the second and third sentences were deleted under the Strategic Planning Meeting heading. The minutes were approved with that change.

Inventory Management Update

Spencer Bruce discussed a draft letter addressed to the Audit Committee regarding results of the annual physical inventory conducted June 8-10. Spencer noted the inventory was done without the benefit of bar code technology. He discussed steps being taken to improve the warehouse processes, educate staff, and better account for inventory. The next action will be to present the inventory information to the Audit Committee.

Executive Delegation and Succession

Bob Miller presented the documents he provided related to delegation of management authority and accountability during an extended absence. The documents included procedures, a flowchart, and an Empowerment and Accountability Matrix, using the Vice President-Treasurer position as an example. Bob Miller will make changes recommended by ELT, and will re-distribute the documents to the Vice Presidents electronically for their use as a template in delegating their responsibilities. This information will become a part of the Emergency Response Plan. The Vice Presidents will provide a matrix of their responsibilities to Don McKay by September 15th. Bob Miller will work with John Huber to prepare a matrix of the President's responsibilities.

Agenda and Bin List

There will be no ELT meeting during the week of September 4 due to the Labor Day Holiday. The September 11 meeting will be held as usual. The September 18 meeting will begin at 1:00 instead of 1:30, and will be moved to another location due to a Compensation Committee meeting in the Board Room at 2:30. Bill Meeks will send out the agenda for the September 11 meeting.

Adjourn

ELT Meeting Minutes September 11, 2006

Attendees: Bob Miller (Leader), Ed Chestnut, Barbara Dickens, John Huber, Greg Heitzman, Karla Teasley

Absent: Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Carl Blanton, Amber Halloran, Sue Purdy

Review Minutes and Agenda

The minutes from the August 28, 2006 ELT meeting were reviewed and approved. The agenda for today's meeting was approved.

August Financial Reports

Amber Halloran and Sue Purdy presented a high level review of financial results for August. Amber discussed preparations for the budget meetings to be held Thursday and Friday.

Open Time

Turn-Offs/Turn-Ons – Karla Teasley said the threshold will be changed. Implementation of the change is planned for later in the week. The change is expected to affect labor costs and may also affect bad debt. Karla said controls may need to be tightened before water service is turned on for new customers.

Status of Search for New President - John Huber said the Search Committee consists of Joe Wise, Rick Johnstone and Stewart Conner. There were 6 - 7 respondents to the RFP for a search firm, which was narrowed down to 3 search firms. The committee will select a search firm, and then develop a job description.

ELT Diversity Expo Skit – Bob Miller discussed his idea for a performance by ELT at the Diversity Expo. ELT agreed to perform the material developed by Bob.

Agenda and Bin List

Items to be added to the bin list:

- CPAC presentation of 2007 budget
Presenter – Jim Brammell
- Status of Policies and Procedures Development
Presenter – Barbara Dickens
- System Certification of Managing Water Quality and Production
Presenter – Greg Heitzman, Jack Wang, Carl Blanton

Bill Meeks will develop and send out the next ELT Agenda.

Adjourn

**ELT Meeting Minutes
September 18, 2006**

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, John Huber, Greg Heitzman, Susan Lehmann, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Kathy Schroeder

Review Minutes and Agenda

The minutes from the September 11, 2006 ELT meeting were reviewed. Karla Teasley made a minor edit to the first sentence under the heading of "Turn-Offs/Turn-Ons." The amended minutes were approved. The agenda for today's meeting was amended to allow for a discussion of ways to reduce the 2007 budget. Bob Miller said his agenda item can be covered in email, and he will email the IT Steering Committee/COBIT information to ELT for review.

Board Agenda

John Huber briefly reviewed the BOWW agenda. Approximately three visitors from the Crescent Hill Customer Advisory Group are expected to attend regarding the proposal for locating the chemical storage facility at Crescent Hill.

Budget Discussion

Greg Heitzman discussed the approach to identifying \$1.25 million in budget reductions for 2007. The Vice Presidents began discussion of potential reductions during this meeting, and will continue at another meeting on Wednesday afternoon, September 20, to complete the budget work. Greg Heitzman, Bob Miller and Amber Halloran will meet with John Huber on Monday, September 25, to discuss the recommended budget reductions.

Bin List and Agenda

Bill Meeks will send out an agenda for the next meeting.

Adjourned

**ELT Meeting Minutes
September 25, 2006**

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Absent: Greg Heitzman

Visitors: Kathie Johnson (Recorder), Eric Ayers, Jim Brammell, Spencer Bruce, Ron Green, Amber Halloran, Lynn Humphrey, Mike Isgrig, Brad McBride, Dallas Morrow

Review Minutes and Agenda

The minutes from the September 18, 2006 ELT meeting were reviewed and approved. The agenda for today's meeting was approved.

MDO Fire Hydrant Program

Eric Ayers, Brad McBride and Dallas Morrow presented an overview and current status of the MDO Fire Hydrant Program. The team's focus is to maintain fire hydrants to documented specifications, using the NWT and quality tools to identify and make improvements in the program. Operational excellence is achieved through the application of standard operating procedures, benchmarking industry practices, employee involvement and customer interaction. Their goal is to increase fire hydrant availability to 99.9% or better, and they are currently at 99.88%. The team currently services about 5,000 hydrants each year with a goal to service 7,500 hydrants in 2007. Dallas Morris discussed an innovation the team designed to keep hydrant barrels dry through the use of a buried drain tank system. This system will prevent freezing in the hydrant during cold weather. The team was congratulated on the use of quality tools in their process and their commitment to the success of the program.

Good Faith Bidding Program

Amber Halloran and Ron Green discussed improvements in the good faith bidding program. Ron Green reviewed the current GFE process and said they continue to look for improvements in the process.

Bin List and Agenda

ELT Leadership passes to Susan Lehmann next; however, she will be absent from the meeting next week. Bill Meeks volunteered to serve as leader on October 2. Bob Miller asked that the focus of the next ELT meeting be on the Capital and O&M budget update. Susan Lehmann will send out an agenda for the next meeting.

Adjourned

**ELT Meeting Minutes
October 2, 2006**

Attendees: Bill Meeks (Leader), Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller

Absent: Ed Chestnut, Karla Teasley

Visitors: Kathie Johnson (Recorder), Jim Brammell, Vince Guenther, Amber Halloran, Bruce Mingus, Kathy Schroeder, Jim Smith

Review Minutes and Agenda

The minutes from the September 25, 2006 ELT meeting were reviewed and approved. The agenda for today's meeting was approved.

Capital Budget Review

Jim Brammell provided background information on how the capital budget for 2007 was developed. Liaisons have been assigned to work with operating areas to better define project scopes of work.

Jim Smith provided a handout regarding the 2007 Capital Improvement Plan. The 2007-2016 CIP includes \$74.2 million in funding for 2007. Approximately 90% of that amount is for projects currently under design or construction. Funding for the 2007 plan was reduced by \$20 million from the amounts anticipated in the 2006 bond issue and CIP. The reduction resulted from cash flow adjustments and deferrals of transmission projects intended to improve system reliability and redundancy. John Huber asked if the problem has been resolved of who performs the value engineering analysis for projects. Jim Brammell indicated improvements have been made but the process is still being refined. Mr. Huber also commented that with a strategy where the focus is on growth instead of reliability, risk management becomes very important.

A follow-up action is to further assess the three transmission mains being deferred. Amber Halloran, Jim Brammell, Jim Smith and Ralph McCord will look at the Cardinal Hill Secondary Transmission Line and the Wolf Pen Branch 36" Transmission Line and portions of the Gene Snyder Transmission Line.

2007 O&M Budget Review

Amber Halloran distributed and discussed information regarding the 2007 budget. Assumptions for 2007 include budgeted water consumption of 38,200,000 and a rate increase of 6.5%. LRO continues to increase. Pension expense is up 25% over 2006 due to increased CERS rates. Mr. Huber requested a revised analysis of the rate equalization dates that were computed upon acquisition of the Goshen, Shepherdsville, and Kentucky Turnpike water systems.

Agenda and Bin List

Susan Lehmann will send out the agenda and bin list for the next meeting.

Adjourned

**ELT Meeting Minutes
October 9, 2006**

Attendees: Bill Meeks (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Review Minutes and Agenda

The minutes from the October 2, 2006 ELT meeting were reviewed and approved. The agenda for today's meeting was approved.

Review Board Agenda

John Huber reviewed the agenda. He commented it would be important to have thorough communication regarding the rate increase and budget, and to communicate the reasons for the 6.5% rate increase. An expectation should also be set that if we experience improved revenues in 2007, work may begin on some previously deferred items.

Financial Highlights for September 2006 (Greenbacks Report)

Amber Halloran and Sue Purdy distributed and discussed financial results for September. YTD water consumption was 720 million gallons lower than budget. Consumption for the month was 394 million gallons lower than budget.

Status of Policy and Procedures Development

Barbara Dickens distributed information on the current status of corporate policies and related procedures. She stated that Spencer Bruce and Jack Wang wanted procedures development to be uniform and had developed a standard procedure that could be used in other business systems. Karla Teasley suggested the BSOC should be consulted for input, and Barbara agreed to discuss this at the next BSOC meeting. Karla Teasley will discuss with John Huber whether there is a need for both a Business Development policy and a Regionalization (Business Development/Expansion) policy.

Open Time

RBI – Greg Heitzman said the RBI project bid opening will be moved to November 8 to allow California contractors to bid. A special board meeting will be scheduled during the last week in November for the purpose of approving a contract on RBI, Phase II.

Risk Based Decision Support – Bob Miller discussed the benefits of risk based decision making, and offered support to those needing assistance in building plans to reduce risk. He said risk assessments are intended to create actionable items that reduce risk, and can become part of the operating plan.

MSD Negotiations – Karla Teasley said meetings will be held soon with MSD to discuss the future billing arrangement.

Adjourned

ELT Meeting Minutes
October 16, 2006

Attendees: Barbara Dickens (Leader), Ed Chestnut, Bill Meeks, Bob Miller, Karla Teasley

Absent: Greg Heitzman, John Huber, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Roger LeMaster, Kathy Schroeder

Review Minutes and Agenda

The minutes from the October 9, 2006 ELT meeting were reviewed. Barbara Dickens modified the second and third sentences under the Policies and Procedures Development topic to read as follows:

“She stated that Spencer Bruce and Jack Wang wanted procedures development to be uniform, and had developed a standard procedure that could be used in other business systems. Karla Teasley suggested the BSOC should be consulted for input, and Barbara agreed to discuss this at the next BSOC meeting.”

The agenda for today’s meeting was approved.

Internal Control Survey

Bob Miller and Roger LeMaster discussed Roger’s memo to ELT on Management’s Response to the 2005 Internal Control Questionnaire. ELT discussed the proposal for CBSOs to meet with the System Advisory Councils regarding management’s response to opportunities for improvement. ELT agreed with the approach described in the memo. Karla Teasley discussed similarities between the OEI and the ICQ. She will discuss these similarities with Carl Blanton and how to communicate OEI results.

