RE: Proposed Tariff Change for Hardin County Water District #1

This letter is in response to the Public Notice for the Proposed Tariff change. I live in a mobile home park and I'm requesting that this doesn't change. I believe the water company should bill for themselves instead of the park owners through a master meter. It's the water company's responsibility and if this change occurs the rent/water bill will increase because of the monthly effort the park has to go through when they bill each resident for water consumption. This has always been the job of the water company and should remain to be their job. I feel that after this they will request the same thing with apartments and so forth making their jobs easier and laying the burden on other parties. It will result in the home owners paying more and the water company getting a break and this is just not right. Please do not make this tariff change and think about the residents and park owners who have to endure this change.

Thank you for your time,
Thomas Thompson
