PUBLIC SERVICE
COMMISSION

Jeb,

2009-00115

We have been petitioned by the residents of far north Hart County for our service and we have attached the petition to this letter. There are over a 100 residents in this area between the boundary line and the county line.

One of the problems for these folks is 911 service. Although they live in Hart County, if they have an emergency they have to call Elizabethtown and it then gets rerouted to Munfordville. This is not a good situation and according to them may have even cost someone their life. They are also complaining vehemently about no provisions of broadband services by their present provider. While we sympathize with these folks and their pleas for broadband services we are bound by the exchange boundary.

At the request of these folks in north Hart County, I am respectfully forwarding their petition presented to South Central Rural Telephone. This petition requests that the Commission consider reallocating the boundary between the current boundary to the county line in north Hart County. The territory in question presently is property of Windstream Communications.

Please reference the attached map that is provided to help the Commission better understand the petitioned area of concern.

A handwritten signature in black ink, appearing to read "Max Phipps".