Executive Information for Daily Dashboard Measurement

Bob Miller and Ed Chestnut discussed their recommendation that key operational data (corporate measures and strategic measures) be prepared in a consistent and meaningful format and posted on the intranet, and updated as new data becomes available. The data would be presented with key performance indicator results, history, forecast, control limits, goals and trends. Bob and Ed will come back to ELT with examples of how the corporate measures data will be presented.

Open Time

AMR Fixed Network - Karla Teasley said Neptune is partnering with Hexagram on an AMR fixed network. Neptune/Hexagram will be at LWC on Wednesday, October 18 to discuss integration of the fixed network into the AMR system.

Agenda – Bob Miller will send out the next ELT agenda.

Adjourned

**ELT Meeting Minutes
November 6, 2006**

Attendees: Susan Lehmann (Leader), Barbara Dickens, Greg Heitzman, John Huber, Karla Teasley, Bill Meeks

Absent: Ed Chestnut, Bob Miller

Visitors: Kathie Johnson (Recorder), Diana Smith-Cohen, Sherry Dukes, Don McKay, Janet Muller, Kathy Schroeder

Review Minutes and Agenda

The minutes from the October 30, 2006 ELT meeting were approved as written.

Shared Hiring Goal

Kathy Schroeder discussed the EEO/AA 3rd Quarter Executive Summary she provided to ELT. There was one hiring opportunity in the 3rd quarter, and we met our goal with a minority hire in the Administrative Supervisory Group. For the total company, we are 15 over market for minorities, and 24 over market for females.

Janet Muller discussed efforts to provide a diverse pool of applicants. She met with a representative of the Urban League Workforce Development office to discuss improvement in the quality of referrals. She also discussed the possibility of hiring blind candidates experienced as customer service representatives. Employment of blind candidates would require the addition of new computers and "window eyes." Chris Goodloe is in the process of acquiring new PCs to test the use of "window eyes."

Barbara Dickens distributed a memorandum to ELT, Re: Boundary Conditions for Reliance Upon A Protected Category to Further Diversify our Workforce. Barbara discussed the legalities of using race or gender as a basis for making hiring decisions. She recommended LWC continue to focus its efforts on value-added minority and women recruitment efforts whereby qualified individuals are in the pool of candidates for available positions in the company.

Evaluation of Monthly Billing

Diana Smith-Cohen distributed a PowerPoint Presentation on a proposed monthly billing pilot in AMR service areas. The pilot is planned to begin in March 2007. The demographics of the AMR service areas are seen as a good cross section of customers for analysis. Among the benefits of monthly billing is the regularity of the bills that might encourage EFT payments, and smaller bills that are easier to pay. MSD is participating on the team so they will understand the advantages/disadvantages of monthly billing. The team will make their presentation to the BOWW Public Affairs and Customer Satisfaction Committee on Tuesday, November 7.

Open Time

CEO Search – Susan Lehmann reported the search firm was selected in September, and the BOWW Search Committee will discuss the search criteria with the Mayor. Susan expects the

search to begin in November and December. Internal and external candidates will be considered.

360 Update – Susan Lehmann discussed the need to complete 360 reviews by November 10.

EPA Full Cost Workshop – John Huber reported on his participation in the EPA workshop held at Michigan State University last week. The workshop's focus was on charging the full cost of water. EPA's estimate of the funding gap projects rates of CPI plus 3% will be required to close the funding gap. The group was organized by the EPA and consisted of representatives from water utilities, wastewater utilities, public service commissions, economists and rate experts. There was also a consumer advocate in the group. LWC's situation with decreased consumption per household and per capita is seen as the norm for the industry. Utility regulatory commissions and economists expressed concern regarding water utilities getting into other lines of business. EPA plans to further advance conservation, and Midwestern and Eastern utilities need to recognize and align to deal with the long term effects of conservation. De-coupling a higher fixed cost piece of the water bill from decreased variable income was discussed. Global warming and climate change is expected to continue, with arid climates experiencing more severe droughts, and severe storms and large rainfall events are projected to be more severe. How do we embrace conservation and adjust our marketplace to reflect these anticipated events?

Adjourn

**ELT Meeting Minutes
November 13, 2006**

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bob Miller, Karla Teasley

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Carl Blanton, Jim Brammell, Amber Halloran, Ralph McCord, Sue Purdy, Jack Wang

Review Minutes and Agenda

The minutes from the November 6, 2006 ELT meeting were approved. The agenda was reviewed and approved.

Review Board Agenda

John Huber reviewed the BOWW Agenda. An RBI award is being recommended for approval by the Board. If the BOWW takes action on the RBI award, the November 28 Special Board Meeting may be canceled. The Audit Committee report will be presented.

Review Operating Performance (Greenbacks Report)

Amber Halloran and Sue Purdy reviewed October financial results with ELT. Consumption is 1 billion gallons lower than budget through October, and 2.2 billion gallons lower than the same period in 2005. Water revenue through October 2006 is \$107,000 lower than last year, and \$2.6 million lower than budget.

Water Quality and Production System Certification

Carl Blanton concluded his review of this system in September. He commended the group for placing its documentation on the intranet in an easily accessible, easily navigable format. Jack Wang discussed the action being taken to implement recommendations made with respect to training needs, knowledge transfer, SOPs, etc. Greg said if the SOE's recommendation for on-the-job training and knowledge transfer for Maintenance Mechanics can be effected, he recommended certification of the Water Quality and Production System, and ELT agreed.

Pipeline Design & Construction System Certification

Carl Blanton reported there were no specific recommendations for this system. He commended the system for its thorough documentation and encouraged them to place the documentation on the intranet. Ralph McCord indicated that would be done. Greg Heitzman discussed the effect the reorganization had on this group, and said the group was a great success story. Jim Brammell recommended the Pipeline Design & Construction System be certified, and ELT agreed. The system will remain on a two-year certification schedule.

Open Time

Industry Talk: John Huber briefly discussed some topics he's been hearing about in the industry, including the efficient use of capital -- privately held companies vs. others, including regulated companies. Some believe privately held companies are doing better, and some believe regulated companies have more efficient use of capital. What is the appropriate level of operating risk? What level of back up facilities and investment is needed for reliability? What is the plan horizon?

Strategic Plan Powerpoint Presentation: Susan Lehmann mentioned the PowerPoint presentation was emailed by Vince Guenther to the Strategic Planning Team last week and CBSO's and VP's should rollout this communication to their employees by year end. If anyone anticipates issues with getting this completed, please talk to Susan.

Adjourned

**ELT- Strategic Planning Meeting Minutes
November 20, 2006**

Attendees: Susan Lehmann (Leader), Jim Brammell, Ed Chestnut, Barbara Dickens, Vince Guenthner, Amber Halloran, Greg Heitzman, John Huber, Bob Miller, Jim Smith, Karla Teasley

Absent: John Huber

Visitors: Kathie Johnson (Recorder)

Review Minutes and Agenda

The minutes from the November 13, 2006 ELT meeting were approved.

Strategic Planning Unfunded Gaps for 2007:

Strategy I – Water Quality

Distribution System Water Quality – Increase knowledge and expertise for water quality in distribution system area (\$75,000 to \$100,000 gap for FTE).

Advanced Treatment Technology at BE Payne and Crescent Hill Filter Plant Contract Administration for RBF – For the first two dot points under this topic, the estimate is a one-half FTE gap, which could be resolved through reprioritization or reallocation of internal resources.

Treat and Produce High Quality Water – There is an ISO funding gap. To have someone come in and do an assessment is estimated at \$15,000 to \$20,000.

Expanded Cross Control Protection – This could be resourced with 3 to 4 part time employees. It is planned to be funded with a fee based structure to be presented to the Board in March 2007.

Strategy II – Customer Satisfaction

Monitor and Address Affordability Issues – This includes monthly billing \$20,000 gap. Budget billing to be tied into the affordability issues. Budgeted gap at this time is uncertain.

Customer Education Program – This includes school programs and additional bottles \$50,000 gap if funded at full level

Timely Electronic Mass Communications – No specific plan in place. Potential gap.

Outdated Website - \$10,000 – \$20,000 gap. May look at using City's facility as a host. There remains an issue of who manages the site. One-half of a position,

which could be part time. Greg feels we need to have a web-based strategy in 2007 to leverage technology in an integrated approach.

Consulting Services for Application Development - \$15,000 gap as it relates to application development of GIS and ties into web-based applications.

Summary Billing Capacity - \$40,000 gap. Summary billing is for multiple locations broken down into 3-4 location systems.

Strategy III - Synergy

Ed Chestnut distributed a matrix of Synergy Opportunities. He said items 1, 2, 4 and 5 can be absorbed into internal resources. He asked ELT, specifically, the areas of responsibility, to look at the first item under No. 3 and let him know what the gaps are.

Vince Guenther commented we need a coordinated approach on how to implement some of the strategies under No. 4, "Develop local government and utility planning group for project planning and operational needs."

Strategy V – Growth

Economic Development - Bob Miller recommended LWC consider providing funding to governmental agencies for property acquisition in Jefferson County. The funding gap would be in funding and interest costs. Another potential strategic gap is a shortage of water transmission and sewer and treatment facilities in Southern Indiana to facilitate growth. Bob believes the best approach would be to develop concepts inhouse regarding the corporate structure and authority to do these kinds of things and then have them peer reviewed with other utilities who have achieved this.

Horizontal and Vertical Integration - There are gaps for future years related to dedicated resources for strategy innovation and business development. Internal and external resources will be needed to establish and maintain customer information, expertise and technology related to or impacting the water industry.

Barbara Dickens commented this will get us started, but there are not enough resources to get it done. There is a gap in coordinating opportunities and a long-term gap in having dedicated resources necessary for research and development.

Amber Halloran distributed a list of unfunded initiatives for consideration in 2007 that was developed by the BSOC. Greg suggested taking Ed's template as a tool for the BSOs to identify 2007 gaps and future year gaps. Amber will take this list of strategic items and have the BSOs prioritize the list.

Strategy IV – Organizational Effectiveness – Diversity measurement tool - \$16,000 gap for the first year of measures. Cost of \$20,000 to \$30,000 to replace Performance Impact System in 2008.

Bin List

Bob requested further discussion at a future meeting of who will release funding for items on the prioritized list developed by the BSOs (i.e., what is the process, and who approves the release of funding?) This item will be added to the bin list for future discussion.

Adjourned

**ELT Meeting Minutes
November 27, 2006**

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder)

Review Minutes and Agenda

The minutes from the November 20, 2006 ELT/Strategic Planning Meeting were reviewed and approved.

