PUBLIC SERVICE  
COMMISSION

To Whom it may concern  
with the Kentucky Public  
Service Commission & Re:  
Water Service Corp NO: 2008-00563  
I am writing in opposition  
to the 50.8% water rate  
increase in my little  
town of Middletown, Ky.

The present state of the  
economy is in "shambles"  
and I don't think that  
the consumer should  
have to take up the slack  
for a mis-managed  
company like ATG -  
(an affiliate of Kentucky  
Water Corp.)

It's funny in a way to  
think that a person  
is going to get ahead  
with the rate of inflation  
Any kind of stimulus  
or tax breaks is taken  
up by increases in  
everything that the consumer  
buys. i.e. - increase

(over)

in our utility bills,  
gas, rent groceries?

We are at the mercy of  
the utility companies, gas co's  
We have to have water  
but a 50.8% increase  
because they paid their  
CEO's too much!! The  
Government just bailed  
out GM this week  
with taxpayer money.  
Come on — it's not  
fair that the CEO's  
got rich on the expense  
of the working man or  
women.

We are in the heart of Appalachia  
let Water service corp. get  
their money somewhere  
else besides us — we  
are already living on tight  
budgets. — let them  
put their CEO's on  
budget to help defuse  
their troubles — we should  
not be the "scap goats"  
please help us —

Sincerely,  
Concerned Citizens Middleboro
