Dear Sir:

This letter is to address the outrageous request of Utilities, Inc. for a 50% increase in water and sewer rates in Clinton, Ky.

I am not interested in padding the pocket of Utilities, Inc. or their mother AIG. This is a perfect example of greed that has put our country in the terrible dilemma we're in. If they put in a 14 million dollar computer system, then they can pay for it out of the healthy profits they already receive. If this kind of nonsense continues, they are going to resurrect the Boston Tea Party.

I am requesting a town meeting in Clinton, Ky to discuss this action. If we have any democracy left in the United States we want to put it into action. Let the people decide.

Sincerely,

Calvin K. Clark