Preliminary Discussion of 2007 Goals:

2007 ELT Shared Goals –

- A. Implement 2007 Capital Improvement Program - Greg will work with Amber and Bob on the numbers for the goal statement. John asked them to develop a long-term goal and how it can be achieved.
- B. Create New Business Strategies to Ensure Revenue and Profitability – Susan suggested this could be a long-term goal with tasks to be completed in 2007. Greg, Karla and Bob will work on a task-related goal.
- C. BE Payne RBF III and CHFP Advanced Treatment Phase III – Bob suggested adding a risk monitoring element for Phase III, and said it may also be timely to update the economic analysis for Phase III. Greg said that the updated economic analysis might be a 2008 activity. Greg will discuss with Jack Wang and Kay Ball.
- D. Metered Water Ratio (MWR) Improvements – Karla will ask Nora Freeman to update the goal based on planned 2007 activities.
- E. Part 1 - M/WBE Spending Goal – Bob recommended that the goal should be updated to move the goal further towards the long term levels of 15% MBE spending and 5% WBE spending. He will update the metrics based on MBD Team recommendations for what is attainable and bring it back to ELT.
Part 2 – Hiring and Diversity Goal – Susan Lehmann recommended no changes be made to the goal, and ELT agreed.

Bob suggested six new goals topics for consideration:

- 1. Dashboard/standardize measurements.
- 2. Activity-based costing.
- 3. Business continuity planning.
- 4. IT Strategic Plan update.
- 5. Internal controls documentation/testing.
- 6. System certification components

The ELT picked disaster recovery and business continuity planning to add to the goals. A question to be answered is whether business continuity planning will encompass the IT Strategic Plan update. Bob will draft the proposed goal and bring it back to ELT for discussion.

2007 Incentive Plan Goals -

The Light Switch Goal statement/objective will not be changed. The measures will be reviewed.

- I. 2007 Net Operating Income – No goal statement/objective change recommended. The measures will be reviewed.
- II. Customer Needs and Expectations –ELT supported the goals as presented. Karla will revisit the goal after reviewing the 4th quarter CSI results.
- III. Reduce Microbial Risk/Become Compliant with EPA Partnership for Safe Drinking Water – Greg will incorporate ATT and Cross Connection program objectives and make them quantifiable.
- IV. Perform Work More Productively – Bob will review the goal to determine the appropriate denominator to use for this measure.
- V. Quality of Worklife – Susan will review the job satisfaction portion of this goal to determine which instrument may be used to provide this measure. Bob will review and update the vehicular accidents/lost-time injury portion.

Corporate Performance Award – Will be discussed at a future meeting.

Bin List and Agenda

ELT will use the December 18 ELT meeting to again review goals. Susan Lehmann will email the agenda for the December 4 meeting.

Adjourned

**ELT Meeting Minutes
December 4, 2006**

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Absent: Greg Heitzman

Visitors: Kathie Johnson (Recorder), Eric Ayers, Spencer Bruce, Amber Halloran,

Review Minutes and Agenda

The minutes from the November 27, 2006 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed. The topic of Funding Gaps will be deferred until January to allow discussion at today's meeting of November revenue results.

Winter Plan Presentation

Spencer Bruce gave an overview of the 2006 Winter Plan, i.e., levels of emergency, crews, authorizations, etc. The plan includes four levels of emergency: Emergency Levels 1 and 2 will be declared by the BSO-Distribution Operations, Level 3 will be declared by the Senior Vice President – Chief Engineer, and Level 4 will be declared by the President. Mr. Huber asked whether new Call Center employees had been given enough training to answer questions from customers during a winter emergency. Spencer said training has occurred. In answer to Bob Miller's inquiry, Spencer said the Radio Room still runs a paper system that backs up MDS in the event of a breakdown of the MDS system. Bob will check on the sufficiency of inbound telephone lines.

ELT Representation on Teams

ELT reviewed the list of Board, ELT and BSO Team Assignments for 2006-07 and recommended changes. Susan Lehmann will update and redistribute the list to ELT.

Bob will provide ELT a status update on Pandemic Planning for Louisville Water Company.

November 2006 Revenue Results

Revenue results for November are \$1.5 Million under budget. November is a month where significant variances from budget do not normally occur. Amber Halloran and Nora Freeman discussed possible reasons for this anomaly, and they suspect it is due to the billing cycle schedule. Other issues may include decreased consumption, the budget spread and decreased pumpage. Communication to the Mayor's office is required this week regarding the dividend payment. We should communicate LWC has experienced a greater than expected revenue shortfall that may affect the dividend payment. More analysis needs to be done.

Open Time

CEO Search – Susan Lehmann reported that Battalia Winston was in last week for meetings with the Search Committee, the Mayor, and John. The firm has vast experience and capabilities.

The team was reminded the December 11 ELT has been rescheduled to 10:00 a.m. that morning because of the diversity session at YUM! in the afternoon.

ELT Agenda

Susan will email the agenda for next week's meeting.

**ELT Meeting Minutes
December 11, 2006**

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Karla Teasley

Absent: Bob Miller

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Review Minutes and Agenda

The minutes from the December 4, 2006 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed.

November Financial Results (Greenbacks)

Amber and Nora Freeman are doing analysis of the billing cycle problem where under billing negatively affected November revenue. They expect the analysis to be completed this week. She said most accounts would be billed for less than 365 days at year end unless additional billings are made. Additional billings will be made, and care will be taken to assure no over billing of service charges. This handling has been reviewed with our external auditors.

Amber Halloran presented and discussed the November financial results. She said the dividend will be declared as budgeted. Mr. Huber requested an explanation be provided regarding wholesale customers' consumption due to the 2007 water rate increase. Wholesale customers' cost of service increased due to their consumption budget, while LWC's consumption decreased. Scott will follow up on whether the decrease in consumption by Oxyvinyl is a result of their intended use of well water.

BOWW Agenda

Mr. Huber reviewed the agenda, and reminded everyone of the need for concise reports.

ELT Agenda

Susan will email the agenda for next week's meeting, at which work will continue on the 2007 goals.

Adjourn

**ELT Meeting Minutes
December 18, 2006**

Attendees: Susan Lehmann (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Karla Teasley

Visitors: Kathie Johnson (Recorder), Janet Muller

Review Minutes and Agenda

The minutes from the December 11, 2006 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed.

Business Case for Diversity

Janet Muller gave a presentation on the business case for diversity, and distributed an article providing a portrait of area immigrants. LWC's customer base has become and will continue to become more diverse with the influx of ethnic minorities. Ethnic minorities are 16% of the population in LWC's service area. The Hispanic/Latino population is now represented in all 120 Kentucky counties and will continue to grow. LWC will need to position itself to deal with the changing demographics of its customer base in order to meet its strategic goals. Janet feels the next steps should include creating a team comprised of representatives of the Diversity Council, ELT, Purchasing, and Ron Green to develop a plan.

ELT Shared Goals

ELT continued their review of the ELT Shared Goals. Ed Chestnut made changes to the goals worksheet during the discussion. The Goals Review will be continued during the next ELT meeting.

Bin List and Agenda

Barbara Dickens becomes ELT Leader in January. Barbara will email the agenda for the next meeting.

Adjourn

**ELT Meeting Minutes
January 8, 2007**

Attendees: Barbara Dickens (Leader), Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller, Karla Teasley

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Barbara Crow, Amber Halloran, Scot Muhlenbeck, Sue Purdy

ELT Photo

Barbara Crow coordinated shooting a photograph of ELT for the 2006 Annual Report.

Review Minutes and Agenda

The minutes from the December 18, 2006 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed.

Review of December 2006 Financial Results

Amber Halloran discussed revenue results. She commented revenue was lower than anticipated. She is working with the Metering/Billing area to assure everything was billed. Bob Miller said an analysis of revenue and consumption is underway, but does not expect a dramatic change in revenue. Communication to the Mayor's office will need to be made shortly.

Proposed 2007 Goals Review

2007 ELT Shared Goals:

Goal A – Implement 2007 Capital Improvement Program. Complete, however the numbers still need to be validated.

Goal B – Create New Business Strategies to Ensure Revenue and Profitability. Complete.

Goal C – Implement Advanced Treatment Technology for the BE Payne Water Treatment Plant and Crescent Hill Water Treatment Plant. Complete

Goal D – Metered Water Ratio. This goal is being reevaluated by the team.

Goal E – M/WBE Spending. The MBE target spending goal is being raised 2% for each level. The hiring and promotions goal is being finalized by Kathy Schroeder.

2007 Incentive Plan Goals:

ELT reviewed and approved the proposed 2007 Incentive Plan Goals. Susan Lehmann and Carl Blanton will draft a goal on knowledge transfer to be included as part of Goal V – Provide an environment which values quality of work life and employee contribution and well being.

2007 Corporate Performance Award Worksheet:

The CSI Serviced Customers Goal was raised 5 points for Levels I, II and III.

Teams

John, Greg and Jim Brammell will discuss Karla's replacements on the teams in which she was involved.

Bin List and Agenda

Bob Miller requested an hour be added to the bin list to discuss Enterprise Risk Management.

Karla Teasley's Departure

John noted that this was Karla's last ELT meeting. John thanked Karla for her service to the Company and participation on ELT.

Adjourn

**ELT Meeting Minutes
January 22, 2007**

Attendees: Greg Heitzman (Acting Leader), Jim Brammell, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Absent: Barbara Dickens

Visitors: Kathie Johnson (Recorder), Amber Halloran, Carl Blanton, Johnnie Rice

Review Minutes and Agenda

The minutes from the January 8, 2007 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed.

Welcome Jim Brammell

ELT welcomed its new member, Jim Brammell, to the team.

Review of Unaudited Financial Results for December 2006

Amber Halloran presented unaudited financial results for December 2006. The external auditors will be at LWC for two weeks beginning Monday, January 29. Greg and Ed will work together to determine a reason pumpage was not down as much as consumption. Unaccounted for water does not account for the difference.

Amber discussed the top twenty, and mentioned Oxyvinyl's consumption was down as a result of using a second well. John Huber suggested a cross-connection check be done there, and Greg will follow up.

2006 Year End Performance Partnerships

Carl Blanton discussed steps being taken to assure accountability for ratings given during Performance Partnerships Reviews. Supporting data should be provided for "Exceeds Expectations" and "Exceptional" ratings. A review of definitions for "Exceeds Expectations" and "Exceptional" ratings will help determine the appropriate rating. Employees performing above the "Fully Achieves" level should be rewarded for their performance; however, documentation is needed to support those recommendations. Carl reiterated that an employee rating of "Fully Achieves" indicates a solid performer who is doing the job well.

Each performance evaluation will be reviewed by Carl and Susan to assure the appropriateness and documentation. Carl asked ELT to discuss the importance of this with BSOs.

Johnnie Rice presented examples of best practices for documentation of "Exceeds Expectations" and "Exceptional" performance ratings, and presented examples where those ratings were poorly documented.

Finalize Draft 2007 Goals

Susan said goals need to be finalized so materials can be sent to the Compensation Committee members in advance of its meeting next week. Susan, Ed and Carl will revise ELT Shared Goal E, and will email the change to ELT. Other ELT members are invited to work on the goal as well.

Two alternatives were considered to replace Incentive Plan Goal V, Part II (formerly OEI). ELT decided to adopt the alternative requiring annual performance goals be established as early in the new year as possible, where all non-union employees will submit a draft of their 2008 performance goals by December 31, 2007 and goals be finalized with each employee by March 1 of each year (beginning 2008)..

