Re: PSC Case 2008-00568

Dear Sirs:

This quick note is to please ask you all to not even consider the 50.8% increase which Utilities Inc. has requested for water rates in Clinton, Ky. For the most part the folks that live in Clinton are on fixed incomes for the most part and are strapped financially just to pay the everyday expenses just to survive. We request that if an increase is to come that the lowest possible increase would be passed. Most of the folks that live in Clinton could not afford a trip to Frankfort, because of money, health and transportation, so as citizens of Clinton and as a council person, I am requesting that you as the PSC would consider holding a public meeting in Clinton concerning the rate increase. I, as a council member, would not be doing my job as an elected official, and as a Utilities Inc. customer. If I did not protest such a high increase. Thank you for your consideration in this matter.

Mickey W. Beck
