RE: Verizon Wireless Cellular Site  
Grayson, Carter County, Kentucky  
KYPSC Case No. 2007-00334

Dear Sir or Madam,

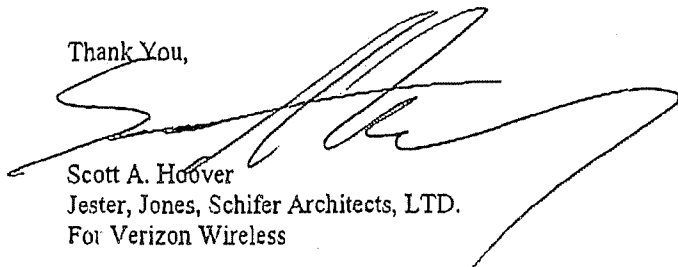

This letter is to serve as documentation that Verizon Wireless is making a change to its cellular communication tower located at 350 Frontage Road, Grayson, Kentucky. The 305' (H) lattice tower is already standing, and no groundwork will be completed. However, Verizon Wireless would like to make some changes to the existing antennas.

At present, there are a total of (12) panel antennas located at a centerline of 300'. Verizon Wireless would like to remove (6) of these antennas and replace them with upgraded panel antennas.

Please confirm, by signing below and returning this letter by fax to (740) 387-0318, that we do not require a permit or further approval from your office to complete the above mentioned work

Should you have any questions, feel free to contact me at (740) 382-6840.

Thank You,

Scott A. Hoover