The second alternative was not adopted as a goal, but was considered valuable. The BSOs will be asked to consider how to proceed with the second concept to improve communication and knowledge between systems and processes.

Susan and Carl will send an email for an affirmative action goal. Jim Brammell will update the Capital Improvement Plan percentages and email the changes to ELT.

Bin List

Greg asked that Carl and Johnnie return in late March 2007 to review Performance Partnership data.

Adjourn

**ELT Meeting Minutes
February 5, 2007**

Attendees: Barbara Dickens (Leader), Jim Brammell, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Amber Halloran, Roger LeMaster

Review Minutes and Agenda

The minutes from the January 22, 2007 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed.

Winter Emergency Update

Greg Heitzman related the Call Center and Cashiers were short a total of seven employees. The abandonment rate was very high due to staff shortages, not because of call volume. Greg will be addressing with Human Resources how to shore up staffing.

Main breaks are high due to the colder temperatures. A Level I Emergency has been called, but that may escalate to a Level II or III if conditions warrant over the next day or so. Middletown and Capital Crews are being used to help repair broken mains. Metering is doubling up employees to minimize exposure to the cold. They are seeing frozen lines on the customer side, but not on the LWC side of the meter.

Combined Giving Campaign

John Huber distributed a projected rotation schedule of leaders for charitable giving campaigns that was based on the past rotation, for discussion by ELT. Susan Lehmann proposed there be one leader of the Combined Giving Campaign to oversee the effort. Barbara Dickens volunteered to head the campaign this year, and Jim Brammell volunteered to head the campaign in 2008. BSOs will be asked to head the three charities, and John Huber suggested they be provided expectations and a description of the role. We will leave off the Loaned Executive for United Way.

ProCard Audit and New Procedures

Amber Halloran discussed the recommendation by the auditors to take another look at the number of ProCard users and try to reduce the number. The BSOs will be asked to identify any infrequent users or other users where ProCards should be removed. Amber stressed the importance of allocating and approving the charges each month. A report will be issued each month listing designated approvers who did not approve charges.

Open Time

Bob Miller commented that after adjusting for consumption and inflation, water bills have remained flat over the last 18 years.

Agenda and Bin List

Barbara Dickens said NIMS training will be held during ELT next week in Training Room A, along with the BSOs.

Adjourn

**ELT Meeting Minutes
February 12, 2007**

Attendees: Barbara Dickens (Leader), Jim Brammell, Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Visitors: Kathie Johnson (Recorder), Don McKay, Glen Mudd, Maj. John Gofney (Trainer, Fire Department)

NIMS Training

The BSOs joined ELT at the beginning of the meeting to participate in National Incident Management System (NIMS) training. Glen Mudd introduced Maj. John Gofney of the Fire Department, who presented an overview of NIMS, and then presented an abbreviated training session. NIMS provides a consistent, nationwide framework to enable government, private-sector and nongovernmental organizations to work together during domestic incidents. At the end of his presentation, he directed staff to the FEMA website to locate IS-700 in the course list and take the test to certify the training. The BSOs left the meeting following the NIMS training.

Review Minutes and Agenda

The minutes from the February 5, 2007 ELT Meeting were reviewed and approved. The agenda for today's meeting was reviewed.

Open Time

John Huber said he is considering asking the various advisory boards for a luncheon meeting with Board members, and asked ELT to provide him any ideas or comments regarding such a meeting.

Bob Miller said Mt. Washington is experiencing financial concerns with its water system. Jim Smith, Patti Kaelin and Bob Miller will meet with the Mt. Washington City Council tonight.

2006 Goals Results

Ed Chestnut presented results for 2006.

ELT Shared Goals –

- A. Capital Improvement Plan Goal. Achieved a Level 5.
- B. New Business Strategies. The BOWW will make a final assessment for the level of achievement.
- C. Advanced Treatment. Achieved a Level 4.
- D. Metered Water Ratio Improvements. Achieved a Level 4.
- E. MBE/WBE and Diversity Goal. Achieved a Level 3 overall. (Achieved a 5 for the MBE/WBE portion. The diversity portion of the goal was not met).

Incentive Plan Goals -

The Light Switch Goal was not met.

- I. 2006 Net Operating Income Exceed the Budget. Goal was not met.

- II. Meet and exceed customer Needs and expectations. Achieved Level 1.
- III. Reduce Microbial Risk/Become Compliant with EPA Partnership for Safe Drinking Water. Goal was not met.
- IV. Perform Work More Productively. Goal was not met.
- V. Quality of Work Life. Part I-A, Number of Preventable Vehicular Accidents, was not met; Part I-B, Number of Lost Time Injuries, was met; Part II, OEI Question on Job Satisfaction, was not met.

2006 Corporate Performance Award –

The Award will be paid at 62.5%.

Agenda

Barbara will email the next agenda. The meeting to be held on February 26 will be devoted to Strategic Planning.

Bill Meeks will lead the February 19 meeting while Barbara Dickens is out of the office.

Adjourn

**ELT Meeting Minutes
February 19, 2007**

Attendees: Bill Meeks (Leader), Jim Brammell, Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bob Miller

Absent: Barbara Dickens

Visitors: Kathie Johnson (Recorder), Amber Halloran, Roger LeMaster, Don McKay

Agenda and Minutes Review

The February 12, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed and approved.

Review Final December Financial Results and January Financial Results

Amber Halloran reported completion of a successful audit of year-end financial results. There were no significant findings by the auditors. Amber discussed the year end financial results. Greg asked for additional information on cash paid to suppliers and others in 2006, which was \$3,732,479 more than in 2005. Amber will provide the detail information. Amber is in the process of creating a pumping/consumption spreadsheet as a management tool. Greg Heitzman commented estimated bills are high, and we need to better understand the calculation for estimated bills.

Board Agenda

John Huber said Stewart Conner and Joe Wise will be absent from the board meeting. Wendy Welsh will chair the meeting. Beverly is calling to see whether there will be a quorum present. The agenda is straightforward.

Enterprise Risk Management

Bob Miller discussed a presentation he made to the International Banff Workshop on Risk Management Cultures in the Water Utility Sector last December. He said the most pertinent part of the presentation for LWC was on pages 14-16. Bob Miller and Don McKay will make a recommendation on when and how the next update to strategic risks should be made. They will work with Jim Brammell on application of the tools for capital projects, and will continue to execute plans underway on disaster recovery.

Bin List and Agenda

Ed said SOE has been holding classes in statistical process controls, and he would like to present some best practice examples to ELT in mid March. Jim Brammell said he and Amber Halloran would like to roll out the new CPAC Rules to ELT in a 30 minute overview of the rule changes. Bill Meeks will email the agenda for the February 26 meeting.

Adjourn

**ELT/Strategic Planning Meeting Minutes
February 26, 2007**

Attendees: Barbara Dickens (Leader), Jim Brammell, Marianne Butler, Ed Chestnut, Vince Guenther, Amber Halloran, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Jim Smith

Absent: Bob Miller

Visitors: Kathie Johnson (Recorder)

Agenda and Minutes Review

The February 19, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed and approved.

Strategic Planning

Service Line Insurance Business Case - Vince Guenther provided an update on activities to date, and a timeline for future activities. The team has put together an aggressive timeline. They have discussed the program with three vendors, all of which offer a turn-key approach where LWC provides billing, but they market and manage the program. An RFP scope will be developed and advertised in the same time frame. Under the current schedule, proposals will be evaluated in April, and the contract awarded in May, with the contract to begin June 1.

Key issues to evaluate are extent of involvement of our call center representatives, what area will be responsible for resources for the initiative, and what new lines of services should be offered. Follow up items include responsibility for management of the initiative, Call Center involvement, billing interface, and contractor interface.

Bottled Water Business Case – Marianne Butler discussed the current cost analysis. A production cost of 20 cents per bottle is required before selling bottled water is a viable initiative. Other factors to consider include lease or purchase of a facility, resources, equipment, storage space, shelf life, and bottle and label costs. Marianne said discussions were held with a local company to discuss private labeling. She believes the company will want to lease our equipment to bottle for their customers. Amber said a contract for marketing expertise should in place by May. Greg suggested an update to the Board be made by the third quarter.

Revenue Recognition/Reporting and Evaluation/Review of Rate-Making Process – Amber Halloran discussed the analyses being done for revenue, meter reading, and rate making. Revenue analysis will include high level comparison of actual pumping and consumption to budgeted pumping and consumption, analysis of rate blocks sold versus rate-making analysis, and a model to predict consumption. The meter reading analysis will include analysis of meter reading schedules to assure all consumption will be read; analysis of variances to scheduled meter reading dates; and analysis of long and short bills in reporting and forecasting. Amber will take a hard look at ratemaking, and plans to model alternative ratemaking methods, by benchmarking against other utilities. A question to be considered is whether the general rate should subsidize a certain part of the customer base. Barbara Dickens noted we likely have demographic information on

customers who may qualify for any subsidies, should we decide to do so. By November of 2007, Amber expects to propose new alternatives to the rate making process.

Point of Entry/Point of Use Devices (POE/POU)

Jim Smith discussed POE/POU devices. The concept is for customers to purchase POU devices from LWC via their water bill and spread payments for the devices over time. Purchase of water filter replacements, at regular intervals, would also be paid through the water bill. LWC would purchase the devices through a goods contract. A marketing survey projected potential sales in approximately 21,000 homes. We are looking for lessons learned from others who pursued this business, and will meet with Don McKay to assess business risks.

Regionalization

Jim Smith covered progress being made with regionalization.

Bin List and Agenda

Barbara Dickens will email the agenda for the March 5 meeting.

**ELT Meeting Minutes
March 5, 2007**

Attendees: Barbara Dickens (Leader), Jim Brammell, Ed Chestnut, Greg Heitzman, Susan Lehmann, Bill Meeks

Absent: John Huber

Visitors: Kathie Johnson (Recorder), Don McKay, Carl Blanton, Amber Halloran, Kathy Schroeder, Claudette Doyle

Agenda and Minutes Review

The February 26, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed. The agenda topic of Diversity Role will be moved to another ELT agenda. Instead, Kathy Schroeder will present the EEO/AA 4th Quarter 2006 Summary.

January Financial Results

Amber Halloran presented a high level review of financial results for January. As follow up, Amber will email ELT the amount of consumption related to billing cycles moved from February to January. Sue will add the O&M cost per million gallons sold to the Key Financial Measures on future reports.

System Certification for Managing Business Risks

Bob Miller distributed the System Certification Review of the Managing Business Risks system prepared by SOE staff, along with Don McKay's responses to the three recommendations made. Don commended Carl Blanton on SOE's approach to the certification review. Don McKay concurred with each recommendation, and is taking steps to comply. Carl noted binders were well documented and SOPs were well prepared and easy to understand; also, SAC meetings are going well. The system met all elements for certification. ELT agreed the Managing Business Risks System should be certified.

IT Steering Committee Strategic Plan – Bob Miller said the IT Steering Committee's objective is to have an IT Strategic Plan ready for review by BSOs, ELT, and the Board in time for 2008 budget preparation. At Bob's request, ELT provided feedback on the merits of ERP (Enterprise Resource Planning) vs. Best of Breed vs. Open Source/Internal development. Greg expressed the opinion that ERP would be better suited to a large company like LG&E with a higher tolerance for risk than a water utility. Susan Lehmann had past experience with an ERP implementation and said it was disruptive to the organization. Greg believed implementation of a 3-year plan was unlikely and suggested a 5 to 7 year plan be considered.

EEO/AA Quarterly Update

Kathy Schroeder presented 4th quarter results. There were no hiring opportunities during the 4th quarter in the Administrative Supervisory or Technician Groups. During the year, there were three opportunities and two hires in both groups. The ELT commended HR for the good progress made during 2006.

Agenda and Bin List

Barbara Dickens will email the next agenda. Items to be covered will include CPAC rule changes and February financial results.

Adjourn

**ELT Meeting Minutes
March 12, 2007**

Attendees: Barbara Dickens (Leader), Jim Brammell, Ed Chestnut, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks

Visitors: Kathie Johnson (Recorder), Carl Blanton, Amber Halloran, Sue Purdy

Agenda and Minutes Review

The March 5, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

CPAC Rule Changes

Jim Brammell and Amber Halloran presented a high level review of CPAC rule changes. Jim Brammell said a more detailed presentation of the changes has been rolled out to those affected during the past month. Jim stated CPAC's role does not include technical review of projects, which should already have occurred within the Core. The role of CPAC is to assure CPAC procedures are followed for project proposals and change actions. The rule changes will further streamline and improve the process.

February Financial Highlights

Amber Halloran and Sue Purdy presented financial results for February. Water revenue was \$646,000 higher than the same period in 2006, but \$570,000 below budget. Amber stated the Contingency Fund was nearly depleted as a result of the winter emergency.

Board Agenda

John Huber reviewed the board agenda. He anticipates discussion regarding income and expense issues, and the CFO magazine article, "Water for Profit."

Diversity Role

Susan Lehmann discussed the feedback she received during focus groups on diversity at Louisville Water Company. Greg Heitzman recommended diversity training be continued. Efforts will be made to communicate LWC's successes to employees in areas like AA/EEO results and M/WBE efforts.

Executive Search

Susan Lehmann provided an update on the CEO search. The executive search firm is continuing to identify, interview and refer candidates to the Board search committee.

Agenda

The next agenda will include a presentation on Statistical Process Controls and budget status.

Adjourn

ELT Meeting Minutes
March 19, 2007

Attendees: Barbara Dickens (Leader), John Huber, Bob Miller, Ed Chestnut, Greg Heitzman, Susan Lehmann, Bill Meeks

Absent: Jim Brammell

Visitors: Dawn Czajka (Recorder), Ralph McCord, Bonnie Gimbel, Brad McBride, Dale Hall, Carl Blanton, Spencer Bruce

Agenda and Minutes Review (1:30)

The March 5, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Statistical Process Control Presentations (1:35)

Bonnie Gimbel provided an overview of Measures and Statistical Process Control Training being conducted with employees throughout the company by her and Ed Chestnut. The purpose of this training is to identify useful process measures, and to chart the data in a format that gives a picture of the process performance over time, enabling data based decisions. Bonnie introduced employees who have used the training to make process improvements in order to provide ELT specific examples of the value of this training.

Servicing Fire Hydrants –Brad McBride and his team of hydrant services calculated the number of hydrants that needed to be serviced daily according to the servicing schedule for hydrants. They flowcharted the process to eliminate waste and identified opportunities to increase efficiencies. Out of this analysis, they developed an SOP with a servicing checklist, changed the routing, stocked the trucks with necessary equipment, parked closer to the hydrants, etc. to increase productivity. Statistical process control gave them a tool to track their data, giving them information for additional changes. They had great success in increasing productivity to the levels needed.

Fire Hydrant Availability – Bill Meeks participated in the training to improve Fire Hydrant Availability, meaning hydrants are back in service within 72 hours or sooner. He relayed that we currently have 22,000 fire hydrants of which 99% are kept available due to our quick repair time. The data shows a process that is predictable with very little variation, and these results are outstanding compared to the national average.

Exercising Valves – Dale Hall reviewed data on the number of valves exercised per day. Technology has reduced the redundancy of exercising valves. The tools talked about in the training gave Dale a better method for tracking the data and a picture of how his process is performing over time so he can make data based decisions.

Bob commented employees updating their own charts can immediately determine if they are achieving their accomplishments. Ed Chestnut noted further that it is more gratifying to see the outcome when you monitor your own data. Ed stated there have been six classes conducted YTD with 2 more planned for 2007. Bonnie Gimbel remarked there have been 30-36 people trained so far. Bonnie invited the ELT to attend the next Symposium on August 21, 2007 at 8:00 a.m.

Budget Update (2:10)

Bob Miller said the risks we are facing in achieving earning objectives are variations in weather, higher expenses due to water quality, and liability exposure. The controls we have in place are budgeting water sales more conservatively, establishing the contingency, and funding the infrastructure replacement reserve. With 9 ½ months left in the year, Bob stated that we still run

the risk of low water sales, cost impacts due to winter emergency or water quality situations, and liability exposure. One of the controls, contingency, is no longer available due to the winter emergency costs. The question for ELT is whether the Company could get by with two controls or we should restore the third control. Bob and Amber Halloran recommended ELT quickly assess the status of potential risks, including interest rates which have fallen, and other O&M costs. He also suggested the BSOC identify two levels of prioritized expense reductions, first a \$850,000-\$1,000,000 range and a second level of \$500,000 in cuts after the initial cuts. Greg Heitzman remarked it is a good approach, but there would not likely be more than \$500,000 in discretionary costs without reducing positions because we already eliminated much of the discretionary items from the budget. Barbara Dickens commented that liability issues are, to an extent, unquantifiable.

Open Time (2:40)

Combined Giving Campaign - Barbara Dickens discussed the Combined Giving Campaign. She suggested having the breakfast on September 7th or September 11th with the campaign running from September 17-28. Barbara suggests we begin holding some events to raise money now, such as social events at the different locations. Barbara will work with Marianne Butler and the BSOC to determine the role of the BSO coordinators, who those individuals are, and how their roles will differ from the site coordinators, which will still be involved this year.

Third Street Office Appearance - John Huber said there are stacks of boxes in the hallways that need to be relocated or shredded.

"Undoing Racism" Program - John Huber summarized a diversity program called "Undoing Racism" sponsored by the State of Kentucky, the police, the NWACP, Health and Family Services, etc. and suggested we consider attending this program.

Agenda and Bin List (2:50)

Barbara Dickens will email the next agenda. Items to be covered will include a review of current Risks and their potential impact to the 2007 Budget. Susan Lehmann advised that Strategic Planning will not be on the next Agenda.

Adjourn (2:55)

**ELT Meeting Minutes
March 26, 2007**

Attendees: Barbara Dickens (Leader), Jim Brammell, John Huber, Ed Chestnut, Greg Heitzman, Susan Lehmann, Bill Meeks

Absent: Bob Miller

Visitors: Kathie Johnson (Recorder), Amber Halloran, Roger LeMaster

Agenda and Minutes Review

The March 19, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Budget Discussion – Earnings Risks and Controls

Amber Halloran distributed and discussed a Risk Catalog of the 2007-2021 Strategic Plan goal for return on equity, and the 2007 dividend payment objective. She is looking for ELT guidance in developing an action plan on budget reductions: target amounts, restrictions, and reporting budget reduction progress to ELT. Currently, LWC is \$670,000 under budget in net income, \$600,000 under budget in net revenue. The \$880,000 contingency fund has been depleted as a result of the winter emergency. Amber will meet with BSOs to discuss budget savings and boundary conditions for identifying savings. ELT will examine Strategic initiatives; BSOs will look at operational/tactical items, discretionary items, and will delay filling vacant positions. Corporate goals will be maintained. Any questionable items will be reviewed with the CBSO. The action plan is for expense reductions to restore the contingency fund, first round of reductions of \$500,000, and second round of reductions of \$900,000. Efforts to curtail discretionary spending should begin immediately.

LOJIC Policy Board

Jim Brammell discussed the response he is preparing to the LOJIC Policy Board regarding funding the Enterprise License Agreement. LWC will be unable to fund the incremental costs in its 2008 budget, but will commit to the same funding level in 2008 as in 2007. He will recommend the Policy Board consider delaying implementation until 2009.

There has been discussion between LOJIC and MSD to make LOJIC a separate entity. LWC has been asked if LWC could house LOJIC and its 12 employees here. Jim Brammell will look into this further.

ELT Leadership Change

Barbara Dickens will check to see who assumes leadership for the next quarter and will email that information to ELT.

Agenda and Bin List

The new ELT leader will prepare the agenda and bin list for the April 2 meeting.

Adjourn

**ELT Meeting Minutes
April 2, 2007**

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Susan Lehmann, Bill Meeks, Bob Miller

Visitors: Kathie Johnson (Recorder), Amber Halloran, Carl Blanton, Johnnie Rice

ELT Leadership

Ed Chestnut became ELT Leader today and will continue through the 2nd Quarter 2007.

Agenda and Minutes Review

The March 26, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Budget Reduction Update

Amber Halloran met last Tuesday with the BSOC regarding the budget reduction plan. There was good discussion on the risk catalog. They discussed boundary conditions for budget reductions, and the timeframe. They will begin to identify budget reductions after they receive the financial reports on Thursday, with reductions effective April 1 through year end. A follow up will be to review the full forecast on April 24.

360 Feedback

Johnnie Rice distributed a 360 Feedback Implementation Timeline for BSOs and Rollout Strategy for Process Owners and Managers. She discussed the process that will be followed. An assessment will be made following the first round of 360s to see if any improvements to the process are needed.

2006 Performance Partnership Year-End Evaluation Results

Carl Blanton distributed and discussed his memorandum summarizing 2006 Performance Partnership Evaluation results. He and Susan Lehmann reviewed all of the 2006 year-end reviews and contacted managers when additional information was needed, for answers to questions regarding ratings, and general concerns. They hope this has been a learning experience for managers in what is expected in terms of specific, measurable goals, supporting documentation for ratings, etc. Carl mentioned a class will be held on Specific, Measurable, Attainable, Relevant, Timely (SMART) goals, even though the date for submission of final goals has passed (March 30th). Participants in this April 5th class will be able to review their current 2007 goals and make any revisions necessary to ensure that they meet the SMART criteria.

Policy, Procedures & Work Instructions Update

Barbara Dickens provided an update. Policies, Procedures and Work Instructions have been posted on the intranet, under the General Counsel heading. Those that have been completed and approved have a link that will open the complete policy, procedure or work instruction when clicked. Barbara said more progress has been made than is evident from the intranet site; many procedures have been completed but were returned to the originators so the responsibility section could be added.

Open Time

Metro Government Structure - John Huber updated ELT on his recent meeting with the Mayor regarding Metro Government's organizational structure. The position of cabinet director no longer exists. Instead, there are 13 department heads. The Mayor will hold meetings with the "independent agencies" once a quarter. John said it continues to be important to have effective working relationships with the deputy mayors and department heads, and we must keep them fully informed.

1Q 2007 Customer Satisfaction Index – Greg Heitzman shared CSI results with ELT. Bob Miller suggested the data be analyzed using the Statistical Process Control Training to interpret and present the results of the CSI survey to the Board.

Armenia Trip – Bob Miller reported on his travel last week to Armenia with a description of "lessons learned".

Agenda and Bin List

Ed Chestnut will prepare and distribute the next agenda. The meeting is expected to be shorter than usual.

Adjourn

**ELT Meeting Minutes
April 9, 2007**

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller

Absent: Susan Lehmann

Visitors: Kathie Johnson (Recorder), Kathy Schroeder, Amber Halloran

Agenda and Minutes Review

The April 2, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Open Time

Rate Setting – Bob Miller said the process for setting water rates has remained basically the same for the last 20 years. Bob will be analyzing the best way for LWC to set rates, keeping within M-1 and PSC rate making practices, with a goal to create fewer year-to-year earnings swings. The rate setting objective includes recovery of reasonable costs; recovery of the cost of service for each customer class; and sending an appropriate price signal to customers. Bob expects to gain feedback on alternative changes to the rate model from the Customer Advisory Council, his peer group within the water utility industry and other economists. John Huber said the drivers for such a change are managing weather-related risks and restoring the infrastructure replacement reserve and contingency fund. ELT indicated they would like to be involved by discussing alternatives on the front end. This item will be added to the bin list.

Board Agenda Review

John Huber said the annual meeting consists of appointment of the board chair and vice chair, officers, and board committees. The rest of the meeting will be straightforward.

Agenda and Bin List

Ed Chestnut reviewed the bin list with ELT. Items to be added were Corporate Risk Assessment (Don McKay and Bob Miller); SOX 404 (Bob Miller); Water Rate Redesign (Bob Miller), and IT Strategic Plan Status Report (Bob Miller and Tony Gregory). Ed will email the April 16 agenda.

Review Operating Performance

Amber Halloran distributed and discussed financial results for March 2007. We are continuing the cost reduction initiative; however, the net income variance under budget improved.

Adjourn

ELT Meeting Minutes
April 16, 2007

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller

Absent: Susan Lehmann

Visitors: Kathie Johnson (Recorder), Jack Wang, Rengao Song, Amber Halloran, Emily O'Mara, Sue Purdy, Rhonda Thome

Agenda and Minutes Review

The April 9, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Cross Connection Control Program Update

John Ralston distributed a Powerpoint presentation on LWC's Enhanced Cross Connection Control Program for commercial and industrial customers. He gave an overview of the Cross Connection Control Program (CCP) and said the enhanced CCP will meet emerging water utility best management practices and future US EPA drinking water regulations. Feedback from customers regarding the program has all been positive. The program is expected to be self sustaining, with costs being recovered through an annual \$36 fee, billed at \$3.00 per month, or \$6.00 per bi-monthly bill to commercial and industrial customers, excluding free water accounts. CCP implementation will likely begin in September-October, 2007. ELT supports moving ahead with the CCP. The BOWW will be asked to approve the \$36 annual fee for industrial and commercial customers. Bob Miller said the board action will be to amend the tariff to allow this new fee.

Corporate Risk Assessment

Bob Miller distributed a LWC Strategic Risk Catalog, Strategic Risk Action Plans, and ELT Strategic Risk Map for review and discussion. Bob recommends ELT review the action plans for the current status and reasonableness. John Huber recommended a sub-team of ELT review the plans. Bob Miller said he and Don McKay will present a status report to ELT, along with a method to identify any gaps between the updated corporate strategic plan and the risk assessments.

Open Time

60" Main Break - Jim Brammell provided an update on the 60" main break on Palatka Road. The break involves a circumferential break in the pipe and will entail a replacement of 2-4 joints of pipe. Price Brothers is working to fabricate replacement material as soon as possible. The contractor is T&C.

Lab Reports – Bob Miller is working with Jack Wang on developing recommendations for applying financial reporting internal controls to water quality regulatory reporting.

Adjourned

ELT Meeting Minutes
April 23, 2007

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Carl Blanton, Don McKay, Glen Mudd

Agenda and Minutes Review

The April 16, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Supplying Financial Resources System Certification

Bob Miller reported on the status of system certification for the Supplying Financial Resources system. He stated that the system has accomplished nearly all of the certification requirements and he anticipated bringing a recommendation for approval next month. There were two findings in the system certification report that still needed further progress: system advisory council needs to demonstrate its sustainability and the operating plan need to be prepared in more detail. Amber Halloran will prepare a SFR system certification status report on resolution of outstanding issues. Bob Miller and Carl Blanton will bring the SFR System Certification topic back to ELT at a future ELT meeting.

John Huber commented SAC team meetings across the company should focus on system operating plans, internal customer satisfaction, etc., and Carl Blanton responded that part of the NWT Effectiveness Training Program is a discussion and clarification of the differences between NWT and SAC meetings.

Open Time

Affordability – Bob Miller will meet with Marion Gee of MSD tomorrow to discuss affordability issues as a result of new fees to be added to the bill to fund capital improvements to resolve the federal consent decree.

Water Rate Strategy – Bob Miller shared concepts about water rate structures involving the identification of costs to perform certain tasks on behalf of and at the request of customers. The costs could be recovered from fees rather than from water rates..

Diversity – Susan Lehmann said by mid May an outside consultant will be selected to facilitate development of a diversity vision, purpose, and priorities with ELT.

CEO Search – Susan Lehmann reported the candidates for CEO have been narrowed to the finalists. Meetings have been scheduled for the finalists to meet with the full board and with the Mayor. A decision is planned to be made at the May BOWW meeting.

Pandemic Planning

Don McKay distributed and discussed business continuity planning in the event of a pandemic event or widespread employee unavailability. Glen Mudd asked for ELT's comments on the incident command structure.

Agenda and Bin List

Ed Chestnut reviewed the bin list with ELT. Ed will email the agenda for the next meeting.

Adjourn

ELT/Strategic Planning Meeting Minutes
April 30, 2007

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Vince Guenther, Amber Halloran, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Susan Lehmann, Jim Smith

Visitors: Kathie Johnson (Recorder), Kay Ball

Agenda and Minutes Review

The April 23, 2007 minutes were reviewed and approved following clarification by Susan Lehmann to the paragraphs on Diversity and CEO Search. The agenda for today's meeting was also reviewed.

Hosting the KY-TN Water Professionals Conference

Kay Ball discussed the planning and involvement of LWC staff in the KY-TN Water Professionals Conference, being jointly hosted by LWC and MSD. Kay will let ELT know what resource needs still exist, but she mentioned volunteers were still needed for registrations and to serve as room monitors.

Quarterly Goals Review

Ed Chestnut distributed and discussed first quarter results.

ELT Shared Goals –

Objective A – Implement Capital Improvement Program – This objective was not on target for the first quarter, but will improve as capital spending occurs.

Objective E, Part 1, - M/WBE Spending - Amber Halloran will follow up to see why the MBE result is lower than projected.

Incentive Plan Goals -

Light Switch Goal – The goal was not on target; however, it doesn't include the contingency fund.

Goal III – Reduce Microbial Risk – John Huber said this goal may need to be modified to redefine Phase I of the Cross Connection Program.

Corporate Performance Award –

Everything was on target with the exception of cost control; if the winter emergency costs were backed out, the measure would probably be on target.

Strategic Planning – Marketing

Amber Halloran commented the Customer Advisory Council was updated at its last meeting on Strategy Innovation. The CAC members liked the concept of the point of use devices and filter sales, and had positive comments about service line insurance and bottled water. Amber said work continues on the marketing RFP. They hired a marketing consultant, Paul Schultz, who was deemed the best of the consultants, and was also the lowest bidder.

Regionalization Update

Greg Heitzman and Jim Smith gave an update on regionalization efforts.

John Huber congratulated Jim Smith, Bob Miller and Patti Kaelin on getting the wholesale water rate approved by the PSC for North Shelby, West Shelby and North Nelson.

Open Time

Legislation – John Huber discussed standards on MTBE, lead and perchlorate. LWC expects to have all its lead lines replaced by 2015. Vince Guenther said it might be helpful to discuss our position with John Yarmuth on MTBE, lead line replacement, and perchlorate standards.

60" Main Break on Palatka – Jim Brammell provided an update on the repair. The original repair work to the line was made, and the line should be back in operation tomorrow. However, a gate valve failed which will require keeping Palatka Road closed a few days longer.

Derby Preparations – Greg reported on preparations for the Oaks, Derby and related events. Staff is on call during Oaks and Derby, and crews are available in the event of a main break.

CSX Derailment Update – Residents displaced during the CSX derailment are now able to move back into their homes.

Adjourn

**ELT Meeting Minutes
May 7, 2007**

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Bill Meeks, Bob Miller, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Tony Gregory, Kathy Schroeder, Claudette Doyle

Agenda and Minutes Review

The April 30, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

Requests for Support of Not-for-Profit Community and Charitable Organizations

John Huber said the three charities approved by the Board of Water Works for LWC support are Metro United Way, Fund for the Arts and Water for People. Requests for support of other organizations and their fundraising efforts are not sanctioned by the Company. Employees who wish to engage in fundraising for other than MUW, FFA or WFP must do so by word of mouth only, and not use Newsleaks to promote contributions, etc. since it gives the appearance of "official" support by LWC and is contrary to LWC policy.

Review of Board Agenda

Mr. Huber reviewed the upcoming agenda. It is expected the BOWW will go into closed session to consider the selection of a new Louisville Water Company President to succeed Mr. Huber. Wendy Welsh will join the discussion by conference call. Announcements to the press and employees will be made immediately following a decision by the board. Mr. Huber said the remainder of the agenda is straightforward.

EEO Updates

Kathy Schroeder presented the first quarter Equal Employment Opportunity/Affirmative Action results. Claudette Doyle continues to work with outreach groups for recruitment. Categories identified as "less than market" for 2007 include Female – Professional Administrative, and Minority – Technicians. There were no hiring opportunities for either category in the first quarter of 2007. The EEO/AA results were very good overall. Kathy Schroeder will present the EEO updates to the BSOC tomorrow.

IT Strategic Plan Update

Bob Miller will provide a progress report to the board tomorrow on the IT Strategic Plan. He expects to make a second status report prior to presenting the plan for adoption. Once the plan is near completion, it will be reviewed by peer groups and an external consultant.

Bin List

Ed will add the topic of President Transition to the agenda for next week. Greg Heitzman briefly discussed a future topic on the bin list, Customer Service Call Center Strategy, which Susan Camp and Chris Goodloe will present to ELT in mid to late June. Ed Chestnut will email the next ELT agenda.

Adjourn

**ELT Meeting Minutes
May 14, 2007**

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Bob Miller, Susan Lehmann

Absent: Bill Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Agenda and Minutes Review

The May 7, 2007 minutes were reviewed and approved. The agenda for today's meeting was also reviewed.

April Financial Results

Amber Halloran and Sue Purdy presented financial results for April 2007. Amber distributed the 2007 Pumping/Consumption Management Report. Greg Heitzman discussed the need to identify \$900,000 in budget savings to replenish the contingency fund, which was nearly depleted during the winter emergency. Amber Halloran, Bob Miller and Greg Heitzman will meet with the BSOC to discuss the need for the additional budget savings and to communicate new boundary conditions to identify the savings.

President Transition

John Huber said the transition has begun and will be finished by August 1. ELT discussed items currently underway. The topic will be added to the bin list for biweekly discussion.

Long-Term Agenda Planning

Bob Miller recommended the following:

1. Review ELT's team charter.
2. Timely review of 2008 budget to allow analysis of implications on long-range financial planning.
3. Review budget development process.
4. System certification review dates.
5. Strategic plan risk identification and assessments.
6. Conversion of fixed costs to variable costs.
7. Internal controls survey.
8. Discussion of fear of reprisal issues.

Cancellation of June Board Meeting

The June BOWW meeting has been canceled. Documentation will be collected and published internally to allow LWC to monitor its operations. No report will be made to the BOWW unless something significant surfaces during review of monthly reports. An hour will be reserved to review reports and financials for June.

Open Time

Diversity Consultant – Susan Lehmann said a consultant will be meeting individually with each ELT member. She will then facilitate a joint session on June 4 to establish a vision and priorities for Diversity going forward.

Regionalization – Greg gave a brief update on activities underway.

Agenda and Bin List – Ed Chestnut will send out the May 21 agenda and will update the bin list.

Adjourn

**ELT Meeting Minutes
May 21, 2007**

Attendees: Jim Brammell (Leader), Barbara Dickens, Greg Heitzman, John Huber, Bob Miller, Susan Lehmann

Absent: Ed Chestnut

Visitors: Kathie Johnson (Recorder), Amber Halloran

Agenda and Minutes Review

The May 14, 2007 minutes were reviewed and approved following clarification by Susan Lehmann on the Open Time paragraph regarding the Diversity Consultant. The agenda for today's meeting was also reviewed.

Process for Reviewing Preliminary 2008 Annual Budget (O&M and Capital) and Long-Range Financial Plan

Bob Miller led discussion of the budget process. Ideally, timing will allow the 2008 budget and financial plan to be presented together at the board meeting in October. Budgets will be developed based on the "as is" organization. The Capital budget will be developed by CPAC, with notice to ELT. The team consisting of Amber Halloran, Ed Chestnut, Nora Freeman, Jack Wang, Diana Smith-Cohen, Roger LeMaster and Sue Purdy, currently working on the management report for pumping, consumption and modeling, will concurrently work on total sales projections. Bob and Greg Heitzman will work on boundary conditions for O&M budgeting. The BSOC will be asked to develop and prioritize the unfunded initiatives list. Bob Miller and Amber Halloran will present a recommended timeline, along with budget meetings to place on ELT's calendars. A budget meeting of 1.5 hours will be added to the ELT bin list. Amber will meet with the BSOC tomorrow, and she will convey their feedback on the budget process to ELT. Approval of the O&M budget will be by ELT consensus.

President Transition

Ron Raque will conduct phone interviews with each ELT member in advance of a New Manager Assimilation exercise. The offsite meeting, scheduled for July 2 at the Home of the Innocents, will be facilitated by Ron Raque.

Open Time

Talent Resource Planning (TRP) - Susan reminded the group that TRP forms are to be updated and submitted by the end of June. She also said the TRPs for the President's direct reports will be updated during the second quarter Performance Partnership Reviews.

New Meter Reader – Bill Meeks commented a new hire will be going directly into meter reading, with employee orientation to be held in approximately six weeks. Greg Heitzman commented inadequate staffing in meter reading directly impacts customer satisfaction, customer calls, etc.

Regionalization Update – Greg Heitzman provided an update of regionalization efforts.

Agenda and Bin List

The May 28 ELT meeting will be canceled due to the Memorial Day holiday. The June 4 meeting will be devoted entirely to Diversity. The first budget meeting will be held June 11. Ed Chestnut will email the agenda for the June 4 meeting.

Adjourn

**ELT Meeting Minutes
June 4, 2007**

Attendees: Ed Chestnut (Leader), Jim Brammell, Greg Heitzman, John Huber, Bob Miller, Susan Lehmann

Absent: Barbara Dickens, Billy Meeks

Visitors: Debra Walton, Tony Gregory, Andrew Brandt (EMC), Paul Thomann (EMC), Graeme Tosh (EMC),

Agenda and Minutes Review

The May 21, 2007 minutes were reviewed and approved following clarification by Susan Lehmann on the President Transition paragraph regarding the New Manager Assimilation exercise. The agenda for today's meeting was also reviewed.

Diversity – Establishing a Vision and Priorities

Susan Lehmann introduced Debra Walton, a Diversity Consultant. Debra made a presentation based on her individual interviews with each ELT member and her subject knowledge. She led a discussion of the topic enabling the ELT to develop a vision and priorities for Diversity at LWC going forward. This work was not completed and will be continued at a future ELT meeting as soon as scheduling will permit.

Results of Business Impact Analysis

Tony Gregory introduced representatives from EMC, who gave presented a summary of the Business Impact Analysis report. Their recommendations included:

- Establish a BC/DR Steering Committee
- Validate the Business Impact Analysis results
- Execute a business recovery gap analysis
- Priority business process recovery order
- Implement a Disaster Recovery Tier program
- Continue and expand the Business Impact Analysis process

The ELT requested that Bob Miller and Tony Gregory develop a recommendation for proceeding with the validation of the Business Impact Analysis results.

2008 Budget Schedule

The ELT accepted the budget development schedule previously distributed by Amber Halloran.

2007 Water Professionals Conference Attendees

The ELT agreed to support an expenditure of up to \$5,000 to allow up to 50 employees to attend the Water Professionals Conference in July in Louisville on day passes.

Agenda and Bin List

Ed Chestnut will send out the next ELT Agenda.

Adjourn

**ELT Meeting Minutes
June 11, 2007**

Attendees: Ed Chestnut (Leader), Jim Brammell, Greg Heitzman, John Huber, Bob Miller, Susan Lehmann, Barbara Dickens, Bill Meeks

Visitors: Amber Halloran, Sue Purdy

Agenda and Minutes Review

The June 4, 2007 minutes were reviewed and approved.

May Financial Reports - Amber Halloran and Sue Purdy presented May Financial Highlights. Revenue was up in May with YTD revenue \$407,000 above budget. During the month it was discovered Maverick Steel was under-billed by approximately \$580,000 (\$230,000 water) over the past 18 months. Nora and Amber are working with Maverick and MSD (Marion Gee) on a payment plan for recovery of this under-billed revenue.

O&M expenses are \$786,000 under budget. Contingency funds (budgeted in December) have been allocated to the operating areas to cover winter emergency expenses. Labor is higher than budget due to the winter emergency overtime and lost time allocation. There are 22 vacancies, however 8 union positions are not funded until July 1. Bad debt is under budget \$152,000. Material and supplies are under budget by \$772,000. The BSOC continues to work on a cost reduction plan with 2 levels: Level 1 of \$500,000 savings and Level II with \$900,000 savings. The \$900,000 savings target is established to allow restoration of the contingency in the event of another emergency and/or low water sales for the year. The Capital program is 25% expended with \$22.1 million through May, similar to 2006 levels of spending. External capital contributions are up substantially at \$9.8 million through May.

June Board Meeting - ELT discussed the method of communications to the Board when regular monthly meetings are not held. With no meeting in June it was agreed that the written officer reports will be forwarded by Wednesday to Barbara, who will prepare a packet to send to the Board by the end of the week.

2008 Budget Schedule - The ELT accepted the budget development schedule distributed by Amber. Greg advised that the 2008 budgets should be prepared using the as-is organizational structure, using a 3 percent target. Greg sees four major areas for new funding in 2008: 1. Increasing the Contingency Reserve and Infrastructure Reserve; 2. Increase funding for Top Line Growth Strategy; 3. O&M funding restorations for reductions in 2003, 2004, 2006; and 4. Debt service for an estimated \$30 million borrowing for the Capital Program. Water sales will be budgeted at the same level as 2007. The anticipated rate increase will range from 5.5 to 6.5 percent.

President Transition - Greg, and Susan discussed the plan for transition over the next 2 months. Ron Raque will be conducting an assimilation exercise for ELT on June 25th. This exercise will include discussion of Greg's vision, organizational strategy, review of the organizational culture survey, and the changing role of Greg from peer to boss. Greg is also meeting with all Board members and ELT members to discuss the transition, vision, and strategy. With Greg's promotion, there will be a vacancy with the Vice President of Operations, and Greg is working with Susan on organizational alternatives to fill this vacancy. There is some anxiety over this transition, and Greg agreed to send out a communication to employees regarding the transition

Open Time - Greg Heitzman and Jim Brammell discussed the production strategy for high water demand, PAC feed for Taste and Odor control for MIB and Geosmin, and the renovation work to the coagulation basins at BE Payne Plant. Currently BE Payne is limited to 45 MGD. Within the next week, the plant will be restored to 60 MGD capacity for summer demands, and work on the basins will resume in the fall.

Agenda and Bin List - Ed Chestnut will send out the next ELT Agenda.

Adjourn

ELT Meeting Minutes
June 18, 2007

Attendees: Ed Chestnut (Leader), Jim Brammell, Barbara Dickens, Greg Heitzman, John Huber, Bob Miller, Susan Lehmann

Absent: Billy Meeks

Visitors: Kathie Johnson (Recorder), Spencer Bruce, Bonnie Gimbel, Kathy Schroeder, Cindy Kowalski, Roger LeMaster, Johnnie Rice, Amber Halloran

Agenda and Minutes Review

Minutes from the June 11 meeting will be forwarded to ELT by Greg Heitzman for review. The agenda for today's meeting was reviewed and approved

System Certification Review of Managing Distribution Operations

Bonnie Gimbel congratulated the system for exceeding certification elements. Highlights included documentation on the intranet, a vision statement and recognition efforts for the response to the winter emergency and CSX derailment. Spencer Bruce commented 7 best practices were identified during the certification process. There was one minor finding regarding NWT meeting minutes that has been addressed. Greg Heitzman recommended certification of the Managing Distribution Operations System, and ELT concurred.

Model/Tool for 360 Feedback Development Planning

Johnnie Rice distributed a 360 tool for identifying areas needing improvement that can then be added to the Individual Professional Development Plan. ELT asked Johnnie to email the sample tool and a blank version to them for their use.

Open Time

System Demand Issues – Greg Heitzman updated ELT on system demand issues resulting from irrigation during the hot, dry weather.

July 30 ELT Meeting – Susan Lehmann suggested, and ELT agreed, to have a luncheon at the University Club on July 30, which will be the last ELT meeting John Huber will attend. Kathie Johnson will make arrangements with the University Club.

Smoking Ban – The smoke-free ordinance goes into effect July 1, 2007. An article regarding the ordinance appeared in the July 18 issue of Newsleaks. All LWC facilities must maintain a smoke-free environment, which includes the garage at Third Street and vehicles owned or leased by LWC. The article mentions smoking cessation programs available in the Louisville area for those who wish to quit smoking.

Code of Ethics Survey

Kathy Schroeder and Cindy Kowalski said 20 Code of Ethics surveys required follow up. Of those, only one required further investigation. Team culture issues identified in the follow up investigation will be addressed.

2008 Water Consumption Recommendation

Amber Halloran distributed a chart on budgeted, actual and predicted total water sales covering the period 1990 – 2025. She also presented actual consumption vs. budgeted consumption for the years 2002 - 2007, and included a budget recommendation for 2008 consumption.

Agenda and Bin List

The June 25 ELT meeting will be canceled because of the June 24-28 AWWA Annual Conference. The July 2 ELT meeting will be held offsite at the Home of the Innocents, and will be devoted to a Manager Assimilation meeting. Jim Brammell becomes ELT leader for the third quarter, and he will send out the agenda for the July 9 meeting. The Water Professionals Conference will be held in Louisville the following week, so the July 16 ELT meeting is canceled. It may become necessary to schedule additional ELT meetings to cover agenda topics and budget reviews. Ed Chestnut and Jim Brammell will meet to decide whether additional ELT meetings should be scheduled.

Adjourn

**ELT Meeting Minutes
July 9, 2007**

Attendees: Jim Brammell (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, John Huber, Bob Miller, Susan Lehmann, Billy Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Agenda and Minutes Review

Minutes from the June 11 and June 18 meetings were reviewed and approved as written. The agenda for today's meeting was reviewed and approved.

President Transition

This agenda item occurs every two weeks; however, there was nothing new to report at this meeting.

Review Board Agenda

John Huber reviewed the agenda. A new board member, Ed Crooks, will be sworn in at the board meeting, and outgoing board member Joe Wise will be presented with an engraved julep cup in recognition of his service on the board. The remainder of the board meeting should be straightforward.

Water Supply to Central Kentucky

Greg Heitzman updated ELT on the water supply proposals for Central Kentucky.

Greenbacks Report

Amber Halloran and Sue Purdy presented the financial results for June 2007. Although June was a good month in terms of consumption, revenue was lower than expected. This was due, in part, to bill read dates that did not include all the peak consumption days in June resulting from the hot, dry weather. It was noted that unaccounted water was high for the month, indicating that a large amount of water is still on the meters to be read. We are expecting more favorable results from July and August for consumption and revenue. Sue will review the top 20 graph, make necessary changes and redistribute.

2007 Budget Reductions and Forecast

Amber Halloran discussed budget reductions identified by the BSOs. The BSOs identified savings of \$399,755, and identified another potential savings of \$341,445. Amber and Sue will prepare further labor analyses to look for potential savings. Amber will distribute the June forecast to BSOs with instructions to continue to defer expenses until we have July and August revenue. This topic will be added to the bin list for discussion again in two to three weeks.

Open Time

2Q CSI Results – Greg Heitzman discussed the latest results. Ed Chestnut will analyze the results for any trends in the data.

Bottled Water in the News – John Huber reported that bottled water has been banned in San Francisco city government departments. Reasons cited included a billion bottles a year going to the state's landfills, energy used in producing, transporting and disposing of the bottles, etc.

Agenda and Bin List

The July 16 ELT meeting is canceled due to the Water Professionals Conference. Jim Brammell will prepare and distribute the agenda for the next ELT meeting, which will be held July 23. Bob Miller reported he will be on vacation on July 23.

Adjourned

**ELT Meeting Minutes
August 6, 2007**

Section under SOE Certification was modified to include reference to the other two best practices, as discussed and agreed to in August 20 ELT meeting.

Attendees: Jim Brammell (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, Billy Meeks

Absent: Bob Miller, Susan Lehmann

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy

Agenda and Minutes Review

Minutes from the July 9 meeting were approved. The agenda for today's meeting was reviewed and approved.

Update on the Combined Employee Giving Campaign

Barbara Dickens is leading the combined giving effort this year. The campaign will run during the period September 17 through September 28. Amber Halloran, Jack Wang and Spencer Bruce are heading up the individual charities, and the BSOs will rotate that responsibility in coming years. Marianne Butler is assisting and coordinating events. A Leadership Breakfast will be scheduled. September 7 and September 11 are possible dates for the breakfast. Barbara Dickens will furnish Greg Heitzman information on employee giving for the past five campaigns.

Quarterly Goals Update

Ed Chestnut presented an update on shared goals.

2007 ELT Shared Goals:

- A. Implement 2007 Capital Improvement Program – Q2 is not on target. We anticipate 90% expended for the revised capital program; meeting the \$68 million will be a challenge.
- B. Create New Business Strategies to Ensure Revenue and Profitability – On Target for a Level 3 rating.
- C. Implement Advanced Treatment Technology - On Target for a Level 3 rating.
- D. Metered Water Ratio Improvements – On Target for a Level 5 rating. Ed Chestnut will verify the second quarter Level Achieved results with Metering Services.
- E. M/WBE Spending – On Target, overall, for a Level 3 rating.

2007 Incentive Plan Goals

Light Switch Goal – On target.

- I. 2007 Net Operating Income Exceed the Budget – On target.
- II. Meet and Exceed Customer Expectations – On target.
- III. Reduce Microbial Risk – On Target.
- IV. Perform Work More Productively – Expect to be on target by 4Q.
- V. Provide Environment which Values Quality of Work Life – Item I, Part A (Preventable Vehicular Accidents) is on Target; Part B (Number of Lost Time Injuries) is Not on Target. Item II (2008 Performance Goals draft submissions) will be determined at the end of 4Q.

2007 Corporate Performance Award

CSI Serviced Customers – On Target

Safety – Lost Time Injuries – Not on Target (7 lost time injuries out of a goal of less than 12 for the year)
– Preventable Vehicular Accidents – On Target (5 accidents with a goal of 24 or less for the year).

Cost Control – Not on Target

Turbidity, Coliform and Chlorine – On Target

SOE Business System Certification

Roger LeMaster presented certification audit findings for the Supporting Organizational Effectiveness system. He commended them on meeting or exceeding requirements for system certification. Four best practices were noted, related to: 1) documentation of processes, 2) employee empowerment, 3) customer service, and 4) knowledge management. The SOE system's partnership agreement has expired, however, it cannot be considered to be updated until such time as Greg Heitzman and Bill Meeks renew the Partnership Agreement between LWC and Local 1683. After that is accomplished and the SOE system's partnership agreement is updated, SOE will either bring the certification back to ELT or submit for approval through email.

Open Time

Strategic Planning – Greg Heitzman met with Karen Wunderlin last week. She will assist LWC in monitoring and implementing the Strategic Plan.

Vision Communication – Greg will extend ELT meetings by 30 minutes over the next 5-10 weeks in order to share his vision for making LWC the best water utility in the United States. The meetings will occur only if all ELT members can be present.

Agenda and Bin List

Jim Brammell will send out the next ELT agenda, which will include the Greenbacks Report and Board Agenda review.

Adjourned

**ELT Meeting Minutes
August 13, 2007**

Attendees: Jim Brammell (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, Susan Lehmann, Bob Miller, Billy Meeks

Visitors: Kathie Johnson (Recorder), Amber Halloran, Sue Purdy, Carl Blanton

Agenda and Minutes Review

Minutes from the August 6 meeting were approved. The agenda for today's meeting was reviewed and approved.

BOWW Agenda

Greg Heitzman reviewed the agenda. Wendy Welsh will cover the Audit Committee Report. Gerald Martin will participate in the meeting by telephone, and Ed Crooks had another commitment and will not be attending.

Greenbacks

Amber Halloran reviewed July financial results. Amber will furnish the previous month's overtime charges to Greg. She will also prepare an updated forecast based on July sales and pumpage. Greg requested that proposals for expenditures of unbudgeted funds greater than \$20,000 in 2007 be forwarded to ELT for review and approval

System Certification of Supplying Financial Resources

This system was due for certification last December. Bob Miller discussed each recommendation and the steps taken to comply. Carl Blanton recommended approval; however, the SFR system's partnership agreement is out of date until such time as the Partnership Agreement between LWC and Local 1683 is renewed. Certification of SFR is approved upon renewal of the Partnership Agreement between LWC and Local 1683.

Open Time

Hot Weather – Greg said we are pumping 184-185 MGD. Jack Wang is monitoring algae blooms. Treatment for taste and odor will be expensive. Another temporary booster pump is being considered to pump more water to Bullitt County. We are keeping up with the Shelbyville Road corridor.

Statistics Process Control – A training session will be held Tuesday, August 21. ELT members are urged to attend if time permits. Bob Miller will address the training session next week, and will give examples of the types of information management would want to see.

Agenda and Bin List

Jim Brammell requested dates be provided, where possible for items on the bin list. He will send out an agenda for the next meeting.

Adjourned

**ELT Meeting Minutes
August 20, 2007**

Attendees: Jim Brammell (Leader), Ed Chestnut, Barbara Dickens, Greg Heitzman, Susan Lehmann, Bob Miller, Billy Meeks

Visitors: Kathie Johnson (Recorder), Susan Camp, Chris Goodloe, Amber Halloran

Agenda and Minutes Review

Minutes from the August 13 meeting were approved. Roger LeMaster, through an email, requested revision to the previously approved August 6 minutes. He requested the paragraph under the SOE Certification topic include reference to four best practices identified in the audit instead of two. The August 6 minutes will be modified to include reference to the four best practices, and the minutes will be notated that the change was made. The agenda for today's meeting was reviewed and approved.

Customer Service Call Center Strategy

Susan Camp and Chris Goodloe gave an overview of the Call Center Resourcing Strategy. Staffing strategies include partnering with other agencies to create a temp pool, and cross training of cashiers and NSA staff. Benchmarking was done with other small call centers (those with fewer than 20 reps) on staffing, hours of operation, call volumes, abandonment targets, service level targets and IVR usage. Plans for improvement were discussed to reduce call volume, revise call center metrics, optimize productivity, enhance resource availability, enhance technology, and partner with internal suppliers/customers.

Water Rate Redesign

Bob Miller discussed water rate redesign issues. He expects the overall rate increase for 2008 to be in the 5.5% to 6.5% range. We will be considering a new charge for service offs and ons to recover the cost of creating a final bill and beginning a new account. We plan to make minor changes to the rate structure in house and use CDM to look at the entire rate model and prepare recommended changes and enhancements.

Closed Session

Adjourn
